We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

We wish to **object** to the inclusion of Blackwell Farm as a development site.

The area merits AONB status according to the independent landscape study you are aware of.

Traffic is already a massive problem on the A3 around the hospital especially but not only at peak times. The development will add to this congestion unnecessarily, and spread it to nearby residential areas. This ignores independent expert traffic studies of which you are also aware. Air pollution in nearby areas already exceeds EU safe limits with implications you well know for the health of children especially.

**Section page number** 724 of 941  **Document page number** 725
I wish to object to the development of 1800 homes at Blackwell Farm, on land which is an Area of Outstanding Natural Beauty. Also part of the land is in the Green Belt which must be preserved for future generations. A recent land evaluation has assessed Blackwell Farm as being outstandingly beautiful that merited its inclusion in the AONB and as such it should remain undeveloped.

The existing road network between the Research Park and the A3 is already heavily congested and cannot take the increase in traffic volume which would be caused by this development.

The existing road infrastructure which already serves the Research Park, the Hospital, the Sports Park, the University, Tesco and Park Barn would need to be increased in capacity, which would appear to be a physical impossibility.

If the vehicular access via Down Place is to be used, then additional traffic will cause chaos on the A31 which is already heavily congested. Until Highways England have issued their proposals for improvements to the A3, A31 and road junctions which serve Guildford then no further consideration should be given to the development at Blackwell Farm. The housing developments in Ash will mean that more traffic will use the A31 and A323, so this will cause, cumulatively, severe transport problems on roads to the west of Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate?  ( ), is Sound?  ( ), is Legally Compliant?  ( )

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I have some serious reservations and must protest at the proposed plans to expand the area of the Surrey Research Park and Blackwell Farm.

I commute into the Surrey Research Park from Hampshire, proceeding north up the A3 into the Guildford area, and have had enough of the current situation, let alone any future negative impact caused by further development in the area.
Just today I have been witness to a number of potential incidents that are already not being addressed. These observations typically include, but are not limited to:

- The Tesco's roundabout junction coming off the A3. I’ve seen wing mirrors ripped off and bumpers scraped off the cars that have to sit half and half on the A3 because the slip road is static and filled with traffic.
- The junction coming off the Tesco's roundabout to proceed west on Egerton Road where the outside lane of cars continuously cut up those on the inside, but do so on the very exit of the roundabout which is exceedingly dangerous. This part should be widened or the priority of lanes needs addressing.
- At this same junction there have been accidents involving pedestrians trying to cross where it is exceedingly busy. Either remove the possibility of crossing or provide a safer means for pedestrians to cross by way of bridge or underpass.
- Proceeding west across the junction from Egerton Road into Gill Avenue where the traffic is funnelled into a single lane simply does not work. I appreciate that this may well be a hospital road but the fact remains that a great number of businesses are in the Surrey Research Park and they require access. This would benefit from an additional lane and you should consult the hospital on the matter. It may also be a consideration to add access into the research park from the back of the hospital through from Park Barn.
- As a matter of etiquette, cars are not funnelling into the single lane at this point nicely and is a source of much road rage each day for many drivers. Perhaps a sign to remind people?
- Cars actively using the hospital entrance access road as a shortcut to circumnavigate the traffic on Gill Avenue and cut in further up. I'm sure you can appreciate how ridiculous and unnecessarily dangerous this is.
- For the underpass on Egerton Road, cars are accelerating down the outside lane going West to then cut up those queuing on the inside lane who are waiting to proceed across the grid locked roundabout. They do so in a very aggressive fashion and I'm surprised we've not seen a great deal more accidents.
- On the same underpass, people (possibly students) are walking underneath alongside the road using the narrow strips of pavement that are there. As a driver, this makes me nervous as I don't believe pedestrians should be in such close proximity to moving vehicles.

Whatever research you've done, it is flawed, and in no way considers the environmental impact or the sanity of those commuting in and around the area. The potential effect is that you risk businesses moving away from the area, probably to Hampshire, because the well being of their staff is also being affected.

Adding more commuters into the area without addressing the existing problems is unsafe and ludicrous. You will be affecting rush hour journey times, suffocating local businesses and their ability to function, as well as making it harder for emergency services to gain access to the hospital. As such, myself and many others would like to state the following:

We object to Guildford Borough Councils changes to to the draft Local Plan and the inclusion of Blackwell Farm as a development site (policy A26 and para 4.1.9.), which:

- Directs more office space to an extended Business Park (Policy E4), which will increase peak-time congestion, particularly around the Hospital and A&E, and will also encourage rat-running through residential areas.
- Disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England's forthcoming boundary review. (Para 4.3.8.).
- Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development. (2.14a).
- Adds to air pollution in neighbouring areas, which already exceeds safe EU limits for Nitrous Oxide (A26, Key considerations (7)).

Please address these concerns and drop your future development plans in their current form.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to object to the proposed development of 1,800 homes at Blackwell Farm site (at the foot of the North side of the Hog's Back).

I live in the beautiful village of Compton and I feel very privileged to live here, after having moved from London. Sadly the traffic through Compton, both day and night is horrendous. It is continuous and it has been reported that the levels of Nitrogen Dioxide are consistently above the EU legal limit so any increase in traffic levels through Compton, such as the proposed access road to Blackwell Farm, will make this situation worse. Also, as you know, the site is dependent on a new access road from the A31 Hog's Back to the hospital roundabout at Everton Road, with a new signalised junction on the A31 at the entrance of Down Place, at the top of Down Lane. Compton cannot cope with the traffic as it is. Everyone avoids walking down The Street (the main road through the village) as cars and heavy articulated lorries are too close for comfort.

Also, the Surrey Hills is an Area of Outstanding Natural Beauty. I feel it is my moral duty to protect this beautiful ancient woodland and the wildlife that is dependant on it for our's and for future generations. We are privileged to have such amazing wildlife and beautiful green land, why would you want to destroy this? Something that once done is irreversible. I do not believe that you have considered the long term consequences of your decision. Great, have lots of houses, but what of people's mental health and wellbeing?

**Policy A26: Blackwell farm, Hogs Back, Guildford**

Network Rail have worked closely with Guildford Borough Council and other interested parties on a potential station within this site allocation. A GRIP 2 study was commissioned by Guildford Borough Council that has looked at a location within this site and one within **Policy A59** as potential new station locations.

We will therefore continue to work with the proposer of the new station as required and necessary to ensure that railway requirements are taken account of.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to Guildford Borough Councils changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site (policy A26 and para 4.1.9.), which:

- Directs more office space to an extended Business Park (Policy E4), which will increase peak-time congestion, particularly around the Hospital and A&E, and will also encourage rat-running through residential areas.
- Disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England's forthcoming boundary review. (Para 4.3.8.).
- Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development. (2.14a).
- Adds to air pollution in neighbouring areas, which already exceeds safe EU limits for Nitrous Oxide (A26, Key considerations (7)).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1919  Respondent: 17291745 / Sophie Woolliscroft  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- Disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- Directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- Adds to air pollution in neighbouring areas, which already exceeds safe EU limits.
- Further residential houses in this area will continue to swell the already overloaded peak time traffic on many major roads in the area.
- Trains to London from Guildford station are already very over-crowded as peak-time, many times you cannot even get onto the train service never mind trying to get a seat. More people living in the area and using these facilities will further compound the problem.
- Public facilities such as schools & leisure centres are currently very busy and over-crowded, significant population rises in the local area will create an overwhelming burden on their resources & facilities.

I cannot emphasise enough the traffic problem that already exists around Guildford in general, many locals have to spend hours stuck in this traffic whilst they attempt to go about their daily lives.

In my opinion, there should be no further significant increase in housing in the area until all roads are upgraded to cope with the existing levels of traffic and then a sensible-plan put in place and delivered in order to cope with the expected increase in traffic. This must be Prior-To building any significant further housing, not agreed to on a promise with a developer and then not delivered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8].
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas such as Compton village.
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]. Accessing the A31 from the top end of Down lane will become impossible.
- adds to air pollution in neighbouring areas, which already exceeds safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I wish to officially log that I object to Policy A26 and the inclusion of Blackwell Farm and surrounding green belt land as a development site [Policy A26 & para. 4.1.9]

1) Disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]. This has been ignored by the council and the local plan.

2) Directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas. This additional office space is not required and will add additional unnecessary burden on local housing needs.

3) Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]. Traffic is already a major problem in Guilford and this development will make travel down the A3 and Hogs Back and surrounding areas unbearable.

I object to the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9] because it:

1. disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
2. directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
3. ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
4. adds to air pollution in neighbouring areas, which already exceeds safe EU limits for nitrogen oxides [Policy A26]

We act for Crimson Project Management Limited. This representation relates to the proposed allocation of land at BLACKWELL FARM- POLICY A46 & PARA 4.1.9. The draft Policy A46 proposed to allocate the above site for a residentially led mixed use development including a new primary school, secondary school and other development. Our clients object to this proposed allocation on the basis that there are more sustainable options available for the provision of additional housing and education facilities through a sustainable urban extension to Fairlands where there is an established existing community with local retail and community facilities already in existence and where an extension to the village would help sustain and enhance these facilities. It seems clear that the Blackwell Farm proposal has attracted significant objection on the grounds of highway and traffic impacts of the development on the local highway network. It should be noted that there are no highway objections to the provision of a new education facility at the Rokers Farm site at Fairlands. The Blackwell Farm allocation would also have demonstrably harmful landscape impacts on land which, as the draft policy itself recognises, is variously within an Area of Outstanding Natural Beauty and an Area of Great Landscape Value. Whilst situated in the Green Belt, the Rokers site in Fairlands would not result in the same impacts on national landscape designations, nor any other planning considerations that cannot be appropriately mitigated.
In the circumstances, the proposed submission draft Local Plan should be further amended to include an allocation at the Rakers site, Holly Lane, Guildford for a mixed use development including an education facility, housing, community and other facilities.

Policy A26 (Blackwell Farm)
I am writing to object in the strongest terms to the above policy in the Guildford Local Plan. I have had a home on the Hog's Back since 1936 and the enormous increase in traffic along what used to be a single-lane country road, before it was dualled, is hard to believe.

The suggestion that 1,800 new homes should be built at Blackwell Farm with access on to the A31 Hog's Back at a signalised junction and roundabout at the top of the Farnham Road is ludicrous. This stretch of the A31 westbound before it joins the A3 northbound is notorious for traffic jams and queues, not only during peak hours but throughout the day, sometimes for no reason other than volume of traffic but exacerbated by the slightest incident occurring on the A3 or in Guildford town. The pollution caused by this increased traffic will worsen the already high levels of Nitrogen Dioxide, well above the EU legal limit, which have recently been recorded at the A3 end of Compton village.

In order to have more housing available, Surrey University could free up the housing in and around the town, presently occupied by students, by building on their land at Manor Park which they removed from the Green Belt many years ago and since then have failed to meet their obligations as part of that development.

Further damage by the University to this nationally important countryside should be prevented at all costs while other options are available to them, particularly by fulfilling their existing obligations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We object to policy E4 Research Park expansion and we object to policy A26 Blackwell Farm.

The Council are proposing development on AONB, AGLV and Greenbelt land where there is no special circumstances and where such development will add to congestion and air quality issues which are already of serious concern to Residents and Businesses.

The Council objected to Waverley Plans for development at Dunsfold siting the impact of extra traffic, congestion etc to the A3 and also the Council object to development of a School and Housing at Fairlands (Rokers) in Worplesdon as inappropriate development which failed to mitigate its impact on infrastructure and the impact on the habitat of flora and fauna and the Council planning officers referred to the fact that the site was in the Greenbelt where there is a general presumption against inappropriate development. The Council Officers further stated that large scale residential development and a new school are inappropriate development which could only be approved in very special circumstances where the benefits outweigh the harm the development would cause. The Council Officers stated a school and housing do not amount to the very special circumstances necessary to justify grant of a planning application.
However the Council include in their draft plan building on Blackwell Farm an area of outstanding natural beauty, Area of great landscape value and all in the Green Belt a school or schools and housing. No special circumstances are associated with this proposed development. Any attempt to argue economic necessity for expansion of the Research Park is negated as there is sufficient land and surface car parking at the existing Research Park and Manor Farm to allow expansion for the next 25 years without allocating more greenbelt land. The Research Park is a name only as many businesses on the existing park are just that businesses and with no great attachment to the University or research.

We therefore find it hypocritical of the Council to include Blackwell Farm in the revised Draft Local Plan. The extra traffic, congestion, delays and further damage to the air quality development at Blackwell Farm which would directly impinge on the two most congested junctions in Guildford at Egerton Road / A3 and A31 /A3.

We object to Guildford Borough Councils changes to the draft local plan and the inclusion of Blackwell Farm as a development site (policy A26 & para, 4.1.9) which Disregards an independent expert landscape study, which demonstrates that part of the site merits Area of outstanding natural beauty status following natural England's forthcoming boundary review (para 4.3.8) Directs more office space to an extended business park (policy E4) which will increase peak time congestion particularly around the hospital and A&E and will encourage rat running through residential areas Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and questions the viability of the development (2.14a) Adds to pollution in neighbouring areas, which already exceeds safe EU limits for nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to record my objection to the inclusion of Blackwell Farm as a development site in the revised draft Local Plan. This is an area where my wife and I walk on a regular basis and the proposals will negatively affect the area as follows:-

i) There will be additional congestion particularly at peak time around the hospital and beyond. Until recently I worked at the Surrey Research Park and although the introduction of the traffic lights improved the situation it is still congested on a regular basis and this development will add significantly to the problem.

ii) The traffic will add to an existing issue with air pollution in the area.

iii) There is a strong argument that part of the area should have already been categorised as an Area of Outstanding Beauty. This development appears to be totally ignoring this

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We understand that the infrastructure schemes associated with this proposed 1,800-home development will wreak havoc on the surrounding road networks, affecting many roads and residents in Guildford and Waverley.

We understand that the site depends on two new schemes:

- Widening of the A3 through Guildford
- A new western link road from the A31 to the Tesco Roundabout at Guildford

Guildford Borough Council’s own traffic modelling has shown that both these schemes will result in a surge in traffic along the B3000 in Puttenham, Compton, Farncombe, Binscombe and Artington (with similar traffic increases along the parallel Charterhouse/Hurtmore and Priorsfield roads), as well increased traffic and congestion on the A31.

Compton, which will experience a 15% increase in traffic in the northbound direction alone, already has air quality problems and nitrous dioxide levels well above the EU legal limit have been consistently recorded over the past three years. The Parish Council has requested that The Street is made a Air Quality Management Area.

Aside from the congestion problems, a six-lane motorway through Guildford will cause severance, as well as increased noise and air pollution; whilst the new “western link” road will slice through the Surrey Hills Area of Outstanding Natural Beauty, through 18th century parkland and a belt of ancient woodland.

We are therefore writing to register our continued objection to the Policy 26 Blackwell Farm site allocation. Inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9]:

1. disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
2. directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
3. ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
4. adds to air pollution in neighbouring areas, which already exceeds safe EU limits for nitrogen oxides [Policy A26].

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Directs more office space to an extended business park (policy E4) which will increase peak time congestion and encourage rat-running through residential areas which is already a major problem. Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development (2.14a). Adds to air pollution in neighbouring areas, which already exceeds safe EU limits for Nitrous Oxide.

Disregards an independent landscape study which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review (4.3.8)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site (Policy A26 & para. 4.1.9).

Guildford Borough Councillors were elected on the promise that they would protect the Green Belt. Instead that promise is being sacrificed for financial gain for the University of Surrey and Guildford Borough Council (in the form of the Government’s New Homes Bonus) by including Blackwell Farm as a development site to extend the Surrey Research Park (Policy E4) and build 1,800 houses, a school, medical centre, etc. However, the cost to residents, businesses, the viability of Guildford town and the environment will be very high.

The University has reneged on its promise to supply student accommodation on its own campuses which would free up a proportion of less expensive housing in the town, occupied by students. The Council would benefit from the additional Council Tax income for many years from private individuals; no Council Tax is paid by students.

Development of the Blackwell Farm site will significantly add to the peak time traffic congestion on the A31 and A3 and ignores independent expert traffic studies on the viability of the development (2.14a). Adding a new link road will add to the traffic chaos for commuters which already exists on the A31 and A3 and add to the congestion at the Tesco/Royal Surrey County Hospital roundabout. In the event of a major incident access to the Hospital for ambulances would be severely affected. It is already difficult for patients trying to meet hospital appointment times with the traffic congestion.

Accidents are caused by drivers trying to cut in from the fast lane on the A31 into the lane accessing the A3 when frustrated by delays. There is no hard shoulder on the A31 or A3 as a refuge for drivers or access by emergency vehicles.

Weight should be given to complying with safe European Union limits on the increased air pollution caused by the additional traffic needing access to the development site; the suggestion that employees at the Hospital and the Research Park would be provided with local housing is flawed as the housing would not be affordable, especially for nursing staff.

The air pollution is already evident, especially at peak times when traffic is virtually stationary for many miles along the Hog’s Back; we can see the fumes rolling down the north side of the Hog’s Back; it is worse in winter conditions. The proposed new major route would cut through a belt of ancient woodland and remnants of historic parkland and disrupt wildlife and habitat. The development would affect the European Union’s Thames Basin Heath Special Protection Area for birds such as the Dartford Warbler and Nightjar. There will be significant light pollution in the area.

The proposed development will result in large scale loss of Green Belt, cause irrevocable harm to this beautiful landscape on the edge of the Surrey Hills Area of Outstanding Natural Beauty, contrary to the Government’s intention to protect Green Belt and disregards an independent expert landscape study which demonstrates that part of the site merits AONB status following Natural England’s forthcoming boundary review (para. 4.3.8). When applying for planning approval on Manor Farm, the University advanced an argument that planning should be approved under “exceptional/special circumstances”. It is questionable what “exception/special circumstances” the University would apply to have approval for Blackwell Farm to be removed from Green Belt. Its marketing strategy is to create a “new garden neighbourhood for West Guildford”; it is hard to see how removing such a beautiful landscape will be improved by building on it.
Residents of properties along the Hog’s Back have no provision for safe access/egress on to the A31 with a speed limit of 60 m.p.h. Similarly the latest draft of the Local Plan also removes the provision for an alternative access to Beechcroft Drive and Manor Cottages. The junction is dangerous to all drivers travelling on the A3 and the residents of Beechcroft Drive. I object to the removal of this scheme (SRN6) on safety grounds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3784  Respondent: 17427105 / E Richings  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Blackwell Farm being included in this Plan as a development site (Policy A26 & Paragraph 4.1.9) which:-

Disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review (para. 4.3.8)

Directs more office space to an extended business park (Policy E4), which will increase peak time congestion, particularly around the hospital and A&E which would only add to the current serious congestion of traffic in the area of the A3 and A31 and will affect existing residential areas. Currently in the morning peak traffic period there is severe congestion. This hospital is a Major Incident hospital and fast access must be maintained at all times.

Ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development (2.1.4a)

Adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

In 2015 the National Farmers’ Union expressed alarm that our ability to produce our own food and be self-sufficient had dropped from 80% in 1980 to 62%. This will drop to 53% by 2040. As world population grows there is no way that we should be building on good quality farm land. Especially commercial property. A recipe for disaster. Again you must listen to us.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
2.1 Policy A26 in the Draft Local Plan 2017 provides for development at Blackwell Farm on the Hogs Back, Guildford. The allocation is still a residential led mixed use development outlined to provide for 1,800 homes but with a minimum of 1,500 homes to be delivered within the Plan period. The employment land is reduced by 1,000sqm to 30,000sqm, which will still form a 10-11ha extension to the west of the current Research Park.

2.2 The allocation would also still provide a range of other ancillary uses including a two-form entry primary school, retail units across the A use class and D1 community buildings but will now also need to provide a secondary school of up to six-form entry of which two forms are needed to serve the housing on the site.

4.1 The transport infrastructure requirements outlined for Policy A26 within the Draft Local Plan 2017 are outlined below with the corresponding cost estimate in italics from the Infrastructure Schedule in Appendix C of the GBC Draft Local Plan 2017.

i) Vehicular access to the site allocation will be via the existing or a realigned junction of the A31 and Down Place access road which will be signalised, and from the site to Egerton Road, preferably Gill Avenue (LRN2 - £5 million and LRN 3 - £5 million).

ii) The design of the improved Down Place access road will be sympathetic to its setting;

iii) A through vehicular link which will be controlled is required via the above accesses between the A31 Farnham Road and Egerton Road to provide a new route for employees and emergency services to the Surrey Research Park, the University of Surrey’s Manor Park campus and the Royal Surrey County Hospital, as well as a choice of vehicular access for the new residents/occupiers. This will reduce impact on the A31/A3 junction, in advance of the delivery of Highways England’s A3 Guildford scheme (LRN4 - £20 million);

iv) Developer to provide the western route section of the Sustainable Movement Corridor on the site and make a necessary and proportionate contribution to delivering the western route section on the Local Road Network, both having regard to the Sustainable Movement Corridor Supplementary Planning Document (SMC1 – proportion of £20 million);

v) A significant bus network to serve the site and key destinations including the existing western suburbs of Guildford and the town centre. (BT6 – £TBC)

vi) Necessary and proportionate contribution to delivering Guildford West (Park Barn) railway station (NR2 – proportion of £10 million);

vii) Interventions which address the potential highway performance issues which could otherwise result from the development (LRN5 £5-10 million).

4.2 Compared to the same list of infrastructure which was provided last year in the previous iteration of the Local Plan there has been an increase in the level of transport infrastructure requirements which the site must provide, namely in the form of the bus network as per scheme BT6 relating to the Sustainable Movement Corridor.

4.3 The transport infrastructure costs associated with the site outlined above now amount to £70-£80 million to deliver just 1,500 residential units in the Plan period (1,800 in total) and 30,000sqm of commercial mixed-use development. The proportionate level of contribution towards the Guildford West (Park Barn) railway station and the western route section on the Local Road Network are as yet unknown at this early stage.

4.4 However, the Blackwell Farm site is the only development site in the Guildford urban area which has the specific written requirement to contribute to the new Park Barn station and since it is indicated as being solely developer funded in the Infrastructure Strategy (Appendix C) of the Draft Local Plan 2017 it is assumed that the Blackwell Farm allocation would need to contribute a significant proportion of the £10 million cost. The western section of the Sustainable Movement Corridor is also only noted on the requirements list for the Blackwell Farm allocation although there is money available through the Local Growth Fund to contribute to this, therefore it is estimated that the obligation would be circa 50% of the total cost of this scheme. This would make the total transport contributions for the Blackwell Farm development around £60 million.
4.5 Concern is therefore raised that the level of transport infrastructure costs which the Blackwell Farm site is required to deliver (~£35,000 per unit) as well as the new secondary school on top of the numerous other costs of infrastructure mitigation is disproportionate to the size of the allocation and brings into question the deliverability and financial viability of the allocation in the Local Plan period contrary to Paragraph 173 of the National Planning Policy Framework (NPPF) as previously discussed in RGP’s previous report TN01 (June 2016).

‘Through vehicular link’ between A31 and Gill Avenue

4.6 Policy A26 now states that the through vehicular route between the A31 Farnham Road and Egerton Road will be ‘controlled’ and will be for employees and emergency services to the Surrey Research Park, the University of Surrey’s Manor Park Campus, Royal Surrey County Hospital staff, patients and visitors as well as for residents on the site. This is a significant and wide range of people who will be permitted to use this route. The method of control is an integral part to the deliverability of the whole site allocation to ensure that it is not used by ‘rat-running’ traffic avoiding the A31/A3 junction and this is a concern that was previously highlighted in RGP’s TN01 (June 2016).

4.7 SCC has indicated that ANPR cameras will be the preferred method of control for the vehicular link road. RGP has looked into the use of ANPR cameras to carry out this type of enforcement and a scheme in Cambridge is known to exist at the Cambridge Biomedical Hospital to deter rat-running vehicles attempting to avoid congestion between the M11 and central Cambridge.

4.8 It is understood that the Cambridge scheme consists of cameras positioned at each of the 4 access points to the Hospital site and the system is based on the time period that cars are recorded as taking between any 2 of the 4 cameras.

4.9 If the duration of stay that the ANPR cameras record associated with any car is below a set period of time which would accord with a ‘through traffic’ speed then the system assumes they were using the Hospital roads as a short-cut and they are charged a fine of £50. If there is a longer dwell time then it is assumed that the cars are legitimate patients/visitors to the Hospital and therefore no fine is issued; additionally, the staff that work in the Hospital are registered on the system so that they do not get fined.

4.10 The roads are understood to be privately owned by the hospital estate and the cameras are owned by the site’s private parking contractor, however, the fines are enforced by Cambridgeshire Police.

4.11 This is a small-scale example of the type of system that would need to be implemented on the Blackwell Farm link road, but with it raises a series of questions related to site deliverability such as:

i) Will the developer provide for the financial enforcement costs of the link road restrictions for the lifetime of the road i.e. in perpetuity? Is this included within the £20million cost for LRN4?

ii) Will Surrey Police be expected to provide the enforcement of the ANPR in perpetuity for the lifetime of the road?

iii) How will all of the people who will be granted access to use the road (residents, University staff and students, Research Park employees, Royal Surrey County Hospital staff, patients and visitors) be able to be differentiated from through traffic?

4.12 Whilst these are operational questions and could be considered as relevant for discussions during a future planning application, they are also considered fundamental to the successful deliverability of the vehicular link road and ensuring that it does not become an attractive ‘rat-run’ for through traffic between the A31 and the A3, but still delivers the aim of being a link road to serve all of the desired uses.

4.13 As discussed in further detail in RGP’s TN01 (June 2016), the implications on the A31 Down Place junction and the Egerton Road junctions of all-purpose through traffic using this route have not been modelled in the strategic model and it is imperative that the link road restrictions operate successfully to ensure that other junctions are not adversely impacted.

EGERTON ROAD AND SURROUNDING AREA

5.1 The Egerton Road Roundabout and the Egerton Road/Gill Avenue junctions are forecast to experience an increase in vehicular traffic which would push the ratio of flow to capacity over actual capacity based on the SHAR 2016 report.
This assessment is not understood to have included any specific assessment associated with the new station at Park Barn or any impact associated with the new secondary school on the Blackwell Farm site.

5.2 It is accepted that the SCC strategic model cannot model specific junction impact as accurately as microsimulation models such as LinSig and Junctions 8 and it is further acknowledged that this detail is not necessary for the high-level assessment required for a Local Plan. However, the true quantum of flows forecast to be generated by all of the Draft Local Plan 2017 aspirations should be incorporated to allow consideration of detailed mitigation to commence.

5.3 The Sustainable Movement Corridor (SMC) Update published in February 2017 by GBC identifies that mitigation options are already being considered for providing additional capacity at the Egerton Road Roundabout and its junction with the A3. The process of considering detailed mitigation to inform the strategic allocations is supported and welcomed, but concern is raised that the options are being considered without the traffic impacts from the Park Barn station and the new secondary school being incorporated.

5.4 The new Park Barn station southern access for instance will likely take its primary access from the western side of Egerton Road to the east of the Hospital. The position of this access will likely result in an increased demand on right turning vehicles at the Egerton Road/Gill Avenue signal controlled junction. Increased provision for right turning vehicles in this location will consequently reduce the capacity of the junction for other movements which may well impact on the new designs for the Egerton Road Roundabout, the SMC and the wider local highway network.

5.5 Additionally, the provision of a new secondary school on the Blackwell Farm site (relocated from the Land to south of Normandy and north of Flexford site allocation [previous Policy A46] which has been removed in its entirety) will ultimately draw vehicular traffic through the Egerton Road junctions. The Blackwell Farm allocation (Policy A26) wording states that the new secondary school would be ‘up to six form entry of which two forms are needed for the housing on the site and the remainder for the wider area’. This indicates that two-thirds of the secondary school children attending the new school will come from off-site. Assuming that there are 30 children per form, 6 forms per year and 5 years in the school (i.e. Years 7-11) there would be a 900 student capacity at the school of which 600 students would need to commute in from outside the Blackwell Farm site each day.

5.6 Whilst the Sustainable Movement Corridor proposals and the new Park Barn station will undoubtedly assist some school pupils and staff in travelling to the new secondary school sustainably from other parts of the borough, there will still ultimately be a draw of vehicles through the Egerton Road junctions to the secondary school, particularly during the morning peak period, which has not been considered.

6.1 The Draft Local Plan 2017 has addressed some of the points which RGP raised in the previous Technical Note in June 2016, however there is still concern regarding the deliverability and viability of the Blackwell Farm allocation (Policy A26) for the following reasons:

i) The required transport infrastructure requirements of around £60 million to make the site acceptable are considered to be excessive in comparison to the scale of the development proposals and the viability and deliverability of the site are still questioned. Compliance with paragraph 173 of the NPPF is also raised;

ii) There are still operational concerns regarding how the through vehicle link will be controlled and how the enforcement will be carried out, by whom and whether it can effectively remove potential for ‘rat-running’ between the A31 and the A3 given the wide range of permitted users of the road;

iii) The deliverability of the scheme still requires third party land to access Gill Avenue and it has not been demonstrated that this is possible to acquire;

iv) The vehicular impact resulting from the requirement to now provide a six-form entry secondary school on the site whereby two thirds of the children would travel in from outside the Blackwell Farm site has not been included in the strategic traffic model and is not understood to be accounted for in the current Egerton Road detailed layout designs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I have viewed the previous Local Plan and current, although there has been a few minor changes to the proposal for Blackwell Farm /University Manor farm/Hogs Back area the current proposal is still in excess of what the road infrastructure and amenities can support. This year has seen an increase in the regular road incidents from the Hogs Back to Cathedral junction on the A3. The volume of traffic attempting enter the business park, Royal Surrey Hospital and university campus has grown dramatically in the past few years. This week whilst in term time has seen Madrid Road from Guildford Station through to past Tesco’s’ roundabout at a standstill. Made worse by the temporary closure of a road at the traffic lights forcing volume to travel by single carriageway. It is along these routes the proposed development at Manor Farm is shown to travel to and from the development, university, Royal Surrey Hospital and Guildford and beyond.

The proposed alterations with new access from Hogs Back will destroy open space and wildlife habitat not to mention an area of outstanding chalk land. For those who live in Onslow Village the pollution will increase as the warm air rises from the lower plain new town, noise levels which are on the increase from the A3 will multiply which will drastically affect the quality of life in the village. Recent decision by Guildford Borough Council to refuse planning approval for new homes and school at Rokers was reported by planning offices as “the application site is located within the green belt where there is a general presumption against inappropriate development “. The application proposes a large scale residential development and a new school both are inappropriate developments Inappropriate developments should only be approved where there are very special circumstances which clearly outweigh the harm that would be caused by the development “ the report goes on to say “In addition to the harm to the green belt the report identifies significant harm to the character of the area “ Those comments are even more applicable to Blackwell Farm/Hogs back.

When we moved to Guildford 11 years ago the traffic on the A3 would generally be noticed about 6:30 am now there is only respite between about 1 am to 4:00 am. Any development should only commence when road infrastructure and if approved rail improvements are completed. The Park & Ride at the Surrey Sports Park is under used, limited number of road users will divert off the A3 and use the facility. The greater number of cars and delivery vehicles using the single carriageway road will have a big impact on ambulances trying to arrive and depart Royal Surrey Hospital. With increase in commercial premises there will also be a greater number of delivery lorries travelling on the lacking road infrastructure. Many expensive studies have recently been undertaken without achieving a workable solution for the A3 or town centre gyratory.

With the increase volume of traffic on the Hogs Back/A3 many drivers now use Onslow Village as a rat run leaving at High View Road or the Chase travelling at speed through residential areas with infants and junior schools located in the village. Resulting in deterioration of the public highway especially in Manor Road. Should development proceed this situation will only get worse.

The previous Local Plan study of numbers of additional persons and home requirements was found to be inaccurate, the suggested numbers are guess work based on increase in students at Surrey University, possible new businesses based on the manor farm development and growth in current local population wishing to buy homes in the borough. The apparent need for commercial development in my opinion should be concentrated at Slyfield where with the proposed new road structure would reduce large volumes of traffic from the west of Guildford in particular the hospital/university and
already grid locked A3/A31 and Farnham Road. The proposed Slyfield Road links close to the A3 junction Northbound which would divert heavy goods vehicles away from residential areas and Guildford town centre roads.

Surrey University has more than sufficient land to develop for students approvals have yet to be commenced when built would reduce demand for rented property in Guildford making available for local workers and families. The University should be develop their land before any “Developers” bonus from sale of Blackwell Farm is paid into their coffers. Areas such as the open air car parks empty for long periods throughout the year, these car parks could be redeveloped with underground parking to meet demand with student accommodation in blocks of up to 5 storeys high which would not be detrimental to area. Students on site Campus with own facilities result less travel or use the park and ride facility. To develop the sites the University would need to raise commercial funding which apparently they are not prepared to consider as it is expensive and no immediate return. By selling Blackwell Farm as residential development land the value would dramatically increase over farmland, they want their cake and eat it! I appreciate a large number of local residents are employed at the University "more students + greater number of tutors and other employees + more road travel as many will be living in other parts of Guildford but preferring to travel by road for time convenience rather than local transport. The proposed train station is unlikely to reduce dependency on road network due to distance from proposed housing and commercial areas. Will probably benefit hospital staff and patients, although they would first have to travel to their local station and with poor bus services seems unlikely to have large take up.

The land bank already approved by GBC for development the University should be developed before other off campus sites. Surrey University could comfortably develop those locations and increase student accommodation by utilising the open space car parks which are vacant for much of the week and year. By building underground car parks with student accommodation above the land would be put to better use, reduce the volume of traffic and pollution. The University should be asked to seriously consider however there would be the commercial investment required which the University are unlikely to entertain. We believe the University should not be able to increase the number of students recently reported as an increase of 6,00 until they can accommodate students on the various campus, not to the detriment of residents many of whom own their own homes and will see the area West of change for the worse with over development, poor infrastructure and increase noise, pollution and traffic. The change in the environment would not bring any benefits to current residents, we fail to see anything in the Local Draft Plan which enhances the West of Guildford.

The proposed development to the West of Guildford is in excess of what the town requires and with very limited road infrastructure opportunities to dramatically improve the flow through Guildford on the A3 the area of the North Downs will be destroyed. Current problems would not be solved by the planned road layout alterations as the infrastructure is totally inadequate. Despite numerous surveys at great expense no realistic affordable practical proposal has been suggested. Road network must be the key to size of any development at Blackwell Farm. The past two weeks I have found it impossible to travel through Onslow Village to join Madrid Road and head towards A3 the village and surrounding roads grid locked 8:00-9:30 such issues will increase which has an effect on not just myself but others living in the area trying to get to work. Our quality of life has not been considered in the plan which is driven by seeking unsubstantiated annual housing targets.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I strongly object to Guildford Borough Council's changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site (Policy A26 & para. 4.1.9).

The proposal will cause irrevocable harm to the beautiful landscape on the edge of the Surrey Hill Area of Outstanding Natural Beauty and destroy Green Belt.

Any increase in development, extending the University's land at Manor Farm, would be inappropriate building growth on Green Belt and in the wrong place. The scheme, together with the proposed access road to the site, linking Guildford to the A31, will cause additional chaos and traffic congestion on the A31 and A3.

I live on the north side of the A31 Hog's Back. Residents in East Flexford Lane have already been affected by the closure of the gap in the central reservation of the A31 at the East Flexford Lane point. Since the closure in March 2017 residents in East Flexford Lane have been cut off from reaching their homes several times with the A31 eastbound towards Guildford being closed to all traffic and westbound during the re-surfacing work and no alternative route. Residents of Wanborough and Normandy were also affected. Due to the closure the fire services had a longer journey to tackle a recent field fire close to our property with large fields of combustible crops putting properties, residents and crops at risk. Residents had asked for provision for access at the gap for the emergency services to have facilities for such an event. Response times would be even more difficult at peak hours.

No slip roads, acceleration and deceleration lane provision has been made for owners of Properties along the Hog's Back accessing the A31 with traffic travelling in excess of 60 m.p.h. Further increase in traffic will create even more dangers for residents joining traffic at motorway speeds; pedestrians also cross the A31 to access the bus stops. Every weekday morning there is a queue of traffic into Guildford that stretches back for several miles. Adding a junction and proposed access road to the Blackwell Farm site, with proposals for 1,800 houses, a school, medical centre and expansion of the Research Park, will add an extra burden on an already overloaded road system. The impact on the local network and questionable viability of the development (Policy paragraph 2.14a) ignores independent expert traffic studies and common sense.

Already the Tesco roundabout and vital access to the Royal Surrey County Hospital is congested and approval of the University's plans will cause road infrastructure breakdown. The journey to the Hospital for ambulances with patients is already difficult at peak times.

The additional traffic will add to air pollution which already exceeds safe Eurorean Unit limits. When I drive up East Flexford Lane, it is clear to see the fumes rolling off the Hog's Back down the into the fields, especially at morning and evening peak times when traffic is stationary waiting to access the A3. The development will inevitably see the destruction of trees which are the lungs to counter pollution; the new proposed major route would cut through an ancient woodland and remnants of historic parkland.

The University has already covered most of the adjoining Manor Farm with housing, a veterinary centre, sports facilities for international events and an underused Park & Ride.

When the University of Surrey applied to have the Green Belt restriction on Manor Farm removed to enable it to expand its University and Research Park facilities on to this land, it evoked "Special Circumstances". Permission was granted, with assurances from the University to supply the 60% of its student accommodation on its own campuses. Instead the University has failed to implement the Planning Permission to build accommodation for students. Such action could release up to 1,700 local houses to meet local demands.

The University acquired planning permission for accommodation for students in Walnut Tree Close. This site could have provided housing for people working in central Guildford or using the train station, reducing car dependent travel.

The National Planning Policy Framework guidelines make clear the direction that should be followed on Green Belt protection and sustainability. Guildford Borough Council should adhere to this Policy and not approve development on Blackwell Farm for financial gain in the form of the Government's New Homes Bonus. Consideration should also be given to the loss of food production from Blackwell Farm which presently contributes to Britain's self sufficiency.

I trust councillors will honour their election promises and protect the Green Belt at Blackwell Farm by opposing plans to build on it.
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

1. The ESFA supports the clarification of requirements regarding secondary school provision in policies A25 and A26; and the clarification of requirements for developer contributions towards education provision in policy A29.
I object in the strongest possible terms to the following policies within the Draft Local Plan:

Policy A22 - Land North of Keens Lane

Policy A26 - Blackwell Farm

I do not believe that constraints have been properly applied to the Draft Local Plan in terms of the AONB, SPA/SSSI of Whitmoor Common, Green Belt, transport implications, flooding from surface water, lack of infrastructure, vehicular emissions and the proposed use of high grade agricultural land in accordance with paragraphs 112, 119 and 166 of the NPPF.

The SHMA numbers used by G L Hearn appear to be inflated due to discrepancies in the student numbers. This vital piece of the Evidence base appears to be fundamentally flawed.

Guildford is being targeted as a growth hub, but due to the town's topography and the numerous planning constraints which should, but have not been applied, I do not consider the proposed plan to be sound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>40905</td>
<td>Blackwell Farm, Hogs Back, Guildford</td>
<td>The water network capacity in this area is unlikely to be able to support the demand anticipated from this development. Strategic water supply infrastructure upgrades are likely to be required to ensure sufficient capacity is brought forward ahead of the development. The developer is encouraged to work with Thames Water early on in the planning process to understand what water infrastructure is required to support the development.</td>
<td>Infrastructure at the wastewater treatment works in this area is unlikely to be able to support the demand anticipated from this development. Significant infrastructure upgrades are likely to be required to ensure sufficient treatment capacity is available to serve this development. Thames Water would welcome the opportunity to work closely with the Local Planning Authority and the developer to better understand and effectively plan for the sewage treatment infrastructure needs required to serve this development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: Sewage Treatment Works upgrades can take 18 months to 3 years to design and build. Implementing new technologies and the construction of a major treatment works extension or new treatment works could take up to ten years. The wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Strategic drainage infrastructure is likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a wastewater network capacity constraint the developer should liaise with Thames Water and provide a detailed drainage strategy with the planning department.</td>

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a
development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of
Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion –
particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the
local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]

adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Proposed Submission Local Plan Regulation 19 representations (2016 and 2017)

Document part: A59 - New rail station at Guildford West (Park Barn)
Save Hogs Back supports this railway station in principle, irrespective of the Blackwell Farm development. It is important to appreciate that its contribution within the Local Plan period will be limited, probably not being operational until at least 2029. The Topic Paper: Transport explains at paragraph 5.31 that Guildford West (Park Barn) railway station is likely to be brought forward only in 2024-2029 because “August 2024 corresponds with the anticipated start date of the South Western franchise period subsequent to the recently awarded franchise for the 2017-2024 period. Delivery from or subsequent to 2024 allows for the servicing of the new rail stations to be included within that new South Western franchise covering the period from 2024”. On this basis, progress with the construction of a station is feasible but far from assured. In particular, although the Plan recognises the need to deliver the project by working with Network Rail, there is no indication in the Plan that Network Rail has identified the technical feasibility and cost of the project or formally committed to it. It may simply not be in a position to deliver this project.

The new railway station will create a new destination for traffic. On the south side of the railway line, behind the hospitals, there will be a requirement for disabled parking together with access for buses, taxis and passenger drop-off. This will add to the congestion on local roads, notably Egerton Road. However, the anticipated vehicle activity associated with the new station has not been included in the traffic model for the area, and this needs to be rectified urgently. This is yet another contributor to excess congestion on Egerton Road if the Blackwell Farm development were to proceed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A59 – new station at Park Barn – it is excellent now to see specific policy relating to this, but there is some local resident concern about how kiss and ride’ provision only will be managed; not providing car parking does not prevent train users arriving by car and seeking somewhere to park.

I congratulate Guildford Borough Council on amending the Local Plan to reflect local concerns and the continuing positive approach to the future of Guildford. We need more homes. We must drive developers and those that own land to maximise brownfield development and thus to protect the countryside as far as possible.

I will continue to lobby Government strongly for vital investment in infrastructure as, without this money, the number of homes we can build will be constrained.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A59

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I support the proposal for a new rail station at Park Barn. However, its delivery remains uncertain for the following reasons:

- There is no evidence accompanying this version of the plan that Network Rail has approved the scheme.
- The economic viability of operating such a station has not been demonstrated and it is unclear whether there is passenger demand for the train service offered on this line.
- The policy does not allocate land for taxis, buses, disabled parking and ‘kiss and ride’ (Requirement 3), and it is not confirmed that the Royal Surrey County Hospital estate would be prepared to provide this land.
- The station is located within a severely congested corner of Guildford, and the traffic generated by trips to and from this new station has not been included within the peak-hour modelling.
- The cost of the new station (£10m) will be met by the developer. This, again, would add to the already unacceptable infrastructure burden placed on the developer of Blackwell Farm and there is a risk that it would not fulfil all its infrastructure commitments (contrary to NPPF Para 173).
- There are likely to be much greater benefits for travellers in Guildford as a whole if £10m was spent on other transport schemes, such as providing safe access/egress for Beechcroft Drive, or a bus service targeted at all school-aged children.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I am concerned with the traffic impact in Park Barn, Worplesdon and the areas around the hospital with the increased car journeys to drop off and collect travellers at the new station.
I am also concerned that Park Barn will become one large parking area.

Policy A59: New Rail Station at Guildford West (Park Barn)

Network Rail have worked closely with Guildford Borough Council and other interested parties on a potential station within this site allocation. A GRIP 2 study was commissioned by Guildford Borough Council that has looked at a location within this site and one within Policy A26 as potential new station locations.

We will therefore continue to work with the proposer of the new station as required and necessary to ensure that railway requirements are taken account of.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY A59: New rail station at Guildford West (Park Barn)

The University supports this new policy in principle. This new rail station is an important element of the local plan strategy.

However, we note that it does not allocate land for the south side facility for taxis, buses, disabled parking and ‘kiss and ride’ referred to in the policy, nor the southern connection to the local road network. This calls into question its deliverability.

The plan should provide more information on how this will be delivered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

See above text.

POLICY A59 - New rail station at Guildford West (Park Barn)

4.39 GVG supports the use of this site for a new railway station. In order to encourage modal shift it is important that the town centre sites around Guildford Train Station accommodate the new platforms and infrastructure to allow for an increase in domestic rail services to this station from the town centre.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
3.1 An Addendum report to the original ‘Guildford Borough Council Proposed Submission Local Plan 2016: Strategic Highway Assessment Report’ (SHAR) (June 2016) has been produced by GBC which it states that the Addendum:

‘provides a high level review of the potential changes to traffic impacts from those reported in the SHAR 2016 which are expected as a result of the key changes made to proposed site policies and to the programme of transport schemes as identified in the Draft Local Plan 2017’.

3.2 The key changes are outlined in Table 2 of the document where on the final page it acknowledges the new Policy A59: New Rail station at Guildford West (Park Barn) as a key change to the Draft Local Plan 2017 and states:

‘It is expected that, borough-wide, modal shift of car to rail trips will significantly outweigh new vehicle trips to access the new rail station. The station is not planned to be a parkway station so sustainable transport options for travel to and from the site will be a priority.’

3.3 It is acknowledged that locating a new station adjacent to existing (Park Barn) and proposed (Blackwell Farm) housing settlements as well as the Royal Surrey County Hospital, Surrey University and Surrey Research Park is a very positive move in terms of encouraging sustained modal shift from the private car for regular journeys such as commuting and indeed for short trips to and from Guildford town centre. It is however a concern that the actual vehicle activity associated with the new station has not been specifically included in the strategic model.

3.4 The assumption by GBC that the current traffic modelling completed in 2016 represents a ‘worst case’ as the traffic levels will reduce borough-wide due to modal shift is misleading since the zones on the network which include and adjoin the new station are likely to experience an increase in vehicular traffic. As well as a likely increase in vehicular traffic, there would also be an associated change in vehicle routing dynamics on the overall network as vehicles access it and this has not been taken into account.

3.5 Despite it not being a ‘parkway’ style station with parking provided (other than disabled parking), the new station will still generate the need for vehicular access from taxis, buses and ‘kiss and ride’ facilities (i.e. drop off from private cars) as outlined in the policy requirements for the allocation. It is accepted that overall there could well be a borough-wide modal shift to using rail for shorter trips which is welcomed and supported, but the concentration of traffic at the proposed access points north and south of the new station is a cause for concern given the congested nature of the local road network.

3.6 The absence of strategic modelling associated of the transport impacts on local infrastructure close to the new station considering the close proximity of the A3 and Egerton Road junctions is a concern. The proposed highway improvements to address capacity issues at these junctions as a result of existing and forecast traffic conditions could result in the current work not providing sufficient capacity to accommodate the immediate impact of the trips attracted to the new station from buses, taxis and private cars.

3.7 With regard to deliverability of the station there is a concern. The Inspector should ensure that Network Rail is satisfied that a new station is technically deliverable and that the costs assumed within the Draft Local Plan 2017 are appropriate. RGP is not aware whether such a statement has been made by Network Rail at the time of writing.

6.2 In relation to the New Rail Station at Guildford West (Park Barn) (Policy A59) the following concerns are raised:

i) The vehicular impact of the Park Barn station on the Egerton Road area has not been included within the strategic traffic model, therefore the true impacts of the scheme are not understood to be included within the detailed mitigation currently being considered;

ii) The deliverability of the station is heavily reliant upon Network Rail and RGP is not aware that Network Rail is in a position to deliver the station within the lifetime of the Local Plan so that the expected modal shift is achievable for all of the reliant development primarily on the Blackwell Farm development.

PROPOSED SUBMISSION HOUSING ALLOCATION SITE A27 – WARREN FARM, WHITE LANE, ASH GREEN

On behalf of our client, BlackOnyx Guildford Limited, please accept and register these formal representations to the Borough Council’s Proposed Submission Local Plan (Regulation 19) in relation to the Proposed Submission Borough wide Strategy and additionally Proposed Submission Housing Site A27: Warren Farm, White Lane, Ash Green.

These representations confirm our support for the following Proposed Submission policies:

- Proposed Submission Policy S2: Borough Wide Strategy
- Proposed Submission Site A27: Warren Farm, white Lane, Ash Green
Background

BlackOnyx Guildford Limited fully supports the Borough Council’s Submission Local Plan in relation to the proposed allocation of 3.36 hectares of land at Warren Farm, White Lane, Ash Green as set out in Proposed Submission Site Allocation A27. BlackOnyx Guildford Limited has entered into an agreement with the freehold owners of Warren Farm and Surrey House in relation to the proposed submission site and we are able to confirm that site A27 is available and deliverable during the early part of the new Plan period for housing development.

Ash Green is a sustainable settlement to the south east of Ash with excellent access to the strategic highway network including the A31 (south) and A331 (west). The village currently benefits from a bus service to nearby Ash where there are a wide range of local services and amenities. The village itself lies outside of the Green Belt and outside the Area of Outstanding Natural Beauty (‘AONB’) and Area of Great Landscape Value. Furthermore, the proposed submission site and village are not identified as being within a Conservation Area and there are no listed buildings in the immediate vicinity of the proposed submission housing site.

The absence of Green Belt and AONB means that Ash Green is an appropriate spatial location to accommodate modest housing growth as part of the Council’s proposed spatial development strategy which will seek to deliver up to 13,860 new homes across the borough during the plan period in order to meet acute housing need.

In this respect, we note that Proposed Submission Policy S2: Borough Wide Strategy has been informed and developed through a series of evidence based assessments including five volumes of the Green Belt and Countryside Study (‘GBCS’) and various iterations of borough-wide housing need assessment. We note that the Council’s Proposed Submission Policy S2 seeks to distribute housing growth fairly across the borough with a focus towards supporting and creating sustainable settlements. We consider that the Borough Wide Strategy is credible and robust and is in accordance with the aims and objectives of the NPPF.

Extent of Ash Green as shown on the Proposed SubmissionInset Map with Proposed Submission Site A27 Warren Farm shown highlighted in red

Proposed Submission Housing Site A27

The enclosed character of Proposed Submission Housing Site A27 is a result of existing residential development on two sides and mature woodland on the other boundaries means the site can be developed to form a natural extension of the built form of Ash Green. The site is distinctly separate from the open countryside to the south and redevelopment would not impact significantly on the wider countryside and would be consistent with the existing settlement pattern of Ash Green.

Furthermore, proposed submission housing site A27 has no particular landscape, ecological, or heritage value save for the semi natural ancient woodland which borders (but lies outside) the southern boundary of the site. In respect to the woodland, Natural England has confirmed that, provided new housing development incorporates a 15 metre non-development buffer housing development will not cause any detriment to the woodland area.

The principle of residential development on the site has also been considered by an independent Planning Inspector who concluded, ‘There is no dispute between the parties that, in principle, the development of this site would be acceptable’ (ref: APP/Y3615/A/14/2220129 paragraph 30). All that remains to be resolved are matters of detailed design.

It is also highly notable that the Strategic Housing Land Availability Assessment and draft Local Plan (July 2014) have consistently identified and promoted the proposed submission housing site throughout the emerging new Local Plan process.

The extent of Proposed Submission Policy A27: Warren Farm, White Lane, Ash Green as shown in the SHLAA
Deliverable Access

One of the key issues to the delivery of Proposed Submission Site A27 is ensuring that safe vehicular access can be created onto White Lane. In this important respect, we are able to confirm that access arrangements to the Proposed Submission site can be safely delivered via Surrey House and that such an access solution will provide appropriate sight lines and forward vision ensuring highway safety for road users. The approach to the site access reflects the access solution proposed for planning application 16/P/00120 which has been reviewed and assessed by the Surrey County Highway Authority. The Highway Authority has confirmed in writing that it has ‘no objection’ to highway access being formed via Surrey House to serve 58 dwellings.

Other Related Matters

A range of baseline studies have been undertaken to assess the likely impacts of delivering housing development on Proposed Submission housing site A27. Those studies include; transport assessment, planning assessment, flood risk and surface water run-off assessment, land contamination study, and ecological (stage 1 and stage 2) assessments. All the studies carried out, to date, demonstrate that housing development can be delivered on the proposed submission site without causing any significant harm to amenities or the local environment.

Indeed the provision of new housing on Proposed Submission Site A27 will benefit local services and amenities by ensuring that the village caters for housing needs including affordable housing for local people, and retains a healthy mix of people (including young people and families).

Housing Need

Housing delivery in the borough has not kept pace with identified housing need or targets, and consequently the Council cannot currently demonstrate a 5 year supply of housing land. In this respect, it is highly notable that the annual housing Monitoring Report 2014/2015 published in October 2015 acknowledges that the borough has identified just 2.4 years of housing land supply when measured against the required 5 year housing land supply target. The Council needs a real step change in housing land supply and delivery in order to meet local housing need. The lack of sufficient new housing also restricts the ability of the borough’s economy to grow and prosper.

The Council’s sustainable development strategy (Proposed Submission Policy S2: Borough Wide Strategy) identifies that the Council’s preferred approach is to focus future housing growth in the most sustainable locations which the Council identify as:

- Guildford town centre
- Urban areas
- Inset villages
- Identified Green Belt villages

We support the Council’s strategy of focussing housing growth on sustainable settlements and villages. The Council’s development strategy set out in Proposed Submission Policy S2 is clearly in conformity with the aims and objectives contained in the NPPF. In that respect, sustainable, accessible settlements such as Ash Green which are outside of the Green Belt, and not designated as part of the AONB or Area of Great Landscape Value can play an important role as part of the borough’s development strategy and make a meaningful contribution towards accommodating new housing development to meet acute housing need.

The Council’s promotion of Ash Green as a sustainable location for modest housing growth and the promotion of Housing Site A27 in the Proposed Submission Local Plan is appropriate and we strongly support these elements of the emerging Local Plan.

Conclusion
The NPPF advises that villages and sustainable settlements have an important contribution to make in terms of accommodating housing growth in order to help meet acute housing need and to support local economies.

The Council’s emerging new Local Plan and the associated evidence base has consistently identified Site A27 land at Warren Farm, White Lane as a suitable site to deliver new housing. An independent Planning Inspector has also concluded that there is no objection to the principle of housing development on the site, subject to detailed design considerations.

Safe vehicular access is available from White Lane and this has been confirmed in writing by the County Highway Authority in relation to planning application 16/P/00120. There are no objections from statutory parties including Natural England which has confirmed that, provided a 15 metre buffer is safeguarded between proposed housing and the woodland to the south of the Proposed Submission site, it will have no objection to housing development.

We are aware that the annual housing Monitoring Report 2014/2015 published in October 2015 acknowledges that the Council has identified just **2.4 years of housing land supply** when measured against the required 5 year housing land supply target. Proposed Submission Site A27 will make an important contribution towards helping to address this significant shortfall and meeting the acute housing need locally. It will also deliver an element of affordable housing for those most in need.

In light of all of the above, it is clear that the Proposed Submission Housing Site A27 Warren Farm, White Lane, Ash Green is an appropriate housing site allocation. The promotion of site A27 is fully in conformity with the aims and objectives of the NPPF and it will help support the Council’s proposed spatial development strategy set out in Proposed Submission Policy S2.

I would be very grateful if you would confirm that these representations in support of Proposed Submission Policy S2; Borough Wide Strategy, and our support for the Proposed Submission Housing Site A27: Warren Farm, White Lane, Ash Green have been registered and are ‘duly made’.

Site Context

The 13.8ha site is located to the east of Ash Green and comprises agricultural fields with several blocks of mature tree belts. The site is bounded by residential gardens to the west, and enclosed by trees on the north, eastern and southern boundaries (Refer to the Location Plan at Appendix)

The site is designated Green Belt on the adopted proposals map. The tree belt along the northern and southern boundaries of the site are designated as a Site of Nature Conservation interest.

The site is also located 1.7km from the Thames Heath Basin Special Protection Area, which is also a Site of Special Scientific Interested (SSSI).

The plan at Appendix 2 shows that the site comprises three main parcels which are currently grazed by cattle and sheep.

Proposed Submission Local Plan

The site is not proposed for development In the Proposed Submission Local Plan, nor has it been previously promoted as an available site. However, the site is now available and there are no known constraints that would prevent the site coming forward for development. Parcel 1 (Refer to Appendix 2) is located directly adjacent to the settlement boundary and is contained by woodland to the north, east and south.

We note that the Council proposes that following sites at Ash Green are removed from the Green Belt and allocated for residential development (C3 use):

- POLICY A27: Warren Farm, White Lane, Ash Green (approximately 158 dwellings)
- POLICY A28: Land to the 8Ut of White Lane, Ash Green (approximately 82 dwellings).

Kitewood Estates do not wish to challenge the proposed allocations at Ash Green, albeit we do wish to make the point that the land at Sunnybrook Farm is equally suitable for development and poses the opportunity for ecological enhancements.

Ecology Considerations

Derek Finnie Associates undertook an ecological Phase 1 Assessment of the site in July 2016 (encl. Appendix 3) and concluded;

- Overall the biodiversity value of the Site is of moderate level due to the SNCI designation and the presence of Ancient Woodland; However, the majority of the Site, which supports improved grassland, is of negligible value;
- If SANGS are to be provided In situ, there is likely to be ample opportunity to provide biodiversity improvements without compromising the main objectives of the SANGS. If contributions towards off site SANGS is adopted, then scope would be available within landscaped areas of the Site to provide enhancement of the biodiversity value of the Site (Phase 1 Habitat Assessment (July 2016)).

Guildford Borough Green Belt and Country Side Study

The site is assessed in Land Parcel H18. Land parcel H18 is considered to have high Green Belt sensitivity. The study concluded that the following Green Belt proposes are met by this land;

- Purpose 1: checks the Eastward sprawl of Ash Green; and
- Purpose 3: minimal existing development therefore safeguards the countryside from encroachment.

In the context of the Green Belt purposes, the site is well contained by a dense tree belt on the eastern boundary and therefore acts as a barrier to eastern sprawl.
The development of the site would Inevitably result In Increased built-form In the countryside. However, any scheme could offer the opportunity to deliver new community Infrastructure and help improve accessibility to outdoor recreation. Parcel 1(as identified at Appendix 2) would only represent a slight encroachment on the open countryside and the remainder of the site has various opportunities for biodiversity enhancements. Ultimately the allocation of this site would not undermine the integrity of the countryside.

Development Potential and Deliverability

Land Parcel 1 (identified at Appendix 2) is approximately 4ha (excluding the tree belt) and could comfortably accommodate in the region of 90-120 dwellings.

There are no barriers to the deliverability of the site which would prevent or delay housing coming forward within the short term. The Infrastructure and design requirements associated with the development are relatively minor compared with other strategic sites within the Plan.

Overall, Kitewood Estates suggest that the best approach for the Council to maintain a deliverable five year housing land supply against the up-to-date OAN, is to ensure the release of a range of sites, of varying sizes, in several locations.

If the site is proposed to be removed from the Green Belt and proposed for allocation, we would expect the site to begin delivering houses within the first five years of the Plan, Alternatively, the site could be safeguarded as a future allocation should the housing need increase during the Plan period.

Conclusions

Overall, the plan appears to have been positively prepared in an attempt to fully meet the Council's Identified Objectively Assessed Need. Albeit, the evidence base behind the OAN is out of date and on that basis could be considered unsound.

The land at Sunnybrook Farm, Ash Green has few constraints and offers the opportunity to deliver further dwellings during the Plan period.

### Comment ID: PSLPS16/7815  Respondent:  15674273 / Savills for Thames Water (Katherine Jones)  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A27

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

This site falls outside of Thames Water’s water supply boundary.

We have concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing drainage infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

There is a history of some sewer flooding. Developer funded impact study required to understand implications of development.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Policy A27: Warren Farm, White Lane, Ash Green

This site is within close proximity to the Surrey Hills Area of Outstanding Natural Beauty. We advise the LPA to take into account the relevant Management Plan for the area and should seek the views of the AONB Partnership. Development proposals brought forward through the plan should avoid significant impacts on protected landscapes, including those outside the plan’s area and early consideration should be given to the major development tests set out in paragraph 116 of the National Planning Policy Framework (NPPF).

This site is adjacent to ancient woodland. Any direct or indirect impacts on this site should be avoided or mitigated.

Total records: 9.
Proposed Submission Local Plan Regulation 19 representations (2016 and 2017)

Document part: A28 - Land to the east of White Lane, Ash
I wish to comment on the proposed site A28 in the revised draft Local Plan.

1. The address of the site should be "Land to the east of White Lane, Ash Green." This area is and always has been Ash Green, not Ash.
2. The southern boundary has been moved south to include an area of ancient woodland in which every tree is subject to a TPO. Since it is inconceivable that planning permission would be granted for this area of ancient woodland, the southern boundary should remain along the northern edge of the woodland as shown in the previous draft.
3. The western boundary has been moved to the west of White Lane, thereby including the road in the potential development site. It also includes the line of trees along the eastern edge of White Lane. These are also part of the ancient woodland and all the trees in this strip are subject to TPOs. The boundary should remain to the east of this woodland as shown in the previous draft.
4. It is the stated policy in the draft local plan that Ash Green should be protected from the sprawl of the Ash and Tongham Urban Area by the creation of new Green Belt to the North and West of the village. This site violates that Local Plan principle and leave virtually no protection for the village from urban spread from the north.
5. If some development of this site has to take place in should to provide facilities for the village of Ash Green, including a village Hall. It should also be used to provide open space (recreational ground or SANG) for the developments around Ash Manor in site A29.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Correct title of Policy A28 to say Ash Green, and not Ash.

- Policies A27, A28 and A29 collectively increase Ash Green village by 50%. Opportunity exists under Policy A28 to provide a village/community hall and recreational area which would provide Ash Green with much needed community and social space. Opportunities (1) Should read: “To create a centre for the village by including a village hall with associated recreational space providing much needed facilities for the Ash Green community. A mix of homes (C3) and accommodation for older people (C2) could be appropriate for this site.”
- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

Attached documents:

Comment ID: PSLPS16/995  Respondent: 8848033 / Paul Gerrard  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A28

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( No )

I object. It is within 5km of the Thames Basin Heaths SPA, and therefore any development is subject to EU/UK legislation (NPPF 119). The impact cannot be mitigated with SANGs because there is no evidence base to support SANGs as required by NRM6 viii, NPPF 158 and 166.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A28

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

At all times please be sure we refer to Ash Green in A28 and not Ash.

Policies A27, 28 and 29 refer to growth in Ash Green of 50%. With this growth proposal the village should be provided with some village hall or community centre and recreational area. There is currently no community or social space and too much development will prevent this provision as space will run out. Your plan should also look to provide a mix of homes (C3) and accommodation for older people (C2). The latter is an increasing need as demonstrated by current UK demographic information on our ageing population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</tbody>
</table>
As residents of Ash Green Road, we have deeds dating back to the early 1900’s with Ash Green clearly documented. The Ash Parish may have dealt with deeds but my legal, binding documents and deeds historically have Ash Green on them. That is because we were and are part of Ash Green.

Where the blue line has been added along the map of the area to draft a separation of Ash Green to ATUA it seems to have put the built up section of Ash GREEN into ‘Ash Green’ and the fields, trees, orchard, old farmsteads, rural part of Ash Green into ASH. It doesn’t make sense. Wouldn’t it make more sense to leave Ash Green as it originally was, a rural community with rural history. As already drafted in the Local Plan it needs to support the rural community. Even on page 213 of the local plan it lists in it’s key considerations ‘The historical location of Ash Green’.

Lets keep it that way, don’t chop it in half. Hundreds of us that live in this community are desperately worried that we will be segregated. It needs a more defining border that incorporates Ash Green Road and Ash Manor.

This objection may have strong undertones in it but the reason for this is, along with all my neighbours and fellow residents of Ash Green, we feel absolutely passionate that where we have been drafted, we should be put back into the original Ash Green. Please don’t separate us. We are a strong community, who love our village. As residents under the Guildford Borough Council, I would feel severely let down if where I live is put into an Urban area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

OBJECTION

As the current occupiers of Ash Green Station, we feel well based to be able to comment on the rather strange boundaries you have created for Ash Green in the plan. You are proposing that Ash Green Road be included in the Ash and Tongham urban area. Where will the boundary be on A28 as you are proposing development of this site? There will be no boundary between Ash and Ash Green. Ash Green actually starts North of Ash Green Road. We believe the greenbelt boundary should be placed north of Ash Green Road as a minimum.

The amount of proposed development in A28 will detrimentally change the character of the village. Large housing developments are not in keeping with Ash Green and the surrounding area and the density of the development is vastly too high. Ash Green is only suitable for accommodating small scale infill housing. Extending the village by over 20% cannot be classed as small scale infill. Rural Ash Green is not a Strategic Area for Growth, this development threatens turning the area from rural to urban.

As the current owners and guardians of the locally listed, historic building of Ash Green Station, we feel that the historic context would be lost as we would be surrounded by and right in the middle of proposed new housing developments, not in keeping with the village.

According to the NPPF guidelines Ash Green is not a suitable location for sustainable development because it has no shops, doctors, community facilities and it's public transport infrastructure is very poor. Guildford Borough Council’s own Settlement Hierarchy ranks this as the least sustainable location in the borough.

Local schools, doctors and dentists are already under pressure. We currently struggle to get a Doctors appointment within two weeks.

We believe the proposed level of development is fundamentally flawed as there is a huge lack of infrastructure - a practically non existent bus service, no real means to safely get to Ash station (there is little option other than to use a car, either to get to the station or elsewhere), and already major congestion on local roads. Ash Green does not have a suitable transport network - we are not set up to take more residents and therefore more traffic. There are already huge delays and traffic jams locally with the main route through Ash in effect being closed 35 minutes out of every hour at the level crossing causing pinch points. We have eight of the top hotspots for traffic congestion within Surrey in and around Ash. The Hogs Back to Guildford at peak times is extremely congested and would struggle with any increase in volume.

Are Guildford Borough Council in correspondence/consultation with Hampshire County Council regarding the new building developments in Aldershot and the surrounding areas? We share bus, rail and road services (with one of the major routes out of Aldershot meeting the A323 at Ash), these new developments will put a strain on everything before Guildford Borough Council even start with any of their proposed developments.

Ash Green, Ash and Tongham has a long recorded history of flooding issues and the sewerage system is at full capacity. With the proposed level of development this will do nothing other than exacerbate an already major problem. Our house already suffers the affects from poor water drainage as the railway cutting is used for local surface water drainage. We have serious concerns that major development on this site could lead to further issues regarding flooding.

We believe site A28 is not suitable for development as our house which is as stated earlier on the local list of buildings which are of intrinsic historic interest would be impacted massively by any development on this site. The old station is built into the railway cutting, and as such we only have windows on the south side of the building at ground level, which is level with the old track bed. Any development of A28 would result in loss of light to our property and also mean we would be completely overlooked by properties on this site, we would lose all privacy. We would also have greatly increased noise and disturbance from all the residents and road noise, both within the estate and on White Lane. Where would the proposed entry and egress points be for this site? White Lane would be awkward and dangerous as it has a blind crest on the bridge to the north and a slight curve in the road to the south. Drovers Way is not designed to take this level of traffic. The junction of White Lane, Ash Green Road and Foreman Road has a history of accidents and a development on A28 would potentially add to this problem with increased traffic levels.
We feel it would be an incredible tragedy to lose such a wonderful greenfield site, which once developed, we would never get back, for us, or future generations. Under the proposed developments Ash Green would lose its rural identity and historic boundaries. We need to protect these areas and instead redevelop urban areas and brownfield sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

OBJECTION TO SITES A28 & A29 AND THE PROPOSED CHANGE TO ASH GREEN BOUNDARIES

I believe the title of Policy A28 needs to be corrected to say “Ash Green” not “Ash”. Policy A28: Land to the east of White Lane, Ash GREEN, states it requires

“(2) Sensitive design at site boundaries that has regard to the transition from urban to rural
(3) No unacceptable impact on trees and ancient woodland
(4) Recognition of the historic location of Ash Green village”.

However I believe the Local Plan (Policy A28) will impact on trees and ancient woodland within the site and does not recognise the historic location of Ash Green village. I have outlined evidence to support my beliefs below.

As the current occupier of Ash Green Station, I feel well based to be able to comment on the rather strange boundaries Guildford Borough Council has created for Ash Green in the 2017 plan. GBC are proposing that the houses of Ash Green Road along with the land south of this up to and including site A28 be included in the Ash and Tongham Urban Area (ATUA), which is historically Ash Green. There will be no boundary between Ash and Ash Green. Ash Green starts on land North of Ash Green Road (part of the proposed A29 development), a fact which seems to have been ignored by placing A28 into the proposed ATUA. I believe the countryside boundary should be placed along Ash Green Road as a minimum but ideally allowing for a buffer into the field south of Ash Manor but north of Ash Green Road, with A28 left as countryside, not shoe-horned in as part of the proposed plans.

The more appropriate, natural defensible boundaries would be either along the old railway line or preferably, along Ash Green Road, which would retain Ash Green village and station in its historic location.

The Ordinance survey map as shown in GBC own Greenbelt and Countryside Study names Ash Green both to the north of the old railway line as well as the south. (see below)

[Map]

As can be seen on this historic O/S map, circa 1920 there were no buildings mapped in Ash Green to the south of Ash Green Lane East, the only properties in Ash Green were those to the north of the railway cutting. Buildings specifically named are Ash Green Station and Ash Green Farm, with the ancient woodland of College Copse running from the railway cutting to Ash Green Lane (east).

[Map]

Ash Green Ash Green (modern estate) (to the south of Ash Green Lane East) was not the original Ash Green, but had started to appear by mid 20th century, as this map shows circa 1944. The entrance to Dene Lodge through the ancient woodland marked as College Copse has been mapped, showing that the whole of site A28 was originally covered by College Copse. A portion of the remainder in A28 is now classed as ancient woodland, therefore we believe any trees north of the ancient woodland on A28, especially on the western boundary of A28 adjoining White Lane up to the railway cutting be treated with a high degree of sensitivity as they are growing on land which once formed College Copse.

[Map]
In addition to the above maps in relation to the boundaries of Ash Green village, this image from 1977 shows signage indicating Ash Green is to the north of the railway cutting as well as to the south.

I would also like to bring to attention that the bus stop north of the railway line outside the old station on White Lane is referred to as “Ash Green, Old Station”.

I wholly agree with your statement in the local plan (below) Section 3 Spatial Vision, which states:

“Further development is also proposed in and around Ash and Tongham on land beyond the Green Belt along with new green belt designated to prevent Ash and Tongham merging with the village of Ash Green.”

I wish to see historic Ash Green comprising Ash Green Road and Ash Green Station included as part of the area of separation.

I feel the locally listed building of Ash Green Station under the proposed plans would lose its historic context of actually being in Ash Green. It is a ‘Heritage asset’ as defined by the NPPF; “A building, monument, site, place, area or landscape identified as having a degree of significance merit [considerations in planning decisions, because of its heritage interest. Heritage asset includes designated heritage assets and assets identified by the local planning authority (including local listing)” The NPPF also states “Significance derives not only from a heritage asset’s physical presence, but also from its setting”. I believe Guildford Borough Council needs to give more consideration to Ash Green Station and its historical setting.

As stated in Policy D3 below: Historic Environment.

1) We will conserve and enhance the historic environment will be conserved and enhanced in a manner appropriate to its significance. We will support development of the highest design quality that will sustain, conserve and, where appropriate, enhance the special interest, character and significance of the borough’s heritage assets and their settings and make a positive contribution to local character and distinctiveness will be supported.

2) Heritage assets are an irreplaceable resource and works which would cause harm to the significance of a heritage asset, whether designated or non-designated, or its setting, will not be permitted without a clear justification to show that the public benefits of the proposal considerably outweigh any harm to the significance or special interest of the heritage asset in question.

The proposal to remove historic Ash Green from Ash Green goes against the NPPF policy contained within the Local Plan (as shown below), which GBC says it will adhere to.

4.5.43 We will ensure that new development must will conserve heritage assets in a manner appropriate to their significance. The NPPF defines significance as “The value of a heritage asset to this and future generations because of its heritage interest. That interest may be archaeological, architectural, artistic or historic.” The contribution of the setting of heritage assets to the appreciation of these qualities will be carefully considered alongside more direct impacts of development proposals.”

The proposed changes would remove Ash Green Station (locally listed) and Ash Green Road out of Ash Green, as well as the historic housing of the Ash Green area.

By developing A28 there is also potential to lose the aforementioned ancient woodland within A28 as well as detracting the original setting of The Old Station.

A29 also goes against this policy and NPPF guidelines by placing Grade II Listed Ash Manor and associated buildings in the centre of a modern housing estate.
Policy D4: Character and design of a new development states that
1) High quality design is expected in the borough. All developments will:
(l) conserves locally and nationally important heritage assets and conserves or enhances their settings
(m) has no unacceptable effect on the amenities enjoyed by the occupants of buildings in terms of privacy, noise,
vibration, pollution, dust, smell and access to sunlight and daylight.

By moving Ash Green village boundary (l) would not be complied with. A28 would also have an impact on Dene Lodge
(locally listed building) and A29 (south of Ash Green Road) would impact on the setting of Woodberry (also locally
listed). Development of A29 around Ash Manor would impact the historic settings of Ashe Grange, Ash Manor, Old
Manor Cottage, The Oast House, Stable and The Barn to the south of Ash Manor, all Grade II listed properties.

In reference to (m), development of A28 has the potential to block sunlight, reduce privacy and increase noise at our
property, due to the unusual fact it is built into a railway cutting and as a result it is below the ground level of A28.
Station house ground floor only has windows on the southern side of the house (as the northern side is built into the
bank), therefore the horizon for our southern aspect on this floor has a much lower effective horizon and as a result the
sun only just reaches our windows in winter months. If development occurs on the northern boundary of A28 it could
well result in the complete blocking of natural light to the property on the ground floor. Station House suffers from an
unusual phenomenon in that sound reverberates and travels along the old railway cutting. We often hear the noise of
trains on the current line in our house, even though it is some distance away. We have concerns that noise from A28, A29
and A31 will carry along the cutting in the same way.

As can be clearly seen on the map below, sites A28 and A29 to the south of Ash Green Road really don’t make any sense
in terms of preserving historic Ash Green and should be removed from the plan. The buffer zone to separate Ash from
Ash Green should be placed on the land to the north of Ash Green Road up to and around Ash Manor to compliment and
preserve its well documented historic setting.

[Map]

With the proposed southern extension of A28 it will potentially require the felling of trees and the destruction of the
ancient woodland of College Copse up to the driveway of Dene Lodge. If A28 and the area of A29 south east of Ash
Green Road are removed from the Local Plan it will provide obvious continuity to the natural defensible boundary for the
countryside (the ancient woodland which bounds the eastern edge of A29 should be included in this) thereby preventing
the urban sprawl of Ash and merging of Ash Green into the ATUA.

[map]

I also object to some of the current and proposed wording in the plan.

I believe Policy P3: Countryside, 4.3.29 should be amended to “Originally consisting of the three small rural villages of
Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford
borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic
location for development. However to make this growth sustainable, suitable infrastructure must be implemented before
further development”. This is because I think infrastructure is greatly lacking, especially in relation to roads, traffic and
public transport.

I believe 4.3.30 should be amended to “We do however wish to ensure that whilst accommodating this growth, we are
able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic
character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green”. I think it is
vital this sentence be included in the plan as there is a real danger with the current proposed sites of A28 and A29 losing
Ash Green’s historical location and identity.

I believe Policy P3: Countryside (1) (c ) should be amended to “does not lead to greater physical or visual coalescence
between Ash Green, the Ash and Tongham urban area and Aldershot”, in order to protect Ash Green as a separate village.
I believe Policy A29: Land to the south and east of Ash and Tongham, Requirements (6) needs to be amended to protect Ash Green village and the houses within it. As I have pointed out and evidenced with maps, Ash Green Station and the houses along Ash Green Road formed the village of Ash Green before the more modern buildings south of the railway cutting appeared, and therefore it is indefensible that GBC want to remove the buildings that originally formed Ash Green village from Ash Green.

I believe the wording needs to be “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road/White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development should not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the build up area and the countryside beyond”.

The wording in Policy A29, Requirements (8) does not offer enough protection to the Grade II listed buildings of Ash Manor and their surroundings, and therefore should be more specific and say “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Approaches and views to, from and around this heritage asset must be protected.”

In Policy A29, I believe Requirements (9) of a new road and footbridge should be in place before any development of A29 commences and the wording should reflect this. Also requirement (9) does not address the other significant transport infrastructure improvements that are required to cope with the huge increase in traffic created by Policy A29.

According to the NPPF guidelines Ash Green is not a suitable location for sustainable development because it has no shops, doctors, community facilities and its public transport infrastructure is very poor. Guildford Borough Council’s own Settlement Hierarchy ranks this as the least sustainable location in the borough. Site A28 lies within Ash Green and therefore should be removed from the Local Plan.

Local schools, doctors and dentists are already under pressure. I currently struggle to get a doctors appointment within two weeks.

I believe the proposed level of development is fundamentally flawed as there is a huge lack of infrastructure - a practically non existent bus service, no real means to safely get to Ash station (there is little option other than to use a car, either to get to the station or elsewhere), and already major congestion on local roads. Ash Green does not have a suitable transport network - we are not set up to take more residents and therefore more traffic. There are already huge delays and traffic jams locally. We have eight of the top hotspots for traffic congestion within Surrey in and around Ash. The Hogs Back at peak times is extremely congested and would struggle with any increase in volume.

Are Guildford Borough Council in correspondence/consultation with Hampshire County Council regarding the new building developments in Aldershot and the surrounding areas? We share bus, rail and road services (with one of the major routes out of Aldershot meeting the A323 at Ash), these new developments in Hampshire will put a strain on everything before Guildford Borough Council start with any of their proposed developments.

Ash Green, Ash and Tongham has a long recorded history of flooding issues. With the proposed level of development this will do nothing other than exacerbate an already major problem. Our house currently suffers the effects from poor water drainage as the railway cutting is used for local surface water drainage. I have serious concerns that major development around us could lead to further issues regarding flooding.

Where would the proposed entry and egress points be for site A28? White Lane would be awkward and dangerous as it has a blind crest on the bridge to the north and a slight curve in the road to the south. Drovers Way is not designed to take this level of traffic. The junction of White Lane, Ash Green Road and Foreman Road has a history of accidents and a development on A28 would potentially add to this problem with increased traffic levels. I feel it would be an incredible tragedy to lose such a wonderful greenfield site, which once developed, we would never get back, for us, or future
generations. Under the proposed developments Ash Green would lose its rural identity and historic boundaries. We need to protect these areas.

We have concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing drainage infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

An impact study would be required. There is history of hydraulic flooding and there are no surface water sewers shown in the vicinity of this proposed site.

Site Allocation A28: Land to the East of White Lane, Ash

Our Client support the allocation of Site A28 for approximately 62 new homes.

The site would, however, be more appropriately described as Land East of White Lane, Ash. This would reflect the Proposals Map designation which shows the site within the defined Ash Urban Area.

The site currently included within the Site Allocation extends to 1.9 Hectares and is currently open pasture land. To the north of the site is the route of a former (now dismantled) railway line. The site has access from White Lane. The site area should be increased to include additional land to the south (2.48 hectares) which will largely form a landscape buffer but which may be required in part on the road frontage to facilitate access and visibility.
The summary table at Page 24 lists the 62 unit capacity as a ‘Total number of Homes- Approx’, however, this should not be imposed as a limit on site capacity.

Our Client agrees with the Council that the site may be suitable for residential use, however, also highlights that the site could be suitable for a C2 care village or other specialist retirement housing use.

SUPPORT ALLOCATION

Our Client supports the inclusion of land to the east of White Lane, Ash Green (Site A28) The Client, however, recommends that:

- The site description is amended to Land to the East of White Lane, Ash to reflect the inclusion of the site in the amended Ash Urban area;
- The identified site area is enlarged to include the additional land to the
- The Site Allocation recognises the potential for use as a C2 care village or other C2 accommodation for older people or other specialist retirement

Comment ID: pslp172/4319  Respondent: 17467457 / Emily Henderson  Agent:
I am writing to object to the 2017 proposed submission of the Local Plan.

OBJECTION TO SITES A28 & A29 AND THE PROPOSED CHANGE TO ASH GREEN BOUNDARIES

I believe the title of Policy A28 needs to be corrected to say “Ash Green” not “Ash”.

Policy A28: Land to the east of White Lane, Ash GREEN, states it requires
(2) Sensitive design at site boundaries that has regard to the transition from urban to rural
(3) No unacceptable impact on trees and ancient woodland
(4) Recognition of the historic location of Ash Green village’.
However I believe the Local Plan (Policy A28) will impact on trees and ancient woodland within the site and does not recognise the historic location of Ash Green village. I have outlined evidence to support my beliefs below.

As the current occupier of Ash Green Station, I feel well based to be able to comment on the rather strange boundaries Guildford Borough Council has created for Ash Green in the 2017 plan. GBC are proposing that the houses of Ash Green Road along with the land south of this up to and including site A28 be included in the Ash and Tongham Urban Area (ATUA), which is historically Ash Green. There will be no boundary between Ash and Ash Green. Ash Green starts on land North of Ash Green Road (part of the proposed A29 development), a fact which seems to have been ignored by placing A28 into the proposed ATUA. I believe the countryside boundary should be placed along Ash Green Road as a minimum but ideally allowing for a buffer into the field south of Ash Manor but north of Ash Green Road, with A28 left as countryside, not shoe-horned in as part of the proposed plans.

The more appropriate, natural defensible boundaries would be either along the old railway line or preferably, along Ash Green Road, which would retain Ash Green village and station in its historic location.

The Ordinance survey map as shown in GBC own Greenbelt and Countryside Study names Ash Green both to the north of the old railway line as well as the south. (see below) As can be seen on this historic O/S map, circa 1920 there were no buildings mapped in Ash Green to the south of Ash Green Lane East, the only properties in Ash Green were those to the north of the railway cutting. Buildings specifically named are Ash Green Station and Ash Green Farm, with the ancient woodland of College Copse running from the railway cutting to Ash Green Lane (east). Ash Green (modern estate) (to the south of Ash Green Lane East) was not the original Ash Green, but had started to appear by mid 20th century, as this map shows circa 1944. The entrance to Dene Lodge through the ancient woodland marked as College Copse has been mapped, showing that the whole of site A28 was originally covered by College Copse. A portion of the remainder in A28 is now classed as ancient woodland, therefore we believe any trees north of the ancient woodland on A28, especially on the western boundary of A28 adjoining White Lane up to the railway cutting be treated with a high degree of sensitivity as they are growing on land which once formed College Copse.

In addition to the above maps in relation to the boundaries of Ash Green village, this image from 1977 shows signage indicating Ash Green is to the north of the railway cutting as well as to the south.

I would also like to bring to attention that the bus stop north of the railway line outside the old station on White Lane is referred to as “Ash Green, Old Station”. I wholly agree with your statement in the local plan (below)

Section 3 Spatial Vision, which states:
“Further development is also proposed in and around Ash and Tongham on land beyond the Green Belt along with new Green Belt designated to prevent Ash and Tongham merging with the village of Ash Green."

I wish to see historic Ash Green comprising Ash Green Road and Ash Green Station included a part of the area of separation. I feel the locally listed building of Ash Green Station under the proposed plans would lose its historic context of actually being in Ash Green. It is a ‘Heritage asset’ as defined by the NPPF; “A building, monument, site, place, area or landscape identified as having a degree of significance meriting considerations in planning decisions, because of its heritage interest. Heritage asset includes designated heritage assets and assets identified by the local planning authority
small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and wording in the plan. I believe Policy P3: Countryside, 4.3.29 should be amended to "Originally consisting of the three countryside (the ancient woodland which bounds the eastern edge of A29 should be included in this) thereby preventing Green Road are removed from the Local Plan it will provide obvious continuity to the natural defensible boundary for the ancient woodland of College Copse up to the driveway of Dene Lodge. If A28 and the area of A29 south east of Ash Road up to and around Ash Manor to compliment and preserve its well documented historic setting. A28 and the area of A29 south east of Ash Green, as well as the historic housing of the Ash Green area. By developing A28 there is also potential to lose the aforementioned ancient woodland within A28 as well as detracting the original setting of The Old Station. A29 also goes against this policy and NPPF guidelines by placing Grade II Listed Ash Manor and associated buildings in the centre of a modern housing estate. Policy D4: Character and design of a new development states that 1) High quality design is expected in the borough. All developments will: (l) conserves locally and nationally important heritage assets and conserves or enhances their settings (m) has no unacceptable effect on the amenities enjoyed by the occupants of buildings in terms of privacy, noise, vibration, pollution, dust, smell and access to sunlight and daylight. By moving Ash Green village boundary (l) would not be complied with. A28 would also have an impact on Dene Lodge (locally listed building) and A29 (south of Ash Green Road) would impact on the setting of Woodberry (also locally listed). Development of A29 around Ash Manor would impact the historic settings of Ashe Grange, Ash Manor, Old Manor Cottage, The Oast House, Stable and The Barn to the south of Ash Manor, all Grade II listed properties. In reference to (m), development of A28 has the potential to block sunlight, reduce privacy and increase noise at our property, due to the unusual fact it is built into a railway cutting and as a result it is below the ground level of A28. Station house ground floor only has windows on the southern side of the house (as the northern side is built into the bank), therefore the horizon for our southern aspect on this floor has a much lower effective horizon and as a result the sun only just reaches our windows in winter months. If development occurs on the northern boundary of A28 it could well result in the complete blocking of natural light to the property on the ground floor. Station House suffers from an unusual phenomenon in that sound reverberates and travels along the old railway cutting. We often hear the noise of trains on the current line in our house, even though it is some distance away. We have concerns that noise from A28, A29 and A31 will carry along the cutting in the same way. As can be clearly seen on the map below, sites A28 and A29 to the south of Ash Green Road really don’t make any sense in terms of preserving historic Ash Green and should be removed from the plan. The buffer zone to separate Ash from Ash Green should be placed on the land to the north of Ash Green Road up to and around Ash Manor to compliment and preserve its well documented historic setting. With the proposed southern extension of A28 it will potentially require the felling of trees and the destruction of the ancient woodland of College Copse up to the driveway of Dene Lodge. If A28 and the area of A29 south east of Ash Green Road are removed from the Local Plan it will provide obvious continuity to the natural defensible boundary for the countryside (the ancient woodland which bounds the eastern edge of A29 should be included in this) thereby preventing the urban sprawl of Ash and merging of Ash Green into the ATUA. I also object to some of the current and proposed wording in the plan. I believe Policy P3: Countryside, 4.3.29 should be amended to " Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and
now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development”. This is because I think infrastructure is greatly lacking, especially in relation to roads, traffic and public transport. I believe 4.3.30 should be amended to “We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green”. I think it is vital this sentence be included in the plan as there is a real danger with the current proposed sites of A28 and A29 losing Ash Green’s historical location and identity. I believe Policy P3: Countryside (1) (c) should be amended to “does not lead to greater physical or visual coalescence between Ash Green, the Ash and Tongham urban area and Aldershot”, in order to protect Ash Green as a separate village. I believe Policy A29: Land to the south and east of Ash and Tongham, Requirements (6) needs to be amended to protect Ash Green village and the houses within it. As I have pointed out and evidenced with maps, Ash Green Station and the houses along Ash Green Road formed the village of Ash Green before the more modern buildings south of the railway cutting appeared, and therefore it is indefensible that GBC want to remove the buildings that originally formed Ash Green village from Ash Green.

I believe the wording needs to be “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road/White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development should not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the build up area and the countryside beyond”. The wording in Policy A29, Requirements (8) does not offer enough protection to the Grade II listed buildings of Ash Manor and their surroundings, and therefore should be more specific and say “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Approaches and views to, from and around this heritage asset must be protected.” In Policy A29, I believe Requirements (9) of a new road and footbridge should be in place before any development of A29 commences and the wording should reflect this. Also requirement (9) does not address the other significant transport infrastructure improvements that are required to cope with the huge increase in traffic created by Policy A29. According to the NPPF guidelines Ash Green is not a suitable location for sustainable development because it has no shops, doctors, community facilities and its public transport infrastructure is very poor. Guildford Borough Council’s own Settlement Hierarchy ranks this as the least sustainable location in the borough. Site A28 lies within Ash Green and therefore should be removed from the Local Plan. Local schools, doctors and dentists are already under pressure. I currently struggle to get a doctors appointment within two weeks. I believe the proposed level of development is fundamentally flawed as there is a huge lack of infrastructure - a practically non existent bus service, no real means to safely get to Ash station (there is little option other than to use a car, either to get to the station or elsewhere), and already major congestion on local roads. Ash Green does not have a suitable transport network - we are not set up to take more residents and therefore more traffic. There are already huge delays and traffic jams locally. We have eight of the top hotspots for traffic congestion within Surrey in and around Ash. The Hogs Back at peak times is extremely congested and would struggle with any increase in volume.

Are Guildford Borough Council in correspondence/consultation with Hampshire County Council regarding the new building developments in Aldershot and the surrounding areas? We share bus, rail and road services (with one of the major routes out of Aldershot meeting the A323 at Ash), these new developments in Hampshire will put a strain on everything before Guildford Borough Council start with any of their proposed developments.

Ash Green, Ash and Tongham has a long recorded history of flooding issues. With the proposed level of development this will do nothing other than exacerbate an already major problem. Our house currently suffers the effects from poor water drainage as the railway cutting is used for local surface water drainage. I have serious concerns that major development around us could lead to further issues regarding flooding.

Where would the proposed entry and egress points be for site A28? White Lane would be awkward and dangerous as it has a blind crest on the bridge to the north and a slight curve in the road to the south. Drovers Way is not designed to take this level of traffic. The junction of White Lane, Ash Green Road and Foreman Road has a history of accidents and a development on A28 would potentially add to this problem with increased traffic levels.
I feel it would be an incredible tragedy to lose such a wonderful greenfield site, which once developed, we would never get back, for us, or future generations. Under the proposed developments Ash Green would lose its rural identity and historic boundaries. We need to protect these areas.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

"Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development”

“We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green”

“does not lead to greater physical or visual coalescence between Ash Green, the Ash and Tongham urban area and Aldershot”

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village.

Proposals for the land west of this road and to the south east of Foreman Road/White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development should not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the build up area and the countryside beyond”

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Approaches and views to, from and around this heritage asset must be protected.”

Attached documents: [Henderson Objection to Local Plan (2).pdf](/file.pdf) (1.6 MB)
Correct title of Policy A28 to say Ash Green, and not Ash.

Policies A27, A28 and A29 collectively increase Ash Green village by 50%. Opportunity exists under Policy A28 to provide a village/community hall and recreational area which would provide Ash Green with much needed community and social space.

Opportunities (1) Should read: "To create a centre for the village by including a village hall with associated recreational space providing much needed facilities for the Ash Green community. A mix of homes (C3) and accommodation for older people (C2) could be appropriate for this site."

Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2708  Respondent: 17979553 / Land to the East of White Lane, Ash (Sir or Madam)  Agent: Vortal Properties Ltd (Robert Symons)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A28

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Vortal Properties support the inclusion of Site A28 within the extended Ash Urban area and the update to the site reference as 'Land to the east of White Lane, Ash'.

Also supported is the increase gross area of the allocation to 2.85 hectares, taking into account the additional land west of the site up to highways land, and the Ancint Woodland to the south, to form a landscape buffer and facilitate access and visibility.
In relation to Site A28 a larger area of land is available for release to the east of the site that would be suitable for an area of Open Space and assist with meeting the identified opportunity for 'green corridors and linkages to habitats outside of the site.' The boundary would need to extend so the additional land is set within the defined Urban Ash area and removed from the greenbelt.

The additional land (totalling 0.28 hectares in size) is outlined below in blue increasing the overall size of the allocation to 3.13 hectares.

[Map]

The inclusion of wording for the allocation at Site A28 to be suitable for both homes (C3) and accommodation for older people (C2) is supported to allow flexibility for development of the site.

[Text of attachment reproduced below]

Vortal Properties support the allocation of Site A28 for approximately 62 new homes, and the following changes;

- Change in the site name to ‘Land to the east of White Lane, Ash’
- Site allocation area increased to 2.85 hectares to include land to the west and south to form a landscape buffer and facilitate access and visibility
- The acknowledgement of the allocation to cater for ‘a mix of homes (C3) and accommodation for older people (C2)’

However, we recommend that:

- The identified site area is enlarged to include the additional land to the east bring the size of the allocation to 3.13 hectares
- The land to the east is removed from the greenbelt and included within the urban area boundary for Ash and Tongham

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Inclusion of additional land to the east of the site within allocation A28 (highlighted blue)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A28

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Vortal Properties are broadly supportive of the changes to the content of the plan and are specifically supportive to the changes made to Site A28 - Land east of White Lane, Ash Green Key Diagram and Proposals Map (Paragraph 1.15) In relation to Site A28 a larger area of land is available for release which should be included in the allocation (see response to PROPOSED SUBMISSION LOCAL PLAN: STRATEGY AND SITES 2017 - PART 2: SITES) and set within the defined Ash Urban Area on the Proposals Map, as well as its removal from the proposed area of greenbelt.

Spatial Vision

The Plan continues to rely heavily on large strategic releases, most notably from the changes in delivery of housing, which is now heavily weighted towards the end of the plan. Emphasis, in the short term, should be focused on the delivery of smaller sites, including land at Ash and Tongham (Site A28) which will not require large infrastructure delivery, as well as assisting Guildford meet its identified shortfall in 5-year land supply.
Vortal Properties role as development partner of Site A28 wish to reserve the right to attend the Examination in order to clarify any elements relating to the site allocation and/or the site capacity, appropriate use and/or the implications of any plan policies for the delivery of the allocation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Site A29 - Land to south and east of Ash and Tongham;

I note the following comment re roads linking new estates to provide alternative distributor roads:

Proposed road layout or layouts to provide connections between both the individual development sites within this site allocation and between Ash Lodge Drive and Foreman Road, providing a through road connection between Ash Lodge Drive and Foreman Road, in order to maximise accessibility and to help alleviate congestion on the A323 corridor.

The reserved matters planning application (16/P/00980) for the 400 house development on land to south of Ash Lodge Drive is currently in the planning approval process. The plans for this development should include a link road between the estate distributor road and a made up Ash Green Lane West. This road would provide a link between the new and proposed developments accessed from Ash Green Lane West comprising a total of 60 + 26 + 55 + 14 units (total = 155 houses), in line with the proposed Local Plan policy statement.

(I have submitted this comment in respect of planning application 16/P/00980 - but the Local Plan team may wish to reiterate it as part of the planning application comments.)

Site allocation A29 (and the deleted A30)

Land adjacent to Ash Station needs to be reserved for car parking / pick-up and drop-off areas and local bus stops. As the road bridge and access roads (previously shown in deleted site allocation A30) have now been incorporated into site allocation, there is no distinction between the land for housing and the land for the road / bridge / station and transport purposes. By not segregating these two different land uses, there will be pressure from developers for housing right up to the station area, without leaving adequate land for the essential transport purposes. With a good rail service to Guildford, Ash station could become an effective transport interchange and provide a park and ride facility to Guildford for the 2000+ new houses approved or proposed in the Ash / Tongham area and for existing residents, thus relieving car use on the A31 and A323 roads. Once land close to Ash station is developed for housing it is no longer possible to use that land for transport services. In such a scenario there would be increased parking pressure on nearby residential roads, as there are at present due to the limited car park spaces at Ash station.

(Ash Vale station is an example where there is inadequate parking provision (all the available places are filled by 7.00am on weekdays) and because of close by housing there is no land available for additional parking.)
Guildford Borough contains some “Countryside Beyond the Green Belt”, although this notation covers only 2% of the Borough, and is located in the west of the Borough near Ash and Tongham. Mindful of the hierarchy set out in paragraph 4.3 above, and the need to identify enough land to deliver an average of 693 new dwelling a year, the draft Plan contains several housing allocations that fall on land that is subject to this designation.

Policy A29 is the most significant of these allocations, identifying land for approximately 1200 homes around Ash and Tongham. A map showing the distribution of the sites that comprise this allocation is shown at Appendix 1 of this report. In addition to this, there are two other smaller allocations (A27: Warren Farm, Ash Green and A28: Land to the east of White Lane, Ash Green) of 120 units in total, 629 homes with planning permission (net outstanding) and 124 completions since the base date of 2013. In the wider Ash and Tongham area, taking into account completions, permissions and Local Plan allocations, this equals 2,057 homes to be delivered by 2033.

In terms of any potential cross boundary impacts of this development identified in Policy A29, whilst it is located close to the boundary with Rushmoor Borough, mindful of the constraints noted above, Guildford Borough Council has very limited opportunities to accommodate its objectively assessed housing need. The draft Plan contains a number of other strategic housing allocations, including land at former Wisley Airfield (2,100 homes), Slyfield Regeneration Project (1,000 homes), Gosden Hill Farm (2,000 homes), and Blackwell Farm (1,800 homes). In addition, there are a number of other allocations of around 100 units. Importantly, the evidence supporting the Plan has had to review the function of land within the Green Belt, and facilitate some land releases from it, in order to achieve the scale of residential development required to meet Guildford’s OAN.

Rushmoor Borough Council is supportive of Guildford’s approach of “leaving no stone unturned” in seeking to meet its housing need. This is positive in as much as it is not asking Rushmoor to help meet its housing needs, and in this respect, at this point in time, both authorities can be said to satisfy the “duty to cooperate” on the cross boundary strategic issue of meeting housing needs.

The Strategic Highway Assessment report (2016) sets out that in respect of the development proposed in the Local Plan, without any mitigation, the greatest potential impacts are seen on the network in the vicinity of Ash / Ash Vale and travelling north into the borough of Surrey Heath. Some of the trips in Ash / Ash Vale will join the A331 Blackwater Valley Road to travel further afield, but it is likely that a reasonable proportion will travel into the neighbouring boroughs of Rushmoor and Surrey Heath. Some of these roads already experience congestion, despite the model suggesting that existing traffic flows are relatively low.

Specifically of interest to the strategic allocation around Ash and Tongham, further information on key infrastructure projects is provided at Appendix C of the draft Plan, in the Infrastructure Schedule. Infrastructure projects LRN9 through to LRN14 relate to improvements to traffic management and environmental improvements in and around Ash, Ash Vale and Tongham, to be funded through a combination of developer contributions and Enterprise M3 Local Economic Partnership Local Growth Fund awards. For example, the schedule identifies LRN14, which is a junction improvement scheme at the connection of the A331 Blackwater Valley Route with the A31 Hog’s Back (Tongham). It is important to note that this mitigation is required to enable the development proposed in the Local Plan to proceed.

In this context, Rushmoor Borough Council is supportive of the planning policy framework and detailed infrastructure projects as they relate to the road network, subject to certainty regarding the delivery of these improvements as part of the overall package of implementation of development in and around Ash, Ash Vale and Tongham.
However, in the absence of the implementation of the full suite of transport policies and proposals to support the quantum of development set out in the Local Plan, this would potentially result in negative cross boundary transport impacts, the residual cumulative impacts of which would be severe. In this context, the Council looks forward to continuing to work with Guildford Borough Council on potential cross boundary strategic transport issues, to ensure that those arising from development proposed in the Guildford Local Plan are appropriately mitigated.

In addition, PED6 sets out a potential expansion of Ash Grange Primary School if required to provide spaces for the primary age children who will live in the new homes to the south and east of Ash and Tongham. These infrastructure proposals are supported by Rushmoor Council, mindful of the strategic allocation for residential development in and around the settlements of Ash and Tongham.

Policy A29: Land to the south and east of Ash and Tongham

We object to the increase from 1200 to 1750 homes as this would increase the pressure of coalescence between the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

• Requirement 6 Amend: "Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green Village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should must include the provision of a green buffer that seeks to maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"
• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

- The Street in Tongham
- A331/A323 intersection and A331/A31 Intersection
- A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Object

The level of development in Ash would significantly increase traffic on the highway network through Wood Street. The Strategic Highway Assessment Report carried out by Surrey County Council, on behalf of GBC concludes that the Aldershot Road (A323) would experience increased traffic congestion and have a level of service indicator which would be at least unstable or where there would be no spare capacity.

[text of attachment reproduced below]

The suggested increase from 1200 to 1750 homes would turn the area locally into a large Urban Area and join Ash, Tongham and Ash Green. Please let us protect the historic location of Ash Green.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I also object to the Policy A29 Land at Ash and Tongham the high levels of housing being put in this area will have an affect upon the A323 going through Worplesdon and other local roads. This road is already at too high a level of traffic congestion. As are too many roads in this borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which
attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. a) The Street in Tongham
2. b) A331/A323 intersection
3. c) A31/White Lane junction

Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the increase from 1200 to 1750 homes as this would increase the pressure of coalescence between the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

- Requirement 6 Amend: “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should must include the provision of a green buffer that seeks to maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:
  “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.
  - The Street in Tongham
  - A331/A323 intersection and A331/A31 Intersection
  - A31/White Lane junction

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Requirement 6 Amend: “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

**Attached documents:**
3) The other change to the Plan which we would like to comment upon is in respect of site A29, which relates to land to the south and east of Ash and Tongham. The site was formerly allocated for approximately 1200 new homes, which has been increased to approximately 1750 new homes in the new version, an increase of almost 50%. An increase of this magnitude will inevitably have a huge impact upon the villages of Normandy and Flexford, in particular upon the volume of traffic on the A323 and the A324, and other roads in the area. The A323 and the A324 are already heavily congested at peak periods and we do not feel that sufficient consideration has been given to problems arising from the increased volume of traffic generated by the number of houses proposed for site A29. In addition this increase in the volume of traffic will have an impact upon the Thames Basin Heaths Special Protection Area which lies to the north of the A324, and upon Normandy Common SNCI which lies between the A324 and the A323. In this respect we feel that the change to site A29 is unsustainable. In this respect we consider that Policy A29, is unsound.

4) Another change which relates to Policy A29, is the deletion of Policy A30 in the current version of the plan. Policy A30 allocated land for a new road bridge and associated footbridge to be built near Ash Station to replace the existing level crossing, and to form part of the A323. That this site has been taken out presumably relates to the fact that the boundaries of Policy A29 near the level crossing have been changed to exclude the fields and four permanent traveller pitches which were contained within Policy A30. We assume that this means that currently GBC are unable to allocate land at the level crossing for the proposed bridges. Policy A29 is described as a strategic location for development, and one of the requirements for it to proceed, Policy A29(9), is “Land and provision of a new road bridge…to enable closure of the level crossing…adjacent to Ash railway station”. We believe that consideration should be given to the question as to whether the deletion of Policy A30 makes Policy A29 unsound, because without an allocation of land the requirement for a new road bridge and footbridge cannot be fulfilled. Presumably if land on which such bridges can be built cannot be acquired, Policy A29 will fail in its entirety. However it is unclear whether the requirement for the construction must be fulfilled before any development in accordance with Policy A29 can commence, or just that the bridges must be built at some point within the dates given in the Infrastructure Schedule of Appendix C, LRN21 (ie. Between 2018 and 2024.) In such a case what would be the result if no land became available during the specified period? If, as seems the case, the position is uncertain, how can Policy A29 be implemented, and how can it meet the tests of “soundness”.

For the reasons set out in points 3) and 4) above, we consider that Policy A29 is unsound, and we object to the changes made in respect of this Policy.

5) We believe that it is necessary to provide a SANG to mitigate against impacts on the Thames Basin Special Protection Area (SPA ) from the developments proposed by Policies A27, A28 and A29), but there is no bespoke SANG relating to these. If the SANG proposed at land to the west of Ash Green is intended to cover this requirement, there does not appear to be any indication in the plan that the size of such SANG has been increased to match the increase in the number of houses proposed in Policy A29.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A29: Land to the south and east of Ash and Tongham should be amended to: “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house.

Requirement 8 should be amended to: “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

Infrastructure must come before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore, solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. A331/A323 intersection
3. A323 from A331 to Ash Station
4. A31/White Lane junction

Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A29: Land to the south and east of Ash and Tongham should be amended to: “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

Requirement 8 should be amended to: “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

Objection - The reasons for objection are below (on pages 19-21 of this letter)

Strategic Location for Development

The words 'This is a strategic location for development' should be removed. There is an implication that you would like inappropriate, large scale growth, perhaps with ugly tall buildings and inappropriate large scale road building.

There will be too many homes (approx. 1200). Density will be too high.

Contents of Policy A29

Your Policy, in a sense, lists reasons why too many homes are planned and why the density will be too high:

- Loss of greenfield land
- Surface water
- Grade II listed buildings
- Historic location of Ash green village
- Area of High Archaeological Potential
- Tree Preservation Orders
- Ancient woodland at some boundaries
- Desirability of a green buffer along Ash green Road
- Congestion on the A323 Ash Street, Ash Church Road Guildford Road
- Need to connect spaces and habitat within the site and to outside the site.

Pollution

For some people there may be noise issues (from the A31 Hogs Back, the A331 Blackwater Valley Road and the railway). Poor air quality must also be considered. The URS report dated August 2014, prepared for Guildford Borough Council, states 'Development at Send and Ashtrongham is likely to lead to negative effects on air quality, noise, human health and other topics'.

Should you not add 'potential noise and air quality issues' to your list in Policy A29? You mention such problems in your description of the former Wisley airfield on page 205, so there is a need to be consistent.

Highway Network

The highway network is not entirely suitable for additional development.

In my view egress from the main sites onto Ash Green Road or Harpers Road is undesirable, bearing in mind the character of these roads and the risk of injury accidents. The junctions of Harpers Road/A323 Guildford Road and Wyke Lane/A323 Guildford Road have accident records. Also, at the Harpers Road/Pound Lane junction there are historic buildings close to the road. Substantial improvement to these roads would be difficult and costly, taking into account a narrow railway bridge etc. The character of the roads which lead to and from the A323, could change so that they are no longer quiet, pleasant, rural lanes. Along the A323, the provision of more traffic signals (compared with roundabouts) would change the character of the A323 from rural to urban. Road widening, which might involve taking land from the recreation ground, would not be welcome.

Historic Environment

Regarding land North of Ash Green Road and East of Foreman Road, this site is too close to the 13th century Manor House which has a moat, or on or near to land which was once the village green. It is important that there should be no
building development anywhere near to the Manor House as it will be out of context and harm the integrity of a historic site. See Policy D3 on Page 103. South Side of Tongham

Development of land on the north side of the A31 dual carriageway, to the west of the Street, will remove the green buffer between the A31 and the village of Tongham.

Building development will spoil the rural character of the approach to Tongham (the land at present has a hop field which serves the Hogs Back Brewery which is on the east side of The Street). The only way to mitigate the effects of the proposed development would appear to be to have fewer homes and less density.

Ash Railway Station

Policy A29 mentions 'improve the level crossing'. Elsewhere in the Local Plan you have mentioned closure of the level crossing, so there is some inconsistency. Please see Policy A30, below.

After 'new road bridge' add:

'A new off-street car park will also be provided on the north side of the railway to the east of A323 Church Road to serve additional residents in the general area and to reduce problems caused by parking on nearby roads'. Please see Policy A30, below.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Page 212, Policy A29: Land to the South and East of Ash and Tongham

Objection – The reasons for objection are below:

Strategic Location for Development

The words 'This is a strategic location for development' should be removed. There is an implication that you would like inappropriate, large scale growth, perhaps with ugly tall buildings and inappropriate large scale road building.

Numbers of Homes and Density

There will be too many homes (approx. 1750, raised from the previous figure of 1200). Density will be too high.

New Homes in Aldershot, Hampshire, 2 miles (3km) from Ash & Tongham

Paragraph 1.9 of the Local Plan mentions the duty of local councils to cooperate with neighbouring authorities. You will therefore have been aware that for the last 16 years or so Rushmoor Borough Council has had plans for 3000-4000 homes to be built upon military land (brownfield sites). Building work has now started. This is one of a number of reasons why there should be less building development proposed in the Ash/Tongham area.

Contents of Policy A29
Your Policy, in a sense, lists reasons why too many homes are planned and why the density will be too high:

- Loss of greenfield land
- Surface water flooding
- Listed buildings
- Historic location of Ash green village
- Area of High Archaeological Potential
- Potential noise and air quality issues
- Proximity to ancient woodland/SNCI

Also, there is often congestion on the A323 Ash Street, Ash Church Road, Guildford Road.

Pollution

For some people there may be noise issues (from the A31 Hogs Back, the A331 Blackwater Valley Road and the railway). Poor air quality must also be considered. The URS report dated August 1014, prepared for Guildford Borough Council, states ‘Development at Send and Ash/Tongham is likely to lead to negative effects on air quality, noise, human health and other topics’.

Highway Network

The highway network is not suitable for the scale of the proposed additional development.

In my view egress from the main sites onto Ash Green Road or Harpers Road is undesirable, bearing in mind the character of these roads and the risk of injury accidents. The junctions of Harpers Road/A323 Guildford Road and Wyke Lane/A323 Guildford Road have accident records. Also, at the Harpers Road/Pound Lane junction there are historic buildings close to the road. Substantial improvement to these roads would be difficult and costly, taking into account a narrow railway bridge etc. The character of the roads which lead to and from the A323, could change so that they are no longer quiet, pleasant, rural lanes. Along the A323, the provision of more traffic signals (compared with roundabouts) would change the character of the A323 from rural to urban. Road widening, which might involve taking land from the recreation ground, would not be welcome.

Historic Environment

Regarding land North of Ash Green Road and East of Foreman Road, this site is too close to the 13th century Manor House which has a moat, on or near to land which was once the village green. It is important that there should be no building development anywhere near to the Manor House as it will be out of context and harm the integrity of a historic site. See Policy D3 on Page 116.

South Side of Tongham

Development of land on the north side of the A31 dual carriageway, to the west of the Street, will remove the green buffer between the A31 and the village of Tongham. Building development will spoil the rural character of the approach to Tongham (the land at present has a hop field which serves the Hogs Back Brewery which is on the east side
of The Street). The only way to mitigate the effects of the proposed development would appear to be to have fewer homes and less density.

Ash Railway Station

After '(9) new road bridge' add:

'A new off-street car park will also be provided on the north side of the railway to the east of A323 Church Road to serve additional residents in the general area and to reduce problems caused by parking on nearby roads'.

Land for New Road Bridge and Footbridge Scheme to enable Level Crossing Closure on A323 Guildford Road Adjacent to Ash Railway Station, Ash

Land for Off-street Parking in the Vicinity

The existing, small, Ash railway station car park is inadequate. There is a need for a firm plan to provide a new off-street parking for cars and cycles on the north side of the railway to the east of A323 Church Road to serve additional residents in the general area and to reduce problems caused by parking on nearby roads. The parking area could be provided before a bridge is built. It could then be adapted to fit land available after a bridge is built. The new car park could be landscaped and secure. It could be funded by contributions from developers and/or Guildford Borough Council in view of the need to address travel problems which will arise from the Council's policies of adding new homes in the area (1750 in Ash and Tongham). The Local Plan will mean that there will be over 2000 more cars and other vehicles owned within a few miles of Ash railway station.

Land for Cycle Routes in the Vicinity

High standard cycle routes could be provided, on and off the highway, to encourage cycling to the station and to help the safety of cyclists.

If necessary, traffic signals could help pedestrians and cyclists to cross the A323.

Note: If these proposed additional requirements for off-street parking and cycle routes are not included in the Local Plan, there is a risk that they will be overlooked.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

After '(9) new road bridge' add:

'A new off-street car park will also be provided on the north side of the railway to the east of A323 Church Road to serve additional residents in the general area and to reduce problems caused by parking on nearby roads'.

**Document:**  Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that seeks to maintain a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

  a) The Street in Tongham
  b) A331/A323 intersection
  c) A31 /White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

6.1 Policy A29 now looks to provide for some 1,750 dwellings rather than the 1,200 proposed in the June 2016 PSLP. This increase is explained at p7 of the 2017 LAA update as being due to the fact that it now encompasses 'planning permissions in the area that have not yet commenced due to the current unavailability of Suitable Alternative Natural Greenspace (SANG).” Whilst we would take issue with this as the consented site at South Ash Drive (which has consent for 400 dwellings (16/P/00980 refers)), also provides for some 24ha of SANG to accommodate its needs and that of the wider area, we note that policy A29 as amended also now requires:

1) Appropriate financial contributions to enable expansion of Ash Manor Secondary School by additional 1FE
2) Appropriate financial contributions towards expansion of existing GP provision in the area or land and a new building for a new GPs surgery
3) Sufficient capacity is available within Ash Vale wastewater treatment works to accept wastewater from this development within its permitted limits
9) Land and provision of a new road bridge which will form part of the A323 Guildford Road, with an associated footbridge, to enable the closure of the level crossing on the A323 Guildford Road, adjacent to Ash railway station

6.2 Whilst not wishing to comment on criterion 1 and 3, the simple fact is the land at South Ash Drive has already made provision for a doctor’s surgery (criterion 2) such that the need for others to do so is open to debate. Furthermore there is no claw back mechanism within the S106 for the land at South Ash Drive for the developer to receive contributions from others to help off-set the costs of providing the doctors surgery such that this cost has been born solely by those developing the land at South Ash Drive (A2 and Bewley). It is thus questionable as to whether the inclusion of criterion 2 in policy A29 as amended is justified, and accords with national government guidance in terms of the CiL regulations.

6.3 In addition to the above the requirement for the land allocation pursuant to policy A29 to provide for a new road bridge which will form part of the A323 Guildford Road, with an associated footbridge, to enable the closure of the level crossing on the A323 Guildford Road, adjacent to Ash railway station is in our opinion unjustified.

6.4 We understand that SCC is concerned about the future operation of the level crossing due to a) development impacts; and also b) the potential closure of the right turn lane into White Lane from the A31 for highway safety reasons, which may result in traffic re-routing via the level crossing.

6.5 In the context of the above we are not aware that SCC have:-
• Modelled the net impact of development (i.e. considering what already has permission) nor have they tested the re-routing effects of closing the A31 right turn lane (noting that ‘other routes are available’);
• Modelled the impact of the potential increase in trains using the line;
• Looked into alternative options i.e. considered the merits of improving alternative routes to those that use the Ash level crossing;
• Considered the viability of delivering the bridge relative to the number of sites that have permission and those that remain subject to applications/ have yet to be bought forward in the allocated area; and
• Sought to establish those parts of the allocation that will have an impact on the crossing and those that will not. The above two points will leave relatively few dwellings footing an exceptional bill.

6.6 Given the above we consider there to be no evidence to demonstrate that
A. The bridge is necessary;
B. How much it will cost and how it can be provided; and
C. The programme for its delivery and how this relates to the Council's housing trajectory for the delivery of housing from the Ash/Tongham allocation.
Furthermore we note that the area allocated pursuant to policy A29 does not include the land necessary to provide for a new road and footbridge over Ash railway line, such that the councils ability to ensure delivery of this facility has not been demonstrated.[12]

6.7 On the basis of the above we do not believe the introduction of criterion 9 in policy A29 as amended to be justified, or to accord with national government guidance in terms of the CiL regulations.
6.8 In addition to the above we would point out that planning permission exists within the area designated pursuant to policy A29 for the following, which in total will provide for 725 dwellings:-
• 400 homes at Ash Lodge Drive, Ash - Application 12/P/01973;
• 56 homes on land south and east of Dene Close, Ash -Application 14/P/01870;
• 35 homes on land north of Poyle Road, Tongham - Application 12/P/01534 – RM for 26 – 16/P/00663;
• 55 homes at Minley Nursery, Spoil Lane, Tongham - Application 15/P/00293;
• 50 homes adjacent to Grange Farm, Grange Road, Tongham - Application 14/P/02398;
• 26 home on land south of Foreman Park and west of Foreman Road, Ash - Application 12/P/01534; and
• 26 homes on land at Ash Green Lane West - Application 15/P/00167.
• 21 homes on land at 109 South Lane - Application 14/P/01637
• 58 homes on land at Warren Farm, White Lane - Application 16/P/00120

[12] Policy A30 of the 2016 PSLP sought to safeguard land for a new road bridge and footbridge scheme to enable a level crossing closure on the A323 Guildford Road adjacent to Ash railway station. This policy is deleted in the 2017 PSLP. The rational for the deletion of policy A30 and the proposed additions to policy A29 in the PSLP is not clear, such that the deletion of policy A30 will in our opinion effectively prejudice the plans ability to deliver the proposed crossing and is, if the bridge is justified, unsound.

6.9 In addition there are currently outstanding (live) applications with GBC for:-
• 254 homes at Grange Farm - Application 16/P/00222;
• 50 homes at land north of Grange Road - Application 17/P/00529;
• 95 homes at Ash Manor - Application 17/P/00513; and
• 154 homes (an additional 98 homes to those already consented via 14/P/01870) at Land south and east of Dene Close Ash - Application 16/P/01679.
• 150 homes on land on Poyle Road - Application 17/P/01315

6.10 These, if consented will provide for an additional 647 dwellings, such that of the 1,750 allocated pursuant to policy A29, 1372 will have consent/ are awaiting determination, leaving just 308 to pay for the proposed 'land and new road bridge which will form part of the A323 Guildford Road, with an associated footbridge, to enable the closure of the level crossing on the A323 Guildford Road, adjacent to Ash railway station’ which is hardly reasonable – i.e. fairly and reasonably related in scale and kind to the development and would not comply with national government guidance.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Policy A29 has been revised following the withdrawal of Policy A30 which proposed a “sound” alignment for a road over bridge for the A323 at Ash railway crossing. Paragraph 9 of amended Policy A29 now effectively replaces deleted Policy A30 with what is a demonstrably poorer solution for traffic along the A323 corridor. The original alignment for the over bridge proposed under Policy A30 is now made impossible by the exclusion of land immediately north east of the railway crossing from the Plan.

During the public drop-in event at Tongham on 15 June, I understood the GBC transport planning team representative to say that potential developers were "not interested" in supporting Policy A30 and, as GBC “had no money” for funding the railway over bridge, it was down to potential developers to propose a new bridge alignment that they would be prepared to fund. Any such alignment would seem to have to involve a significant diversion of the A323 in a "U-bend" via a series of roundabouts through the new housing estate and then almost backwards along Foreman Road to connect into the current alignment just south of the railway crossing.

This is a retrograde change to the Plan as it would lead to a deterioration in the quality of the A323 corridor for through traffic between Aldershot and Guildford compared to the previous proposal under Policies A29/A30. This section of the revised document is therefore considered “unsound”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Reinstate Policy A30 to make the document "sound".

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that seeks to maintain a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”
• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

a) The Street in Tongham
b) A331/A323 intersection
c) A31 /White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. Comment ID: pslp172/3009  Respondent: 10805953 / Elaine Boyes  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My next objection is to Policy A29: Land to the south and east of Ash and Tongham.

On this policy I want to object to the increase in the proposed number of homes of 1200 to 1750. Doing this will certainly join Ash Green Village to ATUA. This completely goes against Policy P3.

It also goes against the NPPF which identifies that there should be a limit to development in the countryside and that the rural communities should be supported. I therefore ask for the requirement 6 of this policy, which looks at protecting the ‘historic location of Ash Green’ is not good enough and needs to be reworded to give Ash Green more protection.

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should must include the provision of a green buffer that seeks to maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

To add to the amendments of policy A29, requirement 8 does not give sufficient protection to Ash Manor which is a historical farmstead constituting of 3 grade 2 listed buildings, of which the main house Ash Manor is a Medieval moated house dating back over 1000 years and is connected to Henry VIII.

It is also clearly stated in the NPPF of the need to conserve and enhance the historic environment and to recognise heritage assets as irreplaceable and protect them against any threats such as development.

To give this historical farmstead and heritage asset more protection there should be amendments to requirement 8 as follows.

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

It must be made a priority that there is adequate infrastructure in place before any development is allowed to proceed. This applies to Requirement 9, the proposed road bridge at Ash Staton and closure of level crossing.
This requirement also fails to address other infrastructure improvements in relation to transport that are needed to cope with increase of traffic that would be generated from any developments of A29. Solutions must be drawn up to address The Street in Tongham, A331/A323 intersection and A31/White Lane junction before any development of A29 can go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Suggested amendment to:

Requirement 6:
“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should must include the provision of a green buffer that seeks to maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

Requirement 8:
“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

2. Policy A29: Land to the south and east of Ash and Tongham

• I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

1. Policy A29: Land to the south and east of Ash and Tongham (Cont.)

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”.

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:
Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be completed before any development of Policy A29 commences.
- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. A331/A323 intersection
3. A31/White Lane junction

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham Urban Area. Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that seeks to maintain a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:
"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

a) The Street in Tongham
b) A331/A323 intersection
c) A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

• My concern lies with the parcel of land bordered by the A331/A31 and The Street in Tongham. Part of this land is currently being used for the growing of hops by the Hogs Back Brewery, celebrating the historic cultivation of Hops in the Farnham area. As such I would be disappointed to see this area used for housing and undermining land adjacent to the brewery which is being used as an agriculture/green space for the supply of local ingredients for the brewery.

• Given the proposed removal of A30/LRN21 (Ash Level Crossing) – which is already a traffic pinch point – and the additional traffic that could be expected to use Foreman Road to access the development, should consideration be given to facilitating a better junction between the A31 and White Lane? I am aware of a number of serious accidents that have taken place at this junction (due to cars either crossing or attempting to join the Northbound carriageway) and so I feel that with the proposed increase of houses in the areas – and hence vehicles that may be attempting to exit/join the A31 at this point, there will be further incidents if the junction is not improved.

1. Policy A29: Land to the south and east of Ash and Tongham

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village, since taking into account the development that has already taken place, since the the start of the consultation the net gain in housing in the ATUA will be in excess of 2000 units. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is insufficient and requires a more robust rewording to prevent this increased potential for coalescence.

1. Policy A29: Land to the south and east of Ash and Tongham (Cont.)

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. RE: REGULATION 19 CONSULTATION, DRAFT LOCAL PLAN POLICY A29

I write on behalf of Copperwood Developments Ltd, to make specific comments relating to draft Policy A29.

As background information, Copperwood Developments Ltd recently obtained Outline planning consent at appeal for 56 dwellings on Land South of Guildford Road, Ash (Application Ref 14/P/01870).

Following the appeal decision (APP/Y3615/W/15/3135326), dated April 2016, Copperwood submitted a further Outline planning application for 154 dwellings on an enlarged application site (Application Ref 16/P/01679). This application was recommended for approval to the Planning Committee (17th May 2017), who resolved to approve the scheme subject to a S.106 agreement, which included a requirement for land to be made available for the Ash road bridge as well as a contribution towards the road bridge itself.

[Location Plan for outline application 16/P/01679(154 dwellings)]

It should be noted, that as part of the planning application the applicant’s Highway Consultant’s submitted extensive reports and data to Surrey County Highways Authority (SCHA) to demonstrate that the proposal for 154 dwellings, on its own, and in combination with other development schemes in the area, would not generate a requirement for a road bridge.

The submitted transport assessment has been accepted by SCHA, who have confirmed that a road bridge is not required as part of my client’s proposal. However, Guildford Borough Council (GBC) continue to insist that a road bridge is required and refers to the emerging Policy A29. The Committee Report, whilst referring to Policy A29 and the S106 road bridge contribution, nevertheless states that the policy carries limited weight at this stage due to its draft status.
My client contends that the requirement for a financial contribution for the road bridge and for my client to gift land to the GBC for the road bridge, fails to meet the tests for S.106 agreements, namely that the requirement is necessary to make the development acceptable in planning terms; directly related to the development; and fairly and reasonably related in scale and kind to the development.

Turning to Policy A29, I would make the following comments:

Policy A29 (1)

We note the requirement for a financial contribution towards expansion of Ash Manor Secondary School for an additional one form entry. It is not clear how these contributions will be sought, and from which developments, particularly as CIL Regulations only enable the Council to seek a maximum of 5 x S106 agreements for a specific infrastructure project.

The policy does not elaborate as to which of the planned development schemes, numbering 1,750 dwellings in total, will contribute towards the secondary school, particularly as some 40% of the 1,750 dwellings have already obtained planning consent without any contributions being payable towards the school.

It is contended, that funding for the secondary school would be more appropriate and equitable through CIL contributions, once the charging schedule is in place.

Policy A29 (2)

It is contended, that seeking financial contributions towards the expansion of existing GP provision in the area, through land and new buildings for a new GPs surgery, is a questionable infrastructure project, particularly as doctors surgeries tend to be privately owned enterprises, owned often by the practice doctors and not owned by NHS England. The contributions towards a doctors surgery could, therefore, be potentially funding a private enterprise.

As noted in the Member and officer discussion during the consideration of application 16/P/01679 (May 2017 Planning Committee), the Council officer responding to a question by a Councillor concerning contributions towards a GP surgery stated:-

“…we are trying to engage with GPs and CCGs but at the moment we don’t have a costed and worked up project by which to take a contribution to.” “…the Bewley Homes Scheme for 400 secures land for provision of a healthcare facility. If we knew what that was and we knew NHS England were going to fund it and pay for it we could seek contributions towards it. Where we are at the moment is we don’t know who will fund that or provide that. That could be provided privately for a commercial rent and if you take a contribution to it you are funding a private company to deliver something that they are providing. We don’t have enough information on what that project is at this time to be able to justify a contribution towards it. “…The answer to that question I think is we don’t have the evidence and there’s not the evidence before you in this committee to link this development to causing an unacceptable impact on local healthcare provision. I appreciate there’s lots of developments that have gone before and anecdotal evidence of GPs’ waiting times is before everybody but to be able to justify reason for refusal you would have to be able to link this development to that breaking point in healthcare provision in the area and we don’t have that evidence. Thank you Chairman”

In the light of the above officer comments to the Planning Committee Members in May of this year, it is somewhat surprising that this Policy (A29 (2)) continues to seek such contributions.

Policy A29 (9)

The policy seeks provision of a new road bridge and associated footbridge to enable the closure of the level crossing. There is no indication within the policy as to how this road bridge will be paid for. The previously superseded draft Policy A30 required developers to cover the cost of the road bridge, estimated to cost £15m to build, excluding the value of the land.

Although in the light of CIL regulations and the limit of 5 x S106 contributions towards a single infrastructure project, there is a strong possibility of a significantly high financial burden being levied against a small amount of development schemes that may come forward in the Ash and Tongham area.

Nevertheless, it is contended that the road bridge is not required to alleviate any highway safety and congestion issues. The application for 154 dwellings (16/P/01679), has shown through the transport assessment and data on queuing in the
vicinity of the level crossing during barrier downtimes, that the current proposal on its own, or in combination with other approved development schemes, will not cause a highway safety issue. The proposed road mitigation measures proposed as part of application 16/P/01679, will improve traffic movements on the immediate highway. SCHA have accepted the applicant’s findings and have not raised any objections to the proposal or indeed sought the provision of a road bridge as part of the 154 dwelling scheme.

The policy also requires developers to provide land for the road bridge, with no mention of Compulsory Purchasing the land required for the road bridge or how the land will be acquired.

We therefore contend, that the road bridge requirement of Policy A29 would fail to comply with CIL regulations should GBC seek to fund the scheme through S106 contributions.

“Planning obligations should not be sought where they are clearly not necessary to make the development acceptable in planning terms. Planning obligations must be fully justified and evidenced.”

(Paragraph: 004 Reference ID: 23b-004-20150326 Revision date: 26 03 2015)

It is contended, that the road bridge is not justified or evidenced as being necessary to alleviate pressures on the local highway from proposed new development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

- Regulatuion 19 Consultation Draft Local Plan Policy A29.pdf (378 KB)
In particular the areas of land identified on the plan attached at Annex 1 to these representations form an integral part of the strategic development location that can and will make a valuable contribution to the delivery of new housing in this area.

Bewley Homes has a controlling interest in the area identified on the attached plan and is therefore able to ensure its complete delivery on a comprehensive basis as part of the overall strategic development location.

Given the importance of ensuring the strategic development location is cohesive and that the individual development proposals provide connections between the sites and existing urban area (a point that Bewley Homes is particularly supportive of) it is considered vital that the whole of the area covered by the strategic development location is included in the formal allocation.

The inclusion of the areas identified will also provide greater flexibility in terms of the delivery of further housing and affordable housing in a highly sustainable location outside of the Green Belt that will strengthen the Council’s housing delivery strategy.

Bewley Homes is aware of the presence of certain Heritage Assets in the vicinity of the areas identified on the attached plan. It is considered that the presence of these Heritage Assets adds greater weight to the argument that the areas identified on the attached plan should be included within the strategic development location. Their inclusion will ensure that through a comprehensive masterplanning exercise for the area under Bewley Homes’ control the Heritage Assets can be properly protected as part of any future development.

Finally it is important to note that the approach being taken by the Council will bring the areas identified into the defined urban area of Ash and Tongham in any event, wherein the principle of development will become acceptable. It is therefore logical that these areas are included within the strategic development location to ensure proper positive planning of the area rather than leaving their future development potential solely to the Development Management process.

The draft proposals map should therefore be amended to include the areas of land identified on the attached plan within the strategic development location.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Policy A29 – OBJECT: UNSOUND – Not Positively Prepared, Justified, Effective or Consistent with National Policy:

2.67 Whilst Bewley Homes supports the allocation of land at Ash and Tongham for housing, as per the previous representations submitted in relation to the earlier Regulation 19 consultation, the revisions made to the policy in the current iteration of the Plan raise a number of fundamental issues, which are explored below.

Housing Numbers Included in Allocation:
2.68 When compared with the previous iteration of the draft policy the total number of dwellings proposed appears, on face value at least, to have increased. This is however not the case when the detail of the approach now being taken by the Council is explored.
2.69 The amendments to the draft allocation reintroduce areas that already benefit from planning consent that were previously excluded from the allocation and therefore the total number of dwellings proposed. When the areas of consented sites are discounted from the total allocation proposed the residual from the allocation is approximately 1,025 dwellings, which compares with the previous allocation figure of 1,200 dwellings. Consequently the Council’s proposed housing provision from this allocation has actually reduced by nearly 200 dwellings.

Current Consented Sites – Ash and Tongham Allocation

| Land South of Ash Lodge Drive | 400 dwellings |
| Foreman Park                  | 26 dwellings  |
| Kingston House                | 35 dwellings  |
| Minley Nursery                | 55 dwellings  |
| Ash Green Lane West           | 26 dwellings  |
| Land adjacent to Grange Road  | 50 dwellings  |
| Land south of Guildford Road  | 54 dwellings  |
| Land at 109 South Lane        | 21 dwellings  |
| Warren Farm, White Lane       | 58 dwellings  |
| **TOTAL**                     | **725 dwellings** |

2.70 This does not represent a positively planned approach particularly given the acute need for new housing in Guildford Borough and the fact that the Ash and Tongham allocation comprises the only major area outside of the Green Belt that is sustainably able to deliver further housing.

2.71 In short the Council is not seeking to make the most of this precious land resource, which fails to accord with government guidance and is consequence not justified.

Requirement for New Road Bridge (Criterion (9)):

2.72 The introduction of this Criterion into the policies corresponds with the proposed deletion of draft Policy A30. Bewley Homes raises serious concerns with the introduction of this Criterion for the following reasons:

2.72.1 **Not Justified/Necessary** – The Council has not presented any evidence either as part of the policy or in any supporting documentation to justify why a bridge over the railway in Ash is required either as part of the housing allocation or in isolation.

2.72.2 The Council has not undertaken any work to determine whether the impact arising from the allocation of additional housing in Ash and Tongham would give rise to a ‘severe’ cumulative impact as required by Paragraph 32 of the Framework such that mitigation to the railway crossing would be required. Following on from this would need to be an assessment of options in the event that mitigation was required. This has not been done.

2.72.3 **Not Reasonable/Feasible** – In the event that a bridge is required, which the Council simply does not have the evidence to determine, there is no assessment by the Council or the Highway Authority to confirm that it would be feasible either in engineering or practical terms.

2.72.4 **Not Viable** - The policy requires the delivery of both land and the bridge to be provided via the residential development of the Ash and Tongham allocation. No financial viability has been undertaken to determine how much the bridge would cost to deliver and
consequently how much the residential development would be expected to pay to determine whether the costs are reasonable related in scale and kind to the residential development proposed.

2.72.5 As a confirmation of Bewley Homes’ concerns in relation to this point the fact that 725 dwellings have already been granted consent in the allocation area leaving only 1,025 dwellings remaining of which a further 647 dwellings are the subject of live planning applications means that the pool of available dwellings against which the costs of delivering a bridge can be levied via a Planning Obligation is relatively small. No highway concerns relating to the railway crossing have been raised by the Highway Authority in relation to the 725 dwellings already consented and it would therefore appear highly unlikely that the Council would be able to justify the delivery of such a significant piece of infrastructure from the remaining 1,025 dwellings (net of 308 dwellings when existing live planning applications are removed).

2.73 For these reasons the proposal for a bridge as part of this allocation completely fails all of the Statutory tests set out in Regulation 122 of the Community Infrastructure Levy Regulations 2010.

2.74 It is also understood that the Council intends to collect financial contributions for the delivery of the bridge via Planning Obligations rather than Community Infrastructure Levy. Given the number of individual ownerships/promoters all active within the Ash and Tongham allocation area the approach the Council proposes will fail to meet the requirement of Regulation 123 of the Community Infrastructure Levy Regulations 2010 and consequently would be unlawful.

2.75 Furthermore the fact that the Council has deleted draft Policy A30 and not replaced this area within Policy A29 raises significant doubt on whether there is actually sufficient land within the scope of the allocation to deliver a bridge even if all of the above matters can be satisfactorily demonstrated by the Council. There is no justification given for the deletion of draft Policy A30 and given that Criterion (9) does not replicate the deleted policy this increases the doubt on the Council’s case for its inclusion.

2.76 The introduction of this Criterion within the draft Policy at this late stage in the process and its lack of detail in terms of the actual bridge proposal raises a serious issue in that the Council cannot possibly contend the proposal has been the subject of SA. The simple fact is the Council has not undertaken any work to determine whether the proposal is necessary and how it can be delivered against which a credible SA could be provided.

2.77 In this regard this element of the draft policy fails not only the tests of soundness in terms of not being justified, positively prepared, effective or in compliance with National policy but also fails the legal test in terms of not having been the subject of SA.

2.78 The policy therefore needs to be reworded as follows:
1. To remove Criterion (9) because there is no justification for a bridge to be provided;
2. To increase the overall housing allocation in the area to make best use of this highly sustainable location outside of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The area is long recognised as the most sustainable location in the Borough after Guildford;
- It is unconstrained by environmental designations;
- It lies in the area designated as ‘Land Beyond the Green Belt’;
- It has access to the strategic road network, specifically the A31 Hogs Back and A331 Blackwater Valley Route;
- Opportunities exist through sensitive design at the site boundaries to have regard to the transition from urban to rural; provide integrated green infrastructure enabling connectivity of spaces and habitats between land parcels; and provide sufficient SANG land for the needs of development cross boundary.

Notwithstanding this, the provision of SANG in conjunction with development proposals coming forward within this strategic location should also be incorporated within the policy, specifically SANG proposals on land at Tongham Road, Runfold which will provide mitigation for residential development on land to the west of The Street, Tongham as well as additional development within the strategic development site and cross boundary into Waverley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I wish to object to the plan for further housing development in ash and tongham.

This is green belt land and should stay that way. On top of this there is not enough schools in the area to support this. The roads are all exceptionally busy and badly maintained.

The level crossing at ash station already causes massive traffic as do the traffic lights in Normady.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I would be interested to know how the building of 1200 new homes can be justified which will change the character of this village beyond recognition? Fundamentally and in my opinion construction on such a large scale will:

- Create more traffic based on the assumption that to every house there are on average 2 car users.
- Have an impact on the local infrastructure putting pressure on the schools and health centre, plus shopping facilities.
- Impact on services - I personally haven’t seen any plans to support this increase in housing by providing any new shopping facilities or a much needed Post Office.
- Have a cumulative impact by adding traffic to an already busy road network - A31, A331, A323, Gridlock happens in Ash whenever there is a major incident on any of the aforementioned roads.
- Decimate the wildlife and natural appearance of the countryside.

In my opinion, house numbers should be downsized. Ash seems to take the hit every time there is talk of construction with other villages particularly to the east of the borough escaping development on this scale. Why is this?

There are approximately 3000 new homes planned for Aldershot, which neighbours Ash. All these new residents will be using and thus sharing the same road network with the additional residents in Ash. Inevitably, there will be increased road congestion.

Lets also not forget that 400 new homes are planned for land adjoining Ash Lodge Drive and further development in Tongham and this represents large scale development which will greatly affect the character and nature of this village and put pressure on infrastructure.

There must be better assurances of why this housing is needed and if so guarantees that the infrastructure is put in place BEFOREHAND so as not to make everyone's life a misery. It is appreciated that some housing, and suitable housing at that is needed but not on this scale. If I had wanted to live in the middle of a town or city, I would have moved to one.

The current infrastructure cannot support the proposed development.

The Ash Vale Health Centre has no spare capacity, the existing roads are already congested at peak times, the trains are already busy at peak times, the recent development in Tongham has only just completed and the proposed increase of over 1200 houses in this area will put an impossible strain on schools, in particular infant, junior and Primary schools.

There are no local facilities for young people in Ash and the surrounding area. There are only a few park areas and the sports centre attached to the Ash Manor school is insufficient to support such a swell in population. Library opening hours are limited.

Whilst Ash Vale has a community centre and a small parade of shops, there are few designated parking facilities, which inevitably leads to on street parking which in turn causes traffic build up. There is very little parking at both Ash and Ash Vale stations, which will lead again to more parking problems.

The transport links, especially the number of buses and routes, are very limited in this area and this will inevitably lead to more cars, congestion and pollution.

In this area, there is only a small Post Office counter housed within the One Stop in Ash, this has on occasion run out of stamps. There is no Post Office in Ash Vale and to my knowledge, no plans for one.

The vastness of these proposal is detrimental to the green and open nature of this area. Ash Green will sprawl into Ash and result in a swollen population of a small village, which already has few facilities.

OBJECTION

As the current occupiers of Ash Green Station, we feel well based to be able to comment on the rather strange boundaries you have created for Ash Green in the plan. You are proposing that Ash Green Road be included in the Ash and Tongham urban area. Where will the boundary be as you are proposing development on site A28? There will be no boundary between Ash and Ash Green. Ash Green actually starts North of Ash Green Road. This is where we believe the greenbelt boundary should be placed.

The amount of proposed development will detrimentally change the character of the village and change it from countryside to urban. The NPPF sites that no development should do this. Large housing developments are not in keeping with the surrounding areas and the density is vastly too high. As the current guardians of the locally listed, historic building of Ash Green Station, we feel that the historic context would be lost as we would be surrounded by and right in the middle of new housing developments, not in keeping with the village. We would end up being the buffer proposed in A29!

We believe this proposed level of development is fundamentally flawed as there is a huge lack of infrastructure - a practically non existent bus service, no real means to safely get to Ash station (there is little option other than to use a car, either to get to the station or elsewhere), and already major congestion on local roads. Ash Green does not have a suitable transport network - we are not set up to take more residents and therefore more traffic. There are already huge delays and traffic jams locally with the main route through Ash in effect being closed 35 minutes out of every hour at the level crossing causing pinch points. We have 8 of the top hotspots for traffic congestion within Surrey in and around Ash. In the plan you suggest changes to road layouts to combat some of these issues, however it would just cause traffic to then travel through Ash Green, creating congestion throughout the entire area as well as on the main road A323. The area cannot take 1200 new homes and the thousands of extra vehicles that would inevitably come with them. The Hogs Back to Guildford at peak times is extremely congested and would again struggle with any increase in volume.

Are Guildford Borough Council in correspondence/consultation with Hampshire County Council regarding the new building developments in Aldershot and the surrounding areas? We share bus, rail and road services (with one of the major routes out of Aldershot meeting the A323 at Ash), these new developments will put a strain on everything before Guildford Borough Council even start with any of their proposed developments.

Local schools, doctors and dentists are already under pressure. We currently struggle to get a doctors appointment within two weeks.

Ash Green, Ash and Tongham has a recorded history of flooding issues, with the proposed levels of development this will do nothing other than exacerbate an already major problem.

We feel it would be an incredible tragedy to lose so much of the greenbelt, which once developed, we would more than likely never get back, for us, or future generations. Under the proposed developments Ash Green would lose it's rural identity and historic boundaries. We need to protect these areas and instead redevelop urban areas and brownfield sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The changes to the plan have created even more contradictions to what it hopes to achieve and what it proposes. It says that it proposes to reduce the need to travel and energy consumption and then increases the number of sites in policy A29 and the number of homes allocated to 1750+ in an area where there is insufficient wealth creation at the very edge of the borough to employ the existing population let alone these proposed new residents, thereby creating even more commuter journeys. Ash and Tongham is being considered as a town when by definition they are not since a town is a place where people not only live but also work which is patently, not the case. Ash, Tongham, Ash Vale and Ash Green should still be afforded their individual identities and would have had, if the green buffer area which is now so important between Ash, Tongham and Aldershot, had been applied to them in the recent past. The green, Tranquil buffer (4.3.34) actually sits aside 4 lanes of fast moving traffic (except at peak times when the traffic is anything but).

The increase in the number of sites in policy A29 added to A28 means an increase of new homes in excess of 1800 new homes, all on green field sites in villages already known to be the second largest urban conurbation in Guildford borough. This increase is only surpassed by the proposed Wisley allocation of 2000. It does appear that other villages within the borough are not having to give up so much of their pleasant environment as Ash, Tongham and surrounds have done in the past and now again in this amended plan, not that I have any wish to see this "chase for growth and push the debt on the next generation" attitude inflicted on anybody else.

The site allocation of policy A29 now includes areas of Ash Green to the north, south and east of Ash Green road and South of Foreman Road which the plan purports to protect without any consideration for a green buffer apparently so important elsewhere.

The amended plan purports to protect sites of historic interest yet policy A29 is in direct conflict with this given its impact on Ash Manor.

The admission that the local infrastructure doesn't meet the needs of many of its residents and is considered poor by many (para 4.6.1) will not be addressed by infrastructure improvements for only those in these new developments (policy Id1). Thereby diminishing further the living standards of the existing residents due to the blight of new development as admitted in policy Id1.

The site apportioned in policy A29 for the new road bridge to relieve congestion caused by the Ash station level crossing has been deleted and is not identified elsewhere which suggests no priority for such an important infrastructure necessity now, regardless of future development.

A29 ASH AND TONINGHMAM

* Village extension: The plan envisages a rather ad hoc village extension. Preservation of the integrity of villages is generally recognised as a paramount objective of the green belt and therefore including this site seems inappropriate. This is particularly so as the 'site' actually consists of 8 separate sites

* Flooding and drainage issues are significant, and will require co-operation of adjoining land owners, that may not be forthcoming, and which are likely to delay the commencement of any development

* Boundaries require sensitive design and are not consistent with government policy of ensuring that any boundary changes to the green belt will have a degree of permanency. Of course as there are 8 separate sites, there are 8 boundaries that need to be considered

* Rail - There is a requirement for a new road bridge and level crossing - again this will impact on the timing of the commencement of development

* Traffic - significant traffic issues, including roads between the 8 sites

* Ownership - The 8 sites are under "multiple ownership".

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy A29

Land to the east of Ash and Tongham Page 190

Under “Requirements,” given the volume of potential new homes, an additional bullet should be included which refers to the existing substandard junction of White Lane with A31 Hogs Back needing to be either improved or closed. Also, the current gap in the central reservation which requires traffic turning into Ash Green from the East to cross the eastbound A31 traffic is inappropriate for any material increase in traffic.

Attached documents:
Sites – most of the sites proposed for allocation are some distance from Waverley and would therefore not lead to any impacts on the Borough. However, one of these (A29) would deliver 1,750 homes in the Ash and Tongham area, an increase of 550 from the 2016 version of the plan. This includes a development at Grange Farm close to the junction of the A31 and the A331 and close to the boundary with Waverley. There is a current cross boundary planning application (WA/2017/1050) for up to 254 residential dwellings (in Guildford) plus SANG (in Waverley) on this site. As stated previously, it would be important for any impacts from this allocation, including impacts on the Thames Basin Heaths SPA to be addressed in this or any subsequent planning application.

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

   "Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

   a) The Street in Tongham
   b) A331/A323 intersection
   c) A31/White Lane junction

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should must include the provision of a green buffer that seeks to maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

a) The Street in Tongham
b) A331/A323 intersection
c) A31 /White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Please see the attached document for the concerns raised. They cover a range of issues which need to be addressed and some of the information in the local plan is based, I believe, on flawed data.

[text of attachment reproduced below]
The Addendum to Guildford Borough Proposed Submission Local Plan “June 2016” Strategic Highway Assessment Report, states that conclusions of the SHAR 2016 is that:

“The results show that for Scenario 5, which represents the quantum and distribution of development proposed in the Proposed Submission Local Plan together with the key highway schemes, there will not be a severe impact on the local and strategic highway network” (p.62), and that,

“Nevertheless, the results of this assessment indicate that should the RIS schemes not be forthcoming then the residual cumulative impact of the Proposed Submission Local Plan on the highway network could be considered severe”

Certainly for the proposed developments in and around ash, in particular the Ash Lodge Drive development will have a significant impact on already saturated road network.

Recent changes to traffic signal timings and synchronisation in Rushmoor borough at the junction of North Lane and Ash Road has had a serious impact of traffic movements and journey times to the east of the borough boundary with traffic during morning and evening peak periods impacting Ash Street, the A331 and all of the local road network around Tongham, Ash and the A31/A331 junctions.

Traffic figures provided in the consultation documents are woefully inadequate and one has to question their validity, how they have been derived and the period during which they were obtained. on the 27th June, for less that 24 hours, a series of traffic monitoring cameras were deployed in and around Tongham, the A31 and the Manor Road / Ash Street junction (Greyhound Roundabout). The purpose of the cameras was not clear (Turning movements, origin / destination journey information, traffic counts etc.) however, what benefit could be derived from any data which is gathered in a period of less than 24 hours. Also, many of the senior pupils at Ash Manor school would not have been at school as this is during the exam period. any results from these video surveys will be worthless and of no value.

It is the case every day that the schools are open that traffic along Ash Street, Manor Road, Shawfield Road and Aldershot Road are brought to a complete standstill due to the volume of traffic. This is primarily due in the morning to parents taking children to school, as parking facilities at the local schools are non-existent. Additional homes in this area will only increase this burden on the local roads even with the developers contribution as the required infrastructure and services need to be overhauled, root and branch and minimal developer contribution will not address the real needs; they are merely a gesture.

Policy A29: Land to the south and east of Ash and Tongham Capacity of the site has been increased from 1,200 to 1,750 homes.

No major impact on traffic impacts from those reported in the SHAR 2016.

The overall scale of growth in this strategic location for development has remained consistent but the capacity of the allocation for this site policy has been increased from 1,200 to 1,750 homes. The site policy now includes the various planning permissions in this area that have not yet commenced. There are no implications for the SHAR 2016 of this change.

With regards the additional 550 homes in this policy A29, how is the impact on the highways being mitigated? Detail is lacking and to what improvements are being proposed and how the benefits of any improvements have been forecast and measured.

How is it that land has cannot be removed from the Green Belt in other areas of the borough to meet housing needs. Why are locations such Clandon, Ripley, Bramley and Shackleford not sites designated for development. They have much better access to the Strategic Road Network. Is it because GBC wish to move the developments as far as possible away from the showcase of their prized town centre and hope that the residents of those new developments will work and shop across the border in Hampshire? It strikes me that the Borough Council is Cherry Picking those areas which shall and
shall not be removed from Green Belt protection based upon the class of the residents, their likelihood of complaining and the desire for the borough to remain a certain political hue.

Policy P3: Countryside

4.3.29 Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Given its relative sustainability, countryside to the south and east of the urban area is allocated as a strategic location for development.

How has the sustainability of such large developments been calculated? The area is barely sustainable at the moment. What mitigations are proposed to improve an already poor level of sustainability and deliver improvements not only for the existing population of the area but for those who seek to move in to the new development.

What liaison has GBC had with Rushmoor BC to ensure that the overall developments of the two authorities do not destroy the environment and irreparably ruin an already difficult way of life for countless residents?

Local Plan, Page 212, Item 6. Why have the residents of Ash Green Road now been lumped in with Ash and Tongham. This seems ridiculous and only serves not only to upset and annoy the local residents, but also to put the borough planners in a poor light (not that it is looking to good so far).

The proposal for the bridges at Ash Level Crossing has been badly thought through. It is as if the BC is trying to make journeys through the area as difficult as possible to ensure travelers avoid the area. This is not always the case and people will have to life with this poor decision forever.

Local Plan, Page 330, What about Ash Walsh Schools. They are closer to the Ash Lodge Drive development and places here are in greater demand than Ash Grange. This needs a serious rethink.

Local Plan, Page 333. If Ash Manor school is to be expanded, serious improvements need to be made to the road infrastructure throughout Tongham, Ash and Ash Green. The values quoted in the report for developer contribution will, in no way, be enough to accommodate the expansion at these schools.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Further, more detailed analysis need to be done regarding existing traffic and travel related issues as the current situation is not sustainable even before developments take place.

**Comment ID:** pslp172/3240  **Respondent:** 17339041 / Carol Pedley  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

- **2. Policy A29: Land to the south and east of Ash and Tongham**
  - I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.
  - “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form
part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond.

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows: “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

  1. The Street in Tongham
  2. A331/A323 intersection
  3. A31/White Lane junction

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green.    a) The Street in Tongham
   b) A331/A323 intersection
   c) A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

• I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

1. **Policy A29: Land to the south and east of Ash and Tongham (Cont.)**

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. A331/A323 intersection
3. A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
the South and East of Ash and Tongham’. A red line location plan for the site is appended to this representation at Appendix 1.

We confirm within these representations that the site is available and deliverable within the first 5 years of the plan period and that it is set within a highly sustainable location. As such, we wish to make representations on the policies contained within the Proposed Submission Local Plan as detailed below, and the proposed strategic allocation: Policy A29.

We wish to support the progression of the Local Plan and make comments within our representations on the basis that the proposed housing numbers should be increased in line with the requirements of the National Planning Policy Framework (NPPF) to meet the full, objectively assessed housing needs of the Borough.

Land north of Grange Road, Ash
Thakeham Homes recommended the site for residential development and as such supports the inclusion of the site within the housing allocation, Policy A29: Land to the South and East of Ash Tongham’ in the Proposed Submission Local Plan. The red line for the site has been appended to this representation in Appendix 1.

Policy A29: Land to the south and east of Ash Tongham
Since the publication of the Pre-Submission Local Plan, the Council have made a number of amendments to Policy A29.

[Figure 1]
Site Area
As above, we support the inclusion of the site within Policy A29 for residential development. However, we note that the entirety of our site as actively promoted, does not fall within the proposed allocation, with a small part falling just outside. There is no evidence or justification to support the omission of this area from the allocation, and we would therefore suggest this may be in error. A site location plan can be found in Appendix 1, and we would request that the Council revise the proposed boundary shown in Policy A29 to reflect the site area for Land north of Grange Road, Ash, as promoted.

Policy A29: Requirement 9
The Council have sought to delete Policy A30: Land for new road bridge and footbridge scheme to enable a level crossing closure on A323 Guildford Road, adjacent to Ash railway station, Ash. Instead the Council have now sought to combine this with Policy A29, inserting requirement 9.

Thakeham Homes objects to Requirement 9 as there is no evidence or justification to support a new road bridge. On this basis the policy is unsound as it is not based on objectively assessed infrastructure requirements in accordance with NPPF, para 182.

The proposed wording of Requirement 9 states:

“Land and provision of a new road bridge which will form part of the A323 Guildford Road, with an associated footbridge, to enable the closure of the level crossing on the A323 Guildford Road, adjacent to Ash railway station”

The objection is made on the following basis:

• **The assessment work to produce a technical justification to support this policy has not yet been undertaken.** There needs to be a fit-for-purpose assessment of future year operation of the level crossing without and with development. There is therefore currently no identification of whether the cumulative impact of development on the level crossing will be ‘severe’ or not (ref: para 32 of the NPPF). It has not been demonstrated that a road bridge option would offer any real benefit in terms of reducing journey times or queue lengths on the A323 Guildford Road.

• **Alternative options have not been tested.** Alternatives to a new road bridge could include for example traffic management, a footbridge only solution or improvement of alternative routes etc. The assessment of options needs to consider the alternatives to a road bridge and the benefits of each option weighed against their costs.
• The feasibility of a new road bridge has not been proven in engineering terms. This needs to be demonstrated, as does the practicality of timeliness of delivery given the need to cross a live rail line.

• No consideration has been given to the cost effectiveness of the solution. It is understood that the level of developer contribution is likely to run to circa £12,000 per dwelling - an unprecedented level of transport contribution, which could potentially jeopardise the delivery of other elements of development in Ash such as affordable housing.

**Infrastructure Delivery Plan (IDP)**

In relation to Policy A29 The Infrastructure Delivery Plan (IDP) references the following policies:

• LRN9: A323 Ash Road and Guildford Road (Ash) traffic management and environmental improvement scheme

• LRN11: B3411 Ash Hill Road/A323 Guildford Road (Ash) junction improvement scheme

Impacts in these locations are already apparent and in the future, are related to strategic growth. The funding source should, for consistency with other infrastructure projects included in the IDP make an allowance for some funding to come via the Local Growth Fund.

Thakeham Homes objects to IDP Policy LRN21 ‘New road bridge and footbridge scheme to enable level crossing closure on A323 Guildford Road adjacent to Ash railway station’ for the reasons set out above.

Notwithstanding this objection, it is noted that pressure on this crossing is likely to come about not only as a result of development, but also due to increased movements on the North Downs Line, and other changes to the local and strategic road network. GBC’s identified mitigation is not solely development related and as such the funding source should, for consistency with other infrastructure projects included in the IDP make an allowance for some funding to come via the Local Growth Fund.

**Inclusion of permitted sites.**

The amendments to Policy A29, seek to include additional sites within the allocation. This includes a number of sites which currently have planning permission. These permitted sites equate to almost 700 new homes, which is a significant proportion of the 1,750 dwelling requirement indicated in Policy A29.

It is our view that the Council has failed to provide sufficient evidence or justification to support the infrastructure requirements within Policy A29, and on this basis, we consider the requirement as set out is unsound and should be deleted from this policy.

**Availability, Suitability and Achievability**

Whilst we have concerns regarding Policy A29 as detailed above, we continue to support the inclusion of this site within the strategic allocation and can confirm that the site is Available, Suitable, Achievable, and therefore deliverable within the next 5 years.

**Availability**

The NPPG provides the following guidance in regard to considering whether a site is available for development:

“A site is considered available for development, when, on the best information available, there is confidence that there are no legal or ownership problems, such as unresolved multiple ownerships, ransom strips tenancies or operation requirements of landowners. This will often mean that land is controlled by a developer or landowner who has expressed an intention to develop”

NPPG Paragraph 021 Ref. 3-020-20140306

As highlighted within this representation, the site is controlled by Thakeham Homes Ltd and we will be actively engaging with the Council over the coming months prior to submission of a Full planning application for residential development.
Thakeham obtained Reserved Matters permission for the adjacent site to the north for the delivery of 26 dwellings (Planning application Ref: 16/P/00663) in December 2016, following the grant of Outline consent in December 2013.

Thakeham has a proven track record for delivering a number of high quality residential schemes across Surrey, Sussex and Hampshire and will be seeking to deliver circa 60 dwellings on the site with a view to commencing development on site at the earliest opportunity.

**Suitability**

The NPPG provides the following guidance when considering whether a site is suitable for development:

“Sites in existing development plans or with planning permission will generally be considered suitable for development although it may be necessary to assess whether circumstances have changed which would alter their suitability”

NPPG Paragraph 019 Ref. 019-20140306

The site is located on the eastern edge of Ash village and is within walking distance of the various local amenities of Ash High Street. The Ash and Tongham Urban Area falls on the top tier of the settlement hierarchy and is therefore considered to have a range of services and facilities to meet the needs of the existing community as well as providing key services for surrounding smaller villages. The site has good transport links, with a railway station within walking distance of the site, and there is good access to bus links from Grange Road on the south western corner of the site.

The site has been submitted to and included within the Land Availability Assessment and promoted to the Local Plan, which acknowledges its suitability for residential development.

It is therefore evident from the proposed allocation and the supporting evidence including the LAA, that the site is considered suitable for development within the meaning of the NPPG.

**Achievability**

In determining whether a site is achievable for development, the NPPF provides the following guidance:

“A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site and the capacity of the developer to complete and let or sell the development over a certain period”

NPPG, Paragraph 021 Ref. 021-20140306

Given the acute housing need within the Borough and the proposed inclusion of the site within a strategic allocation in the Proposed Submission Local Plan, it is considered that there is a reasonable prospect of residential development being achieved on site by 2021.

As stated above, Thakeham has a proven track record for delivering schemes of a similar size and scale throughout Surrey, Sussex and Hampshire, and has the capacity to deliver the development of the site to provide much needed new homes within the first 5 years of the plan period.

**Deliverability**

For the reasons above, the site is considered to be available, suitable and achievable, and therefore deliverable in accordance with the NPPG. As such, we consider that the site could provide much needed housing development within the plan period and support the proposed strategic allocation Policy A29: Land to the south and east of Ash Tongham (except for Requirement 9)

**Conclusions**

In conclusion, we consider that the reduction in OAN and consequently intended housing provision is unsound, and the Council has not provided the required justification for this reduction. In particular, the intention of Guildford Borough to
not contribute to the unmet needs in the HMA is of particular concern, and we would suggest that GBC seek to accommodate the 83dpa shortfall to ensure the housing needs of the HMA are met.

We consider that some standards and requirements stipulated in the proposed policies are unjustified, and the Council should demonstrate how these conform with national policy and guidance. Where there is insufficient evidence to demonstrate a requirement for such policies, these should be deleted from the Local Plan.

As detailed above, we are actively promoting the site for residential development and we therefore support the inclusion of the site within the Strategic Allocation detailed within Policy A29. We do however object to Requirement 9 of Policy A29 as Thakeham considers there is no evidence or justification to support the proposed new road bridge. We therefore suggest that on this basis the policy is unsound as it is not based on objectively assessed infrastructure requirements in accordance with NPPF, para 182.

We have demonstrated within these representations that we consider the site to be achievable, suitable and available for residential development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 2017 07 24 GBC LP Representations Land north of Grange Road, Ash.pdf (828 KB) 2017 07 24 GBC LP Representations Land north of Grange Road, Ash - Appendix 1.pdf (122 KB)

I completely oppose the increase in number of houses proposed for development, from 1200 to 1750. How can this area cope with all these homes? This will certainly push Ash Green into the ATUA and contradict entirely Policy P3 of the countryside. For this reason Requirement 6 that looks at protecting the historic location of Ash Green is not good enough and needs to be as follows....

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

I also feel that Requirement 8 does not give enough protection to Ash Manor. These collection of buildings are Grade 2 listed, once part of a historical farmstead and is steeped in history. I'm aware that the council aim to protect and enhance historical and heritage sites. The history of this site may not be widely known but there is a lot of information on this old farmstead kept in the Library of Winchester College. It's history is fully documented. I urge the council to respect and protect Ash Manor's history and amend it's draft requirements as follows....

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”
With regards to requirement 9, of the proposed bridge at Ash Station to deal with increase in traffic from potential new builds of the A29 policy, this must be in place before any development goes ahead. Otherwise there will be poor and inadequate infrastructure in place and thus the area would be unable to cope.

Requirement 9 does not take into account Tonghams’ The Street, A331/A323 intersection and A31/White Lane Junction as these roads will not cope with the even higher increase of traffic that would come from A29 development.

I would like to reiterate my strong beliefs and concerns of the Local Draft Plan. The area of Ash Green drafted into the ATUA is Ash Green and NOT Ash. We are the people that live here and for many years. We can say first hand what it is like in this rural area and we will see it slowly being destroyed. Please don’t split us in half and dissolve our rural community into an urban area.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. **Comment ID:** pslp172/3111  **Respondent:** 17392609 / Joyce Chandler  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

My next comments and objections are in relation to Policy A29. Looking at the first section of the policy, you have increased the already large amount of houses to be built in the area stated. This will completely push the ATUA into our rural area and as I have mentioned before this must be kept separated. You cannot destroy any remaining rural communities or countryside as this will be lost. Ash Green as a rural community must be protected.

You only need to look at an aerial map that views Ash and Ash Green and compare how hugely built up and compact Ash is in contrast to Ash Green which is rural homes, trees and fields. In between Ash and Ash Green you have Ash Manor which has a lot of history.

I totally appreciate the need for new homes and accept that there will be development in our community, but not on large scales and not on inappropriate land. Ash Manor (historically part of Ash Green) is not suitable as it is a group of grade 2 listed buildings surrounded by fields. Building on these fields as marked out in pink on A29 will destroy it's historical standing and heritage. A28 is more appropriate.

Please amend wording Requirements 6 and 8 to give Ash Greens historical location and rural character more protection, protect the historical Ash Manor and prevent Ash Green from being dissolved into urban Ash.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
We are supportive of the inclusion of land that currently has planning permission in the area. However, we are unclear how this land will contribute towards the requirements that are now included within this policy. With regards to the self build and custom house building plots, there is no evidence supporting the inclusion of this requirement. The Council are still at an early stage of assessing the local demand for such plots of land. There is no evidence that there is a demand for such plots in Ash and therefore we do not agree with this modification and it should be removed. The figure of 1,750 homes should not be treated as a cap and the wording amended to allow more flexibility to increase the numbers if it is found the land has greater capacity. All potential development parcels should be maximised to allow the delivery of much needed housing within Guildford Borough. The Council have reduced the housing figure by 1,400 homes over the plan period.

It would appear that the Council are not meeting the Duty to Cooperate (DTC) in reducing the housing figures; other authorities within the Housing Market Area (HMA) are struggling to meet their need; such as Woking. The Inspector for the Waverley Local Plan indicated that Waverley and Guildford should be looking to the meet the unmet need of Woking. This does not appear to have been addressed by Guildford.

(1) Appropriate financial contribution to enable expansion of Ash Manor Secondary School by additional 1FE

We would want to ensure that this contribution would not conflict with any future CIL payments that the Council may be looking to progress. We would also want to ensure that the level of payment requested is of an appropriate level for the development. As mentioned above the policy includes land which already benefits from planning permission, with an agreed sLOG. The land which does not yet benefit from a planning permission should not be expected to make up this shortfall, if any, in contributions.

(2) Appropriate financial contribution towards expansion of existing GP provision in

As above.
the area or land and a new building for a new GPs surgery

Persimmon has no comment on this. The capacity of foul water networks would be assessed as part of a planning application.

Whilst we agree that the council should include the bridge within this policy; which means that the location of the road bridge can be safeguarded to allow it to be accommodated in a more suitable and achievable location; than policy a30 was previously suggesting. Whilst persimmon do accept that in the long term a bridge will be required, alongside the closure of the level crossing. However, Council have continued to fail to demonstrate that the bridge is required in the short term and that the delivery of the 1,750 homes, within policy ‘29, requires the bridge. We note that a parcel of land that was included within Policy A30 for the delivery of the road bridge has not been included within Policy A29, to the north of the railway line. Therefore the originally envisaged road bridge alignment, as proposed by Mayer Brown, can no longer be achieved. The Council have not provided a preferred route for the road bridge. In the meantime applications for residential development continue to come forward, potentially impacting on the most appropriate location of the road bridge. The Council need to provide a clear strategy of where the preferred and, more importantly, the most suitable alignment of the road bridge should be located, with the appropriate evidence base. Within the Guildford Borough Transport Strategy 2017, there is an estimated cost of £15 million for the new road bridge and footbridge scheme. However, it is not clear what the cost includes and what alignment this takes into account. As part of the land included within Policy A29 already benefits from planning permission it is unclear how these elements will contribute towards the road bridge, if it is indeed found that the bridge is required to mitigate the effects of the housing in Policy A29. As set out in the previous representations, 15th July 2016, the funding mechanisms, outside of developer contributions, are unclear. The evidence and changes to the Local Plan do not clarify this position. Therefore it is still unclear why the Council are stating that the road bridge is ‘anticipated’ rather than an aspirational element of the policy. We note that the wording of this element of the policy calls for land and provision of the new bridges. How this will work in practice is still unclear. If land is being provided by a party for either of the bridges then the level of monetary contribution needs to be considered against this. As set out in Persimmon Homes' representations dated 15th July 2016, an area of land will be safeguarded for delivery of a footbridge within land controlled by Persimmon, with the remaining land coming forward for residential development. This would then allow the road bridge to be delivered within the wider policy area, meaning that an appropriate location can be secured and allow the Design Manual for Roads and Bridges standards to be met; which the previous alignment did not allow for.

---

**Comment ID:** pslp172/3404  **Respondent:** 17408897 / A Cobb  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **Sound?** ( ), **Legally Compliant?** ( )

The proposed 1750 new homes are far too many properties for the area to absorb and will result in the coalescence of the villages which seek to keep their own characteristics and individualism. Further development in Ash Green must protect the historic value to the area. Of particular importance is Ash Manor and the buildings in close proximity to it.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** pslp172/4796  **Respondent:** 17411617 / Graham James Whitehead  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **Sound?** ( ), **Legally Compliant?** ( )

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and
Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that seeks to maintain a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond.

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

  a) The Street in Tongham
  b) A331/A323 intersection
  c) A31/White Lane junction

- Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The proposal for 1200-1750 homes is completely out of character for Ash Green and will coalesce Ash, Tongham and Ash Green losing a beautiful countryside location which is completely contrary to Policy P3 Countryside mentioned.
above. Any development in this area should be of a size and scale which keeps the intrinsic character and rural character of these sites.

Policy A29 Requirement 8 doesn't allow for the right level of protection for Ash Manor, a set of three listed buildings, and should be tightened to prevent developers from spoiling views, setting and driveway approach from White Lane. Listing buildings do not sit nicely against poorly specified and designed housing estates so something more appropriate is called for.

I'd like to highlight again the need for infrastructure before development here as the local roads are used as a rat run and are already under great pressure due to approved developments. Planning approval in this area should be predicated on the completion of the the following improvements:

1. Ash Station  
2. The Street Tongham  
3. A331/A323 Intersection  
4. A31 White Lane Junction

Ash Green is not and should not become part of the Ash and Tongham Urban Area.

Sustainable transport needs further work. Walking from Ash Green to Ash Station is downright dangerous. Cycling to Guildford as I do is only something for the most experienced cyclist and nobody new is going to do it as it's life threatening every day. The bus service is infrequent and no use for commuting. Where is the provision to improve this stuff coming from? Sustainable transport is not at the forefront of the plan and should be far more prevalent.

| These policies provide no provision for community spaces such as a village hall or larger recreation area. It's disappointing that the plan has nothing in this area for local people when it's absolutely trying to cover this land in houses leaving us nothing.

I object to the fact that the plan is trying to build so many houses in one area of Guildford's borough. It is not fair to push all development into one place and it would be far fairer to spread it out across the borough. I'm not against having development on my doorstep just not what I consider to be a large amount of it which is out of proportion.

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Policy A29: Land to the south and east of Ash and Tongham

The borough is required to build a number of houses within a timeframe but they should not all be in the same area. Houses are slow to sell so where are all the people or the proposed for 1200-1750 homes? This is completely out of character for Ash Green and will lose a beautiful countryside location which is completely contrary to Policy P3 Countryside mentioned above. Any development in this area should be of a size and scale which keeps the intrinsic character and rural character of these sites. The site is just north off the Hogs Back but should be better protected as it is to the south.

As a resident of Ash Green, I believe that Policy A29 Requirement 8 doesn’t allow for the right level of protection for the historic Ash Manor, a set of three listed buildings and Ash Grange. More protection should be within the requirements of this policy to prevent developers from spoiling the integrity of these listing buildings. They should not be forced to sit against poorly specified and designed housing estates so something more appropriate is called for.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- Anyone who visited this area would be able to see the proposed increase in housing would be detrimental to this area. I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

“Development proposals near Ash Green to have recognition of the historic location of Ash Green village and Manor and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development must not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built-up area and the countryside beyond”

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

- **Infrastructure before development.**

  - Please note that Infrastructure is not just roads! This area has poor facilities for its current residents. Water, Gas, Sewage, Electricity, Shops, Doctors, Schools are all currently under stress, or in short supply.
• Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) and many other improvements must be completed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Road solutions to the following areas are also required before any development of A29 is permitted.

1. The Street in Tongham
2. A331/A323 intersection
3. A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

“Development proposals near Ash Green to have recognition of the historic location of Ash Green village and Manor and the intrinsic rural character of its countryside location. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”
• Ash Manor has a rich history dating from its entry in the Doomsday Book. It has been owned by several kings and has witnessed foul deeds and intrigue. Some historical documents refer to the Manor as a Palace. This is a building of great significance to our local history and its setting is as much part of this history as the building. We have a moral duty to protect this site for the enjoyment of future generations. I believe the requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house, and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be completed before any development of Policy A29 commences.

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”
I object to the proposed increase in homes (1200 -> 1750) which would result in the development of a single urban
dormitory town with few facilities and the complete erosion of the unique characteristics of Ash Green.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A29: Land to the south and east of Ash and Tongham
• I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban
Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which
attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased
potential for coalescence.

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village
and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green
village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the
historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a
whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the
 provision of a green buffer that maintains separation between the any proposed new development and the properties
fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic
development location and provide a transition between the built up area and the countryside beyond”

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a
medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this
heritage asset, including their approach from White Lane, must be protected.”

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable
closure of the level crossing) must be completed before any development of Policy A.29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with
the increases in traffic generated by Policy A.29. Therefore, solutions to the following areas are also required before any
development of A.29 is permitted.
a) The Street in Tongham
b) A331/A323 intersection
c) A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond”

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

I am writing to object to the 2017 proposed submission of the Local Plan.

OBJECTION TO SITES A28 & A29 AND THE PROPOSED CHANGE TO ASH GREEN BOUNDARIES

I believe the title of Policy A28 needs to be corrected to say “Ash Green” not “Ash”.

Policy A28: Land to the east of White Lane, Ash GREEN, states it requires
“(2) Sensitive design at site boundaries that has regard to the transition from urban to rural
(3) No unacceptable impact on trees and ancient woodland
(4) Recognition of the historic location of Ash Green village”.

However I believe the Local Plan (Policy A28) will impact on trees and ancient woodland within the site and does not recognise the historic location of Ash Green village. I have outlined evidence to support my beliefs below.

As the current occupier of Ash Green Station, I feel well based to be able to comment on the rather strange boundaries Guildford Borough Council has created for Ash Green in the 2017 plan. GBC are proposing that the houses of Ash Green Road along with the land south of this up to and including site A28 be included in the Ash and Tongham Urban Area (ATUA), which is historically Ash Green. There will be no boundary between Ash and Ash Green. Ash Green starts on land North of Ash Green Road (part of the proposed A29 development), a fact which seems to have been ignored by placing A28 into the proposed ATUA. I believe the countryside boundary should be placed along Ash Green Road as a minimum but ideally allowing for a buffer into the field south of Ash Manor but north of Ash Green Road, with A28 left as countryside, not shoe-horned in as part of the proposed plans.
The more appropriate, natural defensible boundaries would be either along the old railway line or preferably, along Ash Green Road, which would retain Ash Green village and station in its historic location.

The Ordinance survey map as shown in GBC own Greenbelt and Countryside Study names Ash Green both to the north of the old railway line as well as the south. (see below)

As can be seen on this historic O/S map, circa 1920 there were no buildings mapped in Ash Green to the south of Ash Green Lane East, the only properties in Ash Green were those to the north of the railway cutting. Buildings specifically named are Ash Green Station and Ash Green Farm, with the ancient woodland of College Copse running from the railway cutting to Ash Green Lane (east). Ash Green (modern estate) (to the south of Ash Green Lane East) was not the original Ash Green, but had started to appear by mid 20th century, as this map shows circa 1944. The entrance to Dene Lodge through the ancient woodland marked as College Copse has been mapped, showing that the whole of site A28 was originally covered by College Copse. A portion of the remainder in A28 is now classed as ancient woodland, therefore we believe any trees north of the ancient woodland on A28, especially on the western boundary of A28 adjoining White Lane to the railway cutting be treated with a high degree of sensitivity as they are growing on land which once formed College Copse.

In addition to the above maps in relation to the boundaries of Ash Green village, this image from 1977 shows signage indicating Ash Green is to the north of the railway cutting as well as to the south.

I would also like to bring to attention that the bus stop north of the railway line outside the old station on White Lane is referred to as “Ash Green, Old Station”.

I wholly agree with your statement in the local plan (below)

Section 3 Spatial Vision, which states:
”Further development is also proposed in and around Ash and Tongham on land beyond the Green Belt along with new green belt designated to prevent Ash and Tongham merging with the village of Ash Green.”

I wish to see historic Ash Green comprising Ash Green Road and Ash Green Station included as part of the area of separation.

I feel the locally listed building of Ash Green Station under the proposed plans would lose its historic context of actually being in Ash Green. It is a ‘Heritage asset’ as defined by the NPPF; “A building, monument, site, place, area or landscape identified as having a degree of significance meriting considerations in planning decisions, because of its heritage interest. Heritage asset includes designated heritage assets and assets identified by the local planning authority (including local listing)”. The NPPF also states “Significance derives not only from a heritage asset’s physical presence, but also from its setting”. I believe Guildford Borough Council needs to give more consideration to Ash Green Station and its historical setting.

As stated in Policy D3 below: Historic Environment.

”(1) THe will conserve and enhance the historic environment will be conserved and enhanced in a manner appropriate to its significance. We will support dDevelopment of the highest design quality that will sustain conserve and, where appropriate, enhance the special interest, character and significance of the borough’s heritage assets and their settings and make a positive contribution to local character and distinctiveness will be supported.

(2) Heritage assets are an irreplaceable resource and works which would cause harm to the significance of a heritage asset, whether designated or non-designated, or its setting, will not be permitted without a clear justification to show that the public benefits of the proposal considerably outweigh any harm to the significance or special interest of the heritage asset in question. “ The proposal to remove historic Ash Green from Ash Green goes against the NPPF policy contained within the Local Plan (as shown below), which GBC says it will adhere to. “ 4.5.43 We will ensure that dNew development must will conserve heritage assets in a manner appropriate to their significance. The NPPF defines significance as “The value of a heritage asset to this and future generations because of its heritage interest. That interest may be archaeological, architectural, artistic or historic.” The contribution of the setting of heritage assets to the appreciation of these qualities will be carefully considered alongside more direct impacts of development proposals.”
The proposed changes would remove Ash Green Station (locally listed) and Ash Green Road out of Ash Green, as well as the historic housing of the Ash Green area. By developing A28 there is also potential to lose the aforementioned ancient woodland within A28 as well as detracting the original setting of The Old Station. A29 also goes against this policy and NPPF guidelines by placing Grade II Listed Ash Manor and associated buildings in the centre of a modern housing estate. Policy D4: Character and design of a new development states that
1) High quality design is expected in the borough. All developments will:
   (l) conserves locally and nationally important heritage assets and conserves or enhances their settings
   (m) has no unacceptable effect on the amenities enjoyed by the occupants of buildings in terms of privacy, noise, vibration, pollution, dust, smell and access to sunlight and daylight.

By moving Ash Green village boundary (l) would not be complied with. A28 would also have an impact on Dene Lodge (locally listed building) and A29 (south of Ash Green Road) would impact on the setting of Woodberry (also locally listed). Development of A29 around Ash Manor would impact the historic settings of Ashe Grange, Ash Manor, Old Manor Cottage, The Oast House, Stable and The Barn to the south of Ash Manor, all Grade II listed properties. In reference to (m), development of A28 has the potential to block sunlight, reduce privacy and increase noise at our property, due to the unusual fact it is built into a railway cutting and as a result it is below the ground level of A28. Station house ground floor only has windows on the southern side of the house (as the northern side is built into the bank), therefore the horizon for our southern aspect on this floor has a much lower effective horizon and as a result the sun only just reaches our windows in winter months. If development occurs on the northern boundary of A28 it could well result in the complete blocking of natural light to the property on the ground floor. Station House suffers from an unusual phenomenon in that sound reverberates and travels along the old railway cutting. We often hear the noise of trains on the current line in our house, even though it is some distance away. We have concerns that noise from A28, A29 and A31 will carry along the cutting in the same way.

As can be clearly seen on the map below, sites A28 and A29 to the south of Ash Green Road really don’t make any sense in terms of preserving historic Ash Green and should be removed from the plan. The buffer zone to separate Ash from Ash Green should be placed on the land to the north of Ash Green Road up to and around Ash Manor to compliment and preserve its well documented historic setting.

With the proposed southern extension of A28 it will potentially require the felling of trees and the destruction of the ancient woodland of College Copse up to the driveway of Dene Lodge. If A28 and the area of A29 south east of Ash Green Road are removed from the Local Plan it will provide obvious continuity to the natural defensible boundary for the countryside (the ancient woodland which bounds the eastern edge of A29 should be included in this) thereby preventing the urban sprawl of Ash and merging of Ash Green into the ATUA. I also object to some of the current and proposed wording in the plan. I believe Policy P3: Countryside, 4.3.29 should be amended to “Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development”. This is because I think infrastructure is greatly lacking, especially in relation to roads, traffic and public transport.

I believe 4.3.30 should be amended to “We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green”.

I think it is vital this sentence be included in the plan as there is a real danger with the current proposed sites of A28 and A29 losing Ash Green’s historical location and identity.

I believe Policy P3: Countryside (1)(c) should be amended to “does not lead to greater physical or visual coalescence between Ash Green, the Ash and Tongham urban area and Aldershot”, in order to protect Ash Green as a separate village.

I believe Policy A29: Land to the south and east of Ash and Tongham, Requirements (6) needs to be amended to protect Ash Green village and the houses within it. As I have pointed out and evidenced with maps, Ash Green Station and the houses along Ash Green Road formed the village of Ash Green before the more modern buildings south of the railway cutting appeared, and therefore it is indefensible that GBC want to remove the buildings that originally formed Ash Green village from Ash Green.
I believe the wording needs to be “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road/White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development should not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the build up area and the countryside beyond”. The wording in Policy A29, Requirements (8) does not offer enough protection to the Grade II listed buildings of Ash Manor and their surroundings, and therefore should be more specific and say “Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor.

Approaches and views to, from and around this heritage asset must be protected.” In Policy A29, I believe Requirements (9) of a new road and footbridge should be in place before any development of A29 commences and the wording should reflect this. Also requirement (9) does not address the other significant transport infrastructure improvements that are required to cope with the huge increase in traffic created by Policy A29. According to the NPPF guidelines Ash Green is not a suitable location for sustainable development because it has no shops, doctors, community facilities and its public transport infrastructure is very poor. Guildford Borough Council’s own Settlement Hierarchy ranks this as the least sustainable location in the borough. Site A28 lies within Ash Green and therefore should be removed from the Local Plan.

Local schools, doctors and dentists are already under pressure. I currently struggle to get a doctors appointment within two weeks.

I believe the proposed level of development is fundamentally flawed as there is a huge lack of infrastructure - a practically non existent bus service, no real means to safely get to Ash station (there is little option other than to use a car, either to get to the station or elsewhere), and already major congestion on local roads. Ash Green does not have a suitable transport network - we are not set up to take more residents and therefore more traffic. There are already huge delays and traffic jams locally. We have eight of the top hotspots for traffic congestion within Surrey in and around Ash. The Hogs Back at peak times is extremely congested and would struggle with any increase in volume.

Are Guildford Borough Council in correspondence/consultation with Hampshire County Council regarding the new building developments in Aldershot and the surrounding areas? We share bus, rail and road services (with one of the major routes out of Aldershot meeting the A323 at Ash), these new developments in Hampshire will put a strain on everything before Guildford Borough Council start with any of their proposed developments. Ash Green, Ash and Tongham has a long recorded history of flooding issues. With the proposed level of development this will do nothing other than exacerbate an already major problem. Our house currently suffers the effects from poor water drainage as the railway cutting is used for local surface water drainage. I have serious concerns that major development around us could lead to further issues regarding flooding.

Where would the proposed entry and egress points be for site A28? White Lane would be awkward and dangerous as it has a blind crest on the bridge to the north and a slight curve in the road to the south. Drovers Way is not designed to take this level of traffic. The junction of White Lane, Ash Green Road and Foreman Road has a history of accidents and a development on A28 would potentially add to this problem with increased traffic levels.

I feel it would be an incredible tragedy to lose such a wonderful greenfield site, which once developed, we would never get back, for us, or future generations. Under the proposed developments Ash Green would lose its rural identity and historic boundaries. We need to protect these areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

“Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development”

“We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside
around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green”

“does not lead to greater physical or visual coalescence between Ash Green, the Ash and Tongham urban area and Aldershot”

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village.

Proposals for the land west of this road and to the south east of Foreman Road/White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development should not be of a size and scale that would detract from the character of the rural landscape. This must include the provision of a green buffer that maintains separation between any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the build up area and the countryside beyond”

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Approaches and views to, from and around this heritage asset must be protected.”

I believe Policy A29: Land to the south and east of Ash and Tongham, Requirements (6) needs to be amended to protect Ash Green village and the houses within it. As I have pointed out and evidenced with maps, Ash Green Station and the houses along Ash Green Road formed the village of Ash Green before the more modern buildings south of the railway cutting appeared, and therefore it is indefensible that GBC want to remove the buildings that originally formed Ash Green village from Ash Green.

I believe the wording needs to be “Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village.

Proposals for the land west of this road and to the south east of Foreman Road/White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. **Comment ID:** pslp172/4795  **Respondent:** 17497377 / Stephen Holmes  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any
Development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond.

- Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

- Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

- Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.
  a) The Street in Tongham

Attached documents:
I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that maintains separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

  a) The Street in Tongham
  b) A331/A323 intersection
  c) A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

| Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No ) |

The schedule of sites at page 143 of the Submission Local Plan and at Policy A29 itself, indicates a change to the quantum of development proposed for this Strategic Site from 1200 to 1750 dwellings. This is to take into account permissions already granted but which have not yet been delivered due to a shortage of SANG provision. Recognition of this is supported as is the proposed change to the Ash and Tongham Inset Plan (Amendment 10; Ash and Tongham) indicating the inclusion of already consented sites within the Strategic Site boundary. However, objection is made regarding the overall quantum of development proposed at A29 which is currently couched essentially equates to a cap on development ‘approximately 1,750 homes’ but which could be augmented further subject to detailed planning and design. In regard to Sustainable Development, the NPPF states at paragraph 14, that:

“For plan-making this means that:
- Local planning authorities should positively seek opportunities to meet the development needs of their area;
- Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change”

Further, one of the Core Planning Principles at paragraph 17 of the NPPF states that planning should:

‘Proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth.’

As an example, through detailed planning, land to the west of The Street (SHLAA site 2247) could accommodate a further 50 units. This would reflect Criterion m) of Policy D4 reflecting the need to make the most effective use of available land; it would contribute towards the overall shortfall in supply indicated in the first five years of the Plan; it would contribute towards reinstating the Borough’s objectively assessed housing need to that required through the 2015 SHMA; secure an adequate five year housing land supply and it would contribute towards the Borough’s Duty to Cooperate with its neighbouring authorities in meeting the otherwise unmet needs across the HMA.

It is not therefore considered as currently drafted, that the Proposed Submission Plan reflects the key national requirement for housing growth and a revision to the Policy to either ‘for a minimum’ or ‘at least’ x homes is therefore required.

Policy A29 also seeks the inclusion of an element of self build and custom house building plots. The Government has indicated a commitment to self-build and custom house building plots and there is a requirement for local authorities to keep a register. However, the Government has not yet finalised its stance or published policy in relation to the specifics of
the initiative. With the impact of the Brexit referendum and new Government, delays have been introduced, not least in the amendment and republication of the NPPF. Government guidance at the time of determining a planning application would be a material consideration that will be looked at as part of the planning balance and self-build and custom housing could be required in due course, in the same way as affordable housing is required within housing developments.

Further, there is little evidence as to the extent of demand for self and custom built houses within the Borough currently. According to the GBC Housing Mix Topic Paper there are 87 individuals on the register in the first base period and 80 who are seeking plots of land in the Borough. Whilst it is recognised that this is a snapshot, it is a very small number across the 19 year plan period - equating to just 4 per annum. The West Surrey Strategic Housing Market Assessment 2015 considered self build opportunities and considered that whilst there could be potential to designate plots within larger schemes, most new delivery would be on small windfall sites.

The Topic Paper goes on to state that there is no definitive number of self-build or custom housebuilding plots sought but that the approach that Guildford Borough Council has taken is to seek flexibility by specifying their inclusion on suitable site allocations over 100 homes. The draft policy within the focussed Proposed Submission goes further than this and specifies that 5% of the total homes shall be available as self-build and custom housebuilding plots ‘whilst there is an identified need’. This approach is both unfounded and arbitrary: There is no basis for the selection of sites of over 100 units in size particularly bearing in mind the conclusion drawn in the SHMA that the majority are likely to come forward on small windfall sites; or the selection of the 5% requirement - the need for which the lpa itself acknowledges is uncertain: ‘whilst there is an identified need’. This level of uncertainty will have an adverse impact on development decisions.

We therefore object to the inclusion of the the requirement for self-build and custom housebuilding at this stage of the Plan making process as being unsound based on inadequate evidence, prematurity in pre-empting confirmation of the Government’s future policy specifics and the level of uncertainty introduced which will have an adverse impact on development decisions. Consequently the policy will be ineffective.

Further to the above discussion, the following modifications to Policy A29 are sought:

i) It is recommended that the quantum of development within the strategic site A29, Land to the south of Ash and Tongham be reviewed to ascertain additional capacity.

ii) At least an additional 50 units to be added to the capacity of land to the West of The Street, Tongham (former 2016 SHLAA site 2247). Reason for the uplift: Reconsideration n the light of further evidence and understanding of potential capacity.

The Policy should therefore be redrafted as follows:

‘Policy A29: land to the south and east of Ash and Tongham

Allocation: This is a strategic location for development. The site is allocated for approximately 1,750 at least 1,800 homes, including some self-build and custom house building plots (C3).’

The Policy also indicates a number of requirements within the Strategic Site. The requirements listed relate variously to the whole Site Allocation and various constituent sites within the overall Strategic Site. This is both confusing and misleading and creates uncertainty which should be avoided.

In particular, Requirement (9) requires land and provision of a new road bridge which will form part of the A323 Guildford Road, with an associated footbridge, to enable the closure of the level crossing on the A323 Guildford Road, adjacent to Ash railway station. Whilst the aims of the policy can be supported in general terms, this requirement does not relate to all of the constituent sites within A29. Objection is made accordingly on the following grounds:

(9) Land and provision of new road bridge

The Land allocation at Ash and Tongham covers a wide area with very different characteristics and as such the impacts on the local highway network differ considerably between the identified land parcels and as such not all ‘Requirements’
are directly related to each of the land parcels identified, i.e. the impacts of sites in Tongham and very different to those in Ash.

As has been shown through the planning applications submitted at Land North of Grange Road, Tongham (ref: 17/P/00529), Land South of Grange Road, Tongham (ref: 14/P/02398) and Land at Manor Farm, The Street, Tongham (ref: 16/P/00222) the impact in traffic terms at the existing level crossing is de-minimis and has never been raised as an issue by either Guildford Borough Council or Surrey County Council as the Local Highway Authority.

On the basis of SCC’s review of applications in Tongham, it is evident that a new road is not necessary to support the delivery of the Allocation sites in Tongham.

Notwithstanding the de-minimis impact from the Tongham sites it is evident from the transport evidence base which accompanies the emerging Local Plan that:

a) No detailed study has been undertaken on the need or justification of any new bridge crossing. A fit-for-purpose assessment of future year operation showing the impacts with and without development is required identifying the cumulative impact and whether development identified in Policy A29 would cause a ‘severe’ impact (ref: para 32 of the NPPF).

b) No alternatives to a new bridge crossing, such as improving alternative routes, traffic management or a footbridge only solution have been considered in detail, or any cost benefit analysis provided. As such, the delivery of a new bridge and closure of the level crossing is merely to meet an aspiration of GBC which is not soundly founded on robust evidence.

Requiring the Tongham land parcel to assist with the provision of the delivery of the A323 Guildford Road level crossing does not meet the tests in Paragraph 32 of NPPF where any mitigation should cost effectively limit the impacts of development. A ‘generic’ approach to collecting an unprecedented level of transport contribution over the whole allocation towards a scheme which is yet to be justified in transport terms is therefore not Fair and Reasonable and does not meet the requisite tests.

On this basis, in our view, Requirement 9 should be removed from Policy A29 Requirements, as this is;

a) Linked to an aspirational scheme which is not based on robust evidence and is not therefore considered to be sound;
b) Is unlikely to offer any real benefit in terms of reducing journey times or queue lengths on the A323 Guildford Road, and

c) If it can be justified, it will predominately be due to the increased frequency of trains on the North Downs Line, and the closure of other local junctions such as the junction of White Lane and the A31 Hogs Back, which are not related to the delivery of housing at Ash and Tongham i.e. any ‘need’ comes about through the delivery of strategic aims within the plan and not solely as a result of the proposed allocation.

Should GBC wish to continue with the aspiration of a replacement bridge as a strategic infrastructure project then it should be retained as Policy A30, as presented in the previous iteration of the emerging Local Plan.

Alternatively, should it be retained within Policy A29, it should be relocated to the ‘Opportunities’ section of the Policy and clarity should be provided within the Policy to identify that Requirement 9 is not related to the delivery of the Tongham sites.

Policy A29: Land to the south and east of Ash and Tongham

Requirements: (9) Land and provision of a new road bridge which will form part of the A323 Guildford Road, with an associated footbridge, to enable the closure of the level crossing on the A323 Guildford Road, adjacent to Ash railway station.

Under the ‘Key Considerations’ section of Policy A29, consideration (11) recognition should be made to the ability for potential noise and air quality issues to be ‘designed out’ through good planning and design.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Suggested amendment: 'Policy A29: land to the south and east of Ash and Tongham

Allocation: This is a strategic location for development. The site is allocated for at least 1,800 homes (C3).'

Removal of Requirement 9 from Policy A29.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document: complies with the Duty to Cooperate? (No), is Sound? (No), is Legally Compliant? ( )

SITE ALLOCATION A29: LAND TO THE SOUTH AND EAST OF ASH AND TONGHAM

The schedule of sites at page 143 of the Submission Local Plan and at Policy A29 itself, indicates a change to the quantum of development proposed for this Strategic Site from 1200 to 1750 dwellings. This is to take into account permissions already granted but which have not yet been delivered due to a shortage of SANG provision. Recognition of this is supported as is the proposed change to the Ash and Tongham Inset Plan (Amendment 10; Ash and Tongham) indicating the inclusion of already consented sites within the Strategic Site boundary. However, objection is made regarding the overall quantum of development proposed at A29 which is currently couched essentially equates to a cap on development ‘approximately 1,750 homes’ but which could be augmented further subject to detailed planning and design. In regard to Sustainable Development, the NPPF states at paragraph 14, that:

‘For plan-making this means that:
- Local planning authorities should positively seek opportunities to meet the development needs of their area;
- Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change’

Further, one of the Core Planning Principles at paragraph 17 of the NPPF states that planning should:
‘Proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth.’

As an example, through detailed planning, land to the west of The Street (SHLAA site 2247) could accommodate a further 50 units. This would reflect Criterion m) of Policy D4 reflecting the need to make the most effective use of available land; it would contribute towards the overall shortfall in supply indicated in the first five years of the Plan; it would contribute towards reinstating the Borough’s objectively assessed housing need to that required through the 2015 SHMA; secure an adequate five year housing land supply and it would contribute towards the Borough’s Duty to Cooperate with its neighbouring authorities in meeting the otherwise unmet needs across the HMA.

It is not therefore considered as currently drafted, that the Proposed Submission Plan reflects the key national requirement for housing growth and a revision to the Policy to either ‘for a minimum’ or ‘at least’ x homes is therefore required.

Policy A29 also seeks the inclusion of an element of self build and custom house building plots. The Government has indicated a commitment to self-build and custom house building plots and there is a requirement for local authorities to keep a register. However, the Government has not yet finalised its stance or published policy in relation to the specifics of the initiative. With the impact of the Brexit referendum and new Government, delays have been introduced, not least in the amendment and republication of the NPPF. Government guidance at the time of determining a planning application would be a material consideration that will be looked at as part of the planning balance and self-build and custom housing could be required in due course, in the same way as affordable housing is required within housing developments.
Further, there is little evidence as to the extent of demand for self and custom built houses within the Borough currently. According to the GBC Housing Mix Topic Paper there are 87 individuals on the register in the first base period and 80 who are seeking plots of land in the Borough. Whilst it is recognised that this is a snapshot, it is a very small number across the 19 year plan period - equating to just 4 per annum. The West Surrey Strategic Housing Market Assessment 2015 considered self build opportunities and considered that whilst there could be potential to designate plots within larger schemes, most new delivery would be on small windfall sites.

The Topic Paper goes on to state that there is no definitive number of self-build or custom housebuilding plots sought but that the approach that Guildford Borough Council has taken is to seek flexibility by specifying their inclusion on suitable site allocations over 100 homes. The draft policy within the focussed Proposed Submission goes further than this and specifies that 5% of the total homes shall be available as self-build and custom housebuilding plots ‘whilst there is an identified need’. This approach is both unfounded and arbitrary: There is no basis for the selection of sites of over 100 units in size particularly bearing in mind the conclusion drawn in the SHMA that the majority are likely to come forward on small windfall sites; or the selection of the 5% requirement - the need for which the lpa itself acknowledges is uncertain: ‘whilst there is an identified need’. This level of uncertainty will have an adverse impact on development decisions.

We therefore object to the inclusion of the the requirement for self-build and custom housebuilding at this stage of the Plan making process as being unsound based on inadequate evidence, prematurity in pre-empting confirmation of the Government’s future policy specifics and the level of uncertainty introduced which will have an adverse impact on development decisions. Consequently the policy will be ineffective.

i) It is recommended that the quantum of development within the strategic site A29, Land to the south of Ash and Tongham be reviewed to ascertain additional capacity.

ii) At least an additional 50 units to be added to the capacity of land to the West of The Street, Tongham (former 2016 SHLAA site 2247). Reason for the uplift: Reconsideration n the light of further evidence and understanding of potential capacity.

The Policy should therefore be redrafted as follows:

‘Policy A29: land to the south and east of Ash and Tongham

Allocation: This is a strategic location for development. The site is allocated for approximately 1,750 at least 1,800 homes, including some self-build and custom house building plots (C3).’

The Policy also indicates a number of requirements within the Strategic Site. The requirements listed relate variously to the whole Site Allocation and various constituent sites within the overall Strategic Site. This is both confusing and misleading and creates uncertainty which should be avoided.

In particular, Requirement (9) requires land and provision of a new road bridge which will form part of the A323 Guildford Road, with an associated footbridge, to enable the closure of the level crossing on the A323 Guildford Road, adjacent to Ash railway station. Whilst the aims of the policy can be supported in general terms, this requirement does not relate to all of the constituent sites within A29. Objection is made accordingly on the following grounds:

(9) Land and provision of new road bridge

The Land allocation at Ash and Tongham covers a wide area with very different characteristics and as such the impacts on the local highway network differ considerably between the identified land parcels and as such not all ‘Requirements’ are directly related to each of the land parcels identified, i.e. the impacts of sites in Tongham and very different to those in Ash.

As has been shown through the planning applications submitted at Land North of Grange Road, Tongham (ref: 17/P/00529), Land South of Grange Road, Tongham (ref: 14/P/02398) and Land at Manor Farm, The Street, Tongham (ref: 16/P/00222) the impact in traffic terms at the existing level crossing is de-minims and has never been raised as an issue by either Guildford Borough Council or Surrey County Council as the Local Highway Authority.
On the basis of SCC’s review of applications in Tongham, it is evident that a new road is not necessary to support the delivery of the Allocation sites in Tongham.

Notwithstanding the de-minimis impact from the Tongham sites it is evident from the transport evidence base which accompanies the emerging Local Plan that:

a) No detailed study has been undertaken on the need or justification of any new bridge crossing. A fit-for-purpose assessment of future year operation showing the impacts with and without development is required identifying the cumulative impact and whether development identified in Policy A29 would cause a ‘severe’ impact (ref: para 32 of the NPPF).

b) No alternatives to a new bridge crossing, such as improving alternative routes, traffic management or a footbridge only solution have been considered in detail, or any cost benefit analysis provided. As such, the delivery of a new bridge and closure of the level crossing is merely to meet an aspiration of GBC which is not soundly founded on robust evidence.

Requiring the Tongham land parcel to assist with the provision of the delivery of the A323 Guildford Road level crossing does not meet the tests in Paragraph 32 of NPPF where any mitigation should cost effectively limit the impacts of development. A ‘generic’ approach to collecting an unprecedented level of transport contribution over the whole allocation towards a scheme which is yet to be justified in transport terms is therefore not Fair and Reasonable and does not meet the requisite tests.

On this basis, in our view, Requirement 9 should be removed from Policy A29 Requirements, as this is:

a) Linked to an aspirational scheme which is not based on robust evidence and is not therefore considered to be sound;

b) Is unlikely to offer any real benefit in terms of reducing journey times or queue lengths on the A323 Guildford Road, and

c) If it can be justified, it will predominately be due to the increased frequency of trains on the North Downs Line, and the closure of other local junctions such as the junction of White Lane and the A31 Hogs Back, which are not related to the delivery of housing at Ash and Tongham i.e. any ‘need’ comes about through the delivery of strategic aims within the plan and not solely as a result of the proposed allocation.

Should GBC wish to continue with the aspiration of a replacement bridge as a strategic infrastructure project then it should be retained as Policy A30, as presented in the previous iteration of the emerging Local Plan.

Alternatively, should it be retained within Policy A29, it should be relocated to the ‘Opportunities’ section of the Policy and clarity should be provided within the Policy to identify that Requirement 9 is not related to the delivery of the Tongham sites.

Policy A29: Land to the south and east of Ash and Tongham

Requirements: (9) Land and provision of a new road bridge which will form part of the A323 Guildford Road, with an associated footbridge, to enable the closure of the level crossing on the A323 Guildford Road, adjacent to Ash railway station.

Under the ‘Key Considerations’ section of Policy A29, consideration (11) recognition should be made to the ability for potential noise and air quality issues to be ‘designed out’ through good planning and design.

1. Policy 12a section

Additional requirement 12 relates to the provision of a green buffer to minimise the noise and air quality issues adjacent to site A31 and A331.
In relation to air quality issues the recent AECOM assessment confirms that air quality is not a restrictive matter. Further, in terms of noise issues these can be dealt with in a number of ways including a range of mitigations measures to include detailed building design, layout design and a suitable standoff.

These matters can be suitable dealt with at the detailed planning stage.

A green buffer is therefore not required. It is therefore recommended that requirement 12 is not required and should be deleted from the emerging policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Further to the above discussion, the following modifications to Policy A29 are sought:

i) It is recommended that the quantum of development within the strategic site A29, Land to the south of Ash and Tongham be reviewed to ascertain additional capacity.

ii) At least an additional 50 units to be added to the capacity of land to the West of The Street, Tongham (former 2016 SHLAA site 2247). Reason for the uplift: Reconsideration n the light of further evidence and understanding of potential capacity.

The Policy should therefore be redrafted as follows:

‘Policy A29: land to the south and east of Ash and Tongham
Allocation: This is a strategic location for development.
The site is allocated for approximately 1,750 at least 1,800 homes, including some self-build and custom house building plots (C3).’

Recommended Changes to Policy A29: Land to the south and east of Ash and Tongham
Requirement: (9) Land and provision of a new road bridge which will form part of the A323 Guildford Road, with an associated footbridge, to enable the closure of the level crossing on the A323 Guildford Road, adjacent to Ash railway station.
Requirement 12: Green buffer to minimise potential noise and air quality issues adjacent to the A31 and A331.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the "historic location of Ash Green", is inadequate and would need rewording to prevent this increased potential for coalescence.

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should include the provision of a green buffer that seeks to maintain a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will
also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

"Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected."

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.

  a) The Street in Tongham
  b) A331/A323 intersection
  c) A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposed Submission Local Plan Regulation 19 representations (2016 and 2017)

Document part: A30 - Land for new road bridge and footbridge scheme to enable level crossing closure on A323 Guildford Road adjacent to Ash railway station, Ash
I have the following comments on Site A30 - Ash station railway bridge. The land on both sides of railway between the diverted road via the new bridge and the existing Guildford Road should be used for additional car parking for station users and a pick up/set down area plus relocated bus stops close to the station entrance(s).

Ash station could be developed as park and ride by train facility for commuters and others travelling to Guildford and Reading (and also London via Guildford). Car parking should be free (or a nominal amount as at Ash Vale - £1 per day), and not at the level of £3.50 weekdays as currently charged by South West Trains, which is a disincentive to use the car park when paid in addition to the train fares. This is shown by the current level of on-street commuter parking near Ash station and regular vacant spaces in the 22 space station car park.

Some of the surplus land in the A30 area could be used for a new convenience store (with some time limited parking) to serve the new developments already approved and built in south/east Ash and likely to be built in the areas in Site A29. By siting a convenience store close to the station, it would be a useful facility for rail users as well as local residents and could reduce the number of car journeys - i.e. a rail user could visit the shop before leaving the car park, instead of having to drive to a shop some distance away, and then onto their home. Existing shopping facilities in Ash - both in Ash Street, at Ash Vale (Wharf Road) and on Guildford Road depend on on-street parking with limited off-street parking with consequent congestion. The new Tesco convenience store close to Ash Vale station appears to be well used, and is in an area with a limited number of shops nearby.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Ash Vale station is an example where there is inadequate parking provision (all the available places are filled by 7.00am on weekdays) and because of close by housing there is no land available for additional parking.

A30 Ash Road bridge

Comment: Whilst we welcome the improvement to the rail crossing for safety reasons. We are concerned about the flow rate onto the Aldershot Road into Guildford through Worplesdon. The Strategic Highway Assessment Report carried out by Surrey County Council, on behalf of GBC concludes that the Aldershot Road (A323) would experience increased traffic congestion and have a level of service indicator which would be at least unstable or where there would be no spare capacity. Therefore, some means of controlling the traffic would need to be introduced to mitigate the increased impact of traffic on the highway network through Worplesdon and the impact on accesses onto Aldershot Road (A323).

Page 193. Policy A30: Land for New Road Bridge and Footbridge Scheme to enable Level Crossing Closure on A323 Guildford Road Adjacent to Ash Railay Station. Ash Allocation -After station, add 'A new off-street car park will also be provided'.

Level Crossing Closure on A323 Guildford Road Adjacent to Ash Railay Station. Ash Allocation -After station, add 'A new off-street car park will also be provided'.
Requirements - Second, third and fourth requirements should be:

'A new off-street car park will also be provided on the north side of the railway to the east of A323 Church Road to serve additional residents in the general area and to reduce problems caused by parking on nearby roads. The new car park will be landscaped and secure. It will be funded by contributions from developers and/or Guildford Borough Council in view of the need to address travel problems which will arise from the Council's policies of adding new homes in the area (1200 in Ash and Tongham)'.

'High standard cycle routes will be provided, on and off the highway, to encourage cycling to the station and to help the safety of cyclists.'

'Traffic signals will help pedestrians and cyclists to cross the A323'.

Note: If these additional requirements are not added to Policy A30, there is a risk that they will be delayed or even overlooked. They are fundamental requirements and they should be included in the policy (although, of course, different wording could be used).

There is no indication of a new road at this site to serve the homes proposed between Harpers Road, the A323 and the railway line. Should this not be shown on the site drawing on page 194, to ensure co-ordination of plans? As mentioned on page 20 of this letter, Harpers Road and Wyke Lane etc are not suitable for increased traffic.

A30 Ash Road Bridge

Comment

It is difficult to see how a bridge over the railway at this point will be achieved as a minimum clearance of 5m needs to be achieved. With a gradient of the road of say 1 in 20 and a structural build of 1m (minimum) a ramp would need to be 120m long to both sides of the railway. The land allocated for this proposal does not appear to be sufficient.

Whilst generally understanding the need for a bridge, I am concerned with the impact on the flow of traffic on the Aldershot Road. The current level crossing acts as a constraint on the traffic and drivers take notice of it by allowing time to get across the level crossing. By providing a bridge the constraint will be removed and drivers will leave later causing congestion at a later point along the Aldershot Road. The likelihood is that the Rydes Hill roundabout will be further congested.

- I do not agree with the removal of this provision for a bridge instead of the existing level crossing. As noted above, this is already a traffic pinch point, and given the size of the proposed development on A29, additional vehicles will be using Forman Road, which joins the A323 at the exiting level crossing. I would like to see this re-instated, together with a better junction for vehicles wanting to use Forman Road. I accept that this will cause land to be used for infrastructure rather than housing but given the area of land assigned to A29, I believe this is an acceptable trade-off. Get Surrey are reporting that First-MTR (the new operator for the South West area of the National Railway) are intending to re-introduce a dedicated Guildford – Farnham rail service (see http://www.getsurrey.co.uk/news/surrey-news/south-west-trains-franchise-farnham-12844991), which would presumably increase the number of times that the level crossing barriers were down in a day and therefore cause further disruption to the traffic flow in that area.
- If this scheme were re-introduced, I would like to see it extended to facilitate improvements to the junction between the A323 and the B3411, which is another traffic pinch point in the local area.

<td>I would like to see a design plan for this proposed new bridge carrying the A323 across the railway at Ash which will replace the level crossing. At present I cannot visualise what it will look like and thus what impact it will have on the surrounding area. My concerns are that it will INCREASE traffic through an already busy and sometimes gridlocked village and that more HGVs will enter the village. Furthermore it may also be out of keeping with the area. Additionally, the area set aside covers land east of Foreman Road. I thought that Persimmon Homes wanted to build houses there so how exactly will that work? Persimmon homes have only recently distributed a pamphlet advising of plans to build 50+ homes on the aforementioned site. Interestingly, Copperwood Developments who propose 154 dwellings on land to the south of Guildford Road say that land is (quote from their literature) ‘reserved to accommodate the Council’s future flyover’. I was of the belief that infrastructure HAS to be in place BEFORE new housing construction? The wording suggests that building will go-ahead before infrastructure is in place.</td>

</tr>
<tr>
<td>Mount Browne has been assessed as an area of 'high sensitivity'. The potential development of 116 houses or of commercial redevelopment on Mount Browne would constitute a major development for this site. Paragraph 116 of the NPPF states that planning permission should be refused for major developments in AONB designated areas unless exceptional circumstances are demonstrated. The plan and GBCS Volume V provide no evidence of exceptional circumstances to support such major development or removal from the Green Belt. The re-development of this rural site could have a major impact on the open character of the area that lies between the North Downs and Farncombe be and also between Guildford and Godalming. This area is clearly visible from adjacent areas and is treasured by local residents, the larger community and visitors to the area. Mount Browne and the adjacent University of Law are regarded are an essential part of the green lung’ which separates Guildford and Godalming. They represent the first line of defence against the risk of urban sprawl. It is crucially important to ensure that it remains essentially open in character and be protected by AONB and Green Belt planning guidelines and constraints.</td>

As set out in our previous consultation response, the National Trust objects to the proposal to remove the Law College / Mount Brown sites from the Green Belt to enable redevelopment. This site lies within the AONB / AGLV and within the St Catherine’s Conservation Area. This site is close to the River Wey and is highly visible heading downstream from Shalford to Guildford. The redevelopment of this site would have a potentially major impact on the amenity of the River Wey and the setting of the River Wey Conservation Area, the AONB, the St Catherine’s Conservation Area and the setting of the St Catherine’s Scheduled Ancient Monument. The site makes a significant contribution to the Green Belt and lying on the periphery of the urban area it is crucially important to ensure it remains essentially open in character. Its removal is therefore not in accordance with paragraph 85 of the NPPF.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A32

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Introduction and Background
1.1. Tibbalds Planning and Urban Design is the appointed planning consultant acting on behalf of the Police and Crime Commissioner for Surrey. These representations relate to the June 2016 consultation of the Proposed Submission version of the Local Plan: Strategy and Sites document, which is open for consultation until Monday 18 July.

1.2. This supporting statement sets out the case for amending draft allocation A32 for the Surrey Police Headquarters. The site is allocated in the Proposed Submission Local Plan for approximately 116 homes and we consider there to be a strong case for increasing the allocation to approximately 200 homes by expanding the southern boundary of the site. The proposed new area for allocation is shown on plan ref. 5630/02.

1.3. These representations explain how the proposed increase in housing numbers is a sustainable option to deliver additional housing in the Borough that accords with national and local policy. The following documents have been submitted in support of these representations:

1. Plan ref. 5630/01 - Opportunity for Additional Residential Development (see appendix)
2. Plan ref. 5630/02 – Potential Additional Allocated Area (see appendix)
3. Ecological Walkover Survey – WYG
4. Highways and Access Technical Note – WYG
5. Landscape and Visual Impact Appraisal + supporting landscape plans – WYG

2. Green Belt

2.1. The Mount Browne site has historically been included within the Green Belt. Policy P2 of the June 2016 Proposed Submission Local Plan recognises that Green Belt boundaries are only to be modified in exceptional circumstances and through the Local Plan process. In light of the development pressures within Guildford the Council are proposing to inset some sites from the Green Belt. This policy identifies Mount Browne as a major previously developed site that is to be inset from the Green Belt:

Site A32 – Surrey Policy Headquarters, Mount Browne, Sandy Lane, Guildford

2.2. The site is allocated for approximately 116 homes and is required to ‘provide positive benefit in terms of landscape and townscape character and local distinctiveness and have regard to the identified landscape character areas’.

2.3. The draft local Plan proposes that the Green Belt boundary is partially redrawn around the Mount Browne site, but these representations recommend that this is extended to include the developable areas in the south, reflecting the logical boundaries of the site and directing development to areas that will have the least visual impact. This does not mean that development would or should include the entire allocation area, but would reflect logical site boundaries. This proposed change would retain existing areas of ancient woodland and other wooded areas that screen the site. This would provide the opportunity for additional homes and also allow for wider landscaping and open space provision and management across the site consistent with the principles of the current draft allocation. This approach is consistent with other allocations in the draft Local Plan.

2.4. Section 9 of the March 2012 National Planning Policy Framework sets out national policy for protecting Green Belt Land between paragraphs 79 and 92. The NPPF states that ‘the fundamental aim of the Green Belt is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence’ (para 79).

2.5. Paragraph 80 of the NPPF sets out the five purposes served by the Green Belt. We consider that the proposed extension of the Mount Brown Green Belt inset would be in accordance with all five points and would not cause any harm to the Green Belt. These points are developed further in the following sections of the representations, but in summary:

1. To check the unrestricted sprawl of large built-up areas

2.6. The Mount Browne site is located c.370m to the south of the designated Guildford Urban Area, as defined by the draft Proposed Submission Local Plan proposals map. Although not within the defined urban area, the site is not isolated and is close to the University of Law site (allocation A33), A3100 road and Artington park and ride. Allocating this site
for additional development would represent a natural and compact extension to urban area, reflecting the existing urban form.

2.7. It is important to consider this proposal in light of other draft land allocations in the Borough. There is a recognised shortage of developable land, requiring several large sites to be released from the Green Belt to deliver housing. Although this proposal represents a small extension to the Guildford urban area, it should be considered as an appropriate and sustainable option when compared to many of the other proposed Green Belt insets.

2. To prevent neighbouring towns merging into one another

2.8. The Mount Browne site is located c.370m to the south of the Guildford Urban Area and c.2.2km to the north of Farncombe. Extending allocation A32 an additional 200m to the south would have no discernible impact on the separation between the two settlements.

3. To assist in safeguarding the countryside from encroachment

2.9. Although located in the Green Belt, the site has been used for a variety of purposes that are not consistent with typical countryside uses. The area has historically been used for private recreational purposes, including a sports pavilion, a landscaped sports pitch and a car park. Parts of the southern area are therefore classed as previously developed land. Although the amenity space is not classed as previously developed land, it is also not open countryside. Extending the A32 allocation southward would not encroach into the countryside in light of the previous uses and strong site boundaries.

4. To preserve the setting and special character of historic towns

2.10. There are no towns of special character that would be impacted by this proposal. The St Catherine’s conservation area is located directly to the north of the A32 allocation.

5. To assist in urban regeneration, by encouraging the recycling of derelict and other urban land

2.11. Part of the site is classified as previously developed land in accordance with the NPPF definition and the remainder has been heavily landscaped. Since this site is now redundant, allocating it for housing represents an appropriate alternative use.

2.12. These points are developed in more detail below.

2.13. The January 2013 Guildford Borough Green Belt and Countryside Study has been used to inform how land should be released from the Green Belt in the new Local Plan. Volume V explores major previously development sites and identifies Mount Browne Police Headquarters as one of eleven potential sites for release from the Green Belt.

2.14. The appraisal of the Mount Browne site contained within section 20 of Volume V recognises that the majority of the site is considered to exhibit a visually enclosed character with a limited contribution to the wider Green Belt. It was considered appropriate to recommend the Mount Browne site for insetting within the Green Belt due to it not presenting a visually open character and possessing defensible boundaries. This assessment sets out potential boundaries for insetting from the Green Belt.

2.15. Whilst we recognise that there is more previously developed land on the northern section of the site, the area to the south could be inset from the Green Belt with few negative impacts, consistent with the conclusions of the Green Belt and Countryside Study.

2.16. It is worth noting that one of the original purposes of creating the Green Belt was to provide access to public open space and recreation areas. It is clear that the Green Belt includes land of variable quality and we encourage the Council to consider how the land within the Green Belt is used and whether there is public benefit to its continued designation. The Local Plan acknowledges that there are significant development pressures within Guildford Borough and a lack of land for development. Since the Council recognises that there is a need for the careful release of Green Belt land to meet development pressures in the area, the most sustainable locations should be given priority over less sustainable sites in more rural areas.
2.17. The proposed submission Local Plan designates 14 villages to be inset from the Green Belt. We recognise that this approach is broadly in line with national guidance, which states that only those villages whose open character makes an important contribution to the openness of the Green Belt should be included in the Green Belt. Those that do not should be inset, or removed, from the Green Belt.

2.18. Whilst we acknowledge that the insetting of villages is in accordance with national policy, there are a number of proposed allocations that would extend the Green Belt insetting significantly beyond what is considered to be the natural boundary of each settlement in accordance with the January 2013 Green Belt and Countryside Study. A review of the allocations set out in the Proposed Submission Local Plan indicates that 431 homes are allocated in inset villages and infill development within identified Green Belt villages. Whilst some of these allocations are appropriate and sustainable, others are large green field sites, formerly within the Green Belt, on the edge of small villages with limited previously developed land and poor access to community facilities. If these sites are considered to be suitable for allocation in light of national policy, then the proposed extension to allocation A32 should also be considered to be appropriate.

2.19. In addition to the inset villages, seven major previously developed sites are inset from the Green Belt, including Mount Browne. Sites identified as previously developed land in the Green Belt are scheduled to deliver 216 homes throughout the plan period according to the sites schedule on pages 123 – 126 of the Proposed Submission Local Plan.

2.20. We considered this proposed approach to be unsound on the grounds that it is not the most sustainable strategy. Paragraph 84 of the NPPF states that ‘when drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary’. This policy clearly requires priority to be given to the most sustainable locations. The sustainability credentials of Mount Browne are explored in detail in the following section, but since there is a clear opportunity to deliver approximately 84 additional homes in a highly sustainable location on the edge of Guildford with excellent public transport and very limited visual impact, this should be prioritised over far more isolated sites in smaller settlements.

3. Sustainability

3.1. Delivering sustainable development is a driving principle of the NPPF. Paragraph 17 states that planning should ‘actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable’. In addition, paragraph 30 states that ‘encouragement should be given to solutions which support reductions in greenhouse gas emissions and reduce congestion. In preparing Local Plans, local planning authorities should therefore support a pattern of development which, where reasonable to do so, facilitates the use of sustainable modes of transport’. Overall we consider Mount Browne to represent a highly sustainable location that provides good access to non-car modes of public transport.

3.2. The June 2016 Sustainability Appraisal sets out the sustainability credentials for each of the proposed allocated sites. A traffic light approach is used to appraise individual sites. Site A32 is shown to be one of the more sustainable allocations in the Borough, with greenlights against 11 of the 21 criteria. Although access to shops and schools are considered to be relatively poor, the Mount Browne site is still considered to be more sustainable than many other allocated housing sites with worse sustainability credentials. The proximity of Guildford town centre coupled with good public transport links gives the Mount Browne site excellent access to the facilities provided there.

3.3. The May 2014 Settlement Hierarchy Document is identified as key evidence in the Proposed Submission Local Plan. This document divides the settlements in Guildford Borough into the following hierarchy in order to promote sustainable development:

1. Urban Area (Guildford)
2. Rural Service Centre x 1
3. Large Villages x 11
4. Medium Villages x 6
5. Small Villages x 6
6. Loose knit / hamlets x 13
3.4. This report confirms that the Guildford Urban area is by far the largest settlement in the Borough with the best access to jobs, education, public transport, health care facilities and shops. Locating additional residential development at the edge of the Guildford Urban Area, with excellent public transport links, therefore presents a very sustainable option.

3.5. The proposal for approximately 200 houses would result in a significant reduction in vehicle movements than that which currently exist. Section six of the attached transport technical note demonstrates that the site currently generates approximately 391 trips between 0700 – 0900 and 397 trips between 1600 – 1800, in addition to other vehicle movements throughout the day necessitated by the police headquarters operations.

3.6. The technical note demonstrates that even in a worst case scenario, the proposed development of 200 houses on the site would generate approximately 191 trips between 0700 – 0900 and 212 trips between 1600 – 1800. This demonstrates that developing the site for 200 units would generate significantly fewer two-way vehicle trips when compared to the current operation, providing a significant net benefit to the operation of the existing site access, local junctions and the local highway network.

3.7. NPPF paragraph 35 states that ‘developments should be located and designed where practical … to give priority to pedestrians and cycle movements, and have access to high quality public transport facilities’. Increasing the allocation on the Mount Browne site from 116 to 200 would help deliver a scheme that accords with these principles.

3.8. Extension of the site allocation boundary to include the southern area of the site will allow improved access to the Artington Park and Ride site and bus routes into Guildford town centre. The footway along The Ridges runs east to west linking to the A3100 footway which provides a connection to Artington Park and Ride. This is approximately a 700m walk from the edge of site A32.

3.9. Extending the allocation to the south will form a more natural connection between the sites by reducing the site edge to park and ride walking distance to approximately 450m. The Artington Park and Ride is served by the number 200, which provides 5 to 6 services per hour to Guildford Bus Station from Monday to Saturday, operating between 0730 and 1920. The Artington Park and Ride is also identified for improved bus services by the June 2016 Guildford Borough Transport Strategy (ASP7).

3.10. In addition to the Park and Ride, bus stops are located on the A3100, just north of the junction between The Ridge and the A3100. These bus stops are served by a number of services (42, 70, 71, 72, 506 and 523) which collectively provide on average 4 services per hour to Guildford bus station, from Monday to Saturday operating between 0645 and 2000, with a reduced service on Sunday.

3.11. Guildford Railway Station is located 2.1km from the proposed development site and can be reached within 25 minutes by walking, 18 minutes by walking to the A3100 bus stops and changing at the bus station or by 10 minutes by cycling.

3.12. Route 22 of the National Cycle Network is located to the north of the site, within a 5 minute cycle ride. Route 22 provides a signed route into the Guildford Cycle Network and wider area. Cyclists would access the route by using the local road network and considering that Guildford is within a 10 minute cycle ride, it is likely that use of this route to access Guildford would be a favourable option for regular commuters.

3.13. Overall we consider the Mount Browne site to be very well located to encourage non-car journeys and will reduce the number of trips generated to and from the site, even with an increase in allocation from 116 to 200 homes.

4. Housing

4.1. The proposed additional homes on the Mount Browne site could contribute to housing delivery for the Borough in the early years of the plan period, with new units on the extended area potentially coming forward before those within the footprint of the existing buildings and facilities on site.

4.2. The June 2016 proposed Submission Local Plan recognises that there is an objectively assessed need to deliver an average of 693 dwellings per annum in accordance with the findings of the September 2015 West Surrey Strategic Housing Market Assessment (SHMA). Policy S2 of the Proposed Submission Local Plan states that the Council’s
preference is to focus growth in the most sustainable locations, making the best use of previously developed land (including in the Green Belt if appropriate). The Guildford urban area is the most significant settlement in the Borough, identified as the most sustainable settlement in the Borough by the May 2014 Settlement Hierarchy Report. Guildford is the closest settlement to the Mount Browne site, the designated edge of which is approximately 370m to the north of the site. Development should therefore be prioritised in the Guildford Urban Area where possible since this is recognised as the most sustainable location.

4.3. Table 1 attached to Policy S2 demonstrates that land has been allocated to deliver 13,652 homes throughout the plan period. 2,742 (20%) of these are to be delivered in Guildford town centre and the Guildford urban area, with the remainder being delivered via an urban extension to Guildford and significant development in smaller settlements. Whilst we recognise that not all development can be located in Guildford, all opportunities should be taken to deliver housing in the most sustainable locations. This can take advantage of existing infrastructure, unlike the large strategic greenfield developments proposed elsewhere in the Borough that will require significant new infrastructure.

5. Area of Outstanding Natural Beauty and Landscape Impact

5.1. The Mount Browne site is located within the Surrey Hills AONB. Paragraph 115 of the NPPF states that ‘great weight should be given to conserving landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty’. Paragraph 116 states that planning permission should be refused for major developments in these designated areas except in exceptional circumstances and where it can be demonstrated they are in the public interest. We consider the proposed changes to allocation A32 to have minimal impacts on the AONB as set out below.

5.2. Policy P1 of the Proposed Submission Local Plan sets out the following criteria for development in the AONB.

- conserve and/or enhance the setting and views of the AONB
- conserve wildlife, historic objects or natural phenomena within it
- promote its enjoyment by the community and visitors to the area
- support the rural economy of the Surrey Hills area
- provide or maintain public access to the AONB.

5.3. We have set out below how we consider that the proposed change to allocation A32 to accord with national and local policy.

5.4. Firstly, a significant proportion of the Mount Browne site is already allocated for development. The existing draft A32 allocation sits within the designated Surrey Hills AONB. Policy A32 states that provision must be made to provide positive benefit in terms of landscape and townscape character and local distinctiveness and have regard to the identified landscape character areas, recognising that it is possible to develop this site without having an undue impact on the AONB.

5.5. The attached Landscape and Visual Impact Appraisal prepared by WYG evaluates the site and surrounding landscape. The methodology used for this landscape and visual appraisal is based on the recommendations in Guidelines for Landscape and Visual Impact Assessment 3rd Edition published by The Landscape Institute and the Institute of Environmental Management & Assessment in 2013 (GLVIA3).

5.6. The report sets out the internal topography of the site, which varies considerably between the northern and southern parts of the site sloping down from approximately 100m AOD to 50m AOD in the south east corner. The northern area, where the current police facilities are located, is marked by a series of steep changes in level and is set on the edge of the ridge line running east-west. This is contrasted by the gradual change in level on the southern part of the site which slopes from 50m AOD at the eastern boundary up to approximately 65m AOD at the western site extents.

5.7. Existing vegetation is a key feature and defines the character of the site. Again there is a distinct change in vegetation between the northern and southern parts of the site. The northern area is densely vegetated with numerous tree groups, and often large individual tree specimens, together with an established shrub and hedge layer. Built form is set within this landscape context creating a sense of enclosure and separation.
5.8. Tree species are a mix of deciduous and evergreen species, including both native and ornamental specimens.

5.9. The southern part of the site contains a series of more open landscape spaces, relating to former uses associated with this part of the site. A former sports hall building effectively divides the site into two parts. To the east of this building is a flat area of grass formerly used for sports pitches, with an access road providing a link to The Ridges and the highway network beyond. Localised landform has been used to create this plateau for the pitches and the ground slopes down to the access road. The boundary is well vegetated with established hedge and trees.

5.10. To the west of sports hall is a further area of amenity grass with a number of large tree specimens with the land gently sloping up to the north and west. The southern boundary is more open with several gaps in the planting offering views into the site. Along the western boundary vegetation becomes denser enclosing the path link here.

5.11. The report also assesses the potential impact on the landscape in a 4km radius of the site. This detailed appraisal demonstrates that views from the north are limited by a combination of topography and vegetation. Views are available from the south, east and west, although the extent of these are limited and filtered by the extent of mature planting on site and in the wider landscape. Existing vegetation on the site and in the wider landscape reduces and filters views to the site, including close views.

5.12. Where there is potential for long distance views, these are often limited, with only the communications mast, located on the northern part of the site, visible above the tree line. This indicates that development on the southern section of the site, up to 50m AOD below the northern area of the site, would have no impact on the long distance views.

5.13. The report sets out potential mitigation measures for any development, including a comprehensive landscape strategy, strengthening existing boundary planting, particularly along the southern boundary; incorporating tree planting throughout the development layout; and management of the existing vegetation to ensure it continues to contribute to the character and qualities of the site.

5.14. The proposed allocation does not include the whole of the area within the ownership boundary. The area ancient woodland to the east would be retained and access to the public could be improved by any future development.

5.15. Overall there is a clear opportunity to increase the extent of the proposed development area on the Mount Browne site without impacting on the wider landscape. This is primarily due to the sloping topography of the site and existing vegetation which would be retained and enhanced as part of any development proposals. It is therefore concluded that impact on the AONB is limited and that development, combined with new access to areas of open space and recreation, as well as opportunities to provide new areas of landscaping, can bring about improvements to the setting of the AONB.

6. Ecology and Biodiversity

6.1. The Mount Browne site has been appraised for any flora or fauna of note by an ecological walkover survey conducted on 30 June 2016 by WYG. The survey has been submitted alongside these representations and sets out the findings in more detail. The survey was carried out broadly in line with the Joint Nature Conservancy Council Standard Phase 1 habitat survey technique and is intended to give an initial view on the ecological quality of the site. The timing of the survey was optimal for encountering species of note.

6.2. The survey found that the different areas of the site contain a variety of habitats which vary from high to low ecological value. The amenity grassland located in Area 1, has a low ecological value whereas the semi-natural broadleaved woodland has a high ecological value, as they have potential to support various notable species. It is therefore recommended that any additional housing (within an allocation extension) is planned to be located within the amenity grassland area and hard standing / man-made habitats within Area 1. This would result in the least adverse ecological impact.

6.3. Furthermore, it is recommended that scattered mature trees, woodland and hedgerow habitats are retained wherever possible. A natural buffer (such as grassland) extending from woodland edges, should be incorporated into the design of the development where possible.
6.4. No protected species were found, but if a development were to be brought forward protected species surveys for bats, reptile, great crested newt, dormouse, badger and possibly breeding birds may be required.

6.5. Overall this demonstrates that a scheme for 200 homes on the site could be carefully designed to avoid any significant ecological impacts, building on the existing sports pitch areas and maintaining the wooded areas.

7. Heritage

7.1. The site is not located within a conservation area and there are no listed buildings on site. The nearest listed building is the Grade II listed Braboeuf Manor on the University of Law site and the nearest conservation area is St Catherine’s. Allocation A32 sits directly to the south of the conservation area and approximately 100m to the south west of the Manor.

7.2. These representations propose to allocate additional land to the south of the A32 allocation, approximately 170m to the south of the conservation area and screened by several dense tree lines, existing buildings and a significant drop in ground levels. There will therefore be no negative impact on these heritage assets.

8. Summary and Conclusions

8.1. In conclusion, the Mount Browne site is located in a sustainable location with good access to public transport and the centre of Guildford. The southern part of the site is well positioned to be developed with minimal impacts on the landscape quality of the surrounding area. Although the southern part of the site is currently allocated as Green Belt, it is sequentially preferable to many other Green Belt sites that the draft Local Plan is proposing to allocate. The A32 allocation should therefore be extended to include the additional land to the south in light of the lack of developable land in the Borough.

8.2. We therefore propose that the following change is made to the local plan policy A32:

1. Amend to say ‘The site is allocated for approximately 116 200 homes (C3)’
2. Update area to 15.4 ha
3. Update plan on page 198 to reflect amended site boundaries

8.3. The Police and Crime Commissioner for Surrey is pleased to have the opportunity to respond to the draft Local Plan and request that they are informed of any future consolation events.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We have concerns regarding Water Supply Services in relation to this site. Specifically, the water network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing water
infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity the Local Planning Authority should require the developer to provide a detailed water supply strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to underestimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

We have concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing drainage infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to underestimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

The proposed development exceeds the capacity trigger levels for available network. Developer funded impact study required to understand implications of development.

The University of Law, also assessed as of "high sensitivity," merits similar consideration to the neighbouring Mount Browne site. The University of Law and Mount Browne are almost connected and should not be considered in isolation.

In the GBCS Volume V justification for in-setting discusses the whole University of Law site but then in-sets just the car park in the Local Plan. APC finds this incongruous.

In the Local Plan the site is potentially allocated for student accommodation to be located on the site of an existing car park. This car park currently provides an open vista from the footpath to the north which would be lost if development was above ground level.

To provide protection to the essentially open character the site must be protected by AONB and Green Belt planning guides. Its removal from the Green Belt would not accord with Paragraph 85 of the NPPF. There is no exceptional circumstance, justification or need for The University of Law car park to be in-set.

APC believes the case to in-set has not been made and, accordingly, objects to the proposal to in-set the University of Law car park from the Green Belt.

The University of Law, Guildford – this site will provide some accommodation for students on-site and seems an appropriate development assuming it can blend well into its rural environs.

Background

The University is the UK’s longest established specialist provider of legal education and can trace its origins back to 1876. The University moved to Braboeuf Manor on the Old Portsmouth Road in 1964. The campus comprises teaching accommodation and the University’s main office functions. The site is currently in D1 Use Class.

The Guildford campus has expanded since 1964 to provide additional on-site teaching accommodation. Approximately 700 students are currently educated at the Guildford campus and the University intends to increase the number of undergraduate places in law courses as well as introduce new business degrees at both undergraduate and postgraduate level at the University over the coming years. Accordingly, it is anticipated that the number of undergraduate and international students at the University will increase over the coming years. Both cohorts expect universities to provide student accommodation.

At present all the University students live off-site. The University does not own its own accommodation but instead has an arrangement with a number of private landlords who are able to offer some accommodation i.e. rooms in a shared house. The quality, type, extent and location of accommodation available in Guildford does not adequately provide for the needs of the University and is severely hampering its ability to attract students and grow in the future. These issues are exacerbated by the high cost of living in Guildford and raising expectations of the standard of accommodation required by students across the UK. It is vitally important that the University students have access to quality accommodation on-campus in the future and therefore the University welcomes the site allocation for student accommodation in response to the submission to the Council’s Call for Sites in January 2015.

The inset of the site from the Green Belt in paragraph 4.3.13 is also strongly supported by the University. The insetting of the site is considered to provide much needed flexibility to greater assist the University in meeting the needs of its students in the future. This approach by the Council is considered to be a positive response to paragraph 27 of the National Planning Policy Framework (NPPF) which encourages local planning authorities to take a proactive, positive and collaborative approach to development that will widen the choice in education.

However, the current drafting of Policy A33 for the site allocation states that “building higher than two storeys are unlikely to be suitable” and the associated plan limits the site of development to the existing car park in the north east corner of the site. These requirements are considered to unreasonably restrict future development at the site and for these reasons the University cannot support the site allocation in its current form. This is further explained below.

Site Location

The site location map appended to the site allocation identifies the development as appropriate within the car park to the north west corner of the University Campus. This reflects the positioning of the most recent schemes for future student accommodation. Nevertheless, the scheme for student accommodation on site is still emerging. Accordingly, it is important that the site allocation is sufficiently flexible to allow potential changes to the scheme in future, including a slightly amended layout, if required. The proposals would be appropriately assessed as part of the planning application process in terms of ecological, visual and heritage impact. Consequently, it is considered that the site allocation map
should include the whole campus as subject to the site allocation, in line with that submitted as part of the Call for Sites Form submitted in January 2015.

**Building Height**

With respect to building height, the draft site allocation includes the following as one of its requirements:

“Significant regard to height of buildings (buildings higher than two storeys are unlikely to be acceptable)”.  

This is a significant concern for the University in terms of the viability of the scheme. It is considered that in order for the scheme to be viable a building of more than two storeys is required. Paragraph 173 of the National Planning Policy Framework (NPPF) identifies that careful attention should be paid to viability to ensure that plans are deliverable. Therefore sites should not be subject to such policy burdens that their ability to be developed viably is threatened. Given that the scheme is still emerging, it is considered that the site allocation should be flexible in its wording to ensure that a viable scheme can be established. Accordingly, it is considered that in this case the statement that “buildings higher than two storeys are unlikely to be acceptable” is unreasonably restrictive on future development and should be removed. Alternatively, it could make reference to the height of development being a sensitivity in planning policy terms, which would need to be tested as part of any planning application process.

Furthermore, the pre-application request submitted to the Council in March 2015 presented a scheme of 4 storeys which stepped up in response to the ground levels of the site. The pre-application advice (ref. 15/A/00333) stated that “the Council is unlikely object to the scale or height of the building where this does not give rise to harm such as harm to the AONB or harm to the Conservation Area.” Should it be decided to proceed with a development on the site, any harm associated with the building height will be fully assessed as part of the planning application process. The restriction to a height of two storeys in the site allocation is therefore considered to be excessive and unnecessary.

**Conclusion**

Para 4.2.18 of the Proposed Submission Local Plan states that to minimise pressure on the existing housing stock it is important that any significant increase in full time student number is matched by the provision of purpose built student accommodation. The University has continued plans for expansion including the increase of undergraduate and postgraduate students requiring on site accommodation and consequently intends to deliver on site student accommodation.

The University therefore welcomes the inset of the site from the Green Belt to better meet the needs of its students in the future. In addition the allocation of the site for student accommodation is strongly supported. However it is considered that the building height requirement and site location map are unduly restrictive on future development schemes, particularly in terms of viability. A scheme for student accommodation at the site is still emerging and accordingly it is considered that the site allocation should be sufficiently flexible to allow an appropriate and viable scheme to come forward. The location and building height would be rigorously assessed as part of any planning application to ensure acceptability in terms of the impact on the Green Belt, Area of Outstanding Natural Beauty and Conservation Area for example. Accordingly, these restrictions in the policy itself are unnecessary.

We trust that the above comments will be taken into account by the Council during the preparation of the Local Plan for submission to the Planning Inspectorate for examination.

Guildford Borough Council Proposed Submission Local Plan: Strategy and Sites – Representations on behalf of the University of Law

On behalf of our client, the University of Law (the University), we enclose representations to Guildford Borough Council Proposed Submission Local Plan: Strategy and Sites consultation which has been issued for public consultation until 24 July 2017.

Background

The University is the UK’s longest established specialist provider of legal education and can trace its origins back to 1876. The University moved to Braboeuf Manor on the Old Portsmouth Road in 1964. The campus comprises teaching accommodation and the University’s main office functions. The site is currently in Use Class D1.

The Guildford campus has expanded since 1964 to provide additional on-site teaching accommodation. Approximately 700 students are currently educated at the Guildford campus and the University intends to increase the number of undergraduate places in law courses as well as introduce new degrees including business at both undergraduate and postgraduate level and law with criminology over the coming years. Accordingly, it is anticipated that the number of undergraduate and international students at the University will increase over the coming years. Both cohorts expect universities to provide student accommodation.

At present all the University students live off-site. The University does not own its own accommodation but instead has an arrangement with a number of private landlords who are able to offer some accommodation i.e. rooms in a shared house. The quality, type, extent and location of accommodation available in Guildford does not adequately provide for the needs of the University and is severely hampering its ability to attract students and grow in the future. These issues are exacerbated by the high cost of living in Guildford and raising expectations of the standard of accommodation required by students across the UK. It is vitally important that the University students have access to quality accommodation on-campus in the future and therefore the University welcomes the site allocation for student accommodation in response to the submission to the Council’s Call for Sites in January 2015 (Annex 2).

Representations were submitted on behalf of the University to the Proposed Submission Local Plan in July 2016 which welcomed the proposed site allocation on its campus (Policy A33) and inset part of the site from the Green Belt; but raised concerns regarding the height constraints placed on the site allocation essentially limiting development to two storeys. We therefore welcome the revision of the site allocation wording to address these concerns and require future development to have “significant regard to height of buildings with specific regard to the setting of the Grade II listed Braboeuf Manor.” It is considered that this will provide the University with the flexibility to deliver a viable student accommodation scheme whilst ensuring it is appropriate within this sensitive site context.

However, we have further comments on the student numbers specified in the policy wording and site location. We expand on this below.

Student Numbers

By way of background, West Surrey Strategic Housing Market Assessment (2015) identifies that the number of students in the borough increased by 4,116 students between 2001 and 2011, of which 3,710 were full time students (excluding 16-17 year olds) equating to a 53% increase. Of this growth 1,329 students (32%) chose to live in halls of residents or other communal establishments, whereas 2,274 lived in the wider housing market area (55%). Students are therefore placing additional pressure on the housing market contributing to acute demand in housing and associated high rental costs for private rented accommodation. This is further exacerbated by the undersupply of housing recognised in the SHMA between 2001 and 2015 relative to the planned need of 419 dwellings per annum.

The provision of on-site student accommodation for the University would therefore contribute to alleviating this pressure on the housing market. Indeed, para. 4.2.18 of the Proposed Submission Local Plan states that “to minimise the pressure
on the existing housing stock it is important that new accommodation is provided to meet any significant increase in full time Guildford-based students.”

Since the Proposed Submission Local Plan consultation, the wording of Policy A33 in relation to the University of Law site has been amended to specifically allocate the site for 112 student bedspaces. We understand that this number has been established based on the Council’s assumption on a reasonable level of development within the Area of Outstanding Natural Beauty (AONB), rather than an assessment of need. It does not appear to have been based upon a detailed assessment of what the site might be able to accommodate in design terms.

Nearly all undergraduate law course providers make accommodation available for first years and most have accommodation for international post-graduate students. In order for it to compete, the University must offer a similar provision. The University is anticipating a considerable expansion of student numbers over the coming years through the introduction of new courses. Based on current projections the total number of students at the campus is anticipated to rise from 713 to 948 students by 2021 (see Annex 1), equating to a 33% increase in student numbers which would contribute to increased pressure on the local housing market. Of this, 108 will be undergraduate and international students who will expect on-site student accommodation (see Table 1). However this does not take account of the introduction of the new undergraduate business degree which the University expects to commence in the coming years. Based on the University’s student number predictions for this course, by 2021 there would be a bed space need of approximately 159 bedspaces to accommodate the first year business undergraduates. The allowance for a higher number of bedspaces is therefore necessary to support the expansion and growth of the University, particularly with regards to the introduction of the new undergraduate business degrees.

The proposed policy should be flexibly prepared to enable detailed site capacity to establish the level of development the site can accommodate in design terms for discussion with the Council at the planning application stage. This approach would be consistent with NPPF para. 14 which encourages local planning authorities to positively seek opportunities to meet the development needs of their area. Indeed, draft Policy H1(5) states that “purpose built student accommodation for full time higher education Guildford based students will be encouraged on campus locations where appropriate” (our emphasis added). It is considered that this will provide the Council with sufficient control over the quantum of development on the site with the onus on the applicant to demonstrate that any level of student accommodation proposed in a subsequent planning application is acceptable from a design perspective, particularly in terms of the impact on the AONB.

Furthermore, the University is concerned that limiting the number of bedspaces to 112 could have implications on the viability of future student accommodation schemes. Paragraph 173 of the NPPF identifies that careful attention should be paid to viability to ensure that plans are deliverable. Therefore sites should not be subject to such policy burdens that their ability to be developed viably is threatened. Given that the scheme is still emerging, it is considered that the site allocation should be flexible in its wording to ensure that a viable scheme can be established. The specification of 112 bedspaces in the allocation could be unreasonably restrictive on future development schemes and should be removed to allow and appropriate and justifiable level of accommodation to come forward that will meet future need.

Consequently, it is not considered necessary to identify a specific number of bedspaces within the site allocation itself. Accordingly, we suggest that the policy wording is returned to its previous iteration to state: “The site is allocated for student accommodation (sui generis).”
Site Location

The site location map appended to the site allocation identifies the development as appropriate within the car park to the north west corner of the University Campus. This reflects the positioning of the most recent schemes for future student accommodation. Nevertheless, the scheme for student accommodation on site is still emerging. Accordingly, it is important that the site allocation is sufficiently flexible to allow potential changes to the scheme in future, including a slightly amended layout, if required. The proposals would be appropriately assessed as part of the planning application process in terms of ecological, visual and heritage impact. Consequently, it is considered that the site allocation map should include the whole campus as subject to the site allocation, in line with that submitted as part of the Call for Sites Form submitted in January 2015 (appended to this submission for reference).

Conclusion

The University has continued plans for expansion including the increase of undergraduate and postgraduate students and the provision of on-site accommodation is vitally important to support this. Whilst the site allocation for student accommodation is strongly supported, the specification of 112 bedspaces raises considerable concern. Para. 4.2.18 identifies that new accommodation should be provided to meet significant increases in student numbers and it is considered that the site allocation in its current form will not enable the University to deliver this. Draft Policy H1(5) provides the Council with sufficient control on the quantum of the development through the planning application process to ensure acceptability. Similarly, the location of development would also be rigorously assessed as part of the planning application. Accordingly the proposed restrictions in the policy itself are unnecessary.

Policy A33: The University of Law, Guildford

These sites are within the Surrey Hills Area of Outstanding Natural Beauty. We advise the LPA to take into account the relevant Management Plan for the area and should seek the views of the AONB Partnership. Development proposals brought forward through the plan should avoid significant impacts on protected landscapes, including those outside the plan’s area and early consideration should be given to the major development tests set out in paragraph 116 of the National Planning Policy Framework (NPPF).

These sites are adjacent to ancient woodland. The policies should ensure that any direct or indirect impacts on these sites are avoided or mitigated.

I would like to confirm my support for the GBC plan for the redevelopment from this site, the current modern offices are extremely obtrusive on the local landscape, especially from the River and the former Wharf area. Ideally any domestic housing will try and reflect the history of this area. It will lead to the greater use local public houses/shops & restaurants.

Policy A34 Broadford Business Park – 100 homes

We are concerned about the development of this site for the following reasons;

3.1.1 As compared to the existing traffic volumes from the Business Park users it would seem that 100 homes would create a major increase in traffic movements from Broadford Park with a consequent knock-on effect to the T-junction of that road where it meets the A281 (already noted above for its severe congestion problems – see 2.1 above). It should also be noted that the exit/entrance to the site is very close to a blind bend on the Broadford Road.

3.1.2 As a residential site there is inadequate pedestrian access from the site to the school, railway station, bus stop and shops. There is no safe walking route from Broadford Road along the A281, because there is no pavement on the west side of that road and it is not permitted to construct one on Common land. There are paths over the Common but not of...
an all-weather nature, although the main path across the Common via Juniper Terrace has been newly relaid. If some of these issues could be resolved we would suggest that the site could possibly support a smaller development of mixed flats and small houses, or even sheltered housing to cater for the elderly and so help to release larger properties for younger families.

3.1.3 The risk of flooding is a concern as parts of the site are identified as Zone 2 and 3 flood zones. We wish to emphasise our concern that any affordable housing provided here should be at no greater risk of flooding than any market property located on the site.

3.1.4 The River Wey is a significant part of the Parish’s “blue infrastructure” and as such would need sensitive development of the site with appropriate screening and due regard for National Trust guidelines. This stretch of water is popular with users of narrow boats and is therefore a valuable tourist attraction for the whole borough. In consequence, it is particularly important that any development of this site does not have an adverse impact on the peace and tranquillity of the water meadows on the opposite bank.

I object to the fact that Brownfield sites A4 and A34 have been removed from the Local Plan which puts pressure onto Green Belt sites to meet the so-called housing “need”. Surely it would be better to build on Brownfield sites rather than Green Belt?!!

I wish these objections to be fully taken into consideration, forwarded to the Planning Inspectorate and the Plan amended accordingly.

OBJECTION TO THE REMOVAL OF BROWNFIELD SITES, A4, GUILDFORD TOWN CENTRE AND A34, BROADFIELD BUSINESS PARK, SHALFORD.

I OBJECT to the removal of these site from the Local Plan. The Council claims to adopt a brownfield first policy. Policy A4, the former Guildford telephone exchange, is now proposed to be used for commercial retail rather than as before, housing. This clearly suggests the Council is failing to properly implement government policy to use brownfield sites first, before going for previously undeveloped land.

This site also abuts the River Wey and Godalming Navigations Conservation Area yet no reference to the consideration of the Conservation Area is made in the policy which is again very disappointing. This part of the Navigations passes through medieval hay meadows, meads and flood plain. It is characterised by its openness and is therefore highly susceptible to a change in character resulting from the redevelopment of this site.

The Trust will seek the preservation and enhancement of important views out of and into Navigations, as well as the preservation and enhancement of the strong sense of openness, natural landscape character and waterway atmosphere at this point along the Navigations.

The draft policy should be updated to address the following considerations:

- The height and scale of new buildings on this site must have regard to the visual setting of the Navigations;
- New buildings must be well set-back from the Navigations, unless historical precedent dictates otherwise;
- New parking and loading areas must not be located adjacent to the Navigations;
• The planting screen between any new development and the Navigations must be strengthened and managed for the long term;
• New building materials and colours must be visually compatible with the rural character of the Navigations;
• New elevations facing the Navigations must be well-articulated, varied in design and respect the site’s historical associations with the Navigations;
• Lighting must not overspill into the waterway environment;
• The existing footpath alongside the Navigations must be retained and surfacing improved to provide improved access for all along the river frontage;
• New development must not result in an increased risk of flooding or an adverse impact on the water table or destabilise the banks of the Navigations.

We wish to continue to be consulted on planning applications on these sites and any others affecting the River Wey.

In respect of All Sites along the Navigations the National Trust will continue to seek to ensure there is:

• a consistency and cohesive design of riverside landscaping, including materials, signage, street furniture and fencing;
• detailed consideration of appropriate materials and surface treatment of the public realm, particularly the towpath, reflecting the historic character of that part of the Navigations to avoid over urbanisation;
• well maintained and visually attractive boundary structures;
• the removal/avoidance of any visual intrusion into the Navigations from car parking and loading areas;
• no building of structures, whether temporary or permanent, which could de-stabilise the banks of the Navigations;
• appropriate lighting which does not overspill into the waterway environment urbanising the character of the area;
• Opportunities for protection and enhancement of nature conservation along the riverside.

As set out at the start of this letter, we have again appended a copy of the Trust’s ‘Principles for development affecting the River Wey Corridor in Guildford Town Centre’ which we would urge the Council to formally endorse in Local Plan policy.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A34

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Thames Water would welcome the opportunity to work closely with the Local Planning Authority and the developer to better understand and effectively plan for the water treatment infrastructure needs required to serve this development. It is important not to underestimate the time required to deliver necessary infrastructure. For example: Water Treatment Works upgrades can take 18 months to 3 years to design and build.

We have concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing drainage infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to underestimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

The proposed 116 dwellings exceed the capacity trigger levels for available network. Developer funded impact study required to understand implications of development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
INTRODUCTION AND OVERVIEW

These representations have been prepared by Barton Willmore LLP on behalf of Zurich Assurance Limited and their fund managers Columbia Threadneedle (hereafter referred to as ‘Zurich’) in respect of their landholding at Broadford Business Park, Broadford Park, Shalford GU4 8ED, which lies to the south of Guildford.

These representations are submitted in response to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites (‘the Proposed Submission GBLP’), which Guildford Borough Council (GBC) has published for consultation under Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012 (‘the Local Planning Regulations’) for a 6 week period on the 6 June 2016.

Zurich previously submitted representations responding to the Draft Local Plan: Strategy and Sites (‘the Draft GBLP’) consultation under Regulation 18 of the Local Planning Regulations that was carried out between July and September 2014. The Draft GBLP outlined the draft strategic policies for the borough and proposed allocation of sites for various types of development, including residential, so to realise GBC’s vision, aims and spatial strategy.

GBC’s Local Development Scheme (LDS), approved at the meeting of the Council’s Executive on 29 September 2015, explains that following the completion of the current consultation, the Proposed Submission GBLP is to be submitted to the Secretary of State (SoS) for independent examination in December 2016. An Examination in Public (EiP) is proposed for April 2017. Subject to the Examiner’s findings, GBC anticipate it will adopt the new GBLP as the Development Plan for Guildford Borough in December 2017, at which stage it will replace the saved policies of the current adopted Local Plan (2003).

Overview

The Strategic Vision for Guildford Borough, outlined in Section 3 of the Proposed Submission GBLP, describes GBC’s plan for sustainable growth of the borough up to 2033. The vision identifies four key core themes, namely society, environment, economy and infrastructure, which will be used to inform the delivery of GBC’s strategic objectives.

Due to a number of factors, there is insufficient land available within the Borough’s existing urban areas and village settlements to accommodate the objectively assessed needs of the area. As recognised by GBC within the Proposed Submission GBLP, “exceptional circumstances” justify the allocation of land currently within the Green Belt to Broadford Business Park, Shalford

Broadford Business Park, Shalford

Broadford Business Park (hereafter referred to as ‘the Site’), which these representations focus upon, is previously developed land (PDL) and occupied by a number of buildings currently used as offices (Class B1(a)) and for light industrial (Class B1(c)) purposes. A more detailed description of the Site is set out at Section 2 of these representations.

The Site was first identified as a prospective development site in the Guildford Borough Land Availability Assessment (LAA) (current version dated February 2016) (LAA ref: 2186). Subsequently, the Site was allocated for redevelopment as part of the Draft GBLP (ref: Site 81). The site allocation has been retained as part of the Proposed Submission GBLP (ref: Policy A34) and has been assessed as being capable of delivering 100 new homes in place of the existing employment uses.

Zurich supports the proposed site allocation, as set out in the Proposed Submission GBLP, for a residential development. The Site can make a meaningful contribution to the housing requirements of Shalford and the wider spatial and development aspirations for the borough.
The indicative masterplan proposals and technical documents that accompany these representations demonstrate that the following can be delivered during the plan period:

- The delivery of up to 100 new homes (including affordable housing), to reflect GBC’s preferred tenure mix;
- Design-led approach that enhances the setting of the adjacent conservation area;
- High quality hard and soft landscaping to enhance the setting of the nearby Area of Great Landscape Value;
- Improved flood attenuation and mitigation measures to reduce flood risk and surface water runoff rates; and
- The opportunity to secure financial contributions through the planning application process and New Homes Bonus to enhance local services and infrastructure.

To demonstrate the deliverability of the Site, these representations are accompanied by the technical documents listed below. The corresponding document reference number has been included for ease of reference:

- BBP2: Design Statement, including Illustrative Masterplan prepared by John Thompson and Partners;
- BBP3: Commercial Agents Report prepared by Savills;
- BBP4: Flood Risk Advice Letter prepared by WSP;
- BBP5: Landscape and Visual Commentary prepared by Scarp Landscape; and
- BBP6: Transport Note prepared by TTP.

### Overarching Policy Context

The representations will have regard to paragraph 14 of the NPPF, which states that at the heart of the Framework is a presumption in favour of sustainable development, which should be seen as a golden thread running through both plan-making and decision-taking. For plan-making this means that:

- Local planning authorities should positively seek opportunities to meet the development needs of their area;
- Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change, unless:
  1. Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or
  2. Specific policies in this Framework indicate development should be restricted.

Zurich’s representations seek to support GBC in ensuring that the Proposed Submission GB LP meets national planning policy and guidance within the context of the tests of soundness identified at paragraph 182 of the NPPF and the guidance contained in Planning Practice Guidance (PPG) relevant to the preparation of Local Plan (ref ID: 12). Paragraph 182 of the NPPF explains that the Local Plan will be examined by an independent Inspector, whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. A local planning authority should submit a plan for examination which it considers is “sound” – namely that it is:

- Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;
- Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;
- Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and
- Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

Whilst having regard to the overall objectives of the Proposed Submission GB LP, particular attention will be given to demonstrate that the Site is free from constraint and meets the availability, suitability and deliverability tests referred to in paragraph 47 of the NPPF. Zurich’s representations include technical assessments addressing the key policy considerations and demonstrating how the Site could be brought forward through an indicative masterplan and accompanying Design Statement that has been prepared by JTP architects.

General analysis of the policies particularly relevant to Zurich’s interests at the Site is provided. Where Zurich are proposing changes to Policy, these are highlighted in bold whilst all proposed deletions are struck through.
SITE DESCRIPTION

Broadford Business Park is situated to the south-west of the village, and identified settlement, of Shalford. The 1.5 hectare site is within the single freehold ownership of Zurich. An aerial photograph of the Site is included in Figure 1 below.

This previously developed site falls within the Metropolitan Green Belt and forms part of the locally designated Area of Great Landscape Value (AGLV) and Corridor of the River Wey (see Figure 2 below). Notably, the Site is located within 5 – 7km of the Thames Basin Heath Special Protection Area (SPA), which is beyond the zone of influence on the SPA as determined by Natural England. The LAA 2016 advises that development at the Site may have an impact on the SPA, judged on a case by case basis, and in that respect GBC’s draft Infrastructure Delivery Plan (IDP) (June 2016) confirms that a contribution may be required to the Chantry Woods and Tyting Farm SANGs.

The Site is occupied by seven commercial buildings (extending to circa 6,500 sqm) that range from two to three storeys in height, namely:

• Bishopsgate House;
• Broadford House and Park House;
• Northfield House and Southfield House;
• River House; and
• Captia House.

Two single storey outbuildings are located towards the northern site boundary. The buildings on the Site benefit from office (Class B1(a)) and light industrial (Class B1(c)) uses. The remainder of the Site is covered by block paving used for car parking that are interspersed with small areas of soft landscaping and trees. The existing trees along the eastern boundary adjacent to the River Wey provide some screening to the open countryside beyond.

As can be seen from Figure 3 below, the northern part of the Site falls within Flood Zone 2 as defined by the Environment Agency, whilst the western extremity of the Site is within Flood Zone 3. The remainder of the Site is within Flood Zone 1.

The Site is accessed by Broadford Park, which crosses common land owned by GBC, and joins with the A248 (Broadford Road) that links the villages of Shalford and Peasmarsh.

Immediately to the west of the Site is the River Wey, which is designated as the Wey and Godalming Navigations Conservation Area. Beyond the river navigation is an open flood plain that is also part of the AGLV as well as is a Site of Special Scientific Interest (SSSI).

To the east is an area of common land, which comprises areas of open grassland and woodland. This area is a designated as a Site of Nature Conservation Importance (SNCl).

Planning History

The Site has limited planning history and has not been subject to any previous planning applications for redevelopment that might be relevant to informing the proposals going forward.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:  BBP-1 Reg 19 Reps.pdf (1.1 MB)

Comment ID: PSLPS16/7987  Respondent: 15693153 / Zurich Assurance Ltd  Agent: Barton Willmore LLP (Sinéad Morrissey)
The Proposed Submission GBLP is accompanied by a comprehensive set of ‘Site Policies’ that are designed to allocate land for a range of uses to support the vision, aims and objectives of the Local Plan. These policies consider sites within the whole of the borough, and allocate land for development including for housing, employment, retail and infrastructure.

Each policy lists uses that are acceptable on the identified land, alongside specific requirements and opportunities for future development proposals. Allocated sites are encouraged to progress development proposals as soon as possible, to help provide housing in the earlier stages of the plan period, to help boost housing supply. Equally, where allocated sites have been identified as likely to deliver in the later years of the plan period due to constraints, if these are resolved sooner, development proposals are encouraged.

The proposed site allocation for Broadford Business Park is set out at Policy A34 of the Proposed Submission GBLP. The Site Policy specifies the allocation, requirements and opportunities set out in Table 3 below that are to be taken into account as part of future proposals for the Site.

The supporting text that accompanies the Site Policy goes on to identify the ‘Key Considerations’ relevant to proposals for the Site. These give due consideration to the relevant planning policy designations that are summarised in Section 2 of these representations.

Zurich wholly supports GBC’s decision to allocate their land at Broadford Business Park for residential development. Zurich is committed to ensuring the optimal amount of new homes are delivered on the Site as early as possible within the plan period.

As explained in Section 2 of these representations, the Site is wholly within the single freehold ownership of Zurich. The majority of the Site will be available for redevelopment by 2019 through vacant procession, with Bishopsgate House later in the plan period. The Site is therefore available for development in the short to medium term and can provide a meaningful contribution to the borough’s housing needs in the short term.

Site Allocation Boundary

Zurich have noted that the access road (Broadford Park) that links the Site to the public highway (A248 – Broadford Road) has not been included in the proposed site allocation. Broadford Park is tarmacked private road that crosses common land owned by GBC (see Figure 6 below).

Zurich have a well-established easement agreement with GBC that provides a right of access over this land for users of the Site. It is anticipated that Broadford Park will continue to serve as the principle vehicular access to the Site. However, vehicular access would be possible from the north-west corner of the Site directly onto Broadford Road, if required. As such, Zurich considers this should be reflected in the Site Policy for the Site. Zurich therefore requests that GBC amend the site allocation boundary so to include Broadford Park and, for the sake of clarity, specify within Policy A34 that the land is only to be used to provide vehicular access to the Site. Furthermore, please note the change in site boundary at the corner adjacent to Broadford Cottages to reflect ownership. Further Figure 7 illustrates the suggested revised site allocation boundary.

Land Availability Assessment

In weighing up the decision whether to allocate the Site under Policy A34, GBC have had regard to the analysis contained in the LAA. Whilst the LAA is not an expression of planning policy and does not grant planning permission for new development, it does provide an evidential baseline that highlights prospective constraints and indicative capacity of any given site.

Consistent with the deliverability tests described at footnote 112 to paragraph 47 of the NPPF, LAA site reference 2186 considers the suitability, availability and achievability of new development on the Site.
In response to the analysis provided by site reference 2186, these representations are supported by a comprehensive suite of technical documents, prepared by an expert consultant team, to demonstrate that the Site is free from constraint and meets deliverability tests referred to in paragraph 47 of the NPPF. Through the detailed work undertaken, it has been possible to demonstrate that the Site is sustainable and can be well integrated into an existing and enhanced infrastructure network.

Set out below is a summary of the indicative development proposals for the Site along with the key findings of the technical documents prepared in response to the analysis contained in the LAA.

Development Proposals

A Design Statement with concept masterplan (Doc Ref: BBP-2) has been prepared by JTP architects to illustrate Zurich’s proposal for its allocation. The proposals would deliver up to 100 new homes in a range of sizes and tenures that will be tailored to meet local housing needs.

Based on a detailed analysis of the Site’s Constraints and Opportunities, page 8 of the statement presents an illustrative vision of how the Site could be developed. Development is envisaged as a range of short terraced homes, some detached and semi-detached dwellings and clusters of apartments. A prospective site layout has been prepared that offer an indication on how the Site could come forward for development. The housing mix, as summarised in Table 4 below, has been adjusted to achieve an appropriate balance between meeting local housing needs, as described in GBC’s SHMA, whilst maintaining the character and appearance of the area. Ultimately, the final housing mix for the Site would be determined at the planning application stage in response to housing needs at that time.

The site area of the proposed site allocation is 1.5 hectares. This results in an overall development density of 66 dwellings per hectare (dph).

The layout provides a high degree of pedestrian permeability between the proposed development and the existing community, as well as making better use of the existing green and blue infrastructure, particularly in terms of improving access to the River Wey and maintaining a respectful relationship with the open countryside to the west. New landscaping across the Site will also increase opportunities to improve the biodiversity value of the Site and integrate more effectively with the SNCl and SSSI areas to the east and west.

Consistent with the objectives of Policy H2 of the Proposed Submission GBLP, the proposals for the Site will ensure affordable homes are delivered in line with GBC’s policies. Further discussions will be conducted with GBC’s Housing Team to finalise the particulars of the affordable housing products and that the proposed is reflective of local housing needs.

The Site is within easy reach of a wide range of areas of public open space, including the River Wey Navigation and Shalford village green. Opportunities to provide contributions to enhance these areas of open space will be secured as part of redevelopment of the Site. A landscape buffer will be provided along the western site boundary for the benefit of future residents so to improve access to the River Wey and provide flood risk mitigation.

Technical Evidence to Support Allocation

As set out in Section 1 of these representations, a suite of technical assessments have been undertaken to address the key planning considerations relevant to the Site. Whilst additional technical studies will be required for any planning application to redevelop the Site, the following address the key issues relevant to the plan making process.

Commercial Agents Report (BBP-3)

A commercial agents report (and associated financial appraisals) has been prepared by Savills to support these representations. The report considers the following:

- Whether the existing buildings are suitable for refurbishment or whether they have reached the end of their economic life.
- Whether redevelopment of the site for employment use is economically viable.
• Whether there is a need for this current space within the Borough for employment purposes or whether there are better suited locations.

The report advises that the existing buildings are failing and the considerable cost of their refurbishment is not a viable option for a developer. It also confirms that alternate employment uses on the site as part of a redevelopment proposal would also be unviable and, in any event, the site is not best placed for such a use in terms of location or demand. Its concluding remark is: “refurbishment of the existing office stock or the redevelopment of the site with a new office scheme will not offer a viable proposition for developers or investors. If the Property were to be brought to the market in its current form we are of the opinion that demand will be from residential developers.”

Flood Risk Advice Letter (BBP-4)

A Flood Risk Advice letter has been prepared by WSP to accompany these representations. It provides a brief assessment of the baseline assessment of flood risk, climate change and drainage and concludes as follows:

“In summary, the site is located in Flood Zone 1, 2 and 3, but mainly Flood Zone 2 Residential development should be preferentially located in Flood Zone 1, followed by Flood Zones 2 and 3, as discussed in Sequential and Exception Tests. To allow for climate change, a basic assessment assumes the 1 in 100 plus climate change level to be 34.80m AOD. It is recommended that further discussions with the Environment Agency are undertaken to agree an approach for estimating the climate change level.

As shown by the GBC SFRA’s the site is sequentially appropriate for development as although there are preferential site outside the flood plain the required allocation for development cannot be met in these areas and that - ‘The LAA and sequential test identifies that there is no reasonably available site appropriate for the proposed development of 100 homes with a lower probability of flooding.’

Based on the current information available and the above assessment, and on the understanding that residential development is located above a level 34.80m AOD including suitable mitigation and management measures are utilised it is concluded that the proposed development is considered appropriate from the perspectives of flood risk.”

Transport Note (BBP-5)

A Transport Note prepared by TTP accompanies these representations which provides an overview of the site’s location, its accessibility and the change in traffic flows that might be expected.

It concludes that:

• The site is located within walking distance of wider facilities offered in the village, local amenities and public transport.
• Bus stops providing access to a number of routes are located within walking distance from the site and Shalford train station provides regular services to London and Reading.
• The level of traffic likely to be generated by a residential use will be comparable with the existing levels of daily activity and as such would not be expected to have a noticeable impact on the operation of the public highway.

Landscape and Visual Commentary (BBP-6)

The landscape and visual commentary provided by Scarp seeks to:

• Outline landscape and visual appraisal of the site and its surroundings,
• Guide the preparation of the master plan for the proposed residential development, and
• Provide a commentary on the effects of the preliminary development proposals on the local landscape and on existing views and visual amenity.

It advises that:

• The development proposal would have many positive effects on local landscape character and visual amenity.
• The proposed development would also introduce an architectural style and materials with a stronger sense of local distinctiveness.
• The existing green corridor alongside the river would be widened and enhanced in landscape and ecological terms.
• Green belt openness would be enhanced by an overall reduction in building heights and volume and by the reduction in the amount of hard-standing on the site.
• The development proposals would enhance the rural setting of the Wey floodplain.
• The widening of the green corridor alongside the river would allow for enhanced footpath access to the River Wey, creating a recreational route that would be safer and more inviting in terms of fewer blind-spots and less dominated by large-scale built form.
• The proposed set-back of buildings away further from the Wey and Godalming Navigations Conservation Area and the establishment of a wider, more robust tree/shrub framework would enhance the setting of the conservation area.
• The enhanced enclosure of built form on the site, as recommended by the Guildford Landscape Character Assessment and Guidance, would help conserve and enhance the pastoral character of the floodplain and the rural character of views from the River Wey.

Phasing within Plan Period

The majority of the site will be available for redevelopment in 2019 following vacant possession. Subject to planning, it is envisaged that units could be delivered on the site 2/3 years later therefore a delivery timetable of circa 5-10 years in line with GBC LAA 2016. The redevelopment of Bishopsgate House will be later in the plan period, circa 10-15 year delivery period.

Delivering Sustainable Development

The NPPF states that the purpose of planning is to help achieve sustainable development. Paragraph 7 states that there are three dimensions to sustainable development, comprising economic, social and environmental roles.

Paragraph 8 emphasises the need for the planning system to balance these different dimensions.

The fundamental precept of the NPPF is a presumption in favour of sustainable development and Paragraph 14 states that this should be seen as a golden thread running through both plan-making and decision-taking.

In the Table 5 below, we summarise how the proposals for Broadford Business Park comply with the definition of Sustainable Development as described in the NPPF.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

SUMMARY AND CONCLUSIONS

In summary, Zurich’s overall conclusions in responding to the Proposed Submission GBLP consultation are as follows:

1. Zurich supports GBC’s proposal to meet OAN in full;
2. Zurich is wholly supportive of GBC’s proposals to allocate land at Broadford Business Park for residential development purposes in accordance with the redevelopment of PDL in the Green Belt set out by the NPPF;
3. Broadford Business Park meets the deliverability tests set out in paragraph 47 of the NPPF;
4. The Site is within the single freehold ownership of Zurich meaning it is immediately available for development;
5. GBC should give further consideration to the inclusion of viability considerations when assessing the provision of affordable housing and planning obligations on new development sites;
6. The Site is sustainably located for future housing growth, being able to deliver a meaningful level of new and affordable housing;
7. Zurich is supportive of GBC’s economic development objectives and the removal of the strategic employment site designation from the Site. GBC’s economic development objectives will deliver a range of employment opportunities in line with GBC development strategy.

Zurich is committed to collaborative working with GBC, its partners, key stakeholders and the local community to ensure the future development of Broadford Business Park comes forward in a timely manner and in the early part of the plan period.

Refer to attached reports for evidence why our client considers that Broadford Business Park should be re-instated as a residential site allocation, as per draft Policy A34.
6.1 The NPPF states that the purpose of planning is to help achieve sustainable development. Paragraph 7 states that there are three dimensions to sustainable development, comprising economic, social and environmental roles. Paragraph 8 emphasises the need for the planning system to balance these different dimensions.

6.2 The fundamental premise of the NPPF is a presumption in favour of sustainable development and Paragraph 14 states that this should be seen as a golden thread running through both plan-making and decision-taking.

6.3 As previously accepted when GBC allocated Broadford Business Park for residential development, the Site complies with the definition of Sustainable Development as described in the NPPF. A residential development would be economically, socially and environmentally sustainable, and critically it would provide much needed housing, thus contributing to GBC’s 5YHLS.

6.4 Table 4 summarises how the proposals for Broadford Business Park comply with the definition of Sustainable Development as described in the NPPF.

[Table 4]

Case for maintaining the residential site allocation

6.5 As set out in Sections 1.0 and 4.0 of these representations, Zurich objects to the designation of Broadford Business Park as a LSES, and maintains the view that a residential development is the most appropriate use for the Site.

6.6 The Site is previously developed land in the Green Belt, and in view of the lack of suitable sites within Guildford’s urban areas and villages, the release of additional sites in the Green Belt and surrounding countryside is required. Broadford Business Park provides an opportunity to contribute towards GBC’s housing needs with a negligible impact on the openness of the Green Belt and the purposes of including land within it.

6.7 As identified by the redacted policy A34 set out in Table 5, GBC previously considered the site to be a deliverable residential site, with capacity for up to 100 homes.

[Table 4]

6.8 This draft policy was supported by the Land Availability Assessment (2016). Consistent with the deliverability tests described at footnote 11 to paragraph 47 of the NPPF, the 2016 LAA considers the suitability, availability and achievability of new development sites. In relation to Broadford Business Park (ref. 2186) the 2016 LAA stated:

“This site is most suited for residential development, to provide new homes to meet the identified need.”

6.9 It was also noted that development could take place from 2018, with the delivery phased in accordance with the building leases set out in Table 2.

Evidence previously submitted in support of residential development

6.10 Zurich supported previous residential allocation as part of their representations submitted in response to the previous Regulation 19 consultation in July 2016. The representations were accompanied by the following technical reports to demonstrate that the Site is free from insurmountable constraint and meets deliverability tests referred to in paragraph 47 of the NPPF.

• Design Statement – This included an illustrative masterplan to highlight the residential opportunities for the Site and demonstrate that the Site had capacity for 100 dwellings;

• Commercial Refurbishment Viability Report (since updated) – This set out why the continued employment use of the Site was no longer viable, including reference to the Sites condition and demand for such employment floorspace;

• Flood Risk Advice Letter (since updated) – This set out clearly the potential risk from flooding and identified what mitigation measures could be employed to both prevent flooding on site and improve the local flood risk levels generally;
Landscape and Visual Commentary – This highlighted that a residential development would present opportunities to improve the visual impact of the Site on the Green Belt and the wider landscape; and

Transport Note – This acknowledged the transport impact of the existing employment use and concluded that the level of traffic likely to be generated by a residential use would be similar to the existing use.

6.11 Since the 2016 GBLP consultation, there have been no material developments which would alter the conclusions of these reports, or the assessment of the Site contained within the 2016 LAA (ref. 2186).

6.12 An updated Commercial Viability Report, as discussed in Section 4.0, and Flood Risk - Sequential Test Assessment have been prepared in response to the updated evidence base that accompanies the latest consultation on the emerging GBLP to demonstrate the planning case for a residential development remains.

Commercial viability

6.13 The updated CVR (and associated financial appraisals) considers the following:

• Whether the existing buildings are suitable for refurbishment or whether they have reached the end of their economic life.
• Whether redevelopment of the site for employment use is economically viable.
• Whether there is a need for this current space within the Borough for employment purposes or whether there are better suited locations.

6.14 The report advises that the existing buildings are failing and the considerable cost of their refurbishment is not a viable option for a developer. It also confirms that alternate employment uses on the site as part of a redevelopment proposal would be unviable and, in any event, the site is not best placed for such a use in terms of location or demand. Its concluding remark is:

“Refurbishment of the existing office stock or the redevelopment of the site with a new office scheme will not offer a viable proposition for developers or investors. If the Property were to be brought to the market in its current form we are of the opinion that demand will be from residential developers.”

6.15 A detailed assessment of the CVR is provided in Section 4.0 of these representations.

Flood risk sequential test

6.16 As previously noted, the Site lies partly within Flood Zone 1, 2 and 3. When considering the flood risk implications of new development in areas prone to flooding, the PPG states that:

“A local planning authority should demonstrate through evidence that it has considered a range of options in the site allocation process, using the Strategic Flood Risk Assessment to apply the Sequential Test and the Exception Test where necessary. This can be undertaken directly or, ideally, as part of the sustainability appraisal. Where other sustainability criteria outweigh flood risk issues, the decision making process should be transparent with reasoned justifications for any decision to allocate land in areas at high flood risk in the sustainability appraisal report. The Sequential Test can also be demonstrated in a free-standing document, or as part of strategic housing land or employment land availability assessments”[14].

6.17 Zurich have noted that GBC have not included an updated Flood Risk Sequential Test as part of the updated evidence base for the GBLP. Therefore, in order to give GBC comfort that the Site would continue comply with the sequential test requirements.

6.18 WSP’s assessment demonstrates that the Site is sequentially better than the alternative sites and that there is no requirement for the Exception Test to be considered at this stage. The site should therefore be allocated for residential use.
6.19 Notwithstanding this, Zurich would recommend that GBC updates its Flood Risk Sequential Test prior to submission of the GBLP for examination in order to ensure the evidence base is robust.

**Deliverability of residential proposals**

6.20 Zurich is committed to ensuring the optimal amount of new homes are delivered on the Site in order to provide a meaningful contribution to the GBC’s housing needs, including the unmet housing need from Woking Borough Council, at an early stage within the plan period. The Site continues to be free from insurmountable constraint, including passing any updated flood risk sequential test should look to undertake.

6.21 As explained in Section 2.0 of these representations, the Site is wholly within the single freehold ownership of Zurich. The majority of the Site will be available for redevelopment by 2019 through vacant procession, with Bishopsgate House available to be included as a second phase by 2022 (still within the first five years of the plan). As a result of the progress in the preparation of the Local Plan being delayed, the site would now available for development within the first 5 years of the plan period, which will provide a meaningful contribution to the borough’s short term and urgent housing needs and as well as GBC’s unfulfilled 5YHLS.

6.22 Zurich does not consider that the Site’s circumstances have materially changed since it was found to be suitable and allocated for residential development in 2016. With it having been demonstrated that the designation of the site for employment purposes is unsustainable and the clear evidence showing that residential site allocation is deliverable, Zurich strongly advocates that GBC reconsider the decision to allocate Broadford Business Park for employment use, and recognise the potential of the Site to deliver much needed housing in GBC. Housing which can be delivered in the short term, subject to planning.

7.1 Zurich consider that the GBLP prepared by GBC has adopted an approach that is not ‘positively prepared’, ‘justified’, ‘effective’ or ‘consistent with national policy’. Therefore, the GBLP fails to satisfy the ‘soundness’ tests outlined in paragraph 182 of the NPPF.

7.2 In summary, Zurich’s overall conclusions in responding to the GBLP consultation are as follows:

• Zurich supports GBC’s improve housing delivery in the borough, the current housing target cannot be considered as meeting OAHN in full as required by the NPPF, on the basis that the GBLP currently only seeks to meet the OAHN for Guildford, despite there being an unmet need in WOK;

• Zurich recommends that GBC should proactively seek to meet full OAHN by reconsidering those sites removed as part of LAA2 in order to meet this unmet need and improve affordability in the borough;

• The existing buildings at Broadford Business Park are poor quality and in need of substantial investment, which is unlikely to be forthcoming in view of local market conditions. The current proposal to designate Broadford Business Park as a ‘Locally Significant Employment Site’ is therefore not viable or sustainable in the medium to long term;

• The Site continues to pass the flood risk sequential test required to support the GBLP. Notwithstanding this, GBC should update its flood risk sequential test to be based on the latest list of sites contained within the 2017 LAA2 prior to the GBLP being submitted for examination;

• Site specific technical work supports Zurich’s conclusion that the Site is suitable for release from the Green Belt, and initial development proposals demonstrate that future development would meet the objectives of the GBLP, would be ‘deliverable’ in accordance with footnote 11 of paragraph 47 of the NPPF and would represent a sustainable residential development;

• “Exceptional circumstances” exist to release additional Green Belt sites beyond those currently included within the GBLP, in order to seek to meet full OAN;

• The Site is capable of delivering a meaningful level of new market and affordable housing; and
• The Site is within the single freehold ownership of Zurich with the existing tenant leases due to expire shortly or have break clauses available meaning that any redevelopment for residential purposes could come forward in the first five years of the plan.

7.3 GBC acknowledge that there is an acute shortage of housing in the borough that makes the borough one of the most unaffordable places to live in the UK. These representations have demonstrated that the Site is not a suitable location for employment uses and refurbishing/replacing the existing buildings to an acceptable standard is not a viable proposition, thereby meaning the Site would be likely to become derelict. When weighed against the chronic housing shortages in the borough, Zurich consider that the need for housing clearly outweighs protecting the Site as an unviable employment location.

7.4 Therefore, in order for GBC to be able to meet its full OAN, or increase its ability to do so, the list of site allocations should be amended to, at the very least, include sites that were included in the previous version of the GBLP consulted upon in June/July 2016. Similarly, Zurich strongly believes Policy A34 should be reinstated, with Broadford Business Park allocated for residential use to meet the identified housing need.

7.5 Zurich would welcome an opportunity to discuss our findings in more detail with the Council’s officers and members, prior to the GBLP being finalised and submitted to the Secretary of State, in seeking to resolve the objections and ensure that the plan can subsequently be found sound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Re-instate Broadford Business Park as a residential site allocation as per draft Policy A34.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to removal of brownfield sites A4 and A34. The council has not adopted a ‘brownfield first’ approach.

I therefore strongly object to all proposed development A34, A43, A58, A42 on the grounds that the area will be grossly overcrowded causing urban sprawl. The roads are already at maximum capacity. One small breakdown occurrence in area causes vast traffic jams. I also object to the fact that the Guildford Borough Council ignored the thousands of objections from the Send/Ripley area and instead increased the allocation of housing etc.

It is wrong in principle to remove Brownfield sites (A4 and A34) from the Plan. To comply with national guidelines, such sites should be developed first before consideration is given to greenfield sites.

1. I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.
1. I object to removal of Brownfield site (A34) from the Plan

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

I object to the large proposed development at 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

I object to the proposed development of the Wisley site and am astonished that GBC has even considered including the site in the Local Plan, especially since planning has already been refused. Whilst I agree that the Wisley developers have included much needed extra infrastructure, the whole plan completely fails on the traffic issue. Our local roads are already very congested and the roads around the M25 and A3 junctions are mostly chaotic. It would be absolute madness for GBC to consider this plan unless it was for a very small number of houses which did not create the risk of further traffic chaos. Under no circumstances can this site be considered without careful and close discussion with local Wisley and Ockham residents, in particular.

On Policy A35 about the proposed Wisley development, I strongly believe that it is still irresponsible to consider the high number of 2,000 houses. Whilst I am delighted about the infrastructure that the scheme would provide, the benefit of this is totally outweighed by the extreme traffic problems that this scheme would cause. One of you officers told me that there would be a bus every 15 minutes to reach East Horsley and its station. This was put forward as a solution for the traffic chaos but firstly the frequency and size of buses in our narrow lanes would be appalling and secondly the lack of frequency of use of buses in our area would not solve the problem. Whilst your latest plan does cover collaboration with National Highways to find smooth flow through the Wisley roundabout and onto the A£/M25, I really do not believe that
your team understand what chaos there is on those roads at many times of day. In order to have an acceptable solution, a really massive investment would be needed. I generally support the concept of using Wisley for a good number of houses but believe that the acceptable number may be nearer to 1,000. I know that this may not be enough houses for the developers to provide their proposed infrastructure but let us remember that this would not just be for the benefit of new Wisley residents. All local residents will need this infrastructure before other houses in the Horsleys are built. I suggest employing a special expert to examine and advise on what is really practicable.

Although their planning application was refused, the developers continue to promote their proposed sustainable development “based on Garden City principles”. In my opinion this site will not deliver the concept successfully. As each phase of the development is completed the residents will find their promised quality of life degraded by the increasing frustrations of daily travel.

Being a popular London commuter area I would expect any major new development in the borough to have easy access to a railway station that is able to provide a service capable of handling a large increase in passenger numbers; only suburban stopping services are provided from the two nearest stations and peak time trains into the capital are already over capacity; the operators, South West Trains, have seen passenger numbers more than double in the 20 years that they have held the franchise and are currently running the maximum number of trains possible; there is no mention of the impact on rail services in the IDP.

The rural area means that many workplaces and schools will not be covered by any public transport offering so the car will be the only satisfactory method of transport. Although employment opportunities are proposed, the percentage of residents that will be employed there is difficult to predict and it is likely that a significant number of workers would commute from other districts by car. There will be a vast increase in traffic volumes in the villages, the promised significant bus network adding to the problem, gridlocked rush hour roads are inevitable. Many of the sustainable transport suggestions will remain unsuitable for safety reasons or will simply be incompatible with the busy lives of working families.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The Planning Department recommended refusal and the Planning Committee unanimously refused permission on 6th April 2016 for an Application for building 2068 houses and other aspects of the large development on the Former Wisley Airfield. After 14 months of negotiations by the developer in response to widespread serious objections raised by authoritative sources, including Highways England, Thames Water, NATS and the Environment Agency, resolutions could not be found. Since it has been established that there are sufficient brownfield sites and land not in the Green Belt available in the Borough, it cannot be argued that there are exceptional circumstances to justify taking the site 35 out of the Green Belt. I object to Site 35 being taken out of the Green Belt.

I am disappointed that my previous objections to the draft local plan have not been reflected in the latest draft. Please confirm that all of these comments together with all my previous comments are passed to the Inspector.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

1. No effort has been made to demonstrate exceptional circumstances for the removal of any land from the Green Belt. I object that the green belt has been preferred over brownfield land in the urban area without taking notice of the response to previous consultations.
2. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.
3. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.
4. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
5. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
6. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
7. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
8. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
9. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
10. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
11. It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
12. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design”
13. Opportunity (3) should be common to all sites and is not unique to this site
14. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.
15. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will increase the negative impact of the views from the AONB.
16. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
17. I object to the removal of additional 3.1 ha to be removed from the green belt without any justification
18. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
19. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
20. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
21. I object to the fact that the council has failed to remove this site from the local plan despite receiving many thousands of objections from local residents and statutory consultees in two full consultations.
22. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
23. The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.
24. I object to the Council wasting tax payers and residents’ time and money not following due process and in particular ignoring previous representations.
25. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
26. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
27. I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.
28. I object to the Housing number which is unsound and open to legal challenge.
29. I object to the disregard for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.
30. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

Proposed local plan (June 2016) and to continued inclusion in the plan of former Wisley Airfield, now known as three farms meadows. Allocations A35 – for the phased development of new settlement of up to 2100 dwellings.

I object to the above plan for many important reasons.

1. I object to the removal of (FWA/TFM) from the green belt. This serves a vital road in stopping urban sprawl from London
2. I object to the disproportionate allocation of houses in this particular part of the borough. It is not the right area for such developments because of the infrastructure.
3. I vehemently object to the ruining of a historical rural village namely Ockham. It is just not suitable for large amounts of traffic which would be needed to contain all these houses. There are very narrow lanes which flood when under a lot of rain. No street lights and all these this would be a blight on a very lovely village representing English heritage, also included are many listed houses.
4. I object because these roads will be hazardous to cyclists and pedestrians alike
5. I object also on the grounds of air pollution which I gather is already very high in the area.

**Former Wisley Airfield**

The Wisley new settlement proposal is contrary to relevant legal provisions and NPPF guidance. It should not form part of the delayed Local Plan when adopted.

In summary, this is because:

**General evidence base is inadequate to support the proposal**

- There is no proportionate evidence base to support such a large and poorly located major allocation which has emerged very late in the LDF. Quite apart from the specific legal deficiencies in the plan-making process relating to this proposed major new settlement (see below), the information provided as the basis for the new settlement proposal is inadequate and at times inconsistent with the guidance and information contained or referred to in the evidence base.

- For example, the application of the "critical mass population of 4000" in section 24 of Volume V of the Green Belt Study (April 2014) does not appear to be justified by the reference works and guidance listed in paragraph 6 of that Volume and it is not justified in relevant paragraphs of the NPPF.

- Appendix B to the Interim SA Report (August 2014) is extremely difficult to read and/or understand. It is illegible unless printed on a scale too large for A3 printers and the electronic version is difficult to read. This appendix should also be supplemented by fuller narrative text to explain and justify the conclusions pithily reflected in the detailed appraisals. It also needs to be expanded to look at possible options on other sites within the relevant settlements that could be sustainably redeveloped to provide the homes and facilities needed.

- Volume V of the Green Belt Study appears to have been prepared on the basis of justifying the Wisley new settlement proposal rather than providing an objective comparison of the green belt impacts of this proposal compared to other more sustainable green belt releases in areas which have existing services and The unexplained application of "critical mass population of 4000" as a cap for this purpose (see above) may be related to the desire to promote the Wisley new settlement instead of the expansion of more sustainable locations in the larger villages.

- Despite the remaining runway and hardstanding areas, the former Wisley airfield site provides a large and tranquil area of countryside, with a network of public access routes, both within and around it, to enable it to be enjoyed by wildlife and the public and affording satisfying public views across the surrounding countryside as well as attractive natural features on the site. The following photographs show views within the Wisley and Ockham Commons area (immediately to the north of the proposed new settlement site) and across the proposed Wisley new settlement. It takes little imagination to see that, even with the proposed SANG, the openness and natural tranquillity of this essentially rural area will be dramatically harmed by the proposed new settlement. (Image 1) (Image 2)

- There are no visual assessments or ecological assessments providing a sound basis for such a radical and unsustainable development proposal.

- There is also no clear evidence in the LDF evidence base to demonstrate that sustainable delivery of the proposed new settlement will be viable or that the timescales within which the necessary public transport and other infrastructure needed to make the new settlement sustainable (if that is even remotely possible) will be deliverable. The unsubstantiated claims to sustainability and the timescales set out in the site schedule for this site and the related evidence base lack credibility, bearing in mind that this is a privately-owned site with no direct rail connection, no existing services or community infrastructure and no meaningful programme for its funding and This is a long way from meeting the principles identified in the studies and guidance referred to in paragraph 21.6 of Volume V to the Green Belt study, as the following quotations illustrate:
"Securing transport links that are public - rather than private transport-based will clearly be a major factor in ensuring that such places advance the cause of reduced carbon emissions."

"It hardly needs stating that excellent public transport is essential to a networked cluster".

- It is also a long way from fulfilling the Core Principles set out in paragraph 17 and paragraphs 29-39 of the NPPF.

- The case studies cited in the Volume V of the Green Belt study show that transport issues have arisen where settlements identified for growth did not have existing access to public transport. The former Wisley airfield site does not adhere to the well-known "beads-on-a-string" concept of growth in the south-east and the London hinterland. However, in contrast with the Wisley new settlement proposal, the expansion of other settlements in the district, including Horsley and Effingham, could function very effectively as networked growth areas in accordance with that concept and with strong sustainable transport links to Guildford, London and other centres of employment, facilities and community services. The rejected draft Guildford Local Plan (due to be re-written after the election in May 2015) and the related evidence base did not appear to have examined properly the opportunities for linked settlements with a "connecting thread of public transport".

- The information presently contained in the LDF evidence base lacks the detail and clarity needed to enable sound comparisons of the impacts and sustainability of the options being considered across a range of This means that local communities are being denied a genuine opportunity to participate on an informed basis in the plan-making process.

- All potential belt releases require properly detailed quantitative and qualitative information to enable sound decisions to be made as to what is the best opportunity for providing sustainable development in the district. Such assessments should be made objectively and on a consistent basis, having proper regard to the principles of sustainability. It is impossible to see how the Wisley new settlement proposal can be justified on the basis of such an approach and there is currently no reliable or proportionate evidence base to justify it or (equally important) to justify rejecting alternative potential allocations in more sustainable locations in favour of the Wisley new settlement proposal.

- There has not been an adequate appropriate assessment in accordance with the Habitats Directive to show that there will be no significant impact on the ecological integrity of the important European Site which is located immediately to the north of the proposed new settlement, albeit with an area of SANG proposed as a buffer.

"Appropriate assessment required at project level to consider impact on the Thames Basin Heath Special Protection Area (SPA) and Environmental Impact Assessment to consider impact on the Site of Nature Conservation Interest".

- A similar statement appears in Table 6 ("HRA Screening of Guildford Site Allocations") on page 45 of the HRA (July 2014).

- These are clear acknowledgements that the proposed new settlement is likely to have significant impacts on the important protected ecological assets in this SPA and that they have not yet been properly. This is an issue that should be properly addressed in an appropriate assessment under the Habitats Directive and a strategic assessment under the SEA Directive before the Local Plan is adopted rather than at the subsequent project stage. This major allocation (and therefore the Local Plan as a whole) cannot be considered to be legally compliant or sound unless and until this has been properly undertaken.

- The proposed new settlement will include development for uses other than residential. In accordance with the specific terms of the Thames Basin Heathlands Special Protection Area Avoidance Strategy 2009 - 2014, the other uses contemplated in this proposed allocation for a mixed use new settlement is not "exempt" from the need for an appropriate assessment, even if such an exemption could conceivably be claimed for a 2500 residential development on a land so close to the SPA (which is highly doubtful).

- The mix of uses proposed on the site, together with the necessary infrastructure works (on-site and off-site) are likely to have significant impacts on the ecology and wildlife in and around the site, with direct and indirect effects on the ecological integrity of the SPA and its ecological...
• For example, the country lanes that would serve the proposed Wisley new settlement are already dangerous for pedestrians and cyclists to use -the widening and other "urbanising" works needed to make them safe (as a means of sustainably accessing good public transport and other facilities in Guildford, Effingham, Horsley and other existing settlements) will have serious impacts on habitats, as well as in terms of "urban" encroachment into the countryside, with the likely loss of hedgerows and woodland as well as other valuable habitats and open There is no sign that such impacts have been meaningfully addressed in the Interim Sustainability Appraisal Report (August 2014) or in the HRA (July 2014) or in the Green Belt Study (April 2014).

• The proposed new settlement will occupy land and habitats that are likely to be functionally related to the European Site (which also comprises the SSSI) and the species it supports. Such impacts must be assessed before any such allocation could be promoted. On the basis of the current information in the evidence base there can be little doubt that the proposed new settlement may cause significant ecological harm to these internationally valuable habitats and to the Priority species that they support, despite the proposed SANG area which is to address principally the human intrusion impacts on ground-nesting birds. Other aspects of harm have not yet been described or assessed.

• Such harm would not be justified under Article 6 of the Habitats Directive or the UK regulations transposing the Directive into English law, bearing in mind the Annex 1 species and other important flora and fauna identified as being supported by the This attaches a particularly onerous obligation on the LPA in terms of permitting development which might harm the ecological integrity of the site. It is likely that the harm identified in an appropriate assessment will not be capable of being overridden or mitigated to enable the proposed Wisley new settlement to proceed.

Unlawful to allocate without a Sustainability Appraisal, including a proper assessment under the SEA directive and the related UK regulations

• There has not been an adequate Sustainability Appraisal or Strategic Environmental Assessment in accordance with Section 19(3) of the 2004 Act and/or the SEA Directive and/or the 2011 SEA Regulations.

• For example, the ecological impacts referred to in the preceding section are likely significant impacts in their own right and the failure to carry out an SEA on the project (including an appropriate assessment) would undermine the lawfulness of the Local Plan on that ground alone.

• In addition, there are other likely significant impacts of the Wisley new settlement proposal, as generically identified within the SA scoping report, which have not been assessed in any systematic and comprehensive Environmental Report for the purposes of the SEA Regulations.

• This appears to be the result of a last-minute retro-fit of this major and anomalous If the LPA wishes to pursue this development proposal further then the SEA and Sustainability Appraisal of all proposed allocations should be re-visited so as to ensure that an objective and unbiased assessment of all reasonable options is taken before the forthcoming draft Local Plan is adopted. For example, the provision of significantly increased services and facilities is presumed not to be practicable or deliverable in the context of the larger villages identified for growth in the Settlement Hierarchy, whereas in relation to the Wisley new settlement proposal their provision is presumed to be viable and deliverable with minimal (if any) economic or viability appraisal or programming.

• The question of whether sustainable transport objectives will be fulfilled has not been properly assessed or Judged by the SA objectives relating to sustainable transport and climate change, this proposal for a new settlement should be rejected because the site is remote from public transport facilities and the level of services and facilities needed to encourage sustainable transport choices. It is unlikely to be other than a highly car-dependent development. The level of development proposed will inevitably generate large numbers of car trips which will use the rural roads in this area which are not adapted for safe pedestrian or cycle trips. There has been no attempt to describe or assess these proposals (or the necessary mitigation measures and the likely impacts of such measures) in the context of these important policies or to compare these impacts with the benefits and impacts of reasonable alternatives which are better located to avoid or mitigate such impacts, including expansion of the existing urban areas or the larger villages or sustainable networks of settlements.

• Recent studies by Surrey County Council and Guildford Borough Council in relation to traffic congestion and air quality point to the inappropriateness of the proposed allocation of a new settlement close to an already heavily congested trunk road and junction (M25/A3 Junction 10) and in a location which is unlikely to encourage sustainable travel Such studies add to the strategic importance of ensuring that Guildford's growth is
capable of being achieved on the basis of a sustainable transport strategy rather than encouraging a large-scale, car-dependent scheme such as the proposed Wisley new settlement.

- The last minute and superficial assessments in the Interim SAR (August 2014), the HRA (July 2014) and Sections 22 to 24 of Volume V of the Pegasus Green Belt Study (April 2014) are inadequate and provide scant justification (if any) for the harm to the green belt and environment that will inevitably be caused in this attractive and environmentally valuable part of the green belt. Whilst the site undeniably bears the signs of its past airfield use, the remaining structures are almost all surface level (runways and hard-standing areas) with virtually no above-ground built structures or other features which undermine or harm the openness of the green belt. There are also clear signs of the runways being "naturalised" over time by vegetation and the rural character and beauty of the areas around site is predominant.

National Planning Policy Framework (NPPF) and the importance of community engagement

- There is clearly massive community opposition to the proposed allocation of the former Wisley airfield as a new settlement and such opposition is based on sound sustainable planning principles.

- The Habitats and SEA Directives (and the regulations transposing them into English law) require such assessments to be carried out and to be properly consulted upon (including public consultation as well as with the relevant statutory bodies) before the relevant plans and programmes are Failure to do so is unlawful.

- Paragraphs 165 - 167 of the NPPF also require these matters to be dealt with in the plan preparation process and it is clearly inappropriate to promote a major new settlement before the necessary assessment, appraisal and consultation procedures have been completed and consulted upon.

- Reference is made above to the lack of transparency and consistency of approach in the site appraisals at Appendix B to the Interim SAR report (August 2014). Also to the unjustified "cap" on the critical mass level when evaluating the potential for expansion of larger villages which, in contrast with Wisley airfield do have good public transport connections and significant physical and community. It is unclear why other sites within such larger villages (other than those specifically promoted in the plan) are not considered as "reasonable alternatives" for the purposes of the Interim SAR, including sites which might be available for sustainable development if the Horsley inset map were to extend up to the corner of Long Reach and Green Lane (and other possible extensions of the inset boundary). There are likely to be other opportunities for sustainable development in Horsley and other larger villages as reasonable and more sustainable options than the Wisley new settlement proposal.

- Failure to consider and consult upon these reasonable alternatives undermines the LPA's promotion of the Wisley new settlement proposal, in the light of the following guidance in paragraph 52 of the NPPF:

> "The supply of new homes can sometimes be best achieved through planning for larger scale development, such as new settlements or extensions to existing villages and towns that follow the principles of Garden Cities. Working with the support of their communities, local planning authorities should consider whether such opportunities provide the best way of achieving sustainable development."

Summary and Conclusion

The LPA should abandon the proposed Wisley new settlement allocation and refuse permission for this application because:

- It has not been properly assessed in accordance with Section 19(5) of the 2004 Act and/or the Habitats Directive and/or SEA Directive and/or paragraph 165-167 of the NPPF and the relevant regulations as referred to above;

- It is in an unsustainable location which is likely to result in a very large car-dependent community causing serious harmful impacts on road safety (particularly pedestrians and cyclists using the rural lanes around the site), traffic congestion and air quality;

- Its proximity to the SPA, SSSI and SNCI and the scale and character of the proposed mixed-use development will seriously harm the ecological value of these important sites and other valuable ecological assets in the area;
• The large-scale development of this attractive, large and tranquil part of the green belt will be inconsistent with
the objectives of green belt policy and will harm the public interest in maintaining and enhancing the
valuable network of public ways and routes through and around the site and the attractive countryside views
and experiences they provide.

In the light of this, the LPA should seriously reconsider drawing village inset boundaries and making additional
residential and other allocations to provide for sustainable development in larger villages and settlements which will:

1. encourage sustainable transport choices, including walking, cycling and public transport;
2. strengthen the well-located larger villages to achieve "critical mass" populations of 4000-5000 (or sustainable
networks of larger villages and settlement) in accordance with the guidance and studies referred to in paragraph
6 of the Green Belt Study (April 2014) to enable them to sustain and increase the quality and range of services
and community facilities that they could provide and in the interest of a better environment and the well-being
of the communities that live there; and
3. allocate suitable sites for development within and on the edges of such settlements so as to enable such
settlements to be master planned to ensure that high quality and integrated designs produce developments to
improve the overall quality of the settlements and the well-being of the communities living there, whilst
properly protecting the landscapes and rural environments in which they exist.

I trust that these representations will be of assistance to the Local Plan consultation process.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

We object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. We object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. This land has been farmed for many years and is good quality farmland.

3. We object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. We object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC). The local infrastructure simply cannot support additional traffic and required facilities.

5. We object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. We object to the detrimental impact on transport, local roads and road safety, and specifically object to:

a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. There is no parking elsewhere near the stations.

7. We object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. We object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. We object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. We object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to the Guildford Borough Council Draft Local Plan (June 2016) and in particular to inclusion in the plan of Site Allocation A35 - the former Wisley Airfield - for a new settlement with 2,000 dwellings,

The Trust writes to object to aspects of the draft Local Plan.

The Trust has approximately 1,100 members, some from within the Borough of Guildford including Ockham. Most of that membership that resides in the Cobham area uses the resources of the Borough of Guildford, including the villages and the countryside for recreational purposes. The Trust submitted objections to applications relating to the Former Wisley Airfield site numbered 13/P/02165, 14/P/01664 and 15/P/00012, all of which were refused. It also filed comments on the draft Local Plan submitted for consultation in 2014, when it objected to the inclusion of the former Wisley Airfield site for consideration for development. That draft was subsequently withdrawn and the Trust is concerned that the large number of objections to that may not be replicated here because of the frequency that these have had to be made in the planning process.

While, therefore, the majority of our members may not live in the Borough of Guildford they have a greater interest in much of what goes into the Guildford Local Plan for their local area than those living on the far side of the borough.

The draft Local Plan now submitted for consultation has many of the flaws that were in the previous draft. In this response the Trust has felt that it should lead on and give most attention to the Plan’s approach to the Green Belt and inclusion of the former Wisley Airfield site (Policy A35).

The site of the former Wisley Airfield

The Trust does in particular object to the inclusion in the draft Local Plan of Policy A35 relating to the site of the former Wisley Airfield and surrounding area and involving 2000 dwellings, and other building. It is said that the evidence for need for this is in the SHMA being used.

The size of the development that might be achieved at the site actually makes it unsustainable.

The Trust points to the South East Regional Plan not being revoked as to preventing new residential development close to the Thames Basin SPA, part of which lies just north of the site.

This is a much loved open area by those living in the south of Elmbridge that is Hatchford, Downside, Cobham and Stoke D’Abernon. The proposal for 2000 dwellings is not sustainable for many reasons. The site is in some beautiful countryside that would be devastated by the development. It is too close to the SPA and would result in the destruction of the Site of Nature Conservation Interest (SNCI). Proposals for this housing resulted in the unanimous refusal of application no.15/P/00012 which showed that it would have been delivered by apartment blocks up to 5 storeys, alien to the area and with a density higher than most London boroughs. Openness and important views would be marred from a number of directions including that from Painshill Park Landscape Gardens

The proposals for 2000 dwellings with other buildings, involving the introduction of some 5,000 new residents, are not sustainable for many reasons. To place them in context as to the increase in population, it would result in an increase of the equivalent of 50% of the population of nearby Cobham, having a significant adverse effect on the infrastructure of the southern part of the Borough of Elmbridge as well as the northern part of the Borough of Guildford. There would be significant wider effects on strategic infrastructure not only in Guildford but also Elmbridge, Mole Valley, Woking and further afield

A settlement here would create, on presently open country, a line of building that would start to merge settlements to become the urban sprawl that the Green Belt exists to prevent.

Green Belt
The site is entirely in the Green Belt. It was not contemplated for development for the existing Guildford Borough Council Local Plan 2003 or the South East Regional Plan. The Green Belt was established by and is protected by Acts of Parliament.

The starting point for consideration of taking any site out of the Green Belt is Paragraph 83 of the NPPF which confirmed that Green Belt boundaries can only be altered in exceptional circumstances through the preparation of the Local Plan. The only exceptional circumstance suggested in the draft Local Plan is the pressure to build more dwellings and that arises from flawed housing target figures. The proposed development would clearly impact negatively on the openness of the Green Belt and would be considered inappropriate development within the Green Belt under paragraph 87 of the NPPF. Inappropriate development is by definition harmful to the Green Belt and should not be approved except in very special circumstances. Under paragraph 89 those very special circumstances will not exist unless the potential harm to the Green Belt is clearly outweighed by other considerations. The proposals for development at the site clearly fail at these hurdles.

There have been assurances by the government that unmet housing need, even if provable, is unlikely to outweigh the harm to the Green Belt and constitute exceptional circumstance (Ministerial Statement on the 17 January 2014 and letter from Brandon Lewis mentioned above).

There has been a tendency to portray this site as if it were a previously developed brownfield site (including emphasis on the remnant of the old runway) and it is worth noting that the runway and hardstanding are but a small part of the site. If the hard-core that is the runway were not to be removed for whatever reason such as viability, in due course, like the remains of many such sites in other parts of the country or the world, the runway would eventually disintegrate and return to agricultural land or nature, as was promised when it was requisitioned during the last world war. The vast majority of the site is good quality agricultural land recently advertised by the owners as Grade 3 and being arable land that has been farmed for many years.

Wildlife

The Trust is very concerned about protecting, and indeed expanding, Special Protection Areas (SPAs) and Sites of Special Scientific interest (SSSIs). The Trust supports the position of Natural England and the Campaign to Protect Rural England (CPRE) that studies show the need for the Green Belt to be protected as an integral component of England's ecological network and the additional views of the RSPB as to protection of biodiversity. While there may be scope for a developer to suggest Suitable Alternative Natural Green Spaces (SANGs) in an area, it is impractical to find any sufficient such sites in the borough or adjoining boroughs that are not already protected in some way. Already agricultural or wooded land should not be used as recreation land in order to justify building on other green spaces nearby.

In the application no. 15/P/00012 the applicants sought to include an onsite SANG in supposed mitigation. That was illogical as it would create an additional multi space car park and would only have increased visitor numbers to the nearby SPA rather than draw them away.

The introduction of residences would mean the import into an ecologically sensitive area not only of humans, and increase in their footfall, but also of pets. Studies of the effect of dogs and cats in particular have shown just what a devastating effect this would have on wildlife. There is no answer to the effect of the introduction of humans and of pets would have on wildlife and wildlife corridors and damage to habitats of the protected and endangered rare species in contravention of the EU Birds Directives and Habitats Regulations.

Local Roads and transport

Looking at how the proposal to have a settlement of 2000 at the site would impact on transport, there would still need to be reliance on vehicles for work and other needs and for delivery. It would be impossible to provide enough jobs for residents in the area of the development which would result in a substantial increase of traffic on the local road network. This suggested site for development is far removed from local stations and has no existing access to public transport. It is unrealistic to assume that residents will not rely on the private car and reliance on private car or buses cannot meet requirements for a low carbon, sustainable economy. It is impossible to provide safe walking and cycling routes to the nearest station particularly in winter as the surrounding lanes are narrow and unlit. Further, public transport would itself
be limited by the weight restrictions imposed on surrounding roads which are narrow and unsuitable for Public Service Vehicles.

In application no. 15/P/00012 the applicants incredibly suggested that stations are within easy cycle distance. Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).

Given how main roads (and in particular the M25 and A3) become jammed at various times, adding to the number of motorists, development in this rural area would result in the use of more local roads as rat runs. The Trust would be particularly concerned for the additional traffic on the very narrow and winding Ockham Lane and Plough Lane locally.

Cobham is the closest shopping centre to the proposed development. It already serves many from the areas of Ockham, the Horsleys and Effingham with traffic along Horsley Road and Downside Road, Ockham Lane and Plough Lane. Cobham is only 4.5 miles from the proposed development whether one used Old Lane, Horsley Road and Downside Road or the A3 and the A245 - Guildford is by comparison 7.5 miles from the proposed development. The village could not cope with the additional traffic and car parking involved in serving an additional 5,000 residents at the site and would experience a significant increase in traffic from the development. Cobham would experience increased stationary traffic at junctions. Traffic congestion has an impact on health and Cobham High Street is an Air Quality Management Area arising in part from the proximity of the A3 and M25 and there are identifiable health problems already arising from this. To add to the traffic here would exacerbate that.

One of the stations that in application no. 15/P/00012 the applicants claimed would adequately service the increased population (much of which is likely to commute) is Cobham & Stoke D’Abernon (the local rail stations of Effingham and Horsley could not cope). The route to that station is either by way of Downside Road or by way of the A3 and A245. Additional pressure would be placed on parking at this station and overcrowding at peak hours would increase, quite apart from the impact of vehicles using local roads for the purpose of getting there. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

In that application the Trust supported Elmbridge Borough Council’s objections on the grounds that the development would have a significant impact on the highway network.

There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic.

**Air quality**

There would be an increase of around 5,000 residents at the proposed development site with possibly an additional 4,000 vehicles. The air quality surrounding the site of the suggested development already causes concern, for instance levels of NO2 already exceed the EU limit due in part to the proximity of the M25, the A3 and Cobham Services on the M25. Additional traffic would worsen the situation, affecting the health of all current and future residents in the area.

**Summary of objections to this site**

Objection is supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

The only exceptional circumstance that might be advanced, with all other matters were discounted, is housing need. Insofar as that may rely on evidence tendered for that it does not bear any extensive examination and the government has anyway made it clear that housing need alone is not sufficient.
There would be a loss of Green Belt and countryside used for leisure purposes and an immense effect on biodiversity. The development would affect not only the surrounding natural land but add to the danger of losing rare species that need protection.

The land is close to the M25 and A3 junction and would increase the number of vehicles using these busy roads on a daily basis, cause further extensive use of inadequate local roads and cause further pollution. Surrey is very poorly served by public transport and any new residents would be reliant on private transport.

A new settlement here would absorb the hamlet of Ockham. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. There is no realistic account taken of general organic growth and other proposed developments and impact on traffic and infrastructure.

**Objections to the Guildford Borough Council Draft Local Plan (June 2016) and in particular to inclusion in the plan of Site Allocation A35 - the former Wisley Airfield - for a new settlement with 2,000 dwellings,**

The Trust writes to object to aspects of the draft Local Plan.

The Trust has approximately 1,100 members, some from within the Borough of Guildford including Ockham. Most of that membership that resides in the Cobham area uses the resources of the Borough of Guildford, including the villages and the countryside for recreational purposes. The Trust submitted objections to applications relating to the Former Wisley Airfield site numbered 13/P/02165, 14/P/01664 and 15/P/00012, all of which were refused. It also filed comments on the draft Local Plan submitted for consultation in 2014, when it objected to the inclusion of the former Wisley Airfield site for consideration for development. That draft was subsequently withdrawn and the Trust is concerned that the large number of objections to that may not be replicated here because of the frequency that these have had to be made in the planning process.

While, therefore, the majority of our members may not live in the Borough of Guildford they have a greater interest in much of what goes into the Guildford Local Plan for their local area than those living on the far side of the borough.

The draft Local Plan now submitted for consultation has many of the flaws that were in the previous draft. In this response the Trust has felt that it should lead on and give most attention to the Plan’s approach to the Green Belt and inclusion of the former Wisley Airfield site (Policy A35).

**Green Belt - POLICY P2**

The Metropolitan Green Belt covers 89% of the borough. Its existence and retention should be one of the fundamental bases of the Local Plan. Policy P2 does not have any proper assessment of the Green Belt’s value. Building on the Green Belt means a loss of agricultural production, open space, biodiversity, natural heritage, rural views, rural leisure amenities (with benefits to public health and wellbeing as aimed for in paragraph 81 of the National Planning Policy Framework (NPPF)), water catchment and flood control. It also means an increase in air pollution by loss of carbon and particulates being captured by vegetation.
There is insufficient commitment in the draft Local Plan to the permanence of the Green Belt. Surrey County Council have voted unanimously to protect the Green Belt. The draft Local Plan suggests that the Metropolitan Green Belt would be defended but then goes on to propose extensive changes to the Green Belt. The pressure for such proposals comes primarily from flawed housing figures as outlined below and fails to take account of how much more difficult it is to deliver infrastructure to support development outside urban areas. The draft Local Plan looks to impose development where wider consultation could have resulted in acceptance of limited development by communities if it were genuinely for the benefit of local people. The Trust believes there should be more emphasis on the aims of the NPPF and in particular the aim in paragraph 17 of “empowering local people to shape their surroundings”.

With an increase of 13,860 new dwellings suggested during the duration of the Plan, only 2,800 are in urban areas. Urban planning in a number of London boroughs and other authorities provides a good model for urban revival, and in particular in bringing brownfield sites back into play, but many of the planning advances from those areas have not been sufficiently taken into account in the draft Local Plan. The number of homes planned in the urban area is too low – there is a need for regeneration in some areas, but this is ignored and instead the plan concentrates on building homes on green field sites, which does not meet the needs for housing within the town.

The insetting of two thirds of the borough’s rural villages appears to involve the straightening boundary lines rather than considering how the nature of the Green Belt protects countryside. The proposals extend the power of developers out of all proportion to genuine local needs. In any event until such time that the evidence is robust enough to be considered sound, no consideration should be given to changing boundaries of the Green Belt. It should continue to wash over settlements close to Cobham such as the Horsleys, Effingham and Ripley.

It is also noteworthy that the South East Regional Plan, as challenged in 2009, had suggested that development on Green Belt land was to be between West Clandon and Burpham. While not advocating any extensive building on Green Belt land, that area was at least closer to the infrastructure that Guildford town offers than development sites now suggested on Green Belt land.

Research available shows that there should be no need to build on the Green Belt. The Green Belt has saved precious countryside from urban sprawl, saved village life and conserved wildlife. Once any part of it is destroyed it is lost for ever and letting any part go in other than in very exceptional circumstances, risks opening the floodgates for further encroachment. It is owed to succeeding generations to preserve it. There is no justification to build on the Green Belt until all alternatives in the more sustainable urban areas have been used. Insofar as there is a demand for new housing there are brownfield and other sites in and around urban and semi-urban Guildford that must be looked at and used first. Development in those areas would ensure that any new infrastructure required would benefit existing properties.

The Trust considers that all Green Belt development sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Trust makes further points on the Green Belt in dealing with the inclusion of the Former Wisley Airfield as a development site but, in summary, the Local Plan should commit more to uphold Green Belt boundaries and protections.

In the context of considering any alteration of Green Belt boundaries the Trust has had sight of a letter dated 7th June 2016 from Brandon Lewis the Minister of State for Housing and Planning to MPs which states “We have been repeatedly clear that demand for housing alone will not change Green Belt boundaries”.

The site of the former Wisley Airfield

The Trust does in particular object to the inclusion in the draft Local Plan of Policy A35 relating to the site of the former Wisley Airfield and surrounding area and involving 2000 dwellings, and other building. It is said that the evidence for need for this is in the SHMA being used.

The size of the development that might be achieved at the site actually makes it unsustainable.

The Trust points to the South East Regional Plan not being revoked as to preventing new residential development close to the Thames Basin SPA, part of which lies just north of the site.
This is a much loved open area by those living in the south of Elmbridge that is Hatchford, Downside, Cobham and Stoke D’Abernon. The proposal for 2000 dwellings is not sustainable for many reasons. The site is in some beautiful countryside that would be devastated by the development. It is too close to the SPA and would result in the destruction of the Site of Nature Conservation Interest (SNCI). Proposals for this housing resulted in the unanimous refusal of application no.15/P/00012 which showed that it would have been delivered by apartment blocks up to 5 storeys, alien to the area and with a density higher than most London boroughs. Openness and important views would be marred from a number of directions including that from Painshill Park Landscape Gardens

The proposals for 2000 dwellings with other buildings, involving the introduction of some 5,000 new residents, are not sustainable for many reasons. To place them in context as to the increase in population, it would result in an increase of the equivalent of 50% of the population of nearby Cobham, having a significant adverse effect on the infrastructure of the southern part of the Borough of Elmbridge as well as the northern part of the Borough of Guildford. There would be significant wider effects on strategic infrastructure not only in Guildford but also Elmbridge, Mole Valley, Woking and further afield

A settlement here would create, on presently open country, a line of building that would start to merge settlements to become the urban sprawl that the Green Belt exists to prevent.

**Green Belt**

The site is entirely in the Green Belt. It was not contemplated for development for the existing Guildford Borough Council Local Plan 2003 or the South East Regional Plan. The Green Belt was established by and is protected by Acts of Parliament.

The starting point for consideration of taking any site out of the Green Belt is Paragraph 83 of the NPPF which confirmed that Green Belt boundaries can only be altered in exceptional circumstances through the preparation of the Local Plan. The only exceptional circumstance suggested in the draft Local Plan is the pressure to build more dwellings and that arises from flawed housing target figures. The proposed development would clearly impact negatively on the openness of the Green Belt and would be considered inappropriate development within the Green Belt under paragraph 87 of the NPPF. Inappropriate development is by definition harmful to the Green Belt and should not be approved except in very special circumstances. Under paragraph 89 those very special circumstances will not exist unless the potential harm to the Green Belt, is clearly outweighed by other considerations. The proposals for development at the site clearly fail at these hurdles.

There have been assurances by the government that unmet housing need, even if provable, is unlikely to outweigh the harm to the Green Belt and constitute exceptional circumstance (Ministerial Statement on the 17 January 2014 and letter from Brandon Lewis mentioned above).

There has been a tendency to portray this site as if it were a previously developed brownfield site (including emphasis on the remnant of the old runway) and it is worth noting that the runway and hardstanding are but a small part of the site. If the hard-core that is the runway were not to be removed for whatever reason such as viability, in due course, like the remains of many such sites in other parts of the country or the world, the runway would eventually disintegrate and return to agricultural land or nature, as was promised when it was requisitioned during the last world war. The vast majority of the site is good quality agricultural land recently advertised by the owners as Grade 3 and being arable land that has been farmed for many years.

**Wildlife**

The Trust is very concerned about protecting, and indeed expanding, Special Protection Areas (SPAs) and Sites of Special Scientific interest (SSSIs). The Trust supports the position of Natural England and the Campaign to Protect Rural England (CPRE) that studies show the need for the Green Belt to be protected as an integral component of England's ecological network and the additional views of the RSPB as to protection of biodiversity. While there may be scope for a developer to suggest Suitable Alternative Natural Green Spaces (SANGs) in an area, it is impractical to find any
sufficient such sites in the borough or adjoining boroughs that are not already protected in some way. Already
agricultural or wooded land should not be used as recreation land in order to justify building on other green spaces
nearby.

In the application no. 15/P/00012 the applicants sought to include an onsite SANG in supposed mitigation. That was
illogical as it would create an additional multi space car park and would only have increased visitor numbers to the
nearby SPA rather than draw them away.

The introduction of residences would mean the import into an ecologically sensitive area not only of humans, and
increase in their footfall, but also of pets. Studies of the effect of dogs and cats in particular have shown just what a
devastating effect this would have on wildlife. There is no answer to the effect of the introduction of humans and of pets
would have on wildlife and wildlife corridors and damage to habitats of the protected and endangered rare species in
contravention of the EU Birds Directives and Habitats Regulations.

Local Roads and transport

Looking at how the proposal to have a settlement of 2000 at the site would impact on transport, there would still need to
be reliance on vehicles for work and other needs and for delivery. It would be impossible to provide enough jobs for
residents in the area of the development which would result in a substantial increase of traffic on the local road network.
This suggested site for development is far removed from local stations and has no existing access to public transport. It is
unrealistic to assume that residents will not rely on the private car and reliance on private car or buses cannot meet
requirements for a low carbon, sustainable economy. It is impossible to provide safe walking and cycling routes to the
nearest station particularly in winter as the surrounding lanes are narrow and unlit. Further, public transport would itself
be limited by the weight restrictions imposed on surrounding roads which are narrow and unsuitable for Public Service
Vehicles.

In application no. 15/P/00012 the applicants incredibly suggested that stations are within easy cycle distance. Due to the
absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development
would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to
cyclists and pedestrians (including those increasingly using local roads for recreational purposes).

Given how main roads (and in particular the M25 and A3) become jammed at various times, adding to the number of
motorists, development in this rural area would result in the use of more local roads as rat runs. The Trust would be
particularly concerned for the additional traffic on the very narrow and winding Ockham Lane and Plough Lane locally.

Cobham is the closest shopping centre to the proposed development. It already serves many from the areas of Ockham,
the Horsleys and Effingham with traffic along Horsley Road and Downside Road, Ockham Lane and Plough Lane.
Cobham is only 4.5 miles from the proposed development whether one used Old Lane, Horsley Road and Downside
Road or the A3 and the A245 - Guildford is by comparison 7.5 miles from the proposed development. The village could
not cope with the additional traffic and car parking involved in serving an additional 5,000 residents at the site and would
experience a significant increase in traffic from the development. Cobham would experience increased stationary traffic
at junctions. Traffic congestion has an impact on health and Cobham High Street is an Air Quality Management Area
arising in part from the proximity of the A3 and M25 and there are identifiable health problems already arising from this.
To add to the traffic here would exacerbate that.

One of the stations that in application no. 15/P/00012 the applicants claimed would adequately service the increased
population (much of which is likely to commute) is Cobham & Stoke D’Abernon (the local rail stations of Effingham and
Horsley could not cope). The route to that station is either by way of Downside Road or by way of the A3 and A245.
Additional pressure would be placed on parking at this station and overcrowding at peak hours would increase, quite
apart from the impact of vehicles using local roads for the purpose of getting there. In the refused planning application
there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north
at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

In that application the Trust supported Elmbridge Borough Council’s objections on the grounds that the development
would have a significant impact on the highway network.
There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic.

**Air quality**

There would be an increase of around 5,000 residents at the proposed development site with possibly an additional 4,000 vehicles. The air quality surrounding the site of the suggested development already causes concern, for instance levels of NO2 already exceed the EU limit due in part to the proximity of the M25, the A3 and Cobham Services on the M25. Additional traffic would worsen the situation, affecting the health of all current and future residents in the area.

**Summary of objections to this site**

Objection is supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

The only exceptional circumstance that might be advanced, with all other matters were discounted, is housing need. Insofar as that may rely on evidence tendered for that it does not bear any extensive examination and the government has anyway made it clear that housing need alone is not sufficient.

There would be a loss of Green Belt and countryside used for leisure purposes and an immense effect on biodiversity. The development would affect not only the surrounding natural land but add to the danger of losing rare species that need protection.

The land is close to the M25 and A3 junction and would increase the number of vehicles using these busy roads on a daily basis, cause further extensive use of inadequate local roads and cause further pollution. Surrey is very poorly served by public transport and any new residents would be reliant on private transport.

A new settlement here would absorb the hamlet of Ockham. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. There is no realistic account taken of general organic growth and other proposed developments and impact on traffic and infrastructure.

**Sites in East and West Horsley**

There is considerable concern locally that Effingham, the Horsleys, Ripley, Wisley and the Ockham and Hatchford areas are protected from unwarranted development. But the changes to settlements that would have most effect on the Cobham area in terms of increased traffic and call for amenities, if the draft Local Plan were implemented, would be the Horsleys. Implementing proposals for Sites A36-41 would destroy the nature of the villages that make up the Horsleys. The new building suggested for these villages is excessive and disproportionate relative to the rest of the borough. It has to be asked why it is suggested that the Green Belt is sacrificed here where the protection of the Metropolitan Green Belt is highly relevant when on the other side of the borough in the Ash and Tongham areas the draft Local Plan looks to expand the Green Belt.

The reclassification of East Horsely to a Rural District Centre would allow less desirable uses such as factory outlets, warehouses, clubs etc. to be the subject of applications for planning permission. Development in these villages should not be other than from small windfall sites.

**Housing Target**

Setting a housing target for Guildford Borough is a vital function for the Local Plan. The Trust is reluctant to get involved in the method of reaching a figure for an adjoining borough but, given what is at stake locally, considers that it has an obligation to comment and object to the figure put forward.
Paragraph 158 of the NPPF 158 provides that "Each local planning authority should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence". The starting point for that is a Strategic Housing Market Assessment (SHMA).

The SHMA does not take into account any of the constraints to development such as Green Belt, AONB, woodland, heathland, protection of flora and fauna etc. in determining an “Objectively Assessed Needs” (OAN) figure for the Local Plan. It is for the local authority to take these constraints into consideration and apply them to what is provided in the SHMA.

There has been nationwide concern, especially from local residents and community groups, even about the figures emerging from the SHMA process. In many instances the figures are considered to be inflated or otherwise inaccurate. Such inflation can occur in the hands of consultants who are inclined to favour developers. Guildford Borough Council have used G.L.Hearn as consultants and that company’s website shows that their work for developers could provide motive for bias. Local authorities can succumb to those in the planning industry acting on behalf of developers who advocate that the “presumption in favour of sustainable development” means that growth must be looked for across the board and in doing so have less regard to where there should be constraints. If local authorities overlook proper scrutiny it can also be because that development can generate income from Community Infrastructure Levy, taxes and bonuses.

For the purpose of a Local Plan it is necessary to have underlying data that is used to back up propositions. In the case of the West Surrey Housing Market Area (SHMA) for Guildford, Woking and Waverley, and prepared by G L Hearn, requests for that have met with resistance. Incredibly Guildford appear to have told the Information Commissioner that consultants have refused to give it the formulae and assumptions in the model because of ‘intellectual property’ in the model used. The Trust understands that in consequence neither the administrators nor councillors at Guildford Borough Council have had an opportunity of scrutinising vital basic information. This makes it all the more important that Inspectors test SHMAs and OANs against properly provided methodology.

The Trust understands that the process toward determining targets for future housing numbers starts with the Office for National Statistics (ONS) projection of the likely local population change for the borough due to natural change (births, deaths), net internal migration within the UK and finally net international migration.

The Trust understands that based on natural change and net internal migration recent ONS data projected that the borough population to 2031 would shrink and that it would increase only on projected net international migration based upon the abnormally high increase in the number of foreign students attending the University of Surrey (as was experienced in recent years). The ONS themselves state that this latter figure is less reliable and anyway stress that before its projections are turned into predictions their basic statistics should be reviewed in detail, with changes made based on whatever factors are deemed important in that review.

G L Hearn have assessed the housing need for Guildford at 693 dwellings per year, (13,860 overall) for the next 15 years (the result bring to add 25 per cent to the stock of dwellings in the borough with increased pressure on existing infrastructure. It is based predominantly on international migration, itself based on an increase in students. Even if desirable this is implausible particularly in a post-Referendum climate with further education being more expensive in the UK compared with other countries, evidence this week of students no longer wishing to study in the UK and a trend to distance learning. This issue should also be considered in the type of housing required. If based on any realistic forecast the University, with unused planning permissions for student accommodation on campus, should take responsibility to enable this factor to be removed from the equation for projected household numbers. This would free up affordable housing for local people, particularly the young. In any event, a separate detailed assessment should be made of the need for and type of student housing required.

This aspect of the SHMA reveals that the basis for it is severely flawed.

There is also a need in looking at housing targets to distinguish between need and demand. The latter could be limitless as in Guildford house prices and therefore demand are dictated and dominated by London house prices. The outward movement of population from metropolitan London is incapable of being satiated and was an important reason for the creation of the Green Belt.
In looking at the OAN there would appear to be insufficient evidence of the residences that Guildford town can accommodate (windfalls, reuse of empty housing, switch from office accommodation and use of student accommodation). A substantially lower number would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

Additional observations

The Trust makes the following general observations on the draft Local Plan.

Policy S1 should go in full through the principles for sustainable development in the NPPF in full including the 12 Core Planning Principles set out in paragraph 17.

Evidence on infrastructure

The draft Local Plan seems to have again been assembled with insufficient proposals or research on the infrastructure needed to accompany proposals for housing development. There must be proper infrastructure planning for transport, educational, medical, energy, water and communications services before additional housing is contemplated. It does not seem to be understood that, for instance, bus transport is wanting and there are few facilities in the borough for any transport to rural parts except by car. There is no guarantee that the A3 will be improved in the way suggested.

Urban Development

The Trust supports higher density development in the urban area where there is existing infrastructure, although that should of course avoid over intensification. Guidelines should avoid spoiling the environment and causing congestion but much can embrace fresh thinking on urban life including pedestrianisation, cycling lanes, home zones and underground parking.

Affordable homes and homes for those on low income and the young

Market prices in the South-East mean that homes designated as affordable are just not that. That makes it even more important that developers are given no leeway from the requirements to provide a proportion of a development to be built as such. In this area there is no excuse to plead viability as a reason not to comply with guidelines. The Trust is keen that in the North Surrey area Local Plans should be formulated in a way that will provide accommodation for local people, to the young and those on low pay and that a good stock of starter homes and social housing are made available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Looking at how the proposal to have a settlement of 2000 at the site would impact on transport, there would still need to be reliance on vehicles for work and other needs and for delivery. It would be impossible to provide enough jobs for residents in the area of the development which would result in a substantial increase of traffic on the local road network. This suggested site for development is far removed from local stations and has no existing access to public transport. It is unrealistic to assume that residents will not rely on the private car and reliance on private car or buses cannot meet requirements for a low carbon, sustainable economy. It is impossible to provide safe walking and cycling routes to the nearest station particularly in winter as the surrounding lanes are narrow and unlit. Further, public transport would itself be limited by the weight restrictions imposed on surrounding roads which are narrow and unsuitable for Public Service Vehicles.

In application no. 15/P/00012 the applicants incredibly suggested that stations are within easy cycle distance. Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).

Given how main roads (and in particular the M25 and A3) become jammed at various times, adding to the number of motorists, development in this rural area would result in the use of more local roads as rat runs. The Trust would be particularly concerned for the additional traffic on the very narrow and winding Ockham Lane and Plough Lane locally.

Cobham is the closest shopping centre to the proposed development. It already serves many from the areas of Ockham, the Horsleys and Effingham with traffic along Horsley Road and Downside Road, Ockham Lane and Plough Lane. Cobham is only 4.5 miles from the proposed development whether one used Old Lane, Horsley Road and Downside Road or the A3 and the A245 - Guildford is by comparison 7.5 miles from the proposed development. The village could not cope with the additional traffic and car parking involved in serving an additional 5,000 residents at the site and would experience a significant increase in traffic from the development. Cobham would experience increased stationary traffic at junctions. Traffic congestion has an impact on health and Cobham High Street is an Air Quality Management Area arising in part from the proximity of the A3 and M25 and there are identifiable health problems already arising from this. To add to the traffic here would exacerbate that.

One of the stations that in application no. 15/P/00012 the applicants claimed would adequately service the increased population (much of which is likely to commute) is Cobham & Stoke D’Abernon (the local rail stations of Effingham and Horsley could not cope). The route to that station is either by way of Downside Road or by way of the A3 and A245. Additional pressure would be placed on parking at this station and overcrowding at peak hours would increase, quite apart from the impact of vehicles using local roads for the purpose of getting there. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

In that application the Trust supported Elmbridge Borough Council’s objections on the grounds that the development would have a significant impact on the highway network. There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic.

**Air quality**

There would be an increase of around 5,000 residents at the proposed development site with possibly an additional 4,000 vehicles. The air quality surrounding the site of the suggested development already causes concern, for instance levels of NO2 already exceed the EU limit due in part to the proximity of the M25, the A3 and Cobham Services on the M25. Additional traffic would worsen the situation, affecting the health of all current and future residents in the area.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I further object to the proposal for this development in the Horsleys and to the proposal to build 2000 houses, with shops and churches, at Ockham on the former Wisley Airfield because the infrastructure is insufficient to cope with these developments and there appears to be neither the scope, the money nor the plans to develop the necessary sewage removal and treatment, the schools, doctors’ surgeries, roads and car parking. Horsley roads are narrow, unlit, often without pavements, never more than one lane in each direction, and some roads are actually single track lanes with and without passing places. The foul water sewers are old and unmapped and will need considerable investment for improvement and enlargement to cope with the proposed scale of development. There is no provision for this investment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/1628  Respondent: 8566145 / Mrs Diana Brighton  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Guildford Local Plan 2017 in particular to the plans to build on the Wisley Airfield and fields. The site is a valued part of the Green Belt and it is therefore not legally available for development.

In addition:

I consider the site is not suitable or sustainable as a residential area because it is dangerous to walk or cycle from the site to the local train station. This is due to the lack of street lights and pavements along this narrow road which is regularly used by large and heavy vehicles causing all other traffic to pull into the verge.

Proposals for new road access to the station for cars and for cycle paths will undermine the rural identity of the surrounding area which is characterised by its unlit, pavementless, narrow country roads through fields and small villages.

I understand that a bus service is proposed but the narrowness of the road and the lack of anywhere safe for passengers to catch or alight from the bus makes this an unrealistic proposition.

The site is adjacent to the A3 road which carries very heavy traffic. The air pollution level is already very high and will become even higher if this planning application is allowed. Inevitably the levels will be greater than the levels currently allowed and thus in breach of the law. The pollution will be increased even further if residents have to use their cars to reach the station where there is already insufficient parking.

Within the time frame proposed for development of this site the access for construction traffic will heavily impact the surrounding roads which are not suitable for sustained use by heavy vehicles and will cause unacceptable disruption to the lives of local residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
A35, WISLEY AIRFIELD

Wisley Airfield has been vacant for decades. All the buildings associated with its previous function have been removed. The runway is not visible from beyond its boundaries. It is located some considerable distance from any meaningful settlement within the wholly inadequate infrastructure for a development of this scale and is served by narrow winding country roads with no footpaths. It is not served by public transport. It, therefore, constitutes a wholly unsustainable development in an unsustainable location. A recent outline planning application for its development was refused unanimously by the Council’s Planning Committee.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I endorse the submission by WAG

WAG commented in its 2016 representations that the over-allocation of housing meant that there was no justification for including the former Wisley

I endorse the submission by WAG

WAG commented in its 2016 representations that the over-allocation of housing meant that there was no justification for including the former Wisley Airfield (A35) given the harm it would cause. That case is strengthened by the reduction in the housing requirement.

There are issues concerning pollution levels due to its proximity to the M25 and A3 and proximity to SPA, and sustainability, none of which have been addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I strongly object the inclusion of site A35. It should be removed from the Local Plan for all the reasons that the recent unsuccessful planning application was rejected.

To name a few: proximity to the Thames Basin Special Protection Area, RHS at Wisley Gardens, and the already polluted gridlocked A3/M25.

I strongly object to the former Wisley airfield being removed from the Green Belt. I strongly support the Green Belt and feel that the large proposals within the local plan for building on the Green Belt is wrong.

I strongly object to the idea of an increase of 5,000 cars into the small rural country lanes of Ockham.

I strongly object to Allocation A35.

Just recently the council refused permission for numerous reasons, none of these have changed, SO WHY IS THIS SITE STILL IN THE LOCAL PLAN???

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Site A35 Land at former Wisley Airfield Ockham

168. I object to this site being i It is a large open space in the Green Belt and there are no exceptional circumstances. The site has extensive views to the AONB. It is an SNCF next to an SSSI and the Thames Basin Heaths SPA. The recent planning application was turned down for many very good reasons that will not go away. There are serious and wide reaching traffic issues arising from the proposed development and these will impact on The Horsleys, Effingham, Cobham, Ripley, Send, the A3 and the M25 and further afield. The proposal is unsustainable and environmentally destructive.

169. With so many negative aspects, and grounds for rejection, the site should not have been included in the draft Local Plan and it appears that undue favour is being given to its developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to Wisley Airfield, which is classified as a brownfield site on a spurious technicality when everybody can see that it is not what is understood by brownfield, being included in the Local Plan as a development site for 2000 houses when Guildford Planning Committee have just refused the planning application relating to it. Either the left hand does not know what the right hand is doing or this is a devious diversion. I object for all the reasons identified by GBC Planning Committee when it rejected the application.

I OBJECT to building 2000 houses at what GBC calls Wisley but is actually at Ockham, because it would massively and detrimentally overwhelm Ockham village, East and West Horsley and the entire neighbouring area. The proposal is ill conceived, showing scant regard for the Green Belt, infrastructure requirements, transport, or pollution and lacking nearly all the evidence that is needed to show that such a development would be sustainable.

(A35) Wisley

Object

EPC objects to the approximately 2000 units proposed for the former Wisley Airfield. It is an over-development of the site and will adversely affect already heavily congested local roads and lead to much worse traffic congestion at the Forest Road, Effingham Common Road junction. Additionally, EPC is concerned about the usage of the car park at Effingham Junction station. This is already full, on most working days, with cars spilling out to park on Effingham Common Road, in contravention of highway regulations.

Many residents of Effingham commute to London to work. The extra pressure on rail services from the site allocation at Wisley will mean that Effingham residents may find there is only standing room on the Effingham Junction to Waterloo service during rush hours.
Effingham residents are also concerned about the inadequacies of the road infrastructure if Wisley were given planning permission. The route from the Forest Road, Effingham Common Road junction, via Old Lane, to the A3 is heavily used and any closure, or restriction, of this road during development of the site would have a severe effect on traffic through the area as well as causing great inconvenience and added pollution.

There are over 120 Effingham residents who live within the East Horsley settlement area and these residents will be particularly impacted by the increased traffic along Forest Road if Wisley were developed, especially in the morning rush hours when new Wisley residents would drive through the area to park at Horsley and Effingham Junction stations.

EPC has previously objected to the planning application at this site and maintains this objection.

A35

I object to this policy. Again no evidence is out forward of exceptional circumstances to justify its removal from the Green Belt.

In fact, of all the sites proposed in the Plan, this is the one which most contributes to checking the outward sprawl of the London conurbation.

It is difficult to see how a sustainable development could be built here. Narrow, unlit, rural roads lie between the site and the nearest two railway stations (which have no spare parking capacity), so walking and cycling to public transport are extremely unlikely and the new settlement would be predominantly car dependent at the already over-trafficked junction of the A3 and M25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

This site has been turned down for development in the past three to six months.

It is difficult to follow the historic logic of this site as Surrey County Council want to use it as a waste ‘transfer site’ in their plan, whilst Guildford want housing, and the residents wish it to remain as is.

The pollution levels [CO2 NOx] at this site exceed acceptable levels for asthma sufferers. On health considerations (air pollution) and being so close to the overloaded M25 can, or should, this site be considered for residential use?
This Policy must be considered as unsustainable and unsound in respect of healthy residential use.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The proposal to build over 2000 new homes together with other facilities, particularly employment facilities, will have a huge impact on the area including East and West Horsley. It is not reasonable to expect local roads to be able to cope with the increased volume of traffic eg those driving from the development to Horsley Station and shops. Apart from the roads East Horsley Medical Centre is full, the Howard of Effingham Secondary school (the main school for the area) is oversubscribed while parking space is already under pressure in the East Horsley Station Parade area. Infrastructure is earmarked for the Wisley site but it is highly likely that new homes would be constructed before new infrastructure. In any event there would still be considerable pressure on the East Horsley area from this development.

POLICY A35: Former Wisley Airfield, Ockham

The description of the Wisley site, which is in the Green Belt, has been changed from “Land at former Wisley airfield, Ockham” to ‘Former Wisley airfield, Ockham’. This is misleading. The airfield only takes up a small fraction of the site. Much of the site is agricultural.

Beginning with land at the former Wisley airfield there will be continuous development from the M25 along the A3 to Guildford. Prime reasons for the Green Belt are its openness and to prevent urban sprawl, and yet these reasons are being ignored in the Local Plan, even though the Green Belt is land which is given protection from development in the NPPF.

I object to the change in name of “Land at former Wisley airfield, Ockham” to “Former Wisley Airfield, Ockham”, for the above reasons.
I object to: Requirements: Infrastructure (3)(d) Mitigating Highways Performance Issues. This opens the way to damaging rural roads and lanes, and the character and landscape which they provide. The straightening and widening of such roads and lanes would leave this area bereft of countryside and village character.

As stated in my original submission to the 2016 Local Plan consultation, I object to this development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object most strongly to the development on the Former Wisley Airfield. The number of houses involved remains quite horrific. I have written to you several times now and nothing of any consequence seems to have been taken into consideration of in excess of 30,000 objections to last year’s plan. To think a [illegible word] will make any difference is laughable. Our area/station will be saturated. Worse still, you will be housing these new folks just off Junction 10 of the M25 which is already over the limit of contaminated air.

I appreciate the developers need to cram in as many houses as possible on the Airfield in order to make a turn on their investment, ie they probably paid too much for the site. But they do not live here! Surely such a plan that affects generations to come, as well as the current taxpayers, should not be held ransom to these developers. Green spaces surrounding our capital are precious. We all need areas for play and enjoyment, as indeed does the wildlife.

I do hope the Government’s Planning Inspector has some sensitivity towards democracy as opposed to a developer’s greed.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Guildford Borough Council’s Proposed Submission Local Plan (published 6 June 2016)

Wisley Action Group (WAG) has reviewed the Proposed Submission Local Plan (Local Plan) and considers that:

1. Despite GBC’s protestations to the contrary, the Local Plan has failed in a number of key areas to take into account or to answer many valid comments and criticisms submitted by thousands of residents and organisations in respect of e.g. the 2013 Draft Local Plan.
2. The Local Plan prioritises growth to the detriment of the ongoing viability, character and “liveability” of Guildford town centre and neighbouring villages and the protection and maintenance of the countryside, the Green Belt, and protected wildlife areas such as the Thames Basin Heath SPA.

3. The Local Plan allocates too much land for development, based on a flawed Strategic Housing Market Assessment, and an artificially inflated Housing Target not justified by actual or reasonably projected demand.

4. There are a number of inclusions in the Local Plan which, in WAG’s view, undermine the soundness of the Plan as a whole on grounds of lack of sustainability, deliverability and need.

5. The purpose of the Local Plan should be to enhance the quality of life of the Borough’s resident population, not to increase those aspects which cause the most dissatisfaction: traffic congestion and pollution are not eased by increasing the amount of traffic; inadequate infrastructure, whether schools, services, or sewerage, is made worse not better by increasing demand; and building houses, schools or other facilities in places furthest from existing areas where people live or work merely increases problems of inconvenience, travel, and development sprawl.

Against this background, WAG OBJECTS to the Local Plan overall on the following grounds:

1. The Local Plan proposes major, unjustified and unacceptable erosion of, and removal of villages or major parts thereof from, the Green Belt.

2. Over 70% of new housing is proposed to be built within the existing Green Belt notwithstanding that there is more than enough genuinely brownfield land and non-Green Belt land available.

3. The housing number of 693 houses per year from the Strategic Market Housing Assessment is based on flawed analysis and is too high. Guildford Residents Association (GRA) has commissioned an independent review of the SHMA, which concludes that the methodology used to arrive at the figure of 693 homes is flawed and that the FOAN for Guildford District is in fact 510 homes a year over the plan period.

4. New houses, schools and services should be developed in or adjacent to areas of actual demand and not in relatively remote areas which inevitably and unnecessarily result in major increases in travel requirements from home to work, work to home, home to school, etc.

5. The proposed allocation of housing in the north east of the Borough particularly Ockham, Ripley, Send and the Horsleys is a prime example of locating supply impractically far from the areas of demand, and is totally disproportionate to allocations elsewhere in the Borough.

6. The continued inclusion in the Local Plan of the former Wisley airfield (which is located in Ockham and which is known locally as Three Farms Meadows) is perverse and illogical, and is unsound for reasons of sustainability, deliverability and need.

Specifically in relation to the former Wisley airfield/Three Farms Meadows (FWA/TFM), WAG considers that the inclusion of the site in the Local Plan renders it unsound and the plan should be modified to exclude it. These objections have been made consistently by WAG and others in relation to, inter alia, the GBC’s 2013 draft Local Plan and Planning Applications for development or use of FWA/TFM:

1. FWA/TFM was included in the draft 2013 GBC Local Plan and was widely objected to. That draft Plan was eventually withdrawn after many months of consultation and deliberation.

2. The Wisley Property Investments Ltd (WPIL) planning application of January 2015 (Reference: 15/P/00012), as subsequently amended, for a phased development of a new settlement of over 2000 dwellings at FWA/TFM was decisively and unanimously rejected by GBC on 8 April 2016, after 15 months’ consideration by the Council, including extensive consultation and several major amendments, following the recommendation of the GBC Planning Officers.

The reasons for the refusal of the application were many, including that the proposed development:

- was an inappropriate development within the Green Belt;
- would have a clear and substantial detrimental impact on the openness of the Green Belt and conflict with the purposes of including land within the Green Belt;
- failed to demonstrate that the benefits amounted to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified;
- failed to comply with the objectives of policy RE2 of the Guildford Borough Local Plan 2003 (as saved by CLG Direction dated 24/09/2007) and chapter 9 of the National Planning Policy Framework;
• was within the 0 - 400m and the 400m to 5km zones of the Thames Basin Heaths Special Protection Area, etc.
• would have a severe adverse impact on the safe and efficient operation of the strategic road network, and a severe impact on the efficient operation of the local road network;
• failed to deliver the required transport sustainability measures;
• failed to secure an appropriate provision of affordable housing;
• was detrimental to the viability and vitality of the existing district and local centres in the vicinity of the site;
• would result in loss of the safeguarded waste site;
• presented a dense and urban form of development owing to its quantum and scale;
• had an adverse impact on the setting and significance of a designated heritage asset;
• had an unacceptable air quality impact;
• impacted on education infrastructure;
• impacted on policing infrastructure;
• impacted on health infrastructure;
• impacted on library provision.

1. Both these and other serious objections and concerns had been raised by WAG, neighbouring borough and parish councils, Surrey County Council, statutory bodies, CPRE, Surrey Wildlife Trust, University of Surrey, Thames Water, NATS, the Environment Agency, Police Authorities, Highways Authorities, residents’ associations and several thousands of other organisations and individuals - both in the context of the planning application and in relation to the current and earlier GBC draft Local Plans.

The numerous concerns raised by WAG and others have been well documented in previous correspondence from WAG to GBC (copies of these representations attached). These concerns are supported by a series of legal opinions from Leading Counsel (appended for convenience), most recently the opinion of Richard Harwood QC, dated 17th May 2016, which advises that the FWA/TFM allocation is highly likely to be found unsound by the Inspector at the Local Plan examination. They are founded on the following:

1. The value of the Green Belt and most importantly the value of FWA/TFM as a critical core at the heart of the Green Belt.
2. The very serious harm to the openness of the Green Belt which would be caused by a development of this scale in this location, as acknowledged by the Council in refusing permission for the recent application. As was also acknowledged by the Council, unless the exceptional circumstances test is made out there is not even scope for redeveloping the previously developed parts of the site – the runway, the taxiways and aircraft hardstanding – because of the serious harm which would be caused to openness and to the Green Belt purposes.
3. The absence of any exceptional circumstances justifying removal of the site from the Green Belt. The only justification for releasing the site is said to be the shortfall in available sites to meet the housing needs of the Borough. However the Council’s own evidence base demonstrates that the release of this site is not, in fact, required in order to meet the housing need. Thus:

   1. Draft policy S2 states that 13,860 new dwellings will be provided over the Plan period in order to meet the identified housing need, based on a FOAN of 693 dpa (693 x 20 years = 13,860).
   2. However the LAA advises that, not including sites with planning permission, sufficient land is already available to construct 13,708 new dwellings over the next 15 years i.e. up to 2031 (with any development from 2031-2033 to be added to this total).
   3. There are 1,342 homes with planning permission which are expected to deliver new homes within the next five years, as well as 66 homes in the 11-15 year period.
   4. Accordingly, there is already provision for a total of 15,116 new homes, even without taking into account completions for 2013-2014 (132), 2014-2015 (242) and 2015-Feb 2016.

Even on the Council’s own analysis, there is therefore a significant surplus of available land compared to the identified housing need, and this surplus has previously been acknowledged by the Leader of the Council. Consequently, the housing need cannot amount to exceptional circumstances justifying the release of this site. Moreover, as noted above, the expert advice received by WAG is that the FOAN of 693 dpa is far too high and that the correct figure is in fact 510 dpa, or 10,200 dwellings over the plan period. On this analysis the available land far exceeds the identified housing need.
1. The Sustainability Appraisal includes the FWA/TFM allocation only if the Plan proposes OAN plus 14% (page 32). Consequently FWA/TFM is not required to meet the Council’s own needs figure. The presumption in favour of sustainable development in para 14 of the NPPF does not support the FWA/TFM allocation – as policy is simply to meet OAN with sufficient flexibility to adapt to rapid change unless specific policies, including Green Belt, indicate development should be restricted. Paragraph 47 of the NPPF requires Local Plans to meet OAN (unless there are constraints). The policy does not include a buffer in the Local Plan figure (the 5 year Housing Land Supply is distinct from the Local Plan total numbers). In the absence of national policy support for a buffer in the total, there is no case whatsoever for the allocation of FWA/TFM. There are no potential exceptional circumstances which could therefore support the allocation.

2. The value of FWA/TFM from an environmental and ecological standpoint, not least in relation to the Thames Basin Heath Special Protection Area, a SNCI and a SSI.

3. The value of FWA/TFM as a community asset and as a vital “lung”, not least because of the health risks associated with increasing pollution and decreasing air quality, as well as acid deposition on the SPA impacting human health and animal, plant and soil viability in the site and immediately surrounding area.

4. The wealth of evidence demonstrating that the adverse consequences of development of the site, including damage to the ecology of e.g. the SPA, cannot be satisfactorily mitigated. This is also self-evident from WPIL’s failure to overcome these adverse impacts, despite considerable efforts over a period of 15 months.

5. The significant harm to the character of the surrounding area which would inevitably be caused by a development of up to 2100 dwellings in this location, necessitating building heights of up to five storeys and creating a wholly incongruous urban form of development in the middle of the countryside.

6. The critical location and current nature of FWA/TFM in relation to the historic and current viability of the Ockham hamlets and surrounding villages.

7. The unacceptable impact of a development of this scale on Ockham, an historic rural village with around 160 existing dwellings, and with narrow lanes, no street lights, few pavements, a Conservation Area and many listed properties – which would be completely subsumed by a 2000+ dwelling development, with urban style buildings up to 5 storeys high and a population density higher than most London boroughs. Ockham’s existing population of just over 400 would be increased by more than 15 times.

8. A Local Plan and potential development which do not meet, and indeed which are completely contrary to, the needs and desires of Ockham’s population, as evidenced in the existing Ockham Parish Plan.

9. The detrimental and unsustainable impact of development at FWA/TFM on transport, the A3 and M25, local roads and road safety, with increased vehicle movements (an estimated 4000 additional cars plus increased bus and HGV movements during construction and afterwards), on rail stations and car parking which are already at capacity, and on local services and infrastructure. It is by no means clear how or whether - the mitigation schemes referred to in policy A35 can be delivered in order to overcome the severe impact of a development of this scale at FWA/TFM on the strategic or local road network (and, certainly, WPIL was unable to overcome these issues, despite considerable efforts on its part and on the part of the relevant authorities).

10. The value of FWA/TFM for agriculture, comprising as it does over 75% of agricultural land including 63ha of Grade 2, 3a and 3b agricultural land (of which at least 45.4ha is classified as best and most versatile land – Grade 2 and Grade 3a). As advised by the planning officer, a development of this scale would result in the loss of approximately 20ha of best and most versatile agricultural land.

11. The loss of a rare consented waste site in the County, which will increase pressure for waste sites elsewhere in the Borough.

12. The impossibility in practical terms of creating a sustainable development on FWA/TFM, which is further demonstrated by the limited historical use of, or development of, the site, and most recently by the inability of the current landowner/developer and its many experts and advisers to come up with a sustainable development plan despite numerous attempts over an extended period.

13. The cumulative adverse consequences of other actual or potential developments in the area particularly in Ripley, Send and the Horsleys.

Consequently the allocation is unsound under paragraph 182 of the NPPF in that:

- It is not positively prepared, since the allocation is not part of meeting objectively assessed requirements nor is it consistent with achieving sustainable development;
- It is not justified, failing to be ‘a most appropriate strategy’ (applying the LPEG change from ‘the most appropriate strategy’) since it contravenes numerous policies and alternative strategies can meet the needs in a less harmful manner;
• The allocation is not effective. The FWA/TFM site is not deliverable, as the objections from the highway authorities show. If the site was deliverable then certain reasons for refusal would have been overcome – the developer’s failure to do so despite a long application process indicates that these are insoluble. It is not based on effective joint working, the planning application being subject to objections from the county planning authority, two neighbouring district authorities and the local and strategic highways authorities;

• The proposal is not consistent with national policy and does not enable the delivery of sustainable development. Instead it is an isolated Green Belt site in an unsustainable location which causes harm to the countryside, landscape, agricultural land, natural conservation, highways, air quality and the historic environment.

CONCLUSION

These objections demonstrate conclusively why removal of FWA/TFM from the Green Belt cannot be justified, and why its isolated location, size, distance from places of employment, and lack of infrastructure, including overstretched and inadequate public transport, roads, services and facilities, make the site totally unsuitable for any kind of significant development – as WAG and others have consistently argued.

The fact that the Local Plan still includes FWA/TFM (as well as neighbouring land not owned by WPIL) as a potential site for development flies in the face of logic and GBC’s own arguments and previous findings, and ignores widespread expert and local opinion.

The repeated attempts, in numerous guises, over the last 3 years to take FWA/TFM out of the Green Belt and to press for both major and ancillary development of the site have stretched the patience and goodwill of local communities, not least Ockham Parish; have imposed heavy and unwarranted costs and other burdens on those local communities (who bear the costs twice: once directly and then again through their Council Tax contributions to GBC), have caused a blight on the area, distress to local residents and farming businesses, and have adversely prejudiced peoples’ lives and livelihoods.

WAG therefore strongly OBJECTS to this further and unwarranted attempt to exclude FWA/TFM from the Green Belt and thereby to promote a highly unsustainable, unnecessary and ultimately undeliverable development. It invites the Council to withdraw the deposit draft and re-deposit a version without the FWA/TFM allocation or to ask the Local Plan Inspector to modify the Plan by removing the allocation. If not, the Inspector is asked to find the plan unsound and if the Council request modifications, to recommend the removal of the allocation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Wisley Airfield, which is classified as a brownfield site on a spurious technicality when everybody can see that it is not what is understood by brownfield, being included in the Local Plan as a development site for 2000 houses when Guildford Planning Committee have just refused the planning application relating to it. Either the left hand does not know what the right hand is doing or this is a devious diversion. I object for all the reasons identified by GBC Planning Committee when it rejected the application.

I OBJECT to building 2000 houses at what GBC calls Wisley but is actually at Ockham, because it would massively and detrimentally overwhelm Ockham village, East and West Horsley and the entire neighbouring area. The proposal is ill conceived, showing scant regard for the Green Belt, infrastructure requirements, transport, or pollution and lacking nearly all the evidence that is needed to show that such a development would be sustainable.

w. Site Objection (A35) Three Farms Meadows (TFM) – former Wisley Airfield. I object to this site being removed from the Green Belt. The site was comprehensively rejected for housing by GBC’s Planning Committee earlier in 2016 and for a raft of very good reasons. Nothing has changed to justify the inclusion of TFM for housing development. Specifically TFM should be excluded because:

1. It is unsustainable and reliant on private cars
2. Unsustainable because of poor air quality on both housing and the SPA
3. Impact on the Surrey Hills AONB
4. Urban nature – a townscape/cityscape rather than a rural design
5. No infrastructure for the site
6. No promised funding from central government/SCC for required infrastructure
7. Impact of NOx and other carcinogens on the potential residents and on the SPA
8. No consideration of the cumulative impact of the many other developments locally and on the expansion Plans of RHS at Wisley
9. Failure to consider protection of /impact on the historic properties within Ockham and the Chatley Heath Semaphore Tower

**Comment ID:** PSLPS16/7077  **Respondent:** 8591169 / Michael Bruton  **Agent:**
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I wish to make a supplementary submission regarding the proposed GBC Local Plan as follows:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels (and in breach of the Air Quality Directive) Additional traffic will exacerbate this situation, impacting the health of all current and future...
residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I request that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

We object to the removal of the Green Belt land at Wisley Airfield.  
We understand that Guildford Borough Council has rejected this scheme as being unsuitable, but it is still in the draft plan. This scheme must be removed from the final plan. In addition to the fact that this scheme involves the building of 2,000 homes on Green Belt land, there are no plans for road improvements and inadequate services.  
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Finally I object to the revival of the Wisley private plan. The dependence of the GBC plan on that dubious plan already thrown out and the lack of openness in the dealings of GBC with the developers is specially objectionable.

CPRE OBJECTION TO SITE POLICY A35 : LAND AT FORMER WISLEY AIRFIELD

CPRE objects to the continued inclusion in the draft Local Plan of the Former Wisley Airfield (FWA) now known as the Three Farms Meadows (TFM). This development was rejected unanimously on 8th April 2016 by the GBC Planning Committee when it was submitted as a planning application prior to the draft Local Plan being published. This decision was recommended by GBC Planning Officers. We can see no justifiable grounds for this development to now be reintroduced. The arguments for its refusal as a planning application are still as valid as before. Our objection to the former Wisley Airfield development reflects exactly our overall opposition to the draft Local Plan in which over 70% of new housing is to be built within the Green Belt. The GBC proposal conflicts with promises made to the electorate in this context. In our view there is ample brownfield land available in the urban area which should be used for housing instead of attention being concentrated on unsustainable sites in countryside outside the town. No exceptional circumstances have been established to warrant removing land from the Metropolitan Green Belt, which is characterised by its openness and permanence, to permit urban sprawl to spread onto agricultural land in attractive countryside.

We object in particular to the disproportionate allocation of housing to Green Belt land in this segment of the borough. Over 23% of the draft Local Plan’s new housing is supposed to be provided in the immediate vicinity of Ockham, Ripley, Send and the Horsleys, and of this total 65% is allocated to the former Wisley airfield.

CPRE objects to the way in which the draft Local Plan for this site will overwhelm the historic rural village of Ockham nearby - which has only 159 residential houses - and destroy its attractive character and identity that depends on its many listed properties, an absence of street lighting, and very few pavements. This charming small community which can only be accessed by narrow sinuous lanes will be sacrificed to the proposed new development in its immediate vicinity of more than 2,000 houses with high density urban buildings of up to five storeys in height spread out in an urban sprawl of unattractive new construction in open agricultural countryside.

We object to the statement that the new development will result in a significant shift to cycling and walking as a means of conveyance. It is incorrect to suggest that such an isolated built-up location would reduce reliance on private cars as a means of transport to Guildford and neighbouring villages and railway stations. A proposed development of 2,068 homes will result in an estimated 4,000 additional cars on the roads. The added congestion that this will cause on the narrow
country lanes in Ockham and surrounding areas will be a source of increased safety hazard to any cyclists and walkers. This will be made worse by the likely increase in bus and HGV movements from the new location with its additional school traffic. No footpaths or cycle lanes are present along these rural roads.

We object to any increase as a result of the proposed new development to the already severe congestion on the A3 and M25 which will require significant infrastructure enhancements. Work in this context to the A3 South of the site is not expected to be begun until 2019 at the earliest.

We also object to the way in which concern about the harm caused by traffic on the A3 and M25 to Air Quality has been treated with insufficient attention. Air pollution is already known to be a problem in many parts of the borough which needs to be tackled. We understand that for example the A3/M25 junction exceeds EU permitted levels and is comparable to air pollution in Oxford Street in Central London where only diesel traffic is present. The additional congestion that will be generated by the new development and by the proposed expansion of daily visitor attendance at the Royal Horticultural Gardens will only make this problem worse. The relevant authorities are well aware of the adverse impact on the health of local residents and plant life that increased traffic causes in terms of air pollution and will need to give this more urgent priority.

We object to the lack of consideration given to the environmental and ecological value of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and a Site of Nature Conservation Interest (SNCI) which will all be harmed. Traffic noise disturbance has been shown to have a negative impact on bird life which is of particular concern with regard to the SPA.

CPRE notes that concern has been expressed by a wide range of authoritative organisations about this development including Highways England, Thames Water, NATS and the Environment Agency.

The Minister of State has made it clear in a recent statement that housing need and/or demand is not sufficient grounds for encroaching onto open Green Belt countryside and that it is up to “local people” to express their objection to development of this kind. The proposed Local Plan does not meet the needs and desires of local communities. The two top responses in the Ockham Parish Plan call for:

1. Access to the countryside and clean air
2. The peace and quiet of wide open spaces

Over 90% of the local people in this community wish to see both the village’s historic features maintained and the former Wisley Airfield now known as the Three Farms Meadows protected.

CPRE agrees with them.

The Wisley development of a new village / town with at least 2000 houses, 4-entry form secondary school and employment land will generate large amounts of additional traffic onto the A3. If the slip roads at the A3/A247 junction to relieve the impact of this development on Ripley do get built, traffic on the A247 will increase dramatically.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Policy A35 Wisley

We object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again. There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company. Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.
2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
5. Absence of adequate traffic data.
6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.
8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
10. Cost of infrastructure required to the detriment of alternative more favourable sites.
11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am of the opinion that new houses are required but that they should be placed in locations where there is adequate supporting infrastructure in place in advance and where impact studies on existing populations are carried out first. I believe that development at Wisley is a viable option but only with road infrastructure improvements at the A3 carried out first, road improvements to Horsley station, as well as the station itself, being described and funding secured first and for healthcare and school provision being described and secured first. Descriptions of infrastructure already in place does not support the case for an increase in population which existing infrastructure does not cater for.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to object most strongly to the inclusion of the Wisley Airfield in the local plan. We must protect our green belt and exclude this site from the draft local plan without delay. I have written previously to object, our country lanes cannot hold the considerable amount of traffic that would need to be accommodated, the A3 junctions would be even more clogged up than usual at rush hour, air pollution would suffer, the site is unsuitable for a housing development and would spoil the green belt and the protected area and its environs. The potential schools are not needed here. We are served by excellent schools already. This is the wrong area to consider. There are many other sites that could and indeed should be considered. Please start afresh. Take a step back and consider how detrimental this would be to our landscape. Why build on this agricultural land which should be retained as such, as was the original historical intention. There are sites off the M25 that could be considered, and outside Guildford, where much of the housing could be contained.

Please consider carefully all the objections you will receive from residents of this picturesque hamlet of Ockham - don't spoil our countryside in this way. Expand elsewhere but not her at Wisley - green open space enjoyed by so many is becoming a rarity. Conserve and preserve our green belt as was intended.

Attached documents:

Comment ID: PSLPS16/549  Respondent: 8686913 / John and Susan Burge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Shortly before this Local Plan was published Guildford Borough Council totally rejected the application to redevelop Wisley Airfield, yet here it is again. The current proposal would destroy the village of Ockham. In effect the proposal is for a New Town with houses and blocks of flats packed close together on a density scale more appropriate to an inner London borough and the site is largely Green Belt.

I OBJECT to the intense use of this largely Green Belt land for housing units.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslpl72/1516  Respondent: 8686913 / John and Susan Burge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The idea of a new township on Wisley Airfield was, and continues to be a very bad idea. GBC has already objected to a planning application for the Wisley site and presented fourteen reasons to justify its position, yet keeps it in the Local Plan as a “policy site”!

The developers have presented what they call “minor” alterations to the original plan – I would query the use of the word “minor”.

I still **OBJECT** to the continued inclusion of the Wisley Airfield site in the revised Local Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I refer to the draft local plan.

I object to the inclusion of policy A35, Three Farms Meadow for the reasons below:-

1. The much heralded bus service from the site to Horsley would be a major hazard to other road users as the lanes are not wide enough. I object to the scheme because it is both unsuitable and dangerous.
2. There would be minimal employment on site so almost all residents would have to travel to work by road. I object to the inevitable increase in traffic and fear for the lives of those who chose to cycle on narrow unlit country lanes.
3. The site would generate increased traffic at the A3/M25 junction which is already heavily congested. I object to the further overloading on this road system and the resulting additional pollution.
4. I object to further "grabbing" of green belt land.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

3. Three Farms Meadow site

I **OBJECT** also to the re-inclusion in the plan of **Policy A35** (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.
This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.18

Policy A35 should be ditched from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottlenecks and Ripley village and roundabouts.

1. **Application reference 15/P/00012.**
2. **Including the Rt Hon. David Mellor QC (its erstwhile founder and former Minister), Mr Michael Murray (spokesman for the project and Conservative cabinet member for planning policy at the Vale of the White Horse District Council in Oxfordshire) and the Hon. Charles Balfour (director, descendant of the Tory Prime Minister).**

- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).19

- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

*****

1. **The River Mole would flood even more badly should a new runway be built at Gatwick.**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD): • Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties. • Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application). • Unacceptable Conservative Party links between the developers and the Council. • No Green Belt “exceptional circumstances” presented. • Not a brownfield site as stated – only 15% of it. • Proposed SCC waste site ignored. • Loss of farming land. • Too near RHS Wisley and Thames Basin Heath SPA. • SANG would harm on SPA. • Will aggravate traffic jams at A3 roundabout and M25 Junction 10. • Unacceptable increase in air pollution. • No existing public transport and stations miles away. • No proper traffic data. • Housing density far too great. • Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings. • Access confined to inadequate narrow lanes. • Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole. • Major impact on neighbouring villages, especially Horsleys. • No assessment made of collective impact on area of this and 6 Horsley sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford BC proposed local plan (June 2016) and the continued inclusion in the plan of Three Farms Meadows (formerly Wisley Airfield) Allocation A35 phased development of new settlement of up to 2100 dwellings.

1 The site is in the Green Belt and the exceptional circumstances necessary for its removal have not been demonstrated.

2 The proposed development is too large scale and high density completely out of keeping with the surrounding area and swamping the village of Ockham.

3 There will be a very large increase in traffic around the site both during and after construction. Local roads are already congested and will struggle to cope with the new traffic volumes.

4 Air quality will also suffer as a result of the large increase in road traffic.

5 Parking is already inadequate at both of the local railway stations.

6 Schools and medical services in the area are already fully stretched and in view of this development and those proposed on the Horsleys, will need to be substantially expanded. Will the developers be meeting the cost of this?

7 The sewerage system in the area is already overloaded and would need to be greatly expanded to cope with the very large increase in housing.

8 Likely to be a greater risk of flooding on and around the development site.

9 Loss of rural environment and local footpaths and bridle ways.

10 The planning application has already been unanimously rejected by Guildford BC’s Planning Committee.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1522  Respondent: 8704417 / Philip Ashfield  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield now known as Three Farm Meadows-Allocation A35 - the phased development of a new settlement of up to 2100 dwellings.

I very strongly object to the draft local plan for many reasons - and I wonder if any of the Councillors have really considered this proposal, and many others in the neighbourhood - Over 600 houses in Horsleys, 400 in Burnt Common, 2000 houses on Gosden Hill Farm (Burpham) plus a number of smaller sites in nearby villages. These add up to in excess of 5000 new dwellings in this neighbourhood.

As far as I am aware no Councillor or Planning Officer has ever been to or considered the enormous effect that this would have, not only on the residents in these areas but many other people from far and wide. I wonder if the Councillors or Planning Officers even know where these places are and, possibly as they do not live near the area affected, they feel that they are correct in putting these plans forward (NIM BY/SM).

If these building projects were carried out then there would be total traffic gridlock not only in the local area but on the M25 and A3 and, of course on every one of the smaller roads in Surrey and the surrounding Counties.
Amongst my other objections to the draft local plan, where no consideration has been given, are:

- There are not sufficient Transport links (railways, buses or roads)
- There are not sufficient Schools/Academies to educate possibly up to 10,000 children in the area. There are insufficient shopping and parking facilities
- The roads in the area cannot take any increase in traffic as this contribute to grave danger to all users (car drivers, pedestrians and cyclists, etc)
- The air pollution is already at a high level and any increase caused would be well in excess of the legal level.
- I was under the impression that the Councillors had previously stated in their Manifesto that "the Green belt is safe" It now appears that these words were totally meaningless and untrustworthy.
- Councillors and planning officials have no right nor lawful reason to turn prime Greenfield land into an enormous urban sprawl/slum stretching from Greater London to Guildford and probably further out.

Once again I write to OBJECT strongly to this new development.

The reasons are always the same ie this area CANNOT COPE with such a mass expansion of new homes. The effect on the environment, lighting, our terrible poor quality roads, Doctors, countryside, drains and flooding, travel etc.

Even considering Traveller pitches and sheltered/care homes is unthinkable. If allowed then the 2000 new homes will never be sold!

I have lived here nearly 60 years, from a child, and I do not like what you are submitting. This is a lovely area and already over populated.

<td><strong>Site A35 - Former Wisley Airfield: I OBJECT</strong> to the inclusion of the former Wisley Airfield as a site for 2,000 home. This is totally inappropriate development that requires the land to be taken out of the Green Belt to even suggest that it should be built on. No exceptional circumstances have been given to justify such a move. Guildford Borough Council is being hypocritical in its inclusion in a Proposed Local Plan published the day before a planning meeting that gave very strong reasons, it being in the Green Belt and the traffic management next door to the already excessively busy Junction 10 of the M25 where the A3 joins that road for refusing an application to build 2,068 houses on the site. If there were no exceptional circumstances to justify planning permission the day after the Local Plan was published how can there be the day before! The information about the amount of brownfield land at the site is incorrect.</td>

<td>The Wisley Site - Possible site for future expansion but who would trust the company for the project? Basis is an off shore tax haven that’s enough to convince me they have little or no interest in surrey’s well being. Their sole objective will be to get the maximum cash return from the project. Money is their motivation – not concerns with developing a site that is – keeping its location eg. opposite the royal horticultural garden at Wisley. Finally does the site have the necessary infrastructure to support further development. The simple answer to that is NO, it does not, so why produce a plan that will only jeopardise what we need to hang on to.</td>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- I object to the fact that the impact of poor air quality on the Special Protection Area is not properly taken into account. There is no evidence that the impact of nitrogen and acid deposition on the heathland and the consequent degradation of the heathland has been taken into Please see the attached document by Baker Consultants specifically in response to the planning application almost identical to policy A35 which is relevant for ALL SITES WHICH ARE CLOSE TO THE SPA.

- I object to the allocation Three Farms Meadows– allocation A35.I object to the proposed removal of this site from the green belt when no exceptional, very special or special circumstances I object due to
  1. Unsustainable nature of site reliant on private cars and undeliverable public transport [in terms of unrealistic journey times/fabricated modelling which do not stand up to scrutiny]
  2. Unrealistic assumptions that people will even walk from one end of the development to the other to go to the doctor, school, shop etc.
  3. Unsustainable due to poor air quality impact on both housing and the SPA
  4. Impact on views to and from the Surrey Hills AONB
  5. The urban nature of the proposal – five storey buildings are out of keeping in the countryside [and some would argue are not even acceptable in Guildford town centre]
  6. Road, sewerage, fresh water, gas and electric capacity does not exist
  7. Funding for infrastructure from Central government does not exist;
  8. There is already a huge infrastructure deficit in terms of This is not properly taken into account.
  9. Impact on nitrogen deposition on the TBHSPA is not neutral and this allocation is therefore open to legal challenge
  10. No consideration has been taken of the current and future plans of the RHS These should take priority over allocation A35. Roads definitely cannot accommodate an additional 500,000 visitors to the RHS and 5,000 residents of site A35. [this is without taking into consideration the huge number of houses planned in the Horsleys, Send and Ripley].
  11. Robust objections to the planning application almost identical to this allocation were made by numerous statutory bodies including neighbouring Local authorities
  12. Insufficient consideration has been taken of the historic houses in Ockham and Ripley and the Chatley Heath Semaphore Tower

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Baker Consultants review of ecology documentation.pdf (1.0 MB)

Comment ID: pslp172/3957  Respondent: 8717921 / Helen Jefferies  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I require confirmation that all of these comments together with all my previous comments are passed to the Inspector. I reserve my right to appear at the inquiry and present my evidence.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:
1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

12. Opportunity (3) should be common to all sites and is not unique to this site

13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

16. I object to the removal of additional 3.1 ha from the green belt without any justification

17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

36. I object to the plan period being inconsistent. This is an example (of which there are many) of extremely sloppy work which gives me no confidence in the content. For example, the foreword mentions an end date of 2034 whereas the introduction 1.2 and 1.3 refer to 2033. Spatial vision uses 2033. What is the plan period? This is very unclear.

37. Para 2.10a underestimates the pressure already suffered by local residents on a daily basis as a result of insufficient infrastructure particularly in the provision of health services, e.g. doctors and hospital appointments. Additional growth in the quantum proposed is unsustainable in that it fails to recognised the needs of current residents and is focussed only on the needs of future residents.

38. Para 2.13 I reject the statement that most local roads in villages have “at least one footway and usually two“.

39. I reject the assumption in para 2.15 that increased road infrastructure capacity – it may improve theoretical capacity but actually worsens performance.
40. I object to the new green belt provision in Ash and Tongham to prevent the merger with Ash Green and I do not understand why this locality should be treated any differently from any other location for example the merger of Ripley and Ockham as a result of policy A35.

41. I object to the fact that the spatial vision makes no mention of protecting the TBHSPA

42. I reject the comment in the spatial strategy that the RIS will provide congestion relief for the A3 in Guildford as my understanding is that these schemes have been dropped.

43. I do not accept para 3.2 where there is a disconnect in the period of the Council’s Corporate Plan and the Submission plan –

44. I object to Para 4.1.11 which should clearly identify the version of the LAA and not just refer to “the latest”.

45. I object strongly to the deletion of para 4.2.8 on housing density. There must be an efficient use of land in keeping with the local area. It is notable than the development planned for the town centre is at a lower density than that at site A35 for example and this is totally unacceptable.

46. I object to the wording of 4.2.18 which is unenforceable. Throughout the plan the word “Expect” needs to be replaced by “require”

47. Likewise, I object to the use of the word “resist” in 4.2.24 – it should be replaced by “refused” in this para and throughout the plan.

48. I object to the wording of policy H2 specifically “we will also seek” and “we will seek”. This should be replaced by the use of the verb “require” in this para and throughout the document.

49. Policy H2 para 4 needs to include that any funds paid in lieu of affordable housing should be ringfenced and the wording further tightened by replacement of “expect” by “will enable”

50. I object to policy H3 para b “the local community”. Rural exception sites should only be allowed where the identified need is truly local defined as within the parish.

51. I object to policy P2 and the inclusion of Ripley in the list of villages to allow insetting.

52. Policy P2 refers to the Metropolitan green belt yet goes on to create additional green belt in the west of the borough furthest from the metropolitan area. There is no justification whatsoever for new green belt land in Ash.

53. There is no evidence that cross-boundary options beyond the green belt have been considered as a viable option instead of moving the green belt boundaries within the borough.

54. I object to the removal in para 4.3.18 of “where it would not have a greater impact on the openness.” and the replacement by “subject to the impact”. This is completely in contravention of the purposes of the green belt.

55. I strongly object to policy P5 TBHSPA as no regard whatsoever is paid to the impact of air pollution on the integrity of the heathland and the resultant loss in habitat from nitrogen deposition. It is inconceivable that the level of development proposed in this plan will result in anything other than thousands more vehicles on the roads due to the unsustainable locations of for example policy A35. Additional traffic equals more pollution and more nitrogen deposition. There is no evidence at all of any in-combination impact from planned developments in adjacent boroughs and no regard to the recent Wealden case for example.

56. I also reject that the SAMM mitigation through the use of wardens will have any impact on cat predation.

57. I object to the statistics in para 4.3.55. Any survey work done on the visitor numbers is unlikely to have covered the time when commercial dog walkers from South London who appear in droves throughout the week.
58. I object to para 4.3.57 – there is no evidence that SANG provided adjacent to the SPA will provide any mitigation at all. Faced with the choice of walking in a manmade environment or on the SPA, the majority of people would choose the natural environment.

59. I object to para 10 of policy E1. Where is the “new industrial employment land on the west side of the former Wisley airfield”? there is no “new” employed land listed under policy A35. This is confusing and needs to be clarified.

60. I do not understand why previously developed sites in the green belt have not been included for development. Specifically, HMP Send where the prisoners have been told that they might be moving and indeed the site is understood to have been valued by Savills amongst others. There is no justification for adjustment of green belt boundaries until all other options have been exhausted. Doubtless there are other examples.

61. I object to para 4.4.36 with regard to the extension of the Surrey Research Park. There is no justification for this when there are a number of surface car parks within the Research Park which should be used in preference. The density of buildings in the Research Park needs to be prioritised over an extension in area.

62. I object to the wording of para 5 in policy E5 – “marketing of the site for its current use for a minimum of 12 prior to submission of a planning application”. This is another example of extremely poor and careless drafting. Do you mean 12 days, months, years….

63. I object to policy D1. Firstly, the deletion of the word “must” in para 2. This means that the policy will be unenforceable (see earlier comments). The word “must” has to be retained.

64. I object to the deletion of the wording in para 2 of policy D1 which must remain in full and I also object to the deletion of para 4.5.8.

65. I agree with the insertion of para 4.5.8a regarding the need for an efficient broadband connection but would add that the needs of current residents should take precedence. The state of broadband provision in parts of the borough (e.g. Ockham) is frankly dire.

66. I support the inclusion of policy D4.

67. In Guildford borough, it is widely accepted that there is an infrastructure deficit particularly in roads and the provision of health services. The needs of current residents are not taken into account in policy ID1. All infrastructure should be in place before development of strategic sites takes place to ensure that the developer pays so as not to jeopardise the needs of current residents.

68. There is insufficient weight given to the problem of air pollution in the borough. I object strongly to the fact that the Council does not take the health of its residents sufficiently seriously to have a policy to ensure the improvement of air quality in the life of the plan.

69. I object to the wording of policy ID3 para 11 which makes no sense at all. What do you mean by “the provision of additional public off-street parking in Guildford town centre will be supported when it facilitates the interception of trips that would otherwise derive through the Guildford gyratory”?

70. I object to the continued assumption that Guildford needs more retail. The ELNA fails to understand the shortcomings in the Carter Jonas retail study update 2017 which refers to retail requirement from companies already in administration and also fails to recognise the increasing use of internet shopping over the bricks and mortar experience. This is lamentable as the land allocated for retail could be put to much better use as residential.

71. I object to the inclusion of policy A58 – there is no justification for an increase in additional industrial floorspace at this location or indeed particularly as there are a number of vacant industrial sites at Slyfield.

72. The AECOM work to support the ELNA is a poor piece of work riddled with unsupported assumptions.
I continue to object to the inclusion of the following policies:
- A36-A41 inclusive in the Horsleys, A43 at Garlick’s Arch, A42 Clockbarn, and A58. There is no evidence that anyone has considered the cumulative impact of these developments together with the development at A35. The infrastructure proposed is totally inadequate and, as these stand at the borough boundary will have a huge impact on residents throughout the borough and further afield, particularly those who use the A3.

I object to the fact that there is no evidence that land owned by the council in the town centre is being used for residential development.

I object to the fact that the land required at Garlick’s Arch is said to be almost 29ha where only 13ha is required at 30dph.

Similarly, I object to the excess requirement for land at A53 where the normal plot ratio of 50% appears to have been ignored resulting in an excess use of green belt land of over 7.5ha.

I object to the housing number of 693/annum as no constraints have been applied – the GL Hearn methodology has compounded past errors in international migration forecasts and the whole SHMA needs to be re-visited and corrected as a matter of urgency.

I object to the continued use of the Green Belt and Countryside study as part of the evidence base. It is a subjective and inconsistent document that pays no regard to the impact of the current proposals on the setting of the AONB for example.

The transport evidence provided shows an increase in congestion as a result of the planned developments. Insufficient modelling has been done to satisfy me that any of the strategic sites can move forward on this basis. The consequences are severe to residents of Guildford and those much further afield.

I object to the fact that there is no proposed location for a bus station in the town centre. This means it is impossible to model journey times from, for example A35 with any degree of reliability. Furthermore, the modelling capacity at SCC does not use “real world” situations for example the junctions do not allow for traffic stopped at red traffic lights and assume all time all direction running which is clearly a fallacy. This perhaps makes it easier to understand why the today’s congestion is so dire.

There is no evidence that noise and light pollution and the impact on both humans and wildlife has been adequately taken into account.

I object to the fact that policy S2 makes no distinction between previously developed land in the Green Belt. It is clear that the use of a site with no above ground building e.g. A35 has a far greater impact than the use of a site such as Send Prison.

I object to the fact that greenbelt sites are allocated to improve flexibility in the delivery of the plan. It is clear that the green belt should only be seen as a last resort, after all other opportunities have been fully explored.

I object to the use of a film on the GBC website promoting a biased view from those interviewed who would in the real world have been excluded due to conflicts of interest. This is unfortunately completed expected behaviour from a council that continues to promote opaque policy and one which has little respect from many residents.

I object to the fact that the prosed housing allocation at Slyfield of 1000 homes results in no increase in vehicles. This is a patently false assumption and leads me to question the soundness of the transport evidence base.

I object to the variation in the assessment of sites which is extremely inconsistent. In some cases the TBHSPA appears to be a concern whereas in others it isn’t. The same applies to a number of elements including impact of conservations areas, SNCIs, views in and out etc.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. It is very worrying that the council does not appear to have either the resources or the intellect to get the basics right.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The re-inclusion in the plan of Site A35 Three Farms Meadow, alias the former Wisley airfield, Ockham following a huge public outcry, and after Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds has deceived many residents into thinking that it has been defeated.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected.

Policy A35 should be removed from the plan for all the reasons the development was rejected by the Planning Committee.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/6892  Respondent: 8729089 / Andrew and Fiona Groenewald  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
OBJECT, This was already refused by the planning committee.

OBJECT Its Greenbelt

OBJECT Traffic nightmare for the whole of the area. Ripley, Send, Ockham, Horsleys, Effingham are already running at road capacity.

OBJECT- Air pollution is already bad at the M25/A3 Junction.

OBJECT- unsustainable as stuck in the middle of nowhere, no facilities, no utilities.

OBJECT, impact on SPA Cannot be mitigated by SANG on its doorstep.

OBJECT current rights of way being affected or ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the change of name of this proposed site.

This site is not just an old airfield! The majority of this site is agricultural and the title should reflect that.

I object to the increase in the size of this land parcel, all of which is in the greenbelt.

I object to the intended mitigation regarding traffic at Clandon/Send junction as this will do nothing to protect the local area. Traffic from this site will predominantly be travelling towards London in the morning, as is reflected around the home counties, thus the impact will be felt at Jct 10 /M25. Air pollution and congestion at this junction is severe and further traffic movements will increase the problem.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the proposed Wisley Airfield development which would have an enormous unquantified impact on the surrounding villages. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

2. THREE FARMS MEADOWS SITE (Wisley Airfield) Policy A35 I STRONGLY OBJECT to the plonking down of a new town of some 2000 new houses in the middle of the greenbelt in the middle of nowhere. This planning application was unanimously rejected by the GBC planning committee recently on 14 separate grounds. The site is miles away from any public transport, is on a site that floods regularly and is surrounded by narrow, muddy, winding, unlit country lanes. The addition of at least 4000 cars will cause a constant gridlock throughout the area. An assumption that residents will walk or cycle to reach amenities is totally unrealistic. An infirm pensioner cannot be asked to walk along these narrow lanes to the doctor and to expect them to cycle is madness. There is no employment nearby which would result in a huge growth of commuter traffic on the A3 and nearby country lanes causing more pollution and traffic jams.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the proposed development of more than 2000 houses on the site of the former Wisley Airfield as the impact of this on the Horsleys which are less than 2 miles away would be completely unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We refer to our letter dated 23'd June and would ask you please to note our further objection/comment as follows -

1. We are of the view that the proposal to create the equivalent of a new town development on the former Wisley Airfield site (Paragraph 4.3.17 and Policy A35) and to remove the area from the Green Belt amounts to an unjustified incursion into the Metropolitan Green Belt and a contravention of the existing Green Belt regime. Kindly note our objection therefore to this item of the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The Wisley Airfield site should be removed from the Plan. It is astonishing that this site has been included in the proposed Plan given that its planning application was unanimously rejected by GBC's Planning Committee. This site should remain in the Green Belt as it serves a vital role in protecting against urban sprawl from London. Again, there are no exceptional circumstances to justify its removal from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

• The Wisley Airfield site should be removed from the Plan. It is astonishing that this site has been included in the proposed Plan given that its planning application was unanimously rejected by GBC’s Planning Committee. This site should remain in the Green Belt as it serves a vital role in protecting against urban sprawl from London. Again, there are no exceptional circumstances to justify its removal from the Green Belt.

To conclude, it is my opinion that the Local Plan is flawed, and is riddled with inaccuracies and unsubstantiated conclusions. It is a development-led, not needs based Plan, and has been devised using an overinflated housing target either by design or through incompetence. It is clear that the same type of errors and deceits are being repeated as with the 2014 Draft Local Plan despite the changes to the senior personnel responsible for the Plan.

I urge GBC to stop the current process and set about producing a Plan that is focused on housing need, not economic or commercial growth, and which is based on sound and transparent data.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. The legal requirements

The Planning and Compulsory Purchase Act 2004 (the Act) states at s39 regarding Sustainable development:

1. 1. Statutory requirements regarding sustainability

2) The person or body must exercise the function with the objective of contributing to the achievement of sustainable development.

- For the purposes of subsection (2) the person or body must have regard to national policies and advice contained in guidance issued by-

- the secretary of State for the purposes of subsection (1)(a) and (b);

- The National Assembly for Wales for the purposes of subsection (1)(c).

National policies which the Act requires CBC to have regard include those set out in the National Planning Policy Framework (NPPF) at, for example, paras 10, 14, and 17.

Para 10 states "Plan s and decisions need to take local circumstances into account, so that they respond to the different opportunities for achieving sustainable development in different areas".

Para 14 states "Local Plans should meet objectively assessed needs... unless, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits,

When assessed against the policies in this Framework taken as a whole; or - specific policies in this Framework indicate development should be restricted."

Para 17 sets out 12 core planning principles. These include
Be genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area.

Take account of the different roles and character of different areas,

promoting the vitality of our main urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving rural communities within it;

Contribute to conserving and enhancing the natural environment and reducing pollution. Allocations of land for development should prefer land of lesser environmental value, where consistent with other policies in this Framework;

conserve heritage assets in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations;

actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable; and

Take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs.

Support the transition to a low carbon future in a changing climate,

- Failure to apply or to apply properly the legal requirements concerning the conservation of the land at the former Wisley airfield, the Parish of Ockham and the Ward of
- The evidence base contains errors regarding this site.

For example, the settlement hierarchy gives a wholly inadequate and inaccurate description of the village of Ockham. Ockham is not a nuclear village with one village center. It is a collection of agricultural settlements distributed around the Parish.

This YouTube video provides a more accurate and fuller picture of the Parish of Ockham and the place of the land at the former Wisley airfield within it:-

http://youtu.beNVnUUDSxKJk

- No legal argument or relevant facts are produced to justify taking the land out of the Green Belt

GBC engaged Pegasus Consulting to carry out a 'Green Belt and Countryside Study'. However, the question of whether there exist 'exceptional circumstances' for changing the Green Belt boundaries as required by NPPF 83 is expressly not included in Pegasus's remit.

The Green Belt and Countryside Study therefore does not produce relevant evidence. It does not answer the logically prior question. Without first knowing the answer to the logically prior question, it cannot be known if Pegasus' work is required.

S 22 of Vol V of the Green Belt and Countryside study seeks to analyse whether or not this site meets the purposes of the Green Belt. However, this is not a relevant argument. There must logically be a presumption that the land satisfies the purposes otherwise it would not have been put into the Green Belt in the first place or have survived through successive local plans.

If no exceptional circumstances exist to justify removing this site from the Green Belt then the Pegasus report is a waste of public money. The various misdescriptions of the site would still be irrelevant even if they were accurate. For example, Pegasus states that the land is an Airfield. That is not correct. No planes have flown from this site since 1972. 75% of the site is countryside - either actively cultivated or wood and grassland. But even if the site were an airfield it would make no difference to its Green Belt status.
Pegasus purports to analyse whether the land meets the 'purposes' of the Green Belt. This analysis is motivated by a desire to show that the land should not be in the Green Belt. But Pegasus is applying the wrong test. The correct test is whether there are 'exceptional circumstances' - a test which Pegasus excludes from its remit.

The Judge in the COPPAS case stated: 'I would hold that the requisite necessity in a PPG 2 paragraph 2.7 case like the present - where the revision proposed is to increase the Green Belt - cannot be adjudged to arise less some fundamental assumption which caused the land initially to be excluded from the Green Belt is thereafter clearly and permanently falsified by a later event. Only then could the continuing exclusion of the land from the Green Belt properly be characterised as "an incongruous anomaly". The test applies symmetrically if the intention is to remove land from the Green Belt.

Nowhere does the local plan makes the argument that some fundamental assumption has been clearly and permanently falsified or produces evidence to support it. Far from some fundamental assumption which caused this land to be included in the Green Belt being falsified - the subsequent development of the surrounding towns and cities has in fact fortified rather than weakened the original assumptions.

Pegasus uses the purposes of the Green Belt which are defined in the NPPF to test the Green Belt in the borough of Guildford. Pegasus makes a presupposition that the NPPF definition is the only determinant of the value of any particular part of the Green Belt. The definitions in the NPPF are necessarily general because they must apply to all Green Belts across the entire country. The tests chosen by Pegasus are not logically the only tests or even the most relevant tests. Apart from looking at the most general definition of a Green Belt in the NPPF it is also legitimate, indeed essential, to consider the purposes of the specific Green Belt under consideration. The Green Belt in the borough of Guildford was not established to protect Guildford but to serve the Metropolis of London. A highly relevant consideration or test is whether part of that Green Belt serves the Metropolis. Pegasus fails to consider this at all. Whether the land serves the Metropolitan Green Belt is, nonetheless, the single most important consideration. Does the land at the former Wisley airfield serve the overriding purpose of the Metropolitan Green Belt? Any disinterested evaluation must conclude that it does.

Just to demonstrate how self-serving and prejudiced the Pegasus report is it is worth looking at its statements about whether this land meets the purposes of the Green Belt:

**Purpose 1: to check the unrestricted sprawl of large built-up areas**

Pegasus state: Due to the airfield site not adjoining the main urban areas within the borough, it does not offer the opportunity for such urban areas to sprawl in it. As a result the Green Belt does not serve this purpose in this location.

This statement is not correct in several respects. The site is not, for the most part, even an 'airfield'. The land does not have to 'adjoin' an urban area to serve the purpose of separating urban areas. Nor are the only relevant 'urban areas' within the borough of Guildford. Adjoining boroughs are also relevant. Cobham, Woking/Pyrford, Byfleet, Ripley and Horsley are all 'large built up areas' and the land is centrally placed between all three developed areas. The logic of the argument is fallacious. Taken to its logical conclusion only the last blade of grass between two settlements would serve to separate them - a ludicrous proposition.

Moreover the land serves to separate London and its suburbs to the North from Guildford and its suburbs to the South.

**Purpose 2: to prevent neighboring towns merging into one another**

Pegasus state: Land parcel C 18 did not include any settlements, as a result there was not the potential for development within this part of the Green Belt to result in coalescence between existing neighboring towns, and the land parcel was not considered to serve this purpose accordingly in Volume II.

Rather than set out an argument Pegasus refers to another Volume of their study, which is hardly helpful. Only the most pedantic and literal of interpretations can deny that the land separates Ripley Cobham, Byfleet, Woking and the Horsley's.
The map below from Surrey County Council shows how the land at the former Wisley airfield ('Three Farms Meadow') is strategically positioned on the watershed between two river valleys and separates Cobham, Horsley, Ripley, Woking and Byfleet:

The land preserves the setting of the ancient settlements of Ripley and Ockham and Cobham.

Purpose 3 to assist in safeguarding the countryside from encroachment

S22 concedes that the land serves this purpose. It could not do otherwise. The land is countryside.

Purpose 4: to preserve the setting and special character of historic towns;

S22 argues that there are no historic towns nearby. Ripley is nothing if not an historic town situated on the main route between London and the Royal Navy in Portsmouth. Ockham and Wisley are nothing if not historic villages.

Purpose 5: to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

Pegasus' comments are incoherent. All Green Belt land serves this purpose by obliging developers to look to brownfield land first.

In short the consultants employed by GBC seek to undermine the land's Green Belt status in order to remove its protections from development. This approach is a waste of time and money. The logically prior question of whether or not 'exceptional circumstances' exist should have been asked and answered first.

- the land is not a sustainable site for a new town

The site does not meet GBC's own criteria for sustainability. The s 22-report states

'At present the Wisley Airfield PMDA C18-A would score very poorly in sustainability terms because there are no facilities and services in place.'

- Infrastructure

The evidence base gives inadequate consideration to whether local infrastructure has any spare capacity for more houses - beyond what is needed to meet local demand. Para 162 of the N PPF is not properly complied with.

2.3.1 School capacity is in the area is already at capacity and the hypothetical capacity which is mooted for the site is insufficient

The s22 report conjectures that provided the site is sufficiently large and attracts a sufficiently large population the site may attract services and facilities:

"For these reasons it is not considered helpful to provide a specific potential sustainability score for the site, but instead provide a range of scoring that would appear feasible, the centre point of which is based upon the following assumptions."... "In accordance with the IHT 'desirable' walking distances identified within Volume II, Table 5.3, the following could realistically be provided:

Primary School - 500m or less Nursery - 500m or less Healthcare facility - 500m or less Local Centre - 200m or less Community Centre - 400m or less"

This analysis is completely arbitrary. An analysis which is limited to 'walking distances' is completely trivial. No serious examination of the existing school capacity in the rest of the ward and borough is made. Any new provision which might become available at a 'new town' is unlikely to be viable for many years. In the interim the residents of the new town would be completely dependent on facilities in other neighbouring settlements. At present there is a substantial shortage of available school capacity in the area. The main primary school, The Raleigh in West Horsley is overflowing to the
extent that its playground is now completely filled with temporary classrooms. The nearest secondary school is in Effingham and is unable to cope with existing demand. The next nearest secondary schools are in Guildford and Woking. Travel times from this area to Guildford and Woking are not appropriate for school children.

- Road transport access is inadequate/nonexistent Access via Elm Corner

The site currently has an access via the hamlet of Elm Corner -which forms part of the Parish of Ockham. Elm Corner does have an access onto the A3. But it has no acceleration and deceleration lane. It is consequently very dangerous. The Highways authority tolerate this situation because a) it has been there since before the A3 was turned into a three-lane motorway b) the number of cars entering and leaving Elm Corner is very low -as there are so few houses. However the Highways Authority has in the past refused permission for filming projects to access this site from Elm Corner on the grounds that large flows of daily traffic would impede the flow of traffic on the A3 and cause a traffic hazard. Given this, it is absolutely inconceivable that the Highways Authority would ever permit access to a ‘new town’ of 2,500 houses via Elm Corner.

Access via a planned new road onto the roundabout at Ockham Road North/Stamford Brook

This roundabout provides an exit for southbound traffic on the A3 to Ripley and the Horsley’s. It also provides access to the northbound lane of the A3. It provides no access to the southbound carriageway of the A3 going to Guildford/Portsmouth.

Wharf Land, from which WPI purchased the site, received permission to use 17 out of 17ha of the site as a waste processing facility. They won this permission on appeal to a planning inspector. They got permission subject to over twenty different conditions and because the Inspector accepted that the Surrey Waste Plan was short of waste sites.

That permission cites as a condition the building of a new access from the southbound carriageway of the A3.

Permission for an access for a waste site does NOT constitute ‘permissioned access’ for a new town. The new town and the waste disposal site are mutually exclusive projects: they cannot both proceed as the new town proposes to use the acreage set aside for the waste plant.

The permission to access the A3 is exclusively for a waste site. The permission is not transferable to a new town proposal. First WPI need permission from SCC to relinquish the 17ha now set aside for waste processing. That permission is not a foregone conclusion. Second, WPI needs to re-apply for permission to build an access for a 2,100-house new town. That is not a foregone conclusion either.

- Local roads already at capacity

The A3 is already at capacity. Every morning the A3 slows to a standstill or to a crawl between the Ripley turn off and the M25 on the northbound carriageway. Traffic through Cobham High Street (A245), Ockharn Road North through East Horsley (B2039) and Byfleet Road (A245) are already at capacity during the rush hour. Everyone who uses these roads knows that very long tail backs are already a regular occurrence.

SCC Options Growth Scenarios Transport Assessment Report confirms that a new town would take traffic conditions to a state of flow breakdowns.

GBC has commissioned SCC to do a traffic analysis -of the impact of ALL of the proposals in the Local Plan.

This analysis is set out in the Local Plan ‘Evidence Base’.
The WPI new town is a small part of the overall analysis -which itself is subject to some major provisos:

1. It is based on 'trip analysis' data derived from an out of date census in 2001 - at least 10 years
2. It is based on data provided by GBC -and not disclosed or It is understood this data is from 2009 - ie during a recession.
3. It is top down:

SCC wrote: 'This study was undertaken at a strategic scale and consequently not all impacts of developments have been identified. However, developments of, and above, a certain scale will require individual transport assessments to be commissioned ...'

Projected Level of Service (LOS)

SCC use LOS to measure road capacity. The scale runs from A to F.

A is 'Free Flow'.

F is 'Every vehicle moves in lock step with the vehicle in front of it, with frequent slowing required. Travel time cannot be predicted, with generally more demand than capacity.

Is there sufficient spare capacity to accommodate a 'new town'? No. Under 'scenario 5'

(the relevant scenario) 'A3 northbound between Ockham and Wisley is rated, guess what, F!

Ratio of Flow to Capacity (RFC)

The other tool SCC uses to measure the performance of a stretch of road is RFC.

'An RFC value greater than 1 means that the stretch of road or turning movement has a higher level of traffic flow than its theoretical capacity. As a result flow breakdown and extensive queues can be expected'

What is the RFC value for the A3 between Ockham and Wisley under scenario 5?

It is 1.02.

Remember that is based on out of date census data.

What is the traffic like now?

Anyone who uses the A3 knows that between Ripley and Junction 10 of the M25 the A3 slows to a standstill EVERY MORNING. (Our children go to school in Guildford. We see this every morning.)

That is the situation today.

Strategic thinking

One of Guildford's strategic advantages is its location between London, Heathrow and Gatwick.

If the traffic on the M25 between Heathrow and Gatwick gets worse - or gets an RFC score of over 85% then Guildford will have shot itself in the foot and destroyed one of its present competitive advantages.

Proposed road closures

To enable a new town at A35 Surrey County Council has proposed the following measures:

- Closure of Ockham lane near Upton Farm
- Closure of Plough Lane
3) Old Lane to be one way from the J3

- Guileshill Lane to be one way from Ripley

The closure of these ancient routes would have a devastating effect on the amenity of existing residents. Journey times from Martyr’s Green to shop in Cobham or Ripley would double. Access to the A3 would take many times longer.

The drastic measures suggested illustrate perfectly that a new town on this site is not sustainable.

New works to facilitate a new town

The developer states that new works on the M25 and A3 would facilitate a new town on this site. They would not. They are required merely to relieve at least in some part the existing congestion. Plans to build a new Jane on the M25 between J1 Q and J14 using the hard shoulder are mere speculation. Even if built a new lane would only supply much needed current capacity - not capacity for new towns.

- Public transport

WPI promote the site as having access to NINE mainline stations within 5 miles. As usual WPI’s statements are at best promotional and at worst just false.

They are Woking, West Byfleet, Byfleet & New Haw and Weybridge on the Woking line and Clandon, East Horsley, Effingham Jnctn and Stoke D’Abemon on the Guildford branch line.

It is a stretch to call the Effingham line a 'main line'. It is a suburban stopping service. The Woking line is, indeed, a main line. But you'll only get on a fast train in Woking or Weybridge.

The distance from Elm Corner at the former Wisley Airfield to Woking is shown as 6 miles on Google maps and over 11 miles for the return journey

Anyone who has ever made this journey will know that it is rare that the journey can be done in less than half an hour especially in rush hour when it can easily take 40 minutes or more.

The distance from Elm Corner to Weybridge is shown as 6.9 miles on Google maps. If you don't get stuck on Byfleet Road in the rush hour you'd be lucky to do the journey in less than 40 minutes.

WPI claims that buses will run with a 10-minute frequency. None currently exists in Ripley Horsley or Cobham. This is pure marketing puff.

- The site is too small to be sustainable on the basis of the evidence provided

Pegasus state that a site area of at least 110 ha is required to support a 'sustainable' site. GBC included neighbouring land in the site without consulting the landowners. That indicates a clear bias in favour of development.

When those landowners wrote to GBC to state that their land was not available and would not be sold, GBC continued to include their land in the site until challenged in writing with an opinion from Leading Counsel.

After receiving Leading Counsel’s opinion GBC reduced the size of the site to 69ha. The number of houses is reduced from 2,500 to 2,100. This represents a site density of 33 houses per hectares without allowing any land for the proposed facilities such as schools and shops and the necessary roads and car parking.

The Issues and Options paper stated that land opposite this site at the Royal Horticultural Society was NOT suitable for development as being a) reliant on car transport b) requiring inappropriate housing densities and c) being too close to the Special Protection Area (SPA) around Ockham Common. Identical arguments apply to this site. The failure to apply the same logical to sites within a few hundred metres of each other is yet another indication of prejudice.
Environmental limits

The UK Sustainable Development Strategy 2005 states that development should have regard to 'Living within environmental limits'. This local plan gives no consideration to these. The sustainability appraisal is not complete. The requirement of NPPF para 165 has not been met.

Habitats Regulations Assessment

When the consultation process for the first draft of the local plan began GBC did not have a Sustainability Assessment. The HRA was not completed until AFTER the draft local plan was sent out to consultation. The consideration given to A35 in the HRA is perfunctory. It merely 'parks' the issues:

Development of a new settlement could lead to effects on the Thames Basin Heaths SPA, through reduced air quality from associated transport movements and increased recreational pressure.

Other comments are wrong and/or banal:

Release and designation of Green Belt land in itself does not have HRA implications; however, a strategic approach to support the integrity of the Thames Basin Heaths management strategy would be beneficial.

The serious problems of attracting more visitors to the SPA/SSSI at Ockham Common are mentioned but not seriously addressed:

Increased access to the countryside needs to be managed in a way that does not lead to increased recreational pressures on the Thames Basin Heaths.

The evidence suggests that GBC could not be trusted to provide the necessary 'management'

Ockham is not discussed at all in the document. It appears in a list of 'Hamlets' and there is a statement that a 'settlement hierarchy' designation does not have HRA implications. That statement is not self-evidently true - especially in relation to creating a new town in the centre of Ockham which would be the third largest settlement in the entire borough.

SNCI

The available evidence for Sites of Nature Conservation Interest is nine years out of date. The whole of the land owned by Wisley Property Investments Ltd within AJ5 has been proposed as an SNCI:

If the new town comprises 2,100 houses and if their pet populations follow the national averages then the new town will bring approximately 350 new cats and some 500 new dogs to the area immediately adjacent to the SPA. It is not credible that it will be possible to exclude these from the SPA.

This site is too close to the SPA. Part of the site is an SNCI which the local plan proposes to build on. The SNCI is part of the 'living landscape' and forms an essential corridor through which wildlife can migrate to and from Ockham and Wisley Commons.

The local plan proposes using a substantial proportion of the site as a Suitable Alternative Natural Greenspace or SANG. The purpose of a SANG is to attract the public AWAY from the SPA. A SANG adjacent to the SPA is likely to have the opposite effect. The choice of location for the SANG is driven purely by expediency (for the developer) and is otherwise irrational.

Information about the wildlife on Ockham Common can be found in this YouTube video:

http://youtu.be/IHdoj-8tfO

Heritage Assets
The evidence base for this is nonexistent. The Council has had years to consider this. It has carried out some Conservation Area Character appraisals. Unsurprisingly it has not done one for Ockham and Ripley. Without such an appraisal how can the Council claim seriously to have properly evaluated whether Ockham is a suitable and sustainable site for the third largest town in the borough?

There are several Conservation Areas in the ward - the largest being Ripley Village itself. There are 49 Listed Buildings in Ripley, 29 in Ockham and 6 in Ripley. Despite this no assessment of the heritage assets in Ripley Ockham and Wisley has been completed. This is contrary to the requirements of The Listed Building and Conservation Areas Act 1990 and NPPF para 126 and 132.

Information about the Heritage of the Parish of Ockham can be found in this YouTube video:

http://youtu.be/Pb0i6Jgbst0

- Rural economy

It is a core principle of the NPPF (set out in para 17) that planning should support thriving rural communities. Ockham has thriving rural communities with several businesses based on agriculture and horse riding and stabling. The removal of up to 1 14ha of land which is currently actively farmed will cause irreparable harm to the local rural economy and is likely to result in permanent job destruction.

nowhere does the local plan make any consideration of this.

This local plan should be condemned for failing to follow the planning principles set out in NPPF para 17 and failing to set out all the required evidence and to justify its proposals. GBC is culpable for

- putting this site into the local plan without legal or factual This has wasted everyones time and money
- putting the site into the local plan before critical parts of the evidence base are available or complete - as described above
- seeking to draw conclusions about the development potential of the site which are not justified by the facts
- not taking account of public feedback from the Issues and Options consultation
- collusion with the developer - to the extent of 'regulatory capture'

The attempt to take this site out of the Green Belt in collusion with the developer without relevant evidence or legal argument is a disgrace.

The definition most widely accepted globally is the 1987 United Nations one from the Brundtland Report: "Development that meets the needs of the present without compromising the ability of future generations to meet their own needs". Developing this site is not consistent with the principle of sustainability.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 5.PNG (529 KB) 4.PNG (400 KB) 6.PNG (231 KB) 8.PNG (4 KB) 7.PNG (272 KB) 1.PNG (358 KB) 3.PNG (353 KB) 2.PNG (292 KB)
No legal argument or relevant evidence to support the development of this Green Belt site has been presented.

Development of the site contravenes the NPPF para 83 and para 89, inter alia.

1. The references to site allocation A35 in the local plan

There are a limited number of references to this site in the Local Plan Strategy and Sites document, specifically in

- section 3 (SpatialVision) where it is stated that a new settlement will be created at this site,
- Policy S2,
- para 3.17 where it states whilst the general extent of the Green Belt has been retained, land has been removed from the Green Belt in order to enable development around Guildford urban area, selected villages, and at the former Wisley airfield. The Green Belt boundary has also been extended between Ash Green village and the Ash and Tongham urban area in order to prevent coalescence.
- Appendix C on infrastructure.

Policy P2 Green Belt

Policy P2 - inside the Blue Box - does not mention site A35. The policy states, 'We will continue to protect the Metropolitan Green Belt, as shown on the proposals map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.'

Since the former Wisley airfield is designated Green Belt one might at first sight conclude that it was protected by Policy P2 which 'will continue to protect the Metropolitan Green Belt....against inappropriate development..'.

However the promise is qualified by reference to the 'proposals map' - which one supposes must refer to the 'Policies Map'.

[1]

However the former Wisley airfield is mentioned in the supporting paragraphs to Policy P2:

4.3.16 National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. We consider that exceptional circumstances exist to justify
the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of develop

4.3.17 Whilst the general extent of the Green Belt has been retained, land has been removed from the Green Belt in order to enable development around Guildford urban area, selected villages, and at the former Wisley airfield. The Green Belt boundary has also been extended between Ash Green village and the Ash and Tongham urban area in order to prevent coalescence.

Site A35 is also mentioned in Policy 14 'Green and Blue Infrastructure' where it is mentioned as a previously developed site, and at Policy S2 'Borough wide strategy' where it is mentioned as contributing 2,000 houses.

A word search confirms that there are no other references to this site in the Strategies and Sites document.

2. The local plan is devoid of legal argument or relevant evidence to support the development of the former Wisley

All the references to the former Wisley airfield in the Strategies and Sites document are cited in part or in full above. It is remarkable that not one legal argument and not one piece of relevant evidence is evinced to support the proposition that this Green Belt site should be developed.

The complete absence of any attempt to provide legal argument and relevant evidence is so remarkable as to be astonishing and extraordinary.

Far from providing positive legal argument and relevant evidence to support development nothing is advanced to counter objections arising from the obvious and multiple contraventions of the NPPF.

Since no positive legal arguments are advanced the public is unable to refute them. It is faced with the administrative injustice of being asked to respond to a consultation about a governmental decision that has not yet been made and a potential action that is contingent on future argument.

In case the argument is run that the legal justification for changing the Green Belt boundaries is set out elsewhere in the evidence base, it should be noted that the authors of the Green Belt and Countryside Study explicitly and expressly state that it was NOT part of their remit to consider whether exceptional circumstances exist. On page 3 of Vol V Pegasus expressly state that evaluation of exceptional circumstances is not within their remit:

18.4 Whether exceptional circumstances exist will depend not only on the site specific circumstances but the wider background also. For example, if it is established that suitable alternative locations can come forward to provide for the necessary level of housing for the borough, then it is possible that exceptional circumstances will exist subject to the assessment of other considerations put forward in paragraph 116 of the NPPF.

18.5 It is not within the remit of this Study to assess whether exceptional circumstances exist to enable major development, and there is clearly some uncertainty over what GUILDFORD BOROUGH GREEN BELT AND COUNTRYSIDE STUDY 4 should be classed as major development in such instances. As a result, any PDAs that are Identified in this Study within the AONB would require closer scrutiny by the Cot.nec prior to any allocation being made. This would take account of the latest information at the time before conclusions can be drawn on, firstly whether exceptional circumstances need to be demonstrated, and secondly if they can be.
In the absence of any positive legal case being presented for changing the Green Belt boundary at site A35 no further consideration should need to be given to this matter. The proposition is self-evidently contrary to the NPPF and it is an abuse of administrative power to force this site into the draft local plan and oblige the public to consider a completely hypothetical and unsupported proposition.

3. Proposed development of site A35 would contravene the NPPF’s protection of the Green Belt - set out at para 83.

Most obviously the NPPF protects the Green Belt against inappropriate development. Since the former Wisley airfield is in the Green Belt all development of it is by definition inappropriate.

Para 83 NPPF states:

83. Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.

The local plan omits to mention ANY exceptional circumstances. GBC has not properly set out coherent legal argument and relevant evidence to show that exceptional circumstances justify altering the Green Belt boundaries to exclude this land from the Green Belt. I attach GBC’s disclosure of its understanding of the meaning of exceptional circumstances. This is not consistent with the more stringent definition of the meaning of the words set out in the legal precedents laid down by the courts, in particular the Court of Appeal. For the avoidance of any doubt, the courts have held that the mere process of creating a local plan does NOT itself constitute an ‘exceptional circumstance’. 

Advice given by Mr David Vickery (of the Planning Inspectorate) to St Albans in 2009 stated:

5) The numbers of houses presently needed on Green Belt land and their approximate locations should be stated. The exceptional circumstances that require this course of action should be stated. Any suggested location should be sustainable and have as little effect as possible on the Green Belt. If possible, the need for Green Belt release should be phased to the end of the plan period so that the detail of the sites and their boundaries could be devolved down later Site Allocators DPD using regional and national guidance. If selection, together with any local criteria that may be appropriate to state in the CS. The CS would also have to say (or delegate the I task to a later DPD) what would be the mechanism or circumstances that would trigger the release of Green Belt land for housing.

I attach the full note of Mr Vickery’s advice to St Albans.

GBC’s draft local plan does not adhere to this advice because this site (site A35) is in the
Green Belt and the exceptional circumstances that require building on it have not been stated. Moreover the site is demonstrably NOT sustainable.

3. Proposed development of site A35 contravenes declared government policy.

Eric Pickles wrote to Sir Paul Beresford MP on 4 August, 2014 as follows:

Our National Planning Policy Framework asks local authorities to plan to meet locally assessed housing needs in full. It is up to each local authority to decide how best to meet its objectively assessed housing need (and other development needs), whether through a Green Belt review or not. However, there has been no weakening of policy in this area: the Framework is quite clear that permanence is one of the essential characteristics of Green Belt, and it emphasises that Green Belt boundaries may be altered only in exceptional circumstances. If a local authority considers that adjustments to such a boundary are essential, they can be taken forward only through the Local Plan process. We have also made clear that it must always be transparent that it is an authority itself that has proposed reviewing its Green Belt.

Nick Boles wrote to Sir Paul on 7 February, 2014:

Green Belt protection

My letter to you emphasised the importance we continue to attach to Green Belt as a way to prevent sprawl and encroachment on open countryside. The National Planning Policy framework provides strong protection: It states that permanence is an essential characteristic of Green Belt, that inappropriate development in Green Belt should not be approved except in very special circumstances, and that a Green Belt boundary may be adjusted only in exceptional circumstances, using the Local Plan process of consultation followed by independent examination.

4. Proposed development of site A35 is not eligible for any of the exceptions in NPPF para 89

GBC do not advance the argument that the site may be developed under any of the exceptions provided for in para 89 of the NPPF.

It is correct not to do so.

It is dubious whether much if any of the site meets the definition of 'previously developed land'.

The NPPF definition of previously developed land is:

**Previously developed** land: Land which is or was occupied by a permanent structure, including the curtilage of the developed land (although it should not be assumed that the whole of the curtilage should be developed) and any associated fixed surface infrastructure. This excludes: land that is or has been occupied by agricultural or forestry buildings; land that has been developed for minerals extraction or waste disposal by landfill purposes where provision for restoration has been made through development control procedures; land in built-up areas such as private residential gardens, parks, recreation grounds and allotments; and land that was previously-developed but where the remains of the permanent structure or fixed surface structure have blended into the landscape in the process of time.

The land was previously used for war-time purposes and 'provision for restoration was explicitly made'. War time purposes do not come into the NPPF definition of previously developed land. But in all justice they should - especially where *provision for restoration* was made by HM Government and then subsequently reneged upon.
Even if reliance is not placed on the implied exemption for land for which 'provision for restoration' was made, it is the case that the former Wisley airfield falls into the exclusion (to the exception) set out in the definition, namely 'the remains of the permanent structure or fixed surface have blended into the landscape in the process of time.'

The original structures were ALL removed when the land was sold back to its original owner under the Crichtel Down code provisions as agricultural land in 1980. The runway was not removed for reasons of cost. It is not accepted that the runway falls within the meaning of 'fixed surface structure'. But even were it to be accepted purely for the purpose of argument it has blended into the landscape in the process of time. The present development proposals envisage NO reuse of any part of the original structures.

Para 89 NPPF states

89. A local planning authority should regard the construction of new buildings as inappropriate in Green Belt Exceptions to this are:

- buildings for agriculture and forestry;
- provision of appropriate facilities for outdoor sport, outdoor recreation and for cemeteries, as long as it preserves the openness of the Green Belt and does not conflict with the purposes of including land within it;
- the extension or alteration of a building provided that it does not result in disproportionate additions over and above the size of the original building;
- the replacement of a building, provided the new building is in the same use and not materially larger than the one it replaces;
- limited infilling in villages, and limited affordable housing for local community needs under policies set out in the Local Plan; or
- limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land), whether redundant or in continuing use (excluding temporary buildings) which would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development.

Para 89 provides for previously developed sites in Green Belt to be redeveloped provided that the development 'would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development.'

There is no 'existing development'. But even supposing for the sake of argument that the former runway were deemed to be development despite there being no structures, redevelopment as a 'new settlement' of 2,100 houses could not possibly be considered to have no greater impact than the existing runway.

No more than a very small part of the site could be considered 'previously developed'. The developer's website describes the land as follows:

[2]

The majority of the land is agricultural and that land does not and never has met the definition of 'previously developed'. So by definition development is inappropriate and no exceptions under para 89 are available.
On these figures less than 26% of the site is 'concrete'. However the area of concrete exaggerates the extent of the land which could conceivably be considered 'previously developed', if any. This is because the only part of the concrete which had structures on it, namely the area of the aircraft hangars, is much smaller than 74 hectares. It may amount to less than 30 acres.

Moreover, that area which was formerly covered by aircraft hangars is already subject to a development proposal which has received planning permission for an 'In Vessel Composting Facility' covering some 17 hectares (c50 acres) out of the total land area of 114 hectares. That land is presently not available for house building. If that land is excluded then it appears that none of the land could conceivably be previously developed.

Exceptional circumstances

The Gallagher v Solihull case (April, 2014 High Court England & Wales) clarifies that the NPPF has not changed the previous definition of 'exceptional circumstances'. The judge stated:

'However it is not arguable that the mere process of preparing a new local plan could itself be regarded as an exceptional circumstance justifying an alteration to a Green Belt boundary. National guidance has always dealt with reviews of the Green Belt in the context of reviews of Local Plans ... and has always required 'exceptional circumstances'.

Whilst each case is fact-sensitive and the question of whether circumstances are exceptional for these purposes requires an exercise of planning judgment,

what is capable of amounting to exceptional circumstances is a matter of law and the plan maker may err in law if he fails to adopt a lawful approach to exceptional circumstances. Once a Green Belt has been established and approved, it requires more than general planning concepts to justify an alteration.'

In Carpets of Worth v Wyre Forest District Council (1991) ('Carpets of Worth') March, 1991 (Court of Appeal) the judge stated:

'As it directly prejudices landowners in the otherwise proper development of their land, an extension to the green belt should not be brought into effect unless it can be justified directly by those purposes for which the green belt is designed. There must, therefore, be an inhibition in extending a green belt so as to avoid sterilising unnecessarily neighbouring land ... just as much as reduction in the boundaries of the green belt, which would prejudice the purposes of that green belt, must be made only in exceptional circumstances. On this basis I think that the general concept of the advice in the circulars is that once a green belt has been established and approved as a result of all the normal statutory processes it must require exceptional circumstances rather than general planning concepts to justify an alteration. Whichever way the boundary is altered there must be serious prejudice one way or the other to the parties involved.'

The Local Plan proposes to change the Green Belt boundary in Ockham. It does not set out this change clearly and unambiguously in prose. It is done by reference to a 'Policies Map' from which one is supposed to infer the change.

The change is to make my garden hedge the new Green Belt boundary. An organic feature such as a hedge is impermanent and is not therefore a 'defensible' Green Belt boundary. Moreover the change in the boundary is a serious prejudice to me as a neighbouring landowner. My property has been in the Green Belt for 50 years and my development rights have been restricted accordingly - as have the rights of all the neighbouring landowners. I have been obliged to maintain the open character of the Green Belt. But now my neighbour, Wisley Property Investments Ltd, is to be suddenly freed from the constraints of the Green Belt and to be allowed to construct the third largest town in the borough within metres of my property around some 240 yards of my hedge and utterly change forever the setting of my house, a Grade II fifteenth century farmhouse and garden laid out in 1975 by Russell Page.
GBC is proposing to make this change without making a proper demonstration that the agricultural land adjacent to my property is a sustainable site for a new town and without setting forth ANY exceptional circumstances. This procedural irregularity shows complete disregard for planning law.

Summary

This letter sets out only a few of the many valid objections to the development of the site. It is little short of astonishing that this site has been taken forward into the local plan despite the numerous legally argued and factually evidenced objections already received by GBC as part of the Issues and Options consultation process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

OBJECTION: evidence base shows no sequential testing of alternative sites

Before selecting a site in the Green Belt for development the promoter, Wisley Property Investments Ltd, a Caymans company, and Guildford Borough Council have an obligation to establish that there are not other more suitable sites to develop outside the Green Belt. In other words, the developer and Guildford Borough Council should apply a 'sequential test'.

The evidence base does not evaluate alternative sites or show that agricultural land at the former Wisley airfield in the centre of the Parish of Ockham is suitable for development and 'sustainable'.

It is instructive to compare site 56, near Ash, with site 66 (agricultural land at the former Wisley airfield). Although the gross area of land at site 66 is much greater, on a net basis, after allowing for land which must be set aside for SANGS, for the Surrey Waste Plan allocation, and for roads and amenities it is in fact the same size or smaller than site 56. Despite the site being of comparable size when compared on a net basis the number of houses planned for at site 66 is over 2000 while only some 400 houses have been given permission at site 56. This illustrates both the potential for more housing at site 56 and the ridiculously high density of housing required at site 66 to cram over 2000 houses into such a small net area.

I set out below a comparison of the two sites. Any rational analysis of the two sites shows that site 56 is far more sustainable than site 66. For example site 56 is adjacent to a railway station, has existing access to severa l A and B roads. In addition there are a number of primary and secondary schools within walking or cycling distance of the site. This is one of many reasons for objecting to this local plan.

**Opportunities /commentary**

Whilst this area of land is within multiple land ownership, and may come forward for development at different times within the plan period, we expect significant regard to be had to the impact of development on the existing character of the area, and the infrastructure needs. New homes could be provided in this area (of which 45% will be affordable homes*).

*The planning permission granted for up to 400 new homes in this area will contribute 40% affordable housing.

Respondent:  8749121 / George Paton  
Agent:  
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
 OBJECTION Site allocation A35: 'land at former Wisley Airfield'

- Failure to comply with GBC's Probity in Planning Code of Conduct and the Nolan Principles
- Regulatory Capture: colluding with the owner of this site in order to change local planning law by including this site in the draft local plan without justification on the basis of sound planning principles, in contravention of planning law, and in contravention of GBC's Probity in Planning Code
- Misrepresentation of the facts concerning this site
- Predetermination of the decision to promote this site in the Local Plan and to remove it from the Green Belt

1. Failure to comply with GBC's Probity in Planning Code of Conduct and the Nolan Principles

[Response has been redacted due to statements being considered potentially defamatory, derogatory, inflammatory or offensive in nature.]

During the compilation of the draft local plan there have been multiple and serious breaches of GBC's Codes of Conduct.

It is astonishing that a developer has managed to achieve pride of place for its site in both the Issues and Options paper and in the local plan as a site for a new town - despite relevant evidence and legal argument in support of that site being against inclusion.

The owner of Site A35 is a Cayman Islands Company called Wisley Properties investments - which is a holding company for various subsidiaries.[Response has been redacted due to statements being considered potentially defamatory, derogatory, inflammatory or offensive in nature.] WPI is fronted by a conservative Councilor from the Vale of White Horse called Michael Murray.

The Probity in Planning Code of Conduct can be found here:

The Code deals explicitly with 'Pre-Application Discussions (page 4)'. The first three bullets define a clear process.

Councilors will only be involved (primarily for fact-finding) in pre-application discussions on major schemes when a specific forum has been arranged by officers for that purpose.

- In complex or contentious cases, at least one planning officer will be

- A meeting note will be taken by planning officers and placed on the relevant file. In some cases, this might be a previous planning file, in others it might be the general file for the area. Some pre-application discussions are undertaken on a confidential basis and these will be placed in a confidential envelope on the appropriate file.

- It will be made clear that the planning officers are giving provisional views (based on the development plan and up-to-date government guidance); that no decisions are being made and that decision-making rests with councilors at Planning Committee or by the relevant officer under delegated powers.

- Similar issues apply to the development of planning policy. There may be occasions where owners, developers or other interested parties will wish to discuss with councilors aspects of emerging policy in the development plan and other policy

In July, 2014 I requested disclosure of the minutes of meetings between GBC and WPI pursuant the GBC's Probity in Planning Code of Conduct. No response was forthcoming. I therefore complained to the Information Commissioner. Following that complaint I received a response over six months later dated 17 February, 2015 (attached). The council chose to use a public interest defense in order not to disclose the information. It appears that GBC officials themselves took minutes of the meetings - as required by the Probity Code.

There remains no explanation of how the Council managed the conflicts of interest involved in providing pre-application advice and also in acting at a statutory planning authority with quasi-judicial powers. For example no information has
been given as to whether the same personnel were involved in giving the applicant advice and also involved in making recommendations concerning whether the application site was sustainable or whether a subsequent planning application should be refused or recommended.

The Probity in Planning Code of Conduct states that Councilors should 'restrict pre application advice to procedures and policies only' It is clear that Council officials went far beyond restricting pre-application advice to procedures and policies only'.

At best I suspect procedural irregularities and at worst breaches of the Codes of Conduct. Subsequent to the publication of planning application 15/P/000 12 I requested copies of the minutes of the meetings attended by Savills on behalf of WPI as detailed in the planning application. Pursuant to that request I received copies of some but not all of the relevant minutes. Those minutes show that GBC and WPI engaged in a joint strategy to include the site in the local plan with a view to making development possible. GBC officials also advised on where to hold public consultations (in Guildford rather than in Ockham) and how to approach other public bodies such as Natural England.

1. Regulatory capture: colluding with the owner of this site in order to change local planning law by including this site in the draft local plan without justification on the basis of sound planning principles, in contravention of planning law, and in contravention of GBC's Probity in Planning Code.

A35 has been promoted as, inter alia, the 'only' site in the Guildford Green Belt which does not satisfy the criteria for inclusion in the Green Belt and the only sustainable site for a new town in the entire borough. The basis for these statements is not set out in the draft local plan and the evidence base is not consistent with these statements.

GBC has neither maintained a proper distance between itself and the developer nor adopted a critical attitude to the developer's promotional claims.

The objectivity and impartiality of the planning department in relation to this site is in question. I am reliably informed by a local resident who was present that when the Local Plan proposals were 'road showed' to the public that Mr Michael Murray was allowed to promote the concept of a new settlement on the site to the public. The blatant conflicts of interest between the developer as promoter and GBC as regulator were not disclosed to participants.

GBC's conduct appears to be a classic example of 'regulatory capture'. The quote below from Wikipedia regarding 'regulatory capture' and 'captured agencies' is relevant:

Regulatory capture

From Wikipedia the free encyclopedia

Regulatory capture is a form of political corruption that occurs when a regulatory agency, created to act in the public interest, instead acts in accordance with the interests of those that dominate the industry or sector it is charged with regulating. Regulatory capture creates an opening for firms to behave in ways injurious to the public (e.g., producing negative externalities). The agencies are called "captured agencies".

The planning dept of GBC appears to be colluding with the developer to have this site included in the local plan without any proper analysis of a) the need for a new town b) the relative suitability of other sites in the borough c) the sustainability of this site d) the effect on the SPA at Ockham Common e) the effect on the Heritage of Ockham.

3. Deliberate misrepresentation of the facts concerning this site

The facts about this site have not been accurately presented. Important elements have not been subject to proper analysis.

The effect of the proposed 'new town' on the environment and natural environment has either not been considered at all or inadequately. This is contrary to the requirements of The Listed Building and Conservation Areas Act 1990 and NPPF para 126 and 132.
The effect on local infrastructure has either not been considered at all or adequately. The evidence base gives inadequate consideration to whether local infrastructure has any spare capacity for more houses - beyond what is needed to meet local demand. Para 162 of the N PPF is not properly complied with.

4. Predetermination

On 12 May, 2016 the Leader of the Council, Mr Paul Spooner, was directly quoted in an article in the Surrey Advertiser headed 'Encouragement for developer working to clear airfield hurdles' as follows:

"for us it is simple. Do we, during the plan period of twenty years 2013 to 2033 believe that a sustainable community can be delivered in Wisley? If the answer is yes it will stay in the local plan, if the answer is no it has to come out. I am convinced subject to a whole bunch of things coming together we should be able to deliver a sustainable community at that site to assist in terms of the objectively assessed need. The application that came forward from Wisley (WPI) clearly for me and all the other members did not deliver on that aspiration and hence, as an application, it failed. If they come back

with one or two tweaks, it would fail again. So I think there is a fundamental need in terms of improvement to that application, but will they do that during the plan period? If they don't, I believe someone else will."

That article appeared after 15/P/00012 was unanimously refused by the Planning Committee on 6 April. In the same edition of the Surrey Advertiser the developer took out double full page advertisements promoting a new town on the site.

The Probity in Planning Code of Conduct states that "Council/ ors should avoid making it known in advance of the Committee or similar meeting whether they support or oppose the proposal."

Mr Spooner's comments express a strong opinion that the obstacles to developing a new town on this site can be overcome and will be overcome over the next twenty years. That strong expression of opinion is clearly contrary to the recommendations of the Probity in Planning Code of Conduct. The use of the pronoun 'we' in the sentence 'we will be able

to deliver a sustainable community' and the use of the word 'aspiration' -suggesting that it is GBC"s aspiration - at best shows an inappropriate lack of impartiality and at worst a clear desire as Leader or the Council and Lead Member for the Local Plan to promote development on the site.

Of the 'whole bunch of things coming together ' one critical pre-condition is the removal of the site from the Green Belt - which was one of the reasons for refusing application

15/P/00012. The statements follow the clear collaboration shown in the minutes of the meetings between Savills and GBC to use the local plan process and the OAN as the necessary 'exceptional circumstances ' required to justify removing the site from the Green Belt.

Taken together with GBC's conduct over the past three years the statements are further evidence that GBC has predetermined that this site should be removed from the Green Belt and deliberately commissioned consultants to produce reports which could be used as evidence to further that objective.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Local Plan Consultation

Site allocation A35 formerly referenced as site no 66: 'land at former Wisley Airfield'

OBJECTION: evidence base shows no sequential testing of alternative sites

Before selecting a site in the Green Belt for development the promoter, Wisley Property Investments Ltd, a Caymans company, and Guildford Borough Council have an obligation to establish that there are not other more suitable sites to develop outside the Green Belt. In other words, the developer and Guildford Borough Council should apply a 'sequential test'.

The evidence base does not evaluate alternative sites or show that agricultural land at the former Wisley airfield in the centre of the Parish of Ockham is suitable for development and 'sustainable'.

It is instructive to compare site 56, near Ash, with site 66 (agricultural land at the former Wisley airfield). Although the gross area of land at site 66 is much greater, on a net basis, after allowing for land which must be set aside for SANGS, for the Surrey Waste Plan allocation, and for roads and amenities it is in fact the same size or smaller than site 56. Despite the site being of comparable size when compared on a net basis the number of houses planned for at site 66 is over 2000 while only some 400 houses have been given permission at site 56. This illustrates both the potential for more housing at site 56 and the ridiculously high density of housing required at site 66 to cram over 2000 houses into such a small net area.

I set out below a comparison of the two sites. Any rational analysis of the two sites shows that site 56 is far more sustainable than site 66. For example site 56 is adjacent to a railway station, has existing access to several A and B roads. In addition there are a number of primary and secondary schools within walking or cycling distance of the site. This is one of many reasons for objecting to this local plan.

**Complaint**

I am writing to draw your attention to this double page advertisement in the Surrey Advertiser and to complain that

- The advertisement headline is misleading
- many of the written statements are factually inaccurate or false
- the diagrams/graphics/photos are false and/or misleading
- overall, the advertisement presents a false and misleading impression of i) the existing site

ii) proposed new development

- the sustainability of the new
  1. Timing and context of the advertisement

The advertisement has been placed in the interval between the unanimous rejection of the advertiser's application for planning consent by Guildford Borough Council's (GBC) Planning Committee on 6 April this year and the issue of a new draft local plan by the Council.

GBC's reference number for the planning application is 15/p/00012. The application documents and well in excess of 2,000 objections can be found on GBC's planning website: [http://www2.guildford.gov.uk/publicaccess/](http://www2.guildford.gov.uk/publicaccess/)
The applicant is now seeking to persuade Councillors to retain its site within the draft local plan. The advertisement is clearly an attempt to influence decision makers (ie borough councilors) by means outside the regulated planning process at a particularly sensitive time.

1. Factual inaccuracies

The following written statements in the advertisement are factually wrong and/or misleading:

- "It has a consented direct connection to the A311 [this is the advertiser’s bold lettering - in green in the advert]

Planning application 15/p/00012 applied for permission to access the A3. That application was unanimously rejected by the planning committee.

The only vehicular access to the site at present is via an entrance on Ockham Lane. That entrance was created primarily for farm vehicles for farming purposes. There are no buildings or premises on the site. That entrance is kept locked. Ockham Lane is an HGV restricted minor road.

The former vehicular access at Elm Lane - which leads from the A3 has been permanently closed with a bund for many years.

Access via Elm Lane to and from the A3 for large volumes of traffic has consistently been refused by the Highways Agency because of the dangers caused by traffic emerging onto the fast flowing three lane strategic road network. In short there is currently NO access to the site to or from the A3 via Elm Lane. This can be verified by visiting the site and viewing the bund and by asking Highways England.

So the only 'consented direct connection to the A3' that the advertisement can relate to is that in the report of the Planning Inspectorate in 2010 granting permission to use some 16ha of the site for a waste composting facility. The Inspectorate report is attached for your information. The permission was subject to the 37 conditions set out in Annex 3 of the attached document. Relevant parts of the document are highlighted in yellow. Note in particular conditions 10-15 concerning highways and access. These conditions explicitly state that the waste composting development may not proceed unless and until an access to the A3 via the Ockham interchange has been built. Neither the development in question nor its road access have ever been built.

The statement in the advertisement is that 'it', meaning in the context of the advertisement the whole of "Wisley Airfield," has a consented direct connection with the A3". That is false and misleading. The whole site does not have any consented direct connection:

1. The consented connection is exclusively for a waste composting facility - covering at most some 16ha out of a total of 115ha
2. The consented connection is not "direct". It is a connection via a new road connected in the first instance to the roundabout below the That roundabout affords access to ONLY the northbound carriageway of the A3, not to the whole A3 ie both the northbound and southbound carriageways
   - The consented connection is for a very limited number of vehicle These are specifically HGVs serving the facilities and the movements must not exceed 36 two way movements per day. The planning application, by contrast, proposed to build 2,068 dwellings.

It is reasonable to assume an average of two cars per household. If further traffic is added to the total for access two and from two schools and still further traffic caused by the closure of four local lanes the volume of traffic ensuing from this development is very material. It is highly misleading to imply that the whole site has 'consented direction connection to the A3' for in excess of 5,000 cars when currently there is no access whatsoever and the only permission is to access a small part of the site for a specific purpose by no more than 36 HGVs per day. The statement in the advertisement is therefore false and misleading.

The advertiser's website (to which readers are drawn by the advertisement) makes further exaggerated or false claims regarding the transport links to this site:
The Airfield is very well connected. It's got a direct, consented connection to the A3 and is within five miles of nine mainline railway stations. Effingham junction is just a six minute cycle away.

As set out above, the airfield, which is not an airfield and has not been since 1980, has NOT "got a direct consented connection to the A3".

Nor is it "within five miles of nine mainline railway stations". The only mainline railway stations are Woking and Guildford.

Elm Lane to Woking railway station via A367: distance by road Gmiles; return distance by road via A367 8.Gm (All distances from Google maps)

Elm Lane to Guildford railway station via A3:8.8m; return journey 11.lm

Secondary railway stations for slow, stopping trains are Effingham Junction, Stoke D'Abernon, East Horsley and Clandon - all on the same branch line; and Worplesdon and West Byfleet on the Woking line.

Elm Lane to Effingham Junction by car: 3.4m Elm Lane to Stoke D'Abernon by car:6.3m Elm Lane to East Horsley by car: 3.Gm

The statement about the site's distance from nine mainline stations or any stations at all is false and misleading. In fact, given the number of suburban railway stations in this part of Surrey it is not legitimate to argue that it is located any closer to railway stations in general than thousands of other sites.

Nor is the site a 6 minute bicycle ride away from Effingham Junction - the nearest station. The site is at least 2.8miles from the nearest railway station, Effingham Junction. The route has a significant hill and takes at least 19 minutes by bicycle. Below I attach a screen print from the Surrey Interactive Map website. The relevant distance is 2.87 miles.

If one cycled at an average of 6mph it would take 29 minutes to cycle to Effingham Junction station:

2.87/6 mph x 60mins = 29minutes

Supposing one cycled it at Omph - it would still take 17 minutes. To do it in 6 minutes one would have to go an average speed of 28.7mph. It is not credible for an ordinary or average cyclist to make that journey in normal conditions in just six minutes. I attach an article written by the Surrey Advertiser. For that article the Surrey Advertiser sent its photographer to the site and he followed me from the middle of the site to Effingham Junction station and verified a) that I did not stop or diverge from the route b) bicycle slowly c) take less than the stated time.

3.2 The site is described as containing the "biggest brownfield site in the Guildford Green Belt". The analysis of the area of the site in a brochure produced by the advertiser is as follows:

Note that the total area of the site is over 283 acres or some 114.7ha. The area of concrete and hardstanding is therefore only 24% of the total. The planning application contains expert reports on the quality of the agricultural land which state conclusively that it is all good quality land of Grade 3 and above, most of it being Grade 3a and Grade 2.

It is misleading to describe the totality of the site by reference to only 24% of it - when the remainder of the site comprises 45 ha (112 acres) of 'Best and Most Versatile' agricultural land which has never been developed and which has been farmed continuously for hundreds of years.
"Brownfield" is a synonym in planning terminology for 'previously developed land', a term defined in the National Planning Policy Framework.

The advertiser’s website states:

Wisley Airfield has a long and distinguished past as a fully operational military and civilian airfield.

This is misleading. It has never been a civilian airfield. Throughout its period of operation it was leased by Vickers/British Aircraft Corporation/Bae for the purposes of testing and transporting planes from its factories near Weybridge. In 1980 there was a public enquiry to decide whether the runway could be used as a civilian airfield. The proposal was decisively rejected.

Even the statement that it was a 'fully operational military airfield' is misleading because the airfield was never an RAF base or used directly by the armed forces. It was an airfield used by a military aerospace contractor - Vickers - an aircraft manufacturer not an operator of a military capability.

The land at the former Wisley airfield was requisitioned in 1942 for 'wartime purposes' on condition it was restored to its prewar agricultural use after the war. (My grandmother was among the leaseholders who gave up part of the land within her lease.)

The wartime purpose was to serve as a grass airstrip for Vickers to use to fly out aeroplanes it was building near Weybridge. Agriculture around the grass airstrip continued throughout the remainder of the war. After the War the land was not immediately relinquished and Vickers continued to use it to test and fly out planes it was building, building a concrete runway in 1950. All flying ceased in 1972 and the site was sold back to its pre-war owner - the Ockham Park Estate - in 1980. It was never an RAF base. It was never a public airfield. It is not correct to describe the land as a 'derelict' airfield.

The use of the land for aerospace purposes by Vickers and its successor companies (finally British Aerospace) ended in 1972. When it was sold to its pre-war owner in 1980 it was totally decommissioned. All the hangars were removed. No buildings remain. The runway should have been removed but was allowed to remain solely to save HM Government the cost of removing it.

The remaining runway is crisscrossed by multiple public rights of way - all restored when the airfield was decommissioned. These could not exist if the runway served any remaining aerospace use.

3.3 "[the site] ...is just minutes from local train stations using one of the planned frequent bus services" bold lettering used by the advertiser - in green in the advert.

The nearest train station is at Effingham Junction, which is 2.6 miles from the centre of the site. There are no public footpaths and no bus services along any of the road connecting the site and the railway station.

The site is described as 'just minutes from local railway stations'. In fact the site is 2.6 miles from the nearest railway station, Effingham Junction. Evidence to support the viability of a planned frequent bus service does not exist. No bus operator has agreed to operate any such route on a current or prospective basis.

The statement that the site is 'just minutes away from local railway stations' is at best a gross exaggeration. At worst it is completely misleading - because there is currently no spare parking capacity at any local railway stations and current services to London are at or near capacity.

3.4 "Over 50% of the site will be green space"

This statement is especially misleading. 'Over 50% of the site will be green space' creates the misleading impression that this will be a low density development. In fact because half the site is within 400m of a Special Protection Area for endangered species, half the site must be set aside for a Site of Alternative Natural Greenspace or SANG. The number of dwellings per hectare on the remainder of the site is extremely high at up to 100 dwellings per hectare, similar to those found in the most densely populated parts of London like Islington.
The green space proposed for the development is described as "a huge new parkland bigger than the County Showground, Stoke Park". The advertisement states: "Creates the biggest park in Guildford Borough". [Bold lettering used by the advertiser.]

This is a highly misleading statement. A SANG is a defined term. It is defined in the legislation creating the SPA. Attached is a Natural England document setting out SANG guidelines. There are material constraints on the use of a SANG which do not apply to an ordinary public park in a town. It is highly misleading to describe a SANG as a park and to compare it to a park in central Guildford surrounded on all sides by development.

Compare the plan in the advertisement with the plan shown on the linked website and proposed to GBC:

The plan in the advertisement is cut in vertically in half (roughly but not exactly by area). However the actual development is divided roughly horizontally ie from West to East. The horizontal division of the site is caused by the northern half of the site being adjacent to the SPA. The narrow shape of the developable site together with the density of dwellings was expressly mentioned as one of the factors in refusing planning consent for 15/p/00012.

The diagram presented in the advertisement is particularly misleading because the northern half of the site cannot be developed at all.

- The Advertisement headline states:
  "A sustainable new community for Surrey"

This headline is also misleading. It presents the development as 'sustainable'. However planning permission for a development on the site has just been unanimously refused in large part because the proposal was NOT sustainable. For example Highways England stated that the development was likely to have a severe negative impact on the Strategic Road Network.

The entire site is situated exclusively within the Parish of Ockham. The site is not in or part of Wisley and does not communicate with Wisley in any way. The Settlement Hierarchy in the Guildford draft local plan lists Ockham as the second least sustainable site for a new development in the whole borough. Ockham does not have a shop or any significant facilities. A new development in the centre of Ockham would be completely dependent on car transport - yet the local roads are entirely unsuitable for a development of this size - which would be third largest in the borough after Guildford and Ash & Tongham.

3.7 The advertisement states:

"Delivers more than 2,000 new homes,fast" [bold lettering as used by the advertiser - in green in the advert]

It is incorrect and misleading to state that 'more than 2000 new homes' can or will be delivered "fast". Thames Water, for example has stated (its letter is on the GBC website) that there is insufficient sewage processing capacity, that up to three years' lead time would be required and that all works would be subject to funding. It is also likely that development could not begin until road access to the A3 had been completed. All these factors make it extremely unlikely that houses could be provided quickly or at all within a 5 year horizon. It is certain that the entire figure of 2,000 homes would not be
developed 'fast' because the plans attaching to 15/p/00012 proposed to spread the development over 15 years. The use of the adjective 'fast' in relation to all 2,000 homes is highly misleading in the context of a development which might not start for five years and might not complete in less than 15 years.

It shows that cumulative housing delivery by 2020 is only 377 houses. That figure itself is aspirational rather than realistic or contracted. No planning permission has been achieved and is unlikely to be achieved before the Local Plan process is complete - which is unlikely to be before the end of 2017.

Political influence

This development is promoted by a local politician called Mr Michael Murray, who is borough councillor in Oxfordshire. His details can be found on the Vale of White Horse website which shows that he is responsible for its Local Plan. Mr Murray is also an officer of Causeway land - the promoter of the development.

The purpose of the advertisement is clearly to influence the political process of adopting a new local plan in Guildford. As such it was important that the public and Guildford Borough Councillors should have been given accurate facts in the advertisement presented in a fair manner taking full account of the context and the constraints on the site. Instead the advertisement shows a casual disregard for the true facts.

The photographs of the site are deliberately unflattering. The main photographs are taken from a very considerable height in the air. These give a misleading impression of the site - because the runway cannot be seen from any of the adjacent land - except from a small area on Hatchford Hill. The photos give no indication of the designations of the adjacent land. They do not mark the Special Protection Area, The Site of Special Scientific Interest, The Sites of Nature Conservation Interest or the Conservation Areas and Listed Building adjacent or near to the site. They do not show the part of the site which has planning permission for a waste composting facility and which is set aside for the Surrey Waste plan. The photos imply that the whole site could be built on. The advertisement implies that the developer is somehow generously electing, out of its innate sense of public service and beneficence, to dedicate half the site to the purpose of providing the lucky citizens of Surrey with the biggest 'park' in the county. Nothing could be further from the truth. In fact the developer is not creating a 'park' at all. It is creating a SANG as a legal obligation in order to comply with environmental legislation.

This map (below), taken from the Surrey Interactive Maps website, shows relevant features which the advertiser has chosen to ignore. Note in particular the proportion of the site allocated to the Surrey Waste Plan, which cannot be used for housing, and the SSSI and the footpaths.

Note that no access to the A3 exists or is shown on the map. This land is no different in terms of access to the A3 from any other farmland adjacent to the A3 along its length from London to Portsmouth - except of course for the fact that it is designated as part of London's Green Belt.

2. Conclusions

The advertisement contains a number of false and misleading statements regarding the access of the site to and from the A3. It describes the whole site as derelict and brownfield when at the very most 24% of the land could be so described. It gives the impression that all of the 'brownfield' land could be developed for housing. In fact some 15% out of 24% is some 60% of it is already allocated for the Surrey Waste Plan - and so is not available for housing. And a significant proportion of that is in any case within 400m of the SPA and so by Jaw impossible to develop for housing. The advertisement states that half the land will be turned into a public park - when in fact it will be land used to create a
SANG to protect the SPA to the north. It states that the site will create a 'sustainable community' when in fact the site is far from sustainable, has no community and will not have a meaningful community for several decades.

The editorial department of the Surrey Advertiser is well aware of the issues surrounding the description of the site. It has published many articles and letters on the subject over the last two years. It would appear that the commercial interests of taking advertising revenue have over ridden an obligation to fair and accurate information. In view of this the Surrey Advertiser should make available space for Ockham Parish Council and other local interest groups to correct the false and misleading impression created by this advertisement.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. The obligations of GBC to regulate development
   o requirements of the National Planning Policy Framework (NPPF)

Conservation of heritage assets 'in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations' is a 'Core Planning Principle' set out in NPPF para 17. 'Housing should be located where it will enhance or maintain the vitality of rural communities' - NPPF para 55. The LPA 'should require an applicant to describe the significance of any heritage assets affected, including any contribution made to their setting' (NPPF 128). The LPA should 'avoid or minimize conflict between the heritage asset's conservation and any aspect of the proposal (NPPF 129). 'Substantial harm to or loss of a grade II listed building, park or garden should be exceptional' (NPPF 132).
1.1 English Heritage Guidance: The Setting of Heritage Assets

English Heritage has published guidance on the setting of Heritage Assets from which the extracts below are taken:

2. Physical setting and context

The designation of site A35 as a strategic development site has profound implications for the character, setting and context of Ockham, itself a heritage asset, and for the individual heritage assets within it. The proposed development would do the parish and its heritage assets substantial and permanent harm. There are no measures significantly to reduce that harm.

The designation implies that development on this site is 'sustainable'. The principal argument made for its sustainability is its size. The planning statement for the planning application 15/P/000 12 states at para 1.14 "to demonstrate the critical mass created, on completion, the new village settlement will be the third largest settlement in the borough, exceeded only by Ash/Tongham and Guildford Town."

However the size of the development is the factor that causes most of the harm to the parish and its heritage assets. The imperative for size, without which the development is unsustainable on GBCs criteria (see s22 of Vol. V of the Green Belt and Countryside Study), causes the development to encroach on most of the constituent settlements that make up the parish of Ockham - especially Martyr's Green, Elm Corner and Bridge End. Rather than address this issue the proposal merely denies the existence of the problem. In a sense it has no choice but to ignore the problem because it can provide no remedy apart from making the development smaller which, in turn, would make it unsustainable. The developer cannot acknowledge that the site is too small because that invalidates the core hypothesis that the development is 'sustainable'. The developer cannot acknowledge that the development is too large because that validates the harm that the development causes to the heritage of Ockham and the Special Protection Area (SPA). The facts conflict with the application thesis and the exegesis is intellectually dishonest. The site is too small for development to be sustainable and allows no possible scope for future expansion.

2.2 The setting of Ockham and its parish

Rather than address the historical and geographical reality of Ockham as an integrated whole, the planning application seeks to split it into small units and then to claim that the units are either not part of or connected with Ockham (e.g. Martyr's Green) or that the effect on various of the parts has no effect on the whole (e.g. the Ockham Conservation areas). This false picture is accentuated by the constant repetition of various claims that present a misleading picture of the site. It is constantly repeated that the site is in Wisley whereas all of it stands in the parish of Ockham, that it is an 'airfield' (although all flying ceased in 1972 over forty years ago) and that it is 'brownfield' (even though only a small part (c27ha of which 17ha is already set aside for the Surrey Waste Plan) of it meets that definition). Other so-called facts are presented in a misleading way. It is claimed on the one hand that there is 'permissioned access' for the development onto the A3 while on the other hand such permission as exists is for a completely different project (a waste processing project) and this application expressly states that the applicant will seek to cancel the historic permission. Real facts such as the existence of the historic bridle ways and footpaths are distorted into justifying tenuous claims to sustainability. The fact that the footpaths mainly link the settlements of Ockham with each other and with their Common and that the proposed new 'urban feature' between all the settlements will do them great violence are all ignored.

The historic landscape characterisation 'is not considered [by Savills] to be of intrinsic significance or to contribute to the significance of the heritage assets with which it is associated:
Historic Landscape Characterisation

- The Application Site lies in an Historic Landscape Character area which is characterised by the Surrey Historic Landscape Characterisation survey as lying mainly within disused airfield with small parts of the south-western area lying within miscellaneous valley floor fields and pastures and medium to large regular fields with wavy boundaries (late medieval to 17th/18th century enclosure). The historic landscape character of the Application Site and its surroundings is not considered to be of intrinsic significance, or to contribute to the significance of the heritage assets with which it is associated.

- Historic Landscape Characterisation
  - The Application Site lies in an Historic Landscape Character area which is characterised by the Surrey Historic Landscape Characterisation survey as lying mainly within disused airfield with small parts of the south-western area lying within miscellaneous valley floor fields and pastures and medium to large regular fields with wavy boundaries (late medieval to 17th/18th century enclosure). The historic landscape character of the Application Site and its surroundings is not considered to be of intrinsic significance, or to contribute to the significance of the heritage assets with which it is associated.

This assessment ignores multiple elements of the Landscape including:

- The public footpaths which exist in order to connect the various settlements of Ockham with each other and with their Com mon
  - There is a very good reason why the historic settlements of Ockham are located south of the Application It is that the Application Site is high ground and extremely exposed to the prevailing south westerly winds. Historic settlers have therefore sought the shelter of lower ground or tree cover.
  - The interconnectedness of the Heritage Assets with the land which has been shaped by the people who lived in these farm houses over the centuries.
  - The fact that the former runway (which is considered to 'degrade' the site) has no visual impact on the heritage assets and cannot be seen from outside the airfield except from the.
  - The fact that the runway is a small part of the overall land parcel - as little as 15% of the.
  - The description of the former airfield land is self-contradictory:

11.3.43. Due to the historic use of the Application Site, the existing land use does not relate to the other rural pressures, however there is some evidence of fragmentation and subdivision of fields for equestrian use immediately south of the Application Site.

11.3.46 The setting of Ockham end its relationship to the surrounding countryside should be retained.

11 3 48 The long open character of the airfield contrasts with the surrounding parkland and agricultural landscape as result of the removal of all traditional boundary hedges and trees during the airfield construction. The Application Site subsequently has few of the key characteristic features of the Ockham and Clandon Wooded Rolling Claylands Character. The linear Application Site is well enclosed by woodland across its north, west and southwest boundaries. with weaker hedges bordering the east and southeast boundaries with Old Lane and Ockham Lane. Its scale, linear and featureless characteristics contrast with the typical smaller scale enclosed field patterns of the surrounding countryside.

  - The application as a whole seeks to represent the airfield land as disconnected from the adjacent This misrepresents the reality
  - The cause of the dilapidations of the hedges around the land at the former airfield is the direct responsibility of the developer and its predecessors in title which have failed to maintain them.
Ockham does not have one central nucleus like many villages. It is a dispersed group of farming settlements historically unified by the Ockham Park Estate and Ockham Church.

1. The setting of Yarne and Ockham End in Martyr's Green

   • Historical geography of the property

Yarne, like Upton Farm, is a fifteenth century farm house. For many years until its sale at auction in 1958 Yarne formed part of the Ockham Park Estate. Until 1900 the property was a farm known as Lara Farm working the adjacent land which formed part of the Estate. Around 1905 the property was extensively modernised by the Estate: a northern extension was added and the southern front was substantially modified on plans thought to have been drawn up by Lutyens.

The historical setting of Yarne and the other farmhouses at Martyr's Green - Upton Farm, Pound Farm and Blackmoor Farm - is rural and agricultural. Farming and common historical ownership within the Ockham Park Estate over many centuries is an integrating and unifying factor creating a common setting for all these heritage assets.

Martyr's Green and May's Green have formed part of the parish of Ockham for many centuries. Closure of Ockham Lane and the introduction of the third largest urban concentration of houses in the borough will destroy Ockham's heritage and geographical integrity.

The geographical and cultural setting of the property is closely tied to the land. The current curtilage and much of the garden was established before WW 1. The house is positioned with its narrow end facing the southwest. The first builders oriented the house like this to minimise exposure to the strong south westerly winds blowing across the open landscape to the west. The predominant feature of the setting and the garden is its openness with views of the western horizon extending across twenty miles over and beyond Woking. These views have existed since the land was first cleared for farming - before the Norman Conquest. This extensive east-west aspect formed by a sandy ridge and the fortuitous crash landing of a bomber in WW2 were the reason it was chosen as the location of a grass airstrip in WW2.

Before WW2 the property was let by Ockham Park Estate with adjacent land to the West as shown by the pink shaded area on the 1927 lease plan:

My grandmother took over the lease of the property in 1932 and continued to hold the field to the west until it was commandeered with other parts of the Ockham Park Estate to form the grass runway along the ridge of the land several hundred metres further west. It was a condition of the requisition of the land that it would be restored to its previous agricultural use after the war.

I have known this agricultural land all my life and to my certain knowledge the adjacent agricultural has never been 'previously developed'.

When the airfield was sold under the provisions of the Crichel Down Code in 1980 to the heir of the original freeholder (the Ockham Park Estate) the leaseholders did not recover their leases.

In 1975 the garden at Yarne was re-designed by Russel Page, perhaps the most renowned twentieth century British garden designers. The back (North) garden was designed with a Westward facing aspect - directly towards the application site. The uninterrupted Westerly views across the application site towards Little Upton, Bridge End Farm and Woking would be completely obliterated by the creation of a new town.
• Assessment of the setting of Yarne in planning application 15/P/00012

Sections 10 and 11 of Environmental Statement (prepared by Savills) attached to the planning application refer to the setting of Yarne and to the impact of the development on Yarne.

In para 10.3.62 it is stated that, ‘The application site is considered to make a minor contribution to the setting of Grade II listed Yarne...’. The consideration given to the setting of Yarne is wholly inadequate and misleading.

1. The western boundary of Yarne is immediately alongside the development site. The western boundary with the site is some 200 yards long. The northern boundary is 40 yards long. This may be the longest boundary of curtilage of any heritage asset with the development site. Nowhere is this set out in planning application S/P/00012. This was drawn to the attention of the developer's representative, Mr Michael MmTay, a conservative councillor, at the roadshow on the runway intended to promote the development. He offered to provide screening for any properties along the northern edge of the Application Site but refused to give any explanation as to why no screening was proposed for Yarne.

The planning application seeks to minimise the effect of the development on Yarne and Martyr's Green. For example at para 11.3.28 it states:

11.3.28. The northern extents of Martyr's Green lie 0 further 400m east.

This is a blatant falsehood. Yarne’s curtilage is right next to the development. The property itself is within 30 yards of the development. The field known as Martyr's Green is Jess than 100 yards from the development.

1. There are extensive views across the whole of the development site from Yarne from the ground floor, from first floor and from the

1. The development property will commence immediately beside Yame with a path/roadway within metres of the

No attempt has been made to separate the development from the heritage asset.

1. No attempt has been made to form a realistic view of effect of the development on the setting of Yarne and its

Architects drawings are included in the application showing the line of sight between various heritage assets and the proposed building in the development:

No line of site drawings are included in respect of Yarne. This is extraordinary given that Yarne is the heritage asset closest to the development and has the longest boundary with the development. It an1ounts to deliberate adverse selection of the facts in a blatant attempt to misrepresent the effect of the development on Yarnc.

3.3 Views from Yarne onto and across the Application Site

The views to and from Yarne are described in s 11 of the Environment Statement Vol 1. While it is claimed in para 11.3.216 that 'hedgerows ...screen ground floor views' the reality is that 240 yards of housing on the development site will front the western and northern boundaries of Yarne. It is further stated that 'Upper storey views are directed along the southern boundary of the site with some additional filtering by boundary trees.' That is misleading.

A defining characteristic of the house is its position in open countryside near the top of a long incline with panoramic views to the west.

The contour map from the planning application confirms that Yarne stands at the highest point of the Application Site. The only higher ground nearby is at the top of Hatchford Hill about 400m to the east.
In para 1.4.63 it is stated, 'Views towards the Application site are restricted to upper storeys'. [That is a blatant falsehood.] Construction impacts will be notable from Neighbourhood 2 increasing in significance to major/moderate as Neighbourhood 4 is completed adjacent to the properties boundaries. Once completed, the impact will reduce slightly due to the reduction in movement and construction activities within the view, however the outlook will change considerable from an open, albeit degraded, landscape to close distance urban frontage.'

The statement in 11.4.65 concerning the views from Ratchford Cottage and Forge Cottage are also false. These cottages stand near the crest of Hatchford Hill. They therefore enjoy panoramic views over the Application Site to and beyond Woking and all a long the North Downs.

The application alleges that the runway 'degrades' the view from Yarne. The statement is manifestly false. It is impossible by definition for something which has zero height to 'degrade' a view. Something of no height cannot obstruct any line of sight. The claim is just another of the many false and misleadi ng claims made by the developer. The runway is not visi ble from Yarne except from the most northerly part of the garden and it makes no impact there because it has no height. It is also alleged that the navigation beacon 'degrades' the view. This is an absurd statement. It applies completely asymmetrical tests to the factors which run against the development and those that run for it. The beacon is a structure which is not much more than one storey high. It is built as a steel frame and it is possible to see through the framework. Yet this tiny structure 'degrades' the landscape view whereas the highest density development in the borough enhances the environment! Perfectionism is req ui red for Yarne to be worth y of protection and any standard can be appli ed in order to justify development. The consultant to my knowledge has never looked at the view from Yarne - at least not from within the property with the owner's permission. The statement that the view is degraded by the runway impugns the professionalism and integrity of the consultancy which made it. You could say with as much justice that Sophia Loren's face was degraded by her lips because they are imperfectly large.

The development immediately beside Yarne will start some 10m or so from the boundary and will be up to three storeys high. The houses will therefore be visible from every part of the property, from within the ground floor, from the first floor and from every part of the garden. Taller five storey buildings will be situated further from the boundary. A townscape will be substituted for a landscape. This will destroy the setting of the Parish of Ockham and its heritage assets including this fifteenth century farmhouse.

3.4 Inter visibility

The houses along the southern side of the Application Site are all situated along a spring line. All these houses sourced water from their own wells and it is believed they were not connected to the water mains by the East Surrey Water Company until after 1900.

Yarne, Little Upton, Old Farm and Bridge End Fann all enjoy indivisibility. There is also indivisibility of Yarne with the dwellings at the top of Ratchford Hill (Forge and Hatchford Cottages, inter alia). The reciprocal views would be permanently destroyed by the new town.

- Connected, living landscape

The open countryside forms a connected landscape between the SPA to the north and the land to the south. Deer, other mammals, birds and insects continuously travel between the SPA and woodlands to the south (Tanner's Copse and the woods at Effingham and Beckham down to the North Downs). The introduction of an alien 'urban feature' will cut off the ancient conduits used by these insects and fauna. It will destroy the habitats which support many endangered bird species, especially the ground nesting Skylarks. The building of an urban settlement along the crest of the sandstone ridge will cut off the SPA from the land to the south causing permanent and irreparable harm to the ecological setting of the parish. It is ridic ulous to suggest that a few bird boxes on a housing estate will satisfactorily compensate for a lost landscape.

3.5 Relationship of Ockham with Ockham Common
Ockham and its common form an integrated historical and ecological whole. The interaction of human beings, animals and geology have created the rare lowland heath on Ockham Common, which Surrey Wildlife Trust describes as 'rarer than rainforest'.

The many miles of interconnecting local footpaths testify to the connectedness of the settlements of Ockham with their Common.

The creation of a new urban settlement, described as 'garden city' in style, is harmful to the fragile local ecology and to the local rural economy which depends on horse riding, arable farming, and pheasant shooting.

The application alleges that the agriculural land on the Application Site is poor grade 4 land or non-agricultural land. During the Summer of 2014 the agricultural Land Agent for the land (Knight Frank Rural Consultancy in Hungerford) advertised the land as Grade 3 land i.e. as good agricultural land.

3.7 Closure of Ockham Lane

The application proposes to close Ockham Lane and Plough Lane and to make Old Lane and Guileshi ll Lane one way.

Closing Ockham Lane, a public right of way for hundreds of years, will cut Martyr's Green, May's Green and Hatchford End off from the rest of Ockham.

The proposal made in the application that Ockham Lane should become a pedestrian route from the new town to the Black Swan public house will adversely affect the setting of Yame, Oakmead and Red and White Rose Cottages which can be expected to suffer from increases in littering and antisocial behavior.

Conclusions

The developer has fundamentally misrepresented the heritage of Ockham, its ecology and economy.

It is stated for example, that the land 'contains the largest previously developed site within the GB part of the Metropolitan Green Belt'. The previously developed element of the land is a fraction of the whole. It is a misrepresentation to propose that all the surrounding farmland is part of the previously developed element.

It is stated 'The land is subject to recommended release from the Green Belt as part of the emerging Guildford Borough Local Plan'. That is clearly false. The draft local plan makes no such recommendation, nor does any of the evidence base.

It is stated 'the principle of a new settlement at Wisley attracts local policy support. The site has been identified as a new settlement and hence removed from the Green Belt within the emerging GBLP, as justified by the Borough Council 's evidence base.' The land has NOT been removed from the Green Belt. Nor does inclusion in the draft local plan without any proper evaluation or sequential testing amount to 'local policy support'. It amounts to a procedural irregularity which calls in question whether a proper professional and arm 's length relationship exists between Guildford Borough Council and the developer.

It is stated: 'The housing situation in Guildford Borough ...points to a critical situation which requires redress via the most suitable, available and sustainable sites.' The statement is one of opinion and not fact. The Objectively Assessed Housing Need has not been publicly scrutinised. So far as local housing need is concerned, the Royal Horticultural Society at Wisley owns some seventy properties -almost all of the village. Of these some fifty houses stand empty. That suggests that there is no shortage of houses in this ward. While there is a shortage of social housing that is a direct result of council policy. It has not built any council houses for twenty years. The average number of persons per house in the borough stands at approximately 2.4. That does not indicate a 'critical' situation. If the situation were truly critical then the average per house would be significantly higher.

The proposal does great violence to the heritage of Ockham and its heritage assets and to the local ecology of Ockham Common. The site is completely inappropriate for a 'new urban feature'. City and urban features are wholly out of place in this geographically constrained and ecologically threatened corner of Surrey.
While the proposal pays lip service to the requirements of planning regulations it does not seek to understand Ockham or its historical context. Rather than consider the parish as an integrated geographic, economic, ecological and legal whole it prefers to focus on the 30 or so hectares of disused runway to the neglect of all other elements.

Rather than acknowledge the consequential harm caused by the proposal, the application seeks merely to deny the existence of harm and/or its extent by claiming falsely that the development site is discrete and disconnected from the rest of the parish. Since the premises of connectedness and harm are denied the proposal contains no meaningful mitigation measures. Indeed since the proposal is so fundamentally incompatible with the parish and its surroundings there are no possible mitigations. This is all the more the case because the core thesis supporting the proposal is that it is 'sustainable'. The logic supporting this hypothesis is that the project is sufficiently large to be able to stand alone and that as a result of its size it will attract sufficient facilities to make it sustainable. This logic flies in the face of the fact that there are no existing facilities at site which justify its selection as a suitable site for development. In short the logic is self serving, intellectually dishonest, and completely at variance with the facts.

The reality is that an outsized development of some 2,100 dwellings is being shoe horned into a site scarcely bigger than half a square kilometre or roughly 700m x 700m. This development is described as the third largest concentration of housing in the borough behind only Guildford Town itself and Ash and Tongham. Whereas Guildford Town and Ash and Tongham have extensive facilities and are not immediately affected by Special Protection Areas, Ockham has no facilities and its ecology is already threatened.

The harm caused to Ockham is substantial, adverse and permanent. The so-called mitigation measures are an undersized sticking plaster which do not begin to cover the gaping wound which this development would leave. If allowed the development will devastate the parish of Ockham and its surrounding villages.

The proposed new town is many orders of magnitude greater in its impact on the Green Belt that the existing 'development' (the disused runway). It is therefore incomprehensible why the planning application should have proceeded this far.

The map below demonstrates that the Application Site is slap bang in the middle of the Green belt separating Woking, Byfleet, Cobham, Effingham, the Horsleys, Ripley and Send. Development of this site is a dagger pointed at the heart of the Green Belt. If the applicant succeeds the future of the Green Belt in this area will be fatally jeopardised.

Regulatory Capture, lack of transparency and disclosure

There is no evidence that any 'sequential tests' were carried out to try to identify the most suitable sites for new towns in the borough. This creates the suspicion that the inclusion of the site in the local plan was highly improper and the result of the 'regulatory capture' of the local authority by the developer. Inclusion within the draft local plan should not pre-determine the outcome of the planning argument.

There is also a risk that the planning department has a grave conflict of interest insofar as it has provided very extensive (and undisclosed) pre application advice to the developer on how to present its application. The public has no assurance that GBC has implemented proper 'Chinese walls' between those officials advising the developer and those officials responsible for preparing the local plan.

This may be still another example of the confusion between GBC's role as planning regulator and its role as adviser to the applicant. The public has reason to believe that the regulator has been captured by the applicant. Application 15/P/00012 was held open for a year to enable the applicant to amend it.

It is of particular and grave concern that this site remains in the local plan despite Application 15/P/00012 being unanimously refused by the planning committee of GBC.
This was no doubt the purpose of the previous application was to build an in-vessel composting facility. That facility was granted permission on the basis that the Surrey Waste Plan constituted a 'very special circumstance'. Despite the purported 'specialness' of the circumstance the applicant has not lifted a finger to build the facility in the subsequent years. And in Application 15/P/00012 it says that the waste plant is no longer required by the Waste Plan. So the circumstances are now considered by the applicant itself to be no longer special. This reveals the cynicism of the applicant which is prepared to make any claim, regardless of whether it intends to act on it and regard less of the long term plausibility or real ity of the claims made in order to achieve permission. The public was duped by the waste plant application. Part of the Green Belt was intended to be permanently sacrificed in the interests of a proposal for a waste plant. But the viability of the waste plant has not endured beyond six or so years. The Inspector was clearly taken in. The waste plant proposal was so much 'vapour ware'. And the applicant suffers no sanction for making misleading claims. It is ridiculous to claim that the site has 'permissioned' access when the permission was granted for a very different development and developer states in 15/P/00012 that it is seeking to revoke the very same permission: 'the applicant proposes to commit to not deliver the extant consent for a Waste Facility'.

Indefensible Green Belt boundary

The NPPF states that the Green Belt should be permanent. Para 83 states:

"Local planning authorities with Green Belts in the ir area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period."

The new local plan seeks to establish the garden of Yarne as the Green Belt boundary. It is an arbitrary line marked by a hedge. It is not defensible. A road or a railway line would be defensible. But an organic feature marking the edge of a garden hardly qualifies as a 'defensible' boundary. It is an example of the inconsistent and arbitrary manner in which GBC applies the planning rules. There is one interpretation for residents and another entirely for developers that propose to build whole new towns.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objection to the removal of Three Farms Meadow in Ockham from the Metropolitan Green Belt

Objection to the systematic promotion of this site for development by the owners and Guildford Borough Council on the basis of false information

Policy A35 proposes Land at the former Wisley airfield in Ockham as a Strategic Development Site for a new town. The town is to comprise some 2,000 houses and would be the third biggest settlement in the borough.

In order to develop this site the owner has persuaded Guildford Borough Council (GBC) to propose the removal of the land from the Green Belt. It has pursued this policy of courting GBC since 2007 when the current owner purchased the site for some £23m.

**History of the site**

The site has been farmed for many centuries by tenants of the Ockham Park Estate- which was originally owned by the King family. During WW2 the site was acquired by HM Government for ‘war time purposes’ on the understanding that it would be returned to its former agricultural use after the war. During the war in 1943 a grass airstrip was created on the land which was used to fly out aeroplanes being built by Vickers in its factories at Brooklands. Agriculture continued around the grass airstrip during the war. After the war Vickers continued to build aeroplanes at Brooklands and requested an extension of the lease. Aeroplanes propelled by jet engines caused the grass runway to catch fire and so in about 1952 a concrete runway was put down. Vickers was subsequently subsumed within what is now BAe and all flying ceased in 1972. In 1980 the government sold the land back to the inheritor of the Ockham Park Estate for its agricultural land value (some £300,000). Permission to re-use the aircraft hangars for intensive farming purposes was refused. Later an application to create a private airport was the subject of a long public enquiry[2] and was also refused. GBC and SCC both opposed all applications to develop the land. All the buildings were removed prior to the sale back to the pre-war owner. The whole site is within the Metropolitan Green Belt. The original lessees whose leases were annulled during the war never recovered the land which they had formerly leased.

**Current ownership**

In 2007 a Jersey company called Wharf Land Investments Ltd purchased the land from Legal and General. The land parcel comprised some 114.7ha. Of that area some 63ha is good quality agricultural land – of which some 45.4ha is ‘Best and Most Versatile’ land. Some 24.6ha is non agricultural land – comprising scrub, woodland and grass. Some 27.1ha comprises the concrete runway and former hangar area. Of the 27.1ha of concrete some 17ha has been set aside for the Surrey Waste Plan. Therefore only 10ha of the concrete area within the site can be considered to be ‘brownfield’ or
previously developed. 10ha out of 114.7ha constitutes less than 10% of the total area. Moreover of that 10ha a significant proportion stands within 400m of the Special Protection Area for endangered species at Ockham and Wisley Commons and therefore may not be used for new residential housing.

The new owners were well aware of the land’s Green Belt and agricultural land designations when they purchased. An Agricultural Land Classification was carried out in August 1979 and is filed at Natural England. It shows all the agricultural land as Grade 3a and 3b. A more recent classification filed with planning application 15/P/00012 provides more detail and shows a proportion of the land as Grade 2.

Once it acquired the land Wharf Land, owned by Douglas Maggs and David Mellor (the former Conservative Cabinet Minister), set about achieving a change of use of the land. It applied for planning permission to build a waste composting facility, which was granted on appeal in 2010 subject to a list of 23 conditions which included limiting the maximum tonnage of waste per annum, the number of lorry movements and the hours of use. This development was never actioned by Wharf Land but was not allowed to lapse after some soil was imported to the site in the week before expiry of the permission.

Wharf Land was sued in Jersey[3] by one of its investors for making ten payments amounting to some £1.5 million to persons unknown without providing any details. The largest payment exceeded £1 million and was paid to a Gibraltar company called Shoehorn Ltd. Disclosure of the parties to whom the payments were made were never disclosed after shareholders voted to approve the transactions. Whether any of these payments were ultimately received as inducements for working towards a change of use of the land is not known.

In 2013 Wharf Land was sued in the High Court[4] in England by a Russian investor called Lisitsin. The court awarded Lisitsin some £1.4 million in damages and the judge said the defendants were ‘knowingly complicit in fraudulent misrepresentation’.

Before the trial had concluded Douglas Maggs put Wharf Land into administration. Its assets were acquired by a new Caymans company called Wisley Property Investments Ltd, (WPIL) the current owners. The ownership of WPIL is not disclosed but is thought to include Lisitsin and RAB Capital Special Situations Fund, a hedge fund. GBC has refused to exercise its right to enquire into the ownership. WPIL is represented in England by Mr Michael Murray, a Conservative Councillor at the Vale of White Horse in Oxfordshire, where he is responsible for their local plan.

WPIL has put in a number of planning applications. Two planning applications sought permission to use the land to make films. One was withdrawn by the applicant after very considerable public protest. The second was refused, appealed and refused again on appeal. The latest application, in December 2014 was for a new town of 2,100 houses. The application was held open for an entire year while further information was collected and finally submitted in December, 2015. The application was finally heard by the planning committee in March, 2015 and unanimously rejected.

Factual misrepresentations by the applicant

WPIL has consistently repeated a number of gross factual inaccuracies regarding this site. It has claimed that the site is poor quality agricultural land. Application 15/P/00012 states that the agricultural land is Grade 4, whereas it is in fact all Grade 3 and above. The application states that the site has ‘permissioned access to the A3’. At best that is misleading and at worst it is a deliberate lie. The site has no access to the A3 for a new town of 2,100 houses. Such permission as it has for a waste processing facility is hedged by 23 conditions which limit hours of access and numbers of lorries per day. The applicant has claimed that the site has good connections to railways, whereas it is about as far from railways as it is possible to get in this part of Surrey. The claim that it is possible to cycle to Effingham Junction station in six minutes is demonstrably false. These and other bogus claims are made in planning application 15/P/00012 despite the application containing a statement as to the truth and accuracy of its details.

Role of GBC

It may be expected that an applicant might promote its site with ‘no holds barred’ because of the very substantial development profits at stake – possibly in the region of £500 million. As the local planning authority performing a quasi judicial role it might be expected, however, that GBC would have taken a more fastidious approach to the facts.

However, GBC has been far from impartial. Mr Murray participated in public roadshows to promote the draft Guildford Local Plan. GBC included this site in both the Issues and Options Paper and in the draft Local Plan – led my the former
Lead Member for Planning, Ms Monika Juneja who was subsequently convicted of forgery and fraud in relation to her professional qualifications. WPIL paid GBC for pre-application advice. Minutes of meetings with WPIL’s adviser, Savills, to the extent that they have been disclosed, reveal that GBC advised WPIL to conduct public meetings in Guildford rather than in Ockham to minimize dissent. GBC has taken no apparent steps to correct the blatant falsehoods contained in 15/P/00012. There is evidence which suggests that GBC has sought to predetermine the outcome of any enquiry into whether the site could be developed by advising the applicant on the timing of its application and by including it in the draft local plan as a site for removal from the Green Belt without showing any exceptional circumstances justifying its removal. The applicant in 15/P/00012 cites the inclusion of the site in the draft local plan as itself being an exceptional circumstance. It would appear the GBC also believed that the mere inclusion of the site in the local plan was a sufficient exceptional circumstance.

Advertising campaign

Subsequent to the refusal of 15/P/00012 WPIL has run an advertising campaign in the local press in particular in the Surrey Advertiser. It has also run trailers in local cinemas (eg The Ambassador Cinema in Woking) promoting development the site for a new town. The same false and misleading information which WPIL used in planning application 15/P/0012 and on its website is repeated. The advertising campaign is intended to sway public opinion and presumably to influence borough councillors and the planning committee which may in the future be required to adjudicate another planning application.

Complaint

The factual basis on which this site has been promoted for inclusion in the local plan as set out by the applicant in its promotional material and its website is materially false in a number of very important respects. GBC has done nothing to insist that these errors of fact are corrected. Its impartiality as a planning authority is in doubt. I attach my recent complaint to the Advertising Standards Authority about the advertisements appearing in the Surrey Advertiser (attached). I am concerned that GBC has been swayed by a number of these false claims. In particular it has gone from a longstanding position that the site was not suitable for development to seeking to assist the developer have the site removed from the Green Belt. My complaint to the ASA would not have been necessary if GBC had upheld the standards of probity in planning applications and planning matters generally that the public has a right to expect.

Attached documents:
Objection to the systematic promotion of this site for development by the owners and Guildford Borough Council on the basis of false information.

Policy A35 proposes Land at the former Wisley airfield in Ockham as a Strategic Development Site for a new town. The town is to comprise some 2,000 houses and would be the third biggest settlement in the borough.

In order to develop this site the owner has persuaded Guildford Borough Council (GBC) to propose the removal of the land from the Green Belt. It has pursued this policy of courting GBC since 2007 when the current owner purchased the site for some £23m.

History of the site:

The site has been farmed for many centuries by tenants of the Ockham Park Estate - which was originally owned by the King family. During WW2 the site was acquired by HM Government for 'war time purposes' on the understanding that it would be returned to its former agricultural use after the war. During the war in 1943 a grass airstrip was created on the land which was used to fly out aeroplanes being built by Vickers in its factories at Brooklands. Agriculture continued around the grass airstrip during the war. After the war Vickers continued to build aeroplanes at Brooklands and requested an extension of the lease. Aeroplanes propelled by jet engines caused the grass runway to catch fire and so in about 1952 a concrete runway was put down. Vickers was subsequently subsumed within what is now BAe and all flying ceased in 1972. In 1980 the government sold the land back to the inheritor of the Ockham Park Estate for its agricultural land value (some £300,000).

Permission to re-use the aircraft hangars for intensive farming purposes was refused. Later an application to create a private airport was the subject of a long public enquiry and was also refused. GBC and sec both opposed all applications to develop the land. All the buildings were removed prior to the sale back to the pre-war owner. The whole site is within the Metropolitan Green Belt. The original lessees whose leases were annulled during the war never recovered the land which they had formerly leased.

Current ownership:

In 2007 a Jersey company called Wharf Land Investments Ltd purchased the land from Legal and General. The land parcel comprised some 114.7ha. Of that area some 63ha is good quality agricultural land - of which some 45.4ha is 'Best and Most Versatile' land. Some 24.6ha is non agricultural land - comprising scrub, woodland and grass. Some 27.1ha comprises the concrete runway and former hangar area. Of the 27.1ha of concrete some 17ha has been set aside for the Surrey Waste Plan. Therefore only 10ha of the concrete area within the site can be considered to be 'brownfield' or previously developed. Oha out of 114.7ha constitutes less than 10% of the total area. Moreover of that Oha a significant proportion stands within 400m of the Special Protection Area for endangered species at Ockham and Wisley Commons and therefore may not be used for new residential housing.

The new owners were well aware of the land's Green Belt and agricultural land designations when they purchased. An Agricultural Land Classification was carried out in August 1979 and is filed at Natural England. It shows all the agricultural land as Grade 3a and 3b. A more recent classification filed with planning application 15/P/00012 provides more detail and shows a proportion of the land as Grade 2.

Once it acquired the land Wharf Land, owned by Douglas Maggs and David Mellor (the former Conservative Cabinet Minister), set about achieving a change of use of the land. It applied for planning permission to build a waste composting facility, which was granted on appeal in 2010 subject to a list w.aste per annum, the number of lorry movements and the hours of use. This development was never actioned by Wharf Land but was not allowed to lapse after some soil was imported to the site in the week before expiry of the permission.
Wharf Land was sued in Jersey by one of its investors for making ten payments amounting to some £1.5 million to persons unknown without providing any details. The largest payment exceeded £1 million and was paid to a Gibraltar company called Shoehorn Ltd. Disclosure of the parties to whom the payments were made were never disclosed after shareholders voted to approve the transactions. Whether any of these payments were ultimately received as inducements for working towards a change of use of the land is not known.

In 2013 Wharf Land was sued in the High Court in England by a Russian investor called Lisitsin. The court awarded Lisitsin some £1.4 million in damages and the judge said the defendants were 'knowingly complicit in fraudulent misrepresentation'.

Before the trial had concluded Douglas Maggs put Wharf Land into administration. Its assets were acquired by a new Caymans company called Wisley Property Investments Ltd, (WPIL) the current owners. The ownership of WPIL is not disclosed but is thought to include Lisitsin and RAB Capital Special Situations Fund, a hedge fund. GBC has refused to exercise its right to enquire into the ownership. WPIL is represented in England by Mr Michael Murray, a Conservative Councillor at the Vale of White Horse in Oxfordshire, where he is responsible for their local plan.

WPIL has put in a number of planning applications. Two planning applications sought permission to use the land to make films. One was withdrawn by the applicant after very considerable public protest. The second was refused, appealed and refused again on appeal. The latest application, in December 2014 was for a new town of 2,100 houses. The application was held open for an entire year while further information was collected and finally submitted in December, 2015. The application was finally heard by the planning committee in March, 2015 and unanimously rejected.

**Factual misrepresentations by the applicant**

WPIL has consistently repeated a number of gross factual inaccuracies regarding this site. It has claimed that the site is poor quality agricultural land. Application 15/P/00012 states that the agricultural land is Grade 4, whereas it is in fact all Grade 3 and above. The application states that the site has 'permissioned access to the A3'. At best that is misleading and at worst it is a deliberate lie. The site has no access to the A3 for a new town of 2,100 houses. Such permission as it has for a waste processing facility is hedged by 23 conditions which limit hours of access and numbers of lorries per day. The applicant has claimed that the site has good connections to railways, whereas it is about as far from railways as it is possible to get in this part of Surrey. The claim that it is possible to cycle to Effingham Junction station in six minutes is demonstrably false. These and other bogus claims are made in planning application 15/P/00012 despite the application containing a statement as to the truth and accuracy of its details.

**Role of GBC**

It may be expected that an applicant might promote its site with 'no holds barred' because of the very substantial development profits at stake - possibly in the region of £500 million. As the local planning authority performing a quasi judicial role it might be expected, however, that GBC would have taken a more fastidious approach to the facts. However, GBC has been far from impartial. Mr Murray participated in public roadshows to promote the draft Guildford Local Plan. GBC included this site in both the Issues and Options Paper and in the draft Local Plan - led my the former Lead Member for Planning, Ms Monika Juneja who was subsequently convicted of forgery and fraud in relation to her professional qualifications. WPIL paid GBC for pre-application advice. Minutes of meetings with WPIL's adviser, Savills, to the extent that they have been disclosed, reveal that GBC advised WPIL to conduct public meetings in Guildford rather than in Ockham to minimize dissent. GBC has taken no apparent steps to correct the blatant falsehoods contained in 15/P/00012. There is evidence which suggests that GBC has sought to predetermine the outcome of any enquiry into whether the site could be developed by advising the applicant on the timing of its application and by including it in the draft local plan as a site for removal from the Green Belt without showing any exceptional circumstances justifying its removal. The applicant in 15/P/00012 cites the inclusion of the site in the draft local plan as itself being an exceptional circumstance. It would appear the GBC also believed that the mere inclusion of the site in the local plan was a sufficient exceptional circumstance.

**Advertising campaign**
Subsequent to the refusal of 15/P/00012 WPIL has run an advertising campaign in the local press in particular in the Surrey Advertiser. It has also run trailers in local cinemas (e.g., The Ambassador Cinema in Woking) promoting development the site for a new town. The same false and misleading information which WPIL used in planning application 15/P/0012 and on its website is repeated. The advertising campaign is intended to sway public opinion and presumably to influence borough councilors and the planning committee which may in the future be required to adjudicate another planning application.

Complaint

The factual basis on which this site has been promoted for inclusion in the local plan as set out by the applicant in its promotional material and its website is materially false in a number of very important respects. GBC has done nothing to insist that these errors of fact are corrected. Its impartiality as a planning authority is in doubt. I attach my recent complaint to the Advertising Standards Authority about the advertisements appearing in the Surrey Advertiser (attached). I am concerned that GBC has been swayed by a number of these false claims. In particular it has gone from a longstanding position that the site was not suitable for development to seeking to assist the developer have the site removed from the Green Belt. My complaint to the ASA would not have been necessary if GBC had upheld the standards of probity in planning applications and planning matters generally that the public has a right to expect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
10. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

11. Opportunity (3) should be common to all sites and is not unique to this site

12. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm, negatively impacting the setting of this building.

13. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

14. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

15. I object to the removal of additional 3.1 ha from the green belt without any justification

16. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

17. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

18. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

19. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees. It is outrageous that local public opinion is being ignored in this way.

20. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

21. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

22. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

23. I object to the extension of the plan period by 1 year as it has not been identified as a major change

24. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

25. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

26. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

27. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

28. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

29. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

30. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

31. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

32. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

33. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. All in all I object to this development as I believe that there is is no justification for a development of this size in the Green Belt. There are no exceptional circumstances which justify the development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to the new draft local plan inclusion of the Wisley Airfield development:

- The proposed scale of the site is out of all proportion to the surrounding area. It will in effect create a new town that will dwarf the existing village of Ripley.
- The impact on local roads of the additional traffic will be significant and negative in terms of congestion and pollution; the existing road network will not be able to cope. The impact on public transport will also be significant; the carpark at Effingham Junction is already full and will not be able to absorb the inevitable increase in demand.
- Residents of this new town will be situated adjacent to the A3 which means placing schools and houses in an area that will inevitably have poor air quality.
- This is clearly an attempt by GBC to meet a significant proportion of their designated building target in a single hit rather than organically place houses in a more sensitive manner.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The removal of the Former Wisley Airfield from the Green Belt which will result in an urban corridor stretching from London to Guildford.

Finally, I object in the strongest possible terms to the continued inclusion of the Former Wisley Airfield now known as Three Farm Meadows where the planning application has already been unanimously rejected by GBC’s Planning Committee. Many authoritative sources across the UK have indicated concern to such a development on this site (eg Highways England, Thames Water, NATS and the Environment Agency).

I trust that these objections will be fully considered and that the Former Wisley Airfield now known as Three Farms Meadows Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Development should be centred on brown field and urban areas. Brown field in this context does not mean Three Farms Meadows – I also object to the proposal to include this in the local plan. There is a massive amount of opposition to this for good reason – again lack of infrastructure as above, density, wildlife and above all the principle of building over farm land.

<td></td>
<td></td>
</tr>
<tr>
<td>3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them). The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to object to the Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield, now known as Three Farms Meadows – Allocation A35 – for the phased development of a new settlement of up to 2100 dwellings.

My objections to the draft Local Plan read as follows:-

The proposal that over 70% of new housing be built within the Green Belt rather than utilising brownfield land in urban areas needing regeneration.

The removal of the Former Wisley Airfield from the Green Belt which will result in an urban corridor stretching from London to Guildford.

The proposed number of 693 houses per year which is far too high and double the figure used in previous plans.

The threat that the Local Plan poses to my village of Ockham and the subsequent detrimental impact on its property.

The horrific impact such development would have on transport bearing in mind the narrow unlit lanes which are dangerous enough already. This would increase the volume of car traffic to an estimated 4000 additional cars plus wider vehicles like buses resulting in congestion both in the villages and the A3 and M25. There are no cycling paths and few pavements which would further compromise the safety of cyclists and pedestrians.

There is a lack of public transport and Horsley and Effingham stations are full to capacity already as are the station carparks.

To develop this site would involve a massive infrastructure project.

The current owners have zero intention of developing the site and are telling their investors they will immediately sell the property for a substantial profit once the have planning permission. As a consequence we would then have to go through the whole process with the new owners.

The property is registered in the Cayman Islands for secrecy and tax reasons this does not deter our representatives GBC.

There is insufficient consideration given to the environmental and ecological value of the site.

Air pollution in many parts of the borough is in excess of EU permitted levels, especially at the M25/A3 junction.

Finally, I object in the strongest possible terms to the continued inclusion of the Former Wisley Airfield now known as Three Farm Meadows where the planning application has already been unanimously rejected by GBC’s Planning Committee. Many authoritative sources across the UK have indicated concern to such a development on this site (eg Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield now known as Three Farms Meadows Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I attended the meeting on 8th April regarding The Wisley Property Investments Ltd (WPIL) planning application of January 2015 (Ref: 15/P/00012) and this was unanimously rejected by GBC following the recommendation of the GBC Planning Officers.

The reasons for the refusal of the application were many but included that the proposed development:

(a) was an inappropriate development within the Green Belt;

(b) would have a clear and substantial detrimental impact on the openness of the Green Belt and conflict with the purposes of including land within the Green Belt;

(c) failed to demonstrate that the benefits amounted to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified;

(d) failed to comply with the objectives of policy RE2 of the Guildford Borough Local Plan 2003 (as saved by CLG Direction dated 24/09/2007) and chapter 9 of the National Planning Policy Framework;

(e) was within the 0 -400m and the 400m to 5km zones of the Thames Basin Heaths Special Protection Area, etc.

(f) would have a severe adverse impact on the safe and efficient operation of the strategic road network, and a severe impact on the efficient operation of the local road network;

(g) failed to deliver the required transport sustainability measures;

(h) failed to secure an appropriate provision of affordable housing;

(i) was detrimental to the viability and vitality of the existing district and local centres in the vicinity of the site;

(j) would result in loss of the safeguarded waste site;

(k) presented a dense and urban form of development owing to its quantum and scale;

(l) had an adverse impact on the setting and significance of a designated heritage asset;

(m) had an unacceptable air quality impact;

(n) impacted on education infrastructure;

(o) impacted on policing infrastructure;

(p) impacted on health infrastructure;

So I was completely baffled when we went to the next meeting at the GBC Millmead, on 24th May, to be told that they were going to go ahead with the plan anyway!! So why are we continually writing our objections when they are completely ignored?

Anyway, I object very strongly to the submission of the local plan, specifically for The Three Farm Meadows (the former Wisley Airfield). I could rewrite my objections from all my previous emails/letters, but I cannot see that they will make a difference!!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. The proposed plan also includes for the development of Wisley airfield. This would have serious adverse effects on the surrounding villages;
   - The additional 5,000 residents is the equivalent of doubling the population of East and West Horsley combined
   - The proposed housing density is completely out of keeping with the surrounding rural area – five storey buildings are not appropriate in a rural environment
   - The resulting impact on light pollution, traffic and infrastructure has been gravely underestimated and proposed mitigation measures are totally inadequate
   - The cumulative impact of development in the borough and in the neighbouring boroughs of Woking, Waverley and Elmbridge has not been taken into account
   - The air quality surrounding the site gives grave cause for concern as levels of NO2 already exceed the EU limit
   - There is insufficient information on the impact on the water table and flooding in the area – the whole of the surrounding area is prone to flooding, and the impact of the River Mole is considerable.
   - Additional traffic will have a negative impact and cause irreparable damage to historic houses and other buildings in Ockham, Ripley, Downside and further afield.
   - The development will impact the listed buildings adjacent to it such as Yarne, Bridge End House and Upton Farm
   - The closure of a number of local roads coupled with a massive increase in traffic will impact a large number of road users from Cranleigh to Cobham and everywhere in between.

1. The proposed development of the old Wisley airfield will also generate a considerable knock on effect on Horsley infrastructure – particularly roads, railway station, shops, medical facilities, schools etc. – this has not been properly considered either.

| Comment ID: PSLPS16/103 | Respondent: 8792193 / Brian Wolfe | Agent: |
5.5.POLICY A35: Land at former Wisley Airfield

5.5.1. Proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

5.5.2. I have major concerns about this proposed development and have objected against both recent planning applications. I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability. It will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will create a devastating impact on traffic on both LRN & SRN in the area and irreversible destruction to the character of one of the most picturesque and historic areas of the country. Development at the proposed density and building mass that will create an urban enclave in the countryside visible from mile. Yet for those who have to live there no private open space, gardens or allotments miles from any social entertainment, miles from any employment. Everybody jumping into car to overcome the isolation how does that fit with the NPPF. There is no evidence that travel mode changes will prevent that happening.

5.5.3. I would like to record my objection to the inclusion of Wisley site within the local plan as a potential housing site the planning application 15/P/00012 | AMENDED DESCRIPTION: was rightly turned down because it was in the green belt and that the developer had failed to satisfy the HE and Surrey County Councils over this development likely impact on the road network. Nothing in the Local Plan has changed that position.

5.5.4. A Local Authority cannot rely on future investment commitment by third parties to deliver the infrastructure requirements that are required to support their Plan. Without that certainty A Local Authority under the latest updates in the Housing and Planning Bill could leave themselves with an obligation to provide the required infrastructure simply because the site was included in the local plan with presumed approval. This was previously the case when planning permission was granted a developer could for example requisition a sewer and a Water Authority was obliged to provide said sewer at their cost.

5.5.5. The same could apply where a site if included in a LP (with its presumed approved status) the LA would need to have the supporting infrastructure either in place or fully designed and costed proposals in place to support any development. Clearly this is not the case with GBC local Plan there is no proof, evidence that for example the transport infrastructure proposed will let alone work, can be delivered, or have been fully costed. In the plan are costing for some projects range from £100m to £250m hardly a well thought out budget planning advanced for a programme of work. 58 Projects out with only 4 committed!! How can a local plan go forward with so much uncertainty? Developments, more importantly people will be dependent on all packages being delivered. It like saying to somebody, you have the car now but the wheels will come next year. You acknowledge what underinvestment in infrastructure has done in the past. You plan will provide the same result as in the past, caused by the very same reasons, pushing forward with growth and homes without the infrastructure being there to support it. Get the infrastructure in place first the rest will follow the funding can still be obtained from the developers at least by that time you will know the full cost.

5.5.6. The comments made by Natural England and there apparent approval of Air Quality issues on this site are being legally challenged.

5.5.7. The proposed one way restriction on Old Lane south of the A3 as proposed in the TA from the developer and seemingly repeated in the local plan evidence base is apparently acceptable to the Highways Agency. This restriction will however not occur adjacent to the A3 but some distance from the slip road. The impact of this closure to southbound traffic will impact on minor roads in the area not controlled by HE but by SCC and no closure notice is approved nor have SCC approved such a restriction.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

In regards to the draft Local Plan and for the following key reasons:

1) I object to the use of Green Belt land for development. Green Belt areas should not be reduced by development for any reasons as once taken, they are gone forever and this allows a dangerous precedent that will proceed to render the principle and overarching natural, cultural, health, tourist and environmental benefits that it currently provides. Housing ‘need’ in a Borough must not be seen as a justification for ‘exceptional circumstances.’ Green Belt is critical to the region as a whole and needs to remain intact.

2) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There are ample infill sites within cities, towns and villages including a rich resource of brownfield land in the urban areas, which needs to be regenerated, without the need to encroach into protected Green Belt land.

3) I object to the proposed removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt and for consideration for its development. The site serves a vital role in protecting against urban sprawl from London. Development on the site will help develop an urban corridor stretching from London to Guildford. Under the NPPF, no ‘exceptional circumstances’ have been established to warrant removing the land from the Metropolitan Green Belt.

4) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

5) I object to the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC). I see the inclusion of FWA/TFM as pure political development providing a massive amount of a wayward and misleading housing target.

6) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

7) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. Severe negative impact on rural life and character, forever changing the makeup of the area to that of a suburb.
   b. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   c. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   d. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   e. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   f. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the...
M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

8) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

9) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

10) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

11) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency. I did not work hard and chose carefully to take residency in this unique, beautiful, special area to have it ruined by a Plan, which is clearly being promoted by development minded politicians and investors. Please redraft the Plan to spend my hard-earned taxes on developing housing on appropriate sites within cities and towns with existing infrastructure and the appropriate urban character and not by the misleading, convenient rationalisation of handing our irreplaceable countryside and cherished Green Belt to irresponsible developers who have no invested interest whatsoever in this region or its intrinsic value, which we must maintain at all costs for generations to come.

Once precedent would be set to take Green Belt, it would not cease until Green Belt itself is gone. This cannot happen. I trust that these objections will be fully considered, the Plan altered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
large site to be proposed on an effectively anonymous basis is a sad testimony to English planning law. Accordingly, I OBJECT to this policy.

I strongly encourage GBC to withdraw its draft Local Plan in the light of the Brexit vote and re-cast a substantially less ambitious plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Policy A35 Land at former Wisley airfield**

There are some minor changes proposed in the revised draft Local Plan to Site Policy A35, land at the former Wisley airfield. However, these changes do not address the many fundamental weaknesses of this proposed site for development, including its very poor sustainability, its total lack of transport sustainability, its destructive impact on local wildlife and ecology, the illegal air quality, the major destruction of the Green Belt at a critical location outside the M25 circle, the severe harm caused to local traffic and traffic on the A3, and the major impact on already over-stretched social infrastructure in the locality.

The proposed urban-style high-density development would be inserted in the midst of five rural villages and be totally incongruous to the character of this historic rural area, which would suffer irreparable harm.

In the revised draft 2017 Local Plan GBC a number of sites which removed which had been in the 2016 plan. As such I seriously question the site selection criteria which has been employed by GBC and that results in a number of major sites being removed whilst a site such as Wisley remains - a site with such poor site sustainability and many other major deficiencies.

For the reasons above therefore: **I OBJECT TO SITE POLICY A35, LAND AT FORMER WISLEY AIRFIELD**

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 4th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farm Meadows), Allocation A35, is immediately removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3898  Respondent: 8795649 / G Pask  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the Continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft local Plan for the following key reasons:
1) I object to a plan which proposes that over 70% of new housing be built within the GreenBelt. There is ample brownfield land in the urban area as which needs to be regenerated, without the need to encroach on protected GreenBelt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at theM25/A3junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously-air pollution in many parts of the borough, and particularly at theM25/A3 junction, is in excess of EU- permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and their reversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to...
the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows)-where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration and various extensions and amendments), Wisley Property Investments Ltd's(WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object to the removal of the Airfield from the Green Belt, in order to build 2000+ dwellings there. I consider that available urban brown field land should be used.

I wish to object because:

1. The local roads near Ockham are too narrow to take increased traffic.
   1. The A3 and M25 are inadequate for more heavy
   2. Local facilities - schools, doctors,shops, - would be seriously Cobham already has daily parking problems and there is at present no site for a secondary school in Cobham.
   3. Air pollution near Wisley RHS gardens would be further

I hope the planning department is able to find a more acceptable solution to the need for housing in Guildford.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to register my continued objection to the inclusion of Policy A35, Three Farm Meadows in the Draft Local Plan for many reasons.

1. I object to the change of boundaries which are identified incorrectly on the plan.
2. I strongly object to the removal of an additional 3.1 ha from the green belt – this is completely lacking in justification.
3. I object to the council not listening to previous representations and wasting tax payers time and money.
4. I object to the disregard of of the constraints of designated green belt land, infrastructure, air quality etc.
5. I object on the grounds that this site is the furthest from railway stations than any other possible site identified.
6. I object in relation to traffic associated with the RHS site opposite – the increases in traffic associated with this tourist attraction have not been taken into consideration.
7. There is a lack of employment on site – so most residents will travel to work. This will mean an increase in traffic – people will not regularly walk/cycle.
8. Local roads are at capacity and there are regular hold ups already.
9. I object to the lack of consideration regarding the damage caused by high pollution levels and nitrogen deposition.
10. I object to the lack of explanation regarding the change in the original time frame for the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY A35, land at former Wisley Airfield, Ockham

This proposed development of over 2000 homes will have major adverse consequences on the local infrastructure, in particular:

- High volumes of traffic on local narrow lanes in all surrounding villages.
- Unmanageable traffic flows onto an already busy A3 and Junction 10 of the M25.
- Additional traffic forced through Ripley and Cobham as a result of proposed road closures and junction changes. Particularly in the rush hour and school arrival and departure times these two towns are virtually impassable.

In addition

- As a result of the A3 and M25 junctions, levels of Nitrous Oxide around this area are already high and will be added to by the approximately 4000 additional vehicles from the site. This will be dangerous for new residents.
- The site is important for wildlife, being a Site of Special Scientific Importance. This was set up to provide protection for rare and threatened birdlife in certain lowland heath locations.
- There is currently no infrastructure at all on this site, meaning that all water, gas, electricity and telephone will need to be installed.

For the above reasons I OBJECT to the above-named Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
there is no infrastructure on the Wisley Airfield site so all of this would need to be put in place to support such a large number of new houses.

- the already congested junction of the A3/M25 would not be able to cope with a vast increase in the number of cars such a development would generate.
- the increase of extra traffic would have an adverse affect on the air quality in the area surrounding the site which would be detrimental both to people and the countryside.
- the local roads in the surrounding area are already congested and are not suitable to cope with the huge number of extra cars generated by a proposed development of 2000+ new houses.
- the schools in the surrounding area are already over subscribed and therefore cannot support an increase in pupil numbers from the proposed development at Wisley Airfield.
- the Medical Centre in East Horsley is operating to capacity and making an appointment is already difficult but this would become even more frustrating if numbers at the surgery increased.
- the shopping centre in East Horsley thrives and very often it's difficult to park so this would be increasingly difficult with the extra cars using the shopping centre.
- the number of people commuting to London or Guildford would increase and the station car park has insufficient capacity for many more cars.

For these reasons I OBJECT strongly to Policy A35.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to object to the latest Local Plan. The reasons for this are as follows:

1) I strongly object to the local area being taken out of the Greenbelt and the turning of our villages into an A3 urbanised corridor. The greenbelt should be protected at all costs. It is an easy option to give over hundreds of acres for building before exploring other avenues. Three Farm Meadows is in all but name, not a brownfield site, it should be designated greenbelt as it has been part of our rural environment for years. It is totally inappropriate to build over this land which has become a natural habitat of so much flora and fauna. Our villages wish to remain villages. Our children need green space to grow and flourish. It would be tantamount to an act of vandalism to carve through our beautiful countryside for developments which would be better located elsewhere on land already occupied by empty office blocks and disused buildings.

2) The road network is not supportive of so many building projects - especially Three Farm Meadows. How are all the people who live in these houses going to travel to work, school and local amenities. Already the A3 is solid every weekday morning. Junction 10-12 of the M25 are the busiest junctions on the M25 with traffic queuing back for miles every rushhour. Already the Horsleys face an overwhelming amount of traffic diverting from Junction 9 at Leatherhead and travelling through the village to get to further up the M25. Juggernauts and large busses travel through our village at astonishing levels. These roads are narrow and ill equipped to deal with such traffic. The huge increase in traffic which would be created by developments cannot possibly be supported by our local roads and lanes.

The local train stations carparks (Effingham and Horsley) are full every morning. Where are more travellers going to park? Where is the local public transport network? Last week I witnessed a bus grounding itself twice coming out of station approach. There just isn’t the space and capacity to deal with yet more commuting traffic.
Schools and Surgery - The local schools and doctors surgery cannot support a bigger intake. Already our villages have children who are unable to access their local school despite living in the catchment area. Car parks at the surgery are full to capacity. The Doctors are over worked and the national problem of recruiting GPs does not bode well for being able to cope with a large increase in local residents.

3) The water table in this area is higher than average. The roads are continually flooding and driving is hazardous with some roads, such as East Lane/The Street, frequently closing during heavy downpours. We have cheap road surfacing (such as that which was completed in Forest Road recently) which doesn’t last and the number of potholes frequently opening up is horrendous.

4) The current use of our roads by hundreds of cyclists needs to be taken into account. Cyclists flock to our area throughout the year training for Ride London and wanting to experience the Olympic route. Although not a problem in themselves, this should be taken into account when assessing the impact of any new developments on road usage. We continually have cycle teams and clubs riding through our roads - sometimes strings of 30/40 and the impact of these on local residents cannot be understated. Most residents are perfectly tolerant but more traffic would certainly involve more danger.

5) Air pollution is a real concern for anyone living in close proximity to the M25 and A3. This will also be a concern for residents of any new development at 3 Farm Meadows and may affect the rationale of building a school on that site. With child asthma and breathing related illnesses on the increase and parents choosing to move to the countryside to avoid the risk of their children developing these, it seems to be totally contrary to health guidelines to build a new village so close to one of the busiest junctions on the M25 and take away so much of the green space that is such a health benefit to so many.

6) Affordable housing - I have yet to see any affordable housing in the Horsleys and surrounding area. I wonder what is meant by affordable. My son is a primary school teacher. On a salary of £21,000/annum could you guarantee he will be able to afford a house in the area. There have been opportunities to build such houses but instead I see mansion after mansion being erected and small bungalows being turned into huge detached houses. This is not joined up thinking. There is a lot of talk, but not much action in this area. I feel developers are not really interested in supporting the local communities but more concerned with financial investment.

7) The development at Three Farm Meadows has already been rejected by GBC. I wonder why the developers are still permitted to put plans forward. I believe it should be completely taken out of the plan. The amount of time, effort and work for councillors to continually assess the viability of this plan, when it has already been rejected on environmental grounds, which have not and cannot be changed, seems ridiculous. It is a waste of our money to have this project continually submitted and debated.

In summary I totally object to Horsley and the surrounding area being targeted for an unsustainable number of housing projects. To build on Greenbelt land would be a travesty and an unjust act undertaken by the council. Once our precious countryside is built on, it can never be returned to what it was. There is no need for it and housing needs can and should be met through other projects in areas which already have the infrastructure to support them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Wisley Airfield

We don’t think this is a suitable site for a large new development since it suffers from considerable noise and air pollution from the traffic around the A3/M25 junction. In our opinion this site is not convenient for commuting to London from ‘local’ train stations and would put many more car journeys on our hard-pressed roads. We note that the developers are hoping that bus services will provide some help; we don’t believe the local bus companies are viable enough to support their current rural routes let alone add to them. Basically any development in this area cannot rely on public transport and will generate an enormous number of extra car journeys which the local roads and infrastructure cannot support.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2599  Respondent: 8803969 / David Scotland  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Dear Sirs

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

There are some small changes made in the revised Local Plan to Site Policy A35, Land at Wisley airfield in Ockham. However, these changes do not provide any justification for continuing to include this site within the revised Local Plan.

Having made a downward revision to its housing targets in the revised 2017 Local Plan draft, GBC is proposing to remove a number of development sites that were included in the 2016 version of the plan. The largest site removed is addressed by Site Policy No. 46 located in Normandy (‘Land to the south of Normandy and north of Flexford’) where a mixed used development of 1,100 homes had previously been proposed.

In rejecting a 2015 planning application for development at the Wisley site (proposed in advance of the Local Plan) GBC identified no less than 14 reasons to justify their rejection of the planning application, only one of which was the issue of it being in the Green Belt. The reminder highlighted a long list of deficiencies associated with this proposed development including its major impact on traffic flows, its severe environmental impacts, its total lack of existing transport and other infrastructure, as well as many other factors. According to GBC’s consultation website, a total of 1,429 comments were registered in the 2016 Local Plan consultation about the Wisley airfield site – 97% of them were against its development. And yet GBC chooses to maintain Wisley airfield as a policy site in the 2017 revised Local Plan.

With a planning appeal due to be heard in September 2017, I trust that if the planning inspector decides to reject the appeal of Wisley Property Investments, then GBC will finally listen to the views of so many of its residents, accept the AECOM sustainability conclusions on the deficiencies of this site and remove Wisley airfield entirely from the Local Plan.

I OBJECT to Site Policy A35, the creation of a new settlement at the former Wisley airfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I live within a few hundred metres of the proposed development at Three Farm Meadows.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) in the Local Plan. A planning application for this site has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration the planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

I object to the fact that air quality concerns have not been taken seriously. Air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, and cause further problems on roads locally and through Ripley Village.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the lack of consideration for the need for good public transport to service this and the other developments in the immediate area. The railway stations at Effingham Junction and Horsley will not be able to cope with the increased need for transport to London and Guildford and the car parks are already at capacity. Cycling would not be a safe option since the roads in the area are narrow, have no pavements and no space to provide cycle lanes.

I object to the fact that a large proportion the proposed new housing appears to be in the immediate localities of Ockham, Ripley, Send and the Horsleys.

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

3. Three Farms Meadow site

I OBJECT to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

I object to the choice of this site.

It is a green belt site and much of it is categorised as good agricultural land.

This development would cause great harm to the green belt through inappropriate development.

An air pollution surveyed revealed high levels of pollution near this site, and the GBC sensor located close to the site is close to or above the legal limit for NO2. It is an entirely unsuitable site because of air pollution. If it were chosen, GBC would be open to future claims for compensation from anyone on this site who developed illnesses that could be related to air pollution. As there is no AQMA on or near this site, as there should be, the legality of choosing this site is questionable.

I live near an any already overwelmed choke point at the cross roads between Effingham common road and Forest Road, near Effingham Junction station. In the morning and evening this is clogged, the idea that building another 2,000 homes on Wisley airfield, many of who’s owners will drive to the station, will not have a significant detrimental impact on the lives of the current population is incorrect. The idea that putting in traffic controls will be sufficient to cover this up is incorrect.

I object to site A35 Wisley Airfield. Yet another massive 2000 home development that is inappropriate and unsustainable and again in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1608  Respondent: 8818689 / Janet Tipper  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Secondly your intention to build over 2000 new houses on wisely aerodrom is unacceptable: the road infrastructure surrounding this site is unsuitable, being narrow, winding roads, effingham and horsley stations have no spare capacity and parking or spare seating on their trains which are already full by 8am; and the land itself is a valuable green space and a haven for wildlife.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/416  Respondent: 8818753 / Chris Bussicott  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

And that brings me to the elephant in the room; the proposals for Wisley airfield. All of the objections raised above also apply there, but multiplied by four times as many proposed houses with a couple of miles of the Horsleys. Once again, no provision for schools, medical facilities, public transport, roads etc etc.

This is a disastrous proposal that risks irreversibly damaging a truly beautiful part of Guildford borough. There is no evidence that the real impact has been thought through adequately, and those elected members and officers involved need to take a long, hard look at themselves and their motivations for putting forward what is so obviously a badly flawed plan. Instead, I urge you to revisit the possibility of brown field development, finding locations in the borough that offer the opportunity for local jobs, education and medical capacity, and transport infrastructure. This is not nimby-ism, this is simply asking you to address the GBC local plan in such a way that provides sustainable development without throwing up houses on unsuitable pieces of land, simply because they appear to be 'underdeveloped'.

You will have seen my letter raises a number of direct questions. I look forward to a detailed response to these so that I can better understand why GBC are promoting what appears to me, as a local resident, to be a simply terrible plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I strongly object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am deeply concerned that the Council has produced such a poor quality document for discussion, submission plan is unsound due to the number of errors in the plan, try fails to address the concerns of resident, which have been clearly aired on numerous occasions, it lacks transparency in the evidence base, the accessibility of the evidence base, including the fact that huge files have again been used and these are not accessible to those with poor internet connections. There is also considerable lack of clarity and coherence. Whether this is just very poor work or deliberate obfuscation remains to be uncovered.

I am also seriously concerned about the Council’s past track record of making inappropriate decisions, its willingness to be manipulated by property developers and builders and the scope for corruption and considerable financial gain for unworthy individuals.

I require confirmation that all of these comments together with all my previous comments are passed to the Inspector. I reserve my right to appear at the inquiry and present my evidence.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:
1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow, unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.
12. Opportunity (3) should be common to all sites and is not unique to this site.
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
16. I object to the removal of additional 3.1 ha from the green belt without any justification.
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

Additionally, the Council has failed to ensure that Surrey University needs to provide student accommodation on its own land, rather than losing valuable, appropriately situated housing stock for Homes of Multiple Occupation, which are the temporary residences of a transient population of students who have no commitment to the communities in which they live, and who make demands on Council services whilst not paying any Council Tax.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and thoroughly unfit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Allocation A35**

I OBJECT to the re-inclusion of this site in the Local Plan. This application was unanimously rejected by Guildford Planning Committee on 8th April 2016. This is a Green Belt location and under the NPPF no exceptional circumstances have been demonstrated to remove it from the Green Belt.

It has been misrepresented as brownfield land – less than 15% is brownfield, it is adjacent to an SPA and therefore within the 400m exclusion zone for housing. The remains of the runway are a habitat for rare flora and fauna. It is close to RHS Wisley and Thames Basin Health Special Protection Area. It is also an SSSI and SNCI. There will be a loss of high quality agricultural land (55% of the site) in breach of national policy.

It poses an unacceptable threat to the historic rural village of Ockham and will blight the properties there. There are some 159 residences in Ockham with narrow lanes, no streetlights, very few pavements and many listed houses.

Air quality concerns have not been taken seriously – air pollution at the junction of the A3/M25 is already in excess of EU permitted levels. Additional traffic will exacerbate this situation impacting the health of current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
It will have a detrimental impact on transport, local roads and road safety. This location is isolated and therefore residents will be reliant on private cars. There is already severe congestion on the Strategic Road Network of the A3 and M25.

There is a lack of suitable public transport. Railway stations at Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

The neighbouring villages of West and East Horsley are already at capacity. The local schools are oversubscribed, the medical centre overstretched and the local roads could not cope with extra volume of traffic. Parking is restricted and very difficult at times and there is little or no scope for improvement.

Serious concerns have been raised about this site by Highways England, Thames Water, NATS and the Environment Agency.

This site should be immediately withdrawn from the Draft Local Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

This development will be a dormitory town unless proper access to AND FROM Guildford is provided; an on slip at Old Lane is not sufficient. Existing access is of course fine for London and M25. Also a new A3 on slip road will attract additional traffic and has to be allowed for on Old Lane and Forest Road. Ockham Road North is already prone to flooding near the roundabout (and elsewhere) and so perhaps is not best suited as the PRIMARY access road.

The provision of so much housing will stress the adjacent villages. Provision has to be made to provide additional parking at Horsley and Effingham rail stations OR to provide proper connecting bus services. These need to be shuttle services with a frequency of 10 minutes or less or timed to properly interface with rail services or people will not use them. Otherwise there will be significant increase in traffic congestion especially at East Horsley with its role as "District Shopping Centre". The proposed 2000(!) dwellings is in fact LARGER than all of East Horsley and should even a small percentage of households be attracted to East Horsley to shop will totally change the nature of the village. Then perhaps it will become the suburban centre that the Council has been keen to designate it. Might it not be better for the new development to be the district centre and adequate retail units provided?

Has the security impact on the VOR and Heathrow stack from so many houses been adequately covered?

It is amusing to see reference to

- "Sensitive design at site boundaries that has significant regard to the transition from village to greenfield"

when the impact on the inset villages from Policy S2 is likely the exact opposite.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4604  Respondent: 8824865 / Costa Theo  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. 2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. 3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans. 4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC). 5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3963  Respondent: 8825377 / Jane MacIntyre  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35  
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  
I also object to other large proposals such as the 2,000 house development at Wisley Airfield which is included in the draft plan despite being rejected by the Planning Committee only this year. This makes no sense.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Comment ID: pslp172/3750 | Respondent: 8831521 / Denis Coulon | Agent: |
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc). There are no plans to alleviate the sudden increase in traffic on these narrow country lanes that would result from this new development.
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract thousands more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis. Parking facilities at the Horsley and Effingham stations are totally unfit to accommodate the onslaught of new vehicles from this proposed development.
9. I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.
10. I object to the removal of additional 3.1 ha from the green belt without any justification.
11. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
12. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
13. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
14. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to OBJECT to the Local Plan presented by Guildford Borough Council.

The inclusion of the Former Wisley Airfield site is unrealistic in its size and location. All the roads in this area are narrow, unlit and do not have footpaths. How can we envisage that residents will walk or cycle two miles to the nearest station, or that children will be allowed to cycle four miles to school on narrow country lanes? This plan is unworkable. The impact on traffic on the A3 even if the M25 junction 10 is improved, would be huge and unworkable. The traffic would also impact on an already poor air quality in this area.

The proposed Wisley Airfield site is in the Green Belt and not appropriate for housing, the local plan should ensure that affordable housing is located into the future in town settings where workplaces are within walking and cycling distance.

The impact of extra housing so close to the TBHSPA will have an adverse effect on the protected site, both by numbers of people, air quality and increased traffic. The present airfield has many priority and protected species of birds which feed on the arable fields, which are the main areas on the old airfield site, the hardstanding is less than 15% of the whole site.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** pslp172/3432  **Respondent:** 8831681 / Helen Cowell  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object to the local plan, particularly in regard to the former Wisley Airfield site which I believe is allocation A35.

The site is in such a position where local roads are very narrow and have no footpaths or cycle paths or indeed any way of adding them. Any housing on this site would be reliant on cars and could generate at least 4,000 car movements a day, the A3 and J10 of the M25 cannot cope with this additional traffic, even with the proposed changes to J10. When events are held at Wisley RHS gardens the roads are solid and they intend to increase visitor numbers by 500,000 per annum.

The site is greenbelt, it is farmland and it adjacent to the TBHSPA which would be over run by dog walkers and further affected by already high pollution levels.

Current studies show that young people and downsizers want to live in towns where they can walk to work, walk to train stations and out in the evenings to leisure facilities. All households on this site would need to drive daily for both work and leisure. The site is in isolated green belt farming country. For the developers to suggest that people could walk or cycle to the station is nonsense, this site is in the wrong place for development.

**Comment ID:** PSLPS16/2068  **Respondent:** 8832513 / Richard Russell  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Site A35: Three Farms Meadow, Ockham: (2000 houses)

I **OBJECT** to both the inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham) and the proposal to build 2000 new homes on it. The impact on the nearby villages of West & East Horsley (less than 2 miles distant) and of course Ripley of an additional 5,000 cars (plus associated additional traffic such as couriers, supermarket deliveries, buses etc) would be catastrophic. There is no room to park NOW in either of the Horsley villages or at the local stations in Horsley and Effingham and so a development of this magnitude would be calamitous.

Furthermore, the impact of an additional 5000 cars, all using the Ripley Roundabout for egress and access (not to mention an additional 5000 from the site proposed at Gosden Hill Farm (Policy A25), would simply magnify exponentially the major traffic flow problems that exist NOW. The nearest railway stations to this proposed site are those of Horsley and Effingham Junction; both of which are full to overflowing NOW and have no space available for enlargement. As is already evident NOW, anybody who attempts to drive towards the A3 / M25 from West / East Horsley, Send or Ripley during the rush hour faces a daunting proposition because not only is the A3 slip road (going northwards) at a virtual standstill but so is the A3 to the extent that the A3 traffic coming from the Guildford direction will be backed-up for several miles. Equally, the local village shops of Ripley and East Horsley have major parking problems NOW and would not be able to cope with the additional cars associated with this proposed development.

Following a major public outcry, GBC’s Planning Committee rejected unanimously a recent application for this development on numerous grounds yet, for no apparent reason, it has been included in the new Draft Local Plan – a clear invitation to the developers that they should try again. This is not a NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who have already been given many additional months to refine their application prior to its rejection. It is therefore my opinion that this development should be removed from the new Draft Local Plan for all the same reasons that it was rejected by GBC’s Planning Committee on 6th April 2016. These include:

- **Green Belt location and absence of “exceptional circumstances”**.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- **Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA)**.
- **Proximity to A3/M25 bottleneck and Ripley village and roundabouts**.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating 2,000 dwellings within the village of Ockham’s 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- **Impact on listed buildings**.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- **Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14)**.
- **Failure to evaluate the cumulative impact of this and nearby development sites on the area**.
In closing, permit me please to thank you and your colleagues for providing me with the opportunity to respond to this new 2016 Draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

It is adjacent to Elm Corner Wood and Hunts Copse both Sites of Nature Conservation Importance and in the proximity of a Thames Basin Heaths SPA of Ockham and Wisley Commons Site of Special Scientific Interest. The development would be a disaster for the area 2000 homes would be 6000 people, 12000 feet destroying the area.

The council has already rejected the development proposal for the site for the following reason:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
• Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
• Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).
• Failure to evaluate the cumulative impact of this and nearby development sites on the area.

But as reported in the national press the CEO of the Cayman Island Company (which have three major player from the Tory party including an former minister connected to it) who owns the land at Wisley, made a donation of £100,000 to the Tory party and then the site is back in the local plan. One can only wonder how this can happen, possible a phone call from central Office to its supports on Guildford Council? The company seem very sure they will get their approval because at the local cinema’s they are showing a short film during the adverts extolling how wonderful the development will be.

I object very strongly to a plan that proposes that over 70% of new housing be built within the Metropolitan green belt when there is ample brownfield land in the urban areas which needs to be regenerated. Also it is ignoring election manifesto promises.

I particularly object to the inclusion of the former Wisley Airfield where after 14 months of consideration Wisley Property Investments Ltd’s planning application was unanimously rejected by GBC on 8th April this year on the recommendation of GBC Planning Officers. Serious concerns about this site have also been raised by a broad number of authoritative sources including Highways England, Thames Water, NATS and the Environment Agency.

I also object to the threat the local plan poses to the historic rural village of Ockham and the blight on properties there. A 2,000 + dwellings development, with urban-style buildings up to five stories high and a population density higher than most London boroughs will have a detrimental impact on transport, local roads and road safety. I specifically point out:

1. The assertion that the development will result in a meaningful shift to cycling will not be born out as the development is too isolated and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The narrow rural roads and farm land will be completely incapable of sustaining what would amount to an extra 5000 people and 4000 cars.
3. The increase in the already severe congestion on the A3 and M25, a further planning application at RHS Wisley and a proposed 600 pupil secondary school on the site would add additional congestion on the A3/M25 junction as well as on local roads and be a serious danger to local cyclists and pedestrians.
4. There is a lack of suitable public transport in the area and the local railway stations at Effingham and Horsley cannot cope with the proposed increase in passenger traffic where car parking is already at full capacity.
5. Air quality concerns have not been taken seriously and there is a threat to wildlife in an area where there are many protected species.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I object very strongly to a plan that proposes that over 70% of new housing be built within the Metropolitan green belt when there is ample brownfield land in the urban areas which needs to be regenerated. Also it is ignoring election manifesto promises.

2) I particularly object to the inclusion of the former Wisley Airfield where after 14 months of consideration Wisley Property Investments Ltd’s planning application was unanimously rejected by GBC on 8th April this year on the recommendation of GBC Planning Officers. Serious concerns about this site have also been raised by a broad number of authoritative sources including Highways England, Thames Water, NATS and the Environment Agency.

3) I also object to the threat the local plan poses to the historic rural village of Ockham and the blight on properties there. 5. Air quality concerns have not been taken seriously and there is a threat to wildlife in an area where there are many protected species.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
• Former Wisley Airfield, Site A35

a) The flawed GBCS stated that the former Wisley airfield only conforms to two of the Purposes of the Green Belt. This is incorrect. These Purposes are:-

1. To check the unrestricted sprawl of large built-up areas. This site prevents the sprawl of Weybridge/Addlestone/Byfleet towards Guildford and the sprawl of Woking towards Leatherhead.

1. To prevent neighbouring towns merging into one another. Wisley lies between Guildford, Woking and Cobham as well as between Byfleet and Horsley.

1. To assist in safeguarding the countryside from encroachment. This is precisely why the site should NOT be removed from the Green Belt.

1. To preserve the setting and special character of historic towns. Ockham is a very ancient Parish comprising of nine separate settlements with the former airfield at its centre. The village has numerous Listed buildings including its Grade 1 church and three Conservation Areas. The site is an integral part of a rural extended village.

1. To assist in urban regeneration, by encouraging the recycling of derelict land and other urban land. Over 70% of the site is high quality agricultural land which has been brought back under cultivation since World War II, before which it had been farm land for centuries.

b) I particularly object to the change in the revised draft Local Plan extending the boundary of the former Wisley Airfield site to include land lying to the south of the site bordering Ockham Lane and Hyde Lane. Taking this extra area of land out of the Green Belt is totally unnecessary and is simply a move by the Council to enable the airfield owners to secure planning permission for the massive housing development they wish to build. Not only will the Green Belt boundary now be adjacent to the eastern end of the Ockham Conservation Area but it also borders on another Listed Building, Bridge End House.

The Strategy and Sites document states on page 205 "Setting of listed building on boundary". This is now incorrect as there are TWO listed buildings on the boundary, namely Yarne and Bridge End House.

Ockham Lane is a narrow winding lane with blind bends, no street lighting and limited pavements. It would not be able to cope with increased vehicular traffic from the development.

c) The housing density planned for the development is totally out of character and inappropriate for the Parish of Ockham. It is more akin to the density in an inner city site.

d) The proposal to build four and five storey buildings along the spine of the development is inappropriate bearing in mind that they will be visible for miles around to the east, west and south. Again, this would be totally out of character in a rural community.

e) Part 2 of the Strategy and Sites document proposes that a "bus network to serve the site" would be "in perpetuity". Such a statement is unrealistic and unenforceable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The need for new housing in Guildford Borough is predominantly for affordable housing. The former Wisley Airfield, being a rural site within Ockham Parish, is totally unsuitable for this purpose and there is no guarantee that the developers would adhere to an undertaking to build up to 40% affordable houses. After all, "up to 40%" could be just 3%!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6428  Respondent: 8837281 / R Brind  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The comments made in response to the earlier Draft Local Plan were largely ignored by GBC Councillors. I trust that the Council will listen to their electors this time round

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3126  Respondent: 8837377 / J Fisher  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Wisley Airfield would make the A3 and all the surrounding roads impossible to use – just do a serious traffic study you will see.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7625  Respondent: 8837729 / Harry Clarke  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. Policy A35 (Wisley Airfield) – Object

1. In breach of the NPPF, which states “Planning permission should be refused for development resulting in the loss or deterioration of irreplaceable habitats, including ancient woodland and … unless the need for, and benefits of, the development in that location clearly outweigh the loss”. There are large negative benefits to the locality if the development was permitted to proceed as outlined below. Irreversible damage to the heathland habitats at Wisley and Ockham Commons will occur if this development is permitted to proceed as outlined below.

2. Pollution is already over legal limits at Junction 10 of the M25, and has been for the last five years! The development can only increase the level of pollution in the area, thus resulting in the severe harm to residents and drivers in the area. Pollution must be reduced to below legal limits before any development could be considered. And must be kept below legal limits after any development.

3. Traffic congestion. Junction 10 of M25 and the A3 already suffers from major congestion. The extra traffic would cause extra congestion. This will result in significant economic loss, not only to the borough, but also to the country.

4. Irreversible damage to Wisley and Ockham Commons through pollution of the ground from nitrate deposits from the traffic fumes. This is contrary to the Councils legal duty to protect SPAs.

5. Loss of biodiversity due to increased visitors to SSSI and SPA sites.

6. Development within 5km of Thames Basin SPA, with totally inadequate mitigation measures in place.

7. Loss of Green Belt land

8. Inadequate access to public transport, such as the railway network. Lack of space in car parks, which are already over-flowing.

9. Increase bus traffic along narrow country lanes, which are unsuitable for such traffic (e.g. BT2 and BT3)

10. Increased traffic congestion along Effingham Common Road, causing unacceptably long travel journeys. Traffic during the rush hour is already very bad.

11. Increased danger to walkers due to massive increase in road and cycle traffic.

12. Increased barriers to wildlife moving between protected sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: pslp172/3520  Respondent: 8839553 / David Burnett  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to A35 Wisley Airfield

Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers, who are based in the Cayman Islands and not local, to try again. This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected.

There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including, Green Belt location and absence of “exceptional circumstances” and misrepresentation of the site as
brownfield land. 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it. It would result in the loss of high-quality agricultural land (55% of the site), in breach of national policy.

I find this policy contrary to NPPF 84, which encourages channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt.

I find this policy contrary to 87 & 88 due to the fact that ‘Very special circumstances’ have not been met.

There is an absence of adequate traffic data. This development would increase air pollution to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school. There is a lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households. Extreme housing density with tiny garden spaces has been proposed, out of keeping with existing homes in the area. The nature of neighbouring communities would be damaged by the creation of a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

There has been Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the continued inclusion of a site A35 (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3525  Respondent: 8840193 / David K Reynolds  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposal for the massive development of the former Wisley airfield, the effect on the Horsleys and Ockham would be enormous. How GBC can put this back in the plan when it was unanimously refused just a few months ago is beyond me. It appears your previous decision was worthless?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6540  Respondent: 8840193 / David K Reynolds  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

- We object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

We reflect objections from our family and friends who regularly visit us and benefit from the current surroundings and are acutely concerned about the changes proposed.
We trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

• We object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
  ◦ We object to the detrimental impact on transport, local roads and road safety. We specifically object to:
    1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
    2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
    3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
    4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
    5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
    6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
  ◦ We object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
  ◦ We object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
  ◦ We object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
  ◦ We object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.
12. Opportunity (3) should be common to all sites and is not unique to this site.
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
16. I object to the removal of additional 3.1 ha from the green belt without any justification.
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The first relates to Three Farms Meadow, Allocation 35. I object on the following grounds:

- This area is currently Green Belt, and I believe that the green belt should be protected. It was established to stop exactly the kind of urban sprawl that the Local Plan is now proposing in Three Farms Meadow.
- The number of houses proposed is many more than any of the local infrastructure can support, even if developed in the ways suggested - including roads, public transport and utilities.
- Ockham is a small hamlet - it will be utterly swamped by the Three Farms Meadow development. We love Ockham because of the wide open spaces and the beauty of the area - a development of this scale and type (urban) would irreversibly change the nature of the village and surrounding area.
- This plan has already been unanimously rejected by GBC’s Planning Committee.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on
the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/5420  Respondent: 8842817 / Simon Charles James Connolly  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My reasons for objecting are as follows -:

1. This site is not sustainable in this and previous versions presented due to the location.
2. Rail stations are further than any other identified strategic site which will result in more congestion in the surrounding area’s which will impact greatly on the many narrow winding unlit roads, making those who wish to walk or cycle unsafe. This is totally unrealistic.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. It is adjacent to the very popular RHS at Wisley where visitor numbers will increase by 500,000/annum. The traffic increase from the RHS has not been taken into account.
5. The traffic increase due to commuters travelling to Woking Rail Station has not been taken into account.
6. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
7. Opportunity (3) should be common to all sites and is not unique to this site

8. I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

9. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

10. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

11. I object to the removal of additional 3.1 ha from the green belt without any justification

12. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

13. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

14. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

15. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

16. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

17. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

18. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

19. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

20. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

21. I object to the inclusion of a 10% buffer in the housing number over the plan period. Which is totally unnecessary.

22. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

23. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

24. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

25. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I would like consideration to be taken for the reasons I have listed above that this plan is unsustainable and is not fit for purpose.
I object to Policy A35 Wisley. I object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. The site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again and a clear sign the council is keen to push forward sites which are not suitable. There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. It seems to me that this is predetermination in favour of this specific application unlike the Howard of Effingham previous site which lost its planning application and has rightly been removed from the plan. I am very concerned by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers who’s a Cayman Islands company. A director of the previous owner of the site is now acting as its promoter who is also a Conservative councilor in Oxford. The person managing the land is also a Conservative Councilor from Windsor. All very questionable in my opinion. Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Wisley Airfield. The current proposal would destroy the village of Ockham. In effect the proposal is for a New Town with houses and blocks of flats packed close together on a density scale more appropriate to an inner London borough. The surrounding roads are totally inadequate to cope with the additional volume of traffic that this would generate. Again this site is largely Green Belt and development on the scale envisaged cannot possibly be justified.

I OBJECT to the idea of a "new town" taking over and destroying the village of Ockham and am horrified that such an intense use of land for housing units can even be contemplated outside of a major city.

Comment ID: pslp172/1581  Respondent: 8845729 / John.P Burge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The idea of a new township on Wisley Airfield was, and continues to be a very and idea. GBC has already objected to a planning application for the Wisley site and presented fourteen reasons to justify its position, only one of which was the fact that the site is in the Green Belt. Despite this GBC has kept the Wisley Airfield site as a 'policy site' in the revised plan.

I OBJECT to the continued inclusion of the Wisley Airfield site in the revised Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

You have rightly rejected the latest Wisley Airfield plans, but then continue to include it in your latest plan! I think that the actual brown field area there is suitable for a small housing development (one to two hundred houses), bringing Ockham up to a viable village size. The traffic could be routed through the village, rather than dangerously onto the A3. You also need to realise the impact on the internationally important RHS Gardens.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2125  Respondent: 8846177 / Moira Tailby  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity already and further traffic is simply unsustainable and will make residents lives a misery.
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded roads and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. The proposed development is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS such as the very popular craft fairs, which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work away from the development. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design.”
11. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
12. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
13. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
14. I object to the removal of additional 3.1 ha from the green belt without any justification.
15. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
16. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
17. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
18. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees. It is extremely disappointing that the local Council sees fit to ride roughshod over local public opinion.
19. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
20. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
21. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
22. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
23. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
24. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations which have consistently been against the development.
25. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
26. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
27. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

28. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

29. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

30. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

31. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

32. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

33. The development is too large for the area and locality. A smaller development on the existing runway and concrete apron (a brownfield site) would be more appropriate and also come on stream more quickly.

34. The size of this proposed development is inappropriate in the Greenbelt and no exceptional circumstances have been demonstrated.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

The Proposed Wisley Airfield site should have been instantly removed from any future development, having been
unanimously turned down in the last 2 months by GBC. To add another 2000+ homes and probably over 4000 cars on the
already bottle necked A3/M25 junction is madness, not to mention the unsustainable pressure on all local services, from
parking, public transport, schooling, doctors etc.

I object. It's Green Belt (NPPF 89). What are the exceptional circumstances that require this site to be developed?

It is within 5km of the Thames Basin Heaths SPA, and therefore any development is subject to EU/UK legislation (NPPF
119). The impact cannot be mitigated with SANGs because there is no evidence base to support SANGs as required by
NRM6 viii, NPPF 158 and 166.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1462  Respondent: 8850433 / Ian Doherty  Agent:
Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

I have major concerns about this proposed development and have objected to prior planning applications at this location. In addition to the issues raised above relating to Junction 10 of the M25 and the lack of parking at both Horsley and Effingham Junction stations, I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

*I strongly OBJECT to Policy A35.*

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/1773  **Respondent:** 8850433 / Ian Doherty  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly OBJECT to this proposed policy for the reasons detailed in this letter.

a) The proposed development represents a fundamental breach of Metropolitan Green Belt rules:

The site forms part of the Metropolitan Green Belt. Under the NPPF, development on such Green Belt land is only permitted under 'very special circumstances'. GBC's Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that: *It has not been demonstrated that the benefits of the proposal amount to very special circumstances* such as to clearly outweigh the harm to the Green Belt and the other harm identified.

Ministerial guidance has repeatedly confirmed that unfulfilled housing need does not qualify as a very special circumstance. Whilst the developers' previous planning application was judged and rejected based upon the 2003 GBC Local Plan, the proposal to include this site within the 2016 Proposed Submission Local Plan does not fundamentally change the argument against it. Any removal of this site from the Green Belt can only be made based upon 'exceptional circumstances', which cannot be justified on the basis of unfulfilled housing need. If this was the case, then the entire Metropolitan Green Belt would already have become filled with housing.

Removal of this site from the Green Belt is totally against its rules, regulations and underlying spirit. The site location at the edge of the M25 circle represents a 'first line of defence' against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

Accordingly, I OBJECT to Policy A35 as a fundamental breach of the Metropolitan Green Belt rules.
b) This site does not meet acceptable levels of sustainability:

Sustainability Appraisal is a core concept of planning policy, yet this site is rated very poorly in terms of its sustainability.

The sustainability appraisal undertaken by GBC's consultant, AECOM, is presented in the Local Plan Evidence Base report 'Sustainability Appraisal (SA) of the Guildford Borough Local Plan' issued in June 2016. In their report AECOM have graded all Local Plan policy sites according to 21 different criteria using the conventional 'traffic light' system. Red colouring signifies poor sustainability. Of the six larger sites included in their evaluation, (those with proposed housing numbers of 1000 homes or greater), AECOM rates Site A35 as the very worst of all in terms of its sustainability. No less than 8 out of the 21 criteria are graded as 'Red' by AECOM for this site, more than any other large site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Detailed reasons why this site has such poor sustainability include the following:

- There is currently no infrastructure whatsoever at this site, meaning that all water, electricity, gas and phone services will need to be newly established;

- New large-scale sewage disposal will be needed, a fact recognised by Thames Water, indicating it may take 3+ years to provide adequate sewage handling facilities for this site;

- There are presently no schools, medical services or shops within walking distance of this site;

- There is presently no local employment at this site and little after the development is completed;

- There will be a significant destruction of agricultural land arising from this development; There will be significant environmental damage from this development;

- There is no public transport currently serving this location;

- The nearest train stations are Horsley and Effingham Junction, both around 3 miles away and so too far to walk. Neither station currently has significant parking capacity available.

- Travel from this site will be primarily dependent upon motor vehicles. Any new site so dependent upon motor vehicles for transport cannot be considered as being 'sustainable';

- New access roads will be needed and significant changes proposed to the surrounding road network, leading to further pressure on over-crowded rural roads and increase in the traffic congestion in nearby settlements;

Whilst some of these issues may be mitigated, e.g. by building new schools, medical facilities, etc, others such as the environmental issues and infrastructure impact may not. This proposal, fundamentally, represents an attempt to create a large-scale new settlement in a poorly-sited green field location. However, as the GBC's own consultant has demonstrated, this site does not reach acceptable minimum levels of sustainability.

Accordingly, I OBJECT to Policy A35 on grounds of its unacceptable sustainability.
c) The site will have a severe impact on local traffic & infrastructure:

The proposed development will have a severe adverse impact on road traffic in the surrounding area. This includes East Horsley where high volumes of additional traffic are likely from the residents of this new settlement accessing East Horsley's two stations, shops and nearby schools. Most of the rural roads in this area are narrow winding 'lanes' - a term used in a recent local public meeting by John Furey, senior SCC councillor for Infrastructure to describe East Horsley's through roads. Many of these 'lanes' are without pavements for large stretches, whilst the principal through-roads of Ockham Road South and Forest Road pass along unlit residential areas so narrow that two buses cannot cross in many sections of these 'lanes'.

The road closures and junction changes being proposed to accompany this development will only serve to increase traffic volumes through the village centres of East Horsley, Cobham and Ripley, and around the station at Effingham Junction, all of which already suffer from traffic congestion at peak hours. The further increase in traffic congestion at the A3-M25 intersection would only exacerbate an existing problem for the highways authority - we understand Highways England have repeatedly expressed serious concerns about this development.

Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity. The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel there and back to these stations lacks credibility. Other village facilities in East Horsley, such as the medical centre, are also likely to suffer adversely from a substantial increase in users as a result of this proposed development.

Accordingly, I OBJECT to Policy A35 on grounds of its severe impact on local infrastructure.

d) There are damaging health & safety implications arising from development at this site:

The site is located close to the junction of the M25 and A3, one of the busiest road junctions in the country. The Nitrous Oxide ('NOx') emissions recorded around this area are extremely high and will affect residents living at the proposed site. The proposal to build new primary and secondary schools at this location is also contrary to government policy prohibiting the building of schools on sites in areas where there is high NOx.

In rejecting the previous planning application by the developers, the GBC Planning Officer cited the "failure to provide adequate information on NOx emissions and nitrogen deposition and to provide any information on acid deposition" as one of the grounds for this rejection.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse health & safety implications.

e) The environmental impact on protected wildlife will be substantial:

GBC's Land Availability Assessment which supports Policy A35 states that the site lies within the 400m-5km 'Zone of Influence' of the Thames Basin Heaths Special Protection Area ('SPA'). This is not correct. The site is immediately adjacent to Ockham & Wisley Commons, an area designated as a Site of Special Scientific Importance ('SSSI'), which forms one part of the Thames Basin Heaths SPA and much of the site lies within the 400m Exclusion Zone where new building is effectively prohibited.

The SPA was set up to provide protection for rare and threatened birdlife in certain lowland heath locations, the provisions of which were agreed by GBC in its 'Thames Basin Heaths SPA Avoidance Strategy'.

This strategy establishes zones to protect the SPA from the impact of new development, particularly from the damage caused by pets (dogs, cats, etc) of local residents to the habitats of threatened ground-nesting birds. Land within 400m of the SPA is designated as an 'Exclusion Zone' where "there will be a presumption against additional new dwellings". Since
the Wisley Airfield site is immediately adjacent to Ockham Common for a significant length, much of this site falls
within 400m of the SPA Exclusion Zone.

The remaining portion of this site falls within the 400m - Skm 'Zone of Influence' set out under the SPA policy, which
requires developers to contribute a new SANG ('Site of Alternative Natural Greenspace') to mitigate for potential damage
caused to the SPA from new development -the size of the SANG is a function of the scale of the development. In their
previous planning application the developers proposed that the land within the 400m Exclusion Zone would provide their
SANG contribution. If accepted as a SANG, this would only encourage the 5000+ residents of the new settlement to
allow their pets access into this space, therefore defeating the objective of the SANG mitigation.

Even with the 400m Exclusion Zone in effect, the positioning of such a large site immediately adjacent to such an
important protected space will inevitably have a major detrimental impact on the wildlife within it.

Accordingly, I OBJECT to Policy A35 on grounds of its material adverse environmental impact.

The impact of the Exclusion Zone and SANG requirements, together with the need to provide for the existing waste
facility, means that the actual area of land available for housing development at this site is estimated to be around 43
hectares.

f) The development is totally out of keeping with local character, context & distinctiveness:

It is a key element of planning policy that new developments should be in keeping with the established pattern of
development in the area. In the 2016 Proposed Submission Local Plan, GBC's very first housing policy, Policy H1,
requires that development should: "make the most efficient use of land whilst responding to local character, context and
distinctiveness." However, Policy A35 fails to do this.

With its proposal to build some 2,100 homes on and around the site of the former Wisley Airfield, Policy A35 will create
a new settlement larger than any other in Guildford Borough, outside Guildford itself. The nearby historic village of
Ockham has merely 159 dwellings. It will be completely swamped by a development on such a scale.

Moreover, the design and density of the proposed development will be completely out of context with its surrounding
area. Due to the restrictions of the SPA Exclusion Zone, the need for SANG provision and the land needed for the waste
facility, the actual land area to be used for housing development under Policy A35 is estimated to be around 43 hectares.
Therefore, with 2,100 homes proposed for this site, the overall housing density of the settlement area may be calculated
at around 49 dwellings per hectare (‘dph’).

East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town,
with some 1,760 homes. East Horsley presently has an overall housing density of 8.1 dph within its settlement area.
Therefore, the proposed development under Policy A35 is six times as dense as the nearest settlement of a comparable
size. The proposed development under Policy A35 therefore utterly fails to respond to local context and as such is in
breach of GBC's own Housing Policy H1.

The density of 49 dph proposed under Policy A35 is effectively an urban density appropriate for a metropolitan location.
It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously
presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley. These villages
have grown up organically over a thousand years. They contain many historic, listed or otherwise protected buildings as
well as a range of residential housing, predominantly detached two storey houses or bungalows. They are all picturesque
villages with charm and character. Visitors come to the area to enjoy some of the prettiest villages and countryside in
southern England, all within easy access of London. The character of this whole area would be irreparably destroyed if
this development goes ahead.
Accordingly, I OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

**Concluding remarks**

I have major concerns about Policy A35. I consider this proposed policy to be a severe contravention of Metropolitan Green Belt rules. It will result in a new settlement of very low sustainability, it will have a major adverse impact on the infrastructure and environment across a widespread area and it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

**Accordingly, I strongly OBJECT to Policy A35.**

In the light of the recent referendum outcome, which will result in the UK leaving the EU, it is inevitable that the population and economic projections for Guildford Borough will need to be reduced.

I presume that GBC will in due course be making such reductions to its proposed housing projections to reflect these changed circumstances. In our opinion, the proposed development at former Wisley Airfield ought to be the very first site in the Borough that GBC should remove from its draft Local Plan as a result of the UK now proceeding to leave the EU.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

>

> The Proposed Wisley Airfield site should have been instantly removed from any future development, having been unanimously turned down in the last 2 months by GBC. To add another 2000+ homes and probably over 4000 cars on the already bottle necked A3/M25 junction is madness, not to mention the unsustainable pressure on all local services, from parking, public transport, schooling, parking, doctors appointments etc.

Having already voiced my concerns by letter and email previously, I wish to repeat my objections, in particular to the ridiculous and greed driven Wisley "new town development". As outlined previously, the green belt has to be protected, otherwise some of the country's most naturally beautiful countryside will be swallowed up by the march of suburbia.

The traffic problems that will be added at the A3 junction 10/ M25 interchange that I currently crawl through every day, the strain on an already overcrowded Effingham Station, the local villages of Ripley, Ockham and the Horsley's that are already becoming busier on the roads every month, plus schooling, medical centre etc, mean that this development is totally unsuitable for that location.

I appreciate that we all have to do our bit and controlled increase in housing is required, but to dump a population of over 2000 homes, probably adding 5-6000 people is completely unsustainable, as already pointed out by the planning experts and Guildford Council.

The Developers must not win this public enquiry, because it'll be the thin end of the wedge and before we know it, the Surrey Hills will be covered by concrete.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Policy A35 Land at Wisley Airfield

Previous planning proposals have been a clear contravention of Metropolitan Green Belt Policy. If the proposed 2000 homes are built it will create effectively a new town in the heart of the Green Belt. In order to get sensible access to and within, it will undoubtedly need to damage and use more of the Green Belt, as well as destroying the character of surrounding villages by causing chaos to communities and peoples quality of life.

Comment ID: PSLPS16/1437  Respondent: 8852289 / John F. Wood  Agent: 
Documnet: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposal to build on the former Wisley Airfield site. This has very recently been unanimously turned down by the Borough Council on 14 different counts and should be removed from the Local Plan permanently.

My specific objections to the Former Wisley Airfield development are as follows:

1) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

2) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

3) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

4) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed
houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

5) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

6) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

7) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I conclude as I began. I strongly object to the Proposed Local Plan.

HANDS OFF THE GREEN BELT!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
**The Wisley Airfield development** looks at first sight like a good idea on a 'brown field site' but again, there is no proper provision detailed to counter the impact (eg 3000+ more cars in use!) on the surrounding villages or the other new loads on the infrastructure so, in that sense, it is 'still born' and just a potential blight on the local area.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPS16/2590  **Respondent:** 8853921 / J S Hawkins  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object most strongly to the draft local plan for the following reasons:

1. I object to the removal of the former Wisley Airfield from the Green Belt. It was always understood that this area would be returned to farmland after the war
2. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. Brown Field land must be used first. It was an election manifesto promise.
3. I object to the disproportionate allocation of housing in this area. 239 of the local plans new housing is proposed around Ockham, Ripley, Send and the Horsleys
4. I object to the density of the housing on planned. It will create an urban environment totally out of keeping with this rural area.
5. I object to the huge increase in traffic this scheme will generate on roads totally incapable of coping. A development of 2068 houses will attract an additional 4000 cars.
6. I object to the additional traffic to the A3 and M25. Both roads can barely cope at the moment.
7. I object to the lack of sufficient public transport. The stations at Horsley and Effingham Junction have no room for additional car parking. The trains at peak times are grossly overcrowded.
8. I object to the fact that as this area is all SSSI and site of Conservation Natural Land. No account has been taken
9. I object to the continued inclusion of the Wisley Airfield site where this planning application has already been unanimously rejected by the Guildford Council’s Planning Committee.
10. I object to the added air pollution and noise which this development will create.
11. I object to the assumption that infrastructure will cope. It cannot. Water and sewerage will be a serious problem
12. There is no major employment in the area. People have to commute - probably by car – to the place of work. Huge traffic congestion will result.
13. I object to the losing a huge quantity of good quality farming land.
14. I object to the developers assumption that 2068 houses will rely on bicycles/buses to get to a station. This is utter nonsense. There are no busses to stations and cycling is out of the question on local narrow roads.
15. I object to the fact that with mixed housing crime will be a problem.

I trust that my objections will be fully considered and that the former Wisley Airfield, Allocation 35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Section page number  Page 190 of 1393  Document page number  1340
The proposed development of over 2,000 houses at Ockham (on the former Wisley Airfield) would have a huge impact on the Horsleys. This large, mixed, housing, retail, commercial, traveler and schools development in close proximity to the Horsleys would have a severe effect on these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Historic setting - This proposed settlement would adversely affect an historic setting the area being that of a wartime airfield and later a flight testing centre.

Highway issues - Any new roads or access roads will destroy additional greenbelt land. The development would generate huge numbers of cars and impact dangerously on highway safety at the junction with the A3 and along the A3 which is already busy, crowded and often at a standstill. Additional traffic will make the A3, where it acts as the Guildford Bypass, even more of a dangerous problem that it is now. The A3 will not cope with additional traffic where it can be avoided. It can be avoided by not building a new development of this size here.

There is a lack of public transport to the proposed development. The 515 bus stops on the A3 but too far away to be used by people living on the proposed development. This lack of public transport will be an additional factor in increasing the number of cars on the A3.

It is an inappropriate use of both greenbelt and agricultural land.

The area is a SNCI due to its populations of reptiles and three red list and seven amber list birds which we have a duty to protect. Providing alternative sites for them will not work.

Any benefits derived from the development will not outweigh the harm it would do.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

This would be a major development that would have far reaching consequences beyond its immediate vicinity. It would remove a large area from the MGB and replace it with a new town that would dominate the existing nearby villages. The increased traffic generated would overwhelm the local roads, and the existing facilities would be insufficient to cater for the increased population. The MGB provides a Green Belt around London. Locally it separates London from Guildford. Removal of such a large area from the MGB in this intervening open space would fail to assist in safeguarding the countryside from encroachment, contrary to NPPF paragraph 80.

Having regard to the complete lack of existing infrastructure on the site, the lack of public transport, the lack of local employment, the loss of agricultural land that would arise, and the environmental harm caused, the proposed development would be unsustainable.

The impact on the local road network, which consists largely of narrow lanes, would be unacceptable. These roads already cater for a high volume of traffic and cannot reasonably accommodate more. The car parks at both Horsley and Effingham Junction Stations are full and do not have any spare capacity.

While facilities such as schools and medical centres could be included in the development, failure to provide them before the inhabitants take up residence would only serve to harm the already overstretched facilities in nearby villages.

This proposal is totally contrary to Green Belt policy and would have significant adverse effects on the surrounding area and its population.

2. The scale of proposals for the former Wisley Airfield site so close to the Horsleys. The negative impact of such a development would be enormous. Having recently rejected a detailed planning proposal for this site which exposed its total lack of viability this should be seen by the Borough Council as the basis for dropping this proposal in its entirety.

I object to Policy A35 Wisley

I object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected.

Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.
2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
5. Absence of adequate traffic data.
6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.
8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159
10. Cost of infrastructure required to the detriment of alternative more favourable sites.
11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**POLICY A35 WISLEY**

21.1-I object to the changed Policy A35 Wisley in respect of the identified mitigation to address the impacts on Ripley High Street and surrounding rural roads comprises two new slip roads at A247 Cladon Road (Burnt Common) and associated traffic management. This will not in any way mitigate the impact on Ripley High Street since traffic will need to pass through Ripley to reach Wisley.

21.2-My previous objections therefore still stand for this changed policy concerning the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

21.3-There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

21.4-This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

21.5-Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.

2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.

3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

5. Absence of adequate traffic data.
6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.

7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.

8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. **Three Farms Meadow site (site A35)**

I object. The re-inclusion of this site is very disappointing following the public outcry for its previous inclusion and the rejection of a recent planning application.

It should be removed as it is in the Green Belt, less than 15% is brownfield and the former runway has never had buildings on it. The former runway is a Special Protected Area.

The infrastructure can't cope with the increased traffic and pressure on services it will create. The cost of improving the infrastructure will mean alternative sites will be more viable if included in the assessment. It is also disproportional to build 2000 homes in a village of 159. It will also have adverse effects on the Horsleys and put pressure on the Horsley station.

I hope you will reconsider the plan and listen to the local people rather than just developers.
Planning objections for TFM site which is allocation A35

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons and I require confirmation that all of these comments together with all my previous comments are passed to the Inspector and reserve my right to appear at the inquiry and present my evidence.

I have below listed my many objections:

- I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
- I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
- I object to the removal of additional 3.1 ha from the green belt without any justification.
- I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
- I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
- I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
- I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
- I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
- I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
- I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
- I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.
- I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
- There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
• The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

• It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

• It is further from railway stations than any other identified strategic site.

• It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10 of the M25)

• Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

• Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

• Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

• It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The associated traffic increase from the RHS has not been taken into account and the regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.

• It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

• The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

• Opportunity (3) should be common to all sites and is not unique to this site

• I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

• I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

• I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

• I object to the extension of the plan period by 1 year as it has not been identified as a major change

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is **Sound**? ( No ), is **Legally Compliant**? ( )

As before I object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

I believe it is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

It is adjacent to the most popular visitor attraction in the south-east.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”. Opportunity (3) should be common to all sites and is not unique to this site

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

I object to the removal of additional 3.1 ha from the green belt without any justification.

Development should be excluded in flood zone 2 and 3 not limited

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes. The council has not explained why they think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the extension of the plan period by 1 year as it has not been identified as a major change.

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc.

I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Due to the number of errors in the plan, and lack of transparency in the evidence base, the accessibility of the evidence base, including the fact that huge files have again been used and these are not accessible to those with poor internet connections and lack of clarity, I believe that the submission plan is not sound.

I request confirmation that the comments contained in this documents together with all my previous comments are passed to the Inspector.

As before I object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

I believe it is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing.

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

It is adjacent to the most popular visitor attraction in the south-east.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”. Opportunity (3) should be common to all sites and is not unique to this site.

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

I object to the removal of additional 3.1 ha from the green belt without any justification.

Development should be excluded in flood zone 2 and 3 not limited.

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes. The council has not explained why they think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the extension of the plan period by 1 year as it has not been identified as a major change.

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc.
I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

In conclusion I consider for many reasons not least those listed above that The Local Plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3868  Respondent: 8858913 / Stephen Carter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

My name is Margaret Carter. I am a resident, aged 95, of Weston Lea, a road in West Horsley where a number of other elderly people also live in the purpose built bungalows. I do not have internet, so have asked my son, who also lives nearby in West Horsley, to send this letter to you using his email.

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them). This is particularly important to pensioners and the aged, such as myself and others who live in Weston Lea. We are only too aware of the dangers posed by the excessive traffic on the village roads, coupled with the narrow or non-existent pavements.
e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. The bus service is close to non-existent - a few busses a day to very limited destinations make it of little real use.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

11) I object also on the grounds that the utilities of the village are incapable of sustaining the degree of development envisaged. Car parking at the shops, station and doctors surgery is already inadequate.

12) Finally, I object to the purported Housing Need figures on which the plan is based. These are grossly exaggerated, as reviews have shown. If reliable figures were used the issue of building on the green belt would not arise. The proposals represent a totally unjustifiable destruction of valuable and essential green belt land. The need is for affordable housing on brownfield land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
A35 - Wisley Airfield

I OBJECT to the removal of the former Wisley Airfield from the Green Belt and to the proposed building on it for reasons given above. Such development has an obvious immediate knock-on effect on the surrounding communities and rural landscape, including the Horsleys. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. This is the major part of the over-allocation of housing in this part of Guildford Borough - 23% of the Plan's new proposed housing being in the immediate localities of Ockham, Ripley, Send and the Horsleys. In effect it is proposing to create a New Town in the heart of the Metropolitan Green Belt with very low sustainability. Above all it will cause the destruction to the character of one Guildford borough's most picturesque and historic villages - Ockham, a hamlet of about 150 houses will be engulfed.

A planning application (15/P/00012) for this site was unanimously rejected by GBC's Planning Officers just before the Local Plan was published and so it is very disappointing to see its inclusion in the Draft Plan. Amongst the 14 grounds for refusal were: Green Belt location, proximity to sites of special protection, proximity to M25/A3 junction and associated noise pollution and air quality problems, lack of local transport possibilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7763  Respondent: 8858913 / Stephen Carter  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the removal of the former Wisley Airfield from the Green Belt and to the proposed building on it. Such development has an obvious immediate knock-on effect on the surrounding communities and rural landscape, including the Horsleys. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. This is the major part of the over-allocation of housing in this part of Guildford Borough - 23% of the Plan's new proposed housing being in the immediate localities of Ockham, Ripley, Send and the Horsleys. The assertion that the development will result in a meaningful shift to cycling and walking is risible. It is too isolated, the roads would be too dangerous and, in the modern world, there will inevitably be heavy reliance on private cars. It would be folly to make any other assumption. In this respect, a development of 2,068 homes will result in around 4,000 additional cars on the road in the first instance, possibly more as children grow up and the numbers of cars per household increases. There are no cycling paths, indeed no footpaths, on many, resulting in danger to life and health.

There are important environmental and ecological considerations - the Thames Basin Health's Special Protection Area, Sites of Special Scientific Interest and a Site of Nature Conservation Interest are all directly affected. It is also notable that serious concerns about this site have been raised by important bodies, including Highways England, Thames Water, NATS and the Environment Agency. Air quality concerns do not appear to have been considered in sufficient detail, or at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4881  Respondent: 8859553 / Clare Bevan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
8. The continued inclusion in the Local Plan of the former Wisley airfield (which is located in Ockham and which is known locally as Three Farms Meadows) is perverse and illogical, and is unsound for reasons of sustainability, deliverability and need.

Specifically in relation to the former Wisley airfield/Three Farms Meadows (FWA/TFM), I OBJECT to the inclusion of that site in the Local Plan on the grounds that:

1. FWA/TFM was included in the draft 2013 GBC Local Plan and was widely objected to. That draft Plan was eventually withdrawn after many months of consultation and deliberation.

2. The Wisley Property Investments Ltd (WPIL) planning application of January 2015 (Reference: 15/P/00012), as subsequently amended, for a phased development of a new settlement of over 2000 dwellings at FWA/TFM was after 14 months decisively and unanimously rejected by GBC on 8 April 2016 following the recommendation of the GBC Planning Officers.

The reasons for the refusal of the application were many but included that the proposed development:

1. was an inappropriate development within the Green Belt;
2. would have a clear and substantial detrimental impact on the openess of the Green Belt and conflict with the purposes of including land within the Green Belt;
3. failed to demonstrate that the benefits amounted to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified;
4. failed to comply with the objectives of policy RE2 of the Guildford Borough Local Plan 2003 (as saved by CLG Direction dated 24/09/2007) and chapter 9 of the National Planning Policy Framework;
5. was within the 0 -400m and the 400m to 5km zones of the Thames Basin Heaths Special Protection Area, etc.
6. would have a severe adverse impact on the safe and efficient operation of the strategic road network, and a severe impact on the efficient operation of the local road network;
7. failed to deliver the required transport sustainability measures;
8. failed to secure an appropriate provision of affordable housing;
9. was detrimental to the viability and vitality of the existing district and local centres in the vicinity of the site;
10. would result in loss of the safeguarded waste site;
11. presented a dense and urban form of development owing to its quantum and scale;
12. had an adverse impact on the setting and significance of a designated heritage asset;
13. had an unacceptable air quality impact;
14. impacted on education infrastructure;
15. impacted on policing infrastructure;
16. impacted on health infrastructure;
17. impacted on library provision.

3. The value of the Green Belt and most importantly the value of FWA/TFM as a critical core at the heart of the Green Belt. There are no exceptional or very special circumstances justifying removal of the site from the Green Belt or its development.

1. The value of FWA/TFM from an environmental and ecological standpoint, not least in relation to the Thames Basin Heath Special Protection Area, a SNCI and a SSI.

2. The value of FWA/TFM as a community asset and as a vital “lung”, not least because of the dangers and possible illegality of increasing pollution and decreasing air quality as well as acid deposition on the SPA impacting human health and animal, plant and soil viability in the site and immediately surrounding area.

3. The critical location and current nature of FWA/TFM in relation to the historic and current viability of the Ockham hamlets and surrounding villages.
1. The total unacceptability and disproportionality of the threat posed to Ockham, an historic rural village with around 160 existing dwellings, and with narrow lanes, no street lights, few pavements, Conservation Areas and many listed properties – which would be completely subsumed by a 2000+ dwelling development, with urban style buildings up to 5 storeys high and a population density higher than most London boroughs. Ockham’s existing population of just over 400 would be increased over 15 times.

1. A Local Plan and potential development which do not meet, and indeed which are completely contrary to, the needs and desires of Ockham’s population, as evidenced in the existing Ockham Parish Plan and the emerging Lovelace Neighbourhood Plan.

1. The detrimental and unsustainable impact of development at FWA/TFM on transport, the A3 and M25, local roads and road safety, with increased vehicle movements (an estimated 4000 additional cars plus increased bus and HGV movements during construction and afterwards), on rail stations and car parking which are already at capacity, and on local services and infrastructure.

1. The value of FWA/TFM for agriculture, comprising as it does over 75% of agricultural land including 63ha of Grade 2, 3a and 3b agricultural land (of which 45.4ha is classified as best and most versatile land – Grade 2 and Grade 3a).

1. The fallacious nature of claims made that FWA/TFM should be regarded as “brownfield” or previously developed. It should also be noted that the former airfield hardstanding and part of the old runway are within the 0-400m exclusion zone of the SPA.

1. Much evidence exists that the adverse consequences of development of the site, including damage to the ecology of, e.g., the SPA, cannot be mitigated.

1. The impossibility in practical terms of creating a sustainable development on FWA/TFM which is further demonstrated by the historical use of and lack of development on the site, and most recently by the inability of the current landowner/developer and its many experts and advisers to come up with a sustainable development plan despite numerous attempts over an extended period.

1. The cumulative adverse consequences of other actual or potential developments in the area particularly in Ripley, Send and the Horsleys, and the impact on the future development plans of the RHS at Wisley.

The above objections graphically demonstrate why FWA/TFM was and should remain in and be part of the Green Belt, and why the location, limited size, lack of infrastructure, relative isolation, distance from places of employment, and existing overstretched and inadequate public transport, roads, services and facilities make the site totally unsuitable for any kind of significant development.

The fact that the Local Plan still includes FWA/TFM (as well as neighbouring land not owned by WPIL) as a potential site for development flies in the face of logic and GBC’s own arguments and decisions, and amounts to disregard for widespread local and further afield opinion.

I therefore strongly OBJECT to this further and unwarranted attempt to exclude FWA/TFM and other parts of Ockham Parish from the Green Belt and thereby to encourage development thereon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed local plan on Wisley Airport on the following grounds:

**Green Belt** – Reduction of Green Belt in the Borough Local Plan would be extremely detrimental to the villages. Any loss to this important land, would create a dangerous precedent.

**Lack of Facilities** - The village does not have sufficient facilities to support more development.

- The medical centre will be required.
- A separate school will be necessary.
- Statutory Undertakers – I do not believe that there is sufficient capacity to cater for the additional developments. Before any sites are considered for approval it is essential that a feasibility study is carried out to determine whether the sewage, drainage, electricity and gas networks can accommodate any further development.
- Highway Safety – The roads in East and West Horsley are relatively narrow and the visibility is often poor, therefore any substantial increase in traffic would lead to more accidents. I am involved with the speedwatch in West Horsley and the speed of traffic often travels at speeds higher than the limit. It is submitted that vehicles entering and leaving an access have to accelerate, slow down or stop in the road whilst other traffic passes them. Such manoeuvres give rise to misjudgement of speed, distance and clearance, which is one of the main causes of accidents. Accesses are potentially dangerous and their numbers should be restricted in the interests of safety and traffic flows. I recommend that a full traffic and capacity study should be carried out prior to any development being approved. Any necessary highway improvements should also be submitted for comment.
- The road structure has not been constructed to a sufficient standard for the existing traffic.
- Pavements East Lane, Ockham Road South and North are narrow and as a consequence a hazard for pedestrians, especially women with prams and toddlers. The additional traffic would make matters worse.
- There is not any provision on the roads in Horsley for cyclists. I was witness to a fatal cycling accident outside my house.
- There is not sufficient parking at the railway station at present so any increase of population would exacerbate the situation. I also understand that the trains at peak hours are very crowded with standing room only.
- There is often insufficient parking in the village centre.
- A large number of houses would completely change the character of the village.

The above comments are primarily concerned with East and West Horsley. The major development proposed at Wisley Airport would further exacerbate these issues.

On the above grounds it is submitted that the proposals for the Draft Local Plan be rejected.

I object to the proposed local plan on Wisley Airport on the following grounds:

**Green Belt** – Reduction of Green Belt in the Borough Local Plan would be extremely detrimental to the villages. Any loss to this important land, would create a dangerous precedence.

**Lack of Facilities** - The village does not have sufficient facilities to support more development.

- The medical centre will be required
- A separate school will be necessary.
- Statutory Undertakers – I do not believe that there is sufficient capacity to cater for the additional developments. Before any sites are considered for approval it is essential that a feasibility study is carried out to determine whether the sewage, drainage, electricity and gas networks can accommodate any further development.
- The A3 is at present running above capacity and there at present extensive queues at junction 10 and the section to and fro from Guildford, therefore a major development adjacent to the A3 cannot be accomodated.
- Highway Safety – The roads in East and West Horsley are relatively narrow and the visibility is often poor, therefore any substantial increase in traffic would lead to more accidents. It is submitted that vehicles entering and leaving an access have to accelerate, slow down or stop in the road whilst other traffic passes them. Such manoeuvres give rise to misjudgement of speed, distance and clearance, which is one of the main causes of accidents. Accesses are potentially dangerous and their numbers should be restricted in the interests of safety and traffic flows. I recommend that a full traffic and capacity study should be carried out prior to any development being approved. Any necessary highway improvements should also be submitted for comment.
- The road structure has not been constructed to a sufficient standard for even the existing traffic.
- Pavements East Lane, Ockham Road South and North are narrow and as a consequence a hazard for pedestrians, especially women with prams and toddlers. The additional traffic would make matters worse.
- There is not any provision on the roads in Horsley for cyclists. I was witness to a fatal cycling accident outside my house.
- There is not sufficient parking at the railway station at present so any increase of population would exacerbate the situation. I also understand that the trains at peak hours are very crowded with standing room only.
- There is often insufficient parking in the village centre.
- A large number of houses at Wisley would be detrimental to the Horsleys and completely change the character of the village and the surrounding area.

The above comments are primarily concerned with the A3 and East and West Horsley. The major development proposed at Wisley Airport would further exacerbate these issues.

On the above grounds it is submitted that the proposals for the Draft Local Plan be rejected.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT also to the proposed development of the Wisley airfield site. This is a totally inappropriate development within the Metropolitan Green Belt area which should be protected. The need for 2000 dwellings has not been justified and will place untenable strain on local services which has been well documented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• Access confined to inadequate narrow lanes.
• Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
• Major impact on neighbouring villages, especially Horsleys.
• No assessment made of collective impact on area of this and 6 Horsley sites.

Dear Sirs

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open...
spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for a number of reasons including:

1. This is the least sustainable site identified in both the current and previous versions of the Local Plan because of the site constraints and location.
2. This site is further from railway stations than any other identified strategic site.
3. The site is adjacent to the most congested stretch of strategic road network (SRN) in the county and close to one the most congested junction in the country (M25 -J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (in peak times and also due to accidents, diversions, roadworks etc)
5. Suggested public transport initiatives including bus services to and from Guildford will exacerbate the already over crowded road network leading to unreliability and delay, which in turn will make local residents choose individual modes of transport resulting in further congestion.
6. Public transport bus services to Horsley will reduce the safety of the local road network as lanes are narrow and this will increase danger to cyclists and walkers which should be encouraged as eco friendly alternatives. The area is greatly used by cyclists at all times throughout the year who seek to follow the 2012 Olympic cycle route and train for the annual Ride London –Surrey 100 cycle event. The current plan will add to traffic flows and endanger cyclists and walkers lives.
7. The proposed site is adjacent to the Royal Horticultural Society gardens, which one of the most visited destinations in the south-east of the country. I understand that expansion plans the RHS have will significantly increase the number of visitors to Wisley. From reading the plan, the resultant traffic increase from the RHS has not been considered. Furthermore, there are regular events at the RHS which attract 1,000’s of additional visitors and again the impact of this increase in traffic does not appear to have been taken into consideration.
8. Once completed, there will be minimal employment opportunities on the developed site as a result of which, the majority of new residents will travel to work. The majority of these are likely to use motor cars ( probably with only a driver) and this will add significant volumes of traffic to the already over crowded local narrow lanes.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

As a further over arching comment on local and government policy, I do not understand why more emphasis is not being given to long term investment in developing other parts of the UK. It is evident that the South East and the London conurbation in particular is over crowded. The answer is not to destroy the green belt but to encourage a shift in population to other areas which have been neglected by successive governments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A35 and Policy S2

I object to the Former Wisley airfield being included in Policy S2 as a strategic development site.

I also object to Policy A35 which sets out details of the proposal to develop the former Wisley airfield.

The main reasons for our objection on these policies are as follows:

- Inappropriate development in the Green Belt, and no exceptional circumstances being evidenced for the removal of the land from the Green Belt.
- The site does not exhibit the necessary sustainability, as shown by adverse sustainability appraisal reports.
- Air quality at the site is in excess of EU permitted levels.

The increased volume of road traffic on roads which are already severely congested, and which are regularly and frequently used by leisure cyclists.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:
• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is brownfield land in the urban areas which could be regenerated, without the need to encroach on protected Green Belt land. **We have seen no plans for the use of brownfield sites.**

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than **double the figure used in previous plans.**

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• **I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there.** The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• **I object to the detrimental impact on transport, local roads and road safety. I specifically object to:**
  1. The assertion that the development will result in a meaningful shift to cycling and walking. **The development is too isolated, the roads are narrow and unsuitable for walking and cycling and the development itself is too spread out, the demographic constitution of proposed homeowners is likely to contain disabled, young children and older residents – all of whom will need private cars and therefore it is impossible to anticipate a reduced reliance on private cars**
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I also wish to object to the continued inclusion of FWA site on this Local Plan....as the plan was unanimously rejected by GBC planning on April 8th 2016, when a broad number of authoritative agencies such as Highways England, Thames Water, the Environment Agency, and NATS all shared the views expressed above. The environmental essentials will be threatened, SPA, SSSI, SNCI, by any further development in this area.

8 I also wish to object to the major new development, as I am concerned about our ability to provide Health Care to any major increase in the population to this area. The local hospitals are working at capacity already, and the A&E departments at over capacity for much of the time to accommodate an ageing population and increased demand. There are no future plans to address a massive expansion in the current numbers of people living in this catchment area, mentioned in the Guildford plan, on our hospitals. I wish these concerns to be represented for the local population.

I trust these objections will be fully considered and that the Former Wisley Airfield, Allocation A35 will be removed permanently from the Local Plan immediately.

I support Wag in all their views to support this vital issue for the future of this area, and for the future quality of Guildford life for the generations to come.

ALLOCATION OF LAND AT FORMER WISLEY AIRFIELD FOR HOUSING-LED DEVELOPMENT

*This proposed development would represent a departure from the National Planning Framework. Para 83 states that Green Belt boundaries should only be altered in "exceptional circumstances". The proposed development cannot be deemed as such.

*The site cannot be deemed as sustainable, with poor access to rail and lengthy bus connections. Potential residents would have to travel great distances to commute to work.

*Additional vehicle movements would further degrade air quality in the area.

*Although the actual figure has not yet been established, the council leader admitted on 13” April that the Objectively Assessed Needs figure was exceeded in this Draft Borough Plan.

Site A35 Former Wisley Airfield:-

The increase to 95.9 hectares represents an inordinate increase in traffic movements (congestion, pollution).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objectives to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I feel strongly, along with my family that this proposal to desecrate our local greenbelt land for a massive development to which there is no proven need is abhorrent to us.

The proposed site falls in the sight line of the Surrey Hill Area of Outstanding Natural Beauty and the rural landscape is probably the main reason that we chose to live in this beautiful hamlet. I really thought when we moved into Ockham nearly thirteen years ago that our concern would be disappointment if local neighbours were given permission to build properties out of line with the area and ruin the landscape for future generations. I never contemplated that we would be contesting a whole additional enormous development close to us on green belt land.

I object primarily that this site should be included in the plan at all, as far I can see, no exceptional circumstances have been established to warrant removing it from the Metropolitan Green Belt. It is only very recently that Guildford Borough Council unanimously refused a planning application for this area.

My understanding of a Local Plan was to enhance the quality of life of our Borough's resident population not to actively encourage urban sprawl. I have to have hope and faith that the many bodies involved in providing the detail behind our concerns will be able to convince that you that the above area of inclusion is impracticable but totally unjustified.
I look forward with great interest to hopefully learn soon that this site will remain out of the Plan and in the Green Belt.

I wish to lodge objections relating to the Guildford Borough Council New Local Plan 2016 concerning land at former Wisley Airfield, Ockham in respect of:

- the proposed development represents a fundamental breach of Metropolitan Green Belt rules;
- the site does not meet acceptable levels of sustainability;
- the site will have a severe impact on local traffic and infrastructure;
- there are damaging health and safety implications arising from development of this site;
- the environmental impact on protected wildlife will be substantial; and,
- the proposed development is totally out of keeping with local character, context and distinctiveness.

My rationale for the objections listed above is articulated in the letter sent by East Horsley Parish Council Local Plan submission on Policy A35 dated 4 July 2016 to which I respectfully direct your attention. Their letter contains additional observations that address other particulars contained in the proposed Policy A35 and these, too, I endorse.

I am not a resident of Guildford, but being a Cobham resident, I am more interested on what goes on, on the doorstep, than those Guildford residents living further away.

- I would like to object to the proposal to remove the former Wisley Airfield from the Green Belt. This area provides amenities for local people and prevents the urban sprawl from London. A development would create a corridor stretching from London to Guildford.
- There are no reasonable arguments for removing this site from the Green Belt.
- Guildford has ample brown field sites.
• The surrounding area is composed of very small villages and narrow roads, and the proposed development would change the nature and character of these communities. It would overwhelm them.

• The villages in the area are historic rural settlements, and the proposed draft plan would have an adverse effect on them.

• Ockham is a hamlet of 159 houses. The proposed development would subsume this village, with 2000 houses and other buildings, some being 5 storeys high. This would provide a density greater than some London Boroughs.

• Hatchford would be greatly affected by this development.

• The impact on the local area, where the roads are already congested, would be unbearable, and I would like to object to projected number of cars i.e. 4000 plus extra traffic servicing the area. The roads are little more than farm tracks and will not cope.

• The increased traffic would be dangerous on the narrow local roads. Cobham is the nearest the nearest shopping centre, and parking and traffic are already problematic.

• As there are no cycle paths or footpath, the roads are totally unsuitable for walking and cycling.

• There would be an increased congestion, on the already congested A3 and M25, especially at the junctions. The proposed secondary school and the proposed application currently submitted by Wisley RHS would significantly increase traffic numbers, adding to an already congested area.

• There is inadequate public transport and the local railway stations would not cope with additional cars needing to be parked and the trains are already used to capacity at rush hours.

• Air pollution is already in the area already exceeds EU permitted limits, due to the major roads in the area, and I would like to object to any increase in the level of pollution, caused by increased traffic numbers.

• I would also like to object to the fact that there has been insufficient consideration given to the damage that such a development would cause to the ecological and environmental aspects of this special site, (Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNI))

• The area is a haven for wildlife, some of which is already endangered. The introduction to this number of residents, along with there pets would have a devastating effect on the wildlife. Protected species on and near the site and wildlife corridors would be destroyed. I would particularly like to object to this issue.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2119  Respondent: 8879841 / Jonathan and Theresa Hulford-Funnel  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The changes in the Guildford Local Plan 2017 are minimal, four of the original housing sites remain, plus sheltered/care homes, employment/retail space and two schools on the former Wisley Airfield.

1. The developments will put further pressure on the already overburdened infrastructure of both East and West Horsley.

2. The road through East Horsley (Ockham Road North & South) is inadequate and there is no scope for expansion. Normal cars have to slow down just to pass each other in certain parts, and climb onto the pavement when a truck passes through.

The development plans for 2,000+ new dwellings plus considerable related infrastructure on the Wisley Airfield, is only two miles from East Horsley, and will add considerable traffic to the area.

1. We do not have sufficient facilities, schools, surgeries and other services to cope with the increased population. Gas, electricity and telephone services in the area are already operating at full capacity on very old
pipes, wires and exchanges. Local roads are too narrow and winding to take the existing traffic, and there is insufficient parking anywhere, even in front of most homes. The local roads were built in the 1930s or before, and are mostly no more than narrow lanes where cars have to slow down to pass each other. The access roads to East Horsley are narrow and winding and are not sufficient to handle even today’s traffic.

2. The scale of the proposed Wisley Airfield development is way out of proportion and way out of character to the existing infrastructure and the space available in this small, picturesque old village. The new town will completely destroy the special character of our historic village.

3. The Green Belt is a policy for controlling urban growth. The idea was developed so as to have a ring of countryside where urbanisation would be resisted, maintaining an area where agriculture, forestry and outdoor leisure could be expected to prevail. The fundamental aim of a Green Belt policy is to prevent urban sprawl by keeping land permanently open, and consequently the most important attribute of Green Belts is their openness.

The 2012 National Planning Policy Framework (NPPF) issued by the Government clearly sets out the following purposes (amongst others) for including land with the Green Belt:

- To check the unrestricted sprawl of large built-up areas
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns

How do you reconcile the Wisley Airfield proposal, and the removal of the Horsleys from the Green Belt, with the NPPF’s guidelines above?

I do hope that this time, GBC will listen to the very strong objections to the local community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
streetlights, very few pavements and many listed houses to be overwhelmed by a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the hugely detrimental impact this development would have on local roads and road safety through the massive increase in the volume of road traffic it would create. Walking or cycling safely on local lanes is difficult already and local public transport is inadequate even for the needs of the present population.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of acid deposits on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I hope that these objections will be fully considered

I am writing to object to the inclusion of the policy A35 in the Draft Local Plan on two grounds, the physical constraints of the site and the fact that it is the least sustainable site.

It is not near any railway line, is close to the heavily congested site J 10 of the M25, adjacent to the polluted and already, at times gridlocked A3.

The narrow surrounding lanes are unsuitable for an increase in the flow of traffic and the proximity to cyclists.

It is near Wisley RHS where there are increasing visitor numbers, events and consequently increased traffic.

There is no local employment thereby increasing the need to commute.

I object to the increase in site boundaries, not on the original plan (AppendixH p16) which will now have an adverse impact on the Listed Upton Farm.

Ockham DVOR/DME is not due for removal for approximately 5 years and building restrictions in the vicinity are in force.

I object to the visual impact that this applications will have on the protected landscape of the AONB.

I object to the unjustifiable removal of the Green Belt status and the impact on the archeology of the site.

I object to the fact that the Borough Council has not used any constraints such as the Green Belt, air quality, infrastructure and AONB considerations.

The Council has submitted inaccurate housing numbers.

For these reasons, I consider that this Plan is neither sound nor fit for purpose.

I require confirmation that this and all of my other comments are passed to the Inspector. I also reserve my right to attend any planning hearing meetings.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Comment ID:** PSLPS16/6860  **Respondent:** 8880865 / Jane Paton  **Agent:**
5. Policy A35 - land at the former Wisley airfield

This site cannot sustain a new town. Building a new town is contrary to the stipulations in the NPPF that Heritage and Environment must be protected and enhanced. Building a SANG immediately beside a Special Protection Area is guaranteed to attract more visitors to the SPA - the very opposite of the purpose of a SANG. Building a new town in the heart of the parish of Ockham will destroy its heritage. The promotion of this site has involved serious misrepresentations of the facts. For example it is stated that the site is brownfield- when at most less than 25% of the site could be considered previously developed and of that area 60% is already allocated for a waste disposal site. The garden hedge of Yarne is not a defensible permanent Green Belt boundary

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. This land is not brownfield. As I understand it the last time it was used as an airfield was over 50 years ago and the arrangement was that it would revert to agricultural use thereafter. The landing strip remains but there has been no commercial activity on the land at any time other than the emergency use as an air strip during WW2.

3. The site is very poorly served with transport. There are no reasonable means of access to any stations within the vicinity and certainly practically every journey to and from this proposed development would have to be by car. I thought the planning departments and central government were looking for sustainable development solutions? This site is served by narrow country lanes none of which even has a pavement, with the exception of the A3 which pedestrians should not use.

4. All the local South West Trains stations in the area, although not nearby, are operating at pretty much capacity in terms of car parking at present.

5. The land is of importance as an agricultural/wildlife site. There must be numerous better located sites on which to develop housing – ideally within reach of transport networks and places to shop and work. This is an isolated spot surely not suitable for the huge number of homes and with them people anticipated.

Whilst I understand that pressure has been put on Guildford planners to find room for additional homes, surely any additional housing developments of any significant size need to sited closer to public transport and at least with access to pavements and lit roads.

For these reasons I object to the proposals and I hope my views will be taken into account when the matter is considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to **object** to the revised new local plan for Wisley Airfield.

I live in Horsley, and you already can't get into the local school, park at the station, get an appointment at the doctors, or park near the shops.

Even the local Football club is full!

The new development at Wisley would be an absolute disaster for the village and the surrounding villages in the area.

I absolutely **object** to the plan for this development.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the draft Local Plan for the following reasons:

FWA/TWM latest planning application has only recently been *unanimously* rejected by Guildford Borough Council but it still remains in this plan as a significant strategic site. How can this be?

I am writing again as a homeowner in Ockham who bought our property here because of a desire to be in the heart of the countryside in a quiet hamlet I cannot believe that there has suddenly become a need for over 2,000 houses which need to be built here. Apart from a lack of evidence that all the brownfield site have been fully explored and all regeneration options fully considered, there is just not the place for such a vast scale development. It is Green Belt land and 70% of new housing is proposed to be built on it! I still have yet to see the exceptional circumstances which warrant it this area being removed from the Metropolitan Green Belt.

Above objections aside, apart from the FWA with other very large sites under consideration there is potential for us and the Horsley’s to be battling the narrow roads with potentially thousands and thousands more cars. Even if adjustments can be made to the A3/M25 the inevitable local traffic chaos here would be intolerable.

Our historic village of not many more than 150 households to be made to be swallowed up into a 2,000+ dwelling development is completely abhorrent on every level.

The frustrations that we have an already existing Flood Plain issue, the fact that are railway stations are already at full capacity and that most of our local roads are by nature single lane or very narrow makes this proposal seem ludicrous.

We can but hope that we as residents have been consulted because our views matter but if not, please do heed the serious concerns raised by the Highways England, Thames Water etc.

I obviously await reassurance that this area will be removed from the plan.
Furthermore, there is the option of using the Ockham Airfield as a last resort for some limited development should the brownfield sites aforementioned not be sufficient for the number of properties finally agreed. It should also be added that any such development that is finally agreed and located on such brownfield sites, should reflect a good percentage of affordable housing, enabling first time buyers to remain in their locality.

Much of Surrey and Guildford in particular is now far too expensive for first time buyers, and a distortion in a true demographic mix of the population is becoming more evident. This must be taken into consideration with any such development in the brownfield opportunities our local area can offer.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I note that the possibility of a new town on the Wisley site is still mooted. After the annihilation of the last application by the Guildford Council surely the arguments used against the proposal are still valid. One would have thought this ruled out any consideration of development on this site. Illogical in the extreme.

6. The development of the former Wisley Airfield.

The inordinate number of houses planned for this area would have a massive negative and unsustainable impact on the Horsley villages. The nature of the mix of houses, retail, commercial, traveller and schools development just under 2 miles away could not fail to have many problematic consequences for the Horsleys. The extensive developments at Burnt Common and Gosden Hill Farm, Burpham are also problematic.

Building 533 homes in East and West Horsley and 2000 on Wisley Airfield amounts to 2533 new homes. This is a huge increase for the area. How can people who have chosen to live in a semi-rural location be forced to have the area changed so fundamentally? Building a town that includes 2000 houses on Wisley Airfield would certainly not be a development on a scale that is compatible with its setting. Surely this is valuable agricultural land and should be used as such. All this land was meant to be returned to agriculture after the 2nd World War, but somehow that never happened. The roads in this area were not designed to take the large amounts of traffic they already have to cope with. Traffic on Surrey’s roads is already much higher than the national average.

I live where Old Lane joins Forest Road. We already struggle with the large amount of traffic that races down Old Lane to reach the A3 and M25. Many cars are now parked on this end of Old Lane (because not enough parking was allocated to the homes built on the site of the Lord Howard public house). They block my view when I am trying to pull out of my drive and, given the speed and volume of the traffic, there is an accident waiting to happen. If 2000 houses are built on Wisley Airfield the traffic will be overwhelming. People who live in the new town will use Old Lane to reach Cobham and the surrounding area. The roads are already full to capacity with traffic. For example trying to join the A3 by Wisley Airfield in the morning rush hour, to then join the M25 at Junction 10. This section of the M25 already crawls along. A new town will make this impossible. Local services such as doctors’ surgeries, local shops and parking already seem unable to cope with the number of people living in the area. If these plans go ahead it would be a very short-sighted tragedy, not just for this area, but for the whole South East of England.

I have written before to object to the inclusion of Three Farms Meadows in the local Plan and I object to the issue being included in the new plan after it was turned down previously by all councillors.

The local roads are not suitable for more traffic and are not suitable for pedestrians or cyclists travelling to stations.

Local station car parks are already at full capacity.

Wisley gardens have increased their visitor numbers hugely and they are planning a further increase. During their special events the A3 is already blocked at peak times and will inhibit traffic flow in both directions.

Part of the site is in Green belt and there is no case for building to take place here. The proposed buildings will impact on the local villages and areas designated AONB.

Changes to the original plan do not make sufficient change for there to be a new submission. It is a waste of our council tax to pursue a new enquiry.

Wisley

Whilst I recognise that Wisley airfield is redundant land, the area is prone to flooding, as anyone who has lived here long enough knows. The access to the A3/Wisley roundabout tends to flood during serious rainfall, and the road has been impassable several times during the last sixteen years we have lived here. You cannot responsibly build 2000 plus houses and not provide a school, medical centre, some local shops, post office, community centre and recreational space. This should be a new community where people have their own facilities and not have to travel along narrow lanes to source them. These facilities should be put in place at the same time as the houses are built. I have seen no confirmation anywhere that GBC plan to provide these facilities. On average, each house could be expected to own two cars. At present the station car park in East Horsley is full each day. Where are these people going to park if travelling into London. Similarly, it is often difficult to get an appointment at the Doctors surgery, so they wouldn’t be able to cope with so many extra patients. I understand that commuters are now using the Village Hall car park and therefore when the Medical Centre car park is full, we are also unable to park in the Village Hall car park, and this is before just one extra home is built in the Horsleys.

I wish to object most strongly to the re-consideration of the above proposed development.

I object to this site **being on Green Belt land.**

I object to the **huge scale of this settlement of over 2000 houses as well as retail, commerce, traveller and school developments.** This is less than two miles from the rural villages of Ripley and the Horsleys and will have an enormous negative impact on their infrastructure.

I object because:

- **ROADS** are narrow, already congested with cars and heavy vehicles (the railway bridge has already been damaged by a large lorry)
- **ROADS** have no space for cycle lanes for the VERY many cyclists who use our villages regularly. This is a dangerous situation
- **PARKING** at Horsley is at a premium and both Horsley and Effingham Stations are at full capacity
- **SCHOOLS** are over subscribed
- **MEDICAL SERVICES** are stretched

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Finally how does the draft plan “know” that a school can be built on the Wisley site when the Borough planning committee turned the plan down and the appeal is not until September 2017?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The proposed village at Wisley will have an incredibly detrimental effect on East and West Horsley. With all the roads connecting to the A3 near to, and south of, the M25 junction shut off bar the one at Ripley that comes through East Horsley, much of the traffic for Dorking, Leatherhead and Guildford will be directed through our village. This is already a narrow and dangerous road that cannot cope with the traffic using it, including many large lorries. The junction with the A246 will come to a halt, not helped by the the traffic from the proposed 48 new houses at Thatchers and the 22 proposed for the BT site. The residents of the new Wisley village will be encouraged to travel to work by rail, using Horsley station, already under pressure, with no capacity for increased parking. This is a proposal to build a small town, unattractively close to the M25, in an area that harbours wildlife, some of which is increasingly rare, and trees and vegetation that balance the emissions produced by the 24/7 traffic of the M25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/1728  Respondent: 8891809 / Sarah O'Neilly  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to object to the proposed plans to build 2000 houses, plus sheltered/care homes, Gypsy/traveller pitches, employment/retail space and two schools on the Former Wisley Airfield and fields.

As I have previously stated, there is insufficient infrastructure in the surrounding villages to support this notion, and furthermore the traffic congestion, which is already heavy during rush hour times, with the introduction of in excess of 5000 cars in the locality will become completely ludicrous. This will have a knock on effect on the M25 orbital, the A3 and of course Guildford. And how will the local train station at Horsley cope with the introduction of more commuters joining trains, not to mention the already over spilling station car park?

I also do not consider that our local police force will be able to cope with the input of so many people, and we will see crime rates rise as a consequence. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

Will any consideration actually be given to the emergency services, which are already stretched in the area? I do not see mention of a doctors practice or hospital being included on the airfield development. Where will people be expected to go to visit their GP’s? The current practice at East Horsley is already too busy, and it takes long enough now to get a routine appointment.

Where will all the extra rubbish and recycling go from this site? Will we see our council taxes rise further to fund both refuse collection for all and of course extra schools, doctors and policing in the area?

I strongly suspect that those individuals putting forward these crazy notions, do not actually themselves reside in the villages surrounding Guildford, or they possibly wouldn’t have dreamt up such a selfish and non sustainable whim.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1517  Respondent: 8892353 / Elizabeth Russell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
I **OBJECT** to both the inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham) and the proposal to build 2000 new homes on it. The impact on the nearby villages of West & East Horsley (less than 2 miles distant) and of course Ripley of an additional 5,000 cars (plus associated additional traffic such as couriers, supermarket deliveries, buses etc) would be catastrophic. There is no room to park NOW in either of the Horsley villages or at the local stations in Horsley and Effingham and so a development of this magnitude would be calamitous.

Furthermore, the impact of an additional 5000 cars, all using the Ripley Roundabout for egress and access (not to mention an additional 5000 from the site proposed at Gosden Hill Farm (Policy A25), would simply magnify exponentially the major traffic flow problems that exist NOW. The nearest railway stations to this proposed site are those of Horsley and Effingham Junction; both of which are full to overflowing NOW and have no space available for enlargement. As is already evident NOW, anybody who attempts to drive towards the A3 / M25 from West / East Horsley, Send or Ripley during the rush hour faces a daunting proposition because not only is the A3 slip road (going northwards) at a virtual standstill but so is the A3 to the extent that the A3 traffic coming from the Guildford direction will be backed-up for several miles. Equally, the local village shops of Ripley and East Horsley have major parking problems NOW and would not be able to cope with the additional cars associated with this proposed development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
development” but a predetermined bias in favour of specific applicants, who have already been given many additional months to refine their application prior to its rejection. It is therefore my opinion that this development should be removed from the new Draft Local Plan for all the same reasons that it was rejected by GBC’s Planning Committee on 6th April 2016. These include:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. Development on the site will create an urban corridor stretching from London to Guildford.

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site.

I object to the detrimental impact on transport, local roads and road safety.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3296  Respondent: 8892449 / Marco Attard  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object strong once again to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan.

I highlight below some of the objections as to why I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan:

Grade 2 listed building within 100 metres of your proposed site. I strongly object to the increased area of the site is located 100 metres from Upton Farm which is a Grade 2 listed building, one of the heritage sites in Ockham, and would have a huge impact on our outlook and views all around. Not to mention the noise pollution, environmental impact, and loss to our quality of life. We have spent years adhering to the stringent Heritage Rules to make sure this house is in keeping with its period and history.

I strongly object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

Local roads are at full capacity and often grid-locked in the rush hours, particularly when the weather is bad, when going to work

It is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10)

The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”!
I object to para 21 which “limits” development in flood zone 2 and 3. Development should be EXCLUDED in flood zone 2 and 3.

I strongly object to the fact that the council has failed to remove this site from the local plan, despite receiving 1000’s of objections from local residents and statutory consultants.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLP16/7657  **Respondent:** 8893057 / Dianne Garnett  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1.1 **We object to** Policy A35 Wisley

1.2 **We object** to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

1.3 There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.4 This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

1.5 Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”. 2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.

3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

4. Proximity to A3/M25 bottleneck and Ripley village and roundabouts. 5. Absence of adequate traffic data.

6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.

7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.
8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
4. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Wisley Airfield Site

I strongly object to this proposal remaining in the new Local Plan. Ockham has been designated with "limited infilling" so I fail to understand how the Wisley plan can possibly remain in the Plan, especially as it was rejected by the Planners just a few months ago. This cannot and must not happen. The area is an important site for wildlife and much needed green space and acts as a buffer for Ockham Village from the pollution and noise from the A3 and M25. In addition the local roads simply cannot cope now with the volume of traffic and adding to it by such a huge number of vehicles every day would be disastrous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

SITE A35 FORMER WISLEY AIRFIELD

The increase in size to 95.9 hectares. The volume of traffic whilst building and once families move in will cause additional congestion and pollution to our already overcrowded local roads. May I remind you that already levels of nitrous oxide are above safe amounts.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
With regard to the proposed development of the former Wisley Airfield as I have stated before this appears to be being treated by Guildford Borough Council as though it was the development of a brownfield site. It is not. The clue is in the name, Airfield. It is or at least should be a field in the Green Belt if the agreement with the original owners to remove the runway when it closed had been enforced as it properly should have been. This is therefore just a proposal to build on a large area of the Green Belt with no exceptional circumstances involved and should be rejected on that basis. Notwithstanding that it is a completely inappropriate development of the land concerned both as to scale and nature and would put completely unacceptable pressure on local facilities e.g. roads, sewage, water etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
and will thus irrevocably change its whole character. It computes to some 25 homes per acre when deductions for roads/paths and amenity areas are made. This used to be called “ghetto” density.

- be limited in size by the availability of all necessary local facilities, infrastructure and transport. The Draft Plan contains insufficient and inadequate proposals to increase the schooling, roads and transport, medical facilities, parking, drainage, mains utilities or any other infrastructure required to avoid serious over-use and overcrowding which will be caused by the increase in dwellings and residents near Ripley, Effingham, Ockham, the Clandons and the Horsleys. It will completely change the character of the villages, and attract yet more traffic, already increasing by “rat-running” avoiding the M25 between Wisley & Leatherhead. Parking spaces at existing local shops, the medical centres, Village Halls and particularly railway stations are already at a premium with no room for expansion. The numbers of houses proposed would require the construction of multi-storey car parks at the two local railway stations, more parking at the local shops (how?), and a completely new road layout at various local road junctions, particularly at the A3 (two) and at B2039/A246 junction in East Horsley, which already suffers serious delays in the rush hours. It would also be necessary to widen the roads, in particular A3, M25, and Ockham Road North and South where blockages occur already. The junction designed for the composting facility is totally inadequate for such a housing conurbation. Has this planning (opposed by GBC) not fallen out of time? To suggest that cycling will in any way reduce this impact is nonsense. People will not cycle back from the medical centre with a temperature of 105, nor with four shopping bags, and the vast majority will not cycle 4 miles every morning and evening to and from the station.

- provide primarily, sufficient housing for the needs of the local community e.g. for some children of existing residents who need to purchase locally, or existing elderly residents wishing to downsize, thus providing larger properties for other incoming families. The Draft Plan makes dubious and unsupportable assumptions about housing need in this particular area, and in particular for affordable housing in this location far from existing jobs. The numbers proposed are much too high, and include double accounting. The EU Referendum result will also reduce numbers. “Sustainable development” means that the country needs to spread the burden, and the benefits, of increasing population across a much wider area of the country, instead of attracting yet higher density into the south-east and London. Businesses will, through market forces, move towards available labour, and government should recognise this by providing the necessary infrastructure to other areas anxious to attract better living standards.

- avoid development over our precious greenbelt and spoiling the landscape we desperately need close to major conurbations including London.

- recognise that if any expansion into the Green Belt is proved absolutely necessary, by simple geometry, it would have less impact the farther away it is from the circumference of London which is already under severe threat.

- whilst the Plan suggests that development of housing on Wisley airfield is a low flood risk, this only refers to the new housing itself, being on a slight mound. What it fails to show is the devastating impact this new catchment will have on existing critical local ditches, lakes and drains.

All the run-off from local villages to the south travels northwards, and is already placing a huge strain on the flood plain around the A3 junction/Ripley/Pyrford/Wisley triangle. This area suffers serious flooding already. Any such development would need to provide very substantial pumping all the way to the river and beyond, and/ or water treatment and storage facilities, to avoid impacting local roads, landscapes and amenities.

To summarise, I say NO to:

- Any proposals to remove Surrey villages close to London from the safeguards of green belt status apart from under exceptional circumstances – the Plan does NOT demonstrate this.

- Any development which seriously enlarges existing villages, let alone a new one, except by the careful addition of a few acres, perhaps by very limited “smoothing” of the existing settlement boundaries, so that local people still need walk only a few yards to enjoy the countryside. Such isolated acres do exist for small developments.

- Any overdevelopment which has a density above the level already existing within the local community – Wisley would be 3 to 4 times that.

- Any large new development over green belt land near the borders of greater London, such as proposed here in Horsley (A36-41) and at Wisley (A35), whether some new infrastructure is provided or not, and which will still have a devastating impact on the way of life in existing neighbourhoods.
• Any development which strains the existing fragile infrastructure of local and much-prized villages and communities
• Any impingement of the Green Belt which will open the door to greater and greater development between Surbiton and Guildford, just as has happened between Hounslow/ Staines and Woking, where very little Green belt remains.

I suggest the Borough reduces their estimates for sustainable development, identifies more sensible and sustainable sites for limited expansion, and drops all proposals for any dense or significant developments over, or transfer out of, existing valued green belt land close to London.

If they do not, existing elected representatives who support this Plan, in central government, the county, the borough or the parish will not receive my vote in the future.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Objection to Guildford Borough Council Proposed Submission Local Plan

I OBJECT to the Proposed Submission Local Plan for many reasons, particularly the following:

1. I object to the proposal to allocate so much new housing to the Green Belt; it should be put on the brownfield land in the urban areas of the Borough. That would reflect election promises to preserve the Green Belt.
2. I object to the housing number of 693 houses per year; this number appears to me to be far too high, particularly in the context of Brexit.
3. I object to the proposal to remove the Former Wisley Airfield from the Green Belt. There are no exceptional circumstances to warrant removing the land from the Green Belt. This area clearly fulfils an important objective of separating Ripley, Cobham, Woking and Horsley.
4. I object that this urban 2,000 house development would be totally out of place in the rural village of 159 homes in Ockham.
5. I object to the danger from its effects on transport, local roads and road traffic. The proposed development would result in around 4,000 additional cars on the roads. This will increase the danger from traffic to horse riders on the narrow local roads in Ockham and the surrounding area and increase the already severe congestion on the A3 and M25. Cycling would be dangerous.
6. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area, and the Sites of Special Scientific Interest and Special Nature Conservation. Endangered ground nesting birds such as the Skylark and the Nightjar will be threatened by the development.
7. I object to the threatened loss of high quality farmland where crops have been grown for decades and probably for centuries.
8. I object to the continued inclusion of this site where a recent planning application has already been unanimously rejected by the Planning Committee.

I request that the Former Wisley Airfield, site A35, is removed from the Submission Local Plan.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4108  Respondent: 8898017 / Jane Lethbridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I require confirmation that all of these comments together with all my previous comments are passed to the Inspector.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. I object to the disregard for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.
2. I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.
3. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
4. The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.
5. I object to the fact that the council has failed to remove this site from the local plan despite receiving over 50,000 objections from local residents and statutory consultees.
6. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
7. I object to the removal of additional 3.1 ha to be removed from the green belt without any justification.
8. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will increase the negative impact of the views from the AONB.
9. Opportunity (3) should be common to all sites and is not unique to this site.
10. It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
12. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
13. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
14. It is further from railway stations than any other identified strategic site.
15. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.
16. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
17. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
18. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.
19. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

20. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design.”

21. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.

22. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

23. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

24. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

25. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

26. I object to the Council wasting taxpayers and residents’ time and money not following due process and indeed ignoring previous representations.

27. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

28. I object to the Housing number which is unsound and open to legal challenge.

29. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” Yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3773  Respondent: 8898081 / Sarah Bowe  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
A few months ago I took the trouble to watch the whole of the podcast of the Wisley Airfield/Three Farms Meadows planning meeting and I wish to object in the strongest possible terms to the waste of public money and time in raising the whole matter of this totally impracticable proposal again.

The objections raised at that meeting by those who had clearly 'done their homework' were precise, detailed and in my opinion, utterly devastating. They made their mark every time and left the other side without a leg to stand on. I could hardly believe it when I heard that the proposal was to be raised again in a revised plan. The developers are persistent, which is hardly surprising, but the fact that Guildford Borough Council should be entertaining the thought of revisiting any revision of such a preposterous proposal raises in my mind a matter of professional competence.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

2) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. Recent data confirms that ONS growth figures should have been used and these have been ignored.

3) I object to the disproportionate allocation of housing in the north of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

4) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 164 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

5) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

6) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

7) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

8) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

9) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Limited’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I also hope that the borough’s housing needs are considered in relation to the effect the Brexit vote will have on population growth ie the consensus is that immigration rates will decrease and therefore the demand for housing will also decrease.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In relation to the specific allocation of site A35, I have a number of objections as outlined below:

1. I object to the inclusion of site A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of infrastructure and in particularly the sewerage constraint due to lack of any spare capacity at Ripley sewerage works.

2. I object to the fact that the Council appear to have directed that the transport assessment for site A35 uses prescribed vehicle movements from site with no justification. I believe this makes the transport evidence subject to challenge due to bias on behalf of the Council.

3. I object to the inclusion of site A35 as it is the least sustainable site identified in both this version and previous versions of the plan because of the constraints of the site and the physical location which is adjacent to the TBHSPA.

4. I object to this site due to the fact that it is further from the railway stations than any other strategic site and that the nearest stations have unsolvable capacity and parking issues.

5. I object to the inclusion of site A35 in spite of unanimous rejection of planning application 15/P/00012 on 14 grounds.

6. I object to the inclusion of site due to the fact that it is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10). The SRN in this location is currently operating significantly over-capacity and the proposed improvements both uncertain in design and timescale. Even with Highways improvements proposed without the impact of this development it is accepted that the A3 is at full capacity and so cannot take the additional traffic from this proposed development.

7. I object to the inclusion of site A35 due to the fact that the local road network is also at capacity and is severely adversely affected when the SRN is not free-flowing at times of accidents, diversion, roadworks etc.

8. I object to the allegation that public transport provision will be able to mitigate the impact of this allocation especially as bus routes to/from Guildford will have to utilise the over-crowded SRN in one/both directions and therefore will be unreliable and subject to frequent delays.

9. I object to the inclusion of site A35 due to the fact that any public transport (bus services) provision to Horsley and/or Effingham junction will impact the safety of the local road network as the lanes are not legally wide enough to accommodate PSVs, particularly when sustainable methods of travel such as cycling and walking are being promoted on the same lanes at the same time. This is not only unrealistic but it is also unsafe.

10. I object to the allocation of site A35 due to the fact that the mitigation to address the impact of increased traffic will not address the commuters travelling to Woking station.

11. I object that due to the fact that site A35 is adjacent to the most popular tourist attraction in the south-east, the RHS at Wisley where the visitor numbers are due to increase by 500,000 visitors per annum and that the associated traffic increase has not been properly modelled or taken into account; and

12. I object to the fact that nor has any account been taken of the traffic resulting from the regular events at the RHS which attract 1000’s more visitors several times a year in the consideration of the allocation of site A35.

13. I object to the fact that the inclusion of site A35 has not properly taken into account the impact of the changed boundaries of the allocation on the adjoining heritage assets and in general and in particular the impact on the setting of Bridge End House (Grade II) and Upton Farm (Grade II) in addition to the known impact on Yarne.

14. I object to the dismissal of the substantial or less than substantial negative impact on the setting of the Grade 2 listed property Yarne. The requirement is to go through a process supported by statute and is to be given a ‘heavy weighting’ when considering the balance of harm versus benefits of development. As this is enshrined in statute law it is not legal to ignore these effects on Yarne and surrounding historic sites.

15. I object to the fact that the increased allocation at site A35, being on the south of the site facing the Surrey Hill AONB will further negatively impact the views to and from the AONB.

16. I object to the removal of an additional 3.1ha of land from the green belt without any justification.

17. Furthermore, I object to change of the site boundaries of allocation A35 as these are not identified clearly or correctly on the plan (Appendix H p16)

18. I object to the unjustified change in the green belt boundary at the eastern end of the site especially as this now encloses an area of high archaeological interest which will prove difficult to develop in the light of the archaeological finds in the surrounding area.

19. I object to the fact that the impact of the OCK/DVOR has not been properly taken into account in the allocation of site A35. It remains unclear when/if this will be decommissioned as the timetable has already slipped. The constraints on the site due to the DVOR are significant and if it is not decommissioned will severely limit the availability of the site to deliver enough land to make the allocation viable.
20. I object to the fact that insufficient weight has been given to the sustainability of allocation A35 due to the lack of employment available onsite meaning that almost all residents will have to travel to work. As already identified above it is unrealistic and unsafe to assume people will walk/cycle to work on narrow unlit local roads on anything more than a very occasional basis.

21. I note that the changes in the opportunities listed in site allocation A35 reinforce why this site is totally inappropriate, talking of “good urban design” – just what is needed in a rural area.

22. I object because of the impact on the TBH SPA of A35 to the mitigation strategy proposed concerning use and calculation of the SANG and considering the appointment of a warden to solve the issue of inhabitants and cats being drawn down the rights of way and into the sensitive TBH SPA. The mitigation strategy proposed is inadequate.

23. I object to the undercalculation of SANGS and the failure to recognise the flooding of the southern area designated as SANGS thereby meaning there is inadequate SANGS to protect the TBHSPA

24. I object on the same grounds as RSPB to the negative and inadequately mitigated impact on the SSSI,SNCI and TBHSPA

25. I object to the fact that site A35 will not meet any of the 5 year housing requirement and is subject to so many exigencies and infrastructure costs it cannot be an exceptional circumstance to include it in the Plan which thereby removes the site from greenbelt.

For all the reasons I have already identified in previous submissions, together with the reasons listed above it is quite clear that site allocation A35 is unsustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the impact of Guildford Borough Council Draft Local Plan on Heritage sites and Conservation Areas in Ockham

Despite its relatively close proximity to London and nearby towns Ockham has escaped suburbanisation. It has retained its distinct rural heritage and has not been subsumed within much larger conurbations. It remains a rural parish and retains its identity as an evolution of a collection of medieval hamlets where small houses nestle together in settlements with their own distinct character. The foundation of the local economy remains agricultural based around arable and livestock farming, equine recreation and game bird rearing.

The special character of the built environment in Ockham is acknowledged by the fact that 29 buildings have been listed by English Heritage. Many of the listed buildings are farm houses by origin. Their setting was and remains rural and agricultural. Upton Farm and Yarne are both 15th century farmhouses immediately adjacent to Three Farms Meadow and have views over it. Appstree and Bridge End have land adjoin Three Farms Meadow. The development of high density housing at Three Farms Meadow will cause irreparable damage to the setting of the listed buildings in Ockham and to the Ockham Conservation Area. The development, because of its location on the highest point of the hill and down the south side of the proposed site will overlook the Conservation Area and impact the setting of those precious and ancient buildings in the Ockham Conservation area causing substantial impact. The effect on the distinctive local Lovelace style would be wholly inappropriate.

The particular significance of the Three Farms Meadows is that it creates a meaningful green gap which enriches and strengthens the separate identities of the different settlements of Ockham. Consequently the separation provided by the
The green gap is a significant asset to both conservation areas and contributes to their character as distinctly separate settlements.

The most significant harm caused by the development proposals is that the scale of development overwhelms the historic settlements of Ockham which are quintessentially small in scale and historic in nature. Unlike many ‘commuter belt’ villages these settlements have escaped extensive redeveloped or extensive post-war expansion. Consequently they retain their evolved medieval form as well as most of their rural separation and setting. These are the characteristics which make them special and gave rise to the designations of Bridge End, Church End and Ockham Mill as a conservation areas.

The disproportionate scale of development in the appeal proposals is contrary to the natural evolution and growth which gave rise to the character of Ockham over the last 500 years. The result will be a revolutionary change in the shape and morphology of the Parish settlements which cannot fail to harm their distinct character.

The historic parish currently consists of 163 dwellings. The addition of another 2,100 dwellings a greater than tenfold increase, will irreversibly change the way in which the historic settlements of Ockham areas perceived. Perception will no longer be of an evolved medieval parish in rural surroundings but of a much larger modern suburb with an historic periphery.

Development on this scale has never occurred within the Parish of Ockham or in Lovelace Ward and, even if well designed, cannot assimilate well into the fine grain and historic parameters of the parish settlements. The development fails to respond to the significance of Ockham’s listed buildings, its conservation area or wider setting in any positive way.

NPPF paragraph 137 states that ‘Local planning authorities should look for opportunities for new development within Conservation Areas and World Heritage Sites and within the setting of heritage assets to enhance or better reveal their significance.’

Sections 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires special regard to be given to preserving listed buildings or their settings and section 72 requires special attention to be paid to preserving or enhancing the character or appearance of conservation areas.

Justice Linblom stated that ‘...a finding of harm to the setting of a listed building or to a conservation area gives rise to a strong presumption against planning permission being granted. The presumption is a statutory one.’ As such heritage conservation is to be given considerable weight and importance in the planning balance.

The proposal for the building of in excess of 2000 houses on the former Wisley airfield no way accords with any planning framework. More importantly it fails to meet statutory requirements and the substantial damage to historic heritage properties and the Ockham Conservation Area cannot be adequately mitigated. As such I strongly object to the inclusion in the Draft Local Plan of this site A35 (FWA) and it should be entirely removed from the GBC Draft Local Plan.

I object to the impact of Guildford Borough Council Draft Local Plan on Heritage sites and Conservation Areas in Ockham

Despite its relatively close proximity to London and nearby towns Ockham has escaped suburbanisation. It has retained its distinct rural heritage and has not been subsumed within much larger conurbations. It remains a rural parish and retains its identity as an evolution of a collection of medieval hamlets where small houses nestle together in settlements with their own distinct character. The foundation of the local economy remains agricultural based around arable and livestock farming, equine recreation and game bird rearing.

The special character of the built environment in Ockham is acknowledged by the fact that 29 buildings have been listed by English Heritage. Many of the listed buildings are farm houses by origin. Their setting was and remains rural and agricultural. Upton Farm and Yarne are both 15th century farmhouses immediately adjacent to Three Farms Meadow and have views over it. Appstree and Bridge End have land adjoining Three Farms Meadow. The development of high density housing at Three Farms Meadow will cause irreparable damage to the setting of the listed buildings in Ockham and to the Ockham Conservation Area. The development, because of its location on the highest point of the hill and down the south side of the proposed site will overlook the Conservation Area and impact the setting of those precious and ancient buildings in the Ockham Conservation area causing substantial impact. The effect on the distinctive local Lovelace style would be wholly inappropriate.

The particular significance of the Three Farms Meadows is that it creates a meaningful green gap which enriches and strengthens the separate identities of the different settlements of Ockham. Consequently the separation provided by the green gap is a significant asset to both conservation areas and contributes to their character as distinctly separate settlements.

The most significant harm caused by the development proposals is that the scale of development overwhelms the historic settlements of Ockham which are quintessentially small in scale and historic in nature. Unlike many ‘commuter belt’ villages these settlements have escaped extensive redeveloped or extensive post-war expansion. Consequently they retain their evolved medieval form as well as most of their rural separation and setting. These are the characteristics which make them special and gave rise to the designations of Bridge End, Church End and Ockham Mill as a conservation areas.

The disproportionate scale of development in the appeal proposals is contrary to the natural evolution and growth which gave rise to the character of Ockham over the last 500 years. The result will be a revolutionary change in the shape and morphology of the Parish settlements which cannot fail to harm their distinct character.

The historic parish currently consists of 163 dwellings. The addition of another 2,100 dwellings a greater than tenfold increase, will irreversibly change the way in which the historic settlements of Ockham areas perceived. Perception will no longer be of an evolved medieval parish in rural surroundings but of a much larger modern suburb with an historic periphery.

Development on this scale has never occurred within the Parish of Ockham or in Lovelace Ward and, even if well designed, cannot assimilate well into the fine grain and historic parameters of the parish settlements. The development fails to respond to the significance of Ockham’s listed buildings, its conservation area or wider setting in any positive way.

NPPF paragraph 137 states that ‘Local planning authorities should look for opportunities for new development within Conservation Areas and World Heritage Sites and within the setting of heritage assets to enhance or better reveal their significance.’

Sections 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires special regard to be given to preserving listed buildings or their settings and section 72 requires special attention to be paid to preserving or enhancing the character or appearance of conservation areas.

Justice Lindblom stated that ‘...a finding of harm to the setting of a listed building or to a conservation area gives rise to a strong presumption against planning permission being granted. The presumption is a statutory one.’ As such heritage conservation is to be given considerable weight and importance in the planning balance.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
2. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
3. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
4. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
5. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
6. I object to the extension of the plan period by 1 year as it has not been identified as a major change
7. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
8. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

<tr>
<td>Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings</td>
<td></td>
<td></td>
</tr>
<tr>
<td>I object to the draft Local Plan for the following key reasons:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable publicly The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning.
Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Dear Sirs

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will
exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to object to the proposed development of this site being included in the New Local Plan. This site is part of the metropolitan Green Belt and there are no exceptional circumstances to justify such a development. This was one of the 14 grounds of refusal given by Guildford Borough Council to the previous planning application. It would be a breach of the “Green Belt Rules”.

The location of the site adjacent to the A3 and M25 junction 10 is totally unsuitable for residential development. There would be extremely poor air quality and pollution from traffic including Nitrous Oxide from two major highways already at capacity. In addition the traffic from 4-500 vehicles from the new town would cause considerable more congestion on both the major roads as well as the local country lanes which surround this site.

There is no infrastructure at this site. All new mains services would need to be established as well as a new large scale sewerage plant. There would be considerable difficulties and costs to achieve such facilities. There would be considerable impact and pressure on the existing limited infrastructure and facilities serving the adjacent Horsley and Effingham areas. The massive increase in population would cause severe difficulties to schools, drainage, doctors surgeries, station parking, access to local shops, wildlife, flooding in places and gridlock on some roads.

It would be difficult to provide a sustainable public transport system from this site given the isolated location, surrounded by country lanes and the problems and delays from the A3 and M25. The reliance on cars from the new town would not be sustainable.

There are also no local employment opportunities in this area. There would be serious impact on access to the RHS Wisley Gardens from the increase in traffic compounding existing access issues due to the proximity of the A3 and M25 interchange.

The recent Brexit decision should reduce the number of new houses required whilst Guildford BC housing projections are unnecessarily well above the national average.

This site should therefore be removed from the New Local Plan as the long term damage and effect will destroy the nature and character of this area and the quality of life for the existing residents,

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee. I objected to that planning application for the very same reasons that I am objecting to its inclusion in the local plan.
- After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.
• Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
