  3. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/ A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  4. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity with dangerous parking on the verge of Effingham Common Road already a regular occurrence. It is simply not believable to assert the residents will look to go to other stations in the area given the proximity of Effingham Junction and West Horsely stations.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI ) and Site of Nature Conservation Interest (SNCI ).

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
15) Finally, I object to the continued inclusion of a site where the planning application has already been unanimously rejected by GBC’s Planning Committee on 6th April 2016 after 14 months of negotiations and apparently unlimited resources, experts and advisors (and various extensions and amendments) on the recommendation of GBC Planning Officers. Serious concerns were raised by authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency, as well as SCC and Elmbridge BC.

I ask that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, be removed from the Proposed Submission Local Plan.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Please confirm that all of these comments together with all my previous comments are passed to the Inspector.

I continue to object to the inclusion of Policy A35, Three Farms Meadows, in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site in this plan because of the constraints on the site and the physical location.
2. It is too far from railway stations.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junctions in the country (J10)
4. Local roads are at capacity particularly when the A3 is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded A3 and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000 per annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000's more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. It remains unclear when/if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
10. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
11. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will adversely impact the views from the AONB.

12. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

13. I object to para 21 which "limits" development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

14. I object to para 22 as this does not reflect the impact of the buildings on the surrounding rural area.

15. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000's of objections from local residents and statutory consultees.

16. I object to the Proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

17. I object to the Council wasting tax payers and residents' time and money not following due process and indeed ignoring previous representations.

18. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

19. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

20. I object to the transport evidence base which has been criticised for using out of date modelling software and is therefore unreliable.

21. I object to the housing number which I believe is unsound.

I consider for the reasons listed above and other reasons, that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. Wisley Airfield

Having been unanimously objected to by GBC on 6th April, it is back on the agenda. It is clear that there are insurmountable difficulties facing the development of this site and it should be removed without further consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):

- Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
- Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
- Unacceptable Conservative Party links between the developers and the Council.
- No Green Belt “exceptional circumstances” presented.
- Not a brownfield site as stated – only 15% of it.
- Proposed SCC waste site ignored.
- Loss of farming land.
- Too near RHS Wisley and Thames Basin Heath SPA.
- SANG would harm on SPA.
- Unacceptable increase in air pollution.
- No existing public transport and stations miles away.
- No proper traffic data.
- Housing density far too great.
- Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
- Access confined to inadequate narrow lanes.
- Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
- Major impact on neighbouring villages, especially Horsleys.

* No assessment made of collective impact on area of this and 6 Horsley sites.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I also object to the continued inclusion of the plan to build over 2000 houses on the site of the former Wisley Airfield (policy A35). I watched the podcast of the planning meeting concerning this development and saw it unanimously rejected by the planning committee. I was appalled to find that it is still in the Local Plan.

Apart from the fact that this is Green Belt land, the infrastructure won't cope. For example, our house is on the crossroads at Effingham Junction right near Effingham Junction Station. Effingham Junction would be the nearest station to the development and the car park is already full on weekdays. (I believe Horsley Station is also full to capacity). Every morning rush hour during term-time there is a long queue of cars past our house. The road is already overloaded without the cars from a new town being added to them – and don't suggest that people should walk or cycle to the station along Old Lane, because the road safety implications are awful to think about. I saw some suggested changes to the local road system (I would be reluctant to call them improvements) and there was nothing on the scale that would accommodate the traffic from the proposed new town. In addition, the A3 and the M25 are already often seriously congested, without the additional cars from a new town close to the A3/M25 junction.

Furthermore, I went to a meeting where the proposals for the new town were described, and it seemed to me that even the cheapest houses would be too expensive for local young people trying to reach the first rung of the housing ladder. That means to me that the proposal wouldn't even help to meet the main housing need in the area.

My husband and I already have concerns about the air quality here with so many vehicles, especially diesel ones, passing our house during the day. This would get much worse if there were a new town just up the road and I believe there would be air quality problems at the new town itself especially for the proposed new school close to the A3.

In summary then I consider that the scale of the proposed developments in this area is hugely excessive, so I object to the Proposed Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the continued inclusion of policy A35, involving building a new town on the former Wisley Airfield. In my view the local infrastructure is absolutely insufficient to support this huge increase in population. The local roads, both major and minor are already overcrowded. The A3 and M25 and where they meet at Junction 10 is all very busy. In addition, for many years there has been a solid queue of traffic past my house at Effingham Junction during the morning rush hour during term time without the addition of cars from the proposed new town.

Another problem is the air pollution resulting from these busy roads.

Also Effingham Junction would be the nearest railway station and the car park already has no free spaces on weekdays.

I watched the podcast of the rejection of the planning application and was hoping that this proposal would have been dropped!
As well, the thousands of objections from local people appear to have been ignored.

**Ref:** Objection to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings

Dear Sir

I wish to object to the inclusion of the former Wisley Airfield in the Guildford local plan because:-

1. The land is Green Belt and there are no exceptional circumstances for it to lose its Green Belt status. The removal would allow urban sprawl to reach from London to Guildford.
2. Such a huge development would threaten the historic rural settlements of Ockham, Hatchford and Downside.
3. With such a large development and the subsequent increase in cars in and out of the site, it would cause chaos on the rural roads leading to Cobham which would be the nearest shopping centre.
4. The area is already experiencing high levels of air pollution due to the M25 and A3, these extra cars will make this much worse and therefore cannot be justified. Guildford BC need to be devoting resources to reducing this air pollution not deliberately adding to it.
5. The area includes SPA, SSSI and SNCI classifications and a major development would threaten these important safeguards.
6. A previous planning application was rejected and therefore it has already been established that this is not a suitable area for development.

I live only a couple of miles from the former Wisley airfield so I know the area and recognise the damage a large development like this would inflict on the local residents of both Guildford and Elmbridge boroughs.

Please remove this from the Guildford Local Plan as it is totally inappropriate.

The scale of the Wisley airfield development, and the pressures this will put on local infrastructure and services

The scale of the proposed Wisley Airfield development is hugely out of keeping with the local area, and a development of that magnitude will have an unsustainable impact on our shared infrastructure, not least on the A3 which already experiences long tailbacks at peak times around the Ockham Park and M25 junctions (which will be those most burdened by the addition of such a large, new town on the airfield site) and on the already overcrowded South West Trains railway service from Horsley into London and Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

- The Health and Safety implications to the inhabitants of the proposed Wisley Airfield development are significant. The site is located close to one of the busiest junctions in the country, M25/A3. The Nitrous Oxide emissions recorded around this area are extremely high and will affect residents. The proposal to build new primary and secondary schools at the site is counter to government policy prohibiting the building of schools on such sites.

I object to the proposal to remove the Former Wisley Airfield (FWA/TFM) from the Metropolitan Green Belt. The only justification for this is to use it for housing which is not an exceptional circumstance. I therefore object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration the planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environmental Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1694  Respondent: 8904161 / Geoffrey & Lesley Tregaskes  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

8.1 object to the removal of the Former Wisley Airfield from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt

9.1 object to the continued inclusion of the former Wisley Airfield where the planning application has already been unanimously rejected by GBC's Planning Committee on 8th April 2016 on the recommendation of GBC Planning Officers. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency

10.1 object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

11.1 object to the detrimental impact on transport, local roads and road safety these housing proposals will bring to this area, with its narrow rural roads, few pavements, almost non-existent street lighting - country lanes used regularly by sports cyclists and horse riders. The increased traffic, let alone increase in HGV traffic, will exacerbate the existing dangers to cyclists, pedestrians (especially children) and horse riders, and to road traffic generally as the roads are not wide enough places to allow two large vehicles to pass in object to the detrimental impact on transport, local roads and road I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in ham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements The photograph at AppendixI illustrates the
inadequacy of ORN to handle any of this extra traffic accessing East Horsley station (by a 5 way uphill intersection), medical centre and shops.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. Road access to Horsley Station is by a very steep uphill five way intersection.

6. **I object** to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservat ion Interest (SNCI).

7. **I object** to the fact that air quality concerns have not been taken seriously particularly at the M25/A3 junction, is already in excess of EU-permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2937  Respondent: 8904161 / Geoffrey & Lesley Tregaskes  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of Three Farms Meadows (and at former Wisley Airfield) in the Guildford Borough Council Plan under policy A35 for the following reasons:

1. It remains unclear when/if the Ockham DVORIDME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights.

2. I remain unconvinced that a company based in an island tax haven can be held to account to provide all it says it will in the way of infrastructure unless prior to building commencing, all the infrastructure is put in place for a development of this size. It is notable that another authority in the west of England insists on infrastructure being in place before the first house or office or other building is commenced.

3. Elsewhere in the plan, land in the Tongham/Ash area newly designated as Green Belt, is protected as it provides an important open gap between Ash/Tongham and the Aldershot conurbation. If Green Belt protection is considered necessary in that area of the borough, is it not even more necessary in this area of the borough where the Parish and hamlets of Ockham, provide an important open gap between the urban areas of Elmbridge BC and the London Metropolitan area and other more densely populated areas of GBC.

I therefore STRONGLY OBJECT to Policy A35, the creation of a new settlement at the former Wisley Airfield, and require confirmation that all these comments, together with my previous ones are passed to the Inspector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3607  Respondent: 8904577 / Angela Wood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I continue to object to the inclusion of Policy A35 Three Farms Meadow (TFM) in the draft plan for numerous reasons including those written below:

1. I object to the number of houses in this plan, and particularly in relation to the Green Belt, Air quality, AONB, TBHSPA etc. I believe this is totally inappropriate and open to legal challenge.
2. I object to the fact that the Council has totally failed to take into account the 1000’s relevant objections which have been lodged over a period of time to this Local Plan.
3. It is directly adjacent to RHS Gardens one of the most popular visitor attractions in Surrey. Each year sees an greater increase in the numbers that visit Wisley. I do not believe this has in any way been properly considered.
4. Any increase in Public transport on these already congested roads will adversely affect the whole network of connecting roads, increasing the danger to road users living in these areas.
5. Its distance from railway stations, and the increase of traffic this will bring. this is in an area already struggling with increased traffic volume.
6. It is in the immediate vicinity of one of the most congested areas of the A3 and the M25. There are almost weekly incidents on this stretch of road causing blockages in the Horsleys, Ripley and the Clandons, any significant increase in the traffic would bring the whole area to a complete standstill. There are times when this already occurs.
7. This area has by design seen a vast increase of use by cyclists already causing traffic problems. Any further increase in traffic will make these lanes even more hazardous for drivers and cyclists alike.
8. I object to the change of the site boundaries on the southern side facing the Surrey Hills. This will negatively impact on the view from this designated area of Outstanding Natural Beauty.
9. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A Regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes. There is no explanation why the Council think it is appropriate to have a Regulation 19 consultation when the changes are major.
10. I object to the quantity of space allocated for retail in the town centre. This could easily be used for residential development. I particularly object to the dependance on the Carter Jonas study update 2017 which includes demand for retail space from Companies already in administration.

I consider from my objections listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6720  Respondent: 8906561 / Ian and Angela Coutts-Wood  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We are astonished and must register our objection that The Wisley Airfield site at Ockham is still in the plan as it was rejected by GBC’s Planning Committee and as far as we can see none of the issues which caused its rejection have been adequately addressed. The plan that has been re-presented for the site of 2,000 new homes is still totally impractical as, although it claims to have addressed the infrastructure issues, it obviously has NOT. In particular, the secondary school capacity in the area, and the more than doubling the commuting traffic on the local roads which are currently inadequate for the existing traffic flow.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Although we do not reside in the Borough of Guildford, my wife and I are very frequent visitors there, because our daughter, son-in-law and their three children have lived in Ockham Lane bordering on Wisley Airfield/Three Farms Meadows for ten years.

I object to the draft Local Plan for the following reasons:

1. I object because by far the greater part of the new housing is proposed within the Green Belt, when there is a large amount of brownfield land in the urban areas which needs to be regenerated.
2. I object to the disproportionate allocation of housing in this particular part of the borough: over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys.
3. I object to the threat the Local Plan poses to the historic rural village of Ockham and the multi-faceted harmful effect on properties there.
4. I object to the detrimental impact on transport, local roads and road safety - i.e., the increased volume of car and delivery traffic and the resulting congestion on major and minor roads in the area, as well as at local stations where parking is already at full
5. I object to the detrimental effect of the Local Plan on the environmental and ecological value of the site and that air quality concerns have not been taken seriously.
6. I object to the fact that the proposed plan does not meet the needs and desires of local communities as per the Ockham Parish Plan.
7. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been rejected by GBC's Planning Committee.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

7. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

8. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. I live on a main road in Ripley which is already very over used, when there is no congestion cars travel far too fast making it a danger to pedestrians and no one has yet managed to curb this problem.

9. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

10. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

11. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

12. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

13. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

14. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

15. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open
spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

16. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. The large-scale proposal for Wisley Airfield is totally unsuitable for the area, primarily because of increased pressure on already stressed infrastructure. As this is less than 2 miles from Horsley (the nearest train station) presumably there would be a significant increase in the number of commuters using this service. Already, rush hour traffic on Ockham Road is heavy, trains are overcrowded and there is little available parking space at the station so this development could make the situation unbearable. There would also be a negative impact on the environment and presumably an increase in safety issues with so many additional households accessing the A3 at one single point.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My objections are:

Site A35 Former Wisley Airfield

I object to the proposed increase and any plan to develop this site.

- The size increase to 95.9 hectares. The resulting increase in traffic volumes will compound exiting problems with the local road network none of which have the option of being further developed to cope with the additional traffic flow
- Nitrous Oxide levels are already above safe levels

Green Belt

- This is a massive encroachment of the Metropolitan Green Belt and would be inappropriate development (as defined by law) within that.
- The proposals would harm the rural landscape character of the area and the openness of the green belt having a negative impact on views from all over North Surrey including from Painshill Park Landscape Gardens.
- Contrary to Green Belt policy the proposals would create on open country a line of building that will start to merge settlements (urban sprawl).
- The protection of the green belt is this generation's responsibility.

Impact on the local area

- The additional 5,000 residents is the equivalent of adding 50% to the population of Cobham, Downside and Hatchford
- The proposed housing density is completely out of keeping with the surrounding rural area – multi-storey buildings are not appropriate in a rural environment
- The resulting impact on light pollution, traffic and infrastructure has been gravely underestimated. Suggested measures in mitigation are totally inadequate
The cumulative impact of development on the neighbouring boroughs of Elmbridge and Mole Valley has not been taken into account. The air quality surrounding the site of the proposed development gives grave cause for concern as levels of NO2 already exceed the EU limit due in part to the proximity of the M25, the A3 and Cobham services. The closure of Plough Lane between Cobham and Ockham and other local roads coupled with a massive increase in traffic will impact a large number of local road users.

**Sustainability**

- Any site that is dependent on the use of private motor car cannot be considered justifiable.
- The proposed public transport provision is unrealistic given the nature of the roads in question. The suggestion that residents will walk or cycle to a rail station on narrow, winding, unlit roads without pavements or cycle lanes is incredible.
- A suggestion of use of Cobham & Stoke D’Abernon Station by the new population would, even if plausible, add to congestion, parking difficulties and pollution.

**Nature**

- This huge proposed development would damage habitats of the protected and endangered rare species in contravention of the EU Birds Directives and Habitats Regulations.
- The siting of a proposed Suitable Alternative Natural Green Space adjacent to the Thames Basin Heath Special Protected Area and Sites of Scientific Interest will only increase visitor numbers causing further damage to that.
- The introduction of pets as well as humans is what devastates wildlife.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

The 2000 houses at Wisley Airfield, which has been refused recently, I see has been brought up again. This really would bring the traffic to a halt. It is quite often completely stopped along the A3 towards Guildford, on a Monday morning. What would it be like with even more cars trying to join the A3 from Wisley Airport. Quite apart from the other infrastructure problem.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3763  Respondent: 8910977 / Imogen Jamieson  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe, putting my family and others in danger.

It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. RHS Wisley traffic already cause frequent congestion by traffic on local roads – there is already vulnerability and this will get worse.

1. The associated traffic increase from the RHS has not been taken into account.
2. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis – again, more danger and potential fatalities.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB and destroy the far reaching countyside views for future generations. Surely there is a responsibility to maintain this?

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultees – Why bother to consult if you then ignore the overwhelming popular view?.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

It is my belief bearing in mind the reasons listed above from a not exhaustive list that this plan is unsound and not fit for purpose.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I remain opposed to any re-designation of local Greenbelt land in order to build homes. The local infrastructure cannot cope with the current population as it is. For example, the M25 and A3 main routes are already some of the busiest stretches of road in the South-East, often congested, or impassable due to accidents. Protection of the Greenbelt was an election promise of the Conservative Party which I believe you should adhere to in the interests of all local residents.

I believe the proposals to put 2000 homes at the Wisley airfield represents significant over-development. For the proposed school to be built 8 years into the development will only increase the pressure on local roads, which already have poor drainage and surface conditions. Ockham Road North and Ockham Road South are prime examples of this.

I believe the Council should be challenging the arbitrary Government targets on housing and scaling back the plans considerably.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs. I object to the detrimental impact on transport, local roads and road safety.
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.
- After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Comment ID: PSLPS16/3769  Respondent: 8914273 / Sabina Paton  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to object to the inclusion of this site yet again in the latest draft of the Local Plan as a strategic site for development.
I find it almost farcical that, having rejected the last planning application for this site decisively a few weeks ago on clear and logical grounds, the site appears yet again in the draft Local Plan with much the same proposal for development attached to it.
What has changed in that few weeks or is it that the Borough Council is in desperate need of housing numbers to put in the box marked new houses required by the Government and this satisfies some of that requirement? There is scant regard for any of the requirements for building in the Green Belt, for the effects on local roads and transport infrastructure, for the local environment, for the increased risk of flooding, schooling or health support - the very reasons on which the last application was rejected.
The arguments against building in the Green belt remain the same. Removal of the site from the Green Belt can only be made on exceptional circumstances and the Local Plan provides no clues as to what these may be. Unfulfilled housing need is not an exceptional circumstance for these purposes.
I also object to the inclusion of this site on the grounds of poor sustainability. It has no transport links or other services, no schooling, shopping or medical services all of which will have to be provided from the existing already overburdened services elsewhere or provided from new. The number of houses proposed will inevitably generate a massive increase in vehicle use of narrow roads and add to the existing problems at the A3/M25 junction 10. At two cars per dwelling average, there will be an increase of some 4000 extra vehicles on local roads. The further addition of passengers on the trains at East Horsley and Effingham stations will be difficult to manage as there is almost no excess parking available at either station now. The same difficulty will arise in relation to parking at the shops in East Horsley.
As the area immediately surrounding the site is prone to flooding, any development will require very extensive improvements to surface and waste water infrastructure to cope with the increased surface water run off and increased need for sewerage. The existing infrastructure will simply not cope with such an increase in population.

The proposal is out of keeping with the established pattern of development in the area. Ockham village currently numbers 159 dwellings and its present setting will effectively disappear. The proposed development would be the largest in Guildford Borough other than Guildford itself. Density would be about 49 dwellings per hectare. East Horsley is presently the largest settlement outside Guildford town, having 1760 homes at a density of 8.1 dwellings per hectare. The disparity is stark and it is clear that the proposed development is wholly out of local context and even appears to breach Guildford Borough Council's own proposed Housing Policy (H1).

I object to the allocation of housing in this part of the Borough. 23% of the Local Plan's new housing is proposed in the localities of Ockham, Ripley, Send and the Horsleys and of this 65% is allocated to the former Wisley Airfield. This is disproportionate in relation to the Borough as a whole.

I object to the policy A35 and the proposed development at the former Wisley Airfield and ask that it be removed from the Local Plan.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As before I object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

I believe it is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location. It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

It is adjacent to the most popular visitor attraction in the south-east.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”. Opportunity (3) should be common to all sites and is not unique to this site

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

I object to the removal of additional 3.1 ha from the green belt without any justification.

Development should be excluded in flood zone 2 and 3 not limited

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes. The council has not explained why they think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the extension of the plan period by 1 year as it has not been identified as a major change

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible place for 2100 houses, when the the planning committee have unanimously refused planning permission.

I object to the inclusion of the site known as Wisley Airfield in the local plan as it goes against the localism the government are trying to foster. The local people don’t want it. The statistics that form the basis of the inclusion are flawed, but not changed.

I object to the awful impact a development on Wisley will have on transport, local roads and road safety.

I object to more cars, 4000 is the estimate, flooding into the narrow lanes that cyclists are being encouraged to use. The danger is obvious to all except the Council.

I object to the proposition that the development will result in a meaningful shift to cycling and walking, of course it won’t as there are no transport links the new residents will use their cars.

I object to the developers saying that a bus service would be laid on to take the residents to the local stations. We all know it will not be a permanent service and will wither on the vine as time passes and residents use their cars. Again it is obvious - except apparently to the council.

I object to any further increase in cars in view of the expansion of Wisley Gardens. The Ripley roundabout is dreadfully congested when they have an event drawing in a further 5000 cars or so. The queue goes back to the M25/A3 junction even causing dangerous queue on the Motorway itself.

I object to the detrimental effect the development would have on the character of the area. The houses that are proposed are completely out of keeping with the whole area.

I object to the fact that even though the local people don’t want it, even though the planning committee have unanimously rejected it, the Council are still determined to have it included in the Local Plan.
I object to the incredible bad effect the development will have on the environment and the local special sites.

I object to the Council trying to force people to live in an atmosphere poisoned by fumes from the M25/A3.

I object to the fact that Guildford Borough Council are completely ignoring the Ockham Parish Local Plan,

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/7362  Respondent: 8915905 / Rhiannon Stroud  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A35 (Wisley Airfield)

On April 6th 2016, Guildford Borough Council voted unanimously to reject planning permission for 2100 houses to be built on a site at Three Farm Meadows in Ockham, by the former Wisley airfield. This site should never have been included in the Draft Local Plan especially in the light of section 150 of the Housing and Planning Act 2016 which states that sites identified in a local plan are assumed to have permission to go ahead in principle. It is completely illogical to include the development of a site which has already been rejected by the council. The fact that this is even included in the Draft Local Plan demonstrates that this plan was not ready for consultation – once again, the Draft Local Plan doesn’t make sense.

I object to the development of a new town at the former Wisley Airfield site as the land is within the Green Belt and the provision of 2100 new houses, equating to around 5355 people, would place enormous strain on the Horsleys and all the surrounding villages.

The Former Wisley Airfield site is valuable farmland which is being worked. The fact that a temporary airstrip was built on the promise that it would be removed when it was no longer required would seem to me to be an unreasonable basis for now considering it for development. This site is very important in ‘checking the unrestricted sprawl of large built up areas’ and preventing continuous corridor of urbanisation along the A3 corridor. Developing this land is inappropriate development in the Green Belt as defined by the NPPF paras 88 and 89 and sets an unacceptable precedent when we should be protecting the Green Belt for future generations.

The A3/ M25 junction is extremely busy most of the day with very high levels of pollution. The increased traffic and potential development of the Ockham/ Wisley Junction would make these roads more complicated, prone to delay and have a significant impact on pollution. We shouldn’t be building residential properties in an area which already has unacceptable levels of air pollution.

Since this area of land falls within 400m – 5km of the Thames Basin Heath Special Protection Area (SPA) it would seem to me to be an inappropriate area to be developing. I can’t believe that incorporating a Suitable Alternative Natural Green Space within this development will deliver enough respite for the Effingham Common. With this size of development alongside the proposed increase in housing in East and West Horsley and Effingham, there would inevitably be quite a dramatic impact on these Special Protection Areas. The increased use of the common land by dog walkers in particular could not be avoided.
If this development were to go ahead it would have a devastating effect on the surrounding villages. The proposed housing density of this site is completely out of keeping with the surrounding rural area. There would be a huge increase in the number of cars on the surrounding country roads and alongside the suggested road closures there would be a serious increase in traffic congestion and danger to pedestrians. There also needs to be a lot more investigation into the effect that such a development would have on water levels and the increased risk of flooding in the area.

Development on this scale needs to be sustainable and yet this new site won’t provide any additional employment. Access to the two nearest train stations would need to be by car as the roads are unlit and many don’t have pavements. The available parking at these two stations is already at capacity.

This site is not listed for development under the existing 2003 Local Plan. The amount of housing that is actually needed in the borough is yet to be established and there are no special circumstances that would allow this development of Green Belt land so I hope that Guildford Borough Council will remove this site from their Draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
8. failed to secure an appropriate provision of affordable housing;
9. was detrimental to the viability and vitality of the existing district and local centres in the vicinity of the site;
10. would result in loss of the safeguarded waste site;
11. presented a dense and urban form of development owing to its quantum and scale;
12. had an adverse impact on the setting and significance of a designated heritage asset;
13. had an unacceptable air quality impact;
14. impacted on education infrastructure;
15. impacted on policing infrastructure;
16. impacted on health infrastructure;
17. impacted on library provision.

1. Both similar and other objections and concerns had been raised by OPC, neighbouring borough and parish councils, Surrey, Thames Water, NATS, the Environment Agency, Police Authorities, Highways Authorities, residents’ associations, in context of the planning application and in relation to the current and earlier GBC draft Local Plans.
2. The value of the Green Belt and most importantly the value of FWA/TFM as a critical core at the heart of the Green Belt. To remove the site from the Green Belt or its development. To the contrary there are overwhelming reasons for retaining the site as Green Belt for the benefit not only of Ockham and surrounding villages but also the wider community.
1. The value of FWA/TFM from an environmental and ecological standpoint, not least in relation to the Thames Basin Heath SPA.
1. The value of FWA/TFM as a community asset and as a vital “lung”, not least because of the dangers and possible illegality of increasing pollution and decreasing air quality as well as acid deposition on the SPA impacting human health and animal, plant and soil viability in the site and immediately surrounding area.
1. The critical location and current nature of FWA/TFM in relation to the historic and current viability of the Ockham hamlets and surrounding villages.
1. The total unacceptability and disproportionality of the threat posed to Ockham, an historic rural village with around 160 existing dwellings, and with narrow lanes, no street lights, few pavements, Conservation Areas and many listed properties – which would be completely subsumed by a 2000+ dwelling development, with urban style buildings up to 5 storeys high and a population density higher than most London boroughs. Ockham’s existing population of just over 400 would be increased over 15 times.
1. A Local Plan and potential development which do not meet, and indeed which are completely contrary to, the needs and desires of Ockham and the emerging Lovelace Neighbourhood Plan.
1. The detrimental and unsustainable impact of development at FWA/TFM on transport, the A3 and M25, local roads and roads (plus increased bus and HGV movements during construction and afterwards), on rail stations and car parking which are already at capacity.
1. The value of FWA/TFM for agriculture, comprising as it does over 75% of agricultural land including 63ha of Grade 2, 3a and 3b agricultural land (of which at least 19.3ha is classified as best and most versatile land – Grade 2 and Grade 3a).
1. The fallacious nature of claims made that FWA/TFM should be regarded as “brownfield” or previously developed. It should also be noted that the former airfield hardstanding and part of the old runway are within the 0-400m exclusion zone of the SPA, and the remainder of the old runway is (of course) flat where any development exists that the adverse consequences of development of the site, including damage to the ecology of, e.g., the SPA, cannot be mitigated.
1. The impossibility in practical terms of creating a sustainable development on FWA/TFM which is further demonstrated by the inability of the current landowner/developer and its many experts and advisers to come up with a sustainable development plan.
1. The cumulative adverse consequences of other actual or potential developments in the area particularly in Ripley, Send and the RHS at Wisley.

CONCLUSION

The above objections graphically demonstrate why FWA/TFM was and should remain in and be part of the Green Belt, and why the location, limited size, lack of infrastructure, relative isolation, distance from places of employment, and existing overstretched and inadequate public transport, roads, services and facilities make the site totally unsuitable for any kind of significant development – as OPC and others have consistently argued.
The fact that the Local Plan still includes FWA/TFM (as well as neighbouring land not owned by WPIL) as a potential site for development amounts to disregard for widespread local and further afield opinion.

The repeated attempts in numerous guises over the last 3 years to take FWA/TFM out of the Green Belt and to press for both major and ancillary development of the site have, as OPC has previously pointed out, stretched the patience and goodwill of local communities, not least Ockham Parish, have imposed heavy and unwarranted costs and other burdens on those local communities, have caused a blight on the area, distress to local residents and farming businesses, and have adversely prejudiced peoples’ lives and livelihoods.

OPC therefore strongly OBJECTS to this further and unwarranted attempt to exclude FWA/TFM and other parts of Ockham Parish from the Green Belt.

Guildford Borough Council’s Proposed Submission Local Plan (published 6 June 2016)

I refer to Ockham Parish Council’s letter of objection dated 12 June 2016.

It has now come to the attention of Ockham Parish Council (OPC) that paragraph 11 of that letter significantly understates the area of the best and most versatile agricultural land at the former Wisley airfield (FWA) otherwise known as Three Farms Meadows (TFM).

Paragraph 11 should therefore read:

“The value of FWA/TFM for agriculture, comprising as it does over 75% of agricultural land including 63ha of Grade 2, 3a and 3b agricultural land (of which 45.4ha * is classified as best and most versatile land – Grade 2 and Grade 3a).”

*rather than only 19.3ha as previously stated.

I apologise for the error in OPC’s earlier letter.
For the avoidance of doubt, I should also point out that the description and maps of “the Former Wisley Airfield” contained in the volume “Guildford borough Proposed Submission Local Plan: strategy and sites” include an area of land to the east of Hatch Lane and bordering Ockham Lane (“additional land”) which is not and never has been part of the former Wisley airfield and which is not in the ownership of Wisley Property Investments Ltd. OPC’s objection to the inclusion in the Local Plan of FWA/TFM also applies to this additional land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

8. The continued inclusion in the Local Plan of the former Wisley airfield (which is located in Ockham and which is known locally as Three Farms Meadows) is perverse and illogical, and is unsound for reasons of sustainability, deliverability and need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3509  Respondent: 8916001 / Ockham Parish Council (Peter Bevan)  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Specifically in relation to the former Wisley airfield/Three Farms Meadows (FWA/TFM), I OBJECT to the inclusion of that site in the Local Plan on the grounds that:

1. FWA/TFM was included in the draft 2013 GBC Local Plan and was widely objected to. That draft Plan was eventually withdrawn after many months of consultation and deliberation.

1. The Wisley Property Investments Ltd (WPIL) planning application of January 2015 (Reference: 15/P/00012), as subsequently amended, for a phased development of a new settlement of over 2000 dwellings at FWA/TFM was after 14 months decisively and unanimously rejected by GBC on 8 April 2016 following the recommendation of the GBC Planning Officers.

The reasons for the refusal of the application were many but included that the proposed development:

1. was an inappropriate development within the Green Belt;
2. would have a clear and substantial detrimental impact on the openness of the Green Belt and conflict with the purposes of including land within the Green Belt;
3. failed to demonstrate that the benefits amounted to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified;
4. failed to comply with the objectives of policy RE2 of the Guildford Borough Local Plan 2003 (as saved by CLG Direction dated 24/09/2007) and chapter 9 of the National Planning Policy Framework;
5. was within the 0 -400m and the 400m to 5km zones of the Thames Basin Heaths Special Protection Area, etc.
6. would have a severe adverse impact on the safe and efficient operation of the strategic road network, and a severe impact on the efficient operation of the local road network;
7. failed to deliver the required transport sustainability measures;
8. failed to secure an appropriate provision of affordable housing;
9. was detrimental to the viability and vitality of the existing district and local centres in the vicinity of the site;
10. would result in loss of the safeguarded waste site;
11. presented a dense and urban form of development owing to its quantum and scale;
12. had an adverse impact on the setting and significance of a designated heritage asset;
13. had an unacceptable air quality impact;
14. impacted on education infrastructure;
15. impacted on policing infrastructure;
16. impacted on health infrastructure;
17. impacted on library provision.

1. The value of the Green Belt and most importantly the value of FWA/TFM as a critical core at the heart of the Green Belt. There are no exceptional or very special circumstances justifying removal of the site from the Green Belt or its development.
2. The value of FWA/TFM from an environmental and ecological standpoint, not least in relation to the Thames Basin Heath Special Protection Area, a SNCI and a SSI.
3. The value of FWA/TFM as a community asset and as a vital “lung”, not least because of the dangers and possible illegality of increasing pollution and decreasing air quality as well as acid deposition on the SPA impacting human health and animal, plant and soil viability in the site and immediately surrounding area.
4. The critical location and current nature of FWA/TFM in relation to the historic and current viability of the Ockham hamlets and surrounding villages.
5. The total unacceptability and disproportionality of the threat posed to Ockham, an historic rural village with around 160 existing dwellings, and with narrow lanes, no street lights, few pavements, Conservation Areas and many listed properties – which would be completely subsumed by a 2000+ dwelling development, with urban style buildings up to 5 storeys high and a population density higher than most London boroughs. Ockham’s existing population of just over 400 would be increased over 15 times.
6. A Local Plan and potential development which do not meet, and indeed which are completely contrary to, the needs and desires of Ockham’s population, as evidenced in the existing Ockham Parish Plan and the emerging Lovelace Neighbourhood Plan.
7. The detrimental and unsustainable impact of development at FWA/TFM on transport, the A3 and M25, local roads and road safety, with increased vehicle movements (an estimated 4000 additional cars plus increased bus and HGV movements during construction and afterwards), on rail stations and car parking which are already at capacity, and on local services and infrastructure.
8. The value of FWA/TFM for agriculture, comprising as it does over 75% of agricultural land including 63ha of Grade 2, 3a and 3b agricultural land (of which 45.4ha is classified as best and most versatile land – Grade 2 and Grade 3a).
9. The fallacious nature of claims made that FWA/TFM should be regarded as “brownfield” or previously developed. It should also be noted that the former airfield hardstanding and part of the old runway are within the 0-400m exclusion zone of the SPA.
10. Much evidence exists that the adverse consequences of development of the site, including damage to the ecology of, e.g., the SPA, cannot be mitigated.
11. The impossibility in practical terms of creating a sustainable development on FWA/TFM which is further demonstrated by the historical use of and lack of development on the site, and most recently by the inability of
the current landowner/developer and its many experts and advisers to come up with a sustainable development plan despite numerous attempts over an extended period.

1. The cumulative adverse consequences of other actual or potential developments in the area particularly in Ripley, Send and the Horsleys, and the impact on the future development plans of the RHS at Wisley.

The above objections graphically demonstrate why FWA/TFM was and should remain in and be part of the Green Belt, and why the location, limited size, lack of infrastructure, relative isolation, distance from places of employment, and existing overstretched and inadequate public transport, roads, services and facilities make the site totally unsuitable for any kind of significant development.

The fact that the Local Plan still includes FWA/TFM (as well as neighbouring land not owned by WPIL) as a potential site for development flies in the face of logic and GBC’s own arguments and decisions, and amounts to disregard for widespread local and further afield opinion.

I therefore strongly OBJECT to this further and unwarranted attempt to exclude FWA/TFM and other parts of Ockham Parish from the Green Belt and thereby to encourage development thereon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In general, if there are insufficient homes planned in this 2016 process within the town & village boundaries, then development must go on the brownfield site at Wisley Airport rather than on the key greenbelt habitats described above.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

8  I object to the proposal within the Draft Local Plan for the development of Wisley Airfield. Such a new town within the Green Belt is totally unacceptable. It will swamp the local villages, communities and facilities. It is hard to credit GBC is putting itself behind such a proposal.

9  All points made in my previous letter of Sept 2014 commenting on the 2014 Draft Local Plan are also applicable to this 2016 new Draft Local Plan.
I am writing to STRONGLY OBJECT to the continued inclusion of the former Wisley airfield now known as the Three Meadows as a strategic site in the local plan.

I object to the total disproportionate number of housing in this part of the borough it is a massive encroachment on the green belt. It is ridiculous for over 2000 houses to be built in a village that's train station is already at maximum capacity, as are the schools and doctors. The infrastructure required for such a massive influx of people would need an entirely new village. The country roads would prove extremely dangerous to have over 2000 cars on top of the already narrow and busy roads.

I object as it would totally ruin the beautiful and historic village of Ockham that has been lived in for generations of families.

To conclude I once again fully and wholeheartedly object to the inclusion of the former Wisley airfield now known as the Three Meadows as a strategic site in the local plan.

Take it out. Save this beautiful village for future generations in this already rapidly decreasing green land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This huge development proposed on good agricultural land would cause significant harm to Ockham Common which is now an international recognized Nature Reserve a 'Special Protection Area' and a 'Site of Special Scientific interest. Damage would occur to the habitats of a number of protected and endangered species. Ockham has been a settlement for over a 1000 years, is recorded in the Domesday Book and has many historic houses, in particular those special flint and brick 'Lovelace' houses/cottages and it is outrageous to imagine this development ruining the village of Ockham. It must never happen, we have a duty to preserve our villages. 

No real account has been taken of how this development would effect the neighbouring villages....the density of the development is far in excess of the surrounding neighbourhoods , the five story buildings are not appropriate in rural surroundings and the re routing of the roads through the villages for this development would be a total disaster and would not work at all...Far too many cars from 2100 homes including those existing cars would be speeding down our lanes which are narrow and have no footpaths or verges - these are dangerous enough now especially in commuter times especially to cyclists ,people riding horses, tractors and pedestrians. In many places the lanes are only one car width so they are totally unsuitable for any more traffic going to stations, schools, surrounding towns to shop etc.the traffic would disperse through all the country lanes and they would become incredibly dangerous. The railway stations of Effingham Junction and East Horsley are both at maximum capacity already. We use East Horsley station and it is very difficult to park there and even to drive in and drop off at busy times you have to queue up the entrance road ...it is absolutely ridiculous to think of residents from 2000 new houses trying to use these stations as well. Doctors surgeries/ Hospitals and schools in the area are already at maximum capacity... this proposed development would also have a negative effect on the Water Table and flooding would be a huge problem and an enormous amount of additional sewerage would be produced when again this is at maximum capacity in the area.

We live in a listed house the oldest part dating back to Elizabethan times and we feel a responsibility for it for future generations so that it continues to be situated in a rural environment...

I Completely Support the Objections to the building of this new town on the former Wisley Airfield and objections to the inclusion of it in the Local Plan put forward by the Ockham Parish Council, Ockham and Hatchford Residents Association and the Wisley Action Group.

.. Please consider these objections fully and take the Former Wisley Airfield ( Three Farms Meadow) Allocation A35 out of the Local Plan

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to the housing number of 683 houses per year from West Surrey Strategic Market Housing Assessment (SHMA) as far too high...

I object to the totally disproportionate allocation of housing in this particular part of the Borough. - over 23 per cent of the Plans new housing is in area of Ockham, Ripley, Send and the Horsleys... This are at present has only 0.3 per cent of the population of Guildford Borough This would be the greatest example of disruption to the Green Belt in the whole country if this development goes ahead.

This is a massive encroachment on the Green Belt and I again repeat all the reasons why I continually have objected to these proposals as I live with my family in this area in an old house in the historic village of Ockham which your proposals would destroy.

This huge development proposed on good agricultural land would cause significant harm to Ockham Common which is now an international recognized Nature Reserve a ' Special Protection Area' and a ' Site of Special Scientific interest. Damage would occur to the habitats of a number of protected and endangered species. Ockham has been a settlement for over a 1000 years, is recorded in the Domesday Book and has many historic houses, in particular those special flint and brick 'Lovelace' houses/cottages and it is outrageous to imagine this development ruining the village of Ockham. What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object very strongly as I have done before to the inclusion of Three Farm Meadows in the Draft Local Plan for so many reasons ....

-it is Green Belt land and I object to the change in the Green Belt boundary to the eastern end of the site

- it is a totally unsuitable site for development because of the constraints on the site and the physical location..

- the site is so very close to the most congested road network( A3 and M25) and most congested M25 junction of all (junction 10)

- it is also adjacent to RHS Wisley where visitor numbers will increase by 500,000 per annum. So this means more traffic.

- the roads around the three Farm Meadows are also totally unsuitable for any more traffic... They are unlit narrow and without pavements .. There would not be sufficient employment on his site for people to work so people would have to travel by car / walk/ cycle along these unsuitable lanes.

- the stations and schools are at their full capacity .... No room for more cars in railway car parks and the site is further from stations than any other strategic site .

- any bus services will have to face the crowded SRN and his would result in unreliable services and delays

These are just some of the many reasons why this site should not be included in the Local Plan

I have objected many times and yet the Council has failed to remove this Three Farm Meadows Site from the Local Plan even though the council have received thousands of objections from local residents and statutory consultees.

Please listen to us local residents .... It would absolutely ruin the historic village of Ockham ..... 

And please remove this site from the Local Plan .

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7447   Respondent: 8917377 / Nick and Fiona Hardman    Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The proposed major development at Ockham (former Wisley Airfield) would have a significant impact on the Horsleys. Whilst there are many arguments against the appropriateness of developing the Wisley Airfield site, our main concern is around the ability of the current transport networks to cope with the increased demand. Their is no rail connection to this site so it is highly likely that commuters would access Horsley and Effingham Junction stations to travel to London by rail. The car parking at these sites is already limited, and the nature of the roads connecting Horsley and Ockham is such that cycling would not be a safe or attractive option for many. The A3 and M25 (at the A3 intersection) would be put under increased strain. Already there are traffic problems on this section of the A3 and the M25 at peak times. Increasing the demand by placing another 2000 homes in close proximity (not to mention those homes proposed for Burnt Common and Gosden Hill Farm, Burpham which will also likely put additional stress on the A3) will make this section of the A3 more congested and less safe.
In addition, the outline planning application for the proposed Wisley Airfield development has recently been refused on the grounds that:

1. a) The proposed development represents inappropriate development of Green Belt Land
2. b) The impact on the Thames Basin Heaths Special Protection Area is a significant concern
3. c) There are concerns about a severe adverse impact on the safe and efficient operation of the strategic road network (A3/M25) and the local road network
4. d) The application fails to deliver transport sustainability measures required
5. e) The applicants have not demonstrated that the proposal would not be detrimental to the viability and vitality of existing district and local centres
6. f) The proposal includes a requirement to build developments up to five storeys in height, which would be in keeping with a dense, urban form of development, and is totally out of keeping with the surrounding area
7. g) There are concerns about the impact on air quality during the construction phase, and how this might be mitigated.
8. h) The impact on policing, education, health and other local services has not been mitigated

Given that nothing has materially changed since this application was refused, that the Green Belt boundaries remain intact and GBC has presented no evidence to justify re-drawing the boundaries, it is non-sensical that this proposal is also included in the local plan.

It is extremely frustrating that these points were raised by many during the consultation process for the local plan in 2014, and yet the current local plan contains the same major flaws. It would seem that GBC is taking no notice of the concerns of residents, and has not made any attempt to explain why it feels that re-drawing Green Belt boundaries is justified, nor to review the clearly incorrect estimates of housing need. We are therefore voicing our strong objection to the Local Plan, which is not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We would like to object to the continued inclusion of this site for possible future residential development.

The prospect of large scale development on this site which is included in the Green Belt and its traffic effect on narrow country lanes, the beautiful village of Ockham, the pressure on school and medical facilities does not bear thinking about. Much smaller scale developments in existing communities is surely the way forward.

Your plan appears to be catering for twice the increase in population that is predicted.

I object to Allocation A35.

The council has not long agreed with the vast amount of residents who objected to the latest planning application on the Former Wisley Airfield, for numerous reasons, none of these have changed, WHY IS THIS SITE STILL IN THE LOCAL PLAN???

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the district. In the plan, 23% of the houses proposed are in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London.
- I object to the detrimental impact on transport, local roads, and roads. I specifically object to:
  1. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  2. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  3. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  4. The increase in the already severe congestion on the Strategic Road Network of the A3 and A25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

- I object to the lack of public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted level. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee.
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT TO POLICY P4 (FLOOD RISK AND WATER PROTECTION):

Flooding across the country last winter clearly demonstrated the danger of overdevelopment and pressure on local drainage systems. I have concerns that building this number of homes, with much high density development, will lead to flood risk in the local area.

The proposed development in the Horsleys and the Three Farms Meadows (the former Wisley Airfield) is unsustainable and will lead to environmental issues both at a local level and in adjoining areas downstream. **Site A39** (land near Horsley railway station, Ockham Road North) has clear flooding issues and nearby drains are unable to manage current levels of runoff – Ockham Road South suffers from flooding through the winter (and autumn and spring!) and the infrastructure is unable to deal with the problem – making it a liability for all – particularly pedestrians and cyclists.

The huge scale of proposed development at Three Farms Meadow will have a huge impact on Ockham, the Horsleys and other surrounding communities. The scale of development will change the nature of these villages irrevocably, creating in effect a new town in a protected green belt area and overwhelming the local amenities, infrastructure and character. The draft Plan has failed to provide substantive evidence of a specific and defined need for large scale high density social housing in the local area.

In conclusion, I strongly object to its proposals as referred to above and believe that the proposed development would seriously detract from the very special character and nature of the green belt, and in particular, the East Horsley Conservation Area.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

Finally, I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD) this proposal should be rejected for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties. There are no “exceptional circumstances” which can justify building on the Green Belt and destroying this area of natural beauty. The Council have sought to misrepresent the site as brownfield – but only 15% of it is developed. The development is unsustainable for all of the reasons outlined above (traffic limitations including on the A3, public transport, high housing density, no proper traffic data. Ockham is a beautiful, very rural village and the proposed development will utterly destroy the village which will be subsumed in a “new town” urban sprawl. The impact of this development on all neighbouring communities cannot be underestimated. The Council have failed to demonstrate any collective impact assessment on the area of this and the proposed Horsley sites.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Comment ID: PSLPS16/2884  Respondent: 8918913 / Sarah Khadka-Lowe  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings
I personally object to the draft Local Plan for the following key reasons:

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. We already are unable to get a seat at Effingham on some busy commuter trains.

The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

I object to a plan which proposes that over 70% of new housing be built within the Green Belt.

There is plenty of brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCF).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the increased volume of car traffic that the proposed FWA/TFM development would cause. The proposal of 2,000+ homes would result in an estimated 4,000 additional cars on the roads, most of which would be out and about during the peak period where people are going to and from work and to and from schools. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas would make usage of these roads intolerable and dangerous.

I object to the impact that the proposed FWA/TFM development would have on the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25.

I object to the assumption that there will be suitable public transport to accommodate the proposed FWA/TFM development. The local rail stations of Effingham and Horsley cannot cope with the current numbers of people who regularly use them let alone the increase in passenger traffic and car parking requirements this proposed development will bring. Public transport is already at full capacity.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site and the impact that the proposed FWA/TFM development will have. The site is formally recognized as being part of the Thames Basin Heaths Special Protection Area (SPA) and is designated as a Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI). Such designations are not to be taken lightly – they are there to protect the fragile and rare ecosystems that exist. The direct proximity of a substantial development of 2000+ houses and all that entails is not compatible with achieving the objectives of the ecological protection directives.

I object to the fact that the impact that the proposed FWA/TFM development will have on air quality have not been taken seriously. Air pollution in many parts of the borough, and particularly at the M25/A3 junction, is already in excess of EU-permitted levels. Additional traffic will obviously exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the additional acid deposition on the Thames Basin Heaths SPA and the irreversible impact that this will have in terms of permanent habitat degradation.

I object to the fact that the proposed FWA/TFM development does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are access to the countryside and clean air and the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of the FWA/TFM as a potential development site in the Local Plan. A formal planning application has already been unanimously rejected by GBC’s Planning Committee. The continued inclusion of FWA/TFM in the Local Plan is therefore irrational and totally at odds with the wishes of GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency, none of which have seemed to be taken into consideration.

The weight of serious, authoritative evidence against the inclusion of the Former Wisley Airfield (Three Farms Meadows) in the Local Plan is overwhelming. I am dumbfounded at its’ continued inclusion in the Local Plan and the intransigence of GBC in not removing it before the revised Local Plan was re-issued. Given this past track record, future decisions made by GBC will undoubtedly come under serious scrutiny. I trust therefore that GBC will take stock, some logical common sense will prevail, all these objections will be fully and diligently considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I continue to object to the inclusion of policy A35, Three Farms Meadows (formerly, the Former Wisley Airfield), in the proposed Submission Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the draft Plan because of the constraints applicable to this area of Green Belt and nature conservation protected land, and its physical location. I object to its continued inclusion in the Plan.

2. This is Green Belt, high quality, farmland, a nature conservation area in and of itself, and immediately adjacent to an SSSI and SPA. Conservation area Ockham Village, including many listed buildings, borders this area of land.

3. It is surrounded by narrow, winding, weight-restricted, country lanes unsuited to any increase in traffic – let alone the approximately 5000 cars likely to result from a housing development of 2100 houses, or the heavy construction vehicles likely to be needed – over many years – for its construction.

4. It has no infrastructure at all - it is Green Belt, high quality, farmland, and therefore has no gas, water, electricity or sewage connections, and no buildings at all. It is also prone to flooding in parts, making drainage from 2100 houses on concreted over land a particular challenge but one which appears not to have been properly considered.

5. It is remote from railway stations and there is currently no public transport that serves the area, and nor is the area suitable for public transport. These are narrow, winding, weight-restricted country lanes.

6. Local schools, surgeries and railway stations/trains are already full, and there are no obvious local employment opportunities for 2,100 households (assuming 2 adults per dwelling, that equates to 4,200 jobs).

7. It is not clear who would want to live in this new dormitory town, remote from employment, entertainment and any form of infrastructure, where the householders would be entirely dependent on their cars.

8. Housing need - and the figures relied upon by the Council – is anything but transparent, despite requests for information about the basis for the Council’s/its agent’s calculations. Housing “need” is a very different thing from the “demand” for housing in Guildford (or in any other place outside London, but within easy commuting distance of London). Despite this, I understand that adjoining boroughs have made very different (and much lower) assessments of their “housing need”.

9. I understand that Surrey University has long had planning permission to build, on its own campus, sufficient accommodation for all of its students, but that it has failed ever to implement that permission. Why? Surely it should have to do this, thereby freeing up housing stock in Guildford town centre - which clearly does have water, electricity, gas and drainage already in place; already has schools and dentist’s and doctors’ surgeries, already has employment and entertainment opportunities, already has public transport, and for many, already has 2 railway stations within walking distance.

10. Guildford town centre – Walnut Tree Close, for example – already has significant areas of former built/industrial development, again with pre-existing infrastructure in place. Sustainable housing development, in its true sense, should clearly be concentrated here.

11. I object to the quantity of space allocated for retail in Guildford town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies in administration.

12. I object to the fact that the Council has still failed to remove the Three Farms Meadows (site A35) from the Plan despite receiving 1000s of objections to its inclusion - from residents and from statutory consultees.

13. There appears to be no clear justification for the removal of one (other) strategic site from the Plan. Why hasn’t Three Farms Meadows (site A35) been removed? What is the justification for the removal of the other site? Three Farms Meadows (site A35) should now be removed from the Plan.

14. I understand that the Council considers that there should be consultation only on the changes it proposes should be made from the previous version Plan. I object to this. Many people will therefore be discouraged from participating in this consultation, and will not appreciate quite how much has changed from the previous version Plan. Moreover, the complexity and length of reports/documents, many of which are not available in hard copy, further discourages debate and participation in it.
15. I object to the timing of this consultation – yet again in the context of the local plan/proposals in relation to Three Farms Meadows, time limits for submission of comments/objections expire during the school summer holidays – once again limiting debate.

16. I object to the fact that there has been no clear explanation from the Council as to why it thinks it is appropriate to have a (limited) regulation 19 consultation. I believe the proposed changes to the Plan are major.

17. I object to the proposed increase in the size of site A35 (Three Farms Meadows) as this now abuts additional heritage assets, including Upton Farm and Bridge End House, further adversely impacting the setting of these buildings and the wider Ockham Conservation Area.

18. I object to the fact that the proposed increase in site area, being on the south side of site A35 (Three Farms Meadows) and facing (therefore) the Surrey Hills AONB, will increase the negative impact of the views from the AONB.

19. I object to the proposed change of site boundaries to site A35 (Three Farms Meadows). Nor are these identified correctly on the plan (Appendix H p16).

20. I object to the proposed removal of an additional 3.1 ha from the Green Belt that the proposed change of site boundaries to site A35 (Three Farms Meadows) would entail.

21. I object to the change in Green Belt boundary to the eastern end of site A35 (Three Farms Meadows), as this now encloses an area of high archaeological impact.

22. I object to the inclusion in the Plan of site A35 (Three Farms Meadows) as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

23. I object to the extension of the Plan period by 1 year.

24. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

25. I object to the idea – mooted by the Council at one point of this process – that loss of Green Belt land in one part of Guildford Borough could be “compensated” by the re-designation of other land, in another part of the Borough, as Green Belt.

I consider for the reasons listed above and numerous other reasons that this Plan is unsound and not fit for purpose. I urge you now to remove site A35 (Three Farms Meadows) from the local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

As a resident of Elm Corner, I live directly adjacent to the planned site and have spent the past several years fighting this disproportionate and unfeasible development. My husband and I moved from London to our home in Ockham in order to enjoy open space and to escape the built-up communities that we had previously lived in. We have built a home for our children to enjoy – and also our children’s children. We understand the need for housing – and in particular affordable housing – and we also want the borough to remain a dynamic and growing place to live and work. Both of these goals can be accomplished, however, without the eradication of the protected and very necessary Green Belt. Housing can also be added in areas that will not break an already creaking infrastructure system. As someone who accesses the A3 and the local roads multiple times a day to get to and from my property, I can tell you that a development of this size is simply not sustainable.

Specifically, I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Having lived temporarily in Cobham, I have witnessed firsthand how quickly built-up developments can erode open spaces. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

4. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs. As previously mentioned, I moved to Ockham specifically for its rural character. This village can not be allowed to be folded into a new “ready-made” town.

5. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. Estimated cycling times to train stations, etc have been significantly underestimated
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected. I was personally involved in preparing this document and read every residents’ comments regarding their visions for our community
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) -

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I write to object most strongly to the proposed inclusion of this site in the Local Plan.

- I object to a plan which proposes that over 70% of new housing be built within the Green There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
- The air quality at Elm Corner is currently at levels that are unacceptable by both UK and EU
- The road infrastructure in and around Ockham and Ripley is insufficient to sustain such a Ripley and Horsley roads are not capable of accommodating such an increase in traffic flow.
- The impact on required public transport for the site is significant and The reliance on cycling for commuters is laughable, the local rail stations do not have sufficient capacity.
- The impact on local environment and ecology would be
- Inclusion in the plan would mean ignoring SPA, SSSI and SNCI
- GBC Planning has already rejected planning proposals for this site
• This site has been repeatedly debated for consideration and repeatedly Continued promotion through the local plan leads many to lose faith in the impartiality and integrity of process within GBC. The reputation of the council is at stake.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Removal of Strategic Site

I object to the fact that there is no justification for the removal of the strategic site at Normandy over and above the removal of any other strategic site, and in particular site A35 – most notably on the grounds of sustainability.

Continued Inclusion of Site A35

I object to the fact that the Council has failed to remove Site A35 from the Local Plan despite the receipt of thousands of objections from local residents and statutory consultees.

I object to the inclusion of Site A35 in spite of unanimous rejection of planning application 15/P/00012 on fourteen separate grounds.

I object to the inclusion of Site A35 because it is the least sustainable strategic site identified both in this version and previous versions due to the constraints of the site and its physical location. From a transport perspective, it is further from railway stations than any other identified strategic site. When you do reach them, the closest stations have unsolvable capacity and parking issues.

I object to the inclusion of Site A35 because it is adjacent to the most congested stretch of strategic road network in the county (A3) and is very close to one of the most congested junctions in the country (J10). Traffic will only be exacerbated by anticipated increased visitor numbers (500,000) at the adjacent RHS Wisley – the impact of which has not yet been taken into account.

I object to the inclusion of Site A35 because the local road network is not sustainable for the increase in cars – and certainly not for the increases in buses and larger vehicles that will be coming to and from the site.

I object to the inclusion of Site A35 because it remains unclear when/if the Ockham DVOR/DME will be decommissioned. This constrains the site significantly.

I object to the removal of an additional 3.1 hectares of land relating to Site A35 from the Green Belt without justification.

I object to the increased area of Site A35 as this now abuts additional heritage assets, including Upton Farm and Bridge End House (in addition to the known impact on Yarne), negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that Site A35 will not contribute to the 5-year housing requirement due to constraints, most notably in the provision of sewerage capacity, but also due to other infrastructure constraints already mentioned.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to the removal of the Three Farm Meadows (TFM) from the Green Belt. The site serves a vital role in protecting the area against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. No exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
2. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4. I object to the grossly disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to TFM, an area that at present has only 0.3% of the population of GBC).
5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. In fact to encourage cycling and walking to and from this development is irresponsible as the local roads are too narrow with no footpaths of street lights. There is a real risk of fatal accidents.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
I wish to register my strong objection to the continued inclusion of policy A35, Three Farm Meadows in the draft local plan for the following reasons:

1. The local roads cannot sustain more traffic. The A3 and M25 junction is incredibly congested at all times of the day and the country roads are already very dangerous, there have been at least two accidents at the crossroads between Old Lane and Ockham Lane in the last few months.  
2. The roads are not wide enough for the new suggested bus routes  
3. Walking and cycling this is unbelievably dangerous due to the narrow twisting roads  
4. There is currently insufficient parking at the local stations, and the addition of so many new residents will make the situation a lot worse  
5. I object to removing more land from the green belt, especially without any justification  
6. I object to para 21 which “limits” development in flood zone 2 and 3. Development should not be permitted in flood zone 2 and 3  
7. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.  
8. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

In summary I consider the draft local plan to be unfit for purpose.
Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

This proposed development is contrary to the existing Metropolitan Green Belt policy and is only possible with the proposal contained in paragraph 4.3.17 to remove Wisley Airfield from the Green Belt.

It will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to one of the most picturesque areas of the country.

Therefore, I strongly OBJECT to Policy A35

In conclusion, I would urge GBC to not to seek to develop housing in land that is currently within the Metropolitan Green Belt and to respect the wishes of the over whelming majority of the residents of those villages which GBC seeks to inset from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. **Recent data confirms that ONS growth figures should have been used and these have been ignored.** The recent referendum result will also slow the population growth and this needs to be considered by the GBC.

3) I object to the disproportionate allocation of housing in the north of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which **65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC**).

4) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of **164 residences** (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a **2,000+ dwelling** development, with **urban-style buildings** up to five storeys high and a population density higher than most London boroughs.

5) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

6) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

7) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

8) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the **Ockham Parish Plan.** The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

9) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Limited’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I also hope that the borough’s housing needs are considered in relation to the effect the Brexit vote will have on population growth ie the consensus is that immigration rates will decrease and therefore the demand for housing will also decrease.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4152  Respondent: 8920865 / Glen Travers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In relation to the specific allocation of site A35, I have a number of objections as outlined below:

1. I object to the inclusion of site A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of infrastructure and in particularly the sewerage constraint due to lack of any spare capacity at Ripley sewerage works.

2. I object to the fact that the Council appear to have directed that the transport assessment for site A35 uses prescribed vehicle movements from site with no justification. I believe this makes the transport evidence subject to challenge due to bias on behalf of the Council.

3. I object to the inclusion of site A35 as it is the least sustainable site identified in both this version and previous versions of the plan because of the constraints of the site and the physical location which is adjacent to the TBHSPA.

4. I object to this site due to the fact that it is further from the railway stations than any other strategic site and that the nearest stations have unsolvable capacity and parking issues.

5. I object to the inclusion of site A35 in spite of unanimous rejection of planning application 15/P/00012 on 14 grounds.

6. I object to the inclusion of site due to the fact that it is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10). The SRN in this location is currently operating significantly over-capacity and the proposed improvements both uncertain in design and timescale. Even with Highways improvements proposed without the impact of this development it is accepted that the A3 is at full capacity and so cannot take the additional traffic from this proposed development.

7. I object to this site due to the fact that the local road network is also at capacity and is severely adversely affected when the SRN is not free-flowing at times of accidents, diversion, roadworks etc.

8. I object to the allegation that public transport provision will be able to mitigate the impact of this allocation especially as bus routes to/from Guildford will have to utilise the over-crowded SRN in one/both directions and therefore will be unreliable and subject to frequent delays.

9. I object to the inclusion of site A35 due to the fact that any public transport (bus services) provision to Horsley and/or Effingham junction will impact the safety of the local road network as the lanes are not legally wide enough to accommodate PSVs, particularly when sustainable methods of travel such as cycling and walking are being promoted on the same lanes at the same time. This is not only unrealistic but it is also unsafe.

10. I object to the allocation of site A35 due to the fact that the mitigation to address the impact of increased traffic will not address the commuters travelling to Woking station.

11. I object that due to the fact that site A35 is adjacent to the most popular tourist attraction in the south-east, the RHS at Wisley where the visitor numbers are due to increase by 500,000 visitors per annum and that the associated traffic increase has not been properly modelled or taken into account; and
12. I object to the fact that nor has any account been taken of the traffic resulting from the regular events at the RHS which attract 1000’s more visitors several times a year in the consideration of the allocation of site A35.

13. I object to the fact that the inclusion of site A35 has not properly taken into account the impact of the changed boundaries of the allocation on the adjoining heritage assets and in general and in particular the impact on the setting of Bridge End House (Grade II) and Upton Farm (Grade II) in addition to the known impact on Yarne.

14. I object to the dismissal of the substantial or less than substantial negative impact on the setting of the Grade 2 listed property Yarne. The requirement is to go through a process supported by statute and is to be given a ‘heavy weighting’ when considering the balance of harm versus benefits of development. As this is enshrined in statute law it is not legal to ignore these effects on Yarne and surrounding historic sites.

15. I object to the fact that the increased allocation at site A35, being on the south of the site facing the Surrey Hill AONB will further negatively impact the views to and from the AONB.

16. I object to the removal of an additional 3.1ha of land from the green belt without any justification.

17. Furthermore, I object to change of the site boundaries of allocation A35 as these are not identified clearly or correctly on the plan (Appendix H p16).

18. I object to the unjustified change in the green belt boundary at the eastern end of the site especially as this now encloses an area of high archaeological interest which will prove difficult to develop in the light of the archaeological finds in the surrounding area.

19. I object to the fact that the impact of the OCK/DVOR has not been properly taken into account in the allocation of site A35. It remains unclear when/if this will be decommissioned as the timetable has already slipped. The constraints on the site due to the DVOR are significant and if it is not decommissioned will severely limit the availability of the site to deliver enough land to make the allocation viable.

20. I object to the fact that insufficient weight has been given to the sustainability of allocation A35 due to the lack of employment available onsite meaning that almost all residents will have to travel to work. As already identified above it is unrealistic and unsafe to assume people will walk/cycle to work on narrow unlit local roads on anything more than a very occasional basis.

21. I note that the changes in the opportunities listed in site allocation A35 reinforce why this site is totally inappropriate, talking of “good urban design” – just what is needed in a rural area.

22. I object because of the impact on the TBH SPA of A35 to the mitigation strategy proposed concerning use and calculation of the SANG and considering the appointment of a warden to solve the issue of inhabitants and cats being drawn down the rights of way and into the sensitive TBH SPA. The mitigation strategy proposed is inadequate.

23. I object to the undercalculation of SANGS and the failure to recognise the flooding of the southern area designated as SANGS thereby meaning there is inadequate SANGS to protect the TBHSPA.

24. I object on the same grounds as RSPB to the negative and inadequately mitigated impact on the SSSI, SNCI and TBHSPA.

25. I object to the fact that site A35 will not meet any of the 5 year housing requirement and is subject to so many exigencies and infrastructure costs it cannot be an exceptional circumstance to include it in the Plan which thereby removes the site from greenbelt.

For all the reasons already identified by the Wisley Action Group together with the reasons listed above it is quite clear that site allocation A35 is unsustainable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to the impact of Guildford Borough Council Draft Local Plan on Heritage sites and Conservation Areas in Ockham

Despite its relatively close proximity to London and nearby towns Ockham has escaped suburbanisation. It has retained its distinct rural heritage and has not been subsumed within much larger conurbations. It remains a rural parish and retains its identity as an evolution of a collection of medieval hamlets where small houses nestle together in settlements with their own distinct character. The foundation of the local economy remains agricultural based around arable and livestock farming, equine recreation and game bird rearing.

The special character of the built environment in Ockham is acknowledged by the fact that 29 buildings have been listed by English Heritage. Many of the listed buildings are farm houses by origin. Their setting was and remains rural and agricultural. Upton Farm and Yarne are both 15th century farmhouses immediately adjacent to Three Farms Meadow and have views over it. Appstree and Bridge End have land adjoining Three Farms Meadow. The development of high density housing at Three Farms Meadow will cause irreparable damage to the setting of the listed buildings in Ockham and to the Ockham Conservation Area. The development, because of its location on the highest point of the hill and down the south side of the proposed site will overlook the Conservation Area and impact the setting of those precious and ancient buildings in the Ockham Conservation area causing substantial impact. The effect on the distinctive local Lovelace style would be wholly inappropriate.

The particular significance of the Three Farms Meadows is that it creates a meaningful green gap which enriches and strengthens the separate identities of the different settlements of Ockham. Consequently the separation provided by the green gap is a significant asset to both conservation areas and contributes to their character as distinctively separate settlements. The most significant harm caused by the development proposals is that the scale of development overwhelms the historic settlements of Ockham which are quintessentially small in scale and historic in nature. Unlike many ‘commuter belt’ villages these settlements have escaped extensive redeveloped or extensive post-war expansion. Consequently they retain their evolved medieval form as well as most of their rural separation and setting. These are the characteristics which make them special and gave rise to the designations of Bridge End, Church End and Ockham Mill as a conservation areas.

The disproportionate scale of development in the appeal proposals is contrary to the natural evolution and growth which gave rise to the character of Ockham over the last 500 years. The result will be a revolutionary change in the shape and morphology of the Parish settlements which cannot fail to harm their distinct character.

The historic parish currently consists of 163 dwellings. The addition of another 2,100 dwellings a greater than tenfold increase, will irreversibly change the way in which the historic settlements of Ockham areas perceived. Perception will no longer be of an evolved medieval parish in rural surroundings but of a much larger modern suburb with an historic periphery.

Development on this scale has never occurred within the Parish of Ockham or in Lovelace Ward and, even if well designed, cannot assimilate well into the fine grain and historic parameters of the parish settlements. The development fails to respond to the significance of Ockham’s listed buildings, its conservation area or wider setting in any positive way.

NPPF paragraph 137 states that ‘Local planning authorities should look for opportunities for new development within Conservation Areas and World Heritage Sites and within the setting of heritage assets to enhance or better reveal their significance.’

Sections 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires special regard to be given to preserving listed buildings or their settings and section 72 requires special attention to be paid to preserving or enhancing the character or appearance of conservation areas.

Justice Linblom stated that ‘…a finding of harm to the setting of a listed building or to a conservation area gives rise to a strong presumption against planning permission being granted. The presumption is a statutory one.’ As such heritage conservation is to be given considerable weight and importance in the planning balance.

The proposal for the building of in excess of 2000 houses on the former Wisley airfield no way accords with any planning framework. More importantly it fails to meet statutory requirements and the substantial damage to historic
heritage properties and the Ockham Conservation Area cannot be adequately mitigated. As such I strongly object to the inclusion in the Draft Local Plan of this site A35 (FWA) and it should be entirely removed from the GBC Draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/5222  Respondent: 8920865 / Glen Travers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

XV. I object to the fact that no account appears to have been taken on the impact of pollution on the TBHSPA particularly the damage caused by nitrogen deposition. This will also impact RHS Wisley. It is an undeniable fact that the level of growth proposed by this plan will result in increased traffic movements and by extension increased polluting emissions. Any argument that relies on potential changes to the make-up of the vehicle fleet in terms of fuel source is clearly premature.

XVI. I object to the fact that there is no consideration of the impact of in-combination development on the TBHSPA especially the large proposed developments in neighbouring authorities.

XVII. I object to the fact that there is no justification for the removal of the strategic site at Normandy over and above the removal of any other strategic site and in particular site A35 on many grounds but most notably on sustainability grounds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Consequently they retain their evolved medieval form as well as most of their rural separation and setting. These are the characteristics which make them special and gave rise to the designations of Bridge End, Church End and Ockham Mill as conservation areas. The disproportionate scale of development in the appeal proposals is contrary to the natural evolution and growth which gave rise to the character of Ockham over the last 500 years. The result will be a revolutionary change in the shape and morphology of the Parish settlements which cannot fail to harm their distinct character.

The historic parish currently consists of 163 dwellings. The addition of another 2,100 dwellings a greater than tenfold increase, will irreversibly change the way in which the historic settlements of Ockham areas perceived. Perception will no longer be of an evolved medieval parish in rural surroundings but of a much larger modern suburb with an historic periphery. Development on this scale has never occurred within the Parish of Ockham or in Lovelace Ward and, even if well designed, cannot assimilate well into the fine grain and historic parameters of the parish settlements. The development fails to respond to the significance of Ockham’s listed buildings, its conservation area or wider setting in any positive way. NPPF paragraph 137 states that ‘Local planning authorities should look for opportunities for new development within Conservation Areas and World Heritage Sites and within the setting of heritage assets to enhance or better reveal their significance.’ Sections 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires special regard to be given to preserving listed buildings or their settings and section 72 requires special attention to be paid to preserving or enhancing the character or appearance of conservation areas. Justice Linblom stated that ‘….a finding of harm to the setting of a listed building or to a conservation area gives rise to a strong presumption against planning permission being granted. The presumption is a statutory one.’ As such heritage conservation is to be given considerable weight and importance in the planning balance.

The proposal for the building of in excess of 2000 houses on the former Wisley airfield no way accords with any planning framework. More importantly it fails to meet statutory requirements and the substantial damage to historic heritage properties and the Ockham Conservation Area cannot be adequately mitigated. As such I strongly object to the inclusion in the Draft Local Plan of this site A35 (FWA) and it should be entirely removed from the GBC Draft Local Plan.

<td>I object strongly to the re-instatement of the plan to build on the Wisley airfield site. This has already been rejected once for sound reasons: the impact of the proposed number of houses within the Green Belt is unacceptable regardless of the developer adding schools or shops to the design. The impact on the A3 transport route is unavoidable. Putting this proposal back into the plan shows a disgraceful lack of integrity by those within the Council who invite public input to the planning process and then show total disregard for the views of people who take part in the consultation.</td>

<tr>
<td>I would like to register my objection to the new local plan for the Horsleys and Wisley. At a time when the environment is under pressure in so many ways , it seems to me ridiculous that you are looking to take areas out of the Green Belt - and increase the urbanisation of the countryside. As a country we expect the rest of the world to contribute to green policies, but unless we can demonstrate such policies close to home then we are in no position to talk. On top of this, the infrastructure in the area does not support a significant increase in the local population size. And again, the increasing of the infrastructure will place greater burden on the environment with more/larger roads, greater use of natural resources, water, sewerage, etc. Whilst I do appreciate that the population size is growing in the UK, requiring extra accommodation, evidence suggests that this can be provided at brown-field sites and policies to encourage higher occupancy rates.</td>

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: PSLPS16/3846 | Respondent: 8922657 / Stephanie Brown | Agent: |
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. The geography of London is unique specifically because of the existence of the Green Belt; if not for the Green Belt London would sprawl uncontrollably like so many other cities in the world.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. I use the M25 every day and the A3/M25 junction is already a bottleneck without an additional 4000 cars joining at the Wisley junction.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the disproportionate allocation of housing in this specific part of the borough. Indeed over 23% of the Plan's new housing is proposed in the immediate localities my home in Ockham, together with Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that currently only has 0.3% of the population of GBC).

4) I object to the massive threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The Plan calls for a village of 159 dwellings (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2000+ dwelling development, with urban-style buildings up to five stories high and a population density higher than most London boroughs.

5) I object to the very seriously detrimental impact on the local infrastructure which in my view will be massively overwhelmed by the Plan. Roads, stations, schools to name but a few are completely inadequate to cope with the projected increase in demand.

6) I object to the fact that the proposed Plan does not meet the stated needs and desires of local communities, as evidenced in the Ockham Parish Plan. We local residents enjoy living in Ockham because of access to countryside and clean air as well as peace and quiet afforded by wide open spaces. Over 90% of residents want both the historic features of the village maintained and our village's green spaces, including the FWA/TFM, protected.

7) I object to the continued inclusion of a site (the former Wisley Airfield - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

Please record this as my objection to the draft Local Plan for the below reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

The site is the least sustainable which has been identified in both this version and in previous versions of the plan because of the constraints on the site and its physical location.

The distance from rail stations is not acceptable.

The site is next to one the most congested junction in the country (J10)

Our local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

In relation to public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

Bus services etc to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

RHS at Wisley is immediately next door where visitor numbers will increase by 500,000/annum.

The associated traffic increase from the RHS has not been taken into account.

The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
OBJECTION to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings.

We live in Cobham and we have a greater interest in what goes into the Guildford Local Plan for the local area than those living on the far side of the borough.

On the 8th April 2016, we watched on video cam, application 15/P/00012 being rejected unanimously on the recommendation of Planning Officers. The Planning Report identified serious concerns about the development of this site. We are now aghast that this settlement is still being considered.

We also object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.

The increase in population at Wisley and the nearby localities would put an intolerable strain on local road and rail networks which are already overstretched. During the rush hour it is tricky getting a space in the station car parks and difficult to secure a seat on the train (40 minutes standing to Waterloo from Cobham - a terrible start to the day). Long queues of traffic are an everyday occurrence in and around Cobham, particularly during the rush hour.

Moreover, Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving serving 5,000 additional occupiers at the site and would experience a significant increase in traffic.

Furthermore, we think that the proposed housing density is completely out of keeping with the surrounding rural area and we understand that the air quality around the Royal Horticultural Society gardens and the Thames Basin Heath Special Protection Area is already in excess of legal limits. It will not improve if the proposed development is allowed.

We could go on and on but a key point is that green belt boundaries can only be changed in exceptional circumstances. There are no exceptional circumstances.

Please remove Wisley Airfield from the local plan and reconsider the disproportionate allocation to Ockham, Ripley, the Horsleys and Effingham.

The (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2123  Respondent: 8925153 / D B Saidman  Agent:

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5862  Respondent: 8925569 / Gaynor Donnell  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Ockham Airfield - This was declined by your local planners yet is included again in the plan. The roads around Wiley are far too small and the A3 /M25 junction must be one of the worst on M25 and cannot take more traffic. This proposed development is totally mad and driven by money and nothing else.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3675  Respondent: 8926529 / Annie Cross  Agent:  

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A35 – Wisley

1. I object: to this site being expanded from 92.8 ha to 95.9 and the proposal to remove it from the Green Belt, as this provides the possibility of large scale development on an unsustainable site which is the only site in the draft Plan situated in the centre of Metropolitan Green Belt - all the other large Green Belt sites proposed are adjacent to urban/residential areas.

2. I object: to GBC removing this location from the Green Belt as their own description of the site is “former airfield and fields” and “partially previously developed land” and only 17ha of the site is truly brownfield.

3. I object: to this amendment as it directly contravenes NPPF Section 9, para 7 “The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence” and NPPF, Section 9, para 80, “to assist in safeguarding the countryside from encroachment

4. I object: to the above expansion of the site contravening another of the five purposes of the NPPF, Section 9, para 80 “to prevent neighbouring towns merging into one another”. The site is in the middle of the Metropolitan and surrounded by towns and villages, all approximately 1.5-2.5 distant, including railway stations. It is inevitable that some of these towns will eventually merge with this site.

5. I object: to the GBC section ‘Requirements: Infrastructure, (3) (d), mitigation schemes “on rural roads surrounding the site”’. Other than the nearby A3/M25, the surrounding country roads are narrow and winding, have no pavements and no lighting. It will be possible to walk/cycle to Ripley, (the nearest village approximately 1 mile from the nearest point of the site), in daylight along a semi-wooded path without lighting and assuming there is no need to carry shopping bags back to the site. There are cycle lanes to Ripley, but the A247 is a busy road with traffic having just left the A3 and not yet in “30 mph” mode. I have never seen anyone cycle this route. I therefore object to vague “mitigation” statements on an expanded site.

6. I object: to the GBC section ‘Requirements: Infrastructure, (4). “The identified mitigation to address the impacts on Ripley High Street and surrounding rural roads comprises two new slip roads at A247 Clandon Road (Burnt Common) and associated traffic management”. The proposed Burnt Common slip roads will mean much of the traffic travelling to/from the south to site A35 will travel through Ripley. This does not “mitigate”, it adds considerably to the current problem of heavy congestion through Ripley. If two slip roads are to be added to service site A35, they should be located at the A3 Ockham roundabout, situated next to the site.

7. I object: to GBC section ‘Requirements: Infrastructure, (22). “Sensitive design as site boundaries that has significant regard to the transition from village to greenfield”. 2,500 homes, i.e. 5,000+ people and similar number of cars, is not a village, it is a town and the transition from “village to greenfield” is in fact transition from “new town” to Green Belt.

28a I object: to GBC not applying constraints to Wisley Airfield (Site 35) and refusing to acknowledge this is an unsustainable site, further away from a railway station than any other site proposed, meaning car usage will be a necessity, contributing to air quality and light pollution problems.

I write to register my objection to the new Guildford Borough Council New Local Plan 2016. I also attach the same response as a Word Document in case of any formatting problems with this text.

Firstly, I strongly disagree with removing the Horsleys from the Green Belt. They are both very rural villages surrounded by open land and woodland, where existing roads were laid out to complement the environment, taking in the proximity of Ranmore Common and the nearby Surrey Hills Area of Outstanding Natural Beauty on one side and Wisley and Ockham Commons on the other. Of particular significance are the areas of heathland and woodland at Wisley and Ockham Commons which provide a much needed refuge from the nearby A3 and M25 and it also happens that the lowland heathland in this area is a very scarce habitat and supports a specific and unusual range of wildlife, with three areas designated Sites of Special Scientific Interest by Natural England in recognition of their importance for nature conservation, and are also part of a European Special Protection Area. This therefore makes the proposed development at Wisley Airfield unacceptable in terms of the environmental damage that would have to occur in order to sustain a development of this size. I therefore urge you to reconsider your plans for Wisley with these factors in mind.

<tr>
<td>I object to the draft Local Plan for the following key reasons:</td>
<td>• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.</td>
<td></td>
</tr>
</tbody>
</table>
• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public service. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will
mean *either* major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Wisley Airfield Policy

I OBJECT to the inclusion of Wisley Airfield development in the local plan. No exceptional circumstances have been demonstrated for its removal from the Green Belt. This proposal has also been unanimously rejected by GBC’s planning committee because of grave concerns including traffic congestion, air pollution, lack of suitable public transport, unsustainability, the inappropriateness of an urban style development in this rural area, the major impact on local villages. These are all still relevant objections.

1. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPI) planning application was unanimously rejected by GBC on 6th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and Allocations A35, A36, A37, A38, A39, A40 and 41 are removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6148  Respondent: 8928481 / Margie Cox  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

OBJECTIONS TO GUILDFORD BOROUGH COUNCIL PROPOSED LOCAL PLAN (JUNE 2016) AND TO THE CONTINUED INCLUSION IN THE PLAN OF THE FORMER WISLEY AIRFIELD (FWA), NOW KNOWN AS THREE FARMS MEADOWS: ALLOCATION A35 FOR THE PHASED DEVELOPMENT OF A NEW SETTLEMENT OF UP TO 2,100 DWELLINGS

I object to the draft Local Plan for the following reasons:

1) I object to the proposal that over 70 percent of new housing required in the plan be built within the Green Belt. There are many opportunities to regenerate brownfield land in urban areas, which already provide the required infrastructure for larger communities.

2) I object to the fact that the proposed plan goes against the wishes of local communities. We have chosen to live in this area because we appreciate access to the countryside (with clean air) and the peace and quiet provided through open spaces. Building extensively on Green Belt land will create an urban corridor stretching from London to Guildford and compound air pollution problems.

3) I object to the disproportionate allocation of housing in this particular part of the borough. Over 23 percent of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3 percent of the population of GBC).

4) I object in particular to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt.

This will result in a development with an excess of 2,000 dwellings, with urban-style buildings of up to five stories high and an unsupportable increase in population density. This is totally out of character with the surrounding villages.
5) I object to the development of the Former Wisley Airfield (FWA/TFM) Site because of the adverse impact it would have on local roads and road safety. A proposed development of 2,000 plus homes would result in an estimated 4,000 additional cars. We already have severe congestion on the Strategic Road Network of the A3 and M25. Trains servicing Horsley and Effingham Stations are already seriously overcrowded.

6) I object to the assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated and too spread out to anticipate a reduced reliance on private cars. The lack of cycling lanes and the lack of pedestrian footpaths (and the space to provide them) would impact on the safety of local residents.

7) I STRONGLY OBJECT to the continued inclusion of the Former Wisley Airfield (FWA/TFM), where the planning application has already been unanimously rejected by GBC’s Planning Committee. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

For all of these reasons, I trust that the objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35 is permanently removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Thank you for your notification on Strategy and Sites (2017) Consultations regarding the proposed Submission of the Local Plan.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons, including:-

1. The surrounding road infrastructure does cannot support a development of this size.

2. Local roads in the vicinity of the site are narrow and are already at capacity. They are also unable to support proposed bus services.

3. The site is adjacent to the most congested stretch of strategic road network in Surrey and Junction 10 is often backed up.

4. The site is also opposite Wisley Gardens, a very popular visitor destination. The impact of 500,000 plus visiting cars per annum has not been taken into account.

5. The site is further away from a railway station than any other identified site.

6. Neither Horsley Station nor Effingham Station have additional parking capacity.

7. It is unrealistic to promote cycling and walking together with public transport (bus) services at the same time, as local lanes are already too narrow to safely support both cars and cyclists.

8. There are not enough employment opportunities proposed onsite for the large number of residents living in the proposed 2,600 homes. They will therefore add to congestion on the roads and lanes.

9. The changed ‘opportunities’ listed in this policy reinforce why this site is totally inappropriate talking of ‘good urban design’.
10. Opportunity (3) should be common to all sites and is not unique to this site.

11. I OBJECT to the increased area of the site. This now extends to additional heritage assess and negatively impacts the setting of the wider Ockham Conservation Area.

12. I OBJECT to the change of site boundaries as these are not identified correctly on the plan (Appendix H, p16).

13. I also OBJECT to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

14. I OBJECT to the removal of additional 3.1 ha from the green belt without any justification.

15. I OBJECT to paragraph 21 which ‘limits’ development in flood zones 2 and 3. Development should be EXCLUDED in any flood zone.

16. I also OBJECT to paragraph 22 as this does not reflect the impact of the buildings on the surrounding areas.

17. I OBJECT to the housing number and the fact that the Council have not, as required used any constraints such as green belt, infrastructure air quality, AONB, TBHSPA etc.

18. I OBJECT to policy S2 where it states ‘the figures set out in the Annual Housing Target table sum to a total of 12,426’ yet the figures in the table add up to 9,810 - what is the significance of the missing 2,616?...?

19. I OBJECT to the quantity of space allocated for retail in the town centre, in particular to the reliance on the Carter Jonas study update (2017) which includes ‘demand’ for retail space from companies already in administration. I have also noticed that a number of business in Horsley Village have moved or closed down.

20. I OBJECT to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

21. There has been no clear explanation why the Council think it is appropriate to have a regulation 19 Consultation when the changes are major.

22. I OBJECT to the fact that the Council has failed to remove this site from the local plan, despite receiving 1,000’s of objections from local residents and statutory consultees.

23. It is clear that the Council has failed to take on board many of the comments made in the past about issues such as poor drafting, errors. Etc.

24. It is also clear that when comparing the allocated sites, the Council have been extremely inconsistent placing different weight on the various restrictions.

25. I OBJECT to the Council wasting tax payers and residents time and money not following due process and indeed ignoring previous representations.

I require confirmation that ALL of these comments, together with all my previous comments are passed to the Inspector. I consider for the reasons listed above, as well as numerous other factors that this plan is unsound and not fit for purpose.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Three Farms Meadows - Wisley Airfield

I strongly object to any development at Wisley Airfield for two reasons – firstly inappropriate development of the area (clearly agreed by all of the Borough Councillors when they rejected the development on 14 counts) and also its effect on the AONB to the south.

The current proposals would mean an increase in population of an estimated 5,355 people. Ockham, a small hamlet of ancient houses would be subsumed into a mass of housing – like Milton Keynes. The land is predominantly productive arable farm land (only 17% is hard standing). The area (hardstanding) near Elm Corner is already in the Special Protection Area bordering on the Thames Basin Heathland. There is a 400m zone where development is prohibited, and from 400m out to 5km developments require a SANG.

It is estimated that on a development of this size there would be 700 dogs and a similar number of cats. Residents would not use another SANG for walking their dogs, they would head straight for Wisley Common over the designated green space thus doing ever more damage to a nationally important area of conservation. At the moment the birdlife on the farm/airfield is wonderful. The song of the skylark is present all year round – but certainly not for long if 700 cats took up residence. The developers have stated that they would have a permanent dog warden working to prevent this happening. Do you really trust this and from 6am to 10pm when it would be necessary?

The proposed changes to the road systems around the site are awful and not only would it seriously increase volumes of traffic throughout the surrounding area, the whole character of the area would be changed for the worse forever. The effects on the surrounding villages would be devastating. The nearest stations of Horsley and Effingham Junction already have overfull car parks – what would happen here? Shopper’s parking is just adequate now in East Horsley and Ripley – where would these new visitors park for shopping etc?

Infrastructure: The developers have stated that they will not build any facilities (schools, doctors surgeries, shopping area) until 500 houses have been built – some ten years into the project. What will people use in the meantime – especially if all other local housing is built within five years as stated?

Transport links. The developers have stated that to address sustainability that there would be a bus service every ten minutes to Effingham station. Can you seriously think this would carry on at their expense in perpetuity from 6 am to midnight? The developers also calmly told me at their public meeting that they fully expected all residents to walk or cycle everywhere. My answer to that was “dream on”. I am a keen cyclist and meet many people who are astounded when they realise that I cycle more than a couple of miles let alone 20 at one go. Can you imagine hordes of cyclists or pedestrians fighting their way down Old Lane or Ockham Road to the respective stations at morning rush hour? As an experienced cyclist I avoid those lanes even during less busy times because of the narrowness of the road and speed of traffic. People drive to our local station from less than ¾ mile away every day and certainly wouldn’t choose to walk or cycle the 2.5 miles. According to Google Maps this is a 9 minute cycle ride and a 49 minute walk. Need I say more? This is an opportunity for the landowners to make a fortune with no thought whatsoever to the sustainability of the plan.

If having promised to build various essential infrastructure projects upon completion of 500 dwellings, what would Guildford Borough Council do if at 499 dwellings the developers decided to pause in their building plan for a few years? What if they decided never to go beyond 499 houses as demand wasn’t satisfied? Is all this a horrible mistake in the making? I have been told that this habit of building to just under a specified total to avoid expensive infrastructure projects is not uncommon.

Effect on the AONB to the south of the site

I visited two of the highest points in the AONB to the south of the site to see whether I could see the site from the AONB (Polesden Lacy and the high point of Staple Lane – a magnificent viewpoint to the south of the A246). From both locations I identified where Wisley Airfield was using triangulation and OS maps. I couldn’t actually any of the site - just green and trees in the general area. I suspect it could be seen on the years when the farmer planted a crop oilseed rape as the yellow splash of colour would stand out. I could just about identify traffic on the A3 passing nearby the site. However there was no doubt that it would be extremely visible with housing let alone 5 storey buildings on it.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

POLICY A35: Land at former Wisley Airfield

Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

EHPC has major concerns about this proposed development and has objected against prior planning applications at this location. We consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

EHPC strongly OBJECTS to Policy A35 and will provide a more detailed submission outlining our arguments against this policy in a separate letter.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Proposed Submission Local Plan: Policy A35, land at former Wisley Airfield, Ockham

This letter supplements our submission of 13th June 2016 concerning the Proposed Submission Local Plan and provides additional comments on Site Policy A35, ‘land at former Wisley Airfield, Ockham’.

East Horsley Parish Council (“EHPC”) strongly OBJECTS to this proposed policy for the reasons detailed in this letter.

a) The proposed development represents a fundamental breach of Metropolitan Green Belt rules:

The site forms part of the Metropolitan Green Belt. Under the NPPF, development on such Green Belt land is only permitted under ‘very special circumstances’. GBC’s Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that: It has not been demonstrated that the benefits of the
Ministerial guidance has repeatedly confirmed that unfulfilled housing need does not qualify as a very special circumstance. Whilst the developers’ previous planning application was judged and rejected based upon the 2003 GBC Local Plan, the proposal to include this site within the 2016 Proposed Submission Local Plan does not fundamentally change the argument against it. Any removal of this site from the Green Belt can only be made based upon ‘exceptional circumstances’, which cannot be justified on the basis of unfulfilled housing need. If this was the case, then the entire Metropolitan Green Belt would already have become filled with housing.

Removal of this site from the Green Belt is totally against its rules, regulations and underlying spirit. The site location at the edge of the M25 circle represents a ‘first line of defence’ against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

Accordingly, we OBJECT to Policy A35 as a fundamental breach of the Metropolitan Green Belt rules.

b/ This site does not meet acceptable levels of sustainability

Sustainability Appraisal is a core concept of planning policy, yet this site is rated very poorly in terms of its sustainability.

The sustainability appraisal undertaken by GBC’s consultant, AECOM, is presented in the Local Plan Evidence Base report ‘Sustainability Appraisal (SA) of the Guildford Borough Local Plan’ issued in June 2016. In their report AECOM have graded all Local Plan policy sites according to 21 different criteria using the conventional ‘traffic light’ system. Red colouring signifies poor sustainability. Of the six larger sites included in their evaluation, (those with proposed housing numbers of 1000 homes or greater), AECOM rates Site A35 as the very worst of all in terms of its sustainability. No less than 8 out of the 21 criteria are graded as ‘Red’ by AECOM for this site, more than any other large site.

Detailed reasons why this site has such poor sustainability include the following:

• There is currently no infrastructure whatsoever at this site, meaning that all water, electricity, gas and phone services will need to be newly established;

• New large-scale sewage disposal will be needed, a fact recognised by Thames Water, indicating it may take 3+ years to provide adequate sewage handling facilities for this site;

• There are presently no schools, medical services or shops within walking distance of this site;

• There is presently no local employment at this site and little after the development is completed;

• There will be a significant destruction of agricultural land arising from this development;

• There will be significant environmental damage from this development;

• There is no public transport currently serving this location;

• The nearest train stations are Horsley and Effingham Junction, both around 3 miles away and so too far to walk. Neither station currently has significant parking capacity availab

• Travel from this site will be primarily dependent upon motor vehi Any new site so dependent upon motor vehicles for transport cannot be considered as being ‘sustainable’;

• New access roads will be needed and significant changes proposed to the surrounding road network, leading to further pressure on over-crowded rural roads and increase in the traffic congestion in nearby settlements;
Whilst some of these issues may be mitigated, e.g. by building new schools, medical facilities, etc, others such as the environmental issues and infrastructure impact may not. This proposal, fundamentally, represents an attempt to create a large-scale new settlement in a poorly-sited green field location. However, as the GBC’s own consultant has demonstrated, this site does not reach acceptable minimum levels of sustainability.

**Accordingly, we OBJECT to Policy A35 on grounds of its unacceptable sustainability.**

**C) The site will have a severe impact on local traffic & infrastructure:**

The proposed development will have a severe adverse impact on road traffic in the surrounding area. This includes East Horsley where high volumes of additional traffic are likely from the residents of this new settlement accessing East Horsley’s two stations, shops and nearby schools. Most of the rural roads in this area are narrow winding ‘lanes’ – a term used in a recent local public meeting by John Furey, senior SCC councillor for Infrastructure to describe East Horsley’s through roads. Many of these ‘lanes’ are without pavements for large stretches, whilst the principal through-roads of Ockham Road South and Forest Road pass along unlit residential areas so narrow that two buses cannot cross in many sections of these ‘lanes’.

The road closures and junction changes being proposed to accompany this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which already suffer from traffic congestion at peak hours. The further increase in traffic congestion at the A3-M25 intersection would only exacerbate an existing problem for the highways authority - we understand Highways England have repeatedly expressed serious concerns about this development.

Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity. The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel there and back to these stations lacks credibility. Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.

**Accordingly, we OBJECT to Policy A35 on grounds of its severe impact on local infrastructure.**

**d) There are damaging health & safety implications arising from development at this site:**

The site is located close to the junction of the M25 and A3, one of the busiest road junctions in the country. The Nitrous Oxide (‘NOx’) emissions recorded around this area are extremely high and will affect residents living at the proposed site. The proposal to build new primary and secondary schools at this location is also contrary to government policy prohibiting the building of schools on sites in areas where there is high NOx.

In rejecting the previous planning application by the developers, the GBC Planning Officer cited the “failure to provide adequate information on NOx emissions and nitrogen deposition and to provide any information on acid deposition” as one of the grounds for this rejection.

**Accordingly, we OBJECT to Policy A35 on grounds of its adverse health & safety implications.**

**e) The environmental impact on protected wildlife will be substantial**

GBC’s *Land Availability Assessment* which supports Policy A35 states that the site lies within the 400m-5km ‘Zone of Influence’ of the Thames Basin Heaths Special Protection Area (‘SPA’). This is not correct. The site is immediately adjacent to Ockham & Wisley Commons, an area designated as a Site of Special Scientific Importance (‘SSSI’), which forms one part of the Thames Basin Heaths SPA and much of the site lies within the 400m Exclusion Zone where new building is effectively prohibited.

The SPA was set up to provide protection for rare and threatened birdlife in certain lowland heath locations, the provisions of which were agreed by GBC in its ‘Thames Basin Heaths SPA Avoidance Strategy’.

This strategy establishes zones to protect the SPA from the impact of new development, particularly from the damage caused by pets (dogs, cats, etc) of local residents to the habitats of threatened ground-nesting birds. Land within 400m of
the SPA is designated as an ‘Exclusion Zone’ where “there will be a presumption against additional new dwellings”. Since the Wisley Airfield site is immediately adjacent to Ockham Common for a significant length, much of this site falls within 400m of the SPA Exclusion Zone.

The remaining portion of this site falls within the 400m - 5km ‘Zone of Influence’ set out under the SPA policy, which requires developers to contribute a new SANG (‘Site of Alternative Natural Greenspace’) to mitigate for potential damage caused to the SPA from new development – the size of the SANG is a function of the scale of the development. In their previous planning application the developers proposed that the land within the 400m Exclusion Zone would provide their SANG contribution. If accepted as a SANG, this would only encourage the 5000+ residents of the new settlement to allow their pets access into this space, therefore defeating the objective of the SANG mitigation.

Even with the 400m Exclusion Zone in effect, the positioning of such a large site immediately adjacent to such an important protected space will inevitably have a major detrimental impact on the wildlife within it.

Accordingly, we OBJECT to Policy A35 on grounds of its material adverse environmental impact.

The impact of the Exclusion Zone and SANG requirements, together with the need to provide for the existing waste facility, means that the actual area of land available for housing development at this site is estimated to be around 43 hectares.

f) The development is totally out of keeping with local character, context & distinctiveness:

It is a key element of planning policy that new developments should be in keeping with the established pattern of development in the area. In the 2016 Proposed Submission Local Plan, GBC’s very first housing policy, Policy H1, requires that development should: “make the most efficient use of land whilst responding to local character, context and distinctiveness.” However, Policy A35 fails to do this.

With its proposal to build some 2,100 homes on and around the site of the former Wisley Airfield, Policy A35 will create a new settlement larger than any other in Guildford Borough, outside of Guildford itself. The nearby historic village of Ockham has merely 159 dwellings. It will be completely swamped by a development on such a scale.

Moreover, the design and density of the proposed development will be completely out of context with its surrounding area. Due to the restrictions of the SPA Exclusion Zone, the need for SANG provision and the land needed for the waste facility, the actual land area to be used for housing development under Policy A35 is estimated to be around 43 hectares. Therefore, with 2,100 homes proposed for this site, the overall housing density of the settlement area may be calculated at around 49 dwellings per hectare (‘dph’).

East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town, with some 1,760 homes. East Horsley presently has an overall housing density of 8.1 dph within its settlement area. Therefore, the proposed development under Policy A35 is six times as dense as the nearest settlement of a comparable size. The proposed development under Policy A35 therefore utterly fails to respond to local context and as such is in breach of GBC’s own Housing Policy H1.

The density of 49 dph proposed under Policy A35 is effectively an urban density appropriate for a metropolitan location. It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley. These villages have grown up organically over a thousand years. They contain many historic, listed or otherwise protected buildings as well as a range of residential housing, predominantly detached two-storey houses or bungalows. They are all picturesque villages with charm and character. Visitors come to the area to enjoy some of the prettiest villages and countryside in southern England, all within easy access of London. The character of this whole area would be irreparably destroyed if this development goes ahead.

Accordingly, we OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.
Concluding remarks

EHPC has major concerns about Policy A35. We consider this proposed policy to be a severe contravention of Metropolitan Green Belt rules. It will result in a new settlement of very low sustainability, it will have a major adverse impact on the infrastructure and environment across a widespread area and it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

Accordingly, EHPC strongly OBJECTS to Policy A35.

In the light of the recent referendum outcome, which will result in the UK leaving the EU, it is inevitable that the population and economic projections for Guilford Borough will need to be reduced.

We presume that GBC will in due course be making such reductions to its proposed housing projections to reflect these changed circumstances. In our opinion, the proposed development at former Wisley Airfield ought to be the very first site in the Borough that GBC should remove from its draft Local Plan as a result of the UK now proceeding to leave the EU.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

There are some small changes made in the revised Local Plan to Site Policy A35, Land at Wisley airfield in Ockham. However, these changes do not provide any justification for continuing to include this site within the revised Local Plan.

Having made a downward revision to its housing targets in the revised 2017 Local Plan draft, GBC is proposing to remove a number of development sites that were included in the 2016 version of the plan. The largest site removed is addressed by Site Policy No. 46 located in Normandy ('Land to the south of Normandy and north of Flexford') where a mixed used development of 1,100 homes had previously been proposed.

Whilst EHPC have no objection to the removal of this policy site per se, we would question GBC's decision-making process of site selection which chooses to remove this site from the local plan rather than the Wisley airfield site. Of all the larger sites included in the 2017 draft Local Plan, Wisley airfield has by far the worst sustainability. In the updated 2017 Sustainability Assessment provided by GBC's consultant AqCOM, Wisley airfield is by some margin the site with the poorest sustainability appraisal - it has no less than 8 red flags in the AECOM criteria list. By comparison Site No. 46 in Normandy is much more sustainable yet it is the one selected to be removed from the plan.

In rejecting a 2015 planning application for development at the Wisley site (proposed in advance of the Local Plan) G6C identified no less than 14 reasons to justify their rejection of the planning application, only one of which was the issue of it being in the Green Belt. The reminder highlighted a long list of deficiencies associated with this proposed development including its major impact on traffic flows, its severe environmental impacts, its total lack of existing transport and other infrastructure, as well as many other factors. According to GBC's consultation website, a total of 1,429 comments were registered in the 2016 Local Plan consultation about the Wisley airfield site - 97% of them were against its development. And yet GBC chooses to maintain Wisley airfield as a policy site in the 2017 revised Local Plan.

With a planning appeal due to be heard in September 2017, we trust that if the planning inspector decides to reject the appeal of Wisley Property Investments, then GBC will finally listen to the views of so many of its residents, accept the AECOM sustainability conclusions on the deficiencies of this site and remove Wisley airfield entirely from the Local Plan.
In previous consultations EHPC has already provided detailed reasons for our objections to the Wisley site and there is no reason to repeat them all again here. For these and the many more reasons already provided:

**EHPC strongly OBJECTS to Site Policy A35, the creation of a new settlement at the former Wisley airfield**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the proposed removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site would create an urban corridor stretching from London to Guildford.

The proposed plan does not meet the needs and desires of local communities, as shown through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the former Wisley Airfield, protected.

Serious concerns about development on this site have also been raised by major statutory consultees including Highways England, Thames Water, NATS and the Environment Agency.

I object to the continued inclusion in the plan of a site - the former Wisley Airfield - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

(After 14 months of consideration, and various extensions and amendments, Wisley Property Investments Ltd’s planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the detrimental impact on transport, local roads and road safety because of the following:

The development is too isolated, and even within the development itself too spread out to expect reduced reliance on the private car

The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

The congestion this traffic would cause not only on the narrow rural roads in Ockham but also the knock-on effect on the immediate and wider local area, exacerbated by wide vehicles including increased bus and HGV movements

The danger this traffic would pose to local cyclists and pedestrians, due to the lack of cycling paths and pedestrian footpaths and the space to provide them

The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: pslp172/4310  
**Respondent:** 8931105 / Elizabeth Murphy  
**Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( No ), **is Legally Compliant?** ( )

1. there is no clear justification for the removal of one strategic site over site A35;
2. the inclusion of A35 would not contribute to the 5-year housing projection due to constraints particularly in the provision of sewerage capacity;
3. the inclusion of a 10% buffer in the housing number over the plan period is unnecessary;
4. the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 is unclear and has been challenged by other experts including NMSS;
5. the transport evidence base including the SHAR 2016 Highways assessment report has been criticised by Mouchel for using out of date modelling software and is therefore unreliable;
6. GBC has directed the transport assessment to use prescribed vehicle movements from this site with no justification;
7. GBC has not as required, used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. The housing number is unsound and open to legal challenge;
8. the disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels;
9. policy S2 states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound;
10. of the quantity of space allocated for retail in the town centre which could be better used for residential development. Reliance on the Carter Jonas study update 2017 which includes demand for retail space from companies already in administration is strange to say the least;

16: the unfair imbalance of the plan across the borough as regards housing, becoming even more biased against the north east of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Because of the above and many other reasons cited by the Horsley Countryside Preservation Society, Ripley Action Group and Wisley Action Group all of whom I support, this plan is unsound and not fit for purpose.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of A35 Three Farms Meadow in the Local Plan because

- It is adjacent to the A.3 and junction 10 of the M.25, both of which are at capacity and need major enhancements and cannot take account of the A.35 traffic implications.
- It is adjacent to RHS Wisley which is scheduled for major modifications leading to 500,000 per annum visitor increase. These have not been included in any traffic studies.
- I object to the various changes in site area and boundaries over the previous plan draft. These require more than a regulation 19 consultation.
- I object to the retention of A.35 in the Plan despite thousands of objections and the refusal of the planning application by Guildford Borough Council.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I also wish to add that as a young person I object most vigorously to the inclusion of FWA/TFM on the basis that it has been for over 1000 years and remains to this day a working farm which provides much need agricultural supplies to the population of England. The land is also part of the greenbelt – the lungs of London. As a young person I believe that the elected officials in this borough have ridden rough shod over the concerns of over 20,000 residents in their drive to get large tranches of financial aid from large property developers and central government. This need for funding is transparently obvious to most residents while most of the ‘elected’ GB Councillors continue to deny this is the reason they have ‘opted’ for the ‘story’ that Guildford’s housing needs are as high as they suggest. Organic growth in the villages is what is needed not this fixation on building large (2000+ houses) numbers of houses on the middle of a farm in the middle of the rural village of Ockham.

The harmful effect on the Horsleys is magnified by the proximity of the so-called Wisley Airfield Site. This site is key to the maintenance of the Green Belt and building a new settlement here would contribute to the creation of an urban corridor through the Green Belt. It has high amenity, farming and historical value. A planning application has recently been rejected by GBC on numerous grounds. For all these reasons, the site should be removed from the Plan now.

I object to the proposal to allow the creation of a substantial new town at Wisley airfield.

The small changes made in the revised Local Plan to Site Policy A35 do not provide any justification for continuing to include this site within the revised Local Plan. I question GBC’s decision to remove certain other sites from the local plan’s development proposals, rather than the Wisley airfield site. Of all the larger sites included in the 2017 draft Local Plan, Wisley airfield has by far the worst sustainability. (See the updated 2017 Sustainability Assessment provided by GBC’s consultant AECOM; Wisley airfield is by some margin the site with the worst score – it is given 8 red flags in the AECOM criteria). In rejecting a 2015 planning application for development at the Wisley site (proposed in advance of the Local Plan) GBC identified 14 reasons to justify their rejection of the planning application, including: its being in the Green Belt; its major impact on traffic flows; its severe environmental impacts; its total lack of existing transport and other infrastructure; and many other factors. According to GBC’s consultation website, a total of 1,429 comments were
registered in the 2016 Local Plan consultation about the Wisley airfield site – 97% of them were against its development. So why has GBC chosen to maintain Wisley airfield as a housing site in the 2017 revised Local Plan?

A planning appeal on Wisley airfield is due to be heard in September 2017. If the planning inspector decides to reject the appeal of the current developer (Wisley Property Investments), GBC should finally listen to the views of residents; accept the AECOM sustainability conclusions on the deficiencies of this site; and remove Wisley airfield entirely from the Local Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
* There is very high pollution at Junction 10. The sensors record levels similar to Central London.

* The drainage in the area is poor. Most years there is flooding on the 82039 near the busy Wisley roundabout - the very spot designated as the main access point to the Wisley Airfield development!

* I am particularly incensed with all this devastation to our wonderful Green Belt making money for a Cayman registered company!!!

* I object to the inclusion in the Plan of The Thatchers Hotel and Wisley Airfield, both of which have been refused planning permission by GBC recently.

GBC needs to listen to the electorate and reassess its objectives! I would ask GBC to reconsider its plan to ruin our villages and attack our Greenbelt.

Wisley Airfield

I strongly object to the proposals for the airfield. I note modest changes have been suggested. However these do NOT justify including this site within the amended plan! This site has poor sustainability. The viability of this area so close to one of the busiest junctions on the M25, so close to one of the most important gardens in the UK, so close to Boldermere Lake and so close to an important conservation area really defies belief! There are enormous constraints on any infrastructure improvements in the area – there is poor drainage in much of the surroundings and even now if there is a problem at Junction 10 all local roads see the effect. East Horsley is the neighbouring village that would have to provide access to trains & shops and scope for improving the congested road structure here is very little limited. In this area most of the main roads go from east to west BUT most people wish to travel south to north. This results in much traffic travelling on the narrow village roads lined with sizeable houses; bottlenecks provide an extra hazard!

I wish to object to the Local Plan, particularly in regard to the former Wisley Airfield site which I believe is allocation A35.

The site could generate an extra 4500 cars which could lead to an impossible situation around the local roads and the A3.

The site is greenbelt, it is farmland and it is adjacent to the TBHSPA and is thus totally unsuitable for such a large development

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I grew up in Cobham, and then after university in Manchester and living for a while in London, I moved back to Surrey and to Ockham 10 years ago to start a family, and to allow my children to experience the benefits of the Green belt. I have been amazed and depressed by the sheer scale of development you have proposed as part of this local plan, and in particular the development on the Former Wisley Airfield that will effectively back on to our home and shatter our quality of living, and the lives of those around us in Ockham, Ripley and the Horsleys. This is a massive threat to local flora and fauna, there is no way that the local infrastructure can support it and the overall impact on this part of the borough will be devastating. No wonder this was thrown out when reviewed objectively by the Planning Committee.

In summary then I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the allocation Three Farms Meadows – allocation A35. I object to the proposed removal of this site from the green belt when no exceptional, very special or special circumstances exist. I object due to:

1. Unsustainable nature of site reliant on private cars and undeliverable public transport [in terms of unrealistic journey times/fabricated modelling which do not stand up to scrutiny]
2. Unrealistic assumptions that people will even walk from one end of the development to the other to go to the doctor, school, shop etc.
3. Unsustainable due to poor air quality impact on both housing and the SPA
4. Impact on views to and from the Surrey Hills AONB
5. The urban nature of the proposal – five storey buildings are out of keeping in the countryside [and some would argue are not even acceptable in Guildford town centre]
6. Road, sewerage, fresh water, gas and electric capacity does not exist.
7. Funding for infrastructure from Central government does not exist;
8. There is already a huge infrastructure deficit in terms of roads. This is not properly taken into account.
9. Impact on nitrogen deposition on the TBHSPA is not neutral and this allocation is therefore open to legal challenge.
10. No consideration has been taken of the current and future plans of the RHS Wisley. These should take priority over allocation A35. Roads definitely cannot accommodate an additional 500,000 visitors to the RHS and 5,000 residents of site A35. [this is without taking into consideration the huge number of houses planned in the Horsleys, Send and Ripley].
11. Robust objections to the planning application almost identical to this allocation were made by numerous statutory bodies including neighbouring Local Authorities.
12. Insufficient consideration has been taken of the historic houses in Ockham and Ripley and the Chatley Heath Semaphore Tower

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), Sound? ( ), is Legally Compliant? ( )

42. I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

43. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

44. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

45. It is further from railway stations than any other identified strategic site.

46. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

47. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

48. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

49. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

50. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   o The associated traffic increase from the RHS has not been taken into account.
   o The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

51. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis

52. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

53. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

54. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

55. Opportunity (3) should be common to all sites and is not unique to this site

56. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

57. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

58. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

59. I object to the removal of additional 3.1 ha from the green belt without any justification
60. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

61. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

62. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

63. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

64. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3000  Respondent: 8947105 / Roy Harrington  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

4. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Site A35 - Land at former Wisley Airfield Ockham

I OBJECT to this site being included. It is in the Green Belt and there are no exceptional circumstances for its removal.

Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development, so there can be no justification for including it in the local plan.

There is no need for housing on this site because the local plan housing target is incorrect and inflated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed strategic settlement (Policy A35) at the former Wisley airfield on each of the following grounds:

- It is not accepted that any residential development is needed at this Green Belt site, for the reasons set out above.
- Removing Wisley airfield from the Metropolitan Green Belt will encourage urban sprawl all the way from Guildford to Cobham and The site is only partly brown field (the old runways and apron area). The rest of the site is untouched agricultural land and should continue to be afforded Green Belt protection.
- The proposed Wisley airfield development will have a major adverse impact on wildlife and rare
- The development will have an adverse impact on the TBHSPA and it is unclear whether the limited provision of open space in the middle of the development will discourage the 4000+ new residents from intruding onto the TBHSPA, threatening the rare species it contains.
- The present airfield site is an important open space for local walkers and cyclists, who will not wish in future to visit what will become an industrialised building Again, this may put the TBHSPA under further pressure.
- The development will overload existing primary and secondary schools in the area, as the Infrastructure Development Plan states that there will be no provision of new school capacity before the development is substantially
- If the proposed waste processing facility goes ahead at Wisley it would be inappropriate to place residential developments close
- It is proposed that around 40% of the housing be affordable Wisley airfield is not a suitable location for large settlements of social housing given the lack of local employment opportunities, the very limited local community shops and other amenities proposed, the lack of local public transport links, and the difficult access without car to Ripley, the Horsleys, and further afield to Guildford, Leatherhead, and Woking. You are in danger of creating a ghetto of deprivation far removed from the services and support that a large social housing development would require.
- The proposal assumes that pedestrians and cyclists will be willing to walk or cycle 4-5km to either Effingham Junction or Horsley stations but this is wishful Pedestrians and cyclists will be exposed to traffic on existing busy narrow roads where there is no room for either pavement or dedicated cycle lanes and it is unlikely that walking or cycling this distance on busy roads would appeal to most residents of a Wisley airfield development.
- Instead it is likely that most residents would choose to use their cars to get to and from a train station - but neither Horsley nor Effingham Junction stations have sufficient car park capacity to absorb the several hundred additional commuter vehicles that might be expected once the development is The additional train commuter traffic would also overload the existing rush hour train services – but there is no scope to increase train size (due to platform limits) or rush hour train frequency (due to capacity constraints at Clapham Junction).

- The already severe local rush hour congestion at the A3/B2039 and A25/M25 junctions and elsewhere will be significantly worsened due to an additional 3-4,000 cars belonging to Wisley airfield residents on the The air pollution at these locations, already in excess of EU standards, will be correspondingly worsened.
- 3-4,000 new residents’ cars will also create additional congestion problems on the B2039 Ockham Road South in East Horsley, particularly at times of peak traffic Automatic traffic surveys by Surrey County Council regularly report peak hour traffic flows approaching 80% of the peak traffic flow on the main A246 – on a minor road which in places is too narrow for two HGVs to pass and too narrow even to justify its B-road classification according to Department of Transport standards. There is no practical scope to widen the road or provide alternative routes to cope with any significant increase in car traffic.
- The development will place additional strain upon the Horsley Medical Centre, which is already operating at or beyond capacity – it can take 3-4 weeks to get a GP It is unclear what expansion is possible at the site given its
proximity to a Designated Open Space (Kingston Meadow) and to the nearby storm drain. Car parking capacity at the Village Hall and Medical Centre is already insufficient to meet demand, and Kingston Avenue is frequently congested by overflow car parking.

The Wisley airfield development cannot therefore be regarded as ‘sustainable’ and should be withdrawn from the Plan for the reasons given above.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed development of 2100 homes and supporting infrastructure on the former Wisley Airfield. This site is the most open piece of Green Belt one could imagine and is visible from the Surrey Hills AONB. For brevity I will not detail the myriad of reasons why this proposed development is unsuitable as the Council clearly understand them full well since it refused this application unanimously only recently. This proposed development is of the wrong type, in the wrong place at the wrong time.

It must be removed from the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. Wisley

The Society objects to the proposed development of 2100 homes and supporting infrastructure on the former Wisley Airfield. This site is the most open piece of Green Belt one could imagine and is visible from the Surrey Hills AONB. For brevity I will not detail the myriad of reasons why this proposed development is unsuitable as the Council clearly understand them full well since it refused this application unanimously only recently. This proposed development is of the wrong type, in the wrong place at the wrong time. It must be removed from the Plan.

The Ripley Society exists to promote and encourage, for the benefit of the public the improvement, protection and preservation of the countryside of Ripley together with the surrounding villages enabling better development of the rural environment. Originally affiliated to the Surrey Amenity Council and more recently to the Surrey branch of the Campaign to Protect Rural England, it als identical objectives of the CPRE nationally.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy A35 and Policy S2

We object to the Former Wisley airfield being included in Policy S2 as a strategic development site.

We also object to Policy A35 which sets out details of the proposal to develop the former Wisley airfield.

The main reasons for our objection on these policies are as follows:
1. Inappropriate development in the Green Belt, and no exceptional circumstances being evidenced for the removal of the land from the Green Belt.
2. The site does not exhibit the necessary sustainability, as shown by adverse sustainability appraisal reports.
3. Air quality at the site is in excess of EU permitted levels.

4. The increased volume of road traffic on roads which are already severely congested, and which are regularly and frequently used by leisure cyclists.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )
1. I object to the proposal to create a settlement on the former Wisley Airfield (Site A35). This is both an unjustified breach of the Green Belt and folly. The size of the site and proposed large population will inevitably have a damaging impact on the adjacent Thames Basin Heaths Special Protection Area where all three vulnerable species, woodlark, Dartford warbler and nightjar breed. Damage will come not only from pressure of people but the lethal impact of their dogs and cats. The required regulatory buffer area will not be sufficient in reality for a site of this size.

2. Even more serious is the lack of proper infrastructure and transport links. Despite the words about promoting walking and cycling the reality will be that this will be an isolated settlement of commuters without sufficient on-site employment and dependent on cars. The inadequate local access to the site has already been exhaustively examined and rejected, it has not changed. The suggestion that a 5 kilometre cycle ride is acceptable is fantasy in terms of families with children, shopping, bad weather and dangerous local roads. It makes no sense to create a large car-dependent settlement next to the overladen M25 and A3 where the pollution levels are already well above permitted levels and traffic congestion is chronic. The plan makes no serious proposals for the provision of basic services such as electricity (where will the generating capacity come from?) water and sewage which will be well beyond present capacity. There is nothing sustainable about this proposal.

**CPRE OBJECTION TO SITE POLICY A35 : LAND AT FORMER WISLEY AIRFIELD**

CPRE objects to the continued inclusion in the draft Local Plan of the Former Wisley Airfield (FWA) now known as the Three Farms Meadows (TFM). This development was rejected unanimously on 8th April 2016 by the GBC Planning Committee when it was submitted as a planning application prior to the draft Local Plan being published. This decision was recommended by GBC Planning Officers. We can see no justifiable grounds for this development to now be reintroduced. The arguments for its refusal as a planning application are still as valid as before: Our objection to the former Wisley Airfield development reflects exactly our overall opposition to the draft Local Plan in which over 70% of new housing is to be built within the Green Belt. The GBC proposal conflicts with promises made to the electorate in this context. In our view there is ample brownfield land available in the urban area which should be used for housing instead of attention being concentrated on unsustainable sites in countryside outside the town. No exceptional circumstances have been established to warrant removing land from the Metropolitan Green Belt, which is characterised by its openness and permanence, to permit urban sprawl to spread onto agricultural land in attractive countryside.

We object in particular to the disproportionate allocation of housing to Green Belt land in this segment of the borough. Over 23% of the draft Local Plan's new housing is supposed to be provided in the immediate vicinity of Ockham, Ripley, Send and the Horsleys, and of this total 65% is allocated to the former Wisley airfield.

CPRE objects to the way in which the draft Local Plan for this site will overwhelm the historic rural village of Ockham nearby - which has only 159 residential houses - and destroy its attractive character and identity that depends on its many listed properties, absence of street lighting, and very few pavements. This charming small community which can only be accessed by narrow sinuous lanes will be sacrificed to the proposed new development units.
immediate vicinity of more than 2,000 houses with high density urban buildings of up to five storeys in height spread out in an urban sprawl of unattractive new construction in open agricultural countryside.

We object to the statement that the new development will result in a significant shift to cycling and walking as a means of conveyance. It is incorrect to suggest that such an isolated built-up location would reduce reliance on private cars as a means of transport to Guildford and neighbouring villages and railway stations. A proposed development of 2,068 homes will result in an estimated 4,000 additional cars on the roads. The added congestion that this will cause on the narrow country lanes in Ockham and surrounding areas will be a source of increased safety hazard to any cyclists and walkers. This will be made worse by the likely increase in bus and HGV movements from the new location with its additional school traffic. No footpaths or cycle lanes are present along these rural roads.

We object to any increase as a result of the proposed new development to the already severe congestion on the A3 and M25 which will require significant infrastructure enhancements.

Work in this context to the A3 South of the site is not expected to be begun until 2019 at the earliest.

We also object to the way in which concern about the harm caused by traffic on the A3 and M25 to Air Quality has been treated with insufficient attention. Air pollution is already known to be a problem in many parts of the borough which needs to be tackled. We understand that for example the A3/M25 junction exceeds EU permitted levels and is comparable to air pollution in Oxford Street in Central London where only diesel traffic is present. The additional congestion that will be generated by the new development and by the proposed expansion of daily visitor attendance at the Royal Horticultural Gardens will only make this problem worse. The relevant authorities are well aware of the adverse impact on the health of local residents and plant life that increased traffic causes in terms of air pollution and will need to give this more urgent priority.

We object to the lack of consideration given to the environmental and ecological value of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and a Site of Nature Conservation Interest (SNCI) which will all be harmed. Traffic noise disturbance has been shown to have a negative impact on bird life which is of particular concern with regard to the SPA.

CPRE notes that concern has been expressed by a wide range of authoritative organisations about this development including Highways England, Thames Water, NATS and the Environment Agency.

The Minister of State has made it clear in a recent statement that housing need and/or demand is not sufficient grounds for encroaching onto open Green Belt countryside and that it is up to “local people” to express their objection to development of this kind. The proposed Local Plan does not meet the needs and desires of local communities. The two top responses in the Ockham Parish Plan call for:

1. Access to the countryside and clean air
2. The peace and quiet of wide open spaces

Over 90% of the local people in this community wish to see both the village’s historic features maintained and the former Wisley Airfield now known as the Three Farms Meadows protected.

CPRE agrees with them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
OBJECTION TO SITE A35

Since I was born in Ockham and lived the early part of my life in Effingham I want to object at the enclosure of the Three Farms Meadows site in the Draft Guildford Local Plan:

The grounds for my objection are as follows:

1. The application for this site was refused by the GBC Planning Committee unanimously and therefore should not have been included in the GBC draft plan.

1. The village of Ockham should be protected against the overwhelming damage that will be done to it should this mixed use development be allowed to proceed.

1. There will be a loss of Green Belt agricultural land at the Three Farms Meadows site if this proposal goes further.

1. The increase of car traffic from this development will have a damaging effect on the congestion at Junction 10 of the A3 and the M25.

1. Air Pollution on the A3 and the M25 will increase if 2,000 more houses are built at the Three Farms Meadows site and their cars start to use the A3 and other local roads.

1. The site is a unique area of countryside with productive farming and is a home for a broad spectrum of wildlife, flora and fauna.

1. Transport links are inadequate and the two nearest stations are several miles away. Their car parks are already full by the end of the morning rush hour.

1. The site is unsustainable as there are no employment opportunities on Three Farms Meadows for the vast majority of the people when they move there.

1. The site is 300 acres in size of which 75% is open countryside with magnificent views in all directions.

Please will you make sure that this objection is recorded and take note of my objection.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
both the Horsleys and Ockham. My plea is to please do not ruin the area as is currently proposed in your draft local plan to which I strongly object for the following reasons:

1. I object to a plan which proposes over 70% of new housing to be built within the Green Belt.
   1. I object to the removal of the former Wisley Airfield from the Green Belt
   2. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment as far too high.
   3. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys.
   4. I object to the threat that the local plan poses to the historic rural village of Ockham.
   5. I object to the threat that the local plan poses, as it will have a massive influence on planning decisions in the Boroughs of East and West Horsley.

(a) The Boundaries for our villages will be greatly enlarged.

(b) The village areas inside these boundaries will be removed from the Green Belt.

(c) The Horsleys are likely to have more than 533 new houses.
   1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the all sites, both Ockham and the Horsleys.
   2. I object to the fact that air quality concerns have not been taken seriously, especially in Ockham
   3. I object to the fact that the proposed plans do not meet the needs of the local communities in both the Horsleys and Ockham.
   4. I object to the inclusion of the Wisley airfield site in the plan, where a planning application has been unanimously rejected.

To sum up I strongly object to the proposed major suggestion of altering the GREEN BELT, which we were assured by our MP was not a requirement of the Government.

Further the infrastructure in both Ockham and the Horsleys is totally inadequate to consider anything but very modest development as has been happening over the last fifty years. Even with this our infrastructure is under considerable pressure and without any development needs upgrading.

It must be appreciated that any major development at Ockham will greatly affect all facilities around that area especially the Horsleys.

The Plan must be amended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

I have major concerns about this proposed development and has objected against prior planning applications at this location. We consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

I strongly object to Policy A35 and will provide a more detailed submission outlining my arguments against this policy in a separate letter.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heath SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in
Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the changed Policy A35 Wisley in respect of the identified mitigation to address the impacts on Ripley High Street and surrounding rural roads comprises two new slip roads at A247 Clandon Road (Burnt Common) and associated traffic management. This will not in any way mitigate the impact on Ripley High Street since traffic will need to pass through Ripley to reach Wisley.

Previous objections therefore still stand for this changed policy concerning the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated.

There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.

2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.

3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

5. Absence of adequate traffic data.

6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.

7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.

8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I strongly object to the building of over 2000 houses on the former Wisley Airfield. This will destroy Ockham conservation together with the impact on listed buildings and will create a major impact on the Horsleys, Effingham and Cobham. This project would contribute to major traffic chaos that already exists on the A3 and M25. Local roads will be unable to cope with the additional volume of traffic. There is no existing public transport and the railway stations are some distance away. I gather that it has been suggested that residents will be coached to Effingham and Horsley stations. With the school coaches on the same roads can you envisage the absolute chaos that will prevail.

Please find enclosed representations on the Proposed Submission Local Plan: Strategy and Sites, submitted on behalf of our client, Wisley Property Investments Ltd (WPI).

The Council will be aware that WPI control land at Wisley Airfield, which has been proposed for allocation within draft allocation A35 in the Proposed Submission Local Plan.

The Representation highlights and where necessary expands upon representations submitted by WPI at the Issues and Options stage of the Local Plan process in November 2013 and the subsequent Strategy and Sites consultation in September 2014.

The representations provide further technical justification for the proposed new settlement allocation at Wisley Airfield (draft policy A35). The proposed allocation and removal of the site from the Metropolitan Green Belt is fully justified, and will deliver homes to meet the urgent and pressing needs.

WPI’s representation is structured in the same order as the draft GBLP. The representation conveys the due merits of land at Wisley Airfield throughout. An executive summary is provided.

The representations are supported by 11 technical appendices. These include relevant appendices which act to support the proposed allocation of a new settlement, and demonstrate that all of the reasons for refusal associated with the planning application (ref. 15/P/00012) are either capable of being addressed, or have been addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Executive Summary

• Wisley Airfield represents an exceptional development opportunity for a new countryside community. It is the proposed new sustainable settlement within Guildford Borough. Wisley Property Investments Ltd (WPI) strongly supports the draft allocation of the Wisley Airfield site for a sustainable residential-led development of a new settlement (draft Allocation A35) within the pre-submission Guildford Borough Local Plan (GBLP). The draft allocation and removal of the site from the Metropolitan Green Belt is fully justified, and will result in the delivery of homes to meet the urgent and pressing needs.

• The Masterplan and Design Vision for Wisley was first submitted to Guildford Borough Council (GBC) in December 2014 (planning application reference 15/P/00012). The Masterplan has been further enhanced following representations made on the application. The Masterplan has been created following over three years of work, as informed by ongoing engagement with key consultees, stakeholders and the public. This is shown on the Concept Plan included within these representations (Appendix 2). WPI held a series of public engagement events in May 2014, and has hosted Project Engagement Panels. In addition to the comments made in 2014 (63% of respondents were either neutral or positive about the proposals), updated telephone surveys undertaken in March 2015 indicate that 46% of respondents support the proposals, and 16% are neutral. A further street survey undertaken soon afterwards demonstrated 65% support for the proposals. Most recently, a public survey undertaken in May 2016 of people under 40 demonstrated 76% as either supportive or neutral and only 15% against the proposed development, with 76% believing that there are too few affordable homes in the Borough (see Appendix 10).

• With over 70 acres of concrete/hardstanding, Wisley Airfield contains the largest previously developed site within the present Guildford Borough Green Belt. Out of all the strategic sites allocated within the GBLP, in
its entirety, it contributes the least to the four purposes of the Green Belt, is outside the AONB and is least constrained by highways (see Appendices 3 and 8).

• Based on the updated ‘objectively assessed housing need’ of 693 dwellings per annum (as identified within the September 2015 SHMA), GBC proposes an achievable suite of development allocations, and proportionate amendments to the Green Belt boundary, including new areas of Green Belt. This will facilitate the land supply over the plan period. The Wisley new settlement can deliver circa 210 dwellings in the next five years of the plan period (2016-2021). This figure has been adjusted to allow for the implementation of the significant green infrastructure provision (Suitable Alternative Natural Greenspaces - SANGs), and reflects the prospect of a resubmission planning application alongside the progress of the GBLP.

• The Wisley Airfield site is an obvious location for growth and, as an assembled site, it is available for immediate development and could make a significant contribution to Guildford’s five-year housing land supply.

• A community of approximately 2,000 homes at Wisley Airfield would be fourth in the Guildford Borough settlement hierarchy, providing the sustainable services and amenities associated with a Sustainable Settlement (see Appendix 8).

• The settlement would deliver around 6,000 sq m of employment and retail floorspace, potentially accommodating some 350 full time equivalent permanent jobs (on top of those employed in the development’s construction) and include facilities to support home working, further reducing travel demand. Additional consumer spending in the local area (excluding housing, fuel and power costs, VAT and leakage), based on 2,000 dwellings, would be around £31.86m per annum. The Housing & Planning Act 2016 makes clear that financial considerations are relevant material planning considerations.

• The development would complement existing villages, providing additional, well connected local infrastructure including a new primary and secondary school, leisure and health provision. This would relieve the pressures on overstretched existing services and amenities, such as schools, and contribute positively to the Surrey County Council (SCC) Surrey Infrastructure Strategy (2016) and the Appendix C Infrastructure Delivery Schedule of the GBLP. The new settlement would, in particular, address wider education needs, as outlined in Appendix 5.

• Wisley Airfield is within five miles of nine mainline railway stations including Woking. The development would provide in-perpetuity bus provision, secured through a Community Trust, potentially delivering a 7-10 minute target frequency (see Appendix 11). This would greatly improve sustainable transport access both to the development and to the local villages.

• Wisley Airfield has consented direct access onto the strategic road network at the A3 Ockham Interchange. Its development would provide a package of measures, deliverable in the short term, to directly improve a section of the A3, significantly reducing accident costs and improving journey time reliability for the region. Transport modelling, based on the SCC ‘SINTRAM’ model, confirms that its proportional contribution towards improvements at M25 J10 would assist in reducing congestion and improving safety. The new settlement would complement the proposed Road Investment Strategy 2 (RIS 2). The relevant transport technical background is provided in Appendix 3.

• The Wisley Airfield site would be a sustainable, successful place that promoted wellbeing, developed by understanding what people need from the places where they live and work. The proposals engender social sustainability by combining design of the physical realm with design of the social world – infrastructure to support social and cultural life, social amenities, systems for citizen engagement, and space for people and places to evolve. The sustainable communities created would meet the diverse needs of existing and future residents, their children and other users, contribute to a high quality of life and provide opportunity and choice.

• The new settlement would also enable the delivery of significant SANGs. The SANGs Strategy submitted with the planning application met with no objection from Natural England. An ecology technical report is included in Appendix 4.

• WPI is working to resolve the outstanding matters arising from the determination of application 15/P/00012, as outlined by the Key Considerations provided in Appendix 1. None of the reasons for refusal question the suitability of the proposed allocation.

Introduction

This Representation has been submitted by Wisley Property Investments Ltd (WPI) as part of the consultation on the emerging Guildford Borough Local Plan: Strategy and Sites (Proposed Submission Version, June 2016) (GBLP). The Representation highlights, and where necessary expands, upon representations submitted by WPI at the Issues and
Options stage of the Local Plan process in November 2013 and the subsequent Strategy and Sites consultation in September 2014.

The Wisley Airfield site was originally promoted to allow for the determination of a planning application concurrent with the Local Plan process. The application, ref 15/P/00012, was submitted in late 2014 to support the emerging Local Plan, the production of which was subsequently delayed. The application was determined in April 2016. None of the reasons for refusal are insurmountable. The Key Considerations are outlined in Appendix 1.

WPI is the majority landowner within draft Allocation A35. Wisley Airfield comprises circa 115 hectares (ha), of the circa 132 ha allocation. WPI has been in liaison with the adjoining landowner who controls Bridge End Farm to the south. It is understood that this land is also available for development.

Following the submission of the application, WPI continued to liaise with the full range of statutory consultees and stakeholders, including Guildford Borough Council (GBC) and Surrey County Council (SCC). The representations made on the application, alongside the Environmental Statement (ES) and technical evidence submitted by WPI, have acted to further demonstrate the delivery of the new settlement, and support the proposed Local Plan allocation. During the consultation process on the application, further information was required to refine and modify the proposals. To this end an addendum submission package was submitted in December 2015, to clarify and provide further evidence in support of the planning application for a new settlement at Wisley Airfield.

This Representation provides further technical justification for the proposed new settlement allocation at Wisley Airfield (draft policy A35). The proposed allocation and removal of the site from the Metropolitan Green Belt is fully justified, and will deliver homes to meet the urgent and pressing needs.

The Representation is structured in the same order as the draft GBLP. The responses within the Representation are supported by 11 technical appendices. These include relevant appendices which act to support the proposed allocation of a new settlement, and demonstrate that all of the reasons for refusal of the application are either capable of being addressed or have already been addressed.

Table 1.4 outlines a summary of all of the representations made by WPI.

WPI is in broad support of the GBLP. In summary, WPI has the following principal technical concerns with the GBLP:

- Clarity should be provided in respect of the proposed housing policy (draft policy S2) to ensure that the full housing requirement is outlined in the policy, in addition to a credible phasing of the housing allocations to enable a rolling five-year supply of housing. To enable the objectively assessed needs (OAN), the housing policy must be based on the delivery of ‘at least’ 13,860 dwellings (see Paragraph 3.10 onwards).
- The draft allocation of the Wisley new settlement should be effective and implementable. The proposed SNCI designation over the whole of WPI controlled land is unjustified, and an amendment is suggested (see Appendix 4). It should also be made clear that it is not the purpose of a Local Plan to make waste allocations, and thus the present waste notation is merely reflective of what the present 2008 Surrey Waste Plan includes (see Appendix 6). Further technical concerns are outlined, notably with respect to the convenience retail provision outlined by the emerging policy.
- The delivery of affordable housing should be expressed as a ‘target’. The provision of land at nil land value is unevidenced and unlikely to be effective (see Paragraph 3.29 onwards).
- The requirement for all development to connect (or safeguard) Combined Heat and Power (CHP) is unjustified and likely to be economically unviable or technically unfeasible. The GBLP should reflect the Housing Standards Review and not repeat or seek to conflict with Part L of the Building Regulations (see Paragraph 3.73 onwards).
- The Sustainability Appraisal (SA) is broadly considered to be robust and soundly prepared. It demonstrates the need for all of the major strategic site allocations (as per Option 4). The SA should be enhanced, to include an accurate description of the Wisley new settlement to be consistent with the Housing Delivery Topic Paper. In addition, a further SA Option which includes the Wisley new settlement as OAN plus 6% buffer (an ‘Option 2A’) should be tested. This would provide additional support to the Local Plan (see Paragraph 2.3 onwards).

Wisley Airfield: A Sustainable New Settlement within Guildford Borough
Wisley Airfield contains the largest previously developed site in the Guildford Borough Green Belt. It is an exceptional opportunity for the Borough. Using the principle of sound planning, and a contemporary approach to architecture and landscaping, the community created would not only contribute significantly to the pressing local housing needs, but also create a settlement of distinct character, with facilities and amenities to benefit the wider villages in the area. The infrastructure delivered with the proposal would also provide potential county-wide benefit, for example the open spaces created to mitigate the Ockham Common Special Protection Area (SPA) and in respect of infrastructure enhancements to the A3 corridor to London.

This Representation provides further technical evidence to update that which accompanied the representations of November 2013 and September 2014. The evidence provided in respect of the Guildford Settlement Hierarchy (May 2014) demonstrates that a new settlement at Wisley Airfield has the potential to be a Rural Service Centre, fourth in the settlement hierarchy, aligned to East Horsley and behind only the major established settlements of Guildford town and Ash/ Tongham (see Appendix 8). GBC through the draft allocation has recognised that the site is far from isolated, and is well connected to other settlements in the locality.

Draft Policy A35 outlines a requirement for the provision of a local centre, employment floorspace, a new primary/secondary school, community and health centres, shops and open spaces. These aspects are supported by WPI, and form part of our site promotion as outlined by the Concept Masterplan (Appendix 2). The provision of these facilities and services will contribute to the delivery of a sustainable development and increase the ‘self containment’ of the new settlement.

Updated evidence is also provided on transport (Appendix 3) which demonstrates a potential highways mitigation package, and substantial public transport provision/enhancements to enable the delivery of a new settlement at Wisley and to support sustainable transport at a number of existing villages. This is based on the emerging Infrastructure Delivery Plan (IDP), Appendix C (Infrastructure Schedule) and the Surrey Strategic Highways Assessment (2016). The site is very well related to Effingham Junction Station and is within five miles of nine railway stations in total, with direct access onto the strategic road network (which benefits from consented improvements). In addition, the development would provide improvements and extensions to existing bus routes, potentially delivering a 7-10 minute target frequency on some services, with funding to encourage the use of buses, for example by offering enhanced levels of frequency (this is based on in-perpetuity funding as set out in Appendix 11). This would greatly improve sustainable transport access both to the development and to the local villages. Critically, by virtue of its location on the London side of Guildford town, the site would have reduced impacts on the constrained A3 corridor through Guildford town when compared with selected other proposed allocations.

Further comment is made on the detail of the GBLP in respect of a need for the plan to positively recognise those key strategic items of infrastructure (as ‘projects’) which need to be delivered to enable the whole plan (to 2031). Improvements to the A3 corridor will be best undertaken via a collaborative approach involving GBC, SCC and the Highways Agency. Minor alterations to the GBLP Appendix C (Infrastructure Schedule) are therefore suggested. Commentary is also made with regard to the GBC Topic Paper ‘Infrastructure and Delivery’.

In landscape terms, the site is well contained, as recognised in the independent Green Belt and Countryside Study (GBCS) undertaken by Pegasus (April 2014 update) on behalf of GBC. As outlined in WPI’s previous representations, detailed visual impact assessment work has been undertaken to inform the Concept Masterplan (Appendix 2). An update to the Green Belt assessment work is provided in Appendix 8. In the broader sense, the site is located relatively far from the nearest settlements, it is not within an AONB, and is well screened in landscape terms. The findings of the GBCS are supported in principle. WPI remains of the opinion that Wisley Airfield is one of the proposed allocations in the GBLP that contributes to the fewest of the purposes of the Green Belt. It is low to medium sensitivity, as outlined on Table 1.1.

In respect of Ecology, the proposals result in a substantial quantitative increase in habitats, supporting ecological objectives. In addition, the previous planning application received no objection from Natural England (see Appendix 4). WPI objects to the unjustified allocation of the whole of Wisley Airfield as an SNCI. Alternative evidence of a more robust SNCI area is provided in Appendix 4. This should also be judged in the context of the quantitative/qualitative improvements to the ecological baseline proposed, which may be brought forward in accordance with draft Policy I4 (Green & Blue Infrastructure).
The Concept Masterplan contained in Appendix 2 has been created following over three years of work, as informed by ongoing engagement with key consultees, stakeholders and the public. WPI held a series of public engagement events in May 2014, including Project Engagement Panels and has undertaken regular public liaison and surveys since (the history of the consultation is summarised by Appendix 10). The Masterplan outlines the sustainable mix of uses proposed, and extensive open spaces (over half of the site area). Crucially, the design vision is centred on the creation of a unique identity for the new settlement at Wisley, exploiting the opportunity to transform redundant, previously developed land into much needed housing in a unique landscaped setting. All of the community uses are proposed on WPI controlled land, which forms the vast majority of the proposed allocation (circa 115 ha of circa 132 ha).

The development of the Wisley Airfield site creates the opportunity to enable a county-wide recreation area comprising walks and ecological features. The Suitable Alternative Natural Greenspaces (SANGs) are a major opportunity arising from the development, reducing recreation pressure on the adjacent Ockham Common SPA.

Overall, the development would provide much needed affordable homes to meet local needs. The site could provide an outlet for a mixture of all tenures to suit identified needs, such as starter homes (if appropriate), private rented, intermediate and social tenures (up to 800 dwellings). The site would also accommodate some of the Gypsy & Traveller requirement for the Borough; in total up to eight pitches are proposed to conform to emerging policy A35.

Difficult decisions need to be made through the production of a Local Plan, notably in a Borough which is presently 89% Green Belt. Given the irregularity of Green Belt Reviews (the NPPF defines that Green Belt boundaries only be altered in exceptional circumstances, looking beyond the plan period), WPI believes that in broad terms the correct balance has been struck in the GBLP, which results in what is thought to be only circa 1.7% of the Green Belt being released. Through the allocation of justified additional Green Belt at Ash and Tongham, the Borough has achieved a solution which ensures that land which contributes the most to the purposes of the Green Belt is retained and wherever possible brownfield sites such as Wisley Airfield have been allocated for development.

The delivery of a new settlement at Wisley Airfield shall also assist with the protection, where justified, of the Green Belt elsewhere, for example some existing villages.

There are considerable housing needs in Guildford, as outlined in the West Surrey Strategic Housing Market Assessment (SHMA) – which covers Guildford, Waverley and Woking Boroughs. The SHMA evidence indicates that affordability pressures in the West Surrey Housing Market Area (HMA) are significant. House prices are substantially above the South East average. Entry level house prices in Guildford are 10.92 times the typical earnings of younger households, compared to a ratio of 6.45 nationally and demonstrates Guildford Borough as one of the least affordable in the country as shown in Figure 1.2 (Topic Paper: Housing type, tenure and mix).

The updated SHMA is dated September 2015. WPI supports the production of this joint SHMA, which is necessary to assess housing need across the whole housing market area, an approach which is consistent with the National Planning Policy Framework (NPPF). The SHMA outlines an OAN in the order of 693 dwellings per annum (dpa), which equates to the need for ‘at least’ 13,860 dwellings in the period 2013-2033 (693 x 20 years).

As GBC is aware, the existing developable and deliverable land within the urban areas is constrained. Given this, the allocation of Wisley Airfield is justified on the basis of meeting housing needs as part of the overall package of allocations, which total circa 12,400 dwellings over the plan period. A reasonable contingency over and above the OAN is included in the GBLP, once existing commitments, completions and an assumed windfall is taken into account, though the evidence included in the Land Availability Assessment (LAA) should be more clearly outlined in the GBLP, including a housing trajectory. This forms a technical objection as outlined in this Representation from paragraph 3.10.

The Wisley Airfield site is clearly the most deliverable strategic site within the Borough on the basis of the evidence and work undertaken to date, which includes the submission of the required details to support an outline planning application. In respect of enabling the early delivery of the housing trajectory, it should be noted that Wisley Airfield is progressing ahead of both Blackwell Farm and Gosden Hill. WPI makes no objection to either site, but notes the relative highways challenges associated with their delivery, as sites closer to the congested part of Guildford town, and the location of Blackwell Farm adjacent to the AONB. In addition, the proposal in respect of land at Normandy and Flexford is, in relative terms, less sustainable than the proposal for Wisley Airfield, as it proposes fewer dwellings. Neither of
these sites is known to have progressed through even the early stages of planning, and hence in delivery terms both sit behind Wisley Airfield which is better placed to meaningfully contribute to the Five Year Housing Land Supply.

In respect of meeting identified affordable housing needs, the Wisley new settlement may account for up to 25% of annual need within the Borough (during the implementation period, 2018-2030), or circa 14% of total needs over the plan period. It is a significant allocation, ready and assembled for delivery.

Savills, acting as planning consultant, continues to engage in positive dialogue with GBC and SCC and wider stakeholders so that this opportunity may be realised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 160715 Local Plan Reps - July 2016 and Appendices.pdf (11.0 MB)

Site Allocations – Policy A35 (including Former Wisley Airfield Map (Appendix G))

Object (not effective, justified nor positively prepared in respect of NPPF paragraph 182)

WPI only wishes to comment on one draft site allocation, A35. WPI makes no objection or comment on any other proposed site allocation.

Site Allocation draft policy A35 is strongly supported by WPI. The draft allocation is an obvious location for growth, well connected to highways and public transport (railway stations) to enable the delivery of a rolling five-year supply of land. A large proportion of the site is previously developed, circa 77 acres of the WPI controlled land. The Proposals Map allocation is also strongly supported.

The draft allocation comprises 114.7 ha of land in WPI control, and an additional circa 16.9ha of land allocated to the south, which is within Bridge End Farm. WPI understands that this land is available for development, and is being promoted separately. The constituent parts of the draft allocation to enable the delivery of the new settlement are entirely within WPI land control. The additional land at Bridge End Farm provides additional Green Infrastructure and residential land, not required to deliver the new settlement, but nonetheless proposed as part of the allocation to assist with overall Borough-wide housing delivery. This also reflects the Green Belt & Countryside Study (2014), which assessed the Airfield and Bridge End Farm together, Parcel C18-A, and provides the evidence base for the release of the land from the Green Belt.

Appendix I outlines a summary of Key Considerations relevant to the application 15/P/00012 and the delivery of a new settlement at the Wisley Airfield site. This also relates to paragraphs 4.110 to 4.116 of the Housing Topic Paper (June 2016). The Key Considerations support these representations, and introduce a series of Technical Reports.

The delivery of the new settlement would achieve many of the objectives outlined by Appendix C Infrastructure Schedule and the Surrey Infrastructure Study (2016), as outlined in Table 3.3.

The allocation of the Wisley new settlement has been achieved through the iterative development of a bespoke package of impact avoidance measures, including Suitable Alternative Natural Greenspace (SANG) provision and Strategic Access Management and Monitoring (SAMM), to ensure that any contributions towards likely significant effects on the
Thames Basin Heaths SPA are avoided, in line with Proposed Policy P5 (discussed further below) and Policy NRM6 of the South East Plan.

The proposed package of impact avoidance measures has been agreed with Natural England, who has confirmed that subject to their delivery, it is satisfied that contributions towards a likely significant effect can be avoided. Accordingly, Natural England raises ‘no objection’ to the proposed development which is the subject of planning application 15/P/00012 brought forward in anticipation of the need to deliver this allocation, as detailed in Appendix 4.

WPI, whilst supportive of draft Allocation A35, does however wish to make some technical points of objection.

**Approximate Delivery:** The allocation refers to ‘approximately’ 2,000 dwellings. The GBLP should include a definition of what this means to be effective. For example, +/- 10% is typically considered appropriate to allow sufficient flexibility (for example the Horsham Planning Framework). WPI agrees that flexibility on this point is worthwhile and justified. In addition, the policy effectively allocates 2,100 dwellings, 100 of which are sheltered/ extra care use. In WPI’s opinion, this use should be C2, as this would not trigger the requirement for SANGs for those units (as a C2 use may be suitably controlled with pet restrictions). The GBLP should be clear on this point as it presently outlines the use as ‘C3’.

**Cycling Enhancements:** WPI objects to the Infrastructure Schedule (Appendix C) provision ‘AM3’ with respect to off-site cycle enhancements. Many of these are not deliverable, and do not form part of the sustainable transport strategy, which is based on bus transport. Appendix 3 includes a technical transport update. As part of our ongoing liaison, WPI has had further discussions with Surrey County Council Highways regarding off-site cycle improvements. This is in the context that the sustainable transport measures for the delivery of the Wisley new settlement will be focused predominately on enhanced bus provision.

Draft allocation A35 outlines that off-site network enhancements are required to Effingham Junction, Horsley and Ripley. Off-site cycle enhancements may be provided where deliverable (i.e. within highways controlled land). WPI considers that the measure of the requirement based on the ‘average cyclist’ is ambiguous. The requirement should be deleted. Other routes are still being investigated, but most other off-site improvements would require the lead of SCC through the Highways Act 1980 and other legislation. It would be appropriate for the Local Plan to recognise this.

**Secondary Education Need:** The need for a secondary school on the site has been identified now, as indicated by the available infrastructure evidence (see Table 3.3). In addition, WPI has provided Appendix 5, which outlines clearly the needs generated by the new settlement, which mitigate the impacts and provide wider benefits. Policy A35 states that, “Secondary educational need will be re-assessed at the time a planning application is made, at which time any recent new secondary school provision will be taken into account”.

**Retail:** Based on the updated retail evidence, see Appendix 7, there is clearly sufficient justification for additional convenience retail on the basis of likely spend of the new residents of the Wisley new settlement / retail business turnover to justify a greater scale of convenience retail. This could be in the order of 1,500 sq m total, to sustain an ‘anchor store’. On the basis of the emerging masterplan (see Concept Plan, Appendix 2), the village centre may accommodate total A1-A5 provision of circa 2,240 sq m. On the basis of the evidence submitted (retail and land capacity) the present restriction of 500 sq m of convenience is unjustified and unlikely to be sound. Therefore WPI considers that the total convenience retail should be increased by 600 sq m, to 1,200 sq m. This would create a centre more likely to meet the needs of the new residents and thus would also have sustainability benefits.

**Design to Site Boundaries:** The policy principle should have regard to the overall draft design policy D1 (Making Better Places), noting WPI’s comments on this draft policy with respect to the opportunity created by a new settlement.

**Access/ Egress:** The site benefits from consented and implemented site access. The proposed measures to enhance Ockham Interchange and provide primary site access from this location are included in the Transport Technical Note (Appendix 3). There is no need for this provision in the policy, as any constraint has been resolved. It is noted that the Strategic Flood Risk Assessment (SFRA) acts as relevant evidence to support the GBLP. WPI notes that the existing Ockham Interchange roundabout is partly in Flood Zone 3. It is possible to construct the site access into the Wisley new settlement outside of the area at risk on the basis of engineering/ design. There is no history of flooding on the roundabout. In addition, with respect to the application reference 15/P/00012 the Environment Agency had no objection.
**Traveller Pitches:** WPI is concerned that the GBLP is overly prescriptive with regard to the tenure of the traveller pitches. It may well be the case that these are privately or publically managed. These matters of detail should be left to the planning application stage. Similar to WPI’s representations on affordable housing, WPI also raises objection with respect to nil cost land transfer, and what this effectively means. In addition, it is not clear why the GBLP has to be prescriptive on the phasing of traveller pitches against the delivery of new dwellings, when the Plan is silent on delivery triggers for all other infrastructure provision. In order to best reflect the needs, on a 500-unit basis, an approximately 2,000 dwelling scheme may deliver a different quantum of traveller pitches. Therefore, the draft policy need only refer to ‘up to’ 8 pitches.

As a general comment, it is surprising that the GBLP only outlines one ‘opportunity’ associated with the delivery of the Wisley new settlement. This is listed as to “reduce flood risk elsewhere”. As GBC is aware, there are numerous economic environmental and social benefits arising from the new settlement. It is apparent that a number of other strategic site policies do not include any provisions under ‘opportunity’. To aid the clarity of the Plan, WPI considers that the provision should be deleted.

**Proposals Map/ Wisley Airfield Allocations**

Associated with draft Allocation A35 is the overall Proposals Map and Wisley Airfield Map.

The proposal to include the Wisley Airfield land as a Site of Nature Conservation Importance (SNCI) is unjustified and un-evidenced. Appendix 4 includes an alternative boundary, based on ecological evidence and a robust matrix in accordance with applicable guidance.

Appendix 6 includes an update with respect to the extant planning permission for an In-Vessel Composting Facility (IVC) and the Surrey Waste Plan allocation for a waste use on part of the site (circa 17ha western element). WPI’s position is that the GBLP must be amended with respect to the Waste Allocation to make clear that this simply is reflective of the present Surrey Waste Plan. The GBLP is not a Waste Plan, and GBC is not the Minerals & Waste Authority, and thus it cannot and should not be anything else. No new or updated proposals for waste can be proposed through the GBLP. In addition, WPI considers the GBLP to be inconsistent, as it does not appear to illustrate all Surrey Waste Plan allocations on its Proposals Map.

In summary, based on all of the available evidence and national planning policy, the best use of the land is now for a new settlement.

**Phasing**

WPI outlined a position in respect of the intended phasing of development in the planning application (15/P/00012). The phasing of the dwellings would be completed in accordance with the landscape design of Neighbourhoods, and as such the new settlement has been divided into four ‘Neighbourhood Blocks’. A Concept Land Use Masterplan is provided in Appendix 2.

Based upon an outline planning consent being granted in early/mid 2017, and the first Reserved Matters Submission being made in late 2017, it is envisaged that the first phase of development could commence in 2019/2020. The phasing of development broadly assumes a housing build rate of no more than 50 dwellings per year, per outlet. Between 2019/20 and 2030/31 the four Neighbourhood Blocks can deliver 2,068 dwellings at an average of 172 dwellings per annum. Table 3.4 outlines.

**Table 3.4** is based on the Concept Masterplan, which envisages four master phases, broadly based on four Neighbourhood Blocks of development, which sit within the three proposed neighbourhood character areas.

The delivery of the employment area and local centre including the primary school will be phased in detail through a detailed submission phasing plan. This will also include the phasing of the proposed traveller pitches. It is suggested that this can be addressed via suitable planning condition. This will need to have regard to wider constraints and obligations, including the phasing of SANGs.

An initial phase of SANGs will likely be progressed through planning in 2017 to enable implementation in 2017/18, and hence residential occupations by March 2020.
There will be a degree of overlap between each phasing period.

Illustrative timing of the delivery of economic and social/community infrastructure is as follows:

- Temporary retail facilities – 2020/21
- Primary School/ Nursery Provision – from period 2019/20 (or by 500th occupation)
- Local Centre/ Village Centre – 2022/23
- Employment (Phase 1) – 2024/25
- Secondary School – 2023/24 (by 750th occupation, on-site provision or contribution)
- Travellers Provision - 2024/25
- Sports Facilities – 2025/26
- Employment (Phase 2) – 2028/29
- 2nd Nursery – 2028/29

Illustrative timing of the SANGs is as follows:

- Release of Phase 1 SANG (38.7 ha) – 2018/19
- Release of Phase 2 SANG (2.1 ha) – 2026/27
- Release of Phase 3 SANG (8.4 ha) – 2027/28
- Release of Phase 4 SANG (0.7 ha) – 2028/29

A SANGs car park will be operational for the first development occupation (2018/19) accessed from the main site access from Ockham Interchange. This will be via the construction of the first section of ‘Ridgeway Avenue’ main development spine road, to an acceptable standard to allow for initial access/ use. The SANGs strategy is agreed with Natural England.

Changes Sought

The following amendments to draft Allocation A35 are suggested.

Amend the requirement for approximately 100 sheltered/Extra Care homes to be C2 or C3 use.

Amend the convenience retail provision to read 1,200 sq m.

Amend the paragraph with respect to off-site cycle network enhancements, as follows:

"Preserve and enhance the existing off site cycle network from the Land at former Wisley airfield site to key destinations, including cost-effective improvements to a level that would be attractive and safe."

The policy wording should be amended to require a re-assessment of secondary education needs at the time that the application is to be determined.

Amend the bullet point with respect to ‘sensitive design’ as follows:

"The delivery of a new settlement provides an opportunity for distinctive character and unique and quality design. A balance should be achieved to enable a design that meets these principles and is designed with the landscape."

Delete the bullet point with respect to site access/egress.

Delete the requirement for an application level ‘Habitat Regulation Assessment’. This is the role of the Borough Council as the competent authority.

Delete the bullet points which refer to the tenure requirements for the traveller pitches and reference to nil cost. Delete the bullet point with respect to the phasing of the delivery of traveller provision. Include reference to ‘up to’ 8 traveller pitches.
For consistency, delete the bullet point related to “opportunity” as it is not apparent what this means, and no other major strategic site has this bullet point.

For clarity, draft Allocation A35 should be amended to read (Changes in Red):

In addition, the GBLP should include a Glossary, which defines ‘approximately’ as ‘± 10%’.

The overall phasing of the Wisley new settlement should reflect the phasing provided in these representations. This should be within the housing trajectory of the GBLP and associated evidence base.

In respect of the Proposals Map:

• Amend SNCI area. See Appendix 4.
• Adopt a consistent approach towards safeguarded waste sites.
• Refer to the Surrey Waste Plan factually as an outgoing Plan, highlighting that waste allocations and safeguarded sites are likely to change in the Revised Surrey Waste Plan.
• Either remove safeguarded waste sites from the Policies Map or amend the notation on the Map to be factually correct, ‘Surrey Waste Plan 2008 Waste Notation’.

Conclusion

WPI has made a number of representations on the GBLP. This is supported by a range of technical evidence which complements the Key Considerations applicable, notably to support the draft allocation, and respond to the reasons for refusal of the recent planning application (reference 15/P/00012). WPI is in broad support of the GBLP, the planned housing requirement, infrastructure provisions and draft allocation of a new settlement at Wisley Airfield. WPI does however have some technical objections.

In summary WPI has the following principal technical concerns with the GBLP:

• Clarity should be provided in respect of the proposed housing policy (draft policy S2) to ensure that the full housing requirement is outlined in the policy, in addition to a credible phasing of the housing allocations to enable a rolling five-year supply of housing. To enable the objectively assessed needs (OAN), the housing policy must be based on the delivery of ‘at least’ 13,860 dwellings (see Paragraph 3.10 onwards).
• The draft allocation of the Wisley new settlement should be effective and implementable. The proposed SNCI designation over the whole of WPI controlled land is unjustified, and an amendment is suggested (see Appendix 4). It should also be made clear that it is not the purpose of a Local Plan to make waste allocations, and thus the present waste notation is merely reflective of what the present 2008 Surrey Waste Plan includes (see Appendix 6). Further technical concerns are outlined, notably with respect to the convenience retail provision outlined by the emerging policy.
• The delivery of affordable housing should be expressed as a ‘target’. The provision of land at nil land value is un-evidenced and unlikely to be effective (see Paragraph 3.29 onwards).
• The requirement for all development to connect (or safeguard) Combined Heat and Power (CHP) is unjustified and likely to be economically unviable or technically unfeasible. The GBLP should reflect the Housing Standards Review and not repeat or seek to conflict with Part L of the Building Regulations (see Paragraph 3.73 onwards).
• The Sustainability Appraisal (SA) is broadly considered to be robust and soundly prepared. It demonstrates the need for all of the major strategic site allocations (as per Option 4). The SA should be enhanced, to include an accurate description of the Wisley new settlement to be consistent with the Housing Delivery Topic Paper. In addition, a further SA Option which includes the Wisley new settlement as OAN plus 6% buffer (an ‘Option 2A’) should be tested. This would provide additional support to the Local Plan (see Paragraph 2.3 onwards).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 160715 Local Plan Reps - July 2016_and Appendices.pdf (11.5 MB)
Executive Summary

- Wisley Airfield represents an exceptional development opportunity for a Sustainable New Settlement. It is the proposed New Sustainable Settlement within Guildford Borough. Wisley Property Investments Ltd (WPI) strongly supports the draft allocation of the Wisley Airfield site for a sustainable residential-led development of a new settlement (draft Allocation A35) within the submission Guildford Borough Local Plan (GBLP) and Focused Amendments June 2017. The key benefits of the proposal are outlined in the Summary Document, included in Appendix 2 of these representations.
- The draft allocation and removal of the site from the Metropolitan Green Belt is fully justified, and will result in the delivery of homes to meet the urgent and pressing needs. The GBLP should move toward prompt adoption which will provide the much-needed framework for the delivery of development.
- Based on the updated ‘objectively assessed housing need’ of 654 dwellings per annum (as identified within the 2017 West Surrey SHMA Addendum), GBC proposes an achievable suite of development allocations, and proportionate amendments to the Green Belt boundary, including new areas of Green Belt.
- The Wisley Sustainable New Settlement can deliver circa 210 dwellings in the next five years of the plan period (2017-2022). This figure has been adjusted to allow for the implementation of the significant green infrastructure provision (Suitable Alternative Natural Greenspace – SANG).
- The Wisley Sustainable New Settlement is an obvious location for growth and, as an assembled site, it is available for immediate development and is capable of making a significant contribution to Guildford’s five-year housing land supply and longer-term provision of housing in the Borough.
- Recognition of the suitability of the site as a location for growth is provided through its inclusion as a “given” for provision of 2,000 new homes in all 8 of the June 2017 Sustainability Appraisal’s (SA) reasonable alternatives. WPI welcomes the revised SA.
- Wisley New Sustainable Settlement would deliver around 7,000 sq m of employment and retail floorspace, potentially accommodating some 1,410 direct or indirect jobs (on top of those employed in the development’s construction) and include facilities to support home working, further reducing travel demand. Additional consumer spending in the local area (excluding housing, fuel and power costs, VAT and leakage), based on 2,000 dwellings, would be around £31.86m per annum. The Gross Value Added from the development would be in the order of £57m per annum.
- The Settlement would complement existing villages, providing additional, well connected local infrastructure including a new primary and secondary school, leisure and health provision. This will relieve the pressures on existing services and amenities, such as schools. The development also incorporates a four form-entry secondary school to meet longer term needs, complementing the two form-entry primary school proposed. The Development directly facilitates the GBLP.
- The Development will contribute positively to the Surrey County Council (SCC) Surrey Infrastructure Strategy (2016) and the Appendix C Infrastructure Delivery Schedule of the GBLP. These benefits of the Sustainable New Settlement have been recognised in the updated SA June 2017, published as part of the Focused Amendments public consultation documentation.
- The vision for the Sustainable New Settlement remains as that submitted with the 2016 GBLP representations. The Wisley Airfield site would be a sustainable, successful place that promotes wellbeing, developed by understanding what people need from the places where they live and work. The proposals engender social sustainability by combining design of the physical realm with design of the social world – infrastructure to support social and cultural life, social amenities, systems for citizen engagement, and space for people and places to evolve. The sustainable communities created would meet the diverse needs of existing and future residents, their children and other users, contributing to a high quality of life and providing opportunity and choice.
- The Sustainable New Settlement would also enable the delivery of significant SANG. The SANG Strategy supporting the planning application was developed in liaison with Natural England, who have no objection to the new settlement. Evidence in respect of the delivery of SANG was produced with WPIs June 2016 representations to the Guildford Local Plan: Strategy and Sites Consultation.
• WPI’s only significant concern with the GBLP is the proposal to designate the entirety of Wisley Airfield as a Site of Nature Conservation Importance (SNCI). This is simply not justified by the available evidence, and fails to disregard the large areas of agricultural or previously developed land on the site. In addition, a concern is maintained with respect of the Proposals Map notation of the present Waste designation on part of the site.
• WPI advances other relatively minor objections with respect to certain other draft Development Management policies.

1. Introduction

1.1. This Representation has been submitted by Wisley Property Investments Ltd (WPI) as part of the consultation on the emerging Guildford Borough Local Plan: Strategy and Sites (Proposed Submission Version, June 2017) (‘GBLP’). The key benefits arising from the promotion of land at Wisley Airfield for a Sustainable New Settlement are outlined within the Summary Document (Appendix 2).

1.2. The Representation highlights, and where necessary expands, upon representations submitted by WPI to the Strategy and Sites Proposed Submission (June 2016) and specifically addresses the focused amendments made to the GBLP. Some of these original representations are withdrawn owing to changes to circumstances.

1.3. Full background to the site was provided within the June 2016 representations (summarised in Appendix 1) and is not repeated here. The key factor to note however is that WPI is the majority landowner within draft Allocation A35. Wisley Airfield comprises circa 115 hectares (ha), of the circa 132 ha allocation. WPI has been in liaison with agents for landowners who control land at Bridge End Farm to the south. It is understood that this land is also available for development as confirmed by representations submitted by CBRE in July 2016. This land is not presently in the planning system, whereas the WPI land is, being subject to an ongoing S.78 planning appeal. The illustrative masterplan which is being considered at the planning appeal has regard for the emerging GBLP allocation, and is facilitative and non-prejudicial on the wider allocation.

1.4. In addition, full technical justification for the proposed new settlement allocation at Wisley Airfield (draft policy A35) was included within the June 2016 representations. This fully demonstrated that the proposed allocation and removal of the site from the Metropolitan Green Belt is fully justified, and will deliver homes to meet the urgent and pressing needs.

1.5. This representation is structured in the same order as the Submission GBLP and specifically addresses the published focused amendments. The first section of this representation sets out a summary of what is understood to have been included as focused amendments. This specifically relates to the matters raised in WPI’s representation in June 2016, and the recommended changes to policy and associated text. A table setting out the summary of the key comments as updated by this representation on the Focused Amendments is included at Table 3.1.

1.6. Following this, a table is produced to provide WPI’s comments and representations on these specific focused amendments.

1.7. WPI is in broad support of the GBLP, and is supportive of the overall provision of housing now proposed. WPI only has a few outstanding technical objections to the GBLP. These are outlined in Table 3.1, with some of the reasoning for certain objections outlined in Section 4:

- The proposal to designate the whole of the WPI land within the proposed allocation as an SNCI has no basis, and does not reflect the available evidence base. The overall policy framework in the emerging GBLP would still permit development on SNCI designations. Notwithstanding this, the requirement in evidence to justify the development on proposed SNCI at Wisley Airfield already exists (see the Environmental Statement and associated SNCI evidence submitted with the planning application / appeal). On this basis, the proposed SNCI designation is simply unjustified, and should be removed from the emerging GBLP.
- The delivery of affordable housing should be expressed as a ‘target’. This change was proposed in our June 2016 representations but has not been made. Instead, GBC proposes that “at least” 40% affordable housing is provided. A new requirement for sums in lieu of on-site provision has been added. In the absence of reference to viability, the policy is unlikely to be effective. This suggestion is made to assist the sound production of the
plan. It must be noted that WPI intends to provide 40% affordable housing as part of the draft Section 106 being considered at the forthcoming planning appeal.

• The requirement for all development to connect (or safeguard) Combined Heat and Power (CHP) is unjustified and likely to be economically unviable or technically unfeasible. The GBLP should reflect the Housing Standards Review and not repeat or seek to conflict with Part L of the Building Regulations.

• The GBLP should not look to incorporate outdated Minerals and Waste data and therefore should remove specific reference in the Proposals Map to Safeguarded Waste Sites which are part of the Surrey Waste Plan 2008.

• The Sustainability Appraisal (SA) as updated in June 2017, continues to refer to the site as having a medium sensitivity. However, this does not accurately reflect the findings of the Green Belt and Countryside Study 2013 (GBCS) that classified the sensitivity as “low to medium”.

• With specific regard to emerging policy A35, WPI remains in support of the proposed allocation of Wisley Sustainable New Settlement within the GBLP. However, there remain concerns regarding the anticipated retail provision, which does not accurately reflect the evidence base. As part of the pending appeal at Wisley Airfield GBC has withdrawn its objection to the development on the basis of the level of convenience retail provision proposed. This was on the basis of the Commercial Assessment produced by Savills on behalf of WPI and appended to the July 2016 representations to the Emerging Local Plan (Appendix 7). This report demonstrated the level of need for A1 use class space associated directly with the proposed development of Wisley Airfield, and set out the considerable benefits that would arise to the new community. Subsequently, the evidence clearly shows a need for a higher provision of convenience retail space at the Wisley New Settlement and policy A35 should suitably reflect this. GBC has not changed the proposed provision from 600sqm which as evidence demonstrates, will not be sufficient to meet the need. Subsequently, this aspect of the policy remains unjustified.

• In addition, there has been no amendment to the requirements for tenure of traveller pitches, nor has “up to” been included in relation to the number of pitches that are to be provided. Notwithstanding this, it is highlighted that the new settlement application does make provision for 8 pitches.

4. Specific Commentary as Additional Representations on the Focused Amendments

4.1. Section 3 provided an update on WPI’s position on the GBLP as it stands (the Regulation 19, 2016 version with 2017 Focused Amendments). This Section 4 provides specific commentary on the SNCI issue (as supported by Appendix 3) and also with respect of emerging Allocation A35 and the Proposals Map.

Wisley Airfield Allocations - Designation of the Wisley Airfield as a Site of Nature Conservation Importance (SNCI)

4.2. Clarification Requested (Objection maintained).

4.3. The Proposals Map and allocation for Wisley Airfield continues to include the land as a Site of Nature Conservation Importance (SNCI) and this is wholly unjustified.

4.4. Part of the site is currently designated a SNCI, and feature of County value. This is accepted by GBC in the Draft Policy Allocation A35 and was originally designated for its assemblage of rare plants.

4.5. Surrey Wildlife Trust (SWT) has long argued that this designation be extended to include the whole site on the basis of bird, and herpetofauna records recorded during surveys between 2004-2007. In their planning application advice to GBC, and in their report to the SNCI review panel, SWT has incorrectly referred to this ‘recommended boundary revision’ as a ‘designated boundary’. WPI has always contested both the boundary extension itself, and SWT’s position regarding the status of the recommended boundary revision.

4.6. In the GBC document ‘Sites of Nature Conservation Importance Surveys 2004-2007 (2007), GBC confirm their position: “The changes to SNCIs including boundary changes to existing SNCI, deleted SNCI and new SNCI, will in the longer term, be fed into and be formally adopted through the GDF process by way of the Site Allocations DPD and identified on
the GDF Proposals Map(s).” “In the interim period, the recommended alterations have been mapped on the Council’s GIS with a note that “this data is a proposed revision to the SNCI boundaries shown in the GBC Local Plan 2003.”

4.7. WPI has continued to object to the boundary change and resultant increased size of the SNCI designation of the Wisley Airfield throughout the local plan process, on the basis of the lack of evidence supporting or justifying the designation.

4.8. As evidenced in Appendix 4 of WPI’s representations made in July 2016, extensive ecology surveys of Wisley Airfield have been undertaken between 2006 and 2016. This provided, and continues to provide, the most accurate and updated date ecology evidence for the Airfield. The results were reported in the ES accompanying the planning application for the Airfield and within a technical note produced to inform the Surrey Local Sites Partnership SNCI Review (Annex A of Appendix 3), which was also shared with GBC.

4.9. In addition, WPI’s appointed ecologist accompanied SWT during their update botanical surveys at the Wisley Airfield, including Wisley Field SNCI on four occasions in 2016, also collecting botanical data as summarised in the technical note supporting the July 2016 Representations (Appendix 4).  

4.10. The up to date evidence available clearly demonstrates that there are only some areas within the wider Airfield site that have the potential to qualify for an SNCI designation, and that the vast majority of the Wisley Airfield has a limited nature conservation interest, not supporting features that could be considered as meeting the SNCI qualifying criteria. The proposed designation as shown on the Proposals Map and Allocation Map for Wisley Airfield, is based on out of date evidence that has been superseded and cannot therefore be considered sound. Its inclusion as part of the Plan fundamentally puts the site at risk of being considered undeliverable, which risks the soundness of the Plan at examination.

4.11. Further evidence and commentary on this matter is contained in Appendix 3, a report prepared in response to the proposed designation by WPI’s appointed ecologist, Ecological Planning and Research Ltd (EPR).

Changes Sought:

4.12. The proposed designation of the Wisley Airfield as an SNCI should be corrected to appropriately reflect the up to date, site specific evidence that is available as undertaken between 2006 and 2016 (inclusive).

4.13. The GBLP proposals Map should be updated to show the amended SNCI boundary to reflect the EPR’s proposal map at Appendix 3, Annex A, Map 1.

Wisley Airfield Allocation – Policy A35 & Proposals Map

4.15. Wisley Airfield is allocated through policy A35. It is positive to see that the table of sites provided onwards of page 141 of the GBLP now refers to the “gross” number of dwellings (approx.) to be provided “over the plan period”. This acknowledges that some sites may be capable of contributing to additional development delivery beyond the plan period, although WPI fully appreciate that this has not been explored by GBC.

4.16. With respect to the changes made to policy A35, WPI is, in the main, supportive, and welcomes the changes that are proposed by the Focused Amendments. However, some objections are maintained. Specifically, WPI strongly believe that there should be a definition of “approximately” included in the glossary. For clarification purposes, this should make it clear that approximately is plus or minus 10%. Whilst this may only appear as a minor addition, the additional clarity provided will help secure the soundness of the plan and ensure it is appropriately interpreted after adoption.

4.17. Policy A35 allocates 8 Gypsy and Traveller pitches at Wisley Airfield. This should be amended to state “up to 8 Gypsy and Traveller Pitches”. In addition, parts 14 to 20 (inclusive) refer to the tenure of the pitches, and that these should be provided at “nil cost”. Both paragraph should be deleted. The matter was covered in our previous representations on the GBLP. The reason being to ensure plan effectiveness and flexibility.
4.18. With the exception of these amendments, WPI fully supports the proposed policy allocating Wisley Airfield. All other objections previously raised to the policy are now withdrawn.

Proposals Map:

4.19. Clarification Requested (Objection maintained).

4.20. WPI continues to raise a technical concern with respect of the ongoing recognition / designation of a waste allocation on the Proposals Map, within the designation for a new settlement. This is not the role nor purpose of a local plan.

-----------------------------

5. Conclusion

5.1. WPI has made a number of representations on the GBLP following the publication of the focused amendments, June 2017. These representations update WPI’s position.

-----------------------------

<tbody>
<tr>
<td>Site Allocations – Wisley New Settlement – Proposals Map</td>
<td>Amend SNCI area. See Appendix 3 Adopt a consistent approach towards safeguarded waste sites. Refer to the Surrey Waste Plan factually as an outgoing Plan, highlighting that waste allocations and safeguarded sites are likely to change in the Revised Surrey Waste Plan. Either remove safeguarded waste sites from the Policies Map or amend the notation on the Map to be factually correct. ‘Surrey Waste Plan 2008 Waste Notation’.</td>
<td>Amendment to the Proposals Map. Retained proposal to designate whole site as an SNCI. No change to reference of Safeguarded Waste Sites.</td>
<td>Objection maintained in relation to SNCI area. Objection maintained in relation to waste. The Local Plan should not be covering outdated Minerals &amp; Waste matters. This is a matter for Surrey County Council. Further commentary on this representation is provided in Section 4.</td>
</tr>
<tr>
<td>Policy A35 (Wisley New Settlement)</td>
<td>Amend the requirement for approximately 100 sheltered/ Extra Care homes to be ‘C2 or C3’ use. Amend the convenience retail provision to read ‘1,200 sq m’.</td>
<td>(Pages 225 to 227). Varied changes have been made to the policy. This includes an amendment to say “C2 Use” only. No change to amount of convenience retail provision. This still reads</td>
<td>WPI welcome the clarification regarding “C2” uses. Objection maintained in relation to retail provision. This does not</td>
</tr>
</tbody>
</table>
Amend the paragraph with respect to off-site cycle network enhancements, as follows:

"Preserve and enhance the existing off-site cycle network from the Land at former Wisley airfield site to key destinations including Effingham Junction railway station, Horsley railway station/Station Parade and Ripley, with including cost-effective improvements to a level that would be attractive and safe for the average cyclist."

The policy wording should be amended to require a re-assessment of secondary education needs at the time that the application is to be ‘determined’.

Amend the bullet point with respect to ‘sensitive design’ as follows:

“The delivery of a new settlement provides an opportunity for distinctive character and unique and quality design. A balance should be achieved to enable a design that meets these principles and is designed with the landscape.”

Delete the requirement for an application level ‘Habitat Regulation Assessment’. This is the role of GBC as the competent Authority.

Delete the bullet point with respect to site access/egress and flood risk mitigation – this matter will be addressed in the application FRA.

Delete the bullet points which refer to the tenure requirements for the traveller pitches and reference to nil cost. Include reference to ‘up to 8 traveller pitches’. In addition, the GBLP should include a Glossary, which defines "approximately" as ‘±/- 10%’.

The overall phasing of the Wisley new settlement should reflect the phasing provided in this Representation. This should be within the housing trajectory 600sqm. There focused amendments do not change the policy wording as requested with regard to removal of Effingham Junction, Horsley and Ripley. Instead, the policy includes an additional location - “Byfleet”.

The policy wording is charged to “determined” in relation to assessment of secondary education needs.

The paragraph on “sensitive design” has been removed and replaced with a new section under “other issues” (para 22).

The requirement for an application level HRA has been removed from the policy (see p226).

Paragraphs relating to access and egress have been deleted (p226). The flood zone comments have been moved to “other issues” at para 21.

The requested changes relating to tenure and traveller pitches have not been made.

No definition of “approximately” has been added to the glossary.

A new section has been added on “opportunity” and two bullets are included relating to creating unique places and incorporating high quality architecture.

It is also noted that there are two new paragraphs relating to the existing Air traffic beacon at Wisley airfield (8) and supporting infrastructure including GP and community building (9).

WPI support removal of requirement for an HRA.

WPI support and welcomes the change regarding access and egress.

Clarification Requested (Objection is maintained) in relation to tenure and traveller pitches, notwithstanding the fact that the new settlement application makes provision for 8 no. new pitches.

Clarification Requested. Definition of “approximately” as requested by WPI would provide additional plan clarity.

The new section on opportunity is a Welcome change.

Welcome clarification of the infrastructure requirements and planning requirements.

Further commentary on this representation is provided in Section 4.
of the GBLP and associated evidence base.

For consistency – delete the bullet point related to ‘opportunity’ – as it is not apparent what this means, and no other major strategic site has this bullet point.

I OBJECT

To the planning on the Wesley Airfield site

Again no infrastructure: Transport?

No regular busses to take people to the only 2 train stations near by, being Horsley or Effingham, which are both totally unsuitable for thousands more commuters either from the Wisley site or from the Horsley proposed sites.

These train stations are small and serve the villagers at the moment, but could not accommodate thousands more commuters.

The Wisley site needs busses to take the population to Guildford, Cobham.

They would need a Doctors Surgery, schools, junior and senior as all the local schools are over subscribed in the surrounding areas.

</table>
I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London.

- I object to the detrimental impact on transport, local roads and road I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

1. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
2. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
3. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
4. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

1. The lack of suitable public transport stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted level Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7839  Respondent: 9228769 / Cathryn Fleming  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1) Inclusion of the Wisley Airfield and the 2000 plus homes etc

Despite being unanimously rejected earlier this spring, this proposal has reappeared. WHY? With what justification? The following issues simply have not been addressed since it was turned down. Why then include it?

Impact on the Local Area

* The additional 5000 residents is the equivalent of doubling the populations of both Horsleys.

* The density is out of keeping with the local area and will change its nature forever. 

* The impact on light pollution, traffic and infrastructure has been GRAVELY UNDERESTIMATED and proposed mitigation measures are totally inadequate. The developers are completely arrogant in their estimation of the following:

  1. Everyone in the development will commute by train from Woking or drive on the A3. Why? Have you ever tried to drive from Ockham to Woking during the morning commute and/or park? It will take 25 minutes at a minimum and create huge congestion in Ripley, Byfleet and Woking

Why will they not then not go to East Horsley or Effingham which are less than 5 or 3 minutes drive from the proposed development? Of course that is where they will go - the developers do not want to state this as the implications are not favourable to them.

Have you been to visit these train stations? There is NO SPACE at East Horsley for additional parking expansion and to do so in Effingham will mean confiscation of land and a further impact on the Green Belt.

This issue also reflects the FACTUAL ERRORS in the documentation that state there are 9 stations within 5 miles. In fact this is only as the crow flies not as Surrey roads exist. ONLY EFFINGHAM AND EAST HORSLEY ARE WITHIN 5 MILES by usable road of this development.

The fact that the developers are already planning that a new double mini roundabout to be installed at the junction of Forrest Road and Effingham Common Road indicates that they themselves know the residents will go to this station but are unwilling to acknowledge it as it does not help their case.
1. The developers claim no impact on Cobham/Downside as everyone will do their local shopping in the new shop(s). REALLY? 2000+ homes from a convenience store? There is a small mini budgens in East Horsley and one convenience store in Ripley. **These 2000+ homes will be shopping at the Sainsbury’s and Waitrose in Cobham and use all the other local facilities there (banks, opticians, dentists etc).** They are simply not going to drive to Merrow or Guildford to do their local shop and there is only a very small car park in East Horsley which offers limited facilities in terms of shopping. This will severely strain traffic and resources in Cobham/Downside. Yet there has been no consultation with Elmbridge.

1. Lack of Local secondary schools. It is very nice they want to add a primary school but where are these kids going to go afterwards - and who is going to fund this school in the longterm? As the Headmaster of Howard of Effingham has stated - that even if it is expanded, there will be no places for children from this development. As it is East and West Horsley residents find it nearly impossible to get into the Howard. There is a severe shortage of secondary places throughout this area and absolutely no plans for a new school. Are they assuming everyone will go private? **Again the lack of consultation with other districts over this issue (Mole Valley, Elmbridge, Woking) is unbelievable.**

1. All of this additional traffic will have a huge and non reversible impact on the historic houses and other buildings in Ockham, Ripley, Downside and the Horsleys.

1. The short term closure (5 years!) of a number of roads will have a huge impact on EVERYONE who lives in the Horsleys, Ockham, Ripley, Downside etc.

* Flooding has not been adequately assessed. No study has been done of the impact on the water table and flooding in the area. This could have a huge impact and also affect the RHS at Wisley.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

</table>

**Inclusion of the Wisley Airfield and the 2000 plus homes etc**

- All sites that are dependent on the use of the private motor cars cannot be considered sustainable.
- The proposed public transport provision is unrealistic given the nature of the roads in question and the level of congestion in the neighbourhood. Moreover given cutbacks by Surrey Council for budget constraints should not be planned upon.
- The thought that residents will walk or cycle to the train stations on narrow, unlit country lanes that do not have pavements is **beyond ridiculous.**
- **Parking, as stated above, at the two nearest stations is already at capacity.**

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Inclusion of the Wisley Airfield and the 2000 plus homes etc

- A number of factual errors exist in the documentation - i.e. that Natural England has not agreed to SANG provision.
  - _The misrepresentation stated above with respect to train stations._

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/7842  Respondent: 9228769 / Cathryn Fleming  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Inclusion of the Wisley Airfield and the 2000 plus homes etc

- The housing need in Guildford has not been determined
- No consultation with surrounding boroughs who are also objecting
- The site is not deliverable within 5 years due to problems with sewage and water capacity as outlined by THAMES Water and the OCK DVOR air traffic control beacon situated onsite which limits development and which is still operating
- No very special or exceptional circumstances exist
- There are alternative ways to increase housing by using infill sites in the area
- The proposal includes the site safeguarded for waste under the Surrey Waste Plan which Surrey County Council refused to give up in their response to the Draft Local Plan in September
- The site is not listed for development under the existing 2003 Local Plan.
- There is not enough land to provide a sustainable community based on your own (GBC’s) parameters
- Surrey Police have concerns on their ability to manage the proposed population density

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/6051  Respondent: 9237953 / Patricia Wood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposal to build on the former Wisley Airfield site. This has very recently been unanimously turned down by the Borough Council on 14 different counts and should be removed from the Local Plan permanently.

My specific objections to the Former Wisley Airfield development are as follows:
1) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

2) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

3) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

4) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

5) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

6) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

7) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I also OBJECT to the inclusion of the Three Farms Meadows proposal in the plan, for all the reasons I gave in my last letter. The changes that the developers have since proposed do not alter the case against the development in any way. Why is this site still included, when another, more suitable, has been removed? The local infrastructure cannot support this development, the roads are already very congested, the M25 Junction 10 is already a daily major problem.

Policy A35 / Land at former Three Farms Meadows, Ockham

I object to this policy.

A chorus of public outcry resulted in Guildford Planning Committee, in April 2016, unanimously rejecting a planning application for this development on 14 separate counts.

Following this rejection, many residents believed that this application was on ‘hold’ until the developers reassessed their proposals. Evidently, the electorate where mistaken as GBC have again, inserted this proposal into the draft Local Plan.

Owing to the concrete runway, the site is being misrepresented as brownfield, when in fact, only a small area of the over-all site where the hangers were previously situated, is actually brownfield. The majority of the site area is currently designated as Green Belt and should remain as such.

Again, under section 9/87 of the NPPF, this proposal does not demonstrate ‘exceptional circumstances.’

Objection to Guildford Local Proposed Plan and inclusion of plan of Former Wisley Airfield , now known as Three Farms Meadows (TFW)
I have lived in Ockham for over 34 years and am very concerned and object to the inclusion of the TFM. My objections are on the following basis:

1. The GBC planning Committee unanimously rejected the planning application this year.
2. The land is to be protected by the green Belt policy.
3. The village suffers very badly with water flooding and the new proposed houses will make this even potentially worse.
4. The development will increase traffic in the village and A3 to a level that will cause potential grid lock and increased accidents.
5. The village does not have sufficient infra structure to support the new houses and traffic. Including railway parking that is currently at full capacity at Effingham junction station.
6. The proposal has blighted the village and marketability of existing homes.
7. The development will have adverse consequences and health and safety concerns with pollution including increased unacceptable noise levels.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: pslp172/2790  Respondent: 9299745 / Simon Runton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The West Horsley issues I object to are as follows:

- The council is not choosing to constrain its housing growth in Green Belt areas and the proposed developments still represent a large number of dwellings on Green Belt space, which was established to prevent urban sprawl not facilitate it. The continued submissions of the Local plan squarely fail to meet any of the infrastructure issues and relies on inaccurate information and excessive erosion of Green Belt land.

- I question the Council’s predictions for Guildford’s level of growth which is 25% more than the Office of National Statistics prediction for the area by 2034. Surely it is an error to base a plan on figures that differ so markedly from national forecasts and flawed evidence must not be relied upon to justify the inflated predictions.

- Nothing has been proposed since last years Consultation to improve sustainability of the West Horsley development sites and therefore meet the National policy requirements. The road network is already over used, in poor state, is prone to flooding in poor weather. The train station carparks are already full up at rush hour. The primary and secondary schools in the area have both applied for expansion to meet existing needs and these have been rejected. I therefore do not understand how an infrastructure that is over subscribed already can fit the further demand expected of 400 new homes in the area. The same applies for the Doctors surgery which is at capacity.

- I object to no changes being proposed since the 2016 consultation to insetting West Horsley from the Green Belt and welcome the reduction in the number of new homes being proposed, but the Local Plan does not go far enough to maintain Green Belt land.

- The number of proposed dwellings will fundamentally change the character of the village, yet Guildford town centre and brownfield sites appropriate for dwellings are being overlooked in preference for further retail space when many published studies show online retailing is growing at the expense of the high street.

I object to the Three Farms Meadows site proposal because:
- There are severe constraints with the A3 and M25, one of the most congested areas of road at one of the busiest motorway junctions in the country.

- Local road networks cannot sustain a development of that size with roads prone to flooding in poor weather, buses and lorries in Horsley do not have enough room to pass cars without them stopping or in too many instances, mounting the pavement.

- There is not enough employment opportunities on the site for a development of that size which will only lead to more cars and commuters adding to the severe congestion, because of this it is inappropriate to assume that the local roads will be fine for cycles instead. The roads are poorly lit, not big enough, in poor repair so cyclists who do use them often have to cycle further from the kerb for their own safety than the Highway Code recommends.

- The proposed removal of over 3 hectares of Green Belt has been included without justification.

- The significant modifications made to the plan mean that it should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

- The evidence base especially the West Surrey SHMA and the Guildford addendum 2017 has been challenged by other experts including NMSS.

Please consider the following in addition to the objections I have already raised regarding both these developments.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

I’d like my comments below to be taken into consideration for the GBC local plan:

Site A35 / Wisley Airfield

1. I object to this proposal. I objected to this site in 2014 and my views are unchanged. This is a significant development which is not appropriate for the area. It is a greenbelt site and should be kept as such. I find the plan to build 2000 houses is unacceptable and completely at odds with surrounding land use.
2. In addition such a huge volume of housing will add to the already significant access issues to the M25 / J10 and A3. It would also create unacceptable traffic congestion / “rat runs” on the surrounding minor roads.
3. I am very concerned about how local services from education to healthcare could cope with such a large additional population in the area. I question whether this has been properly taken into account and incorporated into the GBC plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1166  Respondent: 9577857 / Nick Wilkinson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

I continue to object to this development. I have detailed my objections previously to cover;

- loss of local amenity to surrounding villages and visitors - green spaces, space to breathe
- loss of semi-rural character to surrounding villages and the county - countryside, undeveloped locations
- saturation of local transport services (roads, trains, buses) for the current population by new residents - the roads are insufficient (size, layout, character) to deal with the increased volume of traffic which will be produced; there are no footpaths adjacent to majority of the roadways to encourage walking / cycling; train carparks are already full
- saturation of existing services (clubs, shopping, education, health) for current population by new residents - health services are over-subscribed, schools are full, clubs maintain waiting lists; shops are large enough for the current populations but not for new developments - more people means larger shops, means more traffic, means more urbanisation
- permitting the development will mean the precedent will be introduced which will reduce ability to object to future development in the locality, encouraging and permitting infill development between and around the existing villages (Ockham, Ripley, Horsleys, Effingham, Wisley)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

There are no exceptional circumstances to justify this blatant assault on the green belt.

To maintain that the site is actually brownfield and not green belt, constitutes a mis-representation.

If allowed, this proposal would devastate the village of Ockham and nearby villages of Ripley and the Horsleys.

There is absolutely no precedent to destroy the existing tract of quality farmland in the green belt.

Agricultural land is very important; priorities and the food supply may change in the years ahead.

The land forms an important barrier between Cobham and Ockham & Ripley and an inevitable inexorable sprawl of urbanisation would inevitably follow if this appalling idea were to see the light of day.

The proposal is not sustainable, there is insufficient land available.

The site is adjacent to an area of outstanding natural beauty (AONB).

The road network is inadequate, not to mention loss of good farmland and natural habitat.

I strongly object to the the proposed green belt developments at Wisley Airfield, West Horsley, East Horsley, Send, Send Marsh, Garlic Arch (A43).

The consequences for these villages would be profound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I, like him, am fed up with the time the Council forces us to expend on this exercise and I require confirmation that all of these comments together with all my previous comments are passed to the Inspector.

I reserve my right to appear at the inquiry and present my evidence.

I am a very busy grandmother and do not have the time he has to sort out point by point so generally I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

It is adjacent to the RHS at Wisley where visitor numbers will increase by 500,000/annum and the associated traffic increase from the RHS has not been taken into account nor the fact that 1000’s more visitors appear for special events several times a year and the resultant traffic has not been taken into account.

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

Opportunity (3) should be common to all sites and is not unique to this site

I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
I object to the removal of additional 3.1 ha from the green belt without any justification.

I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

I object topara 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change.

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In summary I again object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

Any public transport provision such as bus services to/from Guildford or into Effingham, East Horsley or either of the nearby stations will have to negotiate the over-crowded SRN, will be an unreliable service for potential customers but more important dangerous on such small narrow over crowded lanes. Furthermore there is insufficient parking available at East Horsley or Effingham to accommodate the additional population that will need to commute either to London or into Guildford using the rail service.

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe. This infrastructure is simply not there to support this.

It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.

- The associated traffic increase from the RHS has not been taken into account.
- The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

Whenever there is an event on today, the traffic is at a standstill already

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station, Effingham or East Horsley

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

Opportunity (3) should be common to all sites and is not unique to this site

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.
I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

I object to the removal of additional 3.1 ha from the green belt without any justification. Green belt is supposed to be PROTECTED!

I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact and is PROTECTED green belt land!

I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change.

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge. Junction 10 of the M25 / A3 is already above the legal air quality limits. As I have 2 asthma sufferers in my household this is extremely important to us particularly as a family.

I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above, yet again, this plan is unsound and not fit for purpose. I object to this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT TO site A35 Wisley Airfield – 2000 homes that are totally inappropriate and unsustainable development in the Green Belt. This is a hugely disproportionate amount of development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings and the development of up to 600 houses in East Horsley

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor.
stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow roads in Ockham, East Horsley and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25, specifically around junction 10 of the M25 and the A3 Guildford bypass. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities. We moved to East Horsley to enjoy living in the countryside not in an overpopulated urban sprawl.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to object to the draft local plan. I see that although the application for a development of over two thousand houses on and adjacent to Wisley Airfield (a New Town) was well and truly rejected, it is still on the draft plan. The idea of what is virtually a new town on the Green Belt of Surrey's countryside is appalling. The object seems to be to turn the beautiful Surrey Green Belt into one vast conurbation. The Green Belt areas were left as green 'lungs' between conurbations and were to be sacrosanct. It seems that there is no interest in 'brownfield' sites, maybe because they are more expensive to develop. It now appears that it is proposed to take three villages out of the Green Belt. (including Ripley, a charming small 'English' village, where I live). This would defeat the object of the Green Belt.

Apart from the issue of the Green Belt, there is also the issue of overcrowding of the narrow country lanes (I live on a lane where two cars cannot pass) and the consequent bottlenecks and gridlocks in local Guildford and on the A3 at busy times. It would appear that The 'Local Plan' would seek to increase the housing and business supply by 25 per cent over the next 15 years. The occupiers of any new properties would doubtless have two cars and add to the chaos. The infrastructure will not bear any further burdens. The local bus service is being reduced, the local Secondary Schools are already fully subscribed. It would seem that taking these three small country villages out of the Green Belt would only add to the danger and disruption of this already busy countryside. Please be guided by the people who live in the surrounding areas and let us keep our Green Belt!

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT TO development of Wisley Airfield. This site is not and never will be suitable for the proposed new town of 2,000+ houses and 4,000+ vehicles. A3 is already working at full capacity with tailbacks at peak times. The site falls between three junctions M25, Cobham and Ripley causing traffic chaos. No adequate public transport the two local railway stations already over subscribed. Combined with narrow lanes the whole area would be turned into a traffic disaster. Air pollution, no adequate infrastructure makes the whole plan a non starter.

Supportive of public tenure pitches as it is easier and provides a level of control.
Support that GBC allocate and manage the pitches as it ensures fairness and tenure security. Support inclusion of garden provision and softer landscaping.
Utility blocks are necessary as no one will want to live somewhere without a utility block and the site will end up being a transit site No facilities of space within a mobile home for washing facilities. If a family could afford a unit with wash facilities, it is likely they would be on a private site anyway.
Strongly support the need for inclusion and breaking down of barriers, particularly for the children.
Agree with softer landscaping to resist isolation.
If outhouses or utility blocks are not including, outbuildings will be built anyway.
Support phasing of the sites .

I object to the large proposed developments at Site'A35)2,000 houses at former Wisley Airfield (already rejected by GBC), Site A25 - 2,000 houses at Gosden Hill Farm and the 1,850 houses at Blackwell Farm, because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
A35 Land at former Wisley Airfield

Comment: I have objected before to this development as I consider this proposed development to be a contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley and its infrastructure. It will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

It is my assessment that the submission plan is unsound due to the number of errors in the plan, the poor quality and the lack of transparency in the evidence base, including the fact that large files have also been used again which are not compatible to those of us with poor internet connection. There is also a considerable lack of clarity.

I am writing to confirm my continued objection to the inclusion of A35, Three Farm Meadows in the draft Local Plan for the reasons as given below:

- It is the least sustainable site in both this and previous versions of the plan because of the constraints on the site and the physical location.
- It is further away from any railway stations than any other identified strategic site.
- It is adjacent to one of the most congested stretches of strategic road network in the country (ie M25 Junction 10)
- Local road are already at capacity particularly when there have been any incidents thus making the SRN not free flowing.
- Public transport is already having to negotiate the overcrowded SRN and is therefore unreliable and subject to frequent delays.
- It is also adjacent to one of the most popular visitor attractions in the south-east, the RHS at Wisley which attracts huge numbers. Any regular events which take place several times per year already result in extra traffic chaos and I feel this has certainly not been taken into account.
- There is insufficient employment available on site so that all residents will have to travel to work. It is unrealistic to assume that people will walk/cycle on narrow local road on a regular basis.
- I also object to any changes within the green belt boundaries.
- I also object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultants.
- I wonder and object to the fact that there has been no clear explanation why the council think it appropriate to have a regulation 19 consultation when the changes are major and needs to be based on the totality of the plan rather than the proposed changes.
- I object to the inclusion of A35 as it will not contribute to the 5 year housing projection due to constraints notably in the provision of sewage capacity
- I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
- I object to a 10% inclusion buffer in the housing number over the plan period as it totally unnecessary.
- I object to the transport evidence base including the SHAR 2016 Highways assessment report which has already been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
• I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
• I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBSPA etc. I believe that the housing number is unsound and open to legal challenge.
• I object to the apparent disregard for the impact of in-combination development on the THSPA, particularly damage caused by nitrogen deposition and high pollution levels.
• I object to the differences in the housing figures set out in the Annual Housing Target table. Another glaring example of why the plan is not sound.
• I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I also object to the reliance of the Carter Jonas study update 2017 which includes “demand” for retail space from companies that are already in administration.

I particularly wish to emphasise the danger posed by an additional 2000 homes at the old Wisley airfield site will add significantly to the existing horrendous traffic problems at the A3/M25 junction during the rush hours.

I hope you will find it helpful if I explain that no amount of fiddling around with the access to the A3 will resolve the problem of say an addition 3000 cars joining the A3 so near to the M25 junction.

In any event, there is no local requirement for additional housing in the area whereas there is a considerable desire to retain the green belt as it is without interference from outsiders who have no interest in the area.

I thought the point of having a ‘consultation’ was to listen to what people are saying and to act on the feedback. You seem to have very largely ignored what almost all people have said.
You seem to ignore the fact that there are already too few doctors in the area, too few teachers and no demand for additional shops/retail development. There are many care homes and sheltered developments in the area.

You seem to totally ignore the obvious opportunities to development at Leatherhead, Dorking and Guildford. It makes one wonder if there is a vested interest at work – particularly bearing in mind the recent history of planners benefitting from their connection with developers.

The green belt was devised to prevent exactly this type of proposal.

The plan remains largely unchanged and thus all the original 30,000 odd objections made previously remain.

I must say this latest proposal is designed to change very little and to hope that people give up objecting because it does no good. It seems you think that if you just change the plan a tiny bit it will go through without problem and if you do it often enough the residents will give up.

I know of many who have given up objecting as it alters nothing.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Local Plan 2016

I write to confirm my total opposition to the local plan you proposed on 6 June 2016. The reasons for my opposition are:-

1. In my view, the removal of any green belt protection amounts to the desecration of our lovely villages & countryside. Many parts of these areas have rare & or protected animal & plant species.

2. The roads around this area are far too narrow and are clearly unsuitable for any additional traffic. My estimation is that an additional 643 houses would mean about a further 1200 cars using our narrow lanes and roads (see also next point)

3. The proposed development of 2000 houses at Wisley Airfield would add about another 4000 cars all trying to reach the A3 or M25 at about the same time each day. In all about an extra 5000 cars would be generated without taking into account the additional commercial vehicles.

4. The narrow country roads cannot support this additional traffic growth nor could it be safe to put so much additional traffic onto the A3 and M25. A large number of vehicles would try to avoid the bottle necks that would be created by using the minor roads as escape routes (rat runs).

5 In any event it was promised that the Wisley Airfield would be returned to green belt after the war and the government promise should be kept.

6. There are already long queues on the A3 north bound & south bound at the M25 junction during rush hours.

7. The decision on local expansion should lie with local people not with people who would be unaffected.

8. There are large areas to the West of Guildford that would be much more suitable for development.
9. The area north of the A3 towards Woking also would be better able to accommodate additional housing and traffic as would Farnham, Aldershot, Farnborough & Fleet.

10. Equally there are many brown field sites around Guildford, Leatherhead, Godalming & Dorking which should be used in place of your proposals.

11. There is no large demand for additional housing in this area.

12. There are not enough doctors in the area.

13. There are not enough schools or teachers in the area.

14. Expanding existing schools is not a solution & would mean education standards would drop dramatically- large schools invariably mean poor standards of education (&indeed behaviour).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

4) Policy A35 Land at former Wesley airfield, Ockham. In the AECOM assessment, this site has, by some margin, the poorest sustainability appraisal. GBC Is proposing to choose to ignore the many hundreds of objections lodged in respect of the planning application for this site. I STRONGLY OBJECT TO SITE POLICY A35, THE CREATION OF A NEW SETTLEMENT AT THE FORMER WISLEY AIRFIELD.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

SITES POLICIES:

Policy A35: Wisley Airfield. I object to this proposal. The proposed Wisley development is probably the craziest thing in this entire document. It represents Town Planning at its very worst. The idea is to build what is effectively a new town in the heart of beautiful and historic Surrey countryside, full of pretty villages which have grown up over a thousand years. The traffic impact will be horrendous. The impact of the protected wildlife next to this site will be catastrophic. All new services will need to be brought in. And who will guarantee that all of this actually? Well.....actually, nobody knows...
because the entire project is being run anonymously. Everything that is wrong with town planning in England is symbolized in this proposal. I OBJECT TO POLICY A35.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The proposal to build a new town on the site of the former Wisley airfield is an appalling idea and should be removed from the Local Plan without delay. This site has no redeeming merits whatsoever. It has no facilities or infrastructure, will destroy local wildlife, will see new homes build in an area of high air pollution, and it will have a major impact on local schools, doctors’ surgeries, etc. This is a picturesque, historic area. To transplant a piece of central London and parachute it into the midst of these five beautiful rural villages is the worst planning proposal I have ever seen.

This site should have been removed from the revised Local Plan. It is a mystery to me why it was not, when other sites with far fewer deficiencies were removed. I strongly object to Policy A35.

For these three major reasons I object generally to the revised Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5608  Respondent: 10647169 / Richard Johnson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The proposed Wisley airfield development seems to have paid little account to the needs of infrastructure - approx 4000 extra cars all driving on the existing roads/lanes, children accessing secondary schools (do the schools have places?) will result in road chaos.

Air and noise pollution from the nearby A3 and M25 exacerbated by the extra 4000 cars - will it be a healthy environment to live in?

The Wisley development will eventually result in the unintended amalgamation of the villages of Ripley, Cobham, Effingham and Horsley into one large strip development - has that result been considered and planned for?

To sum up, the proposed housing developments are too big, seem to lack forward planning and there is no infrastructure planned to deal with it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Although there are many other aspects of the latest version of the Guildford Plan which have clearly not been thought out properly, I will not add to my list of objections at this stage, except for the outrageous issue which is the long standing Wisley Airfield site and the fact that despite a unanimous decision of the Council to turn down this Application, it has been allowed to remain as part of the Guildford Plan. This disgraceful decision is an assault on the electorate and unless speedily rectified will be indelibly engraved in the hearts and memories of voters. So you may take it that I also strongly object to any development of the Wisley Airfield site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Site A35 Wisley Airfield
I object to the proposed increase to 95.9 hectares. The resultant increase in traffic volumes would be excessive on top of the existing traffic levels especially in Ripley where traffic is often at a standstill at morning and afternoon peak times. Newark Lane, in particular, cannot cater for any additional traffic and yet it would be the most likely favoured route for traffic to Woking from the Airfield development. Once again I object to the gross misuse of Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

3 Wisley airfield (support proposal)

3.1 An application was recently refused on the grounds of "inappropriate development" in the Green Belt, giving future objectors a convenient menu of items for their continued opposition. However, it is apparent that the Council is actually in favour of the development and further applications will come forward in due course.

3.2 At this stage, there can be no certainty that it will ultimately be approved. If 2000 houses are suddenly removed from the housing proposals to meet an "objectively assessed need", then the whole plan will be in jeopardy at examination.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT also to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee recently rejected a recent planning application for precisely this development was unanimously on 14 separate grounds.[1] This deceived many residents into thinking that it has been defeated: scandalously, the site had been included in the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers that they should try again.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given additional months to refine their application. Residents are disturbed by apparent party links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.[2]

Three Farms Meadows before WW2 was a valuable argricultural asset to the UK. It still is. It grows enough wheat for 1 million loaves of bread.

The hamlet of Ockham gladly helped the war effort by allowing the fields to be used for the defence of the realm on the understanding and promise from HM Government that after hostislities ceased it would be returned to farm land and the hamlet to a quiet rural existence. For their loyalty to King and country the villagers have been let down and subjected to the threat of the engulfment of the hamlet and the end of their peace and quiet as well as the loss of a valuable food production resource that the country needs to be self supporting (UK only produces half of what it consumes as food. - 2015).

Ockham is a historic place. The home home of ‘William of Occam’ philosopher and author of Occam’s Razor.

Ockham is the home of ‘Ada Lovelace’ the world’s first computer programmer (now on the UK passport)

The site of ‘The Ockam Hoard’ a Bronze Age Hoard of bronze axe heads and jewellery now at the British Museum.

The hamlet is a Grade 1 listed architectural treasure and must be protected.

Please remove Three farms Meadows from the Local Plan immediately.

Policy A35 should be summarily removed from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”;
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it;
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA);
• Proximity to A3/M25 bottleneck and Ripley village and roundabouts;
• Absence of adequate traffic data;
• Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school;
• Loss of high-quality agricultural land (55% of the site), in breach of national policy;
• Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households;
• Presence of a Surrey County Council safeguarded waste site;
• Cost of infrastructure required to the detriment of alternative more favourable sites;
• Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity;
• Impact on listed buildings;
• Difficulty of SANG siting and inability to divert residents and their pets away from the SPA;
• Extreme housing density with tiny garden spaces;
• Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure;
• Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames;
• Failure to evaluate the cumulative impact of this and nearby development sites on the area.

[2] Including the Rt Hon. David Mellor QC (its erstwhile founder and former Minister), Mr Michael Murray (spokesman for the project and Conservative cabinet member for planning policy at the Vale of the White Horse District Council in Oxfordshire) and the Hon. Charles Balfour (director, descendant of the Tory Prime Minister).

Objection to Site 35. Proposed development at site A35 Three Farms Meadows, the former Wisley Airfield in The Draft Local Plan.
The people of Ockham helped to win the war. Will they be allowed to live in peace?

When captain ‘Mutt’ Summers (pictured left), chief test pilot for Vickers Armstrong made his emergency landing on a grassy stretch of Ockham farmland during the early stages of World War 2 he could not have guessed at the far reaching changes his discovery would bring to the local residents.
They were accustomed to walking across the green fields from Elm Corner to Ockham Church on a Sunday morning and enjoying lunch with vegetables grown in the the big field at Elm Corner.

However, the land was requisitioned in 1943 by the Ministry of Defence to make way for an airfield. Access to the public was denied, rights of way closed and four farms Stratford, Hyde, Corsair and Cuckoo together with buildings were demolished.
“Wisley Airfield” is so called because most of the land used to be in the parish of Wisley, until the reorganisation of parish boundaries in 1938. Now the airfield is totally within the civil parish of Ockham.

Following requisition in 1943 The Ministry of Defence promised and gave assurances that after the cessation of hostilities it would be returned and restored to agricultural use. It never was. The government never delivered its promise to the people of Ockham who surrendered land so that our country did not have to surrender to Hitler. The ‘Crichel Down Code’ decrees that land commissioned in an emergency must be offered back to the existing owners in the same condition as before. It never was. The people of Ockham who helped to fight off foreign invaders now are having to fight off foreign Cayman Island investors who seek to concrete over their historic Green Belt hamlet. Isn’t it high time, after 75 years, that the good people of Ockham, for their war time sacrifice, were given their just reward – peace.

Ockham History. Historic Ockham Village deserves special protection status because it is nationally important hamlet and should not be subsumed into a ‘new town’ It is…

1. The birthplace of the philosopher William of Ockham. famous for ‘Ockham’s Razor’.
2. The home of Ada Lovelace The worlds’ first computer programmer.
3. The site of ‘The Ockham Hoard’ a significant Bronze Age archeological find now at The British Museum.

I also continue to object to the inclusion of site A35, Three Farms Meadows in the draft Local Plan for many more reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J110)
3. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
4. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
5. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
6. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The associated traffic increase from the RHS has not been taken into account.
7. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. Opportunity (3) should be common to all sites and is not unique to this site
12. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
13. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
14. I object to the removal of additional 3.1 ha from the green belt without any justification.

15. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

16. I object to paragraph 22 as this does not reflect the impact of the buildings on the surrounding area.

17. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

18. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

19. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

20. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

21. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

22. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

23. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

24. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

25. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

26. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

27. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

28. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

29. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

30. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

31. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

32. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

33. I object to the loss of prime agricultural land that can produce around 1 million loaves of bread per year when the UK produces less than half the food it consumes.
34. I object to the council ignoring The House of Commons Environmental Audit Committee 2014-15 who warned of the dangers to child health which are recorded in the findings of this committee. Excerpt from the committee findings. "New schools, hospitals and care homes must not be built next to air pollution hotspots to help reduce the tens of thousands of deaths currently being caused by nitrogen dioxide (NO2) and particulate pollution (PM 2.5 & PM 10) every year in our cities, Existing schools next to busy roads should also be fitted with air filtration systems. Wisley/A3 is one of the biggest pollution black-spots in the UK.

For the reasons listed above and numerous other reasons I consider this Local Plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposed development of 2,000 homes at the Wisley Airfield site, which in currently in the Green Belt and in direct contravention of Central Government's commitment to the protection of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/2655  Respondent: 10678465 / M.J Wright  Agent:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  - The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  - The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  - The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  - The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  - The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  - The lack of suitable public transport stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in...
Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

2. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

3. 26 I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

4. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations. There should be a clear statement as to how this has been allowed to happen.

5. I object to the extension of the plan period by 1 year as it has not been identified as a major change

6. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

7. 18 I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes. What is being done in this regard?

8. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

9. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
10. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
11. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building. All the arguments with regard to conservation in the area apply.
12. I object that the changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.
13. Reliance on Woking Station is unsustainable. Woking is already at capacity in terms of the station itself and nearby parking.
14. Additional bus services would compromise the safety of those cycling and walking in the area.
15. Its location to the M25 at J10 and the A3 means overloading one of the most congested junctions in SE England.
16. I object to the application of new housing on the old Wisley Airfield on the ground that it is the least sustainable strategic site in either version primarily due to its physical location.
17. The site is further from the railway station than any other proposed site. This station has insufficient trains to deal with increased passengers and a very small car park which is already filled to capacity. There is no scope to increase the size of the car park.
18. Local roads are at capacity and increased public transport would have to negotiate over already overcrowded SRN. They would be unable to offer a reliable service.
19. Additional visitors to the RHS Wisley have not been included.
20. There is insufficient employment opportunities on the proposed site. All residents will therefore need to travel to work by public or private means.
21. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
22. I believe that opportunity (3) should be common to all sites and is not unique to this site. I object that insufficient consideration has been given to this.
23. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB. What has been done in this regard?
24. I object to the removal of additional 3.1 ha from the green belt without any justification.
25. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
26. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
27. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
28. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
29. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
30. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS. No reasonable explanation has been given for this.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
33. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I therefore consider that this plan is unsound and not fit for purpose and must be rejected.

Wisley Airfield Development.

I have a strong suspicion that someone in the council saw this area on a map and thought “great, build 2,000+ houses there and we’ll easily meet the councils projected housing needs in one fell swoop. No need to do the job properly and look for all the brown field sites that could be developed first … that’s too much like hard work”. Then a developer comes along and says yes, we can build all those houses for you at Wisley, no bother (whilst rubbing his/her hands at the massive profits they’ll make in the process). Nowhere do I see that the council has demonstrated that they have really looked long and hard at the impact of such a massive development, or at the infrastructure needs it would mandate, or more critically, at potentially better and less impactful alternatives.

Further, now that we are in Brexit mode, is it the councils intention to look at how this factor might change future housing needs?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )
I object to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt.

I object to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1300  Respondent: 10732161 / Anne Bowerman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the removal of the Wisley Airfield site from the Green Belt.

I object to building any homes, let alone the 2000 proposed, on the Wisley Airfield as it will lead to at least 3000 extra cars in the area and in particular so near the A3 which is already near capacity, leading to frequent tailbacks, especially at the Guildford By-pass, without all the extra vehicles from other sites proposed in the Plan.

I object to the Wisley Airfield proposal as it is in an area of natural beauty with Wisley Lake on one side and the RHS nearby, both of which will lose their attraction if they have a new town on their borders.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3871  Respondent: 10732193 / Leslie Bowerman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- I object to the proposal to create a huge new town of 2,000 houses at the former Wisley Airfield which is supposed to be agricultural land and is part of the Green Belt. This proposal is completely out of character with the existing rural environment, will have a devastating effect on the A3 trunk road which is already grossly over-stretched. It will make visiting the nearby Royal Horticultural Gardens difficult to access. The traffic problem will exacerbate the already existing tailbacks which occur every day on the Guildford By-Pass, not to mention similar problems in Ripley and Send. Moreover, to include this site in the Plan is totally inconsistent with planning permission having already been turned down by Guildford Borough Council. It is difficult to envisage the purpose of sneaking it back into the new Plan unless it is to financially benefit the Council or the developers.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• I object to the development of 2000 new houses at Wisley Airfield, as although we have been told this is more feasible due to the development of the new interchange onto the A3 at Burnt Common – access to this is planned via the Portsmouth Road, which would reduce the Portsmouth Road to a crawl at best

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Development of 2000+ houses etc – I object to the proposed plan and set out below some of the reasons.

I wish to object to the above proposal on the following grounds:-

1. Green Belt has a presumption against development unless there are very special I fail to see any such circumstances in this application.
2. The local roads are unsuitable for an extra 3000+ cars from this. Even allowing for a new access point onto the A3 I Ockham Road North roundabout the flow would be to a congested A3 and narrow surrounding roads. Cut though roads such as Wisley Lane and Newark Lane are single width at various points while the High Street cross roads with Newark Lane and Rose Lane in Ripley is a frequent congestion point. Tinkering with these junctions only pushes the problem further up these narrow roads. To access the A3 southbound, traffic would have to travel through Ripley to the Burnt Common roundabout. Send Road, Send (A247) is also likely to be adversely impacted on an already congested road right through to Old Woking at peak times particularly as there are schools along this route. The Cobham slip road off the A3 northbound is already frequently backed to a standstill onto the A3 itself. See also numerous comments from the A3 Survey in www.getsurrey.co.uk
3. If you link this proposed development to the following potential huge unwarranted developments outlined in the draft Local Plan (some noted below) then on road infrastructure alone it is simply ludicrous:-

1. Site Allocation A 15 Guildford Cathedral - 100 homes I 150+ cars
2. Site Allocation A24 Slyfield - 1000 homes I 1500+ cars
4. Site Allocation A26 Blackwell Farm - 1800 homes I 2700+
5. Site Allocation A42 Tannery Lane, Send -45 Homes I 60+ Site
6. Allocation A43 Garlic Arch -400 homes I 600+ cars
7. Site Allocations A38, A39, A40, A41, A45 - 463 homes I 700+ cars
8. Site Allocation A44 Send Hill, Send - 40 Homes / 60+ cars.

4. By continuing to "over react" to what we are led to believe is a greater need for housing in the south east we are destroying the essence of village life that has "evolved" over hundreds of Small developments of say 4 or 5 houses may be acceptable in some rural areas along with updating and modernising existing stock which would not impact the character of the area. Population and business growth should be dispersed in other areas of the country where there is a need and to even up the "divides" rather than concentrating on a self defeating build more I attract more process in the south east.

5. This Green Belt proposal if allowed could lead to other substantial developments in the vicinity (some mentioned in 3 above) which have already been condemned by local residents during the draft plan consultations and thus should be refused.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Site A35 Former Wisley Airfield

- The size increase proposed to 95.9 hectares at the site A35 Former Wisley Airfield means that the volume of traffic which will be using Ripley High Street and local roads will cause congestion and pollution. Nitrous oxide levels are already above safe levels and speeding traffic through rural villages is a danger to local residents.

1. The area cannot accommodate a new small town at Wisely for the same reasons. All plans to build on the Wisely airfield should be stopped and the land should be returned to agricultural land as was promised when the airfield was built during World War II

The latest Guildford Borough Council Proposed Submission Local Plan should be rejected in its entirety for the reasons stated above. The local plan can be done so much better!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Land at former Wisley airfield, Ockham should not be used for housing, but kept as part of the Green Belt. The revisions proposed does not provide any justification for continuing to include this site within the revised Local Plan. I object most strongly to Site Policy A35, the creation of a new village at Wisley airfield

I am writing to object as strongly as I can to the draft Guildford local plan currently out for consultation. It is with some dismay to note that Three Farms Meadows at Ockham, is still included in the new plan for development of up to 2000 plus houses and an industrial estate.

It seems quite extraordinary that having been unanimously objected to by Guildford Borough Council Planners, it is still being considered as appropriate.

The reasons given for the refusal of the Planning Application have not been mitigated to any degree whatsoever and how, in such a short space of time, the Guildford Borough Planners and Politicians can change their minds so completely, is beyond belief.

The reasons for objecting, certainly to that part of the Local Plan as well as many other proposals, are well rehearsed and well understood by the Planners and local Politicians. Green Belt should always be safeguarded as much as possible, which is of course, specifically dealt with in all Government guidelines relating to such things currently in play.

If the local plan proceeds to be issued in its current form, Guildford Borough Council, in particular the Planning Department and the Councillors who support the Draft, will lose all credibility, if any still exists.

I trust my objection will be treated, along with the hundreds of others that I am sure will be received, in such a way as to show the Council that it is time they started to listen to those whom they serve.

If the local plan proceeds to be issued in its current form, Guildford Borough Council, in particular the Planning Department and the Councillors who support the Draft, will lose all credibility, if any still exists.

I would also like to add that the volume of traffic surrounding the M25/A3 junction and the A3 southbound to Guildford and northbound to London, is proving to be a nightmare for local villages and residents and access on and off the A3, not to mention the noise, pollution and danger.

There are more and more accidents every day and it is becoming a very dangerous area to drive. The local lanes around Ockham, Ripley, The Horsleys, Effingham, Bookham etc are struggling to cope with the traffic today and they are not wide enough for cyclists and cars now, so goodness knows how it will be if we have even more housing and businesses in this area. The A3 will become a static car park, like the M25 in this area, particularly at Junction 10 which is already congested eastbound and westbound at present.

I trust my objection will be treated, along with the hundreds of others that I am sure will be received, in such a way as to show the Council that it is time they started to listen to those whom they serve.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the large proposed development of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope. The local school cannot take any more pupils. The local doctors' surgery cannot take any more patients.
I vehemently object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

I ask that you please take note of the deep concerns of a huge number of Send residents and indeed many others who are connected to the village, pass through it on a daily basis and use this area for recreational purposes.

Please would you acknowledge receipt of this letter.

Policy A35 – Land at former Wisley airfield, Ockham

I OBJECT. GBC recently rejected a planning application for this site, so it is extraordinary that they should continue to include it in the Local Plan.

I originally wrote this objection in January 2015. Nothing has changed.

Wisley Airfield is in the Green Belt and has lain largely undisturbed for well over thirty years. It is scarcely a brown-field site and there are no “exceptional circumstances” which would outweigh the harm to the Green Belt were development to go ahead. The site is adjacent to the world-famous Wisley RHS Gardens and to the SPA at Chatley Heath. Destroying a special site and “replacing” it with land elsewhere would be detrimental for the environment, nature and wildlife. The land available at Wisley airfield is not sufficient for the number of houses proposed and there is no prospect of acquiring more. The local roads are not able to cope with the increase in traffic which would result from the development. The main road through East Horsley towards Ockham and Wisley Airfield is Ockham Road South (B2039) which already takes a significant volume of heavy goods traffic. The road is not wide enough for two large commercial vehicles to pass without one ending up on the pavement. Additional traffic caused by development will only make matters worse. The road is dangerous for cyclists – because it is narrow and because it is not maintained adequately, given the volume and weight of traffic it has to handle. Sewerage services, water, gas and electricity supplies are already severely stretched and suffer frequent breakdowns. They cannot cope with significant additional housing. The A3 interchange is uni-directional, allowing traffic to go to and from London and the M25. There is no access to or from the Guildford direction, so traffic will have to go through the centre of Ripley village. The junction of the A3 and M25 already fails to meet European standards on air pollution. Additional housing will only make it worse. The junction of Ockham Road North and the A3 at Ripley, close to the proposed site, is regularly flooded and – not for the first time – was closed for several days last year. Another attempt at drainage work is under way at the moment – there is no reason it will be any more successful in the long term than its predecessors. There is no adequate plan for public transport to the area.

1. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

1. I object to the continued Inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8111 April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):

- Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
- Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
- Unacceptable Conservative Party links between the developers and the Council.
- No Green Belt “exceptional circumstances” presented.
- Not a brownfield site as stated – only 15% of it.
- Proposed SCC waste site ignored.
- Loss of farming land.
- Too near RHS Wisley and Thames Basin Heath SPA.
- SANG would harm on SPA.
- Unacceptable increase in air pollution.
- No existing public transport and stations miles away.
- No proper traffic data.
- Housing density far too great.
- Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
- Access confined to inadequate narrow lanes.
- Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
• Major impact on neighbouring villages, especially Horsleys.
• No assessment made of collective impact on area of this and 6 Horsley sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the development of the former Wisely Airfield. This will have a massive and detrimental effect on the present road system. There will be increased congestion at the Ockham roundabout as there is no provision for traffic heading South to access the A3. Traffic will travel through Ripley, and contributes to the times before the A3 by hours.

Increased traffic will lead to further air pollution. Motorists wishing to travel by train from Horsley and Effingham Junction will be unable to park, places are already full.

Road Closures in the Ockham area will create havoc.

The new roundabout at Newark lane and Ripley High St. is not necessary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Policy A35 Wisley

We object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again. There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company. Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”. 2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.

3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

4. Proximity to A3/M25 bottleneck and Ripley village and roundabouts. 5. Absence of adequate traffic data.

6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.

7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.

8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).19

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. I live in the hamlet of Hatchford and the narrow and winding Ockham lane route to Cobham is not suitable for any increased use by the additional cars set out in point 6b.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements. The initial proposals for development of the Former Wisley Airfield proposed a bus route from the development to Cobham via Ockham Lane. This appeared ill thought out with no regard to the safety of walkers and cyclists along the route.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
congested enough as it is without a further 2,000 cars on these narrow roads. Local roads around Wisley suffer terribly with drainage and flooding and no scope for improvements, this will be exasperated if more homes are to be built.

I object to traffic congestion that will result from the development of the Wisely Airfield / Three Farms Meadows into a 2100 dwelling housing estate

I object also to the proposed plans for development of the Wisely airfield at the Ockham A3 junction into a 2100 dwelling housing estate. There is simply not the local infrastructure in place – primarily transportation infrastructure – to support this development. I live right on Ripley High St and can tell you we have grid-lock every morning in both directions. I invite you to visit and see the long queues, in both directions. 2000 new homes many of which will commute South on the A3 to nearby villages will create massive amounts of new traffic, and it will all go through Ripley’s 1 main road - the High Street to get to the A3 southboard sliproad at Send. As experienced local planners you must already be aware of 2 examples of local precedent to mitigate critical traffic levels in Ripley in the recent past:

1) The relevant local section of the A3 is called the "Ripley Bypass". It was built to divert the massive amount of traffic going down Ripley High St (the "Portsmouth Rd.") around Ripley. This is going to happen again if you build 2100 new houses next to Ripley without letting them use the Ripley bypass. Now you may say they can just go via A3 North, and around the M25/J10 roundabout, but in the morning that is even more seriously gridlocked and it is obvious that faced with a queue 40 mins there or just driving through Ripley then commuters will do the latter.

2) Prior to consideration of the Wisely airfield being used for housing, it was given permission (on Sec. of state appeal) to be a large waste composting plant. This was a huge concern to the late Cllr. John Garrett and he demanded several planning conditions put in place, one of which was a ban on the lorries using the plant driving through Ripley. He understood the problem of increasing the already serious levels of traffic through Ripley and the damage it could cause to the village's character not to mention the safety issues. As you probably know we have 2 schools and a lot of elderly residents in Ripley.

Proposed Submission Local Plan: Policy A35, land at former Wisley Airfield, Ockham

This letter is further to my letter of 19 June concerning the Proposed Submission Local Plan and provides additional comments on Site Policy A35, ‘land at former Wisley Airfield, Ockham’.

I strongly OBJECT to this proposed policy for the reasons detailed in this letter.

1. The proposed development represents a fundamental breach of Metropolitan Green Belt rules;
2. This site does not meet acceptable levels of sustainability:
3. The site will have a severe impact on local traffic & infrastructure: and
4. The development is totally out of keeping with local character, context & distinctiveness.

Taking these points in turn:

The proposed development represents a fundamental breach of Metropolitan Green Belt rules

The site forms part of the Metropolitan Green Belt. Under NPPF regulations, development on such Green Belt land is only permitted under ‘very special circumstances’. GBC’s Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that: *It has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified.*

Ministerial guidance has repeatedly confirmed that unfulfilled housing need does not qualify as a very special circumstance. Removal of this site from the Green Belt is totally against its rules, regulations and underlying spirit. The site location at the edge of the M25 circle represents a ‘first line of defence’ against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

*Accordingly, I OBJECT to Policy A35 as a fundamental breach of the Metropolitan Green Belt rules.*

This site does not meet acceptable levels of sustainability

The site has poor sustainability:

- There is currently no infrastructure whatsoever at this site, meaning that all water, electricity, gas and phone services will need to be newly established;

- New large-scale sewage disposal will be needed, a fact recognised by Thames Water, indicating it may take 3+ years to provide adequate sewage handling facilities for this site;

- There are presently no schools, medical services or shops within walking distance of this site;

- There is presently no local employment at this site and little after the development is completed;

- There will be a significant destruction of agricultural land arising from this development;
There will be significant environmental damage from this development;

There is no public transport currently serving this location;

The nearest train stations are Horsley and Effingham Junction, both around 3 miles away - too far to walk. Neither of these stations currently have significant parking capacity available.

Travel from this site will be primarily dependent upon motor vehicles. Any new site so dependent upon motor vehicles for transport cannot be considered as being ‘sustainable’;

New access roads will be needed and significant changes proposed to the surrounding road network, leading to further pressure on over-crowded rural roads and increase in the traffic congestion in nearby settlements.

Accordingly, I OBJECT to Policy A35 on grounds of its unacceptable sustainability.

The site will have a severe impact on local traffic & infrastructure

The proposed development will have a severe adverse impact on road traffic in the surrounding area. This includes East Horsley where high volumes of additional traffic are likely from the residents of this new settlement accessing East Horsley’s two stations, shops and nearby schools. Many of these roads that will carry this traffic are without pavements for large stretches, whilst the principle through-roads of Ockham Road South and Forest Road pass along unlit residential areas so narrow that two buses cannot cross in many sections.

The road closures and junction changes being proposed to accompany this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which suffer from traffic congestion at peak hours.

Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity. The suggestion of the developer that large numbers of cyclists from Site A35 will daily cycle 3 or 4 miles along busy roads in order to access one of these two stations lacks credibility. Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.

Accordingly, I OBJECT to Policy A35 on grounds of its severe impact on local infrastructure.

The development is totally out of keeping with local character, context & distinctiveness

In the 2016 Proposed Submission Local Plan, GBC’s first housing policy, Policy H1, requires that development should: “make the most efficient use of land whilst responding to local character, context and distinctiveness.” However, Policy A35 fails to do this.
With its proposal to build some 2,100 homes, Policy A35 will create a new settlement larger than any other in Guildford Borough, outside of Guildford itself. The current and historic village of Ockham has merely 159 dwellings. It will be completely swamped by a development on such a scale.

Moreover, the design and density of the proposed development will be completely out of context with its surrounding area.

East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town, with some 1760 homes. East Horsley presently has an overall density of 8.1 dph within its settlement area. Therefore, the proposed development of Policy A35 is six times as dense as the nearest settlement of a comparable size. The proposed development under Policy A35 therefore utterly fails to respond to local context and as such is in breach of GBC’s own housing plan policy H1.

The density of 49 dph proposed under Policy A35 is effectively an urban density appropriate for a metropolitan location. It is to be achieved by building apartment blocks of five stories in height, according to the designs previously presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley. These villages have grown up organically over a thousand years. They contain many historic, listed or otherwise protected buildings as well as a range of residential housing, predominantly detached two-storey houses or bungalows. They are all picturesque villages with charm and character. Visitors come to the area to enjoy some of the prettiest villages and countryside in southern England, all within easy access of London. The character of this whole area would be irreparably destroyed if this development goes ahead.

Accordingly, I OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches emerging GBC Policy H1.

APPENDIX

The following table sets out an analysis of new housing developments proposed in the draft Local Plan and provides an estimate of the new of developments which are set within the Metropolitan Green Belt:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I further object to the proposals for Wisley airfield - the present road system is fighting to cope with the existing traffic in this popular area, the A3 is always very busy. Considerable thought needs to be given to the provision of a suitable road system BEFORE any building starts here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

A35 I object very strongly to building of any kind on the Wisley Airfield site. This is a location of historical interest, it is a haven for wildlife and building here would cause many problems for the local environment. This location has no immediate local facilities to support the new "community" which will be created. This will mean more overcrowding at the railway stations in East Horsley and Effingham Junction. More traffic and congestion on local roads and especially on the already crowded A3 and M25.

I believe we are custodians of the countryside and we have a duty to maintain them for our future and the welfare of our future generations.

Please do not allow building on our Green Belt.

I object to Policy A35 (former Wisley Airfield) due to the increase to 95.9 hectares. The volume of traffic and pollution levels around this site would be totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1) The Wisley development of a new village / town with at least 2000 houses, 4-entry form secondary school and employment land will generate large amounts of additional traffic onto the A3. If the slip roads at the A3/A247 junction to relieve the impact of this development on Ripley do get built, traffic on the A247 through West Clandon and Send will increase dramatically and unsustainably.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Increasing the size of Site A35 – Former Wisely airfield. The sheer volume of traffic using our High Street and local single track lanes will cause further intolerable congestion and pollution. More and more cyclist use these routes and increasing traffic will create accident black spots.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4115  Respondent: 10816897 / P G Williams  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

While I welcome the removal of housing sites at the Ramada Hotel and the fields south of East Lane, the remaining proposals are still unacceptable. The construction of a new village on the Wisley site would mean overloading of local roads especially Ockham Road South. If the plan is executed, the local transport system, roads, rail and busses would require a significant increase in capacity, whereas at present local services are being cut back. Furthermore the remodelling of the M25 interchange at Wisley would add to local disruption.

At present local GP surgeries are struggling to cope. The increased population from the plan would only increase the pressure.

Does the plan also allow for an increase in police and fire service personnel required for this population?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2778  Respondent: 10817121 / Roger Adams  Agent:
**Site A35: Land at former Wisley airfield, Ockham**

I OBJECT to this policy for the following reasons:

- **The proposed development site**

  I believe the development site to be set entirely within the Metropolitan Greenbelt as opposed to the statement on the Wisley Airfield website (http://wisleyairfield.com/) which calls it the “the biggest brownfield site in the Guildford area”. Removal of this site from the Green Belt is totally against NPPF rules, regulations and its underlying spirit. The site location at the edge of the M25 circle represents a ‘first line of defence’ against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

  I can see no demonstration of any of the exceptional circumstances necessary to alter greenbelt boundaries. Thus the proposal is inappropriate development in the Green Belt as defined by NPPF paras 88 and 89.

  I also believe that:

  - The vast majority of the site (70.1 ha) is Grade 3 quality agricultural land. This arable land has been farmed for many years and, I understand, produces over a million loaves of bread a year.
  - Currently the site is crossed by a number of Public Rights of Way, both footpaths and bridleways, which are used by local residents.

  NPPF para 79 states:

  “The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.”

  I believe the above bullet points show the proposed development is to be at odds with this.

  Therefore I OBJECT to Policy A35 as a breach of the Metropolitan Green Belt rules.

- **Levels of sustainability**

  One of the core concepts of planning policy is sustainability. However this site is rated very poorly in terms of its sustainability according to a sustainability appraisal undertaken by GBC’s consultant, AECOM. This is presented in the Local Plan Evidence Base report ‘Sustainability Appraisal (SA) of the Guildford Borough Local Plan’ issued in June 2016.

  I understand that in their report AECOM rated Site A35 as the very worst of all of the six larger sites included in their evaluation, (those with proposed housing numbers of 1000 homes or greater), in terms of its sustainability. No less than 8 out of the 21 criteria were graded as ‘Red’ by AECOM for this site, more than any other large site.

  Accordingly, I OBJECT to Policy A35 on grounds of its unacceptable sustainability.

- **Impact on local traffic and infrastructure**

  The proposed development will have a severe adverse impact on road traffic in the surrounding area including my own village of East Horsley. This will be as a result of the high volume of additional traffic which is likely from the residents of Wisley Airfield accessing East Horsley’s two stations, shops, nearby schools and medical facilities.
I estimate that with 2000 dwellings the additional volume of traffic will be in the order of 3,000 cars. This is a considerable increase but there is no detail I could find on the Wisley Airfield website re improving local roads save for the rather bland statement:

“We’re also making improvements to local roads to reduce rat running, improve traffic flow and increase safety. The proposals also see improvements to local footpaths and bridleways.”

The rural roads in this area are characteristically narrow winding ‘lanes’ – a term used in a recent local public meeting by John Furey, senior SCC councillor for Infrastructure to describe East Horsley’s through roads. Many of these ‘lanes’ are without pavements for large stretches. Further the main through-roads of Ockham Road North, Ockham Road South and Forest Road pass along poorly lit residential areas so narrow that large vehicles such as buses cannot pass each other in certain sections of these ‘lanes’. Indeed each of these roads has pinch points where one can only just fit two cars abreast, let alone two large vehicles.

There are many schoolchildren who both cycle and walk along these through roads on their way to local schools. Ockham Road North has only a narrow footpath through East Horsley village and Forest Road has no footpath in places. The additional traffic will therefore increase the likelihood of accidents and reduce the safety of their journeys.

The road closures and junction changes which I have seen mentioned previously accompanying this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which already suffer from traffic congestion at peak times. Also any resultant increase in traffic congestion at the A3-M25 intersection would only exacerbate an existing problem for the highways authority. I understand Highways England have repeatedly expressed serious concerns about this development.

The Wisley Airfield website states that there are 9 mainline stations within 5 miles. The reality, I suggest, will be that the vast majority of inhabitants of this development would in fact travel from Effingham Junction or Horsley stations. Why? Because they are the nearest stations, much quicker to reach than the others, especially at peak times, and it is cheaper and quicker, in terms of overall journey time, to travel from these to London or Guildford (which is where most people would be going) than from elsewhere.

Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity, something I know from personal experience! The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel to and from these stations lacks credibility.

Also proposals include plans for buses to run through the site to major local destinations approximately every 10 minutes at peak times. I wonder what these peak times would be. Many commuters to London start early and/or finish late. There is no local taxi service at Effingham Junction station so once again no doubt a car would be used– further increasing traffic volumes.

Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.

Accordingly, I OBJECT to Policy A35 on grounds of its severe impact on local infrastructure

- **Health and Safety Concerns**

  The site is located close to the junction of the M25 and A3, one of the busiest road junctions in the country with traffic frequently at a standstill during peak hours. This must affect the air quality in the locality. I have seen figures from the Wisley Action Group website in the past showing the Nitrous Oxide (‘NOx’) levels being above the EU limit of 40 mg/m³. This will doubtless affect residents living at the proposed site. The proposal to build new primary and secondary schools at this location is also contrary to government policy prohibiting the building of schools on sites in areas where there is high NOx.

  In addition, I believe residents of the proposed development will rely on cars as their main mode of transport. I estimate this means around an extra 3,000 cars This will increase the problem of poor air quality.
NPPF para 109 says:

“The planning system should contribute to and enhance the natural and local environment by” ....

“... preventing both new and existing development from contributing to or being put at unacceptable risk from, or being adversely affected by unacceptable levels of soil, air, water or noise pollution or land instability”.

I believe that the points I have made above demonstrate that the proposed development runs contrary to the above NPPF paragraph.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse health & safety implications

- **Local Character**

The development is inappropriate in size and type with regard to the surrounding villages. In the 2016 proposed Local Plan, GBC’s very first housing policy, Policy H1, requires that development should: “make the most efficient use of land whilst responding to local character, context and distinctiveness.” However, Policy A35 fails to do this.

The area is essentially rural with many charming picturesque rural villages, such as Ockham, East and West Horsley and Ripley, containing historic, listed or protected buildings. However the proposed development is large in comparison to the local villages. It would create a community of just over 2000 homes. This is much larger than the nearest village, Ockham, which has less than 200 dwellings, and would represent an increase of around ten times the existing housing stock. It would effectively be not far short of the combined housing stock of East and West Horsley.

With respect to Ockham, would this mean the disappearance of a small historic rural village?

Ockham is documented as being in existence as far back as the 11th Century when it was mentioned in the Domesday Book of 1086 as Bocheham. It has a number of historic buildings including All Saints, a Grade 1 listed building which has a nave which is partly 12th century, as are its foundations and other parts dating from the 13th and 15th centuries. Others include Ockham Park, a 17th century country house at one time home of Ada Lovelace the famous mathematician whose work on early computers with Charles Babbage is renowned world-wide, Ockham Mill dating from the Victorian Era and The Hautbouy built in typical brick and flint Lovelace style. In addition it is the birthplace of William of Ockham, the famous medieval philosopher and inventor of the theory of Occam’s Razor.

The proposed development seems to effectively ‘absorb’ the medieval hamlet of Ockham. I believe that this would cause Ockham to lose its identity and doubtless, in the fullness of time, be forgotten. What a tragedy that a village so rich in our history should be treated thus. This should not be allowed to happen.

The overall housing density of the Wisley Airfield settlement area I have seen calculated at around 49 dwellings per hectare (‘dph’). I understand that this density is effectively an urban density appropriate for a metropolitan location. It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town, with some 1,760 homes. East Horsley presently has an overall housing density of 8.1 dph within its settlement area. Therefore, the proposed development under Policy A35 is six times as dense. Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley.

I believe the character of this whole area would be irreparably destroyed if this proposed development were to go ahead. The development therefore fails to respond to local context and as such is in breach of GBC’s own Housing Policy H1.

Thus, I OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

- **Historic environment**

This is covered in some detail in Policy D3 of the GBC proposed plan. In particular it says:
"Heritage assets are an irreplaceable resource and works which would cause harm to the significance of a heritage asset, whether designated or non-designated, or its setting, will not be permitted without a clear justification to show that the public benefits of the proposal considerably outweigh any harm to the significance or special interest of the heritage asset in question."

The Horsleys, Ockham and Ripley all contain a wide range of heritage assets which make an important contribution to the look and feel of the villages, their character and the environment surrounding them. I have given an example for Ockham village under Local Character above. However it is true also of the other villages I mention.

Thus, I OBJECT to Policy A35 on the grounds that it fails to meet the criteria set out in Policy D3, Historic Environment.

- **Environmental Objections**

The site is immediately adjacent to the Site of Special Scientific Interest (SSSI) at Ockham and Wisley Commons. Much of the development site is within 400m of the Thames Basin Heath Special Protection Area (SPA). Land within 400m of the SPA is designated as an ‘Exclusion Zone’ where “there will be a presumption against additional new dwellings”.

The remainder of the site falls within the 400m - 5km ‘Zone of Influence’ set out under the SPA policy, which requires developers to contribute a new Site of Alternative Natural Greenspace (‘SANG’) to mitigate for potential damage caused to the SPA from new development. I cannot understand how any proposal for a SANG can possibly mitigate the potential damage caused to the natural habitats of the bats, ground nesting birds, invertebrates, reptiles and flora and fauna by these additional residents and their pets. Furthermore I am concerned about the impact of the development’s residents, whom I estimate them to number in excess of 5,000, on the Thames Basin Heaths SPA, even with the 400m exclusion zone in place.

It is, I believe, generally acknowledged that “concreting over the countryside” increases the likelihood of flooding as rainwater can no longer drain away naturally into the earth. Indeed there was an article in The Mail Online dated 26th March 2015 stating that 19 scientists, from prestigious universities and institutes in Britain, the US, Japan, Australia and across Europe, claim over-development is making flooding much worse.

Given the size of the planned development this alone should give cause for concern. However there is a further point which adds to this concern. The development is very close to, and slopes down towards, Ockham Road North (ORN) where it is prone to flooding, close to where it meets the A3 roundabout. Local residents I am sure still remember the floods during the winter of 2013/2014 when ORN was impassable for a lengthy period.

In addition, development of this scale would, in my opinion, increase light and noise pollution in its vicinity. This would affect both current local residents and existing wildlife.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse environmental impact.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )
As someone who was born in Guildford, gone to school in Guildford and lived in Clandon for a large part of my life, I remain hugely uncomfortable with the proposed development plan for Wisley Airfield and Garlick’s Arch. This is not small local in-fill development for the benefit of local business it is unwarranted development of a substantial rural area which if allowed will infringe on other areas merging villages and roads in a manner more consistent with London than Surrey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I support the development of Wisley Airfield

There is no doubt we have to provide some new homes and they have to go somewhere. Wisley airfield is in my view suitable, but only if the site is provided with direct access to junction 10 of the M25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. How can land be identified as Green Belt ie: protected and then ‘unprotected’ like this – it is a mockery of the whole concept of protection!
3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is simply too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. Commuters going to Effingham station are NOT going to cycle or walk!
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. These are small lanes which don’t have the capacity to take this sort of traffic.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The increase in traffic will create a danger to those who do cycle (and pedestrians walking to the woods with their dogs), due to the absence of any cycling paths and the lack of pedestrian footpaths (as there is no space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. Where are all these extra commuters going to park? This will lead to further development of common land which is again ‘protected’.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, which is already in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. My husband and son are both asthmatic.

9) I object to the fact the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I simply fail to see how the local planning committee can be even reconsidering this application with so many people objecting. It certainly appears to me that the opinions of the locals are not being listened to at all. Rumours abound concerning the investment company whose registered office is in the Cayman Islands and one has to wonder given recent exposes concerning companies from that region whether everything is actually as it should be….

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**Ockham and Wisley Airfield new town**

Local transport potential is poor (local bus services have been or are about to be cut). It is about as far from a railway station as it is possible to get in this part of the borough. Local roads are narrow winding country lanes with no spare capacity.

Emissions are a serious health hazard to people in any dwellings within 500m of a motorway. The closeness of the A3 and the M25 make the health risks a problem.

Dangerous to have more traffic arriving on an already hazardous area (A3 junction).

The charming villages of Ockham, Wisley and surrounds would be completely swamped and ruined. Unacceptable amounts of traffic sent into Ripley village!

The merging of villages!

If the Airfield site were to accommodate the proposed number of ‘affordable’ homes, the impact would effectively destroy the village altogether. The character of the area would alter irrevocably and for the worse.

In my opinion this site should be returned to needed agricultural land as previous.

I write to strongly object to the revised local plan.

In particular ref A35, 3 Farms Meadows.

The local roads are at maximum capacity & the A3 is regularly gridlocked around junction 10 of the M25.

This development would be adjacent to RHS Wisley which is such a popular visitor attraction & is planning to increase its visitors which often causes problems on the surrounding roads already.

The Heathrow Beacon will remain according to NATS so this will drastically reduce these plans re height restrictions & distance required from the Beacon.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Allocation A 35 - Proposed Development of former Wisley Airfield

I wish to voice my strong objections to the above development of a new settlement of up to 2100 new dwellings.

I object to the building of this huge development to the detriment of the local rural villages of Ockham, Ripley, East and West Horsley where facilities are already stretched to breaking point and have their own development plans.

I object to this site being on Green Belt land and that this plan has already been rejected by Guildford Borough Council.

I object to the plan because increased traffic on narrow congested rural roads will endanger lives. There is no space for cycle lanes and the access planned for the site is dangerous exiting from the A3. The parking facilities at both Horsley and Effingham railway stations are full to capacity.

I object to this plan because it will ruin the lives of many people who live in these attractive rural villages in Surrey.

Please remove this development from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the development of over 2,000 houses in Ockham on the former Wisley Airfield. The impact of such a huge mixed housing and commercial development only two miles away will be enormous. No adequate thought has gone into planning any appropriate infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY A35: Land at former Wisley Airfield Policy

A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt. I have major concerns about this proposed development. I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country. I strongly OBJECT to Policy A35.

Summary Surrey is a beautiful county enjoyed by the people from London and further afield, the beauty comes from the structure of open land, green fields and villages, which has been preserved through planning constraints and the Green Belt. The GBC Local Plan sets out to erode the green spaces of Surrey, put strain onto the infrastructure already under strain, and allow housing developments on a scale that is not justified.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Paragraph 4.3.17: Proposal to remove Wisley Airfield from the Green Belt

I OBJECT to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. The proposed Wisley development is discussed further below in the Site Allocation section.

A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt. I have major concerns about this proposed development. I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3818  Respondent: 10832321 / Robert Deatker  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
There are some small changes made in the revised Local Plan to Site Policy A35, Land at Wisley airfield in Ockham. However, these changes do not provide any justification for continuing to include this site within the revised Local Plan. Having made a downward revision to its housing targets in the revised 2017 Local Plan draft, GBC is proposing to remove a number of development sites that were included in the 2016 version of the plan. The largest site removed is addressed by Site Policy No. 46 located in Normandy (‘Land to the south of Normandy and north of Flexford’) where a mixed use development of 1,100 homes had previously been proposed.

Whilst I have no objection to the removal of this policy site per se, I would question GBC’s decision-making process of site selection which chooses to remove this site from the local plan rather than the Wisley airfield site. Of all the larger sites included in the 2017 draft Local Plan, Wisley airfield has by far the worst sustainability. In the updated 2017 Sustainability Assessment provided by GBC’s consultant AECOM, Wisley airfield is by some margin the site with the poorest sustainability appraisal – it has no less than 8 red flags in the AECOM criteria list. By comparison Site No. 46 in Normandy is much more sustainable yet it is the one selected to be removed from the plan.

In rejecting a 2015 planning application for development at the Wisley site (proposed in advance of the Local Plan) GBC identified no less than 14 reasons to justify their rejection of the planning application, only one of which was the issue of it being in the Green Belt. The reminder highlighted a long list of deficiencies associated with this proposed development including its major impact on traffic flows, its severe environmental impacts, its total lack of existing transport and other infrastructure, as well as many other factors. According to GBC’s consultation website, a total of 1,429 comments were registered in the 2016 Local Plan consultation about the Wisley airfield site – 97% of them were against its development. And yet GBC chooses to maintain Wisley airfield as a policy site in the 2017 revised Local Plan.

With a planning appeal due to be heard in September 2017, I trust that if the planning inspector decides to reject the appeal of Wisley Property Investments, then GBC will finally listen to the views of so many of its residents, accept the AECOM sustainability conclusions on the deficiencies of this site and remove Wisley airfield entirely from the Local Plan.

I therefore continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for a number of reasons including:

1. This is the least sustainable site identified in both the current and previous versions of the Local Plan because of the site constraints and location.
2. This site is further from railway stations than any other identified strategic site.
3. The site is adjacent to the most congested stretch of strategic road network (SRN) in the county and close to one the most congested junction in the country (M25 -J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (in peak times and also due to accidents, diversions, roadworks etc)
5. Suggested public transport initiatives including bus services to and from Guildford will exacerbate the already over crowded road network leading to unreliability and delay, which in turn will make local residents choose individual modes of transport resulting in further congestion.
6. Public transport bus services to Horsley will reduce the safety of the local road network as lanes are narrow and this will increase danger to cyclists and walkers which should be encouraged as eco friendly alternatives. The area is greatly used by cyclists at all times throughout the year who seek to follow the 2012 Olympic cycle route and train for the annual Ride London –Surrey 100 cycle event. The current plan will add to traffic flows and endanger cyclists and walkers lives.
7. The proposed site is adjacent to the Royal Horticultural Society gardens, which is one of the most visited destinations in the south-east of the country. I understand that expansion plans the RHS have will significantly increase the number of visitors to Wisley. From reading the plan, the resultant traffic increase from the RHS has not been considered. Furthermore, there are regular events at the RHS which attract 1,000’s of additional visitors and again the impact of this increase in traffic does not appear to have been taken into consideration.
8. Once completed, there will be minimal employment opportunities on the developed site as a result of which, the majority of new residents will travel to work. The majority of these are likely to use motor cars ( probably with only a driver) and this will add significant volumes of traffic to the already over crowded local narrow lanes.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

12. Opportunity (3) should be common to all sites and is not unique to this site

13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

16. I object to the removal of additional 3.1 ha from the green belt without any justification

17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A Regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a Regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

As a further over arching comment on local and government policy, I do not understand why more emphasis is not being given to long term investment in developing other parts of the UK. It is evident that the South East and the London conurbation in particular is over crowded. The answer is not to destroy the green belt but to encourage a shift in population to other areas which have been neglected by successive governments.

I object to the large proposed development at 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm. Not only will this result in large areas of Green Belt being destroyed, but it will also add to the heavy traffic congestion on the A3, especially at the junction with the M25 and through Ripley, Send and Send Marsh, which are already under immense pressure from the volume of traffic travelling through and around these areas.

Policy A35 - Land at Wisley Airfield. (Three Farm Meadows). The continued retention of this land in the Local Plan for the planned building of massive housing estates total over 2000 houses is completely unacceptable. Not only will the small village feel of the areas be completely lost but the areas simply cannot take that volume of new housing all at once. There is not the infrastructure nor the amenities in the areas to be able to handle this volume increase. As a Daily commuter who uses the A3 on a daily basis the roads are already not able to cope with the existing traffic any further increase in volume would be completely unacceptable. The changes in the revised plan are only small and make no effort to address the real issues at stake here regarding the impact on the local communities and infrastructure.

I object to the proposed development of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill in Burpham and 1,850 houses at Blackwell Farm. There is already immense traffic in these areas, particularly around the M25, and as such will only add to the high volume of traffic passing through Send and Send Marsh, which do not have the infrastructure to cope.

I object to the inclusion of the A35 and Three Farms Meadows site. This new plan increase the congestion of the local roads, which in many cases are country lanes. The urban sprawl suggested will increase pollution, increase congestion and change the character of the villages now under threat.

The proposed development at Wisley is totally out of the local character of surrounding villages. It is potentially extremely dangerous, as it's exit will be on to a very dangerous junction on the A3 just on the slip road from the M25. I am frightened to envisage children playing close to this fast dual carriage way. Also there will be insufficient work for those residents and so they will have to travel to either Horsley or Woking station. The roads to either of these stations are very narrow. They are also part of the Surrey cycle way. Those roads will become extremely dangerous to any cyclists or walkers. They are not big enough for regular bus routes.

The impact on the Horsley villages of such a huge mix of new development under 2 miles away would be significant. In particular added congestion on the A3 and M25 trunk roads and congestion on local village roads and lanes. Not to mention concerns over poor air quality from the significantly increased traffic and other pollution catalysts.

Site Allocation Policy A35 Former Wisley Airfield – Strongly Object

I object to this development being on green belt. The scale, bulk and density of the plan on a narrow airstrip is completely inappropriate for the area. The conservation area of Ockham Village, which only has 150 houses, would be completely swamped by this development. The proposed development would have a detrimental impact on the openness of the Green Belt surrounding it. The effect on the habitat in the Thames Basin Heath would be devastating. Damage will occur to the habitats of the protected and endangered rare species. The ground nesting birds would be disturbed by the building works and then the volume of people living in close proximately not to mention the pets that would be introduced to the area.

The surrounding villages, Ripley, Effingham, East and West Horsley, do not have the infrastructure to support such a development. The local schools are over-subscribed and it is already difficult to get a doctor’s appointment at the Medical Centre in East Horsley. The extra volume of traffic would cause even more congestion. The lanes are narrow in places and not very well maintained. The proposed development is on an elevated site and there are already water table problems with localised flooding in the area. Some roads become impassable, Ockham Lane, Ripley Lane, East Lane, Ockham Road North and parts of The Drift. There is no spare parking capacity at Effingham Junction or Horsley stations.

Draft Local Plan G B C - OBJECTIONS

I write to object most strongly to the inclusion of the Wisley Airfield in the local plan. We must protect our green belt and exclude this site from the draft local plan without delay. I have written previously to object, our country lanes cannot hold the considerable amount of traffic that would need to be accommodated, the A3 junctions would be even more clogged up than usual at rush hour, air pollution would suffer, the site is unsuitable for a housing development and would spoil the green belt and the protected area and its environs. The potential schools are not needed here. We are served by excellent schools already. This is the wrong area to consider. There are many other sites that could and indeed should be considered. Please start afresh. Take a step back and consider how detrimental this would be to our landscape. Why build on this agricultural land which should be retained as such, as was the original historical intention. There are sites off the M25 that could be considered, and outside Guildford, where much of the housing could be contained.

Please consider carefully all the objections you will receive from residents of this picturesque hamlet of Ockham - don't spoil our countryside in this way. Expand elsewhere but not her at Wisley - green open space enjoyed by so many is becoming a rarity. Conserve and preserve our green belt as was intended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3807  Respondent: 10844897 / H S Lofthouse  Agent:
The application was rejected by GBC on hood ground last year when TFM should have been removed from the Local Plan. It is wrong to bring it back for consideration when it was turned down on so many grounds and for very good reasons.

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification.
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting taxpayers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

Please consider all of the above and ensure that plans for a large town in the most inappropriate location are again refused. There are many other parcels of land around that can be considered for housing which would not impact on a small community in this way.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the large proposed development at of 2,000 houses at Wisley Airfield (the subject of which I have written to you twice before), 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm, because it will destroy large areas of Green Belt and agricultural land, massively increase congestion on the A3 and the surrounding villages such as Ripley and Send, and create a lot of additional pollution due to traffic. Use brownfield sites which are available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2827  Respondent: 10845377 / Natasha Lock  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6770  Respondent: 10846625 / Frank Drennan  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? (), is Sound? (), is Legally Compliant? ()

I object to Policy A35 “Wisley” on the grounds that;

This constitutes a re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.

2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.

3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

5. Absence of adequate traffic data.

6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.

8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Comment ID:** pslp172/4034  **Respondent:** 10847521 / Andrew Procter  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1.1 **I object** to the changed Policy A35 Wisley in respect of the identified mitigation to address the impacts on Ripley High Street and surrounding rural roads comprises two new slip roads at A247 Clandon Road (Burnt Common) and associated traffic management. This will not in any way mitigate the impact on Ripley High Street since traffic will need to pass through Ripley to reach Wisley.

1.2 **My previous objections therefore still stand for** this changed policy concerning the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

1.3 There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.4 This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected.
Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

1.5 Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.

2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.

3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

5. Absence of adequate traffic data.

6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.

7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.

8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
A35 Land at former Wisley Airfield  Guildford Borough Council has already refused this development of over 2000 houses, so why is it in the Local Plan? The local roads will be unable to cope with an additional 4000 cars and there is no access directly on to the southbound A3 without going through Ripley village.

We believe that Surrey County Council has earmarked this site for a recycling facility and feel that a better use would be to have an Electricity Generating Plant burning waste materials which would be a benefit to the local area (the traffic movements would not be as great as the proposed small town). The runways could be used to site Solar Panels to produce electricity as well, these could be screened by planting trees (environmentally friendly) on the Ockham side. The farmer who cultivates the land could be encouraged to produce a crop which could be used for the production of Bio Diesel. This would make Guildford look like a "forward thinking" Council taking care of of the environment and doing its bit for climate change.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/154  Respondent: 10848513 / Martin Cole  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- Increasing the size of Site A35 – Former Wisely airfield. The sheer volume of traffic using our High Street and local single track lanes will cause further intolerable congestion and pollution. More and more cyclist use these routes and increasing traffic will create accident black spots.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:
• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

This e-mail sets out my objections to GBC’s New Local Plan.

I believe GBC is failing in its responsibility to the people of East and West Horsley and surrounding areas, and I itemise below my reasonings.

Wisley

Whilst I recognise that Wisley airfield is redundant land, the area is prone to flooding, as anyone who has lived here long enough knows. The access to the A3/Wisley roundabout tends to flood during serious rainfall, and the road has been impassable several times during the last sixteen years we have lived here. You cannot responsibly build 2000 plus houses and not provide a school, medical centre, some local shops, post office, community centre and recreational space. This should be a new community where people have their own facilities and not have to travel along narrow lanes to source them. These facilities should be put in place at the same time as the houses are built. I have seen no confirmation anywhere that GBC plan to provide these facilities. On average, each house could be expected to own two cars. At present the station car park in East Horsley is full each day. Where are these people going to park if travelling into London. Similarly, it is often difficult to get an appointment at the Doctors surgery, so they wouldn’t be able to cope with so many extra patients. I understand that commuters are now using the Village Hall car park and therefore when the Medical Centre car park is full, we are also unable to park in the Village Hall car park, and this is before just one extra home is built in the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Development of Wisley Airfield: Ockham’s classification of other rural community includes “Rural communities unsuitable for taking any development including infill housing”. It seems ironic that GBC have now decided to propose a new strategic settlement of some 2,000 new homes on Green Belt land about 200 yards from the properties situated along Ockham Lane and only 2 miles from East Horsley. In the absence of real needs, this is an utter disgrace especially given the concerns with the very limited local infrastructure.

Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPII) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Why would you consider creating housing developments for an additional 2000 houses on the A3? Are you attempting to turn Guildford into Croydon by destroying all the surrounding greenbelt land?

Given the recent vote to leave the EU, shouldn't all local governments be reviewing local plans in light of this radical u-turn in policy that will (supposedly) greatly restrict free movement across our borders thus reducing the growth projections of our population in years to come?

We need a sensible plan, that supports realistic growth requirements with new housing and infrastructure projects that will create new jobs and transport facilities accordingly. We need to find a balance and respect the countryside around Guildford!

I object to Policy A35 Wisley

I object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected.

Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
• Extreme housing density with tiny garden spaces.
• Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
• Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).
• Failure to evaluate the cumulative impact of this and nearby development sites on the area.

### POLICY A35 WISLEY

1.1 - **I object** to the changed Policy A35 Wisley in respect of the identified mitigation to address the impacts on Ripley High Street and surrounding rural roads comprises two new slip roads at A247 Clandon Road (Burnt Common) and associated traffic management. This will not in any way mitigate the impact on Ripley High Street since traffic will need to pass through Ripley to reach Wisley.

1.2 - **My previous objections therefore still stand for** this changed policy concerning the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

1.3- There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.4- This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

1.5 -Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.
2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
5. Absence of adequate traffic data.
6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.
8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
10. Cost of infrastructure required to the detriment of alternative more favourable sites.
11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

### What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Wisley Airfield:

This large housing development will clearly overwhelm parking at Horsley and Effingham Rail Stations and Village Car Park, swamp narrow local roads and lanes, cause blockages, rat runs and potential accidents.

I am concerned that it will cut off current footbridge access over the A3 to Wisley RHS.

Effingham Junction needs to expand Parking and have Wisley residents directed to join there instead of Horsley, by Bus or otherwise.

I think the Train Service is not sufficiently frequent with enough Coaches to accommodate the large influx proposed. Overcrowding would arise long before other Surrey Stations board towards London. The service into Guildford is less busy than into London (except on evening commuter return from London at Waterloo).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

3) Wisley Airfield:

> This large housing development will clearly overwhelm parking at Horsley and Effingham Rail Stations and Village Car Park, swamp narrow local roads and lanes, cause blockages, rat runs and potential accidents.

> I am concerned that it will cut off current footbridge access over the A3 to Wisley RHS.

> Effingham Junction needs to expand Parking and have Wisley residents directed to join there instead of Horsley, by Bus or otherwise.

> I think the Train Service is not sufficiently frequent with enough Coaches to accommodate the large influx proposed. Overcrowding would arise long before other Surrey Stations board towards London. The service into Guildford is less busy than into London (except on evening commuter return from London at Waterloo).
It is not clear what design of infill housing is proposed. East Horsley has uniquely varied quality housing, and standard block builds would detract from this.

I object to the development of Wisley Airfield. The application to build on this site is totally excessive. Again there is no infrastructure to support this development. The village of Ockham would be destroyed.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings.

I am writing as I wish to object to the part of the draught Local Plan referred to below:
• I object to the removal of the former Wisley Airfield land from the Green Belt in order to facilitate a large new development of dwellings and object to the proposed building of 2,000 plus dwellings on the former Wisley Airfield land proposed in the Local This plan is a threat to the rural nature of the village of Ockham and will totally blight the village and the local area if it is acted upon. The increased housing density will be out of all proportion to the village nature and numbers of existing dwellings in Ockham and will impose a huge impact on local roads.

• I object to the plan for Wisley Airfield as it will have a huge and unacceptable impact on the other local villages of Ripley, Send and the Horsleys, all of which also have new housing developments in substantial numbers included in the The proposed building in the local plan of the development on Wisley Airfield will change and spoil the whole character of the area for ever.

• The proposals for the housing development at Wisley Airfield, plus other proposed housing developments in Ripley, Send and the Horsleys are likely to result in 4,000 - 5,000 additional cars moving in and out of these areas on a daily This increase in the volume of traffic is totally unsuitable for the local narrow rural roads in these areas and can only lead to continuous traffic congestion and other traffic problems. Local amenities will be overwhelmed by this influx of people and transport.

• I also object to the local plan's proposed housing developments in The Horsleys, Send and Ripley which are all on rural sites and building over fields and woodland which will be lost for New dwellings which may be needed should be built on the many brownfield sites available in the Guildford area.

I hope these objections will be fully considered and in particular the former Wisley Airfield is removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the inclusion of the old Wisley Airfield site in the draft local plan. This site has proved to be unsuitable for development on so many fronts that Councillors unanimously refused planning consent recently. I fail to understand why it is still included in this new draft plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt.

I OBJECT to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the proposed development at Wisley (A35) as it would cause significant traffic flow problems through Send and Ripley and cause further congestion on an already congested A3/M25
• I object to the proposed development at Wisley (A35) as many of the proposals have been rejected by the various authorities including sewage works at Ripley could not cope with the increase, SCC has said in the past that it is not a site where they want a new school, GBC has turned many planning proposals down. We do not know and, seemingly cannot find out who the developers are other than from the Caymen Islands. With central governments crack down on offshore companies buying land etc because of money laundering, if this is then made retrospective and it is found that this is the case with this company from the Caymen Islands, what sort of mess would that leave GBC in? It would seem crazy to go ahead with this development unless the company is prepared to disclose what the investors etc are. There is a need for transparency about this company

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3835  Respondent: 10868897 / Paul Brown  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft Local Plan for the following reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. The geography of London is unique specifically because of the existence of the Green Belt; if not for the Green Belt London would sprawl uncontrollably like so many other cities in the world.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. I use Horsley station every day to commute to London and this small station will not cope with passengers from the proposed additional 2,000+ homes in the area.

7. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000
additional cars on the roads
c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by
wide vehicles including increased bus and HGV movements
d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of
pedestrian footpaths (and the space to provide them)
e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning
application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on
the site would add additional congestion at the
M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to
the A3 and M25.
Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed
increase in passenger traffic and car parking is already at capacity
7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site,
in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site
of Nature Conservation Interest (SNCI).
8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough,
and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this
situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the
Thames Basin Heaths SPA
and the irreversible impact of the habitat degradation.
9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced
through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access
to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the
historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) -
where the planning application has already been unanimously rejected by GBC’s Planning Committee.
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL)
planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC
Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also
been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water,
NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
3. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
4. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
5. Increased traffic in the area will make small country lanes even more dangerous to walkers, horse riders and cyclists.
6. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract 1000s more visitors several times a year and the resultant traffic has not been taken into account.
7. There is insufficient employment available onsite so that almost all residents will have to travel to work. This will seriously add to the congestion on local roads.
8. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
9. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
10. I object to the removal of additional 3.1 ha from the green belt without any justification.
11. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
12. I object to para 21 which “limits” development in flood zone 2 and 3: development should be excluded in flood zone 2 and 3.
13. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
14. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
15. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
16. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

This development has been already refused planning by Guildford Borough Council and must not be allowed. Again the local infrastructure is just not able to cope with the potential of an additional 4,000 cars on local roads. This would have a hugely detrimental impact on to the villages of East and West Horsley, as well as the same problem outlined in item 3 of the overloading of roads, flood risks and added strain on station carparking, doctors surgeries and schools. This area is adjacent to one of the busiest and most accident generating stretches of the A3 as it joins the M25 and more traffic using this section would make matters worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2651  Respondent: 10872801 / Graham Philip  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the above planning application on the following grounds

• the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
• No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
• There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
• the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
• the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.
• The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
• Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
• the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
• The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
• Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).
• There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
• The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
• the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.
• insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to object to the aspect of the Local Plan relating to Wisley Airfield.

1. This development will lead to the urbanisation of Green Belt land, a precedent that will lead to urban sprawl towards Guildford.

1. Any developments in this area will increase traffic flow in an area that is already often congested with M25 and A3 junction. This congestion spills into local towns such as Cobham compromising the amenity for local residents.

1. Local public resources are saturated. GP’s surgeries, schools, police and transport are currently inadequate. Further population would require new resources.

1. Local towns would be overwhelmed with limited access roads, limited parking and would be less accessible for current residents.

1. To support any developments in the area of Wisley, Ripley and Send would require new shops and public amenities. This investment would need further development to justify costs, which would create out of town shopping areas. In turn this could reduce footfall in local towns.
1. Air pollution in this area is often poor being at the junction of M25 and A3. This section of the M25 is the busiest road in Europe.

1. Wildlife is profuse in these areas and any developments would impact them greatly.

1. With no public transport close to this area residents would be reliant on cars or buses. The roads in this area are unsuitable for larger vehicles or increases in volume.

1. Application 15/P/00012 was unanimously rejected by Planning Officers due to concern such the ones I have mentioned.

It is important that local views and expertise is respected and that the democratic process is respected.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

It is absurd that the Wisley Airfield site has been included in this draft plan. The planning application for this site was resoundingly rejected earlier this year and I cannot believe that this site has been included. Does the Council really believe that it would be sensible to build a new town in this location? Such a development would change the look and character of this area beyond all recognition. Taken together with the 485 houses proposed for the West and East Horsley sites, this would impose an unsupportable burden on the road network, drainage and sewage infrastructure, schools, medical services, public transport and parking.

I trust that my views will be fully considered and that the Council will have the maturity and common sense to revise the current Plan and ensure that the next version is based on sound, freely available evidence and fully incorporates the feedback of the Borough’s constituents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPS16/2619  **Respondent:** 10873633 / Monika Brewer  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

---
I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning.
Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
2. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
3. Opportunity (3) should be common to all sites and is not unique to this site

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5890  Respondent: 10874241 / James Grzinic  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the development of over 2,000 houses at Ockham Village. The impact on the narrow roads in and around our villages would be intolerable. The local train stations at Effingham and Horsley could not cope with any increased demand. I commute daily into London from Horsley, and the car park is already overflowing given current requirements, so I am intrigued to understand how the plan supposes the implicit, major increase in rail users will be accommodated within the existing infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

SITE A35 WISLEY. A very, very, very strong objection to this. It was rejected by the council already. I cannot see why it has been included. This is not a brownfield site, it is supposed to be a Surrey County Council waste site. A lot of good farming land will be lost which will have an enormous effect on the local wild life. The extra number of cars the 2000 homes will have on the A3/M25 and local roads will be enormous there are already traffic jams at the A3 Wisley roundabout, and M25 junction 10 roundabout, often made worse when the RHS gardens have a special event on or even in school holidays. In order to give the proposed residents of the new town access to the Southbound A3 the proposal is to make Old Lane from Effingham Junction one way from its cross roads with the Ockham - Cobham road. this will allow entry onto the A3, but not exit. Exiting onto the A3 here is slow and can be dangerous as you are faced with two lanes of traffic coming fast from the motorway roundabout, followed immediately by another two lanes of fast moving traffic coming off the westbound lanes of the motorway. If lucky you can get out before the next lot of fast cars arrive. I can see long queues. I also object strongly because many people come off the motorway to get home to Effingham Junction, Horsley and also Bookham. If the road is one way they will have to drive through East Horsley to get where they want to go. I also object to the road closures they want to make. I object to this plan because there is no public transport. Both car parks at

Effingham and Horsley stations are already full each day. The flooding that occurs often as you approach the A3 roundabout from Ockham/East Horsley will be worse as water runs off roofs and roads. Where will the sewage go. Who will have to pay for the cost of building a new treatment plant. Last but not least there will be an unacceptable increase in air pollution. These are all my objections to the proposed draft plan.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Site Policy A35. The council have already rejected building planning for the Wisley site on fourteen reasons, one of which is because it is in the Green belt. I cannot see how they can now include it on their new revised local plan. I object to the inclusion of building on the Wisley site. Policy D1. I object to the inadequate provision of infrastructure investment as I have stated before. I shudder to think of the increased traffic queues in both directions along the A3 and M25 junction, and on the great increase in air pollution which is already high in this area. I also object to the fact that they want to close some of our local lanes and make others one way. Finally I repeat again that I strongly object to the latest draft of the Guildford Borough Council local plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Once again I object to the above plans for many reasons, too numerous to list.

The major objections I have are:

1. The proximity to the A3 and M25 that are heavily congested even now.
   
The narrow lanes around Hatchford, Downside, Ockham and Cobham will have to cope with even more traffic in addition to the heavy use by cyclists and horse riders. Walkers, already restricted, will have little chance to enjoy their local area. Any problems with traffic flow on the above road and motorway aways results in streams of vehicles diverting onto the local lanes.

2. I object to the higher level of air pollution that will result from the addition of the houses and flats and their associated vehicles.
   
Pollution levels are way above European recommendation already and a worry for people living in this area.

3. Local facilities such as schools, doctors' surgeries, shops, railway stations and their car parks are already over subscribed.

4. I object to the use of the Green Belt and the subsequent threat to wildlife.

5. The proximity to RHS Wisley where visitor numbers have increased dramatically over the last few years and will continue to do so as Wisley expands its facilities and events.

To sum up, I believe this plan is unsuitable for the location and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposals for the Wisley airfield site (site A35) - totally disproportionate in size to the surrounding settlements and too dense relative to surrounding areas. There is a real risk of "them and us" emerging given the strength of local feeling against this development. I think it could cause real unrest in the area and potential discord between new and old residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Wisley Airfield, so called during the war, was to be put back to farm land, it is therefore not to be used for housing. If this does take place, the whole area will suffer from over crowding, the roads, high pollution levels, schools, doctors surgeries, etc. also it is a high area, very windy and not suitable for housing. We cannot cope with more traffic. The Guildford bye-pass is always at a stand still around 4.0 p.m. backing up all around. The M25 is impossible to get on to and then sometimes at a stand still as well. Trains are so full sometimes impossible to get on . How can we possibly expect to accommodate more people when we do not possess the infrastructure.

I agree we do need more housing, but this should be where they can lay new railways and roads to London and around, away from the already congested SE, or Brown field site within towns and cities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

The former Wisley airfield is entirely unsuitable for use as a new ‘town’. The site was requisitioned by the Government for wartime purposes with a promise that it would be returned to agricultural use in due course - that promise should now be honoured. The land is Metropolitan Green Belt land except for about 15% consisting of the old concrete runway and apron.

A planning application for temporary use of the site for filming was rejected in 2014 and later refused on appeal, the Inspector stating that the development would be detrimental to the Green Belt and would likely cause harm to local environmentally sensitive sites. A much more substantial planning application for a small town of some 2,100 homes, medical centre, schools and supermarket was last year submitted by the owner, Wisley Property Investments, but was recommended for refusal by the Council officers and then rejected unanimously by a special meeting of the Planning
Committee, who totally agreed with the 14 main reasons for refusal by the officers. I will not list all the reasons here because the Inspector will have access to the Council’s files, but my objections include:

- loss of Green Belt
- loss of good quality agricultural land
- danger to nearby environmentally protected sites
- totally unacceptable traffic problems, including dangerously high pollution
- no infrastructure and no transport links (except A3)
- overdevelopment and unacceptable housing density
- five-storey buildings, totally out of keeping with the Surrey countryside
- detrimental impact on Surrey skyline and increase in light pollution.

I will emphasise the traffic problems this development would cause. Some 4,000 cars would be added to the area’s roads, causing more congestion on the A3 into Guildford and at the junction with the M25 (J10), where pollution levels often exceed permitted levels already and are too high to allow schools to be built on the site. The proposed new A3 junction at Wisley would have to accommodate a large increase in traffic from all directions, while Ripley and East Horsley would be seriously affected.

The fact that the scheme involves local road closures and one-way streets is a clear demonstration of how impractical the scheme is.

The Council’s comprehensive rejection of this scheme renders any large-scale development of the site out of consideration: it is not practical, viable or sustainable. Indeed, the Council’s Leader and Lead Councillor for Planning said the scheme failed the Council’s sustainability test ‘dismally’. Why, then, has the Council not removed the site from the Local Plan which would be logical in light of its fundamental unsuitability? I merely point out that Wisley Property Investments has links to the Conservative Party, including its ‘front man’ who happens to be the lead councillor for planning for the Conservative-controlled Vale of the White Horse District Council in Oxfordshire.

The site should continue to be used for agricultural purposes, while the runway and apron could be used for a solar farm or for hydroponic horticulture (no need to remove the eight-foot deep concrete at great expense).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
application for a new ‘town’ was thrown out by the Council’s professional planners who cited 14 compelling reasons for refusal, a decision upheld by the Planning Committee whose elected councillors voted unanimously against it.

b) In a report for the Council, consultants AECOM considered the sustainability of the larger proposed sites for development in the Plan and concluded that the Wisley site was the least sustainable, awarding it eight red flags. Yet in arriving at the 2017 Plan, the Council removes a site near Normandy and Flexford, rather than the Wisley one, even though it scored better for sustainability.

c) The Wisley site has a questionable history involving Conservatives and their supporters and backers. It was bought by Wharfland Investments who wanted to build a green recycling centre there. Its directors included a former Conservative cabinet minister, a property developer and a Conservative lead councillor for planning for an authority in Oxfordshire. Around 2012 when Guildford decided to earmark the site for possible development, Wharfland went into liquidation and the Wisley site was sold to Wisley Property Investments, a company registered in the Cayman Islands tax haven. A coincidence? Because of the secrecy surrounding tax havens, it is not possible to identify the company’s directors, but for the past few years the Oxfordshire councillor has been acting as the front-man for Wisley Property Investments. It is also believed that the development is being supported by a hedge fund manager with possible links to the Conservative party. A public inquiry into the refusal of planning permission is due to be held in September, after which it will be called in by the Communities Secretary, a Conservative, of course.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 
I OBJECT to the proposed development at Wisley airfield. The addition of 2,000 houses only two miles away would put an impossible strain on local amenities and roads.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to object to the aspect of the Local Plan relating to Wisley Airfield.

1. This development will lead to the urbanisation of Green Belt land, a precedent that will lead to urban sprawl towards Guildford.

1. Any developments in this area will increase traffic flow in an area that is already often congested with M25 and A3 junction. This congestion spills into local towns such as Cobham compromising the amenity for local residents.

1. Local public resources are saturated. GP's surgeries, schools, police and transport are currently inadequate. Further population would require new resources.

1. Local towns would be overwhelmed with limited access roads, limited parking and would be less accessible for current residents.

1. To support any developments in the area of Wisley, Ripley and Send would require new shops and public amenities. This investment would need further development to justify costs, which would create out of town shopping areas. In turn this could reduce footfall in local towns.

1. Air pollution in this area is often poor being at the junction of M25 and A3. This section of the M25 is the busiest road in Europe.

1. Wildlife is profuse in these areas and any developments would impact them greatly.

1. With no public transport close to this area residents would be reliant on cars or buses. The roads in this area are unsuitable for larger vehicles or increases in volume.

1. Application 15/P/00012 was unanimously rejected by Planning Officers due to concern such the ones I have mentioned.

It is important that local views and expertise is respected and that the democratic process is respected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The development of the Wisley airfield site in Ockham would have an absolutely massive impact on the area, entirely changing the environment for existing residents and blighting daily life for all concerned. Public facilities are already overloaded. The heaviest impact would fall on the most vulnerable, especially the elderly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

9. I OBJECT to the proposed Wisley Airfield development. This would result in the creation of a new town and the destruction of the character of one of most picturesque and historic areas of the country. Furthermore, the proposed development would increase significantly the load on already inadequate local infrastructure, including that in East Horsley, and would overstretch the Horsley and Effingham Junction railway stations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object for the following reasons:

1. **We should not allow building on green belt land**. We should protect this land because:

   1. It provides the area with valued natural beauty and rural character
   2. It provides a needed break up to urban sprawl – important given the high areas of pollution in the area
   3. It provides natural habitats for local wildlife that should be valued and taken care of

1. **The plan will magnify and worsen current shortfalls in existing infrastructure**. The allocation of housing to Ockham, Ripley, Horsley and Effingham and the 2,000 new homes at the former Wisley Airfield is hugely disproportionate and will adversely impact of the communities of the borough of Elmbridge. For example, the large number of new inhabitants of the proposed new housing will:
1. Take traffic congestion beyond breaking point. Elmbridge roads, particularly at key intersections such as the Painshill junction, are already very overcrowded, particularly at rush hour. It is unthinkable to make this problem worse however a deterioration of the situation is inevitable since residents of the new planned housing will produce an estimated 4,000+ cars and will have to pass through these areas to commute or to shop/socialise.

2. Take parking problems beyond breaking point. This is because residents of the proposed new development will be relying on existing car parking provisions at Elmbridge shops and rail link services. The car parks at the two nearest stations are already at capacity at peak times, and there is no overflow area to cater for the huge numbers of potential additional residents. It is also true that a simple trip to the local shops (which the 2,000 residents of the Wisley airfield would be looking to use) can already involve long queues to park e.g. at Waitrose, since at peak times spaces simply run out. 4,000+ cars-worth of new local shoppers will make this intolerably worse.

3. Taking public transport problems beyond breaking point. Local train services are already hugely overcrowded. I commute daily from Cobham and can confirm that in spite of recent improvements, rush hour services are still commonly full/standing-room only. The idea of a large volume of new commuters joining these services is crazy. There is genuinely no space. The planning department is either naïve or wilfully negligent to recommend that residents at Wisley could drive to Cobham station– this will be terrible for roads, parking and the train itself, all of which are at capacity already!

4. Take local services beyond breaking point. We do not have adequate local services, e.g. doctors surgeries, to cater for the large increase in population density. It is already impossible to get an appointment on the day unless you queue outside the surgery for 30 minutes before it even opens and are willing to wait for in excess of an hour.

1. The plan will create an unacceptable level of pollution. The level of pollution in the area is already in excess of legal limits. This level of pollution puts the health of local residents at risk and it would be madness to build a school in the midst of such high pollution. I am a liability underwriter by trade and would point out that in future, the planning department would very possibly be found negligent for wilfully ignoring pollution guidance and expressly allowing this problem to be worsened. Should local residents and particularly new schoolchildren develop pollution-based illnesses, it would not be unreasonable to expect local planners/developers to answer to why they ignored all reasonable pollution guidelines and exposed injured parties to foreseeable health risk. This is GBC’s responsibility and you are liable for the wellbeing of the communities you represent and/or impact with your decisions.

Overall, the project will damage the area. It will damage the quality of life of its residents. Local infrastructure cannot support the increase in population density.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/6354  Respondent: 10881217 / Ben Stevens  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the vast development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) Allocation, A.35: for the phased development of a new settlement of up to 2100 dwelling

I am writing to object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  1. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
1. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

2. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

1. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

2. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Council. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Officers, who cited the same grave concerns highlighted in this letter.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I would like these objections to be fully considered and for the Wisley Airfield (Three Farms Meadows), Allocation A35, to be removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** pslp172/3288  **Respondent:** 10882465 / Colin Bowes  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

TFM Allocation A35 has already been unanimously rejected by the planning authorities on numerous counts. It is a waste of resources – paid for by the electorate via council tax - to maintain this site in the local plan. I am profoundly concerned that the council has failed to remove this site from the local plan even though it received thousands of objections from local residents and statutory consultees.

Assumptions and claims made in the plan regarding Allocation A35 are unsound. Regarding traffic increases, the site is adjacent to the most consistently congested stretches of strategic road network in the county and close to one of the most...
congested junction in the country (J10). I had to use this junction for years on my commute to work, and it is frequently at a standstill during rush hours, accidents, diversions or roadworks. To suggest using bus services is disingenuous. The buses either travel the already congested main roads, or travel on unsuitable minor roads – thus reducing the likelihood of pedestrians or cyclists wanting to use these same minor roads. Furthermore, it is next door to Wisley RHS Gardens where following recent upgrades and extensions visitor numbers will increase by 500,000/annum and this associated traffic increase from the RHS has not been taken into account. I object to the transport evidence base which is unreliable.

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights and timings. The inclusion of A35 will not contribute to the 5-year housing projection due to this and other constraints notably sewerage capacity.

This is Green Belt Land, and Green Belt is there for a reason. Many councillors and national politicians have made election promises to protect our Green Belt. The removal of an additional 3.1 ha from the green belt without any justification is just not morally right. The increased area of the TFM site now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area. The increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB. I object to paragraph 22 as this does not reflect the impact of the buildings on the surrounding area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )
No regard for smaller local villages, this settlement will dwarf them all in size and change local area forever. The infrastructure- particularly schools and hospitals - has not been sufficiently expanded to account for the 2000 extra homes.

I write to object to the inclusion of various sites suggested for housing and limited infrastructure, within your most recent local plan, but in particular to the inclusion of the former Wisley airfield. On almost the same day as the Council planners rejected unanimously the inclusion of this area, it is still included in your latest plan. Why? It must be painfully obvious to the entire Council that there is no possibility of sufficient infrastructure to accommodate development of this site, either now or at any time in the foreseeable future. The roads within reach of this site are incapable of supporting any additional traffic, including both the A3 and M25.

It must surely also be obvious that there are already insufficient primary or secondary school places available nor the means to transport pupils along narrow country lanes to any existing school which might be built elsewhere. The only two railway stations within normal reach have absolutely no spare parking facilities and nobody in their right mind would attempt to walk or cycle to either station along such dangerous country lanes.

It beggars belief that you are proposing to more than double the size of Ockham, Wisley and Ripley combined with your latest proposals for this area and I object in the strongest possible terms.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:
• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is more than enough brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban expansion from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and is in fact more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. Routes to the closest railway stations are not navigable by foot as there are no pavements and the unlit roads make cycling dangerous.
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for numerous reasons including:

It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.

- The associated traffic increase from the RHS has not been taken into account.
- The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
Opportunity (3) should be common to all sites and is not unique to this site

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

I object to the removal of additional 3.1 ha from the green belt without any justification

I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

I believe that this has gone through consultation already and been rejected.

It still does not address the many issues highlighted in the previous consultation, nor does it make any reference to the fact that it was refused.

I still have concerns about the increase in traffic, the benefits to the local community and the actual ability of the planners to guarantee homes that will be affordable to the local population and not just to London commuters.

If you are planning to take the local villages out of the green belt due to the lack of green space around them, then this, and the other planned developments around this area, will help with this plan.

if you keep planning on building on the green areas and not considering the environmental factors then of course how can we consider them to be part of a 'green belt'

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

My response to the local plan submission with regard to the A35 site

I object to this development because it will add a further three thousand vehicles to local roads causing more pollution, noise and congestion. The impact on quality of life will be very serious indeed.

I object to the highly inconsistent green belt and countryside study, it is misleading.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

This development has been already refused planning by Guildford Borough Council and must not be allowed. Again the local infrastructure is just not able to cope with the potential of an additional 4,000 cars on local roads. This would have a hugely detrimental impact on to the villages of East and West Horsley, as well as the same problem outlined in item 3 of the overloading of roads, flood risks and added strain on station carparking, doctors surgeries and schools. This area is adjacent to one of the busiest and most accident generating stretches of the A3 as it joins the M25 and more traffic using this section would make matters worse.
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No
development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport and parking facilities. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
With regard to the proposed development of the former Wisley Airfield as I have stated before this appears to be being treated by Guildford Borough Council as though it was the development of a brownfield site. It is not. The clue is in the name, Airfield. It is or at least should be a field in the Green Belt if the agreement with the original owners to remove the runway when it closed had been enforced as it properly should have been. This is therefore just a proposal to build on a large area of the Green Belt with no exceptional circumstances involved and should be rejected on that basis. Notwithstanding that it is a completely inappropriate development of the land concerned both as to scale and nature and would put completely unacceptable pressure on local facilities e.g. roads, sewage, water etc

**PROPOSED WISLEY DEVELOPMENT**

It is noted that GBC previously rejected the proposals. I too also objected to what was proposed at the time. One of the main concerns I had was the access & the assumption that the existing country lanes & roads could cope with the amount of traffic generated by the new development. Clearly they could not and this was a major flaw in the proposal.

However, I personally feel that if an adequate primary access could be designed directly off the A3, which would need access to both North & South bound A3 carriage ways, then this may assist. It is appreciate that this would involve a significant civil engineering project and significant cost, but that would need to be borne by the proposed developers of the site. If it could be established that there was clear evidence of a local need for housing in that location, then such additional costs can be taken to account by the Developers. Obviously there would be other planning considerations to also take into account. One potential advantage of a Development at Wisely would presumably be that the necessary infrastructure could be planned for and form part of the development proposals. For example, a school, doctors surgery and perhaps even some local shops could be included and allowed for. This would help reduce the impact on the surrounding areas and also reduce traffic movement. In terms of potential impact on surrounding areas, a housing development at Wisely might be more desirable than trying to expand existing villages like Send or Ripley.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**
I object to Policy 35 Development at Wisley Airfield. This has already been turned down by planning officers for all sorts of reasons including lack of infrastructure, lack of roads, destruction of Green Belt etc, so why has it reappeared in the Local Plan? The ground is beautiful open country covered with wild flowers and providing habitat for many wildlife species. The houses planned will generate so much traffic on our country roads and the A3 and M25, already very overstretched. The village of Ockham would be overrun with polluting traffic. Why are the Councillors so determined to spoil our surrounding countryside?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  - The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  - The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  - The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  - The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  - The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  - The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I appreciate the massive amount of work this is entailing over many years but I have several objections:

1. I object to a 2000 house village at Wisley Airfield. This will cause traffic congestion for the whole area in particular Ockham, Ripley, East and West Horsley, Send, Effingham and further afield. This will cause Utter chaos on the A3 at the M25 intersection, Ockham and Ripley roundabouts and all villages between Cobham, Dorking, Merrow, Woking. There would be extra pollution at Jnctn 10 which is already at a risky level. There would be so many extra people and children that the Horsleys and surrounding villages would be unable to sustain without enlarged shopping areas, more schools and medical facilities. Not to mention trains and parking. This would make us an urban area and we are supposed to be in Green Belt’ which was never supposed to be withdrawn, otherwise it joins us on to London via Kingston and Esher in an urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5235  Respondent: 10910753 / Heather Thompson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object specifically, to the inclusion of the former Wisley airfield. If this proposal is adopted, and the plans put forward by the Cayman Islands based company go ahead, Guildford Borough Councillors will be responsible for the destruction of village life in this part of Surrey, in direct conflict with the promises that were made to the people who elected them as their representatives. The volume of traffic, pollution and the loss of important habitat will all be the blight that is created. The fact that this corner of the borough, on green belt land, should be sacrificed so that questionable housing targets should be met is a betrayal. Should the plans for this site, along with Garlick's Arch go ahead, there will be 2,500 new houses in the area.
I object because I was one of many who attended the council meeting on 8th April 2016 in which the Planning Committee unanimously rejected the application put forward by Wisley Property Investments Ltd. It seems astonishing, therefore, that after serious concerns have been raised by a broad number of, sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency, this site is still considered to be suitable for inclusion in the Local Plan.

I object because the proposed building on this site would result in this part of Surrey becoming part of the urban sprawl from London. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to building on the scale proposed for this site as the impact on our road systems will be catastrophic. Many of the roads in the area are narrow, some only single lane. In addition to this, there are no pavements. The prospect of having an additional 4,000 cars using these roads each day is not to be countenanced.

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation and prove detrimental to the health of local residents.

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

I object to the draft Local Plan because Three Fields Meadows (former Wisley Airfield) should not be included in the draft plan and my detailed reasons for this are itemised below:

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

I object to the draft Local Plan because when certain councillors put forward their objections at the council meeting on 24th May 2016 they were told by the leader of the council, Councillor Spooner, that if the site was not accepted for inclusion in the plan it would mean that they would be responsible for other villages having to bear the brunt of such development. I fail to see the legitimacy of this argument. It also appeared that councillors were being warned to accept this draft plan or the villages they represented would be back in the frame. Is this the premise upon which the plan should be built?

I object to the draft Local Plan because considering this from an entirely cynical point of view, it may appear that the vast sums of money that would be involved should this plan ahead, have tipped the scales of justice. Certainly, those behind WPI have no real interest in the needs of people in the borough and have seen the profits to be made when purchasing green belt land cheaply and then attempting to have its status overturned so that they can sell that land, with outline planning permission, at a vast profit. I doubt that these people live in the area and, by their actions, show they have no love of the area, unlike those of us who live here. The voters of this borough elected its council representatives on the promise that they would protect the green belt. If they adopt this proposal, they will have reneged on this promise and, in doing so, failed their electorate.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect in order to save the countryside for the generations which follow.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Once again, I find that I must object to the Guildford Borough Councils inclusion of Three Farms Meadows in the 2017 Local Plan. As someone who attended the council meeting in which all proposed plans to develop this site were unanimously rejected for very good reasons, I find it hard to understand how it can still be included in this draft. As a resident of Ripley I know that if this development goes ahead, the very nature of this corner of the borough will be destroyed. I will render it nothing more than a suburb of London. The council seems to have no qualms about destroying the green belt which, by it's very nature, is designed to ensure that the urban sprawl is not allowed to simply go unchecked. This, along with other planned developments in Send and Clandon will result in the end of village life here. The villages will simply merge into a new town.

I have attended meetings and seen projected plans for the development of this area and believe that there is a cynical use of green belt land which can be bought cheaply but, once planning has been granted, can then be sold on for a premium. There are those who seek only to make a large profit. The real needs and wishes of the communities involved are simply ignored. Green belt is being exploited in preference to genuine brown field sites for this reason. Those who stand to make vast amounts from this site are registered in the Cayman Islands. They are not paying UK tax and have no interest in improving the lives of those of us who live in the borough.

My reasons for objecting to Policy A35, Three Farms Meadows, in the draft 2017 Local Plan are as follows:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.

12. Opportunity (3) should be common to all sites and is not unique to this site.

13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

16. I object to the removal of additional 3.1 ha from the green belt without any justification.

17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting taxpayers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

It is for these reasons, therefore, that I believe that this plan is not fit for purpose and I now await Guildford Borough Council’s response to my objections.

What changes (2016)/ further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Once again, I find that I must object to the Guildford Borough Council's inclusion of Three Farms Meadows in the 2017 Local Plan. As someone who attended the council meeting in which all proposed plans to develop this site were unanimously rejected for very good reasons, I find it hard to understand how it can still be included in this draft. As a resident of Ripley I know that if this site remains in the plan and is developed in the way that has been suggested by the owners of the land, the very nature of this corner of the borough will be destroyed. I will render it nothing more than a suburb of London. The council seems to have no qualms about destroying the green belt which, by it's very nature, is designed to ensure that the urban sprawl is not allowed to simply go unchecked. This, along with other planned developments in Send and Clandon will result in the end of village life here. The villages will simply merge into a new town.

I have seen projected plans for the development of this area and believe that there is a cynical use of green belt land which can be bought cheaply but, once planning has been granted, can then be sold on for a premium. There are those who seek only to make a large profit. The real needs and wishes of the communities involved are simply ignored. Green belt is being exploited in preference to genuine brown field sites for this reason. Those who stand to make vast amounts from this site are registered in the Cayman Islands. They are not paying UK tax and have no interest in improving the lives of those of us who live in the borough. This seems to be happening on a national scale and is a disgrace.

My reasons for objecting to Policy A35, Three Farms Meadows, in the draft 2017 Local Plan are as follows:

**I object to the inclusion of this site in the 2017 Local Plan because** it will be adjacent to the most congested stretch of roads in the country, junction 10 of the M25. In addition to this, the neighbouring roads, many of which are little more than country lanes, which already carry a high volume of traffic, will be negatively impacted. Living in a narrow lane, which is already a rat run, I know only too well of the impact development here would have. When the increased traffic that is projected due to increased visitor numbers to RHS Wisley is added to this the result can only cause misery for those living here.

**I object to the inclusion of this site in the 2017 Local Plan because** alongside the very significant increase in traffic movements, there will be a very significant increase in air pollution. The quality of our air as a result of the heavy traffic on the M25 and A3 already fails to meet statutory limits. The increase in asthma, particularly amongst children in the area, is disturbing. As a child brought up here, I can attest that when I was a child asthma was unusual, not the norm as it has almost become today.

**I object to the inclusion of this site in the 2017 Local Plan because** the access to the train network from this site is highly problematic. The roads surrounding the development are little more than country lanes and the suggested solution, that commuters could walk or cycle to the nearest railway station, is ridiculous. To suggest a bus service to Horsley again is not viable. The prospect of walkers, cyclists and buses using these narrow roads is completely unrealistic.

**I object to the inclusion of this site in the 2017 Local Plan because** the increase in area is on the south of the site and faces the Surrey Hills ANOB. The projected building on this area, in places several storeys high, would be a true blot on the landscape of this protected area. The removal of a further 3.1 hectares of green belt land is totally unjustified and unnecessary.

**I object to the inclusion of this site in the 2017 Local Plan because** one of the major issues is the provision for dealing with the large amount of sewage that such a site will generate. This will prohibit the plan from contributing to the five year housing projection.

**I object to the inclusion of this site in the 2017 Local Plan because** the housing number and the fact that the council has not used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA.

**I object to the inclusion of policy S2 in the 2017 Local Plan because** it states that the figures in the Annual Housing Target Table add up to 12,426, when, in fact, they add up to 9,810. There seems no account taken of the missing 2,616. This anomaly suggests that the figures are not to be trusted.
I object to the inclusion of this site in the 2017 Local Plan because the council has failed totally to take into account all of the objections raised by those they purport to represent. This is to disregard the fact that they are our democratically elected representatives and have a responsibility to act upon the wishes of the electorate. The promise by those on the council when elected was to protect the green belt. This promise is being flagrantly broken.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. The inclusion of 2100 homes on this site would present an unbearable strain on the existing infrastructure and completely alter the nature of the surrounding villages.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans. I doubt that any of these homes will be truly affordable to local residents and will lead to a further influx from surrounding areas and thus not meet the requirements of the local population.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. At present cyclists are already endangered by the number and speed of cars passing through the area and this will do nothing to improve the situation.
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads which are already congested. At present the roads are in a terrible state with numerous pot holes and the council seems to do little to maintain them.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. In addition the council seems to show no support for measures to reduce traffic on the roads such as the provision of school buses which were once in place but have now been terminated.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I continue to object to the inclusion of Policy A35, Three Farms Meadows, in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site in this plan because of the constraints on the site and the physical location.
2. It is too far from railway stations.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junctions in the country (J10).
4. Local roads are at capacity particularly when the A3 is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded A3 and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000 per annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. It remains unclear when/if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
10. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
11. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will adversely impact the views from the AONB.
12. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
13. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
14. I object to para 22 as this does not reflect the impact of the buildings on the surrounding rural area.
15. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultees.
16. I object to the Proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
17. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
18. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
19. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
20. I object to the transport evidence base which has been criticised for using out of date modelling software and is therefore unreliable.
21. I object to the housing number which I believe is unsound.

I consider for the reasons listed above and other reasons, that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objection to Guildford Borough Council Proposed Submission Local Plan

Although I live in Surbiton I drive every week to visit friends in the Borough

I OBJECT to the draft Submission Local Plan for the following reasons:

- I object to the proposal to take so much land out of the Green Belt; new housing should be put on the brownfield land in the urban areas of the
- I object to the proposed number of houses; it seems too
- I object to the proposal to remove the Former Wisley Airfield from the Green Belt; it separates Ripley from
- I object to the urban 2,000 house development being placed in the historic rural village of 159 homes in
- I object to more development which would have an impact on transport, local roads and road The narrow rural roads in Ockham and the surrounding area cannot cope with the extra traffic, which would increase the already severe congestion on the A3.
- I object to the continued inclusion of this site A35 where a recent planning application has already been unanimously rejected by the Planning

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

1. I object to the disregard for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.
2. I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.
3. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
4. The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.
5. I object to the fact that the council has failed to remove this site from the local plan despite receiving over 50,000 objections from local residents and statutory consultees.
6. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
7. I object to the removal of additional 3.1 ha to be removed from the green belt without any justification
8. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will increase the negative impact of the views from the AONB.
9. Opportunity (3) should be common to all sites and is not unique to this site
10. It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

11. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

12. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

13. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

14. It is further from railway stations than any other identified strategic site

15. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.

16. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.

17. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

18. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

19. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

20. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

21. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design”

22. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.

23. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

24. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

25. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

26. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and in particular ignoring previous representations.

28. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

29. I object to the Housing number which is unsound and open to legal challenge.

30. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” Yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council (GBC) Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brown field land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths, the lack of pedestrian footpaths and the space to provide either, together with the pitiful state of the existing highways, which are currently dangerous for cyclists
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and demand for car parking at each station is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

- I object to the fact that air quality concerns have not been taken seriously. Air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open
spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** pslp172/2341  **Respondent:** 10911617 / Peter P. Earle  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for a number of reasons including:

1. This is the least sustainable site identified in both the current and previous versions of the Local Plan because of the site constraints and location.
2. This site is further from railway stations than any other identified strategic site.
3. The site is adjacent to the most congested stretch of strategic road network (SRN) in the county and close to one the most congested junction in the country (M25 -J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (in peak times and also due to accidents, diversions, roadworks etc)
5. Suggested public transport initiatives including bus services to and from Guildford will exacerbate the already over crowded road network leading to unreliability and delay, which in turn will make local residents choose individual modes of transport resulting in further congestion.
6. Public transport bus services to Horsley will reduce the safety of the local road network as lanes are narrow and this will increase danger to cyclists and walkers which should be encouraged as eco friendly alternatives. The area is greatly used by cyclists at all times throughout the year who seek to follow the 2012 Olympic cycle route and train for the annual Ride London –Surrey 100 cycle event. The current plan will add to traffic flows and endanger cyclists and walkers lives.
7. The proposed site is adjacent to the Royal Horticultural Society gardens, which is one of the most visited destinations in the south-east of the country. I understand that expansion plans the RHS have will significantly increase the number of visitors to Wisley. From reading the plan, the resultant traffic increase from the RHS has not been considered. Furthermore, there are regular events at the RHS which attract 1,000’s of additional visitors and again the impact of this increase in traffic does not appear to have been taken into consideration.
8. Once completed, there will be minimal employment opportunities on the developed site as a result of which, the majority of new residents will travel to work. The majority of these are likely to use motor cars (probably with only a driver) and this will add significant volumes of traffic to the already over crowded local narrow lanes.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the increased area of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

Please note that I reserve my right to attend the inquiry and personally present evidence.

As a further over arching comment on local and government policy, I do not understand why more emphasis is not being given to long term investment in developing other parts of the UK. It is evident that the South East and the London
conurbation in particular is over crowded. The answer is not to destroy the green belt but to encourage a shift in population to other areas which have been neglected by successive governments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Guildford Borough Council Proposed Submission Local Plan: Letter of Objection

Although I live outside the borough I keep my horse at stables in the borough and regularly drive to the borough to ride my horse out over the Bridleways on the Former Wisley Airfield and local areas.

I write to OBJECT to the draft Submission Local Plan and the inclusion in the Plan as a potential site for development of the Former Wisley Airfield for the following reasons:

• I object to a plan with 70% of new housing in the Green There is ample brownfield land in the urban areas of the Borough. The Green Belt should be preserved for future generations as was reflected in election promises to preserve the Green Belt.
• I object to the housing number of 693 houses per year which is far too It is the result of hidden calculations and has not been justified.
• I object to the proposal to remove the Former Wisley Airfield (FWA) and neighbouring land from the Green There are no exceptional circumstances to warrant removing the land from the Green Belt
• I object to this urban 2,068 house development being placed inthe historic rural village of 100 or so homes in
• I object to the impact on transport , local roads and road The proposed development would result in around 4,000 additional cars on the roads. This will increase the danger from traffic to horse riders, cyclists and pedestrians on the narrow rural roads in Ockham and the surrounding area. It will increase in the already very bad congestion on the A3 and M25.
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, particularly the Thames Basin Heath Special Protection Area (SPA) and the Sites of Special Scientific Interest (SSSI) and Special Nature Conservation Interest (SNCI). I enjoy on the airfield the song of the skylarks, which are an endangered species, and which will be threatened by the development
• I object to the threatened loss of high quality farmJand, currently covered by the fast growing maize crop..

Please remove the Former Wisley Airfield, site A35, from the Submission Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7203 Respondent: 10912513 / Sarah Green Agent:
I object to the inclusion of Three Farm Meadows (Policy 35) due to the proposed removal of the site from the Green Belt when no exceptional, very special or special circumstances exist. In particular, I object to the unsustainable nature of the site, the poor air quality and noise pollution levels that will result, the infrastructure deficit that will result and the impact on views to and from the Surrey Hills.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Dear Sirs

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of cars resulting from a proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The increase in pedestrian traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I object to the fact that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency. I hope that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to the inclusion in the Local Plan of the former Wisley Airfield site, A35, also known as Three Farms Meadows. I live in Cobham, outside the Guildford area, but close to Wisley and directly affected by what happens there. My reasons for objection are as follows:

• The site is in the Metropolitan Green Belt and the proposed new town would severely affect the openness of the area and the views to and from the Surrey Hills AONB. There are no very special circumstances justifying this development. There are Brownfield and Urban sites still available in the Guildford area and these should be used.
• Development of the site would destroy this beautiful, quiet rural area and decimate the wildlife. It would overwhelm the hamlet of Ockham and the other little villages close to the site. It would create a ‘foreign body’ in the beautiful Surrey countryside. The intended density of dwellings and the four and five-storey buildings would be completely out of character with the area.
• There would be an unacceptable increase in light, noise, and air pollution plus an effect on the water table and flooding in the locality.
• The new population centre would place impossible strains on health services, schooling, public transport, and other facilities and infrastructure in and around the locality.
• There would be a dramatic impact on roads and traffic. As a resident of Cobham I am particularly concerned with the adverse impact the extra vehicles would have on junctions on the A3 and M25 and on the traffic jams we get in Cobham.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I attended the meeting on 8th April regarding The Wisley Property Investments Ltd (WPIL) planning application of January 2015 (Ref: 15/P/00012) and this was unanimously rejected by GBC following the recommendation of the GBC Planning Officers.

The reasons for the refusal of the application were many but included that the proposed development:

(a) was an inappropriate development within the Green Belt;

(b) would have a clear and substantial detrimental impact on the openness of the Green Belt and conflict with the purposes of including land within the Green Belt;

(c) failed to demonstrate that the benefits amounted to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified;

(d) failed to comply with the objectives of policy RE2 of the Guildford Borough Local Plan 2003 (as saved by CLG Direction dated 24/09/2007) and chapter 9 of the National Planning Policy Framework;

(e) was within the 0 -400m and the 400m to 5km zones of the Thames Basin Heaths Special Protection Area, etc.
(f) would have a severe adverse impact on the safe and efficient operation of the strategic road network, and a severe impact on the efficient operation of the local road network;

(g) failed to deliver the required transport sustainability measures;

(h) failed to secure an appropriate provision of affordable housing;

(i) was detrimental to the viability and vitality of the existing district and local centres in the vicinity of the site;

(j) would result in loss of the safeguarded waste site;

(k) presented a dense and urban form of development owing to its quantum and scale;

(l) had an adverse impact on the setting and significance of a designated heritage asset;

(m) had an unacceptable air quality impact;

(n) impacted on education infrastructure;

(o) impacted on policing infrastructure;

(p) impacted on health infrastructure;

So I was completely baffled when we went to the next meeting at the GBC Millmead, on 24th May, to be told that they were going to go ahead with the plan anyway!! So why are we continually writing our objections when they are completely ignored?

Anyway, I object very strongly to the submission of the local plan, specifically for The Three Farm Meadows (the former Wisley Airfield). I could rewrite my objections from all my previous emails/letters, but I cannot see that they will make a difference!!

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings.

I object to the draft Local Plan for the following key reasons:

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from
London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application
was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency. I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows) I am disgusted with the fact that it has even got this far. We need to protect the land around from developers who want to create massive villages in such a beautiful and natural area. It saddens me that we are destroying nature's home.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I am writing to object in the strongest possible terms to the Guildford Borough Council Local Plans to include the former Wisley Airfield for a major development of a new town. This proposal was unanimously rejected by GBC, and yet it is now being included in the Local Plan.

The plan would have 70% of new houses being built in the protected greenbelt and would destroy for ever the environment surrounding the small local communities of Ockham and Horsley.

I strongly object to the disproportionate allocation of new housing in this area with over 23% of the Plan for new housing being in the area of the Horsleys, Ockham, Ripley and Send, when today only 0.3% of the population living within Guildford Borough live there today.

I, like so many others who live in the area have consistently objected to these proposals on a wide range of grounds. I hope that you will take this and the many other objections being raised in to very serious consideration. A new town of this scale would inevitably absorb the local villages and set the precedent for creeping suburban growth and destruction of the greenbelt so close to London.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object very strongly as I have done before to the inclusion of Three Farm Meadows in the Draft Local Plan. There are many reasons for the objection as have been put forward before and remain fundamental objections and reasons why this should not go ahead.

The area is Green Belt land and I object to the change in the Green Belt boundary to the eastern end of the site

It is a totally unsuitable site for development because of the constraints on the site and the physical location

The site is also very close to the most congested road network (A3 and M25) and most congested M25 junction of all (junction 10)
It is also adjacent to RHS Wisley where visitor numbers will increase by 500,000 per annum. So this means more traffic.

The roads around the three Farm Meadows are also totally unsuitable for any more traffic. They are unlit narrow and without pavements. There would not be sufficient employment on his site for people to work so people would have to travel by car/ walk/cycle along these unsuitable lanes.

The stations and schools are at their full capacity. No room for more cars in railway car parks and the site is further from stations than any other strategic site.

Any bus services will have to face the crowded SRN and this would result in unreliable services and delays.

These are just some of the many reasons why this site should not be included in the Local Plan. If this area were to be developed in ways that have been proposed and rejected through previous planning applications it would fundamentally alter the environment, landscape and community of the several small villages in the area for ever.

I along with many other residents and local people have objected many times, alongside other statutory planning applications, and the Council should remove this Three Farm Meadows Site from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I think that the Ockham plan to develop the old Wisley Airfield makes sense in terms of being a substantial development on what could be classed a brownfield site. It is a wide expanse of tarmac and concrete adjoining the A3. This could helpfully be developed into a village and have amenities for social housing, a traveller site and could be developed in a stand alone way which would not affect the neighbourhood as a road would be made which could link to the A3. I understand that this is not your favourite as it will incur more expense as a road will need to be made. However, it is here that all sections of the community can have their housing needs met for the minimum of trouble to the neighbours and to the landscape.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object very strongly to the Proposed Local Plan and I support the objections to the changes in the Plan that have been summarised on behalf of the residents by Ockham Parish Council.

I object very strongly to the inclusion of the proposed development on Three Farms Meadow (A 35) in the Local Plan, for several reasons:

I object because of the appalling traffic congestion that would result on the A3 and on local roads from the development. The queues on the A3 around Guildford are already miles long twice a day on most days and the junction (10) with the M25 is already one of the most congested junctions in the county. There have been many serious accidents on these roads in the last two years

I object to building on the invaluable green belt. There are **no exceptional circumstances** for this site being removed from the Green Belt, as required by the National Planning Policy.

I object because of the increased pollution that would occur. The pollution levels on the A3 and near to the A3 are already far too high.

I object because this site is still included in the Local plan despite thousands of objections from local residents and statutory bodies, including Guildford Borough Council.

I object because the local station car parks are already full on weekdays. There is no way that dozens more people could park at Horsley or Effingham Junction stations.

I wish these objections to be fully taken into consideration and I strongly request that the proposed development on Three Farms Meadow should be removed from the Proposed Local Plan.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35- for the phased development of a new settlement of up to 2100 dwellings.

I object to the draft Local Plan for the following key reasons:
I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to: The assertion that the development will result in a meaningful shift to cycling and walking.

The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

The Village of Cobham attracts many visitors with its shops and restaurants and the most direct route from the area of Ockham is via Ockham Lane. This road was built for easy access to Cobham for use by the local residents, it is very narrow with no footpaths or cycling track and is only suitable for light traffic due to having very many bends and blind corners. It passes through Ratchford and a flood plain, it is very often closed due to flooding. The danger that any increase in traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them) has to be considered.

The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on due to start until 2019 at the earliest

The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Dear sirs

I wish to record my objections to these proposals on the following grounds:

- So far no exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.

- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

- I seriously object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.

- I also object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.

- The Local Plan as drafted poses a threat to the historic rural settlements of Ockham, Hatchford and Downside.

- The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development. There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.

- There is a serious lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge and I know as a resident of that area that the roads simply cannot accommodate more traffic without serious consequences.

- I am very worried that the issue of air quality is not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

- I object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPS16/6908  Respondent: 10921025 / Tony Allen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Co-operate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to strongly object to your proposal to include the above application for 2,000 new dwellings within your local plan at the site of the former Wisley Airfield.

This site comes under the Metropolitan Green belt and I am not aware of any circumstances that justify its removal from it. The whole point of the Green belt is that it is protected land to prevent the spread of urban development destroying the natural countryside not to mention harming already endangered wildlife and ecologically sensitive areas that have been damaged by increased levels of traffic and subsequent pollution.

The addition of this development will have a severe impact on the already congested rural lanes and roads around the area, not to mention severely burden the small villages and station car parks already struggling to accommodate the high levels of parking required. There is already an application in place for RHS Wisley which will increase visitor traffic and this will be compounded by an additional 2,000 dwellings adding what could be as many as 4,000 cars to the road network, bearing in mind many modern homes and families have at least 2 cars per household, if not more.

I urge the Planning Committee to consider the detrimental affect a development of this magnitude will have on this rural area and the environment and reject the application forthwith.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3439  Respondent: 10923265 / Colin Lewis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Co-operate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object also to the proposed development of Wisley Airfield.

Apart from proposals to add more house building in a village now bursting at the seams, the proposed development of Wisley Airfield with 2,000 houses makes a mockery of the planning and development process. What common sense if any is used to impose such a burden on communities that are barely coping now. The local infrastructure simply cannot cope.

Development of Wisley Airfield as proposed should be removed from the Local Plan. Common sense should prevail.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3470  Respondent: 10923265 / Colin Lewis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Co-operate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/3471  Respondent: 10923265 / Colin Lewis  Agent: 10923265 / Colin Lewis

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5695  Respondent: 10923297 / Matthew Burnham  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):

• Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
• Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
• Unacceptable Conservative Party links between the developers and the Council.
• No Green Belt “exceptional circumstances” presented.
• Not a brownfield site as stated – only 15% of it.
• Proposed SCC waste site ignored.
• Loss of farming land.
• Too near RHS Wisley and Thames Basin Heath SPA.
• SANG would harm on SPA.
• Will aggravate traffic jams at A3 roundabout and M25 Junction 10.
• Unacceptable increase in air pollution.
• No existing public transport and stations miles away.
• No proper traffic data.
• Housing density far too great.
• Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
• Access confined to inadequate narrow lanes.
• Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
• Major impact on neighbouring villages, especially Horsleys.
• No assessment made of collective impact on area of this and 6 Horsley sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I have worked at RHS Garden Wisley for nearly 10 years, and have lived in Surrey all my life, at contrasting locations such as Croydon, Dorking and Haslemere. I have personal experience of the housing market as a Surrey resident, as do my children. I earn below the national average income and choose to live here because it is beautiful, even if it means sacrificing some life-style choices. I do not want to see this area ruined and become suburban sprawl and a biodiversity desert. I have not seen prices in the rental and buying market rise very much at all over the last five years - indeed I believe they have just fallen following the brexit vote. The devaluing of the pound has suddenly made us an even more attractive market for foreign investment: this is trend does not support the apparent housing problem. We've yet to see the effects of the buy-to-let changes. The Green Belt is as necessary here as the parks are to London. I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Site A35 - Wisley

I object to the large proposed development of 2,000 houses at Wisley Airfield as it will destroy large areas of Green Belt and agricultural land and produce massive congestion on the A3 and surrounding roads including Ripley and Send.

To conclude: the draft Local Plan represents a terrible sentence for our villages. We are destined to become a victim of urban sprawl based on an exaggerated housing need. NPPF states that the Green Belt should only be altered in “exceptional circumstances.” There manifestly are no exceptional circumstances in Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I object to the fact that the crime rate will increase and my safety compromised.

I object that the already overstretched NHS resources will not be able to cope with all these extra people.

I object to paying a very high Council tax to live in a rural pleasant environment which will now prove to be poor value for money.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to:

- the removal of the Former Wisley Airfield from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to Three Farm Meadows, an area that at present has only 0.3% of the population of GBC).

- the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment as far too high. This assessment and calculation process has been far from transparent and is more than double the figure used in previous plans.

- over 70% of new housing being built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate, as above, are being ignored.

- Insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1548  Respondent: 10927137 / Mary Pargeter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the former Wisley Airfield (FWAJ, now known as Three Farm Meadows (TFM). Allocation A35- for the phased development of a new settlement of up to 2100 dwellings

I object to local plan which still includes the above site at the Former Wisley Airfield/Three Farms Meadows. Despite overwhelming objections from the public and the application being unanimously rejected by GBC, this site remains on the local plan.

The Government advice states 'The Green Belt should only be altered in exceptional circumstances through the local plan process and the support of the local people. Demand for housing alone will not change the Green Belt.’ The inclusion flies in the face of this edict.

The proposed plan does not have the above support or meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are:

- access to the countryside and clean air and
- the peace and quiet afforded by wide open Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the Three Farm Meadows.

TRAFFIC AND HIGHWAYS

From the severe alterations required to the road network it is obvious that the size of this development is inappropriate for the location.

- the re-routing and one way systems would entail long detours to reach nearby locations and extra traffic (estimated 4,000 cars) would increase noise and This is a unreasonable imposition upon existing residents and obviously affects Ripley, Horsley and Cobham and all of their adjoining minor and major highways.
- Southbound traffic to the A3 would be forced through Ripley High Street, already heavily congested at Newark Lane in the rush Traffic joining the A3 from Old Lane, a dangerous junction with fast traffic joining the A3 from the sliproad, would back up.
- Junction 10 on the M25 is already heavily backed up at peak times and the pollution levels already exceed the European safety standard.
- The lack of suitable public transprt. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
- the assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
- the danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the inclusion of Three Farms Meadows in the draft Local Plan. This application was turned down unanimously at the planning committee meeting. Thousands of letters of objection were received. However this has all been ignored by the Council by refusing to remove this development, which appears to have been added as a direct copy from developer's layout of the site. I have written to object several times and wish that those comments are passed on to the inspector.

In summary:

- green belt infringement or removal.
- adjacent to already heavily congested road system of M25 and A3 junction.
- pollution levels already exceeded.
- increase of estimated 4,000 cars narrow country lanes unable to cape, car parks.
• already full at railway stations.
• closure and rerouting of neighbouring lanes.
• Infrastructure of sewer system unable to cope with existing demands - surcharging already occurs.
• ruination of historic village of Ockham.
• out of scale and proportion to this rural location.

</table>
From experience (daily), I can assure you that the roads in Ockham, Ripley are already completely congested. Between 7.30 and 9.30 am it is hardly possible to go anywhere, as Ripley and the A3 are completely congested at that time. Also, if we would like to travel by train, there is hardly any or no parking space left at Effingham Station.

In your plans you mentioned other train stations like Weybridge, Woking, Cobham, which will take you an hour to get there during rush hour.

An increase of approximately 4000 cars would make life impossible as it will completely clock up the roads. I speak from personal experience as I drive my children to school every morning and my husband uses the train from Effingham.

Nowhere in your plans have you explained how you will solve the infrastructural issues. Just creating an access road to the A3 round-about in Ripley will not solve this issue as this round-about to enter the A3 is already congested during working hours and in addition to that if you would like to go through Ripley the road is also congested.

In our area there are also lots of tractors, horses and cyclists on the road. If you will increase the traffic with about 4000 cars, you should think of an A&E station or an ambulance on stand-by for 24/7 as it will create dangerous situations on the already narrow roads.

Also, the submission plan is unreliable due to some errors in the plan, the poor quality and lack of transparency in the evidence base and the accessibility of the evidence base.

I furthermore would like to stress that It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location. Also the site is further from railway stations than any other identified strategic site and it is on the the border of the most congested road network in the county and close to one the most congested junction in the country (J10)

Any public transport provision such as bus services to/from Guildford will be negatively affected.

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. As already mentioned: this is totally unrealistic and unsafe!!

The site is also on the border with RHS Wisley, which is the most popular visitor attraction in the south-east and visitor numbers of this attraction will increase by 500,000/annum.

Furthermore, and very important to us: we object to the increased area of the site as this now abuts additional heritage assets, including our house: Bridge End House and Upton Farm The increased area will negatively impact the setting of our house and Upton Farm.

Also, I object to the removal of additional 3.1 ha from the green belt without any justification

And what I do not understand and very much object to is the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

I consider for the reasons listed above and many other reasons that this plan is unsound, unreliable, unacceptable and not suitable.

I require confirmation that all of these comments together with all my previous comments are passed to the Inspector.

I do not see the purpose that I have to keep writing these objections again and again as it should be enough to explain to you once. But apparently it should be explained to you over-and-over again in order for you to finally realise that it lacks clarity (which is very clear) and evidence (also very clear) and hat it is just not suitable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
I object to the Guildford Borough Council Proposed Local Plan (June 2016) and, in particular to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings, and the erosion of greenbelt land in East and West Horsley.

I object to the draft Local Plan for the following key reasons in respect of Three Farms Meadows:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I object to the draft Local Plan for the following key reasons in respect of East and West Horsley:

1. I object a plan that removes East and West Horsley from the Green Belt.
2. I object to a plan that includes 533 new houses in East and West Horsley.
3. I object to the erosion of farmland
4. I object to a plan that will destroy the beauty of the village in which I live.

I trust that these objections will be fully considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/835  Respondent: 10933793 / Julia Tilbury  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Three Farms Meadow site

I OBJECT also to there-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. 17 This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision - a clear signal to the developers to try again.

This is not an NPPF ”presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company. “18

Policy A35 should be ditched from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of ”exceptional circumstances”.

---
• Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
• Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
• Proximity to A3/M25 bottleneck and Ripley village and roundabouts.

“17 Application reference 15/P/00012.

“18 Including the Rt Hon. David Mellor QC (its erstwhile founder and former Minister), Mr Michael Murray (spokesman for the project and Conservative cabinet member for planning policy at the Vale of the White Horse District Council in Oxfordshire) and the Han. Charles Balfour (director, descendant of the Tory Prime Minister).

• Absence of adequate traffic data.
• Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
• Loss of high-quality agricultural land (55% of the site), in breach of national policy.
• Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
• Presence of a Surrey County Council safeguarded waste site.
• Cost of infrastructure required to the detriment of alternative more favourable sites.
• Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
• Impact on listed buildings.
• Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
• Extreme housing density with tiny garden spaces.
• Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
• Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14). 19
• Failure to evaluate the cumulative impact of this and nearby development sites on the area.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the large proposed development of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send. The A3 is already at capacity in this area and causes major delays accessing the M25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to a deaf audience. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. Some residents have concluded that commenting is a waste of time.

All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.13

I OBJECT in particular to including Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village – essentially, a soulless new dormitory town. The Horsleys feel victimised by this plan, which has been masterminded by Council leaders representing Ash and Tongham at the other end of the borough, where (in a flagrant case of political double standards) the Green Belt is actually being extended under Policy P3.14

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.
Under the plan, rural West Horsley will take 35% of new homes, Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than sneaking in site proposals as a fait accompli.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

- Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
- Guildford Council’s Education Review says “expansion options may need to be considered for primary” education in the Horsley area within the first 5 years of the plan, but Surrey County Council has no plans to do so. The Raleigh School is already full. The private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.
- The plan’s Infrastructure Schedule (Appendix C) imagines an “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC” but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not improve it.

13 E.g. Gallagher Homes v Solihull Metropolitan Borough Council [2014] EWHC 1283
14 Councillor Paul Spooner and his predecessor, Councillor Stephen Mansbridge.

The harmful impact of these sites is magnified by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with 2,100 new homes only 2 miles away (see below).

I OBJECT also to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee recently rejected a recent planning application for precisely this development was unanimously on 14 separate grounds.15 This deceived many residents into thinking that it has been defeated: scandalously, the site had been included in the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers that they should try again.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given additional months to refine their application. Residents are disturbed by apparent party links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.16

Three Farms Meadows before WW2 was a valuable agricultural asset to the UK. It still is. It grows enough wheat for 1 million loaves of bread.

The hamlet of Ockham gladly helped the war effort by allowing the fields to be used for the defence of the realm on the understanding and promise from HM Government that after hostilities ceased it would be returned to farm land and the
hamlet to a quiet rural existence. For their loyalty to King and country the villagers have been let down and subjected to the threat of the engulfment of the hamlet and the end of their peace and quiet as well as the loss of a valuable food production resource that the country needs to be self supporting (UK only produces half of what it consumes as food. - 2015).

Ockham is a historic place. The home home of ‘Willium of Occam’ philosopher and author of Occam’s Razor. Ockham is the home of ‘Ada Lovelace’ the world’s first computer programmer (now on the UK passport) The site of ‘The Ockam Hoard’ a Bronze Age Hoard of bronze axe heads and jewellery now at the British Museum. The hamlet is a Grade 1 listed architectural treasure and must be protected.

Please remove Three farms Meadows from the Local Plan immediately.

Policy A35 should be summarily removed from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”;
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it;
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA);
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts;
- Absence of adequate traffic data;
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school;
- Loss of high-quality agricultural land (55% of the site), in breach of national policy;
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households;
- Presence of a Surrey County Council safeguarded waste site;
- Cost of infrastructure required to the detriment of alternative more favourable sites;
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity;
- Impact on listed buildings;
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA;
- Extreme housing density with tiny garden spaces;
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure;
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames;
- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

15 Application reference 15/P/00012.

16 Including the Rt Hon. David Mellor QC (its erstwhile founder and former Minister), Mr Michael Murray (spokesman for the project and Conservative cabinet member for planning policy at the Vale of the White Horse District Council in Oxfordshire) and the Hon. Charles Balfour (director, descendant of the Tory Prime Minister).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Re objections

Has anyone seriously considered the total destruction of a village Not including the proposed 2000 houses at Wisley airport and taking the proposed appx 600 houses

Assuming minimum of two people per dwelling and possible one vehicle per house. The very minimum

What services such as doctors surgeries, shops etc have been considered

On the subject of considerations, lets specifically mention Ockham Rd North and South. This Road is already too narrow with no room for widening

Two vehicles {lorries, coaches} cannot pass each other without mounting pavements

My suggestion as per my previous letter is: >>>>>>>>>>>>>>>>>>>

Create another NEW TOWN  !!!!!!!!

---
The retention in the Plan of the inappropriate Wisley Airfield development seems paradoxical, given the outcome so far of the planning process, with the apparent impasse and likely inability of the developer to deliver a viable proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the inclusion of Three Farm Meadows (Policy 35) due to the proposed removal of the site from the Green Belt when no exceptional, very special or special circumstances exist. In particular, I object to the unsustainable nature of the site, the poor air quality and noise pollution levels that will result, the infrastructure deficit that will result and the impact on views to and from the Surrey Hills.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

A35 Land at former Wisley Airfield  Guildford Borough Council has already refused this development of over 2000 houses, so why is it in the Local Plan? The local roads will be unable to cope with an additional 4000 cars and there is no access directly on to the southbound A3 without going through Ripley village.

We believe that Surrey County Council has earmarked this site for a recycling facility and feel that a better use would be to have an Electricity Generating Plant burning waste materials which would be a benefit to the local area (the traffic movements would not be as great as the proposed small town). The runways could be used to site Solar Panels to produce electricity as well, these could be screened by planting trees (environmentally friendly) on the Ockham side. The farmer who cultivates the land could be encouraged to produce a crop which could be used for the production of Bio Diesel. This would make Guildford look like a "forward thinking" Council taking care of of the environment and doing its bit for climate change.

Comment ID: PSLPS16/1342  Respondent: 10942081 / G J Teague  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
9. Proposed development of former Wisley Airfield (A)

I object to this proposal.

The potential development of some 2,000 new dwellings in the middle of the Green Belt is completely unacceptable. No evidence has been offered of any special circumstances justifying development in the Green Belt, and thus the proposal does not comply with the NPPF (para 83.)

The character and amenity of the the Horsleys (2.2 miles away as the crow flies), would be irreparably damaged by the resulting enormous pressures of some 5,000 extra residents on local transport infrastructure and on educational and medical facilities. No credible assessment appears to have been made of these impacts on the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

   - I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
   - I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
   - I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
   - I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( )  **is Sound?** ( )  **is Legally Compliant?** ( )
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
  7. Our Queen’s speech at the opening of Parliament one month ago our queen said “a promise to ensure transport and buses will not be reduced and this would be for the Mayor to ensure” - proposed local bus services have been proposed locally and now we hear the same for many train services.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will
exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I object to all the proposals mentioned above and we feel because of the result of the recent Referendum result it is imperative for the Guildford Borough Council to go “back to the drawing board” to reassess the numbers of properties which would be needed within Surrey together with providing information on infrastructure and additional facilities required. These numbers of properties required will certainly be extremely different to the calculations made before the Referendum!

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Comment ID: pslp172/2545  Respondent: 10945537 / Neill Ebers  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35  
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
We are of the understanding that revisions have been made to the local plans for further housing in East & West Horsley ('The Horsleys') as well as to the housing development of the land at Wisley Airfield. We understand that amended permission has now been requested for a new settlement of up to 2,068 dwellings incorporating up to 60 sheltered accommodation units and associated infrastructure including accesses onto the A3 (Ockham Interchange). Ockham Lane and Old Lane and revised access to Elm Corner, a primary/secondary school, community provisions, nursery provision, health facility, a local centre, employment area, 8 traveller pitches, sports and recreational facilities amongst a host of other things.

Considerable congestion is already being experienced on the A3 between Guildford and the M25 (J10) junction turn off at Wisley. The congestion starts from 6.30am until around 9am and then starts again from 4.30pm until around 7pm with the tail back on some days going back a couple of miles. The A3 and the surrounding area are already experiencing difficulties in handling the existing traffic volumes which will only increase with the proposed new housing.

Outside of the traffic congestions mentioned above we are of the belief that these amended plans will be felt in surrounding areas such as The Horsleys and Ripley and will generate the following impacts:
1. Further road blockage around the surrounding areas of The Horsleys and Ripley
2. Will increase the strain on the local schools in the area.
3. Reduced packing spaces (which has already become a problem).
4. Additional pollution to the area.
5. An impact to the Green Belt status of the area.
6. More accidents in the area.
7. A further drain on the NHS resources in the area ('which are already stretched).
8. The potential devaluation of house prices.

Should our understanding be correct of what we believe are the amended plans we hereby wish to make our objections known with respect to these amended plans.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs. This would impact also on the flooding issues that this area suffers from.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The statement that the development will result in a cycling and walking rather than the use of cars. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car traffic.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements. These roads flood when it rains heavily.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the A3 and M25 particularly around Wisley and Painshill junctions.
  6. The lack of suitable public transport.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site.

- **I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels.**

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. My family and I enjoy living in Ockham because of the access to the countryside and clean air and the peace and quiet afforded by wide open spaces. I wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of the former Wisley Airfield, - now known as Three Farm Meadows because the planning application has already been unanimously rejected by GBC’s Planning Committee.

- **I object because there is already a shortage of schools in this and surrounding areas due to lack of planning by the Council and this situation will only worsen as a result of these plans. Our children are the future and we should be doing all we can to ensure they all receive the very best education. The schools planned would not be sufficient.**

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. No exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs. This would impact also on the flooding issues that this area suffers from.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The statement that the development will result in a cycling and walking rather than the use of cars. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car traffic.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements. These roads flood when it rains heavily.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the A3 and M25 particularly around Wisley and Painshill junctions.
  6. The lack of suitable public transport.

• ◦ I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site.
  ◦ I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels.
  ◦ I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. My family and I enjoy living in Ockham because of the access to the countryside and clean air and the peace and quiet afforded by wide open spaces. I wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
  ◦ I object to the continued inclusion of the former Wisley Airfield, - now known as Three Farm Meadows because the planning application has already been unanimously rejected by GBC’s Planning Committee.
  ◦ I object because there is already a shortage of schools in this and surrounding areas due to lack of planning by the Council and this situation will only worsen as a result of these plans. Our children are the future and we should be doing all we can to ensure they all receive the very best education. The schools planned would not be sufficient.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As previously set out, I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site because of the constraints on the site and the physical location.
2. Too far from railway stations.
3. Limited footpaths and safe walking or cycling routes.
4. Located next to and close to very congested motorway M25 and A road A3 which are frequently at grid lock throughout the day.
5. Local roads and back roads are not safe alternatives to blocked motorways and are very busy normally which has lead to consistent accidents due to dangerous black spots (Black Swan junction).
6. Train services already to congested and limited parking.
7. Local roads not safe for bus services, cars, cycles and walking commuters. Unrealistic.
8. RHS Wisley is near to this site and during shows causes increased traffic congestion and incidents.
9. Limited employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
10. I object to the negative impact to heritage sites.
11. I object to the fact that the increased area, will increase the negative impact of the views from the AONB.
12. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
13. I object to the removal of additional 3.1 ha from the green belt without any justification
14. I object to the change in green belt boundary.
15. I object to the fact that the council has failed to remove this site from the local plan.
16. I object to this development because it will not improve the dangerously high pollution levels in this area.
17. I object because the plans includes a new road for the Elm Corner residents which involves having to navigate our way through the new development particularly when there is a better alternative for the residents available to the Council.
18. I object to the proposed Submission Local Plan.
19. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
20. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
21. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
22. I object to the extension of the plan period by 1 year as it has not been identified as a major change
23. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
24. I object to the Council wasting tax payers and residents’ time and money by not following due process and ignoring previous representations.
25. I object to the 10% buffer in the housing number over the plan period.
26. I object to the evidence base which is not transparent and has been challenged.
27. I object to the transport evidence base including the Highways assessment report.
28. I object to the transport assessment which used prescribed vehicle movements from this site with no justification.
29. I object to the housing number, particularly as the Council have not, as required used any constraints such as green belt, infrastructure, air quality. I believe that the housing number is unsound and unnecessary as housing shortage is not in Surrey but in inner London where low paid workers need to live to be near to their work.
30. I object to the apparent disregard the damage caused by nitrogen deposition and high pollution levels.
31. I object to policy S2 because the figures in the AHT table do not add up.
32. I object to the quantity of space allocated for retail in the town centre.
33. I object because the schooling offered is inadequate for this area both pre-school, primary, Junior and High school. Not enough thought has been given to the future need.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. The fact that many roads are proposed to be made one directional in terms of traffic flow, provides strong evidence that the infrastructure is inappropriate for the proposed traffic volumes.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
• I strongly object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/2667  **Respondent:** 10950689 / Maureen Green  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an intergenerational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

When we moved to Woodfields, School Lane, Ockham, 31 years ago, there was talk about developing the airfield; a neighbour who moved here 40 years ago told me that proposals to develop the site were being discussed even then. At the last Council meeting my husband attended the most recent proposals were rejected by the Councillors UNANIMOUSLY! But were still left in the Local Plan. So what is it that you don't get? For the following reasons that you and we are sick to death of reading and writing about the site is UNSUITABLE for development and this has been recognised by the planning authorities for 40 years that I know of!

I require confirmation that all of these comments together with all my previous comments are passed to the Inspector. I reserve my right to appear at the inquiry and present my evidence.

I continue to object to the inclusion of policy A35, Three Farms Meadows, Wisley Airfield, or whatever you like to call it, in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consulters.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five stories high and a population density higher than most London boroughs.

3. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development such as this could result in around 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and lorry movements.
   4. The danger from this traffic will be to cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with increased visitor traffic) and a proposed 600 pupil secondary school would add further congestion at the M25/A3 junction as well as local roads. No development can proceed without Infrastructure enhancements to the A3 and M25. Highways England has stated that they have no plans to even consider improving the A3 before 2020.
   6. The lack of suitable public transport. The local rail stations of Effingham Junction and Horsley cannot cope with the proposed increase in passenger traffic, and car parking is already at capacity.

I hope that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadow), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Development of over 2,000 house village at Ockham (former Wisley Airfield) – The impact on the Horsley villages of such a huge mixed housing, retail, commercial, traveller and schools development, under 2 miles away, would be enormous

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

We are writing in response to the publication of the new local plan and have the following objections and comments:

1. Policy A35, (Former wisely Airfield)

We object to the overriding of the Green Belt designation of this area. There are no valid reasons to permit a new development of this scale in the middle of the Green Belt with a character totally out of keeping with the existing environment in the long established villages in the surrounding area.

The resulting congestion on existing roads has not been satisfactorily considered and if such a scheme was to be permitted a much more extensive road upgrading program must be implemented. For example, the proposed access to the A3 at the Ockham roundabout only permits access to and return from the North; i.e. London bound. The only access and return from Guildford to the South is through the village of Ripley, which suffers serious congestion at times already. The only way to overcome this problem is to create south going slip roads from the roundabout to the A3 at the expense of the developer. The proposal will otherwise destroy the village character of Ripley.

The proposals seem to be entirely aimed at creating transportation facilities for London commuters. Guildford Borough Council should be concentrating on ensuring that the communications with Guildford are considered as a priority for any inhabitants of the Borough. For example, the transportation with buses assumes that commuters will travel to Effingham, Horsley and Woking railway stations. Why would anyone other than a London commuter want to take the train from Woking? There is mentioned an improvement in the set down arrangements for buses at Effingham station. The station car park is already fully utilised and there are no set down or pick-up facilities for cars there. The road leading there (Old Lane) has a number of dangerous blind corners and trees alongside the carriage way and is much too narrow for the amount of traffic that will be generated. If this scheme is to be allowed, the developer must be obligated to provide a road upgrade to an adequate standard for the frequency of traffic to be expected and provide for bicycles and pedestrians too! It is suggested in the policy that a bus service to Horsley station will be provided. This ignores that the B2039 through Horsley in parts is too narrow to permit a bus to meet a truck, unless one of them drives up onto the pedestrian pavement. It also ignores that during school term the B2039 gets temporarily blocked by mothers delivering their children to the Glenesk School in the morning. Horsley station car park is already fully utilised and the set-down and pick-up area is already fully utilised by the existing station users, not to mention those that would be added if the 533 proposed new houses in the Horsleys get built.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I strongly object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure
enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/4207  Respondent: 10953793 / Hugh Thomas  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Wisley Airfield, which is classified as a brownfield site on a spurious technicality when everybody can see that it is not what is understood by brownfield, being included in the Local Plan as a development site for 2000 houses when Guildford Planning Committee have just refused the planning application relating to it. Either the left hand does not know what the right hand is doing or this is a devious diversion. I object for all the reasons identified by GBC Planning Committee when it rejected the application.

I OBJECT to building 2000 houses at what GBC calls Wisley but is actually at Ockham, because it would massively and detrimentally overwhelm Ockham village, East and West Horsley and the entire neighbouring area. The proposal is ill conceived, showing scant regard for the Green Belt, infrastructure requirements, transport, or pollution and lacking nearly all the evidence that is needed to show that such a development would be sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objection to Guildford Borough Council draft Local Plan and to the inclusion in the plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings

As a lifelong resident of Cobham, just over the border in the Elmbridge Council area, I would be directly adversely affected by the proposal in your new local plan to remove the Former Wisley Airfield site from the Green Belt. I wish to object strongly to this proposal on the following grounds:

• The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
• No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
• There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
• The harmful impact on transport, local roads and road safety by the suggested development has not been taken into account. The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional Wisley residents, and would experience a significant increase in stationary/idling traffic at peak times and at junctions. Even with current traffic levels, Cobham centre is often gridlocked at peak times of day, especially if there are problems on the M25 or A3.
• There is a lack of suitable public transport, which the Plan does not address. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
• The issue of air quality is not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.
• The environmental and ecological value of the site and the area around it is being underplayed in the Plan. Consideration should be given to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

For these reasons, I wish to object strongly to the inclusion of the Wisley site in the new Guildford Plan

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am completely opposed to the Wisley plan as the area is unable to support that style of development: a small housing complex with associated school, dr surgery, shop and parking, play park and nursery for perhaps 150 homes would be acceptable. The impact on local roads, transport and public services would be unacceptable.

What changes (2016) / further amendments (2017) do you suggest should be made to the document?

I write to set our my objections to the local plan which seem to me to be based on unsound analysis and which is riddled with errors.

Of particular concern are the assessment of the increase in housing in the borough over the plan period which is too high and appears based on wrong figures. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS. This is not helped by policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

I believe that new housing should be built near existing infrastructure, in particular railway lines, and not be placed in rural areas where reliance on an already overcrowded road network is required.

It is therefore of concern that the quantity of space allocated for retail in the town centre is so high. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:
1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the A3 and M25 is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded A3 and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking (even though there are no pavements on the local roads) are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
1. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
2. I object to the fact that the whole area sits on a hill and the proposed development including high rise buildings will be clearly visible from the Surrey Hills AONB thereby directly going against the “openness” concept of the Green Belt.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

Policy A35 Land at former Wisley Airfield, Ockham

Proposed allocation: development of a new settlement

including approx 2000 dwellings, 100 sheltered accommodation units, 8 traveller pitches, approx 4,300 sq m of employment space, approx 1,100 sq m of retail space, a local centre, primary school and secondary school.

response: objection

Objection response: Policy A35: Land at former wisley Airfield, Ockham

Proposed location: development of a new settlement

(including approx 2000 dwellings, 100 sheltered accommodation units, 8 traveller pitches, approx 4,300 sq m of employment space, approx 1,100 sq m of retail space, a local centre, primary school and secondary school)

-Proposed site is green belt. All green belt land must be protected. Guildford Borough council must vigorously defend all green belt land. The national planning policy framework 2012 (section 9.79) states that: 'The Government attaches great importance to Green Belts. the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of green Belts are their openness and their permanence'.

-Developed near site of special scientific interest (SSSI) and the thames basin heaths special protection area (spa).

-Potential for increased crime and nuisance (nearest police stations were Ripley and Cobham but both are now closed).

-More light pollution.

-More air and noise pollution.

-Adverse visual impact. No amount of 'landscaping' will remove the impact that 2000 houses, shops, schools, retail outlets, offices, additional cars, lorries and vans will have on the surrounding area.

-More litter on our roadsides. Parts of the A3 and many of our local roads are lined with litter which is very unsightly and whichever 'body' is responsible for clearing litter do not seem able to do so or have a solution to the problem. Imagine what extra litter a whole new settlement could bring.

-Drainage Inadequacies. Although the site itself will have new drainage systems on site, presumably there will need to be connected at some point onto existing local systems.Ditches on local lanes are very rarely cleared these days which can contribute to road flooding as the rain cannot always disperse into the ditches and the existing drain system cannot cope. The new drainage required for this site will just add to this problem.

Objection response.

Policy A35: Land at Former Wisley Airfield, Ockham

Proposed allocation: development of a new settlement

-Pedestrian and cycle network not adequate. Many local roads/Lanes around the site do not have pavements. Many of them are very narrow and dangerous for cyclists. They are not suitable for any increase in traffic, especially vans and Lorries visiting the settlement and new cars which appear to be increasing in width. If the council really want to try and encourage more people to cycle, it will not be by painting 'dotted lines' on the road. Cycle lanes in and around rural areas and villages need to be separated somehow form the roads (possibly by using curb edging to divide the cycle lane from the road) but unfortunately many of the Lanes around the site are not wide enough to do this. However, creating specific cycle lanes away from roads may not be a good idea as they could, even with lighting, become isolated areas and therefore not a safe environment.
- Rail commuters may prefer to drive (or be driven) to a railway station causing more congestion. Car parks at nearest station(s) may not be large enough to cope with the increase and are chargeable, increasing the cost of the commute.

- Bus services. Policy A35 states that a significant bus network will be set up to be provided and secured in perpetuity. It would need to be a significant frequent bus network covering, peak times, say, 07:00-10:00 HRS and 16:00-19:30 HRS. It must also have a timetable up to approx 23:45 HRS, linking with train arrivals at the various railway stations, including Woking and Guildford, to cover those returning at various times from a city night out. Is the developer, who is funding the delivery of this network, also going to fund the ongoing running costs of this significant (and hopefully frequent) bus network in the many years after completion - if not then who is?

- Access Roads to/from the site

A3 Ockham interchange. This roundabout is already very busy at peak times. Queues onto the A3 Northbound at this junction are normal, especially as the inside lane of the A3 at this point is usually queued down to junction 10 of the M25. On many occasions the middle lane is also queued. If anyone using this roundabout wanted to go south onto the A3, they would need to go through Ripley and Burnt Common which is already crowded at peak times. The slip road from the A3 (towards Horsley, Ripley, Send, Woking areas) is already very busy and the junction and adjoining roadscannot cope with more vehicles. For all the above reasons, having additional traffic at this interchange is not viable.

Old Lane. Drivers wishing to head south on the A3 from this lane would turn left onto the slip road connecting J10 of the M25 to the Southbound A3. This slip road is currently extremely busy with cars in the process of speeding up to join the fast movement of cars already on the A3. To potentially have a great number of new cars trying to get onto the slip road at his point would not be a good idea.

- Proposed mitigation measures in Ripley: If Ripley high street and Newark lane need improvements and there is a suitable way of improving the already congested crossroad in Ripley, then those changes should be done anyway. I appreciate approving this development is a way of getting someone else to pay for the work but this is too high a price!

- Surrounding Road Network: Traffic along the A3 is at a standstill most weekdays between Burpham and the A31 Hogsback Junction.

- The A246 is already a busy road during peak hours and any increase in traffic, either towards Leatherhead or Merrow and Guildford, would just make it worse.

- There are queues at peak times on the A247 at the Old Woking roundabout, the Burnt Common Roundabout, the B2215 through Ripley and Painshill roundabout junction.

- Further afield at peak times there are queues at the A3 Copsem lane junction and Copsem lane itself towards Oxshott and towards Esher. Queues through Esher from both Cobham and Kingston directions. The A245 from Brooklands to West Byfleet. The A245 Byfleet road to the Painshill Junction with the A3. The A318 from Brooklands. The A31 Hogsback junction onto the A331. The A31 Fanham by-pass. The A24 Leatherhead Road towards the Leatherhead by-pass roundabout. These are just some of the problem roads in the surrounding area.

- If major incidents occur in this area on the M25 or A3, the Local Roads become even more congested than normal.

- Conclusion- Green Belt Land/Access/ Surrounding road Network.

All Green Belt Land must be protected.

Taking into account all the points raised, it is quite clear that the access links for this site are not viable and the surrounding road infrastructure is nowhere near ready for this development.

- All these road network issues need to be addressed, filed and dealt with before and further development, especially one of this size, is even considered otherwise no one will want to come to Guildford or its surrounding villages and no company will want an office or unit in the area where their employees, visitors or delivery Lorries/vans have to sit and waste time and money on grid locked roads in order to get there.
**Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings**

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure
enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Three Farms Meadow site

I strenuously object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear indication to the developers to try again, with minor adjustments. This is unacceptable.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. I am concerned that there is no transparency as to the identity of the developers who are hiding behind a Cayman Islands company. This type of anonymity has recently been discredited by the government, but it does not seem to bother GBC.
Policy A35 should be removed from the plan for all the reasons by which the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).
- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the removal of the Former Wisley Airfield from the Green Belt

I object to the continued inclusion of a site where the planning application has already been unanimously rejected by GBC's Planning Committee

I trust that these objections will be fully considered and that the Former Wisley Airfield,(Three Farms Meadows), Allocation A35 is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I oppose the Draft Local Plan produced by G B C to include the following points of objection

INCLUSION OF GREEN BELT SITES AS STRATEGIC SITES and removal of Green Belt areas from the Green Belt

Wisley Airfield, Three Farms Meadows Ockham is Green Belt and not appropriate as a sustainable development and should not be a strategic site when G B C Planning Committee last month turned down the application for a new town on 14 grounds, unanimously

It is clear the experienced planning Councillors considered this a non starter as do developers in the area, they would not touch the site in any event

It is unsustainable

Air quality is poor at the interchange of M25 and A 3, at Junction 10

Wisley R H S is expecting half a million new visitors a year, imagine this extra congestion and poor air quality if in addition TFM has a further 2000 dwellings right opposite RHS Wisley on the other side of the A3

Please refer to the 14 objections your Councillors unanimously upheld, drafted by your G B C Planning Department. All upheld. All meaning that this is the wrong development in the wrong place

Please remove it from the Draft Local PLan as a strategic site now

This is squeezing a new town between tiny villages of a few hundred houses and people living there

It will ruin the farmland; It will ruin Ockham; It will ruin Ripley; It will ruin East and West Horsley; It will ruin Send; The A3 will not cope; Health will deteriorate; There are no jobs; The roads are country lanes; The area cannot cope with these numbers; We are a tiny rural hamlet of a few hundred people with agriculture as the main use of the land; There is no infrastructure for a new town; It is a medieval hamlet with an ancient Church All Saint’s Ockham and Grade 11 listed buildings; It is Green Belt Surrounded by conservation areas; Rare flora and fauna exist; Great crested newts, Dartford Warblers, Nightlarks, Red Kites, fungi and butterflies and snakes all rare and protected; This Plan destroys our countryside and fails to prevent town congestion.It would destroy the qualities that make Guildford and its surrounds a successful place to live and work. This plan provides too much land for development and does not do enough to ease congestion. The Green Belt needs protecting as do the Surrey Hills; Why are brown field sites not being used for development? To clear the area of derelict unsightly land and utilise it for the needs of Guildford residents; Residents will not be provided with homes they required; The proposed developers are overseas, Cayman Island Registered company. Surely this is of enormous concern to G B C, and I trust all investigations into ownership in accordance with the law have been carried out by G B C. The character of Guildford will not be protected and improved upon. This is required in a draft Local Plan as follows, concerning Guildford

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. REMOVAL OF former WISLEY AIRFIELD FROM THE GREEN BELT

This is farm land. Please visit. It is lush with maize. Cattle graze. People walk and cyclists and horse riders use rights of way I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

1. INCLUSION OF FORMER WISLEY AIRFIELD

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

It is well known that the site is unsuitable for a so called new town – this is a farm, this feeds many people, it is used every day by locals and visitors as recreational space and its beauty in the summer months will be lost for ever. Its views to the Surrey Hills will be impeded. Life in Ockham and surrounding villages will not cope with 5000 extra cars on the road, 4000 extra people in a hamlet of under 400 people and under 200 homes.

PLEASE REMOVE FORMER WISLEY AIRFIELD AS A STRATEGIC SITE NOW

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

THIS SITE NEEDS PROTECTION< NEEDS TO BE IN THE GREEN BELT< NEEDS TO BE SURROUNDED WITH CONSERVATION AREAS with Dartford Warblers, Great Crested Newts, Skylars, Red Kites, rare fungi, butterflies and bees

Please BUILD ON DERELICT UNSIGHTLY BROWN LAND and kindly leave nature to flourish in Ockham

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Please do not change the status of Green Belt Sites in Guildford Borough

I object on this basis to the draft Local Plan

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPS16/6218  **Respondent:** 10959425 / Jan Lofthouse  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The Green Belt land in Ockham is included as a strategic site in the G B C draft Local Plan

Its habitat includes Skylarks

Dartford Warblers

Great Crested Newts

Red Kites

Rare plants

Rare butterflies

Snakes

Badgers

Other protected species

Why do Surrey Wildlife Trust maintain the conservation areas, SNCI, SPA Thames Basin conservation areas around Ockham?

Surely this is to preserve the wild life and the green environment

Please visit now the Ockham Common, the Former Wisley Airfield, now Three Farm Meadows

It will look very different to six months ago, green and lush and full of crops and trees rare flowers and wildlife

How can you build on this?

Why are rangers protecting the sites?

We are all protecting the sites in Ockham

and surrounding villages in the green belt
And so

Why is G B C not?

I await your comments

Please remove Former Wisley Airfield (temporary in the war and promised by Government to be returned to agriculture) now Three Farm Meadows from the draft Local Plan as a strategic site and I object also to your draft Local Plan generally as it fails to preserve our green belt land

that is apart from where prominent councillors happen live, such as Ash!!! I wonder why

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4301  Respondent: 10959425 / Jan Lofthouse  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35
I object to the continued inclusion of Three Farm Meadows, the Former Wisley Airfield as a strategic site in this Plan.

I agree absolutely with the views of Ockham Parish Council above.

I trust that the green belt, agricultural site will be removed from the Plan.

The OPC response is attached for ease of reference and I fully concur with the objections.

The Wisley site is totally unsustainable and there are no reasons for an unwanted unsuitable development there with conservation areas, Special Protection Areas, Sites of Special Scientific Interest, wildlife to include rare Dartford Warblers, nightingales, night jars, great crested newts, rare butterflies,

The immediately surrounding rural villages would be ruined, that is Ockham, Ripley, Send, East and West Horsley and all neighbouring areas would be at gridlock to include Cobham, Wisley, Esher.

The Guildford area has plenty of disused brown field derelict areas for housing.

The housing numbers are wrong in any event.

Guildford Borough Council rejected planning permission on Three Farm Meadows Ockham – The former Wisley airfield which is a farm, on 14 planning grounds last April 2016, and so query why they continue to include this as a strategic site, in contradiction to its decision.

The people of Ockham continue with the fight to stop planning development on this site with the appeal this September 2017 by overseas Cayman Islands anonymous so called developers, having had to raise almost £200,000 from a tiny village of under 200 homes and approx 400 residents and query for how long this will continue that there enjoyment of daily life is interrupted with the so called developers constantly reapplying for permission on this land, and moving the goal posts.

The site needs to be recognised as it is, a green belt agricultural piece of land, being the lungs of London, enjoyed by all who work, live, walk, and spend recreation time on foot, with bicycles, horses, families.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

- OPC_Response_to_Updated_Local_Plan.docx (42 KB)
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
8. I object in the change of green belt boundary to the east – this now includes an area of high archaeological impact.

9. I object to the inclusion of A35 due to the constraints in the provision of sewerage capacity.

10. I object to the disregard of increases air pollution and nitrogen deposition.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5826  Respondent: 10964161 / Lionel Fewson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to strongly object to the above proposed development as it breaches rules, will have major adverse impacts on the natural environment including wildlife, local traffic and infrastructure as well as resulting in a development which is total out of character with surrounding settlements and lacking in the fundamental tenets of sustainability. The housing density of the proposed new development would be roughly 6 times as dense as the existing local settlements.

The site falls within the Metropolitan Green Belt and, as such, should only be developed if the proposal meets “very special circumstances”. The proposal singularly fails to demonstrate that the benefits of the development outweigh the harm to the Green Belt and other aspects noted above. The development would create the largest settlement in Guildford Borough after Guildford itself, and be the inevitable precursor to further development of the Green Belt and spread of suburban London outside of the M25.

The local roads in the Horsleys area are basically narrow, winding country lanes, already busy at peak times and will not be able to cope with the additional high volumes of traffic the development would create. The lack of suitable infrastructure in the proposed development will make the car the first choice of transport – probably another 4000+ cars and associated journeys - adding to the already serious traffic queues experienced around the M25/M3 junction, of existing concern already to Highways England. The local rail stations at Effingham Junction and East Horsley do not have sufficient parking to accommodate the extra cars and cars are already now parking on Effingham Common Road as the station car park is regularly full.

Both Ockham & Wisley Commons lie within an area designated as a Site of Special Scientific Importance (‘SSSI’) and forms one part of the Thames Basin Heaths Special Protection Area. A large percentage of the site lies within the 400m Exclusion Zone where new building is effectively prohibited. The impact of such a large settlement and associated pets will inevitably have a detrimental impact on the local wildlife.

GBC Local Plan

Noting that the proposed Wisley Airfield development constitutes a fundamental part, I wish to object to the overall proposed Submission Local Plan.

Many of the comments above, particularly those relating to moving the boundaries of the Green Belt, the significant impact of increased traffic on already busy narrow local roads, lack of sustainability and inadequate proposed improvements to local infrastructure apply more generally to the development proposals contained in the document. The proposed developments are out of character with the village nature of the Horsleys and, particularly, the density of the new housing will contrast starkly with the existing settlements.

we object to the development of over 2,000 houses at Ockham. Aside from the obvious impact on the Horsley train station and roads the air quality at this busy M25/A3 junction must be assessed prior to any possible plans being implemented or adopted.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Comment ID:** pslp172/4166  **Respondent:** 10967041 / Ashley Brown  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35
The Large Housing Development Sites:

There were over 30,000 complaints and comments and objections to the last local plan sent out for comment yet GBC have hardly changed any of this latest plan to reflect these, even when the 2000 houses ridiculously tabled for Wisley airfield was rejected by councillors; yet this is still in the plan!

I object to the inclusion again of the proposal for 2,000 houses and other development in Green Belt at the former Wisley Airfield

This is just about DOUBLING the size of the horsley’s with absolutely no new infrastructure. The current roads FLOOD regularly, the roads are terrible to drive on, the drainage cannot cope, there is no real transport links, schools, doctor’s surgeries are full. All of this against a plan which proposes taking the villages out of the green belt for no other reason than concret ing them over. Planning regulations do not allow for this except in EXCEPTIONAL circumstances and taking the villages out of the greenbelt to build on them is not a valid reason.

I OBJECT to the number of cars that would obliterate the local roads, using an average of 2 cars per house this is nearly 6,000 extra cars in a village with extremely poor roads, drainage, infrastructure. The plan makes no provision for improvements.

I OBJECT to the plan on the grounds of the level of pollution introduced by these extra cars, houses etc.

I OBJECT to the plan on the grounds of the infrastructure will increase flooding where we already have flooding every year.

I OBJECT to the plan on the grounds that there is no provision for extra school places within the Horsleys in the plan despite swamping us with extra houses.

I OBJECT to the plan on the grounds of the lack of facilities proposed such as doctor’s surgeries, public transport.

I OBJECT to the plan on the grounds of transport - no real increase in public transport and the train into London each morning is now already almost full with standing room only from a few stations from Horsley.

I OBJECT to the plan’s use of the projection for the number of new homes required per year. The figure is based on invalid statistics and almost twice the ONS projection so must be revised down. For example the ONS figure already uses economic growth in it’s figures and affordable housing is over estimated based on GBC’s own existing policies.

GBC has decided to pursue AGGRESSIVE EXPANSION and Forced Growth and the residents DO NOT SUPPORT THIS.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Development of over 2,000 house village at Ockham (former Wisley Airfield) - The impact on the Horsley villages of such a huge mixed housing, retail, commercial, traveller & schools development, under 2 miles away, would be enormous. The plan also includes extensive developments at Burnt Common (400 houses & commercial developments) & Gosden Hill Farm, Burpham (2000 houses & mixed use developments).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5969  Respondent: 10967489 / Jenny Jackson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT for the following key reasons:

- The plan which proposes over 70% of new housing be built within the Green Belt. There are brownfield sites within the urban areas which can easily be regenerated, without encroaching on Green Belt land which is currently protected

- Regarding the removal of the former Wisley Airfield from the Green Belt – this site is part of the ‘lungs’ between north Surrey and London introduced following the second world war, in order to ensure public health safety to the people of London as well as those living in north Surrey. Permitting this development will serve to create an urban corridor stretching from London to Guildford, when no exceptional circumstances have been established that warrant removal of the land from the Metropolitan Green Belt.

- Including 693 houses per year (double original estimates) represents a significant deviation from earlier versions of the plan without any clear rationale other than seeking to turn Ripley, Ockham, Send and E & W Horsley into an extended London suburb. Where is the transparency?

- When taken alongside other proposals for this area, this plan contributes to over 23% of new housing - across the borough – when currently local infrastructure creaks with only 0.3% of the total population of GBC. This feels like punishment to residents for no apparent crime, other than choosing to live in rural environment.

- This plan will place unimaginable stress on transport, local roads and road safety. In particular I object to:
  1. The belief that more people will walk or use bicycles. The roads are already unsafe, lack street lighting, in part isolated, and so local residents are forced to rely on cars as reliable bus routes, and railway stations are too remote to make either option realistic. I challenge the Planning Committee to visit the area on bicycles, rather than the minibus used for your site visit prior to the April Planning meeting (which you will recall resulted in lots of time wasted due to the normal congestion on our roads – as a result of local traffic, HGVs seeking to avoid congestion on the A3 and M25 and the usual farm traffic – a requirement of rural life).
  2. In view of the above, local residents already are forced to rely on private cars in order to live from day to day.
3. Local roads are already becoming wider as a result of encroachment by HGVs and large vehicles onto roadside banks and hedges, resulting in pot hole damage. British weather causes flooding due to the low lying area and the proximity of the water table – are their plans to address this? Pot holes go for many months unaddressed, and are then filled often during rainy weather, resulting in subsequent damage when the temperature falls – year on year.

4. Your own investigation confirmed that an increase of 2068 homes would result in an estimated 4,000 additional cars on the roads.

5. The danger such increases will cause is directly to the very people you are identifying will take to the roads in great numbers – walkers and cyclists.

6. Again, your own investigation prior to rejecting the access plans to the Wisley Airfield site identified major problems due to anticipated additional vehicles leaving and joining both the A3 and M25 and the Ockham/Wisley interchanges. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. The plan for expansion at Wisley alone will increase visitor traffic.

7. To put together all the proposals – RHS Wisley, the proposed Wisley Airfield development and Garlick’s Arch with massive implications for traffic in the surrounding area, the wider implications in the Plan are nothing short of negligent – Junction 10 and the A3 southbound are already gridlocked for some 3-4 hours on many days each week. Perhaps a heliport should be included – the hardstanding after all is already on the Wisley Airfield site?

8. Whilst the proposal to provide additional local public transport services sounds good on paper, buses cannot move faster than other traffic which currently blocks the roads. Parking at Woking, Effingham and Horsley stations is usually at capacity and will be unable to cope with the increased passenger traffic.

- This plan includes (to reduce necessary footprint) urban-style buildings up to five storeys high and a population density higher than most London boroughs – this is out of keeping and will be a blight on the local countryside.
- Insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area, Sites of Special Scientific Interest and Site of Nature Conservation Interest.
- Air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. The Plan will cause irreversible impact in habitat for wildlife.
- You have had repeated evidence that many of the proposals in the Plan are contrary to the wishes of local communities. These proposals will inevitably receive opposition – and notably, are generally proposed to take place in areas where Councillors DO NOT live.

In conclusion, I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of intensive investigation and consideration the Planning Application submitted by Wisley Property Investments Ltd was unanimously rejected by the Planning Committee (which I was present at) on 8th April 2016 on the recommendation of GBC Planning Officers, who presented all of my concerns and more.

These serious concerns also been presented by authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to object in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2017) and my letter focusses on the developments on the former Wisley Airfield site – and the impact this will have on the immediate local area including Ripley and Ockham. I was present at a Planning Meeting earlier in the year when the Planning Committee unanimously accepted a review by one of their own officers, of the development proposals because of the complete lack of appreciation of the impact on local roads, and travel, and resulting impact on the village of Ripley, and RHS Wisley.

I note policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

My objections are as follows:

1. This is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees. The implication is that “consultation” is simply a tick box exercise.
3. I object to the quantity of space allocated for retail use in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.
4. I object because there is a complete denial of the cumulative impact on each of the proposed housing settlements including that on the Wisley Airfield site, on existing local villages and residents.
5. I object because it is adjacent to the most popular visitor attraction in the south-east, the RHS gardens at Wisley where visitor numbers are expected to increase by 500,000/annum.
6. I object because the associated traffic increase from the RHS has not been taken into account.
7. I object because the regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. I object because the identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station and its impact on Wisley Village, Pyrford and West Byfleet.
9. I object to the increased area of the Wisley site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
10. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills Area of Outstanding Natural Beauty (AONB) will increase the negative impact of the views from the AONB.
11. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
12. I object to the removal of additional 3.1 hectares from the Green Belt without any justification.
13. I object because it is further from railway stations than any other identified strategic site and this is mitigated by the assumption that an improved local bus service will be provided ‘in perpetuity’.
14. I object because it is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the county (J10).
15. I object because local roads are at capacity particularly when the Strategic Road Network (SRN) M25 Junction 19, and A3) are rarely free-flowing (accidents, diversions, roadworks etc).
16. I object because any public transport provision such as bus services to and from Guildford to Ripley (currently running a minimal service) will have to extend their route and negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
17. I object because any public transport (bus services) provision to West Horsley (necessary if Effingham Junction railway station is considered as suitable to alleviate the burden on local road networks) will impact the safety of the local road network as the current lanes (many with listed buildings as homes, and farmland along them) are not wide enough to accommodate PSVs. Also, sustainable methods of travel such as cycling and walking which are being promoted at the same time, are known to be unrealistic and unsafe. Have our local councillors already forgotten their journey in a mini bus when viewing the site earlier this year?
18. I object because there is insufficient employment available on the Wisley site so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
19. I object because the lack of provision for retail, health and education infrastructure is predicated on the numbers of properties occupied – this is unrealistic and can too easily be renegotiated if housing remains unsold.

20. I object because the changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.

21. I object because opportunity (3) should be common to all sites and is not unique to this site.

22. I object to the change in Green Belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

23. I object to para 21 which “limits” development in flood zone 2 and 3. Development MUST be excluded in flood zone 2 and 3 – many local residents will testify to the impact this already has on local homes.

24. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

25. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

26. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

27. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

28. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

29. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

30. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

31. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

32. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

33. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

34. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

35. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

36. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

37. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6804  Respondent: 10967521 / Jayne Way  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farm Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:
1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the disproportionate allocation of housing in this specific part of the borough. Indeed over 23% of the Plan's new housing is proposed in the immediate localities my home in Ockham, together with Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that currently only has 0.3% of the population of GBC).

4) I object to the massive threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The Plan calls for a village of 159 dwellings (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2000+ dwelling development, with urban-style buildings up to five stories high and a population density higher than most London boroughs.

5) I object to the very seriously detrimental impact on the local infrastructure which in my view will be massively overwhelmed by the Plan. Roads, stations, schools to name but a few are completely inadequate to cope with the projected increase in demand.

6) I object to the fact that the proposed Plan does not meet the stated needs and desires of local communities, as evidenced in the Ockham Parish Plan. We local residents enjoy living in Ockham because of access to countryside and clean air as well as peace and quiet afforded by wide open spaces. Over 90% of residents want both the historic features of the village maintained and our village's green spaces, including the FWA/TFM, protected.

7) I object to the continued inclusion of a site (the former Wisley Airfield - now known as Three Farm Meadows) - where the planning application has been unanimously rejected by GBC’s Planning Committee.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity?

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected. 10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

3) I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2579  Respondent: 10967841 / Ian Pearce  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   o The associated traffic increase from the RHS has not been taken into account.
   o The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

1. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
2. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
3. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
4. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
5. Opportunity (3) should be common to all sites and is not unique to this site
6. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
7. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
8. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
9. I object to the removal of additional 3.1 ha from the green belt without any justification
10. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
11. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

12. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

13. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

14. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

15. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change.

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

Dear Sirs,

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the inclusion in the plan of:

1. a) The Former Wisley Airfield, now known as Three Farms Meadows – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings, and

1. b) The Paddocks, Rose Lane, Ripley – Allocation A57 – the site is allocated for 4 Traveller pitches

I object to the draft Local Plan for the following key reasons:

• I object to this version of the local plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas, which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to the Former Wisley Airfield, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural villages of Ripley, Ockham and the blight on properties there. The plan calls for Ockham, a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where GBC’s Planning Committee has already unanimously rejected the planning application.
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I also specifically object to the proposal that 4 traveller pitches be formally established at The Paddocks, Rose Lane, Ripley:
  1. The current occupant has temporary consent until 2018, granted by the appeal inspector in 2015; in conclusion, the inspector wrote

"45. Overall, therefore, I conclude that temporary planning permission should be granted for a temporary period of 3 years. This allows sufficient time for alternative sites to become available and provides accommodation for the appellant and her family in the intervening period."

This summary by the inspector hardly implies an expansion of the site to 4 pitches, and although the policy specifies single family occupancy, this will be impossible to control and multi-family occupancy will result, if not already in place.

1. Policy A57 states: "Bricks and mortar housing, or any buildings capable of being converted to bricks and mortar housing, are not appropriate and will be resisted on this site”. As has been reported, a brick dwelling has already been constructed.

If this policy is realized, the expansion of this sensitive green belt site is likely to continue indefinitely - on the lines of the West End Farm development which we saw in 2009, which in the end was only stopped by private legal action.

I strongly object to the draughted plans for the site A35—Wisley Airfield and site A25 gosden hill farm, as this will destroy the trusted close community installed in Ripley and the surrounding areas and will cause major congestion in the area. 4000 homes is totally inappropriate

Comments on Proposed Submission Local Plan: Strategy and Sites 2016 - Consultation

Policy A35: Site Policy – Land at former Wisley Airfield

I would like to register my strong objection to this policy.

The proposed development will result in approximately 2,100 homes.

Increase in new dwellings of such scale does not only have a serious impact on infrastructure and local amenities, but will also irreversibly change the face of nearby villages like Ockham and the Horsleys, making them akin to towns.

Our current infrastructure and roads are insufficient and are not able to cope with any additional increase in use. As an existing resident, I certainly have noticed pressures experienced by our medical centre and schools, all of which are already stretched to their limits, even under our present number of residents.

To accommodate the increase in population resulting from developing Wisley Airport into 2,100 new homes, new roads, schools, medical centres, drainage and water supplies as well as other amenities would need to be build. However, our surrounding areas are simply not able to absorb any significant additional infrastructure development without being truly destroyed. There is simply not enough physical space.

When considering the full effect of this new housing, the Local Council should take into account and assess responsibly the seriousness of the impact and significant deterioration in the quality of life that would result from this development,
not only for the local residents and the surrounding flora and fauna, but also to those who would move to their new homes in the former Wisley Airport, should this development go ahead.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC)

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No
development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: psp172/2295  Respondent: 10986209 / Richard Green  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
When I moved to Woodfields, School Lane, Ockham, 31 years ago, there was talk about developing the airfield; a neighbour who moved here 40 years ago told me that proposals to develop the site were being discussed even then. At the last Council meeting I attended the most recent proposals were rejected by the Councillors UNANIMOUSLY! But were still left in the Local Plan. So what is it that you don't get? For the following reasons that you and I are sick to death of reading and writing about the site is UNSUITABLE for development and this has been recognised by the planning authorities for 40 years that I know of!

I require confirmation that all of these comments together with all my previous comments are passed to the Inspector. I reserve my right to appear at the inquiry and present my evidence.

I continue to object to the inclusion of policy A35, Three Farms Meadows, Wisley Airfield, or whatever you like to call it, in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consulters.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</tbody>
</table>
It is adjacent to Elm Corner Wood and Hunts Copse both Sites of Nature Conservation Importance and in the proximity of a Thames Basin Heaths SPA of Ockham and Wisley Commons Site of Special Scientific Interest. The development would be a disaster for the area 2000 homes would be 6000 people, 12000 feet destroying the area.

The council has already rejected the development proposal for the site for the following reason:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).
- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

But as reported in the national press the CEO of the Cayman Island Company (which have three major player from the Tory party including an former minister connected to it) who owns the land at Wisley, made a donation of £100,000 to the Tory party and then the site is back in the local plan. One can only wonder how this can happen, possible a phone call from central Office to its supports on Guildford Council? The company seem very sure they will get their approval because at the local cinema’s they are showing a short film during the adverts extolling how wonderful the development will be.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5782  Respondent: 10991873 / Trevor W. Orpwood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft Local Plan for the following key reasons:

• The plan has been based on the intention of adding 13,860 new homes to Guildford Borough over the 2013 - 2033 period, this represents a massive increase of 25% of the housing provision in just 20 years, the need for this huge increase has not been explained or justified, as neither has the basis on which the SHMA has been calculated. It is also the case again without justification that GBC has enhanced this figure to a level which is 70% higher than the official national estimates for population growth than the Borough. The GBC has no mandate from its residents to provide this additional level of housing and therefore has completely departed from the ethos of “localism” in planning policy.

The effect of Brexit will be to reduce the demand for housing nationally and the ability of the building industry to provide it, making GBC’s figures even more extraordinary.

• I object to a plan which proposes that over 70% of the new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are for no good reason being forgotten and ignored.

• I object to the disproportionate allocation of this new housing in this particular part of the borough which means that over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt, and its inclusion in the Local Plan as a site suitable for development. This site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. The proposed removal of this site from the Green Belt by GBC only a few months after Wisley Property Investments Ltd.‘s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers is totally hypocritical, lacking in logic and integrity, and would seem to indicate the existence of an unduly coercive influence by the associated developers on some council members.

From what I have seen of the Local Plan Guildford’s planners, councillors and external consultants seems to have forgotten (or not be aware of) what gives the Borough and Surrey as a whole its unique character and the attributes which currently make it one of the most desirable places in the country to live in.

The first of these is of course that a good proportion of the Borough and indeed the county is countryside protected by the Green Belt, a piece of planning legislation which has given London its “Lungs” and prevented an unrestricted urban sprawl envied by most of the world’s capital cities.
The second is that quintessential element of the British countryside, small villages dotted about the county each with its own character, vernacular architecture, church and village green and individual communities.

The third attribute is the space that we enjoy by choosing to live in a rural and not an urban environment.

The proposals shown in the Local Plan spell out the destruction of what causes this part of Surrey to be unique and will devalue the quality of life of many of the Borough’s residents particularly in the Horsleys, Ockham, Ripley and Send.

- For these reasons I also object to the proposed extension of the Settlement Boundaries of the Horsleys.
- I also object to the Local Plan proposals for any significant increase in the population of the Horsleys, Ockham, Ripley and Send. Notwithstanding the effect of proposed development in these villages the provision of over 2,000 homes on the Former Wisley Airfield will add some 5,000 to 6,000 people to the area and probably 3,000 or more extra vehicles. This new community will need to get to their workplaces and schools and as there is no train station proposed for Wisley Airfield they will have to travel by car either by driving to Guildford or London or to the train stations at Horsley and Cobham. This will involve them accessing the A3 where the 3,000 vehicles would first have to go south to the Ripley/Ockham junction before going east to Horsley Station or north to London and Cobham.

At the present time at rush hour there are often queues northbound between the Ripley/Ockham roundabout and the Cobham roundabout and the addition of a further 3,000 vehicles at this time would cause these roundabouts to seize up and effectively close the A3. Those motorists lucky enough to complete their journeys via the A3 will find that there will not be any spare car parking at either of the stations (where there is no room to extend either the car parking or the platforms) and even if by chance they did find a space in the car park they probably would not find one on the train.

In the villages most of the primary foul water, surface water, electricity, gas, and telephone services are 80 or more years old, close to capacity and near to the end of their effective life. My personal experience of this is that in the six years that I have lived in Ockham Road South East Horsley the electrical supply to my part of the road has failed twice, once for five days and the second time for two days due as the electricity supplier told me, to the age and capacity of the mains cables.

Although new energy saving technologies and elements like sustainable underground drainage systems can to a degree reduce the impact of any new developments ultimately they still have to be provided with services form the existing primary utilities infrastructure which will not be able to cope or be renewed by the monies obtained from the anticipated community infrastructure levies.

Other resources which will be overwhelmed will of course be the local healthcare services (where appointments are already difficult to get) and many will be aware of the near impossibility of parking at Royal Surrey County Hospital. It is also the case that most of the local “country” roads already have difficulty in withstanding the onslaught of potholes following each winter, without the added attrition of 100’s of heavy good vehicles which will be unleashed when any significant development works start.

- I also object to the classification of the East Horsley Station Parade as a designated “District Centre” this is pure artistic licence by the Plans authors, it is just a small shopping parade.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The former Wisley Airfield development

I object to the current plan of developing the Wisley Airfield with more than 2000 houses.

Creating a town, nearly the size of the Horsleys together, will immensly affect the local infrastructure. It currently provides a barrier to outward development from London which once the development is in place will merge villages and bring London much too close.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to continue to register my objections to the inclusion of Policy A35, Three Farms Meadows in the Draft Local Plan.

1. Congestion – road traffic. I object on the grounds that this development has serious issues involving congestion:

   • The site is adjacent to the most conjected road network in the country – Junction 10. The associated traffic of RHS events has not been taken into account.
   • The increased traffic on the route to Woking station has not been taken into account.

1. This conjestion results in increased air pollution which has NOT been taken into account by the plan.
2. This site will be facing the Surrey Hills AONB and will increase the negative impact of the views.
3. There is not sufficient employment available of site – nearly all residents will have to travel to work, resulting in increased conjestion.
4. In Appendix H p. 16 the change in site boundaries are not correctly identified.
5. I object to the development on flood zone 2 and 3 – whilst the plan “limits” the development in these zones, development should be EXCLUDED from these zones – they FLOOD!!
6. I object to the 10% buffer in the housing number. This is not needed.
7. I object to the apparent disregard for the impact of high pollution levels and nitrogen deposition.
8. I object to the extension of the plan period by one year as it has not been identified as a major change.
9. I object to paragraph 22 as it does not reflect as this does not reflect the impact of the buildings on the surrounding area.

Objection to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield

I wish to OBJECT to the draft Guildford Borough Council Local Plan, specifically because of the retained inclusion in that draft of the site at Three Farms Meadows (Wisley Airfield).

Although as a resident of Cobham I do not live within the boundary of Guildford Borough Council, I, my family, neighbours and all residents of Cobham village would be severely adversely affected by any development on this site. I am aware that GBC have a statutory obligation to consult with neighbouring boroughs and take full note of objections.

Our objections are:

1. the Three Farms Meadows (Wisley Airfield) site is a high-grade agricultural site in the middle of Green Belt land. GBC have an obligation to preserve such sites to prevent encroachment and infilling of the Green Belt.
2. GBC's likely future housing needs can be met through development of many available brownfield sites in the borough, which are far better located for access to transport, shops, educational and medical facilities, etc.
3. Although outside the Borough boundary, Cobham is the nearest shopping and transport hub to any development at Wisley. Any such development would overwhelm already critically challenged facilities such as road and rail transport links, schools and doctors' surgeries. A development at Wisley would, for instance, generate further congestion on commuter trains running through Cobham and Stoke d'Abernon station, already
with standing room only at rush hours. There is a desperate shortage of school places in the area, particularly secondary schooling.
4. Road traffic through Cobham would inevitably be increased. Already, traffic on the key A245 link from the A3 causes air pollution well in excess of statutory limits.

Any development in this location will severely damage the environment and quality of life of tens of thousands of local residents. The site should be removed from the GBC local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I am simply amazed that Three Farm Meadows has been left in the Local Plan following the unanimous vote against Wisley Property Investments back in April of this year. It all stinks of foul play and I would be interested to see what the reasons are as the reasons given for the planning refusal are not able to be fixed.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the development of over 2,000 houses at Ockham (former Wisley Airfield)

The impact on the Horsley villages of such a huge mixed housing, retail, commercial, traveller and schools development, under 2 miles away, would be enormous. The plan also includes extensive and inappropriate developments at Burnt Common (400 houses & commercial developments) and Gosden Hill Farm, Burpham (2000 houses & mixed use developments).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2900  Respondent: 11000289 / Nick Bomford  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport providers such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will, therefore, be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The associated traffic increase from the RHS has not been taken into account. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow, unlit local roads on a regular basis.

9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”. Opportunity (3) should be common to all sites and is not unique to this site.

12. I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

13. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

14. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

15. I object to the removal of additional 3.1 ha from the green belt without any justification.

16. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

17. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

18. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

19. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

20. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

21. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

22. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

23. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

24. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

25. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

26. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

27. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

28. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

29. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

30. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

31. I object to the housing number and particularly the fact that the Council have not, as required, used any constraints such as the green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

32. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
4. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Wisley Airfield Policy A35

I OBJECT to the inclusion of Wisley Airfield development in the local plan. No exceptional circumstances have been demonstrated for its removal from the Green Belt. This proposal has also been unanimously rejected by GBC’s planning committee because of grave concerns including traffic congestion, air pollution, lack of suitable public transport, unsustainability, the inappropriateness of an urban style development in this rural area, the major impact on local villages. These are all still relevant objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the draft Local Plan for the following key reasons:
1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCi).
8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.
I write to OBJECT to Amended planning application 15/P/00012 for the following reasons:

**Sustainability:** The site is remote and occupants will rely on the use of the private motor car adding to traffic congestion on both the Strategic Route Network (the A3 and the M25) and local roads which are already running over capacity.

- The application relies on people switching to walking, cycling and public transport. This is unrealistic as it is two miles to the nearest railway station and at least half the route has no footpath. Roads are narrow and unlit.
- There is no spare parking capacity at either of the local stations.
- Sites of this size are required to provide outdoor open space. The applicant has “double counted” the outdoor space with that required for SANGS
- The loss of high quality agricultural land is in contravention of policy.

**Air quality:** The air quality figures are based on an unreliable transport assessment.

- The applicant has not used the DEFRA modelling statistics as required and rather appears used numbers from an unrecognised (and unreliable source)
- Poor air quality is exacerbated in the area by temperature inversions which trap the air. Young and old are extremely susceptible to poor air quality.
- Air quality is not improving as fast as expected, partly due to the excessive emissions (VW et al)
- The impact of poor air quality on RHS Gardens at Wisley and the Thames Basin Heath Special Protection Area (SPA) is already in excess of legal limits.

**Transport:** The transport assessment makes a number of erroneous assumptions and is not credible.

- It is completely unrealistic to assume that there will be a decrease in vehicle movements.
- There is no impact on traffic for the recently added secondary school, nor from the fact that prior to the school being built the children will have to be transported to the nearest available school in Leatherhead – adding to congestion.
- There appears to be no impact shown for the 270 daily bus movements or for the waste lorries or HGV deliveries to the site.
- The TRICS data used for comparison is not a relevant measure: site not comparable with a site in Guildford, nor a site 400m from the centre of Redhill, nor one on the edge of Staines.
- The traffic counts bear no relation whatsoever with counts submitted to Guildford or to Woking borough councils in support of other large development projects.
- The modelling in the Transport Assessment at 7 junctions close to the site bear no relationship to the daily experience of residents, evidencing flawed modelling
- The number of daily trips is understated in the region of 1000 vehicle movements.
- Additional traffic will have a negative impact and cause irreparable damage to historic houses and other buildings in Ockham/ Ripley/Downside and further afield.
• If allowed, the impact of the additional traffic may prohibit other developments further south on the A3 or indeed those needed by the RHS

**Appropriate development:** The site is in the Green Belt in a rural location, hemmed in by the A3 to the west, the TBHSPA and the M25 to the north and the Conservation area of Ockham Village to the south.

- Green Belt boundaries can only be changed in the local plan process and in exceptional circumstances which have not been demonstrated
- The site is not big enough to provide satisfactory living standards even for “affordable housing”.
- Four and five storey buildings are not appropriate in the rural environment nor on an elevated site.
- Residents will be crammed in with little outdoor space, a noisy location, with very poor air quality. The density of housing proposed is similar to that in Islington.
- The site is clearly visible from the Surrey Hills AONB and as a result it will have a negative impact on views to and from the AONB.

**Thames Basin Heath SPA/SSSI/SNCI:** The impact of 2,068 houses on the environmentally sensitive TBHSPA cannot be mitigated. Damage will occur to the habitats of the protected and endangered rare species (including skylarks, nightjars and many others on the RSPB red list) in contravention of the EU Birds Directives and Habitats Regulations

- The siting of the proposed Suitable Alternative Natural Green Space (SANG) adjacent to the SPA will only increase visitor numbers causing further damage
- Part of the SANG is in a designated flood plain
- Para 119 of the NPPF “presumption in favour of sustainable development” does not apply where development requires assessment under the Birds or Habitat Directives
- It is impossible to state without doubt that the mitigation proposed will prevent damage to the SPA particularly in the light of inadequate traffic/air quality reports.
- There are likely to be over 700 dogs and 700 cats living on the proposed development. These will be a constant threat to ground nesting birds on the SPA and cannot be mitigated by one warden working a normal working day.

**Impact on the local area:** The additional 5,000 residents is the equivalent of almost doubling the population of East and West Horsley combined. This increase in local population will impact:

- Light pollution, noise, traffic and infrastructure which has been gravely underestimated and proposed mitigation measures are totally inadequate
- The cumulative development in the borough and in the neighbouring boroughs of Woking, Waverley and Elmbridge per the objections from both Elmbridge Borough Council and Woking B C
- The water table and flooding in the area. It appears that no impact assessment has been done relating to the loss of agricultural land which currently soaks up a significant volume of rainwater.
- Listed buildings adjacent to it such as Yarne, Bridge End House and Upton Farm
- Via closure of a number of local roads coupled with an increase in traffic will affect a large number of road users from Cranleigh to Cobham and everywhere in between

**Inaccuracy of the documentation:** There are factual errors in the documentation

- Highways England have recommended that the proposal cannot be determined due to the applicants failure to provide traffic data in the format required
- There are a number of misrepresentations in the paperwork e.g. nine stations within 5 miles – this is however “as the crow” flies – only Horsley and Effingham Junction are within 5 miles by usable road from the middle of the development
- The applicant’s description of the site as brownfield is a gross over-simplification. 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remaining runway, a habitat for rare flora and fauna, (14ha) has never had buildings. The remainder of the site (55%) is high quality agricultural land.
Other: This site is not deliverable within 5 years due to problems with sewerage and water capacity, outlined by Thames Water & the OCK DVOR air traffic control beacon which limits development until 2022

- No very special or exceptional circumstances exist - Alternative sites exist
- The proposal includes the site SCC safeguarded for waste under the Surrey Waste Plan
- The site is not listed for development under the existing 2003 Local Plan
- There is not enough land to provide a sustainable community based on GBC’s own parameters
- There is no update at all to the Heritage study despite the significant Bronze Age haul found in Ockham village in May 2013 and the likelihood of further remains on the site.

I trust the Council will find this useful, in their deliberations

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am strongly opposed to development of Site A35, former Wisley airfield. This site is a large area of current Green Belt which provides protected open space near the M25 and is a barrier to outward development from London. Creating this new settlement would cause irrevocable harm to the Green Belt and environment. It would also overwhelm local roads (from a traffic perspective) and local facilities/services (shops, health centre, railway services, schools). I am appalled at the inclusion of this site within the Local Plan as it was subject to a recent planning application (15/P/00012) which was unanimously rejected by the Planning Committee.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I also object to the proposal to build houses on the former Wisley Airfield. When this site was the subject of a planning application, it was refused by your Councillors without reservations. Well done! So why has it been restored as a candidate building site in the local Plan? My objection to building at Wisley is for both environmental and infrastructure reasons which were well articulated at the GBC planning hearing, and which have not been subsequently addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

A3 Corridor Development

- There is a disproportionate number of new homes and associated development on Gosden Hill Farm, which will significantly and adversely change the appearance and nature of Burpham the area, and the north eastern side of Guildford in its entirety.
- The combined developments of Wisley and Gosden Hill Farm represent too large a proportion of the overall Guildford plan developments, bearing in mind that of the proposed number of homes approx. 5,000 homes will be on this side of Guildford (incl about 1,000 homes in Send, Horsley, Burnt Common and Ripley in smaller individual developments).
- There has been no clear justification for the number of new homes to be built in Guildford, plus the consequent need of more employment space. How was this figure obtained? Just telling us that independent consultants were employed is not sufficient.
- The proposed designation of the employment site on Gosden Hill Farm as a Strategic Employment Site lacks any definitive justification, and will lead to increasing commercial development in future years, and thence to increased stress on the local infrastructure. It will further deteriorate the attraction of the local area to the disadvantage of existing Burpham and Clandon residents.
- There is a severe danger of significant loss of Green Belt, and the creation of an A3 conurbation stretching from Guildford northwards to encompass Ripley and Wisley, effectively all the way to the M25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I have attended a presentation at East Horsley Village hall and discussed the impact of the local plan with several of your officers who were there. The only amendments to the rejected Wisley airfield project was a slight expansion of the area with no increase in additional housing – wow. There is an arrogance in this that, despite huge objections and a rejection of the plans by the Planning Office, that they believe they can find a way to push it through. In essence, we don’t give a damn about the local residents. We are the power and you will do what we say.

**Comment ID:** pslp172/3634  **Respondent:** 11010945 / Stephen Gill  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I continue to object to the inclusion of policy A35, Three Farms Meadows (formerly, the Former Wisley Airfield), in the proposed Submission Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the draft Plan because of the constraints applicable to this area of Green Belt and nature conservation protected land, and its physical location. I object to its continued inclusion in the Plan.
2. This is Green Belt, high quality, farmland, a nature conservation area in and of itself, and immediately adjacent to an SSSI and SPA. Conservation area Ockham Village, including many listed buildings, borders this area of land.
3. It is surrounded by narrow, winding, weight-restricted, country lanes unsuited to any increase in traffic – let alone the approximately 5000 cars likely to result from a housing development of 2100 houses, or the heavy construction vehicles likely to be needed - over many years – for its construction.
4. The transport evidence base including the SHAR 2016 Highways assessment report has been criticised by Mouchel for using out of date modelling software and is therefore unreliable, thus making all transport predictions unreliable and unrealistic.
5. The statement that sustainable methods of travel such as cycling and walking would be used for access to and from the site are totally unrealistic. The roads in the vicinity are already dangerous for walkers & cyclists and will be made even more so with the increased traffic that will come from the site.
6. Almost all residents will have to travel from the site to work. People will not walk/cycle on narrow unlit local roads on a regular basis – they will travel by car. This additional vehicular traffic will both make the roads more dangerous for other users and add to the congestion.
7. It has no infrastructure at all - it is Green Belt, high quality, farmland, and therefore has no gas, water, electricity or sewage connections, and no buildings at all. It is also prone to flooding in parts, making drainage from 2100 houses on concreted over land a particular challenge but one which appears not to have been properly considered.
8. It is remote from railway stations and there is currently no public transport that serves the area, and nor is the area suitable for public transport. These are narrow, winding, weight-restricted country lanes.
9. The facilities at the closest railway station are already at capacity, are as the rains during peak hours. The increased demand from the site cannot be absorbed.
10. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs.
11. The site is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The associated traffic increase from the RHS traffic together with the increased traffic from regular events at the RHS have not been taken into account in traffic assessments.
12. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
13. Local schools, surgeries and railway stations/trains are already full, and there are no obvious local employment opportunities for 2,100 households (assuming 2 adults per dwelling, that equates to 4,200 jobs).
14. It is not clear who would want to live in this new dormitory town, remote from employment, entertainment and any form of infrastructure, where the householders would be entirely dependent on their cars.
15. Housing need - and the figures relied upon by the Council – is anything but transparent, despite requests for information about the basis for the Council’s/its agent’s calculations. Housing “need” is a very different thing from the “demand” for housing in Guildford. Despite this, I understand that adjoining boroughs have made very different (and much lower) assessments of their “housing need”. Guildford need to review their methods of assessment for housing need and bring them in line with other neighbouring councils.
16. I understand that Surrey University has planning permission to build, on its own campus, sufficient accommodation for all of its students, but has failed to implement that permission. It should be made to do this, freeing up housing stock in Guildford town centre which by default has all the necessary infrastructure and support for additional housing.
17. Guildford town centre – Walnut Tree Close, for example – already has significant areas of former built/industrial development, again with pre-existing infrastructure in place. Sustainable housing development should clearly be concentrated here.
18. I object to the quantity of space allocated for retail in Guildford town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies in administration.
19. I object to the fact that the Council has still failed to remove the Three Farms Meadows (site A35) from the Plan despite receiving 1000s of objections to its inclusion - from residents and from statutory consultees. There appears to be no clear justification for the removal of one (other) strategic site from the Plan. Why hasn’t Three Farms Meadows (site A35) been removed? What is the justification for the removal of the other site? Three Farms Meadows (site A35) should now be removed from the Plan.
20. I understand that the Council considers that there should be consultation only on the changes it proposes should be made from the previous version Plan. I object to this. Many people will therefore be discouraged from participating in this consultation, and will not appreciate quite how much has changed from the previous version Plan. Moreover, the complexity and length of reports/documents, many of which are not available in hard copy, further discourages debate and participation in it.
21. I object to the timing of this consultation – yet again in the context of the local plan/proposals in relation to Three Farms Meadows, time limits for submission of comments/objections expire during the school summer holidays – once again limiting debate.
22. I object to the fact that there has been no clear explanation from the Council as to why it thinks it is appropriate to have a (limited) regulation 19 consultation. I believe the proposed changes to the Plan are major.
23. I object to the proposed increase in the size of site A35 (Three Farms Meadows) as this now abuts additional heritage assets, including Upton Farm and Bridge End House, further adversely impacting the setting of these buildings and the wider Ockham Conservation Area.
24. I object to the proposed increase in site A35 (Three Farms Meadows) that the proposed change of site boundaries to site A35 (Three Farms Meadows) would entail.
25. I object to the fact that the proposed increase in site area, being on the south side of site A35 (Three Farms Meadows) and facing (therefore) the Surrey Hills AONB, will increase the negative impact of the views from the AONB.
26. I object to the proposed change of site boundaries to site A35 (Three Farms Meadows). Nor are these identified correctly on the plan (Appendix H p16)
27. I object to the proposed removal of an additional 3.1 ha from the Green Belt that the proposed change of site boundaries to site A35 (Three Farms Meadows) would entail.
28. I object to the change in Green Belt boundary to the eastern end of site A35 (Three Farms Meadows), as this now encloses an area of high archaeological impact.
29. I object to the inclusion in the Plan of site A35 (Three Farms Meadows) as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
30. I object to the extension of the Plan period by 1 year – this is a major change and as such this current review
should be of the whole Plan and not just the changes.
31. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly
the damage caused by nitrogen deposition and high pollution levels.
32. I object to the idea – mooted by the Council at one point of this process – that loss of Green Belt land in one
part of Guildford Borough could be “compensated” by the re-designation of other land, in another part of the
Borough, as Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/922  Respondent: 11010977 / Hilary S Foulkes  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

2) Similarly, it makes no sense to remove the Wisley site from the Green The site serves a vital role in protecting against
urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford.
No exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3) It also appears that a disproportionate percentage of the development is being targeted at our bucolic corner of the
borough, notwithstanding the Greenbelt and infrastructure issues.
4) The proposed development of the site would pose a threat to the historic rural village of Ockham and create a blight on
properties there. There would be knock-on negative effects on the small hamlet surrounding Ockham Mill, where I live.
5) There would be very negative effects on transport, local roads and road I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and The development is too
isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000
additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas,
exacerbated by wide vehicles including increased bus and HGV
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the
Jack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and No development
can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on
the A3 south of the site are not due to start until 2019 at the earliest. I already have difficulty exiting Mill Lane
in the morning en route to Horsley. Adding more traffic to the Ripley exit roundabout will make it impossible
for me to exit.
6. The lack of suitable public transport. The local rail station of Horsley cannot cope with the proposed increase in
passenger traffic and car parking is already at capacity. I use the Horsley station parking Jot and it's completely
full every day-where are the additional cars supposed to go?

6) Insufficient consideration has been given to the environmental and ecological value of the site, in relation to the
Thames Basin Heath Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature
Conservation Interest (SNI).}

7) I live downstream from the site in a flood-prone location and there has not been adequate attention paid to the
increased flooding risks created by the development
8) Air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted limits. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. I worry about the health of my children.

9) I don't understand why the site has been included after the related planning application has already been unanimously rejected by GBC's Planning Committee. It makes me wonder whether the developer has exercised undue influence on the process, and I have to question the motivation behind the decision to retain this site in the plan.

I ask that the Council reconsider and now, once and for all, remove this site from the Local Plan.

I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the plan to build a town on the site of the former Wisley Airfield, one of the green belt areas on which a large scale development is proposed. This would lead to a great increase in traffic close to the busy A3 road and a very real threat to the beautiful and renowned RHS Garden at Wisley because of higher levels of pollution. The wildlife habitat of the former airfield would also be destroyed and lost for ever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farms Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Green Belt land. There were a number of Election manifesto promises to the electorate which have been ignored in this regard.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. Commuter trains are already at bursting point. The recent addition of two coaches (from 8 to 10) have done little to ease the congestion and it is often impossible to board the Horsley train at Waterloo. Passengers are regularly helped off the train en route because of overcrowding on the inward journey. Even allowing for a small proportion of occupants of the proposed development being commuters would put an impossible burden on the existing services.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two
10) responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces.

Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

11) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

1. I object to policy S2 where it states ‘the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
2. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
3. 26 I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
4. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations. There should be a clear statement as to how this has been allowed to happen.
5. I object to the extension of the plan period by 1 year as it has not been identified as a major change
6. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
7. 18 I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A Regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes. What is being done in this regard?
8. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
9. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
10. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
11. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building. All the arguments with regard to conservation in the area apply.
12. 8. I object that the changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
13. There is insufficient employment opportunities on the proposed site. All residents will therefore need to travel to work by public or private means.
14. Additional visitors to the RHS Wisley have not been included.
15. Local roads are at capacity and increased public transport would have to negotiate over already overcrowded SRN. They would be unable to offer a reliable service.
16. The site is further from the railway station than any other proposed site. This station has insufficient trains to deal with increased passengers and a very small car park which is already filled to capacity. There is no scope to increase the size of the car park.
17. I object to the application of new housing on the old Wisley Airfield on the ground that it is the least sustainable strategic site in either version primarily due to its physical location.
18. Its location to the M25 at J10 and the A3 means overloading one of the most congested junctions in SE England.
19. Additional bus services would compromise the safety of those cycling and walking in the area.
20. Reliance on Woking Station is unsustainable. Woking is already at capacity in terms of the station itself and nearby parking.
21. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
22. I believe that opportunity (3) should be common to all sites and is not unique to this site. I object that insufficient consideration has been given to this.
23. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB. What has been done in this regard?
24. I object to the removal of additional 3.1 ha from the green belt without any justification.
25. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
26. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
27. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
28. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
29. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
30. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS. No reasonable explanation has been given for this.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
33. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I therefore consider that this plan is unsound and not fit for purpose and must be rejected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

10. Lastly, I object to the continued inclusion of a site where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. No habitats assessment has been carried out.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
In the wider picture I object for similar reasons to those above to your unsustainable plans for Ockham, Wisley, Ripley. There is simply NO EVIDENCE to support the need for housing on this gargantuan scale, and this proposed gargantuan scale of population growth simply cannot be supported by our local roads, schools and other infrastructure.

1. **Three Farms Meadow site (site A35)**

I object.

The re-inclusion of this site is very disappointing following the public outcry for its previous inclusion and the rejection of a recent planning application.

It should be removed as it is in the Green Belt, less than 15% is brownfield and the former runway has never had buildings on it. The former runway is a Special Protected Area.

The infrastructure can't cope with the increased traffic and pressure on services it will create.

The cost of improving the infrastructure will mean alternative sites will be more viable if included in the assessment.

It is also disproportional to build 2000 homes in a village of 159. It will also have adverse effects on the Horsleys and put pressure on the Horsley station.

Please reconsider and make the appropriate changes in the plan.

7. I object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (M25, J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. The local road infrastructure has had little to no investment in recent years and any increase in traffic will further degrade/destroy the road surfaces and appalling levels of subsidence.
6. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
7. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally impractical and unsafe.
8. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers are likely to increase significantly year on year.
9. The associated traffic increase from the RHS has not been taken into account.
10. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
11. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
12. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
13. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
14. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
15. Opportunity (3) should be common to all sites and is not unique to this site.
16. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
17. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
18. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
19. I object to the removal of additional 3.1 ha from the green belt without any justification.
20. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
21. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
22. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
23. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
24. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
25. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
26. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
27. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
28. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
29. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
30. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
31. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
32. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
33. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
34. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
35. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

36. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

37. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

38. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. This is a blatant bulldozing of the Green Belt Policy
2. The local roads - including the A3 and M25 - already cannot cope with the current traffic - both cars, lorries, buses and bicycles and this plan proposes the addition of thousands more of those.
1. There is inadequate schooling already and these additional dwellings would put further pressure on those in existence.
1. Medical facilities - hospitals, surgeries - cannot cope already so they will not cope with these additional residents and workers
1. There are no pavements throughout the village of Ockham and much of the surrounding villages (e.g. Ripley, East Horsley) to accommodate safely these extra people proposed on the plan.
1. Railway station facilities for parking at Effingham Junction and East Horsley cannot cope with current demands so they will not cope with these additional numbers of cars.
1. The plan destroys the tranquil environment that we residents have had to pay very dearly to be able to enjoy so the plan is unacceptable on noise pollution levels too.
1. Our democratic right to express our feelings against this plan was put to the test and carried forward at a Council meeting, only to be overturned by Guildford Council - that is NOT democracy!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We have lived in Ockham for 35 years, adjacent to the farming land that was known as the Wisley Airfield and which now forms Policy A35 - Three Farm Meadows. We object, once again, to the inclusion of this land in the draft Local Plan on the basis of the following points:-

- Its proximity to already congested roads - A3 and M25 Junction 10 - and the current huge traffic flowing on nearby roads
- Your suggestions of public transport in the area will meet with this existing congestion and even add to it!
- Wisley RHS Gardens already attract massive visitor numbers using cars and coaches and its current extension programme is destined to attract many thousands more. This will intensify congestion
• New residents to Three Farm Meadows will have to add to road congestion to access essential employment as little is available in the local area or in the proposed development

• Your proposal to include Upton Farm in the site will negatively effect its beautiful, historic location. The same applies to the extension of the area you propose as it will negatively impact the Surrey Hills AONB

• The boundaries on the plan are incorrectly identified

• Your plan should not simply LIMIT development in FLOOD ZONES 2 & 3. You should EXCLUDE development there

• You have ignored thousands of democratic objections to the Plan and wasted tax-payers'/residents’ money

• Major adjustments have been made to the Plan so that it does not conform to a Regulation 19 Consultation

• The vast housing number you agree to and we object to drives a proverbial steamroller across key restraints of green-belt, air quality, AONB and other key policies that we residents abide by

• The area around the Plan is already effected adversely by inadequate schooling, train station car parking and medical centre facilities. You plan would dramatically worsen these.

• Policy S2 refers to the Housing Target table amounting to 12,426 but your calculations are wrong as the actual sum is 9,810!

• Finally, your Plan will ruin the existing ambience and quality of life that residents have paid dearly to enjoy and uphold against the odds of your political ambitions. You will ruin many lives, compensate nobody and overturn our democratic rights, all of which you should be ashamed of if not sacked for!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
• Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following reasons:
1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed...
increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

Comment ID: pslp172/3107  Respondent: 11024769 / Sarah Runton  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

The proposal is based on flawed details particularly regarding transport to train stations and the small roads, ill suited to a development of this size. Clandon has an A road through it, Ockham is adjacent to two huge roads that are already severely congested with smaller artery roads of very poor quality and poorly lit. Of all the proposals for a large development it is the least sustainable strategic site identified by the Council because of the constraints on the site and the physical location.

It is also further away from rail stations than any other considered site and uses ‘as the crow flies’ distances rather than distance by road. It is also important to point out that whenever a bus goes through Horsley towards Horsley Towers that any cars passing on the other carriage way often either have to stop or mount the pavement to allow space to pass, severely impacting local safety to residents and drivers.

There is not enough employment opportunities on the site meaning the majority of those working will have to drive to reach their destination or to the local stations. The M25 at this junction is one of the busiest in the country and the A3 is also severely congested at this point during rush hour. A development so close to this area will only exacerbate what is already a severe traffic problem.

There seems to be a disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels. Studies from bodies such as the World Health Organisation clearly outline issues in children’s development in particular in areas of poor air pollution.

There are also numerous inaccuracies. For example in S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound and its assumptions flawed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsley's (of which 65% is allocated to FWA/TFM, an area that at present has only 3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walki The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  1. The increased volume of car traffic . A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  2. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  3. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  4. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local No
development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

1. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

   • I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
   • I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
   • I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
   • I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Officers.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.'s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Wisley Airfield

The inclusion of the Wisley Airfield site for development in the final draft plan does not seem to have had any impact on the number of areas included in East and West Horsley. I cannot follow this reasoning; clearly the Wisley Airfield development would have a significant impact on East and West Horsley, even given the provision of an additional doctors surgery and primary school at the Wisley site. There would in particular be increased traffic on the local roads. I do not believe that the GBC has looked at the width of the Ockham Road North and South and considered the issues of increased construction traffic if all sites are developed and the general increased car usage going forward; the new denizens of Wisley will not stay in the new development for all their shopping, work transport and leisure needs and account must be taken of the additional impact on East and West Horsley. I do not think the new raft plan as it stands reflects this and so is defective. If the number of sites for development in Horsley had been reduced in consideration of the Wisley site being included it would have shown GBC applying some type of rational balance.
6. Wisley

The proposal to build over 2,000 houses on the Wisley Airfield is most alarming:
• it almost equals the total number of dwelling in the villages of East and West Horsley combined, and dwarfs the neighbouring villages of Ockham and Wisley. It would change the nature of this area irrevocably, and not for the better!
• It would take many years for such a huge and sudden increase in population to be integrated into the Horsleys, Ockham and Wisley.
• It would put unsustainable pressure on the existing roads, schools and medical services.

The development needs to include a doctors' surgery; children's play facilities; secondary, as well as primary school spaces; and a railway station.

I do not object to appropriate housing development on the proposed brown-field sites, such as those opposite Bell and Colvill [West Horsley] and the BT land opposite Bishopsmead Parade [East Horsley].

The land abutting Great Ridings Wood in Norrels Drive, East Horsley is valuable in protecting the Woodland Trust land from being encroached upon, and vehicular access along Norrels Drive is restricted.

I therefore appeal to the Council

• to reconsider the plan;
• to reduce the number of homes proposed,
• to protect our green field sites, and to amend the Plan in favour of brown-field or re-development sites

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

I object to the Development of Wisley Airfield on the basis of:

Volume of houses and their occupants - This is a whole new town

According to the Census of 2011, both Horsleys have a combined population of 5,118. 2,000 new houses would have a population, given some single person accommodation and some families of at least 5,000 people. This would swamp the surrounding villages, their roads, health services and schools.

Transport. Our local roads are already overcrowded. The M25 is regularly gridlocked and access to the A3 on a ‘consented direct access’ can only increase the congestion. If each household has just one extra car, this will be an additional 2,000 cars. It is more likely that each family will have more than one car especially since the nearest railway station is only reachable by bicycle or bus rather than on foot.

Increased Air Pollution. Resulting from more vehicles in the long term and many HGVs during construction of the site.

If you require further proof, take the A429 past Jennett’s Park in Bracknell, 1500 houses planned. First opened in 2009/2010, still looks like a raw building site. We do not need 2,000 new houses at Wisley Airfield.

WRONG PROJECT IN THE WRONG PLACE.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposals for over 2000 houses at Wisley.

The existing levels of pollution and traffic congestion will not be solved by adding 2,000 homes and association development to this area. It is too too large for the area given its proximity to already congested roads and too large to be accommodated within the Community. There will be a total gridlock of traffic. Furthermore 2,000 houses will never be absorbed into the existing small villages in this area.

Several applications for this development have been turned down but the GBC Executive refuses to listen to any objection and seems determined to go ahead with this development, even after all the Councillors rejected the last application. The site was returned to the Draft Local Plan within days of this decision. Five storey flats would be an eyesore from all points of the Downs. The site is very visible as it is on a dome of land. At present, the airstrip, which should have been removed after its war-time requisitioning, is not visible among the green fields.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

  6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean *either* major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

• Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Sustainability

The Former Wisley Airfield is within the least accessible part of Guildford Borough, remote from rail stations with poor local roads and lengthy bus routes and, given the proximity of the A3, it is implausible that development would be prove to be attractive and safe for cyclists. The development is too small to be self-sustaining and yet large enough to cause substantial adverse impact.

Deliverability

The site was subject of a recent planning application for a quantum of development comparable to that in the Proposed Submission Local Plan and with a very similar boundary. The application was recommended for refusal and refused unanimously in April 2016. Despite 15 months of negotiation with the applicant, Wisley Property Investment Ltd (WPIL), additional issues of impact on the Special Protection Area (SPA), impacts on the strategic and local highways network, sustainable transport, affordable housing, air quality and education could not be resolved. The failure of the planning application confirms that there is no reasonable prospect that the project can be delivered.

Soundness

The reasons for refusal of the planning application submitted by WPIL and the failure of the applicant to resolve issues for a proposed development comparable to the Local Plan allocation confirm that the allocation is unsound. The allocation i) does not provide sustainable development ii) is not supported by exceptional circumstances to justify removal of the Green Belt designation and iii) lacks realistic prospects of delivery.

I OBJECT to the removal of East Horsley and West Horsley from the Green Belt. The NPPF requires the provision of exceptional circumstances to justify alteration of the Green Belt Boundary. The Council has failed to provide the necessary justification. Therefore, allocations A36 Hotel at Guildford Road East Horsley, A37 land at the rear of Bell and Colvill Epsom Road West Horsley, A38 land west of West Horsley, A39 land near Horsley railway station Ockham Road North West Horsley, A40 land north West Horsley and A41 land south of West Horsley should be deleted as allocations for residential development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

5.Policy A35 (Wisley)
I object to the changed policy A35 Wisley regarding the identified mitigation to address the impacts on Ripley High Street and surrounding rural roads. Traffic will need to pass through Ripley to reach Wisley. My previous objections therefore still stand for this changed policy concerning the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow alias the former Wisley airfield, Ockham) because:
- following huge public objection, Guildford Planning Committee have unanimously refused a recent planning application for precisely this development on 14 separate grounds. However this site has been reinserted in the draft local plan in a deceitful way showing complete contempt for the borough residents. This was done only 24 hours before the planning decision, therefore showing developers they could try again
- there is no need for housing on this site because it is based on the local plan housing target which is incorrect, and inflated and ignores constraints. The SHMA by GL Hearn has been found to be flawed and based on unverified and unscrutinised methodology. The provider of this assessment (GL Hearn) have not revealed their workings by which they produce the “housing need number” on behalf of the GBC. GBC in turn have failed to request this information from GL.
Hearn by not enforcing their Contract of Services with the said GL Hearn, which can be found in the GBC (Appendix 1) Standard Terms and Conditions of Provision of Services—which may be seen on the internet. One must conclude therefore that because of the inability of GBC to inform the consultation process of the information required, the entire SHMA should be disregarded for the purposes of evidence supporting this local plan.
-Policy A35 should be deleted from the plan for all the reasons the proposed development was rejected by the Planning Committee, including:-

-all the reasons given in my previous objection to the site proposed in the draft plan 2016
-it is Green Belt location and no “exceptional circumstances” are given
-misrepresentation of the site as brownfield land. Less than 15% is brownfield, it is adjacent to the SPA and therefore within 400m exclusion zone for housing. The remains of the runway are now a habitat for flora and fauna and never had buildings on it
-proximity to TBHSPA (Thames Basin Heath Special Protection Area)
-proximity to A3/M25 bottleneck area
-absence of adequate traffic data
-further harm to air quality both onsite and nearby
-loss of high quality agricultural land (55% of the site) in breach of national policy
-inappropriate location of over 2000 dwellings within the ancient village of Ockham which only has 159 households
-preservation of Surrey County Council safeguarded waste site
-cost of infrastructure needed would be detrimental to alternative more favourable sites
-damage to neighbouring communities of creating a settlement of 5000 residents equivalent to East and West Horsley combined with all the pollution that would entail namely light, noise, traffic and competition for local amenities and infrastructure
-impact of potential flooding
-failure to evaluate and therefore take seriously the cumulative impact of this and nearby development sites on the area
-I object to this Policy A35 as it would constitute a breach of NPPF law namely paras. 79-90. In particular all of it would be in breach of preserving the openness of the Green Belt (see case law and Boot v Elmbridge Borough Council February 2017). In view of the above in my opinion this policy should be removed from the local plan 2017.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Building 2000 homes on the former Wisley Airfield site is the wrong place to build a new town/village. Where are these people expected to work? Most will have to commute which if by car will add further congestion to the already congested A3/M25 and local roads, not to mention an increase in green house gases and pollution – hardly an environmentally friendly option. If they commute by train which station are they supposed to use? Horsley & Effingham Junction car parks are already over-flowing on week days.

Three Farms Meadow (Ockham)

I object. 2000 isolated houses are proposed there in another disproportionate development. There are many arguments for objecting to this site being in the Plan at all given that a planning application has already been rejected on 14 separate grounds, however the development will have a considerable negative impact on the Horsleys particularly if the promised infrastructure facilities do not materialise, as is often the case under “viability” pressure from developers. This site should never have made it into the Draft Plan published after the recent planning decision. There seems to have been no consideration of the cumulative impact of this site and the excessive development proposed in the Horsleys and further review is required.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings.

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsley’s (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
   7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
7. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
8. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
9. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

#### Policy A35 Wisley – Objection

- The Wisley development of a new village / town with at least 2000 houses, 4-entry form secondary school and employment land will generate large amounts of additional traffic onto the A3. If the slip roads at the A3/A247 junction to relieve the impact of this development on Ripley do get built, traffic on the A247 will increase dramatically and unsustainably.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I am writing to object strongly to Guildford Borough Council’s local plan for housing and development. As a resident of East Horsley I am disappointed by the proposals, these will damage the character of the village.. There are not enough local services to cope with this.

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

7) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

8) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

9) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

It would seem that GBC is taking no notice of the concerns of residents, and has not made any attempt to explain why it feels that re-drawing Green Belt boundaries is justified. We are therefore voicing our strong objection to the Local Plan, which does not solve the housing problem in a way that maintains the charm of our Surrey village.

I continue to object to the development of the Wisley Airfield site including the amendments in the planning appeal. It is ludicrous to require objections to the amendments when there is nothing about the development of this site that is appropriate. The local roads as well as the major roads are a capacity already and it only takes one accident to bring everything for miles to a standstill. The public transport in the area is not adequate nor can it be made to be adequate. RHS Wisley is increasing its visitor attraction and the resulting increase in traffic has not been taken into account. I also object to the fact that the council doesn’t appear to be taking any of the objections previously lodged into account.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of Three farms meadows in the local plan.

The cumulative and accumulative damage that would be caused to all aspects of life in ockham and the local economy would be permanent severe adverse impact.

The community overwhelmingly wishes Three Farms Meadows to be added to the register of community assets in Guildford as identified in a recent questionnaire for the neighborhood plan.

the community in Ockham overwhelmingly and unanimously oppose development on Three Farms Meadows and believe that this local plan has got the Local Plan wrong for the parish of Ockham, wrong for the people of Lovelace, wrong for the villages in the east of the Borough, wrong for the Borough of Guildford, wrong for the neighboring boroughs and wrong for the strategic national assets hosted in the borough on behalf of the people of England, such as the A3, the M25 and the Metropolitan green belt.

I strenuously object to the Local Plan 2016.

Please read the attached document where I have fully outlined my objection.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt, which provides sanctuary for many wildlife species. There is ample brownfield land in the urban areas which requires regeneration, without the need to encroach on protected Green Belt land. The election manifesto promises to the electorate are being ignored.

1. I object to the proposal to remove the Horsleys from the Green Belt. The so called "exceptional circumstances" required before taking this action have not been demonstrated. Estate development would overwhelm the area, and would not be in keeping with the character of this unique area. With regard to the proposed development at the allocated area A39 site would be unnecessary, as this would add to the already dense overdevelopment in the area, causing an urban "sprawl", affecting Horsley's picturesque image, also the proposed access road on Ockham Road North is inadequate, and would create traffic issues.

1. I object to the proposal to remove the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. This planning application has already been unanimously rejected by GBC’s Planning Committee, who cited the same concerns highlighted in this letter.

2. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

5. I object to the huge impact on transport, local roads, road safety and pollution. I especially object to:

* The assumption that the proposed developments will result in a shift from driving to cycling and walking. The FWA development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. There is also another assumption (and the taken for granted) that the other proposed developments nearer to Effingham Junction and Horsley stations will result in a reduction in car traffic. This will not be the case if people are required to travel regularly to areas around Guildford, Woking and the M25.

* The increased volume of car traffic. The proposed development in these areas would result in an estimated 4,000 additional cars on the roads.
* The danger this traffic will be to local cyclists and pedestrians, due to no cycling paths and the lack of pedestrian footpaths, and the space to provide them!

* The increased volume in car traffic will increase unnecessary pollution for residents.

6. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

7. I object to the fact that the proposed Local Plan which will affect the local communities has not been taken into consideration, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

1. I object to the impact the Local Plan will have on the already overstretched primary and secondary school places. The Raleigh School and The Howard of Effingham schools are already both at capacity. Surrey County Council has published no plans for creating further school places for children of all ages.

9. I object to the Local Plan not taking seriously the advice that Thames Water has given to Guildford Borough Council that the current wastewater network in this area is unlikely to be able to support the demand anticipated from all of these proposed developments. The foul drainage system all the way to the treatment works north of Ripley, will need to be upgraded to cope. There are serious concerns about these sites which have also been raised by a broad number of authoritative sources across the UK, including Highways England, NATS and the Environment Agency.

I am concerned about the proposed housing targets which has been allocated to Guildford Borough and the South East in general. I appreciate that new homes are needed, and that is the plan up and down the country, but the greenbelt is meant to provide a limitation on the inexorable growth of London. Keeping the greenbelt is so vital and beneficial for all, especially for future generations, to enjoy. I really hope that all brownfield sites take all priority in all areas, before the greenbelt is ever considered.

I trust that these objections will be fully considered and the Allocations at the Former Wisley Airfield, A35, A37, A38, A39, A40 and A41, are removed from the Guildford Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Having studied the submission plan, I find it is unsound due to the large number of errors in the plan due to the poor quality, considerable lack of transparency/ clarity in the evidence, and the inaccessibility of evidence for those who are not able to open the huge files being sent due to poor internet connections.

I require confirmation that all of these comments together with all my previous comments are passed to the Inspector. I reserve my right to appear at the inquiry and present my evidence.
I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for the reasons listed -:

1. It is the least sustainable strategic site identified in both this version and the previous versions of the plan because of the constraints on the site and the actual location.

2. It is further from railway stations than any other identified site.

3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

4. Local roads are already at capacity especially when there are roadworks, diversions etc on the SRN.

5. I object to the transport evidence including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable

6. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

7. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

8. Any public transport bus services provision to Horsley will hugely impact the safety of the local road network as the winding, partly unlit lanes are not wide enough to accommodate PSVs. The assumption that people will walk or cycle on a regular basis on these lanes is unsafe and unreasonable.

9. There is no evidence of sufficient employment available on the site, therefore almost all residents will have to travel to get to work.

10 The failure to address the impact of increased traffic does not address travelling to Woking rail station.

11. I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

12. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

13. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

14. I object to the removal of additional 3.1 ha from the green belt without any justification

15. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

16. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

17. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

18. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

19. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

20. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
24. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

25. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

I consider for all the reasons listed above that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4004  Respondent: 11047329 / Hazel Corstin  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object without reservation to the GBC Local Plan in its entirety.

But first, I must comment that I think the cynicism displayed by the Council in turning down the Wisley Airfield development proposal and putting it back in the Local Plan the very next day shows a complete lack of integrity and destroys any faith one might have had in the Council.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt. Election manifesto promises to the electorate are being ignored.
2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
4. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the proposed development of 2000+ houses and associated infrastructure, essentially a new small town, at Wisley Airfield, site A35. This is predominantly farmland, and the access would be onto an already gridlocked A3. Even the provision of a proposed new junction on the A3 at Garlick's Arch, if built (see above), being some distance south of the proposed development would be unlikely to alleviate the problem, however much the Council hopes it would. It seems clear the Council is running scared of the developers here. They are a nebulous company based in the Cayman Islands. They will however have the money to fight the refused planning permission. The Council clearly wants a reason to grant it. The problem again however, is that as indicated before, there is no clearly demonstrated need for homes for 5000 people at this location. Ockham, the nearest village, or more appropriately hamlet, is very pretty, indeed unspoilt. It would be utterly overwhelmed by this monster. Whilst this was the Vickers development airfield, the only parts of this that could be said to be industrial and are the runway and the hangers. The hangers are long gone, and the great majority of this site is productive, high quality farmland. Development here is utterly inappropriate.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO POLICY P4 (FLOOD RISK AND WATER PROTECTION):

Flooding across the country last winter clearly demonstrated the danger of overdevelopment and pressure on local drainage systems. I have concerns that building this number of homes, with much high density development, will lead to flood risk in the local area.

The proposed development in the Horsleys and the Three Farms Meadows (site A35 - the former Wisley Airfield) is unsustainable and will lead to environmental issues both at a local level and in adjoining areas downstream.

The huge scale of proposed development at A35 - Three Farms Meadow will have a huge impact on Ockham, the Horsleys and other surrounding communities. The scale of development will change the nature of these villages irrevocably, creating in effect a new town in a protected green belt area and overwhelming the local amenities, infrastructure and character. The draft Plan has failed to provide substantive evidence of a specific and defined need for large scale high density social housing in the local area.

In conclusion, I strongly object to its proposals as referred to above and believe that the proposed development would seriously detract from the very special character and nature of the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4412  Respondent: 11053889 / Claire Handley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Finally, I STRONGLY OBJECT TO POLICY A35 (WISLEY AIRFIELD) this proposal should be rejected for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties. There are no “exceptional circumstances” which can justify building on the Green Belt and destroying this area of natural beauty. The Council have sought to misrepresent the site as brownfield – but only 15% of it is developed. The proposals would irreparably damage the rural feel of Ockham and surrounding villages and lead to the creation of a small town – but with no opportunity for commensurate extension of infrastructure and development of necessary supporting facilities (or employment opportunities). This makes the proposals wholly unsustainable – without adequate provision for transport facilities, wastewater capacity and runoff, local schools, medical and other amenities, road capacity and flood prevention.

The development would create an isolated urban development but with none of the benefits of urban living and destroy the rural community. The proposed housing density is excessive when compared with existing development in the villages and the new developments would not blend with the existing developments.

The draft Plan fails to address the collective and hugely destructive impact of this site on a small part of the borough which lacks the infrastructure (particularly transport) to support it. It is disappointing to note that the total amount of new building is totally out of scale with the planned development elsewhere in the borough, especially less sensitive urban areas which are not protected by Green Belt.

The development is unsustainable for all of the reasons outlined above. Ockham is a beautiful, very rural village and the proposed development will utterly destroy the village which will be subsumed in a “new town” urban sprawl. The impact of this development on all neighbouring communities cannot be underestimated. The Council have failed to demonstrate any collective impact assessment on the surrounding area and communities.

I object to the proposed development of Wisley Airfield, particularly in the light of the recent decision by Guildford Borough Council to refuse the planning application. This should not have been included in the revised plan and provides further evidence that the entire plan is flawed and will cause massive destruction of the local environment. The impact on local villages particularly in regard to traffic in Ripley will be severe.

I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):

Once again, there have been no exceptional circumstances presented for development on the Green Belt. Development of the site would contribute to the encroachment of the London urban area into the countryside. Additionally, the area is not a brown field site as stated, only 15% of it is brown field, and the majority of the land is agricultural land.

The development is close to the A3 and M25, and will contribute to unacceptable air pollution levels and an aggravation in traffic jams at A3 roundabout and M25 Junction 10. There is no existing public transport and so car transport will be required for everyone on the development with access either from the A3 via the junction with the M25 or from to inadequate narrow lanes. No proper traffic data has been provided.

The housing density is far too great, with over 2,000 houses that will swamp and destroy the Ockham conservation area.

The development would have a major impact on neighbouring villages, especially Horsleys. No assessment has been made of collective impact on area of this and 6 Horsley sites.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I have lived in Ockham now for 10 years, and have lost track of the number of letters I have had to write to you in objection to large scale development on this site. You seem hell-bent on ruining a part of the greenbelt, planting a totally unsustainable development on the Greenbelt and effectively eliminating the historic hamlet of Ockham. I am particularly distressed to see that since this proposal was last dismissed by the Planning committee, the land has now expanded and moved even closer to the residents along Ockham Lane (including our own house).

In summary then I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

Policy A35 – My Objections

79) The Wisley development of a new village / town with at least 2000 houses, 4-entry form secondary school and employment land. The development does not meet the NPPF requirement, namely that developments that generate significant movement will be located where the need to travel will be minimised and the use of sustainable transport modes can be maximised. The provision of slip roads at the A3/A247 junction to relieve the impact of this development on Ripley will have potentially severe effects on the A247.

80) My objections to increased traffic on the A247 through West Clandon are outlined more fully elsewhere but include: (i) although notionally an A-road the A247 is narrow and winding in parts and is most unsuited to carrying additional traffic, (ii) the A247 has a single non-continuous footpath in several sections, (iii) a care home, a church car park and a pub, as well as very many houses, are located on the opposite side of the road to the only footpath, making pedestrian access difficult for people moving about the village on foot, especially for elderly and disabled people; (iv) the railway station and other commercial and residential properties have poor sight lines for access onto the A247 and difficulties in accessing the A247 from these properties will be exacerbated by increased traffic volume (and fewer “gaps” between cars); (v) the A247 is popular with cyclists and because of its narrow and winding nature the potential for accidents that additional traffic will cause is clear.

POLICY A35 (WISLEY AIRFIELD) – I object. The Planning Committee has only recently rejected a planning application for an identical proposal, on 14 separate grounds. It was included in the plan just one day before this happened, showing that this policy is biased in favour of the applicants concerned. It may be no coincidence that these investors had already been given months of extra time to refine their planning application. It is probably also not a coincidence that they have close Conservative Party links with the council. This smells very bad.

The policy fails to present any “exceptional circumstances” for developing this site, which is 85% greenfield, not brownfield as often stated. Other objections include:

- The loss of good agricultural land.
- The excessive housing density involved.
- The fact that over 2,000 houses will swamp and wreck the Ockham conservation area, with harm to listed buildings.
- It disregards the conflict with SCC who also want to use the site for a waste facility.
- It is too near RHS Wisley and Thames Basin Heath SPA and will harm both.
- So will the proposed SANG, which is next to the SPA and would mean dogs and cats disturbing wildlife.
- There is no existing public transport and the train stations are miles away.
- To get there you have to use very narrow, flooded, unlit, winding country lanes with no footpaths or cycle ways.
- This would make the development dependent on private cars (about 3000-4000 of them). But there is no proper data for traffic volumes.

- The extra congestion will certainly make the traffic jams at the A3 roundabout and M25 Junction 10 even worse.

- There will be a dangerous increase in air pollution, as the Wisley Action Group have submitted.

- This is also clay land and the high groundwater table and poor surface drainage not considered either for site itself or for downstream areas in the River Mole basin, which already flood.

- The policy does not consider the major impact on neighbouring villages, especially Horsleys where hundreds of new houses are also proposed. The aggregate impact on infrastructure is not assessed.

Wisley Airfield

The proposal for 2000 houses proposed for Wisley Airfield site has been refused by the Planning Committee 2016. This proposal remains on the Guildford plan. The removal of more Green Belt in order to build is a huge concern. The increased use of highways together with the problems of the infrastructure within Horsley not being capable of withstanding the increased numbers this would inevitably be a worrying threat in both the short and the long term.

**Comment ID:** PSLPS16/6438  **Respondent:** 11078337 / Giselle Hampton  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

*Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )*  

The very fact that the Plan has identified major highway improvement requirements and the necessity of a significant public transport bus service on wholly inadequate rural roads indicates the complete impracticality of this proposal. The infrastructure works that will occur as a result of the Wisley airfield site development indicate the disruptive and inappropriate nature of this proposal.

The A3/M25 section of highway is already heavily congested at peak times. The increased traffic levels arising from the proposed development would be intolerable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPS16/6443  Respondent: 11078337 / Giselle Hampton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We are adamantly opposed to this proposal. The creation of what is effectively a new town in the middle of the Green Belt close to existing heathland and extensive open space is completely contrary to everything that the Green Belt stands for. The scale of the proposed project is massively disproportionate and as already pointed out will place severe burdens on road infrastructure.

The inevitable traffic increase will completely change the nature and character of Ockham village. It will also impose create excessive demands on the nearby stations of Horsley and Effingham Junctions where car parking is already under pressure and where car access is not straightforward. Other local resources such as schools and local health services will also inevitably come under pressure from such a sizable development. It is also worth mentioning that constant reference to the site as being a former airfield seems to seek to imply that any development is taking place on previously developed land. As any visitor to the site will appreciate this site remains primarily agricultural.

It is only the concrete runway, which should have been torn up on closure of the site as an operating airfield after a short period of use, which hints at any form of previous development. The developers constantly overplay this idea of the land being previously developed and it unfortunate that the draft plan does not call out the primarily greenfield and agricultural nature of the site.

We would like to take this opportunity to register our support for the Wisley Action Group's stance on this development and would entreat the Borough to reconsider this aspect of the draft plan.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I have lived in West and East Horsley since 1984 and object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

4. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

5. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

6. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I have the following objections to the proposed development at Three Farms Meadows, Wisley, and to the Guildford Borough Council Local Plan. Please confirm that all of these comments together with all my previous comments have been passed to the Inspector.

1. I object to the inclusion of Three Farms Meadows in the draft Local Plan for a number of reasons including:
   - It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
   - It is further from railway stations than any other identified strategic site.
   - It is close to one the most congested junction in the country (M25 Junction 10).
   - Local roads are at capacity particularly when the SRN is not free-flowing.
   - Any public transport (bus) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs.
   - It is adjacent to the most popular visitor attraction in the south-east, RHS Wisley, where visitor numbers are increasing every year.
   - There is insufficient employment available locally so that almost all residents will have to travel to work.

2. I object that the increased area, being on the south of the site facing the Surrey Hills AONB, will increase the negative impact of the views from the AONB.

3. I object to the removal of additional 3.1 ha from the green belt without any justification.

4. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

5. I object to the fact that the Council has failed to remove this site from the local plan despite thousands of objections from local residents and statutory consultees.

6. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A Regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

7. I object to the extension of the plan period by one year as it has not been identified as a major change.

8. I object to the inclusion of a 10% buffer in the housing number over the plan period as unnecessary.

9. I object to the housing number and I believe that the housing number is poorly based and open to legal challenge.

10. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development.

I object to the Council wasting the time and money of tax payers and local residents by not following due process and ignoring previous representations. I consider, for the reasons listed above, that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I also object to the Local Plan proposals for any significant increase in the population of the Horsleys, Ockham, Ripley and Send. Notwithstanding the effect of proposed development in these villages the provision of over 2,000 homes on the Former Wisley Airfield will add some 5,000 to 6,000 people to the area and probably 3,000 or more extra vehicles. This new community will need to get to their workplaces and schools and as there is no train station proposed for Wisley Airfield they will have to travel by car either by driving to Guildford or London or to the train stations at Horsley and Cobham. This will involve them accessing the A3 where the 3,000 vehicles would first have to go south to the Ripley/Ockham junction before going east to Horsley Station or north to London and Cobham.

At the present time at rush hour there are often queues northbound between the Ripley/Ockham roundabout and the Cobham roundabout and the addition of a further 3,000 vehicles at this time would cause these roundabouts to seize up and effectively close the A3. Those motorists lucky enough to complete their journeys via the A3 will find that there will not be any spare car parking at either of the stations (where there is no room to extend either the car parking or the platforms) and even if by chance they did find a space in the car park they probably would not find one on the train.

In the villages most of the primary foul water, surface water, electricity, gas, and telephone services are 80 or more years old, close to capacity and near to the end of their effective life. My personal experience of this is that in the six years that I have lived in Ockham Road South East Horsley the electrical supply to my part of the road has failed twice, once for five days and the second time for two days due as the electricity supplier told me, to the age and capacity of the mains cables.

Although new energy saving technologies and elements like sustainable underground drainage systems can to a degree reduce the impact of any new developments ultimately they still have to be provided with services form the existing primary utilities infrastructure which will not be able to cope or be renewed by the monies obtained from the anticipated community infrastructure levies.

Other resources which will be overwhelmed will of course be the local healthcare services (where appointments are already difficult to get) and many will be aware of the near impossibility of parking at Royal Surrey County Hospital. It is also the case that most of the local “country” roads already have difficulty in withstanding the onslaught of potholes following each winter, without the added attrition of 100’s of heavy good vehicles which will be unleashed when any significant development works start.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A35 Wisley. I object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. However, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision. There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).19
- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the changed Policy A35 Wisley

- The two new slip roads at A247 Clandon Road (Burnt Common) and associated traffic management will not in any way mitigate the impact on Ripley High Street since traffic will need to pass through Ripley to reach Wisley.
- My previous objections therefore still stand for this changed policy concerning the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again. This is disgraceful!
- There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4159  Respondent: 11104033 / David Dutton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- The Wisley development of a new village / town with at least 2000 houses, 4-entry form secondary school and employment land. The development does not meet the NPPF requirement, namely that developments that generate significant movement will be located where the need to travel will be minimised and the use of sustainable transport modes can be maximised. The provision of slip roads at the A3/A247 junction to relieve the impact of this development on Ripley will have potentially severe effects on the A247.
- My objections to increased traffic on the A247 through West Clandon are outlined more fully elsewhere but include: (i) although notionally an A-road the A247 is narrow and winding in parts and is most unsuited to carrying additional traffic, (ii) the A247 has a single non-continuous footpath in several sections, (iii) a care home, a church car park and a pub, as well as very many houses, are located on the opposite side of the road to the only footpath, making pedestrian access difficult for people moving about the village on foot, especially for elderly and disabled people; (iv) the railway station and other commercial and residential properties have poor sight lines for access onto the A247 and difficulties in accessing the A247 from these properties will be exacerbated by increased traffic volume (and fewer “gaps” between cars); (v) the A247 is popular with cyclists and because of its narrow and winding nature the potential for accidents that additional traffic will cause is clear.
- The A247 may be an A-road on the map but in reality it is a residential road with numerous bends, narrow sections and side-entrances. The road through West Clandon already has numerous accident black spots, such as: (I) the exit from Clandon station which has extremely poor sight lines due to a humped back bridge where numerous accidents have occurred; (ii) the exit from the Onslow Arms pub which is almost blind due to the pub building being adjacent the road - a vehicle has recently ended up in the garden of the cottage opposite; (iii) the narrow section outside “Summers” which is regularly littered with the wing mirrors of cars which have made contact, as well as being a dangerous area for pedestrians due to vehicles mounting the pavement to try to pass; (iv) the winding section outside Clandon Regis and near the primary school which regularly suffers from demolition of gate posts and fences as vehicles leave the road; (v) the bend near West Clandon church which has seen damage caused to the flint wall in recent years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The allocation of Wisley Airfield for housing is an issue for the Borough Council to determine. However, the RHS does object to the allocation of a 16.98 hectare waste use in the north-west corner of the site as identified within the Surrey Waste Plan (2008). RHS Wisley is internationally renowned and contains rare collections of plants, some of which are extremely sensitive to environmental change. Biological aerosols created by the waste material will be carried in the air and will have a significant detrimental impact on the sensitive ecosystem at Wisley. RHS Wisley is strongly opposed to the provision of a waste facility within such close proximity to the Gardens.

In relation to a new settlement at the Wisley Airfield site, the RHS is cautious of the impact of the proposed increase in traffic movements, pollution to air and groundwater supplies, and development on the Ripley roundabout. In view of the emerging Wisley Masterplan the RHS encourages a thorough assessment of the impacts on existing uses, the highway network and that all impacts are mitigated.

Finally, the RHS is encouraged by the sustainable transport requirements including a significant bus network, detailed in Policy A35 which will help to mitigate impacts on the existing highway network.

Conclusions

In principle, the RHS is largely in support of the policies proposed within the Guildford Borough Proposed Submission Local Plan: Strategy and Sites, July 2016 document, aside from the comments raised above.

In the context of the importance of RHS Wisley to horticulture, science, education, communities, health and the local economy, we hope that the Council will recognise the benefits of greater flexibility by removing the village and garden from the Green Belt.

The RHS consider this to be a positive recommendation which will help to meet the aims and objectives detailed in the Local Plan whilst aiding the continued development of the Garden and the value it brings to the Borough. We therefore trust that the Council will accept our representations.

Please can you ensure that our details are recorded on the database for future consultation. We also take this opportunity to continue to reserve our ability to appear at the Examination in Public of the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: RHS WisleyInset.pdf (58 KB)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The allocation of Wisley Airfield for housing is an issue for the Borough Council to determine. It is noted that this allocation has increased in size from 93 ha to 96 ha with the inclusion of a further parcel of land. The RHS welcomes the inclusion of mitigation schemes to address issues on rural roads surrounding the site and the requirement for development to have sensitive design at site boundaries that has significant regard to the transition from village to greenfield.

However, the RHS continues to object to the allocation of a 16.98 hectare waste use in the north-west corner of the site as identified within the Surrey Waste Plan (2008) and allowed through appeal reference APP/B3600/A/09/2098568 on 8 March 2010. Here it is important to note that this consent has now lapsed and has not been implemented. RHS Wisley is internationally renowned and contains rare collections of plants, some of which are extremely sensitive to environmental change. Biological aerosols created by the waste material will be carried in the air and will have a significant detrimental impact on the sensitive ecosystem at Wisley. RHS Wisley is strongly opposed to the provision of a waste facility within such close proximity to the Gardens.

Our previous comments remain on the impact of proposed increase in traffic movements, pollution to air and groundwater supplies, and recent information arising from the impending Appeal hearing give greater concern that these environmental issues will affect the garden.

Conclusions

In principle, the RHS is largely in support of the policies proposed within the Guildford Borough Proposed Submission Local Plan: strategy and sites 2017 / Policy A35 document, aside from the comments raised above.

In the context of the importance of RHS Wisley to horticulture, science, education, communities, health and the local economy, we hope that the Council will recognise the benefits of greater flexibility by removing the village and garden from the Green Belt, given its established nature.

As a Grade II* Registered Park and Garden and an internationally significant scientific collection Wisley garden is at threat from environmental change including local developments that affect the air, temperature, groundwater, and soil conditions, alongside visual impact and noise. The Society seeks protection of this garden, which is of global horticultural scientific importance, with appropriate mitigations from planned developments that affect it and its future.

Furthermore the Society seeks specific recognition in the Plan of its site and the activities that take place at Wisley to the benefit of Guildford Borough Council, and through co-operation, Woking Borough Council.

The RHS consider this to be a positive recommendation which will help to meet the aims and objectives detailed in the Local Plan whilst aiding the continued development of the Garden and the value it brings to the Borough. We therefore trust that the Council will accept our representations.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My objections are as follows:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I strongly object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- The Council has allowed many existing houses, which would be ideal for first time buyers and those with families, to be turned into houses of multiple occupation, in order to house students, who make no contribution to Council Tax, and who are a wholly transient population. The University should be made to house their students in Halls of Residence within the purview of its own considerable land holdings, thereby releasing much needed housing stock.

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure
enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7. **Guildford BC has foolishly encouraged the influx of a large and increasing number of “leisure” cyclists into the Horsleys, who block the roads every day of the week, hold up traffic (increasing air pollution) and impede residents from efficiently going about their everyday business.**

   - I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
   - I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
   - I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
   - I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** pslp172/3736  **Respondent:** 11168161 / Judith Robertson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.

8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.

12. Opportunity (3) should be common to all sites and is not unique to this site.

13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

16. I object to the removal of additional 3.1 ha from the green belt without any justification.

17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

Additionally, the Council has failed to ensure that Surrey University needs to provide student accommodation on its own land, rather than losing valuable, appropriately situated housing stock for Homes of Multiple Occupation, which are the temporary residences of a transient population of students who have no commitment to the communities in which they live, and who make demands on Council services whilst not paying any Council Tax.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am a West Horsley resident and lived here for over 32 years.

I very strongly object to policy 52’s proposal on the development of housing in what is deemed ‘Green belt land’

Sir Eric Pickles stated that the imposition of such developments on Green Belt should only be implemented in ‘exceptional circumstances’. The ONS/DCLG figures in para 158 show the proposed increase as well above the agreed target. The area of the ‘Horsleys’ is recognised as Metropolitan Green Belt, incorporating Areas of Outstanding Beauty.

The proposal to build 2000 dwellings will deeply affect:

1 Roads and lanes around the surrounding area within a 5-mile radius which are already badly maintained and not fit for purpose. This increase will exacerbate the problem.

2 Drainage problems which already exist in what is ancient infrastructure and these dwellings can only increase the problem.

3 School places which are already at a premium.

4 The Medical Centre in Horsley which is at capacity as other medical centres including Effingham have shut. The increasing number of elderly and infirm people is putting further pressure on this facility.

5 The railway stations serving this area which have no further capacity to increase car parking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
We act for Crimson Project Management. This representation relates to the TABLE 1- Policy S2 and Policy A35 concerning LAND AT FORMER WISLEY AIR FIELD, OCKHAM.

The proposed allocation of land at Wisley for a new settlement would be incompatible with the Council's decision to refuse planning permission for this new settlement on grounds which, inter alia, seemingly go to the principle of building a new settlement at this location.

The proposed settlement is in an unsustainable location having regard to its geographical relationship to any district or local centres or other significant areas of population and is in an unsustainable location in respect of public transport access. Its location would appear to be dependent upon its relationship to the adjacent motorway and strategic road network which undoubtedly will provide the stimulus for encouraging travel by the private car on already busy roads.

There are more sustainable locations for new housing development in the Borough than Wisley airfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

PROPOSED SUBMISSION LOCAL PLAN - CONSULTATION REPRESENTATIONS

I am pleased to herewith submit representations to the ‘Guildford Proposed Submission Local Plan: Strategy and Sites’ consultation, ahead of the consultation deadline of 11:59 Monday 18 July 2016. CBRE Ltd acts on behalf of Julian Harris and Nicola Harris, the legal owners of c.14.5 hectares (36 acres – plan attached) of land and buildings known as Land at Bridge End Farm, Ockham, which is promoted through this consultation and these representations.

This letter sets out the background to ownership of the land promoted through this consultation and the representations themselves.

Land at Bridge End Farm

Julian Harris and Nicola Harris (“our Client”) are the owners of freehold land known as Land at Bridge End Farm, Ockham GU23 6NU. The extent of the ownership and land the subject of these representations is outlined in red on the attached plan.

Our Client acquired the Land at Bridge End Farm from their father, Jessel Harris on 27th December 2002. Jessel Harris retains ownership of Bridge End Farm house and lives there today.

Land at Bridge End Farm comprises agricultural land extending to approximately 14.5 hectares (36 acres) in size. The site is made up of a number of agricultural fields and numerous farm buildings and associated hard standing. Access is provided by Hatch Lane off Ockham Lane. Bridge End Farm Land has been run as a cattle farm by a local farmer since 1984.

Previous Promotion

Land at Bridge End Farm has historically been promoted through the Local Plan process in conjunction with other surrounding land, for a strategic allocation at the former Wisley Airfield. This larger land parcel has been assessed by GBC and was considered suitable for release from the Green Belt and allocation as a new urban settlement, through the evidence base for the emerging Local Plan.

Land at Bridge End Farm was originally included within a previous draft Local Plan Strategy and Sites document, but did not feature within the Local Plan Strategy and Sites consultation draft (July 2014). This was partly because Jessel Harris, in response to a letter sent to him by GBC, stated that the Bridge End Farm Land was not available. The reduction in size of the allocation, arising from the exclusion of the Bridge End Farm Land and other neighbouring land, resulted in the potential residential yield of the allocation being reduced from 2,500 units to 2,100 units.

Representations were submitted to the July 2014 consultation, reiterating that Land at Bridge End Farm is available to be included within the Local Plan and that Our Client is promoting the land for inclusion within the wider land parcel, which is crucial for the success of the strategic allocation and development proposals.

At that time, the representations focused on the need for the strategic allocation to achieve a critical mass in relation to size and scale of development, being informed by GBC’s Green Belt and Countryside Study (Volume V April 2014), which forms part of the evidence base for the emerging Local Plan.

Representations

Our Client supports the principle of the strategic allocation around the former Wisley Airfield site, including Land at Bridge End Farm, for the creation of a new settlement. However, it is considered that the draft policy associated with the allocation should be altered to more closely reflect GBC’s supporting evidence based and take advantage of the potential development opportunity in this location. Detailed representations in this regard are provided below.

Context

The National Planning Policy Framework (‘NPPF’) sets out the tests against which Local Plans should be prepared and assessed. Local Plan policies should follow the approach of the presumption in favour of sustainable development.
The principal test guiding policy adoption is that of ‘soundness’, namely that the plan should be (NPPF paragraph 182):

- “Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;
- Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;
- Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and
- Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.”

It is against these categories that the draft Local Plan has been reviewed and against which the following representations have been made.

Site Allocation A35: Land at Former Wisley Airfield, Ockham

The Site Allocation within the Proposed Submission Local Plan now includes a wider area than in the previous draft Local Plan, with associated Policy A35 identifying approximately 2,000 homes to be brought forward along with other employment, retail and leisure uses and supporting infrastructure. The larger allocation reflects previous representations made by Our Client and other landowners bringing forward available and deliverable sites. As highlighted above, Our Client is supportive of the principles of the now expanded allocation for a new settlement in this location. This more closely reflects the scale of land identified and assessed within the supporting evidence base for the Local Plan. However, there are additional comments Our Client would like to make, with several factors to consider, taken in turn below.

Green Belt and Countryside Study

In February 2013, Pegasus Planning Group published a Green Belt and Countryside Study on behalf of GBC, which was later updated with the addition of Volume V in April 2014. This study concludes that land parcel C18 (former Wisley Airfield site and Land at Bridge End Farm) represents an appropriate location for a new settlement and is of a size, and capable of a potential yield, to support a sustainable development in this location.

The Green Belt and Countryside Study identifies a population yield greater than 4,000 people as being capable of comprising a sustainable settlement. Therefore a population of 4,000 is not a ceiling or target, but represents an estimated minimum to assist in creating a sustainable settlement.

Wisley Airfield Outline Planning Application

Outline planning permission for development of a new settlement at the site of the former Wisley Airfield was refused by GBC on 8 April 2016. Refusal was predominantly on the grounds of inability to demonstrate very special circumstances to outweigh harm to the Green Belt, a policy test which will not apply should the proposed allocation in the emerging Local Plan be adopted.

This planning application sought permission for up to 2,068 residential dwellings, up to 100 sheltered accommodation units, retail, leisure and commercial uses as well as other supporting infrastructure. It is clear from the description of proposed uses at Policy 35 of the Proposed Submission Local Plan, that this has been largely informed by the scope of the outline planning application at the former Wisley Airfield site, despite the allocated land being larger than that of the outline planning application site.

Green Belt Boundary

The draft Policies Map accompanying the Proposed Submission Local Plan, proposes a number of alterations to the Green Belt boundary. In relation to the proposed site allocation A35, the Green Belt boundary revisions result in a larger
area than the allocation being released from the Green Belt. The justification behind this is to utilise physical and permanent features to create a defensible Green Belt boundary, not including land within the Green Belt which it is unnecessary to keep permanently open, and to endure beyond the plan period. This approach reflects policy within the NPPF at paragraph 85 and Our Client is supportive of this approach, recognising appropriate Green Belt boundaries and the possibility for additional land to come forward for development to meet future development needs.

**Commentary**

In Our Client’s view, the above identified key considerations would suggest that draft Policy A35 as currently worded, does not accurately reflect provisions of the NPPF and the opportunity for sustainable development. Our Client suggests that greater flexibility is introduced to draft Policy A35 to allow for a more significant contribution of development, particularly in relation to residential dwellings, with specific reference to a higher number. The justification for this, as above, can be summarised as follows:

- The supporting evidence base for the emerging Local Plan indicates a minimum population yield that could be capable of creating a sustainable settlement in this location and focus should be for a yield in excess of this, with a larger development capable of delivering more social and community infrastructure and benefits supporting a sustainable development;

- It is inappropriate for the specifics of the allocation to be informed by the outline planning application at the former Wisley Airfield site, which relates to a significantly smaller land at The inclusion of Land at Bridge End Farm, as well as other land, in the allocation provides the opportunity to enhance the development of a new settlement here and allows for a greater scale of development at appropriate densities, assisting in producing a higher population yield reflecting the supporting evidence base and enabling the creation of a sustainable settlement;

- Although not able to be specified in the allocation due to lack of its promotion, the additional land to be released from the Green Belt by virtue of the proposed Green Belt boundary should be recognised as providing for future development need Draft Policy A35 should therefore include recognition of this and be informed by the proposed defensible boundary and future development potential.

In addition to the above, planning for sustainable development is enshrined within the NPPF, as well as a requirement to “boost significantly the supply of housing” at paragraph 47.

For the reasons set out above, Our Client considers that Policy A35 of the Proposed Submission Local Plan as currently drafted is unsound, as it is not:

- ‘Positively prepared’ – Additional development brought through the strategic allocation would further assist in meeting the development needs of GBC and neighbouring authorities. The development potential has not been maximised with additional land being promoted;

- ‘Justified’ – As it is not the most appropriate strategy with consideration to the principles of the evidence base and inappropriate reliance on the scope of the outline planning application; and

- ‘Consistent with National Policy’ – As it could do more to boost the supply of housing and promote sustainable development.

**Conclusion**

The increase in size of the Wisley Airfield allocation following the inclusion of the Land at Bridge End Farm and other neighbouring land has provided the Local Authority with the potential to provide new sustainable mixed- use development.

We do not believe the Local Authority has positively addressed the additional land and would challenge that the 2,000 units as set out in policy A35 is sufficient. Page 124 of the proposed submission plan refers to an ‘approximate 2,000’ homes and this still does not reflect the original Pegasus report 2013 whereby 2,500 homes were deemed appropriate and indeed desired to create a sustainable community.
In order to be found sound, we request that the Local Authority amend Policy A35 to state that the site can accommodate approximately 2,500 homes. The exact number can then be determined through proper masterplanning of the site.

I trust that the above provides informative comments to the current consultation. I would be grateful if you could please confirm safe receipt of these representation and for above comments to be considered and included in the submission of the draft Local Plan.

In addition, we request to be kept informed on the Examination proceedings and request to reserve the ability to take part in the Examination Hearings on behalf of our client.

Please do not hesitate to contact me or my colleague Mark Novelle (020 7182 2423) should you wish to discuss any of the above further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A35 – OBJECT: UNSOUND – Not Positively Prepared, Justified, Effective or Consistent with National Policy:

The Council’s proposed allocation of land at former Wisley airfield, Ockham cannot be considered as a sound land release for the following primary reasons:

- Development Scale and Sustainability: The Council suggests that this proposal will create a new settlement (see Spatial Vision) yet the residential component only comprises 2,000 dwellings. A development of 2,000 dwellings is insufficient in terms of its scale to provide a large enough population to sustain the new services and facilities that would need to be provided alongside housing and employment.
- It has been long established in the planning system that the creation of new settlements requires a nucleus of population of sufficient size to ensure that the associated services and facilities can be funded and provided and then maintained in a viable manner.
- Many examples exist of new settlement development and all of those that have succeeded require greater levels of housing than the Council is currently proposing.
- Although a little dated now in terms of its publication date the Town and Country Planning Association ("TCPA") produced a document in 2007 in conjunction with the DCLG that reviewed Best Practice in relation to Sustainable Urban Extensions and New Settlements.
- The review reached a number of key conclusions those of direct relevance to the Council’s proposal are summarised below:
  - The decision making in relation to the provision of a new settlement is not something that can or should be taken at a local authority level. The strategic nature of such a decision renders it necessary to consider at a more strategic level to ensure that cross boundary issues with neighbouring authorities are properly considered and catered for;
  - New settlements have a long lead in time that is typically 20 years i.e. the whole plan period; and,
  - Significant initial investment is usually required to bring forward the substantial infrastructure that is typically required.
- The Council is therefore proposing a new settlement unilaterally at a local level and without proper recourse to neighbouring authorities (Neame Sutton is aware of a number of authorities that border Guildford Borough that are objecting to this proposal).
• The Council is suggesting that the 2,000 dwellings on the site will be delivered in years 1 -15 (Table 1 refers) yet typical delivery from such proposals is 20 years.
• The scale of the proposal is too low to ensure the necessary infrastructure requirements can be bought forward in a viable manner.
• For these reasons the draft allocation proposal is inadequate in scale and inherently unsustainable.

**Delivery of Essential Infrastructure:**

• The Council identifies in the policy that ‘interventions will be required to address potential highway performance issues.’ Furthermore the Council states that regard will need to be had to the delivery and timing of key infrastructure.
• Appendix C of the Plan sets out the key infrastructure required to deliver the Plan as a whole and in specific relation to Wisley confirms the following requirements:

<table>
<thead>
<tr>
<th>Infrastructure Required</th>
<th>Cost to Development</th>
</tr>
</thead>
<tbody>
<tr>
<td>Improvement works to the strategic road network (SRN1, SRN2, SRN3)</td>
<td>A proportion of the following: SRN1 - £2m SRN2 - £100 - £250m SRN3 - £100 - £250m</td>
</tr>

</tbody>
</table>

• Even taking into account those items where the Council has attributed a cost it is apparent that a development of some 2,000 dwellings cannot afford to deliver all of the infrastructure that the Council state is required to make it acceptable in planning terms as a sustainable new settlement. The fact that the Council has not been able to quantify the majority of the works that are required also represents a failing in terms of demonstrating that the Plan will be effective in the delivery of those obligations.
• It is therefore hard to see how a scheme of 2,000 dwellings will ever come forward on the land let alone within the 20 year time horizon of the Plan that has in effect only 17 years left to run.

**Planning History:**

• The Council has recently determined an Outline Application on the site for circa 2,000 dwellings, which was refused permission on 08 April 2016 (Decision Notice attached at Annex 1).
• The decision notice confirms the following concerns raised by the Council’s Planning Committee:
  ◦ The scale of development would have a clear and substantial detrimental impact on the openness of the Green Belt;
- No evidence to demonstrate the scheme would not give rise to severe adverse impact on the safe and efficient operation of the strategic road network;
- Impact on the viability of existing district and local centres in the vicinity;
- Impact on safeguarded waste site;
- The quantum and scale of development is unacceptable;
- Impact on listed buildings;
- Impact on air quality; and,
- A range of matters relating to Planning Obligations.

- It is clear from the decision that the Council’s own Members share the same concerns as Bewley in relation to the viability and deliverability of the development in this location together with raising additional concerns in relation to its impact on the Green Belt and the character of the area.
- If this is the view of Council Members it seems perverse that the Council has continued with the proposed allocation of the land given that the delivery of circa 2,000 dwellings has been tested more thoroughly through the planning application process and found to be significantly lacking.

Furthermore, and as document in the SA (Page 20 of the main SA document refers) neighbouring Local Planning Authorities have also raised serious concerns in relation to the proposed allocation of this site in the Plan. In particular Elmbridge Borough Council has highlighted the vulnerability of the Green Belt in this location as confirmed by the Inspector appointed to examine the Elmbridge Core Strategy.

The Council’s proposed allocation should therefore be deleted and further land allocated to make up the shortfall in supply.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A35 – OBJECT: UNSOUND – Not Positively Prepared, Justified, Effective or Consistent with National Policy:

2.79 Given that this Regulation 19 consultation is targeted on the amendments made by the Council Bewley has reviewed the amendments to this policy and all of its concerns as set out in its representations from June 2016 remain unresolved.

3.0 Representations in Relation to the Sustainability Appraisal (“SA”)

3.1 On the basis that there is direct overlap between the representations set out in Section 2 above and the SA the comments in this section are limited to Bewley Homes’ specific concerns with the updated SA.

3.2 The SA confirms on pages 26 and 27 that there is an unmet need in the HMA arising from working amounting to 3,150 dwellings. Box 6.8 even confirms the Council’s understanding that ‘there is little reason to suggest that the Waverley Local Plan will provide for any of Woking’s unmet needs.’

3.3 The SA then accepts the need to consider options that meet some or all of Woking’s unmet need, which must be the right approach to take.

3.4 This is of course, for the reasons set out in Section 2 above, completely at odds with the actual approach taken by the Council in the Plan that singularly ignores the unmet need arising from Woking.
3.5 The SA and the Plan are therefore in direct conflict with one another over this important matter, which cannot be considered to meet with the tests of soundness particularly in terms of being justified, positively prepared or in accordance with National policy and guidance.

3.6 Table 7.1 on Page 39 summarises the options the Council has considered and identifies at Option 8 and OAN plus 27% uplift scenario. This option is the closest in terms of alignment with the correct OAN identified in Section 2 of these representations.

3.7 Option 8 confirms the best outcomes in terms of economy and housing, which confirms the suitability of this option to address the needs of the Borough in terms of meeting housing need and sustaining the local economy. The areas where harm is identified in the table relating to Landscape, Transport and, Biodiversity are all matters that are capable of mitigation bought about through the Development Management process and should not therefore be viewed as overriding factors against pursuing Option 8.

3.8 Finally Option 8 scores poorly in relation to the ‘land’ category, which is perhaps of no real surprise given that land is a finite resource and the development of an increase level of housing necessarily results in the use of more land. This is more a function of Option 8 rather than an expression of its sustainability credentials.

3.9 The SA does not therefore identify any specific or indeed cumulative overriding issue that would render Option 8 unviable or unsustainable. Instead the SA confirms the view that Option 8 is the best in terms of addressing the significant housing shortfall in the Borough and ensuring the longevity and growth of the local economy.

3.10 In fact the final bullet point of Paragraph 6.5.26 on Page 35 confirms that Option 8 is both reasonable and would meet half of Woking’s unmet need. This is entirely in line with the approach set out by Bewley Homes in Section 2 of these representations.

Wisley, I would support the proposed development at Wisley Airfield, this seems to be the creation of a sustainable and self-contained community which could have good road links on what is arguably a "brown-field site". I support the Wisley proposal.

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I strongly object to the draft Local Plan for the following key reasons:
• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. Delisting of land in this way makes a mockery of the Green Belt and any environmental and planning legislation or regulation.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI). Specifically there are a large number of Red Listed species that either use this site or are the adjacent farmland. All will be affected by this development proposal. For example, there are significant numbers of Northern Lapwings that are either resident (nesting) or migrating through this site each year.

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in
Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- And I most strongly object to the continual destruction of this ‘green and pleasant land’ for short term pecuniary gain. We live on an increasingly overcrowded island and are reliant on imports for most of our foodstuffs. In the long term this is unsustainable and the proposed Local Plan will only exacerbate this dire situation. Building over good, crop-growing farmland is not only absurd but ill-advised given this pertinent fact.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
40.1 I object to Policy A35 Wisley

40.2 I object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

40.3 There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

40.4 This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

40.5 Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.

2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.

3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

5. Absence of adequate traffic data.

6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.

7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.

8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2237  Respondent: 15084897 / Save Send Action Group (Andrew Procter)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1.1 I object to the changed Policy A35 Wisley in respect of the identified mitigation to address the impacts on Ripley High Street and surrounding rural roads comprises two new slip roads at A247 Clandon Road (Burnt Common) and associated traffic management. This will not in any way mitigate the impact on Ripley High Street since traffic will need to pass through Ripley to reach Wisley.

1.2 My previous objections therefore still stand for this changed policy concerning the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

1.3 There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.4 This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

**Attached documents:**

---

**Comment ID:** PSLPS16/3529  **Respondent:** 15104897 / Terence Waters  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A35 for the following reasons:

1. The sheer size and density of the development is quite out of proportion to the local area. Horsley has several hundred less houses and occupies an area of around six times as great.

1. The housing in the development will, inevitably, be completely out of character with the surrounding village. These have been around for hundreds of years and grown organically. New houses have tended to be built singularly or small multiple units and therefore, over time, have fitted in - but a new 2,000-house estate in this setting is, frankly, a ridiculous suggestion.

1. The local roads are unable to cope with the existing traffic. Ockham Road North and South are narrow and windy, with only one pavement in some places which is often just 2-foot wide and which at times vehicles need to mount for large vehicles to pass in the opposite direction. The additional traffic generated by the new development will exacerbate an already intolerably dangerous situation.

1. The transport requirements of residents of the new development can only be met primarily by private cars and the existing train stations of Horsley and Effingham Junction. The junction between the Ripley roundabout and
the A3 heading northbound is already crowded with cars during the rush hour - adding more cars with lengthen the delays currently faced. And is it sensible to have a development built so close to the A3 with all the emissions generated currently to which greater delays will only add? The car parks at the two stations are already close to capacity - last winter when I went to Horsley Station at 10.00am there were only six available spaces. Where I live, about a mile from the station, there is a layby next to the side of my property which is used by the customers of the local butcher. Connisbees and I already see cars parked there all day with the owners walking down to the station. If the car park becomes full, so will the layby and then we'll have cars parking on Ockham Road itself creating even more traffic problems.

1. The additional population created by the development is likely to be between 5-6,000 including perhaps 6-800 children of school age. There are not the medical or educational facilities available to cope with this sudden influx.

1. And perhaps most important of all the plan contravenes the Green Belt regulations in that the requirement for the development does not meet the "special circumstances" set out.

For all these reasons I object to Policy A35 and trust the Council will remove the Wisley Airfield site from the local plan.

I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):

• Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
• Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
• Unacceptable Conservative Party links between the developers and the Council.
• No Green Belt “exceptional circumstances” presented.
• Not a brownfield site as stated – only 15% of it.
• Proposed SCC waste site ignored.
• Loss of farming land.
• Too near RHS Wisley and Thames Basin Heath SPA.
• SANG would harm on SPA.
• Will aggravate traffic jams at A3 roundabout and M25 Junction 10.
• Unacceptable increase in air pollution.
• No existing public transport and stations miles away.
• No proper traffic data.
• Housing density far too great.
• Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
• Access confined to inadequate narrow lanes.
• Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
• Major impact on neighbouring villages, especially Horsleys.
• No assessment made of collective impact on area of this and 6 Horsley sites.

Please can we crack on with the plans to add 2000 houses at Wisley and the 500 houses in Horsley? Accommodation is desperately needed and you must ignore all these bleats about greenbelt (Horsley is built in the greenbelt thanks to some far sighted people in the 40's and 50's).

It is time for someone to make a decision to get the houses built. The proposed plan is a start but only building 30 new houses per year is simply insufficient.

All the Neighbourhood Plan people in this village seem to be involved only to try and stop any development.

Please approve and get started

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

My view is that the plan is too conservative. There is ample room in the Horsley's - where I live - and the surrounding villages for many more houses. GBC must not allow itself to be intimidated by well connected and well funded NIMBIES.

the fact is that all of the villages have been developed within the green belt - whatever that is - and can be significantly enlarged without any impact on the nature of the area.

Wisley development is desperately needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
(2) I object to the Wisley Airfield, Garlicks Arch (Ripley/Send border) and Gosden Hill (Clandon) sites being used for housing development as the nearby villages simply cannot support the increase in traffic.

(3) There is already a very high level of traffic congestion in Ripley high St, sometimes gridlocked at rush hour already making access to services and residences in ripley very difficult and stressful. I also object to the vast increase in traffic that would arise on the junction between the M25 and A3.

(4) I object to the additional strain that the Villages Medical Centre, Send will have as a result of the large increase in population in the area. This service is already overstretched and the development will exacerbate the problem.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
all to see, only gets a passing mention. For example, the transport report by the developer's consultants has been torn apart following many comments and objections. Missing traffic numbers, grossly understating the impact of the development on trunk roads and local roads. The information provided in the Local Plan implies that if billions are spent on road and transport network improvement the development at Wisley could proceed with improvements funded by developers.

3.3. There appear to be 58 projects included in GBC wish list; statements have been made that for the housing program to move forward, it would require the majority of the programme of work to be delivered. At this point in time only 4 of the 58 projects have received committed funding even one of these is in doubt if Highways England is to be believed.

3.4. No solutions have been arrived at for the problems in the centre of Ripley. After more than 2 years of meetings and discussions involving SCC and the developer's consultants no workable solution has been identified. GBC local plan dismisses this significant problem saying it will be resolved with a "management solution". I would be very interested to hear what that solution could be and I suspect SCC highways would also be interested.

3.5. Both Highways England and SCC Highways issued holding objections in relation to the recent planning application for the Wisley site. This is, apparently, all they can now do as they are unable to refuse an application. If these two key agencies have expressed their grave reservation over the potential development on this site, why do GBC insist in promoting the site?

3.6. Under the latest Housing and Planning Bill, if sites are included in a local plan there is a presumption in favour of an application with matters of detail only to be resolved. Large slices of GBC traffic solutions are based on survey and analysis yet to be done when more detail can be made available. In other words they do not know the full extent of the problem. This information will be the result of a further examination of the issues and with solutions that are not currently apparent. I suppose this is the reason for the vagaries of the budgets. The only beneficiary of such an ill conceived and ill prepared approach will be lawyers representing the future developers when they are asked to pay for or contribute towards any mitigation.

3.7. The budget costings are said to err on the conservative side. Worked out on the back of a fag packet is more the case! How can anybody be expected to take a budget plan seriously when the individual projects have a budget plan estimate in the range of £100m to £250m on a single project. It is no wonder only 4 of the 58 projects have any commitment.

3.8. There are serious environment issues on the Wisley site and the nearby SPA. Pollution levels already exceed EU levels. The proposed SANG provision is immediately adjacent to the SPA a point that was criticized by Wildlife Trust, and Forestry Commission and initially by Natural England. The latter making a reversal of earlier comments following changes in personnel.

3.9. I therefore Object to the Wisley Airfield site being taken out of the Green Belt where it continues to serve the purposes intended by its original inclusion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Wisley

Very recently GBC gave 14 reasons for disallowing the planning application for a significant development at Wisley. Some of the reasons given were either insurmountable or insurmountable for all practical purposes. Yet having rejected this development Guildford Borough Council then, within weeks, includes it in their Local Plan.

How is this possible? There is no logic whatsoever in an organisation whole heartedly rejecting a proposal to then include the same proposal immediately in its Local Plan. Something cannot be fundamentally wrong for 14 reasons and yet be perfectly all right simultaneously.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them) e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Please do sent me conformation that all of these comments together with all my previous are passed to the Inspector.

I reserve my right to appear at the inquiry and present my evidence.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1) It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

2) It is further from railway stations than any other identified strategic site.

3) It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

4) Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5) Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

6) Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

7) It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.

   - The associated traffic increase from the RHS has not been taken into account.

   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.

   - There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow, unlit local roads on a regular basis.

9) The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station 10). It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

11) The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

12) Opportunity (3) should be common to all sites and is not unique to this site.

13) I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

14) I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

15) I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

16) I object to the removal of additional 3.1 ha from the green belt without any justification.

17) I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

18) I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

19) I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20) I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21) I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22) I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23) I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24) I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25) I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26) I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27) I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28) I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29) I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30) I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31) I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32) I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33) I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34) I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35) I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

For the reasons listed above and numerous other reasons, I consider that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPS16/8307  **Respondent:** 15136769 / NATS LTD (Sacha Rossi)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

NATS has reviewed the Local Plan. While we acknowledge that reference to our DVOR/DME installations is made on page 206, our preference would be to include a statement as follows:

- The airfield site hosts an aeronautical navigation beacon, known as the Ockham DVOR/DME. This is an integral part of the UK aeronautical infrastructure and serves a number of major airports in the South East. When considering planning application(s), engagement with the operator (NATS En Route PLC) should be sought as early as practicable in order to ensure that any impact may be assessed and so that any relevant conditions and obligations to planning permission(s) can be attached.

in the table on page 205 ‘POLICY A35: Land at former Wisley airfield, Ockham’ under the REQUIREMENTS entry.

This is to highlight the importance of the aeronautical infrastructure and to ensure engagement with NATS is as early as possible should the current plans for the area be subject to alteration in any way.

Thanks and regards
I refer to the Consultation below and can confirm that having reviewed the LPD NATS is satisfied that its comments have been incorporated, specifically around the NATS owned DVOR/DME Aeronautical Beacon at Wisley airfield.

POLICY A35: Former Wisley airfield, Ockham,

Requirement 8, page 226.

Accordingly, NATS has no further comments to make.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

d. The danger this traffic will be to local
cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them). The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Policy A35 – Land at Former Wisley Airfield, Ockham

In regards to the proposed new settlement at Wisley (Policy A35) it is acknowledged that there are two amendments to the site’s boundary. In regard to the first amendment it is understood that additional land is being added that was previously not considered available for allocation / development. Whilst there is no objection to the land being added per se, it is queried whether the identified capacity of the site should be amended to reflect the additional land now included. Should the potential capacity of the site change consideration should also be given to an additional impact on infrastructure requirements that would need to be included within the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Wisley Airfield

3.1. The proposal to include this site in the Local Plan and remove it from the green belt is puzzling as it was the subject of a planning application refusal in recent months.

3.2. The reason given for the refusal was because the site was within the Green Belt. So why do that when GBC had the clear intention of moving the site out of the Green Belt within next few weeks? There were other reasons that were glossed over in the report that are not resolved by GBC recent actions. The impact on infrastructure, which is clear for all to see, only gets a passing mention. For example, the transport report by the developer's consultants has been torn apart following many comments and objections. Missing traffic numbers, grossly understating the impact of the development on trunk roads and local roads. The information provided in the Local Plan implies that if billions are spent on road and transport network improvement the development at Wisley could proceed with improvements funded by developers.

3.3. There appear to be 58 projects included in GBC wish list; statements have been made that for the housing program to move forward, it would require the majority of the programme of work to be delivered. At this point in time only 4 of the 58 projects have received committed funding even one of these is in doubt if Highways England is to be believed.

3.4. No solutions have been arrived at for the problems in the centre of Ripley. After more than 2 years of meetings and discussions involving SCC and the developer's consultants no workable solution has been identified. GBC local plan dismisses this significant problem saying it will be resolved with a "management solution". I would be very interested to hear what that solution could be and I suspect SCC highways would also be interested.

3.5. Both Highways England and SCC Highways issued holding objections in relation to the recent planning application for the Wisley site. This is, apparently, all they can now do as they are unable to refuse an application. If these two key agencies have expressed their grave reservation over the potential development on this site, why do GBC insist in promoting the site?

3.6. Under the latest Housing and Planning Bill, if sites are included in a local plan there is a presumption in favour of an application with matters of detail only to be resolved. Large slices of GBC traffic solutions are based on survey and analysis yet to be done when more detail can be made available. In other words they do not know the full extent of the problem. The latter making a reversal of earlier comments following changes in personnel.

3.9. I therefore Object to the Wisley Airfield site being taken out of the Green Belt where it continues to serve the purposes intended by its original inclusion.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I’d like my comments below to be taken into consideration for the GBC local plan:

Site A35 / Wisley Airfield

1. I object to this proposal. I objected to this site in 2014 and my views are unchanged. This is a significant development which is not appropriate for the area. It is a greenbelt site and should be kept as such. I find the plan to build 2000 houses is unacceptable and completely at odds with surrounding land use.

2. In addition such a huge volume of housing will add to the already significant access issues to the M25 / J10 and A3. It would also create unacceptable traffic congestion / “rat runs” on the surrounding minor roads.

3. I am very concerned about how local services from education to healthcare could cope with such a large additional population in the area. I question whether this has been properly taken into account and incorporated into the GBC plan.

1. We strongly object to the ongoing proposal for 2000+ homes on the Wisley former airfield site. We believe that this will create an unacceptable strain on local resources such as road and rail transport, schooling and medical services.

The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I write with reference to the above submission plan.

I would be grateful if you could kindly confirm that all of these comments together with all my previous comments will be passed to the Inspector. I reserve my right to appear at the inquiry.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe, putting my family and others in danger.

It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. RHS Wisley traffic already cause frequent congestion by traffic on local roads – there is already vulnerability and this will get worse.

1. The associated traffic increase from the RHS has not been taken into account.
2. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis – again, more danger and potential fatalities.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB and destroy the far reaching countyside views for future generations. Surely there is a responsibility to maintain this?

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultees – Why bother to consult if you then ignore the overwhelming popular view?.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

It is my belief bearing in mind the reasons listed above from a not exhaustive list that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1)  I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2)  I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. How can land be identified as Green Belt ie: protected and then ‘unprotected’ like this – it is a mockery of the whole concept of protection!

3)  I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4)  I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5)  I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed
houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is simply too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. Commuters going to Effingham station are NOT going to cycle or walk!
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. These are small lanes which don’t have the capacity to take this sort of traffic.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The increase in traffic will create a danger to those who do cycle (and pedestrians walking to the woods with their dogs), due to the absence of any cycling paths and the lack of pedestrian footpaths (as there is no space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. Where are all these extra commuters going to park? This will lead to further development of common land which is again ‘protected’.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNIC).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, which is already in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. I am asthmatic as is my father.

9) I object to the fact the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I simply fail to see how the local planning committee can be even reconsidering this application with so many people objecting. It certainly appears to me that the opinions of the locals are not being listened to at all. Rumours abound concerning the investment company whose registered office is in the Cayman Islands and one has to wonder given recent exposes concerning companies from that region whether everything is actually as it should be……
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/3696  Respondent: 15185185 / Jeff Gill  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I believe this is now the third or even fourth time I seem to be writing to object to this planning submission. I am at a lost to understand why this is repeatedly being put forward with such minor changes as to be not worth reconsidering and this is despite being rejected by thousands of local residents. This is being planned at the detriment of the local community.

I object to this submission plan AGAIN due to the poor quality and lack of transparency in the evidence to support this case - and you will note my objections below.

Please confirm that all of these comments together with all my previous comments are passed to the Inspector.

In summary I again object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above, yet again, this plan is unsound and not fit for purpose. I object to this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt.

The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself is too spread out to anticipate a reduced reliance on private cars

1. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

1. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

1. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the lack of space to provide for them)

1. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

1. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• The plan proposes that ‘Major new developments will provide….. educational facilities….’ (and other infrastructure); but there appears to be no additional secondary schooling attached to the enormous development proposed for Wisley.
• The Wisley & Blackwell Farm proposals will put a huge strain on the A3 which anyone using it on a regular basis will be able to tell you is already under considerable strain.
• The Wisley development has been previously rejected so it is disappointing & surprising to see it back in the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I object to the increase in the site (A35 former Wisley Airfield). The increase in size to 95.9 hectares will further increase traffic congestion and pollution, which are already above safe levels.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a VITAL role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** pslp172/3598  **Respondent:** 15196385 / Lucy Jamieson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**
It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe, putting my family and others in danger.

It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. RHS Wisley traffic already cause frequent congestion by traffic on local roads – there is already vulnerability and this will get worse.

1. The associated traffic increase from the RHS has not been taken into account.
2. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis – again, more danger and potential fatalities.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB and destroy the far reaching county side views for future generations. Surely there is a responsibility to maintain this?

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultees – Why bother to consult if you then ignore the overwhelming popular view?.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change.

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting taxpayers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

It is my belief bearing in mind the reasons listed above from a not exhaustive list that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<table>
<thead>
<tr>
<th>Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Wisley Airfield</td>
</tr>
<tr>
<td>3.1. The proposal to include this site in the Local Plan and remove it from the green belt is puzzling as it was the subject of a planning application refusal in recent months.</td>
</tr>
<tr>
<td>3.2. The reason given for the refusal was because the site was within the Green Belt. So why do that when GBC had the clear intention of moving the site out of the Green Belt within next few weeks? There were other reasons that were glossed over in the report that are not resolved by GBC recent actions. The impact on infrastructure, which is clear for all to see, only gets a passing mention. For example, the transport report by the developer's consultants has been torn apart following many comments and objections. Missing traffic numbers, grossly understating the impact of the development on trunk roads and local roads. The information provided in the Local Plan implies that if billions are spent on road and transport network improvement the development at Wisley could proceed with improvements funded by developers.</td>
</tr>
<tr>
<td>3.3. There appear to be 58 projects included in GBC wish list; statements have been made that for the housing program to move forward, it would require the majority of the programme of work to be delivered. At this point in time</td>
</tr>
</tbody>
</table>
only 4 of the 58 projects have received committed funding even one of these is in doubt if Highways England is to be believed.

3.4. No solutions have been arrived at for the problems in the centre of Ripley. After more than 2 years of meetings and discussions involving SCC and the developer's consultants no workable solution has been identified. GBC local plan dismisses this significant problem saying it will be resolved with a “management solution”. I would be very interested to hear what that solution could be and I suspect SCC highways would also be interested.

3.5. Both Highways England and SCC Highways issued holding objections in relation to the recent planning application for the Wisley site. This is, apparently, all they can now do as they are unable to refuse an application. If these two key agencies have expressed their grave reservation over the potential development on this site, why do GBC insist in promoting the site?

3.6. Under the latest Housing and Planning Bill, if sites are included in a local plan there is a presumption in favour of an application with matters of detail only to be resolved. Large slices of GBC traffic solutions are based on survey and analysis yet to be done when more detail can be made available. In other words they do not know the full extent of the problem. This information will be the result of a further examination of the issues and with solutions that are not currently apparent. I suppose this is the reason for the vagaries of the budgets. The only beneficiary of such an ill conceived and ill prepared approach will be lawyers representing the future developers when they are asked to pay for or contribute towards any mitigation.

3.7. The budget costings are said to err on the conservative side. Worked out on the back of a fag packet is more the case! How can anybody be expected to take a budget plan seriously when the individual projects have a budget plan estimate in the range of £100m to £250m on a single project. It is no wonder only 4 of the 58 projects have any commitment.

3.8. There are serious environment issues on the Wisley site and the nearby SPA. Pollution levels already exceed EU levels. The proposed SANG provision is immediately adjacent to the SPA a point that was criticized by Wildlife Trust, and Forestry Commission and initially by Natural England. The latter making a reversal of earlier comments following changes in personnel.

3.9. I therefore Object to the Wisley Airfield site being taken out of the Green Belt where it continues to serve the purposes intended by its original inclusion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a VITAL role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

1. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

1. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**Comment ID:** PSLPS16/2654  **Respondent:** 15207425 / Elizabeth Davey  **Agent:**
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an intergenerational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

RE: GUILDFORD BOROUGH COUNCIL DRAFT LOCAL PLAN

The submission plan for the above is completely unfit for purpose, containing as it does a number of fundamental errors. As well as this I find the evidence base in the plan to be almost unbelievably poor and I find it hard to believe that this is the work of professional people. The lack of clarity is worrying and reports that I have received regarding the information being difficult to access for people with poor internet connections leads me to wonder if there is an ulterior motive that has led to this difficulty being deliberately put in the way of people as these try to assess this important matter.

I continue to object in the strongest possible terms to the totally unjustified inclusion of policy A35, Three Farms Meadows in the draft Local Plan for the following reasons:

Transport

(Matters that make the site completely unsuitable for inclusion in the local plan):

Three Farms Meadows is adjacent to the most congested stretch of strategic road network in Surrey and close to one the most congested junction in the country (J10 of the M25 and the A3) and the amount of traffic using this area of road it set to increase significantly. No amount of changes to that junction in the future will change these facts. Because of this, any egress onto A3 from Three Farms Meadows at any point will be extremely dangerous and cannot be allowed.

Local roads are already at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks and so on). The roads in the immediate area around Three Farms Meadows are extremely narrow and no responsible plan should seek to increase traffic on these roads. I challenge any Guildford Borough Council employee or elected official to drive around these local roads with me to see how suitable they are.

Any existing or new public transport provision such as bus services to/from Guildford or destinations towards London has to, and will have to negotiate these over-crowded major and minor roads and will therefore be unreliable and subject to frequent delays. This has always been the case with bus services in the area around Three Farms Meadows – as anyone (myself included) who has previously had experience of Green Line / London Country 715 route bus services can testify to. Any new bus services to Horsley or anywhere else will impact the safety of the local road network and lead to road traffic accidents as the lanes are not wide enough to accommodate buses. Again, I challenge any Guildford Borough Council employee or elected official to drive around these local roads with me to see how suitable they are.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable. I object to the fact that the Council
appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification whatsoever.

Finally, on transport, I would point out that Three Farms Meadows is further from railway stations than any other identified strategic site in the local plan. These railway stations are visited by trains that are already extremely overcrowded and no there is no short term, medium term of long term rail plan to overcome this overcrowding. I challenge any Guildford Borough Council employee or elected official to drive to these railway stations with me to see how realistic it is to drive to them and to see the car parking provision at these stations.

Finally, on transport, I would point out that Three Farms Meadows is further from railway stations than any other identified strategic site in the local plan. These railway stations are visited by trains that are already extremely overcrowded and no there is no short term, medium term of long term rail plan to overcome this overcrowding. Car parks at all of these railway stations are already full. How can anyone possibly think that the flood of additional vehicle from Three Farms Meadows would do anything but add to this parking problem.

**Environment**

(Matters that make the site completely unsuitable for inclusion in the local plan):

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area, all of which together make a unique and environment – so close to Greater London. These changes to the site boundaries are not identified correctly on the plan (Appendix H p16). As well as this I object to the fact that the increased area, being on the south of the site facing the Surrey Hills Area of Outstanding Natural Beauty will increase the negative impact of the views from the Area of Outstanding Natural Beauty. Unless this monstrous idea is withdrawn Guildford Borough Council will be responsible for an irredeemable act of environmental vandalism.

I object to paragraph 21 which “limits” (notice the use of double quotes) development in flood zone 2 and 3 as development should be excluded in flood zone 2 and 3 and I object to paragraph 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the disregard for the impact of in-combination development on the Thames Basin Heaths Special Protection Area, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to the total lack of proper sewerage capacity for Three Farms Meadows in the local plan. How can supposedly professional people not make proper provision for this?

**Green Belt**

I object to the sinister removal of additional 3.1 ha from the green belt without any justification and I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact. This inclusion change can only be interpreted as a being undertaken in order to suit the needs of property developers and their aspirations to make money from this site regardless of the wishes of ordinary people. The inevitable and irreversible damage to the local environment that removal from Green Belt would entail would first and foremost the fault of Guildford Borough Council.

**The wishes of the local population, the lack of proper consultation and lack of due process**

(Matters that make the site completely unsuitable for inclusion in the local plan):

I object to the fact that the council has failed to remove this site from the local plan despite receiving thousands of objection from local residents and statutory consultees. I am appalled and puzzled that the Council continues to fly in face of the wishes of the local population in this matter and I can only assume that those persons who responsible for this plan have ulterior motives for including Three Farms Meadows in the plan.

I object to the significant modifications that have made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes. I
object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19
consultation when the changes are major. I object to the disturbing fact that there is no clear justification for the removal
of one strategic site over site A35.

There are many other totally justified objections in addition to the above that I could make to this appalling plan and I
have no doubt that many thousands of other people will make those points in their objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

RE: GUILDFORD BOROUGH COUNCIL DRAFT LOCAL PLAN

The submission plan for the above is completely unfit for purpose, containing as it does a number of fundamental errors.
As well as this I find the evidence base in the plan to be almost unbelievably poor and I find it hard to believe that this is
the work of professional people. The lack of clarity is worrying and reports that I have received regarding the
information being difficult to access for people with poor internet connections leads me to wonder if there is an ulterior
motive that has led to this difficulty being deliberately put in the way of people as these try to assess this important
matter.

I continue to object in the strongest possible terms to the totally unjustified inclusion of policy A35, Three Farms
Meadows in the draft Local Plan for the following reasons:

Transport
(Matters that make the site completely unsuitable for inclusion in the local plan):

Three Farms Meadows is adjacent to the most congested stretch of strategic road network in Surrey and close to one the
most congested junction in the country (J10 of the M25 and the A3) and the amount of traffic using this area of road it set
to increase significantly. No amount of changes to that junction in the future will change these facts. Because of this,
any egress onto A3 from Three Farms Meadows at any point will be extremely dangerous and cannot be allowed.

Local roads are already at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks and
so on). The roads in the immediate area around Three Farms Meadows are extremely narrow and no responsible plan
should seek to increase traffic on these roads. I challenge any Guildford Borough Council employee or elected official to
drive around these local roads with me to see how suitable they are.

Any existing or new public transport provision such as bus services to/from Guildford or destinations towards London
has to, and will have to negotiate these over-crowded major and minor roads and will therefore be unreliable and subject
to frequent delays. This has always been the case with bus services in the area around Three Farms Meadows – as anyone
(myself included) who has previously had experience of Green Line / London Country 715 route bus services can testify
to. Any new bus services to Horsley or anywhere else will impact the safety of the local road network and lead to road
traffic accidents as the lanes are not wide enough to accommodate buses. Again, I challenge any Guildford Borough
Council employee or elected official to drive around these local roads with me to see how suitable they are.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised
by Mouchel for using out of date modelling software and is therefore unreliable. I object to the fact that the Council
appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification whatsoever.

Finally, on transport, I would point out that Three Farms Meadows is further from railway stations than any other identified strategic site in the local plan. These railway stations are visited by trains that are already extremely overcrowded and no there is no short term, medium term of long term rail plan to overcome this overcrowding. I challenge any Guildford Borough Council employee or elected official to drive to these railway stations with me to see how realistic it is to drive to them and to see the car parking provision at these stations.

Finally, on transport, I would point out that Three Farms Meadows is further from railway stations than any other identified strategic site in the local plan. In any case, these stations are visited by trains that are already extremely overcrowded and no there is no short term, medium term of long term rail plan to overcome this overcrowding. Car parks at all of these railway stations are already full. How can anyone possibly think that the flood of additional vehicle from Three Farms Meadows would do anything but add to this parking problem.

Environment

(Matters that make the site completely unsuitable for inclusion in the local plan):

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area, all of which together make a unique and environment – so close to Greater London. These changes to the site boundaries are not identified correctly on the plan (Appendix H p16). As well as this I object to the fact that the increased area, being on the south of the site facing the Surrey Hills Area of Outstanding Natural Beauty will increase the negative impact of the views from the Area of Outstanding Natural Beauty. Unless this monstrous idea is withdrawn Guildford Borough Council will be responsible for an irredeemable act of environmental vandalism.

I object to paragraph 21 which “limits” (notice the use of double quotes) development in flood zone 2 and 3 as development should be excluded in flood zone 2 and 3 and I object to paragraph 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the disregard for the impact of in-combination development on the Thames Basin Heaths Special Protection Area, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to the total lack of proper sewerage capacity for Three Farms Meadows in the local plan. How can supposedly professional people not make proper provision for this?

Green Belt

I object to the sinister removal of additional 3.1 ha from the green belt without any justification and I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact. This inclusion change can only be interpreted as a being undertaken in order to suit the needs of property developers and their aspirations to make money from this site regardless of the wishes of ordinary people. The inevitable and irreversible damage to the local environment that removal from Green Belt would entail would first and foremost the fault of Guildford Borough Council.

The wishes of the local population, the lack of proper consultation and lack of due process

(Matters that make the site completely unsuitable for inclusion in the local plan):

I object to the fact that the council has failed to remove this site from the local plan despite receiving thousands of objection from local residents and statutory consultees. I am appalled and puzzled that the Council continues to fly in face of the wishes of the local population in this matter and I can only assume that those persons who responsible for this plan have ulterior motives for including Three Farms Meadows in the plan.

I object to the significant modifications that have made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes. I
object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major. I object to the disturbing fact that there is no clear justification for the removal of one strategic site over site A35.

There are many other totally justified objections in addition to the above that I could make to this appalling plan and I have no doubt that many thousands of other people will make those points in their objections.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My main concerns relate to the development of the Wisley Airfield with 2000 houses and the redrawing of the Green Belt and in particular the removal of rural villages such as East Horsley from the Green Belt.

I moved into East Horsley from Cobham last year after living 21 years in Cobham – and before that 12 years in Claygate.

Over those years I have seen the gradual creeping of urbanisation outwards from London. The Green Belt was established to prevent seepage of urbanisation so that no rural separation would remain between villages. The Green Belt is necessary to protect our environment and residents’ enjoyment of that environment.

Additionally there is already serious congestion because of the number of residents already living here and their pressure on limited amenities.-

- rail station car parks are already full at Effingham Junction and East Horsley

- A3 and M25 congestion including at junctions. eg most days there are periods when traffic going west on the M25 below the boundary with Elmbridge is at a standstill.

- air quality deterioration

- ? schools

- affect on mental health of residents

1. I object very strongly to the inclusion of the Former Wisley Airfield (FWA/TFM) in the local plan. Extensive public consultation has shown the madness of the idea to build over 2000 houses on the FWA. It is absolutely shocking that GBC is still including the Former Wisley Airfield in the local plan. GBC has no concern for democracy.

My wife and I have lived in Ockham for over 40 years and find that the plan for Wisley Airfield completely out of order. The traffic congestion at the moment is at a ridiculous high level and the roads in the Ockham are at gridlock several times each day. The fact that the roads are not maintained properly and the sides of the roads are full of potholes and there are potholes even in the middle of the roads are not uncommon.

Furthermore this would lead to a big intrusion into the green belt and the pollution would be beyond belief.

I object to the large proposed development of 2,000 houses at Wisley Airfield (A35)

It will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Ripley & Send.

The re-inclusion in the Plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham) is fundamentally wrong. Following a huge public outcry, Guildford Planning Committee has unanimously rejected a recent planning application for precisely this development on 14 separate grounds.

Policy A35 should be removed from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land less than 15% is
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and
- Loss of high-quality agricultural land (55% of the site), in breach of national
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley
- Failure to evaluate the cumulative impact of this and nearby development sites on the

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPI) planning application was unanimously rejected by GBC on 4th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is immediately removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):
• Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
• Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
• Unacceptable Conservative Party links between the developers and the Council.
• No Green Belt “exceptional circumstances” presented.
• Not a brownfield site as stated – only 15% of it.
• Proposed SCC waste site ignored.
• Loss of farming land.
• Too near RHS Wisley and Thames Basin Heath SPA.
• SANG would harm on SPA.
• Will aggravate traffic jams at A3 roundabout and M25 Junction 10.
• Unacceptable increase in air pollution.
• No existing public transport and stations miles away.
• No proper traffic data.
• Housing density far too great.
• Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
• Access confined to inadequate narrow lanes.
• Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
• Major impact on neighbouring villages, especially Horsleys.
• No assessment made of collective impact on area of this and 6 Horsley sites.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible site for the building of a large number of house - basically a New Town. The planning committee have unanimously refused planning permission for houses to be built on that site so there is no reason to include it in the Local Plan. I object to the local council not making these reasons known - if there are any, which I doubt there are except possible financial considerations which have again not been made clear.

I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible site for the building of a large number of houses as ‘localism’, taking note of what the local people want, is supposed to be the new watchword in political circles especially after the Referendum vote showed exactly how out of touch the governors are with the governed. In this case the governed do not want a development on the airfield, Three Farm meadows, as particularly evidenced by the unusually high rejection of the people to the inclusion of it in the local plan. If the Council continue to fly in the face of local wishes they too will in the end suffer at the hands of the electorate in the same way as the Government did at their hands.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to the proposition that the development will result in a meaningful shift to cycling and walking. The development is miles from anywhere and the residents will be entirely reliant on their cars to get about as there are no transport links of any kind except narrow roads and the enormously busy M25/A3 junction, which could not stand an influx of
thousands of extra cars. There have in my experience in the last month already been two accidents on the section 
of the A3 between the M25 and the Wisley Roundabout and that is with the present amount of traffic.

Because the Olympic Cycle race and the Prudential Ride London–Surrey cycle race come through Ripley and past 
Ockham and Horsley, Cyclists are encouraged to cycle throughout this area and the number of cyclists on these 
narrow roads has increased dramatically especially in Saturday mornings, the favoured shopping time for most 
people, when large phalanxes of cyclist can be seen racing down the narrow lanes covering them from hedgerow 
to hedgerow. I object to the addition of any extra cars that will be a massive danger to these cyclists and 
discourage cycling in direct contravention of the governments aim to encourage it.

Wisley Gardens has proposed an expansion which will increase visitor traffic more than it stands today and so I 
object to any proposal that will increase the traffic any further and put an already over populated road junction 
under even greater strain making long stationary queues a probable permanent feature of this junction. Come and 
see what five thousand extra people visiting Wisley Gardens on special event days does to the M25/A3 junction as 
well as The Ripley Roundabout.

I object to the detrimental effect the development would have on there character of the area, what I believe the 
planners refer to as ‘street scene’. ALL houses in Ockham, the nearest village, are old, vernacular, set back from 
the road, built in hollows or behind trees, are a maximum of two stories, with perhaps and attic conversion, and 
very sparsely arranged in terms of number of houses per hectare. This development is scheduled for the crest of a 
hill, it is urban in nature, has a population density equal to or greater than the most congested parts of London 
and will have living units up to five stories high; twice the height of anything in the area.

I object to the fact that even though the local people (those living in Ripley, Ockham, Wisley, and the Horsleys) do 
not want it, even though the planning committee have unanimously rejected it, STILL the Council are fighting 
tooth and nail to have it included in the Local Plan. Why??? As the ubiquitous phrase would have it - 'Follow the 
money'.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), 
Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4051  Respondent: 15232513 / Barnaby Lawrence  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally 
Compliant? ( )

I object to the inclusion of Three Farms Meadows (otherwise known as Wisley Airfield) Development in the Local Plan 
and would like it removed.

I object to the fact that It is in the wrong place as it will be under the pollution cloud form M25 Junction10, it is 
constrained by ill-equipped country lanes, SSSIs, lack of public transport links.

I object to the injection of thousands more cars into transport links that are already often subject to overcrowding 
especially on warm sunny days when everybody and his wife visits Wisely Gardens and they intend to increase their 
visitor numbers.

I object to to being too big and aggressively impacts the openness of the Green Blet, by being built high, along the 
skyline and to use the Councils own phraseology is of too great a 'Bulk and Mass'
I object to the fact that the Council has no justification for removing the land from the Green Belt except that they want to.

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

I object that only a portion of the plan is being considered when it should be the totality of the plan that is under consideration. The Council have given reasons for this when the changes are major changes.

I object to the Council ignoring the thousands of objections from private individuals and also the objections from statutory bodies requesting the removal of the site from the plan.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

I object to the fact that the plan would appear to be full of inaccuracies - eg. in one part of the document the started number of houses is 12,426 and yet when the figures in the table are added up the total is 9,810. It is therefore not possible to consider the plan until it is presented accurately otherwise it is open to misinterpretation and challenge upon challenge because its foundation is so weak.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. There are many many more objections to which I would add my name, but I have already done so over and over again and I am getting really really fed up with being forced to over and over again object and object and object.

The development is basically unsound and purely speculative and anyone who has no ulterior motive can see it.

**Comment ID:** PSLPS16/718  **Respondent:** 15233153 / Anthony Harris  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

1. **Wisley Airfield**

3.1. The proposal to include this site in the Local Plan and remove it from the green belt is puzzling as it was the subject of a planning application refusal in recent months.

3.2. The reason given for the refusal was because the site was within the Green Belt. So why do that when GBC had the clear intention of moving the site out of the Green Belt within next few weeks? There were other reasons that were glossed over in the report that are not resolved by GBC recent actions. The impact on infrastructure, which is clear for all to see, only gets a passing mention. For example, the transport report by the developer's consultants has been torn apart following many comments and objections. Missing traffic numbers, grossly understating the impact of the development on trunk roads and local roads. The information provided in the Local Plan implies that if billions are spent on road and transport network improvement the development at Wisley could proceed with improvements funded by developers.

3.3. There appear to be 58 projects included in GBC wish list; statements have been made that for the housing program to move forward, it would require the majority of the programme of work to be delivered. At this point in time only 4 of the 58 projects have received committed funding even one of these is in doubt if Highways England is to be believed.
3.4. No solutions have been arrived at for the problems in the centre of Ripley. After more than 2 years of meetings and discussions involving SCC and the developer's consultants no workable solution has been identified. GBC local plan dismisses this significant problem saying it will be resolved with a “management solution”. I would be very interested to hear what that solution could be and I suspect SCC highways would also be interested.

3.5. Both Highways England and SCC Highways issued holding objections in relation to the recent planning application for the Wisley site. This is, apparently, all they can now do as they are unable to refuse an application. If these two key agencies have expressed their grave reservation over the potential development on this site, why do GBC insist in promoting the site?

3.6. Under the latest Housing and Planning Bill, if sites are included in a local plan there is a presumption in favour of an application with matters of detail only to be resolved. Large slices of GBC traffic solutions are based on survey and analysis yet to be done when more detail can be made available. In other words they do not know the full extent of the problem. This information will be the result of a further examination of the issues and with solutions that are not currently apparent. I suppose this is the reason for the vagaries of the budgets. The only beneficiary of such an ill conceived and ill prepared approach will be lawyers representing the future developers when they are asked to pay for or contribute towards any mitigation.

3.7. The budget costings are said to err on the conservative side. Worked out on the back of a fag packet is more the case! How can anybody be expected to take a budget plan seriously when the individual projects have a budget plan estimate in the range of £100m to £250m on a single project. It is no wonder only 4 of the 58 projects have any commitment.

3.8. There are serious environment issues on the Wisley site and the nearby SPA. Pollution levels already exceed EU levels. The proposed SANG provision is immediately adjacent to the SPA a point that was criticized by Wildlife Trust, and Forestry Commission and initially by Natural England. The latter making a reversal of earlier comments following changes in personnel.

3.9. I therefore Object to the Wisley Airfield site being taken out of the Green Belt where it continues to serve the purposes intended by its original inclusion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I fully support the rejection by the entire planning committee of the development of Wisley airfield (Three Farm Meadows) to the inclusion of the site formerly known as Wisley Airfield in the local plan and object strongly to its continued inclusion.
I object to the inclusion of the site known as Wisley Airfield in the local plan as it goes against the published Ockham Parish Local Plan which we are encouraged to issue so that everybody has a clear idea of what local people actually want rather than what the Council think they want.

I object to the awful impact a development on Wisley will have on transport, local roads and road safety.

I object to the impact on the local environment such a development would have especially on the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI)

I object to attempts to remove Three Farm meadows (Formerly known as wisely airfield) from the green belt. The site is actually prime agricultural land that the government promised to remove the airstrip from it when they had finished with it and under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the mass of cars that will be unleashed on our narrow roads that are flooded with cyclists.

I object to more cars on our roads as there are no provisions for pedestrians and we take our lives in our hands when we walk the roads even with the traffic we have now and there is no room for pavements.

I object to the Council using inflated/dodgy statistics (West Surrey Strategic Market Housing Assessment (SHMA)) to base their need for so many houses.

I object to the proposition that the development will result in a meaningful shift to cycling and walking, of course it won’t as there are no transport links and the new residents will obviously use their cars.

I object to the fact that the houses that are proposed are completely out of keeping with the whole area.

I object to the fact that even though the planning committee have unanimously rejected it, even though the local people don’t want it, the Council are still determined to have it included in the Local Plan.

I object to the Council trying to force people to live in an atmosphere poisoned by fumes from the M25/A3.

I object to the fact that Guildford Borough Council are completely ignoring the Ockham Parish Local Plan,

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

1. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows)- where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3852  Respondent: 15234529 / Oliver Pask  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)- Allocation A35-for the phased development of a new settlement of up to 2100 dwellings

I object to the draft local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBE).

5) I object to the threat the local Plan poses to the historic rural village of Ockham and the Blighton properties there. The plan calls for a Village of 159 residences (With narrow lanes, no street lights, very few pavements and many listed
houses) to be subsumed into a 2,000 dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development walking. The development is too isolated, and even within the development

b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RH S Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25! A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously—air pollution in many parts of the borough, and particularly at the M25! A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's greenspaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield—now known as Three Farm Meadows)—where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by anumber of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency

I object to the inclusion of Three Farm Meadows (Policy 35) due to the proposed removal of the site from the Green Belt when no exceptional, very special or special circumstances exist. In particular, I object to the unsustainable nature of the site, the poor air quality and noise pollution levels that will result, the infrastructure deficit that will result and the impact on views to and from the Surrey Hills.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons. I am writing again, and I require confirmation that all of these comments together with all my previous comments are passed to the Inspector.

I object strongly to many of the things in the plan, including the following:

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

I consider for these reasons and many others that this plan is unsound and not fit for purpose and I strongly object to it. I would be grateful to know that my objection has been received and sincerely considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. Three Farms Meadow site

I OBJECT also to there-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision - a clear signal to the developers to try again.

This is not an NPPF "presumption in favour of sustainable development" but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company. "18

Policy A35 should be ditched from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of "exceptional circumstances".
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.

"17 Application reference 15/P/00012.

"18 Including the Rt Han. David Mellor QC (its erstwhile founder and former Minister), Mr Michael Murray (spokesman for the project and Conservative cabinet member for planning policy at the Vale of the White Horse District Council in Oxfordshire) and the Han. Charles Balfour (director, descendant of the Tory Prime Minister).

- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA. Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).
- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

*****
"The River Mole would flood even more badly should a new runway be built at Gatwick.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**POLICY A35: Land at former Wisley Airfield**

Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

I have major concerns about this proposed development and have objected against prior planning applications at this location. I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

I strongly OBJECT to this proposed policy for the reasons below.

1. **a) The proposed development represents a fundamental breach of Metropolitan Green Belt rules:**

   The site forms part of the Metropolitan Green Belt. Under the NPPF, development on such Green Belt land is only permitted under ‘very special circumstances’. GBC’s Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that: *It has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified.*

   Ministerial guidance has repeatedly confirmed that unfulfilled housing need does not qualify as a very special circumstance. Whilst the developers’ previous planning application was judged and rejected based upon the 2003 GBC
Local Plan, the proposal to include this site within the 2016 Proposed Submission Local Plan does not fundamentally change the argument against it. Any removal of this site from the Green Belt can only be made based upon ‘exceptional circumstances’, which cannot be justified on the basis of unfulfilled housing need. If this was the case, then the entire Metropolitan Green Belt would already have become filled with housing.

Removal of this site from the Green Belt is totally against its rules, regulations and underlying spirit. The site location at the edge of the M25 circle represents a ‘first line of defence’ against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

Accordingly, I OBJECT to Policy A35 as a fundamental breach of the Metropolitan Green Belt rules.

1. b) This site does not meet acceptable levels of sustainability:

Sustainability Appraisal is a core concept of planning policy, yet this site is rated very poorly in terms of its sustainability.

The sustainability appraisal undertaken by GBC’s consultant, AECOM, is presented in the Local Plan Evidence Base report ‘Sustainability Appraisal (SA) of the Guildford Borough Local Plan’ issued in June 2016. In their report AECOM have graded all Local Plan policy sites according to 21 different criteria using the conventional ‘traffic light’ system. Red colouring signifies poor sustainability. Of the six larger sites included in their evaluation, (those with proposed housing numbers of 1000 homes or greater), AECOM rates Site A35 as the very worst of all in terms of its sustainability. No less than 8 out of the 21 criteria are graded as ‘Red’ by AECOM for this site, more than any other large site.

Detailed reasons why this site has such poor sustainability include the following:

- There is currently no infrastructure whatsoever at this site, meaning that all water, electricity, gas and phone services will need to be newly established;

- New large-scale sewage disposal will be needed, a fact recognised by Thames Water, indicating it may take 3+ years to provide adequate sewage handling facilities for this site;

- There are presently no schools, medical services or shops within walking distance of this site;

- There is presently no local employment at this site and little after the development is completed;

- There will be a significant destruction of agricultural land arising from this development;

- There will be significant environmental damage from this development;

- There is no public transport currently serving this location;
• The nearest train stations are Horsley and Effingham Junction, both around 3 miles away and so too far to walk. Neither station currently has significant parking capacity available.

• Travel from this site will be primarily dependent upon motor vehicles. Any new site so dependent upon motor vehicles for transport cannot be considered as being ‘sustainable’;

• New access roads will be needed and significant changes proposed to the surrounding road network, leading to further pressure on over-crowded rural roads and increase in the traffic congestion in nearby settlements;

Whilst some of these issues may be mitigated, e.g. by building new schools, medical facilities, etc, others such as the environmental issues and infrastructure impact may not. This proposal, fundamentally, represents an attempt to create a large-scale new settlement in a poorly-sited green field location. However, as the GBC’s own consultant has demonstrated, this site does not reach acceptable minimum levels of sustainability.

Accordingly, I OBJECT to Policy A35 on grounds of its unacceptable sustainability.

1. c) The site will have a severe impact on local traffic & infrastructure:

The proposed development will have a severe adverse impact on road traffic in the surrounding area. This includes East Horsley where high volumes of additional traffic are likely from the residents of this new settlement accessing East Horsley’s two stations, shops and nearby schools. Most of the rural roads in this area are narrow winding ‘lanes’ – a term used in a recent local public meeting by John Furey, senior SCC councillor for Infrastructure to describe East Horsley’s through roads. Many of these ‘lanes’ are without pavements for large stretches, whilst the principal through-roads of Ockham Road South and Forest Road pass along unlit residential areas so narrow that two buses cannot cross in many sections of these ‘lanes’.

The road closures and junction changes being proposed to accompany this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which already suffer from traffic congestion at peak hours. The further increase in traffic congestion at the A3-M25 intersection would only exacerbate an existing problem for the highways authority - we understand Highways England have repeatedly expressed serious concerns about this development.

Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity. The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel there and back to these stations lacks credibility. Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.

Accordingly, I OBJECT to Policy A35 on grounds of its severe impact on local infrastructure.

1. d) There are damaging health & safety implications arising from development at this site:

The site is located close to the junction of the M25 and A3, one of the busiest road junctions in the country. The Nitrous Oxide (‘NOx’) emissions recorded around this area are extremely high and will affect residents living at the proposed site. The proposal to build new primary and secondary schools at this location is also contrary to government policy prohibiting the building of schools on sites in areas where there is high NOx.

In rejecting the previous planning application by the developers, the GBC Planning Officer cited the “failure to provide adequate information on NOx emissions and nitrogen deposition and to provide any information on acid deposition” as one of the grounds for this rejection.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse health & safety implications
1. **e) The environmental impact on protected wildlife will be substantial:**

GBC’s *Land Availability Assessment* which supports Policy A35 states that the site lies within the 400m-5km ‘Zone of Influence’ of the Thames Basin Heaths Special Protection Area (‘SPA’). This is not correct. The site is immediately adjacent to Ockham & Wisley Commons, an area designated as a Site of Special Scientific Importance (‘SSSI’), which forms one part of the Thames Basin Heaths SPA and much of the site lies within the 400m Exclusion Zone where new building is effectively prohibited.

The SPA was set up to provide protection for rare and threatened birdlife in certain lowland heath locations, the provisions of which were agreed by GBC in its ‘Thames Basin Heaths SPA Avoidance Strategy’.

This strategy establishes zones to protect the SPA from the impact of new development, particularly from the damage caused by pets (dogs, cats, etc) of local residents to the habitats of threatened ground-nesting birds. Land within 400m of the SPA is designated as an ‘Exclusion Zone’ where “there will be a presumption against additional new dwellings”. Since the Wisley Airfield site is immediately adjacent to Ockham Common for a significant length, much of this site falls within 400m of the SPA Exclusion Zone.

The remaining portion of this site falls within the 400m - 5km ‘Zone of Influence’ set out under the SPA policy, which requires developers to contribute a new SANG (‘Site of Alternative Natural Greenspace’) to mitigate for potential damage caused to the SPA from new development – the size of the SANG is a function of the scale of the development. In their previous planning application the developers proposed that the land within the 400m Exclusion Zone would provide their SANG contribution. If accepted as a SANG, this would only encourage the 5000+ residents of the new settlement to allow their pets access into this space, therefore defeating the objective of the SANG mitigation.

Even with the 400m Exclusion Zone in effect, the positioning of such a large site immediately adjacent to such an important protected space will inevitably have a major detrimental impact on the wildlife within it.

**Accordingly, I OBJECT to Policy A35 on grounds of its material adverse environmental impact.**

The impact of the Exclusion Zone and SANG requirements, together with the need to provide for the existing waste facility, means that the actual area of land available for housing development at this site is estimated to be around 43 hectares.

1. **f) The development is totally out of keeping with local character, context & distinctiveness:**

It is a key element of planning policy that new developments should be in keeping with the established pattern of development in the area. In the 2016 Proposed Submission Local Plan, GBC’s very first housing policy, Policy H1, requires that development should: “make the most efficient use of land whilst responding to local character, context and distinctiveness.” However, Policy A35 fails to do this.

With its proposal to build some 2,100 homes on and around the site of the former Wisley Airfield, Policy A35 will create a new settlement larger than any other in Guildford Borough, outside of Guildford itself. The nearby historic village of Ockham has merely 159 dwellings. It will be completely swamped by a development on such a scale.

Moreover, the design and density of the proposed development will be completely out of context with its surrounding area. Due to the restrictions of the SPA Exclusion Zone, the need for SANG provision and the land needed for the waste facility, the actual land area to be used for housing development under Policy A35 is estimated to be around 43 hectares. Therefore, with 2,100 homes proposed for this site, the overall housing density of the settlement area may be calculated at around 49 dwellings per hectare (‘dph’).
East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town, with some 1,760 homes. East Horsley presently has an overall housing density of 8.1 dph within its settlement area. Therefore, the proposed development under Policy A35 is six times as dense as the nearest settlement of a comparable size. The proposed development under Policy A35 therefore utterly fails to respond to local context and as such is in breach of GBC’s own Housing Policy H1.

The density of 49 dph proposed under Policy A35 is effectively an urban density appropriate for a metropolitan location. It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley. These villages have grown up organically over a thousand years. They contain many historic, listed or otherwise protected buildings as well as a range of residential housing, predominantly detached two-storey houses or bungalows. They are all picturesque villages with charm and character. Visitors come to the area to enjoy some of the prettiest villages and countryside in southern England, all within easy access of London. The character of this whole area would be irreparably destroyed if this development goes ahead.

Accordingly, I OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

Concluding remarks

I do not share the same vision for the future of Guildford Borough as GBC, although I do recognise that an enormous volume of work has gone into the preparation of the Proposed Submission Local Plan, which is now out for public consultation.

However, after more than 20,000 responses were submitted in 2014 in connection with the previous draft Local Plan, most of them opposed to its proposals, GBC has made relatively few changes from the earlier version and none of any materiality.

At the heart of the problem is GBC’s desire to pursue a ‘Forced Growth’ policy which results in highly aggressive and unjustified targets being set for housing development in the Borough. These excessive targets – the proposed 25% increase in housing stock in particular – create a tremendous strain on both land and infrastructure in an already over-crowded and over-stretched part of the country.

These targets will also have a material adverse impact on the Metropolitan Green Belt across this area, despite all the political promises made to the contrary. The irony of Policy P2 which states that “We will continue to protect the Metropolitan Green Belt” does not fool anybody.

Accordingly I OBJECT to the Proposed Submission Local Plan.

I sincerely request that GBC that radically re-assess its own policy objectives rather than force through the Council a Local Plan which clearly does not have the wider support of the residents of Guildford Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
POLICY A35: Land at former Wisley Airfield

Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

I have major concerns about this proposed development and have objected against prior planning applications at this location. I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

I strongly OBJECT to this proposed policy for the reasons below.

1. **a) The proposed development represents a fundamental breach of Metropolitan Green Belt rules:**

The site forms part of the Metropolitan Green Belt. Under the NPPF, development on such Green Belt land is only permitted under ‘very special circumstances’. GBC’s Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that: *It has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified.*

Ministerial guidance has repeatedly confirmed that unfulfilled housing need does not qualify as a very special circumstance. Whilst the developers’ previous planning application was judged and rejected based upon the 2003 GBC Local Plan, the proposal to include this site within the 2016 Proposed Submission Local Plan does not fundamentally change the argument against it. Any removal of this site from the Green Belt can only be made based upon ‘exceptional circumstances’, which cannot be justified on the basis of unfulfilled housing need. If this was the case, then the entire Metropolitan Green Belt would already have become filled with housing.

Removal of this site from the Green Belt is totally against its rules, regulations and underlying spirit. The site location at the edge of the M25 circle represents a ‘first line of defence’ against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

*Accordingly, I OBJECT to Policy A35 as a fundamental breach of the Metropolitan Green Belt rules.*

1. **b) This site does not meet acceptable levels of sustainability:**

Sustainability Appraisal is a core concept of planning policy, yet this site is rated very poorly in terms of its sustainability.

The sustainability appraisal undertaken by GBC’s consultant, AECOM, is presented in the Local Plan Evidence Base report ‘Sustainability Appraisal (SA) of the Guildford Borough Local Plan’ issued in June 2016. In their report AECOM have graded all Local Plan policy sites according to 21 different criteria using the conventional ‘traffic light’ system. Red colouring signifies poor sustainability. Of the six larger sites included in their evaluation, (those with proposed housing numbers of 1000 homes or greater), AECOM rates Site A35 as the very worst of all in terms of its sustainability. No less than 8 out of the 21 criteria are graded as ‘Red’ by AECOM for this site, more than any other large site.

Detailed reasons why this site has such poor sustainability include the following:

- There is currently no infrastructure whatsoever at this site, meaning that all water, electricity, gas and phone services will need to be newly established;
• New large-scale sewage disposal will be needed, a fact recognised by Thames Water, indicating it may take 3+
  years to provide adequate sewage handling facilities for this site;

• There are presently no schools, medical services or shops within walking distance of this site;

• There is presently no local employment at this site and little after the development is completed;

• There will be a significant destruction of agricultural land arising from this development;

• There will be significant environmental damage from this development;

• There is no public transport currently serving this location;

• The nearest train stations are Horsley and Effingham Junction, both around 3 miles away and so too far to
  walk. Neither station currently has significant parking capacity available.

• Travel from this site will be primarily dependent upon motor vehicles. Any new site so dependent upon motor
  vehicles for transport cannot be considered as being ‘sustainable’;

• New access roads will be needed and significant changes proposed to the surrounding road network, leading to
  further pressure on over-crowded rural roads and increase in the traffic congestion in nearby settlements;

Whilst some of these issues may be mitigated, e.g. by building new schools, medical facilities, etc, others such as the
environmental issues and infrastructure impact may not. This proposal, fundamentally, represents an attempt to create a
large-scale new settlement in a poorly-sited green field location. However, as the GBC’s own consultant has
demonstrated, this site does not reach acceptable minimum levels of sustainability.

Accordingly, I OBJECT to Policy A35 on grounds of its unacceptable sustainability.

1. c) The site will have a severe impact on local traffic & infrastructure:

The proposed development will have a severe adverse impact on road traffic in the surrounding area. This includes East
Horsley where high volumes of additional traffic are likely from the residents of this new settlement accessing East
Horsley’s two stations, shops and nearby schools. Most of the rural roads in this area are narrow winding ‘lanes’ – a term
used in a recent local public meeting by John Furey, senior SCC councillor for Infrastructure to describe East Horsley’s
through roads. Many of these ‘lanes’ are without pavements for large stretches, whilst the principal through-roads of
Ockham Road South and Forest Road pass along unlit residential areas so narrow that two buses cannot cross in many sections of these ‘lanes’.

The road closures and junction changes being proposed to accompany this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which already suffer from traffic congestion at peak hours. The further increase in traffic congestion at the A3-M25 intersection would only exacerbate an existing problem for the highways authority - we understand Highways England have repeatedly expressed serious concerns about this development.

Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity. The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel there and back to these stations lacks credibility. Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.

Accordingly, I OBJECT to Policy A35 on grounds of its severe impact on local infrastructure.

1. **d) There are damaging health & safety implications arising from development at this site:**

The site is located close to the junction of the M25 and A3, one of the busiest road junctions in the country. The Nitrous Oxide (‘NOx’) emissions recorded around this area are extremely high and will affect residents living at the proposed site. The proposal to build new primary and secondary schools at this location is also contrary to government policy prohibiting the building of schools on sites in areas where there is high NOx.

In rejecting the previous planning application by the developers, the GBC Planning Officer cited the “failure to provide adequate information on NOx emissions and nitrogen deposition and to provide any information on acid deposition” as one of the grounds for this rejection.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse health & safety implications.

1. **e) The environmental impact on protected wildlife will be substantial:**

GBC’s *Land Availability Assessment* which supports Policy A35 states that the site lies within the 400m-5km ‘Zone of Influence’ of the Thames Basin Heaths Special Protection Area (‘SPA’). This is not correct. The site is immediately adjacent to Ockham & Wisley Commons, an area designated as a Site of Special Scientific Importance (‘SSSI’), which forms one part of the Thames Basin Heaths SPA and much of the site lies within the 400m Exclusion Zone where new building is effectively prohibited.

The SPA was set up to provide protection for rare and threatened birdlife in certain lowland heath locations, the provisions of which were agreed by GBC in its ‘Thames Basin Heaths SPA Avoidance Strategy’.

This strategy establishes zones to protect the SPA from the impact of new development, particularly from the damage caused by pets (dogs, cats, etc) of local residents to the habitats of threatened ground-nesting birds. Land within 400m of the SPA is designated as an ‘Exclusion Zone’ where “there will be a presumption against additional new dwellings”. Since the Wisley Airfield site is immediately adjacent to Ockham Common for a significant length, much of this site falls within 400m of the SPA Exclusion Zone.

The remaining portion of this site falls within the 400m - 5km ‘Zone of Influence’ set out under the SPA policy, which requires developers to contribute a new SANG (‘Site of Alternative Natural Greenspace’) to mitigate for potential damage caused to the SPA from new development – the size of the SANG is a function of the scale of the development. In their previous planning application the developers proposed that the land within the 400m Exclusion Zone would
provide their SANG contribution. If accepted as a SANG, this would only encourage the 5000+ residents of the new
settlement to allow their pets access into this space, therefore defeating the objective of the SANG mitigation.

Even with the 400m Exclusion Zone in effect, the positioning of such a large site immediately adjacent to such an
important protected space will inevitably have a major detrimental impact on the wildlife within it.

Accordingly, I OBJECT to Policy A35 on grounds of its material adverse environmental impact.

The impact of the Exclusion Zone and SANG requirements, together with the need to provide for the existing waste
facility, means that the actual area of land available for housing development at this site is estimated to be around 43
hectares.

1. f) The development is totally out of keeping with local character, context & distinctiveness:

It is a key element of planning policy that new developments should be in keeping with the established pattern of
development in the area. In the 2016 Proposed Submission Local Plan, GBC’s very first housing policy, Policy H1,
requires that development should: “make the most efficient use of land whilst responding to local character, context and
distinctiveness.” However, Policy A35 fails to do this.

With its proposal to build some 2,100 homes on and around the site of the former Wisley Airfield, Policy A35 will create
a new settlement larger than any other in Guildford Borough, outside of Guildford itself. The nearby historic village of
Ockham has merely 159 dwellings. It will be completely swamped by a development on such a scale.

Moreover, the design and density of the proposed development will be completely out of context with its surrounding
area. Due to the restrictions of the SPA Exclusion Zone, the need for SANG provision and the land needed for the waste
facility, the actual land area to be used for housing development under Policy A35 is estimated to be around 43 hectares.
Therefore, with 2,100 homes proposed for this site, the overall housing density of the settlement area may be calculated
at around 49 dwellings per hectare (‘dph’).

East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town,
with some 1,760 homes. East Horsley presently has an overall housing density of 8.1 dph within its settlement area.
Therefore, the proposed development under Policy A35 is six times as dense as the nearest settlement of a comparable
size. The proposed development under Policy A35 therefore utterly fails to respond to local context and as such is in
breach of GBC’s own Housing Policy H1.

The density of 49 dph proposed under Policy A35 is effectively an urban density appropriate for a metropolitan location.
It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously
presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley. These villages
have grown up organically over a thousand years. They contain many historic, listed or otherwise protected buildings as
well as a range of residential housing, predominantly detached two-storey houses or bungalows. They are all picturesque
villages with charm and character. Visitors come to the area to enjoy some of the prettiest villages and countryside in
southern England, all within easy access of London. The character of this whole area would be irreparably destroyed if
this development goes ahead.

Accordingly, I OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and
distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

Concluding remarks
I do not share the same vision for the future of Guildford Borough as GBC, although I do recognise that an enormous volume of work has gone into the preparation of the Proposed Submission Local Plan, which is now out for public consultation.

However, after more than 20,000 responses were submitted in 2014 in connection with the previous draft Local Plan, most of them opposed to its proposals, GBC has made relatively few changes from the earlier version and none of any materiality.

At the heart of the problem is GBC’s desire to pursue a ‘Forced Growth’ policy which results in highly aggressive and unjustified targets being set for housing development in the Borough. These excessive targets – the proposed 25% increase in housing stock in particular – create a tremendous strain on both land and infrastructure in an already over-crowded and over-stretched part of the country.

These targets will also have a material adverse impact on the Metropolitan Green Belt across this area, despite all the political promises made to the contrary. The irony of Policy P2 which states that “We will continue to protect the Metropolitan Green Belt” does not fool anybody.

Accordingly I OBJECT to the Proposed Submission Local Plan.

I sincerely request that GBC that radically re-assess its own policy objectives rather than force through the Council a Local Plan which clearly does not have the wider support of the residents of Guildford Borough.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

10) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public transport: The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in...
Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

• Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to express my objection to the proposed policy A35, Three Farm Meadows in the draft local plan for several reasons:

1. The plan is a gross misuse of Greenbelt land whose very purpose is to stop the environmentally unsustainable and detrimental expansion of city areas at the cost of natural green space.
2. The local roads would not be able to sustain the increase in traffic. The A3 and M25 junction is already incredibly congested at all times and the country roads are narrow and dangerous. In recent months there have been multiple accidents at the Old Lane – Ockham Road crossroads.
3. The roads are not wide enough for the new suggested bus routes
4. I find the proposal for walking and cycling on these routes absurd and unbelievably dangerous due to the narrow twisting roads and frequently speeding cars from the A3.
5. There is already insufficient parking at local stations (which for many residents is much more than a quick walk or cycle away), and the addition of so many new residents will make the situation even worse.
6. I object to para 21 which “limits” development in flood zone 2 and 3. Development should not be permitted in flood zone 2 and 3
7. I object to para 22 as this does not at all reflect the impact of the buildings on the surrounding area.
8. I object to the inclusion of a 10% buffer in the housing number over the plan period; this proposal is completely unnecessary.

I hope that yourself and the developers will consider these reasons when you decide whether or not to ruin our local area and community with these continued ‘cheap and convenient’ fixes to fulfil quotas when alternatives, such as constructing on the numerous brown field sites within and surrounding London, do exist.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I support a new community at Wisley Airfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I often visit my parents, who live in Ockham, and the traffic around the M25/A3 Junction is frightening. If there were to be more cars, as I understand it around 4000, then that junction will become dangerously overcrowded. The local lanes are just not equipped to take that increase especially in view of the many cyclists who use the area that I often encounter in large groups.

I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible site for the building of a large number of houses. The planning committee have unanimously refused planning permission for houses to be built on that site so there is no reason to include it in the Local Plan. It cannot be built as there is no permission for it.

I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible site for the building of a large number of houses as it flies in the face of ‘localism’.

I especially object to the detrimental impact on transport, local roads and road safety. I specifically object to the proposition that the development will result in a meaningful shift to cycling and walking. The development is miles from anywhere and the residents will be entirely reliant on their cars to get about as there are no transport links of any kind except narrow roads and the enormously busy M25/A3 junction, which could not stand an influx of thousands of extra cars.

Because the Olympic Cycle race and the Prudential Ride London-Surrey cycle race come through Ripley and past Ockham and Horsley, Cyclists are encouraged to cycle throughout this area and the number of cyclists on these narrow roads has increased dramatically especially on Saturday mornings, the favoured shopping time for most people. I object to the addition of any extra cars that will be a massive danger to these cyclists and discourage cycling in direct contravention of the governments aim to encourage it.

Wisley Gardens has proposed an expansion which will increase visitor traffic more than it stands today and so I object to any proposal that will increase the traffic any further and put an already over populated road junction under even greater strain making long stationary queues a probable permanent feature of this junction.

I object to the detrimental effect the development would have on there character of the area. Houses in Ockham are old, vernacular, set back from the road, built in hollows or behind trees, are a maximum of two stories, with perhaps and attic conversion, and very sparsely arranged in terms of number of houses per hectare. This development is scheduled for the crest of a hill, it is urban in nature, has a population density equal to or greater than the most congested parts of London and will have living units up to five stories high; twice the height of anything in the area.
I strongly object to the detrimental effect the proposed development will have on the environment and the various sites of special significance that border it.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have further objections to the large proposed development of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill Policy A25 and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

I hope that all my objection points listed above will be taken into consideration.

I object to the removal of Wisley Airfield and the land surrounding it from the Green Belt and to designate this area as a potential site for building some 2000 new homes. Again this is Green Belt and an open area which should be protected against the developer.

I object to the continued inclusion of Wisley Airfield (Three Farms Meadow) as a potential site for new housing.

Wisley Airfield - I strongly object to any form of building here as I mention above. This is an area of Green Belt land with no infrastructure and non-existent transport facilities other than road access. The reasons for unsuitability and rejection of this area for potential development are well documented in the recent rejection by GBC Planning of a planning application for access to this site. The Wisley site must be removed from the Local Plan. Access from this site to the A3 is very poor and already the junction is at capacity at peak travel periods. Rail transport is already at full capacity and the car parks at nearby stations are fully utilised. The large increase of vehicular traffic and people from houses built at Wisley could not be absorbed by the current infrastructure and public facilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)?

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I often visit my in-laws who live in Ockham, who are an integral part of our family. The traffic around the M25/A3 Junction, and indeed the local traffic level in Ockham, is already dangerous due to the volume. If there were to be more cars, as I understand it around 4000, then that junction will become dangerously overcrowded. The local lanes are just not equipped to take the inevitable increase in traffic, especially in view of the many cyclists who use the area.

I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible site for the building of a large number of houses. The planning committee have unanimously refused planning permission for houses to be built on that site so there is no reason to include it in the Local Plan. It cannot be built as there is no permission for it.

I object to the inclusion of the site formerly known as Wisley Airfield in the local plan as a possible site for the building of a large number of houses as it undermines the concept of localism and community cohesion and assent.

I especially object to the detrimental impact on transport, local roads and road safety. I specifically object to the proposition that the development will result in a meaningful detriment to the community’s ability to safely cycle or walk. The development is dislocated from public transport hubs and the residents will be entirely reliant on their cars to travel, as there are no transport links of any kind except narrow roads and the enormously busy M25/A3 junction, which could not stand an influx of thousands of extra cars.

Because the Olympic Cycle race and the Prudential Ride London-Surrey cycle race come through Ripley and past Ockham and Horsley, cyclists are encouraged to cycle throughout this area. The number of cyclists on these narrow roads has increased dramatically especially on Saturday mornings, coincidently the favoured shopping time for most people. I object to the addition of any extra cars that will be an undeniable danger to these cyclists; discouraging cycling in direct contravention of the governmental aspirations to encourage it both as a sport and mode of transport.

Wisley Gardens has proposed an expansion which will increase visitor traffic to a level that will already increase more than it stands today and so I object to any proposal that will increase the traffic any further and put an already over populated road junction under even greater strain making long stationary queues a probable permanent feature of this junction.

I object to the detrimental effect the development would have on the character of the area. Houses in Ockham are old, vernacular, set back from the road, built in hollows or behind trees, are a maximum of two stories, with perhaps an attic.
conversion, and very sparsely arranged in terms of number of houses per hectare; it is part of our local culture and heritage. This development is scheduled to be built on the crest of a hill, is urban in nature, and has a population density equal to or greater than the most congested parts of London. It will include units up to five stories high; twice the height of anything in the area. I strongly object to the detrimental effect the proposed development will have on the environment and the various sites of special significance that border it.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**Comment ID:** PSLPS16/6805  **Respondent:** 15274913 / Simon Osborn  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. I urge the council to look more imaginatively at use of brownfield land. For example, much land currently used as retail is likely to become vacant in the years to come.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the building of any homes in this Green Belt area which has a lovely rural character. I live in the London/Surrey borders and often come out here walking. I am a keen birdwatcher and nearby Ockham heath has valuable, protected wildlife such as nightjars. I have been on evening walks on Ockham heath to see nightjars with the Surrey Wildlife Trust. A forward-thinking council would be working with Surrey Wildlife Trust not just to protect surroundings areas from development, but to expand Ockham heath and turn the ‘airfield’ back to heathland as it once was. Already a huge amount of this internationally valuable habitat for wildlife has been lost. An estimated 80% of all the UK's lowland heathland has been destroyed (source: RSPB). This is valuable for wildlife but walking in this lovely area also improves my quality of life, physically and mentally. Surrey needs to protect its countryside as an asset not build new homes in completely inappropriate places. I am also a regular visitor to the Black Swan as our cherished country pub. With this development it would be a ‘country pub’ no longer.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs. It is wholly inappropriate, thought up by a faceless developer who I understand is acting through a Cayman Islands company, removed from public scrutiny. The developer should be ashamed of this way of acting, hiding from the public, which shows that pure profit is their motive. It is greed and the pursuit of short-term profit. If this development is permitted we will only realise the damage that has done after it is too late and the special rural character of this part of Surrey (just about clinging on after the A3 and M25 have been driven through) has been destroyed.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. This is simply not credible. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. This has pollution and climate change impacts. Surely the council has a duty to site major new developments in areas served by public transport?
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object strongly to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI). An estimated 80% of all the UK’s lowland heathland has been lost (source: RSPB). Surrey has much of what remains. Ockham/Wisley heaths have already been cut in two by the A3 and M25. It would be extraordinarily destructive to build a huge new housing development next to what remains. The council should be working to enhance what is left. A forward-thinking council would be working with Surrey Wildlife Trust to convert the old airfield back to heathland as it once was.

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

In summary, it is wholly inappropriate to build this size of development on this greenfield, green belt site. I am surprised that this site remains in the strategic plan. To an outsider, it appears to be yet another case of a greedy developer (in this case acting through a Cayman Islands company away from public scrutiny and through cowardly anonymity) bending a council’s ear to persuade the council that short-term financial gain should be placed ahead of a sensible, sustainable...
future for this area that will preserve its character and enhance the life of residents and regular visitors such as myself. I urge the council not just to remove this site but to work with organisations such as Surrey Wildlife Trust and the RSPB to prevent more damage to Surrey heathland and work to restore what has already been destroyed.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

116. RPC has had the opportunity to see the Report of Richard Harwood Q.C. prepared for Wisley Action Group. RPC wishes to adopt the views expressed in the Report and accordingly agrees that the allocation is unsound. This report is attached, for reference.

117. Accordingly, RPC objects to the allocation of Land at Wisley Airfield and recommends that the Plan should be modified and the allocation for housing should be deleted in its entirety.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7875  Respondent: 15280737 / Miller Developments (David Milloy)  Agent: The Chine Consultancy Advice Ltd (David Pugh)

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

The former airfield at Wisley is identified as a site of Medium Green Belt Sensitivity based on the four purposes of the Green Belt adopted as the assessment criteria in the GBCS. This however down plays the contribution the site makes in terms of ‘openness’ which is one of the principal attributes of any Green Belt.

Although the site is considered to be a previously developed site, the quantum of above ground structures on the site is limited and only they currently impact on the site’s openness; the former runways in fact contribute to its open character. As a consequence, the Green Belt designation of the site is significant to the surrounding settlements and when viewed from the A3 and adjacent local roads. Miller would question therefore whether this site should be seen to be of medium Green Belt Sensitivity.

Whereas RHS Wisley was considered not suitable for insetting due to the contribution it made to the Green Belt (despite the level of development on the RHS site), the opposite conclusion has been reached in relation to Wisley Airfield which is considered to be an appropriate site for a new settlement as it is not part of the Borough that best serves the purposes of the Green Belt. Miller would argue that whilst the site’s development may not constitute ‘urban sprawl’ it clearly and fundamentally represents and incongruous encroachment into the Green Belt and the openness of the countryside. This clearly demonstrates the subjective nature of applying the ‘four purposes’ of the Green Belt as the sole criteria for assessing the impact a potential a development might have on the Green Belt designation was flawed. It is also considered that the impact on the historic setting of Ockham Village and the Conservation Area, due to the separation that exists is inconsistent with how this criterion has been applied elsewhere (e.g. H8 was considered to impact on the Wood Street Village Conservation Area despite the PDAs benefiting from significant separation being maintained).

In addition to the above concerns, Miller would question whether taking direct access off the A3 Ockham Interchange off-slip is appropriate. The current Interchange provides for south bound off and north bound movements only and is deemed totally inadequate for a development of the scale proposed. An earlier proposal to serve 2,500 dwellings on this site considered far more significant improvements to the Ockham Interchange would be necessary to accommodate the development and that an all movements junction. It is considered that without an all movements junction even a development of the scale now envisaged will have a significant adverse effect on the character of the villages of Ripley and Ockham.

In terms of the sustainability analysis undertaken as part of the GBCS, it is noted that the Wisley Airfield site came near to the bottom of the list yet the Council is suggesting that the sustainability of this location can be be improved by enhancing public transport and cycle access along the existing highways to ‘key’ destinations such as Effingham Junction railway station and Horsley railway station and Ripley. It is unclear as to how these improvements could be achieved without impacting on the character of existing rural roads.

Miller considers that whilst the scale of development proposed has a significant critical mass the total lack of any strategic infrastructure and the absence of a workable access solution will add significantly to the cost of delivery of this project and that the improvements to highways infrastructure, which should be delivered in advance of construction (given the highly congested nature of the A3 and A3/M25 junction) will significantly impact on the delivery of housing in this location and any affordable housing contribution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/5544  **Respondent:** 15282625 / Kelly Graves  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):**

- Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
- Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
- Unacceptable Conservative Party links between the developers and the Council.
- No Green Belt “exceptional circumstances” presented.
- Not a brownfield site as stated – only 15% of it.
- Proposed SCC waste site ignored.
- Loss of farming land.
- Too near RHS Wisley and Thames Basin Heath SPA.
- SANG would harm on SPA.
- Unacceptable increase in air pollution.
- No existing public transport and stations miles away.
- No proper traffic data.
- Housing density far too great.
- Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
- Access confined to inadequate narrow lanes.
- Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
- Major impact on neighbouring villages, especially Horsleys.
- No assessment made of collective impact on area of this and 6 Horsley sites.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

  ◦ I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

    1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
    2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
    3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
    4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
    5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
    6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

  ◦ I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
  ◦ I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
  ◦ I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by
wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a
proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the site A35 the land at the former Wisley Airfield as the roads are all ready congestion it would only get worse and the 2000 homes are totally inappropriate and unsustainable development in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1362  Respondent: 15298849 / Elaine Burns  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

POLICY A35: Land at former Wisley Airfield

Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East and West Horsley.

It will impact on the sewage system, already at capacity, on the two railway stations where daytime parking is at capacity and on the shops of East and West Horsley where parking is nearing capacity, on the roads/lanes already severely damaged and narrow, on the medical services available and on the wildlife of the area.

Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country. I object to policy A35

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID:  pslp172/2388  Respondent:  15300513 / Paul Worsfold  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the plans for Three Farms Meadows in the draft Local Plan for after the initial plan was overwhelmingly rejected by the full GBC planning committee.

It is an unsustainable site identified in all versions of the plan because of the Infrastructure constraints of the site and the physical location.

The railway stations identified in the application are linked to the site by inadequate country roads. There have been a number of serious accidents within 200 meters of the site in the last year with current levels of traffic.

There is nothing in the application that considers the current traffic problems and congestion. EG Painshill junction of A245 and A3. Also the high numbers of cars and coaches visiting the world famous Royal Horticultural Garden Wisley opposite the site seem to have been ignored.

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc). The application suggests that Plough Lane (in a flood plain) and Ockham lane are a possible route for a new public transport service, linking new residents with many of the key services mentioned by the developer (shops, services, station, local hospital, etc). Use by cyclists of local narrow country lane will delay transport further. The applicant puts great weight on sustainable transport, walking and cycling which is ridiculous on narrow, twisting lanes with no footpaths.

There is very little employment available onsite. A majority of residents will have to travel to work. Few will be able find work within a reasonable distance using sustainable transport meaning vehicular forms of will be required

Suggestions that the use of Woking station as a major hub are laughable as the use of Wisely Road running past the RHS garden entrance and over the narrow canal and bridges (single carriageway) is limited to small numbers of vehicles11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

I note that the new plans are increased in area, the south of the site faces the Surrey Hills AONB and will have a negative impact on the vie

I note that the new plans include an additional 3.1 ha from the green belt without any justification . . .
I am a little concerned that the GBC has not explained their reasons for rejecting the original planning application in a timely way.

I am mystified by the transport analysis undertaken by the applicants' consultants. The data seems to contradict the figures supplied in the plans by a Government Transport department to modify Junction 10 to ease what they consider is a highly congested junction.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

I note that pollution levels nearby at Junction 10 exceed recommended levels. Building more houses and further motorised transport will exacerbate the problem for current affected residents.

I consider for the reasons listed above and numerous other reasons that this application be rejected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Objections to the continued inclusion in the Guildford Borough Council Proposed Local Plan (June 2016) of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation for the phased development of a new settlement of up to 2100 dwellings

I object to the inclusion of FWA/TFM in the draft Local Plan for the following key reasons:

1) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt.

   The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. FWA/TFM is prime green belt, and was given to the country for an airfield as part of the war effort, based on the promise that the land would be returned to the community after the need for an airfield had passed. This promise has been broken, and no effort has been made to see whether there is a moral or equitable duty to return this land to the existing community.

2) I object to the disproportionate allocation of housing in this particular part of the Plan. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

3) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no street lights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
4) I object to the detrimental impact on transport, local roads and road I specifically object to:

1. The lack of suitable public transport. The local rail stations of Effingham Junction and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

2. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

3. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

4. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

5. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

6. The assertion that the development will result in a meaningful shift to cycling and the development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

5) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

6) I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. In particular, two schools should not be planned in the FWA/TFM area which is known to have poor air quality, which will only be exacerbated by the planned development.

7) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

8) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 9th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Those reasons remain valid, and there are no adequate ways to overcome them.

9) Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council draft Local Plan and to the inclusion in the plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings.

I wish to make the following observations

- The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
- No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
- The plan calls for Ockham, a hamlet of 159 residences to be merged into a development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
- Object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
- Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
• There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
• There is lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge. In terms of traffic movement we are already at a standstill.
• Air pollution in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.
• Little or no consideration has been given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• In coming forward with this site no consideration has been given to the wildlife, some of which is already endangered.

My Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted. I believe I’m correct in saying no members on that committee were in favour of that application. If that was the case its obvious that any future application would receive the same decision and be turned down, not just on Green Belt grounds but also on the many other problems that exist in relation to this site which I have listed above.

This site should be removed from your Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

I have major concerns about this proposed development and have objected to prior planning applications at this location. In addition to the issues raised above relating to Junction 10 of the M25 and the lack of parking at both Horsley and Effingham Junction stations, I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

I strongly OBJECT to Policy A35.

I strongly OBJECT to this proposed policy for the reasons detailed in this letter.

a) The proposed development represents a fundamental breach of Metropolitan Green Belt rules:

The site forms part of the Metropolitan Green Belt. Under the NPPF, development on such Green Belt land is only permitted under 'very special circumstances'. GBC's Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that: *It has not been demonstrated that the benefits of the proposal amount to very special circumstances* such as to clearly outweigh the harm to the Green Belt and the other harm identified.

Ministerial guidance has repeatedly confirmed that unfulfilled housing need does not qualify as a very special circumstance. Whilst the developers' previous planning application was judged and rejected based upon the 2003 GBC Local Plan, the proposal to include this site within the 2016 Proposed Submission Local Plan does not fundamentally change the argument against it. Any removal of this site from the Green Belt can only be made based upon 'exceptional circumstances', which cannot be justified on the basis of unfulfilled housing need. If this was the case, then the entire Metropolitan Green Belt would already have become filled with housing.

Removal of this site from the Green Belt is totally against its rules, regulations and underlying spirit. The site location at the edge of the M25 circle represents a 'first line of defence' against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

Accordingly, I OBJECT to Policy A35 as a fundamental breach of the Metropolitan Green Belt rules.
b) This site does not meet acceptable levels of sustainability:

Sustainability Appraisal is a core concept of planning policy, yet this site is rated very poorly in terms of its sustainability.

The sustainability appraisal undertaken by GBC's consultant, AECOM, is presented in the Local Plan Evidence Base report 'Sustainability Appraisal (SA) of the Guildford Borough Local Plan' issued in June 2016. In their report AECOM have graded all Local Plan policy sites according to 21 different criteria using the conventional 'traffic light' system. Red colouring signifies poor sustainability. Of the six larger sites included in their evaluation, (those with proposed housing numbers of 1000 homes or greater), AECOM rates Site A35 as the very worst of all in terms of its sustainability. No less than 8 out of the 21 criteria are graded as 'Red' by AECOM for this site, more than any other large site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1788  Respondent: 15323041 / Jane Doherty  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Detailed reasons why this site has such poor sustainability include the following:

- There is currently no infrastructure whatsoever at this site, meaning that all water, electricity, gas and phone services will need to be newly established;

- New large-scale sewage disposal will be needed, a fact recognised by Thames Water, indicating it may take 3+ years to provide adequate sewage handling facilities for this site;

- There are presently no schools, medical services or shops within walking distance of this site;

- There is presently no local employment at this site and little after the development is completed;

- There will be a significant destruction of agricultural land arising from this development; There will be significant environmental damage from this development;

- There is no public transport currently serving this location;

- The nearest train stations are Horsley and Effingham Junction, both around 3 miles away and so too far to walk. Neither station currently has significant parking capacity available.

- Travel from this site will be primarily dependent upon motor vehicles. Any new site so dependent upon motor vehicles for transport cannot be considered as being 'sustainable';

- New access roads will be needed and significant changes proposed to the surrounding road network, leading to further pressure on over-crowded rural roads and increase in the traffic congestion in nearby settlements;

Whilst some of these issues may be mitigated, e.g. by building new schools, medical facilities, etc, others such as the environmental issues and infrastructure impact may not. This proposal, fundamentally, represents an attempt to create a large-scale new settlement in a poorly-sited green field location. However, as the GBC's own consultant has demonstrated, this site does not reach acceptable minimum levels of sustainability.

Accordingly, I OBJECT to Policy A35 on grounds of its unacceptable sustainability.
c) The site will have a severe impact on local traffic & infrastructure:

The proposed development will have a severe adverse impact on road traffic in the surrounding area. This includes East Horsley where high volumes of additional traffic are likely from the residents of this new settlement accessing East Horsley's two stations, shops and nearby schools. Most of the rural roads in this area are narrow winding 'lanes' - a term used in a recent local public meeting by John Furey, senior SCC councillor for Infrastructure to describe East Horsley's through roads. Many of these 'lanes' are without pavements for large stretches, whilst the principal through-roads of Ockham Road South and Forest Road pass along unlit residential areas so narrow that two buses cannot cross in many sections of these 'lanes'.

The road closures and junction changes being proposed to accompany this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which already suffer from traffic congestion at peak hours. The further increase in traffic congestion at the A3-M25 intersection would only exacerbate an existing problem for the highways authority - we understand Highways England have repeatedly expressed serious concerns about this development.

Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity. The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel there and back to these stations lacks credibility. Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.

Accordingly, I OBJECT to Policy A35 on grounds of its severe impact on local infrastructure.

d) There are damaging health & safety implications arising from development at this site:

The site is located close to the junction of the M25 and A3, one of the busiest road junctions in the country. The Nitrous Oxide ('NOx') emissions recorded around this area are extremely high and will affect residents living at the proposed site. The proposal to build new primary and secondary schools at this location is also contrary to government policy prohibiting the building of schools on sites in areas where there is high NOx.

In rejecting the previous planning application by the developers, the GBC Planning Officer cited the "failure to provide adequate information on NOx emissions and nitrogen deposition and to provide any information on acid deposition" as one of the grounds for this rejection.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse health & safety implications.

e) The environmental impact on protected wildlife will be substantial:

GBC's Land Availability Assessment which supports Policy A35 states that the site lies within the 400m-5km 'Zone of Influence' of the Thames Basin Heaths Special Protection Area ('SPA'). This is not correct. The site is immediately adjacent to Ockham & Wisley Commons, an area designated as a Site of Special Scientific Importance ('SSSI'), which forms one part of the Thames Basin Heaths SPA and much of the site lies within the 400m Exclusion Zone where new building is effectively prohibited.

The SPA was set up to provide protection for rare and threatened birdlife in certain lowland heath locations, the provisions of which were agreed by GBC in its 'Thames Basin Heaths SPA Avoidance Strategy'.

This strategy establishes zones to protect the SPA from the impact of new development, particularly from the damage caused by pets (dogs, cats, etc) of local residents to the habitats of threatened ground-nesting birds. Land within 400m of the SPA is designated as an 'Exclusion Zone' where "there will be a presumption against additional new dwellings". Since
the Wisley Airfield site is immediately adjacent to Ockham Common for a significant length, much of this site falls within 400m of the SPA Exclusion Zone.

The remaining portion of this site falls within the 400m - Skm 'Zone of Influence' set out under the SPA policy, which requires developers to contribute a new SANG ('Site of Alternative Natural Greenspace') to mitigate for potential damage caused to the SPA from new development -the size of the SANG is a function of the scale of the development. In their previous planning application the developers proposed that the land within the 400m Exclusion Zone would provide their SANG contribution. If accepted as a SANG, this would only encourage the 5000+ residents of the new settlement to allow their pets access into this space, therefore defeating the objective of the SANG mitigation.
