Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to POLICY P2 – Green Belt

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
- Impact on rural leisure and tourism ignored.
- Impact on flood control ignored.
- Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
- Impact on biodiversity ignored.
- Impact on natural heritage ignored.
- Impact on water catchment ignored.
- Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
- Impact on rural business (e.g. mineral mining, film making) ignored.
- Impact on natural landmarks and views ignored.
- Harm to public health and wellbeing (physical, psychological) ignored.
- Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
- Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
- Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
- Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
- “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
- Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
- Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
- Ignores most of NPPF 17 stipulations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am a Send Village resident of 25 years and am extremely concerned about the planned developments, not only in Send but also in the surrounding areas. These plans will only serve to destroy the way of life we have enjoyed for so many years. I am also appalled at the underhandedness of the council in the way it has tried to shoehorn the plans in at the last minute.

I therefore object to the local plan but in particular:
I object to Send Village being removed from the Green Belt. Local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it.

Comments/Objections on draft Local Plan

(Ripley, Burnt Common, Send Marsh and Send)

Would you please register my comments/objections on the above as follows:

1 Green Belt Issues

I am most concerned at the proposals for insetting of the above four villages, which as I understand it means removing these areas from the Green Belt.

I wish to register my formal objection to this proposal.

The insetting/removal of these four villages suggests that those areas do not make an important contribution to the openness of the Green Belt. Having referred to paragraphs 89-90 of the National Planning Policy Framework it appears that any new development construction in Green Belt areas will be considered inappropriate unless very special circumstances can be demonstrated. The Planning Authority will have applied this test and I am sure local residents will be interested to hear how this criteria was met.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have read your proposed local plan and particularly the suggestions with regard to East and West Horsley – including Wisley airfield.

I fully understand the need for a steady increase in new housing to meet the demands of a growing population. But your plan seems far too aggressive in its proposal to increase the size of settlement areas such as East Horsley and to effectively take the village out of the green belt. Based on previously declined proposals for Wisley airfield I fail to see how you could find a workable proposal to put a new town on this site without the essential amenities – it would become a strange ghetto.

The Horsleys should contribute to meeting the need for increased housing in the borough. But this should be done in a way that is sensitive to the current environment and without any need to remove green belt ‘status’.

I Object to your local plan as currently proposed for the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the way the Green Belt is to be used for building when these homes seem to be far beyond the need, and the way in which figures have been put forward is dubious and unsupported. To suggest that over 60% of proposed homes should be built on Green Belt land is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5858  Respondent: 10830785 / PE Whatley  Agent:

I object to the potential retraction of the promises repeatedly made at elections to protect the Green Belt. This should go down as one of the greatest crimes of the 21st Century, as it will set a precedent for all other local authorities to build over swathes of the country with no thought or regard for what is being lost forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1258  Respondent: 10830785 / PE Whatley  Agent:

I object to the removal of the industrial area in Tannery Lane for similar reasons (policy 2 paragraph 4.3.15). Access to the site is wholly unsuitable for heavy traffic or large vehicles. The open areas around this site are of immense environmental importance and we owe it to future generations to preserve the Green Belt wherever we possibly can. There are absolutely no exceptional circumstances that could warrant such action, and it is in direct opposition to the views expressed by local residents in the past.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/177  Respondent: 10831201 / Norma Plank  Agent:

I wish to raise my objections to the draft local plan. I itemise the many areas below that I strongly object to:-

1) I object to all erosion of the Green Belt (especially when brown field sites are not exhausted)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the proposal to remove the Horsleys from the Green Belt. The Metropolitan Green Belt has endured for over seventy years and has been the backdrop to the successful evolution of our village throughout this time. To remove it is to reverse over seventy years of wise conservation. I support the need for a proportionate and sensible increase in housing, but this could happen within the constraints of the Green Belt as it has in the past. Such building needs to reflect the existing character of the village and the houses and amenities within it. The practicality is that our village's removal from the Green Belt would mean that building standards will be lowered, and developers will be allowed to squeeze additional housing into completely unsuitable places. The ‘exceptional circumstances’ required before taking this action have not been demonstrated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

It seems to me that you have not listened to the thousands of objections to your proposal to remove the villages of Ripley, Send, Clandon and Wisley from the Green Belt and turn them into towns by overdevelopment. There is no justification for this and no planning for the aftermath of chaos that will occur. The village roads cannot be widened, no traffic study has been carried out, no new doctor's surgeries are planned and no new schools are planned. But you propose to solve 70% of a so called housing need of 13,860 new houses by concentrating only on four villages in the Green Belt without first investigating all brown field sites in and around Guildford. What you have done is to increase the size of developments in Send and restricted objections to these amendments. Given your practice of ignoring objections anyway it seems we live in a dictatorship where the people's wishes are not even considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Last but not least, I object to Green Belt Policy 2 at paragraph 4.3.15 where it is proposed to inset Send Business Park from the Green Belt because: It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation. There is highly restricted vehicular access along Tannery Lane in both directions. Further expansion or development at this location is totally inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I have carefully considered the Proposed Submission Local Plan which Guildford Borough Council (“GBC”) has now published for public consultation. My comments are set out in this letter.

I have strong concerns about the Proposed Submission Local Plan and the evidence and assumptions which support it. In particular, I do not accept the scale of the house building programme which is being proposed by GBC. The target outlined represents a 25% increase in the housing stock of the borough, whilst I note that the Office of National Statistics (“ONS”) projects a population increase of some 15% for Guildford Borough over this same period. I also note that the Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. I fully and unequivocally support this policy. The Green Belt is a national asset which should be treasured; the whole character of Surrey will change over time if GBC allow the degradation of the Green Belt. If everytime there is pressure to build housing, GBC uses the Green Belt as an area for negotiation, the unique character of Surrey will be lost forever and the generations that follow will look at this moment as a trigger point in the decline of Surrey.

Unfortunately GBC appears to be in breach of this same policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt.

I am also concerned that the infrastructure proposals are inadequate even to meet the needs of what is here currently, let alone the proposed developments in the Local Plan.

POLICY P2: Green Belt
Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. Currently development is permitted within the settlement boundary, although this area is still considered to be Green Belt with a particular planning regime being applicable.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015. GBC attributes the need to inset East Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. This East Horsley clearly does. No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come to a rural village like East Horsley and see how the Green Belt has preserved the rural character and openness of this village.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being ‘washed over’ by the Green Belt. Therefore there is no need to change its status. I therefore OBJECT to the proposal to inset East Horsley from the Green Belt and requests that this proposal be dropped from the Local Plan.

Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley
GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance' and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

GBC LOCAL PLAN

I wish to make the following comments;

I object to Effingham being taken out of the Green Belt.

However, if this has to be the case, the boundary proposed in the centre of the village is very weak and a better boundary would be Church Lane and thus keeping Lower Road and the Howard of Effingham School in the Green Belt.

I attach a map showing my proposed changes.

I trust that you will take my comments into consideration.

I object to Send being removed from the Green Belt (Policy P2). The Green Belt land around Send and Send Marsh act as a buffer between Woking and Guildford. This is one of the tenets of The National Planning Policy Framework, namely point 80, which states that one of the purposes of Green Belt land is ‘to prevent neighbouring towns merging into one another’. It is vital to keep this buffer in place, not only for the local community, but because of the great natural beauty of the area.

4. I object that Green Belt is being removed from its Protection.

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). This will result in urban sprawl which is exactly why it was designated Green Belt in the first place. The cavalier approach of this Local Plan to summarily remove the Green Belt because it does not suit is, at best, convenient, and, at worst, criminal. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy. Why cannot the plan develop the existing brownfield site at Burnt Common, originally in the Draft, rather than developing Garlick’s Arch (A43)?

Brown field sites: A part of any local plan should be to use up all brownfield sites first, before any other land for housing is considered. There are areas in the Guildford area where there are unoccupied pieces of land, derelict offices and industrial areas. In Guildford itself the areas around Walnut tree close and Slyfield come to mind but all other areas which need re-generation must be identified and used for housing needs before any other land is considered, particularly green belt land. Developer must be made to use brownfield land and not just proceed with what that see as the cheaper or easier options. I do not feel the changes to the plan have properly addressed this point.

Site A46 at Normandy has been designated as RED ZONE sensitive area by GBC, where development should **not** take place and should remain in the Green Belt.

The proposed development of site A46 would completely urbanise the semi-rural village of Normandy, destroying the open space. It would more than double the number of houses plus all the additions of commercial and other buildings and also the enormity of a very large secondary school - replacing grass with concrete. The whole purpose of Green Belt land is to provide a buffer from increased urbanisation, to provide a living, breathing 'green space'.

I object to the proposed removal of Send Business Park from the Green Belt under Policy 2.

{paragraph 4.3.25} of the Plan.I believe that this policy is will result in yet further commercial development at this site and takes no account of the poor vehicular access in both directions along Tannery Lane or the position of the site in open countryside adjacent to the Wey Navigation.

I am writing to object to the proposed local plan and to express my concerns at the never ending assault on the countryside and Send's local environment. Policy P2 removal of villages from the Green Belt is particularly disturbing and I object most strenuously as it it sends the opposite message to your statement in the recent "about Guildford" publication- "One of the boroughs biggest assets is our significant green belt and major consideration is given to protecting this".

I further object to the proposal to inset Send business park from the Green Belt- Policy 2 para's 4.3.15 as Tannery Lane is highly restricted in either direction for large commercial/industrail vehicles, being in an area of open countryside adjacent to the attractive Wey navigation in the Green Belt.

I have lived in Send since 1970 and increasingly in recent years have felt the need to add my voice to defend the peace and quiet I moved here for. GBC seems to have a predilection to ignore the ideals of the Green Belt and the laws constraints to take due account of inadequate infrastructure of roads, school and medical facilities and ignore the traffic and pollution implications in a disproportionate manner for our area.

I strongly OBJECT to removing Send from the Green Belt, you are just using this to your advantage to allow for more development. The Green Belt around this area is permanently protected by the NPPF which prevents merging settlements! This area contains ancient woodland with trees from the 16th Century. 50% of new homes needed could be built on brownfield sites.

While I recognise that some level of new house building is necessary, I am concerned that the proposed Local Plan vastly overstates the need for both new housing and industrial expansion and does not take account of the limitations of the infrastructure in the Send area. Accordingly:

I object to the removal of Send village from the Green Belt. The inevitable result of this would be extensive development effectively removing the buffer between Guildford and Woking. Amongst the areas lost would be school playing fields and woodland: a great loss of amenity for all residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

With reference to the latest GBC Local Plan, I strongly object to all the proposals noted in the Local Plan now submitted for further development and changes to the Green Belt Boundaries in Send, considering that these are not only significantly different from the previous proposals submitted in 2014 but are both flawed and ill conceived.

I wish to question why the Council consider it necessary to make incursions into current Green Belt areas without first exhausting all available 'Brownfield' sites in the Borough. It is my understanding that Government directives require these sites to be developed as a priority in order that the required housing demand can be satisfied before the need to spoil our beautiful countryside forever.

There are many detailed objections to the particular sites identified (i.e. Garlick's Arch Clockbarn Nursery and Winds Ridge) but my main point is that the development of 'Brownfield' sites is most likely to negate the requirement for these sites to even be considered.

I also object to the lack of clarity given with respect to the derivation of the housing requirement figures. It would appear that the figures have been based on an exaggerated housing need which has resulted in increased numbers from the previously submitted plan, an increase that can only be satisfied by building on Green Belt land.

I therefore reiterate my strongest objection to the Local Plan for Send in its current form and insist that Guildford Borough Council must reconsider the proposals in their entirety.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the removal of Send Business Park from the Green Belt as proposed under Policy P2 (paragraph 4.3.15) of the Plan. I believe that this is the 'thin end of the wedge' that will result in yet further expansion of commercial building at this location which is totally inappropriate given its position within open countryside adjacent to the Wey Navigation and the poor vehicular access in both directions along Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1317  Respondent: 10839265 / S.G. Saxby  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I support the removal from the Local Plan of site A.46 (land to the South of Normandy and North of Flexford) – 1,100 homes and school. The removal of site A47-50 homes (land to the East of the Paddocks Flexford.)

I object to the proposed change that Normandy settlement, Flexford settlement and Walden Cottages should be inset from the Green Belt. There is evidence in past planning appeals APP/Y3615/W/15/3002308, APP/Y3615/A/10/2140630 and APP/Y3615/A/10/2131590 that the land here contributes to the “openness” of the Green Belt.

There is evidence in the sustainability Appraisal para 10.4.7 that the agricultural land between the settlements is of BMV quality, exhibits ‘openness’ and contributes to the rural economy.

The land in and around the settlements of Normandy and Flexford Contributes to views into and from the Surrey Hills AONB (HOGS BACK.)

Policy P2 omits any assessment of the Green Belts value. The Green Belt is not just empty space but is an inhabited working environment that safeguards a certain [illegible word] of natural capital. There is no “acceptable” percentage (in the NPPF or anywhere else) of land that may be removed from the Green Belt.

I object to the changed “insetting” of 15 villages from the Green Belt and at “infilling” 12 of the borough’s Green Belt villages. I am concerned that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside the OAN.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/71  Respondent: 10839393 / F.A. Howell  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy 2 at paragraph 4.3.15

I OBJECT TO POLICY 2 AT PARAGRAPH 4.3.15 because

1) we are not an industrial area
2) Tannery lane (in both directions) is far too small to accommodate large lorries
3) Council has failed to provide a need for self build plots, additional employment floor space or space for travelling show people in this area.

Council has already received over 3000 objections to the Garlick's Arch site proposal from just one small area of Send (namely Send marsh), which on account of the population density is unanimous! When Council rejected the Wisley Airfield proposal unanimously, that had some effect, and likewise so should this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

With reference to Policy P2 of the GBC local Plan I strongly object to the removal of Send from the Green Belt. I believe that this is the 'thin end of the wedge' and will result in yet further erosion of this vital asset to the well being of the people of Surrey in the future.

The latest GBC Local Plan for Send includes a number of changes from the previous version put forward in 2014. I object to the manner with which these additional sites have been included and consider that these significant changes require the full consultation process to be effected not the shortcut procedure under Regulation 19 that the GBC are currently trying to implement.

| I object to the proposal to inset Send Business Park from the Green Belt because:  |
This is an old non-conforming user in an area of outstanding countryside next to the beautiful Wey Navigation.

There is highly restricted vehicle access along Tannery Lane in both directions that would not accommodate any increase in volume or type of traffic.

Any increased expansion or development at this site detracts from the Green Belt and is completely inappropriate.

I object to POLICY P2 – Green Belt

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
- Impact on rural leisure and tourism ignored.
- Impact on flood control ignored.
- Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
• Impact on biodiversity ignored.
• Impact on natural heritage ignored.
• Impact on water catchment ignored.
• Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
• Impact on rural business (e.g. mineral mining, film making) ignored.
• Impact on natural landmarks and views ignored.
• Harm to public health and wellbeing (physical, psychological) ignored.
• Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
• Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
• Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
• Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
• “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
• Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
• Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
• Ignores most of NPPF 17 stipulations.

I would like to express my total objection to all proposals to build on green-field sites in Surrey and elsewhere. There is clearly now great importance in exerting pressure to preserve all wild-life sites and green fields for future generations and building on such sites (even when they are relatively out-of-sight from general passers-by; in essence covert building) must be prevented with utmost attention to detail and fastidiousness.

The principle of protecting these crucial sites, even to the extent of economically disadvantaging the area, is clearly of such extreme importance, that failure to do so amounts to nothing but total dereliction of duty. This view is very typical
of the vast majority of people who live in all parts of the county and elsewhere. It is of utmost importance to everyone that you protect wild-life and farming sites for living creatures and ourselves.

When changes of the scale proposed are so vast it is difficult to comment on specific sites. Please regard this e-mail as an objection to all building proposals affecting wild-life and green field sites.

Green Belt – I strongly object to the removal of the Horsleys and other villages in Guildford Borough from the Green Belt.

The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.
This fundamental foundation of the purpose of Green Belt has been ignored by this plan. If the proposals in this plan are carried out then Green Belt will be **irreversibly** removed and a conurbation created from Bookham and Cobham through to Guildford. This is diametric opposite of the Green Belt’s purpose. This plan is predicated on the assumption that it is acceptable to convert Green Belt to housing. This must be the option of last resort, not the starting point.

Loss of Green Belt land:

Sadiq Khan, new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on greenfield sites in Normandy.)

I live at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] in Ripley I am Stewart Hornblow My youngest son is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and he objects to -

1) all erosion of green belt
2) removal of villages from the green belt
3) disproportionate amount of development in one area of the borough
4) limited consultation period
5) last minute inclusion of new sites with less than 2 weeks to go
6) lack of evidence for housing numbers needed
7) lack of immediate provision needed for new schools
8) lack of any immediate provision for doctors surgery S
9) and development at garlic arch
10) increased traffic that would be cause in which a village such as Ripley already cannot sustain its current demand without long tailback and
11) dangerous size vehicals manoeuvring in roads that has little or no pedestrian path way due to increased traffic
12) lack of parking in the village for the present day users let alone if more were to be housed
13) the use of countryside areas for which the area is so well know to build more properties

I object to the proposal to inset Send Business Park from the Green Belt because it is in an area of outstanding countryside adjacent to the beautiful Wey Navigation and is an inappropriate development in the Green Belt. The narrow country road system connecting Send Business Park to Send, Ripley and Woking is inadequate and will only be made worse by more development of this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14508  Respondent: 10846625 / Frank Drennan  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1.1 I object to Policy P2 “green belt” on the grounds that;

1.2 This policy states, “the general extent of the Green Belt has been retained.” This is completely false.

1.3 The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away.

1.4 Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.
Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of: 

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even fracking)
- Natural beauty, landmarks, open space, rural views and sight lines

Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold.

I object to the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.

This policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.

To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.
Send is a good example of villages that should not be removed from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

- I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt around Send which include:
  - The land behind the schools including playing fields and woodland.
  - The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
  - Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1106  Respondent: 10846625 / Frank Drennan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

I object to the changes to Policy P2 because they have not addressed many of the 32,000 objections made to the 2016 plan.

I object to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a sham.

I object to the proposed change that Send Business Park should be inset from the Green Belt due to the fact that:
- It is effectively a non-conforming user in an area of beautiful countryside adjacent to the beautiful Wey Navigation
- It has restricted access along Tannery Lane
- It should not be given the opportunity for further expansion or development

Policy P2 still completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24 km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.

Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.
It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s
Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included.
More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold.
No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

I object to the statement in the Draft Local Plan under Green Belt Policy P2 (4.3.13) which claims that Send and a further
list of 13 villages are “now inset from the Green Belt”. This statement is false. GBC is proposing to “inset” these village.
No decision has been made by an Inspector, therefore the villages remain in the Green Belt.

I object to the changed “insetting” of 15 villages (including Ripley) from the Green Belt, and at “infilling” 12 of the
borough’s Green Belt villages. Send is a good example of villages that should not be removed from the Green Belt. Send
provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon
development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The
village and the countryside behind the A247 should all be protected.

I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt at Send
which include:

- The land behind the schools including playing fields and woodland.
- The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision
  Engineering.
- Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

I object to the inclusion of Send Business Centre/Tannery Studios Tannery Lane, Send in relation to proposed inset from
the Green Belt because:

• It is effectively an old non-conforming user in an area of outstanding countryside
• It is adjacent to the beautiful Wey Navigation
• There is highly restricted vehicular access along Tannery Lane in both directions
• Further expansion or development at this location detracts from the openness of the Green Belt and is
  inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2135  Respondent: 10847521 / Andrew Procter  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

1.1 I object to the changes to Policy P2 because they have not addressed many of the 32,000 objections made to the
2016 plan.

1.2 I object to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on
the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of
new development will be considered inappropriate and will not be permitted unless very special circumstances can be
demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has
effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a sham.

1.3 I object to the proposed change that Send Business Park should be inset from the Green Belt due to the fact that:
1.4 It is effectively a non-conforming user in an area of beautiful countryside adjacent to the beautiful Wey Navigation.

1.5 It has restricted access along Tannery Lane.

1.6 It should not be given the opportunity for further expansion or development.

1.7 Policy P2 **still completely fails** to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.

1.8 Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.

1.9 It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

1.10 I object to the statement in the Draft Local Plan under Green Belt Policy P2 (4.3.13) which claims that Send and a further list of 13 villages are “**now inset from the Green Belt**”.

1.11 This statement is untrue as GBC is proposing to “inset” these village. No decision has been made by an Inspector, therefore the villages remain in the Green Belt!

1.12 I object to the changed “insetting” of 15 villages (including Ripley) from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages.

1.13 I am deeply disturbed that settlement boundaries are to be hugely extended in many villages (particularly at Send) and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside of the OAN.

1.14 Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.

1.15 Send is a good example of villages that **should not be removed** from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

1.16 I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt at Send which include:

1.17 The land behind the schools including playing fields and woodland.

1.18 The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
1.19  Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

2. I object to not protecting the Green Belt

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield and Garlick’s Arch and the subsequent urban sprawl. The whole beauty and character of the area are the individual villages. There are no exceptional circumstances for these villages being removed, as required by the National Planning Policy.

There is a suitable brownfield site at Burnt Common that should be developed rather than developing Garlick’s Arch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/806  Respondent: 10848705 / John Woodcock  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to all erosion of the Green Belt. It is essential that we contain urban sprawl and there is plenty of evidence that we have considerable ‘brownfield’ land on which to build.

2. I object to any “in-setting” of any villages from the Green Belt, mostly for the same reasons as above, but also because any proposed development should be tested very vigorously against the character of the area and the absolute necessity to keep green spaces between our towns and villages; they preserve quality of life and provide an essential eco-system which promotes peoples’ health and welfare

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy P2 (green belt)

This is an extremely important asset to the public and goes against protecting it. The impact on flooding, natural resources, wildlife, leisure and health has been ignored.
There appears to be an unreasonable amount of development proposed for the green belt in areas of west and east horsley, which in my opinion will do more harm than good.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

National planning policy requires exceptional circumstances to persist for green belt boundaries to be amended. these have not been shown, save for a generic belief that green belt needs to be changed to enable further development in the borough. In most cases there is no justification for boundary changes or insetting, and the Council has erred in its evaluation.

In particular, I refer to Effingham. The planning document states that the village does not contribute to the openness of the green belt and should therefore be inset. This is not supported by evidence, and there are no exceptional circumstances to justify the insetting of the village. In a recent planning inquiry (public inquiry in 2013 relating to land in Church Street, Effingham) Guildford Borough Council argued, and the Inspector held, that the proposed development damaged the openness of the green belt. The same was held in respect of a planning appeal in Effingham Place. Accordingly, on the basis of this evidence, it is clear that the council's assessment is flawed, and Effingham should not be inset.

I have not examined all the circumstances of the villages proposed to be inset, but I contend that the council has failed to demonstrate that in each case exceptional circumstances exist, and/or that they do not contribute to the openness of the Green Belt, and/or that insetting is justified under that National framework.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2285  Respondent: 10850433 / Gwyn Griffiths  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
The plan proposes a significant development of Green Belt land at the disused Wisley Airfield. I object to the proposed development on the basis that it is inappropriate development in the green belt and is unsustainable.

The council has failed to show that it is necessary to develop the Wisley Airfield, contributing to urbanisation sprawl along the A3 in Surrey, destroying the openness of the green belt.

The proposals will destroy the rural nature of local villages, Ockham in particular, but extending to Ripley, East and West Horsley, Cobham and Effingham. It will increase loads on local infrastructure which is already at breaking point: local roads and rail transportation will be overloaded, local schools will have to be enlarged thereby further damaging other sensitive villages and sites in the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I strongly object to the Horsleys being removed from the Green Belt. This is a beautiful area which is peaceful and friendly, although in recent years the traffic through the village has become a problem and localised flooding is becoming worse. The more housing that is built, water has nowhere to go. It seems that GBC has taken little notice of the concerns of residents who are totally aware of the problems we will face if all these houses are built. As mentioned before, for every house built, we can expect two extra cars on our roads. What are you thinking?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Extension of the boundaries of the East and West Horsley settlement area: There is no reasoning provided for these proposed changes and the East and West Horsley village areas inside these boundaries must not be removed from Green Belt protection.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As a resident of West Horsley I wish to register objections to the new Local Plan as follows:

The purpose of green belt is to protect against urban sprawl and retain the character of rural communities like ours. The removal of green belt status and addition of large numbers of houses in the Horsleys would completely change the look and feel of our villages.

The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Exceptional circumstances for removing the Horsleys from the Green Belt have NOT been demonstrated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The proposal to remove East and West Horsley villages from the green belt is hard to understand. It goes in the face of the successful protection which the green belt has given over decades. On principle it should be retained for the benefit of future generations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I find myself having to object again to things the council are trying to put through when precious objections were made.

I object to the following areas of the draft plan.

1. The erosion of the local Green Belt and what is called "in-setting" of any villages from the Green Belt. I live in Ripley, and am objecting to the plan to take Ripley, Send and Clandon out of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the removal of Send from the Green belt because the village and countryside provide a necessary buffer between Guildford and Woking and there are no special circumstances that can be justified for building on the Greenbelt land.

1. POLICY P2. SEND SHOULD NOT BE REMOVED FROM THE GREEN BELT. I strongly object to the removal of the buffer that Send provides between Woking and Guildford. The particularly vulnerable areas of land being taken out of the Green Belt include 1. The land behind the school including playing fields and woodland. 2. The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering. 3. Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

WE OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage.
The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition WE OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.
There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Firstly please confirm receipt of this objection to the proposed Local Plan. As a long standing resident of Send under no circumstances should the Green Belt be encroached by any proposed development. The Green Belt provides local residents with a certain quality of life...that is what I have paid for in the cost of my house and I am not prepared for Guildford Borough Council to take that away from me.

RE: SEND VILLAGE. GREEN BELT INCURSION

It must be wonderful to be a property developer - sitting there with nothing to do except vandalise the Surrey countryside, eagerly perusing your commissioned aerial photographs, greedily peering at open spaces and green bits - totally oblivious to the wonderful fecundity, streams, woodlands and healthy abundance of wildlife there.

The developer sees none of this - just 'business opportunities' where a couple more houses and yet another Tesco Express could be squeezed in ... no conscience, no altruism ... just greed.

In the odd moment of benevolence they salve their consciences by proclaiming they create jobs and provide much-needed housing - which translates to jobs for 3 months and houses that no ordinary person could afford.

A property developer's standing on the social pariah scale is now alongside that of the average MP.

I know quite a few developers .. most of whom are boring, soulless individuals you'd pray you're never stuck in a lift with.
And so here we go again: the annual battle with Guildford Council and their mates - the whittling away of the Green Belt - which was created for a purpose, by people gifted with more wisdom and foresight than the elected guardians we're blessed with now.

I do appreciate your problems on the Council: It can't be easy with the government pouring people into the South East year on year. They care little - after all, many of its members will have their fat pensions and a couple of 'consultancies' to fall back on, leaving some other poor sap to try to sort out the mess they've made.

Viewing your list of proposals on this new Local Plan is very depressing:

Light industry? Travellers Sites? Housing Estates? ..

Are you mad??! You hope to push these proposals through with little or no added infrastructure? Oh, please!

The proposed Garlick's Arch and Tannery Lane developments are of particular concern to me.

What your plans should involve is building roads and services for the villages & communities we have now, not piling yet more straws onto the enervated camel's back.

Thanks to much-vaunted 'Austerity' our infrastructure is grinding to a halt: roads can't be maintained, paths and road signs are completely overgrown, making getting about more of an ordeal with every week that passes.

And I wonder if any of you actually ever venture onto the M25's J 10 via the A3? If you value your life, probably not - it is now increasingly dangerous. Or maybe try to head down the A3 past Guildford? Um, excuse me: WE CAN'T COPE NOW!

It's no use you hoping against hope that the traffic fairy will come along, wave her wand and for your problems to disappear ..

They won't.

Mid Surrey is not some gigantic Monopoly board with bits to be cherry-picked and flogged off to make a fortune - No, it's an example of England at its finest. But won't be if you get your way.

Speaking as one who's rapidly grown to love the place and its inhabitants, it's all too apparent that the good residents of Send and its environs are up in arms and ready to do battle with this intended vandalism ... and frankly, who can blame them?

The developers, who obviously consider themselves 'Oh so clever’ have the resources to pay people to keep their applications coming, then revised application compounding revised application, confident that sooner or later we Plebs will get bored of protesting, thus clearing the way for their ugly, cash-rich developments.

Think again .. We won't
Please add my name to the growing list of objectors..

As recently as last month it was all going so well for the Tories set fair for a thumping Parliamentary majority around the seventy mark, to provide a rock-solid mandate to do whatever they liked for the next five years. But of course fate decreed otherwise; the PM, along with her equally out-of-touch advisers, crushed that dream in 10 minutes flat by alienating millions of core voters.

However, it seems this same detached thinking continues outside Central government - the regions, especially the moneyed ones, still think they can carry on as though the promised landslide had actually happened. It must be wonderful to be a property developer - sitting there with nothing to do except vandalise the Surrey countryside, eagerly perusing your commissioned aerial photographs, greedily peering at open spaces and green bits - totally oblivious to the wonderful fecundity, streams, woodlands and healthy abundance of wildlife there.

The developer sees none of this - just 'business opportunities' where dozens more houses and yet another Tesco Express can be squeezed in ... no conscience, no altruism ... just flat out greed. I would like to object to the removal of Chilworth and Shalford from the green belt for the following reasons:

1. It goes against the Fundamental aim of green belt policy i.e. that is to prevent urban sprawl
2. The transport links are inadequate to cater for the proposed developments.
3. The proposed developments around Old Manor Lane would increase the rate of run-off and the likelyhood of further flooding downstream.

National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy P2: Green Belt

I OBJECT to this policy.

This ignores the Green Belt as a constraint as set out in the NPPF and has weakened the interpretation of exceptional circumstances.

Villages should continue to be washed over by the Green Belt in order to preserve their integrity and character.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Stated Government policy is that areas should only be taken out of the Green Belt in exceptional circumstances and you have not demonstrated that those circumstances apply in the case of the Horsleys. It is accepted that on your planning watch you have permitted some infill development in the main East Horsley village, but south of the A246 there have been no extra dwellings in decades. Indeed, you have previously advised me that the Warren and Rowbarns Way are in an Area of Outstanding Natural Beauty - i.e. the Surrey Hills. In the circumstances, how can you possibly permit a re-designation from AONB status to a planning free-for-all; that would be an act of quite inexcusable planning vandalism?

I wish to lodge my objection to the 2016 local plan for Guildford,

The Green Belt was put in place to

• To check the unrestricted sprawl of large built-up areas;
• To prevent neighbouring towns merging into one another;
• To assist in safeguarding the countryside from encroachment;
• To preserve the setting and special character of historic towns; and
• To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.
• I cannot understand how the draft local plan abides by what the Green belt is meant to be and so I strongly object to what is being proposed
• I object to the building on green belt land altogether (this is against Government stated commitments for Green Belt protection)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the local plan as it does not protect the green belt.

Multiple villages and their surrounding areas will be removed from the green belt, resulting in urban sprawl.

Villages will lose their identities as a result of their sprawl. Ancient Woodland will be destroyed, wildlife will be impacted due to the loss of their natural habitat.

For instance at the site of Waterloo Farm there are regular sightings of Deer, Peacocks and Rabbits along with a variety of birds.

The plan should concentrate solely on brownfield sites, leaving the current green belt intact.

**I object to Policy P2 green belt**

This policy states, “the general extent of the Green Belt has been retained.” This is completely false.

The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away.

Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.

Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even fracking)
- Natural beauty, landmarks, open space, rural views and sight lines
- Benefits to public health and well being, physical and psychological (as well expressed in the NPPF)

As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included.
More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

I object to the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.

To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Send is a good example of villages that should not be removed from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt around Send which include:

1. The land behind the schools including playing fields and woodland.
2. The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
3. Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

I object to the proposal to inset Send Business Park from the Green Belt because:

- This is an old non-conforming user in an area of outstanding countryside next to the beautiful Wey Navigation
- There is highly restricted vehicle access along Tannery Lane in both directions that would not accommodate any increase in volume or type of traffic
- Any increased expansion or development at this site detracts from the Green Belt and is completely inappropriate

GREENBELT AND BROWNFIELD

I object to the the fact that 70% of the building proposed in this Local Plan is in the Greenbelt and strung along the A3 where it will not only remove valuable countryside forever but will destroy the openness of the Greenbelt and effectively join up town and villages as well as creating impossible traffic congestion on the A3 and local roads.

I object the relatively small amount of development for Guildford Town center and the complete failure of GBC to identify and promote sufficient brownfield sites within the urban area, where much more is possible. It almost completely ignores the proviso of 'brownfield first'. Walnut Tree Close, which represents a very real opportunity for housing provision has mysteriously become 'high flood risk' in this plan despite the fact that it is already built upon and new buildings continue to be constructed there. There are many ways to mitigate flood risk. It is interesting that this risk does not seem to be a bar to proposed rural sites, which flood regularly.

I object to GBC using taxpayer's money to buy consultancy, which continually fails to meet their objectives. The station development, another big opportunity for housing is constrained by very precise size and height requirements, which make it difficult for imaginative planning to apply. More imaginative approaches to the issues could achieve better results.

The concentration on retail in the town centre is a further restriction on housing provision. Guildford has adequate retail provision and there is no big demand for more. Retail is less and less needed as so much shopping is now done on line and this trend will continue. If Guildford wants more retail it would be wise to provide housing first and the demand for retail would follow. As it is, pushing development into the countryside will hugely increase external traffic coming to the centre and exacerbate the already congested access problems. Under this circumstance alone retail is likely to fail.

I object to the fact that this plan will fail to deliver anywhere near enough 'affordable housing' despite the promotional exercise on the GBC website where key workers talk of the benefits of the plan. This sort of PR, again at tax payers
expense, is highly misleading. The lack of building in the town centre where key workers are most needed and access to work and public transport is available is an indictment of the intent. Guildford Borough is a commuting area and over building in the countryside will only create more commuters. Moreover this housing will not be 'affordable'. These will be executive homes and will be expensive.

SEND

I object to all the proposals for development in Send on the grounds that none were included in the 2014 draft Local Plan and that these fundamental changes and last minute inclusions have not undergone proper consultation.

I object to the removal of Send and other villages from the Greenbelt. Send specifically and in conjunction with development at Gosden Hill is in the front line as a link village between Guildford and Woking. This plan to infill Greenbelt land will effectively join up the towns thus creating exactly the type of urban sprawl the Greenbelt was created to avoid.

DEVELOPMENTS AT WISLEY, GOSDEN HILL AND BLACKWELL FARM

I object to the proposed developments for 2,000 homes at Wisley,

I object to the proposed development of 2,000 homes at Gosden Hill

I object to the development of 1,850 homes at Blackwell Farm.

These numbers are excessive. If allowed to proceed these developments will destroy Greenbelt and farmland and encroach on AONB's and SSCI's and make a mockery of Greenbelt legislation and pledges from Conservative ministers and councillors that they will 'protect the Greenbelt'.

THE NEED TO APPLY CONSTRAINTS

Ministerial guidance in relation to building on the Green Belt is clear:

1. “the single issue of unmet need - is unlikely to outweigh the harm to the Green Belt and other harm to constitute the
“very special circumstances” justifying inappropriate development in the Green Belt” - Nick Boles to Sir Paul Beresford
MP 7th February 2014.

2. “we were always very clear that we would maintain key protections for the countryside, and, in particular, for the
Green Belt. The Framework makes it clear that a Green Belt boundary may be altered only in exceptional circumstances
and reiterates the importance and permanence of the Green Belt” – Nick Boles to Sir Michael Pitt, Planning Inspectorate
3rd March 2014.

3. “Planning Guidance, updated in March 2014, also states that unmet housing need is unlikely to outweigh the harm to
the Green Belt to constitute the very special circumstances justifying inappropriate development within the Green Belt” –
Nick Boles to Sir Paul Beresford MP 18th June 2014

70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government
planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law
make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to
adjust boundaries.

Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical
constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and
medical requirements).
Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 693 per annum to 500.

In view of the comments above it would appear logical to apply CONSTRAINTS in line with government policy to a corrected OAN of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council.

This would result in a more acceptable and practically achievable HOUSING TARGET of 250 homes per annum which over a 20-year period would be 5,000 homes. All of these homes could be built in the existing urban brownfield areas of the borough and would in part satisfy the 20,000 objections made by residents to the 2014 draft plan and also relieve the additional problems of inadequate infrastructure.

It would also mean that there is currently 8.5 years supply of housing (2131/250) which is made up of existing permissions granted (1,518) and completions made (613) during 2013/2015. (Monitoring Report by GBC 2015)

The Brexit vote may have strengthened government policy further. Theresa May, the new prime minister, announced on 11 July that she is personally committed to protecting the Green Belt once she takes office.

Whilst I have many significant objections to the GBC Local Plan I applaud the policy statement by GBC in their Monitoring Report, “We will continue to monitor the use of previously developed land, and continue to identify as many opportunities as possible for redevelopment of previously developed land.” I believe it will be to the benefit of all residents if GBC can apply themselves vigorously to this endeavour in order to protect the Green Belt.

POLICY P2 GREEN BELT

I object to Policy P2 green belt

This policy states, “the general extent of the Green Belt has been retained.” This is a misleading statement.

The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. Once gone it is gone forever. It is not the Council’s to give away.

Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.
Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

1. Agricultural production
2. Rural leisure and tourism amenities
3. Water catchment
4. Flood control
5. Biodiversity
6. Natural heritage
7. A carbon sink for air pollution
8. Room for public facilities such as parks and burial grounds
9. Profitable film locations (e.g. Shere)
10. Future economic potential such as mineral extraction (even fracking)
11. Natural beauty, landmarks, open space, rural views and sight lines
12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold.

I object to the “insetting” of 14 villages from the Green Belt. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.

To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead.

I object to the removal of over 400 hectares of Green Belt land in and around Blackwell Farm to facilitate further development of Surrey Research Park and for 1800 homes. Over 60 hectares were removed from Green Belt 12 years ago for the same developer (Surrey University) who has yet to fulfill their planning obligations. This valuable land has been squandered with over 17 acres of surface car parking and as one of the key features of Green belt is its 'permanence' this second request for yet more Green Belt land to be released in such a short space of time, with all the outstanding issues that remain makes this all the more objectionable.

Furthermore I object on grounds of the impact this development will have in terms of congestion on our highways, these issues have been highlighted under ‘infrastructure’.

The Surrey Hills are an Area of Outstanding Natural Beauty and you state clearly that you will continue to protect the Metropolitan Green Belt and yet the majority of this excessive development proposed is on green belt. How can you possibly reconcile these two conflicting issues? There is a certain lack of honesty here. I object to the plan on these grounds as well.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I object to the plan to build houses in the green belt. How can you state that you will protect the green belt when you are proposing to build so many houses in the green belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I strongly object to the GBC local plan on the following points. There is no good reason to remove the Horsley,s from the Green Belt.

No Green Belt land should be released for development around the Horsley,s or Ockham Wisley Airfield as to do this would lead to a breakdown of this rural area of Surrey in the future.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---
The document contains three separate comments, each discussing concerns about the proposed changes to the Green Belt and specific policies within it. The comments are as follows:

**Comment ID: pslp171/856  Respondent: 10861217 / Lesley Mantell  Agent:**

- **Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
- **Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to Policy 2 at paragraph 4.3.17 because Tannery lane is narrow and completely unsuitable for lorry access with many near missed collisions with cars, lorries and cyclists for gods sake this is a small village, what is it going to take...someone to die!!

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**Comment ID: pslp171/1623  Respondent: 10861441 / Peter Read  Agent:**

- **Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
- **Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I OBJECT to the removal from the Green Belt of homes in Guildford Road, northern end of Glaziers Lane, Flexford, Walden Cottages & Palm House Nurseries traveller site.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**Comment ID: pslp171/1618  Respondent: 10861569 / Christine Read  Agent:**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/5019  **Respondent:** 10864353 / Eildert Jan Panman  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I believe that the available brownfield land in Guildford town should be used to provide high density homes for the many people who already work in Guildford and support it while being unable to live in it. This land should not be used for further commercial development which would employ yet more people who could not live in Guildford and would have to commute there. GBC has chosen this path with the consequence that 65% of its new homes would be built on land currently on the Green Belt, despite the majority Conservatives promising before the election that the Green Belt would be safe with them. Therefore I object to Policy P2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/5020  **Respondent:** 10864353 / Eildert Jan Panman  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy P2 Para 4.3.13 proposes that East Horsley be inset from the Green Belt. I object to this. East Horsley is a rural village with narrow, winding, tree-lined lanes. Houses are mostly detached with large gardens. Its character has been preserved in the Green Belt without preventing new housing being built (149 new homes in the village between 2000 and 2015).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPP16/5022  **Respondent:** 10864353 / Eildert Jan Panman  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposals in Policy P2 para 4.3.16 to change the settlement boundaries of East and West Horsley. I object to Policy A39 which proposes to remove five hectares of land from the Green Belt by moving the settlement boundary from its natural course along the deep ditch behind the houses on the west side of Ockham Road North to the eastern boundary of Lollesworth Wood.

I object to the settlement boundary being moved to take Kingston Meadows out of the Green Belt. This open space is the chief recreation space for the Horsleys, used daily for sports, walking, training and socialising and regularly for big community events like the recent Queen's Birthday Party. It is integral to the physical and social wellbeing of the area and must stay available to the community.
I object to Infrastructure Policy I2 and 13 because they are inadequate to the needs of housing expansion in the Horsleys. The local lanes are narrow and winding, poorly drained and lit with narrow or no pavements. Ockham Road North and South is too narrow for the ever increasing number of enormous trucks using it and has the constraint of the narrow, arched railway bridge that regularly suffers vehicle strikes. The Medical Centre runs to capacity and so do local schools. The station car parks are full every day.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1233  Respondent: 10866305 / Christine Reeves  Agent:
I object to the latest plan to remove our greenbelt for development. I was going to highlight all my concerns but after seeing the Ripley action groups website their specific points say it all.

I do not understand why councils/government do not look to build more towns well away from existing villages/towns as they did years ago with Milton Keynes. Building within existing villages totally over runs them and there are never amenities put in place to cope with schooling, doctors surgeries and traffic management. If there is an incident on either the A3 or the M25 it becomes totally gridlocked in Send Marsh/Send/Ripley as all the A3 traffic comes off and through Ripley.

I OBJECT STRONGLY

1. Not protecting the Green Belt
   I object to the proposals to remove Ripley, Send and Clandon from the Greenbelt. There are no special circumstances to do this. Once taken the green belt is lost forever.

2. Disproportionate size of sites in relation to rural locations
   I object to the allocation of land to the strategic sites of Wisley Airfield, Garlicks Arch (Ripley/Send border) and Gosden Hill (Clandon). The proposed development of these sites will have a disproportionate impact on the surrounding local villages. They will have a permanent impact on each of these communities.

3. Unbalanced allocation of development in one area of the Borough
   Between the M25 and Burpham, a distance of only about 5 miles it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.

   I object to the development of the strategic sites due to A3 and M25 already being at capacity during peak hours. Highways England has no plans to look at improving the A3 before 2020. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

5. Congestion on the local village roads and lanes
   Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. I object to further development which will cause greater congestion in and around our villages.

6. Unsuitability of our local roads for heavy vehicles and more traffic
   Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

7. Poor air quality concerns
   Further congestion, particularly in built up residential areas will only lead to greater levels of air pollution. I object to further development, which will result a fall in the air quality.
8. Lack of proper infrastructure planning for sites
   I object to the lack of planning and implementation of infrastructure. For example at Garlick’s Arch. Without
   improvements to the infrastructure prior to development, the existing residents’ quality of life will significantly
deteriorate in many ways. How will the local services such as doctors and schools cope?

9. Lack of Utilities Capacity
   Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network
   and sewers. I object to the development of Garlick’s Arch on the ground that there is little capacity in these
   networks.

10. Sites being planned in unsustainable locations
   Many of the strategic sites e.g. Wisley Airfield and Garlick’s Arch, are in unsustainable locations. They do not
   benefit from railway stations within easy walking distance and bus services across rural villages are forever
   reducing. Residents will have few options, but to be reliant on motor vehicles. I object on the grounds that these
   sites are not sustainable.

11. Parking issues in local villages caused by larger population
   Many of the affected villages, such as Ripley, already suffer from parking problems. Further development
   around these villages will only result in more traffic and more parking problems. To which I object.

12. Local healthcare facilities will be overwhelmed
   Without proper planning and a commitment to fund new healthcare facilities, existing services such as the
   Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
   already at capacity and suffering from funding cuts or freezes. I object due to the further stress it will put upon
   existing health services.

13. Local policing facilities will be overwhelmed
   Police services are seeing funding reduced. The development of the likes of Garlick’s Arch and Wisley Airfield
   will stretch the police services further and I object.

14. Local social welfare facilities will be overwhelmed

15. Local shops/restaurant facilities will be overwhelmed

16. No protection of heritage assets

17. No protection of the environment

18. 1 Overdevelopment of sites

19. Not meeting the needs of local communities

20. Insufficient affordable housing

21. Poor quality of layout and housing design

22. Insufficient consideration of SPA, SSI and Conservation Area issues

23. Lack of proper cycle lanes on local roads

24. Lack of proper pedestrian footpaths on local roads

25. Current SHMA figure of 693 p.a. too high

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.

2. I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

As a resident of East Horsley I write to object to your proposal to remove the villages of East and West Horsley from the Green Belt.

If the Borough Council had set out with the intention to destroy the character of East and West Horsley, it could not have chosen a better route than to remove the villages from the Metropolitan Green Belt.

Paragraph 86 of the National Planning Policy Framework states: “If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt.”

The open character of East and West Horsley self-evidently does make an important contribution to the openness of the Green Belt. And therefore these villages must remain in the Green Belt.

Furthermore, paragraph 83 of the NPPF states that “once established, Green Belt boundaries should only be altered in exceptional circumstances”. I do not accept that your forecasts of future housing needs in the Borough, which are themselves suspect, constitute “exceptional circumstances”. Indeed, it is apparent that ministerial guidance (for example the written ministerial statement by Brandon Lewis, Parliamentary Under Secretary of State for Communities and Local Government, on 17 February 2014) supports this view.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• I object to Send and the surrounding area being taken out of the Green Belt. It was meant to be a permanent requirement and no justifiable reason has been identified as to why this should not be continued. The Green Belt in Send stop stops Woking and Guildford becoming a conurbation
• I object to Send and the surrounding area being taken out of the Green Belt because local councillors and central government were elected in 2015 on the clear promise of protecting the Green Belt and local councillors, most
of them from the Conservative Party, are in clear breach of their election promise and going against what their own party in central government want.

- I object to Send and the surrounding area being taken out of the Green Belt because, regardless of the proposed development in the local plan, taking the area out of Green Belt will give carte blanche for development in future

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Finally I object to the large scale removal of green belt area which appears to be a back door approach to further development without considering the impacts specifically for the proposed development at the time.

I OBJECT TO THE 2016 DRAFT LOCAL PLAN

- I object to any erosion of the Green Belt. The Green Belt exists for a reason - to protect the countryside. Once the Green Belt has been lost, it is gone forever
- I object to any 'in-setting' (i.e. removal) of any villages from the Green Belt

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I also object to the erosion of the green belt and the proposal to remove the Horsleys from it. The exceptional circumstances required to do so have not been adequately shown. The primary school is full and there is no specific plan to deal with the effect on that. The roads are already in need of constant maintenance from usage, pot holes, problems with flooding causing erosion of the road surface and more housing and increasing the population will not only put excessive pressure on our roads, schools, sewage and water systems but also increase pollution. It will erode the special...
characteristics of the Lovelace villages and we must protect and respect their proximity to National Trust Properties and land, to West Horsley Place (of historic interest) and to Horsley Towers and maintain the beautiful countryside and biodiversity of the nature living in it.

I also support the views of the Horsley Countryside Preservation Society and I object to the local plan for the reasons stated above. The proposals for 593 houses in the Horsleys, the creation of Wisley Village, development around Ripley, Ockham etc would seriously impact the current residents lives and is an area which should remain protected by the green belt for future generations because of its openness and historical value.

I am writing to you to make my strong objections known to the latest planning proposals that will destroy the quality of life for my family and others living in Send and Ripley. Over the last months and even years, I am stunned at the level of development that is being proposed by the very people who are meant to represent the lives and families in their boroughs. I will make my latest objections clear one by one.

Firstly, I object to Send and Ripley being removed from the Green Belt. Whilst I am sure that our villages being in the greenbelt is very tiresome for local planners who otherwise have to stand up to central government, not to mention developers offering money to build extraordinary levels of housing in our local communities, the green belt’s purpose was intended to be permanent and there is absolutely no justification for abandoning it. Quality of life for those already living in the greenbelt will be destroyed and the levels and density of housing will create the kind of unrest that has been seen time and time again when excessive development is victorious over sensible levels of planning with adequate investment in supporting facilities. I am sure that local councillors don’t need reminding that they are elected to represent their local constituents, of which they are doing a very poor job. Clear election promises have been broken. Have those running the borough lost all sight of their role and purpose?

1. **I object to Policy P2.** It is wrong in principle to remove Send from the Green Belt. The Send area provides a rural buffer separating the major urban areas of Guildford and Woking. Removal of Send from the Green Belt risks effectively linking Guildford to Woking through a virtually complete developed strip through Send and thus effectively turning them into a single huge conurbation of the type we already see further west in the Farnborough/Aldershot/Ash area. **I object to Policy A25 (Gosden Hill Farm) for this reason:** stretching along the A3 from Burpham/Merrow to a point well beyond the end of Potters Lane in Send, it is the first step in this process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to object in the strongest terms to the building on green belt land in the area of Send, Ripley, Send Marsh, Burnt Common and the Clandons.

I object strongly to the changes in the Green Belt boundaries, This is not justified.

All the Green Belt sites locally meet the five purposes of Green Belt inclusion.

The Green Belt serves five purposes:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land

Taking Send Business Park out of the green belt completely.

- The Send Business Park on Tannery Lane has been to all intents and purposes a non-conforming user in an area of natural beauty adjacent to the river Wey navigation. To extend this use will change the very nature and fabric of the area.
- The narrow road which allows access to the existing industrial site is already an issue for the community and to extend the site will cause traffic and snarl ups on an already heavily used main road through Send. A road that is used by school children to access their education, both by walking and by buses to schools outside the village. Making an even earlier start for the buses to get the children to school on time through the rush hour traffic.
- Another very important consideration to take in to account is the destruction of the openness of this area, due to the Green Belt protection. In my view a wanton dismantling of an important environment that we, as residents and members of this community, treasure.

Please consider very carefully before you irreparably destroy this area for reasons that don't adhere to the values and lives that we live.

This would be a very detrimental leaving both the Horsleys exposed to the spread of urbanization from all sides. The two distinct areas of West and East Horsley would lose their separate identities and merge with each other, and the creeping tide of development would engulf from Effingham, and Bookham, and, if it were to go ahead, the new proposed development of over 2000 houses in Ockham. The green belt must not be removed from the Horsleys and the ‘exceptional circumstances’ that are required to be shown before taking this drastic action have not been demonstrated. The Horsleys lie adjacent to the area of the Sheepleas, a designated Area of Natural Beauty, Site of Special Scientific Interest, and Local Nature Reserve. To allow unchecked development to the south of this beautiful and special place should removal of the green belt be proposed, would be truly sad. The area is well loved by visitors from far and wide, not just from the local area, who come to enjoy the natural beauty of these ancient woodlands, and undisturbed meadows. But the other areas of more ordinary green space, the fields, the hedges, the patches of woodland, the wildlife corridors, are all very special, and deserve our protection. The protection of our fragile environment must be the number one consideration here. Once it’s gone it’s lost forever. Surrey is a under ambush from the creeping tide of urbanisation probably more than any other county in the country and we need to make firm decisions regarding it’s safeguarding NOW.

To extend the boundaries into the village settlement, is just another sneaky way to allow more land to become available for development, and again will increase the size of our two villages to ridiculous proportions, bearing in mind the lack of
infrastructure. No sound reasons have been given as to the actual reason for doing this, apart from making it much easier for future development to get through. This needs to be addressed further.

My concerns regarding the plan are as follows:

• Why are you planning to build on the green belt when not all brownfield areas have been utilised and other less contentious areas are available for development? Losing the green belt means this land is lost for ever and opens the door to never ending expansion. How long will it be before a retail park is built on the outskirts of the village?

1. I object to Ripley and Send being removed from the Green Belt. This area of Green Belt prevents the joining up of Guildford and Woking and is against the principles agreed by local councillors and central government to protect the Green Belt. The rash of new development being now discussed would just be the beginning.

Policy P2: Green Belt

Policy P2 states that: “We will continue to protect the Metropolitan Green Belt.” However, through the housing policies set out in the Document, GBC appears to be in breach of this policy through the housing policies. **Approx. 65% of the developments** proposed by GBC are to be built on land currently within the Metropolitan Green Belt and there appears to be little attempt to reduce housing delivery in order to take account of this.

**Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt**
Policy P2 proposes that East Horsley should be inset from the Green Belt. East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving the rural character and openness of this village, and this is a key factor in attracting people to relocate to the village, often from the built up areas of South West London. By train, it remains a commutable distance to London, and its rural setting is a key factor in attracting people looking to relocate. Development on the Green Belt would undoubtedly erode the attractiveness and appeal of East Horsley.

The Green Belt has existed for many decades, with good purpose and great success, and I do not believe there is evidence that this situation should be reversed at this time.

I object to the proposal to inset East Horsley from the Green Belt and request that this proposal is removed from the Local Plan.

Agent: Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I Object to the proposal to inset Send Business Park from the Green Belt. Its in the greenbelt, clear and simple. Coming up with sneaky ways to circumnavigate protection for the Green belt seems to be GBC's plan to force through development which will cause long lasting devastation to the local villages and all ton meet some quota someone has made up. GBC should be defending us from this short sighted approach, protecting the green belt for us and for future generations and standing up for us. There are so many reasons this should not proceed. I am not sure how many times we can mention that Tannery Lane is a small rural lane with poor access and it simply cannot accommodate more traffic. Send and surrounding villages deal with a lot of traffic and to suggest adding more by finding a way to get this out of the greenbelt (despite the fact its clearly within and surrounded by greenbelt) is unacceptable. Its the thin edge of the wedge and you know it... you start with this and then it simply opens up the option for further development. GBC needs to step up and stop ANY intrusion or impact to the greenbelt.

Please share with the planning inspector.

I truly hope you do listen to the objections, to the locals and the overwhelming concern for the impact to our villages and the green belt. The area cannot take the level of development you are proposing and there is simply not a need either. Stop this and put these plans to death. Do your jobs and protect the local area.

It is simply astonishing that the Council is considering building new housing in the Green Belt when there is so much unused brown field land in the Borough that could be used for housing. There are no “exceptional circumstances” to justify changes to the Green Belt and I can only assume that recommendations to do so are being determined by developers’ preferences in terms of where they can make the most profit.

I object in the strongest possible way to the Policy 2 at paragraph 4.3.15 change

I object to the proposal to inset Send Business Park from the Green Belt because

- It is non-confirming user in an area of outstanding countryside directly next to the beautiful Wey Navigation.
- There is vehicular restriction along Tannery Lane in both directions
- Further development will impact the Green Belt and the openness of the area
- Further development will impact the character / heritage of the village
- Further development will lead to increased traffic in the area, an area that is already severely congested
- Further development will impact flora and fauna in the Green Belt
- Further development will increase noise levels in the local area

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Destruction of the Green Belt - I OBJECT

The ruling party on GBC has acted dishonestly and dishonourably over the Green Belt. Having promoted its protection at every election for decades and made the same pledge last year, it now claims it has ‘listened’ to the people of Guildford, yet produces a plan barely different from the

2014 version but which includes widespread development - TWO-THIRDS of which is on Green Belt land. This is contrary to their own policies, those of central Government and those of the NPPF. The Council even has the gall to include in its Plan the sentence: ‘We will continue to protect the Green Belt’!

The new Plan also includes removing about 15 villages in the borough from the Green Belt and changing the Green Belt boundaries. There is no justification for this except to facilitate future development. Removing Green Belt status from villages will leave them vulnerable to excessive development and result in the merging of villages causing an ‘urban’ sprawl, exactly the outcome the Green Belt was designed to protect.

At the last General Election, the Tories’ manifesto promised to protect the Green Belt and to retain the rules governing it. These state that development can only be allowed on Green Belt land in exceptional circumstances and that housing need does not count as sufficient reason. They also say that Green Belt boundaries cannot be changed or moved, again except in exceptional circumstances. GBC have not given a single reason why there are special circumstances for sacrificing so much Green Belt land. Why do they think that the rules do not apply to GBC, especially when only a few years ago they made a legal challenge to protect the borough’s Green Belt?

The Plan’s totally unacceptable assault on the Green Belt will, in effect, destroy the concept of protection throughout the borough and beyond. It must be resisted if we are to retain the sort of countryside that the British know and love - and want retained.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
2. One of the most glaring errors in the Plan is the total disregard for planning constraints, in particular the Green Belt. This is a matter of major concern to Guildford residents, as shown in the responses to the earlier versions of the Plan.

a) Guildford Conservatives have acted shamefully and undemocratically, deliberately lying to the Guildford electorate in order to retain power and proceed with their development-led Plan. In the 2015 local elections, they produced campaign material making vows and pledges to ‘save the Green Belt’, yet as soon as they were returned, they produced the then new version of the Local Plan which envisaged nearly two-thirds of all proposed development on Green Belt land. It is utterly disgraceful. Even now, after a consultation which saw the Council again lambasted for its proposed destruction of the Green Belt, this latest version proposes development of nearly 60% of new housing on Green Belt land.

b) Earlier this year, the Communities Secretary described Green Belt land as ‘sacrosanct’. The then housing minister also used the phrase and added in a television interview: ‘There is no need to build on large tracts of Green Belt land’. Why is it, then, that Guildford Conservatives have turned a deaf ear? And why is it that trust in the Conservatives is at an all-time low?

c) There is no justification for removing the Horsleys and other villages from the Green Belt. The Horsleys, in particular, represent a Green Belt line of defence against further outward development outside the M25. If these and the other development proposals are allowed, there will be almost continuous development from outer London all the way to Guildford, Woking and even beyond. The removal of the Horsleys from the Green Belt will increase development, destroy openness and result in the loss of character and diversity. Moreover, the proposed Green Belt boundary changes in East Horsley will result in similar losses, while increasing the settlement area by an unacceptable 37%.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy P2 - Green Belt

I object – to the proposed insetting of villages from the Green Belt, and the green light given to infilling. This means to villages are open to development as well as the allocated sites. Green Belt protection is national policy – its protection was strongly promoted by national political leaders in the 2015 General Election and by most candidates, including those of the majority party in Guildford, in the 2015 Local Elections.

Appeal case law has shown that even if housing need does exist, that does not automatically over-ride the protection accorded by the Green Belt legislation.

Guildford B.C. claims that less than 2% of Green Belt will be lost, but factoring in the insetting of villages, the figure appears to be nearer 6%.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy P2, Green Belt

I OBJECT to the statement 4.3.15 which states that 14 villages are ‘now inset from the Green Belt’ – factually untrue, as no decision has been made. These villages are at present actually in the Green Belt.

I OBJECT to the proposal to remove Send Business Park from the green belt. Tannery Lane is narrow – single track in places – in both directions. The lane lacks pavements. There is already planning permission for a marina and it will be dangerous to stress the road further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Rectify the inaccuracy of the text.

Withdraw the proposal to remove Send Business Park from the Green Belt.

I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, in addition to Wisley Airfield (site A35) and Garlicks Arch (site A43)

There are no exceptional circumstances (as required by the National Planning Policy) for these villages and sites being removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1) The exceptional circumstances required to take the Horsleys out of the Green Belt do not appear to have been proved. The Green Belt is the most valuable protection we all have to prevent uncontrolled urban sprawl and MUST not be given up lightly.
2) Whilst there is clearly unfulfilled Housing Need in the area which must be addressed it is not in itself a Special Circumstance needed to upset the Green Belt and the Housing needs requirement shown seems to be arbitrary and unproven.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13670  Respondent: 10877153 / Carol Ann Cullen  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the proposal to remove the Horsleys from the Green Belt. I do not agree that the exceptional circumstances required before taking this action have been demonstrated. I am alarmed that 65% of new houses are to be built on land that is currently in the Green Belt. It is imperative that Green Belt Land is preserved.

I OBJECT to the extension of the boundaries of the settlement areas of the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/7843  Respondent: 10877217 / D E Cooper  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We object to the removal of Effingham Village from the Green Belt.
We object to the removal of the surrounding villages of East Horsley, West Horsley, Ripley and Send from the Green Belt.

We firmly believe that the Green Belt needs to be protected. There may be parts of the Green Belt where it may be appropriate for the Parish Councils to consider developing, but this should be the exception rather than the general rule. Removing in toto all these villages from the Green Belt means a loss of habitat for wildlife, loss of wildlife corridors, and the loss of trees whose leaves absorb pollution. We already contend with major roads such as the A3, the M25 and an increasing amount of heavy and light vehicular traffic on our roads, so it is vital that our ‘green lungs’ are protected.

The Parish Councils are best placed to decide where small housing developments are appropriate and any total loss of Green Belt status could open the doors to wholesale, unwanted and unsustainable development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3693  Respondent: 10877313 / Millie Lipscombe  Agent:
I previously emailed you on 21 Sept 2014 with my objections to the draft Local Plan covering East & West Horsley and Ockham. As I understand that my previous objections will not be taken into account, I am therefore repeating my objections in this email below. In addition, to my previous objections, I wish to make **Additional Points** and these follow on after my **Original Points**.

**Original Points**

- The removal of East & West Horsley and Ockham from the green belt is just not tenable. You have not demonstrated the exceptional circumstances why this action is necessary.

You have not given good reasons for the proposed extension of the boundaries of the settlement areas of both East & West Horsley.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

- Why is there not more development made of brownfield sites instead of developing greenbelt sites?

In addition, now that we have had a referendum and Brexit is to happen, we should not be destroying the countryside when there is no longer the same unproven anticipated housing requirements and at such a frenetic pace at that.

I object to all erosion of the green belt.

I object to any removal of villages from the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.

I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I OBJECT to the failure of the proposed plan to adequately protect the Green Belt. The Green Belt is not being protected. Some 65% of planned development is on Green Belt, and this is in breach of the statement in the Local Plan that “We will continue to protect the Metropolitan Green Belt”.

2. I OBJECT to the proposal to inset East Horsley from the Green Belt. East Horsley is in a rural location and has the look and feel of a rural village. The proposal to inset East Horsley from the Green Belt will be detrimental to the rural character of the village and should be dropped.

3. I OBJECT to the proposal to remove Fangate Manor in East Horsley from the Green Belt and include it within the Settlement Boundary. There are no exceptional Planning circumstances to justify removing Fangate Manor from the Green Belt, and changing the Settlement Boundary does not in any way enhance the defensible nature of the Settlement Boundary. It merely involves moving the boundary from one hedgerow to another, but leads to the loss of Green Belt, agricultural land and wildlife habitat.

**Objections to Guildford Borough Proposed Submission Local Plan June 2016**

I object most strongly to the Guildford Borough Proposed Submission Local Plan (June 2016)

I list below the main reasons for my objection

1. **I object to the not protecting the Green Belt (Policy P2)**

I strongly object to removing the villages of Ripley, Clandon and Send from the Green Belt.

In addition the sites of Wisley Airfield and Garlicks Arch must not be removed as their development would wreck the local area creating an urban rather than a green environment. As required by the National Planning Policy there are no exceptional circumstances for the above sites being removed from the Green Belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Government gave a clear election promise to protect the Green Belt. The current proposals renege on those promises.

There are no special circumstances to justify Send losing its Green Belt status; it acts as a buffer to separate Guildford from Woking and therefore it is essential that its Green Belt status be retained.

1. The Green Belt is not something that can be taken away by unrealistic Government targets; greedy property developers or a spineless Borough Council who prefers to develop in the areas that they believe will give them the least resistance.

I object to Send being removed from the Green Belt. The Green Belt was intended to be permanent, as required by the National Planning Policy Framework, and I am not aware of any special or extenuating circumstances which justify abandoning it. There was a clear election promise by local councilors & central government to protect the Green Belt and the he current proposals renege on those promises.
1. Send’s Green Belt acts as a buffer to separate Guildford from Woking it is essential that its Green Belt status be retained. If this is lost Developers will be quick to take advantage and there will be nothing to stop them.

I OBJECT to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent, as required by the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send’s Green Belt provides an essential buffer stopping Woking and Guildford becoming one large conurbation. Local councillors and central government gave a clear election promise to protect the Green Belt and this plan reneges upon that election promise. Developers will be quick to take advantage of the removal of Send from the Green Belt and then there will be nothing to stop further development.

I object to Policy 2 at paragraph 4.3.15. I do not think Send Business Park should be inset from greenbelt land. It is in a beautiful quiet rural lane in an area of outstanding natural beauty which is why we all have chosen to live and work here. There is highly restricted vehicular access along Tannery Lane in both directions and as it is. This is, and should remain an area of outstanding beautiful countryside adjacent to the Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The sites proposed in West Horsley are currently within established Green Belt. The policy on protection for the Green Belt is contained in section 9 of the National Planning Policy Framework, which sets out the fundamental aim of Green Belt policy. Policy on development in Metropolitan Green Belt is set out in paragraphs 79 - 92 of the NPPF. Inappropriate development is, by definition, harmful to Green Belt and the NPPF states that it "should not be approved except in very special circumstances". Local planning authorities are advised to "regard the construction of new buildings as inappropriate in Green Belt".

The Framework also states that a Green Belt review should only happen in "exceptional circumstances". This concept is further elaborated as being "for example when planning for larger scale development such as new settlements or major urban extensions". The Green Belt in Surrey is established with detailed boundaries, therefore "exceptional circumstances" must be demonstrated to necessitate the change to its boundaries. No exceptional circumstances or other justification have been made for the proposed new Green Belt boundaries. There are identified brownfield sites in the borough which have not been seriously considered in the borough plan.

Policy P2 of the Guildford Plan states that Guildford Borough Council "will continue to protect Metropolitan Green Belt against inappropriate development." I am totally opposed to the removal of West Horsley from the Green Belt by insetting and the extension of boundaries and believe that the proposed development is wholly inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to object to the proposed plan for massively increasing the number of houses & industrial spaces on GREEN BELT LAND.

I object to changing designated Green Belt into designated Future Development land.

I would also like to state my disgust at the total contempt shown towards the people living in the area, by the council, who have clearly and demonstrably ignored all the concerns raised over past plans by proposing plans that will be far more damaging to the area

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object in the strongest terms to the removal of Send, Ripley and Clandon from the Green Belt.

It was my understanding that the Government stated, in a letter by Housing and Planning Minister Brandon Lewis, that “demand for housing alone will not change Green Belt boundaries”. Indeed National Planning Practice Guidance states that “unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the ‘very special circumstances justifying inappropriate development on a site within the Green Belt’.

Therefore, I was absolutely horrified to learn of your intention to “inset” or rather REMOVE Ripley, Send and Clandon from Green Belt status in order to circumnavigate this difficulty and I strongly object. It is apparent that you have no respect for the National Planning Practice Guidance and you appear to have little respect for the general members public who live, work and pay their council tax in this area. I reach this conclusion because it seems you are prepared to ride roughshod over any commitments by Government to preserve the Green Belt for future generations.

As an ordinary member of the public, I had absolutely NO idea that you had classified different areas of Green Belt into areas of sensitivity i.e. those you would be prepared to lose from the Green Belt and those areas you wouldn’t. I feel absolutely furious as well as utterly betrayed because I do not feel this has EVER been made clear to the general public. Many of us have chosen specifically to live in and invest in houses here because we adore living in this area surrounded by beautiful countryside and I am one hundred percent certain we have paid a premium for doing so.

I can see that the reason that you wish to remove the land around these villages from green belt status is for expediency. I can see how it would be an easy solution for you but once removed, you will have changed the character of our villages forever thereby having a dramatic affect on their desirability as places to live and work. It is a decision that will never be able to be reversed.

I object to the 400 house development that has been planned at Garlick’s Arch and I object to the 7,000 sq meter industrial site. I feel that the impact of such an enormous development in Send is completely disproportionate and will cause absolute chaos at the Burnt Common/Shell roundabout which is already often congested in the mornings and evenings as people vie for access to and from the A3. In addition to this of course it will only add to the current congestion on the A3 which for anyone who lives here is a daily battle.

I also object to the high number of 45 houses being built at Clockbarn because I understand that planning permission has already been granted for 65 houses at the Tannery which means there will be a further 110 houses in Send with all the
extra traffic that will bring down Tannery Lane which is narrow and winding - not to mention all the additional traffic congestion along Send Road.

I object to the 40 houses being built at Send Hill. I understand that the subsoil of the existing site contains asbestos which could give rise to all sorts of health problems for those living there and nearby if this is disturbed.

I strongly object to the way that student housing is included in the calculation of housing needs for permanent residents. To use this fluctuating population which drops for up to six months of every year (4 months over the Summer and 2 more at Christmas and Easter) as a reason would have a dramatic effect on our Green Belt and yet we all know NO students will want to live out in the surrounding villages.

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3. This will ENSURE gridlock on the A3 for everyone at ALL times of the day rather than between the hours of 7.30 am to 9.30 am and again in the afternoon from 2.30 (yes, it often starts that early!) to 6.30pm - often later. This will mean that because the A3 will be at a standstill - so too will all the surrounding roads as people seek to find alternative routes.

I also object to the failure of GBC to identify sufficient brownfield sites within the urban area which should first be targeted for development which would enable residents to use the railway networks to and from work.

Please confirm receipt of my objections.

All,

I am writing to object to the inclusion of Green Belt land in the local plan.

I believe there are enough suitable alternatives.

I note several councillors campaigned for election with a manifesto that included preservation of the green belt. I expect my elected representatives to fight against any use of the green belt.
In particular I object to the inclusion of Three Farms Meadow in the Local Plan. Only a few weeks prior to the local plan being published the proposed development was unanimously rejected on numerous counts. These difficulties will not be overcome in the short or medium term, and I believe the council should not invest further time or money trying to fix this inappropriate development.

**Para 80 NPPF purposes of Green Belt**

Para 80 of the NPPF states that Green Belt serves (inter alia) “to check the unrestricted sprawl of large built-up areas”; and ‘to prevent neighbouring towns merging into one another’. However in the subjective opinion of the GBCS TFM does not to check the unrestricted sprawl of large built-up areas – when taken out of the Metropolitan and strategic context. The Probity in Planning Code of Conduct enjoins Councillors to be ‘objective’ and to ‘uphold the law’. It is objectively the case that TFM **does** check unrestricted sprawl of large built-up areas and **does** prevent neighbouring towns merging into one another. The fact that those large built-up areas and neighbouring towns are in the adjacent boroughs of Elmbridge, Woking and Mole Valley should not exclude them from consideration by Guildford Borough Council.

The plan below illustrates how TFM **does** serve to separate neighbouring towns and check the sprawl of large built-up areas: (see pdf attachment)

(For the avoidance of doubt the distances cited are taken from Google maps and are ‘as the crow flies’ not the actual distances by road.)

TFM fulfils ALL of the purposes of the Green Belt. It did when it was first put into the Green Belt and circumstances have not changed since:

1. **to check the unrestricted sprawl of large built-up areas;**

   *TFM prevents north-south sprawl from London suburbs down to Guildford and east-west sprawl from Woking to Leatherhead. Specifically it stands between the suburbs of Leatherhead (Fetcham and Bookham) and the suburbs of Woking.*

2. **to prevent neighbouring towns merging into one another;**

   *TFM prevents 12 neighbouring towns and villages across 4 boroughs merging.*

3. **to assist in safeguarding the countryside from encroachment;**

   *The site is at the centre of a connected natural landscape.*

4. **to preserve the setting and special character of historic towns; and**

   *Three Farms Meadows sits at the heart of Ockham Village in the parish of Ockham. Ockham has 3 conservation areas and 31 listed buildings and is arranged in 9 historic settlements.*

5. **to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.**

   *70ha out of 114ha is good quality agricultural land in active cultivation – as it has been for centuries. It includes at least 45.4ha of Best and Most Versatile agricultural land. Building on this does not assist urban regeneration.*

The GBCS appears to run the argument that if a plot of land is not the very last plot to stand between two towns then that particular plot does not serve the purpose of separating the towns. That is a bogus and illogical argument. Taken to an absurdity it would imply that only the last blade of grass between two towns served to separate them.

One of the justifications for removing the site from the Metropolitan Green Belt that has been cited is the analysis carried out in the Green Belt and Countryside Study. This compares different sites on the basis of the ‘purposes’ of the Green Belt set out in the NPPF. Those particular criteria are neither the only relevant criteria nor necessarily the best. The purposes set out in the NPPF are necessarily abstract – because it is necessary that they can be applied to every Green
Belt in the country. The NPPF description of the purposes of the Green Belt was not intended to be an exclusive list. It was not intended to imply that purposes not on that particular list were wholly irrelevant and could be safely wholly disregarded.

**Overriding purpose of the Metropolitan Green Belt in serving London**

Every Green Belt is unique and has an overriding purpose over and above these five abstract criteria – namely to protect the particular city or metropolis for which the particular Green Belt was set up. Since TFM was put into the Green Belt to protect Metropolitan London it is also highly relevant how it fulfils that particular overriding purpose.

The GBCS does not ask the question, how does TFM serve London – the metropolis for which the Metropolitan Green Belt exists and the reason why TFM was originally put into the Green Belt. It should. It is in fact the primary and the concrete purpose of this Green Belt. TFM in fact performs an essential purpose within the Metropolitan Green Belt – standing in a strategic position between London and Guildford and between Woking and Leatherhead as this plan shows:- (see pdf attachment)

The economic geography of London and its satellite towns has depended on commuting for some two hundred years and especially since the invention of the train and the car. The system works because London is separated from its satellite towns by green space. This allows fast transit times between the two. If the green space is filled in then the efficiency of the entire system will rapidly deteriorate as congestion clogs the free and efficient movement of people and goods. The signs of such congestion are already much in evidence on the A3 and on the M25 which carry many thousands of vehicles every hour.

Apart from the purposes set out in the NPPF, TFM also fulfils many other important, material and relevant purposes which the GBCS has not considered. Among these are its Environmental and its Heritage purposes. As it is immediately adjacent to a Special Protection Area and a Site of Special Scientific Interest and as it is itself an SNCI, it serves to protect those nature reserves and forms an essential and integral part of a connected living landscape- connecting the nature reserves to other ancient woodland and serving as an important wildlife corridor. And TFM is also at the very centre of the parish of Ockham. Ockham has never been a nuclear village with one defined centre. It is a collection of nine hamlets and the centre of those hamlets is TFM – which is why Ockham Parish Council has submitted an application for TFM to be made an Asset of Community Value. This youtube video describes a little of Ockham’s history: [https://youtu.be/VVnUUDSxKJk](https://youtu.be/VVnUUDSxKJk)

Before removing TFM from the Green Belt the law requires that ‘exceptional circumstances’ are shown. Residents of Ockham have yet to be shown any rational exceptional circumstances.

Is the proposed new Green Belt in Ash qualitatively equivalent in terms of checking sprawl and preventing towns merging? How is it strategic to the Metropolis of London? What are the exceptional circumstances required by law to justify creating new Green Belt in Ash? New Green Belt in Ash is not a substitute for the unique qualities of the Green Belt in Ockham, which should be preserved and protected.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:** [Picture attachments Colin Bowes.docx](281 KB)
This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of ‘About Guildford’ (published by the Council) on page 5 states that ‘... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.’ This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.
In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt and Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Ripley should not be removed from the green belt. It provides a necessary buffer from the urban sprawl of London. It is important villages separate boundaries are maintained to preserve the village’ way of life’ in this area of Surrey. The attraction of this area of Surrey is its green areas around small villages with individual identities. Please don't sacrifice this for a few extra homes.

be made to protect the green belt and AONB. Why has GBC not sort to do so? I object to paragraphy 4.3.13 Policy P2 proposes that East Horsley be inset from the green belt. East Horsley is set in a rural location and its green belt status has preserved that rural character. Between 2000 and 2015 incremental development of brownfield and infilling sites has seen 149 new homes built in the village, so sensible development is welcomed within the “washed over” status of East Horsley. 36% of East Horsley is woodland which, together with its low density housing and large gardens, give those open spaces that are vital to the character of the greenbelt. Why would GBC wish to destroy this character?

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not adress Garlick’s Arch, so there is no evidence base to support including this site.
Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.
Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. I strongly believe that the Horsley’s should remain in the green belt as it has thus been designated for many years past.

Surely there should not be any plan for such a complete and radical wrecking of the whole village environment which will leave a catastrophic effect in many ways on people’s lives and affect children’s appreciation of their surroundings and also have its effect on the whole Surrey landscape and on natural habitats of wild creatures and would involve the destruction of valuable and massive trees so necessary for health and wellbeing of all live beings .

It appears that this plan will have a big effect on the whole area overloading the already stretched in all aspects – transport, good roads, medical facilities, drainage etc. as mentioned. Reduction of housing numbers, A 2000 house village at Ockham’s Wisley Airfield seems just wrong on a site from where so many men gave up their lives for the battle of Britain for a green and pleasant land to remain, it would be better if just a very few houses could be built there, with a small but significant public memorial to those who made a supreme sacrifice in WW2.

This is what people need to have.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

This would be very detrimental leaving both the Horsleys exposed to the spread of urbanization from all sides. The two distinct areas of West and East Horsley would lose their separate identities and merge with each other, and the creeping tide of development would engulf from Effingham, and Bookham, and, if it were to go ahead, the new proposed development of over 2000 houses in Ockham. The green belt must not be removed from the Horsleys and the ‘exceptional circumstances’ that are required to be shown before taking this drastic action have not been demonstrated.

The Horsleys lie adjacent to the area of the Sheepleas, a designated Area of Natural Beauty, Site of Special Scientific Interest, and Local Nature Reserve. To allow unchecked development to the south of this beautiful and special place should removal of the green belt be proposed, would be truly sad. The area is well loved by visitors from far and wide, not just from the local area, who come to enjoy the natural beauty of these ancient woodlands, and undisturbed meadows. But the other areas of more ordinary green space, the fields, the hedges, the patches of woodland, the wildlife corridors, are all very special, and deserve just as much protection.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Extension of the boundaries of the settlement areas of the Horsleys

This is just another to increase more areas into the village settlement, in the hope that more land will become available for development, and again will increase the size of our two villages to ridiculous proportions, bearing in mind the lack of infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to register objections to Guildford Borough Council Proposed Local Plan (June 2016) and inclusion in the plan of proposed multiple development sites in the Horsleys:

**Urbanisation of the Green Belt**

I strongly object to removal of the land areas in the vicinity of the Horsleys from the Green Belt. The Green Belt prevents urban sprawl and retains important wildlife corridors in proximity to the highly urbanized areas of outer London. It helps maintain clean air quality and provides recreational areas for urban dwellers from both Greater London and adjacent conurbations.

There are five legal reasons for protection of land assigned as Green Belt:

1. To check the unrestricted sprawl of large built up areas
2. To prevent neighbouring towns merging into one another
3. To assist in safeguarding the countryside from encroachment
4. To preserve the setting and special character of historic towns
5. To assist in urban regeneration by encouraging the recycling of derelict and other urban land

The provision of the Green Belt in the vicinity of the Horsleys meets the criteria listed above. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is not an exceptional circumstance in law. In addition the existence of the Green Belt/AONB is a reason for *not* meeting objectively assessed housing need (i.e., such protected land is a legal constraint against any such development). The Draft Local Plan has not demonstrated exceptional circumstances requiring additional housing.

**Removal of Villages from the Green Belt**

I strongly disagree with and object to the assumption made in the Draft Local Plan that it is reasonable to remove villages such as West and East Horsley from the Green Belt. It seems remarkable that a single act of Parliament by the current Government can undo the good work for the provision of the Green Belt and protection of rural England laid out in the Town and Country Planning Act of 1947. The rationale behind the need to protect rural areas in close proximity to ever growing metropolitan areas is more relevant today than ever, in light of the projected growth in UK population.

I object to the method of defining settlement hierarchy as described in the Draft Local Plan. In particular, I take exception to the "classification" of East Horsley as a "Semi-Urban Village" and question the basis for this classification. Horsley lacks most of the infrastructure and community facilities taken for granted in an urban area. The key charm and attraction of Horsley is essentially it's rural character.

To accrete large numbers of new houses to the Horsley - Okham area would change the character of these ancient villages permanently, resulting in a detrimental impact on the environmental and village character.

In summary, I strongly object to the proposal in the Draft Local Plan to take the following villages out of the Green Belt: East Horsley and West Horsley (North), Effingham, Ripley, Shere and West Horsley (South).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT to the removal of Send from the Green Belt which was designed specifically to prevent Woking and Guildford becoming one sprawling housing estate. No justification has been given and its removal runs counter to national policy and manifesto commitments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to not protecting the Green Belt (Policy P2)

Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

This policy is flawed and should have been amended. In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy 1,332 (97%) were against.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

NO EXCEPTIONAL CIRCUMSTANCES

The local plan proposes nearly 9000 new homes to be built on Green Belt land (compared with ~ 5000 current homes in Guildford, so approx. equal to 18% of the existing homes in the borough) – a huge proportion. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. No exceptional circumstances have been disclosed. So the Green
Belt boundaries should NOT be changed through the plan making process.

| I am writing to advise of my objections to the new Guildford Borough local Development plan recently published | |
| Loss of Green Belt Land: I strongly object to the expansion of the Horsley village boundaries and its subsequent removal including Ripley, Send and Clandon from the Green Belt. The new mayor of London has instructed London planners NOT to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be too long before we have none left. There is insufficient details and/or evidence within the local plan to support why this action is necessary and therefore I strongly object. Our British countryside needs to be preserved along with our wonderful animal, bird and plant life which will be inevitably affected by the erosion of the Green Belt Land. | |

With regard to the proposed extension of those boundaries there appears to be no logic to them and they seem solely to be aimed at increasing the area within the village boundaries (see above) available for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

2. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick's Arch (A43).

Green Belt Policy 2 at paragraph 4.3.15

I object to the proposal to inset Send Business Park, Tannery Lane, from the Green Belt for the following reasons:-
It is adjacent to the Wey Navigation and would appreciably reduce the enjoyment of walkers and boat users along the river.

Tannery Lane is a narrow country road with poor visibility, restricted access at both ends and in many places is a single track with few passing places.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**GREEN BELT GENERALLY**

I am concerned by the extent of the proposed erosion of the Green Belt and object to the current proposals. I understood that one of the purposes of the Green Belt is to maintain adequate separation between villages and settlements etc. and to prevent a sprawl of development over time that effectively joins such areas together, with little or no separation. When examining the proposed local plan, the conclusion is that the proposed erosion of the green belt, particularly along the A3 corridor, between the M25 and Guildford would result in an unacceptable situation. The character of Send & Ripley would be lost and the proposed development at Gosden Hill would almost merge with the proposed expanded areas of Send/Ripley Villages. For this reason, I strongly object to the current proposals.

**IN-SETTING**

I object to the extent of the proposed in-setting where significant areas to Send, Clandon/Burpham and Ripley are to be removed from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Green Belt Policy 2, at paragraph 4.3.15; I object to the proposal to inset Send Business Park from the Green Belt for the following reasons:

It is a non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation.

Tannery Lane, as previously mentioned, is a small country lane which should remain as such and is totally unsuited to increased traffic volume.

Any additional expansion or development in this position will have a significantly detrimental effect on the Green Belt land in this location.

There is not the need for such a large amount of housing as GBC has suggested. I realise that there is a need for housing but not to the detriment of losing Green Belt, congested roads, over-subscribed schools and doctors. The South East of England is already highly populated and there are other areas of England which would be more suitable to have larger housing developments.

In my opinion, these developments should NOT be approved and NOT be allowed to go ahead.

I object (yet again) to the local plan. I see no improvement since the last local plan and in fact it appears things have got even worse!

The development is ridiculous in the extreme, it will destroy the village communities of Ripley, Send and Clandon. We neither have the infrastructure to support this level of development or (frankly) the need. I strongly disagree with the seeming disregard for the green belt which will ultimately connect everything creating an urban sprawl.

Yet again I note that there are no exceptional circumstance to the destruction of the greenbelt save making some building firms very rich, why not instead look to develop/redevelop brownfield sites before looking to destroy the countryside.

I object to the removal of large areas of villages from the Green Belt. I moved to this area because the area was protected by the Green Belt from excessive development. The villages are vital to the health of Guildford as a borough maintaining the rural feel of the borough. Green Belt status should not be removed from any area without full examination of alternative sites to meet the exceptional need of the development. Removing the status removes the requirement to carry out this examination. The character of the villages within Guild for Borough boundary do make a significant contribution to the openness of the Green Belt.

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

I object on these grounds:-

1. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley Send and Horsley from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl.

These villages and their countryside provides a necessary buffer between Woking and Guildford. The Green Belt is not some irritating bit of officialdom to worked around by planners. It is for the prevention of merging of towns and settlements which would otherwise create unrestricted sprawl. If these villages were removed from the Green Belt in time there would be continuous development between Woking and Guildford.

70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Local Plan Policy P2 states that: *We will continue to protect the Metropolitan Green Belt.* We fully and un-equivocally support this policy.

Unfortunately, despite such brave words, GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. The analysis included in the Appendix shows that around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. We consider this outcome to be outrageous.

Under NPPF rules, GBC is permitted to make allowance for factors which may constrain the delivery of new housing, such as the need to protect the Metropolitan Green Belt or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty (‘AONB’) which is offered protection under the NPPF comparable to that of a national park. Although these areas make up a large proportion of the land area of Guildford Borough, GBC makes no attempt to reduce its housing delivery in order to take account of such constraints. We find this approach inexplicable.

There are also a number of further issues relating to the detailed implementation of this policy which are set out further below:

a) Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt

Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. Currently development is permitted within the settlement boundary, although this area is still considered to be Green Belt with a particular planning regime being applicable.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015.

GBC attributes the need to inset East Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. This East Horsley clearly does. No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards bio-diversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come to a rural village like East Horsley and see how the Green Belt has preserved the rural character and openness of this village.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being ‘washed over’ by the Green Belt. As the saying goes: “If it ain’t broke, don’t fix it”. This applies to East Horsley in the matter of insetting.

EHPC therefore OBJECTS to the proposal to inset East Horsley from the Green Belt and requests that this proposal be dropped from the Local Plan.

b) Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

We object to two specific boundary changes, which have been proposed, as follows:

1. There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and therefore represents a highly defensible Green Belt boundary.
Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in 'exceptional circumstances'. We do not believe this proposal can be considered as an exceptional circumstance. Clearly the only justification for this change is to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. As such, we believe it is an invalid proposal.

**EHPC accordingly OBJECTS to this proposed boundary change.**

2. There is also a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston. The result is to take all of Kingston Meadows out of the Green Belt.

Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in 'exceptional circumstances'. We do not believe that this can be considered as an exceptional circumstance. As such we believe this is an invalid proposal.

**EHPC accordingly OBJECTS to this proposed boundary change.**

In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac.

The NPPF is clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, we believe the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

c) Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt

**EHPC OBJECTS to the proposal to remove Wisley Airfield from the Green Belt.** The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. The proposed Wisley development is discussed further below in the Site Allocation section.

d) POLICY P2: Limited In-filling

A new planning designation has been introduced called ‘the identified boundary of the village’. For East Horsley this covers a number of roads south of the A246. It is a sizeable area, covering 45 hectares, the equivalent of 23% of the present Settlement Area of the village. Within this area, Policy P2 sets out proposals that would allow ‘limited in-filling’ within this boundary.

We find it hard to reconcile the opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” with this sizeable reduction in effective Green Belt status. In our opinion, this policy represents a de facto extension of the Settlement Boundary and a substantial reduction in the operational effectiveness of the Green Belt, whose effectiveness is significantly weakened where this new planning designation applies.

**EHPC accordingly OBJECTS to the proposal to designate roads south of the A246 as being within the ‘identified boundary of the village’ and to allow limited infilling within this area.**

Policy P2 – Green Belt: I object to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. I note in particular the huge developments proposed for the North East quadrant of the borough which will adversely affect our amenity, but also unfairly targets our tranquil rural villages because we can provide ‘dormitory’ facilities for commuters to London. The developments directly affecting our villages are the proposals for Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send.

Further, on the erosion of Green Belt and I object that Policy P2 is not met where it states that Green Belt should be protected. I object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt and with little consideration being given to redevelopment of brown field sites.

I object that GBC are contravening the NPPF framework stipulation in paragraph 87 with the proposed developments at Gosden Hill Farm, Ripley, East and West Horsley and Garlicks Arch, Send. Paragraph 87 states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” and GBC have not proven any special circumstance for developing on these Green Belt areas.

I object to building on the Green Belt because the essential characteristic of Green Belt is its openness and permanence (National Planning Policy Framework paragraph 79).
I object to all other strategic sites in the Local Plan, Blackwell Farm, 3 Farms Meadows, Garlick’s Arch, West Horsley and Hog’s Back. All are out of proportion to the surrounding area and none qualify for the exceptional circumstances required to take them out of the Green Belt.

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy. These sites have been targeted by developers who have no interest in the area. They are simply looking to make massive profits by buying green belt land at a modest sum and selling it for a massive profit once its green belt status has been withdrawn. Is this why the existing brownfield site at Burnt Common has been shelved and Garlick’s Arch has been substituted at the last minute? The Plan should develop the this existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business Park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

The first line of Policy P2 states, ‘We will continue to protect the Metropolitan Green Belt against inappropriate development.’ I am totally opposed to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries. No exceptional circumstances or other justification is made for the new Green Belt boundaries that will result from the proposed insetting of the two parts of the village from the Metropolitan Green Belt. I believe the Green Belt & Countryside Study is flawed. West Horsley's defined Settlement Area boundaries (ref
2003 Local Plan) DO NOT need to be extended. West Horsley Parish is one of a rich and varied mix of well-established low housing density settlements with a considerable number of historic buildings. Positioned on the north side of the North Downs, partly in the Surrey Hills an area of outstanding natural beauty, it attracts a considerable number of recreational visitors (walkers and cyclists) through the seasons each year.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I still object to Policy P2 as redrafted since it still does not address a very large proportion of the thousands of objections made to the previous version. I particularly object to the reference in paragraph 1 to the Policies Map: the words “as shown designated on the Policies Map” must be deleted if this paragraph is to be of any use at all. I object to the proposals that the settlements of Normandy, Flexford and Walden Cottages, and the traveller sites to the rear of Palm House Nurseries (A49) and Whittles Drive (A50), should be inset from the Green Belt. These are all areas and sites contributing to the openness of the Green Belt and also contributing to the views to and from the Hogs Back AONB. I also object to the insetting of other villages from the Green Belt and “infilling” of others and wholesale extension of settlement boundaries across the Borough. Such changes ignore the importance of a permanent Green Belt preventing urban sprawl and providing a “green lung” which should be protected, with any individual changes being subjected to rigorous scrutiny and being dependent on clear demonstration of exceptional circumstances justifying any over-riding of the Green Belt provisions. I would also point out that para 4.3.13 is incorrect and misleading in saying that a long list of villages are now inset from the Green Belt – this simply refers to GBC’s proposal last summer, to which there have been huge objections from residents and which we hope will be rejected through the Local Plan process.

Exceptional circumstances must be demonstrated in order to develop Greenbelt yet despite the weight of public opinion against weakening of this policy, 70% of new housing development will be in the countryside, of which, 58% will be in Greenbelt. By definition, this is not an exception and no attempt is made to demonstrate exceptional circumstances, in line with the requirements of the NPPF. Insetting villages is of concern since restrictions within the settlement boundary raises concerns over loss of character. The Rural Economic Strategy covered in 4.51a, promoting affordable homes everywhere in the countryside including the AONB as a main aim, is a mechanism for promoting overdevelopment in our countryside. It has not been subject to full public consultation and is based on data, which is not up-to-date.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015. GBC attributes the need to inset East Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt [NPPF: only those villages whose open character makes an important contribution to the openness of the Green Belt should be included in the Green Belt. Those that do not should be inset, or removed, from the Green Belt and other development management policies used to restrict any inappropriate development]. It is clear that East Horsley clearly does make an important contribution to the openness of the Green Belt. No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come to a rural village like East Horsley and see how the Green Belt has preserved the rural character and openness of this village.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being ‘washed over’ by the Green Belt. As the saying goes: "If it ain’t broke, don’t fix it”. This applies to East Horsley in the matter of insetting. I therefore OBJECT to the proposal to inset East Horsley from the Green Belt and request that this proposal be dropped from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

I object to two specific boundary changes, which have been proposed, as follows:

i) There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth Wood. This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and therefore represents a highly defensible Green Belt boundary. Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe this proposal can be considered as an exceptional circumstance. Clearly the only justification for this change is to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. As such, I believe it is an invalid proposal. I OBJECT to this proposed boundary change.

ii) There is also a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows. The result is to take all of Kingston Meadows out of the Green Belt. Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’, I do not believe that this can be considered as an exceptional circumstance. As such I believe this is an invalid proposal. I object to this proposed boundary change.

In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac. The NPPF is clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, I believe the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt

I object to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance.

POLICY P2: Limited In-filling

A new planning designation has been introduced called ‘the identified boundary of the village’. For East Horsley this covers a number of roads south of the A246. It is a sizeable area, covering 45 hectares, the equivalent of 23% of the present Settlement Area of the village. Within this area, Policy P2 sets out proposals that would allow ‘limited in-filling’ within this boundary.

It is hard to reconcile the opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” with this sizeable reduction in effective Green Belt status. In my opinion, this policy represents a de facto extension of the Settlement Boundary and a substantial reduction in the operational effectiveness of the Green Belt, whose effectiveness is significantly weakened where this new planning designation applies. I object to the proposal to designate roads south of the A246 as being within the ‘identified boundary of the village’ and to allow limited infilling within this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Draft Local Plan

I wish to object to the Draft Local 2016 Plan to remove the Green Belt villages of Send, Ripley and Clandon from Green Belt status as I believe this is being done for pure expediency.

In a letter by Housing and Planning Minister Brandon Lewis, the Government stated that “demand for housing alone will not change Green Belt boundaries”. Furthermore, National Planning Practice Guidance states that “unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the ‘very special circumstances justifying inappropriate development on a site within the Green Belt’.

I object as I cannot see that the building of houses and an industrial site on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill is justified by “any special circumstances”. Green Belt is supposed to be permanent and not continually eroded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11778  Respondent: 10913569 / June Tallon  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The Green Belt

We object strongly to virtually any development within the Green Belt. Those who conceived the idea and implemented the necessary laws to create Green Belt around our major cities and towns in 1955 showed foresight and determination that Society, Politicians and vested interests today would be unable and unwilling to commit to. The whole concept of Green Belt land is 'genius' which much of the rest of the world envies us for. It represents only 13% of land in England but its immeasurable benefits have been cherished by all who live and work in its proximity and can only continue to be such an asset if its future is guaranteed for generations to come.

Green Belt is Green Belt and should not be considered as an asset other than as Green Belt, it is irrereplaceable. The laws that protect the Green Belt may well allow for 'Exceptional Cases' but these should be considered in extremis, land taken out of the Green Belt should be replaced elsewhere and in no circumstances should it be sacrificed 'to build houses'
I OBJECT to Send Village being removed from the Green Belt. The Green Belt land in Send comprises of beautiful woodland and fields of long grass which support a rich myriad of wildlife. The Green Belt land not only provides a physical buffer between Send and Guildford to the South and Woking to the North, but even more importantly it is an environmental buffer against traffic pollution and noise, it is the ’lungs’ of Send, helping to combat the air pollution. If Send were to lose the Green Belt to development it would have an irreversible and detrimental effect on the rural aspect of Send Village. The Councillors have reneged on their promise to protect the green belt, and there are no special circumstances to justify building on the green belt. Brown Field sites should be used to fulfill the housing need.

I OBJECT to the proposal of new villages and infilling of existing villages which erodes Green Belt land. In particular in West Horsley, where ‘infilling’ is proposed outside the settlement boundaries. There is no justification for development of green belt when there are sufficient brownfield sites to meet the capacity required. Surrey is the most congested county in the country, and every effort should be made to reduce this by locating new housing needs in areas with adequate road networks and infrastructure.

POLICY P2 – Green Belt
I OBJECT to the proposal of new villages and infilling of existing villages which erodes Green Belt land. In particular in West Horsley, where ‘infilling’ is proposed outside the settlement boundaries. There is no justification for development of green belt when there are sufficient brownfield sites to meet the capacity required. Surrey is the most congested county in the country, and every effort should be made to reduce this by locating new housing needs in areas with adequate road networks and infrastructure.

I OBJECT

To the village of Send being removed from Green Belt. Not only because I really feel that the village should retain its rural feel – which after all is why most people chose to move there - but more importantly the green belt ensures Send acts as a very vital buffer between the boroughs of Guildford and Woking. Without this buffer the two run the risk of merging in to one huge city! Ash and Tongham are having new green belt designated just for this reason. As has been pointed out no doubt numerous times, it was an election promise to keep and protect the Green Belt; this proposal of unnecessarily huge development and the removal of the greenbelt goes against everything the people voted for! We voted for you because you said you’d protect the area!

I have lived in Horsley for the majority of my life. I am now 22 and have grown-up with the beauty and serenity of what I believed to be green land which would remain so for generations to come. I am not only disappointed at the government’s dismissal of the Green Belt policy – a policy everyone was lead to believe to be permanent - but angered by the lack of alternative solutions proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Green Belt Protection

If the Council fails to apply Green Belt protection or constrain expansion to reflect widespread, legitimate environmental and transport constraints, the 2017 Plan will cause harm to the qualities that underpin the economic success of Guildford and aggravate congestion.

Land Development

Allocating too much land for development in the 2017 Plan will also result in Guildford being required to provide homes for Woking on our Green Belt which is folly given the constraints in Guildford, a gap town with constricted roads in the Surrey Hills ANOB.

I object to Send Business Park being taken out of the Green Belt

It is an old non-conforming user in an area of outstanding natural and beautiful countryside next to the River Wey Navigation.

Vehicular access is highly restricted along Tannery Lane in both directions

Expansion or development at this location detracts from the openness of the Green Belt which is unacceptable.

Loss of Green Belt Land: I strongly object to the expansion of the Horsley village boundaries and its subsequent removal including Ripley, Send and Clandon from the Green Belt. The new mayor of London has instructed London planners NOT to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be too long before we have none left. There is insufficient details and/or evidence within the local plan to support why this action is necessary and therefore I strongly object. Our British countryside needs to be preserved along with our wonderful animal, bird and plant life which will be inevitably affected by the erosion of the Green Belt Land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I think that you need to think very carefully about the aim of what you are trying to achieve if you remove the green belt. There isn’t the infrastructure and people’s lives will be negatively affected if you go ahead. Brownfield sites are one thing but building on open fields will achieve long term problems for which there are no solutions offered by the council.

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to all insetting of villages from the Green Belt.
We note that the Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. We fully and unequivocally support this policy. However, unfortunately GBC appears to be in breach of this same policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt.

I am writing to lodge my objections to the draft local plan 2016.

I object to the removal of villages including Send, Ripley and Clandon from Green Belt. This simply seems to be an attempt to get a foot in the door for future mass scale building which I would advocate is not needed.

I object to any erosion of Green Belt.

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.

I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

Objections to the Local Plan

I live in the village of Send and I should like to object very strongly to the following issues in the Local Plan:

1. Removing Send from the Green Belt

I object most strongly to the idea of removing Send from the Green Belt. I do not believe that you have the right to do this as Green Belt, by its very definition, is meant to be a permanent feature and protected from property developers. There are no ‘exceptional circumstances’ that require you to remove this status especially when there are a number of undeveloped Brown Field sites in the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6517  Respondent: 10922945 / Toby Meredith  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to a new proposed industrial site at Garlick’s Arch (A43). It is not needed and there is already room for the proposed 7,000m2 at Slyfield where it is already set up for industrial purposes.

I object to removing Send, Ripley, Clandon, Galick’s Arch (A43), Wisley Airfield (A35) and Gosdon Farm (A25) all from the Green Belt as it would produce an unwanted urban sprawl. There are no exceptional circumstances for these being removed, as required by the National Planning Policy. A43

I object to GBC not looking at brownfield sites first before trying to develop on Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT TO POLICY P2 (GREEN BELT):

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
- Impact on rural leisure and tourism ignored.
- Impact on flood control ignored.
- Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
- Impact on biodiversity ignored.
- Impact on natural heritage ignored.
- Impact on water catchment ignored.
- Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
- Impact on rural business (e.g. mineral mining, film making) ignored.
- Impact on natural landmarks and views ignored.
- Harm to public health and wellbeing (physical, psychological) ignored.
- Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
- Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
- Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
- Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
- “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
- Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
- Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
- Ignores most of NPPF 17 stipulations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposal that new housing be built within the Green Belt. There are plenty of brownfield sites in the borough which should be redeveloped before using fresh sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13126  Respondent: 10924609 / H Perryman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposals to remove the villages of Ripley, Send and Clandon and the site of Send Prison from the Green Belt. Also the sites of Wisley Airfield and Garlick’s Arch. National Planning Policy requires exceptional circumstances for the Green Belt boundaries to be changed or for the development within Green Belt. There are no exceptional circumstances for these villages and the land to be removed from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the continued plan to remove Ripley, and other villages, from the Green Belt. The change to the green belt boundary at Ripley is not sufficient to make it reasonable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy P2:
I object in the strongest possible terms to the removal of Send from Green Belt status and to the proposals to build on the Green Belt fields at Gosden Hill, Garlick’s Arch, Send Hill and Clockbarn Nurseries, particularly Sites A25, A35, A42, A44 and A43. NPPF states that the Green Belt should only be altered in “exceptional circumstances.” There simply are no eligible exceptional circumstances expressed in the Local Plan or supporting documents. Guildford’s urban brownfield areas must be identified and utilised instead, not only to protect our countryside but also to limit the impact on road traffic yet provide much-needed access for new housing to transport links such as the rail network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to all in setting of villages from the Green Belt, in particular for Ripley, Send Marsh/Burnt Common, Send and East/West Horsley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to local villages (Send, Ripley, Clandon, Wisley) being removed from the Green Belt.

I was for many years a Chair of Governors in both the Primary and Secondary sectors. An issue that engaged much of my time and energy was the selling off of school playing fields; the main thrust of my opposition to such short-sighted action was that once a playing field has been swallowed up up development it can never reclaim its status quo. The proposed Local Plan could amount to the same situation, but on a much larger and potentially more dangerous scale; once Green Belt is gone it is GONE – FOREVER. We neither want nor indeed need an urban sprawl from Guildford up to the M25 which the ‘Vision’ would create. We have areas designated as Green Belt for excellent reasons – the clue is in the name.

I object to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
• Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

I trust that all of these objections, together with those which I submitted when the previous iteration of this Local Plan was made open to comment, will be taken into account when finalising the Local Plan. That final version should simply address the real needs of the community and not merely reflect the desires of developers and land owners.

GREENBELT

I object to:

• over 70% of new housing being built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
• the removal of the Former Wisley Airfield from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment as far too This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to Three Farm Meadows, an area that at present has only 0.3% of the population of GBC).

Insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

Policy P2: Green Belt

I object to the proposal to remove West Horsley from the Green Belt. I don not see that any sound case has been made to justify changing the boundaries of the Green Belt. I have read the guidance in the National Planning Policy Framework which makes it clear that Green Belt boundaries should only be altered in exceptional circumstances and that unmet housing need alone is unlikely to qualify as "exceptional circumstances".

Apart from the obvious benefits that the Green Belt designation provides, e.g. protection of our natural environment and good air quality, there are wider social benefits. Without the protection offered by the Green Belt the character of our village would be changed, which will over time lead to a loss of community and could result in West Horsley transforming into another bland commuter town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Send being removed from the Green Belt, which is meant to save the countryside from being over-run by the nearby towns of Guildford and Woking. Central Government and Local Councillors should honour their promises and not renge on them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT strongly to the proposal to remove the Horsleys (and other villages in the Borough) from the Green Belt. In paras 79 and 80 of the NPPF (National Planning Policy Framework - Mar 12) the Government places great importance on the Green Belts and in Para 83 states that once established they should only be altered in “exceptional circumstances” through the preparation or review of the Local Plan.

The Green Belt around the Horsleys serve all 5 of the purpose set out in para 80.

Para 84 states that inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.

The draft plan does not identify the “exceptional circumstances” required to remove the Horsleys (and other villages) from the Green Belt nor the “very special circumstances” required to build on Green Belt land.

As outlined above, the green belt is not just a pleasant amenity but also an essential protection against flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

which many horseriders, bikers, hikers, people of any age enjoy and love and the habitat of many precious wildlife and plants. Sacrificing the Greenbelt Land and trade it with more traffic, congestion, more pollution, insufficient infrastructures would be a terrible mistake.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future
generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly
protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public
consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the
borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage.
The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken
out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to
justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national
guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional
circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be
taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances
required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered
certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing
exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from
the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be
carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt
in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor
is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than
is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land
rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that "... the Plan
rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider
this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and
the consultation period restarted after the correction has been given the same distribution as the original statement. (I
assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that
the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of
these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that
infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is
too difficult to square off boundaries by including countryside bounded on only one or two sides by existing development,
claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines.
The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this
policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost
calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the
Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I
cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could
quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of
opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their
surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an
untruth.
In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

The Plan is presented in a way that is dishonest in the extreme, even by current political standards. The suggestion that "We will continue to protect the Metropolitan Green Belt" is a complete lie. No less than 65% of the Plan's development will take place on current Green Belt land! Did somebody think we wouldn't notice? This is a totally unacceptable and unnecessary destruction of our countryside and our way of life.

The proposal to inset our villages (including our village, East Horsley) from the Green Belt rather than being washed over is completely unacceptable. Our villages make an important contribution to the openness of the Green Belt as is obvious to anyone who takes the time to look for themselves. A very large part of East Horsley is woodland and housing density is extremely low. It is the Green Belt that has preserved the rural character of the village, which is why we choose to live here. The current status has allowed controlled and balanced expansion of the village - why change this?

The proposals to change the settlement boundaries for the village are a blatant attempt to create more land for development. Green Belt boundaries can only be changed in “exceptional” circumstances and a desire to build more houses is certainly not exceptional. The current boundary to the west side of Ockham Road North is defined by a deep drainage ditch which is itself a defensible Green Belt boundary, whose defensibility would in no way be improved if it was moved.

The proposal to take Kingston Meadows out of the Green Belt is equally unjustified and egregious. It provides the main recreational space in the village and the suggestion that it would be developed would be catastrophic for the village.

The Green Belt is not the Council’s to give away, it belongs to us all and not just those who live within it, yet the detail of the policy suggests the Council is willing to sacrifice it. There is no commitment within this plan to protect the Green Belt, contrary to the content of the NPPF, party manifesto commitments, government policy and previous responses to public consultations.

There is no assessment of the Green Belt’s value, yet losing it results in an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment & flood control
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations
- Future economic potential such as mineral extraction
- Biodiversity, natural beauty, landmarks, open space, rural views and sight lines
- Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF).

The draft Local Plan suggests that most Guildford villages do not contribute to “openness”, however this is subjective. Indeed, preserving the openness of Effingham is a cornerstone of their emerging Neighbourhood Plan and fits with Paragraph 17 of the NPPF which ‘empowers local people to shape their surroundings’. I am especially concerned by the proposed ‘insetting’ of 14 villages from the Green Belt, and ‘infilling’ 12 of the borough’s Green Belt villages. It is of great concern that settlement boundaries are proposed to be extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. To ‘inset’ two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is completely inappropriate, given the stated objectives of the Green Belt in the NPPF and government policy. No exceptional circumstances have been disclosed, and therefore the Green Belt boundaries should NOT be changed.

POLICY P2- Green Belt

I OBJECT. This policy states, "the general extent of the Green Belt has been retained." This is a lie.

The policy wording is tepid in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present
Government's policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations - an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council's to give away.

Policy P2 omits any assessment of the Green Belt's value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even tracking)
- Natural beauty, landmarks, open space, rural views and sight lines
- Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)"6

As a matter of law, morality and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is disreputable to argue, as the Council do, that the plan would involve the loss of "only" 1.6% of the borough's Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no "acceptable" percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

I am not opposed to appropriate development in the Green Belt and recently supported a major planning application in my own village. But I fail to see why a system of fair burden-sharing of new development cannot be applied to the borough's existing settlements in proportion to their size. This alternative would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth. It is reasonable to ask urban Guildford, with x times the population of semi-rural East Horsley for instance, to accommodate x times the number of new homes over the plan period. Parish councils could be asked, and will no doubt be willing, to propose where their quota of houses should go. Most rural residents are reasonable people who, if not alienated by top-down planners, will support realistic numbers of new houses in their neighbourhoods. Unfortunately, this democratic, bottom-up approach has not been attempted.

Instead, while developers flip and land-bank urban sites as a financial speculation, this plan will dump most new development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates that few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much-needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning.

I particularly protest at the "insetting" of 14 villages from the Green Belt, and at "infilling" 12 of the borough's Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages . Many Guildford villages are "leggy" in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the "openness" of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF's other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hellbent on self-defeat.
I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To "inset" two-thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London.

"8 See Ministerial foreword: "Our natural environment is essential to our wellbeing, and it can be better looked after than it has Habitats that have been degraded can be restored. Species that have been isolated can be reconnected. Green Belt land that has been depleted of diversity can be refilled by nature and opened to people to experience it, to the benefit of body and soul."

"9 Councillor Matthew Sarti, Planning Committee meeting, 18 May 2016.

cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed "insetting" and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17's aim of "empowering local people to shape their surroundings" and other NPPF provisions."

SITES

1. Green Belt sites

I OBJECT to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that "allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses." This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. Some residents have concluded that commenting is a waste of time.

"13 Further discredited by criminality on the Council. Former lead Councillor for planning Monkia Juneja, architect of the 2014 draft plan, is currently serving a two-year sentence on 3 counts of forgery, pretending to be a barrister and obtaining dishonest pecuniary advantage.

All Green Belt sites should be removed from the plan until "exceptional circumstances" for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. "14

This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is disreputable to argue, as the Council do, that the plan would involve the loss of "only" 1.6% of the borough's Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no "acceptable" percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

I am not opposed to appropriate development in the Green Belt and recently supported a major planning application in my own village. But I fail to see why a system of fair burden-sharing of new development cannot be applied to the borough's existing settlements in proportion to their size. This alternative would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth. It is reasonable to ask urban Guildford, with x times the population of semi-rural East Horsley for instance, to accommodate x times the number of new homes over the plan period. Parish councils could be asked, and will no doubt be willing, to propose where their quota of houses should go. Most rural residents are reasonable people who, if not alienated by top-down planners, will support realistic numbers of new houses in their neighbourhoods. Unfortunately, this democratic, bottom-up approach has not been attempted.

Instead, while developers flip and land-bank urban sites as a financial speculation, this plan will dump most new development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates that few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much-needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning.
I particularly protest at the "insetting" of 14 villages from the Green Belt, and at "infilling" 12 of the borough's Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed *outside* the settlement boundaries of 11 further villages. Many Guildford villages are "leggy" in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the "openness" of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF's other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hellbent on self-defeat.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.9 To "inset" two thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed "insetting" and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17's aim of "empowering local people to shape their surroundings" and other NPPF provisions.10

**SITES**

1. *Green Belt sites*

I OBJECT to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that "allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses." This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014.13 Some residents have concluded that commenting is a waste of time.

"13 Further discredited by criminality on the Council. Former Lead Councillor for planning Monika Juneja, architect of the 2014 draft plan, is currently serving a two-year sentence pm 3 counts of forgery, pretending to be a barrister and obtaining dishonest pecuniary advantage.
All Green Belt sites should be removed from the plan until "exceptional circumstances" for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. "14

I OBJECT. This policy is tepid in support of the Metropolitan Green Belt even though it constitutes 89% of the borough and should be the cornerstone of all local planning policy.

It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations — an asset and amenity that belongs as much to Londoners and the wider nation as to the people who live in it. It is not the Council’s to give away, and once it is gone it is gone forever.

Any policy on the Green Belt should start with a fair assessment of its value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even fracking)
- Natural beauty, landmarks, open space, rural views and sight lines
- Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF) 8

As a matter of law, morality and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation.

It is disreputable to argue, as the Council does, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. No-one argues that we should sell 1.6% of British Museum artefacts in order to build houses.

I am not opposed to appropriate development in the Green Belt and recently supported a major planning application in my own village. But I fail to see why a system of fair burdensharing of new development cannot be applied to the borough’s existing settlements in proportion to their size. This would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth. It is reasonable to ask urban Guildford, with x times the population of semi-rural East Horsley for instance, to accommodate x times the number of new homes over the plan period.

Parish councils could be asked, and would no doubt be willing, to propose where their quota of houses should go. Most rural residents are reasonable people who, if not alienated by top-down planners, will support realistic numbers of new houses in their neighbourhoods. Unfortunately, this democratic, bottom-up approach has not been attempted.

Instead, while developers flip and land-bank urban sites as a financial speculation, this plan will dump most new development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning.

I particularly protest at the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines.

The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hellbent on securing the rejection of the plan as a whole.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. 9 To “inset” two-thirds of the borough’s 9 rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly
defeat them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions. The policy states that “the general extent of the Green Belt has been retained.” This is not true.

8 See Ministerial foreword: “Our natural environment is essential to our wellbeing, and it can be better looked after than it has been. Habitats that have been degraded can be restored. Species that have been isolated can be reconnected. Green Belt land that has been depleted of diversity can be refilled by nature – and opened to people to experience it, to the benefit of body and soul.”

9 Councillor Matthew Sarti, Planning Committee meeting, 18 May 2016.

10 See footnote 3 above.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.
Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I object to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

I object to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council's to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation.

Paragraph 4.3.16 only states that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified within the local plan. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise.

Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council's growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned.

I object to the "insetting" of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the "openness" of the Green Belt, a term which neither the plan nor the NPPF defines.

To "inset" two-thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed "insetting" and boundary extensions go ahead.

I object to the proposals to remove from the Green Belt the so called 'strategic sites' of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. The local plan fails to demonstrate any exceptional circumstances for these sites and villages (as mere housing need does not constitute a 'special circumstance') to be taken from the Green Belt. Once taken from the green belt they will be lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch (Policy A43 and A43a), so there is no evidence base to support including this site. Rather than developing Garlick's Arch, there is an existing brownfield site just to the south ofthe site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that "allocating these sites does not grant planning permission for development." However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether "exceptional circumstances" existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as well as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as III as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless "exceptional circumstances" for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-tenn considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to strongly object to the revised GBC local plan for the following reasons.

1. **Policy P2. Removal of Send from the Green Belt.** In the new local plan document on page 29 Send is referred to as a "Rural Local Centre" yet the plan suggest removing the green belt along the banks of the River Wey Navigation, Garlick's Arch and around the village school. The local area is already very busy and congested, and we need to preserve the "village feel" in these rural areas for the sake of existing residents and their children as well as anyone looking to move to the area, part of the charm of the villages surrounding Guildford is that you can live in areas with outside green spaces with the benefit of having a large town centre close by. The removal of Green Belt status will open the door to more planning applications to greedy private land owners to "fill in" these current Green Belt spaces if you change the status of these leaving them exposed. For these reasons I very strongly object to these proposed changes and we will do everything we can to stop them happening.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

3. **Removal of the Horsleys from the Green Belt (Policy P2 Green Belt)**

I object to this policy.

The draft plan proposes that the Horsleys be removed from the Green Belt. The NPPF (Para 83) requires any change of Green Belt Boundaries to demonstrate exceptional circumstances. The Written Ministerial Statement of 1st July 2013 clarified that the single issue of unmet housing need is unlikely to outweigh the harm to the Green Belt necessary to constitute such exceptional circumstances. The Plan states (Policy P2 para 4.3.16) "We consider exceptional circumstances exist to justify the amendment of Green Belt boundries in order to facilitate the development that is needed and promote sustainable patterns of development". No objective evidence is offered of any exceptional circumstances justifying the Horsleys' removal from, and thus permitting intensive development in, the Green Belt.
Further, Policy P2 states (para 4.3.19) that a Green Belt Supplementary Planning Document is being prepared, and that this document will provide further detail and guidelines to help inform development proposals. It is unacceptable that a policy of this sensitivity be promoted for final consultation without this detail.

The Plan is therefore not only non-compliant with the NPPF, but has not been positively prepared.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

7. Extension of the East Horsley village boundary

I object to this proposal.

The plan proposes that the area south of the A246, including the Warren, be included within the newly proposed "village boundary". This is unacceptable. Not only was this proposal not included in the earlier version of the plan put out for consultation in 2014, but no explanation is offered of the intended planning effect of this designation. The A246 is an obviously defensible boundary for the Green Belt. There appears to be no obvious purpose for creating this new village boundary other than a subterfuge to enable a future in setting of this area. No justification exists for removing the area south of the A246 from the Green Belt. The proposal is therefore in breach of the NPPF (para 83.)

This area south of the A246 has a true semi-rural character, evidenced by generous plot sizes, wide separations between dwellings and a uniformly lower density than that obtaining in the currently defined settlement area of East Horsley. All previous development in this area has (rightly) had to be consistent with maintaining the openness of the Green Belt, and ending this status would wreck its character and amenity. Even if it were to be accepted (which it is not - cf above) that the built environment within the existing settlement boundary of East Horsley was out of character with the overall openness of the Green Belt, this clearly is not true of the area south of the A246, which accordingly, should continue to be included in the Green Belt. To conclude otherwise would be to legitimate an obvious future "land grab" designed to enable wholly inappropriate development to the deep detriment of the existing residents.

8. Infilling (Policy P) Green Belt

I object to this policy.
Not only are the Horsleys to be removed from the Green Belt (cf above), but infilling is to be allowed within the identified settlement boundaries of "East Horsley (south)", as well as outside the inset boundaries, where it can be demonstrated that the site is as a matter of fact on the ground within the village (sic).

To the extent applicable to the area south of the A246, this proposal is completely unacceptable. Per the Council's own Guildford Borough Council Green Belt and Countryside Study Vol IV at para 13.13 the area south of the A246 is classified as a low development density. The infilling of "gaps", or "small-scale redevelopment of existing properties" (para 4.3.25 ff) in this area would utterly compromise the existing low density, and create a self fulfilling rationale for later formal insetting. This is little short of legalised vandalism.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the removal of Send from the Green Belt.
I object to the building on the Green Belt at Send at Garlick's Arch, Clockbam Nurseries and Send Hill because all the development that is really needed can be accommodated in Guildford's urban brownfield areas much closer to existing transport hubs.
I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day.
I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25.
I object to all the proposed sites in Send because they were not included in the previous consultation in 2014. Unlike the rest of the borough Send has not been properly consulted and all its sites have been changed substantially.
I object to the development at Garlick's Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks' notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.
I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to all erosion of the Green Belt, since this is the only safeguard from further air pollution.

I object to any "insetting" (i.e. removal) of any villages from the Green Belt. I object to the disproportionate amount of development in one area of the Borough. I object to the lack of any evidence for the alleged housing need numbers. I object to the last minute inclusion of new sites with less than two weeks notice. I object to the limited consultation period.

Once the Green Belt is lost... it gone for ever. The Conservative election mandate was to SAVE THE GREEN BELT.

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional
circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "...the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.
Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I therefore object to the "Planning moves to build over Burnt Common and other areas surrounding Send.marsh." This will greatly affect the clay's natural structural. In effect: by concreting over the Green Belt fields, which are the collection points for rain water. This waters percolate down into the ground resulting in ground water. In other words; it's this water which keeps the clay in a state of balance and the structures that now sit on it.

**TO SWIM: due to Flooding**

Sendmarsh is on the cuff of flooding.

Throughout the area, East Clandon Stream flows. Water flows passed Send.marsh at depth of 2 to 3 inches & upwards of 10 to 12 feet.

A flood barrier was put in place around Send.marsh in 2006-8. In winter 2014/15, water levels were within 2 feet from the top of this barrier. Having Burnt Common along with the surrounding areas; concreted over: will increase water run-off into the East Clandon Stream making flooding inevitable & repetitive.

The double whammy comes from both of the above and will result in: -

1. Home Insurance costs rising due to:
   1. Long term subsidence's problems.
   2. Short & long term flooding issues.
2. Property values for Send Marsh will drop.

Until all these issues are fully resolved and solutions put in place, both politically & technically; no planning approval should be given.

I object to; tweaks in the local highways infrastructure; which will not match the vast increases in motor transport; caused by this "Massive Proposed Development."

This Local Plan does not come close to any relevant meaning of word "Plan," in fact it only reflects gloss of a politics!

I object totally to The Local Plan because, it does away with the "Green Belt" It also tramples over most, if not all, of the current & future, electorates' wishes.

**GREEN BELT**

The Green Belt was established principally to protect London and the south east area from unrestricted urban spread. This has been successful and ensured that historic towns and villages have largely retained their distinctive nature. Perhaps most critically, it provides a safeguard to the countryside which is increasingly under threat. Having the Green Belt provides both recreational opportunities for people living in the surrounding urban areas as well as being the lungs of our ever increasingly built up environment. We are stunned that when we are placing globally such a high priority on what is happening to our environment that nothing short of vandalism of the Green Belt is being considered. Nearly two thirds of the proposed developments will be made on Green Belt land.

The Green Belt must remain intact with its existing boundaries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I wish to make the following objections to the local plan

1. **Not protecting the Green Belt**
   I object to the proposals to remove Ripley, Send and Clandon from the Greenbelt. There are absolutely no special circumstances to do this. Once taken the green belt is lost forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object removing Send Business Park from the Green Belt (4.3.15).
   Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

I write to object to the sudden change of the local plan allowing no time for Send to be consulted. It is very different to the previous consultation in 2014.

I object, most strongly, to Send being taken out of the Green Belt. There is no justification for this and it will result in Woking and Guildford becoming one huge conurbation. There are plenty of brownfield sites that should be used first and NOT the Green Belt.

<td>I am strongly opposed to the removal of West Horsley from the Green Belt. It is this protected open space which gives West Horsley much of its character. The removal of this protection will have a significant adverse effect on the nature of the village and ultimately lead to a conurbation stretching all the way from Leatherhead to Guildford. I do not believe that the current circumstances warrant any change in the Green Belt status here in West Horsley. The urbanisation that would follow removal of Green Belt status would be completely at odds with the village as it is now. The potential development of around 500 homes on Green Belt land in this parish would be out of all proportion to the existing community and its infrastructure. The nature of such housing developments, by virtue of their type and density, would markedly change the character of West Horsley.</td>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposal to inset Send Business Park from the Green Belt. Its in the greenbelt, clear and simple. Further, Tannery Lane is a small rural lane with poor access and it simply cannot accommodate more traffic. Traffic is already a nightmare and anyone who uses the lane knows that. Its cannot take more and the village cant take more. Once again, you just seem determined to find ways to bypass Green belt protection (despite the fact its clearly within and surrounded by greenbelt) and it is unacceptable. If you are able to get this through it simply opens up the option for further development, and further (irrevocable) destruction of the greenbelt you should be protecting. GBC needs to step up and stop ANY intrusion or impact to the greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3038  Respondent: 10952705 / Moira Maidment  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council's to give away and once it is gone it is gone forever . Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of "only" 1.6% of the borough's Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an "acceptable" percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council's growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers' hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I
I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the "insetting" of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to include them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the "openness" of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF's other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To "inset" two-thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed "insetting" and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17's aim of "empowering local people to shape their surroundings" and other NPPF provisions.

Paragraph 4.3.17 states that "the general extent of the Green Belt has been retained." I believe this should be deleted as an untruth.

In addition I object to the proposals to remove from the Green Belt the so called 'strategic sites' of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick's Arch (A43) and all other strategic sites.

National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a 'special circumstance') to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

I object to all strategic sites proposed in the draft Plan to be built in the Green Belt.
1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or
other. The plan says that “allocating these sites does not grant planning permission for development.” However,
each of the sites will be removed from the Green Belt and will be available in principle for development and
non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for
the thousands of detailed comments the Council have received about individual sites ever since the
Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its
first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly
conducted.

1. The housing needs assessment is flawed in various respects and overstates housing. In addition since it was
produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the
previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to
consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

1. Having determined housing need the Council was entitled to consider constraints before determining the housing
number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to
constraints. The scarcity of sites outside the Green Belt as Ill as its infrastructure (most notable roads)
considerations all represented constraints which should have been taken into account in determining the final
housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First
I believe constraints should have been applied. Secondly I believe the Council did not properly consider
constraints and that their decision making process was flawed and thus subject to being set aside by the
Inspector.

1. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt
sites should not be included in the plan unless “exceptional circumstances” for development are proven in
relation to that specific site, as stipulated repeatedly in the N

The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.
There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt
against the very special circumstances which are

argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have
appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt
then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at
will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. **What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

---

**Comment ID:** PSLPP16/8847  **Respondent:** 10953793 / Hugh Thomas  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I OBJECT to the Local Plan because it seeks to build on Green Belt land unnecessarily. The work of Professor Anne Power at the London School of Economics, amongst much other expert research, clearly demonstrates that there is more than sufficient land to build all the houses that are needed without taking any of the Green Belt. In our area several studies show that unused brownfield sites in Guildford Town itself are capable of yielding most of the required land. GBC has not properly explored the capacity which is available there or on brownfield sites elsewhere in the borough, which would have provided a sensible starting point since GBC own many of them.

I OBJECT to the Local Plan in that GBC’s approach to the Green Belt introduces a concept of grading its quality. This is an alien concept, not recognised in law. Of course some Green Belt is seen to be better than other Green Belt but the law does not make any distinction, nor should it. It depends who is looking at it and from what standpoint they are looking. Green Belt is Green Belt and it is not for GBC to stand in judgement on what bits it thinks are worth keeping and what are not.

I OBJECT to removing Send and other villages from the Green Belt. The Green Belt was intended to be permanent, and its permanence was enshrined in law through the National Planning Policy Framework, reinforced by the NPPG and a succession of Ministerial guidance statements. For all of this to be overridden requires “special circumstances” which do not exist in the case of Send.

I OBJECT to all four proposed sites in Send because they are all in the Green Belt and not one of them displays the very special circumstances which would be needed in order to outweigh the substantial harm caused by reason of inappropriateness.

I OBJECT to any sort of diminution of Send’s Green Belt because it provides an essential buffer stopping Woking and Guildford becoming one conurbation. It has served this purpose effectively since its inception and should continue doing so for the benefit of subsequent generations living here. No group of councillors, especially without a mandate, has the authority to impose a different future on residents.

I OBJECT to any reduction in Send’s Green Belt because so much land in Send provides the setting for the beautiful Wey Navigation corridor, which is a conservation area that enhances biodiversity, is visually important, provides a valuable leisure facility and combined with the surrounding lakes an exceptional habitat for a wide range of bird species and other wildlife.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, in addition to Wisley Airfield (site A35) and Garlicks Arch (site A43)

There are no exceptional circumstances (as required by the National Planning Policy) for these villages and sites being removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to this policy:

Comments: Asserting unmet housing need is not an argument for building on green belt land. Much of this land is farmland, burying it under tarmac, is an insane policy when food security is precarious and may become more so, it would be negligent not to consider the needs of future generations. The sacrifice of green belt to produce commuter dormitories cannot be justified. The attempt to justify building on Green Belt ‘in order to facilitate the development that is needed’ is vague and not supported by guidance from Nick Boles office.

It is disingenuous to move to remove villages from the Green Belt, encourage development and then state that only 1.6% of the borough’s Green Belt will be lost. The extreme elasticity of the definition of ‘permanently’ and ‘permanence’ expressed in this document is reminiscent of Alice in Wonderland

“When I use a word,” Humpty Dumpty said, in rather a scornful tone, “it means just what I choose it to mean—neither more nor less.” “The question is,” said Alice, “whether you can make words mean so many different things.” “The question is,” said Humpty Dumpty, “which is to be master—that's all.” – I would recommend that the authors of the Draft Plan seek guidance from the Oxford English.

Taking Ripley and Send, and other villages out of the Green Belt is completely unacceptable and paves the way for destruction of the Villages in perpetuity, to inflict this burden on residents who live in the Villages and impact the historic and unique quality of the area itself.

The next policy comments reflect my concern that sites are identified for development without attention being paid the overall impact on the local area, the contribution to creating a single highly urbanised area where there were villages of individual character and charm.
I object to the proposed development at Wisley airfield due to environmental impact and destruction of the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy P2 – Green Belt: I OBJECT to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. The huge developments proposed for the North East quadrant of the borough (Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send) will have a severely detrimental effect on the amenity of the area.

I OBJECT that Policy P2 is not met where it states that Green Belt should be protected. I object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt, with little consideration being given to redevelopment of brown field sites.

I OBJECT to the changes to Green Belt boundaries. This is not justified by any very special circumstances. All the Green Belt sites meet the five purposes of the Green Belt.

I OBJECT to building on the Green Belt because the essential characteristic of Green Belt is its openness and permanence (National Planning Policy Framework paragraph 79).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT that GBC are contravening the NPPF framework stipulation in paragraph 87 with the proposed developments at Gosden Hill Farm, East and West Horsley and Garlicks Arch, Send. Paragraph 87 states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” All of the proposed developments are out of proportion to the surrounding area and none qualify for the exceptional circumstances required to take them out of the Green Belt.

I OBJECT specifically to the proposed building on Gosden Hill Farm on Green Belt designated to prevent West Clandon being absorbed into a sprawling urban environment. The proposed development would be four times the size of the village and is completely disproportionate and unjustified.

   I am writing to Guildford Council to express my great concerns on the proposed development of the Green Belt in Surrey.

   What give's you the right to remove this land from the green belt?

   **The NPPF (National Planning Policy Framework) makes it clear that the fundamental aim of the Green Belt policy is to prevent urban sprawl by keeping land permanently open.**

   **It also explicitly states that once established Green Belt boundaries should only be altered in exceptional circumstances.**

   **There are no exceptional circumstances!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!**

   **The whole point of the Green Belt is to stop urban sprawl, your destroying the Green Belt to extend urban sprawl? Insane!**

   Green Belt Guidelines enclosed as it's obvious you haven't read them.

   The UK has voted to leave the EU, so 2.9 million people will be leaving soon, so no reason for all this devastation of the beautiful Surrey Green Belt.

   These are pictures taken today of the land proposed to be taken out of the Green Belt for the Housing for Garlick's Arch.

   **I object to not protecting the Green Belt (Policy P2)**
   I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider...
this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and
the consultation period restarted after the correction has been given the same distribution as the original statement. (I
assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that
the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of
these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that
infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It
is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing
development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the
NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored.
Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems
almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the
Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I
cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could
quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of
opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their
surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as
an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield
(A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires
there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special
circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging
into one another. The significant development in these villages will result in the character of these villages being lost and
the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support
including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common,
with surplus land that could accommodate a further development.

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.
1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy P2. – I object.
The requirements under this policy are a consequence of the flawed Strategic Housing Market Assessment which over-estimates future migration trends, on top of which arbitrary, unsubstantiated factors are applied. There is no popular desire to see large-scale inward migration as envisaged in the Draft Local Plan, which will inflict extra, large pressure on local infrastructure and degrade the quality of life for the population.
The proposal to remove West Horsley and other rural villages from the Green Belt is not consistent with the NPPF in that it does not reflect in fact ‘the great importance’ that the Government attaches to Green Belts. There is no proven need for these removals. The Strategic Housing Market Assessment is flawed in over-estimating the amount of inward migration that will occur; in this regard it is inconsistent with latest estimates from the Office of National Statistics, and with projections of national immigration made by Government (‘down to tens of thousands rather than hundreds of thousands’), and now more likely to be achieved following ‘Brexit’.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am objecting in the strongest possible terms to the proposed removal of green belt status from any part of the Send Ward (Send, Send Marsh, Burnt Common).

In Guildford Borough Council’s proposed submission Local Plan – June 2016 strategy and sites forward by Cllr Paul Spooner – Leader of the council he states ‘The Borough of Guildford is a very special beautiful place for all who live and work here. We want to keep it this way for generations to come.

- If this is so I cannot begin to understand why Guildford Borough Council is contemplating ruining the environment it is supposed to protect.
- The Removal of any areas of Send, Send Marsh and Burnt Common from the Green Belt Should be vigorously opposed so as not to radically change or damage our village environments.
In the ministerial forward of the national planning policy framework 2012 it states: ‘our national environment is essential to our wellbeing……….To the benefits of body and soul’ and ‘Planning must be a creative exercise in finding ways to enhance and improve the places in which we live our lives’

- Removing green belt status would certainly not enhance or improve our well-being or the places in which we live.

The national Planning Policy Framework 2012 (Section 9.79) States that: ‘The government attaches great importance to green belts. The fundamental aim of Green Belt Policy is to prevent urban sprawl by keeping land permanently open; The essential characteristics of Green Belts are their openness and their permanence’

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In the ‘Proposed Submission Local Plan – June 2017’, Guildford Borough Council has added Send Business Park to the list of sites they want removed from the green belt.

I write to object to the removal of Send Business Park from the green belt.

All green belt land must be protected – even previously developed sites. If we allow this, we will never get it back again and it will become easier for councils/developers to put developments on other green belt land. My previous objections also therefore apply to this objection response as well.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. I do not understand why the Council has permitted this. It seems to amount to a war of attrition being waged on the public by the Council in conjunction with developers. Many residents, including myself, are too busy to write, repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014.[1] Some residents have concluded that commenting is a waste of time as the Council have their own agenda and are determined to see it through.

I believe that all Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. It is simply wrong to include them in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing to object to POLICY P2 – Green Belt

I object in the strongest possible terms to the insetting of 14 villages from the Green Belt, and the proposal that infilling is acceptable within a further 12 villages within the Green Belt. I am also concerned that “infilling” is also proposed outside the settlement boundaries of 11 further villages.

Greenbelt is a binding covenant between the executive and the people and the proposal to inset is a travesty.

While I accept that the definition of “insetting” is valid in planning terms, I think that an inspector should note that it is a highly misleading as most people are unaware that it means “removing from”. In the same way as the electorate were misled over Brexit, they are being misled by jargon that is not clearly explained.

The Green Belt is supposed to be protected as a matter of national and local policy, Policy P2 seeks to justify development in a supposedly protected area, in breach of clear local manifesto commitments and contrary to previous responses to public consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• Profitable film locations (e.g. Shere)
• Future economic potential such as mineral extraction (even fracking)
• Natural beauty, landmarks, open space, rural views and sight lines
• Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)[1]

These assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

The Council argues that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold.

I am not opposed to appropriate development in the Green Belt, but I fail to see why a system of fair burden-sharing of new development cannot be applied to the borough’s existing settlements in proportion to their size. The plan dumps hundreds of houses on the Horsleys, while burden sharing would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth. It is reasonable to ask urban Guildford, with a considerably larger population of semi-rural East Horsley for instance, to accommodate a larger proportion of new homes over the plan period.

The current proposal allows speculative development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates that few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much-needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning.

I particularly protest at the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I do not agree that settlement boundaries should be hugely extended in many villages. I am against the infilling that is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages reflect the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hellbent on self-defeat.

I believe this policy is seriously flawed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  

I object to Green Belt – POLICY P2 , POLICY P3, POLICY E5 and sites

It has been established that exceptional circumstances must be demonstrated in order to develop Greenbelt yet despite the weight of public opinion against weakening of this policy, 70% of proposed new housing development will be in the countryside, of which, 58% will be in Greenbelt.
Quite clearly, this is not an exception and no attempt is made to demonstrate exceptional circumstances, in line with the requirements of the NPPF. The sinister and misleading term “insetting” continues to be used. Most laymen think this means adding to the Green Belt and protecting a village from development, rather than the contrary. I am concerned about the continued policy of insetting villages since restrictions within the settlement boundary will assuredly lead to loss of character. The Rural Economic Strategy covered in 4.51a, promoting affordable homes everywhere in the countryside including the AONB as a main aim, is a mechanism for promoting overdevelopment in our countryside. It has not been subject to full public consultation and is based on data, which is not up-to-date.

Three major strategic sites – Blackwell Farm, Wisley Airfield and Gosden Hill Farm – are in the Green Belt. Previous consultations show that, in line with the NPPF, the public would prefer to use brownfield land in the urban area first.

Only a few days ago on 18th July 2017, The Communities Secretary, Sajid Javid said “As we have made clear in the Housing White Paper we expect brownfield sites to always be the priority to meet our housing need” in relation to Bradford’s Local Plan. Yet GBC continues with its plan to bulldoze the green belt and not use brownfield land, of which it has plenty.

Further to my objection dated 20 September 2014 I am again writing to object to the proposed settlement boundary change in Shalford in respect of the area behind Shalford Village Hall. This area of land sits in the heart of the village and is essential to its character and rural feel of the village, despite only being a couple of miles from Guildford. I live in [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and any future potential development on this site will have a material detrimental effect on my property as the land in question sits above, and looks down upon, my property and garden.

There have been multiple attempts to change the settlement boundary in respect of this land. This was suggested in the last version of the local plan and was vehemently objected to by over 700 local residents. This latest attempt comes despite the council not responding to or addressing the multiple objections to the last attempt. In fact, it would appear that the council has brushed the previous objections 'under the carpet' in the hope that these will not be raised again this time. This is disappointing, to say the least. By repeated attempts to, essentially, do the same thing (i.e. rezone this land) it brings a heavy cloak of suspicion down on the council, as the only reason that can be seen for bringing these changes about appears to be to facilitate future development on this land. If this isn't the intention, then it must be asked why the council are wasting time and money on this when it could be to using this on value adding activities.
Repeatedly asking the same question also suggests that the council is hoping that the local residents will get 'objection fatigue' and start to tire of objecting, allowing this proposal to sneak through. This is not democratic - in fact, it’s the opposite, with locals beginning to think that the council has its own agenda regardless of what the local residents think. If the public don't engage because they do not believe that they will be listened to, this cuts across democratic principles.

I would also like to draw you attention to the following objections:

- A report was provided to the council in 2007 (the Landscape Assessment Study, 2007 by Chris Burnett), which reported that Shalford requires protection not further development, with the area sensitive and vulnerable to change. This area requires protection from the council, not rezoning.

- The land behind the village hall was donated to Shalford Parish Council a long time ago by a local villager, for the SPC to protect as open green field land for the whole village to enjoy ‘in perpetuity’. The council previously thought that the green belt and AGLV status would protect the land forever and so they could honour this resident’s wish of it being protected ‘ in perpetuity’. This brings into question as to why there should be any change.

- As GBC policy is to protect AGLV land unless in exceptional circumstances it makes no sense to move the settlement boundary behind the village hall as this would open up this green belt and AGLV land to development. No special or exceptional circumstances appear to have been stated.

- This steep elevation on this land would mean that any eventual potential development which could take place would be clearly visible from the village green and the surrounding village. The land is 32 feet higher than the nearby main road and over 25 feet higher than the village hall. As such these elevated fields very much contribute to the openess of the green belt and the attractive village setting - they are in fact like a green oasis of peace which the whole village can enjoy when either playing tennis, bowling or attending meetings or functions in the village hall. This field acts as the green lungs for the already 'developed' village and as such are something which so many people feel passionately about protecting for future generations to enjoy.

- Around the field behind the village hall there are already existing established hedges which have been in existence since before the 1950s. These established hedge rows and fences clearly mark the edge of the settlement boundary and have done so for decades, however they are not visible from aerial maps which also cannot pick up the unusual elevation of the land behind the village hall when calculating settlement boundaries. These form clear ‘defensible’ boundaries to de-mark the settlement boundary and so I see no need to alter the boundary for this reason.

- The Shalford Settlement boundary was originally drawn so that the land behind the village hall which is green belt and AGLV land remains outside of the settlement and thereby retains its critical protected status.

- Local traffic congestion is already a major issue with Chinthurst Lane, where the access would be to the site behind the village halls, already highly congested at rush hour. Chinthurst Lane has also become a favoured parking spot for commuters at the local railway station - which makes the lane almost impassable during the working day. This has resulted in cars mounting the kerbs by the Common to pass each other. Further up Chinthurst Lane, it is a narrow country lane without pavements and is already a dangerous place for young and old to walk along. As someone with a young child, this is of considerable importance to me.

In addition to the concerns above, any development (which surely must be with the intention behind the proposed boundary change) will affect the sight lines from the back of my property as this area is noticeably higher than the rest of the village. Due to this height, any possible future development will be able to look straight down into the windows at the back of my property (and a significant number of the surrounding properties). Of considerably more concern to me is that this area of land provides a significant drainage utility for the lower village. Even now, there is some 'run-off' which can be easily identified running down alongside Chinthurst Lane. The scale of this was demonstrated during exceptional wet weather in winter 2013/2014 when the corner of the Common and Chinthurst Lane flooded on a number of occasions (as the lowest point in the area). Development on this site will prevent any existing drainage resulting in increased surface 'run-off' which will run down hill and is highly likely to cause flooding to the lower lying properties (including my own) and the Common on a regular basis. Guildford Borough Council has a duty to ensure that this does not happen.
I very much hope that the Council appreciates the strong level of feeling in Shalford with respect to the proposed settlement boundary change and is willing to see sense and not make any such change to the boundary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to one specific aspect of the consultation process which is fatally flawed. The Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the green belt." This is demonstrably untrue and I believe it is deliberate untruth which compromises the consultation process. Even the council's position in the draft Plan is that exceptional circumstances exist so as to justify taking areas out of the Green Belt - which by definition has a detrimental impact on the Green Belt. This unqualified statement cannot be justified and is simply untrue. By giving this unqualified assurance to residents that there is no detriment to the Green Belt residents may have been reassured and dissuaded from responding to the consultation.

I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (We assume the document was delivered to most houses in the Borough.) I have no doubt that that people will argue before the inspector that the consultation process was flawed and ineffective because of this.

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance' and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt
Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that “… the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.
GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

As well as Objecting to Three Farms Meadows, Former Wisley Airfield being sited for development

I Object to Garlicks Arch Ripley being in the draft Local plan for housing

I Object to Land for new north facing slip roads to and from the A3 at Aend Marsh/Burnt Common

I Object to Land at the rear of the Talbot Pub Ripley as this is further Green Belt Development

Green Belt land MUST be protected at all cost

I Object to The Paddocks Rose Lane
as this further extends development in the Green Belt

All Land which is GREEN BELT is for common use as open spaces and it is not right to include these special areas as possible sites for planning

Kindly remove them from the Local Plan
Please use your derelict ugly sites in and around Guildford Centre to create housing jobs pleasant developments, shops and leave the Green belt alone. Rural villages should grow organically

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan as it impinges on the Green Belt and Ockham is a tiny rural historic village, yet G B C still includes former Wisley Airfield as a Strategic Site.
This will engulf Ockham, cause the loss of actively farmed land, affect air quality to the detriment of all visitors and locals in the area to a dangerous level, and there is no infrastructure

The following are important key reasons:

1. LOSS OF THE GREEN BELT
   I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Please Keep our Surrey villages in the green belt as Councillors have promised us - Once our precious Green Belt is Gone it is GONE FOR GOOD

G B C has plenty of derelict sites to build on - So please use them. Make this attractive for developers. Make developers give up their land banks

As a priority protect green belt land - Richard Rogers renowned architect and Government advisor has said there is no need to build on the GREEN BELT< SO PLEASE SAVE IT
Why not build on your unsightly unused sites first and leave the Green Belt Alone?

Please protect the green belt.

Please leave countryside alone.

Please Leave GREEN BELT land alone.

Please Leave useful agricultural land alone

Please visit the farmland in Ockham and Ripley and see the traffic at peak hours at Ripley High Street and off the A3 between Junction 10 and Ripley turn off

Thank you, you will see how this rural community could not cope with losing green belt sites and having thousands of extra dwellings imposed.

Please do not be remembered for making beautiful historic villages into urban sprawl.

Please be remembered for conscientious thoughtful planning using unsightly sites, and leaving green belt alone

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the removal of Send from the Green Belt because it helps to separate the village and surrounding country side from Woking and Guildford dense housing.

I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances as already exist a permanent site at Slydefield which doesn’t endanger the erosion of the current Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the complete failure/ lack of will/enthusiasm of GBC to identify sufficient brownfield sites within the urban area which should be identified/targeted first for any development. The open countryside and the Green Belt should be looked at after the availability of brownfield sites have been exhausted. I object to the failure to include the Town Centre Masterplan 2015 within the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'specialcircumstance' and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site. Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from...
the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that “... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Subject: I OBJECT TO THE 2016 DRAFT LOCAL PLAN

I am writing to inform you of my many objections to the Guildford Local Plan.

I strongly object to this destruction of the Green Belt, an area of land protected to safeguard the countryside.

I strongly object to the extraction of Ripley, Send and Clandon from the greenbelt and wish to firmly oppose this. The greenbelt was created to protect the unrestricted sprawl of large built up areas and I believe that the removal of these villages from the greenbelt would serve to encourage this sprawl.

We object to the proposal to remove East Horsley from the green belt & do not feel that the "exceptional circumstances" have been fully demonstrated.

-we object to the extension of the settlement boundaries since no valid reasons have been given for this and it appears the aim is to simply increase the land available for future additional development

Finally I note that the Proposed Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. I fully support this policy. However, unfortunately GBC appears to be in breach of this same policy throughout the Local Plan! In fact 65% of developments will be made on land that is currently Green Belt so how does this statement stand up against such a blatant attack on the green belt within the local plan?

*Sadiq Khan, new Mayor of London, has instructed London planners NOT to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on greenfield sites in Normandy.)*

OBJECT TO SEND VILLAGE BEING REMOVED FROM THE GREEN BELT.

The Green Belt was intended to be permanent as required by the National Planning Policy Framework.Send’s Green Belt provides an essential buffer between Woking and Guildford providing an essential area preventing the area becoming one sprawling conurbation.Specifically I live at the bottom of [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] directly adjacent to the
River Wey. There is a plethora of wildlife on the Wey to include deer, swans, cormorants, migrating geese, fox, badger, numerous fish species, snakes, barn owls, birds of prey, bats, kingfisher to name but a few species. Increased urbanisation and the associated congestion and the effects of an increase in population will bring an increase in pollution, pressure on the river with increased flood risk that will be both aesthetically detrimental to the scenic beauty and have a significant negative impact on both the wildlife and incumbent long established human habitation.

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)
This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that “... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.
In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I strongly object to this policy.

The local plan document states that “the main aim of Green Belt is to prevent urban sprawl by keeping land permanently open. Green Belt also provides opportunities for people to access the countryside, to protect land for agriculture, forestry and similar land uses, and for nature conservation”.

Your document states that “national planning policy requires that Green Belt boundaries are only amended in exceptional circumstances”. The housing need appears to be the sole purpose of removing our villages from Green Belt. While there is a general need for new dwellings in the UK, it does not support a case for “exceptional circumstances”.

Removing villages listed in para 4.3.13 of the plan document, will give way to a burst of developments, most of which are likely to be of a commercialised urban nature which will inevitably result in losing the rural appeal of the area. It will destroy the existing surrounding nature by effectively allowing London boundaries to overflow. The beauty of Surrey Hills has earned a reputation that has attracted many visitors from the UK and abroad over the years, to the extent that our surrounding areas were selected to represent Great Britain on numerous tournaments of 2012 Olympics. Areas surrounding our villages continue to be regularly enjoyed by the British sports enthusiasts and visitors all year round.

The area has been the pride and joy of many residents who tirelessly work on maintaining and keeping our precious nature, accessible to all, at our door step.

I urge you to re-consider and to save our open land, nature and the villages for future generations by keeping Green Belt boundaries unchanged.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
3. Policy P2 states that the Green belt will be protected against inappropriate development. I am totally opposed to the removal of West Horsley from the Green Belt because the exceptional circumstances have not been proved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. **Policy P2: Green Belt:** I object to the proposal to remove any land at and around Send from the Green Belt. The fundamental aim of the Green Belt is to limit urban sprawl. There is currently little open land remaining between Woking and Guildford and further encroachment would endanger the existence of Send as a village, whilst removing yet more countryside in an already pressurised rural environment. The creation of a Guildford-Woking conurbation which would emerge from this sacrificing of our Green Belt would change the nature, not only of our countryside, but also of Guildford itself, which maintains its attraction as a charming ancient market town in the ‘stockbroker belt’.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Green Belt – I OBJECT. I object to the insetting of 14 villages from the Green Belt, and the proposal that infilling is acceptable within a further 12 villages within the Green Belt. I am concerned that “infilling” is also proposed outside the settlement boundaries of 11 further villages. Essentially, all the villages within the Green Belt are now vulnerable to extensive further development. Green Belt is supposed to be protected as a matter of national and local policy, but this policy seeks to justify development in a supposedly protected area, in breach of local manifesto commitments and contrary to previous responses to public consultation.

My comments on the Guildford Local Plan are as follows:

The Green Belt

The Metropolitan Green Belt is one of the best legacies our forefathers left us and needs upholding, respecting and maintaining AS IT IS TODAY in order that we, and future generations, may benefit physically, emotionally and mentally from enjoying the expanse of fresh air which is hugely enhanced by the greenery around us.

Build houses elsewhere - not within the Green Belt!

The Horsleys (East Horsley and West Horsley) must absolutely remain within the Green Belt.

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that “… the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**
I object to the proposed local plan:

1. The reduction in the number of new homes in the Green Belt is insufficient. There is still an enormous number of new dwellings proposed for construction in the Green Belt, particularly when considered in proportion to the number of existing homes.
2. It is proposed that the area east of the borough takes an even higher number of dwelling in the Green Belt than before.
3. Many other councils have chosen not to constrain overall housing growth to protect the Green Belt, yet Guildford has not. Although the objectively-assessed housing target has been reduced since the 2016 plan to 12,466 dwellings by 2034, this still represent a 25% growth for Guildford, which is disproportionate.
4. Nothing has changed since last year’s consultation to address the sustainability aspects of the West Horsley development sites, as is required by national policy requirements. No matter how much people are encouraged to travel on foot or by cycling, each new home will need a least one car to give access to Horsley station, shops, medical centre, library, etc.; this is easily demonstrable.
5. More apartments are needed in Guildford, not more retail space. The rise of on-line shopping and the reduction in physical shopping is clearly documented and many authoritative reports support that view that the trend will continue.
6. No changes have been made to the proposal to inset both East and West Horsley from the Green Belt. Policy P2 states that the Metropolitan Green Belt will continue to be protected against inappropriate development. I object to the village’s removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries.
7. The overload of local social and physical infrastructure is not addressed. Increased demand for access to medical facilities, schools, station parking, roads, and particularly disposal of waste water remain at large.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I moved out of London, over 6 years ago, after having lived there for more than 10 years. We are a young family and made a conscious decision to live in a healthy and green environment. We found Horsley to be that place. Surrounded by clean air, peace and quiet, no light pollution at night, woodland and nature in a small community. A perfect place for our kids and us to be outside and be a healthy happy Family. I believe strongly that in protecting the green belt you protect it for the future. Not only for those who live here but also for those who visit. Once it’s gone its gone!

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt). This yet another example of an ill thought out plan and approach. Once taken the Green Belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl with these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost - to the serious detriment of residents and visitors to the area - and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site. Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

I object to the Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the former Wisley Airfield.

I object to proposals to remove Ripley, Ockham, Clandon and Send from the Green Belt. There are no exceptional circumstances for removal.

I object to a plan which proposes that over 70% of new housing be built within the Green Belt.

I object to any reduction or tinkering with the Green Belt. There is enough brownfield land to use without encroachment on the Green Belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I OBJECT to the removal of 15 villages, including Ripley and Send, from the green belt. This will lead to wholesale, and often inappropriate developments.

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brownfield sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider
this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

As a West Clandon resident I am extremely concerned that the removal of these sites will result in the merging of our Green Belt village with the developments on the outskirts of Guildford, making a complete mockery of the term Green Belt. Our village character will be lost for ever if this happens, so we must try above all else to retain our Green Belt, not build on it.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I objected to the 2014 Draft Plan and frankly can see little difference in the current plan to which I again object.

I object most strongly to any building on the GREEN BELT.

I object to any villages that are currently in the GREEN BELT being removed from it, such as the Horsleys, Ripley, Send, Clandons. There can be no justification for it as there are plenty of BROWNFIELD sights still available to accommodate the suggested requirement for some 693 homes per year for the next 20 years.

I object to the possibility of Guildford being increased by some 25 per cent due to the foregoing predictions.

I object most vigorously to any Brownfield sights being used for further factories, offices, warehouses and shops that would not include very substantial affordable housing in their planning footprints.

I object very strongly to any change in current settlement areas.

I object strenuously to any diminution of the current GREENBELT (National Planning Policy Framework Para 79).

I object to any widening of the village boundaries to encroach upon the current Greenbelt.

I object to the scale of new building throughout the Guildford borough which can not be reasonably substantiated and appears completely unfounded and a figment of some distant planners imagination.

I object most strongly and specifically to the proposed building on Gosden Hill Farm which is in the GREENBELT and designed to keep West Clandon from being absorbed into the Guildford sprawl.
I object again most vociferously to any development of Garlick’s Arch with a view to creating a spur off the A3 going Southbound or Northbound as the surrounding infrastructure would be totally unable to handle any increase in vehicular traffic. Our already overcrowded village roads would not be able to cope with any increased traffic and would cause a highly increased possibility of injury or death to the local population as sidewalks are virtually non existent or indeed too narrow to accommodate the current village populations.

I object most strongly to any change being made to Newlands Corner, an area of Outstanding Natural Beauty that is FREE to everybody to enjoy.

It is fact that Surrey County Council has no funds available to repair many of the roads in and around West Clandon - specifically the junction of the A247 and A246 at the South end of West Clandon, and it would appear the Highways Authority have no interest.

The GREENBELT is sacrosanct and must be fully and totally protected at all times for future generations.

I object to the Local Plan on the grounds of development of green belt land which should be preserved as an amenity not just for the present but for generations to come.

No consultation has been carried out directly with local residents and the impact on the area would be enormous, not to mention the detrimental effect on already clogged local roads.

There should be NO BUILDING ON THE GREENBELT without local resident agreement. This greenbelt destruction is robbing the next generation of their heritage and driving up pollution and traffic. The purpose of green belt is to prevent urban sprawl. Why should land that has previously been designated greenbelt be allowed to have that status removed? If it was deemed that it should be greenbelt then, it is even more important now that it remains greenbelt as pressure from developers grows.

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.
I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

GUILDFORD PROPOSED LOCAL PLAN 6/6/2016 - FIELDS BEHIND SHALFORD VILLAGE HALL

As a resident of Shalford, and as family members of Shalford LTC, I am writing to strongly object to the current version of the local plan which removes the fields behind the Village Hall and Tennis Club from the Green Belt and puts them in the Shalford settlement boundary.

Although these fields have been classified as “open spaces” I am concerned that they do not have the same degree of protection as the Green Belt from housing development. Should houses be built on this site, the resulting traffic chaos would increase the already severe problems for Shalford, where roads are blocked every weekday from 7am – 9am as traffic tries to join the heavily congested A281 into Guildford and the surrounding towns. Vehicles from any housing
built on these fields would have to join traffic on Chinthurst Lane, further causing pollution and increasing the risk of an accident as many young children and families walk along Chinthurst Lane to school.

Furthermore, I feel the small village of Shalford needs to be preserved as such; we do not have the amenities, facilities or space to accommodate more housing on green space. Any construction on these fields, which are 25ft above the village hall, would tower over the tennis courts and bowling green and totally destroy not only the green lung of our village, but also the visual appeal of the area.

I urge you to make a small adjustment of the village boundary, moving it back to the 2003 green belt boundary, thereby protecting these fields and ensuring they remain open spaces for future generations of our village to enjoy.

1. I object to any erosion or diminution of the Green Belt to facilitate further development is totally unjustified. The Green Belt was originally to prevent urban sprawl and to maintain our countryside and rural areas; these proposals are a radical departure from this long-held principle. The notion that entire villages, such as Wisley and Ripley, can simply be removed from the Green Belt and lose the protection that this status offers is mind-boggling.

The notion that entire villages, such as Wisley and Ripley, can simply be removed from the Green Belt and lose the protection that this status offers is mind-boggling.
I object to Send losing its Green Belt status

The Green Belt should remain intact throughout the borough. Its purpose was to ensure villages/towns don’t merge and become large conurbations, to protect the countryside, to encourage the use of derelict and other urban land, to preserve the special character of old towns and villages. All these issues are still relevant, perhaps even more so.

With more and more development, housing and industry in the South East we are seeing huge increases in road and air travel. Consequently, the air quality in the South East is under threat. London itself, has some of the worst air pollution of all European cities. If we increase development and at the same time lose the Green Belt we reduce the means to help improve or maintain air quality at an acceptable level. It is the vegetation in the Green Belt that is responsible for absorbing the additional carbon being produced by our increased travel and industrial use.

The air quality along Send Road is already unacceptable. I lived on Send Road for 20 years and my neighbour’s child suffered so badly with asthma that they were forced to move to another area of Send, away from the main road. This may be anecdotal evidence but I wonder if it would be possible to do some monitoring of air quality along these busy roads before we plan to increase the weight of traffic yet again.

Green Belt was meant to be permanent unless it could be shown that exceptional circumstances existed to allow it to be developed. Surely these ‘exceptional circumstances’ need to be considered on an individual basis rather than just wholesale removal of all land in the village from the Green Belt.

The National Planning Policy Framework (NPPF) states that ‘unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the ‘very special circumstances” justifying inappropriate development on a site within the Green Belt’. (NPPF 3-034-20140306).

Surely those responsible for planning should consider the bigger picture. The number of new houses and other developments listed in the Local Plan is significantly above the actual need and will cause enormous pressure on the existing infrastructure especially the increases traffic on our already unacceptably busy roads and motorways. Global warming is not an idle threat and the UK should be responsible with its plans for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**POLICY P2: Green Belt**

Local Plan Policy P2 states that: *We will continue to protect the Metropolitan Green Belt.* I fully and un-equivocally support this policy.

Unfortunately, despite such brave words, GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. The analysis included in the Appendix shows that around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. We consider this outcome to be outrageous.

Under NPPF rules, GBC is permitted to make allowance for factors which may constrain the delivery of new housing, such as the need to protect the Metropolitan Green Belt or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty (‘AONB’) which is offered protection under the NPPF comparable to that of a national park. Although these areas make up a large proportion of the land area of Guildford Borough, GBC makes no attempt to reduce its housing delivery in order to take account of such constraints. I find this approach inexplicable.

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT strongly to the proposal to remove the Horsleys (and other villages in the Borough) from the **Green Belt**. In paras 79 and 80 of the NPPF (National Planning Policy Framework - Mar 12) the Government places great importance on the Green Belts and in Para 83 states that once established they should only be altered in “exceptional circumstances” through the preparation or review of the Local Plan.

65% of new houses in the Borough are to be built on land that is currently in the Green Belt.

The Green Belt around the Horsleys serves all 5 of the purposes set out in para 80.

Para 84 states that inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.

The draft plan does not identify the “exceptional circumstances” required to remove the Horsleys (and other villages) from the Green Belt nor the “very special circumstances” required to build on Green Belt land.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 houses

---

**I object to the draft Local Plan for 10 fundamental reasons:**

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban sprawl stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

**Green Belt – POLICY P2, POLICY P3, POLICY E5 and sites**

Exceptional circumstances must be demonstrated in order to develop Greenbelt yet despite the weight of public opinion against weakening of this policy, 70% of new housing development will be in the countryside, of which, 58% will be in Greenbelt. By definition, this is not an exception and no attempt is made to demonstrate exceptional circumstances, in line with the requirements of the NPPF. Insetting villages is of concern since restrictions within the settlement boundary raises concerns over loss of character.

The Rural Economic Strategy covered in 4.51a, promoting affordable homes everywhere in the countryside including the AONB as a main aim, is a mechanism for promoting overdevelopment in our countryside. It has not been subject to full public consultation and is based on data, which is not up-to-date.

Three major strategic sites – Blackwell Farm, the former Wisley Airfield [Three Farms Meadows] and Gosden Hill Farm – are in the Green Belt. Previous consultations show that, in line with the NPPF, the public would prefer to use brownfield land in the urban area first

No case has been made for “Exceptional circumstances” for building on the greenbelt, even though Guildford Borough council have rejected plans for the Wisley Airfield, this has been included again.

I object to the continued proposed ‘insetting’ of East & West Horsley and other villages from the Green Belt and the expansion of the settlement boundaries.

I object to the statement in P2 (4.3.13) that these villages are ‘now inset from the Green Belt’ when this is only a proposal. I also object that this section does not take into account an assessment of the Green Belt benefits.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing in response to your invitation to comment on the Guildford Borough Proposed Submission Local Plan.

I object to the proposal to inset the villages of East and West Horsley from the Green Belt. Nowhere in your documents do you produce evidence to support the existence of exceptional circumstances which would support this being carried out.

All the objective evidence seems to derive from the need to release land for building development, and the study carried out by your consultant is inconclusive, subjective, and fails to take adequate note of the fact that the original aims of the Green Belt are still met in the cases of villages like East and West Horsley. The report of the study by your consultant bears the hallmarks of a desktop study and the result is a shallow analysis of the current situation which lacks conviction.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

This policy states that Guildford Borough Council (GBC) will continue to protect the Green Belt and we fully support that aim.

In the villages of East and West Horsley the original objectives of the Green Belt continue to be fully met and we disagree with the analysis in the Green Belt and Countryside Study (GBCS) documentation produced by consultants on behalf of GBC which fails to acknowledge the open nature of the villages, the large areas of woodland and open space which are integral to the appearance of the area and the low density of housing in the settlement areas.

We object strongly to the proposal to remove the villages from their current status by insetting them from the Green Belt and we do not believe that GBC have demonstrated the exceptional circumstances which are necessary to support such a
proposal. The only circumstances that they present are those for increased development, in particular housing, which is unacceptable as a basis even if the proposed development was based on accurate and supportable evidence. As outlined above, this is not the case as the OAN and the SHMA are flawed.

There is also a proposal to change the settlement boundaries for the villages which appears to arise from the GBCS. The reason for changing the boundaries appears to be solely in order to include additional area inside the village boundaries in order to make land available for development. In many of the cases the proposed extended boundary lines are less recognisable in logic and certainly less defensible than the existing ones. We object to these proposals to change the settlement boundaries for East and West Horsley and in addition object to the newly designated "identified boundary for the Village" proposed to the south of the A246 in the area of Chalk Lane, The Warren, Rowbarns Way and Green Dene.

1. I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford while providing a life enriching environment for my family.
2. I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances. If we start making exceptions the boundaries to stop this happening in the future are removed. The Green Belt is meant to be permanent and not continually eroded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13907  Respondent: 11002945 / David Guthrie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.
I request that the following comments are shown the Planning Inspector.

I wish to register my strongest opposition to GBC proposal to desecrate the Green Belt.

I object to any planned Green Belt erosion.

I object to the fact that local villages are to be obliterated in an effort to bring money into GBC so that they can fund their vanity project of a tunnelled A3 to Bypass Guildford.

I object to your Policy2, at paragraph 4.3.15
On what grounds do you find it acceptable to remove an old existing “non-conforming” business out of Green Belt jurisdiction?

Yet again you have made no consideration of the Traffic problems that further development of the area would create in the Village and surrounding Lanes, I use the term lanes because they could only just about be classed as roads.

Green Belt Policy 2 at paragraph 4.3.15

I object to the proposal to inset Send Business Park from the Green Belt because

There is highly restricted vehicle access along Tannery Lane in both directions

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

As a resident of East Horsley I wish to register strong objections to the Local Plan on a number of counts.
GREEN BELT

Without doubt our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

NO EXCEPTIONAL CIRCUMSTANCES

The local plan proposes ~ 9,000 new homes to be built on Green Belt land (compared with ~ 50,000 current homes in Guildford, so approx. equal to 18% of the existing homes in the borough)

The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law.

In addition the existence of the Green Belt/AONB is a reason for NOT meeting objectively assessed housing need (i.e. such protected land is a legal constraint against any such development). No exceptional circumstances have been disclosed. So the Green Belt boundaries should NOT be changed. To remove most of the Borough’s Villages from the Green Belt would change the nature of this area of countryside forever and would eventually merge historic and separate villages. It would be an environmental outrage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I firmly object to the New Local Plan 2016.

I live in East Horsley and I am absolutely against all measures to reduce the green belt in this area most particularly by removing any part of East Horsley village (and other neighbouring villages) from this green belt. A massive increase in the housing stock of the Horsleys of 593 new houses represents something like a 35% increase. Nowhere can I see ANY justification for this requirement other than a badly worked consultant's report which is based upon some wildly inaccurate forecasts.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The plan as it relates to Send is flawed on three levels:

- the calculation of housing requirement for the Borough as a whole is extremely spurious, based on wrong assumptions about industrial demand, classification of university students and the indiscriminate imposition of national-level requirements on individual regions

- the share of the burden of development to be placed on Send and its environs has been from the first draft suggestive of a very poor attitude to complying with the demands of government. Rather than 'how can we spread this requirement fairly across the Borough', the Council appear to be asking 'which few parishes can we sacrifice in the interests of keeping the others relatively happy'. More important in my view, the Council's disregard for the Green Belt has been shocking: the Act requires 'exceptional circumstances' for areas to be removed from the Belt, while the current justifications for development are the most unexceptional imaginable - ongoing pressure of population and increasing demand for housing. This is exactly what previous governments committed not to doing.

In spite of this, we see the Plan focusing on new build in areas such as Send, Ripley and Wisley where it's easy and cheap to carve up the countryside, rather than making a serious attempt to use the Borough's extensive brownfield capacity to cover a high proportion of the development. The official line seems to be to talk about affordable housing and insinuate that those objecting are NIMBYs: but given the choice of sites (highly unpopular but the most profitable for development) and the decision to make a minimum of only 40 percent of houses built on land freed up for development 'affordable' (equivalent to perhaps 25 percent of the land thus freed up) - leaving developers rubbing their hands over the other 75 percent, it's hard to keep faith in the Council's having any other motive than greed.

If you want to free up land for affordable housing, why not use *all* that land for affordable housing, and make sure the developers get a decent price for their work? Then we'd be talking about 25 percent of the current land grab and you might get a less furious response from residents [though it should still be brownfield]. The fact that the Council is far more worried about the developers' feelings than those of the local residents, speaks volumes.

- most specifically, the effect on Send of the proposed developments will be to cripple the already creaking road system, massively overload schools and medical facilities, undermine the environment and - in short - ruin the village. It's far from perfect at the moment but I can say hand on heart that it's quite a nice place to live. It seems likely to be a truly grim place to live if the Plan goes through.

It's the third of these I want to focus on for the remainder of this email, and as instructed I shall focus on changes made since the previous draft - but please note none of the objections raised previously have been addressed and you should still give these full consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposal to remove the Horsleys from the Green Belt as there are no exceptional circumstances to make this a valid option.

I object to the proposed extension of the boundaries of the settlement areas of the Horsleys as no good reasons have been provided.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Proposal to inset East Horsley from the Green Belt Policy

I OBJECT to the proposal that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. Removal of the Horsleys from the Green Belt would require exceptional circumstances and these have not been demonstrated. There is no consideration in the plan of the effect of such insetting upon the villages and this is required by the National Planning Policy Framework.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Changes to the Settlement Boundaries

I OBJECT to the proposed Settlement Boundary changes in East Horsley. GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map. The changes to the settlement boundaries in the Horsleys appear to have been done purely on the basis of including additional Greenfield sites which can then be built on. I can see no reasons given for the proposed changes and therefore the boundaries should remain as they are.

Finally I object to taking Send Business Park out of the Green Belt. **Policy 2 paragraph 4.3.15.** The current development should never have taken place. It is in an area of beautiful countryside right next to the charming Wey Navigation. The tow path is regularly used by walkers and the water used by boats and canoists. It will spoil this area for everyone's leisure use completely.

I am repeating myself but it also creates more problems for Tannery Lane which is totally unsuitable for larger vehicles in both directions.

I appeal to you to consider these objections seriously, to draw up a plan which is fair to all residents in Surrey, and in particular a plan which respects our natural environment and does not encroach on Green Belt.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to this policy.

I particularly protest at the “insetting” of 14 villages from the Green Belt and at “infilling” 12 Green Belt villages. It is disturbing to learn of the proposed extension to the settlement boundaries in many villages which will inevitably lead to numerous overdeveloped areas and a total extinction of the rural feel and the surrounding countryside.

Having reviewed the above policy, I note that the NPPF’s other 4 tests of Green Belt status including the prevention of urban sprawl have been ignored. The policy also states that “the general extent of the Green Belt has been retained”, which is a misrepresentation.

Policy P2 seeks to justify excessive development on the Green Belt designated land without demonstrating exceptional circumstances required for alterations of the existing Green Belts boundaries.

I object to this policy on moral and national grounds. Our surrounding nature and villages are the assets that should be protected not only for the sake of our own, but also for generations to come. It will be impossible to undo the damage.
inflicted once Green Belt boundaries are removed, opening up the area to developments that are for over-ambitious and
distractive to the local nature and culture.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15280  Respondent: 11007393 / James Culmer  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and
should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is
gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of
future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly
protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public
consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the
borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage.
The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken
out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to
justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national
guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional
circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be
taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances
required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have
answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing
exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from
the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should
be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green
Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and
nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites
than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped
land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan
rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider
this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and
the consultation period restarted after the correction has been given the same distribution as the original statement. (I
assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that
the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of
these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that
infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It
is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing
development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the
NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored.
Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems
almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the
Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I
cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could
quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of
opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their
surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as
an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield
(A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires
there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ’special
circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging
into one another. The significant development in these villages will result in the character of these villages being lost and
the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support
including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common,
with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I wish to register objections to the Local Plan on a number of counts.

**Green Belt**

The National Planning Policy Framework states that the Government attaches great importance to the Green Belts; the fundamental aim of which is to prevent urban sprawl by keeping land permanently open. I strongly object to the changes to the Green Belt which are proposed and specifically to the exclusion from the Green Belt of the former Wisley airfield site and ‘insetting’ of East Horsley, West Horsley and Effingham villages.
I find the arguments proposed in 4.3.12, 4.3.14 & 4.3.16 of the Local Plan to be fundamentally unsound. I cannot see any justification for the former Wisley airfield site to be excluded from the Green Belt and I consider the ‘inserting’ of East Horsley, West Horsley and Effingham villages to be unacceptable. I consider both these proposals to be against the National Planning Policy Framework which states “once established Green Belt boundaries should only be altered in exceptional circumstances”. The status quo for the former Wisley airfield site and for these villages is that they currently are in the Green Belt. Ministerial Guidance on the Green Belt makes it clear that legally unmet housing need alone is unlikely to qualify as “exceptional circumstances”. I firmly believe the former Wisley airfield site and East Horsley, West Horsley and Effingham villages should continue to lie within the existing Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wholeheartedly disagree with the statement “The Metropolitan Green Belt will continue to be protected, as shown designated on the proposals”. Given the changes to the Green Belt which are proposed, I cannot see how Guildford Borough Council can claim to be championing the Green Belt in any way, much to my dismay. I firmly believe East Horsley, West Horsley and Wisley Airfield should continue to lie within the existing Green Belt.

The NPPF states that the Government attaches great importance to the Green Belts; the fundamental aim of which is to prevent urban sprawl by keeping land permanently open - “once established Green Belt boundaries should only be altered in exceptional circumstances”. The status quo for West Horsley and East Horsley is that they are currently in the Green Belt. Ministerial Guidance on the Green Belt makes it clear that legally unmet housing need alone does not qualify as “exceptional circumstances”.

I object to the creation of a new settlement at Wisley Airfield as outlined in the Spatial Vision and its inclusion as a “strategic development site” in 4.1.9. The NPPF states that sustainable development means achieving growth while “ensuring that better lives for ourselves don’t mean worse lives for future generations”. The area around Ockham is beautiful countryside and important farmland. To develop this area would be absolute desecration and destruction of the NPPF principles, resulting in the loss forever of this rural landscape and more importantly the wildlife and plant habitats. It is not a sustainable location given the lack of amenities and transport – Ockham is a small settlement with no infrastructure. I do accept the need for further housing but it MUST be development of brownfield sites within developed areas. (We do not have an infinite number of natural habitats left in the overdeveloped South East to destroy with impunity!

Policy P2 of the Local Plan clearly states “We will continue to be protected the Metropolitan Green Belt, as shown designated on the proposals Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The Local Plan’s proposal to include the Former Wisley Airfield as a potential development site is completely contrary to this statement and I object strongly to such a large scale expansion into the Green Belt.

I have commented before on the Council's proposal to take the village of East Horsley out of the Green Belt (what you call insetting) and the very ambiguous statement that the Green Belt is being protected in the proposed Plan. That is clearly not happening, and a more plausible and honest statement of Green Belt policy needs to be stated in your Plan if is still your intention to remove the Green Belt status of this village in the face of many objections. Along with this, you are proposing to increase the area to be "inset" beyond the boundaries of the existing settlement area in order to maximise the area available for building on the fringes of the village. However I wish to comment more specifically on what appears to be a new proposal in your targeted consultation. This is to extend the settlement boundary in East Horsley to the south of the A246. While I am pleased to see this area is not threatened by Green Belt removal, the proposal you are making is difficult to comprehend on the maps - the various Appendix H maps for East Horsley South - and is largely unexplained in the text. It seems to have been 'bounced in' to the Plan at the very last minute. One of the main components of this potentially increased settlement area is Chalk Lane and its environs. The Lane is a scenic and archeological feature of the village, being an old drove road probably dating from pre-historic times. The proposal to include this sensitive area within the new settlement area boundary will put at risk the unique character of the area. It is very likely to promote unsympathetic mulling and extensions to properties, and new and larger accesses that destroy the chalk banks and degrade the whole character of this part of the village. I therefore strongly object to the movement of the Settlement Area Boundary south of the A246 which is proposed under the various East Horsley South maps in Appendix H which you are proposing as part of Policy P2.

Greenbelt:

My first objection to the Local Plan relates to the protection of the Greenbelt. I am absolutely opposed to the removal of some of the village from the Greenbelt through the extension of the settlement boundaries and the insetting. No Exceptional Circumstances or other relevant justification has been demonstrated to justify the new Greenbelt boundary in West Horsley. National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. As such the proposal and Policy P2 is not in line with National Planning Guidelines. It is clear to me that it cannot be considered exceptional in order to facilitate the development put forward when a) The Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West Horsley (or neighbouring villages) (indeed the new economic development sites are located on the other side of the borough to West Horsley) and b) when the current proposals have given insufficient consideration of the use of brownfield sites within the borough (located much nearer centres of employment and supporting infrastructure). This is a key flaw in the Guildford Borough Submission Local Plan 2016 – proposing extensive development in locations remote from areas of employment and supporting infrastructure. The new housing should largely be allocated much nearer and around Guildford’s town and urban areas.

Ref Proposed overdevelopment in Send and surrounds

1, I object to the removal of Send from the Green Belt, it is a village and should not be part of an urban sprawl of Guildford and Woking. The Green Belt was promised as a permanent buffer and both councillors and government have promised to maintain it. Therefore it is the elected councils duty to comply with the promises made to the electorate.

The loss of swathes of the Green Belt is a betrayal of residents (voters) who have moved to the area because of its proximity to protected countryside. We are in danger of creating an “A3 Corridor Conurbation” that could ultimately spread closer and closer to London.

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object strongly to the following proposals in the village of Send listed in the Local Plan:

1. Removing Send from the Green Belt

I object to Send losing its Green Belt status

I do not understand how you have the right to change the Green Belt. It was meant to be a permanent feature designed to stop towns and villages merging into one huge conurbation. Also its purpose was to encourage the use of derelict and other urban land. I don’t believe that there is an urgent need to change the status when there are still brown field sites in the borough. Is this a government ruling of a financially driven move that will allow property developers to make a lot of money? We have already lost the only piece of woodland in the village when permission was recently granted to build on the land behind Vision Engineering.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/8815  Respondent: 11011585 / Martin Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the removal of Send from Green Belt status and to the proposals to build on the Green Belt fields at Gosden Hill, Garlick’s Arch, Send Hill and Clockbarn Nurseries, particularly Sites A25, A35, A42, A44 and A43. NPPF states that the Green Belt should only be altered in “exceptional circumstances.” There simply are no eligible exceptional circumstances expressed in the Local Plan or supporting documents. The Council must identify the urban brownfield areas around the Guildford area in order to protect the countryside and limit the impact that any plans have on local road traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp171/758  Respondent: 11011713 / Mary Warren  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy 2 Paragraph 4.3.15 Removal of Send Business Park from the Green Belt. As already stated in the above objection, Tannery Lane is a narrow winding road completely unsuited to large HGVs. Already they cause considerable traffic problems and any increase in their number along this road will bring traffic to a standstill both in Tannery Lane and at its junction with the A247. The other exit from Tannery Lane is equally difficult and again unsuited to heavy traffic.

In conclusion, Send residents objected strongly to the previous version of the local plan. Despite this, the load on Send has increased. One has to wonder why Guildford Borough Council should single Send out for such over development when there are vacant brown field sites in Guildford and at Slyfield. No changes are proposed to the roads, schools, medical facilities or other essential infrastructure and the result will mean that Send becomes an overdeveloped suburb of Guildford with congested roads and traffic at a standstill pumping fumes into the air and damaging children's lungs. Is this really what they want?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
There is no evidence that there are exceptional circumstances for encroaching on our green belt and this plan is not wanted by the vast majority of people who live in this area. This plan will irreparably damage the rural and quiet nature of our village life.

I am totally opposed to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries. No exceptional circumstances or other justification is made for the new Green Belt boundaries that will result from the proposed insetting of the two parts of the village from the Metropolitan Green Belt. West Horsley's defined Settlement Area boundaries (ref 2003 Local Plan) DO NOT need to be extended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to raise the following objections to the draft local plan:

I object to the removal of Send and Ripley from the Green Belt because the villages and their countryside provides a necessary buffer between Woking and Guildford. One of the purposes of the Green Belt is the prevention of merging of towns and settlements thereby creating unrestricted sprawl. If these villages were removed from the Green Belt in time there would be continuous development between Woking and Guildford. 70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries. They have not been shown by Guildford Borough Council. I object to Policy P2 green belt which states that “the general extent of the Green Belt has been retained.” This is completely false.

I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Green belt expansion

1. The proposed area for the expansion in West Guildford is green belt. The underlying thesis behind a green belt designation is that it should be preserved for the future. Re-classifying sites as green belt in order to compensate with the removal of green belt status elsewhere is at least inappropriate and disingenuous. More realistically it is bordering on fraudulent – the designation of the site as green belt is understood by the general population (or even the man on the Clapham omnibus in legal parlance) to be a long-term designation not given or removed lightly. This proposal treats the designation with disdain and when the wider population understand what has been done there will be general shock and resulting contempt for the town planners and councillors. This proposal is completely inappropriate and particularly for sites such as Blackwell farm which are sites of exceptional beauty and home to varied wildlife – it is simply not possible to lift and drop this flora and fauna into a new area without significant damage being done to it. The fact that the university is supportive of expansion, thereby making this site easier to develop, does not mean that the simplicity of approach should over-rule the impact of the development on this special area.

The detailed arguments relating to the impact upon the various elements of the infrastructure have been well rehearsed elsewhere. Suffice it to say that transport (road, rail and parking), medical, educational and shopping facilities are already under considerable strain. The increased volumes of traffic that would arise from the proposals have the potential to generate considerable hazards to local schools, pedestrians and junctions. The Raleigh School is oversubscribed and the Medical Centre is inundated. The addition of a significant number of new dwellings to the area would be unsustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object vehemently to the Guildford Borough Proposed Submission Local Plan: Strategies and Sites June 2016. Your proposed submission local plan is so offensive that it is hard to know where to begin my objections.

I object to your proposal to remove the Horsleys from the Green Belt. The Green belt has prevented planners and developers from "concreting over" the South East for 5 decades. Your ignorance, arrogance and short-termism in wishing to remove this precious protection is breath-taking. How can you live with yourselves and the prospect of being the destructive group who initiated the despoliation of the beautiful county of Surrey? Vandalism on this scale is not just justified by current housing needs. I note that you are not prepared to reveal the mathematical models used to support the SHMA underlying this plan. You seem to have singled out West Horsley for 35% population growth - more than anywhere else in the Borough, for no sensible or stated reason. Nor have you shown any other "exceptional circumstances" required to diminish the Green Belt and remove West Horsley from it. You have also extended the boundaries of the Settlement areas of the Horsleys for no apparent good reason.

When these precious green spaces are gone, they are gone forever. Don't have this environmental devastation on your consciences. Your proposals are ill-conceived, unsympathetic to the character of this part of Surrey, and completely unsustainable. Please re-consider them radically and urgently. I vehemently object to them all.

Policy P2 - Green Belt

I object and disagree.

We should not allow the relatively short term 15 year plan spoil the legacy of future generations.

Once gone the Green Belt is gone forever.

The general extent of the Green Belt has not been retained which is stated in the policy.

The policy omits any assessment of the value of the Green Belt. The policy severely understates the loss of Green Belt land.
The required housing allocation should be spread across the borough and not burdened in one part on Green Belt land which will put strain on infrastructure and change the character of these settlements.

Developers will want greenfield sites as building costs will be lower. 8086 houses are proposed for Green Belt compared to 1135 for the Guildford urban area which is inequitable, will destroy the Green Belt and disincentives Urban regeneration.

The policy makes all villages in the green belt vulnerable to large blocks of new development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Firstly I object to the fact that no changes have been proposed since the 2016 consultation to the insetting of West Horsley and East Horsley from the green belt despite numerous objections at the time.
2. I object to the very large number of new dwellings proposed on Green Belt. Whilst the reduction in the number of new homes proposed in the Green Belt after the 2016 Consultation, is welcomed (90 in West Horsley, 1100 in Normandy and Flexford) I believe that the case for building on Green Belt land at all is not proven and should be rejected in entirety.
3. I object to the revised proposal that the eastern side of the West Horsley Borough is now scheduled to take an even greater proportion of new homes in the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My objections to the Draft Local Plan are as follows:

1) I OBJECT TO all erosion of the Green Belt.

A brief read of the Green Belt section on the government website highlights several crucial points and indicators for local authorities which have been established over many years, to safeguard rural areas from urban sprawl. I draw your attention to several areas in said literature:

-the government stance outlines that Green Belt's should only be encroached upon in "very special circumstances"

-such special circumstance "will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations"

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

-exceptions include "LIMITED infilling in villages..."

Whilst these are only a few of the points I could have selected from the government's website, they act to completely invalidate the thinking behind the 2016 Draft Local Plan. It is not only completely laughable that "exceptional circumstances" should be claimed with regards to this area, but more importantly, even if such circumstances did exist, the government website clearly states that such circumstances allow for LIMITED infilling of villages. The housing proposed in the local area is by no means "limited" and will cause complete overcrowding of the area and a wholly inadequate provision of local services.

In proposing this plan, the local authority has shown a complete lack of understanding not only of the purpose of the Green Belt, but of the terms on which it was created.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

On principle, I reject the building on any greenbelt land. The laudable purpose of establishing the green belt was to stop the relentless sprawl of urbanisation and ribbon development and provide some secure green spaces for the enjoyment of both local residents and city dwellers. To concede this just because there is pressure on building land is like taking down flood defences in case they get damaged in future floods! It negates the vision and those who had the good sense to see the future threat to our countryside.
As such, I strongly object to the erosion of green belt land at Send by taking out of the Green Belt Send Business Park (Policy 2 at paragraph 4.3.15), developing Land at Burnt Common (Policy A58), building on Garlick’s Arch (policy A43) and building at Clockburn Nursery, Tannery Lane (Policy A42).

Send Business Park (Policy 2 at paragraph 4.3.15):

To develop this site further would be to the detriment of what is a pleasant and predominantly rural stretch of the River Wey navigation.

I often cycle use Tannery Lane as part of a recreational route I use and appreciate, therefore, just how unsuitable Tannery Lane is for Commercial Traffic being a narrow country lane with poor access at both ends.

3. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

I object to this plan because over 70% of new housing is to be built within the Green Belt. There is ample brownfield land in the urban areas that needs to be regenerated. This can be achieved without the need to encroach on protected Green Belt land. Once the Green Belt has gone, it has gone forever and blatantly ignoring it now gives license to continue to do so in future.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I was born in Guildford, as were my parents and all four Grandparents.

I am appalled at the new local plan and wish to object to it in the strongest possible terms.

The amount of proposed Greenbelt land to be given up for development is scandalous and clearly against the wishes of the vast majority who live and work in the Borough.

I strongly urge the council to reconsider this part of the plan and to prioritise Brown field land for both residential and commercial development.

I am writing to register my sincere objection to proposed building on Greenbelt land within the Borough.

It is supposed to be protected as a matter of National and Local policy and at a time of perceived pressure to build new homes, its purpose of preventing urban sprawl is more important than ever.

Furthermore, it seems that Brownfield sites within the Borough are sufficient to provide all reasonable housing needs.

Insetting of East and West Horsley

I made the point in my original letter that the ‘insetting’ of certain villages, instead of them being ‘washed over’ by the Green Belt, and changes to the Settlement Boundaries of certain villages, were major and important changes that could significantly impact the future of the villages concerned and I still believe that there was not sufficient prominence given to this issue in the Issues and Options document and so the consultation process was therefore flawed and so the present new Proposed Submission Local Plan cannot be replied upon as a result.

Green Belt, Policy 2 at paragraph 4.3.15

Send Business Park now taken out of the Green Belt altogether

I object to the proposal to inset Send Business Park from the Green Belt because:

- With the new Marina planned on the Wey navigation, removal of this area will facilitate the total erosion of the greenbelt in this area through the infill of further buildings in the future.
- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions as well as limited access to the already busy Send Road.
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

2. I object to not protecting the Green Belt (Policy P2)

Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city's playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns

To assist in urban regeneration by encouraging the recycling of derelict and other urban land. This policy is flawed and should have been amended. In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy 1,332 (97%) were against.
### 8. NO EXCEPTIONAL CIRCUMSTANCES

The local plan proposes nearly 9000 new homes to be built on Green Belt land (compared with - 50,000 current homes in Guildford, so approx. equal to 18% of the existing homes in the borough) - a huge proportion. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. No exceptional circumstances have been disclosed. So the Green Belt boundaries should NOT be changed through the plan making process.

### 9. BROWNFIELD AVAILABLE

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites to cope with genuine business need, and we've enough retail capacity already, so urban brownfield/derelict land should be used for housing.

### 2 Green Belt

It is absolutely wrong in my opinion to encroach on London's irreplaceable 'Green belt'. Apart from its amenity value, it plays an incalculable role in maintaining the environment, particularly good air quality and water management. Furthermore, it is not we, but future generations who will bear the burden of its abandonment to the developers, namely:

- the inevitable 'urban sprawl'
- the loss of the County's historic character
- the degradation of villages and smaller towns.

The Green Belt should not be built upon its the very reason that people want to live in or around Guildford as not only does in provide AONB but it provides for the separation between town and village thereby giving Guildford the identity that it has. Remove that and its just another clone town with all the innate problems that this brings. Loose the identity and you will erode the desire to live in Guildford.

I see from the revised "Local Plan (2015-2034) that the settlement boundaries of the Horsleys are still to be extended & removed from the "Green Belt". This is an absolute disgrace, the "Green Belt" is supposed to be the "Lungs of London"...with more vehicles & more pollution we need the Green Belt more than ever. Doesn't this Council listen to the people it's suppose to represent? It also appears to support the development of the former Wisley Airfield adding an
additional 2000 houses to the area & causing more pollution... Do you want to remembered as the Councillors who destroyed "Our Green & Pleasant Land" FOREVER! You won't be able to reverse it the future.......

The opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” is blatantly disregarded all the way through this local plan. GBC appears to be in breach of this policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt. It is not a Government directive to build on greenbelt land as GBC present it and would have us believe. In fact Government guidelines say that greenbelt land should only be built on in. The local plan does not make nearly enough argument for ANY of the proposed greenbelt land developments to be considered ‘exceptional circumstances’. You have a duty to protect the greenbelt.

The schools are oversubscribed and full, particularly the Raleigh, (including the Howard, the only viable option for local secondary schooling in the state sector). There are no plans to increase secondary school provision! Where are all the children from the new houses going to attend school? All the other services are stretched to the max including doctors surgeries, dentist (only one NHS)in the two villages!!., not to mention the busy east Horsley station parade.

Drainage is already an increasing problem and each year the flooding gets worse in certain areas..some of which are right by the proposed developments. The developments would only exacerbate this situation. I1

[The proposed boundary changes would devastate the only open green communal area in East Horsley, Kingston meadows and other boundary changes are ridiculous in that they ignore natural boundaries which exist and are currently used (such as a deep drainage ditch) and would seek to move these to further the machinations of the developers. The arguments for the boundary changes are therefore invalid.

By changing the boundary to include area past the A246..and infilling in the spaces, you are threatening the green belt in the same way as new developments and I view this with the same scepticism and unless the boundary changes can be lawfully justified, they are invalid too.

Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac. Also, every movement in settlement boundaries must be justified by ‘exceptional circumstances. Therefore most of these proposals should be thrown out because they could only be considered under exceptional circumstances and these do not exist and the proposals cannot be justified.

In all, the draft plan is flawed in the extreme and GBC’s insistence on forcing developments where there is no proven need and riding roughshod over laws put in place to protect our valuable green spaces must be prevented at all costs. This plan must be rejected apart from the areas which I have identified.

I object to the Proposed Local Plan for a number of reasons listed below.

I object to Send Village being removed from the Green Belt. Councillors and central government gave an election promise to protect the Green Belt and this reneges on it. The Green Belt in Send helps Send to maintain its village identify and prevents Woking and Guildford merging into one big urban conurbation.

As a resident of Burnt Common, Send I object to the following proposed developments:

I object Policy P2. In-setting of Send and Ripley.

I object to taking Send and Ripley out of the Green Belt, I see no exceptional circumstances for this.

Vulnerable land includes, School playing fields and land adjoining the Wey Navigation Canal, a National Trust facility.

Also, Villages to the East of the A3 maintain Greenbelt status.

I object to building on ‘Green Belt’ land, which are the lungs of London. And are meant to prevent Urban spread in the countryside and the linking of settlements. In this case Send, Ripley and on a broader scale to Woking and Guildford.

Local and Central Government gave clear commitment that the green belt would be protected. These proposed development go against this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object Policy A25 Gosden Hill Farm, 2,000 houses, on Green Belt Land.

I object to Policy A35 Wisley Airfield, 2,000 houses in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the offsetting of any of the greenbelt, Policy P2. Once it is gone it is gone for good, there is no route back. This is why the act was passed originally to protect the villages and green spaces of England, if this plan goes ahead, Guildford will be joined to everywhere from the hogs back to the M25. The entire length of the A3 will become a corridor of unwanted houses instead of the green fields which are currently present. This proposal to concrete over farmland which only developers can ever benefit from comes at a time when the UN predicts the loss of farmland to climate change is not acceptable. Also the plans for Garlicks Arch have been added with less than two weeks notice, but the existing brown field site just to the south of Burnt Common, which has been removed.

I Object to develop to the building on land which is susceptible to flooding (Policy P4). The plan does not take notice of the National Planning Policy. Garlicks Arch is constantly flooding and is according to the Environment Agency to be at a higher risk of flooding than Guildford Borough Council’s estimate. This land floods regularly and the Councils estimate is not up to the standard required for this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy 2 paragraph 4.3.15 states that Send Business Park will be taken out of the Green Belt. Why? There is restricted access by road to the site in both directions, it is next to the beautiful Wey Navigation and it detracts from the openness of the green belt.

I also object to the hiding of development by deferment A24, A25, A26, A43 within this version of the plan. These are concealed planned development and are designed to have two effects, to hide the true number of proposed properties being built with around 1100 hidden on A24, A25 and A26. Also, this looks to me to be an excuse to build on A43 Garlick’s Arch where developments are not needed. This is in my view dishonest. The proposed increase from 400 to 650 houses on this site is totally unacceptable and should not be allowed, especially as the plan in 2016 which was added into the plan during the meeting gave reasons that removing A58 Burnt Common started that “the site A43 location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm.... (site allocation A25) than the Burnt Common site did”.

Now that A58 has been added back into the plan, and the separation issue is clearly being ignored as both sites which are almost contiguous are now in the plan, it would appear that Guildford Borough Council are not following their own guidelines and objectives. Also as A58 is now back in the plan then the required floor space is allocated surely and there is no reason to build on Garlick’s Arch.

Guildford Borough Council claim to be building on Brownfield sites in preference to Green Belt, if this was truly the case why is Site A4 removed from the plan? This removed housing from the plan in favour of retail, which means Green Belt land will be used to allow retail development, this policy is totally unacceptable. Site A34 is also being removed from the plan, another Brownfield Site which should be contributing to housing.

I completely object to the council giving developers an “out” on affordable housing Policy 4.2.23 by allowing a payment in lieu to enable the same amount of affordable housing as would have been developed on site. Where in this plan is this affordable housing actually going to be built?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I specifically object to the Green Belt changes – Policy P2

There does not appear to have been any consideration to the value of the local Green Belt as a public and private asset. This is not just potential building land with additional restrictions it provides habitat for wildlife, the preservation of trees, much needed green space and areas of no pollution for our families to enjoy. There has been no consideration to the harm to public health on the removal of this land. I have seen this area flood multiple times and the development on the green belt will increase this frequency.

I have also been informed that the plan has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF. I was also informed that the plan ignores most of the NPPF 17 stipulations.

The plan has proposed a disproportionate amount of development to green belt land and very little in urban areas where a significant amount of the population want to live. 35% of the development being proposed for the Horsley's is also excessively high for one area to support without causing significant change.

Loss of Greenbelt Land:

I STRONGLY OBJECT TO BUILDING ON GREENBELT LAND. It is of paramount importance that we continue to protect our green belt and open spaces, especially when there are brown field sites available in the UK for development.

Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on greenfield sites in Normandy.) If we continue to build on our countryside it won’t be many decades before we have none left.

I object to Send Village being removed from the Green Belt. The Green Belt was land put aside by our ancestors in perpetuity for the best of reasons - biodiversity, as a bulwark against urban sprawl (in providing an essential Green Space in stopping Woking and Guildford becoming one conurbation), wild life corridors and human appreciation of nature, to name but a few. Apart from anything else, Local Councillors and Central Government have given clear election promises
to protect the Green Belt, as required by the National Planning Policy Framework - there are no "special circumstances" to justify abandoning it.

I object on the basis of how this is being applied - The policy states "We will continue to protect the Metropolitan Green Belt", but, based on the proposals of housing locations, this policy is not being followed. Furthermore, it has been clearly stated that building on the Greenbelt may only be allowed in exceptional circumstances, and none of the elements in this plan, including meeting the arbitrary "needs outlined in the SHMA" are appropriate to be called "exceptional".

I fundamentally object to building on Green Belt land. Building on Greenbelt land can only be allowed in "exceptional circumstances", and the local plan does not come close to justifying exceptional circumstances. A broad brush statement in section 4.3.16 of the Local Plan saying "We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development" is not justification for building the green belt, and certainly not in West Horsley. Green Belts are established in law and well ingrained into the society in which we live.

Section 9, Point 89 of the Governments National Planning Policy Frame outlines these "exceptional circumstances", and none of these apply to the extensive plans for new homes outlined in the Draft Local Plan. I also note that the Government is committed to safeguarding the Greenbelt.

The Local Plan places the majority of new home construction on Green Belt land in the next five years, and for the duration of the plan, how can this be possible? Brownfield sites should be the focus for growth. This is especially true when the economic growth areas of the borough are not in the areas where building is planned on Green Belt land.

Furthermore, once a Green Belt is infringed, this removes significant requirements for planning consent going forward, creating yet more disturbance and pain for residents in the future.

The same reasons outlined for removal of the Green Belt also apply to insetting of the Green Belt. There are no exceptional circumstances to inset the Green Belt in West Horsley. I understand the Parish Council has performed an analysis of housing demand within the Village and this is limited to a small number of homes, (<30) which can be accommodated without decimating the village through building hundreds of homes through insetting the Green Belt.

Environment

I do not believe that the majority of residents would support expansion into (and the continuing shift of the boundaries of) the Green Belt, particularly not on this scale. The development seems to be 50-70% within the green belt - how can such an encroachment be morally acceptable to the council? This expansion will impact local wildlife, spoil views from the Hog’s Back and parts of the Downs, and have potentially dire effects on surface water flooding in Guildford due to loss of natural capacity for soak-away at a time when it is widely thought that our climate is becoming more unpredictable and extreme. Additionally, the new road for Blackwell Farm cuts through ancient woodland and the Surrey Hills AONB. The countryside surrounding Guildford is something we should be protecting for our children.

I also feel strongly that the council have been dishonest to repeatedly commit to protecting the Green Belt, or to promise countryside areas to the people of Guildford, and to then shift the boundaries or locations to suit its own aims; this has undermined my trust in the council, and in politics, generally. I fear even more for the protection of our countryside with the recent decision to leave the European Union.

There will also be impacts on visual amenity with the views from the Hog’s Back and North Downs blighted by huge numbers of buildings.

I object to the volume of houses proposed in the Borough to be built on land currently in the Green Belt.

1. Specifically that 65% of the new housing would be built on land at present in the Green Belt
2. Both Horsleys should remain in the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6966  Respondent: 11035361 / Marion Shipman  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Neither the policy nor the supporting Green Belt papers give any coherent justification for the proposed changes to the Green Belt. Indeed, policy H2 refers frequently to the quality of the countryside within the Borough. There are five legal purposes for Green Belt and our Green Belt meets them all. There are no exceptional circumstances that justify building the majority of the proposed new houses on Green Belt land or for insetting villages from the Green Belt. Green Belt preserves air quality and prevents flooding. The legal purposes for the Green Belt include:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is not an exceptional circumstance in law. The Plan has failed to disclose any exceptional circumstances to support such a change in boundaries and Green Belt boundaries should not be changed through the planning process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Horsley. I fear gravely that the actions of the Council in regard to development will lead to making areas such as Horsley not as attractive for them to live and bring up their children. I believe that East Horsley must not be inset from the Green Belt. I strongly object to the movement of the settlement boundary proposed under Amendment 4 in Appendix H map of East Horsley (South), proposed as part of Policy P2.

I understand the housing pressures and the need for the Council to provide affordable housing and lower cost housing, but I think Guildford borough has a unique challenge. Given the desirability of the area, the development of areas such as East Horsley will lead to additional supply but this won’t be affordable housing for most. Guildford is an expensive area and this challenge remains. I believe that Guildford needs to revise the number of dwellings proposed at Wisley airfield. The infrastructure (doctors; trains; parking; roads) cannot cope and no adequate solutions are proposed.

Having read the revisions to the local plan I am writing to strongly object to the local plan as it currently stands. Whilst I recognise that there are improvements such as stopping the development of the Thatcher’s site, I am fundamentally opposed to any development of the green belt in the borough of Guildford or any proposal to inset East Horsley from the green belt.

I do not believe that Guildford Borough Council are taking into account the green belt when establishing housing targets. Guildford is a highly sought after area in a large part due to the mix of housing and green belt. The Council (and in particular the Councillors that have been elected by the electorate) has a moral duty to maintain the green belt to avoid establishing a precedent that destroys Guildford for future generations. The Council must not remove areas from the Green Belt, and I cannot see that this is direction being provided by central government to local government so the onus is on my local Councillors. I have lived in East Horsley all my life, and I am delighted to bring up my children in East Horsley. I fear gravely that the actions of the Council in regard to development will lead to making areas such as Horsley not as attractive for them to live and bring up their children. I believe that East Horsley must not be inset from the Green Belt. I strongly object to the movement of the settlement boundary proposed under Amendment 4 in Appendix H map of East Horsley (South), proposed as part of Policy P2.

I understand the housing pressures and the need for the Council to provide affordable housing and lower cost housing, but I think Guildford borough has a unique challenge. If the Council fails to protect the Green Belt and constrain expansion to reflect the widespread concerns of residents regarding environmental and transport issues, the 2017 Plan will irreparably damage the very qualities that make Guildford an attractive place to live and to conduct business in.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to Policy P2 green belt. This policy states, “the general extent of the Green Belt has been retained.” This is a misleading statement. The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. Once gone it is gone forever. It is not the Council’s to give away. Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world. Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

1. Agricultural production
2. Rural leisure and tourism amenities
3. Water catchment
4. Flood control
5. Biodiversity
6. Natural heritage
7. A carbon sink for air pollution
8. Room for public facilities such as parks and burial grounds
9. Profitable film locations (e.g. Shere)
10. Future economic potential such as mineral extraction (even fracking)
11. Natural beauty, landmarks, open space, rural views and sight lines
12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF) As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations. It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. I object to the “insetting” of 14 villages from the Green Belt. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat. I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead.

Furthermore I object on grounds of the impact this development will have in terms of congestion on our highways, these issues have been highlighted under ‘infrastructure’.

1. Destroying the Green Belt

I object to the proposal to remove (“in-set”) Ripley, Send and Clandon from the Green Belt.

No one in this county, let alone this nation voted for destroying the Green Belt. We already live in one of the most overcrowded parts of the country. Roads are congested, schools are full to capacity and hospital/medical center waiting times are forever deteriorating. Just to drive out of our village in the morning can take up to 15 minutes to cover a few hundred meters. This is stressful and will only get far worse with more houses.

We are filled with despair at loosing what we have worked all our life so hard for. We have worked hard to ensure our family lives in “England’s green and pleasant land” (something that was even shown as a virtue of our nation in the Olympic opening ceremony), away from the suburban sprawl. All this is in jeopardy with this plan.

By building more and more houses, this will not only further congest an already congested road network, but the overcrowding will create further pressure on schools, hospitals, and other services, all of which will require more people to be employed, which will probably result in a further round of house building and so on. What is GBC doing to consider the wellbeing of their constituents? Was not happiness and wellbeing also on our Prime Minister’s agenda?

High volumes of traffic and congestion have negative effects. These include road collisions, the severance of communities, the costs of delays and the unreliability of journey times to people and businesses. Environmental impacts...
include traffic noise, air pollution and amenity issues. At a global scale, vehicle emissions contribute to climate change. Some parts of the major roads in Surrey operate significantly beyond their capacity, resulting in traffic congestion, and forcing drivers down rural / country lanes to avoid main roads, leading to further congestion and road accidents.

If Surrey has a high quality of life and the borough is ranked as one of the least deprived 10 per cent of boroughs in England and one of the best places to live in the UK (Halifax quality of life survey, the Family Friendly Hotspots report), why is GBC looking to diminish this by proposing these plans?

Central London imposes congestion charges and astronomical parking charges in order to limit traffic and its associated problems in central London so as to afford its residents a better quality of life. Why can this logic not be applied to those living in Guildford Borough/Surrey? Why are GBC proposing the opposite in suggesting more houses be built?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The Green Belt designation of the site prevents the sprawl of the urban areas of Guildford, Woking, Leatherhead and the Metropolitan area. Previously developed parts of the site such as the runway, taxiways and the aircraft hardstanding are all open and, therefore, buildings on these areas will cause considerable harm to openness and the Green Belt. A new settlement would represent inappropriate development in the Green Belt, would cause significant harm to the character of the surrounding area and significant harm to the setting of a Listed Building. Development of this Green Belt site will discourage urban regeneration.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO POLICY P2 REMOVING SEND FROM THE GREEN BELT. Send is an historic settlement dating back many hundreds of years and provides an essential buffer between the large urban conurbations of Woking and Guildford. Send contains areas of Special Scientific Interest as well as areas of natural beauty and ancient woodlands providing much needed habitats for wildlife - an amenity much enjoyed by Send residents as well as other GBC residents such as the Canoe Club. Without the Green Belt permanent protection afforded by the National Planning Policy Framework Developers would run riot - could not be stopped - and very quickly there would be no separation between Woking and Guildford as intended by central government in the NPPF to prevent the merging of settlements.

I object to Green Belt, Policy 2 at paragraph 4.3.15 - Send Business Park taken out of Green Belt because it is an old non-conforming user in an area of countryside of outstanding natural beauty which is also an area of special scientific interest adjacent to the Wey Navigation Canal; Tannery Lane has very restricted vehicular access in both directions; has major junction problems with the A247; is prone to flooding; and any further development of this area is inappropriate - not least because it detracts from the openness and effectiveness of the Green Belt.

• As stated in Policy P2 the Green Belt was implemented to ‘prevent urban sprawl’ and provide opportunities for people to access the countryside. By removing these local, rural villages from the Green Belt it will lead to urban sprawl and will mean the individual villages will lose their identity. The Green Belt area around Send and Ripley also act as an important buffer between the larger towns of Woking and Guildford.
• There are no exceptional circumstances as to why these villages should be removed from the Green Belt. I know a lot of people live in these villages to be closer to the countryside and they should be safe in the knowledge that the rural area they have chosen to live in is in the Green Belt and protected from large developments. Garlick’s Arch is also home to some areas of ancient woodland which are not protected as part of the Local Plan.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to the way this policy has been drawn up as it fails to robustly support the Metropolitan Green Belt, its value and the protection it is afforded by the NPPF and government statements. It makes up 89% of the borough. Support for this should therefore be at the heart of all local planning policy in the Guildford Borough. This policy on the contrary makes no such declaration of support for protecting Guildford Green Belt.

As already argued under Policy S1, the Green Belt is an important legacy to future generations, an asset and valuable amenity for Londoners and the whole country as well as for its current inhabitants.

P2 fails to assess the Green Belts value and treats it simply as potential land to be built on. It is far too precious an asset to be neglected in this way. The restrictions on the building on Green Belt enshrined in National law are there for many reasons. This draft plan risks, through unrestrained development, causing severe damage to the Green Belt and its environment. This involves impact on the following:

- local agricultural production
- rural leisure and tourism
- flood control
- water catchment
- biodiversity
- natural heritage
- carbon sink and air pollution
- room for public space amenities e.g. parks, burial grounds
- rural business
- natural landmarks and views
- future economic potential such as mineral mining
- natural beauty, landmarks, open space rural views etc
- harm to public health and wellbeing (expressed in NPPF as giving physical and psychological benefit-)
P2 seeks to allow excessive levels of development in protected areas ignoring views given in the last consultation and against policy issued in government statements in support of protecting the Green Belt. This precious area and amenity is not for the Council to give away. Councillors are arguing that there is an acceptable % of Green Belt that should be sacrificed to development. There is no such rule or justification for such set down in the NPPF.

It fails to take a fair approach by sharing out the burden of development between settlements according to and in proportion to their size.

Insisting on a disproportionate amount of development (most of it) to be in the Green Belt is counter productive and it would make better sense to develop new homes in the urban areas, including cheaper accommodation, where most people (Young and less well off) want to live and work. These areas could be regenerated in this way and fewer people need to commute, thus saving the environment as well, saving untold damage to the surrounding countryside which the whole nation can continue to enjoy. Once it is lost it is gone forever.

In particular, I strongly OBJECT to the "insetting" of 14 villages from the Green Belt. In their current state these villages continue to contribute significantly to the 'openness' of the Green Belt and their removal from the Green Belt has not been justified under this plan. No exceptional circumstances or other justification has been made to allow new Green Belt boundaries which would result from the proposed insetting. On the contrary, these villages should not be inset, because they represent the contribution to the purposes and aims of the Green Belt as specified in NPPF para.80. It includes the importance of protecting the openness of the countryside and the settlements within it. Not only should the Local Plan be aiming to protect the very rural nature of these villages (settlements) under these provisions, but also the Green Belt itself.

NPPF para.83 states that Green Belt boundaries should only be changed in exceptional circumstances, and in further guidance notes that housing need will not be regarded as "exceptional circumstances". Thus for my own village in West Horsley, the plan seeks to simply allow many houses to be built without any justification for them. As anyone who properly looks at the character of all the villages in their rural setting, they offer space air and light and the amenity we cherish for leisure and conservation of our heritage sites and wildlife. If we develop on these green spaces inside the villages they will be lost and so will the openness of the Green Belt area.

The policy ignores most of NPPF17.

The policy is based on a flawed Green Belt and Countryside Study, and it suggests that 2/3 of the boroughs rural villages should be 'inset' because they no longer contribute to the purposes of the Green Belt. This is completely ridiculous considering the location of the borough.

Further this study should not be relied on as I understand it was not commissioned correctly and without Councillor authority.

This policy states "the general extent of the Green Belt has been retained". This is not correct.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Policy P2 concerns the Green Belt. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence. Primary legislation ensures protection for The Green Belt areas in perpetuity. This proposed policy appears to omit large chunks of the NPPF concerned with the protection of the Green Belt. Policy P2 has no mention of a commitment to uphold Green Belt boundaries and protections, or setting clear tests to scrutinise plans and proposed planning decisions without fear or favour. I include a large number of detailed comments here on the impacts and harms which will flow from the proposed policies:

- Impact on natural landmarks and views
- Impact on rural business
- Curtailment of space for public amenities e.g. Parks, cemeteries, recycling.
- Disregard of impacts to water catchment
- No mention of impact to the natural heritage.
- Protection of Biodiversity, one of the key outputs of the Green Belt, is missing.
- Guildford in general and the Horsley in particular have high levels of traffic pollution exacerbated by the proximity to the A3 and M25 and also by the huge increase of traffic levels on local roads. The Green Belt is a large ‘carbon sink’ which helps to mitigate this pollution.
- The proposed policy would have a devastating effect on air pollution, light pollution and climate change and has been discounted or ignored.
- Flood prevention and control is missing or ignored.
- Local agriculture is clinging onto its fingernails, with the current onslaught of ‘land-banking’ and subsequent rural decline. As the proposed policy is so widely drawn and weak, it will effectively allow any development on Green Belt land which is mainly agricultural. This is completely contrary to the provisions and spirit of the NPPF.
- The Green Belt has been the subject of many assurances of support and protection from government and planning law. The proposals in P2 contain no declarations of such support.
- The 12 Core Planning Principles set out in NPPF paragraph 17 cannot be ignored by policy P2. The proposals to change the Green Belt boundaries are simply an excuse to allow any type of building within the Green Belt. This is in my view illegitimate at best and represents a reversal of the intentions of the law. The Green Belt is not the property of the council to give away and cannot be treated as such. It is not something to be treated as available for building with only a few inconvenient restrictions.
- This proposed policy allows the argument that there is some proportion of the Green Belt which can be sacrificed to development. The NPPF allows no such argument.
- The amount of ‘Insetting’ of most of the villages around Guildford is unjustified and disproportionate. It is an attack on the value of the countryside and its contribution to the openness of the Green Belt. It is also an attack on the nature and conservation of the entire area.
- There is no objectively scrutinised and assessed development plan for Guildford post the referendum on 23rd June 2016.
- It makes no sense to concentrate most of the proposed development on the Green Belt when brown field sites are barely mentioned.

object to Policy P2 Green Belt because:

- It still completely fails to appreciate and acknowledge the importance and permanence of the Metropolitan Green Belt and the fact it has played a major part in planning in London and the Home Counties for a long time and that it needs to be permanently protected. It was established in 1938 under the London Home Counties (Green Belt) Act and then in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were defined in the 1987 Local Plan. It formed part of a 19-24 km belt around London and had very specific purposes, which are enshrined in the NPPF, and reinforced in the local plan. The aim and five purposes of Green Belt are outlined in NPPF section 9 paras 79 & 80. The Metropolitan Green Belt is a major model of good planning.

- Policy P2 omits any assessment of the value of the Green Belt. It is not just an empty space but is an inhabited working environment that safeguards a certain stock of natural capital. It is wrong for the Council to argue that the plan would involve the loss of “only” 1.5% of the boroughs Green Belt. This is misleading because really the amount is nearer to 7% when infilling, insetting and settlement boundary extensions/alterations are included. GBC have suggested incorrectly that this is acceptable. It is not, as there is no “acceptable” percentage (mentioned in the NPPF or anywhere else) of Green Belt which may be sold. Any amount of the Green Belt is a precious asset to be protected and kept because once it is gone it is gone forever.

- I object to the statement in the draft Local Plan under Green Belt Policy P2 (4.3.13) which claims that Send and a further list of 13 villages are “now inset from the Green Belt.” This statement is untrue as GBC is proposing to “inset” these villages. No decision has been made by an inspector so therefore the villages remain in the Green Belt.

- I object to the changed “insetting” of 15 villages (including Ripley) from the Green Belt and at “infilling” 12 of the borough's Green Belt villages.

- I strongly object to the proposal of settlement boundaries being vastly extended in many of the villages, especially in Send and infilling planned for outside the boundaries of 11 further villages. This is unplanned and unmeasured development outside of the Objectively Assessed Need (OAN).

- The local plan should not claim in the Policy for example, that parts of the villages with ribbon development contribute nothing to the “openness” of the Green Belt. This term is not defined by NPPF or in the draft. The Policy appears to be self-defeating by on the one hand saying that it will look after Green Belt land, whilst on the other fails to acknowledge the 5 tests of Green Belt status correctly. It is effectively using this Policy to allow all villages in Green Belt to be vulnerable to large areas of development which would be harmful to the Green Belt, ignoring its very importance to the residents and the borough as a whole.

- It is very short sighted of GBC to look at a village such as Send and conclude that in its “leggy” appearance that it doesn't contribute to the value of the Green Belt. Of course it does because it acts as a vital buffer between Woking and Guildford. It should not therefore be removed from the Green Belt. The village and countryside behind the A247 should all be protected, otherwise the two large towns will link up causing urban sprawl, which would be exactly against the fundamental aim of the Green Belt (para. 79 NPPF).

All other Green Belt villages in the borough are acting in a similar way and should be protected for the same reason, and for the other reasons set out in para 80 NPPF.

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

I note the plans to remove or to use the polite phraseology adopted within the plan to 'inset' a number of villages from within the Green Belt. I can see no justification for this. The Green Belt is designed to protect such rural villages from development or over-development. The rural villages each have their character and have managed their development locally. While I recognise that the Green Belt is a living and breathing artifact, there is no need for the creation of a 'free for all' with respect to in-fill and multiple fill development that will occur within the settlement areas of the villages once the green belt protection is removed. The nature of the villages, and in particular East Horsley where I live, is rural and peaceful. Its infrastructure is already strained with its existing population. I do not foresee affordable housing or even housing that takes into account the needs of an aging population or the increasing shift to mobile and other forms of work being served by the removal of the village from the Green Belt. This is especially disturbing with the presumption in favour of development that is mentioned in Section 1 of the plans.

As a supplementary to my previous comment, the council says that its policies will be outlined in its forthcoming Green Belt Supplementary Planning Document. No-one can support a plan on the basis of Trust Me - I will write something sensible. Furthermore, having 'inset' the villages from the Green belt the policies will not apply. The situation is perverse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Secondly, the proposal to remove the Horsleys from the green belt appears disproportionate to the documented need for additional housing. Whilst, there is clearly some potential for limited development within the two villages, this needs to have the current level of scrutiny of new planning applications, if the essence of the local environments is to be maintained.

Thirdly, removing the green belt will make it too easy for builders to develop relatively low cost agricultural sites rather than more expensive brown fields or more innovative options such as building over the urban sections of the A3 and railways.

Sustainability and the Green Belt (Policy P2)

I object. The Green Belt is a highly valued asset and we are the custodians of it for today and future generations in the South East and London. Long-term sustainability is critical to such an asset and the draft Local Plan does nothing to uphold the Green Belt. Rather by stealing from the Green Belt to add settlement areas the Plan undermines Green Belt principles. The Green Belt is a covenant to protect the area in perpetuity not to be eroded for short-term gain.

- The Green Belt should be a cornerstone of local planning policy.
- The Green Belt cannot be replaced – once it is gone it is gone forever.
- It should not be in the gift of the Council to give away this asset that belongs as much to Londoners and the whole nation as to the people who live in it.
- The Plan does not assess the loss associated with taking Green Belt land; its working environment and its natural capital including flood control biodiversity, open space, rural views etc. as well as benefits to health and wellbeing.
- The Green Belt is protected by law and national and local policy. The Plan needs to recognise this.

All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

‘Protects our most important countryside, landscapes and heritage ’ - How does removing the protection of the green belt and building large number of houses safeguard our countryside and landscapes? If the plan allows the green belt to be eroded, how can it be stopped long term as the precedent is set. The recent proposals for developing Newlands Corner show the Council have a complete lack of understanding of what it means to protect the countryside (and I do not understand how the council could account for the financial figures it gave for its upkeep!). Also, the heritage of our
separate villages is to be replaced by conglomerates of housing areas vvear away our most important countryside, landscapes and heritage’ is a better description of this plan.

In particular, I object to the removal of West and East Horsley from the green belt, changes to the boundaries and the large number of houses proposed to be built. There are no exceptional circumstances for this change to the green belt. The disproportionate number of houses planned is a huge increase in density for our village and exacerbates the chronic issues of „ school places, surgery appointments, drainage and substandard roads. Also, Horsley railway station would have problems dealing with the increased demand and there is not enough parking in the area. Furthermore, the type of housing proposed will not address the true housing needs but will totally change the character of our village. The plan is unsustainable and destabilizing. In view of recent events, I hope the Council will really start to listen and act on views of its residents and perhaps find the true meaning of “sustainable”.

I strongly object to the proposal to remove Ripley, Send, Wisley and Clandon villages from the Green Belt. The intention was for green belt to be permanent and allow for open space and a natural environment to prevail and not for more houses, which will create the joining of villages into a wider urban existence. Development will become inevitable and our rural villages will disappear for ever. 'Inset' of our villages must not happen, development should be on brownfield sites only.

I object to not protecting the Green Belt (Policy P2)

Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.
This policy is flawed and should have been amended. In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy 1,332 (97%) were against.

**1. NO EXCEPTIONAL CIRCUMSTANCES**

I object to the methodology of drawing up the plan also it appears that they have not taken into account the Surrey County Council highway planners’ views and the real risk of flooding in the area and the costs involved in improving the existing infrastructure. Furthermore, the plan has been formulated without regard to village neighbourhood plans. There should have been extensive consultation before removing the affected villages from the Green Belt, particularly the villages affected neighbour National Trust sites and Areas of Outstanding Natural Beauty such as the Sheepleas and Ranmore Common.

The local plan proposes nearly 9000 new homes to be built on Green Belt land (compared with ~ 5000 current homes in Guildford, so approx. equal to 18% of the existing homes in the borough) – a huge proportion. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. No exceptional circumstances have been disclosed. So the Green Belt boundaries should NOT be changed through the plan making process.

I OBJECT TO SEND VILLAGE, RIPLEY, WISLEY AND CLANDON BEING REMOVED FROM THE GREEN BELT.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to this policy for the following reasons:

1. It does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local Planning policy. The Green Belt is not the Council’s to give away and once it is gone, it is gone forever. Sacrificing areas of the Green Belt to a developer-influenced growth agenda is a betrayal of future generations and does not constitute sustainable development. Green Belt was last taken in the 2003 Plan and now it is again proposed to move the boundaries.

1. The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the Plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

1. Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

1. The Countryside Study was a simplistic exercise based on the erroneous principle that ranking Green Belt land would identify candidates for development. The Council has not carried out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. This exercise should be based on the awareness that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently Planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brownfield sites.
1. **I object** to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt (a term which neither the Plan nor the NPPF defines) and there is no need to inset them. I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling, and that infilling is also proposed **outside** the settlement boundaries of a further 11. In effect, each village will become a nucleus for further development. The NPPF’s other four tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development.

1. To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need and has caused intense opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

1. Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” This is misleading. Since the Second World War, Guildford has been expanding to the north east, starting with the Bushy Hill estate in the 1950’s, then Merrow Park and Weybrook Park were built on around 100 hectares of Green Belt land in the 1980’s, and now 89 hectares of land from the adjacent Gosden Hill Farm is also to be taken out of the Green Belt. This will connect to the proposed Garlick’s Arch development (30 hectares), also in the Green Belt, via several slip roads and feeder roads alongside the six-lane A3 (a further 4.5 hectares). If allowed, these two proposals will more than double the area of Green Belt land hitherto removed to enlarge Guildford’s NE suburbs.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ) , is Sound? ( ) , is Legally Compliant? ( )**

**Policy P2 Green Belt - Objection**

The Plan states: “4.3.16 National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development.”

- In the introduction to the Policy statement, numerous sites are taken out of the Green Belt including Gosden Hill, Blackwell Farm, Garlick’s Arch, Burnt Common, HM Prison Ripley Road, Send, and a number of villages. The Plan fails to detail the exceptional circumstances that have been identified for each site that is to be taken from the Green Belt.
- It appears therefore that the Plan is based on an assumption that because the housing number cannot be accommodated on brownfield or previously developed land in the Green Belt, it is legitimate to move the boundaries. A blanket change to Green Belt boundaries is being made to facilitate development. That is not in accord with the NPPF or ministerial statements.
Policy P2 Introduction – Objection

- The removal of Green Belt protection from the site of HM Prison, Ripley Road means that it could come forward for housing development. The nearest feasible access to the A3 is at the A247 junction.

3. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a “special circumstance” and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to removal of Send and other villages from the green belt. This can only be done in exceptional circumstances according to planning law, and none exist in this area. The interests of developers profiting from indiscriminate urban development are not exceptional circumstances.

Any weakening or exceptions to green belt protection will lead to its permanent loss. The green belt must be protected in its entirety, according to current law. It is the lungs of the densely populated south east, and an area that is enjoyed by millions, including valuable tourism from abroad.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1342  Respondent: 11041569 / Peter Belton  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the local plan, on grounds that much of the development is on Green-belt land. The Borough does not provide sound evidence of need, and does not provide infrastructure improvement already needed and cannot be trusted to ensure sufficient investment in infrastructure to accommodate additional local development.

I object to removal or inset' from the Green-belt of Send and other villages in the Borough, or sections of land such as Send Business Park (Policy 2 at paragraph 4.3.15). This can only be done in exceptional circumstances according to law, for which none exist. This is deliberate erosion of the green-belt by stealth. Any exceptions made to green belt protection will lead to its demise. All green belt land in Britain must be protected in its entirety in perpetuity as the law intended and stands,

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the changes to Policy P2

• Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.
• It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.
• I object to the changed “insetting” of 15 villages (including Ripley) from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages.
• I am deeply upset that settlement boundaries are to be hugely extended in many villages (particularly at Send) and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside of the OAN.
2 Loss of protection for the Green Belt. The draft Local Plan states that “We will continue to protect the Metropolitan Green Belt” and then is directly in breach of this policy as it proposes that 65% of housing will be built on land that is currently Green Belt.

Protecting Policies

Local Plan Policy P2 states that “We will continue to protect the Metropolitan Green Belt.”

However in direct contradiction to this the analysis in the Appendix shows that 65% of the developments proposed in the Local Plan are to be built on land currently within the Metropolitan Green Belt.

It has been repeatedly stated within government by different ministers that unfulfilled housing needs does not qualify as a special circumstance and our local MP Sir Paul Beresford has reiterated this in a letter of 21st June 2106 – “that Government Advice is unmistakeably clear – that housing need alone is *not* adequate grounds for building on the Green Belt.”

This was stated by GBC’ Planning Officer in assessing an earlier application for the Wisley site – “it has not been demonstrated that the benefits clearly outweigh the harm to the Green Belt”.

*I therefore object to Policy P2 on the grounds that it breaches central government policy.*

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
With reference to the Draft Local Plan published by Guildford Borough Council, I wish to **OBJECT** to the following proposals:

**I OBJECT to Send Village being removed from the Green Belt.**

The Green Belt was created to protect open spaces and prevent the indiscriminate growth of individual communities and loss of community identities. Politicians frequently promise to protect the Green Belt but this proposal is a clear breach of these hollow promises. There are no special circumstances that justify this breach of public faith in their representatives and officers.

Dear Sir/Madam

I would like to object to the proposal to change the Settlement Boundary so that it includes Fangate Manor, thereby removing Fangate Manor from the Green Belt. I am writing because of my concern relating to Green Belt and to Fangate Manor:

1. **We OBJECT** to the proposal to inset East Horsley from the Green Belt. The proposal to inset East Horsley from the Green Belt will be detrimental to the rural character of the village and should be dropped. The specific changes proposed are not justified under the National Planning Policy Framework rules.
2. We strongly oppose and **OBJECT** to the proposal to remove Fangate Manor from the Green Belt and include it within the Settlement Boundary. There are no exceptional Planning circumstances to justify removing Fangate Manor from the Green Belt, and changing the Settlement Boundary does not in any way enhance the defensible nature of the Settlement Boundary. It merely involves moving the boundary from one hedgerow to another, but leads to the loss of Green Belt and agricultural land.
3. There is an **ERROR** in the Land Availability Assessment dated February 2016, and we ask that GBC corrects this. There is a plan on page 299 that appears to show access to Fangate Manor from Manor Close. Manor Close is a private road, and access will not be granted. MCRA would oppose any change to the character of this very quiet road. The road and the verges are narrow and are not suited to any growth in traffic.

Please can you take my objection seriously as I find this to be very damaging to our local area.

POLICY P2: GREEN BELT: Object
● No exceptional circumstances exist which warrant removal of land from the Green Belt. Unmet housing need is not an “exceptional circumstance”.
● Socalled “insetting” of villages from the green belt is simply removal of more land from the green belt. GBC has a duty to use plain English to describe their proposals rather
than hiding behind unclear language.
- The Draft plan seems to priorities development on the Green Belt over brownfield sites in meeting future housing need.
- The Green Belt land is a precious asset and its loss is irreversible. It is our collective responsibility to protect it for future generations.

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development." However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as well as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as well as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an ‘acceptable’ percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.
Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages.

In particular I object the proposed changes to the settlement boundaries for East and West Clandon.

Neither the residents nor the Parish Councils have been consulted on this and we do not wish our boundaries to be altered.

I also object to proposed infilling. A visit to Hook Heath in Woking demonstrates how a village is turned into a crowded estate very quickly once infilling is allowed.

We wish to keep the rural nature of our villages and infilling, together with proposed development of Gosden Hill Farm, will simply create merged suburbs of the rapidly extending Guildford Urban Area.

Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.
In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

I remind you of Guildford Borough Council’s submission to Parliament:

“5.1 Guildford Borough Council supports the fundamental principles of the Green Belt, as set out in PPG2: Green Belts (1995). They are:

1. to check the unrestricted sprawl of large built-up areas;
2. to prevent neighbouring towns from merging into one another;
3. to assist in safeguarding the countryside from encroachment;
4. to preserve the setting and special character of historic towns; and
5. to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.”

The proposed development of the ‘strategic sites’ in this draft Local Plan goes completely against the Council’s own stated policy.

Green Belt, Policy 2 at paragraph 4.3.15

I object to the proposal to inset Send Business Park from the Green Belt because there is highly restricted vehicular access along Tanner Lane in both directions, further expansion or development at this location detract from the openness of the Green Belt and will ruin an area of outstanding countryside adjacent to the beautiful Wey Navigation.

POLICY P2

I wish to register my objections to the proposed development of sites in East and West Horsley on the following grounds:

The proposed development area lies within the Metropolitan green Belt, which the policy P2 undertakes to protect from inappropriate development. There is no justification for the removal of this protection of a rural area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Green Belt

West Horsley is situated within the Green Belt and on the edge of the Surrey Hills, a Sight of Special Scientific Interest. Taking the village out of the Green Belt, and building such a huge number of houses, both in Horsley and Wisley Airfield, will have an enormous impact on these delicate areas. The increase in the number of people and in particular dog walkers and horse riders, using the SSSI will have an enormous negative impact on such a special environment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am totally opposed to the village’s removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area Boundaries. This seems madness for ecological reasons and also will change the face of the village for ever. The defined Settlement Area boundaries (ref 2003 Local Plan) do not need to be further extended. Over development will destroy the character of the area and deter what recreational visitors we have left (cyclists and walkers). Also the Guildford Borough Economic Strategy 2013-2031, makes no case for locating large numbers of homes in East and West Horsley or indeed the neighbouring villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I want to vehemently object to the villages being inset from the green belt.

In the Guildford plan section 4.3.12 it states "Historically all the villages, except Ash Green, and major previously developed sites have been washed over by the Green Belt designation. However, the national planning policy states that only those villages whose open character makes an important contribution to the openness of the Green Belt should be included in the Green Belt. Those that do not should be inset, or removed, from the Green Belt and other development management policies used to restrict any inappropriate development". According to the National Planning Policy Framework (NPPF, 2012) there are five stated purposes of including land within the green belt: to check the unrestricted sprawl of large built-up areas, to prevent neighbouring towns from merging into one another, to assist in safeguarding the countryside from encroachment, to preserve the setting and special character of historic towns, and to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

In fact the UK government encourages local authorities to protect the land around the towns by creating green belts, and not to build on them. By insetting the villages you are effectively disregarding the government policy to protect urban sprawl, not safeguarding the countryside, and not preserving the character of the villages in this area. Who has decided that West Horsley and the other villages mentioned in the plan do not make a significant contribution to the openness of the greenbelt?

This is a village and should remain a village at its current size, and not be inset by the plan to accommodate the greed of the property developer, it should remain in the greenbelt as it is a beautiful village to live in and it should remain so. Lets face it, putting a quarter of the homes designated for development in greenbelt villages in one village is too much and should not be allowed to happen. Please listen to our concerns and not allow developers to make significant revenue for themselves at the expense of destroying village life in Surrey.

arrangement. Send's Green Belt provides an essential buffer stopping Woking and Guildford comprising one conurbation. It is a betrayal of the trust that was placed by residents in local councillors and central government who gave clear undertakings to protect the Green Belt. These proposals represent a breach of representations made to, and the mandate given by, residents who elected them. The Green Belt is a safe haven for a diverse range of wildlife. I have observed over the 16 years that I have lived in Send how this wildlife has been eroded. For example, it is clear that plants and animals such as the English oak, the adder, the song thrush and toads are less numerous than when I first came to live in Send. Removing the village of Send from the Green Belt will further limit the ability of these and other wild lifeforms from using the area as a habitat, if not exclude them from the area altogether. Removing Send from the Green Belt will also result in a loss of amenity to residents, many of whom live in the area as young families or retirees, or who otherwise as residents take pleasure from its semi-rural/rural setting and surrounds. This proposal, if successful, will without doubt result in extensive development that will destroy forever (a) the personality and fabric of the village and (b) in turn, the lifestyles and amenity of residents.

### 1. POLICY P2

I object to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

I object as Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned.
I object as The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that “... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages.

In particular I OBJECT to the settlement boundary put round East Clandon with no reference to the residents or the Parish Council.

Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. **SITES - POLICIES A1 TO A57**

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. **The plan says that “allocating these sites does not grant planning permission for development.”** However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

I wish to object to a number of issues in the ‘Proposed Submission Local Plan (2017)’ which have changed since the previous ‘Draft Local Plan 2016’. In addition I would like to state that the original objections to the 2016 plan remain. I still believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity currently enjoyed by residents of East Clandon and to the even greater detriment to our neighbouring villages of West Clandon, Ripley, Send, West and East Horsley. The plan erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

The Plan involves moving the current Greenbelt boundaries and the Greenbelt is one of the main reasons why this area maintains its rural charm and character, particularly just outside the M25. If the proposal goes ahead then the Greenbelt land will be lost forever and our inheritors will be denied these benefits and be thrust into an increasing metropolitan mass.

**Development within the green belt**

The stringent national criteria for exceptional circumstances for removing greenbelt classification has not been met.

The area is uniquely placed to act as a barrier from the urban sprawl of London, and adjustments to the greenbelt boundaries will result in an additional housing load. This will erode the current green area between the major towns of Woking, Cobham, Leatherhead, and Guildford. I do not believe the reason for removal of green belt status is justified.

This area of rural Surrey attracts visitors to the region, such as walkers and cyclists from outside the county and its importance extends beyond that of the local residents.

Whilst I welcome the removal of site A36 and A41, the amendments have not addressed the failings in the local plan on infrastructure (that the level of development is so extensive the area cannot accommodate the additional housing without major investment in infrastructure and other local provisions), development within the green belt and other concerns as stated in my letter dated 17 July 2016, for the following sites:

**Former Wisley Airfield (site A35)**

**Bell & Colvill (site A37)**

**Manor Farm Site (site A38)**

**Ockham Road North (site A39)**

**Ockham Road North (site A40)**

**Garlick’s Arch (site A43)**

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and
nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am shocked to read about the gerrymandering with established boundaries in, what appears to be, an attempt to make the plans work where they are unworkable under existing and long established village boundaries. It is my understanding that any change in Green Belt boundaries should demonstrate exceptional circumstances. I see no exceptional circumstances to justify the proposed arbitrary changes to the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

There are obvious and real reasons why the plan to ‘adjust’ the village boundaries and cancel large areas of Green Belt to accommodate a 35% increase in local households does not work. In addition the loss of recreational amenities, both for local people and the considerable number who travel, particularly from London would be disastrous. There appears to be a determination to extend the boundaries of the built up area of London through the Horsleys, past Guildford and beyond. Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. I understand that there are five legal purposes for Green Belt as I am certain you are aware, and the area around East and West Horsley is particularly critical in meeting all of these criterial:

• To check the unrestricted sprawl of large built up areas
• To prevent neighbouring towns merging into one another
• To assist in safeguarding the countryside from encroachment
• To preserve the setting and special character of historic towns
• To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

The concept of limiting urban sprawl, and the requirements for the establishment and maintenance of the Green Belt have apparently been disregarded or completely ignored in the new Guildford Local Plan.

May I urge you urgent to reconsider this objectionable and unworkable plan that will result in the loss of the villages and country in which we live.

I strongly object to policy 4.3.13 which removes a number of villages from the green belt for the following reasons:

Whereas only certain sites have been identified within these villages at this stage of the local plan it will open the floodgates to future high density infilling within the villages which will put pressure on the infrastructure and roads and more importantly destroy historic English villages forever.
There has been little consultation from the council with the public many of whom do not understand the implications of this document.

The Localism Act has been ignored

I OBJECT to the "insetting", i.e. removal, of the villages of Send, Ripley and the Clandons from the Green Belt. There is no demonstrated need let alone "exceptional circumstances" for such action and the proposed massive development in these areas. The former Secretary of State, Eric Pickles, emphasised last year that Councils did not need to achieve Government building targets at the expense of the Green Belt. Both the outgoing Prime Minister and Chancellor, David Cameron and George Osborne, reiterated this earlier this year. There is no reason to assume that government policy has changed in the light of events over the past week, and indeed "Brexit" may well lead to a reduction of immigration, depending on the terms of withdrawal from the EU that are negotiated in due course. The Green Belt was to remain sacrosanct as a buffer between urban area except for where exceptional circumstances exist. It is abundantly clear from the proposals in this ill-conceived plan that no such circumstances exist as regards the proposed developments on green field sites in the existing Green Belt.

Send in particular, I concede is not a pretty village, at least as far as the central section of it's main street is concerned. Nevertheless the roads off it are predominantly attractive semi-rural and rural lanes, soon running into attractive and largely unspoilt countryside. Send in particular however, has one attribute shared by only one other village, Shalford, in the Guildford Borough Council area: the Wey Navigation runs through it. This provides a beautiful rural corridor through the northern edge of the village, especially from Trigg's Lock south-west of the village to the Tannery Lane Business Park north-east of it. The Green Belt principle has already been breached in this area by the grant of planning permission for the construction of the new Vision Engineering factory adjacent to the Navigation, but it is accepted that exceptional circumstances were shown for the building of the new factory on land owned by the company next to the existing one. That of course is no reason to allow any further development without again demonstrating exceptional circumstances, nor I would argue, to remove this area from the Green Belt. Send, and its neighbours, should remain in the Green Belt to continue the separation of Guildford from Woking and to avoid having what would effectively be one continuous conurbation from the M25 to Woking to the west of the M25, and to Guildford to the south-west. That is what
the Green Belt principle was intended to achieve, and which remains its objective, the intention being that the Green Belt should be permanent unless special circumstances are made out. They clearly are not here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

GREEN BELT POLICY 2 AT PARAGRAPH 4.3.15 - RE SEND BUSINESS PARK

I OBJECT to the "insetting" i.e. removal, of Send Business Park from the Green Belt. This is a long-established non-conforming user in the Green Belt adjacent to the National Trust owned Wey Navigation. There is no justification for its insetting and indeed the Council makes no attempt to argue that there is any such reason. It therefore follows that no exceptional circumstances exist as required by the National Planning Policy Framework and thus that there is no reason to inset it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the proposed removal of Green Belt Protection for Send - the Green belt status should be left in place as per the National Planning Policy framework to provide permanent protection against over development and the risk of conurbation and transformation of villages into sprawling areas of mass population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. Legality of Insetting of Villages from the Green Belt
2. Current case law in England is that any removal of land from the Green Belt for any reason and by any means is illegal unless there are special circumstances. This is also set down in the various planning frameworks. Insetting from the Green Belt for the purposes of freeing up land for building without special circumstances has been declared illegal in previous court judgements.
3. No special circumstances are set out in the Draft Local Plan. Proposing or following a course of action known to be illegal should be cause for investigation of those involved for misconduct in public office.
4. I specifically object to the removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford. With no special circumstances given in the Draft Plan, the insetting of Send from the Green Belt would be illegal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. The changes to the plan appear go against the “Countryside Vision Strategy” adopted by the Borough Council and published in the Summer 2017 edition of “About Guildford”. The strategy talks of protecting the countryside, not insetting large areas from the Green Belt and building houses, traveller pitches and industrial sites on it. The strategy talks of aligning the countryside management with “national policy” - and national planning policy dictates that the Green Belt should be protected.

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from
the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that “… the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

1. **Green Belt Protection**

Green Belt status is a vital protection for our environment, our way of life, and our communities. While GBC is seeking to make massive detrimental changes to meet their perceived but wrong housing need, I believe in any case that meeting housing development need is not sufficient grounds to amend the Green Belt. **Therefore, I strongly OBJECT to any changes to the Green Belt being made for housing reasons.** Our villages should retain their Green Belt status to preserve the culture, the environment, and provide a barrier against the continual and pervasive over-population of our beautiful countryside.

I would remind GBC that there needs to be “exceptional reason” for any village to be removed from the Green Belt, and that housing need to make up development plan numbers is NOT one of them. Where there is need to add housing, use brownfield and extend the current larger communities such as Guildford and Woking to meet needs – where the infrastructure can support the growth. Please consider refusing planning for future new supermarkets such as Waitrose in Guildford, which was not needed, and build housing to the maximum capacity instead. It is simply outrageous that the plan entails over 65% of the new housing being planned for current Green Belt areas.

It is counter to national policy to remove the highest level of statutory protection and rely on conservation areas and other changeable planning policies. Therefore, I can only conclude that the proposed changes to the Green Belt are being done simply to remove any objections to the future development. Hence, **there should be NO CHANGE to the Green Belt status of the villages concerned.** The LDP therefore needs to be amended to remove the proposals to remove Green Belt status and remove development plans seeking to build on current Green Belt land.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Concluding remarks**

In summary, there are several significant areas of major objection to the LDP that impact on life in the Surrey villages. The LDP appears to have specifically gone against national Green Belt policy that states that meeting housing need is absolutely not a valid reason for re-categorisation of Green Belt. This plan is therefore ill-considered, and needs to be re-worked from the ground-up and taking full account that Green Belt villages cannot be re-designated to get round planning laws. GBC should seek to:

1) get accurate (and hence far lower) housing demand forecast, and provide objective evidence for their forecasts

2) find ways to meet this without sacrificing Green Belt nor existing village character and community, and

3) before deciding to recommend plots for development, actually consider the real implications on rural lanes and other infrastructure when the plots are amalgamated

GBC should be protecting the Green Belt, the villages and the way of life that we have all come to know and love. Let’s use the plan to do that, not destroy it in many areas, as seems to be the likely outcome from the current draft plan. You have the power to protect for the next 20 years at least, or the ability at a stroke to destroy forever the heritage we cherish. As councillors and planners, you have this important responsibility – please do not take it lightly on the basis of flawed assumptions.

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored.
Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12849  Respondent: 11053825 / Claire Owen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads)
considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

This Local Plan goes against the stated purposes of the green belt.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
The Local Plan allows for several large developments along the route of the A3, from Guildford to the outskirts of London, creating a corridor of development between the two – and so does not prevent the unrestricted sprawl of the London urban area into the countryside.

The Local Plan aims to remove a number of villages from the green belt, thus removing restrictions on development within and around the villages – however, the stated purpose of the green belt is prevent urban sprawl by keeping land permanently open, and consequently the most important attribute of green belts is their openness. Also, the location of the land designated as green belt is fundamental to its purpose – designating alternative land that is located in a more developed area further away from London that is of less interest to developers is not protecting the green belt at all.

The Local Plan permits a disproportionately large amount of development in areas that are currently Green Belt, whilst a relatively small amount of development is planned for the existing urban land. The proportion of new housing within Guildford is far too small, with the development planned for the countryside, ruining the latter and harming urban regeneration. This goes against the aim that urban regeneration is encouraged.

Our ancestors had the foresight to create the Metropolitan Green Belt to restrict the outward growth of London. We must protect this for our descendents.

I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41:

I am opposed to the changes to the settlement boundaries for East and West Horsley. I am opposed to the removal of East and West Horsley from the Green Belt.

The proposed changes to the settlement boundaries for East Horsley and the northern part of West Horsley may result in considerable development within the new boundary in addition to the development proposed in the plan. There is no assessment of the level of additional, as yet unplanned, development that this change may have.

The plan indicates that it is assumed that some of the development in East and West Horsley will be within walking distance of the primary school and the railway station. However, the pedestrian pavements within East and West Horsley are frequently on only one side of the road and often narrow due to encroachment of trees and hedges. The roads often flood or have large puddles making walking along pavements hazardous after heavy rain. The roads and pedestrian pavements are also often poorly lit or not lit at all. This infrastructure would have to be dramatically improved to avoid significant increase in car traffic - but to do this would completely change the character of the villages to be more like an urban area.

The public transport facilities in East and West Horsley consist of a good train service but an infrequent bus service that does not run in line with typical working hours. It is likely that most of the additional transport resulting from the development in East and West Horsley will result in additional car journeys - either directly to the destination or to and from the railway station. The assumption of pedestrian access to the facilities is incorrect.

The proposed amount of new housing far exceeds the local need. The proposed developments would bring a disproportionally large number of new residents to West Horsley, in particular, for whom there a few opportunities for local employment. The employment prospects for these new residents would mostly be outside of the Horsleys. Hence the new developments would not be providing for local needs, but would allow for people to move out of London and still commute into London for their employment. This is not a sustainable development and goes against the purposes of the green belt.

The infrastructure of East and West Horsley cannot support such a great increase in the number of houses. The local plan classifies Station Parade in East Horsley as a District Centre, designating it an area appropriate for large development due to the availability of local facilities. There is no assessment of the facilities themselves and whether they could support the proposed development sustainably. The 'supermarket' in East Horsley is not sufficiently large to be subject to Sunday trading restrictions, and as such would not fall into a modern description of a supermarket. The small parades of shops in East and West Horsley can only be described as local shops. However, once again, to develop these areas to provide the additional facilities to support a far greater population would completely change the character of the villages, a result which goes completely against the purpose of the Green Belt.
The proposed housing density is excessive when compared with existing housing density within the Horsleys and would transform the Horsleys into a sizable town, something for which no case is made and for which there is no local support. The collective impact of these 6 sites on a small part of the borough is not considered by the Local Plan and they should not be treated as isolated, separate sites. The total amount of new building in the northern part of West Horsley and the adjoining part of East Horsley is out of scale with the planned development elsewhere the borough, including the less sensitive urban areas that are not protected by the Green Belt.

The Horsleys are characterised by streets with development along only one side of the road and an attribute of openness. The policies allow too many adjacent green fields to be developed. This goes against the stated purpose of the Green Belt to retain attractive landscapes and the enhancement of landscapes, near to where people live.

The development sites are mostly currently used for agricultural purposes. To use agricultural land for development purposes cannot be considered ‘sustainable’. Also, the key infrastructure is lacking, with poor wastewater capacity and flooding.

The development of the Horsleys would contribute to a significant narrowing of the Green Belt gap with neighbouring settlements hugely narrowed, especially if the neighbouring large developments also occur at Wisley Airfield, Burnt Common and Gosden Hill Farm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly object to not protecting the Green Belt (Policy P2).

I am appalled that such a large amount of greenbelt is being used by the GBC plan. I strongly object to removing Ripley, Send and Clandon from the Green Belt, together with Wisley Airfield (A35) and especially Garlick’s Arch (A43) and am appalled at the resulting urban sprawl that would result from this development plan. Why put houses and light industrial close to the A3 at Garlicks Arch? The quality of housing will not be great because of proximity to the A3 (noise and pollution) and there are overhead pylons across the proposed development. There are no exceptional circumstances for these villages and sites being removed from greenbelt status, as required by the National Planning Policy.

I believe the Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43), if indeed it believes that we now need this.

Furthermore what about using the Slyfield site – there was a leaflet proposing that site instead recently?

Additionally – climate change – it is predicted – could remove 30% or so of our farming land. Why waste valuable productive farmland when it may become even scarcer in the future? Is the official GBC view that climate change is not happening?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

There is no exceptional circumstance that has been demonstrated to require Horsley to be removed from the green belt. Extension of the boundary area of Horsley is being attempted with no sound reason for this action.

3. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2).

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions. Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I do not believe this to be true.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Policy P2 Introduction – My Objections

83) The removal of Green Belt protection from the prison site means that it is likely to come forward for housing development. The nearest feasible access to the A3 is at the A247 junction.

84) My objections to increased traffic on the A247 through West Clandon are outlined more fully elsewhere but include: (i) although notionally an A-road the A247 is narrow and winding in parts and is most unsuited to carrying additional traffic, (ii) the A247 has a single non-continuous footpath in several sections, (iii) a care home, a church car park and a pub, as well as very many houses, are located on the opposite side of the road to the only footpath, making pedestrian access difficult for people moving about the village on foot, especially for elderly and disabled people; (iv) the railway
station and other commercial and residential properties have poor sight lines for access onto the A247 and difficulties in accessing the A247 from these properties will be exacerbated by increased traffic volume (and fewer “gaps” between cars); (v) the A247 is popular with cyclists and because of its narrow and winding nature the potential for accidents that additional traffic will cause is clear.

Policy P2 – My Objections

The Plan states: “4.3.16 National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development.”

The Plan fails to demonstrate that exceptional circumstances exist for each site that is to be taken from the Green Belt. The wording implies that it is legitimate to have a blanket change to Green Belt boundaries to facilitate development. That is not in accord with the NPPF.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

POLICY P2 (GREEN BELT) – I object very strongly. This policy should start by stating the council’s support for the Green Belt, in line with the NPPF, statements by Ministers and its own election manifesto commitments. It should then make a fair and balanced assessment of the Green Belt’s positive importance to Guildford as an asset providing amenities and services to the public and to private individuals alike. This would allow planners in future to evaluate the cost of development proposals in terms of the damage to natural heritage, views and landmarks, farm production, leisure and tourism, biodiversity, flood control, water catchment, carbon sink capacity, public health and wellbeing, public open spaces (eg parks, SANG, burial grounds, recycling areas), mineral extraction, other rural businesses etc, etc…

The amount of new building planned to be located in the Green Belt is beyond all reason. It’s out of proportion with the relatively minor amount destined for the urban areas, where most people would prefer to live. It discriminates against the less well-off by dumping them in remote ghettos in the countryside where there are no jobs, no transport and no social infrastructure. It discriminates against rural residents who’ll have their environment ruined. Actually, it even discriminates against town dwellers who will never see Guildford regenerated.

2000 residents made all this clear in the last consultation and the Conservatives promised to protect the Green Belt, but this plan is a major assault on it, just like the last version, piloted by the infamous Monika Juneja. Nothing has changed.

Why can’t the urban and rural settlements simply adopt new development in proportion to their size? That would mean Guildford town accommodating 20 times the number of new homes compared with the next biggest settlement, East Horsley. People would accept that.

I find it offensive for councillors to say that there is a percentage of Green Belt that should be “sacrificed” to development when this isn’t necessary. It doesn’t matter what the percentage is – this approach isn’t supported by any government policy. We’re being told we can’t stand in the way of progress. That’s what they said about asbestos – and Communism.

Who says Guildford’s rural villages don’t contribute to the “openness” of the countryside and should be “inset” (ie kicked out)? Only the consultants that some unauthorised civil servant hired to draw up the defective Green Belt and Countryside Study, which has never even been vetted by councillors. It’s all too subjective as a basis on which to wreck the lives of thousands of rural residents.
This policy doesn’t refer at all to the requirements in NPPF para.17 and the effects that major development in the Green Belt would have in this regard.

Any impartial observer can see that removing most of the villages from the Green Belt is a very dubious move, especially given the lower economic and population growth following Brexit.

Village settlement boundaries would be extended in a major way, allowing great blocks of house building on green fields and changing forever the rural character of our villages. There is no argumentation or case made in the plan for doing this, and it is unjustified.

As a young resident (23) I don’t want my heritage sold off by people who won’t live long enough to see the consequences. The Green Belt has survived several generations already and should continue to be protected down the ages. The council has misjudged young voters like me if it thinks a vain attempt to manipulate short-term house prices is going to win our support.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)
This Policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough). I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this Policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This Policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.
In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch so there is no evidence base to support including this site. Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.
I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. 1. SITES - POLICIES A1 TO A57
I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

I object to the proposal to inset Send Business Park from the Green Belt for the following reasons:

- It is an old site that should not be further developed because of its location within Green Belt land on the Wey Navigation
- The road network is narrow and restricted, and totally unable to service any new expansion
- Road links to the A3 and elsewhere go directly through the village, which would increase traffic pollution and danger to local residents and children

To summarise, all these developments in Green Belt land have attracted many thousands of objections from local residents - they are not wanted, but more importantly, they are simply not needed. There are many brown field sites throughout the borough that have not been taken advantage of, only because they would not yield as good a profit for developers.

Housing is needed, but it must be built in the right places, not just the most convenient or most profitable, and be accompanied with investment in local services for the huge increase in numbers of people that would come along with the proposed construction. The real tragedy is that were these developments in Send, Send Marsh and Burnt Common allowed to go ahead, the quality of life for existing and new residents alike would be much poorer than it is now. Local roads, schools and medical facilities are already fully stretched. There would be a considerable human cost for hitting government targets.

Green Belt.
The proposed plan does not protect the Green Belt and 65% of the proposed new developments will be placed on land that is currently Green Belt. According to the National Planning Policy Framework para 87, it is stated that ‘As with previous Green belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances’. The housing need has already been turned down as an exceptional circumstance.

The plan refers to various villages being currently washed over by the green belt and goes on to say that "the national planning policy states that only those villages whose open character makes an important contribution to the openness of the Green Belt should be included in the Green Belt” (4.3.12) With no further justification or discussion the Plan then states that 14 villages are summarily inset from the Green Belt (4.3.13). This is wrong, arbitrary and seemingly in conflict with what has been expressed in previous drafts of the Local Plan which stated

"....The Government attaches great importance to the Green Belts and there is a general presumption against new development in the Green Belt."

"...National Planning Policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken through the Local Plan process"

We consider that the Plan has completely failed to make the case that such exceptional circumstances exist and that as such no amendments to the boundaries should be made around the village settlement boundaries or specifically in relation to the proposed massively inappropriate free standing settlement at the former Wisley airfield which also requires land to be taken out of the Green Belt. We consider in particular that the open character of the East and West Horsley and Effingham villages does make an important contribution to the openness of the Green Belt. Specifically we think that the openness of the Green Belt along the A246/A3 corridor is of critical importance, and has the added benefit of buffering the Surrey Hills AONB. We also consider that the current openness of the Green Belt to the west of the Leatherhead/ Fetcham/Bookham extended settlement and south of Cobham plays a key role in preserving the character of the Green Belt. As such we think the preservation of the Green Belt status of the historic villages running from West and East Clandon to West and East Horsley and on to Effingham and Ockham is massively desirable and entirely in keeping with national guidelines.

Similarly to create a massive new settlement south of the 43 at Wisley, further compromises the openness of the Green Belt.

I object to the Removal from the Green Belt of homes in Guildford Road, northern end of Glaziers Lane, Flexford, Walden Cottage and Palm house Nurseries traveller site.

The GBC has not provided exceptional circumstances for changes to the Green belt.

I object to the changes to Policy P2 because the council has not addressed many of the 32000 comments made about the 2016 plan.

Policy P2 fails to appreciate the importance and permanence of the Green belt and that it needs to be permanently protected. The intension of the Green belt is to check unrestricted urban sprawl.

I object to the statement in the submission Local Plan under Green belt Policy P2 (4.3.13) which claims that Normandy, Flexford and a further lists of 12 villages are “now inset from the Green belt.” This is untrue as GBC is proposing to “inset” these villages. No decision has been made by an Inspector, therefore these villages remain in the Green belt.

I object to Policy P2 green belt This policy states, “the general extent of the Green Belt has been retained.” This is a misleading statement. The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. Once gone it is gone forever. It is not the Council’s to give away. Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world. Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

1. Agricultural production
2. Rural leisure and tourism amenities
3. Water catchment
4. Flood control
5. Biodiversity
6. Natural heritage
7. A carbon sink for air pollution
8. Room for public facilities such as parks and burial grounds
9. Profitable film locations (e.g. Shere)
10. Future economic potential such as mineral extraction (even fracking)
11. Natural beauty, landmarks, open space, rural views and sight lines
12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations. It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. I object to the “insetting” of 14 villages from the Green Belt. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat. I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead.

I object to the removal of over 400 hectares of Green Belt land in and around Blackwell Farm to facilitate further development of Surrey Research Park and for 1800 homes. Over 60 hectares were removed from Green Belt 12 years ago for the same developer (Surrey University) who has yet to fulfill their planning obligations. This valuable land has been squandered with over 17 acres of surface car parking and as one of the key features of Green belt is its 'permanence' this second request for yet more Green Belt land to be released in such a short space of time, with all the outstanding issues that remain makes this all the more objectionable.

Furthermore I object on grounds of the impact this development will have in terms of congestion on our highways, these issues have been highlighted under 'infrastructure'.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Council to act in accordance with the views of the majority of Borough residents, rather than to continue with proposals that benefit a minority with a vested interest in the proposed major new housing developments.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I have lived in West and East Horsley since 1984 and object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I object to not protecting the Green Belt (Policy P2)

It would be a tragedy to remove Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) as this would result in an urban sprawl that would utterly destroy the character of the area. Successive governments have continually supported the retention of the UK's Green Belt that is particularly necessary in the outer reaches of London. The alternative would lead to London sprawl extending to beyond Godalming. This must be avoided at all costs. There are more than enough brownfield sites in the Guildford area that should be developed for the Plan.

There are no exceptional circumstances for these villages and sites being removed from the Green Belt, as required by the National Planning Policy (Policy P2).

Central Government state clearly that housing need is not an exceptional circumstance.

WE OBJECT to not protecting the Green Belt (Policy P2)

WE OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt, and its inclusion in the Local Plan as a site suitable for development. This site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. The proposed removal of this site from the Green Belt by GBC only a few months after Wisley Property Investments Ltd.’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers is totally hypocritical, lacking in logic and integrity, and would seem to indicate the existence of an unduly coercive influence by the associated developers on some council members.

From what I have seen of the Local Plan Guildford’s planners, councillors and external consultants seems to have forgotten (or not be aware of) what gives the Borough and Surrey as a whole its unique character and the attributes which currently make it one of the most desirable places in the country to live in.

The first of these is of course that a good proportion of the Borough and indeed the county is countryside protected by the Green Belt, a piece of planning legislation which has given London its “Lungs” and prevented an unrestricted urban sprawl envied by most of the world’s capital cities.

The second is that quintessential element of the British countryside, small villages dotted about the county each with its own character, vernacular architecture, church and village green and individual communities.

The third attribute is the space that we enjoy by choosing to live in a rural and not an urban environment.

The proposals shown in the Local Plan spell out the destruction of what causes this part of Surrey to be unique and will devalue the quality of life of many of the Borough’s residents particularly in the Horsleys, Ockham, Ripley and Send.

5) For these reasons I also object to the proposed extension of the Settlement Boundaries of the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to Policy P2 green belt. This policy states, “the general extent of the Green Belt has been retained.” This is completely false. The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and it needs to be permanently protected. The boundaries of the Green Belt through Guildford Borough were defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected
This is in breach of party manifesto commitments and contrary to previous responses to public consultations. It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. I object to the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages reflect the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development. I believe this policy is based on a flawed Green Belt and Countryside Study. To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions. Send is a good example of villages that should not be removed from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. The village and the countryside behind the A247 should all be protected.

I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt around Send which include:

- The land behind the schools including playing fields and woodland.
- The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
- Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

Policy 2 paragraph 4.3.15 green belt.

I object to the proposal to inset Send Business Park from the green belt. The business park fronts the River Wey navigation which is acknowledged as protected corridor. The business park is a historical accident arising from a former historic industrial use. Tannery Lane is too restricted for any increase in traffic and the business park should remain within the green belt to inhibit further development.

I categorically OBJECT to this policy.

As a start, the Green Belt does not belong to Guildford Borough Council and therefore is not theirs to carve up and dispose of as they choose. The Green Belt totals 89% of the borough and as such must be vigorously protected for existing and, above all, future generations.

Careful and considered development of certain Green Belt areas could be considered – but these must be proportionate to the size of existing developed areas. For example, how can anyone justify that urban Guildford receive less development than semi-rural Horsley? Guildford is in desperate need of regeneration! How can this be overlooked in favour of sacrificing untouched countryside? The revival and repopulation of central London is a clear example that building satellite settlements is an out-of-date approach to planning.

Furthermore, the “insetting” of 14 villages and “infilling” 12 villages from the Green Belt is a completely flawed plan when considering these villages’ proximity to metropolitan London. How can someone argue that these villages fail to contribute to the purposes of the Green Belt? Yet again this is a totally flawed manipulation of incorrect information.

I fervently hope that this time residents’ considerations will be taken into account more and will result in a less “fluffy” version of a Local Plan – one that will be based upon concrete evidence rather than hypothetical approximations and one that will preserve the existence of the Green Belt.

Over 65% of the proposed housing is planned for land currently in the Green Belt. The Government has stated that housing need is not a reason for protected Green Belt Land being used to provide it.

In conclusion, I object to the Local Plan as it seeks to remove the Green Belt from our villages and places a far greater housing burden on West Horsley proportionate to the current number of houses, than anywhere else in the borough. It provides for no additional infrastructure or facilities and is largely a developers’ charter.

Both RHS Wisley and Wisley village are located within the Metropolitan Green Belt.

The RHS has been located at Wisley for over 100 years, and Wisley is the RHS’s flagship garden. It is therefore not just a garden but is the headquarters of the RHS. Consequently it contains built development to provide offices, a centre for research, education, an extensive horticultural library, restaurants and cafes, retail, tourism and leisure, and maintenance. All of these are ancillary to the main Garden and are necessary for the RHS to function and thrive. Consequently, these facilities need to have the ability to adapt and evolve in accordance with the primary use and function of the Garden.
Green Belt policy is not an effective way to control development at Wisley. The Garden requires the flexibility to adapt and we therefore propose that part of the Garden is excluded from the Green Belt in previously developed areas where the principle of development is either established or to be established by future planned development.

Policy P2 states:

“We will continue to protect the Metropolitan Green Belt, as shown on the proposals map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.

Certain forms of development are not considered to be inappropriate. Proposals will be permitted where they are consistent with the exceptions listed in national planning policy and, where relevant, also meet the following criteria:

Extensions or alterations
The extension or alteration of a building provided that it would not result in disproportionate additions over and above the size of the original building.

Replacement buildings
The replacement of a building, provided the new building:

- would be in the same use, and
- is not materially larger than the one it replaces, and
- is sited on or close to the position of the existing building.

Limited infilling
Limited infilling within the identified settlement boundaries of the following villages: Albury, Compton, East Clandon, East Horsley (south), Gomshall, Holmbury St Mary, Peaslake, Pirbright, Puttenham, Shere, West Clandon and Worplesdon.

Limited infilling may also be appropriate outside the inset or identified settlement boundaries, and in the following villages, where it can be demonstrated that the site is as a matter of fact on the ground within the village: Artington, Eashing, Farley Green, Fox Corner, Hurtmore, Ockham, Seale, Shackleford, The Sands, Wanborough and Wisley.”

It is considered that the wording of this policy is not clear and therefore the following alterations to the wording is suggested:

“We will continue to protect the Metropolitan Green Belt, as shown on the proposals map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.

Certain forms of development are not considered to be inappropriate. Proposals will be permitted where they are consistent with the exceptions listed in national planning policy and, where relevant, also meet the following criteria:

Extensions or alterations
The extension or alteration of a building provided that it would not result in disproportionate additions over and above the size of the original building.

Replacement buildings
The replacement of a building, provided the new building:

- would be in the same use, and
- is not materially larger than the one it replaces, and
- is sited on or close to the position of the existing building.
Limited infilling
Limited infilling within the identified settlement boundaries of the following villages:
Albury, Compton, East Clandon, East Horsley (south), Gomshall, Holmbury St Mary, Peaslake, Pirbright, Puttenham,
Shere, West Clandon, and Worplesdon and Wisley.

Limited infilling may also be appropriate outside the inset or identified settlement boundaries, and in the following
villages, where it can be demonstrated that the site is as a matter of fact on the ground within the village: is contained on
at least 3 sides by built development:
Artington, Eashing, Farley Green, Fox Corner, Hurtmore, Ockham, Seale, Shackleford, The
Sands, and Wanborough and Wisley.”

Previously, a proportion of Wisley Garden was proposed to be allocated as a Major Previously Developed Site within the
Draft Local Plan Strategy and Sites Document.

Since the Draft Local Plan Strategy and Sites Document was published, national planning policy and guidance now refers
to limited infilling as an exception to development in the Green Belt. Paragraph 89 of the National Planning Policy
Framework (NPPF) outlines exceptions to the construction of new buildings as inappropriate in the Green Belt. These
exceptions include the following:

“Limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land), whether
redundant or in continuing use (excluding temporary buildings), which would not have a greater impact on the openness
of the Green Belt and the purpose of including land within it than the existing development.”

The exception of ‘limited infilling’ is incorporated within Policy P2. However, Wisley Garden and Village are not
currently proposed to be an inset in the Green Belt in the Submission Local Plan: Strategy and Sites document. The
principle of the exception therefore only applies to land at Wisley that is previously developed and would not have a
greater impact than existing development. This does not serve the purpose of the Society. When development is planned
at Wisley the need to improve facilities to meet future demand naturally means that development will be larger and
therefore a subjective judgement is applied to determine whether this is a greater impact on the Green Belt or whether
very special circumstances exist. In order to provide greater clarity, we proposed that the Garden and Village are removed
from the Green Belt.

The garden at Wisley is definably a previously developed site, within the Green Belt, which is constantly evolving,
reflecting and supporting the work of the Society. On the basis that RHS Wisley has been formerly considered as a
previously developed site, we would propose that the gardens and village are included as an inset within the Green Belt
within adopted policy. This would allow for limited infilling and the redevelopment of brownfield land within the village
and garden.

Land at Wisley Village could provide a potential future housing site. This would reduce the need for development to be
directed to the Green Belt and could form a more sustainable option as well as creating a critical mass for a more
sustainable community at Wisley.

To support the allocation of land within the village for housing an assessment of the following would need to be
submitted in support to inform such proposals. This assessment would consider the following issues:

• Flooding;
• Access; and
• Ecology

A smaller scale of housing of approximately 15 units through infilling could be delivered in the plan period. This
approach would aid the delivery of the Borough’s housing targets. With that said, we hope the request to include Wisley
Gardens and the Village as an inset within the Green Belt will be supported.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that “... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

1. I object to Policy P2 under which areas of land surrounding Send Village would be taken out of the Green Belt. The Green Belt around Send provides a buffer between Guildford and Woking in accordance with Government Policy to limit urban sprawl and the reduction of the Green Belt in this strategic area would be the first step in the development of the very urban sprawl which the Green Belt was devised to prevent.

1. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.
The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

I write to state that I strongly object to the above proposals. This land contributes to the open character of Shalford Village and provides an attractive setting for the villages community, facilities. Highly significant is that access to this land is via Chinthurst Lane which is an already heavily congested country lane!

As a Shalford resident since 1969 I urge you to withdraw these proposals.

Section 4.3: Protecting Policies; Policy P2: Green Belt

The NRA note paragraph 4.3.11 reflects the NPPF in stating that the main aim of Green Belt is to prevent urban sprawl by keeping land permanently open.

Paragraph 4.3.12 states that historically all the villages in the Borough, except Ash Green, and major previously developed sites have been washed over by the Green Belt designation. The text then correctly confirms that the NPPF states that only those villages whose open character makes an important contribution to the openness of the Green Belt should be included within it. Those that do not should be inset, or removed, from it and other development management policies used to restrict any inappropriate development.
Paragraph 4.3.13 provides a list of villages which under LP1 will now be inset from the Green Belt.

Paragraph 4.3.14 follows and clearly states that although not villages, a similar approach is to be applied to major previously developed sites in relation to whether they should remain washed over or be inset from the Green Belt. Again the paragraph correctly reiterates that the NPPF requires that land which it is unnecessary to keep permanently open should not be included in the Green Belt. If major previously developed sites are of sufficient scale and do not possess an open character, it is not considered necessary for them to remain within the Green Belt.

Paragraph 4.3.15 goes on to list the major previously developed sites (MPDS) which will become inset from the Green Belt under LP1. These are: Henley Business Park, HM Prison Send, Keogh Barracks, Mount Browne, Pirbright Barracks, Pirbright Institute and the University of Law Guildford.

The NRA do not object to the insetting of any of these MPDS from the Green Belt. However, the NRA are entirely concerned, and disappointed, by: 1) the omission of Bisley Camp from the list of major previously developed sites within the Borough set out by paragraph 4.3.15; and 2) the according omission of Bisley Camp's developed land area as being inset from the Green Belt and shown to be so on the proposals maps of LP1.

As the Council will recall, in response to the consultation on the DLP in late 2014 the NRA submitted representations on the findings of the Council’s Green Belt and Countryside Study (GBCS) which comprised, and still does, part of the evidence base upon which the new local plan and its policies are being developed. It is not our intention to fully reiterate the content of the representations made in response to the DLP in response to LP1. A copy of the complete submission is however included at Appendix 1 of this submission for ease of reference and we invite the Council to review it again as a comprehensive element of the NRA’s submission to LP1, specifically in regard to the content under the section heading ‘Assessment of the Evidence Base’.

As currently written, whether by intention or otherwise, the NRA are concerned that between the consultation on the DLP the potential, and correct, status of the developed area of Bisley Camp as a MPDS has now been withdrawn by LP1. This is sincerely disappointing given the comparable similarities identified for the Council within the NRA’s representations made in response to the DLP, specifically regarding the developed area of Bisley Camp and Henley Business Park and The University of Law. The NRA consider that the status of these sites as MPDS support the basis for recognising and establishing Bisley Camp as a MPDS within LP1; and equally for Bisley Camp to be removed from the Green Belt also.

Accordingly, the NRA would like to see paragraph 4.3.15 amended to include Bisley Camp as a specified major previously developed site. The NRA also consider that the boundary of Bisley Camp’s MPDS should be drawn on the LP1 proposal maps to the extent shown on the drawing attached as Appendix 2 of this letter.

The NRA also note that beyond the reference to MPDS within paragraph 4.3.15 LP1 does not contain any other policy concerning MPDS. Having spoken with members of the Council’s Policy Team we have been advised that, at this time, it is the intention that a specific policy or set of policies relating to MPDS’s will be brought forward as part of the future Local Plan 2: Development Management Policies (LP2). It is considered this approach is less than ideal for the NRA and Bisley Camp. Firstly, although a MPDS policy could conceivably be delivered via the LP2 given the purpose and intent of MPDS status and its implications it is considered that this matter should be addressed as part of the LP1. MPDS are strategic policy designations and their designation and policy context should be developed and assessed accordingly. Indeed, as currently written in LP1 it would appear that this is what the consequence of paragraph 4.3.15 and the proposals maps are already establishing. The omission of Bisley Camp as an inset MPDS within LP1 is therefore failing to support the future regeneration and potential sustainable growth of the camp as a significant contributor to the leisure and tourism industry within the Borough. This would be contrary to paragraph 28 of the NPPF and likewise to the Council’s own stated spatial vision.

The NRA would also acknowledge the Council’s current LDS sets out the timescale for delivery of LP2 which is due to commence with evidence gathering from September 2017. Final adoption of LP2 will subsequently follow, after intervening consultation stages, in late 2018/early 2019. LP2 is clearly someway from the present and this further increases the importance to the NRA of the appropriate nature to define the status of Bisley Camp as a MPDS (whether within or inset from the Green Belt) as part of LP1.

In summary conclusion, the NRA consider Bisley Camp should be allocated as an inset major previously developed site. Insetting the site would not conflict with the purposes of including land within the Green Belt (as defined by Paragraph 80 of the NPPF) and, on balance, there is no reason why sufficient defensible boundaries (in compliance with Paragraph
85 of the NPPF) should not be identified. In this regard the NRA would welcome further dialogue with Officers of the Policy Team to discuss and provide additional boundary information. Furthermore, as identified in paragraph 20.8 of the GBCS, if major previously developed sites are not considered appropriate for insetting and are to remain washed over within the Green Belt this implies the open character of the site makes an important contribution to openness. This in turn implies there is limited opportunity to redevelop, or expand the site, without detracting from the openness of the Green Belt. It is evident from an objective assessment of the major developed area at Bisley Camp that the land does not make such an important contribution to the openness of the Green Belt nor does it in landscape character terms as identified in the Council’s own Landscape Character Appraisals. It is also evident that Bisley Camp exhibits comparable features with other major previously developed sites in the Borough that are proposed to be inset from the Green Belt and are stated as such within paragraph 4.3.15 of LP1.

**Policy P2: Green Belt**

The NRA generally support the wording of Policy P2.

However, the 4th bullet point of paragraph 89 of the NPPF clearly states the replacement of a building, provided the new building is in the same use and not materially larger than the one it replaces is one of the stated exceptions whereby the construction of a new building need not be considered inappropriate. Nowhere within the NPPF is it stated or implied that new buildings must also be sited on or close to the position of the existing building.

The inclusion of this requirement within Policy P2 is therefore entirely unnecessary, unduly restrictive and fails to accord with the corresponding Green Belt policies of the NPPF. The inclusion of this requirement within Policy P2 is also unqualified within the supporting text to justify why such a specific additional policy requirement should be included within the Borough’s development plan.

The NRA would therefore support an amendment to Policy P2 so that it reads:

‘…Proposals will be permitted where they are consistent with the exceptions listed in national planning policy and, where relevant, also meet the following criteria:…

**Replacement buildings**

The replacement of a building, provided the new building:

- Would be in the same use, and
- Is not materially larger than the one it replaces.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Attached documents:**
- Appendix 2 GBCS Section 20 Extract (2).pdf (479 KB)
- Appendix 1 BISLEY CAMP MPD (2).pdf (2.2 MB)
- 160713 LP1 Representation on behalf of the NRA DRAFT (002) (2).pdf (287 KB)
I object to the plan on the basis that any new development in this area will generate additional risk of flooding from drainage issues on Chinthurst hill; additional traffic congestion and risk of accidents in on already busy and narrow roads in the area. The infrastructure of the area with poor road capacity already struggles to cope with traffic that attempts to get in to and around Guildford via Shalford and Chilworth.

As a resident of Shalford at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] I object to the proposed redevelopment of the above since access to this land is via Chinthurst lane which is already heavily congested. The land also contributes to the open character of the village providing an attractive setting for the villagers and its community facilities. The boundaries in question have been there for a long time and therefore there is no valid reason for change bearing in mind the number of residents who have signed a petition objecting to the proposed settlement boundary change last year.

I sincerely hope that the Council will reconsider their proposals in light of the residents' wishes.

I object that all these proposed developments are on Greenbelt land

Must the people of Send, which comprises some 11% of the Borough, have imposed on them 40%
of the development of the whole Guildford Plan? This would see the village become submerged by overdevelopment, at
even greater risk of flooding, traffic congestion, an industrialised area conjoined to Woking and Guildford by houses for
families for whom no additional provision has been made.

The Government has repeatedly spoken in defence of the Greenbelt. Is Send excluded from this?

</tbody>
</table>
Land at Treetops Boarding Kennels and Loxhill Nursery, Old Portsmouth Road, Guildford was assessed through the 2014 SHLAA (Site 2118) as being suitable, available and achievable for the delivery of residential development subject to a satisfactory relationship within the Green Belt, and in relation to the AONB, conservation area and listed building. The site’s development potential was considered to be in the order of 12 units on 2ha, at a density of just 6dph. The site was confirmed as both available and achievable. An application for the site’s redevelopment for 39 dwellings 17/P/00801 is currently being considered by the Council. It is considered that this application reaches a balance between making most effective and efficient use of available previously developed land whilst still respecting the site’s environmental constraints. The resulting density remains very low at 20dph.

Again, at paragraph 14 of the NPPF, the definition of sustainable development is confirmed:

‘For plan-making this means that:

- local planning authorities should positively seek opportunities to meet the development needs of their area;
- Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change.’

The effective use of such previously developed land will assist the local planning authority in meeting its objectively assessed housing needs and in so doing respond positively to wider opportunities for growth as required by the NPPF.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

i) Site Allocations:
Land at Treetops Boarding Kennels and Loxhill Nursery, Old Portsmouth Road should be added to the list of sites in the Previously Developed Land in the Green Belt category of Site Allocations as follows:
New Site A34 Treetops Boarding Kennels and Loxhill Nursery Shalford Homes (C3)39

ii) Policy P2: Green Belt
Policy P2 should be amended to recognise the potential that previously developed sites within the Green Belt can make to housing delivery. As such an additional section should be added as follows:
‘Use of Previously Developed Land
(7) The redevelopment of previously developed land within the Green Belt is considered to be appropriate provided that it is appropriate to the scale of the locality and has a beneficial impact on the character of the countryside or the local environment in terms of improving the local built fabric.’

Comment ID: PSLPP16/10149    Respondent: 11170401 / Anna Bowe    Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I want to bring your attention to a settlement boundary change in one part of the village of Shalford.

I live at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and behind us is a small triangular field which belongs to [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]

I've attached a map of the field in question. I've highlighted in different colours the current situation and what I'd like to see changed. Basically:

- I believe the the proposed boundary change in blue is not correct and it's an accidental mistake. There is a lot of drama surrounding the fields behind the village hall. I think the residents of our part of Christmas Hill have got caught up in this unnecessarily.
- The preferred solution would be to leave the boundary unchanged (in red).

- As you can see in the map the field at the back of Findon Lodge has changed over time. The garden now extends back the whole way (in between the lime and white lines). The original field would have covered all this area hence the existing red boundary line.

- Because of the garden changes I have suggested two alternative boundary lines in lime and white.

The main point here is that the small triangular field needs to remain in green belt please!

- Over 700 residents signed a petition objecting to these boundary changes last year.

- We live in an area of outstanding natural beauty. Although this small piece of land currently has no intentions of being anything else we need to protect it. You just have to look across to Chinthurst Hill to see how badly this would be affected if something bad were to happen.

- If the fields behind the village hall were not up for consideration then I'm sure the boundary near us would not be changing either. It's a very small correction.

I'm happy to show you what I mean from my back garden. I'll throw in a cup of tea too. If you'd like to chat then please do call me on [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998.].

I also want to object to the proposed boundary change to the fields behind the village hall. The big danger here is that the current owner wants to build houses on it.

- Over 700 residents signed a petition objecting to these boundary changes last year.

- The elevation of this land and where it sits in the village contributing to the open character of the village should be protected.

- We live in an area of outstanding beauty. If these fields become less protected then it's such a great shame. I know we need new housing but I think Station Road has given well above the quota needed in our area!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: ChristmasHillPlan - BoundaryChange PNG (1.9 MB)
• Aerial maps which are being used to help draw the new settlement boundary don’t take into account the particularly high elevation of this land and its protected status.

The National Trust recognises the need to build more houses, and we support development in line with locally agreed plans.

Given the Borough’s landscape and green belt designations, which footnote 9 of the NPPF (discussed earlier in this letter) acknowledges are such areas where development should be restricted, in determining the approach to where new development should be distributed due regard should be given to the retention of the Green Belt to ensure that communities remain separated and to prioritise the re-use of brown field over green field sites.

Settlement Boundaries

West Horsley

As stated in our previous representations to the Local Plan we object to the removal of West Horsley (south) from the Green Belt. West Horsley is smaller in scale, and very different in form and character from East Horsley and its rural nature and proximity to Hatchlands Park are such that we believe it should be retained within the Green Belt. A future aspiration should be to extend northward the current boundary of the Surrey Hills AONB to wash over Clandon, Hatchlands, West and East Horsley.

Send

We object to the removal of the village of Send from the Green Belt. The scale, form and open, rural character of the village is such that it makes a significant contribution to the openness of the Green Belt.

I object – Having visited a friend whose house and garden overlooked our beautiful countryside, I was shocked and dismayed to hear that the Guildford Local Plan included a site to build houses on the adjacent field! I am therefore concerned that it is possible to find ‘special circumstances’ to justify building on protected Green Belt areas and especially in Send?

I am very concerned about the proposed ‘in-setting’ of Send which will mean that the green areas within our rural village will become much more vulnerable to development as they no longer have Green Belt protection? The green areas within Send characterise the rural aspect of the village and to develop them could spoil it!

I believe the plan is unsound for reasons including but not limited to:
-building on Green Belt when there is brownfield sites available.

b. Building on Current Green Belt land: I OBJECT to the proposed development of current Green Belt sites at Clockbarn Nurseries, Garlick’s Arch, and Send Hill since there are no special circumstances which justify removal of their Green Belt status.

c. Process: I OBJECT to the failure of Guildford Borough Council to identify sufficient brownfield sites within existing urban areas that should be targeted for development before the open countryside and the Green Belt.

d. Process: I OBJECT to the failure of Guildford Borough Council to include the Town Centre Masterplan 2015 within the overall Local Plan.

Allowing Green Belt development to pay for transport schemes will simply generate yet more traffic from more homes, fuelling congestion.

I oppose unjustified Green Belt development.

It is irresponsible to squander every last resort greenfield site in a single Plan, robbing future generations.

Brownfield opportunities are being ignored – we need homes in the centre (not 40% more shops), much more accommodation on campus for students, and homes for the elderly to free up family houses.

Under this policy Send will be removed from the Green Belt which means that all areas within the settlement boundary will no longer be afforded Green Belt protection. The GBC suggest that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed. I do not agree that these exceptional circumstances have been proved in the case of Send, when many suitable brownfield / non Green Belt sites remain for consideration

Local Plan Policies S2 and P2, in particular, are not sound.

Policy P2 and the related maps of Green Belt boundaries are also not sound as they are based on a review of Green Belt boundaries that does not comply with paragraphs 84 and 85 of the National Planning Policy Framework. In particular, insufficient weight has been given to the need to promote sustainable patterns of development and to the consistency of the policy with meeting identified requirements for sustainable development.

Opportunities for sustainable development for housing and other uses associated within the edges of the main urban areas and other settlements have been overlooked because of an inappropriate approach to review of the Green Belt, based on the boundaries of largely irrelevant land parcels.

The review of Green Belt at Wood Street Village exemplifies these shortcomings, which are explained in detail in the report that forms part of this submission. There are opportunities for sustainable development in the village on sites that were identified as Potential Development Areas in the Green Belt & Countryside Study.

The proposed inset boundary for Wood Street Village is unduly restrictive. It excludes large parts of the settlement, including its Green, Conservation Area and Potential Development Areas which are proposed to remain in the Green Belt. The inset boundary appears to have been drawn to restrict development to previously developed sites.

The inset boundary for Wood Street Village should be redrawn to take account of the need to promote sustainable patterns of development and to recognise opportunities for meeting the identified requirements for sustainable development in the village, within revised Green Belt boundaries that also reflect physical features that are readily recognisable and likely to be permanent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Background

Lightwood Strategic submitted representations on the Local Plan Issues and Options consultation in November 2013 and on the Local Plan Consultation Draft (Regulation 18) in September 2014. Their representations expressed concerns about the Council’s proposed approaches to:

- the objective assessment of housing needs;
- Green Belt review; and
- Settlement boundaries in the larger villages, particularly at Wood Street Village.

Lightwood Strategic pointed out that there are natural infill sites in Wood Street Village (including the two ‘alternative sites’ shown on Map 1 - see end of document) that can provide SANG and are located only a short distance from the village green, shops and other amenities.

The Council identified these two sites in April 2014 as ‘Potential Development Areas’ in its Green Belt & Countryside Study (Map 2 - see end of document). It also undertook analysis of various characteristics of the settlement in its Green Belt & Countryside Study to determine whether it was appropriate to define an inset boundary rather than leave the whole village as ‘washed over’ by the Green Belt.

The Council has modified its approach to villages in the Green Belt, in response to the National Planning Policy Framework (March 2012). In the 2003 Local Plan villages were generally ‘washed-over’ by the Green Belt. New Local Plan Policy P2 provides for Wood Street Village and 13 other villages (as well as several, large previously developed sites) to be inset from the Green Belt. In these villages, Policy D4 (Development in Urban Areas and Inset Villages) allows for limited development within strict environmental guidelines.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy P2 and the related maps of Green Belt boundaries are also not sound as they are based on a review of Green Belt boundaries that does not comply with paragraphs 84 and 85 of the National Planning Policy Framework. In particular, insufficient weight has been given to the need to promote sustainable patterns of development and to the consistency of the policy with meeting identified requirements for sustainable development.

Opportunities for sustainable development for housing and other uses associated within the edges of the main urban areas and other settlements have been overlooked because of an inappropriate approach to review of the Green Belt, based on the boundaries of largely irrelevant land parcels.
The review of Green Belt at Wood Street Village exemplifies these shortcomings, which are explained in detail in the report that forms part of this submission. There are opportunities for sustainable development in the village on sites that were identified as Potential Development Areas in the Green Belt & Countryside Study.

The proposed inset boundary for Wood Street Village is unduly restrictive. It excludes large parts of the settlement, including its Green, Conservation Area and Potential Development Areas which are proposed to remain in the Green Belt. The inset boundary appears to have been drawn to restrict development to previously developed sites.

The inset boundary for Wood Street Village should be redrawn to take account of the need to promote sustainable patterns of development and to recognise opportunities for meeting the identified requirements for sustainable development in the village, within revised Green Belt boundaries that also reflect physical features that are readily recognisable and likely to be permanent.

In addition to these other concerns, a development of this scale on greenbelt land would be a disaster for Surrey's Natural Beauty taking away some key green belt land that is a key part of the county's charm and appeal. I am concerned with GBC's attitude to Greenbelt land in general within this local plan as many of the housing development areas are in greenbelt land rather than using the many, many brownfield sites available within the county.

The Green Belt:

The National policy is clear in that it attaches great importance to the nature of the Green Belt.

The Plan does not show evidence of exceptional circumstances to justify why the Green Belt land should be used for strategic development.

Brownfield land needs more consideration, surely the decline in the need for retail space means that houses could be built in the town centre instead of more retail units, student accommodation should be constructed on campus even if higher rise accommodation is used.

3) The removal of the green belt.

The green belt is a lawful boundary set in place to protect the identities of rural villages and towns. To stop these places merging into one urban area, and for the welfare of the people and wildlife of Britain. This is an historic beautiful country and will be terribly damaged by the removal of its green belts. Below is a statement relating to this..

'Green belt policy in the UK has shown to be highly effective in halting the urban sprawl and improving the quality of life for both rural and urban population. However, the CPRE warns on the so-called developmental threats to green belt policy and emphasizes the importance of protecting the existing green belt areas in their boundaries'.

'The UK government said that it has no intention of changing the boundaries of green belts but the CPRE says that developmental plans and talks about replacing the “lost” green belt areas elsewhere are clearly revealing that the current green belt policy is under threat.

We live in a democratic country. Yet this Government has not listened to the wishes of its people regarding this issue and now we are told that the lawful green belt can simply be removed? This is a legal binding boundary that no developer can question, yet the council can? This should be totally illegal! Our MP for Surrey Sir Paul Beresford stated before his election last year that he wanted the green belt protected. Yet here we are, one year later taking all the villages out of the green belt?!

I object to Send being removed from the Green Belt. The village Send provides a green buffer between Woking and Guildford. To develop in the Green Belt requires ‘special circumstances’ there are none to justify developing the land in and around Send so Guildford Borough Council have come up with another plan, to remove Send from the Green Belt therefore freeing up the area for development. Guildford Borough Council should not be allowed to abuse the Green Belt in this way in order to just suit themselves. The Green Belt was set up to control urban growth from unscrupulous Council’s and Developers permanently. If this is not protected then all of the land in and around the village will be vulnerable to development. This would destroy the character of the village of Send. Guildford would merge with Woking through a series of urban estates.

I OBJECT to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent, as required by the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send’s Green Belt provides an essential buffer stopping Woking and Guildford becoming one large conurbation. Local councillors and central government gave a clear election promise to protect the Green Belt and this plan reneges upon that election promise. Developers will be quick to take advantage of the removal of Send from the Green Belt and then there will be nothing to stop further development.

**Policy P2, Green Belt**

I object to the proposal to inset Send Business Park from the Green Belt because it is essential to conserve the Green Belt wherever possible. In this case Send Business Park is a non-conforming user in an area of outstanding countryside close the Wey Navigation, which is cherished by walkers of all kinds and from all parts of the country.

There is extremely restricted vehicular access along Tannery Lane, which makes expansion of this site totally inappropriate.

Overall, the Green Belt was designed to provide a cordon of countryside and green fields around London, and should be kept sacrosanct in respect of its original purpose.

1) This policy directly conflicts the government’s objective in the NPPF to “assist in safeguarding the countryside from encroachment”, and that “once established, Green Belt boundaries should only be altered in exceptional circumstances”. Normal population growth does not constitute exceptional circumstances which would justify removal of Green Belt status with the associated loss of rural character of the village.

Under the NPPF policy #86, “If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt.”

Ref West Horsley: As a minimum, the southern part of West Horsley (south of the railway line) strongly meets these criteria, being characterised by low housing density, open countryside views and bordering directly onto both National Trust and AONB lands, and should remain in the Green Belt with its existing boundaries intact. This area should be...
considered separately to the northern area of West Horsley which directly adjoins East Horsley and is developed to a greater degree (though still a rural village).

2) Expansion of the village settlement boundary vs Local Plan 2003

Together with the insetting policy, the proposed expansion of the settlement boundary vs LP 2003 would remove additional undeveloped green spaces from the Green Belt, rapidly hastening village expansion and encroachment on the neighbouring countryside. There is no supportable basis for this expansion which contradicts the NPPF policy that local planning authorities should “define boundaries clearly, using physical features that are readily recognisable and likely to be permanent” and the above government objective to safeguard the countryside from encroachment.

I want to specifically highlight the area to the east of The Street currently outside the settlement boundary, including the Village Green and neighbouring undeveloped land which contributes to the village’s rural character, which would not be best served by being included in the settlement.

As a resident of West Horsley I write to you with regards the Guildford Borough Proposed Submission Local Plan (Reg 19) 2016 draft which was issued in April, and is now under public consultation.

Having reviewed the submitted document, I am very concerned at the potential implications for the rural village of West Horsley, and challenge the following key points:

1. A) Policy P2: Removal (‘insetting’) of the village from the Green Belt

- This policy directly contradicts the government’s objective in the NPPF to “assist in safeguarding the countryside from encroachment”, and that “once established, Green Belt boundaries should only be altered in exceptional circumstances” . Normal population growth does not constitute exceptional circumstances which would justify removal of Green Belt status with the associated loss of rural character of the village.

- Under the NPPF policy #86, “If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt.”

As a minimum, the southern part of West Horsley (south of the railway line) strongly meets these criteria, being characterised by low housing density, open countryside views and bordering directly onto both National Trust and AONB lands, and should remain in the Green Belt with its existing boundaries intact.

Policy P2.

I object to Send being removed from the green belt. If the proposals go ahead we lose more green space and this could then open the door for development on surrounding green belt land that will eventually join Woking and Guildford into one large conurbation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I further object to building on green belt because I am reminded that it is an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is truly precious beyond the short term demands of the present Government’s policy or a 15 year plan. It benefits public health and wellbeing, physical and psychological health. Chipping away at a natural heritage can only lead to more future cuts to benefit developers and the radical transformation of a largely rural borough into a mainly urban or suburban one.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy P2. Send should not be removed from the Green Belt. The green belt separates that villages from Woking and Guildford, is essential to local wild life including some buzzards that now live in the fields behind Boughton Hall Avenue and we need the flood plains still to prevent flooding further down the river.

There is no need to be destroying our beautiful countryside and endangering ancient trees, local wildlife and the existing quality of life for current residents. Green Belt is Green Belt for a reason, please respect that.

Our Green Belt is precious to all of the residents within Horsley. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

• To check the unrestricted sprawl of large built up areas
• To prevent neighbouring towns merging into one another
• To assist in safeguarding the countryside from encroachment
• To preserve the setting and special character of historic towns
• To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

NO EXCEPTIONAL CIRCUMSTANCES

The local plan proposes additional housing stock to the area, 385 new homes being built in West Horsley (a 35% increase on the current housing number of 1,111) and an additional 148 homes proposed for East Horsley.

I am totally opposed to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries

Our local doctors surgery cannot cope now with the current resident numbers, with constant difficulty in making appointments.

The Raleigh school which serves both East and West Horsley is full every year and this has been the situation for many years. There is a continuing lack of state primary school places in the village.
Our local waste drainage, our water supply, our medical facilities and our roads cannot cope with the proposed number of new homes. Building this number of homes will lead to further flood risk here and downstream. The planned development on Green Belt is therefore unsustainable.

In conclusion, I must ask you to revise the housing number, and to amend the Local Plan to utilise brownfield land rather than green field sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

8 THE NEED TO APPLY CONSTRAINTS

8.1 Ministerial guidance in relation to building on the Green Belt is clear:

1. “the single issue of unmet need - is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development in the Green Belt” - Nick Boles to Sir Paul Beresford MP 7th February 2014.

2. “we were always very clear that we would maintain key protections for the countryside, and, in particular, for the Green Belt. The Framework makes it clear that a Green Belt boundary may be altered only in exceptional circumstances and reiterates the importance and permanence of the Green Belt” – Nick Boles to Sir Michael Pitt, Planning Inspectorate 3rd March 2014. 3. “Planning Guidance, updated in March 2014, also states that unmet housing need is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying inappropriate development within the Green Belt” – Nick Boles to Sir Paul Beresford MP 18th June 2014

8.2 70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries.

8.3 Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements).

8.4 Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 693 per annum to 500.

8.5 In view of the comments above it would appear logical to apply CONSTRAINTS in line with government policy to a corrected OAN. of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council.

8.6 This would result in a more acceptable and practically achievable HOUSING TARGET of 250 homes per annum which over a 20-year period would be 5,000 homes. All of these homes could be built in the existing urban brownfield areas of the borough and would in part satisfy the 20,000 objections made by residents to the 2014 draft plan and also relieve the additional problems of inadequate infrastructure.

8.7 It would also mean that there is currently 8.5 years supply of housing (2131/250) which is made up of existing permissions granted (1,518) and completions made (613) during 2013/2015. (Monitoring Report by GBC 2015)
8.8 I have recently (9 July 2016) had a meeting with Sir Paul Beresford my own MP for Mole Valley who has kindly assured me that he is in the process of speaking to the Secretary of State to ratify the current government policy of protecting the Metropolitan Green Belt and to instruct the Planning Inspectorate and Local Planning Authorities accordingly. This is in the wake of the recent national referendum and the likelihood of the easing pressure on international immigration over the next 20 years.

8.9 The Brexit vote may have strengthened government policy further. Theresa May, the new prime minister in waiting, announced on 11 July that she is personally committed to protecting the Green Belt once she takes office.

8.10 Whilst I have many significant objections to the GBC Local Plan I applaud the policy statement by GBC in their Monitoring Report, “We will continue to monitor the use of previously developed land, and continue to identify as many opportunities as possible for redevelopment of previously developed land.” I believe it will be to the benefit of all residents if GBC can apply themselves vigorously to this endeavour in order to protect the Green Belt.

13 POLICY P2 GREEN BELT

13.1 I object to Policy P2 green belt

13.2 This policy states, “the general extent of the Green Belt has been retained.” This is completely false.

13.3 The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away.

13.4 Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.

13.5 Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

1. Agricultural production
2. Rural leisure and tourism amenities1
3. Water catchment
4. Flood control
5. Biodiversity
6. Natural heritage
7. A carbon sink for air pollution
8. Room for public facilities such as parks and burial grounds
9. Profitable film locations (e.g. Shere)
10. Future economic potential such as mineral extraction (even fracking)
11. Natural beauty, landmarks, open space, rural views and sight lines
12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

13.6 As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

13.7 It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

13.8 I object to the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are ‘leggy’ in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.

13.9 I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.

13.10 To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

13.11 Send is a good example of villages that **should not be removed** from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

13.12 I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt around Send which include:

1. The land behind the schools including playing fields and woodland.
2. The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
3. Land to the left of Carbridge going up to the old depot on the Wey Navigation.

37 GREEN BELT SITES

37.1 I object to ALL Green Belt sites allocated for development in the local plan

37.2 I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014.13

37.3 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

37.4 All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1.1 I object to the changes to Policy P2 because they have not addressed many of the 32,000 objections made to the 2016 plan.

1.2 I object to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a sham.

1.3 I object to the proposed change that Send Business Park should be inset from the Green Belt due to the fact that:

1.4 It is effectively a non-conforming user in an area of beautiful countryside adjacent to the beautiful Wey Navigation
1.5 It has restricted access along Tannery Lane

1.6 It should not be given the opportunity for further expansion or development

1.7 Policy P2 still completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world.

1.8 Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.

1.9 It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

1.10 I object to the statement in the Draft Local Plan under Green Belt Policy P2 (4.3.13) which claims that Send and a further list of 13 villages are “now inset from the Green Belt”.

1.11 This statement is untrue as GBC is proposing to “inset” these village. No decision has been made by an Inspector, therefore the villages remain in the Green Belt!

1.12 I object to the changed “insetting” of 15 villages (including Ripley) from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages.

1.13 I am deeply disturbed that settlement boundaries are to be hugely extended in many villages (particularly at Send) and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside of the OAN.

1.14 Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat.

1.15 Send is a good example of villages that should not be removed from the Green Belt. Send provides an important Green Belt buffer between Woking and Guildford. Yes, it is true that Send comprises old ribbon development but this should not mean it can be removed from the Green Belt so that Woking joins up to Guildford. The village and the countryside behind the A247 should all be protected.

1.16 I object to three particularly vulnerable areas of high quality amenity land being taken out of the Green Belt at Send which include:

1.17 The land behind the schools including playing fields and woodland.

1.18 The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.

1.19 Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

Green Belt Policy 2 at Paragraph 4.3.15
I object to the proposal to inset Send Business Park from the Green Belt because
Further expansion or development in this location detracts from the openness of the Green Belt
It is an area of outstanding Natural Beauty adjacent to the beautiful Wey Navigation
There is highly restricted vehicular access along Tannery Lane in both directions, it is extremely narrow.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. POLICY P2.Send should not be taken out of the Green Belt Send provides green space between Woking and Guildford.
   1. Send is a much loved village which actively encourages village activities.
   2. It has strong historic links to the local area including Henry VIII, Sir Francis Drake, one of the oldest churches in the country as well as its links to neighbouring historic Ripley.
   3. There is outstanding countryside in Send and its surrounding areas including country lanes and peaceful Wey Navigation walks.
   4. It would be a huge loss to erode our much loved village by taking it out of its Green Belt protection.

I am writing to express my objections to the ill thought out planning proposals for the area in which I live and for a much larger area which includes erosion of the green belt. There is no apparent thought to provision of schools, surgeries and general amenities for the large surge in population which will result not to mention the fact that the present roads will not support the huge increase in traffic. The disregard for the importance of the green belt is beyond belief and the proposed amount of development in one area seems ridiculous. The limited time for consultation has been quite inadequate and I can only hope that some one will consider these objections before proceeding with the proposed plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Send village being removed from the Green Belt on the basis that it was intended that this would be permanent as required by the national Planning Policy Framework. The Green Belt prevents any joining of Woking & Guildford in a large unwelcome and anti-social conurbation, removing essential natural landscape. Removal reneges on election promises and gives a free rein to developers for ever.

I object to the Local plan 2016 for the following reasons

1. I object to insetting of the local villages of Ripley, Send and Clandon from the Greenbelt. The purpose of the greenbelt is to prevent urban sprawl, as such removing the villages specifically those located between your identified strategic sites at Wisley airfield and Garlicks Arch would seem to be encouraging an urban sprawl directly damaging the integrity of the greenbelt. As these Strategic sites sandwich Ripley it would seem highly
It is important for Ripley to remain washed over within the greenbelt to provide separation and identity to any proposed new developments and those existing at present.

I strongly object to the Green Belt status being eroded away from Send Village. I appreciate more housing is required but there are a number of brown fill land sites in the borough on which to build. I object to the plans for the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley, land for new north facing slip roads to/from A3 at Send Marsh/Burnt Common and Clockbarn Nursery, Tannery Lane.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Green Belt, Policy 2 at Paragraph 4.3.15

I object to the proposal to inset Send Business Park from the Green Belt because it is in a restricted vehicular access area along Tannery Lane from both directions and further expansion and development is not in keeping and will detract from the natural beauty of the area. The existing infrastructure is not sufficient to cope with any increase in traffic and building development. It will seriously impact the area of outstanding building along the Wey Navigation, which my family and friends have enjoyed for many years.

My wife and I have lived in Send in excess of 24 years. I originally grew up in Send and we chose to return to the village to enjoy our retirement. We have family and friends living close by, including both my daughters and grandchildren, all of whom regularly visit us. The proposals above would considerably change the way of life in the village and surrounding area, we along with many others chose to buy in Send because of its village environment and rural setting, away from built up areas. We live in Potters Lane and are impacted every day by commuters speeding through to and from the A3, both my wife and I and are family have had our cars damaged from cars speeding past and not keeping to their lane and clipping our cars.

I appreciate more housing is required but there are a number of brown fill land sites in the Borough on which to build. I strongly object to the Green Belt status being eroded away from Send Village. I do hope you will take my comments on board along with the many other residents of Send who very much care about their village and its surroundings and who have lived in the village for many years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT TO POLICY P2 (GREEN BELT):

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
- Impact on rural leisure and tourism ignored.
- Impact on flood control ignored.
- Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
- Impact on biodiversity ignored.
- Impact on national heritage ignored.
- Impact on water catchment ignored.
- Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
- Impact on rural business (e.g. mineral mining, film making) ignored.
- Impact on natural landmarks and views ignored.
- Harm to public health and wellbeing (physical, psychological) ignored.
- Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
- Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
- Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
- Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
- “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
- Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
- Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
- Ignores most of NPPF 17 stipulations.

I am writing to strongly object to many issues contained in the unbelievably long
document of about 1800 pages covering the Draft Local Plan.

Firstly I object to the any erosion of the Green Belt and strongly object to any removal
of villages from the Green Belt, including Ripley where I have lived for the last forty years.

There appears to be no sensible reason or logic in this "in-setting" which will just help to
hasten the destruction of our rural environment and village life, and open the flood gates
for more and more building in previously rural areas to further destroy the natural surroundings.

"I OBJECT TO THE 2016 DRAFT LOCAL PLAN"

I have been made aware of the above development proposals affecting our villages.

Whilst I recognise the need for housing developments my main objection is the use of "Green Belt" land.

I have read numerous development proposals which could be located on "Brown Field" sites which I have no objection to.

The other serious issue is the infrastructure associated with the above proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPP16/176  **Respondent:** 15110721 / Stuart Reeves  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )
I object to the plan. Send provides a buffer between Woking and Guildford and should not be removed from the green belt. the land west of winds ridge and send hill is a new site and was not included in the regulation 18 and has not been consulted upon previously. Development for housing is inappropriate due to its perminant green belt status and high quality green belt amenity within an area of beautiful countryside which would be spoilt by development. The subsoil of the existing site is also inappropriate for housing and the access road on Send hill is a narrow single width track unsuitable for access and additional volumes of traffic.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

I object to policy 2, para 4.3.15 to inset Send Business Park from the Green Belt because:

1. There is very restricted vehicular access along Tannery Lane in both directions
2. Further development here detracts from the openness of the Green Belt and is inappropriate.

Attached documents:

Comment ID: PSLPP16/257  Respondent: 15120641 / Elizabeth Wolfe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Green Belt

2.1. Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. No this is not the case. The housing policies set out in the Proposed Submission Local Plan; indicate that 65% of proposed new developments will take place on land that is currently in the Green Belt.

2.2. Under NPPF regulations GBC and other Local Authorities are permitted, once they have determined their Objectively Assessed housing Need (OAN), to make allowance for factors which may constrain the delivery of new housing. Constraints such as the need to protect the Metropolitan Green Belt, or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty, or land costs etc. Although these designated areas make up a large proportion of the land area of Guildford Borough, GBC has made no attempt to reduce its housing numbers in order to take account of such constraints. They have instead increased the number, beyond that required for normal growth projections to satisfy their own egotistical view on a path of massive economic growth.

2.3. Currently development is permitted within the settlement boundary, where villages are washed over by the green belt with particular planning regimes being applicable that have proved beneficial in preventing the urbanization of many villages. They are very successful, because of the non urban nature of small scale new development to help to retain the openness of the villages. These villages house, in some cases, a population of 4000 plus people, yet are regarded by residents as small villages. For those who drive through these areas they do not see a mass of urban style developments but trees and hedges, views between homes, views through spaces that don't reveal row upon row of homes but space and openness with trees amongst the homes and a variety of scale and architecture.

2.4. Washing some of the larger villages will result in them becoming their own urban sprawl as a result of disproportionate infilling.

2.5. Changes to settlement boundaries have been made in order to make more land available for the developers under the guise of making the boundaries more defensible. Many straight lines have now been drawn which result in villages developing hard edge profiles with buildings replacing the fragmented softer edge of the original hedgerows, trees and green fields.

2.6. Loss of Green Belt resulting from these boundary realignments can only be justified in exceptional circumstance. None of which have been provided. Moving a boundary from one already defined boundary to another, again can only be done in exceptional circumstance. Housing need has already been turned down as such an exceptional circumstance.

2.7. I object to all these changes being made to the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. Not protecting the Green Belt
I strongly object to the proposals to remove Woking, Ripley, Send, Horsley and Clandon from the Greenbelt. There are no special circumstances to do this. Once taken the green belt is lost forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Please find my detailed OBJECTION to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites 2016 below.

I’m going to respond regarding my objection in two parts. Firstly the overall plan and secondly issues that are relevant to my local village, West Horsley, and surrounding area.

**Overall Plan**

**Green Belt**

The plan states that ‘National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances’ and ‘We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development’

The development that is needed in the borough is a result of normal growth and should be catered for in the normal way. It is not ‘exceptional’ it is normal. It is not due to a new airport, railway line, etc, etc it is just ‘normal’ evolution of the area.

The purpose of the Green Belt is to provide protection from urban growth. If it can be removed to provide for urban growth, that is a tautology!

The plan also tries to argue that some of these locations should not have been ‘washed over’ by the Green Belt in the first place and as per the wording in the plan ‘other development management policies used to restrict any inappropriate development’ in these places.

However other development management policies are not being used to restrict inappropriate development. That requirement is being completely ignored. If these areas are removed from the Green Belt on the basis of this technicality then they should be protected by those other development management policies. Why aren’t they? Why are villages like West Horsley being immediately faced with an increase of 35%? Clearly the alternative protection as defined in the plan is not being applied as required.

Also the new Settlement / Green Belt Boundaries going around the villages that are now being proposed to be inset are, as to be expected, generally hugging the main settlements. However, every so often, the boundary extends out into open countryside and then back again for no explicable reason. It is of no surprise that where it does this are the proposed development sites. This is a cynical opportunity, when insetting these villages, to include open countryside in them that clearly would have, and should have, been in the Green Belt in the first place. It is blatant opportunism when changing the designation of these villages by including lumps of countryside within their Settlement Boundaries. If the villages were not washed over by the Green Belt originally these areas which are now included in the Village Settlements would have been in the Green Belt and untouchable I will cover one specific example in West Horsley below.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Setting of the Green Belt / Settlement Boundaries**

If West Horsley is no longer being washed over by the Green Belt then the new boundaries need to be set carefully. I don’t believe I am being cynical when I notice that the new boundary (as one would expect) hugs the settlement closely except in the areas where development is proposed. At these places it goes into open countryside exactly replicating the development plots.

If West Horsley had previously been inset and not washed over by the Green Belt then these boundaries would have been along the edge of the settlement and all these proposed development sites would have still been in the Green Belt and not available for development.

To take the worst example – Site Allocation and Policy A41. It takes great imagination to put the Settlement / Green Belt boundary around this plot and not along the opposite side of East Lane where it clearly should be.

How on earth can anyone think that the Green Belt boundary that runs along East Lane on both sides of this plot should suddenly, for no explicable reason, suddenly bulge out and go around a piece of completely open countryside. Could it have anything to do with a proposal to build 90 houses here?

**Villages Merging**

I notice in the plan that effort is made to ensure villages don’t merge at Ash/Tongham/Ash Green by the addition of new Green Belt. I understand this is something where great effort is being made to avoid coalescence and of course the Green Belt that operated over West Horsley prevented exactly that from happening here. Yet the plans put forward are now apparently encouraging coalescence in West Horsley.

It should be noted that the political/parish boundaries of West Horsley do not represent the physical structure of the village. There are two distinct parts.

There is the original village of West Horsley, including the conservation area, with its own amenities (shop, hall, pubs etc.) and this is entirely surrounded by countryside. The Street goes through the centre of it.

When The Street becomes East Lane (at the junction with Long Reach) this is the start of the rest of West Horsley (where I live). This northern part of West Horsley is actually contiguous with East Horsley and not attached to the more historic part of the village at all. It does not have its own amenities and we tend to use those in East Horsley. This part of West Horsley, around East Lane, is distinct and separate from the original village of West Horsley.

The development proposed on East Lane (Policy A41) is starting that creep of development towards the village part of West Horsley and should not be allowed. The older part of the village of West Horsley should keep its unique identity and not be merged in with East Horsley and the northern part of West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Introduction: The policy A44 refers to new development of green sites which are recovered land fill sites after the closure of Sand Quarries. A major part of this site is currently privately owned by a person who bought it to protect the area from over development in 2002.

The other part is owned by GBC and to date has been left as an open space for the enjoyment of the local community. At the northern end is another piece of land which is owned by a traveller family. There was some consternation some years ago when the travellers set up unauthorized pitches on the land which is covenanted against such use and development. The incomers were evicted with the authority of the council and a deep trench was created to prevent any further incursion. This land is locked in on all sides by public footpaths and there is no vehicular access.

The landfill system won an award and it is well vented and monitored for methane and other pollutants. It is said that before the landfill was capped off, a large quantity of asbestos was dumped on the top level.

The residential setting to the east of these lands provides high quality housing through 57 properties and there is also a cemetery which is in regular use. The road to the junction with Potters Lane is narrow and is often congested at peak hours with traffic to the school at the northern end of Send Hill. The Junction is dangerous as cars and other vehicles

It is proposed that policy P2 would remove Send from the Green Belt to allow for the scale of development that GBC seeks.

I object in principle to this proposal which threatens to change the life of the village residents through over-development and pressure on local resources in health and education. This is an unjustified imposition on local people who will see no benefit to the wider community but certain profits for the developers.

There is already a pattern of through traffic congestion which will be predictably worsened year on year as there is a high local dependency on private cars for people to access their place of work in the local towns. The impact on vehicular pollution levels need to be evaluated as there is strong evidence that such patterns of congestion at peak times when children are starting the school day creates such an impact on their health and development which must not be ignored.

Introduction: The policy A44 refers to new development of green sites which are recovered land fill sites after the closure of Sand Quarries. A major part of this site is currently privately owned by a person who bought it to protect the area from overdevelopment in 2002.

The other part is owned by GBC and to date has been left as an open space for the enjoyment of the local community. At the northern end is another piece of land which is owned by a traveller family. There was some consternation some years ago when the travellers set up unauthorized pitches on the land which is covenanted against such use and development.
The incomers were evicted with the authority of the council and a deep trench was created to prevent any further incursion. This land is locked in on all sides by public footpaths and there is no vehicular access. Provision of Traveller pitches would compromise the covenant and enable unauthorized development which would be difficult to challenge and expensive on the local purse to resolve.

The landfill system won an award and it is well vented and monitored for methane and other pollutants. It is said that before the landfill was capped off, a large quantity of asbestos was dumped on the top level.

The residential setting to the east of these lands provides high quality housing through 57 properties and there is also a cemetery which is in regular use. The road to the junction with Potters Lane is narrow and is often congested at peak hours with traffic to the school at the northern end of Send Hill. The Junction is dangerous as cars and other vehicles emerge into a short stretch of road that is between two blind bends and there are frequent accidents and near misses.

Traffic at peak times by the school is very congested and there is a high risk to the children who are being dropped or collected at either end of the school day.

OBJECTIONS

I OBJECT TO EVERY ASPECT OF THIS PROPOSAL.

In particular, I object to the proposal for the travellers' pitches. The local plans "ambition" is to improve the quality of existing residents and the introduction of a culturally different group to the area has the likelihood of imposing increased noise, nuisance and traffic which would be detrimental to existing residents. [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

I object as this is a new proposal and the consultation that is required is a FULL CONSULTATION UNDER REGULATION 18 rather than Regulation 19.

I object as there is a risk to existing residents if the underground asbestos is disturbed while the infrastructure development takes place.

I object as the provision of infrastructure to support 40 homes and two traveller pitches will require a huge disruption to the detriment of existing residents and through traffic. The necessary land clearance and provision of water, sewage, energy and telecoms will create a level of traffic and noise in an area which is noted for its peaceful amenity and rural charm.

I object as the proposal threatens the rural amenity and property values are likely to fall with loss of revenue to the local council and the local economy (eg estate agents) as well as to the Exchequer in relation to stamp duty.

COMMENTS ON OTHER POLICIES IN THE LOCAL PLAN.

Policy P2

It is proposed that policy P2 would remove Send from the Green Belt to allow for the scale of development that GBC seeks.

I object in principle to this proposal which threatens to change the life of the village residents through over-development and pressure on local resources in health and education. This is an unjustified imposition on local people who will see no benefit to the wider community but certain prof its for the developers. There is already a pattern of through traffic congestion which will be predictably worsened year on year as there is a high local dependency on private cars for people to access their place of work in the local towns. The impact on traffic pollution levels need to be evaluated as there is strong evidence that such patterns of congestion at peak times when children are starting the school day creates such an impact on their health and development which must not be ignored.

I am writing to object to all the planning which I have listed below. I have lived in Ripley and Send and grow from the little villages with house and traffic and not for the better.

1) I object that GBC have not followed correct processes
2) I object that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015
3) I object policy P2. Send should not be removed from the Green Belt
4) I object to Policy A43, 30 ha of land at Garlick's Arch, Burnt Common, designated 400 houses and 7,000 sqm of industrial and warehousing
5) I object to Policy A44. 1.9 ha land west of winds ridge and Send Hill, designated for 40 homes and Travellers Pitches

I object to Policy 2 at paragraph 4.3.15 I object to the Send Business Park being removed from the Green Belt, yet another unnecessary diminution of the very precious green land in our village. It again will increase pressure on the junction of Tannery Lane and the main road through the village. A narrow lane with added traffic, what a poor way to treat the environment, adding extra business traffic to the area which is an old non-conforming user in an area of outstanding natural beauty.

I object to the Policy A42 proposal change in Tannery Lane on the grounds that firstly it erodes the Green Belt in our village along with some other plans for the area, but just as important the density of housing is too great for the village. So no additional housing should be contemplated anyway. The lane itself is narrow and the junction into the main village road inevitably will increase hold ups and delays, in turn will increase pollution from the resulting extra traffic, which in turn is putting too much pressure on the road through Send, already a main route to Woking.

Loss of Green Belt land: Sadiq Khan, new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford.

Conclusions

When my family and I moved to the area we did so because of the village life style, and proximity to the green belt and rural environment.

The local amenities cannot cope with such a large planned expansion and it would completely alter the place that we chose to make our home.

At the heart of the problem is GBC’s desire to pursue a ‘Forced Growth’ policy which results in highly aggressive and unjustified targets being set for housing development in the Borough. These excessive targets – the proposed 25% increase in housing stock in particular – create a tremendous strain on both land and infrastructure in an already over-crowded and over-stretched part of the country.

These targets will also have a material adverse impact on the Metropolitan Green Belt across this area, despite all the political promises made to the contrary.

Accordingly this local resident OBJECTS to the Proposed Submission Local Plan.

I object removing Send Business Park from the Green Belt (4.3.15).
Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Policy P2. Removal of Send from Green Belt

I object to Send being removed from the Green Belt. The land proposed for removal from the Green Belt provides a buffer between Guildford and Woking. Without this buffer the village of Send will lose its village identity and merge with the conurbations of Guildford and Woking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/387  Respondent: 15137057 / Ian Phillipson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I consider that the proposals in the plan will result in the eventual loss of the Green Belt to a housing sprawl with suburban London creeping further and further south. Once the Green Belt has been used for urban development, it is lost forever for future generations.

Comment ID: PSLPP16/397  Respondent: 15137697 / Phil Goodman  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Please accept this email as recognition of my firm objection to the Draft Local Plan. My primary objection is the proposed removal of Send, Ripley and Clandon fro the Green Belt. Changing this status will have a reversible detrimental effect to these areas.

As a local resident, I have been on the receiving end of planning refusal from Guildford Borough Council on the grounds of green belt. Whilst this restricted what I want to do to my home, I understood that GBC were following a plan to protect the green belt, and I admired this.

The complete turnaround by GBC is hugely disappointing.

I feel the whole process has been managed appallingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/405  Respondent: 15137825 / Lianne Sherlock  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am a resident of Ripley [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and I am deeply concerned about the proposal to build over 14,000 new homes many of which at Garlicks Arch, Wisley and Gosden Hill.

This will have a devastating impact on the community and the effective erosion of the Green Belt is simply scandalous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/414  Respondent: 15137921 / Jean Sylvester  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I do not consider that any of the other proposed sites are viable and strongly object to the boundaries of our villages being enlarged and land within these boundaries being removed from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/416  Respondent: 15138049 / Mark Leonard  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I do not consider that any of the other proposed sites are viable and strongly object to the boundaries of our villages being enlarged and land within these boundaries being removed from the Green Belt.
I would like to strongly object to the 2016 draft local plan. I live in Ripley High street and over the last 4 years have already seen allot of change to what was a lovely village and this has already gone downhill with all the permitted development and the local plan will only make matters worse in my eyes.

I would like to object to many points as follows:

I object to all erosion of the greenbelt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to any in-setting, removal of any villages from the Green Belt, that’s what we have brought into and should remain in

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Loss of Green Belt land: Sadiq Khan, new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford.
These targets will also have a material adverse impact on the Metropolitan Green Belt across this area, despite all the political promises made to the contrary.

Accordingly this local resident OBJECTS to the Proposed Submission Local Plan.

As a current resident in the local Ripley area I specifically object to the villages of Ripley, Send and Clandon being removed from the green belt. These locations are very special villages with a strong village atmosphere with many events and activities encouraging the villages to thrive as they do today. The fact they are in the green belt make them and keep them special. The planned increase in housing will encroach and destroy these small quintessential English villages which help retain British heritage.

We are already struggling to provide good quality education to our children locally and the increase in housing will only add to this pressure, not to mention the burden on local infrastructure.

This consultation has not been fair, with a limited consultation period and last minute changes with the inclusion of new sites.

Please reconsider your plans.

I am writing to object in the strongest possible terms your 2016 Local Draft Plan, especially the removal of Ripley and surrounding areas from the green belt which will be the absolute death of our village.

The main reasons from my objection are, but not limited to, the following:

1. Your consultation period has been minimal and not allowed enough time for people to fully take in the massive changes proposed.
2. The consultation document is nearly 2000 pages and is not designed for the layman to read and understand, probably deliberately.
3. There needs to be special circumstances to remove an area from the green belt and I do not believe your proposals satisfy/meet those circumstances.
4. I can see no proper provision for new schools, where will children be educated? All local schools are operating at or very close to capacity.
5. No provision for increased Doctor’s surgeries, waiting lists are long enough and these proposals will completely overwhelm any semblance of an efficient GP service. This will put peoples lives and general wellbeing at risk.
6. No provision for extra Policing in the area and, having retired from Surrey Police less than a month ago, I can assure you there is no plan to increase Police numbers to cover the proposed increase in the local population. Like every Force in the country Surrey Police are massively overstretched and suffering from recent government cuts to the Policing bill which will continue for the life of this parliament. This will put peoples safety at risk.
7. The disproportionate size of development sites in relation to the rural locations, in particular the Garlicks Arch proposal in Ripley. A development of this size will have a permanent and detrimental affect on our community for all the reasons listed above.
8. The local road network is already over capacity and the increase in traffic will gridlock Ripley village and surrounding areas especially during rush hours. Simply put, our roads were not designed for the amount of traffic now on our roads let alone what your plan proposes.
9. I suffer with a respiratory disorder made worse by heavy traffic pollution, your proposed plan and the increase in traffic will severely affect my breathing.
10. Ripley already has a massive shortage of parking for vehicles, the proposed plan will make the situation far worse.

I say no to the entire plan.

1. GREEN BELT INFRINGEMENT. There are plenty of brownfield sites in this area and the wider borough without infringing upon the valuable green belt. The council should be doing its utmost to protect the green belt and not consider touching it until it becomes a last resort - and we are nowhere near that point in the foreseeable future.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the local development plans for the areas around Send, Ripley and Cladon.

We have only recently moved to the area and we chose Send especially for its relative peaceful location and natural beauty. The development plans you are proposing would change the area to the extent we will not want to stay living here.

I object to the proposal of removing the villages (Send, Ripley, Cladon) from the green belt. I understand this can only be done in the special circumstances which is not the case here. Please consider other areas which are not in the green belt and therefore better suited for the housing or the commercial development.

The proposals to remove significant areas of land from the Green Belt are wrong, The whole point of the Green Belt is to preserve open land, The boundaries should not be amended without very good reason and a potentially flawed housing need calculation is certainly not a good enough reason. I also note that the policy on which the Conservative party councillors were elected was that the Green Belt would be protected. To abandon this pledge would be undemocratic and dishonest.

I have studied the proposed Local Plan which Guildford Borough Council has now published for public opinion and my comments are set out in this email.

**I object to the lack of protection shown for the Green Belt.**
I understood the local plan stated it would protect the Green Belt, this submission proves the opposite. 65% of developments will be made on land that is currently Green Belt.
Green Belt should be appreciated, it's not just a view or a place to picnic, an escape from City life or even farmland, its a big part of English heritage and East/West Horsley's identity.
Further ramifications will be pollution from loss of green belt and added traffic and flooding from building on an area that is partially a level 3 flood risk already.

My wife and I moved back from London after university to start our family here and we believe it's important that this area of outstanding beauty is cherished or the future generations will not see the Green Belt benefits in the decades to come.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

I strongly object to the removal of Send from the Green Belt, something that I thought the government had put on their manifesto to protect. As this is mainly a Conservative council I thought this is something that you would be looking to uphold. It seems I, like many other voters have been misled!

The Green Belt was established to limit this type of over development, and to remove it would merge Woking into Guildford. Once a field has been built upon it will never return to its original state, it will be lost forever!

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
The local plan stated it would protect the green belt and this isn't reflected in the proposal with 65% of developments made on current Green Belt land.

The loss of green belt and added traffic will cause pollution. Building on an area that is partially a level 3 flood risk will increase the likelihood of increased flooding which the drains cannot manage.

I object to the loss of Green Belt.
Not only will the added cars create more pollution but the loss of green belt land will only accelerate this problem. This land is important for our wider environment which reduces the effect of heat generated by cities. The land is a flooding area and in the past the drains haven't coped with heavy rainfall, building on that area will only further the problem. Building 65% of developments on Green Belt land is a direct contradiction to the local plan statements to protect the Green Belt and this proposal further highlights the little notice it's taken from previous comments in this community.

People who live here, live here because it is a protected Green Belt area of outstanding beauty. The negatives of this proposal outweigh the positives, this plan severely tampers with the identity of East and West Horsley.

Although I do not live in Guildford I am a regular visitor and know the Ripley, Send area well.

I cannot believe that planners intend to take Ripley, Send and Clandon out of the Green belt. What is the point of a Green Belt if you take out of it those areas which separate Greater London from the Surrey countryside? There was huge concern when the house at Clandon was burnt to the ground, but this proposal is many times more damaging to the future of the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing with reference to the final draft local plan and would like to raise my objections.

With reference to the policies P2, A42, A43, A43a and A44 I object for the following reasons.

Policy P2 - Send is a small village community on the edge of Woking and it provides a buffer between the town and the open countryside. To remove Send from the Greenbelt is a short-sighted act of lunacy. Greenbelt is designed to provide protection from urban sprawl and to erode it in this way is irresponsible and indeed there were repeated specific election promises to protect it.

We are all custodians of our countryside and it needs protecting from reckless planners for future generations.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposal to inset Send Business Park from the Green Belt. This will allow future sprawling development over which we will have no control. We are all custodians of our countryside and we need to protect it for future generations. To allow this to happen will create the opportunity for future expansion or development at this location without consultation.

The housing demand number in the Local Plan has dropped by 39 houses per annum from 2018 to 2034, and despite this, Send’s contribution has been increased without any justification. Major sites in Send and Ripley have been changed 3 times; first we had Burnt Common, then Garlick’s Arch and now we have both. Guildford Borough Council appear to have a predetermined agenda to build on the Green Belt and without any constraints to take into account the lack of infrastructure such as roads, schools and medical facilities as required by law.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to lodge my strong objection to the Draft local plan.

The Councils disregard for the Protection of the Green Belt is of great concern.

The proposed removal of the villages from the green belt, will potentially allow disproportionate housing developments to be built.

As a Surrey resident for 35 years, I feel that the threat to Surrey and the villages surrounding Guildford has never been greater, do not destroy our heritage, and that of future generations by allowing the destruction of Surreys Green Belt.

I have the following objections to removing Ripley, Send and Clandon from the Green Belt:

1. **Green Belt**
   I STRONGLY OBJECT to the proposal to remove Ripley, Send and Clandon from the Green Belt. These are historic villages and there is no sound reason to do this. I bought a house in Ripley as it’s a lovely village and it’s utterly heartbreaking to see that planning departments are even contemplating removing these villages from the Green Belt. If this decision moves forward, the Green Belt will be gone forever.

<tbody>
<tr>
<td>I am writing to object to the Local Plan 2016-06-18 and would like my comments to be seen by the Inspector. It would appear that far from looking after the Rate payers interests Guildford Borough Council would override our interests and previous comments and objections.</td>
</tr>
<tr>
<td>I Object to the way the council have changed the plans for Send after the original plan was put forward.</td>
</tr>
<tr>
<td>I Object also to the various villages being removed from the Green Belt, in particular Send Village policy P2</td>
</tr>
<tr>
<td>I Object to the massive development of Garlicks Arch Burnt Common, this is another development just slipped in without the necessary consultation. The local roads in this area are already blocked during the morning and afternoon rush hour periods as they were not built to cope with this volume of traffic already using them. Apart from a major junction at Burnt Common, there does not appear to be any further plans for improvement to the roads in this area. The A3 is already grid locked to both North and South daily.</td>
</tr>
<tr>
<td>I Object because no one seems to have considered how much water and sewage will be used and generated by the properties proposed for this whole area including Ripley, Send, Wisley and Clandon. Just how are these new households and businesses to be served? What about Policing, Fire and Ambulance services on top of which the Dr surgery is already struggling as is The Royal Surrey Hospital. In summery I strongly object to the 2016 Draft Plan.</td>
</tr>
</tbody>
</table>
I Object to any invasion of The Green Belt.

I Object to any setting of any villages from the Green Belt.

I Object to the massive amount of development in this one area of the Borough.

I Object to the incredible limited consultation period.

I Object to the last minute inclusion of new sites with less than two weeks notice.

I Object to the total lack of any evidence for the alleged housing need numbers.

I Object to the lack of immediate provision for new schools.

I Object to the lack of creditable provision for Dr's surgeries.

I Object to the proposal to build 40 homes and 2 travellers pitches on the land West of Winds Ridge and Send Hill. This site is new and was not included in the regulation 18 Draft and has not been consulted upon previously. Development for housing is inappropriate due to its narrow entrance, Green Belt status, and high quality Green belt amenity within an area of beautiful countryside which would be ruined by development. The sub soil of this existing site contains documented unsafe land fill which is currently vented and should never be disturbed as nature has sealed the site it must be left undisturbed. The proposal to include two travellers' sites is inappropriate due to the existing narrow single track lane which provides insufficient access to the site or even access to Potters Lane. In fact residents at this point are woken up in the early hours by delivery lorries which get stuck due to wrong instructions from sat navs having to reverse back up Send Hill with warning sirens and flashing lights. There is also a school at the bottom of the hill with the attendant traffic when mothers deliver and collect their children. Policy 44-1.9na.

It is disgraceful that in spite of all the promises you made at election time, you now seem to totally disregard our views and seem intent on breaking down our village communities and destroying the community spirit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

As a resident of Normandy for approx. 25 years we chose to live in a village. Over those years we have observed traffic increase enormously. Our road system just about copes the ref ore to increase the number of houses by 1100 which is your proposal doubles the size of Normandy which the current road & sewage system could not cope with. Normandy elevates from South to North at quite a steep gradient causing flooding to occur regularly on the North boundary at times closing Glaziers lane for fear of stalling in deep water, sewage has been a major problem for several properties in there gardens. To propose such an enormous development is totally unacceptable & will deprive future generation of any green belt to walk in & breath air not polluted by vehicles Therefore I am lodging a strong objection

I understand that a large redevelopment around the village of Send and the alteration of the existing Green Belt arrangements at Send and Burnt Common are being proposed in the Local Draft Plan.

I wish to strongly object to the changes to the Green Belt that would remove areas around the village of Send from the designation of "Green Belt". The whole idea of having a green belt is to permanently protect rural areas from development and to prevent towns and cities expanding into agricultural land and areas of natural beauty. There is a real danger that
this leads to the joining together several villages to form a sprawling area that in turn joins to Guildford or Woking ( or both ).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attended documents:

Policy P2: Green Belt

5.15 We agree that the Metropolitan Green Belt should be protected against inappropriate development in accordance with national planning policy to maintain its openness and open character. We consider that the land at Onslow Park should however, be excluded from the Green Belt as shown on the proposals map in accordance with the boundary identified in these representations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. **Lack of protection for the Green Belt and the Historic Environment.** I object to the plan Ripley to be taken out of the Green Belt and designated as a “District Centre”. Further, the boundary for the Primary Shopping Area is to be contiguous with the the boundary of Ripley itself, opening the door to commercial development outside of the High Street. This this is being done without any prior consultation and without following proper procedure, which is unacceptable. It does not consider the current paucity of parking, yet proposes to add to the burden. It also increases the traffic burden on the interchange with Newark lane and Rose Lane in the village centre, identified choke points. It also threatens to change the nature of Ripley as an Historic Environment...
whose important presence on the Portsmouth Road has resulted in a significant number of Listed properties on
the High Street and wider. It would be more suitable to designate Ripley as a rural Local Centre and to protect
its heritage nature. I also understand that the previous plan for the Burnt Common site which was allocated for
light industrial, general industrial and warehousing and 100 houses has been replaced with a new proposal,
Garlick's Arch. This includes increased light and general industrial units and 400 houses, as well as a new 4 way
on/off junction for the A3 to support Gosden Hill and Wisley Airfield as well as developments in the East of the
borough. The site that is earmarked for this development has permanent green belt protection. There is no
proven need for additional housing or industrial development in this area and contributes to an entirely
disproportionate building burden on this area. The open character of Ockham with its Commons and RHS
Wisley, Ripley with its historic Village Green and the Wey navigations, and Send Marsh, all make important
contributions to the Green Belt and should be included rather than being inset. I strongly disagree that
exceptional circumstances exist to justify the amendment of the Green Belt boundaries in this area against
national planning policy. On the contrary, the development of the sites at Garlicks Arch and Gosden Hill Farm,
combined with proposed limited infilling in West Clandon would result in the coalescence of urban sprawl from
Guildford all the way to the M25.

On the contrary, the development of the sites at Garlick's Arch and Gosden Hill Farm, combined with proposed limited infilling in West Clandon would result in the coalescence of urban sprawl from Guildford all the way to the M25.

We keep hearing that your Borough Council is listening to your residents of Send or Ripley. But in spite of the enormous response to the last Local Plan, now even more houses and development are being planned encroaching on the Green Belt which the Conservatives pledged to save. Now we have new proposals to build a 4 way junction at Garlick's Arch.

** I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, in addition to Wisley Airfield (site A35) and Garlicks Arch (site A43)

There are no exceptional circumstances (as required by the National Planning Policy) for these villages and sites being removed.
I have the following comments:

- I object to Send being removed the GreenBelt. Send is a small village that cannot take any more housing, the infrastructure & road systems are barely suitable for the current number of people and definitely cannot support more housing. I particularly object to the land between the 2 schools, including their playfields being taken out of the greenbelt.

I write with reference to the proposed development on Green Belt Land of 400 houses and an industrial site at Garlicks Arch – Burnt Common Send Ripley Borders which has been drafted into the Guildford Local Plan 2016. I would like to register my objection to this proposed development for the following reasons:

1) Erosion of the Green Belt –

   I strongly object to proposed wholesale destruction of the Green Belt, which is in clear contravention of the central governments stated commitment for “Green Belt Protection”. Once this area is developed not only will this part of the Green Belt be eroded, but it will set a precedent for future development and erosion of the green belt – not only in Send/ Ripley and Clandon villages but on other green belt sites within Guildford & surrounding areas. The Green Belt should and must be protected, and whilst I appreciate the need for more housing in Guildford, there are plenty of brownfield sites which can be redeveloped. Also, it is alarming that not only is housing proposed on the greenbelt, but also an industrial site – which will have a huge & negative impact on the surrounding environment e.g. pollution, long term damage to the surrounding countryside and the flora/fauna within this area, not to mention the negative effect on communities currently living in these areas.
Furthermore, I also object to the proposed removal, through “in-setting”, of several villages from the Green Belt (e.g. Send, Ripley, Send, Clandon and Wisley to name a few).

Planning Policy Committee.

I am writing to strongly object to the proposed 2016 draft plan for the following reasons.

1. The erosion of the green belt, which directly goes against Conservative policy. 2. Any insetting of any villages in the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attended documents:

1. Green Belt

2.1. Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. No this is not the case. The housing policies set out in the Proposed Submission Local Plan; indicate that 65% of proposed new developments will take place on land that is currently in the Green Belt.

2.2. Under NPPF regulations GBC and other Local Authorities are permitted, once they have determined their Objectively Assessed housing Need (OAN), to make allowance for factors which may constrain the delivery of new housing. Constraints such as the need to protect the Metropolitan Green Belt, or the restrictions required to protect the
Surrey Hills Area of Outstanding Natural Beauty, or land costs etc. Although these designated areas make up a large proportion of the land area of Guildford Borough, GBC has made no attempt to reduce its housing numbers in order to take account of such constraints. They have instead increased the number, beyond that required for normal growth projections to satisfy their own egotistical view on a path of massive economic growth.

2.3. Currently development is permitted within the settlement boundary, where villages are washed over by the green belt with particular planning regimes being applicable that have proved beneficial in preventing the urbanization of many villages. They are very successful, because of the non urban nature of small scale new development to help to retain the openness of the villages. These villages house, in some cases, a population of 4000 plus people, yet are regarded by residents as small villages. For those who drive through these areas they do not see a mass of urban style developments but trees and hedges, views between homes, views through spaces that don't reveal row upon row of homes but space and openness with trees amongst the homes and a variety of scale and architecture.

2.4. Washing some of the larger villages will result in them becoming their own urban sprawl as a result of disproportionate infilling.

2.5. Changes to settlement boundaries have been made in order to make more land available for the developers under the guise of making the boundaries more defensible. Many straight lines have now been drawn which result in villages developing hard edge profiles with buildings replacing the fragmented softer edge of the original hedgerows, trees and green fields.

2.6. Loss of Green Belt resulting from these boundary realignments can only be justified in exceptional circumstance. None of which have been provided. Moving a boundary from one already defined boundary to another, again can only be done in exceptional circumstance. Housing need has already been turned down as such an exceptional circumstance.

2.7. I object to all these changes being made to the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object most strongly to the Horsley villages being taken out of the Green Belt. Many promises have been made to preserve the Green Belt and it should be. It is a rural area and the character of the villages should be maintained.

The Horsley villages have already, during the last few years, had considerable infilling and large areas of new houses built resulting in considerable congestion on the narrow roads, particularly at peak times. It is already almost impossible to park to shop in the village, and the overflow car park is constantly full.

The station car park is also nearly full now, and with the additional houses planned commuters would not be able to park there.

The filter roads off the A3 already have huge tailbacks at peak times.

The proposed number of houses to be built would mean a huge strain on the infrastructure, and cause a different way of life for the residents who do not want this. The further possibility of development at Wisley airfield is a complete horror as it would ruin the areas of outstanding natural beauty all around it.

Please reconsider the Local Plan.

<td>I object to Send being removed from the Green Belt. The land proposed for removal from the Green Belt provides a buffer between Guildford and Woking. Without this buffer the village of Send will lose its village identity and merge with the conurbations of Guildford and Woking. GBC refer to the Green Belt as one of the borough’s biggest assets so this proposal is not designed to protect and enhance this area at all. Removal of Send and neighbouring villages from the Green belt opens up possibilities for further developments off the A3 which would be detrimental to and destroy this beautiful countryside. Guildford would lose its identity and become a sprawling area extending all the way northwards to the M25 junction.</td>

I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Policy P2 - Send should not be removed from the Greenbelt. Send provides a buffer between Woking and Guildford. The particularly vulnerable areas of land being taken out of the Green Belt include: 1 - the land behind the school including playing fields and woodland. 2 - the land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering. 3 - Land to the left of Cartbridge going up to the old depot on the Wey Navigation.

I would like my opposition to the proposed plans to be noted for the following sites:

Waterloo Farm
Manor Farm
The Horsley Main site
Ockham Road North
East Lane
Thatcher's Hotel

I strongly disagree with encroaching on green belt land by extending the borders of our village.

The green belt is a policy for controlling urban growth and to assist in safeguarding the countryside from encroachment. (National Planning Policy Framework (NPPF) March 2012).

Should you ignore this, I along with other residents would consider legal action.

Yesterday morning I cycled out from Ripley on my bicycle enjoying the beautiful green countryside that has been preserved for us by previous generations.

In my opinion it is exceptionally sad that the removal of the green belt status has been proposed.

Removal of the green belt and the subsequent urbanisation of our villages and countryside is a one way decision. Once destroyed he countryside is gone forever.

In principal I am not against the development of new homes but it feels like the removal of the green belt and the disproportionate amount of proposed development is being made without any consideration of the infrastructure in our local area.

This week it took me an hour to drive from Ripley into Guildford, it took my wife an hour to drive from Weybridge to Cobham, parents cannot get their children into local schools, it can take 2 weeks to see your GP and the Royal Surrey hospital is at breaking point. Rush hour trains from Guildford and Woking to London are amongst the most overcrowded in the United Kingdom. Is the solution to this really to build the proposed quantity of new homes?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The spatial vision of the draft Local Plan seeks to maintain the extent and function of the Green Belt in order to protect the character of the Borough. However, paragraph 4.3.16 recognises that there are exceptional circumstances to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development. Paragraph 4.3.17 notes that land has been removed from the Green Belt in order to enable development around selected villages. In accordance with the conclusions of the Green Belt and Countryside Study Volume IV Insetting of Villages, Normandy and Flexford have become inset from the Green Belt (paragraph 4.3.13). These changes to the Plan are supported.
Nevertheless, the strategic development proposed at Normandy/Flexford does not go far enough. In relation to Normandy, Volume IV of the Green Belt Study: Insetting concludes that the village be inset within the Green Belt. This conclusion was based on a number of factors including:

- The high and medium density and distribution of residential development located on A323 Guildford Road, Anchor Close and Walden Close;
- The intermittent visual connections between the village and the wider Green Belt with the exception of Normandy Community Centre playing fields; and
- The presence of recognisable and defensible boundaries including the A323 Guildford Road, woodland at Normandy Common, Anchor Copse, hedgerows to the north of playing fields at Normandy Community Centre, and surrounding Glazier’s Lane, Mariner’s Close, Wyke Churchyard and Walden Cottages.

Similarly, the Study concluded that Flexford to the south of the railway line should also be inset based on:

- The difference in open character to the north and south of the railway line, with high density development and enclosure more evident to south of the railway line in comparison to the north;
- The high density residential development located on Christmas Pie Avenue, Orchard Way, Cull’s Road, Flexford Road and Westwood Lane to the south of the railway line; and
- The presence of recognisable and defensible boundaries to the south of the railway line including tree belts to the east of The Paddocks, Crossways and Flexford Road, the hedgerows and newly planted woodland to the south of Flexford Road, and fence lines, hedgerows and tree belts to the west of Westwood Lane. A significant amount of existing development already lies to the west of Westwood Lane and will relate to the proposed strategic development allocation.

These conclusions were based on a very limited perceived extent of the village area and by no means included all existing development which clearly does form part of each wider village as it is on the ground. For instance a significant amount of built form exists to the west of Westwood Lane and at Wyke. The summary conclusions against each of these villages also makes reference to their relationship with the proposed strategic development allocation (Policy A46) which will further emphasise their physical and functional integration.

Consequently it is considered that land to the west of Westwood Lane albeit assessed within a different Land parcel, clearly relates to the SDA and should be included within it and / or the insetting of Normandy and Flexford.

To reinforce this, it is considered that the land in question does not contribute to any of the five purposes of a Green Belt:

- To check the unrestricted sprawl of large built-up areas. The Plan seeks to deliver development for the needs of the Borough for the next 20 years. Accordingly it has the ability to contain further growth to the areas identified within the Plan. There is no need for a subsequent layer of restriction imposed by Green Belt designation;
- To prevent neighbouring towns merging into one another. There is a significant separation between Normandy/ Flexford and development of and significance at Ash to the west and the level of development envisaged to the west of Westwood Lane would not in anyway merge the two areas.
- To assist in safeguarding the countryside from encroachment. As above, there is no necessity for further safeguards in this area;
- To preserve the setting and special character of historic towns. No special character has been identified at Normandy or Flexford which would be impacted by additional development to the west of Westwood Lane; and
- To assist in urban regeneration, by encouraging the recycling of derelict and other urban land. That there is insufficient derelict and other urban land available to meet the needs of the Borough is recognised through the draft Plan through the relaxation of Green Belt boundaries in locations such as Normandy/Flexford.

The area is generally unconstrained and, being adjacent to the proposed strategic development area, will contribute to the planned comprehensive and integrated development in a sustainable way.

In conclusion it is considered appropriate for land to the west of Westwood Lane to be incorporated within the inset area around the SDA at Normandy / Flexford.

Further changes should be made to the Green Belt designation in the vicinity of Policy A46 with the incorporation of land to the west of Westwood Lane between the railway line to the south and the A323 Guildford Road to the north. The extent of this area is indicated on the attached plan.
In order that sufficient land is made available at the proposed Potential Development Area at Normandy / Flexford to ensure a sustainable and inclusive community and to ensure that sufficient land is made available to deliver objectively assessed housing needs across the Borough.

I object to West Horsley, and all the other local villages, being removed from the Green Belt- this is being done just so that you can then allow increased development which is not wanted by local people. There are lots of other areas (like the old Wisley Airfield) which could be developed upon and which have good links to the bigger roads which could and should be used first.

Removal of villages from the Green Belt allowing increased development into the future;

The proposed erosion of the Green Belt in any way, shape or form;

The really short time frame for consultation of the Draft Local Plan;
The council ignoring the many suitable brownfield sites within the borough which could be used for future development;

I object strongly to any 'plan' to build on the green belt. I ask you the question. What makes Guildford a reasonably pleasant place to live? Answer, in my opinion is the green belt. Once that goes there is nothing left, and a total reduction in quality of life with all the associated problems that come with such high density housing, schools, hospitals, pollution etc. In my opinion this is environmental vandalism straight out the top drawer.

I wish to lodge my strong objection to the Draft local plans.

The *Council's disregard for the Protection of the Green Belt* is of great concern to me.

The proposed removal of the villages from the green belt, will potentially allow disproportionate housing developments to be built.

These large developments bring with them a huge demand on already stretched local resources, overloading schools, health services and transport systems.

The already overcrowded roads, will potentially see thousands of additional cars and commercial vehicles flood into the villages, where the lanes were never designed to accommodate them.

This brings with it the problem of pollution, which is a particular problem for the young and elderly.
I have regularly been dismayed to discover that these developments with the promise of ‘affordable housing’ are far from ‘affordable’

with very little chance of young families, or local people being able to afford them.

As a Surrey resident for 33 years, I feel that the threat to Surrey and the villages surrounding Guildford has never been greater,

do not destroy our heritage, and that of future generations by allowing the destruction of Surreys Green Belt.

GUILDFORD PROPOSED LOCAL PLAN 6/6/2016

FIELDS BEHIND SHALFORD VILLAGE HALL

Although a resident of Dunsfold but a member of Shalford LTC I wish to make known my objections to the current version of the local plan which removes the fields behind the Village Hall and Tennis Club from the Green Belt and puts them in the Shalford settlement boundary.

Although these fields have been classified as “open spaces” there is no confirmation to say that this would give them the same degree of protection as the Green Belt from housing development.

Any Construction on these fields which is 25ft above the village hall would tower over the tennis courts and bowling green and totally destroy the Green aspect of the village.

The considerable traffic from a development would have to exit on Chinthurst lane not only adding to the traffic chaos and pollution but increasing the potential for an accident.
By implementing a small adjustment back to the 2003 boundary GBC could protect these fields and ensure they remain open spaces.

Although Guildford Borough Council states they will protect the Metropolitan Green Belt which I fully support they then go on to show through analysis in the Appendix that c65% of the development proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. This would lead to the devastation of our beautiful and historic village one being East & West Horsley where over 500 house are proposed on the Green Belt.

Green Belt - Policy 2 at paragraph 4.3.15
The proposal that Send Business Park be taken out of the Green Belt goes against everything that has been refused for this site in the past. It would be far better to allow the existing building to be converted into luxury apartments, that would easily sell in this area of outstanding natural beauty adjacent to the Wey Navigation. It would eliminate the need for heavy lorries to use Tannery Lane that has restricted vehicular access. There is no need for development of the old Tannery building, it is hardly a Business Park and should not be used for industrial purposes. The addition of 460 homes in the village with potential to increase the population by 1,150 (assuming 2 people per house and 50% with one child) will put unbelievable pressure on local services, especially doctor's surgeries, schools and the police let alone local hospitals. These plans, policies and proposals are going to ruin the life of the residents, who decided to live in Send and Ripley for its rural areas and quiet way of life. This is now being threatened and the people of Send and Ripley will not stand for it.............. Stop this NOW - ENOUGH IS ENOUGH!!

I object to the proposals to remove the villages Ripley, Send and Clandon from the Green Belt. Together with sites of Wisley (A35) and Garlick's Arch (A43). National planning policy requires there to be an exceptional circumstances for the Green Belt boundaries to be altered . There are no exceptional circumstances for the villages and the land to be taken from the Green Belt.

I object to development in areas which are at risk of flooding (Policy P4).

The site at Garlick's Arch is identified on the Environment agency map on [text unreadable] a flood zone 3.

Knowing the area well I know that this site often floods.

I Object to the 2016 Local Draft Plan

I wish to record my strong objections to the Draft Local Plan which is out for public consultation currently.

I live in West Horsley and I am aged 16. My family moved to this area because we did not wish to live in an urban location (like Guildford itself) - we like the countryside with its open, green spaces. These are special places, with lots of amazing wildlife and interesting species. Areas like these must be protected for future generations.

We have learned at school about the Green Belt which I think should be protected from erosion by possible future disproportionate development - how can you identify new development sites and produce a whole plan without having a solid set of evidence as to what the future housing need actually is? No one has ever asked me whether I wish to buy a house within the villages surrounding Guildford when I am older.

I object to West Horsley, and all the other local villages , being removed from the Green Belt- this is being done just so that you can then allow increased development which is not wanted by local people. There are lots of other areas (like the old Wisley Airfield) which could be developed upon and which have good links to the bigger roads which could and should be used first.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I have recently heard about the amendment to the local plan and the impact that this will have on Shalford village, and would like to state my objection.

I believe this amendment will significantly and irreversibly alter Shalford village to the detriment of this area - the character of the village will be completely lost.

The services cannot cope with additional housing. The local roads already suffer from severe congestion at key times of the day.

I believe there is no valid reason to wreck the village of Shalford in this manner.

I object to this proposed development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object at the proposed changes to the Local Plan by Guildford Borough Council (GBC) to the fields behind the Shalford village hall.

The fields you are planning to develop contribute to the open character of the Shalford village and provide a rural backdrop - I believe that GBC should support the expressed views of over 700 local residents who signed the petition objecting to this development and retain this land within the Green Belt and keep them outside the village settlement boundary.

Due to their height, these fields contribute to the openness of the Green Belt and any development would tower over the village community facilities and surrounding areas - with very large developments already planned both sides of the village is it really worth spoiling the heart of Shalford by building on this virgin, totally undeveloped site?

I have already seen first hand in station road that previous developments haven't taken the impact of more cars on the small road infrastructure in Shalford - both parking on pavements and making roads more busy and dangerous. As there are so many families with young children in the area my main concern is that access to this land is via Chinthurst Lane, which is already heavily congested, and is a key route for families to access walks in Chinthurst Hill and alone the old railway line to Bramley, which will then become more dangerous int he future.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the policy to remove the village of Send from the Green Belt. The Green Belt designation of the village of Send provides a key buffer zone between Woking and Guildford that should prevent them from merging in the future and I do not see the 'exceptional circumstances' referenced in 4.3.16. The Government notes that there are 5 main purposes to Green Belt land and I contend that the Green Belt designation of Send is important for maintaining the first 3 of these (listed below).

• to check the unrestricted sprawl of large built-up areas;
• to prevent neighbouring towns merging into one another;
• to assist in safeguarding the countryside from encroachment;
• to preserve the setting and special character of historic towns; and
• to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

In particular, areas of land proposed for removal from the Green Belt include areas behind the school consisting of playing fields and woodland, which are important to the character of the local community and the quality of its schooling, as well as land around the Wey navigation near Carbridge that should not be encroached upon. I only recently moved to the area and I was attracted by the easy access to the countryside that living in Send would afford me and I believe that this proposal will threaten that, making Send a less appealing village.

I object to Policy 2 of the Green Belt section (paragraph 4.3.15) that would inset Send Business Park form the Green Belt as this is an area of beautiful countryside adjacent to the Wey Navigation and any further development would reduce the openness of the Green Belt. I am also concerned about increased traffic along tannery lane that would result from further development.

I would like to 'bullet' point my main concerns:-

I object to the erosion of the Green belt, the villages of Ripley Wisley Clandons and Send, are apparently earmarked to lose their Green Belt status, this is outrageous. Property in this area commands high prices, this is because of the location. Residents accepted the inflated price in return for being able to live in a pleasant semi-rural location, with the knowledge that as there was green belt land in the area it would not change too drastically or become over developed!

1. I object to not protecting the Green Belt (Policy P2)

Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

This policy is flawed and should have been amended. In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy 1,332 (97%) were against.

I object to the careless destruction of the Green Belt. The greenbelt was created to protect from urban sprawl, protect the countryside and provide space for recreation outside of big cities… As a local resident/as a regular visitor/I work in Ripley… I object to the reduction of these green spaces. 13,860 new houses is not sustainable and will damage local communities by overdevelopment – the plans proposed growth based on the SHMA report are more than double the figures used in previous plans. The Guildford local plan proposes an unsustainable increase in population, which will not be sustainable on the current or proposed road networks… As a regular commuter through these villages, I am all too aware of the problems that increased traffic will cause… increased commute… /I work in Ripley…/school run…/the A3 and M25 already suffer from congestion…]

I object to the local plan on the grounds that it will destroy several landscapes of beauty for current residents and visitors as well as future generations. Decreased enjoyment of the area, views, fresh air…

I object most strongly to any building on the GREEN BELT.

I object to any villages that are currently in the GREEN BELT being removed from it, such as the Horsleys, Ripley, Send, Clandons. There can be no justification for it as there are plenty of BROWNFIELD sights still available to accommodate the suggested requirement for some 693 homes per year for the next 20 years.

I object to the possibility of Guildford being increased by some 25 per cent due to the foregoing predictions which are unfounded.

I object most vigorously to any Brownfield sights being used for further factories, offices, warehouses and shops that would not include very substantial affordable housing in their planning footprints.

I object very strongly to any change in current settlement areas.

I object strenuously to any diminution of the current GREENBELT (National Planning Policy Framework Para 79).

I object to any widening of the village boundaries to encroach upon the current Greenbelt.

I object to the scale of new building throughout the Guildford borough which can not be reasonably substantiated and appears completely unfounded and a figment of some distant planners imagination.

I object most strongly and specifically to the proposed building on Gosden Hill Farm which is in the GREENBELT and designed to keep West Clandon from being absorbed into the Guildford sprawl.

I object again most vociferously to any development of Garlick's Arch with a view to creating a spur off the A3 going Southbound or Northbound as the surrounding infrastructure would be totally unable to handle any increase in vehicular traffic. Our already overcrowded village roads would not be able to cope with any increased traffic and would cause a highly increased possibility of injury or death to the local population as sidewalks are virtually non existent or indeed too narrow to accommodate the current village populations.

I object most strongly to any change being made to Newlands Corner, an area of Outstanding Natural Beauty that is
FREE to everybody to enjoy and must remain so.

It is a fact that Surrey County Council has no funds available to repair many of the roads in and around West Clandon - specifically the junction of the A247 and A246 at the South end of West Clandon, and it would appear the Highways Authority have no interest.

The GREENBELT is sacrosanct and must be fully and totally protected at all times for future generations.

1. Green Belt

2.1. Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt”. No this is not the case. The housing policies set out in the Proposed Submission Local Plan; indicate that 65% of proposed new developments will take place on land that is currently in the Green Belt.
2.2. Under NPPF regulations GBC and other Local Authorities are permitted, once they have determined their
Objectively Assessed housing Need (OAN), to make allowance for factors which may constrain the delivery of new
housing. Constraints such as the need to protect the Metropolitan Green Belt, or the restrictions required to protect the
Surrey Hills Area of Outstanding Natural Beauty, or land costs etc. Although these designated areas make up a large
proportion of the land area of Guildford Borough, GBC has made no attempt to reduce its housing numbers in order to
take account of such constraints. They have instead increased the number, beyond that required for normal growth
projections to satisfy their own egotistical view on a path of massive economic growth.

2.3. Currently development is permitted within the settlement boundary, where villages are washed over by the
green belt with particular planning regimes being applicable that have proved beneficial in preventing the urbanization of
many villages. They are very successful, because of the non urban nature of small scale new development to help to retain
the openness of the villages. These villages house, in some cases, a population of 4000 plus people, yet are regarded by
residents as small villages. For those who drive through these areas they do not see a mass of urban style developments
but trees and hedges, views between homes, views through spaces that don't reveal row upon row of homes but space and
openness with trees amongst the homes and a variety of scale and architecture.

2.4. Washing some of the larger villages will result in them becoming their own urban sprawl as a result of
proportionate infilling.

2.5. Changes to settlement boundaries have been made in order to make more land available for the developers under
the guise of making the boundaries more defensible. Many straight lines have now been drawn which result in villages
developing hard edge profiles with buildings replacing the fragmented softer edge of the original hedgerows, trees and
green fields.

2.6. Loss of Green Belt resulting from these boundary realignments can only be justified in exceptional
circumstance. None of which have been provided. Moving a boundary from one already defined boundary to another,
again can only be done in exceptional circumstance. Housing need has already been turned down as such an exceptional
circumstance.

2.7. I object to all these changes being made to the Green Belt.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

Please register my objection to the Local Plan, we need to consider our children future. We cannot go on building forever over our green belt. Who will stand up and say enough is enough. Surrey Hills is a unique area, let’s keep it that way.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to not protecting the Green Belt (Policy P2) I object to removing Ripley, Send and Clandon, Wisley Airfields and Garlick’s Arch from the Green Belt. Such a change can never be reversed and there are no exceptional circumstances to require such action. There are other areas more suitable for accommodating the required housing, not in the Green Belt and consideration should be given to these sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to not protecting the Green Belt (policy P2) As a regular visitor to Ripley and surrounding areas I value the unbuilt areas that give this part of England it's character. Once the Green Belt is encroached on by development it can never be retrieved. There are more suitable areas for housing.

I object to the 2016 Draft Local Plan by Guildford Borough Council (GBC) for the following reasons:

1. Destroying the Green Belt

I object to the proposal to remove (“in-set”) Ripley, Send and Clandon from the Green Belt.

No one in this country voted for destroying the Green Belt. We already live in one of the most overcrowded parts of the country. Roads are congested, schools and hospitals are full to capacity. Just to drive out of our village in the morning can take up to 15 minutes to cover a few hundred meters. This is stressful and will only get far worse with more houses.

We are filled with despair at losing what our families have worked all our life so hard for. They have worked hard to ensure their family live in “England’s green and pleasant land”, away from the suburban sprawl. All this is in jeopardy with this plan.

By building more and more houses, this will not only further congest an already congested road network, but the overcrowding will create further pressure on schools, hospitals, and other services, all of which will require more people to be employed, which will probably result in a further round of house building and so on. What is GBC doing to consider the wellbeing of their constituents? Was not happiness and wellbeing also on our Prime Minister’s agenda?

High volumes of traffic and congestion have negative effects. These include road collisions, the severance of communities, the costs of delays and the unreliability of journey times to people and businesses. Environmental impacts include traffic noise, air pollution and amenity issues. At a global scale, vehicle emissions contribute to climate change.
Some parts of the major roads in Surrey operate significantly beyond their capacity, resulting in traffic congestion, and forcing drivers down rural / country lanes to avoid main roads, leading to further congestion and road accidents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1.  We object to not protecting the Green Belt (Policy P2)

We object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. Once taken the green belt is lost forever.

There are no exceptional circumstances for these villages and the land to be taken from the Green Belt.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Green Belt, Policy 2 at paragraph 4.3.15
Send Business Park now taken out of the Green Belt altogether

We object to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

This Draft Plan should be rejected. Development on the Green Belt sites is not justified. There are no 'special circumstances' which justify using Green Belt land as proposed by this Plan. Green Belt land acts as a necessary buffer between Woking and Guildford, it is a valuable and beautiful amenity enjoyed by thousands of residents and it is unjustified and thoroughly ill-considered to use this Green Belt to meet this Local Plan particularly as there are far more appropriate alternatives.

Please ensure my comments are placed before the Planning Committee and the Councillors.

The policy echoes the guidance of the NPPF in saying that the Green Belt will be protected, and that while development on Green Belt land will be considered inappropriate in general, infilling within villages is acceptable. The policy identifies Gomshall as one of the villages within which limited infilling is permitted, and the draft plan proposes to increase Gomshall’s identified boundary in order to include the site, both of these things are supported.

The document’s glossary entry for infilling has been amended from “the filling of an underdeveloped plot in an otherwise built up frontage by not more than two dwellings.” It now reads: “Development of a small gap in an otherwise continuous built-up frontage, or the small-scale redevelopment of existing properties within such a frontage. It also includes infilling of small gaps within built development.” This definition broadens the terms of what is considered infill, and appears to recognise that a greater level of tolerance is required in order to ensure that the plan can meet the borough’s housing requirement.

The widening of the identified boundaries of villages, along with the broadening of the plan’s definition of infill, is supported. My client’s land is located within the village envelope, and is a gap within the built development, and thus meets the definition of infill as set out in the local plan. In the interests of certainty, the local authority’s confirmation of this would be much appreciated.

Please do not hesitate to get in touch if you have any questions relating to the above. In the meantime I would be grateful if you could confirm receipt of this representation.

The Cemetery enlargement in Send Hill has now been offered to all denominations which will increase both traffic and parking problems adding yet more chaos from your proposed development. If you take in consideration the traffic from schools and their latest rebuilds, this will increase the traffic problems. By the riding stables on Send Hill the road gets even narrower and very dangerous leading into Potters Lane.

I strongly object to your proposal to remove, Send, Send Marsh/Burnt Common & Ripley from the Green Belt and expanding their boundaries which encroach on a large proportion of Green Belt Land, which is to be used for Housing & Industrial development, (Policy P2).

This proposal is in direct contravention to the Government's stated Policy as part of their pre election manifesto and their issued guide lines to Councils with respect to the preservation of Green Belt land

I OBJECT TO POLICY P2 (GREEN BELT):

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
- Impact on rural leisure and tourism ignored.
- Impact on flood control ignored.
- Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
- Impact on biodiversity ignored.
- Impact on natural heritage ignored.
- Impact on water catchment ignored.
- Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
- Impact on rural business (e.g. mineral mining, film making) ignored.
- Impact on natural landmarks and views ignored.
- Harm to public health and wellbeing (physical, psychological) ignored.
- Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
- Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in
the NPPF.
• Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
• Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
• “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
• Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
• Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
• Ignores most of NPPF 17 stipulations.

In addition to these comments I attach a key document I have referred to which gives greater detail of all the points of objections all of which I support fully.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

2) The enclosure of protected Green Belt land within the proposed new village boundaries (for there will be a presumption for development in the future).

6) Send should not be removed from the Green Belt as it is a buffer between Woking and Guildford.

I strongly OBJECT to all of these plans and feel it goes completely against honouring your repeated election promises to protect the green belt!

I would like all my comments to be seen by the inspector.

Please do the right thing and save Send and Ripley's hugely important Green Belt. I feel it is important to honour promises made and that this development Plan will cause a loss of trust by all residents. It will disrupt the idealistic village environment currently enjoyed and destroy the desirability to live in such an incredible area.

Do not destroy the identity of our village.

Act in the interests of the current residents.

business premises and which has been used initially for industrial and latterly for a wider range of business purposes for very many years. This is elaborated further in the attached Masterplan for Send Business Centre that was prepared at the request of the Borough Council in January of this year and which the subsequent Employment Topic Paper commented: “Initial master planning ideas show sensitive design to complement the surroundings.”

There has been concerns expressed by some local residents over the proposed change to the Policy Map in relation to Send Business Centre, these focussing on:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

Looking at each of these concerns in turn, we would like to comment as follows:

**It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation**

In response to these concerns it is right to say that the business complex has been established at the site for many years: indeed, industrial activity at this site has continued without a break over the past 200 years or so. The premises - and the local /village employment it brings - has therefore served the local community and the rest of the borough since time immemorial. Whilst it is acknowledged that local people value the attractive appearance of the surrounding countryside, by any reasonable test the same could not be said of the appearance of the site and its curtilage which is used for car parking, open storage and industrial buildings. Nevertheless, change can be the impetus for improvements: the land between the canal and the River Wey is also within the ownership of SBC and is testament as to how the present owners have invested in improving the appearance of the site in collaboration with The National Trust such as the public garden the owners have installed by Tanyards Bridge. These improvements are set to continue if the proposal to inset the site from the Green Belt is confirmed with opportunities for further improvements and landscaping of the site. The recently published (July 2017) Rural Economic Strategy for the Borough specifically identifies Send Business Centre where improvements are being made. Page 25 of the Strategy highlights the site as a Case Study commenting as follows:

> “There is a strongly supportive and sustainable rural business and community atmosphere among current tenants and, with funding support from the Enterprise M3 Local Enterprise Partnership, the family owners are bringing to fruition ambitious plans to develop a creative hub hosting hi-tech film and video studio and post-production facilities. Collaboration with the National Trust has resulted in canal-side improvements that are being further enhanced by the building of a marina to provide moorings away from the main waterway”. (see page 25 Rural Economic Strategy published by Guildford Borough Council, July 2017).

**There is highly restricted vehicular access along Tannery Lane in both directions.**

As to the vehicular access to the site along Tannery Lane, this issue has been specifically addressed by highway experts Bellamy Roberts who have been advising the owners regarding access and traffic issues and is referred to in detail in the accompanying Masterplan under the heading “Movement”. In this regard, it is important to point out that:

1. Historically, the site generated significant HGV movements in the past associated with the previous industrial processes that were carried out on site. Due to the site’s historical B2 and B8 uses, it continues to generate a significant number of HGV movements every day, although HGV use is declining as the site moves to business within the B1 and R&D classes.

2. Planning permission was obtained to divert a section of Tannery Lane to a new alignment running along the south-eastern boundary of the site. That consent remains extant because a lawful start was made on its construction and a Lawful Development Certificate was issued at that time by the Council. The company plans to complete the road realignment when it has sufficient funds to do so as part of the consolidation of the entire site. When completed this will bring about significant improvement to highway and pedestrian safety.

3. The site already has in place a green travel plan and is in discussions with another employment site in Send regarding running a peak hour direct bus service to Woking and Guildford city centres. The new development will incorporate a
4. Although much of this section of Tannery Lane is a narrow rural road it accommodates the existing levels of traffic without undue difficulty. There have been no injury accidents along that section of Tannery Lane between the Business Park and the A247 junction or in the car park adjoining Tannery Lane during the last five years. As part of the Master Plan proposals it is intended that improvements will be carried out to the extent that this is feasible within the existing highway boundaries and these measures will improve forward visibility around bends and create passing bays.

5. Furthermore, additional improvements are likely to take place at the junction of Tannery Lane and the A247 arising from other developments within the village.

Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

It is acknowledged that additional buildings will be associated with the planned expansion on the adjoining ‘curtilage’ land. Nevertheless, as acknowledged by the council, “the Initial master planning ideas show sensitive design to complement the surroundings.” Moreover, NPPF acknowledges that the limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land) such as Send Business Centre can be considered to be appropriate development in a Green Belt provided that certain conditions are met.

The council are however, taking the correct approach by ‘insetting’ the site from the Green Belt acknowledging not only the fact that the site has over the past two centuries performed an important role in providing much need employment for local people but that it can perform perhaps a more important role in the future by, for example, continuing to provide low-cost serviced office space with high-speed broadband access, with many of the existing companies have been supported from a great range of industries, with occupiers including Queens Award winners in healthcare, finance, property, insurance companies and start-ups. The site’s current focus is the creative digital creative sector: a key building block in the Borough’s economic growth.

Policy P2 Green Belt

We support the change to the Policy Map that indicates that Send Business Park is now inset from the Green Belt. The extent of the land inset from the Green Belt is broadly contiguous with the long established industrial curtilage of these business premises and which has been used initially for industrial and latterly for a wider range of business purposes for very many years. This is elaborated further in the attached Masterplan for Send Business Centre that was prepared at the request of the Borough Council in January of this year and which the subsequent Employment Topic Paper commented: "Initial master planning ideas show sensitive design to complement the surroundings."

There has been concerns expressed by some local residents over the proposed change to the Policy Map in relation to Send Business Centre, these focussing on:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- There is highly restricted vehicular access along Tannery Lane in both directions
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate
Looking at each of these concerns in turn, we would like to comment as follows:

It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation

In response to these concerns it is right to say that the business complex has been established at the site for many years: indeed, industrial activity at this site has continued without a break over the past 200 years or so. The premises - and the local/village employment it brings - has therefore served the local community and the rest of the borough since time immemorial. Whilst it is acknowledged that local people value the attractive appearance of the surrounding countryside, by any reasonable test the same could not be said of the appearance of the site and its curtilage which is used for car parking, open storage and industrial buildings. Nevertheless, change can be the impetus for improvements: the land between the canal and the River Wey is also within the ownership of SBC and is testament as to how the present owners have invested in improving the appearance of the site in collaboration with The National Trust such as the public garden the owners have installed by Tanyards Bridge. These improvements are set to continue if the proposal to inset the site from the Green Belt is confirmed with opportunities for further improvements and landscaping of the site. The recently published (July 2017) Rural Economic Strategy for the Borough specifically identifies Send Business Centre where improvements are being made. Page 25 of the Strategy highlights the site as a Case Study commenting as follows:

“There is a strongly supportive and sustainable rural business and community atmosphere among current tenants and, with funding support from the Enterprise M3 Local Enterprise Partnership, the family owners are bringing to fruition ambitious plans to develop a creative hub hosting hi-tech film and video studio and post-production facilities. Collaboration with the National Trust has resulted in canal-side improvements that are being further enhanced by the building of a marina to provide moorings away from the main waterway”. (see page 25 Rural Economic Strategy published by Guildford Borough Council, July 2017).

As to the vehicular access to the site along Tannery Lane, this issue has been specifically addressed by highway experts Bellamy Roberts who have been advising the owners regarding access and traffic issues and is referred to in detail in the accompanying Masterplan under the heading ‘Movement’. In this regard, it is important to point out that:

1. Historically, the site generated significant HGV movements in the past associated with the previous industrial processes that were carried out on site. Due to the site’s historical B2 and B8 uses, it continues to generate a significant number of HGV movements every day, although HGV use is declining as the site moves to business within the B1 and R&D classes.
2. Planning permission was obtained to divert a section of Tannery Lane to a new alignment running along the south-eastern boundary of the site. That consent remains extant because a lawful start was made on its construction and a Lawful Development Certificate was issued at that time by the Council. The company plans to complete the road realignment when it has sufficient funds to do so as part of the consolidation of the entire site. When completed this will bring about significant improvement to highway and pedestrian safety.
3. The site already has in place a green travel plan and is in discussions with another employment site in Send regarding running a peak hour direct bus service to Woking and Guildford city centres. The new development will incorporate a range of effective travel planning measures to reduce car usage, together with cycle parking in accordance with the Council’s standards.
4. Although much of this section of Tannery Lane is a narrow rural road it accommodates the existing levels of traffic without undue difficulty. There have been no injury accidents along that section of Tannery Lane between the Business Park and the A247 junction or in the car park adjoining Tannery Lane during the last five years. As part of the Master Plan proposals it is intended that improvements will be carried out to the extent that this is feasible within the existing highway boundaries and these measures will improve forward visibility around bends and create passing bays.
5. Furthermore, additional improvements are likely to take place at the junction of Tannery Lane and the A247 arising from other developments within the village.

It is acknowledged that additional buildings will be associated with the planned expansion on the adjoining ‘curtilage’ land. Nevertheless, as acknowledged by the council, “the Initial master planning ideas show sensitive design to complement the surroundings. ” Moreover, NPPF acknowledges that the limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land) such as Send Business Centre can be considered to be appropriate development in a Green Belt provided that certain conditions are met.
The council are however, taking the correct approach by 'insetting' the site from the Green Belt acknowledging not only the fact that the site has over the past two centuries performed an important role in providing much needed employment for local people but that it can perform perhaps a more important role in the future by, for example, continuing to provide low-cost serviced office space with high-speed broadband access, with many of the existing companies having been supported from a great range of industries, with occupiers including Queens Award winners in healthtech, finance, property, insurance companies and start-ups. This Green Belt was implemented for a reason, to protect from urban sprawl, to ensure Green spaces for generations to come not just for our generation. The Green Belt is not just for the people who live in the villages but for Londoners too for their health and their mental well being. There are plenty of other places to build that are more suitable, this seems to me to be a corrupt way for someone to make money at the expense and misery of everyone else not just for today but for the children and the wildlife of the future.

I object to any "in-setting (i.e. removal) of any villages from the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Andrew Povey (S.C.C leader) said providing more homes should not happen if it means cementing our vast area of countryside. Sir Paul Beresford and GBC conservative councillors stood on a policy of no development in the green belt unless in exceptional circumstances – There are no exceptional circumstances. The whole issue of in setting is undemocratic. Local people have raised concerns for the last decade concerning over development of our villages. I know Sir Paul Beresford is on record as saying that local people must have a real say in housing numbers he is also omitted to protecting our natural environment and wildlife from over-exploitation of resources and development.

2. Removal of Green Belt (Policy P2)

Ripley, Send, Clandon and sites at Wisley Airfield (A35) and Garlick’s Arch (A43). must not be removed from the Green Belt, I object to the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I STRONGLY object to the 2016 Draft Local Plan on the following grounds;
I PARTICULARLY OBJECT to the erosion of the Green Belt.
I OBJECT to the lack of any evidence for the alleged housing need numbers
I OBJECT to the last minute inclusion of new sites with less than 2 weeks notice

I OBJECT to the limited consultation period

I OBJECT to any removal of any villages from the Green Belt

I OBJECT to a disproportionate amount of development in a single area

Policy P2- Green Belt

I OBJECT. This policy states, "the general extent of the Green Belt has been retained." This is a lie.

The policy wording is tepid in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government's policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations - an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council's to give away.

Policy P2 omits any assessment of the Green Belt's value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even tracking)
- Natural beauty, landmarks, open space, rural views and sight lines
- Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)"6

As a matter of law, morality and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.
It is disreputable to argue, as the Council do, that the plan would involve the loss of "only" 1.6% of the borough's Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no "acceptable" percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

I am not opposed to appropriate development in the Green Belt and recently supported a major planning application in my own village. But I fail to see why a system of fair burden-sharing of new development cannot be applied to the borough's existing settlements in proportion to their size. This alternative would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth. It is reasonable to ask urban Guildford, with \( x \) times the population of semi-rural East Horsley for instance, to accommodate \( x \) times the number of new homes over the plan period. Parish councils could be asked, and will no doubt be willing, to propose where their quota of houses should go. Most rural residents are reasonable people who, if not alienated by top-down planners, will support realistic numbers of new houses in their neighbourhoods. Unfortunately, this democratic, bottom-up approach has not been attempted.

Instead, while developers flip and land-bank urban sites as a financial speculation, this plan will dump most new development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates that few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much-needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning.

I particularly protest at the "insetting" of 14 villages from the Green Belt, and at "infilling" 12 of the borough's Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are "leggy" in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the "openness" of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF's other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hellbent on self-defeat.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To "inset" two thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London. I

"8 See Ministerial foreword: "Our natural environment is essential to our wellbeing , and it can be better looked after than it has Habitats that have been degraded can be restored . Species that have been isolated can be reconnected . Green Belt land that has been depleted of diversity can be refilled by nature- and opened to people to experience it, to the benefit of body and soul."

"9 Councillor Matthew Sarti, Planning Committee meeting, 18 May 2016 .

cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed "insetting" and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17's aim of "empowering local people to shape their surroundings" and other NPPF provisions."10

SITES

1. Green Belt sites

I OBJECT to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that "allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses." This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014.13 Some residents have concluded that commenting is a waste of time.

"13 Further discredited by criminality on the Council. Former lead Councillor for planning Mokija Juneja, architect of the 2014 draft plan, is currently serving a two-year sentence on 3 counts of forgery, pretending to be a barrister and obtaining dishonest pecuniary advantage.

All Green Belt sites should be removed from the plan until "exceptional circumstances" for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. "14

Protecting

P2 & P3 The Greenbelt and the Countryside The Greenbelt and the Countryside must be retained as “the greenbelt” and “the countryside”, not seen as optional, attractive development opportunities. If they are not safeguarded, we will never get them back, and we and future generations of Guildfordians will be the losers.

I object to what I believe is deference made to demands from business developers for easier, glamorous schemes and bigger profits: over what is actually in the best interests of residents and the environment – using brownfield and maximising the use of brownfield sites.

We have a particular interest in this issue also. Until 2015, Guildford Borough Council owned an empty piece of brownfield land, of over 1,000 square metres, near our home, in Christchurch ward. It had good access to two roads.

From 1975 when we first came to Guildford, we were told that it would be wanted for development. But in 2015 it was sold-off as garden-land, at £36 per square metre, and we have been unable to find-out the reason.

I do not know how many units of housing can be accommodated on 1,000 sq m.; it would be interesting to know this also. It appears to be a failure of duty by the Council.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**POLICY P2: Green Belt**

Local Plan Policy P2 states that: *We will continue to protect the Metropolitan Green Belt*. We fully and un-equivocally support this policy.

Unfortunately, despite such brave words, GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. The analysis included in the Appendix shows that around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. We consider this outcome to be outrageous.

Under NPPF rules, GBC is permitted to make allowance for factors which may constrain the delivery of new housing, such as the need to protect the Metropolitan Green Belt or the restrictions required to protect the Surrey Hills Area of Outstanding Natural Beauty (‘AONB’) which is offered protection under the NPPF comparable to that of a national park. Although these areas make up a large proportion of the land area of Guildford Borough, GBC makes no attempt to reduce its housing delivery in order to take account of such constraints. I find this approach inexplicable.

There are also a number of further issues relating to the detailed implementation of this policy which are set out further below:

1. **a) Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt**

Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being ‘washed over’ as it is today. Currently development is permitted within the settlement boundary, although this area is still considered to be Green Belt with a particular planning regime being applicable.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being ‘washed over’ by the Green Belt has not been a serious constraint on development within the village. For example, GBC’s planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015.

GBC attributes the need to inset East Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. This East Horsley clearly does. No less than 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and large residential gardens make a vital contribution towards bio-diversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another.
actually to come to a rural village like East Horsley and see how the Green Belt has preserved the rural character and openness of this village.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being ‘washed over’ by the Green Belt. As the saying goes: “If it ain’t broke, don’t fix it”. This applies to East Horsley in the matter of insetting.

I therefore OBJECT to the proposal to inset East Horsley from the Green Belt and request that this proposal be dropped from the Local Plan.

1. **b) Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley**

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

I object to two specific boundary changes, which have been proposed, as follows:

1. There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth Wood. This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and therefore represents a highly defensible Green Belt boundary.

Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe this proposal can be considered as an exceptional circumstance. Clearly the only justification for this change is to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. As such, I believe it is an invalid proposal.

**I accordingly OBJECT to this proposed boundary change.**

1. There is also a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe that this can be considered as an exceptional circumstance. As such we believe this is an invalid proposal.

**I accordingly OBJECT to this proposed boundary change.**

In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be ‘an exceptional circumstance’. If it were the entire Green Belt would already be covered in tarmac.

The NPPF is clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, I believe the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

1. **c) Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt**
I OBJECT to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. The proposed Wisley development is discussed further below in the Site Allocation section.

1. d) POLICY P2: Limited In-filling

A new planning designation has been introduced called ‘the identified boundary of the village’. For East Horsley this covers a number of roads south of the A246. It is a sizeable area, covering 45 hectares, the equivalent of 23% of the present Settlement Area of the village. Within this area, Policy P2 sets out proposals that would allow ‘limited in-filling’ within this boundary.

I find it hard to reconcile the opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” with this sizeable reduction in effective Green Belt status. In my opinion, this policy represents a de facto extension of the Settlement Boundary and a substantial reduction in the operational effectiveness of the Green Belt, whose effectiveness is significantly weakened where this new planning designation applies.

I accordingly OBJECT to the proposal to designate roads south of the A246 as being within the ‘identified boundary of the village’ and to allow limited infilling within this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I write as a resident of East Horsley for over 43 years, and object to the draft Local Plan for the following key reasons:

1. I most strongly object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

To whom it many concern,

I am writing to Guildford Council to express my great concerns on the proposed development of the Green Belt in Surrey.
What give's you the right to remove this land from the green belt?

The NPPF (National Planning Policy Framework) makes it clear that the fundamental aim of the Green Belt policy is to prevent urban sprawl by keeping land permanently open.

It also explicitly states that once established Green Belt boundaries should only be altered in exceptional circumstances.

There are no exceptional circumstances!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The whole point of the Green Belt is to stop urban sprawl, your destroying the Green Belt to extend urban sprawl? Insane!

Green Belt Guidelines enclosed as it's obvious you haven't read them.

The UK has voted to leave the EU, so 2.9 million people will be leaving soon, so no reason for all this devastation of the beautiful Surrey Green Belt.

These are pictures taken today of the land proposed to be taken out of the Green Belt for the Housing for Garlick's Arch.

[IMAGE 1]

[IMAGE 2]

2. I object to not protecting the Green Belt (Policy P2)
I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl.

There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield sites at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. COMMON OBJECTIONS TO POLICIES A42, A43, A58 & GREEN BELT, POLICY 2 AT PARAGRAPH 4.3.15

I object to the changes to these Policies because:
• Any additional houses and other developments in Send would increase the urbanisation of what is a semi-rural area protected by Green Belt from the closeness of the already built-up Woking Borough.

• The proposed number of new houses and other land appropriation for development adds to what was already an over-development of the area and is a disproportionate allocation of land in the Send Ward within the Borough of Guildford.

• Further developments in the Send Ward will worsen the already chronic problem for vehicle parking for people using the recreational and shopping facilities in Send.

• The prospect of yet more vehicle traffic being added to the minor ‘A’ road (the A247) through Send as this already has high volumes of traffic where the ‘uktrafficflow’ web site shows an average of nearly 14000 vehicles passing along the A247 in Send each day, which has an adverse effect on the quality of life for the residents of Send with congestion, noise, and pollution from vehicle emissions, afflicting the lives of residents. This daily high traffic flow is excessive and must not be increased further by senseless developments.

• There are no commensurate plans or funding to increase the provision of water storage and supply to additional households and commercial facilities in the Affinity Water region, to avoid water shortages in future years.

I object to this Policy change to inset Send Business Park from the Green Belt because:

• The Business Park is an anachronistic legacy which has been allowed to develop in an area of public amenity countryside (adjacent to the unique National Trust property that is the Wey Navigation) which should be not be allowed expand further and destroy the Green Belt and impact upon the amenity value and natural biodiversity of the area forever.

• Such expansion is entirely inappropriate in any event because of the highly restricted nature of Tannery Lane.

Green Belt, Policy 2 at paragraph 4.3.15 I object to the proposal to inset Send Business Park from the Green Belt because:

- It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation
- Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate
- There is highly restricted vehicular access along Tannery Lane in both directions

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPP16/1928  **Respondent:** 15254113 / R Orchard  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.
I object to removing Ripley, Send and Clandon from the Green Belt, in addition to Wisley Airfield (site A35) and Garlick's Arch (site A43). There are no exceptional circumstances (as required by the National Planning Policy) for these villages and sites being removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Green Belt Assessment

1.10 Significant limitations in Guildford’s approach to their Green Belt Assessment have been identified. Given the need for the evidence base to be sound, Boyer has carried out an independent assessment of the PDAs and MPDAs around Send and Send Marsh as identified in the Council’s GBCS to supplement the GBCS based on guidance published by the Planning Advisory Service (PAS) and the approach of other Local Planning Authorities. This was provided to Guildford Council on 11th March 2016.

1.11 The full report is included at Appendix Three to these representations (which has been updated to refer to the site allocations within the Proposed Submission Local Plan.)

1.12 First, the GBCS considers that a land parcel either contributes or not to a specific Green Belt purpose (i.e. with the parcel scoring either 1 or 0) without providing any quantification or the degree of that contribution (for example the extent to which a land parcel may make towards a particular Green Belt purpose).

1.13 Second, as a result of this first limitation, the methodology of the GBCS does not allow for any detailed form of ranking to assess the relative contribution each land parcel makes towards the purposes of including land within the Green Belt. The GBCS did not therefore carry out any form of comparative assessment between the identified PDAs/MDPAs.

1.14 Notwithstanding this, the GBCS does identify a number of small PDAs that are considered not to significantly compromise the land parcel score as a whole. These have included sites that have subsequently been proposed as site allocations or safeguarded sites within the previous draft Local Plan (2014) (site references 74-76). Our client’s site was previously identified as safeguarded land (site reference 120).

1.15 Boyer has adopted a scoring methodology to address these issues and quantify the contribution made by each PDA/MPDA towards the purposes of including land within the Green Belt. The aim is to build upon the methodology of the GBCS by enabling a comparison between potential sites already identified through the Local Plan process.
1.16 This approach, together with the sustainability methodology adopted within the GBCS, has been applied to the 11 PDAs/MPDAs surrounding Send, Send Marsh & Burntcommon and Ripley.

1.17 This assessment concludes that the site, at best, makes only a very limited contribution to the purposes of including land within the Green Belt. When compared with the PDAs/MPDAs assessed, it is ranked joint top (i.e. contributes least to the Green Belt) along with land south of Burntcommon. It is considered therefore that its release from the Green Belt would not have any adverse impact on the purpose and function of the Green Belt in this part of the Borough and as such there are no overriding constraints to prevent early delivery of the site.

Previously Developed Land

1.18 The broad approach to removing major previously developed sites from the Green Belt accords with national planning policy and is supported. However, the evidence base to support Guildford’s assumptions about the sites considered to be previously developed appears to be somewhat lacking. There are no details as to the methodology or reasoned justification that has been applied to demonstrate that a site should be considered as previously developed land.

1.19 In the absence of any evidence base being produced by Guildford Borough Council, specific and detailed evidence demonstrating the case for concluding that the site at Send Marsh should be considered to be previously developed land (PDL) was submitted to Guildford Borough Council in February 2016. This report is entitled, ‘Land at Polesden Lane and Send Marsh Road, Send Marsh, Previously Developed Status of Land’ and is attached again at Appendix Four to this representation.

1.20 It is therefore of fundamental importance that the Council demonstrates that the proposed approach with regards to both Green Belt and subsequently previously developed land in the Green Belt is supported by a robust evidence base in order to demonstrate it has appropriately considered all reasonable alternatives to ensure the plan and policies P2: ‘Green Belt’ and D4: ‘Development in urban areas and inset villages’ are sound.

3.10 Paragraph 79 of the NPPF confirms that, ‘The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.’

3.11 Paragraph 80 then sets out the five purposes of the Green Belt i.e.

- ‘To check the unrestricted sprawl of large built-up areas;
- To prevent neighbouring towns merging into one another;
- To assist in safeguarding the countryside from encroachment;
- To preserve the setting and special character of historic towns; and
- To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.’

3.12 Paragraph 83 of the NPPF refers to the Green Belt boundaries and sets out that, ‘Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.’
3.13 Paragraph 84 then goes onto say that, ‘When drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary.’

**Background to Green Belt position**

6.1 Page 22 of Guildford’s Corporate Plan 2015 – 2020 identifies the following action relating to the Green Belt, ‘Protect sensitive greenbelt land and Areas of Outstanding Natural Beauty and designate new SANGS (Suitable Alternative Natural Green Spaces)’.

6.2 The Green Belt and Countryside Study (GBCS) produced by Guildford Borough Council, consisting of 6 volumes (and including the Volume II addendum and re-issue of Volume IV) is a key piece of evidence informing the strategy of this emerging Local Plan. As part of the GBCS, the evidence base now includes a Green Belt sensitivity map, which colour codes parcels of the Green Belt into green, yellow and red, depending on the parcels’ contribution to the green belt, with green meaning a lesser contribution and red meaning the greatest contribution.

**Proposed approach**

6.3 Paragraph 4.4 of the officer report to the Extraordinary Council meeting confirms that, ‘Alongside the detailed considerations carried out as part of the Sustainability Appraisal process, the sensitivity map has been used as a further targeted constraint in arriving at the amended proposal sites…’

6.4 The general approach to the release of land from the Green Belt is supported i.e. an assessment of the existing Green Belt has been undertaken, based on the division of the existing Green Belt into parcels and an assessment made as to the contribution of each of these parcels against the five purposes of the Green Belt as set out in the NPPF.

6.5 It is however critical that this assessment is based on a sound evidence base. As background, the GBCS identified a number of Potential Development Areas (PDAs) and Major Potential Development Areas (MPDAs) for assessment against the purposes of including land within the Green Belt.

6.6 Significant limitations in Guildford’s approach to their Green Belt Assessment have been identified. Given the need for the evidence base to be sound, Boyer has carried out an independent assessment of the PDAs and MPDAs around Send and Send Marsh as identified in the Council’s GBCS to supplement the GBCS based on guidance published by the Planning Advisory Service (PAS) and the approach of other Local Planning Authorities. This was provided to Guildford Council on 11th March 2016.

6.7 The full report is included at Appendix Three to these representations (which has been updated to refer to the site allocations within the Proposed Submission Local Plan. However, it is clear that the GBCS has significant limitations that have been addressed in the report with a view to assisting the Council and strengthening the Local Plan evidence base.

6.8 First, the GBCS considers that a land parcel either contributes or not to a specific Green Belt purpose (i.e. with the parcel scoring either 1 or 0) without providing any quantification or the degree of that contribution (for example the extent to which a land parcel may make towards a particular Green Belt purpose).
6.9 Second, as a result of this first limitation, the methodology of the GBCS does not allow for any detailed form of ranking to assess the relative contribution each land parcel makes towards the purposes of including land within the Green Belt. The GBCS did not therefore carry out any form of comparative assessment between the identified PDAs/MDPAs.

6.10 Notwithstanding this, the GBCS does identify a number of small PDAs that are considered not to significantly compromise the land parcel score as a whole. These have included sites that have subsequently been proposed as site allocations or safeguarded sites within the previous draft Local Plan (2014) (site references 74-76). Our client’s site was previously identified as safeguarded land (site reference 120).

6.11 Boyer has adopted a scoring methodology to address these issues and quantify the contribution made by each PDA/MPDA towards the purposes of including land within the Green Belt. The aim is to build upon the methodology of the GBCS by enabling a comparison between potential sites already identified through the Local Plan process.

6.12 This approach, together with the sustainability methodology adopted within the GBCS, has been applied to the 11 PDAs/MPDAs surrounding Send, Send Marsh & Burntcommon and Ripley.

6.13 This assessment concludes that the site, at best, makes only a very limited contribution to the purposes of including land within the Green Belt. When compared with the PDAs/MPDAs assessed, it is ranked joint top (i.e. contributes least to the Green Belt) along with land south of Burntcommon. It is considered therefore that its release from the Green Belt would not have any adverse impact on the purpose and function of the Green Belt in this part of the Borough.

6.14 The site is adjacent to the village settlement boundary to the north, east and south and is therefore largely within the existing village envelope. The smaller part of the northern boundary, and the western boundary, adjoin fields but these boundaries comprise of strong and mature landscaping.

6.15 Overall, the site is bordered by established housing and defensible boundaries. It therefore has an enclosed character that is visually contained and separate from the wider countryside beyond. Furthermore, the Site’s western boundary does not extend much beyond the western edge of the existing settlement and does not therefore fall clearly within any identifiable gap between Send and Send Marsh.

6.16 The landscape character assessment by FLA (Appendix 5 of our Green Belt Assessment) concludes as follows:

6.17 “The previous land use for Kennels and other sui-generis uses suggest that the areas landscape character relates more to the village fringe than that of the more open land to the west. Therefore, I consider that this is an in-fill site which relates well to the historic field pattern and although the area does lie on the western edge of the village of Send Marsh, it does not form part of the open land to the west which is part of the gap between the two village settlements.”

6.18 The site is easily accessible to a range of facilities within Send and Send Marsh including The Village Medical Centre, St Bede’s Junior School, The Saddlers public house and Send Village Hall. In these terms it compares favourably with other PDAs/MPDAs, especially those surrounding Send Marsh & Burntcommon and Ripley. This combination of good access to facilities and a high degree of separation and containment from adjoining countryside means that the site represents a logical extension to Send Marsh.

6.19 In light of the characteristics of the site and the Council’s recognition that there is a need for Green Belt release to meet the proposed housing target, we consider that the site should be removed from the Green Belt and allocated for new residential development through the emerging Local Plan.

Comparative Assessment

6.20 The table below identifies the eight PDAs at Send Marsh, Send and Ripley as defined within the GBCS. However, this table provides Boyer’s assessment of each site against Green Belt purposes and, using the Boyer methodology, allows their relative contribution against each purpose to be assessed and for the sites to be ranked accordingly.

<see attachments for table 1>

6.21 As stated above, the site is ranked joint top (i.e. contributes least to the Green Belt) along with land south of Burntcommon. We conclude that its release from the Green Belt would not have any adverse impact on the purpose of the Green Belt in this part of the Borough.
6.22 The attached Green Belt assessment highlights the significant limitations within the Council’s GBCS in terms of the methodology used. Our attached Green Belt assessment also adopts a more refined approach to the review of the Green Belt which is considered necessary to make both the assessment and the emerging Local Plan sound.

6.23 Whilst the principal of illustrating how areas meet the Green Belt purposes is welcomed, i.e. through the Green Belt Sensitivity Map, the background information informing this must be robust.

6.24 Our Green Belt Assessment has clearly demonstrated that our site, ‘at best, makes only a very limited contribution to the purposes of including land within the Green Belt.’ It is therefore clear that in order to ensure the soundness of the plan, the evidence supporting the release of Green Belt land and subsequently informing the Green Belt sensitivity map must be revisited and the study updated to take into account the recommendations regarding the revised methodology informing the Council’s Green Belt Assessment.

6.25 Policy P2: Green Belt, sets out that, ‘We will continue to protect the Metropolitan Green Belt, as shown on the proposals map, against inappropriate development…’ As set out in paragraph 85 of the NPPF, ‘When defining boundaries, local planning authorities should…not include land which it is unnecessary to keep permanently open…’

6.26 The inadequacies of the Council’s Green Belt Assessment, as identified within our Green Belt Assessment result in the approach to release of land from the Green Belt being fundamentally flawed and not based on a sound evidence base.

6.27 By revisiting the evidence base to justify the release of land within the Green Belt, as detailed above and adopting the approach as advised which accords with both PAS guidance and best practice, it is clear as robustly demonstrated by our Green Belt Assessment, inter alia, that our site should be removed from the Green Belt.

6.28 In order to ensure the soundness of the plan, it is therefore recommended that the methodology is updated in accordance with our Green Belt Assessment and in accordance with this updated evidence, the Proposals Map illustrating the Green Belt boundaries is updated to reflect these findings.

6.29 In addition to the above Green Belt boundary reviews, there are also some more refined adjustments proposed to the Green Belt boundaries. Paragraph 6.9 of the Guildford Borough Green Belt and Countryside Study summary document, dated January 2013 sets out that,

‘There are some instances where the proposed Green Belt boundaries of a village, as set out in Volume IV, might appear to go beyond the existing built up or settlement boundary, suggesting that a PDA has been assumed to be included. This is not the case. The reason for the proposed Green Belt boundaries sometimes not directly following the built up part of a village, is in order to adhere to the NPPF guidance on such boundary lines. This requires at paragraph 85 that boundaries follow physical features that are readily recognisable and likely to be permanent. As explained at 5.6 above, the inclusion of land within a village boundary that is inset from the Green Belt does not automatically imply that development would be acceptable, with other relevant planning policies still applying to any development proposals.’

6.30 The revised Green Belt boundary around the site at Polesden Lane, Send Marsh does not accord with the above methodology.

6.31 Volume IV of the Greenbelt and Countryside Study assesses the potential for insetting villages across Guildford Borough Council which are currently ‘washed over’ by the Green Belt designation.

6.32 The assessment maps relating to Send Marsh / Burntcommon identify a ‘fence line and treebelt located to the west of Danesfield and to the north of Send Barns Road’. This is identified by Reference 3M.

6.33 Contrary to this statement there is no fence line or tree belt which runs in a diagonal north-west to south east direction across the site.

6.34 The proposed insetting boundary for the Green Belt in this location does not therefore adhere to the NPPF guidance on these boundaries and fails to follow a physical feature which is recognisable or permanent.

6.35 To ensure it is consistent with this approach and follows boundaries that are ‘readily recognisable’, the entire site should therefore be removed from the Green Belt. This approach would also accord with the assessment and conclusions in the Green Belt Assessment carried out by Boyer.
6.36 It is therefore recommended that the Green Belt boundary in this location is adjusted to remove the entire site from the Green Belt and follow physical, recognisable and permanent features as set out in the NPPF. These alterations would help ensure the soundness of the plan and the soundness of policy P2: Green Belt.

Safeguarding land

6.37 Paragraph 4.64 to 4.66 of the Council’s Topic Paper: Green Belt and the Countryside June 2016 sets out the following with regards to safeguarded land:

‘The NPPF is clear that when amending Green Belt boundaries we should have regard to their intended permanence so that they are able to ensure beyond the plan period. In doing so, we should safeguard sites in order to meet longer-term development needs. Safeguarded land is therefore safeguarded for future development, not from development.’

The draft Local Plan (2014) included approximately 200ha of safeguarded land around some of our villages and at one traveller site. As part of reconsidering our spatial strategy, we have looked again at the issue of safeguarding. The NPPF states at paragraph 85 (bullet 3):

‘where necessary, identify in their plans areas of ‘safeguarded land’ between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period’ (emphasis added)

The NPPF is therefore explicit that safeguarded land should be on the edge of the urban area. This is consistent with the fundamental aim of Green Belt policy, which is to prevent urban sprawl. We have therefore considered the extent to which safeguarded land could be identified around Guildford urban area. Given the significant constraints that exist to the north and south of the borough (Thames Basin Heaths Special Protection Area and Surrey Hills Area of Outstanding Natural Beauty), we are left with a ribbon across the central part of the borough that remains potentially suitable for development.

6.38 Paragraph 4.67 then sets out that, ‘Safeguarded land is required in order to ensure that, once amended, Green Belt boundaries need not be reviewed at the end of every plan period. It therefore adds certainty and is consistent with their intended permanence. However, given the nature of our borough and the extent to which constraints limit development opportunities, we no longer consider that safeguarding is appropriate for Guildford. In order to be consistent with the NPPF, any safeguarded land would need to be on the edge of Guildford urban area and would need to be of a sufficient scale to negate the need for a Green Belt review until ‘well beyond the plan period’.

6.39 The ‘urban area’ should not be restricted to Guildford; there are other settlements which are considered to be both sustainable and suitable for development and such settlements, which include Send and Send Marsh should be considered for safeguarding land. Without applying such an approach to safeguarded land it will not be possible to comply with paragraph 83 of the NPPF, which sets out that

‘Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they are capable of enduring beyond the plan period.

6.40 Indeed, Guildford Borough Council has already recognised that the failure to safeguard land is likely to necessitate further Green Belt releases. This position is acknowledged at paragraph 4.70 of the Green Belt and the Countryside Topic Paper, which confirms that, ‘We consider that any future local plan would also need to consider a combination of spatial options if needs were to be met, and is therefore likely to necessitate further Green Belt release around the villages.’

6.41 It is therefore concluded that Guildford’s approach with regards to the safeguarding of land is neither effective nor justified and cannot be considered to be sound.

6.42 Contrary to the position adopted in the Topic Paper, the constraints referred to that are limiting the development opportunities are the very reason that land should be safeguarded. I.e. it is acknowledged that the Green Belt is a significant constraint.

6.43 Furthermore, the safeguarding of land should not apply only to land around Guildford Urban Area, but should be informed by a robust Green Belt Assessment where all settlements are considered, particularly those such as Send Marsh, which has been identified as a large village suitable for growth.
6.44 This is demonstrated in the Guildford Borough Settlement Profiles which states that “due to its proximity and relationship with Send in terms of sharing facilities there is scope for Send Marsh/Burntcommon to support additional housing development in the future through an extension if suitable sites are found.”

6.45 Referring back to the matters addressed above regarding the Green Belt Assessment, it is therefore of fundamental importance that the Council’s Green Belt Assessment follows a robust methodology in order to ensure it has appropriately considered all reasonable alternatives and can identify land to be safeguarded in order to be justified and ensure the plan and policy P2: Green Belt is sound.

Other comments

6.46 The ‘Green Belt and the Countryside’ Topic Paper highlights that two documents were amended/produced to contribute to the Council’s Green Belt and Countryside Study (GBCS). These documents were firstly Volume II addendum, which amended the way that the land parcels were scored in relation to two Green Belt purposes. Secondly it relates to the preparation of Volume V of the GBCS which sought to assess a number of further spatial strategy options.

6.47 Paragraph 4.85 of the ‘Green Belt and the Countryside’ Topic Paper sets out that, ‘Both these documents were published in April 2014, by which stage the spatial strategy for the draft Local Plan had been formed and there was insufficient time to be able to fully incorporate all the findings from the updated evidence.’

6.48 This demonstrates that insufficient regard has been had to all available evidence in formulating the spatial strategy and raises concerns that in fact the approach proposed is not based on a robust evidence base, and is not the best strategy as all reasonable alternatives have not been assessed. Without demonstrating that the proposed approach is supported by a robust evidence base, the plan cannot be said to be sound.

6.49 Policy P2: Green Belt is the main policy addressing Green Belt matters. A significant amount of the proposed policy is devoted to regurgitating national planning policy. This is not necessary and indeed unless all paragraphs are quoted word for word, the meaning as set out in the NPPF then becomes altered, without justification.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Background to Inset Villages

8.1 As set out in paragraph 4.3.12 of the supporting text which accompanies draft Policy P2 of the Proposed Submission Local Plan: Strategy and Sites June 2016 historically all of the villages with the exception of Ash Green and major previously developed sites have been “washed over by the Green Belt designation”.

8.2 With the publication of the National Planning Policy Framework (NPPF) in 2012 however the Government provided clear guidance in respect of the Green Belt and its essential characteristics and purposes.

8.3 In particular Paragraph 86 of the NPPF states that “If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt” (Our emphasis).

The Emerging Local Plan Response
8.4 In response to the NPPF the Council instructed further work to be undertaken in respect of their ‘Green Belt & Countryside Study’ to consider whether villages should be ‘inset’ or ‘washed over’ by the Green Belt designation.

8.5 As set out in draft Policy P2 of the Proposed Submission Local Plan: Strategy and Sites June 2016 the following villages are now proposed to be inset from the Green Belt: Chilworth, East Horsley, Effingham, Fairlands, Flexford, Jacobs Well, Normandy, Peasmarsh, Ripley, Send, Send Marsh/Burnt Common, Shalford, West Horsley and Wood Street Village.

8.6 The approach of the Council to respond to the changes in national policy in respect of the Green Belt designation and to protect these areas using development management policies in accordance with the NPPF are supported.

8.7 Therefore the addition of ‘Policy D4: Development in urban areas and inset villages’ in the latest draft of the Local Plan which seeks to “promote the efficient use of land” whilst ensuring that “this does not negatively impact upon the quality of the local environment” is also supported.

Settlement boundary around the site

8.8 Send Marsh comprises an enclave of established housing closely related to the larger village of Send to the west. The Danesfield development marked a significant change to the character of this part of Send Marsh, introducing a distinct element of estate housing in an area which previously had comprised ribbon housing and non-residential uses.

8.9 As such, the village clearly lends itself to residential development which will rationalise the existing situation creating a long-term defensible boundary without any material outwards projection of built development.

8.10 Land at Polesden Lane and Send Marsh Road, Send Marsh is bordered on three sides by established housing and defensible boundaries including a footpath to the west (footpath number 46) and a second footpath to the north of the site (footpath number 45). It therefore lies within the effective framework of Send Marsh Village although it does not fall within the proposed settlement boundary as defined by the draft Local Plan.

8.11 Paragraph 4.2 of the Green Belt and the Countryside Topic Paper sets out that, ‘Whilst the NPPF broadly represents a continuation of previous policy, there has been a significant change in the policy approach to villages. PPG2 had previously given a choice as to whether villages should remain washed over by the Green Belt or whether they should be inset (removed) from the Green Belt. This is in contrast to the NPPF, which requires that all villages that do not make an important contribution towards the openness of the Green Belt are inset.’

8.12 Paragraph 4.12 of the Topic Paper then confirms that, ‘Volume IV of the Green Belt and Countryside Study (GBCS) in 2012 assesses all of our villages and recommends that the following villages should be inset from the Green Belt:… Send, Send Marsh/ Burnt Common…’

8.13 The Council’s approach with regards to ‘inset villages’ is supported. However, given the evidence presented in previous sections relating specifically to our client’s site at Polesden Lane, Send Marsh with regards to its contribution to the Green Belt and its previously developed land status, the location of the settlement boundary should be re-drawn around the entire site.

8.14 Furthermore, based on the physical characteristics of the site, its usage and its containment it is considered that this site is fundamentally different from the open countryside to the west and north-west.

8.15 The site does not therefore represent pristine, high quality Green Belt land and its previous usage is visible in the character of the site itself and its interrelationship with the surrounding development.

8.16 The inclusion of the site within the settlement boundary would not therefore have any material adverse impact on Green Belt purposes and in particular its openness. The site clearly lends itself to residential development and would rationalise the existing built form creating a defensible village boundary to the west.

8.17 This was demonstrated during the examination of the current Local Plan which was adopted in 2003. As set out in paragraphs 10.4.174 – 10.4.178 of the Inspector’s report the site was put forward on the basis that it had “advantages of being a brownfield site, closely related to a settlement in which there was a reasonable provision of facilities.” The Inspector appeared to agree with this statement noting that “were there a need (for further housing) this site would have features that would make it worthy of consideration.”
8.18 The new Local Plan seeks to identify and meet the needs of the Borough in respect of housing and seeks to provide for the delivery of 13,860 additional homes by 2033.

8.19 As set out above our client’s site would meet this requirement and would provide a proportionate and logical extension to the village whilst contributing to the housing needs of the Borough.

8.20 Whilst the realignment of the Green Belt boundary in relation to the Village of Send Marsh as set out in Section 6 is welcomed, given the evidence presented in previous sections relating to the fact that, at best the site makes only a limited contribution to the Green Belt and evidence demonstrating the previously developed status of the land, in order to ensure the soundness of the plan and policy D4: Development in urban areas and inset villages, the settlement boundary should be redrawn around the entire site.

8.21 The application of the approach in our Green Belt Assessment and evidence presented in our previously developed land report demonstrates that inter alia on the basis the site would provide for more than 25 dwellings that our site should therefore be allocated for residential development. This approach would ensure the soundness of the plan and in particular policies S2: Borough Wide Strategy, P2: Green Belt and D4: Development in urban areas and inset villages.

1. **I OBJECT to not protecting the Green Belt (Policy P2)**

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I am writing to object to a number of proposals in the revised Guildford Borough Proposed Submission Local Plan. I ask that these objections which are listed below are considered by the Inspector.

I object to all proposals to build on the Green Belt at Send because all the development that is really needed can be accommodated in Guildford's urban brownfield areas and is much closer to existing transport hubs. The whole destruction of the Green Belt in this area is in clear contravention of the central government's stated commitment for Green Belt Protection.

I object to the number of houses that the Plan intends to deliver.

I have further objections which I have listed below:

1. Policy P2. The removal of Send from the Green Belt because the village and its countryside provides a necessary buffer between Woking and Guildford.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to register objections to the Draft Local Plan for the following reasons:

1. **GREEN BELT**

The Green Belt is precious and the purpose of the Green Belt is to stop the unrestricted sprawl of large built up areas and prevent neighbouring towns merging.

By removing East and West Horsley from the Green Belt would change the nature of this area of countryside forever and would eventually merge historic and separate villages.

Furthermore, housing, education needs is NOT an exceptional circumstance in law under The National Planning Policy Framework requirements. Under no circumstances should green belt land be used for housing or educational buildings.

We need to preserve the Green Belt for future generations to enjoy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I vehemently object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

I ask that you please take note of the deep concerns of a huge number of Send residents and indeed many others who are connected to the village, pass through it on a daily and use this area for recreational purposes.

Please would you acknowledge receipt of this letter.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I absolutely object to the principle of insetting or removal of any of our rural villages from the Green Belt. I object because they are really are of an open character and do make an important contribution to the openness of the Green Belt. In particular, I object to the insetting or removal of Normandy from the Green Belt. Normandy’s name was derived from “no man’s land”, reflecting its character as a collection of rural settlements with significant open land within, between and beyond them. Furthermore, Normandy is renowned for its very special wildlife which is an important part of the Green Belt. It is thus an absolutely crucial part of the “green lung” for maintaining the separation between urban growth. Elsewhere in the draft Local Plan eg Policy P3, the need to avoid the merging of Ash, Tongham and Ash Vale is recognised. It is just as important to ensure that the open character of Normandy’s settlements is maintained, and this can only be done by retaining Normandy fully within the Green Belt.

I also strongly object to the removal of Blackwell Farm and its surrounding fields from the Green Belt. There has to be a limit to step by step encroachment of urban sprawl, and it is entirely inappropriate to downgrade this exceptionally beautiful area which is still actively farmed today and clearly contributing to the openness of the Green Belt.

I still object to Policy P2 as redrafted since it still does not address a very large proportion of the thousands of objections made to the previous version. I particularly object to the reference in paragraph 1 to the Policies Map: the words “as shown designated on the Policies Map” must be deleted if this paragraph is to be of any use at all. I object to the proposals that the settlements of Normandy, Flexford and Walden Cottages, and the traveller sites to the rear of Palm House Nurseries (A49) and Whittles Drive (A50), should be inset from the Green Belt. These are all areas and sites contributing to the openness of the Green Belt and also contributing to the views to and from the Hogs Back AONB. I also object to the insetting of other villages from the Green Belt and “infilling” of others and wholesale extension of settlement boundaries across the Borough. Such changes ignore the importance of a permanent Green Belt preventing urban sprawl and providing a “green lung” which should be protected, with any individual changes being subjected to rigorous scrutiny and being dependent on clear demonstration of exceptional circumstances justifying any over-riding of the Green Belt provisions. I would also point out that para 4.3.13 is incorrect and misleading in saying that a long list of villages are now inset from the Green Belt – this simply refers to GBC’s proposal last summer, to which there have been huge objections from residents and which we hope will be rejected through the Local Plan process.

I object to the proposals for amendments to the current Green Belt boundaries.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1  I OBJECT TO ALL EROSION OF THE GREEN BELT

6  I OBJECT ANY REMAL OF ANY VILLAGES FROM THE GREEN BELT

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
TO THE PLANNING INSPECTOR

I wish to object to the proposal in the local plan as under:

01 I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy P2: Green Belt is the main policy addressing Green Belt matters. A significant amount of the proposed policy is devoted to regurgitating national planning policy. This is not necessary and indeed unless all paragraphs are quoted word for word, the meaning as set out in the NPPF then becomes altered, without justification.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1.1 This statement has been produced on behalf of Trenfold Property Limited and Countryside Properties (UK) Limited (Countryside) in response to the ‘Guildford Borough Proposed Submission Local Plan: Strategy and Sites (2017)’. Countryside is the contractual purchaser for this site and is able to deliver residential development at the site early on in the plan period. A site location plan is attached at Appendix One.

1.2 Land at Polesden Lane and Send Marsh Road is approximately 2.6ha in size and currently comprises scrub grassland together with spoil and hardstanding associated with the previous uses of the site.

1.3 The site is enclosed on three sides by existing residential development. The site is broadly level and featureless with no significant vegetation within the site. The site benefits from vehicular access from Danesfield suitable to serve the proposed development.
1.4 The western boundary of the site comprises of substantial existing mature vegetation which provides a clear definition to the edge of the site and also a significant level of screening.

1.5 These representations provide our formal response to the changes made by the Council between the 2016 and 2017 versions of the emerging Local Plan and its associated evidence base.

1.6 The representations are structured as follows:
- A summary of key changes made between the 2016 and 2017 versions of the Local Plan;
- Implications of the key changes made to the Local Plan since 2016;
- An assessment of the revised housing numbers proposed in the 2017 version of the Local Plan;
- Consideration of the amended Green Belt boundaries now proposed in the 2017 version of the Local Plan; and
- An overview of our conclusions.

Introduction
1.7 Guildford Borough Council undertook a Regulation 19 public consultation on their emerging Local Plan in June and July 2016.

1.8 It is understood that the Council received approximately 32,000 representations in response to this consultation period which the Council subsequently processed and published in February 2017.

1.9 Following this period of public consultation the Council has made a number of alterations to the Local Plan. Several of these are significant in nature. As a consequence of these amendments the Council is now undertaking an additional period of public consultation.

1.10 This additional Regulation 19 public consultation which commenced on 9th June 2017 is targeted in nature. As such all representations received in respect of the previous 2016 Regulation 19 consultation will still be submitted as part of the Local Plan examination.

1.11 However, in addition to this any representations received in relation to this additional Regulation 19 consultation will also be submitted to the Planning Inspectorate for consideration. This is provided that any additional representations relate to parts of the emerging Local Plan or evidence base which have been amended since the previous 2016 Regulation 19 consultation.

1.12 The following section of these representations therefore provides an overview of the key significant amendments made since the previous Regulation 19 public consultation in 2016. This will inform the matters which can be addressed as part of the targeted consultation currently being undertaken by the Council.

LAND AT POLESDEN LANE AND SEND MARSH

Green Belt Boundary Amendments

3.1 As set out in Section 2 of these representations one of the significant amendments made to the emerging Local Plan since the 2016 consultation is the revision of a number of Green Belt boundaries.

3.2 In a number of instances these revisions relate to the amendments made to site allocations within the Local Plan and reflect the alterations to the OAN proposed mainly as a result of the SHMA Addendum Report.

3.3 However, with regards to Land at Polesden Lane and Send Marsh Road the Green Belt boundary has been revised irrespective of any of these matters.

3.4 The proposed revision to the Green Belt boundary relating to Land at Polesden Lane and Send Marsh Road is illustrated in Amendment 6 of the ‘Send Marsh / Burnt Common’ policies maps.

3.5 The ‘Summary of key changes to the Proposed Submission Local Plan: Strategy and Sites (2017)’ notes that the reason for this amendment is to “ensure the Green Belt follows a defensible boundary”.

3.6 However as set out in Paragraph 85 of the NPPF when reviewing Green Belt boundaries local planning authorities “should not include land which it is unnecessary to keep permanently open”.

3.7 We have demonstrated in our previous representations that the removal of this site from the Green Belt would not have any adverse impact on the purpose or function of the Green Belt in this part of the Borough.

3.8 The Council have failed to address these representations and have failed to demonstrate any sufficient justification for retaining Land at Polesden Lane and Send Marsh Road within the Green Belt.

3.9 Our previous representations make reference to the Planning Advisory Service updated guidance on the preparation of Green Belt Assessments published in February 2015 titled, ‘Planning on the Doorstep: The Big Issues – Green Belt’. On the basis of both the five Green Belt purposes set out at paragraph 80 of the NPPF and the PAS guidance, a boundary should in no way inform or contribute to an assessment as to whether a land parcel meets the Green Belt purposes or otherwise.

3.10 An assessment of the contribution a land parcel makes to meeting the Green Belt purposes should firstly be carried out. Secondly and as necessary, subsequent consideration should be given to where any revised boundary should be located. The boundary assessment should in no way be confused with assessing the contribution a parcel of land makes to the Green Belt purposes.

3.11 Given the conclusions reached in our Green Belt Assessment and the evidence now presented by the Council regarding the boundary of the Green Belt, it appears that Guildford Borough Council has used the location of a boundary to inform their assessment of the site.

3.12 It is therefore considered that Guildford’s approach regarding the Green Belt boundary around our clients’ site has therefore not been justified, and is therefore not sound.

3.13 In light of the substantial requirement for housing delivery sites as established in Section 3 of these representations, we re-assert that this site should be removed from the Green Belt and be allocated for new residential development through the emerging Local Plan.

3.14 Paragraph 4.39 of the Housing Delivery Topic Paper supports this approach noting that “to not amend boundaries would lead to a significant undersupply of homes compared to the identified needs”.

3.15 The Council do acknowledge in their Housing Delivery Topic paper (Paragraph 4.85) that “if major previously developed sites are of sufficient scale and do not possess an open character, it is not considered necessary for them to remain within the Green Belt”.

3.16 However, our previously submitted representations have demonstrated that the site is previously developed land and should therefore be removed from the Green Belt. The Council have nevertheless also failed to respond to these submissions.

3.17 With regards to Green Belt boundaries the NPPF requires local planning authorities to “satisfy themselves that Green Belt boundaries will not need to be altered” and should be defined “clearly, using physical features that are readily recognisable and likely to be permanent”.

3.18 Whilst it is acknowledged that not altering the Green Belt boundary in this location would ensure a defensible boundary the overall assessment of the site (as set out above) is not robust.

3.19 As clearly established by our Green Belt Assessment, the site makes at best, only a limited contribution to Green Belt purposes. As a subsequent and secondary point, the boundary issue would then be considered.

3.20 As we have previously highlighted a defensible boundary for the Green Belt can be established as a result of the removal of the site from the Green Belt owing to the existing site boundaries and substantial vegetation which would provide a clear and permanent boundary in compliance with the NPPF.

3.21 In light of the characteristics of the site and the Council’s recognition that there is a need for Green Belt release to meet the proposed housing target, we consider that in order for the plan to be found sound, the site should be removed from the Green Belt and allocated for new residential development through the emerging Local Plan.

**Flood Risk**

3.22 The Housing Delivery Topic Paper prepared as part of the 2017 public consultation into the Local Plan notes that
“the Proposed Submission Local Plan has given due regard to national flood risk policy, and has not allocated land for housing development that does not accord with the flood risk compatibility table, or pass the sequential test”.

3.23 We have previously highlighted in our earlier representations that our client’s site has been incorrectly given a red ranking against flood risk in the site options appraisal. The Council have been provided with evidence to demonstrate that the site is not at risk of flooding and this ranking is therefore incorrect.

3.24 As illustrated in the flood risk map overlay provided in Appendix 2 and the location plans provided in Appendix 3 all of the proposed residential development can be provided on land which lies within the current Environment Agency Flood Zone 1. As such the site should score a green ranking against flooding and not a red ranking.

3.25 If this inconsistency is corrected then Land at Polesden Lane and Send Marsh Road performs strongly against the Council’s assessment criteria as set out in the sustainability appraisal.

3.26 Despite our representations the Sustainability Appraisal on the Guildford Borough Local Plan which was updated in June 2017 has not incorporated our comments.

3.27 In order to minimise any potential for legal challenge to the Local Plan process, we once again re-iterate that the sustainability appraisal should be revised to take into account the matters raised above and demonstrate how all of the reasonable alternatives have been considered. This is necessary to ensure the soundness of the Plan.

3.28 In addition Countryside has also commissioned a Fluvial Flood Study Report provided in Appendix 3.

3.29 This work addresses the fact that the Environment Agency had previously lacked suitable flood levels for the area in order to inform a Flood Risk Assessment for the site.

3.30 The Report provided in Appendix 3 incorporates hydraulic modelling of the watercourses within the vicinity of the site to determine flood levels and the resulting flood extents.

3.31 The results demonstrate that the site would be entirely situated out of any floodplain up to a 1 in 1000 year return period.

3.32 The site would therefore be entirely positioned within Flood Zone 1 subject to the Environment Agency approving the model.

4.1 These representations have been prepared in response to the Regulation 19 public consultation in respect of the ‘Guildford Borough Proposed Submission Local Plan: Strategy and Sites (2017)’.

4.2 The representations respond directly to the changes made between the 2016 and 2017 versions of the emerging Local Plan and in respect of the new and updated evidence base as required by the targeted consultation.

4.3 Our clients continue to support the commitment of the Council to progress their Local Plan however it is apparent that there are a number of outstanding issues which need to be addressed in order for the Local Plan to be found sound at examination. These points are summarised below.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 170724 Representations (1).pdf (6.9 MB)
Object to proposed Green Belt boundary showing retention of “Land at Hornhatch Farm” as a Green Belt designation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to register objections to the Draft Local Plan on the following:

Proposed Submission Local Plan: Strategies and Sites June 2016, with regards to the proposed development in East and West Horsley as follows:

Policy P2: Green Belt and the Countryside / Policy P1: Surrey Hills Area of Outstanding Natural Beauty (AONB)

I and many if not the majority of residents of West Horsley are totally opposed to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries.

There are no exceptional circumstances or other justification is made for the new Green Belt boundaries that will result from the proposed insetting of the two parts of the village from the Metropolitan Green Belt.

West Horsley's defined Settlement Area boundaries (ref 2003 Local Plan) DO NOT need to be extended. West Horsley Parish is one of a rich and varied mix of well-established low housing density settlements with a considerable number of historic buildings. Positioned on the north side of the North Downs, partly in the Surrey Hills AONB, it attracts a considerable number of recreational visitors. Evidence of this is specific with walkers and cyclists, reliving the 2012 Olympic Cycle race and subsequent annual races which is now a feature through this and other local villages.

The Key Evidence document 'Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2176  Respondent: 15270401 / Lynne and Nick Martin  Agent:
We wish to register objections to the Draft Local Plan. Our reasons are as follows:

1. Green Belt

Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

<tr>
<td>We object to Policy P2 Green belt.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>This policy states, “the general extent of the Green Belt has been retained.” This is a misleading statement. The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. Once gone it is gone forever.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it serves a valuable purpose and it needs to be permanently protected. It was established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an example of good planning and the envy of planners throughout the world. Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

1. Agricultural production. 2. Rural leisure and tourism amenities. 3. Water catchment. 4. Flood control. 5. Biodiversity. 6. Natural heritage. 7. A carbon sink for air pollution. 8. Room for public facilities such as parks and burial grounds. 9. Profitable film locations (e.g. Shere). 10. Future economic potential such as mineral extraction (even fracking). 11. Natural beauty, landmarks, open space, rural views and sight lines. 12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF). As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations. It is quite incorrect to argue, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. We believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors.

We object to the removal of over 400 hectares of Green Belt land in and around Blackwell Farm to facilitate further development of Surrey Research Park and for 1800 homes. Over 60 hectares were removed from Green Belt 12 years ago for the same developer (Surrey University) who has yet to fulfill their planning obligations. This valuable land has been squandered with over 17 acres of surface car parking and as one of the key features of Green belt is its 'permanence' this second request for yet more Green Belt land to be released in such a short space of time, with all the outstanding issues that remain makes this all the more objectionable.

Furthermore we object on grounds of the impact this development will have in terms of congestion on our highways, these issues have been highlighted under 'infrastructure'.

We object to the subjectivity of the Green Belt assessment and the inclusion of highly valued areas for development.

We object to the addition of Green Belt to prevent coalescence when areas such as Normandy and Flexford are being merged by development and so are the Horsleys. An area that has a higher landscape value (Blackwell Farm) on the same stretch of land (Hog's Back) is proposed for removal and so the criteria and decision made over Green Belt removal and addition make no sense. We would otherwise support the additional Green Belt but only if there is parity between the various areas of Guildford.

Exceptional circumstances must be outlined and none have. We are also aware of planning permission that has been given locally within Greenbelt where the developer or agent states 'there are exceptional circumstances' yet these are not outlined and approval is given? Policies must be in line with the NPPF and exceptional circumstances but be 'exceptional' which means by definition, 5 strategic sites with the vast majority on Green Belt cannot be 'exceptional'?

We object to the inclusion of Greenbelt sites where exceptional circumstances have not been given. Housing need alone has in case law, been overturned and the housing need is highly questionable. We question the soundness of 66% of almost 14,000 homes being proposed on Greenbelt land and whether any circumstances could warrant this.

I object wholeheartedly to the continued destruction of green belt land. The entire idea of the greenbelt is to protect us from becoming a concrete jungle, protecting our wildlife and the natural environment within this country. There is absolutely no exceptional circumstance warranting this land being developed on. Leave it alone.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Having carefully considered the GUILDFORD NEW PLANNING DOCUMENTS I would like to STRONGLY OBJECT to the plans as set out.

My greatest concern is the erosion of Greenbelt policy. The very reason we choose to live and raise our families here is in major part due to the connection that the Surrey Hills has with the countryside, green spaces, controlled population density and outdoor leisure activities.

The value of this protection is enormous. We can attempt to attach tangible value to it, but the reality is that it even as we add up the value of all it offers we cannot calculate the intangible value of preserving these bands of green in an ever growing, every more populous and overcrowded land.

It is my STRONG OPINION that Greenbelt should be held sacrosanct. The point of providing this protection is to ensure it is absolute and for all time.

I am not objecting to reasonable planning or appropriate development in the Borough. However, taking villages like Horsley out of the Greenbelt fundamentally alters the character and protections that we hold dear in the places we’ve chosen to live. It seems far more logical to drive more careful thought in the planning and location of urban developments then creating less careful thought for developers who have NO VESTED INTEREST in the community to build on greenfield sites simply because its cheaper and more profitable. It is a complete outrage really.

I particularly protest at the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 Green Belt villages. I STRONGLY OBJECT TO THE FACT THAT settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and in and of itself invalidates the plan as a whole.

I believe this policy is based on a flawed Green Belt and Countryside Study that was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is just NOT TRUE given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF. IMPORTANTLY, this policy is disproportionate in terms of any foreseeable development requirement.

Our family, friends, community contacts and fellow residents are all in agreement that this needs to be OPPOSED AT ALL COSTS. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.
The policy states that “the general extent of the Green Belt has been retained.” Simply put this is a serious misrepresentation of the facts. If it forms any basis for this policy change, the change is inherently flawed.

I oppose unjustified green belt development. I also think that allowing Green Belt development to pay for transport schemes is a flawed policy, given that it will be the development itself that gives rise to the need for more transport. I disagree with the methodology for parcelling and scoring potential green belt developments - using the number of functions as a scoring method is too narrow and doesn't allow for value judgement over the relative merits. In addition, I don't think the test of 'exceptional circumstances' for Green Belt development has been applied properly.

Green Belt, Policy P2

The jargon in paragraphs 4.3.11 to 4.3.17 is impenetrable to the lay reader, but in so far as the draft Plan proposes that East Horsley and Wisley Airfield should cease to be within the Green Belt and that the settlement boundaries of the village should be moved, we strongly object and support the position of the East Horsley Parish Council in its opposition.

A disproportionate part of the new housing provision is to be allocated to settlements and adjoining areas in the Green Belt, particularly in the Send/Lovelace Wards of the District.

27. RPC object to other Allocation Policies including:
A25 Gosden Hill Farm
A35 Land at former Wisley Airfield, Ockham
A36 Hotel Guildford Road East Horsley
A37 Land at Bell and Colvill, West Horsley
A38 Land at West Horsley
A39 Land near Horsley Station, West Horsley
A40 Land to the north of West Horsley
A41 Land to the south of West Horsley

28. These proposals together amount to a total of 4533 homes (approximately 35% of the total new housing provision for the whole Borough) within a 3 mile radius of Ripley. As such they are likely to indirectly and directly affect Ripley with the likelihood of traffic and infrastructure problems.

The approach adopted by the GBC in the Local plan is to exclude land in and surrounding rural settlements from the protection of Green Belt designation by “insetting” of land some of which continues to serve the Green Belt purposes and contributes to the openness of the Green Belt.

40. The approach appears to have taken place as a significant general shift in policy, rather than on the basis of an assessment, in each case, of the extent to which the land in question still serves GB functions.

41. The “exceptional circumstances” required to justify amendment of GB boundaries are not identified.

42. The exclusion of these areas is not in accordance with the guidance in the NPPF.

43. RPC objects to the proposed insetting of rural villages so as to exclude them from the Green Belt protection.

44. There are no exceptional circumstances which justify such an approach and it does not follow or accord with the guidance in the NPPF set out above.

45. This Report is particularly concerned at the following insetting: (1) the insetting of Ripley Village; (2) the Send Marsh/ Burnt Common insetting.

46. There is no change of circumstances or exceptional circumstances which justify the insetting.

47. While RPC objects to the general approach to insetting in principle, it also objects to alignment of the boundary of the insetting, which has been drawn too widely and without proper or any regard to the character of the land to be excluded from the Green Belt or the extent to which it continues to fulfil Green Belt purposes.
48. RPC objects in particular to the insetting of land to the rear of the Talbot and the allocation A45. (above) The land to the rear of the built development behind the Talbot beyond the light industrial buildings is open land and forms a valued part of the rural setting of the village.

49. RPC takes the view that the insetting of Ripley Village has been far too widely drawn. The NPPF para 86 states: “If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt.”

50. Whilst acknowledging that much of the Village of Ripley is in a widely drawn conservation area RPC consider that the open character of the village does make an important contribution to the openness of the Green Belt which justifies retention of its existing Green Belt status.

51. Accordingly RPC objects to the insetting of Ripley from the Green Belt, both in principle and in detail. The Plan is not “sound” in this respect and RPC recommends that the Plan should be modified to retain the village entirely in the Green Belt. If this objection is rejected, and the village is to be inset, the boundary should be drawn more tightly into the existing village built envelope and the paddock are to the rear of The Talbot excluded.

52. RPC objects to the insetting of Send and Burnt Common in general, but particularly objects to the extension of the settlement to exclude the Garlick’s Arch site from the Green Belt and to allocate the land for built development. In the case of Site A43 and Site A43a, Send Marsh/Burnt Common, the insetting of the Garlick’s Arch allocation appears to have no other justification than the very late substitution of the Garlick’s Arch site at the Executive Meeting on 24th May 2016 itself.

53. The site continues to serve a number of the Green Belt purposes and is an important green buffer to the A3 and of ecological and landscape importance.

54. There is nothing stated in the reasoned justification in the Plan to indicate that any exceptional circumstances exist to justify the allocation and the insetting of the Green Belt boundary.

55. It does not appear to have been identified by the process of criteria-based assessment of site through which other sites were identified for allocation and there is no explanation for the substitution of the original A43 allocation “land around Burnt Common Warehouse” which was much more appropriate, given its largely previously developed character.

56. This site which has long been included in the Green Belt has been excluded in the PSLP.

57. RPC accepts the principle of insetting this site as to do so would be consistent with paragraph 85 of the NPPF.

58. However, RPC objects to the inclusion of The Spinney in the area to be inset and submits that the Plan should be modified to as to exclude this area which is adjacent to HMP Send. No exceptional circumstances or change of circumstances have arisen which would justify the insetting of this part of the site, so as to remove its Green Belt protection. RPC consider that the open and undeveloped character of this area distinguishes it from the Prison site and justifies its retention in the Green Belt.

Loss Of Rural Economy
59. RPC considers that Oldlands Field Yard which forms part of the Garlick’s Arch site (A43) and also the barns behind the Talbot (A45) are all excellent examples of successful rural economy sites. There are many very well established and successful businesses housed at these two locations which will be lost.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not adress Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The case for removing the Horsleys from the Green Belt (or “insetting” them) has not been made. They are open in appearance and character and epitomise the areas which Green Belt designation was designed to protect. The insetting will expose them to much weaker development constraints. This is evident in the plan to accommodate 60% more new housing (25% increase) than commensurate with the ONS’ own projections for a 15% population increase in the area.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

It is recognised that the extent of the Green Belt around Guildford represents a particular constraint on development but some Green Belt release is necessary if the Borough is to meet its development needs.

In this context the Council prepared its GBCS to help inform the plan making process, the most recent version of which was published in 2014. This assessed the quality of various sites located adjacent to the existing built up area of Guildford and abutting smaller villages / settlements.

By ranking the various attributes of the sites, taking into account SHLAA returns and making enquiries as to the availability of sites that had previously not been identified the Council published for consultation its Strategy and Sites Document in 2014.

This GBCS has been updated to include, inter alia; an assessment of Wisley Airfield site and other development opportunities which were not considered by the original study.

Based on the revised study, the Council has now further reviewed the release of Green Belt sites and concluded that other than the strategic allocations any development in locations should be concentrated in and immediately adjacent to the existing settlements.

However, the Council has responded to national planning policy and moved away from ‘washing over’ villages with the Green Belt designation and has now ‘inset’, or removed, those villages from the Green Belt that do not contribute to its openness. As a result, the following villages are now inset from the Green Belt: Chilworth, East Horsley, Effingham, Fairlands, Flexford, Jacobs Well, Normandy, Peasmarsh, Ripley, Send, Send Marsh / Burnt Common, Shalford, West Horsley and Wood Street Village. A number of major previously developed sites have also been inset. To facilitate development around Guildford, selected villages and the former Wisley Airfield certain areas have been removed from the Green Belt.

Against this background, Policy P2 reaffirms the usual presumption against ‘inappropriate’ development in the Green Belt, except for those uses identified in the NPPF and appropriately scaled extensions, replacement buildings and limited infilling in identified settlement boundaries.

Miller is concerned that there is no ability to bring forward alternative allocations in the event that the Council fails to meet its housing needs on the larger strategic sites.

In such circumstances, Miller considers that the Council should either reduce the reliance on the strategic sites and allocate a number of small to medium sized allocations (between 100 and 300 dwellings), or should revert to identifying a range of ‘safeguarded sites’ which are capable of being brought forward without delay in the event of a failure by bring forward the strategic allocations; either due to the lack of supporting infrastructure or developer’s concerns about market conditions generally.

In relation to ‘safeguarding opportunities’, the sites previously identified should be reviewed in the context of other sites put forward in response to the 2014 consultation into the Strategy and Sites Document and sites subsequently promoted through the SHLAA.

Miller maintains that safeguarded sites will ensure that should alternative allocations be required the Council will be able to direct development to the most sustainable sites and resist sites being advanced in inappropriate locations.

We also note that whilst the Council has continued to use the spatial hierarchy to inform its allocations, it has also relied on the Sustainability Appraisal (http://www.guildford.gov.uk/media/15039/Volume-I-plus-Appendix-I-and-H---Guildford-Borough-Green-Belt-and-Countryside-Study/pdf/Volume_I_Guildford_Borough_Green_Belt_and_Countryside_Study.pdf) and the Green Belt Sensitivity Assessment (http://www.guildford.gov.uk/newlocalplan/CHttpHandler.ashx?id=16835&p=0). With regard to the latter, Miller recognises the importance of working to preserve the purposes of the Green Belt, but at the same time notes that such a sensitivity assessment can be subjective in terms of if and how the purposes are weighted, particularly as the scoring of whether each parcel meets three or more of the purposes of the Green Belt (thereby being deemed “high sensitivity”) is based on a one sentence statement of supposed fact regarding each purpose. In relation to Miller’s site (H8-C), we
question the validity of the assessment made as to its high sensitivity, as we address this later in this submission.

We are concerned at the inconsistency in the Council’s approach to assessing both the sustainability and sensitivity of Green Belt sites, and how this has led to certain sites being discounted (rejected) in the Land Availability Assessment.

For instance, a number of sites (such as ours – H8-C) have been rejected for the stated reason of “identified in the GBCS but within high sensitivity Green Belt”, yet these two assessments do not consider sites on the same basis. For instance, H8-C had a site-based sustainability ranking of 5 out of 41 in the GBCS, thereby confirming its highly sustainable status.

By contrast, the Green Belt Sensitivity Assessment considered the whole of a wider area known as H8 (which included a far more extensive area comprising H8A, H8B, H8C and the open fields, woodlands and hedgerows stretching down to Wood Street Village). As a result, whilst the key purposes of the Green Belt (such as preventing neighbouring towns from merging into one another) would be prejudiced if the whole H8 area was to be developed, the same conclusion would not be reached if the Green Belt Sensitivity assessment was applied merely to the PDA itself. Against this background the process is considered to be fundamentally flawed and unsound – as it makes a judgement on a potential development area (PDA) based on how the purposes of the Green Belt apply to a much larger area. We have no doubt that the purposes of the Green Belt in relation to PDA H8C (which is what should be considered in relation to the suitability of this parcel of land for Green Belt) are considerably different (i.e. low to medium sensitivity) compared to how the purposes apply to all of H8 when considered as one. This appears to be a consistent theme through the Council’s approach to individual sites, which may have led to some sites being rejected when on their individual merits may have been considered acceptable from both a sustainability and sensitivity perspective.

Miller has further concerns at how the Sustainability Appraisal and the Green Belt sensitivity assessment have been disregarded in relation to the proposed strategic site at Normandy and Flexford. Notwithstanding the fact that there may be a need for a new secondary school (albeit not yet proven), we are not convinced that granting such an exception is consistent with not granting exceptions for other sites that help meet identified wider local needs, such as H8-C. Ignoring the Sustainability Appraisal in relation to the Normandy site is significant, given that the Flexford part (the majority) of this strategic site was given a sustainability ranking of just 34 out of 41, meaning that it was considered to be of low sustainability. Miller believes that the Council would struggle to defend the inclusion of such a site whilst excluding others which have a much higher sustainability ranking (and by virtue of their smaller scale would have a much less significant impact on the Green Belt). In summary, to include a strategic site with a very low sustainability ranking and high sensitivity in the Green Belt whilst excluding others of a much less contentious nature would give rise to challenge on grounds of consistency and soundness.

I wish to object most strongly to the proposal to remove Chilworth from the Green Belt. It is surrounded by an AGLV and the AONB and is seen from the hills along the Tillingbourne Valley. This valley is an extremely attractive area within the Borough and it is very important that the villages along it remain as discrete entities and do not coalesce due to ribbon type development. Hence Green Belt protection for Chilworth is essential.

There is a suggestion that 20 dwellings could be built on land at Old Manor Farm, (Site Ref. 2286). This land is outside the Settlement Boundary, is in the Green Belt and in an AGLV, and is also adjacent to a Conservation Area. It is almost surrounded by Public Footpaths. Hence it is important for the openness of the countryside. The side has no adequate, or wide enough, vehicular access. Thus the proposal to build there is entirely inappropriate.

Tillingbourne Junior School playing fields should remain outside the Settlement Boundary so as to retain their Green Belt protection in the long term. Having been a Governor there for about 30 years I know that the fields are fully utilised but the Governing Body is well aware that many school playing fields have already been sold off.

GREEN BELT EROSION - Ripley, Wisley, Clandon and Send should not be removed from the Green Send provides a buffer between Woking and Guildford. The Green Belt was originally formed to avoid amalgamation of villages into towns and towns into cities, by unregulated development or Urban Sprawl. Much has been made in recent years of the plight of certain species of birds and reptiles and destruction of their habitats by development - and yet the Council are exacerbating this process in their wanton desire to take the easy and cheapest option and develop in the Green Belt -
home to a myriad of Flora and Fauna. The Green Belt should be left alone and more use made of existing developed (brown field) land - a prime example being Wisley Airfield.

**POLICY P2 – GREEN BELT – SEND BUSINESS PARK OMISSION**

- It is noted in paragraph 4.3.15 that it is intended to inset (exclude) a number of developed sites from the Green Belt, Send Business Park in Tannery Lane being one of them even though there are no ‘Special Circumstances’ put forward to justify this.
- The site is a non-conforming use within the Green Belt however this alone does not justify its exclusion from the Green Belt, in fact there are a myriad of such sites throughout the entire National Green Belt.
- The site is NOT a major developed site within the Green Belt and therefore does not warrant exclusion. The group of existing buildings is not excessive and is surrounded by open fields and the River Wey Navigation therefore the site has an open character (an essential characteristic referred to in Policy P2 paragraph 4.3.12 and 14) and makes an important contribution to the Green Belt.
- If exclusion of this site from the Green Belt designation is intended to promote further development, residential or commercial, then this will only serve to increase the problems of traffic congestion and highway safety along Tannery Lane and its junctions with Polesden Lane and Send Road particularly at peak flow times.

I trust that the above objections are self-explanatory and I would be grateful if the Council and the Planning Inspectorate would carefully consider the points raised in relation to the proposed alterations made to the 2017 Draft Local Plan and in securing a positive future for Guildford Borough and its residents.

I am writing to show my objection and dismay at the proposed abolition of Green Belt Land around the villages of Chilworth, Shalford, Peasmarsh and surrounding villages. Green Belt land should be reserved for exactly what it says GREEN BELT, the villages are in an area of Outstanding Natural Beauty within the Surrey Hills.

Pollution through extra traffic through the villages and the destruction of wildlife habitat will have a completely detrimental affect on the 'country side'.

We would urge the council to consider carefully how best to meet the future needs for realistic numbers of homes whilst maintaining Guildford's identity by safeguarding the green belt. Future generations need us to take responsibility for how Guildford is shaped and the current proposal simply sacrifices areas of Greenbelt which is an easy way out with huge future consequences of intense urbanisation and all this brings. Before any decision on the distribution of homes is made we strongly urge the council to make fundamental decisions on the local infrastructure to put in place real and sustainable road and rail plans that are delivered ahead of the inevitable increases in population and vehicles in the coming years.

The Metropolitan Green Belt was set up in 1935 to control urban growth around London. In 1947 this was extended to local authorities in the Town and Country Planning Act. In 1955 the Minister of Housing encouraged local authorities around the country to do the same. Chilworth thankfully is included in this Green Belt, if this were to be removed unscrupulous developers with no other interest other than to make a 'fast buck' and move on would be given access to the land around our villages to cover them in thousands of houses as this would be considered 'approved in principal' outside the Green Belt. No thought as to how our local doctors, schools and road infrastructure should cope has been given, the roads in particular around my village of Chilworth are in a deplorable state requiring total rebuilding in some places not just a splash of Tarmac and a heavy boot to settle it down as seems to be the usual system!

I write to register my objection to the Guildford local plan 2016.

Now more than ever before the green belt is essential to us all. To remove the protection it provides in safeguarding the "lungs" of the country would mean its demise for evermore.

People of all walks of life, all ages, all interests flock to enjoy the advantageous effects it provides. In so doing many small and cottage industries thrive. People use the green belt to walk, cycle, fish. It makes money for transport companies too, and provides opportunities for local schools to provide extra curricular activities cheaply and conveniently.

Obviously I want the green belt to continue to be protected for us all, town and country folk alike but in addition I want any councillors involve to look deep into themselves: please do not remove this protection of the green belt because it's the easiest thing to do; because you can't be bothered to use your heads to think of the alternatives, and most ESPECIALLY because it will fill the council coffers with easy money.

THERE ARE ALTERNATIVES

I object to the Green Belt not being protected.

I object to removing Ripley and Send from the Green Belt. With Wisley Airfield (A35) and Garlick’s Arch (A43) and the villages will be be close to merging resulting urban sprawl, which is specifically what the Green Belt is designed to prevent. National Planning Policy requires exceptional circumstances for these villages and sites being removed, and there are none.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I learn with deep regret that the new "Local Plan" proposes removing the outlying villages south of Guildford from green belt status. As a resident for 39 years of Chilworth I object most strongly to this. The idea of turning these beautiful Surrey villages into housing estates - for what benefit - is preposterous and sheer vandalism.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The so-called policy of in-setting the villages of Ripley, Send and Clandon is just a euphemism for ignoring their Green Belt status to suit the Borough’s convenience.

These villages are and must remain Green Belt areas.

I write to register my objection to the Guildford local plan 2016. Now more than ever before the green belt is essential to us all. To remove the protection it provides in safeguarding the "lungs" of the country would mean its demise for evermore. People of all walks of life, all ages, all interests flock to enjoy the advantageous effects it provides.

I understand that you have financial issues, however this is entirely of your making due to your short vision proposals. Inefficient spending is plain to see, for example the cheap and poor quality of resurfacing roads, that requires more maintenance and money in the long run. Another example, resurfacing a road and then soon after ripping it up to access the plumbing. Another example, increasing council taxes to a level so high that local businesses cannot survive.

If housing was built in these areas, how do you suggest you will gain access to further capital to pay for the services and maintenance? Its not just a case of getting money from the companies wanting to build and taxes. You will eventually be spending more, its obvious. Sure you will get cash in your pocket initially, but you will soon realise this money has run dry and you will be looking into further short term methods to get a quick buck. It only takes a complete and utter blind idiot to decide that money in the pocket is better than a sustainable and more prosperous future.

There are much more sustainable and creative methods that can be utilised. How about you think logically and try to develop on what we already have? For example, encourage local businesses with lower taxes? If this is mainly a housing issue, try to find better ways of fulfilling your requirements rather than trying to take the quick and easy option. There is no reason why further development in urban areas is a problem. Guildford town is not densely populated and it can be easily argued that its land (especially housing areas) has been used inefficiently, especially considering that its supposed to be the main town or city of Surrey.

Now lets talk about the environmental and ecological effect. You are talking about destroying everything that this planet needs to stop taking for granted, and after a few hundred years of destruction, people are starting to realise this. The environment is not just a canvas for development.

I sincerely hope you don't just count these objections, please read them, every one. People are passionate about this matter.

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’) and the land to be taken from the Green Belt. Once taken Green Belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

POLICY P2: Green Belt

Local Plan Policy P2 states that: We will continue to protect the Metropolitan Green Belt. I support this policy.

Yet GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan as around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. This is outrageous.

Proposal to inset East and West Horsley from the Green Belt and make Settlement Boundary Changes

I object to these proposals

East and West Horsley are set in a rural location and have the look and feel of a rural villages. Green Belt status has been a key factor in preserving that character. GBC attributes the need to inset East and West Horsley to NPPF requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. This both Horsleys clearly do as around a third is composed of woodlands. Woodlands and large residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and furnish those open spaces which are vital to the character of the greenbelt. It is one thing for a planner to study a map and see a settlement area filled with housing, but it is quite another actually to come to rural villages like the Horsleys and see how the Green Belt has preserved their rural character and openness.

Today East and West Horsley are picturesque and flourishing rural communities, which continue to experience steady incremental growth as a result of being ‘washed over’ by the Green Belt.

Proposal to remove Wisley Airfield from the Green Belt

I object to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance.

I object to Policy P2 green belt. This policy states, “the general extent of the Green Belt has been retained.” This is a misleading statement. The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. Once gone it is gone forever. It is not the Council’s to give away. Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world. Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an
inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

1. Agricultural production
2. Rural leisure and tourism amenities
3. Water catchment
4. Flood control
5. Biodiversity
6. Natural heritage
7. A carbon sink for air pollution
8. Room for public facilities such as parks and burial grounds
9. Profitable film locations (e.g. Shere)
10. Future economic potential such as mineral extraction (even fracking)
11. Natural beauty, landmarks, open space, rural views and sight lines
12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations. It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. I object to the “insetting” of 14 villages from the Green Belt. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat. I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead.

I object to the removal of over 400 hectares of Green Belt land in and around **Blackwell Farm** to facilitate further development of Surrey Research Park and for 1800 homes. Over 60 hectares were removed from Green Belt 12 years ago for the same developer (Surrey University) who has yet to fulfill their planning obligations. This valuable land has been squandered with over 17 acres of surface car parking and as one of the key features of Green belt is its 'permanence' this second request for yet more Green Belt land to be released in such a short space of time, with all the outstanding issues that remain makes this all the more objectionable.

Furthermore I object on grounds of the impact this development will have in terms of congestion on our highways, these issues have been highlighted under 'infrastructure'.

| POLICY P2 – Green Belt We object to this policy. 1. It does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development. 2. The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt 3. Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of green belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done. 4. The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. We believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites. 5. As mentioned above we note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "...the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and we consider this to be a deliberate untruth which compromises the consultation process. We
would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same
distribution as the original statement. (We assume the document was delivered to most houses in the Borough.) We
reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

6. We object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many
of these villages do contribute to the openness of the Green Belt and there is no need to inset them. We also object to the
wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed
outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square
off boundaries by including countryside bounded on only one or two sides by existing development, claiming it
contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The
NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy
makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to
secure the rejection of the plan as a whole.

7. To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of
the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London.
We cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF but this
could quickly be the case if the proposed “insetting” and boundary extensions go ahead. This policy is wildly
disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents.
It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF
provisions.

8. Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” We believe this should be deleted
as an untruth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **I object to not protecting the Green Belt (Policy P2)**

I strongly object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever. This is one of the reasons I chose to move to Ripley.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

I write to register my objection to the proposal on the above mentioned plan to remove Green Belt protection from the local villages, in particular Chilworth and Shalford.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

In my opinion it is exceptionally sad that the removal of the green belt status has been proposed.

Removal of the green belt and the subsequent urbanisation of our villages and countryside is a one way decision. Once destroyed the countryside is gone forever.

In principal I am not against the development of new homes but it feels like the removal of the green belt and the disproportionate amount of proposed development is being made without any consideration of the infrastructure in our local area. P2

<td>1. GREEN BELT EROSION - Ripley,Wisley,Clandon and Send should not be removed from the Green Belt. Send provides a buffer between Woking and Guildford. The Green Belt was originally formed to avoid amalgamation of villages into towns and towns into cities, by unregulated development or Urban Sprawl. Much has been made in recent years of the plight of certain species of birds and reptiles and destruct ion of their habitats by development - and yet the Council are exacerbating this process in their wanton desire to take the easy and cheapest option and develop in the Green Belt - home to a myriad of Flora and Fauna. The Green Belt should be left alone and more use made of existing developed (brown field) land - a prime example being Wisley Airfield.</td>

POLICY P2 – GREEN BELT – SEND BUSINESS PARK OMISSION

- It is noted in paragraph 4.3.15 that it is intended to inset (exclude) a number of developed sites from the Green Belt, Send Business Park in Tannery Lane being one of them even though there are no ‘Special Circumstances’ put forward to justify this.
- The site is a non-conforming use within the Green Belt however this alone does not justify its exclusion from the Green Belt, in fact there are a myriad of such sites throughout the entire National Green Belt.
- The site is NOT a major developed site within the Green Belt and therefore does not warrant exclusion. The group of existing buildings is not excessive and is surrounded by open fields and the River Wey Navigation therefore the site has an open character (an essential characteristic referred to in Policy P2 paragraph 4.3.12 and 14) and makes an important contribution to the Green Belt.
- If exclusion of this site from the Green Belt designation is intended to promote further development, residential or commercial, then this will only serve to increase the problems of traffic congestion and highway safety along Tannery Lane and its junctions with Polseden Lane and Send Road particularly at peak flow times.

I trust that the above objections are self-explanatory and I would be grateful if the Council and the Planning Inspectorate would carefully consider the points raised in relation to the proposed alterations made to the 2017 Draft Local Plan and in securing a positive future for Guildford Borough and its residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly object to the 2016 Guildford Draft Local Plan on the following grounds.

1. Loss of Green Belt between Burpham and M25.

The plan does not offer sufficient evidence of exceptional circumstances to justify allocating Green Belt land for strategic developments.

In this plan there is a disproportionate level of development to the north of Guildford and the proposal for Garlicks Arch, Send, Wisley and Gosden Hill Farm will infill the green belt from the northern edge of Burpham right to the M25.

Consequently I object to the loss of Green Belt, especially the land for the Gosden Hill Farm development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The comments below represent the issues about which I have some local knowledge and about which I feel strongly.

The Green Belt was originally introduced to prevent ad hoc development and it should still be so other wise England's green and pleasant land will soon disappear.

Guildford is an interesting old town which is surrounded and protected by the Green Belt. In my opinion and that of countless others, this protection should be maintained at all costs. The only people to benefit are the developers.

To suggest that several villages should be taken out of the Green Belt beggars believe.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I strongly object to the 2016 Draft Local Plan for the following reasons.

I strongly object to all erosion of the Green Belt. Especially as the electorate in the last local elections were promised that the elected councillors would protect the Green Belt.
I strongly object to any "in-setting" (ie removal) of any villages from the Green Belt. The proposed 2016 Draft Local Plan by these elected councillors will destroy the local villages of which they were elected on their promise to keep the Green Belt currently surrounding these villages.

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not adress Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to not protecting the Green Belt.

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council's to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.
The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of only 1.6% of the borough's Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an 'acceptable' percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the council considers that exceptional circumstances exist to justify amendment of Green Belt. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council's growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers' hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of 'About Guildford' (published by the Council) on page 5 states that '... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.' This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the 'insetting' of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openess of the Green Belt and there is no need to inset them. I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the 'openess' of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF's other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To 'inset' two-thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed 'insetting' and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17's aim of 'empowering local people to shape their surroundings' and other NPPF provisions.

Paragraph 4.3.17 states that 'the general extent of the Green Belt has been retained.' I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called 'strategic sites' of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick's Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing does not constitute a 'special circumstance') to be taken from the Green Belt. Once taken from the green belt they will be lost forever.
There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Objection to the removal of the Green Belt Protection from Peasmarsh, Shalford and Chilworth.
I wish to register my objection to your intention to remove 'Green Belt' protection from the villages within the Guildford Borough Council area.

It is well documented that the infrastructure of the area is under considerable strain and that unrestricted housing development of the area is not sustainable.

I therefore object to your 2016 Local Plan proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Herewith my Objections to the above Plan:**

1. **Green Belt sites**

   I OBJECT to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014.

   All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the National Planning Policy Framework (NPPF 2013) which makes clear ‘that most development in the Green Belt is inappropriate and should only be approved in very special circumstances’.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy P2. I OBJECT Send should not be removed from the Green Belt

Is states as follows:

"The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence."

Guildford Borough Council is ignoring this wish by the government, given it is a Conservative Council I feel this is showing further disagreement within the Conservative party not required at such time, while also ignoring the wishes of local residents.

I also note that Areas of Outstanding Natural Beauty are ignored for building on, yet Green Belt is, both should be protected or destroyed, that is discriminating against the hidden beauty of the Send area which must be protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Firstly, as a matter of principle, the Green Belt was intended to protect existing built up areas from encroachment. If pieces are to be taken from it for further building, then there will eventually be no Green Belt left to be encroached upon. Before building plans are even considered a political decision needs to be made as to whether or not we should have Green Belts at all.

An area protected by a Green Belt is totally different from an area which is not so protected. People have moved into this area precisely because it is protected by a Green Belt. If the Green Belt is diminished in any way, then existing residents will have been robbed of a vital property right.

Property rights are an essential part of the Rule of Law. As such they are a political matter, and their diminution is a matter for a political decision. They cannot be taken away as part of some bureaucratic building plan. If the Green Belt is to be diminished, then we need a political decision as to what exactly are the status of Green Belts, and how much, if any, reliance can be placed upon them by the people of this country.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to POLICY P2 – Green Belt

• No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
• No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
• Impact of Green Belt development on local agriculture ignored.
• Impact on rural leisure and tourism ignored.
• Impact on flood control ignored.
• Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
• Impact on biodiversity ignored.
• Impact on natural heritage ignored.
• Impact on water catchment ignored.
• Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
• Impact on rural business (e.g. mineral mining, film making) ignored.
• Impact on natural landmarks and views ignored.
• Harm to public health and wellbeing (physical, psychological) ignored.
• Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
• Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
• Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
• Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
• “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
• Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
• Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
• Ignores most of NPPF 17 stipulations.

I am writing to say that I strongly object to the Green Belt status of our area mainly south of the A246 being changed and brought within a newly identified "villiage boundry"

The purpose of the Green Belt was to protect our beautiful villiage and its surroundings. We have a responsibility to keep our rural areas open for future generations who are bound to suffer from these proposed changes. Once these appalling changes are put into place, there will be no going back.

We have a duty to protect our very precious villiage lay out and its countryside.

I am writing to you to express my strong objection to the fact that the development of Wisley Airfield with 2000 houses under 2 miles ferom the Horsleys has been included again in the plan.

The A3 road has more traffic than it can cope with already. Our smaller lanes will become congested.

Our local hospitals are already fully stretched

There will be a need for more doctors, therefore we would need more surgeries.

We have no more space to accommodate at least 2000 more cars in our village.

There would be a desperate need for more schools, but, bearing in mind the congested roads, how would we get to them?

Please do not agree to the plans that will eventually spoil the lives of the present residents, who are justly proud of the village that exist today.

Local Plan Policy P2 states that: We will continue to protect the Metropolitan Green Belt. I fully and un

support this policy.

Unfortunately, despite such brave words, GBC appears to be in breach of this policy itself through the housing policies that it has set out in the Local Plan. Around 65% of the developments proposed in the Proposed Submission Local Plan are to be built on land currently within the Metropolitan Green Belt. I consider this outcome to be outrageous.

There are also a number of further issues relating to the detailed implementation of this policy which are set out further below:

1.  a) Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt

Policy P2 proposes that East Horsley should be inset from the Green Belt, instead of being 'washed over' as it is today.

East Horsley is set in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Moreover, being 'washed over' by the Green Belt has not been a serious
constraint on development within the village. For example, GBC's planning records indicate that no less than 149 net new homes were added to the village housing stock through in-filling and brownfield developments between 2000 and 2015.

Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience steady incremental growth as a result of being 'washed over' by the Green Belt. As the saying goes: "If it ain't broke, don't fix it". This applies to East Horsley in the matter of insetting.

I therefore OBJECT to the proposal to inset East Horsley from the Green Belt and requests that this proposal be dropped from the Local Plan.

1. b) Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley

GBC are proposing to make a number of changes to the settlement boundaries of East Horsley and so expand the settlement area, as set out in the Proposals Map, with the justifications seemingly provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

We object to two specific boundary changes, which have been proposed, as follows:

1. There is a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth W. This proposal removes over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a 'main river line' and therefore represents a highly defensible Green Belt boundary.

Moving this boundary west to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in 'exceptional circumstances'. We do not believe this proposal can be considered as an exceptional circumstance. Clearly the only justification for this change is to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. As such, I believe it is an invalid proposal.

I accordingly OBJECT to this proposed boundary change.

1. There is also a proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston. The result is to take all of Kingston Meadows out of the Green Belt.

Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in
'exceptional circumstances'. I do not believe that this can be considered as an exceptional circumstance. As such we believe this is an invalid proposal.

I accordingly OBJECT to this proposed boundary change.

In the Green Belt & Countryside Study and its accompanying Topic Paper, GBC justifies the need to make changes in settlement boundaries in order to meet unfulfilled housing need in the Borough. However, Green Belt rules make it clear that unfulfilled housing need is not normally considered to be 'an exceptional circumstance'. If it were the entire Green Belt would already be covered in tarmac.

The NPPF is clear that every movement in settlement boundaries must be justified by 'exceptional circumstances'. GBC have offered only a generic justification in their Topic Paper of meeting unfulfilled housing need, but a case by case justification has not been provided. As such, I believe the settlement boundary changes referred to above (and many others) are invalid without such detailed justification.

1. c) Paragraph 3.17: Proposal to remove Wisley Airfield from the Green Belt I OBJECT to the proposal to remove Wisley Airfield from the Green Belt.

The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. The proposed Wisley development is discussed further below in the Site Allocation section.

d) POLICY P2: Limited In-filling

A new planning designation has been introduced called 'the identified boundary of the village'. For East Horsley this covers a number of roads south of the A 246. It is a sizeable area, covering 45 hectares, the equivalent of 23% of the present Settlement Area of the village. Within this area, Policy P2 sets out proposals that would allow 'limited in-filling' within this boundary.

I find it hard to reconcile the opening statement of Policy P2 that "We will continue to protect the Metropolitan Green Belt" with this sizeable reduction in effective Green Belt status. In my opinion, this policy represents a de facto extension of the Settlement Boundary and a substantial reduction in the operational effectiveness of the Green Belt, whose effectiveness is significantly weakened where this new planning designation applies.

I accordingly OBJECT to the proposal to designate roads south of the A246 as being within the 'identified boundary of the village' and to allow limited infilling within this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the removal of areas of Send being removed from the green belt. I am passionate about the countryside surrounding the area in which I live. Without the green belt, we begin to sprawl between Woking and Guildford, turning the area into mere suburbia. The proposed 693 homes per year would inevitably increase. Please do not let this happen.

I OBJECT

POLICY P2.

SEND SHOULD NOT BE REMOVED FROM THE GREEN BELT. Send provides a buffer between Woking and Guildford.

The particularly vulnerable areas of land being taken out of the Green Belt include

1. The land behind the school including playing fields and woodland.
2. The land to the right of Cartbridge by the River Wey Navigation up to the new boundary fence with Vision Engineering.
3. Land to the left of Cartbridge going up to the old depot on the Wey Navigation.
4. Land west of Winds Ridge. This will now protrude into the surrounding countryside like a carbuncle whereas before there was a clean straight line behind the Send Hill properties (formed by a footpath) a much more natural boundary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY P2 – Green Belt

I OBJECT. This policy states, “the general extent of the Green Belt has been retained.” This is a lie.

The policy wording is tepid in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away.

Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even fracking)
- Natural beauty, landmarks, open space, rural views and sight lines
- Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

As a matter of law, morality and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is disreputable to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

I am not opposed to appropriate development in the Green Belt and recently supported a major planning application in my own village. But I fail to see why a system of fair burden-sharing of new development cannot be applied to the borough’s existing settlements in proportion to their size. This alternative would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth. It is reasonable to ask urban Guildford, with x times the population of semi-rural East Horsley for instance, to accommodate x times the number of new homes over the plan period. Parish councils could be asked, and will no doubt be willing, to propose where their
quota of houses should go. Most rural residents are reasonable people who, if not alienated by top-down planners, will support realistic numbers of new houses in their neighbourhoods. Unfortunately, this democratic, bottom-up approach has not been attempted.

Instead, while developers flip and land-bank urban sites as a financial speculation, this plan will dump most new development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates that few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much-needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning.

I particularly protest at the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

I object to the removal of villages from the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to any building on Green Belt Land as this was, initially, created to prevent this type of gross urbanization.
I object to the proposed building on Gosden Hill Farm where the Green Belt was designated to protect West Clandon.
I object to Brown Field Land being used for unnecessary retail expansion when there are empty shops in the High Street.
For future generations, it is essential to keep these open green spaces with less, rather than more pollution.

1. I OBJECT to all insetting of villages from the Greenbelt. It is my fundamental belief that the Metropolitan Greenbelt serves a highly significant role in the preservation of open space and should be rigorously protected for future generations. In particular I refer to my objection of the insetting of the beautiful rural villages of Ripley, West Horsley, East Horsley, Send Marsh/Burnt Common, Chilworth, Shalford, Albury, Shere and Peaslake. It is indefensible that these areas of great beauty in the Surrey Hills should lose their Greenbelt status and there is no clear demonstration of exceptional circumstance to allow this to happen. As a resident of Guildford borough for over 45 years, I can attest to the huge numbers of visitors who regularly walk, ramble and cycle in the countryside of our borough. Many of these visitors are from London and the suburbs and who need fresh air and unrestricted countryside views as an antidote to urban living. Ripley is on the Olympic cycle route and the hugely popular Ride London route. There are thousands of cyclists utilising our country lanes every weekend, enjoying the wonderful countryside. Surely Londoners deserve an escape route too, just an hour away from the confines of the metropolis?

The Garlick’s Arch site however is not suitable for development given that it is designated as GreenBelt (Policy P2). The Local Plan clearly states a preference for best utilising previously developed land. Why then has a brownfield site been removed and replaced with a Greenbelt site?

<td>I object to the 2016 Draft Local Plan, as at last I have been able to view some of the vital elements of the proposals in the document. The main points that I am concerned over is the mass of housing that is proposed in the Green Belts north of Guildford. Each time I read in the local paper on the possible new areas of housing, it states an ever increasing number of new developments allocated in green areas and do not seem to state any proposals south of Guildford. What happened to the original Council concept that you should first build on Brown Field sites and nearer the town centre if possible. All of this development will bring increased pollution not to mention traffic congestion on our local roads especially the A3. No sensible timing has been stated to the building of any new improvements to this busy trunk road prior to the building of</td>
<td></td>
</tr>
</tbody>
</table>
the new roads and houses near-by. What about the upgrading of utility services to serve the new housing, which will no doubt take months to sort out and may affect any major A3 road improvements that are proposed.

REMOVAL OF AREAS FROM THE GREEN BELT

The Green Belt was granted to areas to prevent urban sprawl, prevent widespread development, further air pollution and flooding whilst providing areas of relaxation for those who live in the cities. The proposed Local Plan allows for large numbers of new homes and other facilities to be developed in Green Belt areas. The National Planning Policy Framework states that such a development requires exceptional circumstances but the Local Plan does not disclose such needs.

Erosion of the Green Belt as set out in the Local Plan will lead to further urbanisation in the future thus adding even further to the development already proposed.

No changes to the Green Belt should be made unless there are exceptional circumstances.

I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I strongly object to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent, as required by the national Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send’s Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation. Local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and there will be nothing to stop them. There is plenty of brownfield land still available for developing in the Surrey area.
Policy 2 paragraph 4.3.15-this proposal would spoil the countryside and the beauty of the Wey Navigation. Large lorries and a high volume of traffics will find it difficult using the small narrow lanes in the area and of course, cause gridlock in Send. Sadly St Bedes School was closed this year and moved to Send First School on the main road through Send. more industrial lorries and traffic will heighten the likelihood of accidents outside the school plus congestion. There is no room for extra traffic and bad planning.

We object to Send Village being removed from the Green Belt because:-

- The village provides breathing places for people and for nature.
- We will lose more than just a view, we will lose a space to run or play and an escape from the city.
- We will lose valuable farmland which provides local produce and therefore reduces food miles.
- We lose land that has its own identity and plays its own role in England’s heritage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3584  Respondent: 15342113 / Jane Carwardine  Agent:

Having objected in 2014 I would like to make my voice heard again in connection with the new proposals for the local plan and how I see it affecting my local environment and community.

1. Removal of the Horsleys from the green belt

I object to removing the Horsley's from the green belt. Our country is very overcrowded already, particularly in the southeast and the green belt was created by some foresighted government to protect the environment around London for all. It should therefore be sacrosanct. It serves as London's lung. We have seen how other policies supposedly to cut carbon emissions by encouraging people to buy diesel cars has now been proven to have made London one of the most polluted cities in Europe. How short sighted governments can be to reach so called targets!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/947  Respondent: 15342305 / Redmond Neale  Agent:

I would like to object the changes to policy P2 for the following reasons:

- I object to the changes to Policy P2 because they have not addressed many of the 32,000 comments made to the 2016 plan.

- I object to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a sham.
I object to the proposed change that Normandy settlement, Flexford settlement and Walden Cottages should be inset from the Green Belt due to the fact that:

- There is evidence in past planning appeals APP/Y3615/W/15/3002308, APP/Y3615/A/10/2140630 and APP/Y3615/A/10/2131590 that the land here contributes to the “openness” of the Green Belt.

- There is evidence in the Sustainability Appraisal para 10.4.7 that the agricultural land between the settlements is of BMV quality, exhibits ‘openness’ and contributes to the rural economy.

- The land in and around the settlements of Normandy and Flexford contributes to views into and from the Surrey Hills AONB (Hog’s Back).

Policy P2 fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it needs to be permanently protected. The Green Belt is intended to check the unrestricted sprawl of built up areas, to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land.

Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital.

It is incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of land that may be removed from the Green Belt.

I object to the statement in the submission Local Plan under Green Belt Policy P2 (4.3.13) which claims that Normandy, Flexford and a further list of 12 villages are “now inset from the Green Belt”. This statement is untrue as GBC is proposing to “inset” these villages. No decision has been made by an Inspector, therefore the villages remain in the Green Belt.

I object to the changed “insetting” of 15 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages.

I am concerned that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside the OAN.

Many Guildford villages are elongated in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages, as mere housing need does not constitute a 'special circumstance' for the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Please taking into account my objections listed below, and draw my objections to the attention of the Planning Inspector.

Green Belt

I object to the proposals to inset from the Green Belt the villages of Send, Send Marsh/Burnt Common, and Ripley, because (given the proposed developments in them, and the huge developments planned close by at Wisley and Gosden Hill Farm), the first three NPPF main guidelines on preserving the Green Belt are not being adequately observed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to policy P2

Send should not be removed from the Green Belt. Currently Send provides the only buffer between Guildford and Woking. If taken out of the green belt then Guildford would be allowed to merge into Woking. The Green Belt must be protected and preserved.

Stated Government policy is that areas should only be taken out of the Green Belt in exceptional circumstances and you have not demonstrated that those circumstances apply in the case of the Horsleys. It is accepted that on your planning watch you have permitted some infill development in the main East Horsley village, but south of the A246 there have been no extra dwellings in decades. Indeed, you have previously advised us that the Warren and Rowhams Way are in an Area of Outstanding Natural Beauty - i.e. the Surrey Hills. In the circumstances, how can you possibly permit a re-designation from AONB status to a planning free-for-all; that would be an act of quite inexcusable planning vandalism?

We are writing to object to the proposed submission local plan for the following reasons:-

• Removing Horsley from the Green What exceptional circumstance is this decision based on? Could the Council please be open and honest with the residents as no explanation has so far been made to demonstrate these circumstances.
- Extensions of the boundaries of the settlement area. This surely means that further development will be allowed in the future without referring to the residents. This is either developers being greedy or Guildford Borough Council in terms of future planned income.

Extension of the boundaries of the settlement areas of the Horsleys & proposed removal of the Horsleys from the Green Belt

I object to the proposed changes. The Greenbelt sites are essential for keeping the air around London clean, acting as a home and refuge for wildlife. The pollution levels in Greater London already far exceed the targets for clean air each year. Removing the surrounding greenbelt sites will only make this worse and the air more heavily polluted. It will also turn our village into essentially just another extension of Great London. To stress the point again, this would have a devastating impact on our air, wildlife, and also the village community here.

I have lived in West Horsley for 30 years and strongly object to the proposals put forward in the latest Guildford local plan to strip the Horsleys of green belt status and to build 533 high density dwellings. If these proposals go through you will be responsible for significantly and irrevocably destroying the character and appeal of one of Surreys most beautiful villages and declaring open season for further development. The Horsleys were granted Green Belt status to prevent precisely what you are proposing, to ensure that land is not over developed and that green open spaces are provided for people to enjoy. Whilst I understand the need to build more homes we should not be doing it at the expense of villages which add so much to the character, appeal and beauty of the county. The Borough is proud to boast that one of the things which make Guildford great is that 89% of the Borough is Green Belt, so why are you proposing to reduce it? Your proposal in fact does not provide a solid case for removing our green belt status and increasing the West Horsley housing stock by a staggering 35%, greater than any other single area in the Borough. There is certainly no mention of this in the ‘Guildford Borough Economic Strategy 2013 - 2031’ document, so what has changed? I also have not seen proposals to address the drastic effect that the addition of 533 houses will have on local roads, infrastructure, and services, and your proposal to build an additional 2500 homes in the immediate vicinity will make this even worse.

I am writing to object to the erosion of the green belt within the above plan. The Green Belt Act was brought in to ensure that no further undeveloped land was built on around large suburban areas. This was to ensure that local residents continued to have the opportunity to enjoy the countryside, by car, bicycle, horse or walking. Also to see and observe nature. I am dismayed that the Guildford 2016 Plan proposes reducing the areas for countryside recreation and farming. With the increased population in the area consideration should be given to increasing the green belt so that the density of people to green belt is brought back to what it was when the green belt was first proposed. Again we need more farmland to feed the population not less. Erosion of green belt also means more flooding as there is less land to absorb the run off water.

I am writing to lodge a formal objection to the New Local plan 2016 as proposed. I have resided at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] for over 8yrs with my children attending both the local authority schools within the area.

My first objection is that the Horsley’s should remain in the green belt area, as this is an area of outstanding natural beauty. It is our duty that this is preserved for our children and future residence…once it is gone it can never be brought back and see this as an attack on the green belt and everything this policy stands for.

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance' and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban spraw land these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

As a resident of East Horsley since 1976 I feel I should make my objections known to the proposed building of 533 houses in East and West Horsley. Removing the Horsleys from the Green Belt will be detrimental to the environment, wildlife included and will alter and damage the landscape for no reason after having protected it for over 60 years. It will change forever the ethos of a village life with a community.

I have studied this subject in some detail and cannot understand why these ridiculous proposals have been put forward. This is not Nazi Germany or a Soviet Socialist Republic, and this is not a simple propaganda exercise. There is no need for you to copy the style of the Referendum debate with a load of unjustifiable facts figures and nonsense.

I demand the resignation of all those responsible for this stupid plan which was bound to result in hundreds of thousands of very reasonable objections.

The Green Belt is laid down in law, it has proved its worth, you have no right to meddle with it. I don’t believe your figures or the expert opinions you quote, other experts have different opinions.

In my objections I am not going into further detail, all the details have been covered by other objectors, but my husband (separately) and I simply object to the whole mess you have made of this job (and will be held responsible for) and we support the West Horsley Paris Council’s objections without exception and in their entirety.

I am writing to OBJECT most strongly to the proposal to build 385 houses on West Horsley’s Green Belt. Nobody answers the question of who the dwellings are meant for and why West Horsley – out of all proportion to other areas in and around Guildford - has been selected as the victim to endure years of destruction of agricultural land, major equipment carving up the roads, noise and all to add to the already appalling lack of sufficient infrastructure in the village.

I am writing to object most strongly to the proposal to build a disproportionate number of new houses on a minimum of six larger plots, and a number of smaller ones, of green belt land, in East and West Horsley villages. My reasons are as follows:

1. The Green Belt and the Countryside police states that the green belt will be protected against inappropriate development, and Guildford BC has not stated the exceptional circumstances or other justification for moving the green belt boundaries as proposed.

I am writing to express my objections to the 2017 changes to the Local Plan.

The reduction in the number of new homes proposed in the Green Belt does not go far enough in reducing the still substantial number of new homes proposed on green belt land.

The eastern side of the borough is now scheduled to take an even greater proportion of new homes in the Green Belt.

It is unacceptable that Guildford is choosing not to constrain its overall housing growth, as many other Councils have done, to protect Green Belt. The objectively assessed housing target, though reduced since 2016 to 12466 homes, will by 2034 mean that Guildford will have grown by nearly 25%. This is nearly double the ONS’ prediction for the growth of Guildford.

I am writing in relation to the Guildford Borough's most recent Local Plan for the Horsley Area, which we find quite disturbing and completely unacceptable in most areas. Whilst we do not object to a modest addition of a few houses, it is quite improper and wholly without basis to withdraw the Horsley's from the Green Belt, especially as it was designed specifically to stop such plans for what seems to be convenience.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to object most strongly to this Plan to turn Wisley Airfield into a "new settlement of 2100 dwellings", for the following reasons:

1. This is Green Belt and there are no 'special circumstances' to be argued in favour of development.

   1. A development of this size, leading to urban sprawl, is totally inappropriate and not the solution to the provision of more housing, which should only be by small growth utilising brownfield sites where possible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5220  Respondent: 15349761 / John Kettle  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Green Belt

There is a government defined policy that Green Belt land can only be built on "in exceptional circumstances". Indeed the GBC Local Plan includes the statement "We will continue to protect the Green Belt". The Local Plan proposes extensive use of Green Belt land and makes no case for "exceptional circumstances". GBC is proposing new settlement boundaries for East Horsley encompassing Green Belt land so that new houses can be built in a re-defined village settlement. In addition GBC is proposing a new extended boundary described as "the identified boundary of the village". This is in an area currently protected by Green Belt. There are no "exceptional circumstances" defined for any of the re-drawing of the settlement area. East Horsley is set in a rural location and the Green Belt has preserved the whole character and openness of this village. A recent East Horsley village survey indicated that 88% of the residents wished to see this maintained. GBC has proposed two sites for development in East Horsley (Thatchers 48 houses and Ockham Road North 100 houses). Both of these would be using Green Belt land, and in addition would be at a density quite out of keeping with the density of local housing. GBC has also stated that 3 further sites, identified as LAA sites, should be considered as potential development sites. These are again on Green Belt land. I should like to make the point that identifying these LAA sites is by no means easy as GBC does not include them in the ir Local Plan proposals and therefore the general public is not aware of these extra sites unless they know where to look. In my opinion this is a devious and disgraceful way for the Council to behave.

I object to any Housing development that makes use of Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3931  Respondent: 15350081 / Tania Parslow  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
I am writing to state my objections to the current plans for development at Send.

Only today, Theresa May, as our new Prime Minister, reiterated her government’s commitment to protecting our Green Belt yet Guildford Borough Council seems to be committed to allowing vast expansion of our village to a point where it is in danger of losing its distinction and merging with Woking and Guildford. Once we lose our countryside it is lost forever and remains brownfield. With great advances in civil engineering and smart materials, surely there are more efficient ways of managing brownfield spaces in order to avoid this urban sprawl.

I shall outline my specific areas of objection:-

Firstly, I object to Send village being removed from the Green Belt as this was intended to be a permanent categorisation in order to protect our land from unscrupulous developers and those who might place financial interests over environmental concerns. We must retain Send’s village identity and prevent urban sprawl and loss of our countryside forever.

Please see my comments below regarding Guildford Borough Council’s Local Plan. I should be grateful if you would please forward these to the Planning Inspector for his consideration. I request an acknowledgement to this email.

I OBJECT to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent, as required by the National Planning Policy Framework and there are no special circumstances to justify abandoning it. Send’s Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation. Local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and there will be nothing to stop them.

I OBJECT to the Guildford Borough Proposed Submission Local Plan Strategy and Sites, June 2016, proposed strategy that in excess of 65% of the proposed residential development be built within the Green Belt. The National Planning Policy Framework (NPPF) requires the provision of exceptional circumstances to justify alteration of the Green Belt Boundary. The Council has failed to provide the necessary justification.

It is proposed by the Council that a number of villages in the Guildford area are to have protection from the Green Belt removed and this means that there would be no protection against development.

One of the reasons I live in Chilworth is because it is a village that sits within open and beautiful countryside and it would be disastrous to allow ribbon development, which is what would happen.

More housing would produce a greater amount of traffic onto our already overcrowded roads and lanes.

The Conservatives were voted in with a promise that they would protect the Green Belt. If this policy is carried out it would be a betrayal that will be remembered at the next elections.

I am writing to express my complete dissatisfaction with the proposed local plan. In many ways it is in breach of regulations and facts have been misrepresented by GBC.

My main objections are as follows: I am not able to express them in legal jargon but these are the feelings of 90% or greater of the two villages of East and West Horsley. The Surrey Hills AONB is one of the great treasures of Guildford Borough and I strongly believe that protecting this area should be given the highest priority.

The opening statement of Policy P2 that “We will continue to protect the Metropolitan Green Belt” is blatantly disregarded all the way through this local plan. GBC appears to be in breach of this policy through the housing policies it has set out in the Proposed Submission Local Plan, whereby some 65% of developments will be made on land that is currently Green Belt. It is not a Government directive to build on greenbelt land as GBC present it and would have us believe. In fact Government guidelines say that greenbelt land should only be built on in. The local plan does not make nearly enough argument for ANY of the proposed greenbelt land developments to be considered ‘exceptional circumstances’. You have a duty to protect the greenbelt.

In all, the draft plan is flawed in the extreme and GBC’s insistence on forcing developments where there is no proven need and riding roughshod over laws put in place to protect our valuable green spaces must be prevented at all costs. This plan must be rejected apart from the areas which I have identified.

Finally, if you feel the need to do a Milton Keynes style attack on some of our finest landscapes then consider further down the A3 corridor towards Guildford where the current car boot sale is held. This may give easier access onto the A3 by being on a straight stretch away from junctions and the damage to the landscape and environment is arguably more "acceptable" as it is arguably less polluting and gives a speedy access to the shops and facilities of Guildford and Burpham.

Might it be more sensible to focus more modest development areas around those which are already significantly urban, rather than eradicating the protection afforded by the Metropolitan Green Belt? I was heartened by your statement in P2 that “we will continue to protect the Metropolitan Green Belt” but this is contrary to various Policies elsewhere. Your plan as it relates to the Horsleys and local environs seems to me to be completely out of keeping and proposes one of the greatest and fastest increases in housing numbers which is way beyond what seems in keeping, threatening villages that have grown very slowly over centuries.

3. I OBJECT to Policy P2: your proposal to move (and effectively eradicate in places) the Metropolitan Green Belt in order to allow development of our precious green spaces. The green belt was instigated with a brilliant single idea in mind, which was to prevent urban sprawl and your plan demonstrates scant regard for its protection. All these spaces are
discussed as potential land for development and I am shocked that there are no balancing values offered for enjoyment of these spaces for leisure, tourism, public health and wellbeing, biodiversity or natural heritage.

To remove Ripley, Send and Clandon from the Green Belt would create an amorphous suburban sprawl out of the three villages and, as such, compromise their identities. According to the National Planning Policy Framework set out by the Government in 2012, "There is a general presumption against inappropriate development, unless very special circumstances can be demonstrated to show that the benefits of development outweigh the harm caused to the green belt." (NPPF.2012). Beyond the need for new housing (which, as a reason, does not amount to "very special circumstances"), there is little in the new plan that satisfies this stipulation. Indeed, the following concerns (largely relating to infrastructure) would appear to demonstrate the opposite to be true.

3. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly object to the Guildford Local Plan 2016 to:

1. remove "inset" the neighbouring villages of Ripley, Send, Clandon and the Horsleys out of the Green Belt which will facilitate their merger into one another and inevitably lead to the creation of an unrestricted sprawl of large built-up areas;

Comment ID: PSLPP16/4178  
**Respondent: 15357025 / Emma Willis  
Agent:**

---

I am writing to lodge my objection to the proposed new Local Plan that removes Green Belt protection from Chilworth village. The NPPF places great weight on the protection of Green Belt and states that Green Belt boundaries should only be altered in exceptional circumstances. The need for housing is not considered exceptional and I believe Chilworth village contributes greatly to the openness and character of the countryside that the Green Belt is meant to protect for future generations.

The village undeniably adds to the open character of the countryside in topography and views. It is bounded on side by the Tillingbourne river and the historic Gunpowder Mills in the Tillingborne Valley with steep part wooded slopes up to St Martha's church; which is a prominent landmark and backdrop for the village. The village itself represents a modest and narrow strip of development that is bounded on the other side by the railway.

Further infill development would encroach on the north towards the steeply rising slopes of St Martha's with the historic medieval church of St Marthas and to the South the ecological conservation area of Blackheath.

Surely, the status affords Chilworth some recognition of the historic and current value to the Green Belt. The area surrounding Chilworth is in the Area of Outstanding Natural Beauty and therefore is of national landscape importance - indeed the link with historic industry means that the Area of Great Landscape Value recognises the area of County importance. The Chilworth conservation area has large area of open space which contributes to a soft, rural feel complemented by a backdrop of semi-wooded steep hillsides. Indeed, the removal of Green Belt status threatens the character and feel of the area from overspill and infill development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Respondent: 15357057 / Keith Willis  
Agent:**

---

I object to the removal of Green Belt status from Chilworth village.
I fail to see from the Plan what the exceptional circumstances are that mean that Chilworth should have its Green Belt protection removed. It lies in the Tillingbourne valley floor with the northern boundary the river and the southern boundary the railway. Beyond these boundaries would mean allowing and encouraging development that would be wholly inappropriate for AONB, conservation area, AGLV in the Surrey Hills with specific views and topography that contribute to the local character and openness of the rural landscape. Shameful that our own Guildford Council should be the public body that plans to remove protection to allow urban sprawl to destroy the beauty of the countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent as required by the National Planning Policy Framework and there are no special circumstances for abandoning it. Local councillors and central Government gave a clear election promise to protect the Green Belt and this should be upheld.

I object to the disproportionate amount of planned development in this area and the Council's complete lack of consideration for local residents whose lives will be severely affected by the mayhem which will be caused by these large scale developments.

I feel that Send, Ripley and Send Marsh must be protected from the vast amount of development planned on Green Belt land and the health and welfare of existing residents should be considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the 2016 Draft Local Plan, I live on Winterhill Way in Burpham and am extremely concerned about the 2016 Draft Local Plan. In particular the proposed development of Gosden Hill Farm to build 2,000 homes and allocate multiple pitches for Travellers.

Green Belt

My family decided to live in Burpham because we liked the character of the village, wanted to send our children to the local schools and live in an area surrounded by beautiful Green Belt countryside. The 2016 Draft Local Plan puts all of these qualities that made the area desirable to us at risk. In particular the loss of Green Belt, once Green Belt is built upon it will be lost forever. Green Belt should only be built upon in exceptional circumstances and the Local Plan does not provide sufficient evidence to justify developing Gosden Hill Farm and as such should be considered unsound. More consideration should be given to developing brownfield areas. It is very upsetting to think that our local Green Belt areas are at risk due to an ill thought through and unnecessary development that will ruin the character of the local area forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/4227  Respondent: 15357921 / Lisa Goldsworthy  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to register my objection to removal of the green belt protection from Chilworth and Shalford and Peasmarsh This would allow the guildford area to become a sprawling suburban development and would not be good for the rural environment
This is some of the most scenic country and well farmed, productive and used land and allowing building would be foolish.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

In a way this does not directly concern me since I live in Old Woking (Woking Borough Council, of course. However the billboards displayed throughout Send become increasingly alarming. Is there any really good reason for the opposition against the proposed development? is there a shortage of land in the area - probably not? Yes it is part of a "green belt", but that can extend as far as you wish it to. Is there any good reason for this opposition except a dislike of change? As a well-intentioned member of the public I hope that the Borough Council will have very good reasons before they turn down this planning application.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are no exceptional circumstances for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to this village (Send) being 'inset' and thus removed from the Green Belt. Green Belt is supposed to be in perpetuity, and in this case it provides an essential green zone which stops Woking and Guildford becoming a single conurbation unrelieved by open spaces. The removal of Send from the Green Belt will inevitably destroy its character as a village with a healthy environment and good recreational amenities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy 2 at para 4.3.15 which will take the Send Business Park area (including the aforementioned marina site) out of the Green Belt altogether. This area of the Wey is a beautiful public amenity, the site is poorly served by a very narrow road, and this further incursion on the Green Belt will open up the possibility of further loss to an area of outstanding rural beauty. I trust my objections will receive your earnest consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/4281  Respondent: 15358753 / Adam Lewis  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. We object to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and is deemed by us as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological potential. We demand that this proposal be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village.

2. Policy P2 – Green Belt: We object to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. We note in particular the huge developments proposed for the North East quadrant of the borough which will adversely affect our amenity, but also unfairly targets our tranquil rural villages because we can provide ‘dormitory’ facilities for commuters to London. These developments directly affecting our villages are the proposals for Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send.
3. Further, on the erosion of Green Belt and we object that Policy P2 is not met where it states that Green Belt should be protected. We object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt and with little consideration being given to redevelopment of brown field sites.

As long-standing residents of East Horsley we wish to express our objections to the Guildford Local Plan as proposed. We are extremely concerned that the proposed development plans will change the character of several lovely Surrey villages for ever.

We object to the removal of the Horsleys from the Green Belt. There has been no effective demonstration of “exceptional circumstances” as required under the Government’s “Green Belt” Briefing Paper of January 2016. The proposed developments in the Horsleys do not meet the “exceptional” criteria and there is therefore no need for the Green Belt designation to be changed.

I further object to policy P2 on the grounds that it conflicts with the guidelines, strictures and aims of the National Planning Policy Framework (NPPF) for protection of the GB. The authorities have not demonstrated why the boundaries have been moved when there are NO EXCEPTIONAL CIRCUMSTANCES to warrant such. As such the historic and rural setting of villages like Ripley will be irreparably damaged and any conservation areas will lose their raison d'être.

Development in flood risk areas, Policy P4: this really is stupid, flood risks are all too real yet here the L.A. seem to be encouraging it by allowing such areas to be included within the Plan. Land at Garlick's Arch is a good example of this, it is identified by the Environmental Agency as being in a flood Zone 3; this is the highest risk of flooding each year. Yet the L.A. have categorized the area as a flood zone 2 which has a lower probability for flooding. So we appear to be held hostage by the L.A.'s attempt to redesignate the areas flood risk despite the evidence of floods each winter?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The plan proposes to use green belt land destroying for ever an asset we all enjoy and wish to pass onto future generations. We should be cautious, politics is moving very fast and what may have seemed pragmatic before 23rd June may on reflection appear unduly hasty. We need to review the situation in the light of the changed circumstances.

In conclusion THERE IS NO EXCEPTIONAL CIRCUMSTANCES TO JUSTIFY USING GREEN BELT LAND NOR FOR REMOVING LAND FROM THE PROTECTION OF BEING GREEN BELT LAND.

The need for large scale developments is now changed since we have made the decision to leave the EU. There is no benefit for Normandy only the destruction of a village this village has a long history and played its part in the last war in preserving our democracy. Normandy with with fields and wildlife should not be sacrificed for a flawed plan.

Green Belt, Policy 2 at paragraph 4.3.15
Send business Park now to be taken out of the Green Belt altogether I object to the proposal to inset Send Business Park from the Green Belt because:
1. As you will be aware this is effectively an old non-conforming user in an area of outstanding countryside which is adjacent to the beautiful Wey Navigation
2. The roads are narrow allowing restricted vehicle access along Tannery Lane in both directions
3. It is inappropriate for further expansion or development at this location and it will detract from the openness of Green Belt.

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.
I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional
circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

POLICY P2: Green Belt – East Horsley should be inset from the Green Belt

East Horsley’s rural village character has been preserved because of its Green Belt status. Currently development is allowed within the village settlement boundary within a particular planning regime. GBC attributes the need to inset East Horsley to National Planning Policy Framework (NPPF) requirements, arguing that the test for remaining ‘washed over’ is that the village should make an important contribution to the openness of the Green Belt. About 36% of East Horsley is composed of woodlands, whilst inside the settlement area there is an average housing density of just 8.1 dwellings per hectare ‘dph’) with many houses having large gardens which make a significant contribution towards bio-diversity, allowing wildlife corridors and open spaces which are vital to the character of the greenbelt.

I OBJECT to Policy P2

Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley.

I object to two specific boundary changes, which have been proposed:

a) The proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth Wood will remove over 5 hectares of agricultural fields from the Green Belt. The present boundary line is clearly defined by a deep and well-maintained drainage ditch which is
classified by the Environment Agency as a ‘main river line’ and therefore represents a highly defensible Green Belt boundary. Moving this boundary west to the edge of woodland in no way improves its defensibility. NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe this proposal can be considered as an exceptional circumstance. The only reason for this change seems to be to bring a large agricultural field within the settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for changing a Green Belt boundary. It is therefore an invalid proposal and I OBJECT to this proposed boundary change.

b) The proposal to move the East Horsley settlement boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows (the main public recreational space of East Horsley, comprising various sports facilities and playing fields) will result in taking all of Kingston Meadows out of the Green Belt. The present settlement boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore again represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I do not believe that this can be considered as an exceptional circumstance.

It is therefore an invalid proposal and I OBJECT to this boundary change.

Paragraph 4.3.16: Proposal to remove Wisley Airfield from the Green Belt

The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance.

I OBJECT to the proposal to remove Wisley Airfield from the Green Belt.

1. **POLICY P2**

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disrespectful to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.
The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt sites proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
With regard to the 2016 Draft Local Plan:

1. **I OBJECT** to Send Village being removed from the permanent green belt, as intended by the National Planning Policy. There are no special circumstances to justify removing Send from the Green Belt as originally elected by local councillors & central government. This is reneging on a clear election promise, which is unacceptable. We do not wish to be part of a conurbation and value our village status. Developers will be taking advantage to over-populate the village, very quickly.

The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

2. I OBJECT to not protecting the Green Belt

I object to the proposals to remove the villages of Send, Ripley and Glandon from the Green Belt together with the sites of Wisley Airfield and Garicks Arch. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered or the development of the Green Belt. There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. This is something that villagers from each village do not want to happen.

(Instead of developing Garicks Arch and Send Hill, there is a "brownfield" site just to the south of the Burnt Common roundabout with surplus land that could accommodate a further development)

In your recent free newspaper "About Guildford", you state that the Green Belt must be saved and to use all "brownfield" sites for development. So why doesn't the council abide by it's own statements?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to building on the Green Belt. The essential characteristic of Green Belt is its openness and permanence: moreover this Government featured in its manifesto full protection of Green Belt as a core undertaking.

I object to the changes to Green Belt boundaries. This is not justified by any very special circumstances. All Green belt sites meet the five purposes of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object that housing on the Green Belt will significantly increase traffic already at saturation point) bringing increased danger, pollution and slower journey times.

<tr>
<td></td>
<td>The local plan proposes nearly 9000 new homes to be built on Green Belt land (compared with 50 000 current homes in Guildford, so approx. equal to 18% of the existing homes in the borough) - a huge proportion. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet</td>
<td></td>
</tr>
</tbody>
</table>
housing need is NOT an exceptional circumstance in law. No exceptional circumstances have been disclosed. So the Green Belt boundaries should NOT be changed through the plan making process.

8. **BROWNFIELD AVAILABLE**

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites to cope with genuine business need, and we have enough retail capacity already, so urban brownfield/derelict land should be used for housing.

3. I object to not protecting the Green Belt (Policy P2)

I object to the proposals to remove the villages of Ripley, Send and Glandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43).

National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• I object to the building on the Green Belt at Send at Garlick's Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.

• I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford's urban brownfield areas much closer to existing transport hubs.

• I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

• I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

• I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

POLICY P2 – Green Belt

GROUNDS FOR OBJECTION We object to the insetting of 14 villages from the Green Belt, and the proposal that infilling is acceptable within a further 12 villages within the Green Belt. We are concerned that “infilling” is also proposed outside the settlement boundaries of 11 further villages. Essentially, all the villages within the Green Belt are now vulnerable to extensive further development.

Green Belt is supposed to be protected as a matter of national and local policy, but this policy seeks to justify development in a supposedly protected area, in breach of local manifesto commitments and contrary to previous responses to public consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. **SITES - POLICIES A1 TO A57**

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2). I object to not protecting the Green Belt (Policy P2).

Removing Ripley, Send and Clandon from the Green Belt is unacceptable. These are villages that have always been surrounded by agricultural land that gives them their character. Whilst increasing population requires further housing development, large scale plans such as Wisley airfield and Garlick’s Arch are inappropiate in such areas and removing these villages from the Green Belt is just an "underhand way" to allow such developments and more in the future.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

I OBJECT categorically with the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is ill thought out unproven and unnecessary.

Please find below my objections

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to any proposal to take land out of the Greenbelt as is suggested with villages such as Ripley, Send and Clandon as well as sites of Wisley Airfield (A35) and Garlick’s Arch (A43). The National Planning Policy states
clearly that it requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt and that housing need is not such an exceptional circumstance.

There are no exceptional circumstances for these villages (as mere housing need does not constitute a 'special circumstance' and the land to be taken from the Green Belt.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

As a resident of Burnt Common, Send I object to the following proposed developments:

I object Policy P2. In-setting of Send and Ripley.

I object to taking Send and Ripley out of the Green Belt, I see no exceptional circumstances for this.

Vulnerable land includes, School playing fields and land adjoining the Wey Navigation Canal, a National Trust facility.

Also, Villages to the East of the A3 maintain Greenbelt status.

I object to building on ‘Green Belt’ land, which are the lungs of London. And are meant to prevent Urban spread in the countryside and the linking of settlements. In this case Send, Ripley and on a broader scale to Woking and Guildford.

Local and Central Government gave clear commitment that the green belt would be protected. These proposed development go against this.

Objection to Guildford Proposed Submission Local Plan
I object to the removal of East and West Horsley from the Green Belt and the building of 533 new houses in the area (excluding the proposals for the Wisley airfield).

No special circumstances have been demonstrated to justify the loss of Green Belt.

Re: Responses to Guildford Borough Proposed Submission Local Plan (June 2016)

I am writing to express my serious concerns relating to the most destructive policy ever to be imposed on the population of Surrey, or as you call it the ‘Guildford Borough Plan’. In addition to my comments below which directly relate to the outlined proposals, I am disappointed and perplexed as to how the council feels to is right to make such ludicrous plans at the significant expense of areas of outstanding natural beauty in the Guildford area.

The plan is a total attack on the beautiful green areas which surround the northeast of Guildford, and it is not only unethical to propose building on Greenbelt land but destructive to a small local village community within this region. Greenbelt land is intended to protect small village settlements, such as West Clandon, from the urban sprawl of larger town and cities, and the residents of such communities live away from urban areas out of choice. As such it is totally unacceptable to be proposing to build on such large green spaces as an urban extension, when it will totally transform the number of residents living within a parish.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.
Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that “… the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.)

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

** I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, in addition to Wisley Airfield (site A35) and Garlicks Arch (site A43)

There are no exceptional circumstances (as required by the National Planning Policy) for these villages and sites being removed.

** I object to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)
This will cause more congestion to the villages of Ripley, Send and Clandon, which have poor condition narrow roads and no footpaths, which are dangerous. More houses will increase this danger and unsustainable volumes of traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Re: Objections to Regulation 19 Draft Guildford Borough Council Local Plan

I wish to object to the above for the following reasons:

- I object to the removal of Send, Ripley and Clandon from the Green Belt because these villages and surrounding countryside provides a necessary ‘buffer’ to prevent urban sprawl.
- I object to the proposed building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because there are no ‘special circumstances’ to justify this. The Green Belt should not be continually eroded and should stay permanent.

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

2. I object to all development in the Green Belt and AONB (Policy P2)

I object to the 4 strategic sites on previously undeveloped land of A43 Garlick's Arch, A25 Gosden Hill, A35 Wisley Airfield and A26 Blackwell Farm as this directly contravenes the protection of Greenbelt land and none of these sites demonstrate the exceptional circumstances required in the NPPF to even consider any encroachment on Greenbelt. I also object to all other developments listed in the local plan which are in the Greenbelt on previously undeveloped sites.

I also object to all insetting of ALL villages in this local plan. In particular I object to the insetting of Ripley and Send Marsh/Burnt Common and Send as this will inevitably lead to coalescence. These villages and communities have their own distinct identities as a result of gradual growth over many centuries. We are not urban areas but rural villages with vibrant communities. Nothing has demonstrated this more than the huge response by members of all these areas who have come together very rapidly to fight this local plan.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I write to object very strongly to the proposal to remove Send from the Green Belt and to the developments proposed at Send Hill (A44), (A42) Clockbarn Nurseries and (A43) Garlick’s Arch and also (A35) 2,000 houses at Wisley Airfield, (A25) 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm. Also A36-A39 which transform the village of Horsley.

I work in Woking and shop in Guildford where my children went to school. I have lived in this area for 16 years and it is clear that Send village, the surrounding countryside and the green belt protection provides a crucial buffer between Woking and Guildford. The green belt has provided the protection needed for many years and I cannot see any justifiable reason for removing it now when it would appear more necessary than ever. As a Fellow of the Institutions of Civil and Structural Engineers and Member of the Institute of Highways and Transportation I have attended many discussions with developers assessing sites for development and the lure of bigger profits building on greenfield sites in preference to more expensive brownfield sites makes this kind of protection absolutely essential both preserving the countryside and nature and also encouraging investment back into our cities and towns. I strongly believe that sufficient brownfield sites are available, closer to transport hubs and that would benefit from developments of this type bringing life back into the town centres.

I don’t think the Guildford Borough Council have demonstrated sufficient investigation of brownfield sites within urban areas which should be targeted first for development before the open countryside and the Green Belt.

I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill, I cannot see any justification or special circumstances for eroding the Green Belt in these locations. I don’t understand and object to the aggregated “housing need” figures quoted which appear far too high. In my view these figures are incorrect and should be challenged before considering developments on our green belt that are not wanted and potentially completely unnecessary.

These proposed developments completely destroy the green belt barrier separating Guildford from Burnt Common, Ripley and several other villages in the area!! I am astonished that such a proposal could be considered. These are huge areas of development that would completely destroy the countryside and change the nature of the surrounding villages, wildlife passing through etc. Almost completely removing this band of green belt entirely!! Green belt was brought in to protect our countryside and I object very strongly to these proposals. Please think again. I live on Potters Lane, I love the mix of village and countryside that characterise this area and these proposals would completely change the nature of the village, neighbouring countryside and opportunities for wildlife to survive. Surely we owe something to future generations to stop building over the countryside.

You have removed areas from green belt when surely green belt is specifically to protect countryside and the proposals mean send and ripley are joined and will no longer be two separate villages. you propose extending industrial areas that should never have been located there in the first place, requiring people to drive to work in these locations remote from built up areas where people live requiring jobs. It makes no sense to me.

Policy 2 para 4.3.15 send business park taken out of the green belt altogether!

- Again I object for the same reasons given elsewhere.
- Encouraging development and building over green belt in these locations is a dreadful idea
- Why encourage business parks in the middle of the countryside?

These proposals are worse to those I objected to previously, I can see no improvement only more and more building in the countryside with complete disregard for the wishes of the people that live there and the fact this land is protected as green belt – for very good reason.

- These proposals ignore previous objections, there is no improvement but rather the opposite.
- The scale of the developments has increased not reduced
Traffic problems will be worse on roads that are not suited and at a time when surely we finally realise we
should be removing the need for cars. Surely you should be developing brownfield sites and protecting the green
belt?!

Villages start to disappear as they are conjoined with development, its tragic that the nature of our green belt is
being built over in this way.

These proposals are inappropriate, they don’t suit or support the requirements of the communities that live here
and

Fail to protect this land for nature / wildlife and future generations

I OBJECT TO THE REMOVAL OF CHILWORTH FROM THE GREEN BELT.

I FIND IT DIFFICULT TO UNDERSTAND WHY THE VILLAGE OF CHILWORTH IS TO BE REMOVED FROM THE GREEN BELT, WHEN OTHER VILLAGES IN THE TILLINGBOURNE VALLEY, I.E ALBURY, SHERE, GOMSHALL AND ABINGER ARE NOT TO BE REMOVED.

IN THE ST.MARTHA PARISH OF CHILWORTH MOST OF THE LAND IS IN AN AREA OF OUTSTANDING NATURAL BEAUTY.
IS IT ALSO INTENDED TO TAKE THIS OUT OF THE GREEN BELT?

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional
circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.
Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

I object to the removal of Send and other nearby villages from the Green Belt. The inevitable result of this would be extensive development effectively removing the buffer between Guildford and Woking. Amongst the areas lost would be school playing fields and woodland: a great loss of amenity for all residents. Removal of Green Belt status also leaves the affected areas vulnerable to further undesirable development in future.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

I wish to strongly object to the councils plan to remove the greenbelt status from a number of our local villages, i.e. Chilworth & Shalford.

As a local resident living close to these villages, I am of the opinion that further developments on greenbelt protected land will have a serious negative impact on the area, which is already heavily congested with traffic during the rush hour period.

We are very fortunate to live in such a beautiful and relatively unspoilt part of the country, so let’s keep it so. These villages cannot take anymore development.

I formally object to the removal of the green belt protection from the local villages as proposed in the new local plan.

Surely before any proposed alterations to the area and any developments approved in principle, the local infrastructure must first be reviewed.

As an example from Chilworth via New Road the traffic backs up past the Tilling Bourne School on a regular basis. After turning right towards Shalford again the traffic backs up immediately all the way to the roundabout on the A381 the build-up is all the way to Guildford. The A281 before Bramley coming from Dunsfold backs up often for 2 miles.

The housing proposals for Dunsfold, Alfold and Cranleigh will add thousands of new properties and therefore cars vans etc. to the local roads these will become rat runs with people trying to get to Guildford.
Traffic is not the only concern. Doctors, Schools are already at breaking point will read reviewing and will become a major concern for many people.

As this is an area of outstanding natural beauty losing any of the green belt would cause irreparable damage. I therefore would need to see the infrastructure problems dealt with and how the finance for such works provided before any such removal of the green belt protection is implemented.

I oppose unjustified Green Belt development.

It is irresponsible to squander every last resort greenfield site in a single Plan, robbing future generations.

Brownfield opportunities are being ignored – we need homes in the centre (not 40% more shops), much more accommodation on campus for students.

As a resident of Send I object to the following:

I object Policy P2. In-setting of Send and Ripley.

I object to taking Send and Ripley out of the Green Belt, I see no exceptional circumstances for this.

Vulnerable land includes, School playing fields and land adjoining the Wey Navigation Canal, a National Trust facility.

Also, Villages to the East of the A3 maintain Greenbelt status.

I object to building on ‘Green Belt’ land, which are the lungs of London. And are meant to prevent Urban spread in the countryside and the linking of settlements. In this case Send, Ripley and on a broader scale to Woking and Guildford.

Local and Central Government gave clear commitment that the green belt would be protected. These proposed development go against this.

I strongly object to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent, as required by the national Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send's Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation. Local councillors and central government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and there will be nothing to stop them. There is plenty of brownfield land still available for developing in the Surrey area.

I wish to communicate my strong objections to the latest planning proposals that will impact Send and Ripley, which will have a very negative impact on the quality of life for my family and others living in Send and Ripley. I am horrified by the level of development that is being proposed by the very people who are meant to represent me and my family. I will detail each objection clear below..

Firstly, I object to Send and Ripley being removed from the Green Belt. The green belt’s purpose was intended to be permanent and there is absolutely no justification for abandoning it. Quality of life for those already living in the greenbelt will be destroyed and the levels and density of housing will create the all manner of pressures on local resources, including roads, doctors, schools etc. I am sure that local councillors don’t need reminding that they are elected to represent the interests of their local constituents, of which they are doing a very poor job. Clear election promises have been broken.

In specific, I object to the proposal to remove Send and other local villages from the Green Belt. Doing this will allow developers carte blanche to develop the last remaining rural areas and will eventually ensure that Woking and Guildford merge into one urban area with all the challenges that occur, i.e. roads, schooling, amenities etc. There are no exceptional circumstances that allow for these villages to be removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

There should in my view be no loss of Green Belt land. It is there for a purpose to protect the existing villages and enhance their environment and the rural nature of the area. An increasing urban sprawl is not a desirable objective and the areas effected should remain as open and permanent Green Belt land as buffers for the existing communities.

Gosden Hill is in the Green Belt. If this scheme goes ahead it is likely to generate pressure from adjoining landowners for their land to be developed over time and it represents the 'thin end of the wedge' which is likely to result in further significant losses for future development and the increasing urbanisation of the area. In my view the proposed development of this land should be resisted.

I object to the policy to remove the village of Send from the Green Belt. The Green Belt designation of the village of Send provides a key buffer zone between Woking and Guildford that should prevent them from merging in the future and I do not see the 'exceptional circumstances' referenced in 4.3.16. The Government notes that there are 5 main purposes to Green Belt land and I contend that the Green Belt designation of Send is important for maintaining the first 3 of these (listed below).

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

In particular, areas of land proposed for removal from the Green Belt include areas behind the school consisting of playing fields and woodland, which are important to the character of the local community and the quality of its schooling, as well as land around the Wey navigation near Cartbridge that should not be encroached upon. I only recently moved to the area and I was attracted by the easy access to the countryside that living in Send would afford me and I believe that this proposal will threaten that, making Send a less appealing village.

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of, Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**SITES - POLICIES A1 TO A57**

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.

Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Despite living outside the Borough of Guildford I have a greater interest in what goes into the Guildford Local Plan for the local area than many of those living on the far side of the borough.

In summary my objections are as follows...

- Object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
- No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

- Loss of Green Belt land -

Sadiq Khan, the new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won't be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on Greenfield sites in Normandy.) We must place some value on Greenbelt land as otherwise there will be none left for future generations.

As a resident of Send I am writing to object to the PROPOSED DESTRUCTION OF OUR VILLAGE!

There are so many aspects of the proposed development that I am extremely concerned about as follows:

I OBJECT to Send Village being removed from the Green Belt. I moved to this village specifically because it was in Green Belt and if this is removed from the area it will give leave to Developers to take advantage and build over our beautiful fields and ultimately joining Woking and Guildford as one massive conurbation.

I object to all erosion of the green belt and any sites for development included in the local plan will only give the developers a wedge to continue their fight to erode our green and pleasant land.

I object to the removal of any villages from the green belt as this would lead to unsuitable development and the destruction of the integrity of our villages.
I object to the removal of villages from the Green Belt.

1. **POLICY P2**

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.
I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Attached documents:
I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.
