Even with the 400m Exclusion Zone in effect, the positioning of such a large site immediately adjacent to such an important protected space will inevitably have a major detrimental impact on the wildlife within it.

Accordingly, I OBJECT to Policy A35 on grounds of its material adverse environmental impact.

The impact of the Exclusion Zone and SANG requirements, together with the need to provide for the existing waste facility, means that the actual area of land available for housing development at this site is estimated to be around 43 hectares.

f) The development is totally out of keeping with local character, context & distinctiveness:

It is a key element of planning policy that new developments should be in keeping with the established pattern of development in the area. In the 2016 Proposed Submission Local Plan, GBC's very first housing policy, Policy H1, requires that development should: "make the most efficient use of land whilst responding to local character, context and distinctiveness." However, Policy A35 fails to do this.

With its proposal to build some 2,100 homes on and around the site of the former Wisley Airfield, Policy A35 will create a new settlement larger than any other in Guildford Borough, outside Guildford itself. The nearby historic village of Ockham has merely 159 dwellings. It will be completely swamped by a development on such a scale.

Moreover, the design and density of the proposed development will be completely out of context with its surrounding area. Due to the restrictions of the SPA Exclusion Zone, the need for SANG provision and the land needed for the waste facility, the actual land area to be used for housing development under Policy A35 is estimated to be around 43 hectares. Therefore, with 2,100 homes proposed for this site, the overall housing density of the settlement area may be calculated at around 49 dwellings per hectare ('dph').

East Horsley, just three miles from this site, is the largest settlement in Guildford borough outside of Guildford town, with some 1,760 homes. East Horsley presently has an overall housing density of 8.1 dph within its settlement area. Therefore, the proposed development under Policy A35 is six times as dense as the nearest settlement of a comparable size. The proposed development under Policy A35 therefore utterly fails to respond to local context and as such is in breach of GBC's own Housing Policy H1.

The density of 49 dph proposed under Policy A35 is effectively an urban density appropriate for a metropolitan location. It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously presented by the developer. For a setting within the middle of rural Surrey this is completely out of character.

Other settlements close to this site are small rural villages such as Ockham, West Horsley and Ripley. These villages have grown up organically over a thousand years. They contain many historic, listed or otherwise protected buildings as well as a range of residential housing, predominantly detached two storey houses or bungalows. They are all picturesque villages with charm and character. Visitors come to the area to enjoy some of the prettiest villages and countryside in southern England, all within easy access of London. The character of this whole area would be irreparably destroyed if this development goes ahead.
Accordingly, I OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

Concluding remarks

I have major concerns about Policy A35. I consider this proposed policy to be a severe contravention of Metropolitan Green Belt rules. It will result in a new settlement of very low sustainability, it will have a major adverse impact on the infrastructure and environment across a widespread area and it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

Accordingly, I strongly OBJECT to Policy A35.

In the light of the recent referendum outcome, which will result in the UK leaving the EU, it is inevitable that the population and economic projections for Guildford Borough will need to be reduced.

I presume that GBC will in due course be making such reductions to its proposed housing projections to reflect these changed circumstances. In our opinion, the proposed development at former Wisley Airfield ought to be the very first site in the Borough that GBC should remove from its draft Local Plan as a result of the UK now proceeding to leave the EU.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1468  Respondent: 15324673 / Michael Brooke  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

   • I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

     1. The assertion that the development will result in a meaningful shift to cycling and walki. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

     2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads - there are already significant congestion issues on Old Lane and Effingham Common Road during peak hours - there is no capacity for this

level of increase especially when also considering wide vehicles including increased bus and HGV movements

---
1. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as Local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

2. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity with dangerous parking on the verge of Effingham Common Road already a regular occurrence. Any assertion that residents will use other stations in the area is pure fantasy.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. As a father of two young children, this is clearly of much concern. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

After 14 months of consideration (and various extensions and amendments) Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 5th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the Local Plan in so far it includes a proposed large development of housing for Wisley. Such a development will have a huge and unacceptable impact on the other local villages of Ripley, Send and the Horsleys, all of which also have new housing developments in substantial numbers included in the Plan. The proposed building in the local plan of the development on Wisley Airfield will change and spoil the whole character of the area.
• I also object to the removal of the former Wisley Airfield land from the Green Belt in order to facilitate the development of numerous dwellings. The point of the Green Belt is to protect the countryside for the future.
• The proposals for the housing development at Wisley Airfield, plus other proposed housing developments in Ripley, Send and the Horsleys are likely to result in 4,000 - 5,000 additional cars moving in and out of these areas on a daily. This increase in the volume of traffic will result in traffic congestion problems on all the local rural narrow roads. Also local amenities are not sufficient to cope with this influx of people and transport.
• I also object to the local plan’s proposed housing developments in The Horsleys, Send and Ripley which are all building over fields and woodland which will be lost for ever.

I hope you will take note of my objections and particularly the former Wisley Airfield is removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1490  Respondent: 15326369 / J D W Todd  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT

Policy A35 p124 and 203

Land at the previous Wisley Airfield like Gosden Hill is close to Send and Ripley and will cause significant traffic flows on the A3 and M25 as well as the effect on local amenities. This would also be catastrophic as regards local hospitals, schools, traffic and the environment.

Overall the increase in the population of Send as already envisaged by developments in the area will impose an intolerable burden in the infrastructure such as Schools, the Villages Medical Centre, Roads, local Hospitals, parking for local shops, sewerage and internet provision (which is barely adequate at present). I see nothing in the Local Plan concerning such issues and until these issues are addressed satisfactorily in detail any further development should be rejected. There would seem to be a hidden agenda and vested interests by some members of the committee being brought to bear on the overall policies being put forward by the planning committee to the detriment of the Send area and its environs which seems to have been singled for intensive development and this is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1496  Respondent: 15326849 / Michael Hoad  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
I was born and brought up in Guildford and am still a regular visitor to the Borough, not only to visit many friends, but also to enjoy walking in the countryside and through the historic villages which are the Borough’s heritage.

I would like to raise objections to the Borough Councils proposed Local Plan.

I object to the fact that the majority of housing is proposed to be built on Green Belt land, rather than on available brown field sites, and I specially object to the proposed removal of the former Wisley Airfield site from the Green Belt when no exceptional circumstances have been given for doing so.

I strongly object to the continued inclusion of the Wisley Airfield site in the plan when after over a year of consideration, the Council Planning Committee unanimously rejected the developer’s planning application, after the Council’s Planning Officers expressed grave concerns about the proposed development.

The proposed 2,000+ houses proposed for this site would totally swamp the local historic Ockham village with its many listed houses, whilst losing valuable green land.

The roads in the area are extremely narrow, unlit and with no pavements and totally unsuitable to cope with increased traffic. The suggestion that this development would encourage a move to cycling and walking is not realistic due to the isolation of the site – it would without doubt bring about a large increase in private car usage in the area. Car ownership figures would suggest that a 2,000+ housing development could generate 3,000 - 4,000 extra cars (as well as heavy lorries and vans which would service such an estate) adding to an already overcrowded A3 and M25, and creating even higher levels of pollution, which already breach EU limits around the M25 junction. Furthermore, there is little public transport in the area and certainly neither of the local railway stations at Effingham and Horsley could cope with a large increase in passenger numbers or demand for parking.

A look at the map clearly shows why the Green Belt was created – the urban sprawl from London has already reached as far as Cobham, and the Wisley Airfield site is crucial in protecting the Borough from its further advance.

I trust that you will seriously consider removing the Wisley Airfield site from the Local Plan – not only for the many practical concerns raised, but because it risks destroying the very countryside and rural village life which are the very things which make the Borough such a desirable place to live.

3. Three Farms Meadow site

I OBJECT to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My objections to Guildford Borough Council Proposed Local Plan i june 2016) and to the continued inclusion in the plan of the Former Wisley Airfield now known as Three Farm Meadows- Allocation A35 - the phased development of a new settlement of up to 2100 dwellings.

I very strongly object to the draft local plan for many reasons - and I wonder if any of the Councillors have really considered this proposal, and many others in the neighbourhood - Over 600 houses in Horsleys, 400 in Burnt Common, 2000 houses on Gosden Hill Farm (Burpham) plus a number of smaller sites in nearby villages. These add up to in excess of 5000 new dwellings in this neighbourhood.

As far as I am aware no Councillor or Planning Officer has ever been to or considered the enormous effect that this would have, not only on the residents in these areas but many other people from far and wide. I wonder if the Councillors or Planning Officers even know where these places are and, possibly as they do not live near the area effected, they feel that they are correct in putting these plans forward (NIM BY/SM).

If these building projects were carried out then there would be total traffic gridlock not only in the local area but on the M25 and A3 and, of course on every one of the smaller roads in Surrey and the surrounding Counties.

Amongst my other objections to the draft local plan, where no consideration has been given, are:

  • There are not sufficient Transport links (railways, buses or roads)
  • There are not sufficient Schools/Academies to educate possibly up to 10,000 children in the area. There are insufficient shopping and parking facilities
  • The roads in the area cannot take any increase in traffic as this contribute to grave danger to all users (car drivers, pedestrians and cyclists, etc)
  • The air pollution is already at a high level and any increase caused would be well in excess of the legal level.
  • I was under the impression that the Councillors had previously stated in their Manifesto that "the Green belt is safe" It now appears that these words were totally meaningless and untrustworthy.
  • Councillors and planning officials have no right nor lawful reason to turn prime Greenfield land into an enormous urban sprawl/slum stretching from Greater London to Guildford and probably further out.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1542   Respondent: 15330017 / Honor Grear   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to the continued inclusion in the Guildford Borough Council Proposed Local Plan (June 2016) of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation the phased development of a new settlement of up to 2100 dwellings

I object to the inclusion of FWA/TFM in the draft Local Plan for the following key reasons:

1. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt FWA/TFM is prime green belt, and was given to the country for an airfield as part of the war effort, based on the promise that the land would be returned to the community after the need for an airfield had passed. This promise has been broken, and no effort has been made to see whether there is a moral or equitable duty to return this land to the existing community.

2. I object to the disproportionate allocation of housing in this particular part of the Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

3. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no street lights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

4. I object to the detrimental impact on transport, local roads and road I specifically object to:
   a) The assertion that the development will result in a meaningful shift to cycling and The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b) The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c) The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d) The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e) The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f) The lack of suitable public transport The local rail stations of Effingham Junction and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

5. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

6. I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames
Basin Heaths SPA and the irreversible impact of the habitat degradation. In particular, two schools should not be planned in the FWA/TFM area which is known to have poor air quality, which will only be exacerbated by the planned development.

7. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

8. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 9th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Those reasons remain valid, and there are no adequate ways to overcome them.

9. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

12. Opportunity (3) should be common to all sites and is not unique to this site

13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

16. I object to the removal of additional 3.1 ha from the green belt without any justification

17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. Indeed, in ordinary words and common language, I believe that this draft local plan, and these revisions, in totality, but in particular relating to Three Farm Meadows are “bonkers”!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objections to Guildford Borough Council Proposed Submission Local Plan: Strategy and Sites (June 2016) and to the continued inclusion on the plan of the former Wisley Airfield, now known as Three Farm Meadows (TFM) - Allocation A35 or the phased development of a new settlement of 2,068 dwellings.

Although I live outside the borough I use the borough for visiting friends who do live there. I object to the Local Plan for the following key reasons:

1. I object to the threat the local plan poses to the historic rural village of Ockham and the blight on properties there.

2. I object to the detrimental impact the proposed development of over 2,000 dwellings will have on a village with 159 residences. In particular this development and the associated increase in traffic will have a very detrimental impact on the environment, road safety and congestion.

3. I object to a plan which proposes that over 70% of new houses are built on land designated as Green Belt land in contrast to election manifesto promises made to the electorate.

I trust that these objections to the Local Plan will be fully considered and that the plans for development on the former Wisley Airfield (TFM) allocation A35 are now removed from the local plan.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the building of 2000 house on the Wisley airfield. I previously thought it might be a reasonable proposal to build on an old brownfield site but the scale of the plan will have an enormous impact on our narrow country roads and make train travel at peak times intolerable. It is almost at capacity already and where will the extra cars park?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

### Attached documents:

### Comment ID: PSLPS16/1649  Respondent: 15342689 / Robin Pearson  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I refer to the above Plan and the proposal to build approximately 2,000 houses on the site of the former Wisley Airfield.

I wish to strongly object to this proposal on the basis of creating the equivalent of a new town on Green Belt land. Government Policy states that the use of Green Belt land can only be used in exceptional circumstances and this certainly has not been demonstrated.

If considered, this proposal would have a major impact on the villages of West and East Horsley. This forced growth policy would put an enormous strain on existing infrastructure in an already over-crowded area. Our roads, or lanes, are worn out, the existing sewers and drainage systems have difficulty coping. Our schools are overcrowded, our Doctor's surgeries struggle to cope and our few shops have limited parking. The nearest stations would be Horsley and Effingham Junction and they are both well served and their car parks are full.

It must remain a Policy to preserve the natural beauty of our area and to build houses and create a new town in such a rural area would be negligent, and therefore to this end I must strongly object.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the building of 2000 house on the Wisley airfield. I previously thought it might be a reasonable proposal to build on an old brownfield site but the scale of the plan will have an enormous impact on our narrow country roads and make train travel at peak times intolerable. It is almost at capacity already and where will the extra cars park?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

### Attached documents:
I am writing with regards to the building proposals for the Horsleys and Wisley Airfield/Ockham and my objections to them.

My reasons for doing so are the following:

**Wisley Airfield**

I object to the development of 2000 extra houses being built. The local roads and public transport at peak times are already at capacity. The A3 being the closest main road in and out of London is already regularly congested, if not at a standstill in both directions during rush hours, as is the A25 that connects the area with Guildford. The winding country back roads are also certainly not made for large numbers of cars. Adding more traffic to the area will not only make this undoubtedly worse, but will also increase pollution and disrupt more wildlife around the greenbelt area.

The trains are also at peak time capacity. The car park at Effingham Junction (the closest station to the suggested site for building) is already full daily, with commuters parking dangerously and most probably illegally on nearby roads. The trains themselves are full already. The villages are not places that attract many work opportunities (nor should they become so), so residents of the proposed establishments would need to travel to work in some capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Whilst I support the concept of using the Wisley Airfield Site for development I am not convinced that such a large settlement is warranted.

It is a major anxiety that the development will impact on local roads which are already extremely busy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPS16/1786  **Respondent:** 15348705 / Richard Shaw  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The draft Local Plan also proposes development of 2000 houses at the Wisley Airfield. This would be an unsustainable development that would depend heavily on private car transport, exacerbate safety concerns and congestion on the A3/M25 interchange and add significantly to the problems described above in the Horsleys.

This is an ill-considered Plan that should not be approved.
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) -

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys - of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC.

5. I object to the threat the local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   a. The assertion that the development will result in a meaningful shift to cycling and The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
b. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

e. The increase in the already severe congestion on the Strategic Road Network of the A3 and a further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

f. The lack of suitable public transport options. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

2. I object to the fact that air quality concerns have not been taken seriously- air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

4. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows)- where the planning application has already been unanimously rejected by GBC’s Planning Officers, who cited the same grave concerns highlighted in this letter.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I write to **OBJECT** to **Amended planning application 15/P/00012** for the following reasons:

**Sustainability:** The site is remote and occupants will rely on the use of the private motor car adding to traffic congestion on both the Strategic Route Network (the A3 and the M25) and local roads which are already running over capacity.

- The application relies on people switching to walking, cycling and public transport. This is unrealistic as it is two miles to the nearest railway station and at least half the route has no footpath. Roads are narrow and unlit.
- There is no spare parking capacity at either of the local stations.
- Sites of this size are required to provide outdoor open space. The applicant has “double counted” the outdoor space with that required for SANGS
- The loss of high quality agricultural land is in contravention of policy.

**Air quality:** The air quality figures are based on an unreliable transport assessment.

- The applicant has not used the DEFRA modelling statistics as required and rather appears used numbers from an unrecognised (and unreliable source)
- Poor air quality is exacerbated in the area by temperature inversions which trap the air. Young and old are extremely susceptible to poor air quality.
- Air quality is not improving as fast as expected, partly due to the excessive emissions (VW et al)
- The impact of poor air quality on RHS Gardens at Wisley and the Thames Basin Heath Special Protection Area (SPA) is already in excess of legal limits.

**Transport:** The transport assessment makes a number of erroneous assumptions and is not credible.

- It is completely unrealistic to assume that there will be a decrease in vehicle movements.
- There is no impact on traffic for the recently added secondary school, nor from the fact that prior to the school being built the children will have to be transported to the nearest available school in Leatherhead – adding to congestion.
- There appears to be no impact shown for the 270 daily bus movements or for the waste lorries or HGV deliveries to the site.
- The TRICS data used for comparison is not a relevant measure: site not comparable with a site in Guildford, nor a site 400m from the centre of Redhill, nor one on the edge of Staines.
- The traffic counts bear no relation whatsoever with counts submitted to Guildford or to Woking borough councils in support of other large development projects.
- The modelling in the Transport Assessment at 7 junctions close to the site bear no relationship to the daily experience of residents, evidencing flawed modelling
- The number of daily trips is understated in the region of 1000 vehicle movements.
- Additional traffic will have a negative impact and cause irreparable damage to historic houses and other buildings in Ockham/ Ripley/Downside and further afield.
- If allowed, the impact of the additional traffic may prohibit other developments further south on the A3 or indeed those needed by the RHS

**Appropriate development:** The site is in the Green Belt in a rural location, hemmed in by the A3 to the west, the TBHSPA and the M25 to the north and the Conservation area of Ockham Village to the south.
- Green Belt boundaries can only be changed in the local plan process and in exceptional circumstances which have not been demonstrated

- The site is not big enough to provide satisfactory living standards even for “affordable housing”.

- Four and five storey buildings are not appropriate in the rural environment nor on an elevated site.

- Residents will be cramped in with little outdoor space, a noisy location, with very poor air quality. The density of housing proposed is similar to that in Islington.

- The site is clearly visible from the Surrey Hills AONB and as a result it will have a negative impact on views to and from the AONB.

**Thames Basin Heath SPA/SSSI/SNCI**: The impact of 2,068 houses on the environmentally sensitive TBHSPA cannot be mitigated. Damage will occur to the habitats of the protected and endangered rare species (including skylarks, nightjars and many others on the RSPB red list) in contravention of the EU Birds Directives and Habitats Regulations

- The siting of the proposed Suitable Alternative Natural Green Space (SANG) adjacent to the SPA will only increase visitor numbers causing further damage

- Part of the SANG is in a designated flood plain

- Para 119 of the NPPF “presumption in favour of sustainable development” does not apply where development requires assessment under the Birds or Habitat Directives

- It is impossible to state without doubt that the mitigation proposed will prevent damage to the SPA particularly in the light of inadequate traffic/air quality reports.

- There are likely to be over 700 dogs and 700 cats living on the proposed development. These will be a constant threat to ground nesting birds on the SPA and cannot be mitigated by one warden working a normal working day.

**Impact on the local area**: The additional 5,000 residents is the equivalent of almost doubling the population of East and West Horsley combined. This increase in local population will impact:

- Light pollution, noise, traffic and infrastructure which has been gravely underestimated and proposed mitigation measures are totally inadequate

- The cumulative development in the borough and in the neighbouring boroughs of Woking, Waverley and Elmbridge per the objections from both Elmbridge Borough Council and Woking BC

- The water table and flooding in the area. It appears that no impact assessment has been done relating to the loss of agricultural land which currently soaks up a significant volume of rainwater.

- Listed buildings adjacent to it such as Yarne, Bridge End House and Upton Farm

- Via closure of a number of local roads coupled with an increase in traffic will affect a large number of road users from Cranleigh to Cobham and everywhere in between

**Inaccuracy of the documentation**: There are factual errors in the documentation

- Highways England have recommended that the proposal cannot be determined due to the applicants failure to provide traffic data in the format required

- There are a number of misrepresentations in the paperwork e.g. nine stations within 5 miles – this is however “as the crow flies” only Horsley and Effingham Junction are within 5 miles by usable road from the middle of the development
- The applicant’s description of the site as brownfield is a gross over-simplification. 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remaining runway, a habitat for rare flora and fauna, (14ha) has never had buildings. The remainder of the site (55%) is high quality agricultural land.

Other: This site is not deliverable within 5 years due to problems with sewerage and water capacity, outlined by Thames Water & the OCK DVOR air traffic control beacon which limits development until 2022

- No very special or exceptional circumstances exist - Alternative sites exist
- The proposal includes the site SCC safeguarded for waste under the Surrey Waste Plan
- The site is not listed for development under the existing 2003 Local Plan
- There is not enough land to provide a sustainable community based on GBC’s own parameters
- There is no update at all to the Heritage study despite the significant Bronze Age haul found in Ockham village in May 2013 and the likelihood of further remains on the site.

I trust the Council will find this useful, in their deliberations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. A development of this size at Wisley Airfield would have an enormous impact on neighbouring villages, including Ockham, Effingham and the Horsleys. The facilities in these villages will inevitably be swamped by such a large increase in population at the proposed site.

1. The road management plans for the Wisley site appear totally inadequate and unsafe. The traffic leaving/joining the A3 at the Ockham roundabout will create an extremely dangerous situation and we are sure that GBC and the developers would not wish to be responsible for the injuries and deaths that will undoubtedly follow from the development of this site.

1. Air quality has not been taken seriously and pollution in this area is in excess of EU permitted levels and will only get worse if this development proceeds.

For the reasons given above I object to this site being included in the Local Plan and request that it is removed forthwith.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Submission Local Plan: Strategy and Sites (June 2016) and to the continued inclusion on the plan of the former Airfield, now known as Three Farm Meadows (TFM) - Allocation for the phased development of a new settlement of 2,068 dwellings.

Although I live outside the borough I use the borough for visiting friends who do live there. I object to the Local Plan for the following key reasons:

1. I object to the threat the local plan poses to the historic rural village of Ockham and the blight on properties there.

1. I object to the detrimental impact the proposed development of over 2,000 dwellings will have on a village with 159-residences. In particular this development and the associated increase in traffic will have a very detrimental impact on the environment, road safety and congestion.

1. I object to a plan which proposes that over 70% of new houses are built on land designated as Green Belt land in contrast to election manifesto promises made to the electorate.

I trust that these objections to the Local Plan will be fully considered and that the plans for development on the former Wisley Airfield (TFM) allocation A35 are now removed from the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1846  
Respondent: 15350753 / Linda Bassett  
Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the removal from the Green Belt of the former Wisley Airfield, referred to as Three Farm Meadows, and I OBJECT to Allocation A35, the development of a new settlement of up to 2,100 dwellings, as a new settlement does not accord with the designation of the site as Green Belt and the Council has failed to provide the exceptional circumstances required by the NPPF necessary to justify removal of the site from the Green Belt. It was accepted by the Leader of the Council at the Advisory Board in April 2016 that the Objectively Assessed Needs (OAN) figure was exceeded. There is no need for the Council to exceed its OAN but the Local Plan proposes to do so by causing harm. The OAN can be satisfied by development of more sustainable sites; there is no need for A35 and so there cannot be any exceptional circumstances justifying it.

Green Belt

The Green Belt designation of the site prevents the sprawl of the urban areas of Guildford, Woking, Leatherhead and the Metropolitan area. Previously developed parts of the site such as the runway, taxiways and the aircraft hardstanding are all open and, therefore, buildings on these areas will cause considerable harm to openness and the Green Belt. A new settlement would represent inappropriate development in the Green Belt, would cause significant harm to the character of the surrounding area and significant harm to the setting of a Listed Building. Development of this Green Belt site will discourage urban regeneration.

Sustainability

The Former Wisley Airfield is within the least accessible part of Guildford Borough, remote from rail stations with poor local roads and lengthy bus routes and, given the proximity of the A3, it is implausible that development would be prove to be attractive and safe for cyclists. The development is too small to be self-sustaining and yet large enough to cause substantial adverse impact.

 Deliverability

The site was subject of a recent planning application for a quantum of development comparable to that in the Proposed Submission Local Plan and with a very similar boundary. The application was recommended for refusal and refused unanimously in April 2016. Despite 15 months of negotiation with the applicant, Wisley Property Investment Ltd (WPIL), additional issues of impact on the Special Protection Area (SPA), impacts on the strategic and local highways network, sustainable transport, affordable housing, air quality and education could not be resolved. The failure of the planning application confirms that there is no reasonable prospect that the project can be delivered.

Soundness

The reasons for refusal of the planning application submitted by WPIL and the failure of the applicant to resolve issues for a proposed development comparable to the Local Plan allocation confirm that the allocation is unsound. The allocation i) does not provide sustainable development ii) is not supported by exceptional circumstances to justify removal of the Green Belt designation and iii) lacks realistic prospects of delivery.

I OBJECT to the removal of East Horsley and West Horsley from the Green Belt. The NPPF requires the provision of exceptional circumstances to justify alteration of the Green Belt Boundary. The Council has failed to provide the necessary justification. Therefore, allocations A36 Hotel at Guildford Road East Horsley, A37 land at the rear of Bell and Colvill Epsom Road West Horsley, A38 land west of West Horsley, A39 land near Horsley railway station Ockham.
Road North West Horsley, A40 land north West Horsley and A41 land south of West Horsley should be deleted as allocations for residential development.

2. Wisley Airfield.

I object to the building of 2000 house on the Wisley airfield. The case for so much additional local housing is not made. The pressures from additional nearby homes, people and dogs will jeopardise conservation efforts to preserve a rare habitat for nature at Ockham Heath. The narrow feeder roads will struggle to cope with additional traffic and there will be increased congestion at junctions to nearby main roads. In combination with the other planned developments in the Horsleys, the Wisley site development will create a large block of suburbia in what was previously a mixed semi-rural community.

The proposals for Wisley airfield falls exactly into this category...GBC are trying to justify the development under unfulfilled housing need (which has been exaggerated at best) and in any case unfulfilled housing need is not sufficient argument to build on green belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

8. I OBJECT to Policy A35: the proposed Wisley Airfield development which is completely out of keeping with the will add tremendous burden onto all local services. Only a small proportion of the site is brownfield (not totally as stated). It will add traffic to the already busy M25/J10/A3 junction. The number of houses suggested will ruin Ockham conservation area. The development would have a major negative impact on Horsleys facilities such as shops, trains, health centre etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to register my strong objection to the New draft Local Plan.

I cannot understand why, after the GBC Planning Committee unanimously rejected the proposal for 2,000 homes (mostly on the site of the former Wisley Airfield), it has again been included in the plan; an explanation of this repeated inclusion should be made public in conjunction with clarification of the new reasons that justify it.

Much of this development would be adjacent to the Nature Reserves of Wisley and Ockham Commons and Chatley Heath. Substantial parts of this land have SSSI designations and development adjacent to such is forbidden under Natural England's Wildlife and Countryside Act 1981 and Access to the Countryside Act 1949 - amended by schedule 11 Natural Environmental and Rural Committees Act 2006. You need to make public the proposed and actual consultations that you have had (and intend to have) with Natural England regarding the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The proposal to increase the size of the site for development will lead to even greater numbers of vehicles on roads which are not designed for even the present volume of traffic. The delays around the M25 Junction 10 slip roads have recently led to long build-ups on the A3 so how on earth will the present infrastructure cope with such a vast development of housing.

I have lived in Hatchford since my marriage in 1959. I wish to add my name to list of objections who state that Allocation A35 Former Wisley Airfield be removed from the local plan.

I object to more houses being built on this site now named three farms meadow. The narrow winding lanes are not suitable for an increase of vehicles. It is too dangerous now for me to walk 200yards to post a letter at the Black Swan public house post box. I have to drive for my own safety.

I object to more traffic causing the air quality to further break the EU permitted levels.

I object to loss of Green Belt land. My husband and I are great nature lovers and wakl through the woods almost daily on public rights of way!

I object to Guildford Borough Council proposed local plan (June 2016) and to continued inclusion in the plan of the former Wisley Airfield now know as Three Farm Meadows.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to site A35 Wisley Airfield- 2000 homes that are totally inappropriate and unsustainable development in the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objections to Guildford borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the former Wisley Airfield FWA, now known as Three Farms Meadows TFM Allocation A 35 for the phased development of a new settlement of up to 2100 dwellings

I STRONGLY OBJECT to the draft Local Plan for the flowing reasons:

1. I object to 70% of new housing planned on green belt when there is ample brownfield in urban areas

2. I VERY STRONGLY OBJECT to the removal of the former Wisley Airfield site from the Greenbelt land the site is needed to protect against an urban corridor from London

3. I OBJECT STRONGLY to the disproportionate allocation in this part the borough.

The impact on the narrow roads around the villages of Ockham, Ripley, Wisley, Horsley and others will be detrimental to health due to heavy pollution levels from the A3/M 25 junction, light pollution and general impact of heavy traffic down narrow beautiful country lanes.

1. I STRONGLY OBJECT to A proposed development of over 2,000 houses would result in more than 4,000 cars, heavy lorries and buses for proposed schools, chaos at the station of Horsley and Effingham, impact on village life, cafes and public houses and local amenities.

Chaos at the Ripley roundabout.

1. I STRONGLY OBJECT ......My main concern, viewed with complete amazement and horror is the inclusion of the Wisley Air Field (three Farms Meadow) in the Local Plan I was at the meeting when EVERY COUNCILLOR to a MAN objected and refused permission!!!!!!

WHY therefore has it been included? Whose suggestion was that?

I need answers please.

All the authorities represented refused permission for the right reasons as the whole proposed development for the airfield is preposterous and the impact would be felt for years to come. To the detriment of all who live in the local area and the people yet to come.

Therefore in conclusion I demand that the Wisley Airfield is withdrawn from the local plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I understood that the development at the old Wisley Airfield site had been rejected but has been included on the above plan again. The density of the proposed development here is not appropriate for the area and must continue to be rejected by the council.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

5) Development of over 2000 house village at Ockham (former Wisley Airfield).

The impact on the Horsley villages of such a huge mixed housing, retail, commercial traveller, and schools development less than 2 miles distant from the Horsleys would be enormous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

DRAFT LOCAL PLAN – CONSULTATION

Wisley Airfield – Site A35

This letter addresses the proposals contained in June 2016 Guildford BC Draft Local Plan for 2013-31 for substantial extra housing across the Borough, and particularly at Wisley Airfield close to my home.
In conjunction with my husband, I OBJECT to this ridiculous proposal to begin an unsustainable wedge of development between London & Guildford which will be uncontrollable in the future through the precedent set by this Plan, and support all his comments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/2203  Respondent: 15373153 / C R Woodland  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to site A35 Wisley Airfield. The proposed development is totally inappropriate and a more suitable use for the site would be as a park-and-ride 'hub' with buses going to Guildford, Woking (via Send), Heathrow and Gatwick Airports and possibly other places such as Effingham Junction as well. Tilis would reduce traffic flows on the M25, A3 and other local roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/4755  Respondent: 15377473 / Deborah Holden  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. A35

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

- The assertion that the development will result in a meaningful shift to cycling
- The increased volume of car traffic. A proposed development of 2,068 homes
- The congestion this traffic will cause on the narrow rural roads in Ockham and
- The danger this traffic will be to local cyclists and pedestrians, due to the
- The increase in the already severe congestion on the Strategic Road Network
The lack of suitable public transport. The local rail stations of Effingham and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars would result in an estimated 4,000 additional cars on the roads on the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

The absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

The A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest. Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I continue to "OBJECT" in the strongest possible terms that policy A35 THREE FARM MEADOWS are still included in the DRAFT LOCAL PLAN. for many and various reasons and these include:-

1. It is an unsustainable site in whatever version it has been presented.
2. Unrealistic distance from existing railway stations. all other identified sites are closer.
3. The site is in touching distance of (J10) M.25. – A.3. the most gridlocked junction in Surrey and one of the most congested in the Country.
4. Local roads are full to overload now already!! and worsened by road works etc.
5. Small local roads and lanes unsuitable and unsafe for public transport with frequent delays.
6. narrow dangerous road to HORSLEY very hazardous to pedestrians cyclists etc.
7. nearby R.H.S. WISLEY is the most visited Tourist attraction in S.E. where attendance numbers expect to rise to 500,000/annum this [illegible word] and other high attendance events at R.H.S. have not been taken in to consideration
8. The increase in traffic expected by local employment will be down-right dangerous on these narrow roads and lanes.
9. Commuter traffic to Woking Railway Station at present hazardous will become even more so.
10. The future timescale at the VOR Beacon is unclear and at present is at present a constraint on any possible building height etc.
11. Heritage asset UPTON FARM now abuts the site with a negative impact.
12. The increased area of this site presents a negative view to SURREY HILLS (AONB.)
13. Incorrect changes to site boundaries that are also not identified properly.
14. Changes to Green Belt boundary at the eastern end now encloses site of high archaeological impact
15. Unsuitable proposed development in flood zones 2-3.
16. Failure to recognize the impact on local countryside of new Buildings!!
17. Why has the Council failed to remove this site from the “LOCAL PLAN” despite receiving 1000s of letters of “OBJECTION” from local residents and statutory local consultees!!!
18. There is no mention of the inclusion of A35 on the effect on sewerage capacity.
19. Poor air quality is a real problem in this area that has not been addressed in fact one of the “AIR QUALITY SENSORS” has gone missing mysteriously in recent times!!
20. The Council has paid no heed to the constraints of the GREEN BELT. infrastructure damage.
21. There seems to be no regard to the bad affects of pollution, nitrogen deposition.
22. The Council has in general paid little attention to the genuine fears and concerns of local residents, and so many experts opinions whos views they do not agree with. In short they appear to be on the side of anybody except the local residents they are supposed to represent and defend

In conclusion for the afore mentioned reasons and many others this plan is wrong in so many way’s and is a total waste of time and money.

I OBJECT to the draft Local Plan for the following reasons:

I feel quite strongly that I want to keep our local Green Belt land. We are very lucky to live in an area that is so beautiful with gorgeous views. I have not heard that there are any exceptional circumstances for this to be ruined. It is not only for myself but for any children I might have. Planting a few trees won't re-create an interrupted landscape and importantly all this development would cause many rare and protected species to die.

I love Ockham the way it is. I don't want to be selfish though and say we shouldn't build any more houses or make room for any more people to move from London and come to the outskirts of Guildford - but to do so there needs to be a train station close by. I have seen how full Horsley and Effingham stations are. None of the local stations are within walking distance for anyone so this means an inordinate amount of extra cars on our little lanes.

Anyway, I appreciate the old Airfield is a large area and probably something has to happen to it at some point but it definitely shouldn't be included as a potential site for a large scale residential housing development because a) it is green belt land and b) our Ockham/Horsley area couldn't cope.

I hope you will give my objections your full consideration.

I OBJECT to the draft Local Plan for the following reasons:

The reasons are: that the proposal is an enormous encroachment on the Green Belt and will change the way our nearby countryside looks for myself and for future generations. (By the way, I thought Green Belt land was "Sacrosanct" and at the very least - an absolute last resort. I haven't seen any paperwork that this is the case.

Apart from my parents moving me away from what I love about Ockham my biggest concern is that if over 2,000 houses were built this probably means over 5,000 people. I don't know how many extra cars that will be but I do know that my
Mum and Dad are always stuck in traffic already. Lots of the roads around here are single lane - I cannot see how they can be made bigger without knocking existing houses down.

We live in Ockham itself so we can't walk home from the station and need our parents to pick us up. I am told that there are no plans to build a new railway station. So how are all the people going to get to work? Horsley and Effingham stations are already super-busy and there could be loads and loads of cars on our narrow lanes. Have the people who carried out this research to put this site in the plan not seen all the local roads closed and us diverted when we have heavy rainfall!

Anyway, I will keep my objection letter brief and to the point - a strong "no" to our village being included for a large scale housing development. The village couldn't cope.

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too hi This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC)
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My reasons for objection:

• Object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.

• Object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.

• The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times. Cobham is unable to cope with the traffic at the moment.

• Object to the massive increase in air pollution that would result from the congestion on the small country lanes and the M25 and A3. These areas pollution levels are already above EU permitted levels.

• I live off Between Streets in Cobham and would be affected by the increase in traffic from the above. I can hardly get out of my drive as it is.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and again produce congestion on the A3 and surrounding roads including Send. The local infrastructure is completely inadequate to deal with the proposed housing levels. These are massive areas of lovely countryside and protected Green Belt that is just being turned into urban areas. Roads, doctors and schools will be unable to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Airfield in the proposed Local Plan. Although I do not live in the borough the airfield is sufficiently close to my home to present substantial problems to my area if any development of the airfield such as that proposed were to go ahead.

Apart from being in the protected Green Belt, and part of it being a SSSI, the previously-proposed development of this site was comprehensively rejected by your Planning Committee on substantial and compelling grounds of which you are surely aware. The site is surrounded by small and historic villages, the character of which will be fundamentally and unacceptably changed by any development. The possibility of over 2000 new dwellings on the site, some of which would be of the multi-storey variety, together with perhaps an additional 3-4000 cars, would totally ruin the area. Apart from the A3 and M25 roads, which are constantly jammed at peak periods, none of the roads adjacent Wisley Airfield is able to take more traffic than at present. They are all narrow, twisting and without pavements. The additional traffic would represent a nightmare.

Furthermore, even if the additional traffic managed to get to any of the neighbouring stations, e.g. Horsley, Effingham, Cobham, the trains could not cope.

The local shops also could not cope. It is fanciful to suggest that shops and other amenities would be available at the site from the outset. No developer would provide such things until after a substantial number of dwellings had been built.

The area surrounding the site is a beautiful part of the county and well recognised as such. So long as Wisley Airfield remains in the Local Plan, thus signalling to developers that they should keep trying, it will be a blight on us all.

I therefore object in the strongest possible terms to the proposed Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. How can land be identified as Green Belt ie: protected and then ‘unprotected’ like this – it is a mockery of the whole concept of protection!

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is simply too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. Commuters going to Effingham station are NOT going to cycle or walk!

2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. These are small lanes which don’t have the capacity to take this sort of traffic.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The increase in traffic will create a danger to those who do cycle (and pedestrians walking to the woods with their dogs), due to the absence of any cycling paths and the lack of pedestrian footpaths (as there is no space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. Where are all these extra commuters going to park? This will lead to further development of common land which is again ‘protected’.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, which is already in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I simply fail to see how the local planning committee can be even reconsidering this application with so many people objecting.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to register my objection to the above proposed development on the grounds listed below. Whilst I live outside the borough of Guildford the proposed development will impact the local area in and around Cobham.

- Object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
- No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
- Object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
- Object to the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.
- The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
- Object to the potential harmful impact on transport, local roads and road safety by the suggested development.
- The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
- The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
- Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).
- There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
- The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
- Object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.
- Object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.
• Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield, now known as Three Farms Meadows (TFM)

-Allocation for the phased development of a new settlement of 2,068 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored

• I object to the removal of The Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, 36% of the Plan's new housing is proposed in the northeast of the borough (x% of which is allocated to TFM), an area that at present has only 11% of existing housing

1. S) I object to the loss of the historic rural village of The plan calls for a village of
159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five stories high and a population density higher than most London boroughs

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to assume a reduced reliance on private cars

  1. The increased volume of car A proposed development of 2,068 homes would indicate an increase of approximately 4,000 additional cars on the roads.
  2. The impact this traffic will have on the narrow rural roads in Ockham and the surrounding areas, also including increased bus and lorry movements
  3. The impact this traffic will have on local cyclists and pedestrians, due to the absence of any cycling paths and the lack of proper pedestrian footpaths (and the space to provide them)
  4. The impact on the already congested Strategic Road Network on the A3 and A further planning application at RHS Wisley (with increased visitor traffic) and a proposed 600 pupil secondary school would add further congestion at the M25/A3 junction as well as local roads. Infrastructure enhancements to the A3 and M25 would have to be completed before any development commences.

Highways England has stated that they have no plans to even consider improving the A3 before 2020.

  1. The lack of suitable public transport. The local rail stations of Effingham and West Horsley cannot cope with the proposed increase in passenger traffic

   - I object to the fact that insufficient consideration has been given to the site's value from an environmental and ecological standpoint, in relation to the Thames Basin Heath Special Protection Area (SPA), the Sites of Special Scientific Interest (SSSI) and Special Nature Conservation Interest (SNCI)
   - I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction is in excess of EU permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents
   - I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced throughout Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% both wish to see the historic features of the village maintained and to protect the village's green spaces, including the FWA/TFM
   - Lastly, I object to the continued inclusion of a site where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

### Strategic Sites for Development

One, if not the, prime example of the above defects and contradictions is the over heavy focus on developments in the north east of the Borough, and most particularly the continued inclusion of the former Wisley airfield (FWA but known locally as Three Farms Meadows) as a strategic site for development when it is patently unsuited to such designation.

#### The FWA:

- (a) is at the epicentre of the Metropolitan Green Belt to the south west of London and should remain Green Belt.
- (b) contains and is bordered by the Thames Basin Heaths SPA and numerous SSCIs, etc;
- (c) is completely surrounded and constrained on the north by the A3 (one of the most congested A roads in the UK), and to the west, east and south by narrow, unlit, non-pavemented, twisting rural lanes (Ockham Road North, Old Lane and Ockham Lane) which can barely cope with local access needs;
- (d) is immediately adjacent to the A3/M25 junction (one of the most congested and polluted junctions in the UK);
- (e) has no existing infrastructure;
- (f) [has the area of only two average sized UK farms and] could only be developed as envisaged by the Updated Plan through extremely and totally inappropriate high density, high rise buildings, etc.
- (g) produces run off which floods the surrounding area;
- (h) is two miles from a rail line with small existing rail stations which are already at capacity in terms of car parking, near capacity in terms of existing passenger traffic, and over capacity with organic growth in the area, leaving aside proposed developments to the east, west, north and south of the line;
- (i) has no existing bus services which are in any event inhibited by the narrow and twisting roads.
- (j) is distant from existing centres of employment, services, schools, and shops;
- (k) is at the centre of Ockham Parish whose assets are small hamlets surrounded by open attractive country side, recreation opportunities, agriculture and rural pursuits, conservation areas, a cherished history and historic buildings;
- (l) could only be "sustainable" through major and unsustainable if not impractical development in the surrounding area - major additional roads, houses, schools, transport, public and private services, etc, - and the consequential absorption of further Green Belt and greenfield sites as well as the demolition of existing houses and other buildings to accommodate such facilities and access thereto. This fact seems to be gaining growing recognition in the Updated Plan which now envisages concepts such as "District" and "Local Centres", "Locally Significant Employment Sites" "Transport Hubs/Interchanges", etc - concepts which in this context appear to be simply euphemisms for development "creep".

In similar vein, it is noted that the Updated Plan now unacceptably and without explanation includes within the claimed strategic site for development a significant area of land to the south of the FWA directly bordering the Ockham Conservation Area but not owned by the developer applicant and not included in its latest Amended Planning Application.

I re-iterate that this plan is UNSOUND

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Please be advised that as a resident of Cobham I strongly object to the Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - The Former Wisley Airfield - for a new settlement with 2000 dwellings.

I fully support the all of the objections set out by Cobham Conservation & Heritage Trust, Cobham Green Belt Group and Cobham & Downside Residents Association. These organisations are well aware that all of the services in the Cobham area, especially health and education, are already overstretched by the demands created by the influx of new residents from the Greater London Area.

For the record, my personal objections are as follows:

- The removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
- No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
- The disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
- The threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.
- The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
- The potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
- The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupants at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
- Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).
- There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
- The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
- The issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.
- Insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.
• The above objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Dear Councillors

My mum and Dad have been talking a lot about the Local Plan and I wanted to say that I am also against a new town. My school is already overcrowded and no room for any more kids. The roads on the way to school are always traffic jammed.

It is wrong to build on Green Belt land it is meant for our future, not for developers to make quick money building as its cheaper than sites that have already been built on.

I object.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2477  Respondent: 15399425 / William Emerton  Agent:
I have read the documents dated 13th June 2016, and 4th July 2016, submitted to Planning Policy, Guildford Borough Council by East Horsley Parish Council (EHPC) setting out its objections to Proposed Submission Plan and Policy A35.

I support the views expressed by EHPC and object to both proposals on the same grounds. They do not need repetition.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Allocation A35 for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to: The assertion that the development will result in a meaningful shift to cycling and walking.

The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

The Village of Cobham attracts many visitors with its shops and restaurants and the most direct route from the area of Ockham is via Ockham Lane. This road was built for easy access to Cobham for use by the local residents, it is very narrow with no footpaths or cycling track and is only suitable for light traffic due to having very many bends and blind corners. It passes through Ratchford and a flood plain, it is very often closed due to flooding. The danger that any...
increase in traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them) has to be considered.

The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWAIT FM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I raise objection to the Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings as we use this Green Belt are extensively for recreation and appreciation of wildlife.

There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land and as such No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt so I OBJECT to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.

I OBJECT to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys, Effingham and Cobham. The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs, this in no way is acceptable.

The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions. Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable/unachievable/unreal. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).

The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used, this car park is also at full capacity as are the route through Cobham Village to get to the station. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

I Object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

I Object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

I reiterate the area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford and the roads, public transport in the area are not of a standard to accommodate the development.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/2499  **Respondent:** 15400609 / Brian Carte  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I am writing to object to the inclusion of the Former Wisley Airfield in your Borough plan.

Although I do not live in the borough I have lived in the area for over 40 years and have a great interest in the wider environment and how developments will impact on surrounding areas.

I see the proposal has no basis for inclusion when other brownfield sites can be identified, green belt should be preserved as a basis of preventing urban creep.

The surrounding areas, villages, roads, schools, countryside, will be swamped by such a development.

Residents in the area already suffer severe congestion on the local and national roads (A3 and M25). Air quality is already a major concern on many local roads being used by locals and those vehicles trying to avoid the aforementioned congestion.

The inclusion of this site is a little strange and surprising bearing in mind your own planning committees rejection of application no 15/P/00012 in April of this year.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/2514  **Respondent:** 15400769 / H L Cunnah  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

- **Local Road Networks -**

As mentioned above, the roads in the Horsleys struggle to cope with the volume of traffic that already exists. In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that "consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed". It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is inevitably true for the proposed developments in East and West Horsley as well.
- **Pollution**

  The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment - already a cause for concern in several areas in the Borough.

  **What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

"Objection to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings"

As someone who has lived in Surrey for many years I strongly object to the above plan. The proposed development is far too big and would have an enormous impact on the surrounding communities. In particular it would lead to greatly increased congestion unless extensive new roads were planned and they, in turn, would destroy the ambience of the vicinity. Many local services are already stretched and an increase in population of this scale would greatly aggravate matters.

I urge you to reject this application.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Objections to GBC Proposed Submission Local Plan

Although I live outside the Borough I keep my horse at stables in the Borough and visit regularly to go riding on the Bridleways across the Former Wisley Airfield and the surrounding areas in the Borough.

I OBJECT to the Proposed Submission Local Plan for many reasons and in particular for the following key reasons:

1. I object to the use of the Green Belt for over 70% of new The brownfield land in the urban areas should used for rebuilding.
2. I object to removing from the Green Belt the Former Wisley Airfield and neighbouring properties on its southern No exceptional circumstances have been established to justify removing the land from the Green Belt.
3. I object to the threat the Proposed Local Plan poses to the historic rural village of The urban 2,068 dwelling development is totally out of character with this village of 159 homes.
4. I object to the adverse impact on transport, local roads and road I specifically object to the increased volume of car traffic. The proposed development would result in around 4,000 additional cars on the roads. This will cause congestion on the narrow rural roads in Ockham and the surrounding areas. The danger from this traffic will be to cyclists and pedestrians, and particularly to horse riders. The increase in the already severe congestion on the A3 and M25
5. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area, the Sites of Special Scientific Interest and Special Nature Conservation
6. I object to the continued inclusion of a site where the planning application has already been unanimously rejected by GBC's Planning

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am disappointed that my previous objections to the draft local plan have not been reflected in the latest draft.

Please confirm that all of these comments together with all my previous comments are passed to the Inspector.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

1. No effort has been made to demonstrate exceptional circumstances for the removal of any land from the Green Belt. I object that the green belt has been preferred over brownfield land in the urban area without taking notice of the response to previous consultations.
2. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.
3. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.
4. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
5. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
6. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
7. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
8. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
9. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
10. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
11. It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
12. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design”
13. Opportunity (3) should be common to all sites and is not unique to this site
14. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.
15. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will increase the negative impact of the views from the AONB.
16. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
17. I object to the removal of additional 3.1 ha to be removed from the green belt without any justification.
18. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

19. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

20. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

21. I object to the fact that the council has failed to remove this site from the local plan despite receiving many thousands of objections from local residents and statutory consultees in two full consultations.

22. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

23. The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.

24. I object to the Council wasting taxpayers and residents’ time and money not following due process and in particular ignoring previous representations.

25. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

26. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

27. I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.

28. I object to the Housing number which is unsound and open to legal challenge.

29. I object to the disregard for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.

30. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

**Objections to Guildford Borough Council Proposed Submission Local Plan**

I OBJECT to the draft Submission Local Plan and the inclusion of the Former Wisley Airfield in the Plan for the following reasons:

- I object to a plan with 70% of new housing in the Green There is ample brownfield land in the urban areas of the Borough. That would reflect election promises to preserve the Green Belt.
- I object to the housing number of 693 houses per year; this estimate is far too high and is the result of hidden It cannot be justified.
- I object to the proposal to remove the Former Wisley Airfield (FWA) from the Green There are no exceptional circumstances to warrant removing the land from the Green Belt.
• I object to this urban 2,000 plus house development being placed in the historic rural village of 159 homes in
• I object to the impact on transport, local roads and road The proposed development would result in around
4,000 additional cars on the roads. This will increase the danger from traffic to horse riders, cyclists and
pedestrians on the narrow rural roads in Ockham and the surrounding area. It will increase in the already very
bad congestion on the A3 and M25.
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of
the site, in relation to the Thames Basin Heath Special Protection Area (SPA), the Sites of Special Scientific
Interest (SSSI) and Special Nature Conservation Interest (SNCI).
• I object to the threatened loss of high quality

The Former Wisley Airfield, site A35, should be removed from the Submission Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Objection to Guildford Borough Council Proposed Submission Local Plan**

I live outside the Borough and keep my two horses at stables in the Borough. I visit regularly to ride on the Bridleways across the Former Wisley Airfield and the surrounding areas.

I OBJECT to the Proposed Submission Local Plan for many reasons, particularly the following:
1. I object to the proposal to allocate so much new housing to the Green Belt; it should be put on the brownfield land in the urban areas of the Borough. That would reflect election promises to preserve the Green Belt.

2. I object to the housing number of 693 houses per year; this number appears to me to be far too high, particularly in the context of Brexit.

3. I object to the proposal to remove the Former Wisley Airfield from the Green Belt. There are no exceptional circumstances to warrant removing the land from the Green Belt. This area clearly fulfils an important objective of separating Ripley, Cobham, Woking and Horsley.

4. I object to this urban 2,000 house development would be totally out of place in the rural village of 159 homes in Ockham.

5. I object to the danger from its effects on transport, local roads and road safety. The proposed development would result in around 4,000 additional cars on the roads. This will increase the danger from traffic to horse riders on the narrow local roads in Ockham and the surrounding area and increase the already severe congestion on the A3 and M25. Cycling would be dangerous.

6. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area, and the Sites of Special Scientific Interest and Special Nature Conservation. Endangered ground nesting birds such as the Skylark and the Nightjar will be threatened by the development.

7. I object to the threatened loss of high quality farmland where crops have been grown for decades and probably for centuries.

8. I object to the continued inclusion of this site where a recent planning application has already been unanimously rejected by the Planning Committee.

I request that the Former Wisley Airfield, site A35, is removed from the Submission Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt. There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

I object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.

I object to the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside. The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs. Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.

I object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development. The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.

Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).

There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion. The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

I object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

I object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI). The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to object to the proposal to build on greenbelt land on the former Wisley Airfield.

Whilst I live outside the Guildford area I am very concerned at the impact it would have on the area:

Reasons for objections are:

I object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt. There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

I object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.

---

I OBJECT TO POLICY A35 (Wisley Airfield Development)

- Shouldn't be in the plan at all for the same reasons the Planning Committee rejected the identical proposal by Wisley Investment Properties

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 3% of the population of GBC).
5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces, where 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.'s (WPIL) planning application was unanimously rejected by GBC on 6th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I have previously written objecting to the development of the former Wisley Airfield for over 2000 houses. Still seeing this included in the plan again after it had been shown comprehensively not to be appropriate is ridiculous and should immediately be discarded from the plan.

It is appreciated that some new housing is required in the area but it would appear that the planned number of houses required is grossly inflated.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, 36% of the Plan's new housing is proposed in the northeast of the borough (x% of which is allocated to TFM), an area that at present has only 11% of existing housing.

5. I object to the loss of the historic rural village of Ockham. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five stories high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to assume a reduced reliance on private cars.
   2. The increased volume of cars: A proposed development of 2,068 homes would indicate an increase of approximately 4,000 additional cars on the roads.
   3. The impact this traffic will have on the narrow rural roads in Ockham and the surrounding areas, also including increased bus and lorry movements.
   4. The impact this traffic will have on local cyclists and pedestrians, due to the absence of any cycling paths and the lack of proper pedestrian footpaths (and the space to provide them).
   5. The impact on the already congested Strategic Road Network on the A3 and M25. A further planning application at RHS Wisley (with increased visitor traffic) and a proposed 600 pupil secondary school would add further congestion at the M25/A3 junction as well as local roads. Infrastructure enhancements to the A3 and M25 would have to be completed before any development commences. Highways England has stated that they have no plans to even consider improving the A3 before 2020.
   6. The lack of suitable public transport: The local rail stations of Effingham and West Horsley cannot cope with the proposed increase in passenger traffic.

- I object to the fact that insufficient consideration has been given to the site's value from an environmental and ecological standpoint, in relation to the Thames Basin Heath Special Protection Area (SPA), the Sites of Special Scientific Interest (SSSI) and Special Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction is in excess of EU permitted level. Additional traffic will exacerbate this situation, impacting the health of all current and future residents.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% both wish to see the historic features of the village maintained and to protect the village's green spaces, including the FWA/TFM.

- Lastly, I object to the continued inclusion of a site where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

8] Eighthly I object to the proposed development of the Wisley site and am astonished that GBC has even considered including the site in the Local Plan, especially since planning has already been refused. Whilst I agree that the Wisley developers have included much needed extra infrastructure, the whole plan completely fails on the traffic issue. Our local roads are already very congested and the roads around the M25 and A3 junctions are mostly chaotic. It would be absolute madness for GBC to consider this plan unless it was for a very small number of houses which did not create the risk of further traffic chaos. Under no circumstances can this site be considered without careful and close discussion with local Wisley and Ockham residents, in particular.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Dear Sirs  

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings  

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally, I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farm Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Dear Sirs

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car traffic proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no
funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC)

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary
school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport stations at Effingham is not suitable for the proposed traffic. The local rail station of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIl) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I would like to object to the proposed development of Wisley Airfield on the grounds that it should remain as a protected green belt area.

- there are insufficient services such as schools, shops and doctors surgeries for a development of its size.
- the impact of increased traffic on the surrounding country lanes and on the already dangerous confluence of the M25 and A3 should not be underestimated.
- lack of public transport, buses and trains and lack of commuter parking at existing stations.

I support the objection made by WAG as well as the objections made by Ockham/Ripley/East Horsley parish councils.

I object particularly to the loss of the publane footpath which cross the Wisley Airfiled, I played some part in getting the footpath instated and sedicated.

I object any plan which is dissected to violate the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties
  The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many
  listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five
  storeys high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is
     too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private
     cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000
     additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas,
     exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the
     lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning
     application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary
     school on the site would add additional congestion at the M25/A3 junction as well as local roads. No
     development can proceed without significant infrastructure enhancements to the A3 and M25. Partial
     improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
  6. The lack of suitable public The local rail stations of Effingham and Horsley cannot cope with the proposed
     increase in passenger traffic and car parking is already at capacity.
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of
  the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific
  Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the
  borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will
  exacerbate this situation, impacting the health of all current and future residents. No account is being taken of
  the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as
  evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in
  Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open
  spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces,
  including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows)
  - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of
  consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPI) planning
  application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning
  Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also
  been raised by a broad number of authoritative sources across the UK, including Highways England, Thames
  Water, NATS and the Environment Agency.
• I would point out that the number of new homes has been based on pre-Brexit projections for economic and
  population growth, including migration which now needs to be revised downwards, possibly quite seriously.
• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs
  and organic growth. The plan's commitment to build housing across the Guildford countryside will
  mean *either* major infrastructure investment, which no one will believe will happen and for which there are no
  funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication
  services.
• Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in
  absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these
  communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows),
Allocation A35, is removed from the Local Plan with immediate effect.

Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).  
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No
6. The lack of suitable public transportation. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to state my objection to the building of 2,000 new homes on the Former Wisley Airfield. The A3 is already under pressure from traffic with the interchange of the M25. I live in Cobham and use the A3 nearly daily, the increase of traffic over the last few years is disproportionate to the area. Access onto the A3 from Elm Lane off the airfield is very dangerous as is Old Lane, a potential increase of over 2,000 vehicles, even through Hatch End, Martyrs Green area, would impact greatly on Cobham, which is often at a standstill.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
In common with many residents I consider there to be sufficient brownfield sites and other avenues to accommodate reasonably affordable housing than to sacrifice greenbelt land and our children's future capacity to grow food.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M2S/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.

• Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.

• Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.
The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.
Objection to Guildford Borough Council Proposed Submission Local Plan

Although I live outside the Borough I am, and have been for many years, the tenant farmer at Bridge End Farm in the Borough. I visit every day the Former Wisley Airfield and the surrounding areas. I am disappointed that my previous objections to the draft local plan have not been reflected in the latest draft.

I OBJECT to the draft Submission Local Plan for many reasons, particularly the following:

• I object to the proposal to allocate so much new housing to the Green Belt; it should be put on the brownfield land in the urban areas of the
• I object to the housing number of 693 houses per year; this number appears to me to be far too high, particularly in the context of Brexit
• I object to the proposal to remove the Former Wisley Airfield (FWA) from the Green Belt. This area clearly fulfils an important objective of separating Ripley, Cobham, Woking and Horsley.
• I object that this urban 2,000-house development would be totally out of place in the rural environment of Ockham.
• I object to the danger from its effects on transport, local roads and road safety. The proposed remote development of 2,000 homes would result in around 4,000 additional cars on the roads, with residents having to drive to work and drive children to school. I am obliged to drive my large tractors on the narrow local roads in Ockham and the surrounding area as well as on the A3. More cars would increase congestion on the local roads and the A3. Cycling would be dangerous.
• I object to the threatened loss of high quality farmland, including 4ha classified as Best and Most Versatile land where crops have been grown for decades and probably for centuries.
• I object to the continued inclusion of this site where the Planning Committee has already unanimously rejected a recent planning application.

I request that the Former Wisley Airfield, site A35, is removed from the Submission Local Plan and the land kept as Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objection to Guildford Borough Council Proposed Submission Local Plan

Although I live in New Malden I drive regularly to visit friends and take my daughter to where she keeps her horse in the Borough.

I OBJECT to the Proposed Submission Local Plan and the inclusion in the Plan as a potential site for development of the Former Wisley Airfield for the following reasons:

1. I object to the proposal to take so much land out of the Green Belt which should be preserved for future generations; new housing should be put on the brownfield land in the urban areas of the
2. I object to the housing number of 693 every year; it is too high. I object that the public has not been told any details of how this figure was determined. It should be reviewed independently, additionally to reflect to impact of Brexit which is likely to reduce the number of foreign students wanting to come to this country.
3. I object to the proposal to remove the Former Wisley Airfield from the Green Belt; it separates Ripley from
4. I object to the urban 2,000 house development being placed in the historic rural village of 159 homes in
5. I object to more development which would have an impact on transport, local roads and road safety. The narrow rural roads in Ockham and the surrounding area cannot cope with the extra traffic, which would increase the already severe congestion on the
6. I object to the proposal that encourages many more cars causing further deterioration in air quality when the A3 and M25 are already in breach of regulations; the acid deposition on the nearby SPA is also in breach of
7. I object to the continued inclusion of this site A35 where a recent planning application has already been unanimously rejected by the Planning Committee.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objections to the draft local plan

I object to the development at Wisley on the grounds that the development is huge (higher than an urban one) resulting in vast numbers of additional cars which the roads are completely unable to cope with.

I support the objection made by the parish councils of Ripley, the Horsleys, Ockham on the grounds that the government (and local councillors) pledged to protect the green belt.

I object to the Local Plan as it would encourage Urban sprawl linking the villages eventually with Woking.

I object to the development on Long Reach. It is not a "suitable alternative" although it definitely is a "Natural Greenspace" and as such any development would wreck the countryside which separates the villages of Ripley, the Horsleys and Ockham.

I sometimes wonder if the planners who come up with this local plan actually travel on local roads or do they simply look at a map and see a road.

The roads in this area (Ripley/ Send/ Horsleys/ Ockham/ Pyrford) are COMPLETELY UNSUITE to a huge increse in traffic and the whole area (THE COUNTRYSIDE) does not deserve the added polution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2776   Respondent: 15423169 / W.F. Sennett   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Although I do not live in the Guildford Borough, I live much closer to the above undesirable proposed development than many others who do.

I particularly object to the Wisley site being removed from the Green Belt. This would run counter to the whole purpose of the Green Belt in preventing urban development which could ultimately see Guildford subsumed into the mass of London - there are no special circumstances that would justify this. I object also to the proposed increase in housing in
Ockham, Ripley, the Horsleys and Effingham for the same reason and also because this would change the whole character of the area very much for the worse.

There would be many other harmful side effects but particularly the impact on local roads, especially the A3, and services of the increase in population. Congestion is already quite severe and the regular presence of a further 4,000 (at least) cars plus service vehicles could lead to gridlock in a number of places and there would be a serious deterioration in air quality.

Little consideration seems to have been given to the environmental and ecological value of the site and the surrounding area.

There is plenty of brownfield land that could be developed without the need to threaten the Green Belt and I hope that the council will reconsider.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

We object to site A35, Former Wisley Airfield, as the overall area of the site has increased to 95.9 ha, which implies loss of more open countryside to development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPS16/2805  **Respondent:** 15426017 / Heather Harrison-Tams  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

1. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
2. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
3. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
4. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield,- now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) -

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsley’s (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storey’s high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road networks I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
1. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

1. The increased volume of car traffic. A proposed development of 2,008 homes would result in an estimated 4,000 additional cars on the roads
2. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
3. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
4. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil
secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

5. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradati
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure development.
enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Cobham & Downside Residents’ Association object to the above draft Local Plan on the following grounds:

- The removal of the former Wisley Airfield from the Green Belt – the Green Belt prevents the urban sprawl and no exceptional circumstances have been established to warrant such a removal.

- There is ample brownfield land in urban areas which need to be regenerated.

- There would be a disproportionate allocation of a proposed increase in housing to the settlements of Ockham, Hatchford and Downside.

- Harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs to service the development.
• The assertion that the development would result in a considerable increase in cycling and walking is astonishing. There is insufficient space to provide cycle lanes/footpaths and those attempting to cycle or walk could be put at risk

• There would be an increase in the already severe congestion on the A3 and M25 and the junctions of those major roads as well as local roads

• The lack of suitable public transport

• Air quality has not been given serious consideration. Air pollution in this area already exceeds DEU-permitted levels, affecting adversely the health of current and future residents

• Objections are supported by the unanimous rejection of Application No 15/P/00012 by the Planning Department of Guildford Borough Council on 8 April 2016

The reasons for not removing the former Wisley Airport from the Green Belt are overwhelming and it is very much hoped that the Consultation will result in the Green Belt status being retained.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2853  Respondent: 15427649 / Alan Martin  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Although I am not a resident of Guildford Borough Council, as a resident of Cobham (Elmbridge) I would be adversely affected if the above Plan were to be approved, bearing in mind the proximity of the former Wisley airfield to Cobham. I request you to reject the Plan, in particular for the following reasons:

1. The area of the former Wisley airfield serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
2. No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
3. There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
4. There would be a disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
5. My home town of Cobham is the closest shopping area to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic.
6. There is a lack of public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
7. Protected species on and near the site and wildlife corridors would be destroyed.
8. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.
I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the Plan. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

1. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

2. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

3. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

4. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

1. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of
the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific
Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the
borough, and particularly at the M25/A3 junction, is in excess of EU permitted level Additional traffic will
exacerbate this situation, impacting the health of all current and future residents. No account is being taken of
the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as
evidenced through the Ockham Parish Pl The top two responses as to why local residents enjoy life in Ockham
are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over
90% wish to see both the historic features of the village maintained and the village's green spaces, including the
FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield,- now known as Three Farm Meadows)
- where the planning application has already been unanimously rejected by GBC's Planning

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.’s (WPIL)
planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning
Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK,

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows),
Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2879  Respondent: 15428097 / Bridget McClellan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

2. THREE FARMS MEADOWS SITE (Wisley Airfield) Policy A35
I STRONGLY OBJECT to the location of a new town with some 2000 new houses in the middle of the greenbelt in the
middle of nowhere. This planning application was unanimously rejected by the GBC planning committee recently on 14
separate grounds. The site is located miles away from any public transport, is on a site that floods regularly and is
surrounded by narrow, muddy, winding, unlit country lanes. The addition of at least 4000 cars will cause a constant
gridlock throughout the area. An assumption that residents will walk or cycle to reach amenities is completely unrealistic.
An infirm pensioner cannot be asked to walk along these narrow lanes to the doctor and to expect them to cycle would be
unacceptable. There is no employment nearby which would result in a huge growth of commuter traffic on the A3 and
nearby country lanes causing more pollution and traffic jams; commuter trains are already standing room only and this
new town would increase the number of commuters and cause chaos on a daily basis.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

  1. The lack of suitable public transport stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted level. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide-open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Although I do not live in the Guildford Borough, I live much closer to the above undesirable proposed development than many others who do.

I particularly object to the Wisley site being removed from the Green Belt. This would run counter to the whole purpose of the Green Belt in preventing urban development which could ultimately see Guildford subsumed into the mass of London - there are no special circumstances that would justify this. I object also to the proposed increase in housing in Ockham, Ripley, the Horsleys and Effingham for the same reason and also because this would change the whole character of the area very much for the worse.

There would be many other harmful side effects but particularly the impact on local roads, especially the A3, and services of the increase in population. Congestion is already quite severe and the regular presence of a further 4,000 (at least) cars plus service vehicles could lead to gridlock in a number of places and there would be a serious deterioration in air quality.

Little consideration seems to have been given to the environmental and ecological value of the site and the surrounding area.

There is plenty of brownfield land that could be developed without the need to threaten the Green Belt and I hope that the council will reconsider

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

*I draw your attention to the speech made by the new Prime Minister of the UK Theresa May in her inaugural speech where she said when questioned on fulfilling the need for more house building:
I AM NOT TALKING ABOUT BUILDING IN THE GREEN BELT.

THE GREEN BELT IS VERY IMPORTANT

Theresa May spoke further about the need to plan “MORE CLEVERLY”.

Building on the Green belt is not “Clever”, therefore:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3003  Respondent: 15430849 / Christopher Campbell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Council. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
4. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object because Wisley airfield is greenbelt land, there are plenty of brown belt sites that could be developed, it would be completely wrong to develop this area of outstanding natural beauty, it will be greatly detrimental to the wildlife there, the narrow rural lanes are not suitable for the large increase of traffic and the congestion it will cause and there will be an increase in air pollution, it will be shameful if Guildford borough council allow this development to go through for the reasons above and for the people living in the area, I don't live by the area but I go to the area often and know people in the area and it's shocking to think this lovely area could be destroyed by development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2983  Respondent: 15432705 / Gordon Bennett  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Draft Local Plan for the following reasons.

(1) I object to the plan as the site is remote and occupants will rely on the use of the private motor car adding to traffic congestion on both the Strategic Route Network (the A3 and the M25) and local roads which already running over capacity.

(2) I object as the application relies on people switching to walking, cycling and public transport. This is unrealistic as it is two miles to the nearest railway station and at least half the route has no footpath. Roads are narrow and unlit, and there is no spare parking capacity at either of the local stations.

(3) I object because a site of this size are required to provide outdoor open space. The applicant has not complied with this requirement but rather has “double counted” the outdoor space with that required for SANGS.

(4) I object to the loss of high quality agricultural land is in contravention of policy.

(5) I object on the grounds of Air quality. The air quality figures are based on an unreliable transport assessment and therefore should not be used in evidence.

(6) I object as there is documentary evidence that the applicant has not used the DEFRA modelling statistics as required and rather appears used numbers from an unrecognised (and unreliable source).

(7) I object as a person who has COPD to the poor air quality which will be exacerbated in the area by such a development. Young and Old are extremely susceptible to poor air quality.

- It is clear that air quality is deteriorating largely due to the emissions from the traffic, I believe that the impact of poor air quality on the internationally famous RHS Gardens at Wisley and the Thames Basin Heath Special Protection Area is already in excess of legal limits.

(8) I object because in my opinion the transport assessment makes a number of ridiculous assumptions and is not credible. It is completely unrealistic to assume that there will be a decrease in vehicle movements after completion of this development, and there will no impact on traffic for the recently added secondary school, nor from the fact that prior to the school being built the children living on site will have to be transported to the nearest available school in Leatherhead.
– adding to congestion and pollution, and there will be no impact shown for the 270 daily bus movements which will impact local roads further, or for the waste lorries or HGV deliveries to the site.

The traffic counts bear no relation whatsoever with counts submitted to Guildford or to Woking borough councils in support of other large development projects.

(9) I object because the number of daily trips is understated in the region of 1000 vehicle movements. Additional traffic will have a negative impact and cause irreparable damage to historic houses and other buildings in Ockham, Ripley, and Downside and further afield. If allowed, the impact of the additional traffic may prohibit other developments further south on the A3 or indeed those planned by the RHS.

(10) I object because the site is in the Green Belt in a rural location, hemmed in by the A3 to the west, the Special Protection Area and the M25 to the north and the Conservation area of Ockham Village to the south. Green Belt boundaries can only be changed in the local plan process and in exceptional circumstances. The applicant has not demonstrated that exceptional circumstances exist.

(11) I object because the four and five storey buildings are not appropriate in the rural environment. Residents will be crammed in with little outdoor space, in a noisy location with very poor air quality.

(12) I object to the proposed closure of local road, coupled with the massive increases in traffic, will effect us & a large number of other road users from Cranleigh to Cobham and everywhere else in between. We regularly have to use Ockham Lane to avoid the chaos on the A3 when picking up our Grandchildren from school in Cobham.

Further, Ripley- The traffic data suggests fewer vehicles (15-28% less than today) on Portsmouth Road/High Street and Newark Lane. This information is flawed. We are daily subjected to queuing traffic on the Portsmouth Road, and as senior citizens have given up in crossing this road to take our walk through to Polesden sailing club.

More traffic queuing in Ripley High Street will increase levels of NOx and NO2 pollution, possibly beyond EU limits.

- Additional traffic accessing the A3 will lead to longer journey times and additional driver stress. - The closure of Ockham Lane to vehicles will result in your separation from schools, doctors surgery etc. resulting in longer journey times and delay (via Old Lane/Forest Road or Old Lane/through the development, Ockham Road North to Horsley) More noise and dust pollution through the 12 year build resulting in loss of amenity- Loss of country footpaths and bridleways which become rights of way through a densely populated settlement.

-- Traffic assessment does not include the A245 or Painshill junction despite the fact that it is likely that these roads will carry significant additional traffic.

We already have had to choose to curtail early appointments at the Village Surgery Send, because of the traffic build up at the Burntcommon Roundabout.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the large proposed development of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm, because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads, including Send.

I OBJECT to the fact that the Local Plan takes no account of Schools, Doctors surgeries and roads that are already operating at full capacity.

Objections to the continued inclusion in the Guildford Borough Council Proposed Local Plan (June 2016) of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the inclusion of FWA/TFM in the draft Local Plan for the following key reasons: 1) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. FWA/TFM is prime green belt, and was given to the country for an airfield as part of the war effort, based on the promise that the land would be returned to the community after the need for an airfield had passed. This promise has been broken, and no effort has been made to see whether there is a moral or equitable duty to return this land to the existing community.

- I object to the disproportionate allocation of housing in this particular part of the Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham (of which I am the Rector) and the blight on properties th The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walki The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public The local rail stations of Effingham Junction and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted level Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. In particular, two schools should not be planned in the FWA/TFM area which is known to have poor air quality, which will only be exacerbated by the planned development.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee . After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 3th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this I Those reasons remain valid, and there are no adequate ways to overcome them.

• Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• There can be no certainty about whether the site can ever be developed and even on the best scenario commencement of development is certain to be many years hence. The location and sustainability of the site are both questionable.

**Comment ID:** PSLPS16/3005  **Respondent:** 15433665 / Andrew Holley  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Ockham.** As someone who worked for 20 years in museums and the historic environment, I am particularly concerned about the threat posed by the Local Plan to the rural village of Ockham, which has many fine listed historic buildings including the Grade I listed All Saints Church. The Plan calls for a small village of 159 residences with a low level of public amenities to be subsumed into a development including over 2,000 dwellings. In addition, many of the proposed buildings are high density dwellings up to five stories high, making them completely inappropriate for a rural area such as Ockham and its environs.

I hope that these objections will be fully considered by the Council and that the former Wisley Airfield (Three Farms Meadows), Allocation A35, will be removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Former Wisley Airfield/Three Farms Meadow.** I believe that the FWA/TFM should not be removed from the Green Belt. The site should be protected in order to prevent further urban sprawl from London. It is also a valuable leisure resource for local people and visitors. The local wildlife also needs to be protected from development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**
Objections to the continued inclusion in the Guildford Borough Council Proposed Local Plan (June 2016) of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation 35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the inclusion of FWA/TFM in the draft Local Plan for the following key reasons: 1) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt.

The site serves a vital role in protecting against urban sprawl from London.

Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. FWA/TFM is prime green belt, and was given to the country for an airfield as part of the war effort, based on the promise that the land would be returned to the community after the need for an airfield had passed. This promise has been broken, and no effort has been made to see whether there is a moral or equitable duty to return this land to the existing community.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsley's (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car traffic resulted in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham Junction and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

6. S) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. In particular, two schools should not be planned in the FWA/TFM area which is known to have poor air quality, which will only be exacerbated by the planned development.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in
Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Those reasons remain valid, and there are no adequate ways to overcome them.

- Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/5165  Respondent: 15433697 / Beniah Grear  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

16. I object to the removal of additional 3.1 ha from the green belt without any justification.

17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development.

I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. Indeed, in ordinary words and common language, I believe that this draft local plan, and these revisions, in totality, but in particular relating to Three Farm Meadows are “bonkers”!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

1. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

2. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will
exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

3. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. **What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
The impact of over 2000 houses in the Wisley/Ockham area would have a huge impact on the Horsleys. Just 2 miles away and with a local railway station with easy access to London raises unimaginable, additional, traffic problems in an already very congested village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• Connection to the trunk roads of the A3 and M25 can only be via the roundabout at the North end of Ripley which is already a seriously difficult access going north. Going South would have to pass through the village of Ripley which is already congested at busy times.
• Air quality is already poor here because of the proximity to the A3/M25 junction. Major development here and especially the increase in traffic would make it worse.
• There is much wildlife on the site and surrounding area, some of it endangered, it would be seriously impacted by a major development at this site

Guildford Borough Council recently rejected planning application 15/P/00012 for two thousand houses on this site for the above reasons and the resultant report spells them out.

Please amend the plan to keep Wisley Airfield as part of the green belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Fields are available to help people to have access to healthy open spaces - this is helpful in terms of children’s development and mental health improvement for people of all ages.

The proposed plan is too large and should concentrate on Brown Field sites such as the Wisley Airfield at Ockham which is a concrete/tarmac jungle with noise from the A3. This could be made into a proper village with facilities for families, single people, the elderly and social housing and also a traveller site. Unlike the plan for the rest of the villages where landowners will not take into account with developers on enhancing people’s lives.

Some development is necessary but not in this scale and taking over the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object very strongly to the revised draft local plan to develop in the Ockham/Horsleys area. The impact of siting a new residential development of over 2000 households at Ockham so close to the villages of East and West Horsley would be tremendous, the extra traffic alone on the local roads is inconceivable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We object most strongly to the above proposal. Although we are not living in the borough of Guildford, Cobham be
affected by such a development as we believe the traffic on the A3 would be absolutely horrific if the proposal should go
ahead. The slip road off of the A3 to Cobham is already a nightmare every morning, and we dread to think of the impact
such a large development would make.

Parking is also a major problem in Cobham at the moment, and this would become intolerable with so many more houses
in the area.

We trust that the Council will reject this most inappropriate scheme.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Compliant? ( )

I object to site allocations A35 Wisley Airfield, A43 Garlick's Arch and A58 Land around Burnt Common as the
scheduled delivery of the important local transport infrastructure developments is unjustifiably late in the process, eg:
- A43 Garlick's Arch is stated to be available in the first five years of the plan with 400 homes (0) and 6 Travelling
  Showpeople plots proposed: "There is no available alternative site that can provide Travelling Showpeople plots in the
  first five years of the plan to meet need", 2017 Sustainability Appraisal.
- A58 Land around Burnt Common warehouse, London Road, Send: Land Availability Assessment (2017 Addendum)
  page 15: "There is a realistic prospect that development will be delivered within the first five years of the Local
  Plan"; page 16 "Timescale 0-5 years".
- SRN 9 and SRN 10, new A3/A247 junctions are stated to be scheduled during the period 2021 to 2027. (Guildford

LRN7 Interventions to address potential highway performance issues resulting from the development at former Wisley
Airfield site, including various mitigation schemes to address issues affecting Ripley High Street, A3 Ockham
Interchange and M25/A3 Junction 10, are stated to be scheduled for likely delivery during the period 2021 to 2033.
(Guildford Borough Transport Strategy 2017 page 23). It seems ridiculous that the Local Plan is based on developments
A43 and A58 taking place or at least begun BEFORE the required improvements to major local transport networks.
Unless the major road network improvements take place before the site developments, the Ripley/Send Marsh/
Burntcommon/Send/Clandon area will be subject to severe traffic congestion arising from the site developments
with very limited access for the vast number of heavy vehicle journeys that will be required which will cause an absolute
nightmare for traffic in these villages. It will make Portsmouth Road even more dangerous than it is already at its
various junctions.

The addition of new A3/A247 junctions (A43a; SRN9, SRN10) will not help the area of these villages as it will
encourage far more traffic to join/leave from the A3 via the A247 meaning much more traffic through Clandon, with its
very narrow bends on the A247, and Send in particular, the latter making it more dangerous for pupils, parents and staff
at Send Primary School and also more dangerous for both patients and staff at The Villages Medical Centre, as well as
local residents and businesses in Send.

Although the draft Local Plan includes reference to the Highways England (HE) Proposed M25/A3 Junction 10
improvement it takes no account of the HE attention to close off access from the A3 northbound onto Wisley Lane, which
includes access to RHS Wisley. The HE plan is to only have access to Wisley Lane from a slip road running parallel to
A3 northbound, its only access being from the Ockham Interchange (Ockham/Ripley roundabout) which will only be
accessible from the southbound A3, with NO ACCESS FROM THE NORTHBOUND A3. Although HE say that there
will be signs on the northbound A3 advising drivers to go to the M25 junction roundabout, turn around and leave the A3 southbound at Ockham Interchange for Wisley/RHS Wisley, human nature being what it is most such drivers will leave the A3 northbound at London Road B2215 and drive through Burnt Common, Send Marsh and Ripley to get to Ockham Interchange for access to RHS Wisley. So every time an event takes place at RHS Wisley we can expect even worse traffic congestion through Burnt Common, Send Marsh and Ripley which makes the building of 400 homes at Garlick's Arch on Portsmouth Road even less appropriate, and Travelling Showpeople with heavy vehicles for fairground equipment an even bigger mistake. A43 Garlick's Arch should be removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Document page number
2157
I object to the development of site A35 near Wisley because:

- Of all the reasons raised during the recent planning application process and are too numerous to list but include building on the greenbelt, size, lack of facilities and traffic issues.
- The Council should not be revisiting issues already dealt with in detail by the planning process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3244  Respondent: 15442977 / Laura Robinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

I object to the above planning for the following reasons:

- Object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
- The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
- No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
- It's a disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
- Object to the threat of the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.
- The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
- Object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
- The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could...
not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.

- Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).

- There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.

- Object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

- Object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted

I object to Wisley air field being developed with over 2000 new homes. It is too many in a very small village of outstanding natural beauty and green belt.

I object to housing as the roads surrounding Ockham are narrow and already have too much traffic cutting through grin the A3 & M25 junction 10.

I object also as there are no secondary schools that could cater for more children than it already does and certainly not hundreds as it could be. It is extremely difficult to get into- The Howard of Effingham, the nearest to Ockham.

I am a regular visitor to the village where I have parents living there, I hope this is stopped.

10) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open space. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

11) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

5. Shortly before this Local Plan was published Guildford Borough Council totally rejected the application to redevelop Wisley Airfield, yet here it is again. The current proposal would destroy the village of Ockham. In effect the proposal is for a New Town with houses and blocks of flats packed close together on a density scale more appropriate to an inner London borough and the site is largely Green Belt. This development would increase the number of vehicles needing to park at Horsley Station and Effingham Junction which are already full to capacity most days.

I OBJECT to the intense use of this largely Green Belt land for housing units, the insetting of the

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **Sound?** ( ), **is Legally Compliant?** ( )

I am writing to state my objection to the removal of the former Wisley airfield site from the green belt.

Although I live in Cobham I commute to Ockham on a daily basis for work.

The local roads and lanes could not cope with the proposed increase in traffic, let alone the A3 and M25 which is already gridlocked on a daily basis.

2000 homes in such a rural area would also have a devastating impact on local residents.

The nearest shopping to the proposed development is in Cobham which has local parking issues and a further possible 4000 vehicles added to this would on result in chaos.

There are also areas of SSI surrounding the site which would be hugely impacted by the increase of family pets from such a number of houses. [cats and dogs etc]

There must be a number of Brownfield sites in and around Guildford that should be considered for development before destroying our precious Greenbelt that once gone can never be replaced.

It would also increase the tendency for urban sprawl. How long before Surrey becomes part of London?

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **Sound?** ( ), **is Legally Compliant?** ( )
I object to the removal of the former Wisley Airfield from the Green Belt. The site is important in protecting against urban sprawl from London and if built on, will mean an urban corridor from London to Guildford. There are no circumstances whatsoever that warrant removing this land from the Metropolitan Green Belt.

I object to the continued inclusion of the side known as Three Farm Meadows when the planning application has been unanimously rejected by Guildford Borough Council's planning committee. Serious concerns about the site have also been raised by authoritative sources across the UK including Highways England, Thames Water, NATS and the Environment Agency.

I trust these objections will be fully considered and the former Wisley Airfield (Three Farms Meadows) Allocation A35 is removed from Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):

- Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
- Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
- Unacceptable Conservative Party links between the developers and the Council.
- No Green Belt “exceptional circumstances” presented.
- Not a brownfield site as stated – only 15% of it.
- Proposed SCC waste site ignored.
- Loss of farming land.
- Too near RHS Wisley and Thames Basin Heath SPA.
- SANG would harm on SPA.
- Unacceptable increase in air pollution.
- No existing public transport and stations miles away.
- No proper traffic data.
- Housing density far too great.
- Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
- Access confined to inadequate narrow lanes.
- Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
- Major impact on neighbouring villages, especially Horsleys.
- No assessment made of collective impact on area of this and 6 Horsley sites.

I would like to object to the Guildford Borough Plan on the following points:

- I am against the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
- No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
- I am against the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
- I object to the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.
- The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000+ dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
- I object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
- The increased traffic if the proposal is implemented will cause serious congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development and will not be able cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
- Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).
- There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
- There is no suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used but the car park there is already full. The use of Cobham or stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
- I object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.
- I object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.
- Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

The existing local services such as foul and surface water drainage cannot cope with such a major addition without resulting in increased flood risk.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), Hatch Lane Ockham, GU23 6NU now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwelling

I write to strongly object to the inclusion of TFM in the current draft Local Plan for the following reasons:

1. I object because the impact on the local greenbelt area will be unacceptable and it seems that the applicants have shown a total disregard for those residents that have been living here for many years. It beggars belief that the TFM developer’s plans include the closure of several of our local roads forcing us to take detours of several miles to get to our destinations.

2. I object because it is a fact that there is currently severe congestion on the major roads in the area yet this plan would bring an addition of well over 4,000 extra cars for the houses alone plus all the extra cars bringing the school students to the proposed school.

3. I object because the suggestion that people in the area should stop using their cars in favour of walking or cycling is ludicrous. There are no footpaths on these unlit country lanes, no cycle tracks and with the speed at which traffic leaves the adjacent A3 and races down Old Lane no-one in their right mind would risk their life on either mode of travel. Road public transport doesn’t exist in the area.

4. I object because the roads are not coping with the current through traffic and neither are the road surfaces with many potholes and dangerously deep gullies alongside the carriageways and they regularly flooded. I wrote to the council about two roads (Plough Lane and Horsley Road) that are frequently flooded but was told there is no funding in the budget to resolve the situation. Incidentally the flooding was not as a result of the river breaking its banks as the council claimed but by the excess water coming off the surrounding fields which should be controlled by ditches.

5. I object because of the increased number of commuters this will bring to an area where rail public transport is already completely overstretched. How would the two local stations cope with the increased commuter traffic let alone the road council lanes? The distance from the TFM development would necessitate the use of a car. The Railway stations of Effingham and East Horsley are well over a mile from this site and neither of them have spare parking capacity.

6. I object because of the effect resulting from the increased sewerage output that will be caused. How will the water supply cope with the demand? Thames Water have concerns with the limited capacity.

7. I object because of the claim that housing shortage is a reason for the TFM development but there are plenty of alternative sites to resolve this situation. This site was not listed for development under the 2003 Local Plan probably because there is not enough land to provide a sustainable community based on GBC’s own parameters. There are still no “very special or exceptional circumstances” to have added this site to the Local Plan.

8. I object because the TFM developers have decided to include a secondary school in their plans having woken up to the fact that the existing schools would not be able to cope with the additional school age inhabitants. The nearest school, the Howard of Effingham is already extremely over-subscribed. I therefore object because if it is eventually built this new school would attract pupils from the surrounding area thus increasing the traffic congestion in the area even further.

9. I object because of the fact that when the airfield was requisitioned in wartime when an undertaking was made to return it to agricultural use, removing the buildings (which was done) and removing the runway which should have been done because this is a green belt area. TFM developer’s description of the site as brownfield is a gross over-simplification. 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remaining runway, perversely a habitat for rare flora and fauna, (14ha) has never had any buildings on it. The remainder of the site (55%) is high quality agricultural land.

10. I object because the detrimental impact on the wildlife in this area of the green belt seems to have been totally dismissed as irrelevant. Creating a triangle with two seriously main roads and this band of densely packed houses leaves little room for the wildlife with perils on all sides.

11. I object to the fact that for those of us living in Ockham and the surrounding area would suffer the extreme detriment to the air quality and the visual and aural amenities of the area plus have to put up with the resulting destruction to the environment. The homeowners around Ockham and Horsley will have their life completely blighted by this new town as will the wild life.
12. Finally I strongly support the principle that the countryside should be protected from landowners whose only wish is to line their pockets which seems to me the main reason behind including this development in the draft Local Plan.

I thank you for taking the time to read my objections and for taking them into consideration when finalising the new Local Plan. I truly hope you will agree that the former Wisley Airfield site aka Three Farms Meadows (TFM) should very definitely be removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3404  Respondent: 15449601 / Brian Cochrane  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I live outside the borough but I have a greater interest in what goes into the Guildford Local Plan for the local area than those living on the far side of the borough for the following reasons:

- The removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
- No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
- The disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
- The threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.
- The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
- The potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
- The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
- Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).
- There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
- The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application...
there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

- The issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.
- Little consideration is being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. This is of particular concern as I have young children and walking to school is already a difficult task as cars are so fast along the road into the village. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. As mentioned above the traffic is a particular concern to me.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Although I live in Stoke D’Abermon which is in Elmbridge, I have known the area of Ockham and Wisley all my life and view with great apprehension the plans for putting some 2,000 homes on Wisley Airfield. There are ample brownfield sites in urban areas which are more suitable for development and which would be more sensible as these would be near to railway stations and bus routes. Wisley and Ockham are small villages and those who need to travel to London would have to use East Horsley, Effingham Junction or Cobham stations which would lead to considerable parking problems. These railway car parks are already overcrowded with parking in neighbouring roads which leads to traffic congestion. The development at Wisley would make matters much worse.

The nearest shopping centre with supermarkets, banks, restaurants etc. is Cobham. This is already a very busy town with severe parking problems and heavy traffic passing through all the time linking places like Walton and Weybridge on one side to Epsom, Leatherhead and Dorking on the other. More congestion and pollution problems.

If you have a new community with 2,000 homes, there are bound to be households with 4,000 cars. The husband needs one to get to his place of work or to drive to the most convenient railway station; the wife needs one for shopping and taking the children to school (if they can find places that is), with the result that 4,000 cars a day will want to join the A3 near to the junction with the M25. Imagine the accidents that will occur as drivers get impatient with all the overcrowding. On the other side, there are only traditional country lanes which could not possibly cope with an excess of traffic.

Air pollution will get worse especially in the morning and evening with people leaving for work and returning at the end of the day. Pollution there already exceeds permitted levels and the development of Wisley Airfield will make matters worse. I do hope that this scheme is finally rejected and that the airfield is returned for agricultural purposes which was its original function, and as we may have to produce more home grown food in the years ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. A35

I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35 in the draft Local Plan for the following:

1. It is the least sustainable strategic site identified because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to Junction 10 (M25) one of the most congested junctions in the country.
4. Local roads are at capacity, particularly when the SRN is not free-flowing due to accidents, diversions, roadworks etc.
5. Any public transport provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
6. There is insufficient employment available onsite and almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk or cycle on narrow unlit local roads on a regular basis.
7. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultees.
8. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints (notably the provision of sewerage capacity).
9. I object to the Council wasting tax payers and residents’ time and money and not following due process, and indeed ignoring previous representations.

For the reasons above and numerous other reasons, this plan is unsound and not fit for purpose.

Dear Sir, I am writing to object to the building of 2000 houses on the Wisley Airfield. My objections are the following: 1. Urban style houses with some 5 storeys high. 2. Another estimated 4000 cars. 3. Increase in pollution. 4. Severe congestion on already congested local and on the A3 and M25. 5. Environmental damage to an area full of already endangered wildlife.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the development of the former Wisley Airfield. It looks like a nice and easy way to create more homes, but without taking into account the effect on the current community. The plan looks at a 20 year building development, with terrible consequences such as with a huge increase in road traffic on already busy roads. Why does this proposal keep being added back to plan, when it has already been heavily criticised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

I object to Wisley air field being developed with over 2000 new homes. It is too many in a very small village of outstanding natural beauty and green belt. I object to housing as the roads surrounding Ockham are narrow and already have too much traffic cutting through from the A3 & M25 junction 10. I object as there are no secondary schools that could cater for more children than it already does and certainly not hundreds as it could belt is extremely difficult to get into- The Howard of Effingham, the nearest school to the village.

I am a regular visitor to the village where I have grandparents living there, I hope this is stopped.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. The inclusion of 2100 homes on this site would present an unbearable strain on the existing infrastructure and completely alter the nature of the surrounding villages.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans. I doubt that any of these homes will be truly affordable to local residents like myself and will lead to a further influx from surrounding areas and thus not meet the requirements of the local population.
- I object to the disproportionate allocation of housing in this particular part of the borough. 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC.
- I object to the threat the Local Plan poses to the historic rural village of Ockham. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. This will cause an increased volume of car traffic on roads which are already congested. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas will have a significant impact on the quality of life for existing and future residents.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath's Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heath's SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. **What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/3665  **Respondent:** 15456641 / Ross Studholme  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

- I object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
- No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
- I object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
- The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
- I object to the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.
- The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
- I object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
- The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
- Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is not plausible. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).
- There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
- I object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. The inclusion of 2100 homes on this site would present an unbearable strain on the existing infrastructure and completely alter the nature of the surrounding villages.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans. I doubt that any of these homes will be truly affordable to local residents and will lead to a further influx from surrounding areas and thus not meet the requirements of the local population.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. At present cyclists are already endangered by the number and speed of cars passing through the area and this will do nothing to improve the situation.
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads which are already congested. At present the roads are in a terrible state with numerous pot holes and the council seems to do little to maintain them.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. In addition the council seems to show no support for measures to reduce traffic on the roads such as the provision of school buses which were once in place but have now been terminated.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farms Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
A35

Wisley:

I object to the Wisley site selection and approximately 2000 units proposed for the former Wisley Airfield. It is an over-development of the site and an over-development of the local area which will adversely affect already heavily congested local roads and puts strains on public transport infrastructure and local services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/336  Respondent: 15457953 / Ian Symes  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

3.1 Wisley

The Green Belt inset should not be expanded at Wisley there is no justification for this. It would be better to reduce the inset to make more defensible boundaries. This would also have the advantage of reducing the over-development of Ockham as described in Guildford Borough Council’s Wisley Appeal Statement of Case where GBC describes the Wisley development as a totally disproportionate attempted location of 2068 dwellings within the ancient village of Ockham.

Comment ID: PSLPS16/3750  Respondent: 15458497 / Stephen Clennell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to all the GBC Plans and Proposals to build on Green Belt, most importantly the sites known as **Wisley Airfield/Three Farms Meadows** and the Woodland known as **Garlic Woods** on the Send/Ripley boarders.

Even the consideration of developing the FWA/TFM area – which would be a small town - with a potential population of 5000 plus – is clearly ludicrous.

The application should be **refused** once and for all on a whole host of grounds:

1. 4000 additional cars in the area
2. Effingham and Horsley stations overcrowding
3. Road casualty numbers and serious delays at Ockham Interchange
4. NO2 and CO2 pollution
5. Sewage problems
6. Water drainage – Already Ockham Road North floods – and Surrey CC seem impotent to stop it.
7. No secondary school places available in the area
8. Rural flora and fauna damage (SWT have recently butchered an area in The Forest (East Horsley) which was the environment of Wrens, Blue Tits, Black Caps and rabbits with seeming impunity
9. The ‘lungs’ of London – the green areas just outside this massive urban area - have to be sacrosanct.

Clearly people without any vision will only wake up when all the land within the M25 and ten miles outside is all concrete. Then, there will be difficulties with sewage inadequate water supplies and nowhere for flash-flood water to go except into people’s homes. Surely the cruel lessons in December/January in Cumbria 2015/2016 must be learned?

The only answer to Guildford housing requirement – and who, by the way, are these people who come up with a figure of 400/500/600 new homes a year?....These figures are never justified to the general public, - must be smaller developments throughout the Borough.

I do not just mean the occasional new house. I mean significant developments like the proposed 120 housing in Send Marsh. This will make significant contribution to housing requirement without any impact on the roads, sewage, water system etc.

As I have said new housing is necessary, but I think that GBC Planning department must move their mind-set into the 21st century. For example – why not decree that all new builds MUST be a minimum of three stories + a basement if a fourth is desired.

By definition, then, all dwellings will require a smaller footprint, which means that dwelling density can be greater and more can be built per acre.

Just finally, and returning to my reason for writing I have read and heard literally thousands of people with a whole host of reasons why the Wisley air field project should **NOT** go ahead.

I have YET to hear one clear, structured argument as to why it should.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
The development proposed for Wisley Airfield would have a huge impact on the region, the roads and junctions are not suited to taking more traffic. The M25 and A3 junction is already one of the most polluted areas in Europe.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to
the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3766  Respondent: 15460353 / Elizabeth Hewlett  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO THE DRAFT LOCAL PLAN FOR THE FOLLOWING KEY REASONS:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of...
pedestrian footpaths (and the space to provide them)
e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
8) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
9) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
10) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

This still proposes to inset East Horsley from the Greenbelt. The development of 100 homes is proposed near Horsley station and over 2000 on the Wisley Airfield. The village of East Horsley (and surrounding villages such as West Horsley, Effingham and Ripley) do not have the infrastructure in terms of transport (roads, parking or rail), schools or medical facilities to adequately meet this increased demand.

57% of new housing proposed is on land that is currently categorised as Greenbelt and this is, quite frankly, shameful as this land is land that was supposed to be protected for future generations.

Since Brexit, forecasts of increasing population numbers have been significantly reduced. The ONS forecast is now only forecasting 10.4% for Guildford, which still intends to increase its housing stock by 22%. This doesn't seem to make sense?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and is more than double the figure used in previous plans.
• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

   - I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
   - I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning
application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on
the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed
without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the
site are not due to start until 2019 at the earliest

f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the
proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the
site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and
Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the
borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate
this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on
the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced
through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to
the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the
historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) -
where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL)
planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning
Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK,

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows),
Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Although there are many other aspects of the latest version of the Guildford Plan which have clearly not been thought out properly, I will not add to my list of objections at this stage, except for the outrageous issue which is the long standing Wisley Airfield site and the fact that despite a unanimous decision of the Council to turn down this Application, it has been allowed to remain as part of the Guildford Plan. This disgraceful decision is an assault on the electorate and unless speedily rectified will be indelibly engraved in the hearts and memories of voters. So you may take it that I also strongly object to any development of the Wisley Airfield site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Site A35 Wisley Airfield
I object to the proposed increase to 95.9 hectares. The resultant increase in traffic volumes would be excessive on top of the existing traffic levels especially in Ripley where traffic is often at a standstill at morning and afternoon peak times. Newark Lane, in particular, cannot cater for any additional traffic and yet it would be the most likely favoured route for traffic to Woking from the Airfield development. Once again I object to the gross misuse of Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):

- Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment
- Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
- Unacceptable Conservative Party links between the developers and the Cou
- No Green Belt "exceptional circumstances"
- Not a brownfield site as stated - only 15% of
- Proposed SCC waste site
- Loss of farming land.
- Too near RHS Wisley and Thames Basin Heath
- SANG would harm on
- Unacceptable increase in air pollution.
- No existing public transport and stations miles away.
- No proper traffic
- Housing density far too
- Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed
- Access confined to inadequate narrow lanes.
- Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
- Major impact on neighbouring villages, especially Horsleys.
- No assessment made of collective impact on area of this and 6 Horsley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed 2000 houses at the Wisley Airfield site on the grounds that it is a totally inappropriate use of Green Belt and agricultural land. The location is served by country roads and to develop the infrastructure to accommodate access to the A3 will severely impact on the already congested and often gridlocked carriageway and also cause tailbacks to the surrounding country road networks. Drivers will no doubt use these as a 'rat run' and I suspect many accidents will occur.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/4132  Respondent: 15474785 / Jules Widdowson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The development of the former Wisley Airfield does not take into account the effect on the local villages whose infrastructure would have to support it. This will undeniably bring a further increase in road traffic on already busy roads. The train station and its commuter links cannot support that level of growth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4151  Respondent: 15475041 / Anne Geary  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

I have major concerns about this proposed development and has objected against prior planning applications at this location. We consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country.

I strongly object to Policy A35 and will provide a more detailed submission outlining my arguments against this policy in a separate letter.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---------------

Comment ID: PSLPS16/4168  Respondent: 15475841 / David Boothby  Agent:  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency. This development represents greed of the most unpleasant kind.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This shouldn’t be in the plans for all the reasons that the Planning Committee rejected the identical recent proposal by Wisley Investment Properties. Only 15% of the land is brownfield site land and it is simply too close to RHS Wisley and the Thames Basin Heath SPA. Increased traffic would no doubt aggravate traffic jams at the A3 roundabout and M25 Junction 10 and cause an unacceptable increase in pollution. The is no existing public transport and the stations are miles away. The housing density is far too great and over 2000 houses will swamp and destroy the Ockham conservation area, with an impact on listed buildings. The water table and surface water flooding has not been considered either for the site itself or for downstream areas of the River Mole. There will be a major impact on neighbouring villages, especially the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Objections to Guildford Borough Council (GBC) Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brown field land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths, the lack of pedestrian footpaths and the space to provide either, together with the pitiful state of the existing highways, which are currently dangerous for cyclists.

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and demand for car parking at each station is already at capacity.

   - I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
   - I object to the fact that air quality concerns have not been taken seriously. Air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
   - I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
   - I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** pslp172/2331  **Respondent:** 15479457 / Philip. L Earle  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**
I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for a number of reasons including:

1. This is the least sustainable site identified in both the current and previous versions of the Local Plan because of the site constraints and location.
2. This site is further from railway stations than any other identified strategic site.
3. The site is adjacent to the most congested stretch of strategic road network (SRN) in the county and close to one the most congested junction in the country (M25 -J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (in peak times and also due to accidents, diversions, roadworks etc)
5. Suggested public transport initiatives including bus services to and from Guildford will exacerbate the already over crowded road network leading to unreliability and delay, which in turn will make local residents choose individual modes of transport resulting in further congestion.
6. Public transport bus services to Horsley will reduce the safety of the local road network as lanes are narrow and this will increase danger to cyclists and walkers which should be encouraged as eco friendly alternatives. The area is greatly used by cyclists at all times throughout the year who seek to follow the 2012 Olympic cycle route and train for the annual Ride London –Surrey 100 cycle event. The current plan will add to traffic flows and endanger cyclists and walkers lives.
7. The proposed site is adjacent to the Royal Horticultural Society gardens, which is one of the most visited destinations in the south-east of the country. I understand that expansion plans the RHS have will significantly increase the number of visitors to Wisley. From reading the plan, the resultant traffic increase from the RHS has not been considered. Furthermore, there are regular events at the RHS which attract 1,000’s of additional visitors and again the impact of this increase in traffic does not appear to have been taken into consideration.
8. Once completed, there will be minimal employment opportunities on the developed site as a result of which, the majority of new residents will travel to work. The majority of these are likely to use motor cars (probably with only a driver) and this will add significant volumes of traffic to the already over crowded local narrow lanes.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

Please note that I reserve my right to attend the inquiry and personally present evidence.

As a further over arching comment on local and government policy, I do not understand why more emphasis is not being given to long term investment in developing other parts of the UK. It is evident that the South East and the London conurbation in particular is over crowded. The answer is not to destroy the green belt but to encourage a shift in population to other areas which have been neglected by successive governments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4270  Respondent: 15479521 / Tim Meyer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to the Local Plan as the development proposed will not be sustainable (Policy S1). The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. There is no evidence the development of 13,860 homes during the Plan period is sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35) and Garlick’s Arch (A43) are in unsustainable locations. They do not benefit from direct public transport links – there are no railway stations within easy walking distance and bus services across
rural villages are forever reducing. Residents will have few options but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport.

Greater consideration should be given to increasing the density of development in present urban areas, such as Guildford, where more practical sustainable transport options can be provided. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from significant congestion. Further vehicle movements will result in even more acute congestion and greater pollution and noise. Residents and the environment will suffer as a result.

2) I object to the Borough Wide Strategy (Policy S2).
The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey at an apparent detriment to borough residents.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

3) I object to not protecting the Green Belt (Policy P2).
I object to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt.

Once villages are removed they are removed forever. Villages are a quintessential element of life in the borough – for the villagers themselves and for large numbers of people in areas surrounding the villages. Villages cannot be replaced with the sweep of the planner’s pen. Planning history is littered with failed attempts to create the unique character and life of traditional villages in a modern project. We have wonderful and meaningful villages and cannot afford to lose them. In fact, there are no plans to build new villages hence we cannot afford to lose our existing villages.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

Rather than developing Garlick’s Arch, there are numerous brownfield sites in the borough with surplus land that could accommodate a further development.

4) I object to development in areas which are at risk of flooding (Policy P4).
National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding. The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a Flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
There are many other sites in the borough not designated as flood risks that can be developed for housing and industry without such risks and without condemning families and business to highly likely flooding events and the inevitable disruptions and costs.

5) I object to the sustainable employment policy (Policy E1).

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. There is also brownfield site at nearfield Slyfield that is highly suited to industrial development. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

6) I object to the location for new employment floor space at Garlick’s Arch – Site A43 (Policy E2).

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floor space will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floor space to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

There is also brownfield site at nearfield Slyfield that is highly suited to industrial development. There is no evidence that industrial development in addition to that planned and possible in Slyfield is needed at Garlick’s Arch and that it would warrant a plan that does so little to meet the needs and desires of the local community.

7) I object to the loss of rural employment (Policy E5).

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

8) I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3).

I object to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees. The ancient woodlands are an amenity enjoyed by many in the borough.

9) I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1).

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages not just from the traffic created by the proposed developments but from the rat-running the proposed developments will encourage. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces. Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

10) I object to the lack of proper infrastructure planning for sites (Policy I1).

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns...
over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and

overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

11) I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2).

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse. It must not be a planning goal or consequence to make matters worse for residents of the borough.

12) I object to concerns of poor air quality (Policy I3).

Paragraph 4.6.27 of the Plan states “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.”

The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

13) I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3). Many residents in the borough would object to the removal of protection for these trees. The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

14) I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a). The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking would become through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 would go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved. This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

15) I object to the proposed Infrastructure Schedule (Appendix C).

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

16) I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough as being too high (Appendix D).

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford in general and in particular to the sites in the Proposed Plan. This local plan and the SHMA number have completely ignored these factors.

17) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

18) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

19) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

20) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the proposed sites, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

21) I object to the fact that environmental concerns are not taken seriously in the Proposed Plans. Air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation. Noise from current traffic levels is already a significant nuisance in many areas and the plan would add further noise to existing residents and introduce many new families of the proposed new housing to this existing level of unpleasant or damaging traffic noise. It is not necessary since there are better sites to build on than along the main traffic arteries where noise would be an unwarranted nuisance to neighbouring residents.

22) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and...
(2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

23) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency. It is more than clear that planning applications are unwarranted for all the many and detailed reasons given. Further such plans create an undue waste of public monies and are a serious distraction to residents who unfairly have to face over and over repeated threats to the enjoyment of residency in their borough.

I trust that these objections will be fully considered and the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council (GBC) Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brown field land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths, the lack of pedestrian footpaths and the space to provide either, together with the pitiful state of the existing highways, which are currently dangerous for cyclists
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and demand for car parking at each station is already at capacity.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously. Air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4) I object to the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The significant congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already currently at full capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham and the Horsleys are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the three villages maintained and the villages’ green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

    After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

    Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

    I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I strongly object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being completely ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. The site will suffer from constant low level noise and extremely poor air quality.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The significant congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already currently at full capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham and the Horsleys are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the three villages maintained and the villages’ green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The disproportionate plan to build 2100 homes north of Ockham would take yet more land out of the Green Belt, which is unacceptable for the reasons outlined above. Greater pressure would be placed on local roads, including those in Effingham which are already congested.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the foregoing on grounds which include the following:

The Former Wisley Airfield should not have been removed from the Green Belt – the proposed development would create an urban corridor from London to Guildford. There are no exceptional circumstances justifying removal from the Metropolitan Green Belt. The proposed housing density will severely impact the nearby localities – Ockham, Ripley, the Horsleys and Effingham. In particular, the proposal will have a devastating impact on Ockham, a hamlet on open land, which would be subsumed into an area of high population density.
2 Further, the proposal would have an adverse impact on transport, local roads and road safety, and danger on the narrow local roads. Far from encouraging local cycling and walking, it would increase the danger.

3 There would be an increase in the already severe traffic congestion on the A3, M25 and some local roads.

4 There is a lack of local transport, and the local railway stations could not cope, while use of stations further afield would add to congestion and pollution. The risk of increased air pollution has not been properly addressed.

5 The area is a haven for wildlife, which would be seriously endangered.

In short, although this proposed development would undoubtedly benefit developers who are, I believe, operating out of a tax haven, I cannot see how it would benefit the area concerned. Although living in Cobham, I believe I have a greater interest in the area concerned than those living on the far ide of the Borough.

I have worked at RHS Garden Wisley for nearly 10 years, and have lived in Surrey all my life, at contrasting locations such as Croydon, Dorking and Haslemere. I have personal experience of the housing market as a Surrey resident, as do my children. I earn below the national average income and choose to live here because it is beautiful, even if it means sacrificing some life-style choices. I do not want to see this area ruined and become suburban sprawl and a biodiversity desert. I have not seen prices in the rental and buying market rise very much at all over the last five years - indeed I believe they have just fallen following the brexit vote. The devaluing of the pound has suddenly made us an even more attractive market for foreign investment: this is trend does not support the apparent housing problem. We've yet to see the effects of the buy-to-let changes. The Green Belt is as necessary here as the parks are to London. I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed...
houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a
population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development
   is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private
cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated
   4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas,
exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the
   lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further
   planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil
   secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No
   development can proceed without significant infrastructure enhancements to the A3 and M25. Partial
   improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the
   proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the
   site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI)
   and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the
   borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate
   this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on
   the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced
   through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to
   the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the
   historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) -
    where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL)
planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning
Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK,

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows),
Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the draft local plan for the following reasons-

I object to the detrimental effect on transport of so many extra cars. The roads are already overcrowded and congested and greater numbers would bring traffic to a standstill at busy times (rush hour & school arrivals & departures).

Added to which the East Horsley Station car park was already FULL by 10am on my last 3 attempts to find a place before the start of the summer holidays. Where do you go? There are no long term car parks in Horsley within reach of the station. Infrastructure must come first.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I wish to object to the proposed Submission Local Plan.

Of most concern is the significant impact of more traffic on already busy narrow local roads. The roads in the Horsleys area are basically narrow, winding country lanes, already busy at peak times and will not be able to cope with the additional high volumes of traffic the developments would create, especially the major one at Wisley airfield. Additional major concerns include moving the boundaries of the Green Belt, lack of sustainability of the developments and inadequate proposed improvements to local infrastructure especially medical facilities and schools. The proposed developments are out of character with the village nature of the Horsleys and, particularly, the density of the new housing will contrast starkly with the existing settlements.

LAND AT FORMER WISLEY AIRFIELD

I wish to object specifically to the above proposed development. It breaches Green Belt rules, will have major adverse impacts on the natural environment including wildlife, local traffic and infrastructure as well as resulting in a development which is total out of character with surrounding settlements and lacking in the fundamental tenets of sustainability. The housing density of the proposed new development would be roughly 6 times as dense as the existing local settlements.

My major concern is the lack of suitable additional travel infrastructure in the proposed development will make the car the first choice of transport – probably another 4000+ cars and associated journeys - adding to the already serious traffic queues experienced around the M25/M3 junction, already of concern to Highways England. Effingham Junction and East...
Horsley rail stations do not have sufficient parking to accommodate the extra cars and vehicles are already now parking on Effingham Common Road as the station car park is regularly full.

The site falls within the Metropolitan Green Belt and, as such, should only be developed if the proposal meets “very special circumstances”. The proposal singularly fails to demonstrate that the benefits of the development outweigh the harm to the Green Belt and other aspects noted above. The development would create the largest settlement in Guildford Borough after Guildford itself, and be the inevitable precursor to further development of the Green Belt and spread of suburban London outside of the M25.

Both Ockham & Wisley Commons lie within an area designated as a Site of Special Scientific Importance (‘SSSI’) and forms one part of the Thames Basin Heaths Special Protection Area. A large percentage of the site lies within the 400m Exclusion Zone where new building is effectively prohibited. The impact of such a large settlement and associated pets will inevitably have a detrimental impact on the local wildlife.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in
Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT TO THE 2016 DRAFT LOCAL PLAN!??

I am only 12 years of age and I do not want to grow up in a busy, polluted area. I like to feel safe in my environment which I currently do as my village is small and friendly with lots of fields to play on with my friends. If 2000 more homes, industrial and business sites and a railway station are added to my surroundings I will not feel so happy as millions of people would be traveling through my area every week. This will not only hurt me but many others of my similar age too. If we are to go through with this plan it will result in 5000+ more vehicles on our roads causing pollution in our currently clean area. Building on the Green Belt will mean thousands of animals losing their homes and possible extinction in some species. This will also harm the bees which I know we are trying to look after at the moment due to low numbers. I know this sounds extreme but it could even put us at risk!

YOU DON'T WANT TO LOSE THE GREEN BELT FOR EVER DO YOU?

I OBJECT TO THE 2016 DRAFT LOCAL PLAN!??

Objection to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings"

Although we live outside the borough of Guildford, we have a greater interest in what goes into the Guildford Local Plan than those living on the far side of the borough. With this in mind we would like to object most strongly to the Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings with the following reasons:

• We object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.
• No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
• There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
• We object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
• We object to the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.
• The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
• Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
• We object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
• The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
• Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).
• There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
• The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

• We object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

• We object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

These objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified these serious concerns.

I object to the proposed development on the site of the former Wisley Airfield.

The Spatial Vision notes…. 'Not all of the borough’s development needs can be met within Guildford’s urban areas. It is therefore proposed to focus some development on large strategic greenfield sites which brings with it significant infrastructure.'
Please can you explain what significant infrastructure is available at the site of the former Wisley Airfield where you propose to create a new town.

As already observed, very little development will take place within Guildford’s urban areas. Nevertheless, two new rail stations are planned, Guildford East (Merrow) and Guildford West (Park Barn), presumably to support the additional 2,742 homes planned for Guildford. However, the new town planned for Wisley will be expected to use already over-extended stations at Horsley and Effingham Junction. In excess of 2500 new homes (including those planned for the Horsleys) are proposed without any additional infrastructure beyond the addition of bus routes and a cycle path.

Assuming there is significant infrastructure that could make the former Wisley Airfield a candidate for development, I would still object to this proposal based on the level of detail provided in the plan. This proposal is a very significant intrusion into the green belt and the level of associated planning seems minimal. For example, the plan suggests the need for “…a significant bus network to serve the site and key destinations including Effingham Junction railway station and/or Horsley railway station”. However, the existing roads (commonly referred to as lanes) are insufficient to accommodate two buses passing, never mind a ‘significant bus network’. The consequences of this development will lead to very significant additional infrastructure work that is currently not envisaged in the plan and which will have a much wider impact on the green belt.

In short this proposed development can never be supported until a comprehensive and detailed plan is developed with a model showing how

- The current, very poorly maintained, road infrastructure will be impacted
- the Horsley and Effingham railway stations will be impacted
- the existing schools and medical facilities will be impacted
- disruption will be minimised for existing residents while such an extensive multi-year development proceeds
- the very real flood risk will be over come
- the designated Site of Nature Conservation Importance will be protected
- listed buildings will be protected
- funding will be secured from multiple agencies over a multi-year budget cycle
- air quality will not be reduced
- the model should also illustrate the impact if (and surely when) the 2000 homes become 3000 and then 4000.

Of course, without a fact based explanation as to why the housing stock must increase by 25% (refer to Objection 1) it is not clear that this development is even needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

9. I object to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4806  Respondent: 15496321 / S N Graham  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ) , is Sound? ( ) , is Legally Compliant? ( )

Whilst I do not live in the borough of Guildford I do none the less have a very deep interest in the area as I live on the borders and in particular live close to the Wisley site and as a result have an in depth knowledge and respect for this area. I am therefore writing in connection with the above draft local plan to which I wish to express my objections for the following reasons:

- I object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. The Green Belt was set up specifically to prevent this kind of urban expansion.
- No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.
- There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
- I object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham.
- I object to the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.
- The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- Hatchford, south of the M25, has some 60 residences off narrow Ockham Lane that would be greatly affected by the proximity of development.
- I object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
- The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.
- Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes).
- There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.
- The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
• I object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

• I object to insufficient consideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We wish to record our objection to the inclusion in the Guildford Borough Council draft Local Plan (June 2016) of the former Wisley Airfield as a potential development site. This site is Green Belt land and there is no need for its development as there are brownfield sites in urban areas that could be regenerated.

A development of 2,000 dwellings would have a significant effect on the surrounding villages, towns and roads. We live in Cobham and this would be the site’s nearest shopping centre. Cobham is already congested and there is insufficient parking.

The environmental effects of increased traffic have not been given sufficient consideration. Air quality would be affected and this site and areas around it have significant ecological value.

The application no. 15/P/00012 was unanimously rejected by Guildford Council Planning Committee in April 2016 so it is unsettling to see the site included in the Draft Plan.

I chose to live here because it is a village

Wisley airfield? Well we are back to URBAN SPRALL  again, again, again!

Far too many house because we all know that the house will be built because there is profit in them for the developers but the schools, medical facilities will be quietly put on the back boiler & conveniently forgotten

Whilst the proposal for 2000 houses at Wisley does not directly affect Horsley residents, it will surely increase traffic through the Horsleys and therefore the A3 and A246, both of which suffer regular congestion.

Objection to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings

I object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt. There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

I object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham and also the threat the Local Plan as drafted poses to the historic rural settlements of Ockham, Hatchford and Downside.

I object to the potential harmful impact on transport, local roads and road safety by the suggested developments. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development. The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions. The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.

I object to the issue of air quality not being taken seriously. Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

I object to insufficient ocnsideration being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I am a frequent visitor to the borough, working in Guildford and visiting relatives in Ockham where I grew up. I am writing to object to the draft Local Plan for the following key reasons:

1) There is plenty of brownfield land in the borough which should be regenerated before Green Belt land is even considered. I therefore object to the plan for such a huge amount of new housing to be built on Green Belt land.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. Development on the site will create an urban corridor stretching from London to Guildford. I don't believe there are any exceptional circumstances which warrant removing the land from the Green Belt under the NPPF.

3) I object to the excessively high number of houses to be built per year -693. This is more than double the figure used in previous plans and there is no clear reason for the dramatic increase.

4) I object to the threat to the village of Ockham and the blight on properties there. The plan calls for a small village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development.

5) I object to the negative impact on transport, local roads and road safety. I specifically object to:

   1. The suggestion that the development will result in a meaningful shift to cycling and walking. The development is too isolated for people to give up their cars.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads.
   6. The lack of suitable public transport. The Guildford Waterloo rail route is already hugely overcrowded and cannot cope with the proposed increase. Car parking at the stations is already at capacity.

6) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) when the planning application has already been rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I request that these objections are fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am an owner and director of an international horticultural business in Cobham which owns land in Cobham and Ockham. Our Ockham site is very important for the development of the business and there are regular movements between the two sites of Tractors and cultivation and/or harvesting equipment. We also have vehicle movements between the two sites moving commercial stock.

I object very strongly to the re-inclusion of the Former Wisley Airfield/ Three Farms Meadows site into the Borough Local Plan after it was rejected as a suitable site for housing by the full planning committee and the planning department of the Borough.

I object to the plan’s proposal to remove the Wisley airfield / Three Farms Meadows from the green belt and we also strongly object to the similar proposals to build on green field sites in the Parish’s of East and West Horsley, Send and Ripley, and to the removal of these parish’s or parts of them from the Green Belt.

We object to the loss of the Agricultural land at The Farms Meadows through the proposed development there. Good agricultural land is a declining resource.

I object to the proposed development of the various sites in the parish’s of East and West Horsley, Ockham, Ripley and Send because they cannot happen without a big investment in services and this major requirement is hardly mentioned. Already the district is struggling with overflowing sewerage, with shortages of other utilities of Gas, water and electricity supplies. There is already a desperate shortage of school places for all age groups in this area of Surrey; Medical services are also fully stretched and inadequate for more clients. The Hospital will need to expand too.

I object to the proposals to increase the number of houses in this area by such a large amount on an annual basis. The road infrastructure is inadequate. The roads were developed in the days of the horse and cart, are narrow and cannot be widened easily because they are bounded by hedges. There are few footpaths and no cycle lanes or lighting. The mix of pedestrians, cyclists and ridden horses with fast cars and trucks are a recipe for disaster and litigation if no planning consideration was made. Due to the high traffic movements and the high number of goods vehicles using these lanes they are now breaking up. The area has some of the worst roads in the county.

I object strongly to the development because of its likely affect on the Wisley and Ockham commons, part of the Thames Basin Heaths Special Protection Areas, particularly considering atmospheric pollution, increased footfall and dog exercising on these fragile environments.

I object to the planning department, the planning committee and their subcontractors in devising a housing need without consideration and planning for the infrastructure needed to establish their proposals.

I strongly object to the proposals because of the effect on the picturesque villages which have a high number of old and historic houses, many listed. The proper development of The Borough should be to increase the number of high rise buildings in the centre, now that Guildford is a city, with schemes such as the station development, lesser rise building should be encouraged in the suburbs of Guildford.

We object to the lack of planning for work and employment for the residents of these developments. They cannot all take the train to London.

I OBJECT to the inclusion of A35 Wisley airfield in the local plan. The principle of the local plan is a presumption in favour of sustainable development. The Housing and Planning Act 2016 grants permission in principle to any development included within the local plan leaving only technical details to be considered by planning authorities. The site at Wisley failed in its planning application on a large number of points including infrastructure and sustainability. It is highly unlikely that these will be met in the future due to its positioning. Part of the site is green belt and no exceptional circumstances have been demonstrated. Aspects of the site also include high quality agricultural land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the
plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample
brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt
land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in
protecting against urban sprawl from London. Development on the site will create an urban corridor stretching
from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing
the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment
(SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than
double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the
Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is
allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there.
The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed
houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a
population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development
       is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private
cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated
       4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas,
       exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the
       lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further
       planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil
       secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No
       development can proceed without significant infrastructure enhancements to the A3 and M25. Partial
       improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the
       proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site,
in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site
of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough,
and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this
situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the
Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5087  Respondent: 15501377 / Elmbridge Borough Council (Karen Randolph)  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A35- Land at Former Wisley Airfield, Ockham

In regards to the proposed new settlement at Wisley (Policy A35), many of the concerns we previously raised have now been addressed through the publication of additional evidence base documents e.g. Habitats Regulation Assessment and Draft Infrastructure Delivery Plan, and by way of the evidence and statutory responses submitted in regards to the two planning applications for this site. The Council would however, like to reiterate those comments which it considers to be outstanding as well as make some additional comments in light of the publication of the Proposed Submission Plan and supporting evidence base.
Due to the location of Wisley Airfield in relation to Elmbridge Borough, this site is of keen interest to us and our residents and so, we continue to query whether this is the right location for this scale of growth when considered against the principles of Green Belt. The fundamental aim of the Metropolitan Green Belt is ultimately to prevent the spread of London. The site is located in the very north west of the Guildford Borough where the Green Belt is already very fragmented and particularly vulnerable to additional development, a point that was noted by the Inspector for the examination into our Core Strategy. It is therefore considered that further evidence should be provided to indicate why this site has been identified in preference to other sites having regard to the strategic significance of the Green Belt in this location.

In addition, we would like to understand further the process for considering the eire. 100, parcels of Green Belt and countryside that were considered to have low or medium sensitivity and how the work has resulted in this site, as opposed to other areas, being proposed for allocation. Working our way through the various Volumes and Addendum it would appear that Guildford Borough Council has been selective in assessing the environmental capacity and sustainability of the parcels and we query why only those parcels on the edge of the urban edge were considered. Furthermore, Parcel G18 (Wisley) is not located next to the urban edge and therefore in accordance with this general approach, should have been excluded for further consideration as have other similar parcels.

Turning to the Proposed Submission Plan, we would recommend that Table 1 - Planned Delivery between 2018 and 2033, be amended to show more clearly when it is envisaged that each strategic allocation would be delivered rather than generically stating the period of 1 - 15 years. Our concerns regarding the impact on the strategic road network remain, particularly in regard to the proposed development at Wisley but also other proposed development sites along and in close proximity to the A3. For example, Policy A43 Land at Garlick's Arch, Send Marsh / Burnt Common and Ripley which will further compound the impact on the road network should the appropriate mitigation measures not be implemented. Without the mitigation measures identified in the Government's Road Investment Strategy (RIS) (phases 1 and 2) the residual cumulative impact of the Proposed Submission Local Plan on the highway network could be considered severe. As set out in the evidence base, the RIS schemes are complicated and may involve land acquisition and planning permission and, as a result, Highways England is cautious about programming these schemes. Given these complications, and also the infrastructure required on-site to support the scheme and the securing of the land north of the site for Suitable Alternative Natural Greenspace (SANG) (in regard to the Wisley scheme), it is considered that the Borough Council could provide a better estimate in terms of delivery knowing that the development of some sites is unlikely to be in the first few years of the plan.

I hope you find these comments useful in progressing work on the Local Plan.

Please do not hesitate to contact Mark Behrendt, Planning Policy Manager, if any of the points raised requires further explanation. Officers would be happy to meet with you to discuss our comments in more detail.

At this time the Council would like to reserve the opportunity to attend the examination in public.

I OBJECT to Wisley Airfield, which is classified as a brownfield site on a spurious technicality when everybody can see that it is not what is understood by brownfield, being included in the Local Plan as a development site for 2000 houses when Guildford Planning Committee have just refused the planning application relating to it. Either the left hand does not know what the right hand is doing or this is a devious diversion. I object for all the reasons identified by GBC Planning Committee when it rejected the application.
I OBJECT to building 2000 houses at what GBC calls Wisley but is actually at Ockham, because it would massively and detrimentally overwhelm Ockham village, East and West Horsley and the entire neighbouring area. The proposal is ill conceived, showing scant regard for the Green Belt, infrastructure requirements, transport, or pollution and lacking nearly all the evidence that is needed to show that such a development would be sustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object to the above draft local plan for several reasons, but on three specific areas of concern.

(1) The removal of the former Wisley Airfield from the Green Belt which has assisted the prevention urban sprawl from London. Development of this land would create and urban corridor from London Guildford. There are ample Brownfield sites where future housing developments might be considered.

(2) The road infrastructure anywhere close to the M25 and the A3 is already at breaking point. It is not at all unusual for queues of traffic to stretch from the A3 back through Cobham, and on those frequent days when there are significant delays on the M25 between the Leatherhead turnoff and the Wisley junction, traffic queues can and do stretch back beyond Stoke D'Abernon towards Leatherhead.

Bearing in mind that access to Cobham and Stoke D'Abernon station from Wisley would be along the A3 and through Cobham, an increase in traffic would add significantly to the current delays.

In the past three to four years, there has been a daily increase in the number of cyclists using the local roads, and this too has lead to more and more crawling traffic through Cobham, which does not help anyone in a hurry to get to the Cobham station.

(3) Any additional housing would lead to a further increase in the number of cars using the local roads. The proposal to build circa 2000 houses on the Wisley Airfield site would increase daily car usage to between 2000 and 4000 vehicles which would lead to further delays and frustration for all road users.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I represent the owners of an international horticultural business in Cobham which owns land in Cobham and Ockham. Our Ockham site is very important for the development of the business and there are regular movements between the two sites of Tractors and cultivation and/or harvesting equipment. We also have vehicle movements between the two sites moving commercial stock.

We object very strongly to the re-inclusion of the Former Wisley Airfield/ Three Farms Meadows site into the Borough Local Plan after it was rejected as a suitable site for housing by the full planning committee and the planning department of the Borough.

We object to the plan’s proposal to remove the Wisley airfield / Three Farms Meadows from the green belt and we also strongly object to the similar proposals to build on green field sites in the Parish’s of East and West Horsley, Send and Ripley, and to the removal of these parish’s or parts of them from the Green Belt.

We object to the loss of the Agricultural land at The Farms Meadows through the proposed development there. Good agricultural land is a declining resource.

We object to the proposed development of the various sites in the parish’s of East and West Horsley, Ockham, Ripley and Send because they cannot happen without a big investment in services and this major requirement is hardly mentioned. Already the district is struggling with overflowing sewerage, with shortages of other utilities of Gas, water and electricity supplies. There is already a desperate shortage of school places for all age groups in this area of Surrey; Medical services are also fully stretched and inadequate for more clients. The Hospital will need to expand.

We object to the proposals to increase the number of houses in this area by such a large amount on an annual basis. The road infrastructure is inadequate. The roads were developed in the days of the horse and cart, are narrow and cannot be widened easily because they are bounded by hedges. There are few footpaths and no cycle lanes or lighting. The mix of pedestrians, cyclists and ridden horses with fast cars and trucks are a recipe for disaster and litigation if no planning consideration was made. Due to the high traffic movements and the high number of goods vehicles using these lanes they are now breaking up. The area has some of the worst roads in the county.

We object to the proposed development of the Former Wisley Airfield on health grounds in that the site is very close to the major trunk roads of M25 and A3 and junction 10 of the M25. I have personally experienced discomfort due to the air pollution engendered by the traffic when walking on Ockham Common which is very close to the site when the wind is from the North round to the South East.

I object strongly to the development because of its likely affect on the Wisley and Ockham commons, part of the Thames Basin Heaths Special Protection Areas, particularly considering atmospheric pollution, increased footfall and dog exercising on these fragile environments. We object to the cavalier attitude of the planning department, the planning committee and their subcontractors in devising a housing need without consideration and planning for the infrastructure needed to establish their proposals. If it were a business making such poor plans they would quickly lose their money and become bankrupt. We object as taxpayers that we would have to bear the financial consequences of the planning incompetence’s.

We strongly object to the proposals because of the effect on the picturesque villages which have a high number of old and historic houses, many listed. The proper development of The Borough should be to increase the number of high rise buildings in the centre, now that Guildford is a city, with schemes such as the station development, lesser rise building should be encouraged in the suburbs of Guildford. We object to the lack of planning for work and employment for the residents of these developments. They cannot all take the train to London.

Wisely Airfield Allocation Site A35

5.7 This proposed redevelopment site would provide 2,000 new homes as part of a larger mixed use scheme. There are however significant concerns that this site is unsuitable in planning terms, particularly regarding the strategic highway network.

5.8 The NPPF is clear that plans and decisions should ensure developments that generate significant movements are located where the need to travel will be minimised and the use of sustainable transport modes can be maximised. The site is manifestly not sustainable, it is not related to any existing settlement or infrastructure or local services. Indeed it is located in open countryside, remote from any settlement infrastructure. Development of this site would constitute a major housing development in a rural area which will rely upon car based travel to and from given the proposed access on to the A3 which is not conducive to encouraging modal shift to non-car based transport.

5.9 The inherently unsustainable location of this site means that its development as a major housing and employment site will conflict with the policies of the Framework. An Inspector will have to give very careful consideration as to whether it constitutes the most suitable location for the proposed form of development. The site is also the most contentious proposed allocation in GBC’s plan. Its suitability for major development will need to be very carefully scrutinised.

5.10 In the light of the potential deliverability issues displayed by some of the most significant strategic sites identified in the Plan, as well as GBC requiring yet further sites to meet its OAN of 693 dwellings per annum, there is no justification to not consider the land at Fairlands for development. The site is suitable, available and deliverable now.

**New Settlement at Ockham**

I strongly object to the proposal to use farm and previously requisitioned land at Ockham for 2,100 houses. The impact on my village would be enormous and unsustainable. Planning permission has recently been refused for numerous reasons and the site should therefore be removed from the Plan.

I am writing to object to your draft Local Plan of June 2016 relating to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt and there is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

The plan calls for Ockham, a hamlet of 159 residences to be subsumed into development, on presently open land, with 2,000 dwellings and other urban-style buildings up to five storeys high and a population density higher than most London boroughs. In addition, Hatchford, south of the M25, has some 60 residences off the narrow Ockham Lane that would be greatly affected by the proximity of development.

I strongly object to the potential harmful impact on transport, local roads and road safety by the suggested development. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development. The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions. Also, owing to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those increasingly using local roads for recreational purposes). There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. The current planning application by RHS Wisley would already have significantly added to visitor traffic. Any proposed secondary schooling would add additional congestion.

The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernon Station could be used. That or use of stations further north at Weybridge or Walton would increase congestion and pollution on local roads in Elmbridge.
Also, insufficient consideration is being given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

My objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads which cannot support the current flow of traffic and the surface water which does not drain away

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements. The wide vehicle cause damage to the narrow country lanes

4. The danger this traffic will be to local cyclists, pedestrians and horse riders due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

6. The lack of suitable public transport and roads that a large bus can safely travel on. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

   • I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
   • I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
   • I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
   • I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I believe there is a planning application in and I would like to raise our families objections to until we have certain guarantees and questions have been answered.

Why is such a large development required? Why could not a series of smaller developments be done that would not be so catastrophic on small villages but instead gradually increase their size so as not to break to eco system of that community.

Why are urban brownfield sites not being considered instead? I agree we need to provide housing in the SE of England but this is a huge development that would change the human and natural ecosystems of the area.

We need some assurances that if this goes ahead there will be additional schools built, both junior and senior, nurseries funded because we are talking about 1000's of additional children and the current schools can't cope nor do we need to have mega schools with masses of classes per year.

Roads - what additional road widening, traffic control measures, new roads are going to be built to cope with the traffic? Cobham traffic is already a joke because the parking bays prevent cars from going through but now this development would add to those queues without any considerations of the issues we have already. There simply isn't the parking spaces nor the volume of shops to cope with that number of additional people. What is to be done?

Travel - the local train services cannot support this type of development, assuming this means there is an additional 1000 per day who travel into London, how many extra trains are SW going to put on, will they be doing fast trains as well as slow trains like they do at Woking? There isn't enough parking at any of the trains along the line to cater for these additional people, there is never more than 30 spaces free at Cobham in any one day. If you think people are going to be able to walk to these stations then that is a joke because some roads in the local area don't have pavements, in fact an extraordinary number dont so how are people expected to walk safely to these stations?

I don't object to building more houses but I do strongly object to large developments without considered planning of the impact on other communities and their current way of living. This would have a serious impact on my way of living and would mean Cobham is no longer the place I bought into as it would take longer to get around, less certainty about where to shop, where to park, whether I would get a parking space at the station, time to travel to work etc. Do this in a considered way with more disperse developments spread around the area and it's less impactful.

Please acknowledge this email so that I know it has been logged as a formal objection.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

For almost twenty years I have been a regular visitor to the beautiful greenbelt village of East Horsley and its neighbouring communities and villages. I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open
spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5347  Respondent: 15505633 / John Hume  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

As a regular visitor to East Horsley and its neighbouring communities and villages I was horrified to hear of the proposed development at Wisley Airfield in what is the heart of greenbelt land. Having witnessed the many developments that have already had in my opinion a negative impact on the beauty of this wonderful part of Surrey, this development is totally out of character and will without doubt spoil what has always been a protected untouched halcyon of days gone by. To say that the proposed development would be grossly out of context is a definite understatement. I trust that Guildford Borough Council will have the common sense to reject this application which would be much better suited to some of the many brownfield sites crying out for redevelopment.

I object to Policy A35 Wisley. I object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee unanimously rejected a recent planning application for precisely this development on 14 separate grounds. However, the site had been reinserted into the new draft local plan published only 24 hours before the planning decision. There is no need for housing on this site because the local plan housing target is incorrect &inflated and ignores constraints.
This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

Green Belt location and absence of “exceptional circumstances”.

Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.

Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).

Proximity to A3/M25 bottleneck and Ripley village and roundabouts.

Absence of adequate traffic data.

Loss of high-quality agricultural land (55% of the site), in breach of national policy.

Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

Presence of a Surrey County Council safeguarded waste site.

Cost of infrastructure required to the detriment of alternative more favourable sites.

Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

Impact on listed buildings.

Extreme housing density with tiny garden spaces.

Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

Failure to evaluate the cumulative impact of this and nearby development sites on the area.

I OBJECT to Policy A35 Former Wisley Airfield as being totally inappropriate and unsustainable development of 2000 homes in the Green Belt.

I OBJECT to the disproportionate amount (36%) of all proposed development being in one area of the borough from Wisley to Burpham creating a narrow ribbon effect along the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The removal of the former Wisley Airfield from the Green Belt which serves a vital role in the prevention of London sprawl.

No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.

The Local Plan as drafted poses a threat to the historic rural settlements of Ockham, Hatchford and Downside.

The potential harmful impact on transport, local roads and road safety by this suggested development. The result of an additional 2,000 homes could result in an estimated 4,000 more cars, plus other vehicles to service the development.

Such increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham.

The absence of cycle paths and footpaths renders the assertion that the development would result in a shift to using cycles and walking is not viable.

There would be an increase in the existing severe congestion on the Strategic Road Network of the A3 and M25. Also any proposed secondary school would add to this congestion.

There is not sufficient capacity at all the local railway stations to accommodate further large increase in passenger traffic and parking facilities.

Air quality issue does not seem to be given sufficient consideration; near the M25/A3 junction, it already exceeds EU-permitted levels.

These and other objections are supported by the unanimous rejection of application 15/P00012 by the Planning Committee at Guildford Borough Council on 8th April 2016.

1. The continued inclusion of the Wisley airfield as a site for housing. This is an inappropriate location due to many reasons including transport links, infrastructure (such as schools, doctors etc) environmental protection and its impact on the surrounding villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5643  Respondent: 15568417 / Leslie Healey  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings
I object to the draft Local Plan for the following key reasons:
1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses)
to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to totally OBJECT to the continued inclusion of the former Wisley airfield now known as Three farms meadows as a strategic site in the local plan. I object to the total destruction of the historic village of Ockham where I have lived my whole life. The station, small lanes, schools, doctors surgeries and general layout of Ockham is not suitable in the slightest for this massive encroachment on the green belt, they are already at maximum capacity. It would ruin every part of living in Ockham and the beautiful countryside surrounding it which we should preserve for future generations. This would be the greatest disruption to the green belt in the entire country and this is why I completely object to over 2000 houses being built in my village.

To summarise I once again want this development out of the local plan and totally object to the continued inclusion of the former Wisley airfield now known as Three Farms Meadows as a strategic site in the local plan.

Please take my reasons into consideration and understand what massive destruction this would cause to not only the people that live in Ockham but all the surrounding villages.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I would like to object to GBC’s Proposed Submission Local Plan unreservedly. As a local resident I have objected to all the proposals the GBC has put forward along with thousands of others in our area. It really is appalling that our objections have been completely ignored and the Local Plan has failed in the number of key areas to take into account or to answer our valid comments and criticisms submitted by thousands of residents and organisations in respect of the previous 2013 Draft Local Plan. What is the point of us all objecting whole-heartedly if we are just ignored. I have to say that in my opinion it raises questions about your governance and vested interests.

The meeting on 8th April regarding The Wisley Property Investments Ltd (WPIL) planning application of January 2015 (Ref: 15/P/00012) was unanimously rejected by GBC following the recommendation of the GBC Planning Officers.

The reasons for the refusal of the application were many but included that the proposed development:

(a) was an inappropriate development within the Green Belt;

(b) would have a clear and substantial detrimental impact on the openness of the Green Belt and conflict with the purposes of including land within the Green Belt;

(c) failed to demonstrate that the benefits amounted to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified;

(d) failed to comply with the objectives of policy RE2 of the Guildford Borough Local Plan 2003 (as saved by CLG Direction dated 24/09/2007) and chapter 9 of the National Planning Policy Framework;

(e) was within the 0 -400m and the 400m to 5km zones of the Thames Basin Heaths Special Protection Area, etc.

(f) would have a severe adverse impact on the safe and efficient operation of the strategic road network, and a severe impact on the efficient operation of the local road network;

(g) failed to deliver the required transport sustainability measures;
I object very strongly to the submission of the local plan, on the above reasons, specifically for The Three Farm Meadows (the former Wisley Airfield).

Council draft Local Plan Site Allocation A35 Former Wisley Airfield

We wish to object to proposed development for the following reasons:-

1. The removal of the site from the green belt.
   1. No exceptional reasons are given for the action in 1. above.
   2. Generous amounts of brownfield land is available in urban areas.
   3. The nearby villages of Effingham, Ripley, Ockham and the Horsleys will be severely affected.

5. Ockham with only 159 residences will be completely overwhelmed by 2000 dwellings up to 5 stories high.

6. Hatchford with 60 dwellings off Ockham lane would be severely affected. 2000 additional dwellings with -overtime- say 4000 cars will have very significant effects on local and main roads including safety. The A3 is often blocked by cars queuing to exit onto the M25 causing tailbacks and some “shunts”.

8. At present the roads through and around Cobham are often blocked at peak times.
   1. There is very little provision of cycling and footpaths and the increased traffic would make these activities extremely dangerous.
   2. The local rail stations could not cope with large increases in traffic and of course the car parking facilities are already over capacity/11. Air quality is of vital importance and due to the existing traffic and the number of planes this is vital and has not been given proper consideration.
3. Insufficient consideration is given to the existence of SPA, SSSI, and SNIC sites.

!3. This development was unanimously rejected by the Planning Committee on 8th April 2006 and this should be repeated for the new application.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

It is wrong to build on green belt land, destroying the countryside and natural habitats which are home to endangered wildlife.

It is wrong to take the population density of the area to the proposed level, which is higher than the majority of London boroughs. Five storey developments do not suit the area, and besides, the area does not have the infrastructure to support such a high density of residents.

The development will overcrowd the area and I object to this. The development will make traffic and parking in the local area even more treacherous. As a competitive cyclist myself, I would mock the planning team’s idea that there would be an useful/positive increase in cycling. The majority of local routes are long, windy country lanes with very little cycling safety – plenty of blind spots and no cycle lanes, putting cyclists lives at risk. The increased traffic (estimated 4,000+ cars) from the new homes would make the cycle routes even more dangerous. The routes are hardly efficient for commuting!

I believe the development will take pollution to dangerous levels that could worsen the health of local residents. Air pollution in the development area already exceeds levels recommended by the EU and this should be taken seriously.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

OBJECTION TO GUILDFORD BOROUGH COUNCIL DRAFT LOCAL PLAN (JUNE 2016) AND TO THE INCLUSION IN THE PLAN OF SITE ALLOCATION A35 – THE FORMER WISLEY AIRFIELD – FOR A NEW SETTLEMENT WITH 2,000 DWELLINGS

I write to express my objection to the removal of the former Wisley Airfield from the Green Belt.
The area serves a vital role in preventing urban sprawl and development would create an urban corridor stretching from London to Guildford. There are no exceptional circumstances established to warrant removing the site from the Metropolitan Green Belt. There is ample brownfield land in urban areas which needs to be regenerated without the need to encroach on protected Green Belt land.

The local plan as drafted poses a threat to the historic rural settlements of Ockham, Hatchford and Downside.

The potential to create an additional 2,000 homes in close proximity would be disastrous for the general area and Cobham.

The traffic congestion would be horrendous and the infrastructure simply will not cope with such a large development. The shopping and rail facilities at Cobham are already saturated.

We are supposed to have a Green Agenda but this cannot be the case when developments of this type are under consideration. Not only would air quality be severely impaired but the area is a haven for wildlife with protected species on and near the site.

Objections are supported by the unanimous rejection of Application No 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of the Planning Officers.

On this basis, I cannot comprehend why the former Wisley Airfield should be removed from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I would like to object very strongly to the plans put forward for the Horsleys and most of all to the development of the former Wisley Air Field.

The infrastructure is totally inadequate for the number of units planned. The local schools and medical facilities are already overloaded and of course there would be added strain on Guildford Royal Surrey with extra houses in this area and all the other areas within the Guildford boundaries.

The roads are not of the necessary size or structure to take the additional traffic, at times they are unable to cope already especially around school start and finish times.

There are many brown sites that should be developed without intruding on the Green Belt. It cannot be right to double the size of this area which is totally unsuitable for this size of development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO POLICY(SITE) A35 (WISLEY AIRFIELD):

- Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
- Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
- Unacceptable Conservative Party links between the developers and the Council.
- No Green Belt “exceptional circumstances” presented.
- Not a brownfield site as stated – only 15% of it.
- Proposed SCC waste site ignored.
- Loss of farming land.
- Too near RHS Wisley and Thames Basin Heath SPA.
- SANG would harm on SPA.
- Unacceptable increase in air pollution.
- No existing public transport and stations miles away.
- No proper traffic data.
- Housing density far too great.
- Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
- Access confined to inadequate narrow lanes.
- Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
- Major impact on neighbouring villages, especially Horsleys.
- No assessment made of collective impact on area of this and 6 Horsley sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Site A35 - Three Farms Meadow site - I OBJECT

The continued inclusion in the plan of Policy A35 (land at Three Farms Meadow, the former Wisley airfield, Ockham). Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. Policy A35 should be removed immediately from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA)
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined
- Insufficient information about the impact on the local water table and run-off (see comments and attached pictures on flooding in Horsley above)

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. No exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. 2100 homes on this site would present an unbearable strain on the existing infrastructure and completely alter the nature of the surrounding villages.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans. I expect few of these homes will be truly affordable to local residents and will lead to a further influx from surrounding areas and out of London and thus not meet the requirements of the local population. Rather than the families of local residents being housed, there will even more crowding in the area.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars. Residents will need to visit nearby shopping centres and will almost all rely on private transport. At present cyclists are already endangered by the number and speed of cars passing through the area and this will do nothing to improve the situation.
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads which are already congested. At present the roads are in a terrible state with numerous pot holes and the council seems to do little to maintain them.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements. The situation would be impossible during the construction phase which could last for several years.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them). The increased congestion on the road is likely to make car drivers even more frustrated and even more of a risk to cyclists and pedestrians.
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity. In addition the council seems to show no support for measures to reduce traffic on the roads such as the provision of school buses which were once in place but have now been terminated.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI). In addition, such a large development will have a major impact on views from surrounding beauty spots.

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

• Finally, I object to the loss of agricultural farmland in the area. Several farms within the Borough have already been subject to development. The continued erosion of the area’s rural heritage is a significant loss to borough.
I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

3 Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• The Council has allowed many existing houses, which would be ideal for first time buyers and those with families, to be turned into houses of multiple occupation, in order to house students, who make no contribution to Council Tax, and who are a wholly transient population. The University should be made to house their students in Halls of Residence within the purlieu of its own considerable land holdings, thereby releasing much needed housing stock.

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
  7. Guildford BC has foolishly encouraged the influx of a large and increasing number of “leisure” cyclists into the Horsleys, who block the roads every day of the week, hold up traffic (increasing air pollution) and impede residents from efficiently going about their everyday business.

• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I object to the draft Local Plan for the following key reasons:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure
enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My over-riding concern is that existing properties in areas such as ours are being told repeatedly by Council offices and SW Water that the threat of flooding is because of developments and the lack of / upgrading of infrastructure and drainage services to support those projects.

More specifically:

- The proposed removal of the Former Wisley Airfield from the Green Belt. The development proposal is creating infill of green belt areas and that has already been abused with the M25 services at Cobham. There are surely areas that require regeneration rather than developing new ones, or over populating areas such as Ockham and Ripley.
- We first moved to the Cobham area in 1987. The increase and impact of transport – both in terms of volume, and size – is staggering. Look at the weight of traffic which travels along Plough Lane – with cyclists! There is already sever congestion because the road systems are inadequate and an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.
These are old villages and hamlets which supported by infrastructure never intended for modern day living. There can’t be development with improvement in infrastructure.

- I’m a dog walker – and there is a genuine risk to pedestrians, dog walkers, and cyclists from the increased traffic volume.
- There are environmental concerns which relate to the above, and as I understand, air pollution in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels – or perhaps Brexit means that can be ignored!? In addition, what about wildlife and the changes to / loss of natural habitat.

The application shouldn’t be considered without a full impact study, and a huge dose of common sense. This is not nimby’ism – these are genuine concerns about the area I live which is rapidly under threat.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3774  Respondent: 15572993 / Laura Jamieson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe, putting my family and others in danger.
It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. RHS Wisley traffic already cause frequent congestion by traffic on local roads – there is already vulnerability and this will get worse.

1. The associated traffic increase from the RHS has not been taken into account.
2. The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis – again, more danger and potential fatalities.

The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB and destroy the far reaching countryside views for future generations. Surely there is a responsibility to maintain this?

Object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultees – Why bother to consult if you then ignore the overwhelming popular view?.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning...
Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a
proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Other: This site is not deliverable within 5 years due to problems with sewerage and water capacity, outlined by Thames Water & the OCK DVOR air traffic control beacon which limits development until 2022

- No very special or exceptional circumstances exist - Alternative sites exist
- The proposal includes the site SCC safeguarded for waste under the Surrey Waste Plan
- The site is not listed for development under the existing 2003 Local Plan
- There is not enough land to provide a sustainable community based on GBC’s own parameters
- There is no update at all to the Heritage study despite the significant Bronze Age haul found in Ockham village in May 2013 and the likelihood of further remains on the site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to STRONGLY OBJECT to the continued inclusion of the former Wisley airfield now know as the Three Meadows as a strategic site in the local plan.

I object to to total disproportionate number of housing in this part of the borough it is a massive encroachment on the green belt. It is ridiculous for over 2000 houses to be built in a village that's train station is already at maximum capacity, as are the schools and doctors. The infrastructure required for such a massive influx of people would need an entirely new village. The country roads would prove extremely dangerous to have over 2000 cars on top of the already narrow and busy roads.

I object as it would totally ruin the beautiful and historic village of Ockham that has been lived in for generations of families.

To conclude I once again fully and wholeheartedly object to the inclusion of the former Wisley airfield now know as the Three Meadows as a strategic site in the local plan.

Take it out. Save this beautiful village for future generations in this already rapidly decreasing green land.

I object very strongly to the inclusion of Three Farms Meadows in the draft local plan for so many reasons.

I object to the fact the council has still not removed this site from the local plan, despite receiving thousands of objections from the local residents. This is a waste of tax payers money as it has been ignored by the council.

It's further from railway stations the any other identified strategic site. Which are at full capacity anyway.

It's close to junction 10 of the M25, which is one of the most congested junction in the country, this would cause further congestion in an already congested area.

There are narrow country lanes surrounding the area, which allow no pavements or lighting for people to travel at night, it's unrealistic and unsafe to assume people will travel this way.

I consider for the reasons listed above and multiple other reasons that this plan should not be put forward. Unlike previous objections, I hope you take this seriously and listen to the local residents, this is where we live and it means a great deal to us. Hence why we have objected so many times.

Objection to Guildford Borough Council draft Local Plan (June 2016) and to the inclusion in the Plan of Site Allocation A35 - the Former Wisley Airfield - for a new settlement with 2,000 dwellings.

I am writing to object to the removal of the former Wisley Airfield from the Green Belt, and the proposed increase in housing in our surrounding area.

I object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford. And no exceptional reasons have been given for this to happen. With so many brownfield sites in urban areas to be regenerated this is an outrageous grab to take away our precious and prized Green Belt that can be enjoy by all now and HOPEFULLY in the future for our children. That’s if Guildford Council do not chip away at it.

I also object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham. This will have a huge knock on effect to our circumstances in historic Downside Cobham where I live, in regards to the traffic, noise, oversubscribed school places, the struggle to get a GP appointment, and the already extremely over packed commuter trains from Effingham Junction as well as the constantly full station parking. There are no footpaths, cycle paths and very fast traffic along the lanes in the area approaching Effingham station so you have to commute by car to the station. Alternative stations such as Cobham and Stoke D’Abernon, Weybridge, or Esher are also at capacity, if not more so. It is already a battle to get to work, please don’t make it even harder for us.

In Downside we already suffer with the noise and pollution of the M25 and service station, the development of more housing will add to this problem with all of the building site traffic on our narrow roads, and the pollution this will cause. The infrastructure to support such an increase in housing is blatantly NOT in place and there is absolutely no plan to invest in such infrastructure before or after such an increase in population. Guildford Council will be a disgrace to
approve these increases and the removal of the Green Belt, damaging our way of life, and the natural wildlife we are surrounded by.

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to
the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5884  Respondent: 15576961 / Jacqueline Edney  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

I am writing to object to the removal of the former Wisley Airfield from the Green Belt, and the proposed increase in housing in our surrounding area.

I object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.

I also object to the disproportionate allocation of a proposed increase in housing to the nearby localities of Ockham, Ripley, the Horsleys and Effingham. This will have a huge effect to our circumstances in Downside, where I live and Cobham. Cobham is the nearest shopping centre to the proposed development and the increase in traffic on the narrow country roads is not acceptable. 2,000 new houses means in my estimation around 4,000 cars (especially as the development is not serviced by mass transit services). These extra vehicles will result in increased traffic jams, weight of traffic at peak times, noise and pollution. In Downside we already suffer with the noise and pollution from the M25 and the MSA, the development of more housing will add to this problem with all of the building site traffic during the construction phase.

I also think it's a tragic shame that the plan calls for the immolation of historic Ockham. This lovely hamlet is set to be subsumed into the developed area with high rise urban style buildings!

The Green Belt was intended and implemented to stop London sprawling. Stop trying to punch holes in it and forever ruining the character of not only Surrey but the whole of the South East.

I am writing to voice my objection to the I plan from the green belt.

There are ample brownfield sites available. We do not want urban sprawl.

Not least the harmful impact on the strategic road network the A3 and M25 on an already overcrowded road with many accidents.

Plus the air pollution would be worst at an area which exceeds EU permitted limits.

There is NO suitable public transport and local stations are already overloaded. They are citing Cobham as the nearest station which is a complete joke.

The Planning officers have agreed on the identified concerns

The former Wisley airfield is entirely unsuitable for use as a new ‘town’. The site was requisitioned by the Government for wartime purposes with a promise that it would be returned to agricultural use in due course - that promise should now be honoured. The land is Metropolitan Green Belt land except for about 15% consisting of the old concrete runway and apron.

A planning application for temporary use of the site for filming was rejected in 2014 and later refused on appeal, the Inspector stating that the development would be detrimental to the Green Belt and would likely cause harm to local environmentally sensitive sites. A much more substantial planning application for a small town of some 2,100 homes, medical centre, schools and supermarket was last year submitted by the owner, Wisley Property Investments, but was recommended for refusal by the Council officers and then rejected unanimously by a special meeting of the Planning Committee, who totally agreed with the 14 main reasons for refusal by the officers. I will not list all the reasons here because the Inspector will have access to the Council’s files, but my objections include:
- loss of Green Belt
- loss of good quality agricultural land
- danger to nearby environmentally protected sites
- totally unacceptable traffic problems, including dangerously high pollution
- no infrastructure and no transport links (except A3)
- overdevelopment and unacceptable housing density
- five-storey buildings, totally out of keeping with the Surrey countryside
- detrimental impact on Surrey skyline and increase in light pollution.

I will emphasise the traffic problems this development would cause. Some 4,000 cars would be added to the area’s roads, causing more congestion on the A3 into Guildford and at the junction with the M25 (J10), where pollution levels often exceed permitted levels already and are too high to allow schools to be built on the site. The proposed new A3 junction at Wisley would have to accommodate a large increase in traffic from all directions, while Ripley and East Horsley would be seriously affected.

The fact that the scheme involves local road closures and one-way streets is a clear demonstration of how impractical the scheme is. The Council’s comprehensive rejection of this scheme renders any large-scale development of the site out of consideration: it is not practical, viable or sustainable. Indeed, the Council’s Leader and Lead Councillor for Planning said the scheme failed the Council’s sustainability test ‘dismally’. Why, then, has the Council not removed the site from the Local Plan which would be logical in light of its fundamental unsuitability? I merely point out that Wisley Property Investments has links to the Conservative Party, including its ‘front man’ who happens to be the lead councillor for planning for the Conservative-controlled Vale of the White Horse District Council in Oxfordshire.

The site should continue to be used for agricultural purposes, while the runway and apron could be used for a solar farm or for hydroponic horticulture (no need to remove the eight-foot deep concrete at great expense

**I object to building on Wisley Airfield.**

This plan has been poorly thought out - the proposal to build over 2000 houses on this site, adjacent to the tiny village of Ockham, will cause immeasurable damage to the surrounding area. It would totally change the character of the area, and have an enormous negative impact on residents of all the local villages. RHS Wisley and the Thames Basin Heath Special Protection Area are adjacent to this site - these are extremely important nationally in terms of promoting and protecting wildlife; the construction of a new town nearly on top of these areas would be extremely damaging.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I am writing about the plans for a housing development on a greenbelt site. The government is always saying that brownfield sites will be used, and yet there seems to be an ever increasing number of developments.

The objections are the following:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objection to Guildford Borough Council draft Local Plan (June 2016)

and to the inclusion in the Plan of the development at the former Wisley Airfield site.

I wish to object to the inclusion in the draft Local Plan of the development of 2,000 dwellings at the former Wisley Airfield site.

It seems bizarre to see the site included in the draft Plan since it was only in April that the Council itself turned down an application for a development which in essence was similar to that in the Plan. Presumably therefore the Council then accepted most if not all of the objections to the application: these apply equally to the development outlined in the draft Plan.

I shall list here only those issues which would impact in particular on Cobham. Those who live in the Borough of Guildford will doubtless have many other concerns in addition.

First, the Wisley Airfield is in the Green Belt. It is an essential part of the purpose of the Green Belt to prevent continuous urban sprawl. If this site were to be developed, there would be pretty well continuous development between London and Guildford. The Council should look instead for the development of brown field land which needs regeneration.

Second, the transport infrastructure in the area is already under very considerable strain and cannot take more. The Wisley Airfield development would be likely to bring into the area an additional 4,000 cars plus all the HGVs, vans, and so on required for servicing the households in the area.

It is true that over the next few years Junction 10 of the M25 is to be remodelled, but this is to cope with the present traffic and any likely expansion which can already be foreseen, not yet further additions. In any event, that would not help with other current tailback issues such as at the junction of the A3 at Painshill with the A245 and at the junction at Esher/Oxshott with the A244.

There would also be additional strain on the narrow local roads. There is very little public transport and the large majority of residents would have to use their cars.

Third, air pollution. Parts of Cobham already have high levels of air pollution. It would be likely that Cobham would be used by the residents of the Wisley development as its nearest shopping centre and this would add yet further to the pollution.

RSPB Comment:

For ease of reference we deal with all of our concerns with the proposed allocation of the former Wisley airfield (A35) for development here, including the relevant provisions within the Habitats Regulations Assessment of the Submission Plan.

The RSPB considers that there are inherent inconsistencies between the stated aims of the Plan and the inclusion of the former Wisley airfield which are central to the overall soundness of the Plan. The Foreword to the Plan states that:

“It also outlines how we will conserve and enhance the unique qualities of our natural and built environment, especially in the Surrey Hills Area of Outstanding Natural Beauty and Thames Basin Heaths Special Protection Area. This Development Plan Document sets out how we propose to meet these conflicting demands” (p5).

The Foreword continues:

“Whilst we will conserve and enhance our special landscapes, the Local Plan aims to balance protecting the borough’s unique environment with meeting our social and economic needs.”

The RSPB submits that this statement gives a clear expectation that protection will be accorded a higher priority than development in circumstances where there are conflicts between the need to provide housing and the need to protect nature conservation interests. A key factor is that existing protected areas must be conserved in situ, whereas there is greater flexibility to decide where future housing allocations will go.

The RSPB notes Strategic Objective 6 of the Plan: “To protect those areas designated as Thames Basin Heaths Special Protection Area, Special Areas of Conservation, Sites of Special Scientific Interest and Areas of Outstanding Natural Beauty for their biodiversity and landscape characteristics.” In addition we note Strategic Objective 7: “To ensure that new development is designed and located to minimise its impact on the environment and that it mitigates and is adapted for, climate change.” All of Strategic Objective 6, and the first part of Strategic Objective 7, are pertinent to the proposed allocation of the former Wisley airfield. The RSPB consider that the inclusion of the former Wisley airfield represents a clear failure by the Council to meet its requirement to conserve its internationally designated areas and has placed development demands first, and is a failure to meet the strategic objectives it has set itself. These clear internal inconsistencies demonstrate that the Plan is not the most appropriate when considered against reasonable alternatives and that the Plan consequently fails the “justified” test of Soundness.

The RSPB notes that policy S1, Presumption in favour of sustainable development, states:

“We will work proactively with applicants jointly to find solutions that mean that proposals can be approved wherever possible, and to secure development that improves the economic, social and environmental considerations in the area.”

However, this does not mean that it will be possible to find appropriate solutions to allow the development to go ahead.

Policy H1, Homes for all, makes it clear that “Sites should not significantly impact on the visual amenity and local character of the area or adversely affect an environmentally sensitive location.” We contend that this policy presumption should be applied throughout the plan, with a key bearing on the evaluation of sites that are proposed for inclusion as allocations within the Plan.

We note that the supporting Policy P2, Green Belt, states that “If major previously developed sites are of sufficient scale and do not possess an open character, it is not considered necessary for them to remain within the Green Belt.” (para 4.3.14). However, a visit to the former Wisley airfield clearly indicates that, aside from a runway and adjoining apron that the site is clearly open in character, a fact borne out that the first reason given by the Planning Officer’s report into the Wisley application recommended refusal for the “clear and substantial detrimental impact on the openness of the Green Belt” (Officers’ Report, para 2.1).
We note the following statement in Topic Paper “Green Belt and the Countryside”:

“Given the significant constraints that exist to the north and south of the borough (Thames Basin Heaths Special Protection Area and Surrey Hills Area of Outstanding Natural Beauty), we are left with a ribbon across the central part of the borough that remains potentially suitable for development.” (para 4.66)

On the basis of this statement from the Council, the RSPB questions why the decision has been made to ignore the constraints highlighted here and to propose removing the former Wisley airfield from the Green Belt for the provision of housing, particularly given its proximity to the Thames Basin Heaths Special Protection Area.

Later on, the Topic Paper states:

“Part of the extended Green Belt land is proposed to be designated as Suitable Alternative Natural Greenspace (SANG) which will be retained as open space in perpetuity. This is consistent with the objectives of the NPPF to enhance the beneficial use of the Green Belt.” (para 4.94)

We contend that there are clear tensions between this statement and the provisions set out within the Plan to release existing green belt land for delivery for a major development and SANG, which appears to be developing green belt land for housing at the Wisley airfield site, with attendant risks to the Thames Basin Heaths Special Protection Area, whilst at the same time proposing to turn land into SANG and add it to the green belt. This adds further support to our contention that the Plan is not the most appropriate when considered against reasonable alternatives and that it therefore fails the “justified” test of Soundness.

We also note that that the plan explains that it is unable to accommodate all of the new development, leading to the release of land at other sites, including Wisley (para 4.1.8). This clearly indicates that this proposed location is not sustainable, a point that we have raised previously in our objections to the recent planning applications.

**The RSPB’s concerns with the site**

We highlight here the key concerns which we raised on the recently rejected planning application for the former Wisley airfield, that we consider are central to the inclusion of the site as an allocation in the Local Plan. We focus on concerns we raised about the general suitability of the site, as we consider that these are so fundamental to the site that they cannot be resolved by the promotion of an alternative development scheme on the site.

The RSPB highlighted that

“the location of the SANG between the development and the SPA will actually draw people towards the SPA and would end up simply providing new residents with a route to the SPA. Clearly, this defeats the object of providing a SANG.” (RSPB objection letter, 25 March 2015)

We further stated:

“Whilst we understand the developer’s desire to locate the SANG in the 400m zone as built development is highly unlikely to be permitted we consider that the constraints this has on its design is likely to introduce pinch-points and compromise the SANG’s effectiveness.” (RSPB objection letter, 25 March 2015)

Finally the RSPB stated:

“The RSPB’s view is that the existing PROW [Public Rights of Way] fundamentally and unavoidably compromise the functionality of the SANG as an avoidance measure.” (RSPB objection letter, 12 February 2016)

It is important to note that as a result of the multiple rights of way run right across the whole development site and into the SPA, providing ready access to the SPA to residents of any housing scheme that is constructed on this site, it is our view that no housing allocation is appropriate in this location.

**The Habitats Regulations Assessment**
It is important to note the caveats associated with the evaluation of this particular allocation that the HRA uses to make its inclusion in the Plan appear acceptable. It states that bespoke SANGs “if provided to an appropriate standard and in a timely manner will provide a suitable avoidance measure” (p39). There are two key issues here: firstly whether, as highlighted above, it will be possible to provide a SANG of an appropriate standard, given the physical constraints of the site (long and narrow), and the presence of the multiple public rights of way. Secondly, it will be essential that this bespoke SANG is ready for the first residents to move in and that the ongoing development does not affect the tranquillity of the scheme. The designs promoted for the recently refused planning application do not offer confidence on either front. We disagree with the conclusion of the Plan HRA that it will be possible for the Council and Natural England to be content with the SANG provided on site (p39), for the reasons we highlighted in our section above considering our concerns with the site.

The HRA acknowledges that part of the site is located within the 400m zone of the Thames Basin Heaths Special Protection Area and that it would be this part of the site which would provide the SANG for the development and notes that a subsequent application level assessment will be required (para 7.3.9). The RSPB respectfully disagrees with the assertion of the HRA authors that

“It is not the purpose of this HRA to determine the deliverability and suitability of the SANG identified above in line with Natural England’s SANG Criteria, merely to determine if the identified SANG provides suitable capacity to support the quantum and location of housing planned within the Plan.” (para 9.3.5)

As set out above in relation to our concerns about the recently rejected scheme, we do not consider it likely that a project level assessment will be able to adequately exclude the risk of harm to the Special Protection Area, as we do not believe a SANG at this development site can be effective in drawing residents away from the SPA as a result of the Public rights of way network on the site. As this information is already known and was available to the authors of the HRA we consider it inappropriate to rely upon such an approach here – the issues of concern are ones which are not capable of being resolved at the application level. Part of the role of the HRA of the Plan should be to evaluate the likelihood that a project-level assessment can be passed – helping to give a clear understanding of the likely deliverability of key sites: the former Wisley airfield is expected to deliver 14.4% of the Borough’s overall housing until 2033 – so it is essential that any risks to such a site coming forward should be clearly evaluated.

What changes do you suggest should be made to the document?

Policy A35, and associated references to it should be deleted.

If you are proposing a change to the Proposed Submission Local Plan: strategy and sites, do you wish to express an interest in participating at the Examination? Yes

Why do you wish to participate at the Examination?

The issues surrounding this proposed allocation are of sufficient complexity that it is necessary to be able to address comments provided by other parties and engage in discussions at the Examination hearings.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The proposed development of further large scale housing, retail, commercial, traveller and schools on the former Wisley Airfield site is ill judged and wholly inappropriate. The impact of a sudden addition and development of over 2000 properties on the Wisley Airfield site would be enormous on the surrounding villages, which have gradually developed in a sustainable manner over a very long period of time. This is now under threat and such development proposals will ruin and change the nature of our community beyond repair forever. I am opposed to these development proposals in any shape for form.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am sure you (councillors, developers and investors) are all aware of the many, many objections to this plan.

My objection is simple, the drainage for rain water run off from this proposed elevated developed site has not been thought through.

To me it is plainly obvious that if there is any weather 'event' resulting in above normal rainfall (even normal rainfall often causes problems) the adjacent Wisley Lake (or Bolder Mere) will flood resulting in a flooded A3 and probably the M25 not to mention the nearby River Wey and Mole Valley which already floods regularly.

Any increase in concrete in this sensitive area will have dire consequences for all surrounding districts.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
As residents of Ripley, my family and I have studied with interest the Local Plan and the wealth of carefully argued objections that you have received. We cannot offer any points that have not already been covered; but would endorse the comments that have been made and would underline, once again, the strength of feeling amongst the local community against what is being proposed. We note in particular the lack of logic in retaining the proposed Wisley Airfield development in the Plan, in spite of the fact that Officers and Councillors comprehensively rejected that proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to The Former Wisley Airfield being included in the Draft Local Plan, leaving nearby to this site and seeing on a daily basis the already serious traffic issues around the M25/A3 junction I am shocked that the Councillors wish to see it increase. To include this site is crazy it is unsustainable! The local plan is all about sustainability so I am shocked that Councillors are allowing this site to be included. Please see sense and remove The Former Wisley Airfield from the Draft Local Plan. I also object to the erosion of the Green Belt, once it is gone, we will never be able to get it back, please make sure the Guildford Councillors are not responsible for such a serious mistake.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Proposal to remove the Horsleys from the Green Belt, the Proposal to extend the boundaries of the settlement areas of the Horsleys and the Proposed Submission Local Plan: Policy A35, land at former Wisley Airfield, Ockham

I am writing in connection with the proposal to remove the Horsleys from the Green Belt, the proposal to extend the boundaries of the settlement areas of the Horsleys as well as the proposal to develop over 2000 homes at what was once the Wisley Airfield in Ockham to all of which I object for the following reasons:

1. **The proposed changes represent a fundamental breach of Metropolitan Green Belt rules:** The GBC’s Planning Officer said in relation to a previous planning application in relation to the Wisley Airfield site in
rejecting the application said "It has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified".

It is clearly stated in Ministerial Guidance that **unfulfilled housing need does not qualify as very special circumstances** and therefore the removal of this site from the Green Belt is entirely unjustifiable in relation to the Metropolitan Green Belt rules.

1. **The proposed site at Wisley Airfield does not meet acceptable levels of Sustainability**

In its Sustainability Appraisal of the Guildford Borough Local Plan issued in June 2016 AECOM rated this site as the worst of the six sites in terms of sustainability with 8 out of the 21 criteria graded as Red (poor sustainability).

Amongst the factors that influenced this grading are the following: no public transport currently servicing the area, the nearest train stations are more than 3 miles away, there is insufficient parking at both local stations to accommodate additional commuters, there are no schools or medical services, new roads will be needed as travel from the proposed site will depend on motor vehicles etc.

In essence this is a proposal to create a large scale green field settlement in a poorly sited green field location.

1. **The site will have a severe impact on local traffic and infrastructure:**

The roads around East Horsley are to say the least poor with many being little more than winding lanes without pavements and the main through roads Forest Road and Ockham Road South and North pass through residential areas that are in many places narrow and unlit. Any increase in the local population will only put added pressure to the volume of traffic going through the village centre and in and around Horsley Station and Effingham Junction Station which will add to the congestion at peak hours. The likely further traffic congestion at the A3 / M25 intersection will only exacerbate the existing problems.

Other facilities in the Horsleys such as schools and the East Horsley Medical centre will not be able to cope with the additional population planned as a result of the Wisley Airfield and proposals for housing in the Horsleys.

4. **The development is totally out of keeping with the local character, context and distinctiveness:**

East Horsley with 1,760 homes is currently the largest settlement borough outside Guildford itself with a housing density of 8.1 dph within its settlement area. The proposal at Wisley Airfield is to build 2,100 homes, which is 19% more housing than in East Horsley at a density of 6 times as much (49.1dph) which is similar to that utilised in a metropolitan area. This sort of development is completely out of character for an area of rural Surrey and the character of the whole area would be irreparably damaged if the Wisley Airfield development goes ahead.

5. **New homes in the Horsleys:**

The plans indicate a further 173 homes in East Horsley and 420 in West Horsley, a total of

1. **This results in an approximate increase of households of 10% in East Horsley and 35% in West Horsley. This will substantially increase the volume of traffic in the village not least when added to the likely number of motor vehicles if the proposed Wisley Airfield development also takes place. It will also put a strain on the village facilities such as schools, the medical centre and the stations all of which are at capacity now.**

In summary it appears to me that the proposals for new homes in the Horsleys and at Wisley Airfield have been poorly thought out with little regard for the Metropolitan Green Belt rules. There has been a complete failure to consider the impact on the infrastructure and environment across a widespread area, the strain on local facilities and the fact that the proposed developments are totally out of character for the rural area of this part of Surrey.
I would therefore urge Guildford Borough Council not to countenance any development at the Wisley Airfield site and to considerably reduce the planned housing increase in the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6068  Respondent: 15583329 / Robert Morgan  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) in particular to the obscene scale of development in the Horsleys and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs. It’s frankly a disgrace that it continues to be considered when it’s categorically not a suitable site for a new town.
- I object to the detrimental impact the proposed town at Wisley will have on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a
proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

- With regards to the Horsleys specifically I am very concerned about the following:
  1. The in setting of the East Horsley settlement area from the Green Belt and the associated implications for development
  2. The scale of proposed development in West Horsley (35% increase) is totally absurd and will ruin the area for good. I see no proposed infrastructure improvements to cope with such a large number of new houses

This area of the Borough is attractive to residents because of its characteristics – a feeling of spaciousness, access to the countryside and infrastructure utilisation that makes for a high standard of life. The proposed development will unquestionably immeasurably worsen the lives of the existing residents because of the vast scale proposed. Limited development that is of an order of magnitude that befits the areas where it is proposed must be the only acceptable solution.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I am writing to register my profound dissatisfaction with the amended local plan 2017. I live in Horsley and I am appalled at the scale of development the plan presents. It amounts to a zero sum game where more people will be using the same infrastructure meaning a worse quality of life for existing residents. Overall I would make the below comments:

- Including the proposed development at Three Farms Meadow, Horsley and the surrounds are shouldering far too high a proportion of the Plan’s housing proposals. Large scale housing should be built on brownfield and be placed around infrastructure that can support it.
- I am especially concerned about removing Horsley from the green belt meaning the villagers will be living under constant threat of development in places like the wonderful Horsley Tennis club or Kingston Meadows.
- On the ludicrous proposals for the new town at Three Farms Meadows I have the below comments:
  - It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
  - It is further from railway stations than any other identified strategic site making it both unsustainable and a community reliant on cars thereby worsening the already appalling traffic.
  - It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
- Local roads are at capacity.
- Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
- There is insufficient employment available onsite so that almost all residents will have to travel to work.
- It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
- I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
- I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
- I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
- I object to the removal of additional 3.1 ha from the green belt without any justification.
- I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
- I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
- I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
- I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
- I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
- I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
- I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
- I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
- I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
- I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
- I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
- I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
- I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
Based on the above I consider the plan not fit for purpose. We are privileged to live in a sought after and beautiful part of the country. It’s incumbent upon us to preserve its character, open space and heritage. This plan equates to a decimation based on spurious housing numbers which, if enacted, would tarnish this area forever.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. **Proposed Submission Local Plan: Strategy and Sites 2016 – Part 2 Sites**

Objections are related to particularly high volume inappropriate developments in the green belt and lack of exceptional circumstances.

- **A35 LAND AT FORMER WISLEY AIRFIELD (Objection)**
  - 2000 homes? Too large, unsustainable, and the developers’ marketing desire to brand this “brownfield” development is simply untrue, as anyone aware of the history of the site is aware.
  - This is disproportionate green belt development with no supporting infrastructure whatsoever. The M25 and A3 and local roads simply cannot cope with this high increase in car journeys, they are often gridlocked today, and public transport in the area barely exists. The suggestion of securing a bus service “in perpetuity” is highly misleading by the draft plan authors, will Guildford be purchasing their own bus franchise and setting eternal terms and conditions and bus routes? We think not. Such a feat “in perpetuity” is impossible, and in fact Effingham barely has a bus service today. The roads and facilities in adjoining villages will suffer significantly through this lack of infrastructure and misleading positioning by the authors.
  - Guildford’s own planning committee refused this development recently and we are mystified as to why this is included. It suggests something here does not ring true and requires closer scrutiny.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**Comment ID:** PSLPS16/6074  **Respondent:** 15583649 / Sheila Attridge  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT also to Policy A35 (Wisley Airfield):

- This should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
- There is the question of the irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
• No Green Belt “exceptional circumstances” are presented.
• This is not a brownfield site as stated – only 15% of it.
• Proposed SCC waste site is ignored.
• Loss of farming land.
• The site is too near RHS Wisley and Thames Basin Heath SPA.
• SANG would harm on SPA.
• Development will aggravate traffic jams at A3 roundabout and M25 Junction 10.
• There would be an unacceptable increase in air pollution.
• No existing public transport, and stations are miles away.
• No proper traffic data exist.
• Housing density would be far too great.
• Over 2,000 houses would swamp and destroy Ockham conservation area, with impact on listed buildings.
• Access is confined to inadequate narrow lanes.
• The water table and surface water flooding are not considered either for site itself or for downstream areas on River Mole.
• There would result a major impact on neighbouring villages, especially the Horsleys (see above).
• No assessment has been made of the collective impact on area of this and 6 Horsley sites (see above).

It is my belief that this policy would be catastrophic for the character of the area and the well being of existing residents. I OBJECT in the strongest possible terms

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPS16/6085  **Respondent:** 15583745 / Jane Friend  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Proposed Submission Local Plan: Policy A35, land at former Wisley Airfield, Ockham. I OBJECT to the inclusion of this site as I believe it is a fundamental breach of the Metropolitan Green Belt Rules.

Earlier this year this site was refused planning permission on over 14 counts – why on earth is it back in?

The proposed development represents a fundamental breach of Metropolitan Green Belt rules: The site forms part of the Metropolitan Green Belt. Under the NPPF, development on such Green Belt land is only permitted under ‘very special circumstances’. GBC’s Planning Officer, in assessing a previous planning application from the developer of this site, rejected their application, arguing that: “It has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified”.

Ministerial guidance has repeatedly confirmed that unfulfilled housing need does not qualify as a very special circumstance. Whilst the developers’ previous planning application was judged and rejected based upon the 2003 GBC Local Plan, the proposal to include this site within the 2016 Proposed Submission Local Plan does not fundamentally change the argument against it. Any removal of this site from the Green Belt can only be made based upon ‘exceptional circumstances’, which cannot be justified on the basis of unfulfilled housing need. If this was the case, then the entire Metropolitan Green Belt would already have become filled with housing. Removal of this site from the Green Belt is totally against its rules, regulations and underlying spirit. The site location at the edge of the M25 circle represents a ‘first line of defence’ against metropolitan encroachment into the Surrey countryside. If this site is developed then it becomes only a question of time before Guildford itself is absorbed into the sprawling London conurbation.

I trust that you will take my views into account, and I would appreciate acknowledgement of receipt of this letter.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the inclusion of Policy A35 Three Farms Meadows because it is the least sustainable strategic site identified in this draft Local Plan - further from railway stations, adjacent to the most congested stretch of the A3, and the most congested Motorway Junction on the M25 (J10), and local roads will not be able to cope with the projected volume of additional traffic that will result. There will such a considerable impact on local facilities such as the Medical Centre in East Horsley, local schools and other amenities that those who live here already will have to look further afield, putting additional pressure on surrounding areas.

I believe that the proposal to develop over 2,000 new houses at Ockham - and also the proposed development on Ockham Road North - will not only significantly damage the local infrastructure, which is already stretched, but also have a serious and long lasting negative environmental impact.

I represent the owners of an international horticultural business in Cobham which owns land in Cobham and Ockham. Our Ockham site is very important for the development of the business and there are regular movements between the two sites of Tractors and cultivation and/or harvesting equipment. We also have vehicle movements between the two sites moving commercial stock.

We object very strongly to the re-inclusion of the Former Wisley Airfield/ Three Farms Meadows site into the Borough Local Plan after it was rejected as a suitable site for housing by the full planning committee and the planning department of the Borough.
We object to the plan’s proposal to remove the Wisley airfield / Three Farms Meadows from the green belt and we also strongly object to the similar proposals to build on green field sites in the Parish’s of East and West Horsley, Send and Ripley, and to the removal of these parish’s or parts of them from the Green Belt.

We object to the loss of the Agricultural land at The Farms Meadows through the proposed development there. Good agricultural land is a declining resource.

We object to the proposed development of the various sites in the parish’s of East and West Horsley, Ockham, Ripley and Send because they cannot happen without a big investment in services and this major requirement is hardly mentioned. Already the district is struggling with overflowing sewerage, with shortages of other utilities of Gas, water and electricity supplies. There is already a desperate shortage of school places for all age groups in this area of Surrey; Medical services are also fully stretched and inadequate for more clients. The Hospital will need to expand too.

We object to the proposals to increase the number of houses in this area by such a large amount on an annual basis. The road infrastructure is inadequate. The roads were developed in the days of the horse and cart, are narrow and cannot be widened easily because they are bounded by hedges. There are few footpaths and no cycle lanes or lighting. The mix of pedestrians, cyclists and ridden horses with fast cars and trucks are a recipe for disaster and litigation if no planning consideration was made. Due to the high traffic movements and the high number of goods vehicles using these lanes they are now breaking up. The area has some of the worst roads in the county.

We object to the proposed development of the Former Wisley Airfield on health grounds in that the site is very close to the major trunk roads of M25 and A3 and junction 10 of the M25. I have personally experienced discomfort due to the air pollution engendered by the traffic when walking on Ockham Common which is very close to the site when the wind is from the North round to the South East.

I object strongly to the development because of its likely affect on the Wisley and Ockham commons, part of the Thames Basin Heath Special Protection Areas, particularly considering atmospheric pollution, increased footfall and dog exercising on these fragile environments.

We object to the cavalier attitude of the planning department, the planning committee and their subcontractors in devising a housing need without consideration and planning for the infrastructure needed to establish their proposals. If it were a business making such poor plans they would quickly lose their money and become bankrupt. We object as taxpayers that we would have to bear the financial consequences of the planning incompetence’s

We strongly object to the proposals because of the effect on the picturesque villages which have a high number of old and historic houses, many listed. The proper development of The Borough should be to increase the number of high rise buildings in the centre, now that Guildford is a city, with schemes such as the station development, lesser rise building should be encouraged in the suburbs of Guildford.

We object to the lack of planning for work and employment for the residents of these developments. They cannot all take the train to London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8. I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9. I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10. I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Proposal to remove the Horsleys from the Green Belt, the Proposal to extend the boundaries of the settlement areas of the Horsleys and the Proposed Submission Local Plan: Policy A3J, land at former Wisley Airfield, Ockham

I am writing in connection with the proposal to remove the Horsleys from the Green Belt, the proposal to extend the boundaries of the settlement areas of the Horsleys as well as the proposal to develop over 2000 homes at what was once the Wisley Airfield in Ockham to all of which I object for the following reasons:

1. The proposed changes represent a fundamental breach of Metropolitan Green Belt rules: The GBC's Planning Officer said in relation to a previous planning application in relation to the Wisley Airfield site in rejecting the application said "It has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified".

It is clearly stated in Ministerial Guidance that unfulfilled housing need does not qualify as very special circumstances and therefore the removal of this site from the Green Belt is entirely unjustifiable in relation to the Metropolitan Green Belt rules.

2. The proposed site at Wisley Airfield does not meet acceptable levels of Sustainability

In its Sustainability Appraisal of the Guildford Borough Local Plan issued in June 2016 AECOM rated this site as the worst of the six sites in terms of sustainability with 8 out of the 21 criteria graded as Red (poor sustainability).

Amongst the factors that influenced this grading are the following: no public transport currently servicing the area, the nearest train stations are more than 3 miles away, there is insufficient parking at both local stations to accommodate additional commuters, there are no schools or medical services, new roads will be needed as travel from the proposed site will depend on motor vehicles etc.

In essence this is a proposal to create a large scale green field settlement in a poorly sited green field location.

3. The site will have a severe impact on local traffic and infrastructure:
The roads around East Horsley are to say the least poor with many being little more than winding lanes without pavements and the main through roads Forest Road and Ockham Road South and North pass through residential areas that are in many places narrow and unlit. Any increase in the local population will only put added pressure to the volume of traffic going through the village centre and in and around Horsley Station and Effingham Junction Station which will add to the congestion at peak hours. The likely further traffic congestion at the A3 / M25 intersection will only exacerbate the existing problems.

Other facilities in the Horsleys such as schools and the East Horsley Medical centre will not be able to cope with the additional population planned as a result of the Wisley Airfield and proposals for housing in the Horsleys.

4. The development is totally out of keeping with the local character, context and distinctiveness:

East Horsley with 1,760 homes is currently the largest settlement borough outside Guildford itself with a housing density of 8.1dph within its settlement area. The proposal at Wisley Airfield is to build 2,100 homes, which is 19% more housing than in East Horsley at a density of 6 times as much (49.1dph) which is similar to that utilised in a metropolitan area. This sort of development is completely out of character for an area of rural Surrey and the character of the whole area would be irreparably damaged if the Wisley Airfield development goes ahead.

5. New homes in the Horsleys:

The plans indicate a further 173 homes in East Horsley and 420 in West Horsley, a total of 593. This results in an approximate increase of households of 10% in East Horsley and 35% in West Horsley. This will substantially increase the volume of traffic in the village not least when added to the likely number of motor vehicles if the proposed Wisley Airfield development also takes place. It will also put a strain on the village facilities such as schools, the medical centre and the stations all of which are at capacity now.

In summary it appears to me that the proposals for new homes in the Horsleys and at Wisley Airfield have been poorly thought out with little regard for the Metropolitan Green Belt rules. There has been a complete failure to consider the impact on the infrastructure and environment across a widespread area, the strain on local facilities and the fact that the proposed developments are totally out of character for the rural area of this part of Surrey.

I would therefore urge Guildford Borough Council not to countenance any development at the Wisley Airfield site and to considerably reduce the planned housing increase in the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</tbody>
</table>
I object most strongly to Guildford Borough Council draft local plan (June 2016) and to the inclusion in the plan of Site Allocation A35 - the former Wisley Airfield - for a new settlement with 2000 dwellings.

Point 1. Erosion of the Green Belt.

I am a resident of West Horsley (my address is [redacted]) and my son and his family also live in Horsley. I moved to this area 4 years ago drawn by the unspoilt quality of the area and the sense of community in the village. The fact that these villages are in the Green Belt is fundamental to the reason why there has been tight control on housing development in these villages, maintaining the rural nature of this whole area. I strongly object to removing East and West Horsley from the Green Belt. The Green Belt is one of the best controls established in this country to make sure that we hold on to our green space, if we allow this to be lost in this area we will open the door to a steady urbanisation. This should not and need not happen.

Point 2. The Extent of Development Proposed

The proposed plan includes at least 148 more homes in E. Horsley, at least 385 more homes in W. Horsley, plus 2,068 homes on the Wisley site (2.1 miles away) 400 more at Burnt Common (3.2 miles away) and 2,000 at Gosden Hill Farm (4.2 miles away). This amount of development in such a small area borders on the ridiculous! There is no doubt that we need to be able to provide affordable housing for young people in this country but there have to be better ways than this - explosive housing development in a rural area. The social impact of radical change like this is never good.

Point 3. Pressure on Roads, Parking, Education and Medical Facilities

In all these development plans very little attention has been placed on the infrastructure that will be necessary to support the extra people who will be living in these new homes - the cars they will be driving, the schools the children will need and the medical services that will need to be stretched beyond the way they are now to accommodate so many more people. Just adding up the number of new homes in the developments described above gives a total of 5,000 new homes with a knock on of at least 5,000 extra cars (probably more), 10,000 plus more people to be catered for by NHS facilities and certainly several thousand children to be educated.

Lack of Imagination Developing Brown Field Sites

There is ample brown field land in areas not in the Green Belt. It is surely better to develop these and protect our green spaces for generations to come. Why, for example, in a small island like ours do we not encourage more apartment living? A broad sweep of development may well be an 'efficient' way of increasing our housing stock and is an approach which I am sure will be welcomed by building developers! But what is needed in these communities is flexible and moderate development which takes into account both the value of the rural environment and the capability of essential social facilities to support the housing development.

The development of the Wisley airfield site in Ockham would have a massive negative impact on the area, entirely changing the environment for existing residents and blighting daily life for all concerned. Public facilities are already overloaded. The heaviest impact would fall on the most vulnerable, especially the elderly.

The local plan would, in short, destroy the village community and turn the area into yet another bleak commuting dormitory.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPS16/6299  **Respondent:** 15588321 / Zoe-Amber Purves  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECTTo : the planning on the Wesley Airfield site

Again no infrastructure : Transport ?
No regular busses to take people to the only 2 train stations near by, being Horsley or Effingham, which are both totally unsuitable for thousands more commuters either from the Wisley site or from the Horsley proposed sites. These train stations are small and serve the villagers at the moment, but could not accommodate thousands more commuters. Cobham Stn was mentioned in these plans as being a 'local station'? This is rubbish, as it is several miles away and the Wisley inhabitants would have fro go up the A3, or travel down the road by Wisley Lake to get there. This road which you are planning to close and make 'one way'!!

That road is used constantly by traffic coming from the M25 and the A3 by commuters and locals alike. It is a main thoroughfare.
The Wisley site needs busses to take the population to Guildford, Cobham.
They would need a Doctors Surgery, schools, junior and senior as all the local schools are over subscribed in the surrounding areas.

There is already a large Traveller site in Effingham, we as villages do not need any more sites for them, as our own children cannot buy houses, or build, or extend from our own properties, yet the Travellers can build on Green Belt at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/6311  **Respondent:** 15588641 / Richard Purssell  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The proposed development of nearly 600 houses in the Horsley area in addition to the proposed 2,000 house development at Ockham would have an enormous impact on the local infrastructure and is massively disproportionate to the existing housing stock and infrastructure. We fully understand the need to develop further housing but this has to be done proportionately and in areas where this can be supported rather than where it is already stretched.

<tr>
<td>• The majority of the site (70.1 ha) is Grade 3 quality agricultural land which has been farmed for many years and produces over a million loaves of bread a year.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>NPPF para 79 states:</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
“The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.”

I believe the above bullet points show the proposed development is contrary to this.

Therefore I OBJECT to Policy A35 as a breach of the Metropolitan Green Belt rules.

- **Impact on local traffic and infrastructure**

I have already commented under Policies I1, I2 and I3 about the serious deficiencies and shortcomings in the current infrastructure of East and West Horsley.

As I can find no specific proposals to improve the current infrastructure within this policy, the proposed development will serve only to increase these problems. Examples I foresee include:

- A severe adverse impact on road traffic in the surrounding area including my own village of East Horsley.

I calculate that the 2000 dwellings will generate what would be a considerable increase of approximately 3,000 cars locally. However there is no detail I could find on the Wisley Airfield website re improving local roads save for the rather bland statement:

“We’re also making improvements to local roads to reduce rat running, improve traffic flow and increase safety.

The proposals also see improvements to local footpaths and bridleways.”

This additional traffic is likely to use East Horsley’s two stations, shops, nearby schools and medical facilities.

The local roads are characteristically narrow winding ‘lanes’, many without pavements for large stretches. Some are poorly lit and others have a number of pinch points where it is difficult, and in some cases impossible, for vehicles to pass one another.

The road and junction changes which were mentioned previously as part of this development will increase traffic volumes through the village centre of East Horsley and around the station at Effingham Junction. These already suffer from traffic congestion at peak times.

- An increase in the risk of accidents.

Many schoolchildren cycle and walk along these through roads on their way to local schools. Ockham Road North and Ockham Road South have only narrow footpaths in many places through East Horsley village and Forest Road has no footpath in places.

There is concern of course for other pedestrians and cyclists. The number of cyclists has increased considerably - both locals and by groups riding in charity events, “Sportives” and for general recreation. Also the users of the narrow pavements - the elderly and infirm, parents pushing infants in pushchairs etc. – will be at increased risk.

The additional traffic will doubtless increase the likelihood of accidents and reduce the safety of their journeys.

- **Station Parking**

The Wisley Airfield website states that there are 9 mainline stations within 5 miles. The majority of inhabitants from this development would in fact travel from Effingham Junction or Horsley stations as they are the nearest stations. They are much quicker to reach than the other stations, especially at peak times. Further, it is cheaper and quicker to travel from these to London or Guildford (which would be the likeliest destinations) than from elsewhere.
Neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity, something I know from personal experience! The suggestion of the developer that large numbers of cyclists from Site A35 will cycle 6 or 7 miles each day along busy roads in order to travel to and from these stations lacks credibility.

The proposal plans to run buses through the site to major local destinations approximately every 10 minutes at peak times. Many commuters start very early and/or finish very late. It is unlikely these would be catered for. There is no local taxi service at Effingham Junction station so once again no doubt a car would be used—further increasing traffic volumes.

- Other village facilities in East Horsley

These include the medical centre and primary school. They will likely suffer adversely from a substantial increase in users as a result of this proposed development. I have commented more fully on these under Policies I1, I2 and I3

Accordingly, I OBJECT to Policy A35 on grounds of its severe impact on local traffic and infrastructure

- Health and Safety Concerns

The site is located close to one of the busiest road junctions in the country, the junction of the M25 and A3. It is not uncommon for traffic on the M25 to be at a standstill at various time throughout the day and at the A3/M25 junction during peak hours. This must be detrimental to the air quality in the proposed development area. Figures on the Wisley Action Group website in the past showed the Nitrous Oxide (‘NOx’) levels being above the EU limit of 40 mg/m3. This will surely affect residents of the proposed site. Also government policy prohibits the building of schools on sites in areas where there is high NOx. Therefore the proposal to build schools on this development must be contrary to this and thus not allowable.

Also the exhaust fume from the 3,000 cars which I estimate residents will own and use will increase the problem of poor air quality.

NPPF para 109 says:

“The planning system should contribute to and enhance the natural and local environment by” ….

“... preventing both new and existing development from contributing to or being put at unacceptable risk from, or being adversely affected by unacceptable levels of soil, air, water or noise pollution or land instability”.

I believe that the points I have made above demonstrate that the proposed development runs contrary to the above NPPF paragraph.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse health & safety implications

- Local Character

Policy H1 of the draft plan states under “Density” that development should: “make the most efficient use of land whilst responding to local character, context and distinctiveness.” Policy A35 fails to do this.

The area in which the development is planned is essentially rural with many pretty villages, such as Ockham, East and West Horsley and Ripley containing historic, listed or protected buildings. The proposed development is large compared to these villages. It would create a community of just over 2000 dwellings. In comparison this will be 10 times the size of Ockham, twice the size of West Horsley and bigger than East Horsley.

I suspect that Ockham, a small historic rural village, will be subsumed into the Wisley development and doubtless, in the fullness of time, forgotten. Ockham is documented as being in existence in the Domesday Book of 1086 and has a number of historic buildings including All Saints, a Grade 1 listed building which has a nave and foundations which are partly 12th century, plus other parts dating from the 13th and 15th centuries. It is also the birthplace of William of Ockham, the famous medieval philosopher and inventor of the theory of Occam’s Razor. What a tragedy that a village so rich in our history should be treated thus.
I believe the overall housing density of the Wisley development is around 49 dwellings per hectare (‘dph’) which is effectively an urban density. It is to be achieved in part by building apartment blocks of five stories in height, according to the designs previously presented by the developer. Para 4.2.5 of the draft local plan says:

“all new development must be in keeping with the character of the surrounding area”

For a setting within the middle of rural Surrey this development is completely out of character.

East Horsley is just three miles from this site. With 1,760 homes it is the largest settlement in Guildford borough outside of Guildford town and has an overall housing density of 8.1 dph within its settlement area. Therefore, the proposed development under Policy A35 is six times as dense. Para 4.2.8 of the draft local plan says:

“Certain areas can accommodate higher densities provided there is no adverse impact on the character of the area and the infrastructure is able to cope.”

However I have shown in my comments under Policies I1, I2 and I3 that the infrastructure is NOT able to cope.

The development is therefore inappropriate in terms of character and density with regard to the surrounding villages.

I believe the character of this whole area would be irreparably destroyed if this proposed development were to go ahead. The development therefore fails to respond to local context and as such is in breach of GBC’s own Housing Policy H1.

Thus, I OBJECT to Policy A35 on the grounds that it is out of keeping with local character, context, density and distinctiveness, and therefore breaches the NPPF and Policy H1.

• Historic environment

Policy D3 of the GBC proposed plan says:

“Heritage assets are an irreplaceable resource and works which would cause harm to the significance of a heritage asset, whether designated or non-designated, or its setting, will not be permitted without a clear justification to show that the public benefits of the proposal considerably outweigh any harm to the significance or special interest of the heritage asset in question.”

There are a large number of “heritage assets” in The Horsleys, Ockham and Ripley. These all help to contribute to the character, look and feel of the villages and the environment surrounding them, which is one of the reasons people like to come and live here.

Thus, I OBJECT to Policy A35 on grounds that it fails to meet the criteria set out in Policy D3, Historic Environment.

• Environmental Objections

It is nowadays recognised that building over the countryside stops rainwater draining away naturally into the earth, thus increasing the likelihood of flooding. The size and location of the planned development should therefore give cause for concern in this respect. The development is very close to, and slopes down towards, Ockham Road North (ORN) where it is prone to flooding. There is a recent example of such flooding in this area. During the winter of 2013/2014 ORN was impassable for a lengthy period due to flooding.

In addition, development of this scale would, in my opinion, increase light and noise pollution in its vicinity. This would affect both current local residents and existing wildlife.

Accordingly, I OBJECT to Policy A35 on grounds of its adverse environmental impact.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to object to changes to the Draft Local Plan.

I object to the fact that there has been NO change to the insetting of West and East Horsley from the Green Belt

I object to site A35 Three Farm Meadows still being included in the Local Plan and that it hasn't been removed despite the thousands of objections from both residents and consultees

The site is next to an extremely busy stretch of road and close to the very congested Junction 10 of the M25. Plans for improving the road do not take into account any development and the road system would not be able to cope

It is also next to the very popular RHS Wisley which has thousands of visitors a year and the effect of this traffic has not been considered

The site is not near any railway station so travel on the local roads would cause huge disruption and congestion. Other sites are much nearer train stations

There is no public transport and any suggested would have to negotiate the local narrow roads. Sustainable transport would not be possible as they would not be safe

I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change

I object to the fact that the Council have not explained why the Plan is unsound within the original time frame

I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Re: Development of over 2,000 house village at Ockham (former Wisley Airfield) The impact on the Horsley villages of such a huge mixed housing, retail, commercial, traveller and schools development, under 2 miles away, would be enormous. The plan also includes extensive developments at Burnt Common, (400 houses commercial developments) Gosden Hill Farm, Burpham (2000 houses & mixed use developments).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY A35: Land at former Wisley Airfield Policy

A35 proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt. I have major concerns about this proposed development. I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability which will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will cause irreversible destruction to the character of one of the most picturesque and historic areas of the country. I strongly OBJECT to Policy A35.

Summary Surrey is a beautiful county enjoyed by the people from London and further afield, the beauty comes from the structure of open land, green fields and villages, which has been preserved through planning constraints and the Green Belt. The GBC Local Plan sets out to erode the green spaces of Surrey, put strain onto the infrastructure already under strain, and allow housing developments on a scale that is not justified.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)

Allocation A35 – for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following reasons:

1. I object to the removal of the Airfield (FWA/TFM) from the Green Belt. The Green Belt was established to prevent urban sprawl from London and no exceptional circumstances have been established to warrant removal of this land from the Green Belt.
2. I object to the impact this development would have on transport and local roads, particularly
   1. The A3 and M25 roads are already congested and, when there are problems on either of these roads, the surrounding areas come to a standstill. This happens frequently.
   2. The car parks at Effingham Junction and Horsley Stations are very often full. The detrimental impact of a further possible 4,000 cars cannot be overstated
   3. The developers seem to think that the local population will suddenly take to cycling or walking, even though there are no cycle lanes and a lack of pedestrian footpaths.
3. I object to the fact that air pollution has not been given consideration. I understand that the air quality at the M25/A3 junction is in excess of EU-permitted levels and this can only become worse with more traffic.
4. I object to the fact that this site has been included as the planning application was unanimously rejected by the Planning Committee.

I cannot understand why Guildford Borough Council still feel this site should be included when there have been many serious concerns raised by a number of authoritative sources, including Highways England, Thames Water, NATS and the Environment Agency. There are brownfield sites in the area which would benefit from development without affecting historic local villages and causing untold problems for the local communities.

I trust these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6458  Respondent: 15591585 / John Thompson  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings.

I am stunned that having rejected the proposed development of Three Farms Meadows at the Council Planning Meeting, we, yet again, having to write to the GBC to reiterate the same things that applied from the start; the same things that were totally rejected before. So why are they on the table again? This, however, being the case, I include my objections to the Proposed Local Plan's inclusion of Three Farms Meadows below:
I object to the encroachment on the green belt, for which there is no justifiable reason. There has been no real
determination to use brown field sites (because of reduced profits for faceless property speculators)

I object as our road systems, already dangerously over-used, will not be able to cope with the increased traffic. I live in a
lane in Ripley which has no pavements and is already a dangerous place to walk, due to the volume of traffic. The same
is true of many of the residential roads in the area.

I object because the increased traffic will result in increased pollution and have a detrimental impact on the health of
local residents.

I object because the proposed building on this site would result in this part of Surrey becoming part of the urban sprawl
from London.

I object as there is no real improvement to local infrastructure to cope with this vast influx of people and that the figures
presented do not reflect the true number of houses required

I object as there are no plans for how to deal with increased sewage, water supplies and run offs.

I object as the creation of a town on the The Three Meadows site will not provide additional school places for years, long
after the houses begin to be built. This will create problems for local schools. Similarly, there are no plans for another
Doctors' Surgery.

I object to the local plan because The GBC are still dealing with a company registered in the Cayman Islands and,
therefore, anonymous money people. They are only interested in getting outline planning permission so they can sell on
their totally inadequate proposals for a profit of several hundred million pounds. They will then beat a hasty retreat and
leave the whole sorry mess to be put together by somebody else and to incarcerate hapless people for the foreseeable
decades into overpriced and under-planned mis-housing. We know that our villages have to grow, but in an organic way,
not by totally engulfing them into a sprawling new town.

The Borough Councillors are our representatives and, as such, should represent the views of those who elected them.
Election promises were made to protect the green belt which are now being flagrantly flouted. Listen to the views of the
people you represent and remove Three Farm Meadows from the proposed plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
who seek only to make a large profit. The real needs and wishes of the communities involved are simply ignored. Green belt is being exploited in preference to genuine brown field sites for this reason. Those who stand to make vast amounts from this site are registered in the Cayman Islands. They are not paying UK tax and have no interest in improving the lives of those of us who live in the borough.

My reasons for objecting to Policy A35, Three Farms Meadows, in the draft 2017 Local Plan are as follows:

**I object to the inclusion of this site in the 2017 Local Plan because** it will be adjacent to the most congested stretch of roads in the country, junction 10 of the M25. In addition to this, the neighbouring roads, many of which are little more than country lanes, which already carry a high volume of traffic, will be negatively impacted. Living in a narrow lane, which is already a rat run, I know only too well of the impact the development would have. When the increased traffic that is projected due to increased visitor numbers to RHS Wisley is added to this the result can only cause misery for those living here.

**I object to the inclusion of this site in the 2017 Local Plan because** alongside the very significant increase in traffic movements, there will be a very significant increase in air pollution. The quality of our air as a result of the heavy traffic on the M25 and A3 already fails to meet suggested limits. The increase in asthma, particularly amongst children in the area, is disturbing. As a child brought up here, I can attest that when I was a child asthma was unusual, not the norm as it has almost become today.

**I object to the inclusion of this site in the 2017 Local Plan because** the access to the train network from this site is highly problematic. The roads surrounding the development are little more than country lanes and the suggested solution, that commuters could walk or cycle to the nearest railway station, is ridiculous. To suggest a bus service to Horsley again is not viable. The prospect of walkers, cyclists and buses using these narrow roads is completely unrealistic. These lanes and unlit, have no footpaths, are barely wide enough for two vehicles to pass and, therefore, cycle lanes would be impossible.

**I object to the inclusion of this site in the 2017 Local Plan because** the increase in area is on the south of the site and faces the Surrey Hills ANOB. The projected building on this area, in places several storeys high, would be a true blot on the landscape of this protected area. The removal of a further 3.1 hectares of green belt land is totally unjustified and unnecessary.

**I object to the inclusion of this site in the 2017 Local Plan because** one of the major issues is the provision for dealing with the large amount of sewage that such a site will generate. This will prohibit the plan from contributing to the five year housing projection.

**I object to the inclusion of this site in the 2017 Local Plan because** the housing number and the fact that the council has not used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA.

**I object to the inclusion of policy S2 in the 2017 Local Plan because** it states that the figures in the Annual Housing Target Table add up to 12,426, when, in fact, they add up to 9,810. There seems no account taken of the missing 2,616. This anomaly suggests that the figures are not to be trusted.

I object to the inclusion of this site in the 2017 Local Plan because the council has failed totally to take into account all of the objections raised by those they purport to represent. This is to disregard the fact that they are our democratically elected representatives and have a responsibility to act upon the wishes of the electorate. The promise by those on the council when elected was to protect the green belt. This promise is being flagrantly broken.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

Comment ID: PSLPS16/6461  Respondent: 15591617 / Andrew Van  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016)

and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) The plan has been based on the intention of adding 13,860 new homes to Guildford Borough over the 2013 - 2033 period, this represents a massive increase of 25% of the housing provision in just 20 years, the need for this huge increase has not been explained or justified, as neither has the basis on which the SHMA has been calculated. It is also the case that GBC has enhanced this figure to a level which is 70% higher than the official national estimates for population growth than the Borough. The GBC has no mandate from its residents to provide this additional level of housing and therefore has completely departed from the ethos of “localism” in planning policy.

The effect of Brexit will be to reduce the demand for housing nationally and the ability of the building industry to provide it, making GBC’s figures even more extraordinary.

2) I object to a plan which proposes that over 70% of the new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are for no good reason being forgotten and ignored.

3) I object to the disproportionate allocation of this new housing in this particular part of the borough which means that over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

4) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt, and its inclusion in the Local Plan as a site suitable for development. This site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt. The proposed removal of this site from the Green Belt by GBC only a few months after Wisley Property Investments Ltd.’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers is totally hypocritical, lacking in logic and integrity, and would seem to indicate the existence of an unduly coercive influence by the associated developers on some council members.

From what I have seen of the Local Plan Guildford’s planners, councillors and external consultants seems to have forgotten (or not be aware of) what gives the Borough and Surrey as a whole its unique character and the attributes which currently make it one of the most desirable places in the country to live in.

The first of these is of course that a good proportion of the Borough and indeed the county is countryside protected by the Green Belt, a piece of planning legislation which has given London its “Lungs” and prevented an unrestricted urban sprawl envied by most of the world’s capital cities.

The second is that quintessential element of the British countryside, small villages dotted about the county each with its own character, vernacular architecture, church and village green and individual communities.

The third attribute is the space that we enjoy by choosing to live in a rural and not an urban environment.

The proposals shown in the Local Plan spell out the destruction of what causes this part of Surrey to be unique and will devalue the quality of life of many of the Borough’s residents particularly in the Horsleys, Ockham, Ripley and Send.

5) For these reasons I also object to the proposed extension of the Settlement Boundaries of the Horsleys.
6) I also object to the Local Plan proposals for any significant increase in the population of the Horsleys, Ockham, Ripley and Send. Notwithstanding the effect of proposed development in these villages the provision of over 2,000 homes on the Former Wisley Airfield will add some 5,000 to 6,000 people to the area and probably 3,000 or more extra vehicles. This new community will need to get to their workplaces and schools and as there is no train station proposed for Wisley Airfield they will have to travel by car either by driving to Guildford or London or to the train stations at Horsley and Cobham. This will involve them accessing the A3 where the 3,000 vehicles would first have to go south to the Ripley/Ockham junction before going east to Horsley Station or north to London and Cobham.

At the present time at rush hour there are often queues northbound between the Ripley/Ockham roundabout and the Cobham roundabout and the addition of a further 3,000 vehicles at this time would cause these roundabouts to seize up and effectively close the A3. Those motorists lucky enough to complete their journeys via the A3 will find that there will not be any spare car parking at either of the stations (where there is no room to extend either the car parking or the platforms) and even if by chance they did find a space in the car park they probably would not find one on the train.

In the villages most of the primary foul water, surface water, electricity, gas, and telephone services are 80 or more years old, close to capacity and near to the end of their effective life. My personal experience of this is that in the six years that I have lived in Ockham Road South East Horsley the electrical supply to my part of the road has failed twice, once for five days and the second time for two days due as the electricity supplier told me, to the age and capacity of the mains cables.

Although new energy saving technologies and elements like sustainable underground drainage systems can to a degree reduce the impact of any new developments ultimately they still have to be provided with services form the existing primary utilities infrastructure which will not be able to cope or be renewed by the monies obtained from the anticipated community infrastructure levies.

Other resources which will be overwhelmed will of course be the local healthcare services (where appointments are already difficult to get) and many will be aware of the near impossibility of parking at Royal Surrey County Hospital. It is also the case that most of the local “country” roads already have difficulty in withstanding the onslaught of potholes following each winter, without the added attrition of 100’s of heavy good vehicles which will be unleashed when any significant development works start.

7) I also object to the classification of the East Horsley Station Parade as a designated “District Centre” this is pure artistic licence by the Plans authors, it is just a small shopping parade.

I trust that these objections will be fully considered and that the Local Plan will be redrawn to reflect the views and true needs of the local electorate, the parish councils and local action groups and not politicians with alternative agendas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. This land serves a vital role in protecting against urban sprawl from London. Development on this land would create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing this land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the draft Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to the FWA/TFM), an area that at present has only 0.3% of the population of GBC.

5) I object to the threat the current draft Local Plan poses to the historic rural village of Ockham. The current draft plan contemplates that a conservation-protected village of 159 homes (many of which are grade 2 listed, with a grade 1 listed church), with narrow, winding country lanes (which are weight-restricted), no streetlights and very few pavements should be subsumed into a 2,000+ dwelling development, with urban-style buildings, up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety that such a development would inevitably entail. The local infrastructure, including the roads and railway networks, schools, medical facilities and even local drainage facilities cannot support such a contemplated development.

7) I object to:

1. The assertion that such a development would result in a meaningful shift to cycling and walking. The location of the FWA/TFM, surrounded as it is by narrow, winding country lanes, with no footpaths, remote from shops and the nearest commuter stations, mean that this assertion is demonstrably wrong. Even claims about the time it would take to cycle from the FWA/TFM to Effingham Junction station have been shown to be wrong.

1. The increased volume of car traffic that such a development would entail. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the narrow country lanes that surround the FWA/TFM.

1. The heavy traffic that such a development would entail during many years of construction, on our narrow, winding weight-restricted lanes.

1. The danger that such traffic would pose to those who use these lanes.

1. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school as part of the possible development on the FWA/TFM would result in still further congestion at the M25/A3 junction, as well as on local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

1. The lack of suitable public transport. The local railway stations of Effingham and Horsley cannot cope with the increase in passengers that such a development would entail, and car parking is already at capacity.

8) I object to the fact that insufficient consideration has been given to the environment, ecological and agricultural value of the FWA/TFM - the Thames Basin Heaths' Special Protection Area (SPA) adjoins the FWA/TFM, as does a Site of Special Scientific Interest (SSSI). The nature conservation designation SNCI (Site of Nature Conservation Interest)
applies to almost all of the FWA/TFM. Rare flora and fauna abound and should continue to be protected. This land is predominantly high grade agricultural land which should continue to be cultivated.

9) I object to the fact that air quality concerns have not been taken sufficiently seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of legal limits. Additional traffic will exacerbate this situation, impacting the health of all current and future residents.

10) I object to the fact that no account seems to be being taken of the effect of acid deposition on the Thames Basin Heaths' SPA and its irreversible impact on the habitats of the many rare species of flora and fauna which the various nature conservation designations that apply to the FWA/TFM are designed to protect.

11) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two reasons given to the question why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

12) I object to the continued inclusion in the draft local plan of the FWA/TFM: a planning application for residential development of this land was unanimously rejected by GBC’s Planning Committee in April 2016: after 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC's Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about the proposed residential development of this land have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

13) I object to the inclusion of the FWA/TFM in the draft plan: it fails to take account of the value of FWA/TFM for agriculture, comprising as it does over 75% of agricultural land including 63ha of Grade 2, 3a and 3b agricultural land (of which at least 19.3ha is classified as best and most versatile land).

14) I object to the inclusion of the FWA/TFM in the draft plan: claims have been made that FWA/TFM should be regarded as “brownfield” or "previously developed land". I believe these to be erroneous. The land is Green Belt land. It should also be noted that the former airfield hardstanding and part of the old runway are within the 0-400m exclusion zone of the SPA, and the remainder of the old runway is (of course) flat and at ground level, meaning that any development would have a "major impact on the openess of the area". Much evidence exists that the adverse consequences of development of this land, including damage to the ecology of, e.g., the SPA, cannot be mitigated.

15) I object to the inclusion of the FWA/TFM in the draft plan: the impossibility in practical terms of creating a sustainable development on the FWA/TFM is further demonstrated by the historical use of, and lack of development of, this land and most recently by the inability of the current landowner/ developer and its many experts and advisers to come up with a sustainable development proposal despite numerous attempts over an extended period - unanimously rejected by GBC's Planning Committee - on the recommendation of its Planning Officers - in April 2016.

CONCLUSION

The above objections graphically demonstrate why the FWA/TFM was and should remain in and be part of the Green Belt, and why the location, limited size, lack of infrastructure, relative isolation, distance from places of employment, and existing overstretched and inadequate public transport, roads, services and facilities make this land totally unsuitable for any kind of significant development – as has been consistently argued.

The fact that the draft Local Plan still includes FWA/TFM (as well as neighbouring land not owned by WPIL) as a potential site for development flies in the face of logic and GBC’s own arguments and decisions, disregards local and not-so-local opinion, and imposes significant cost and anxiety on local communities.

I continue to strongly OBJECT to:
I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency. I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I particularly object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The road network south to the Horsleys and towards A246 and to Effingham has narrow roads, very narrow in places, that are not suitable for the increase that would arise in business traffic – including the proposed increase in buses.

The plan has a statement which would allow the council to not build a school that is currently stated as part of the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the large proposed development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and produce congestion on the A3 and surrounding roads including Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6534  Respondent: 15595041 / Richard Wilkinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Impact of the development at Wisley Airfield on local traffic and infrastructure

The villages of East Horsley, Cobham and Ripley, along with the roads around Effingham Junction station, already suffer from traffic suggestion at peak hours. The development will only increase traffic volumes in all these areas.

Furthermore, neither Horsley nor Effingham Junction railway stations currently have any significant spare parking capacity. As the roads between the proposed development and the stations are not suitable for cycling and there is no bus service, residents at the new development will have to drive to, and park at, both stations. The proposed development will therefore only exacerbate parking at both stations.

Also many of the roads in the surrounding area are country lanes, which are not suitable for the major increase in traffic that would result from the proposed development.

I there object to the development on the grounds of its severe impact on local traffic and infrastructure.

Impact on health and safety of the development at Wisley Airfield

The site is located close to the junction of the M25 and A3, where recorded Nitrous Oxide emissions are very high. This will therefore have a detrimental effect on the health of residents in the proposed site.

Furthermore, the proposal includes the building of a new primary and a new secondary school. This is in contravention to government policy which prohibits the building of schools in areas where there are high Nitrous Oxide levels.

I there object to the development on the grounds of its unsuitability on health and safety grounds.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to strongly object to the above proposed development. Having just returned from a morning of cycling and walking in this beautiful green belt area, this is a much needed green belt space and must remain so to protect the local wildlife and countryside as it is.

The development plans look way top heavy for the local area.

The roads and surrounding small villages will be swamped by the traffic from the service vehicles needed for building the development and then congestion from the additional residents from the development.

Traffic at the M25 and A3 junction is already at bursting point at peak times.

I believe there is supposed to be a plan for the residents to cycle but where are the plans for this.

No exceptional circumstances have been identified to allow this development on green belt land

There will also be a huge demand on local amenities, schools (already over subscribed), doctors, dentists, etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the continued inclusion of the site A35 Formerly Wisley Airfield (Three Farm Meadows), Ockham in the Local Plan. A35

This planning application was recently unanimously rejected by GBC's planning committee on the recommendation of the GBC planning officers who had grave concerns about the application.

I objected to this application on a number of grounds including the quality of the agricultural land, the impact on wildlife and the complete lack of infrastructure to support such an application. The road system is already at a standstill and even with the proposed new junction on the A3 (which has so obviously been added to the plan at the very last minute as a means to support this enormous housing development and the proposed development at Gosden Hill A25) the impact on the local villages and environment would be enormous. Flooding in that area remains a huge problem and cannot be ignored.

Serious concerns about this site were also raised by the Environment Agency, Thames Water and Highways England

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPS16/6594  **Respondent:** 15596193 / Ingrid Dupre  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

**Objection to Guildford Borough Council’s Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –**

**Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings**

I object to the draft Local Plan for the following key reasons:

1) It is in all our interests to protect Green Belt sites from development. This was promised in the Election manifesto.

2) The proposed site, Former Wisley Airfield (FWA/TFM) is on Green Belt land. For this reason I object most strenuously to 70% of this Green Belt land to be taken and used to build 2100 new dwellings.

There is ample brownfield land in urban areas which needs to be regenerated instead.

3) The FWA/TFM) site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

4) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA). This is far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

5) I object to the disproportionate allocation of housing in this particular part of the Borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
6) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there.

The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4) I object to the disproportionate allocation of housing in this particular part of the Borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. <td>Re: Objection to Guildford Borough Council draft Local Plan (June 2016)</td>
<td>We strongly object to the inclusion in the Guildford Borough Council draft Local Plan (June 2016) of Site Allocation A35 namely the Former Wisley Airfield for a new settlement of 2,000 dwellings. For the following reasons:</td>
<td></td>
</tr>
<tr>
<td>• The Former Wisley Airfield should NOT be removed from the Green Belt, as it serves a vital role in preventing urban sprawl from London and a development there would create an urban corridor stretching from London to Guildford.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• No exceptional circumstances have been established to warrant removing the site from the Metropolitan Green Belt.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• There is ample brownfield land in urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Such a development would have harmful impact on transport, local roads and road safety. The result of an additional 2,000 homes would be an estimated 4,000 additional cars together with other vehicles, including HGVs, to service the development.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development – Cobham Village...</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.

- Due to the absence of cycling paths and the lack of footpaths (and the space to provide them) the assertion that the development would result in a meaningful shift to cycling and walking is unbelievable. The increased traffic would add danger to cyclists and pedestrians (including those already increasingly using local roads for recreational purposes).

- There would be an increase in the already severe congestion on the Strategic Road Network of the A3 and M25 and the junction of those as well as local roads. Any proposed secondary schooling would add additional congestion.

- The lack of suitable public transport. The local rail stations of Effingham and Horsley could not cope with the proposed increase in passenger traffic and car parking is already at capacity. In the refused planning application there had been a suggestion that Cobham & Stoke D’Abernion Station could be used – that, or use of stations further north at Weybridge or Walton, would increase congestion and pollution on local roads in Elmbridge.

- Air pollution in this area in the north of the Borough of Guildford and the south of the Borough of Elmbridge and particularly near the M25/A3 junction already exceeds EU-permitted levels. Additional traffic would worsen the situation, affecting the health of all current and future residents.

- Insufficient consideration has been given to the environmental and ecological value of the site and the area around it, taking account of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- The area is a haven for wildlife, some of which is already endangered. The introduction of residences would mean the import into an ecologically sensitive area not only of humans and their increased footfall, but also of pets, and cats and dogs in particular, that can have a devastating effect on wildlife. Protected species on and near the site and wildlife corridors would be destroyed.

- On 8th April 2016, there was unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on the recommendation of its Planning Officers. The Planning Report identified the serious concerns now being highlighted above.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
- Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
- Unacceptable Conservative Party links between the developers and the Council.
- No Green Belt “exceptional circumstances” presented.
- Not a brownfield site as stated – only 15% of it.
- Proposed SCC waste site ignored.
- Loss of farming land.
- Too near RHS Wisley and Thames Basin Heath SPA.
- SANG would harm on SPA.
- Unacceptable increase in air pollution.
- No existing public transport and stations miles away.
- No proper traffic data.
• Housing density far too great.
• Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
• Access confined to inadequate narrow lanes.
• Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
• Major impact on neighbouring villages, especially Horsleys.
• No assessment made of collective impact on area of this and 6 Horsley sites.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

Dear Sirs,

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Wisley Airfield being developed with over 2,000 new houses. It is too many in a very small village of outstanding natural beauty.

I object to this development on the grounds that roads are narrow and already have too much traffic from A3 and M25. I am a regular visitor to this area with my wife's parents in the village and myself having been brought up in Wisley.

No Schools could cater for this many homes and Howard of Effingham and other surrounding schools already have waiting list. This will change the whole area and I strongly object to this development.

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object as a local resident to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling
   2. The increased volume of car traffic. A proposed development of 2,068 homes
   3. The congestion this traffic will cause on the narrow rural roads in Ockham
   4. The danger this traffic will be to local cyclists and pedestrians
   5. The increase in the already severe congestion on the Strategic Road Network
   6. The lack of suitable public transport. The local rail stations of Effingham

The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars would result in an estimated 4,000 additional cars on the roads

the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them) the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8 the April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objection to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation 35 - for the phased development of a new settlement of up to 2100 dwellings

Dear Sirs,

I would like to register my objection to the above draft local plan for the following reasons:

**Green Belt:**

I object to the proposals to build on Green Belt land and understand that green belt boundaries can only be altered in exceptional circumstances and I do not believe that there has been any demonstration of the special circumstances required in this case. The development would be a massive encroachment of the Metropolitan Green Belt and would as I understand it be inappropriate development (as defined by law) within that.

There are many brownfield sites which are more appropriate for redevelopment which are currently not being utilised.

I object to the removal of Wisley Airfield from the Green Belt and believe the protection of green belt land to be important for many different reasons and feel strongly that this proposed development would have an adverse impact on the surrounding area: it would lead to the urbanisation of a rural area of which there are not many near and around London, it would have a negative impact on wildlife, in particular in leading to the loss of habitat for a number of protected and endangered species and would lead to a loss of green space currently enjoyed by walkers, horse riders and cyclists amongst others.

Additionally, I am concerned that election manifesto promises to the electorate are being ignored.

**Impact on the local area:**

I have lived on Ockham Lane for 10 years and have seen the number of new homes and volume of traffic increase substantially in the area during this time. The proposed housing density and multi-storey buildings in these proposals are out of keeping with the surrounding rural area and there is already an obvious strain on the local infrastructure with problems related to roads, traffic and parking and severe pressure on local services including those provided by doctors, dentists, shops and schools.

I am concerned that insufficient consideration has been given to the ability of the local infrastructure to cope with the additional homes and the associated developments and vehicles that will come with them, the detrimental impact on road safety and the negative impact on current residents within the area. The major increase in traffic to and from the site is not compatible with the narrow country lanes in the area and will exacerbate the current traffic issues and congestion. Traffic is already frequently at a standstill in the area and such a significant increase in the volume of cars can only lead to further traffic issues in an already over-crowded area.
I object to the proposed number of houses, the disproportionate allocation of housing and housing density planned for this part of the borough which is out of keeping with the rural area. In light of the recent Referendum and the UK’s forthcoming withdrawal from the EU it is clear that there will be smaller numbers of migrants coming to the UK and therefore less pressure on housing and a reduced need to build new homes.

Consideration does not appear to have been given to the negative impact of such a substantial increase in population to the existing residents of Cobham, Downside and Hatchford. I am concerned that the impact on light pollution, traffic and infrastructure has been significantly underestimated and that suggested measures in mitigation are inadequate.

Additionally, insufficient consideration appears to have been given to the environmental and ecological value of the site (site of special scientific interest (SSSI) etc) and air quality concerns and the serious concerns raised by many authoritative sources including Highways England, Thames Water and the Environment Agency amongst others.

Other concerns:

I am concerned by the fact that a developer has been trying to gain planning permission for these exact proposals for several years and that it is therefore expedient for these original proposals to be utilised, rather than this site being selected, objectively, as an appropriate site for development. I am concerned that the council is now putting these proposals forward having vigorously and unanimously objected against them only two or three months ago citing many of the serious concerns I and other local residents are raising in our objections.

I am concerned about the fact that these plans do not meet the needs and wishes of the local communities as evidenced through the Ockham Parish Plan and the unacceptable level of stress that these and the previous proposals have placed on many local residents for many years.

In summary, I am concerned that this is not the right place for additional housing and development and that the impact and above issues have not been properly thought through and are unacceptable to those living in the area. I would be grateful if these concerns could be taken into account and hope that the former Wisley Airfield will be removed from the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
  7. Whilst I live in Elmbridge I consider that this proposal will severely impact Cobham and Stoke D’Abernon as well. Its inconceivable that Cobham will not suffer substantially increased traffic, to the railway station in particular which is bound to share some of the load with the designated stations.
8. I also regularly enjoy the tranquil environment of the public footpaths across this local area and shudder to contemplate the impact of the equivalent of a new town being squeezed onto this site.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
• I object to all the proposals mentioned above and we feel because of the result of the recent Referendum result it is imperative for the Guildford Borough Council to go “back to the drawing board” to reassess the numbers of properties which would be needed within Surrey together with providing information on infrastructure and additional facilities required. These numbers of properties required will certainly be extremely different to the calculations made before the Referendum!

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/6809  Respondent: 15604833 / Susan Vaughan Jones  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to voice my very great concern that this proposed development site remains part of the Draft Local Plan on the basis of its potential effect on air quality.

1. On 9th February 2016 the European Lung Foundation produced a paper following a study conducted in Canada on the effect of maternal diesel particulate inhalation during pregnancy resulting in a significantly increased incidence of neonatal and childhood The summary of this paper is attached for information.

2. Guildford Borough Council undertook an air study in 2013 the results of which are also appended.

It revealed that station 5 (Junction 10 M25/A3 - Wisley) had the highest air pollution recorded of all stations tested.

1. Further evidence of this was also produced by:-
   1. Surrey Your Air Millennium Report
   2. Surrey Future Congestion Programme 2014
   3. A3 corridor improvement appendix.

2. Within my former practice as a GP with a special interest in paediatrics, I have hitherto been all too well aware of the hazard to young children in pushchairs of inhaling diesel particulates causing resultant childhood asthma

3. This latest research suggests a whole new level of threat to the unborn infant based on maternal diesel particulate exposure during The traffic implications of the additional 2,100 new homes planned for the Wisley Airfield site will inevitably increase air pollution in a place which already has the most significant air pollution in Surrey.

4. In turn this will produce a substantial increase in serious child health consequences

5. For this reason alone the site should be removed from the proposed Draft Local Plan

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the strategic site at Wisley airfield as this has recently been denied planning permission due to many of the above reasons, as such why is it to be included again, many of the reasons it was reject are not solvable due to its location and the nature of the site. Or is it the case that the council will allow development here regardless due to the revenue they can generate from council tax?

Objection to the inclusion in the Draft Local Plan (June 2016) of Site Allocation A35 - the former Wisley Airfield - for a new settlement with 2,000 dwellings

We wish to register our objection to the proposal to remove the former Wisley Airfield from the Metropolitan Green Belt in the Guildford Local Plan and make the site available for large scale housing development.

We believe that the new and exceptional circumstances required in law for such a change have not been established. We further believe that there are many opportunities in the Borough for housing development in established urban areas without the need to destroy an essential safeguard to the environment of all of us.

This change to the Local Plan would have a serious, negative impact on local communities including our own in Cobham. As the nearest town of any size to the new development Cobham would become the first port of call for many of the services required by those living in the new homes. Our already overstretched roads and public transport links would come under ever greater and unsustainable pressure. We are in no way geared up for such an increase in population and the demands that would accompany it.
The historic communities close to the site - most notably, but not exclusively, the small village of Ockham - would be engulfed in the new town which includes, in a recently presented proposal, buildings of five stories. The rural character of these communities would be destroyed and the result would be a denser concentration of people here than is found in many of our major cities. This reality alone would be sufficient grounds for the strongest objection to the proposed change.

It has been seriously proposed that the new community on the airfield site will turn significantly to walking and cycling rather than depending on road transport. One only has to look at the volumes of traffic currently using our local road network to realise how unrealistic that suggestion is. Our present roads do not cope with the demands that current traffic levels make of them. How much worse - and how considerably less safe - will the addition of substantial numbers of extra vehicles make? Such a development could well lead to more than 4,000 additional private cars trying to use our roads plus all the commercial vehicles needed to service such a new town.

People today assume they will be able to use their cars. It would, in our opinion, be unrealistic to approve a plan based on a belief that cycling and walking will provide an answer to our infrastructure limitations.

Wisley Airfield is not the right place for large scale housing development. We object strongly to the proposed change in the Guildford Borough Local Plan that would prepare the way for such a development and remove the protection to our Green Belt that has served us well for so long.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. - I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
• I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Guildford Borough Council 2016 Draft local Plan Response to Consultation: Policy A35 land at former Wisley Airfield, Ockham I write to object to the inclusion of this site again in the latest draft of the Local Plan as a strategic site for development. A planning application for this site in effectively the same terms was decisively rejected a few weeks ago on clear and logical grounds. It is difficult to understand what could have changed in that few weeks. The arguments against building in the Green belt remain the same. The site can only be removed from the Green Belt on exceptional circumstances and the Local Plan provides no details as to what these may be. Unfulfilled housing need is not an exceptional circumstance for these purposes. I also object to the inclusion of this site on the grounds of poor sustainability. There are no transport links or other services such as schooling, shopping or medical services which means that these will have to be provided by the existing stretched services in the surrounding area or provided from new. The number of houses proposed can only generate a massive increase in vehicle use of the local narrow roads and add to the existing problems at the A3/M25 junction 10. At an average of two cars per dwelling, there will be an increase of some 4000 extra vehicles on local roads. There will also be many more passengers on the trains at East Horsley and Effingham stations at both of which there is almost no excess parking available now. The same difficulty will arise in relation to parking at the shops in East Horsley. As the area immediately surrounding the site is prone to flooding, the proposed development will require extensive improvements to surface and waste water infrastructure to cope with the much increased surface water run off and extra foul waste. The existing infrastructure simply cannot cope with such an increase in population.

Ockham village currently has 159 dwellings and its present setting will effectively disappear if this site is developed as proposed. The concept proposed is completely out of keeping with the established pattern of development in the area and would be the largest in Guildford Borough other than Guildford itself with a density would be about 49 dwellings per hectare. East Horsley is presently the largest settlement outside Guildford town, having 1760 homes at a density of 8.1 dwellings per hectare. The disparity is stark and emphasises the fact that the proposed development is wholly out of local context. It even appears to breach Guildford Borough Council's own proposed Housing Policy (H1). I also object to the allocation of housing in this part of the Borough which is disproportionate in relation to the Borough as a whole. Calculation shows that 23% of the Local Plan's new housing is proposed in the localities of Ockham, Ripley, Send and the Horsleys and of this 65% is allocated to the former Wisley Airfield. This is wholly unreasonable and unjustified by the Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows, in the draft Local Plan. Much of the above general comment is also applicable to this site. Primarily, the proposal removes 3.1h of land from the Green Belt without any justification. There are no special reasons for this as such for it is effectively unsustainable because of its location and the constraints of the site. Junction 10 of the M25 is already unworkable at times and even the proposed improvement of the junction (how many years away?) will not alter the totally restricted access to this site from the A3/M25. In this respect, it will rely at that end on the same junction on the A3 as RHS Wisley, a major visitor attraction with its own plans for expansion. The access at the other end of the A35 site is from narrow country lanes and any substantial increase in traffic including bus services there will make them even more dangerous than they are now and increase the deterrent effect on walking/cycling to the sewerage, lack of medical service, schools, transport connections in the surrounding areas as well, all contributing to the site's total unsustainability.

Quite apart from the wholly unsustainable nature of the site on all levels. any substantial development of it, such as that presently proposed and under appeal, will have an overwhelming effect on the Horsleys and other nearby villages, already faced with proposals for their own expansion in the draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
All our local services would be stretched far beyond their capacity to cope. Cobham is already very congested with limited parking and this is the obvious place for people from such a development to shop and attend doctors surgeries, dentists, etc. We simply can’t cope with such an increase, which would change the whole character of the area very much for the worse, also having a very damaging effect on local wildlife.

We would urge you very strongly indeed to reject this proposal especially in the light of the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of planning officers with the above serious concerns being highlighted

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• Proposed SCC waste site ignored.
• Loss of farming land.
• Too near RHS Wisley and Thames Basin Heath SPA.
• SANG would harm on SPA.
• Will aggravate traffic jams at A3 roundabout and M25 Junction 10.
• Unacceptable increase in air pollution.
• No existing public transport and stations miles away.
• No proper traffic data.
• Housing density far too great.
• Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
• Access confined to inadequate narrow lanes.
• Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
• Major impact on neighbouring villages, especially Horsleys.
• No assessment made of collective impact on area of this and 6 Horsley sites.

Hannah

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7008  Respondent: 15616161 / Anna Joyce  Agent:

Comment ID: PSLPS16/7039  Respondent: 15618529 / Angus Jordan  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA) now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings
I wish to object to the draft Local Plan in the strongest possible terms, for the following key reasons:
1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored and this simply appears to put money in the pockets of overseas investors rather than doing something useful with land that needs regeneration rather than conservation as the greenbelt does.
2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in...
protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans. Where has this number come from. They should not be used without complete clarity and transparency.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC). This does not equate to a reasonable and fair process of distributing new housing.

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heath SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency. I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT also to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. (Application reference 15/P/00012) This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again. This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company. (Including the Rt Hon. David Mellor QC (its erstwhile founder and former Minister), Mr Michael Murray (spokesman for the project and Conservative cabinet member for planning policy at the Vale of the White Horse District Council in Oxfordshire) and the Hon. Charles Balfour (director & descendant of the David Cameron).

Policy A35 should be removed from the plan for all the reasons the development was rejected by the Planning Committee, including:
  • Green Belt location and absence of “exceptional circumstances”.
  • Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
  • Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
  • Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
  • Absence of adequate traffic data.
  • Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
  • Loss of high-quality agricultural land (55% of the site), in breach of national policy.
  • Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
  • Presence of a Surrey County Council safeguarded waste site.
  • Cost of infrastructure required to the detriment of alternative more favourable sites.
  • Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
  • Impact on listed buildings.
  • Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
  • Extreme housing density with tiny garden spaces.
  • Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
  • Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14). (The River Mole would flood even more badly should a new runway be built at Gatwick.)
  • Failure to evaluate the cumulative impact of this and nearby development sites on the area.
In addition I object to the following policies in the Town Plan:—

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7076  Respondent: 15624705 / Chanelle Allen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

• I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

• I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

• I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  • The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

  • The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

  • The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

  • The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

  • The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. Policy A35

**Land at former Wisley airfield, Ockham Page 203**

More detail is required in the column headed, “Requirements” regarding the potential interventions that will be required to address issues on B2215 Ripley High Street. This comprises two slip roads at A247 Send. If the land necessary for these has now been secured, is presumed that there will not be a problem in linking these to Wisley.

Some 17 ha is allocated for waste management use under Policies WD2 & WD5 of the SWP and is also considered suitable for aggregate recycling. The proposed allocation contains no specific waste use allocation other than an allocation for general industrial purposes which could in principle include some suitable, but smaller scale, waste uses (see below).

The county council would wish to see part of the site continue to be allocated specifically for waste management purposes (the county council acknowledges that much less than 17 ha would be required for waste management purposes - perhaps of the order of 5 ha including any necessary environmental buffer). Therefore as waste planning authority, we object to this proposed policy as it involves the loss of this waste management site and is therefore contrary to SWP 2008 Policies WD2 and WD5 and government policy contained in the NPPW. We consider the Plan to be unsound in terms of being positively prepared in that it does not take account of this acknowledged requirement for waste management facilities and the SWP allocation.
In view of the ongoing need for additional waste management capacity in Surrey, including for the recycling of construction and demolition waste, the proposal would prejudice the successful implementation of the SWP by reducing land availability for such uses and limiting flexibility to make adequate strategic provision. As such it will fetter the implementation of the waste hierarchy and undermine the targets included in SMP Core Strategy Policy MC5 for the production of alternative aggregates in Surrey.

The county council is currently in the early stages of preparing a new waste plan that will consider the need for new waste management capacity in the county.

It should be noted that the wording relating to primary school provision in policies A25, A26 and A35 is not consistent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Finally, no assessment has been made of the collective impact on the area of the Wisley development and the 6 Horsley sites.

Please do not let the legacy of this council be one that destroys the greenbelt, impacting the next generations irrevocably and eroding thousands of years of history, character and place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Scale of development at Wisley Airfield

Priority is given within the plan to the development of brownfield sites, of which Wisley is one. My objection is not about the development of the site as such, but more to do with the scale of the proposed development. As mentioned above, the A3 / M25 interchange and M25 itself are at gridlock in the morning. The proposal to add this number of additional dwellings next to this interchange will only make matters significantly worse. Furthermore the impact of this number of houses on the other amenities and infrastructure within the area will be highly significant. A smaller, more reasonably sized or lower density development would reduce this impact to more manageable levels. This is particularly relevant when taken in conjunction with the proposed 2,000 houses for the Gosden Hill Farm and 400 at Burnt Common, just up the A3.

So in summary, the plan in its current format, would significantly impact the character of Horsley and its surrounding areas and well as have a damaging affect on its roads, schools and other amenities.

The plan needs to be revised to take a more balanced view between the need for further housing in the area and the hugely negative impact it will have on Horsley and its surrounding areas.

I urge, in the strongest possible terms that the Council and its elected representatives review the plan accordingly. Most importantly, it is essential that the proposal to remove Horsley and surrounding villages from the Green Belt be removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I OBJECT to the inclusion of A35 Wisley airfield in the local plan. The principle of the local plan is a presumption in favour of sustainable development. The Housing and Planning Act 2016 grants permission in principle to any development included within the local plan leaving only technical details to be considered by planning authorities. The site at Wisley failed in its planning application on a large number of points including infrastructure and sustainability. It is highly unlikely that these will be met in the future due to its positioning. Part of the site is green belt and no exceptional circumstances have been demonstrated. Aspects of the site also include high quality agricultural land.

<td>I am writing once again to state my objection to the revised local plan that has been prepared. It is clear that you have not taken into account the views of 1000’s of local residents and qualified people on the environmental impacts of the proposed plans. There is still too much development into green belt, which must be protected and a distinct lack of thought of the required infrastructure to support any of this building. The proposed development at Wisley which has already been rejected??but is still in the plan is ridiculous in terms of size. The roads cannot take this, it will be like central London and the A3 is one of the busiest junctions, with regular accidents and this will only increase. Clearly we need to increase housing stock but this has to be proportionate to the local surroundings, infrastructure and existing stock. This plan is clearly not and needs to be reconsidered AGAIN.</td>

I OBJECT in the strongest possible terms to the proposal to develop a 2,000 house village at the former Wisley airfield, a site that forms part of the Metropolitan Green Belt and a 'first line of defense' against urbanisation from the A3 and M25. Guildford Borough Council's Planning Officer, in rejecting a previous planning application from the developer said 'it has not been demonstrated that the benefits of the proposal amount to very special circumstances such as to clearly outweigh the harm to the Green Belt and other harm identified'. The proposal would be disastrous not only for East and West Horsley but especially for the local villages of Ockham, Hatchford and Downside. Anyone with local knowledge of the area will appreciate the strain such a proposal would place on local transport and infrastructure. Why does Guildford Borough Council continue to include this site in its plans in the face of massive objections from residents from across the area? I consider this proposal to be an act of ENVIRONMENTAL VANDALISM.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY A35 WISLEY

I object to Policy A35 Wisley. I object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. However, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision. There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.
- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).19
- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the number of proposed buildings and building sites in general. Whilst I understand there is a need for local housing these villages should be considered separately from any ‘country wide’ suggestion, they are unique and require individual consideration. If the Wisley Airfield site goes ahead this will already add 2000+ homes within a 2 mile radius of the existing villages? More homes and sites would just be a further assault on the current village infrastructure. If Wisley Airfields is to be one of the sites then I would object to any further building within at least 5 mile radius.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the fact that the plan implies modal shift to cycling and walking which in the rural areas is completely unrealistic due to lack of proper cycle lanes on local roads (and the space to provide them). This plan disenfranchises the elderly, the young, the unwell and the disabled.

I object to all sites in West Horsley for over 5 homes. There is insufficient infrastructure planned. It is impossible to deliver sustainable housing sites of this size in the countryside. These sites will merge the villages of Ockham, West and East Horsley creating URBAN SPRAWL.

I endorse in full the comments made by Ockham Parish Council and also those by the Wisley Action Group. I understand that the Richard Harwood QC, retained by OPC and WAG has advised that the Council should not be undertaking a Regulation 19 consultation. I find it insulting that the Council appears not to understand the process under which it is meant to operate.

Additionally, I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. By virtue of its location residents will be reliant on the motor car, any assumption that the infirm, elderly and the young will walk or cycle to work, health facilities, shopping etc is clearly nonsense. I also have no confidence that those who do not fall into the above categories will use sustainable methods to get about. As a medic I am exposed on a daily basis to the sedentary nature of today’s population in the UK and any ambition of converting the population to a bunch of fitness fanatics is very wide of the mark. [see increases in diabetes, heart disease etc]
4. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junctions in the country (J10)
5. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
6. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
7. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

8. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.

9. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

10. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

11. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

12. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.

13. Opportunity (3) should be common to all sites and is not unique to this site.

14. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

15. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

16. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

17. I object to the removal of additional 3.1 ha from the green belt without any justification.

18. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

19. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

20. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

21. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

22. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

23. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

24. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

25. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
26. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

27. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

28. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

29. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

30. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

31. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

32. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

33. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

34. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

35. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

36. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

37. I object to the plan period being inconsistent. This is an example (of which there are many) of extremely sloppy work which gives me no confidence in the content. For example, the foreword mentions an end date of 2034 whereas the introduction 1.2 and 1.3 refer to 2033. Spatial vision uses 2033. What is the plan period? This is very unclear.

38. Para 2.10a underestimates the pressure already suffered by local residents on a daily basis as a result of insufficient infrastructure particularly in the provision of health services, e.g. doctors and hospital appointments. Additional growth in the quantum proposed is unsustainable in that it fails to recognised the needs of current residents and is focussed only on the needs of future residents.

39. Para 2.13 I reject the statement that most local roads in villages have “at least one footway and usually two “.

40. I reject the assumption in para 2.15 that increased road infrastructure capacity – it may improve theoretical capacity but actually worsens performance.

41. I object to the new green belt provision in Ash and Tongham to prevent the merger with Ash Green and I do not understand why this locality should be treated any differently from any other location for example the merger of Ripley and Ockham as a result of policy A35.

42. I object to the fact that the spatial vision makes no mention of protecting the TBHSPA

43. I reject the comment in the spatial strategy that the RIS will provide congestion relief for the A3 in Guildford as my understanding is that these schemes have been dropped.
44. I do not accept para 3.2 where there is a disconnect in the period of the Council’s Corporate Plan and the Submission plan –

45. I object to Para 4.1.11 which should clearly identify the version of the LAA and not just refer to “the latest”.

46. I object strongly to the deletion of para 4.2.8 on housing density. There must be an efficient use of land in keeping with the local area. It is notable than the development planned for the town centre is at a lower density than that at site A35 for example and this is totally unacceptable.

47. I object to the wording of 4.2.18 which is unenforceable. Throughout the plan the word “Expect” needs to be replaced by “require”.

48. Likewise, I object to the use of the word “resist” in 4.2.24 – it should be replaced by “refused” in this para and throughout the plan.

49. I object to the wording of policy H2 specifically “we will also seek” and “we will seek”. This should be replaced by the use of the verb “require” in this para and throughout the document.

50. Policy H2 para 4 needs to include that any funds paid in lieu of affordable housing should be ringfenced and the wording further tightened by replacement of “expect” by “will enable”.

51. I object to policy H3 para b “the local community”. Rural exception sites should only be allowed where the identified need is truly local defined as within the parish.

52. I object to policy P2 and the inclusion of Ripley in the list of villages to allow insetting.

53. Policy P2 refers to the Metropolitan green belt yet goes on to create additional green belt in the west of the borough furthest from the metropolitan area. There is no justification whatsoever for new green belt land in Ash.

54. There is no evidence that cross-boundary options beyond the green belt have been considered as a viable option instead of moving the green belt boundaries within the borough.

55. I object to the removal in para 4.3.18 of “where it would not have a greater impact on the openness.” and the replacement by “subject to the impact”. This is completely in contravention of the purposes of the green belt.

56. I strongly object to policy P5 TBHSPA as no regard whatsoever is paid to the impact of air pollution on the integrity of the heathland and the resultant loss in habitat from nitrogen deposition. It is inconceivable that the level of development proposed in this plan will result in anything other than thousands more vehicles on the roads due to the unsustainable locations of for example policy A35. Additional traffic equals more pollution and more nitrogen deposition. There is no evidence at all of any in-combination impact from planned developments in adjacent boroughs and no regard to the recent Wealden case for example.

57. I also reject that the SAMM mitigation through the use of wardens will have any impact on cat predation.

58. I object to the statistics in para 4.3.55. Any survey work done on the visitor numbers is unlikely to have covered the time when commercial dog walkers from South London who appear in droves throughout the week.

59. I object to para 4.3.57 – there is no evidence that SANG provided adjacent to the SPA will provide any mitigation at all. Faced with the choice of walking in a manmade environment or on the SPA, the majority of people would choose the natural environment.

60. I object to para 10 of policy E1. Where is the “new industrial employment land on the west side of the former Wisley airfield”? there is no “new” employed land listed under policy A35. This is confusing and needs to be clarified.
61. I do not understand why previously developed sites in the green belt have not been included for development. Specifically, HMP Send where the prisoners have been told that they might be moving and indeed the site is understood to have been valued by Savills amongst others. There is no justification for adjustment of green belt boundaries until all other options have been exhausted. Doubtless there are other examples.

62. I object to para 4.4.36 with regard to the extension of the Surrey Research Park. There is no justification for this when there are a number of surface car parks within the Research Park which should be used in preference. The density of buildings in the Research Park needs to be prioritised over an extension in area.

63. I object to the wording of para 5 in policy E5 – “marketing of the site for its current use for a minimum of 12 prior to submission of a planning application”. I do not understand what this means so how can I be consulted properly.

64. I object to policy D1. This policy will be unenforceable due to the deletion of the word “must” in para 2. The word “must” needs to be retained.

65. I object to the deletion of the wording in para 2 of policy D1 which must remain in full and I also object to the deletion of para 4.5.8.

66. I agree with the insertion of para 4.5.8a regarding the need for an efficient broadband connection but would add that the needs of current residents should take precedence. The state of broadband provision in parts of the borough (e.g. Ockham) is frankly dire.

67. I support the inclusion of policy D4.

68. In Guildford borough, it is widely accepted that there is an infrastructure deficit particularly in roads and the provision of health services. The needs of current residents are not taken into account in policy ID1. All infrastructure should be in place before development of strategic sites takes place to ensure that the developer pays so as not to jeopardise the needs of current residents. Indeed, I understand that the withdrawal of the objection from Highways England is contingent on infrastructure in advance.

69. There is insufficient weight given to the problem of air pollution in the borough. I object strongly to the fact that the Council does not take the health of its residents sufficiently seriously to have a policy to ensure the improvement of air quality in the life of the plan.

70. I object to the wording of policy ID3 para 11 which makes no sense at all. What do you mean by “the provision of additional public off-street parking in Guildford town centre will be supported when it facilitates the interception of trips that would otherwise derive through the Guildford gyratory”.

71. I object to the continued assumption that Guildford needs more retail. The ELNA fails to understand the shortcomings in the Carter Jonas retail study update 2017 which refers to retail requirement from companies already in administration and also fails to recognise the increasing use of internet shopping over the bricks and mortar experience. This is lamentable as the land allocated for retail could be put to much better use as residential.

72. I object to the inclusion of policy A58 – there is no justification for an increase in additional industrial floorspace at this location or indeed particularly as there are a number of vacant industrial sites at o Slyfield.

73. The AECOM work to support the ELNA is a poor piece of work riddled with unsupported assumptions.

74. I continue to object to the inclusion of the following policies: o A36-A41 inclusive in the Horsleys, A43 at Garlick’s Arch, A42 Clockbarn, and A58 There is no evidence that anyone has considered the cumulative impact of these developments together with the development at A35. The infrastructure proposed is totally inadequate and, as these stand at the borough boundary will have a huge impact on residents throughout the borough and further afield, particularly those who use the A3.
75. I object to the fact that there is no evidence that land owned by the council in the town centre is being used for residential development.

76. I object to the fact that the land required at Garlick’s Arch is said to be almost 29ha where only 13ha is required at 30dph.

77. Similarly, I object to the excess requirement for land at A53 where the normal plot ratio of 50% appears to have been ignored resulting in an excess use of green belt land of over 7.5ha.

78. I object to the housing number of 693/annum as no constraints have been applied – the GL Hearn methodology has compounded past errors in international migration forecasts and the whole SHMA needs to be re-visited and corrected as a matter of urgency.

79. I object to the continued use of the Green Belt and Countryside study as part of the evidence base. It is a subjective and inconsistent document that pays no regard to the impact of the current proposals on the setting of the AONB for example.

80. The transport evidence provided shows an increase in congestion as a result of the planned developments. Insufficient modelling has been done to satisfy me that any of the strategic sites can move forward on this basis. The consequences are severe to residents of Guildford and those much further afield.

81. I object to the fact that there is no proposed location for a bus station in the town centre. This means it is impossible to model journey times from, for example A35 with any degree of reliability. Furthermore, the modelling capacity at SCC does not use “real world” situations for example the junctions do not allow for traffic stopped at red traffic lights and assume all time all direction running which is clearly a fallacy. This perhaps makes it easier to understand why the today’s congestion is so dire.

82. There is no evidence that noise and light pollution and the impact on both humans and wildlife has been adequately taken into account.

83. I object to the fact that policy S2 makes no distinction between previously developed land in the Green Belt. It is clear that the use of a site with no above ground building e.g. A35 has a far greater impact than the use of a site such as Send Prison.

84. I object to the fact that greenbelt sites are allocated to improve flexibility in the delivery of the plan. It is clear that the green belt should only be seen as a last resort, after all other opportunities have been fully explored.

85. I object to the use of a film on the GBC website promoting a biased view from those interviewed who would in the real world have been excluded due to conflicts of interest. This is unfortunately completed expected behaviour from a council that continues to promote opaque policy and one which has little respect from many residents.

86. I object to the fact that the prosed housing allocation at Slyfield of 1000 homes results in no increase in vehicles. This is a patently false assumption and leads me to question the soundness of the transport evidence base.

87. I object to the variation in the assessment of sites which is extremely inconsistent. In some cases, the TBHSPA appears to be a concern whereas in others it isn’t. The same applies to a number of elements including impact of conservations areas, SNCIs, views in and out etc.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. It is very worrying that the council does not appear to have either the resources or the intellect to get the basics right.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Comment ID: PSLPS16/7795  Respondent: 15673313 / Stephanie Wiera  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heath Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heath SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

3

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency. I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We have significant concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater treatment capacity in this area is highly unlikely to be able to support the demand anticipated from this development. Significant infrastructure upgrades are likely to be required to ensure sufficient treatment capacity is available to serve this development. Thames Water would welcome the opportunity to work closely with the Local Planning Authority and the developer to better understand and effectively plan for the sewage treatment infrastructure needs required to serve this development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: Sewage Treatment Works upgrades can take 18 months to 3 years to design and build. Implementing new technologies and the construction of a major treatment works extension or new treatment works could take up to ten years. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the infrastructure is in place ahead of occupation of the development. We have significant concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater network capacity in this area is highly unlikely to be able to support the demand anticipated from this development. Significant drainage infrastructure is likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

An impact study of the foul network has confirmed that there is not sufficient capacity to accept this development. An option has been included in the report.

Waste water treatment: We have concerns regarding sewage treatment capacity at Ripley STW to accept proposed flows from this development. Ripley STW has a current Population Equivalent of 15,400. It will be necessary for us to undertake upgrades to the works to enable the flows from the new development to be accepted. Programming of upgrades to the STW will be necessary and the developer shall notify Thames Water and the Planning Authority of phasing of development and any amendments thereof.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the strategic site at Wisley Airfield as the proposed plan failed to demonstrate that the benefits amounted to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7862  
Respondent: 15678593 / Mole Valley District Council (Deborah Miles)  
Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Highways

Development at Wisley Airfield would give rise to a significant increase in vehicle movements. The nearest principal road, the A3, and other nearby trunk routes, M25, A317, A319, are all heavily congested. It is therefore likely that traffic will seek to make use of less congested routes, particularly at peak periods, encouraging ‘rat running’ and avoidance activities on the local rural road network to the south of the site, and southern roads such as the A246. Significant additional traffic on these roads would have an adverse effect on land within Mole Valley. MVDC is pleased to note that the requirements section to policy A35 (Land at former Wisley Airfield) has identified a number of works that will need to be done in order to improve the road network. MVDC would also ask that a Traffic Impact Study which includes mitigation measures should be submitted as part of any application.

A number of sites are earmarked for development within and around the edges of West Horlsey, East Horsley and Clandon. As with MVDC, the rural areas around Guildford are heavily constrained and the majority of new development has to be accommodated on smaller sites which makes it difficult to phase development and ensure the provision of infrastructure and services is in line with the rate of building. MVDC would ask that GBC are aware of this as and when applications begin to come forward, especially given the potential impacts identified as the Wisley Airfield development goes forward.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7863  
Respondent: 15678593 / Mole Valley District Council (Deborah Miles)  
Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Flooding

The Wisley Airfield site is identified as being partly in Flood Zone 3. MVDC would expect this to be taken into account when assessing a planning application on the site and that any Flood Risk Assessment would take measures to mitigate flooding in the wider area.

Education

MVDC have previously raised concerns that the development of the Wisley Airfield site had the potential to put additional pressures on the need for secondary school places both in GBC and MVDC. Of particular concern was pressure on places at Howard of Effingham School which would result in cross-boundary issues, particularly for residents in Bookham, for whom Howard of Effingham is the most popular local secondary school. Given the above MVDC are pleased to see the allocation of a secondary school within the Wisley Airfield site, as well as a primary school as previously proposed.

The Surrey School Organisation Plan does predict a steady rise in the need for secondary school places in Guildford over the next 10 years. Therefore, MVDC would ask to be kept appraised of the potential for development at this site, and that GBC consults with Surrey County Council so that county wide pressures can be taken into consideration.

Health

The allocation at Wisley Airfield will result in a significant increase in the local population, and it is noted that no specific provision has been made for primary health care. MVDC would expect GBC to consult with both Guildford and Waverley and Surrey Downs CCGs in order to address any cross-boundary issues that may result in a deficit of primary health care places in MVDC, specifically Bookham where the draft NHP has identified an existing need.

It may be beneficial if any consultation on this topic would include NHS England South East Region and that development aligns with the strategic transformation plan as agreed by the Surrey Heartlands Collaboration which includes social care and health.

Waste

The comment in Key Considerations of policy A35 (Land at former Wisley Airfield) regarding the waste allocation in the corner of the site is noted. It would be expected that consultations with Surrey County Council would be carried out regarding the need for alternative locations if required.

Upgrades to Thames Water waste water treatment works were mentioned in the refusal of the original planning application on the site. It would be expected that consultations with Thames Water would continue on this matter and that the upgrades would be carried out in time to support any proposed development and mitigate any impact on provision outside GBC.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Development of over 2,000 house village at Ockham (the former Wisley Airfield)

The proposal at this location of some 2,000 houses with mixed housing, retail, commercial, traveller and school development under two miles away would be significant in itself. To further compound this with proposed extensive developments at Burnt Common (400 houses and commercial developments and Gosden Hill Farm, Burpham 2,000 and mixed used developments) in addition to the impact upon West Horsley of the proposed developments within those Parishes, is more reflective of the form of development one might see in a Stalinist society rather than a caring and listening, democratic society. It also evidences a total lack of real consideration for residents within the districts concerned.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In looking at what residents can do to object, it considers that it would be best for residents to focus on objecting to the inclusion of development of the Former Wisley Airfield and it has drafted some bullet points for residents to use as below. It is important to state an objection whenever that is appropriate.

Object to the removal of the Former Wisley Airfield from the Green Belt. The area serves a vital role in preventing urban sprawl from London and a development would create an urban corridor stretching from London to Guildford.

The increased traffic would cause congestion and danger on the narrow rural roads in Ockham, Hatchford, Downside and Cobham. Cobham is the closest shopping centre to the proposed development. The village could not cope with the additional traffic and car parking involved in serving some 5,000 additional occupiers at the site and would experience a significant increase in stationary/idling traffic at peak times and at junctions.

Any proposed secondary schooling would add additional congestion.

Objections are supported by the unanimous rejection of application no 15/P/00012 by the Planning Committee at Guildford Borough Council on 8th April 2016 on the recommendation of Planning Officers. The Planning Report identified the serious concerns now being highlighted.

New Settlement at Ockham

I strongly object to the proposal to use farm and previously requisitioned land at Ockham for 2,100 houses. This is important Green Belt Land. The impact on my village would be enormous and unsustainable. Planning permission has recently been refused for numerous reasons and the site should therefore be removed from the Plan.

Already Rejected Proposals. I object to the GBC rejecting plans to develop the former Wisley airfield due to among many things a breech of national regulations as to the levels of nitrogen dioxide and particulates in the environment, and yet now includes this site in the Draft Local Plan. Utterly disingenuous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of A35 Wisley airfield in the local plan. The principle of the local plan is a presumption in favour of sustainable development. The Housing and Planning Act 2016 grants permission in principle to any development included within the local plan leaving only technical details to be considered by planning authorities. The site at Wisley failed in its planning application on a large number of points including infrastructure and sustainability. It is highly unlikely that these will be met in the future due to its positioning. Part of the site is green belt and no exceptional circumstances have been demonstrated. Aspects of the site also include high quality agricultural land.

</table>

The requirements section of Policy A35 newly proposes that additional mitigation is required for the Wisley Airfield development in the form of “two new slip roads at A247 Clandon Road (Burnt Common)”. The Transport Topic Paper paragraph 5.56 notes that the new slip roads are being promoted to “mitigate the impact of the level of strategic planned
growth and in particular the development traffic flows resulting from the development of a new settlement at the former Wisley Airfield site (site allocation Policy A35).

As noted in our letter dated 5 October 2016, it remains unclear if these slip road proposals are deliverable and what the conditional requirements are to enable the proposals to progress. It is not clear if proposals set out in Policy A43 (and now additionally Policy A58 and A35) are dependent on GBC’s aspirations set out in A43a. Appendix C Infrastructure Schedule notes that the Burnt Common slip road scheme will be wholly developer funded. To date we do not have any evidence that such an improvement is deliverable and could be designed in conformity with the Design Manual for Roads and Bridges. We would welcome further discussions on these policies.

We understand that the Wisley Airfield site is expected to go to Planning Appeal in September 2017 which will likely have implications for the soundness of these policies, therefore discussions are urgent if proposals are reliant upon the improvement set out in A43A that is being promoted by GBC and Surrey County Council.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

We object to the changed Policy A35 Wisley in respect of the identified mitigation to address the impacts on Ripley High Street and surrounding rural roads comprises two new slip roads at A247 Clandon Road (Burnt Common) and associated traffic management. This will not in any way mitigate the impact on Ripley High Street since traffic will need to pass through Ripley to reach Wisley. Previous objections therefore still stand for this changed policy concerning the reinclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham).

Following a huge public outcry, Guildford Planning Committee unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.

Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.
2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
3. Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
5. Absence of adequate traffic data.
6. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.

7. Loss of high-quality agricultural land (55% of the site), in breach of national policy.

8. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.

10. Cost of infrastructure required to the detriment of alternative more favourable sites.

11. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.

13. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.

15. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.

16. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

17. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

Specifically in relation to the former Wisley airfield/Three Farms Meadows (FWA/TFM), OPC OBJECTS to the inclusion of that site in the 2013 draft Local Plan for development. OPC and others in relation to, inter alia, the GBC’s 2013 draft Local Plan and Planning Applications for development or use of FWA/TFM, have documented in, inter alia, OPC’s letters to GBC dated 25 November 2013 (Local Plan), 4 June 2014 (Local Plan), 22 September 2014 (Planning Application), and 19 April 2016 (Local Plan). By way of example, copies of OPC’s letters of 22 September 2014, 29 March

OPC’s objections include, in summary:

1. FWA/TFM was included in the draft 2013 GBC Local Plan and was widely objected to. That draft Plan was eventually withdrawn after many months of consultation and deliberation.
2. The Wisley Property Investments Ltd (WPIL) planning application of January 2015 (Reference: 15/P/00012), as subsequently amended, for a phased development of a new settlement of over 2000 dwellings at FWA/TFM was after 14 months decisively and unanimously rejected by GBC on 8 April 2016 following the recommendation of the GBC Planning Officers.

The reasons for the refusal of the application were many but included that the proposed development:

• was an inappropriate development within the Green Belt;
• would have a clear and substantial detrimental impact on the openness of the Green Belt and conflict with the purposes of in the Green Belt Framework;
• failed to comply with the objectives of policy RE2 of the Guildford Borough Local Plan 2003 (as saved by CLG Direction on the Green Belt Framework);
• was within the 0 -400m and the 400m to 5km zones of the Thames Basin Heaths Special Protection Area, etc.
• would have a severe adverse impact on the safe and efficient operation of the strategic road network, and a severe impact on the local road network;
• failed to deliver the required transport sustainability measures;
• failed to secure an appropriate provision of affordable housing;
• was detrimental to the viability and vitality of the existing district and local centres in the vicinity of the site;
• would result in loss of the safeguarded waste site;
• presented a dense and urban form of development owing to its quantum and scale;
• had an adverse impact on the setting and significance of a designated heritage asset;
• had an unacceptable air quality impact;
• impacted on education infrastructure;
• impacted on policing infrastructure;
• impacted on health infrastructure;
• impacted on library provision.

1. Both similar and other objections and concerns had been raised by OPC, neighbouring borough and parish councils, Surrey University of Surrey, Thames Water, NATS, the Environment Agency, Police Authorities, Highways Authorities, residents associations and individuals - both in the context of the planning application and in relation to the current and earlier GBC draft Local Plans.
2. The value of the Green Belt and most importantly the value of FWA/TFM as a critical core at the heart of the Green Belt. There are no exceptional or very special circumstances justifying removal of the site from the Green Belt or its development. To the contrary there are overwhelming reasons for retaining the site as Green Belt, not only for the benefit of Ockham and surrounding villages, but also the wider community.
3. The value of FWA/TFM from an environmental and ecological standpoint, not least in relation to the Thames Basin Heath Special Protection Area, etc.
4. The value of FWA/TFM as a community asset and as a vital “lungs”, not least because of the dangers and possible illegality of increasing pollution and decreasing air quality as well as acid deposition on the SPA impacting human health and animal, plant and soil viability in the site and immediately surrounding areas.
5. The critical location and current nature of FWA/TFM in relation to the historic and current viability of the Ockham hamlets and surrounding villages.
6. The total unacceptability and disproportionality of the threat posed to Ockham, an historic rural village with around 160 existing dwellings, and with narrow lanes, no street lights, few pavements, many Conservation Areas and many listed properties – which would be completely subsumed by a 2000+ dwelling development, with urban style buildings up to 5 storeys high and a population density higher than most London boroughs. Ockham’s existing population of just over 400 would be increased over 15 times.
7. A Local Plan and potential development which do not meet, and indeed which are completely contrary to, the needs and desires of the population, as evidenced in the existing Ockham Parish Plan and the emerging Lovelace Neighbourhood Plan.
8. The detrimental and unsustainable impact of development at FWA/TFM on transport, the A3 and M25, local roads and road infrastructure (cars plus increased bus and HGV movements during construction and afterwards), on rail stations and car parking which are
9. “The value of FWA/TFM for agriculture, comprising as it does over 75% of agricultural land including 63ha of Grade 2, 3a and 3b agricultural land (of which 45.4ha is classified as best and most versatile land – Grade 2 and Grade 3a).”

10. The fallacious nature of claims made that FWA/TFM should be regarded as “brownfield” or previously developed. It should also be noted that the former airfield hardstanding and part of the old runway are within the 0-400m exclusion zone of the SPA, and the remainder of the old runway is (of course) flat where any development would have a major impact on the openness of the area. Much evidence exists that the adverse consequences of development of the site, including damage to the ecology of, e.g., the SPA, cannot be mitigated. The impossibility in practical terms of creating a sustainable development on FWA/TFM which is further demonstrated by the inability of the current landowner/developer and its many experts and advisers to come up with a sustainable development plan despite numerous attempts over an extended period.

11. The cumulative adverse consequences of other actual or potential developments in the area particularly in Ripley, Send and the Horsleys, and the impact on the future development plans of the RHS at Wisley.

CONCLUSION

The above objections graphically demonstrate why FWA/TFM was and should remain in and be part of the Green Belt, and why the lack of infrastructure, from places of employment, and existing overstretched and inadequate public transport, roads, services and facilities make the site totally unsuitable for any kind of significant development – as OPC and others have consistently argued.

The fact that the Local Plan still includes FWA/TFM (as well as neighbouring land not owned by WPIL) as a potential site for development and amounts to disregard for widespread local and further afield opinion.

The repeated attempts in numerous guises over the last 3 years to take FWA/TFM out of the Green Belt and to press for both major and ancillary development of the site have imposed heavy and unwarranted costs and burdens on local communities, not least Ockham Parish, have caused a blight on the area, distress to local residents and farming businesses, and have adversely prejudiced peoples’ lives and livelihoods.

OPC therefore strongly OBJECTS to this further and unwarranted attempt to exclude FWA/TFM and other parts of Ockham Parish from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Ockham Parish Council - 12 July 2016.doc (46 KB)
OCHHAM PARISH COUNCIL Local Plan Supplementary Letter - 14 July 2016.docx (26 KB)
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is further from railway stations than any other identified strategic site.
2. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
3. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
4. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
5. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
6. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ◦ The associated traffic increase from the RHS has not been taken into account.
   ◦ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
7. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
8. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
9. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
10. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
11. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
12. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
13. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
14. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
15. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
16. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
17. I object to the extension of the plan period by 1 year as it has not been identified as a major change
18. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
19. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
20. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
21. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
22. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
23. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The policy associated with the allocation of the site for 2,000 houses has not significantly changed (beyond minor grammatical issues). However, the Wisley allocation refers to a bespoke SANG to mitigate rather than avoid adverse effects on the SPA, this wording is inconsistent when comparing the general policy within the Plan (P5) and this specific policy. Policy A35 is not setting out the correct tests, and is inconsistent with Policy P5’s approach which seeks to adequately to avoid impacts on the SPA via a properly located and designed SANG. From our understanding of the proposals that have currently been brought forward, we do not consider that the SANG is adequately designed to avoid adverse impacts on the SPA, in particular because the extant rights of way on the site are likely to funnel residents from the housing and into the SPA. The RSPB therefore still remains concerned that policy P5 has not been properly implemented in relation to this specific allocation, a concern detailed in our response to the ‘Proposed Submission Local Plan: strategy and sites’ consultation.

The RSPB note with concern that all 8 of the “reasonable spatial strategy alternatives” considered by the Plan’s Sustainability Appraisal contain a proposal for 2000 houses at Wisley (page 36). The RSPB does not consider that this represents an appropriate consideration of alternative strategies insofar as this policy is concerned. This approach makes it impossible to consider the comparative sustainability of the site against other possible strategies. This has an important bearing on the overall soundness of the Plan. Paragraph 182 of the National Planning Policy Framework requires that for a plan to be justified it “should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence”. We consider that the failure to consider any plan scenario which does not contain Allocation A35 fails to satisfy the requirements of this test: there are clearly alternative sites and approaches that could have been adopted (highlighted by the number of sites that the Council has considered throughout the production of the Plan) but the Council has ultimately declined to demonstrate a clear need for the Wisley airfield site. If the Council had presented scenarios here with and without the Wisley airfield site it would have been possible to consider the comparative merits of the alternative sites and approaches, but instead the Council has considered no alternatives for such a substantial proportion (16.1%) of the Council’s housing allocations, and one that will have an array of significant implications arising from its inclusion in the Plan. The RSPB consider that in order to make the Plan sound it is essential that it assesses alternative scenarios which do not include the Wisley airfield site.

A further important consideration is that if technical problems prevent the delivery of the Wisley airfield site the Council does not have an alternative solution to help it meet its housing requirements, raising questions about whether the plan is effective over its period.

The RSPB considers that there are inherent inconsistencies between the stated aims of the Plan and the inclusion of the former Wisley airfield which are central to the overall soundness of the Plan. The Foreword to the Plan states that:

“It also outlines how we will conserve and enhance the unique qualities of our natural and built environment, especially in the Surrey Hills Area of Outstanding Natural Beauty and Thames Basin Heaths Special Protection Area. This Development Plan Document sets out how we propose to meet these conflicting demands” (p5).

The Foreword continues:

“Whilst we will conserve and enhance our special landscapes, the Local Plan aims to balance protecting the borough’s unique environment with meeting our social and economic needs.”

The RSPB submits that this statement gives a clear expectation that protection will be accorded a higher priority than development in circumstances where there are conflicts between the need to provide housing and the need to protect nature conservation interests. A key factor is that existing protected areas must be conserved in situ, whereas there is greater flexibility to decide where future housing allocations will go.

The RSPB notes Strategic Objective 6 of the Plan: “To protect those areas designated as Thames Basin Heaths Special Protection Area, Special Areas of Conservation, Sites of Special Scientific Interest and Areas of Outstanding Natural..."
Beauty for their biodiversity and landscape characteristics.” In addition we note Strategic Objective 7: “To ensure that new development is designed and located to minimise its impact on the environment and that it mitigates and is adapted for, climate change.” All of Strategic Objective 6, and the first part of Strategic Objective 7, are pertinent to the proposed allocation of the former Wisley airfield. The RSPB consider that the inclusion of the former Wisley airfield represents a clear failure by the Council to meet its requirement to conserve its internationally designated areas and has placed development demands first, and is a failure to meet the strategic objectives it has set itself. These clear internal inconsistencies demonstrate that the Plan is not the most appropriate when considered against reasonable alternatives and that the Plan consequently fails the “justified” test of Soundness.

The RSPB notes that policy S1, Presumption in favour of sustainable development, states:

“We will work proactively with applicants jointly to find solutions that mean that proposals can be approved wherever possible, and to secure development that improves the economic, social and environmental considerations in the area.”

However, this does not mean that it will be possible to find appropriate solutions to allow the development to go ahead.

We note that the supporting Policy P2, Green Belt, states that “If major previously developed sites are of sufficient scale and do not possess an open character, it is not considered necessary for them to remain within the Green Belt.” (para 4.3.14). However, a visit to the former Wisley airfield clearly indicates that, aside from a runway and adjoining apron that the site is clearly open in character, a fact borne out that the first reason given by the Planning Officer’s report into the Wisley application recommended refusal for the “clear and substantial detrimental impact on the openness of the Green Belt” (Officers’ Report, para 2.1).

The RSPB’s concerns with the site

We highlight here the key concerns which we raised on the rejected planning application for the former Wisley airfield, that we consider are central to the inclusion of the site as an allocation in the Local Plan. We focus on concerns we raised about the general suitability of the site, as we consider that these are so fundamental to the site that they cannot be resolved by the promotion of an alternative development scheme on the site.

6 The RSPB highlighted that “the location of the SANG between the development and the SPA will actually draw people towards the SPA and would end up simply providing new residents with a route to the SPA. Clearly, this defeats the object of providing a SANG.” (RSPB objection letter, 25 March 2015)

We further stated:

“Whilst we understand the developer’s desire to locate the SANG in the 400m zone as built development is highly unlikely to be permitted we consider that the constraints this has on its design is likely to introduce pinch-points and compromise the SANG’s effectiveness.” (RSPB objection letter, 25 March 2015)

Finally the RSPB stated:

“The RSPB’s view is that the existing PROW [Public Rights of Way] fundamentally and unavoidably compromise the functionality of the SANG as an avoidance measure.” (RSPB objection letter, 12 February 2016)

It is important to note that as a result of the multiple rights of way run right across the whole development site and into the SPA, providing ready access to the SPA to residents of any housing scheme that is constructed on this site, it is our view that no housing allocation is appropriate in this location.

As set out above in relation to our concerns about the rejected scheme, we do not consider it likely that a project level assessment will be able to adequately exclude the risk of harm to the Special Protection Area, as we do not believe a SANG at this development site can be effective in drawing residents away from the SPA as a result of the Public rights of way network on the site. As this information is already known and was available to the authors of the HRA we consider it inappropriate to rely upon such an approach here – the issues of concern are ones which are not capable of being resolved at the application level. Part of the role of the HRA of the Plan should be to evaluate the likelihood that a project-level assessment can be passed – helping to give a clear understanding of the likely deliverability of key sites: the former Wisley airfield is expected to deliver 16.1% of the Borough’s overall housing until 2034 – so it is essential that any risks to such a site coming forward should be clearly evaluated.
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3. I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4. I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6. I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   a) The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.

   b) The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

   c) The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

   d) The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

   e) The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on
the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

f) The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
When I went to school we had up to 40 people per class….and I see that the developers have planned for 6 classes (I assume a form is a class as it was in my day). OK – so where are the other 680 students going to school? Remember they are across 12 age groups so we are talking which is something like 24 further forms/classes required.

Has anyone at GBC really thought this through?

We can then turn our attention to the flora and fauna of the area. In the woodland known as the Forest alongside the Drift in East Horsley SWT have ripped out an area of low trees and thicket that surrounded a rather hidden pond. There used to be rabbits there, wrens, blue tits, black caps, tree creepers, wood-peckers as well as all the other birds of the woodland….but they are all gone. Who will care if SWT does not care?

And so what will happen to all the flora and fauna of the Wisley Airfield….an area that has largely remained quiet and untouched since the war….I plead on their behalf….“Where will we go?”

So what about this development – caged in by the A3, a B road and a couple of lanes. There is no infrastructure. Roads, Sewers, no parking at the two local train stations, buses….well, they may put some routes in but they will be clogged up too. In addition the permanent white noise of the A3 and the M25….and yet another area of open space is sucked up!

And lets face it….who will snap up these houses?

They will be sold in the main to people who are escaping London, but still work in the city….they will not be for local people who cannot afford a deposit….but still need a decent home.

I think that GBC needs to throw-out all the PR companies and Consultants, who will sell you the concept that black is white. I know this is true because all my business life I have used these type of people to sell the impossible for me. Get rid of them.

Start again GBC – with the whole of your local plan and start using your individual intelligence.

Blue-Sky thinking is what you need…it is not Rocket Science…it's easy….all you have to do is speak up, forget kow-towing to your boss because you are frightened of loosing your pension, speak up, speak load and talk some sense.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
SITE A35, FORMER WISLEY AIRFIELD

A new size of 95.9 hectares has been proposed without any consideration for local transport and will cause a huge increase in the local traffic which is already too high.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We strongly oppose the proposed development of the former Wisley Airfield. There are so many problems with this proposal that it is difficult to provide a comprehensive letter of objection.

In summary this is a proposal that, if approved, would place an unacceptable strain on an already overburdened infrastructure, whether schooling, medical facilities, roads, railways, parking and water supplies.

We are in the middle of another drought and the pressure on the water supply infrastructure is intense. The development is also unacceptably close to a prized national asset, the RHS Garden at Wisley. The M25 and A3 are already close to gridlock, as shown by the standstill on both 13 and 14 July.

The ameliorating proposals put forward by the developer in an adjacent planning application are ludicrously inadequate.

Please remove this proposal from the 4th document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I see there is another planning piece that has gone in and I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons as outlined below.

Please why can't you just allow a few more family homes in this peaceful family area, why this insistence on trying to create a massive new village that will ruin the infrastructure and all we hold dear in this beautiful area we live in? My 20 points are:-

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junctions in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is total unrealistic
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.

• The associated traffic increase from the RHS has not been taken into account.
• The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account. It is a nightmare getting anywhere in these days as you know.
1. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis. My children have been injured just by current local traffic on their bikes and refuse to cycle now as just too dangerous.
2. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
3. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
4. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design
5. Opportunity (3) should be common to all sites and is not unique to this site
6. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting.
7. I object to the removal of additional 3.1 ha from the green belt without any justification

1. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
2. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
3. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
4. I object to the extension of the plan period by 1 year as it has not been identified as a major change
5. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

1. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616?

This last point is one of a number of glaring examples of why the plan is unsound and not fit for purpose and alongside my other points needs to be rejected.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2124  Respondent: 17299841 / David Chesters  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

There is too much area allocated for retail which could be better used for residential.

I object to the loss of more green belt with the increased area.

I object to the increased area making it adjacent to Upton farm.

It is adjacent to a3/m25 junction which would lead to traffic using Wisley roundabout into an already congested and dangerous entry to the m25 slip road.

Local roads roads would not cope with increased traffic and buses in the narrow roads.

I object to the plan for the above reasons.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The new draft remains objectionable for three main reasons:

1. Based on Guildford Borough Council’s own figures, marginal changes such as these would still leave 56.7% of all new development in the borough built on Green Belt sites. No “exceptional circumstances” or any other justification is advanced for this strange imbalance.

2. The deletion of two Horsley sites fails to correct the issue of relative overdevelopment in East and West Horsley, which is both excessive in absolute terms and disproportionate in relation to the rest of the borough.

3. No attempt is made to assess the cumulative impact on the Horsleys – either of the four sites now proposed, or of Site A35 (Three Farms Meadow, alias “Wisley Airfield”), with over 2,000 new homes only 2 miles away. This piecemeal approach leaves the future of the Horsleys at the mercy of ad hoc planning applications, which is the opposite of what a Local Plan should intend. It would not be difficult (e.g. with the help of the draft West Horsley Neighbourhood Plan) to set out a proper, more integrated vision for this part of the borough. Without this, the plan is not a plan for the Horsleys in any practical sense.
The Inspector will also want to have regard to the feeling among Horsley residents that this limited approach is deliberate – driven by a concealed wish to turn their community into new dormitory town. Plausible claims have been made of political bias by a Council leadership representing the western end of the borough, which is less threatened by London urban sprawl.

The new plan Policies put greater emphasis on the need for adequate facilities and infrastructure to underpin development. But this is not reflected in any new wording on the Horsley sites, thus leaving most local objections unaddressed. Again, this defect curtails the plan’s usefulness as a practical planning tool at a site level and undermines its credibility among residents. The plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the Horsley sites, including public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops. These were fully set out in responses to last year’s public consultation.

The density of new housing on the four Horsley sites too is inappropriate, being greater than anywhere in the locality at present.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries. The plan presents no arguments for this which, contrary to NPPF paragraph 79, will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre and the popular Olympic cycle route.

These examples of positive planning depend on a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are hostile to this.9

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for the following reasons:

1. I live in East Horsley where local roads would not be able to take the additional traffic from Three Farms Meadow.
2. The infrastructure in East Horsley, including doctor, railway station and parking, would be overloaded by the additional pressure from the habitants of Three Farms Meadow.
3. It would involve severe disruption and constraints on the roads in Ockham.
4. I object to the removal of additional 3.1 ha from the green belt
5. I object to the change in green belt boundary to the eastern end of the site
6. I object to the fact that the council has failed to remove this site from the local plan
7. I object to the inclusion of a 10% buffer in the housing number over the plan period.
8. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

1. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
2. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Site A35 Former Wisley airfield

The sheer volume of traffic which will be using Ripley High Street and local roads notably Newark Lane, will cause massive congestion and pollution. I cannot envisage any possible traffic management methods which would effectively and efficiently deal with this volume of traffic on our narrow local roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2599  Respondent: 17325665 / Claire Nix  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site.

It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The associated traffic increase from the RHS has not been taken into account. The regular events at the RHS attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

I object to the fact that the increased area, being on the south of the site facing the Surrey Hills Area of National Beauty will increase the negative impact of the views.

I object to the removal of additional 3.1 ha from the green belt without any justification

I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000s of objection from local residents and statutory consultees.

I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

I object to the extension of the plan period by 1 year as it has not been identified as a major change

I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly to reflect the views and concerns of local residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As well as the general points above and notwithstanding any ruling upon them I also object to the inclusion of TFM in the draft local plan - even or especially as it is now amended and even if the further amendments now proposed by the developer can be considered at this stage. My reasons include:

1. TFM is the least sustainable strategic site identified in both this and previous versions of the plan because of the constraints on the site and the physical location.
2. TFM is further from railway stations than any other possible strategic site – hardly a place to locate students or other residents of publically owned or rent subsidised homes.
3. TFM relies upon the most congested stretch of the strategic road network in the county and the most congested motorway junction in the country (J10).
4. All roads local to TFM are at capacity and there are no funds to expand these e.g. by providing new bypasses.
5. The proposal to provide a bus service to TFM is totally unrealistic and unsafe. The roads are inadequate etc. This is clearly a sop to try and get permission - the bus will never materialise or will be cancelled for low use soon after its inception.
6. TFM is next to the most popular visitor attraction in the south-east, the RHS at Wisley, where visitor numbers are booming. These are forecast to increase by over 500,000/annum in the planning period yet this has not been taken into account. The RHS’s very popular special events attract thousands more visitors several times a year and these already bring the traffic all around to a standstill. Any future residents of TFM would be virtually prisoners.
7. There is no employment available near TFM so its residents will have to commute to work (or to the university to study!).
8. The proposed development at TFM cannot be built in any event or at least for many more than five years as a) it would breach the height restrictions imposed by the Ockham DVOR/DME (that will remain throughout the plan period) and b) there is no sewage capacity. Ergo this site anyway cannot contribute to any five year land supply calculation.
9. Even the councils own (changed) “Opportunities” listed in their policy reinforce why TFM is totally inappropriate. It takes barely a fleeting look at the plans for this site (a very long urban terrace perched on top of a ridge) to see these are just totally wrong.
10. The TFM site as this now defined (3.1Ha larger than was the subject of a recent planning application that the council unanimously rejected!) a) now abuts another heritage asset, Upton Farm, negatively impacting the setting of this building, b) will greatly damage the Surrey Hills AONB by its disfiguring views, c) encloses an area of high archaeological impact and d) proposes building on the flood plain. The site plans do not even accurately show the proposed site boundaries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3114  Respondent: 17344801 / Graham Rendell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Finally the proposed development on the Wisley Airfield would I think put just as much strain on the area as the Garlick?s Arch plan. Particularly the increase in traffic and impact on local facilities. It would obviously put major pressure on the small back roads into Cobham which I believe would make those small roads extremely dangerous. An increase in traffic through Ripley would cause massive congestion not seen since before the Ripley By-Pass was built - yes I am old enough to remember those times - with again an increase in air pollution and a decrease in air quality.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for the following reasons:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the overcrowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.

- The associated traffic increase from the RHS has not been taken into account.
- The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.

1. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
2. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
3. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
4. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.
5. Opportunity (3) should be common to all sites and is not unique to this site.
6. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
7. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
8. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
9. I object to the removal of additional 3.1 ha from the green belt without any justification.
10. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
11. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
12. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
13. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

14. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

15. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

16. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

17. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

18. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

19. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

20. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

21. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

22. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

23. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

24. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

25. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc.

26. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

27. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
- The proposed removal of over 3 hectares of Green Belt has been included without justification.

- The significant modifications made to the plan mean that it should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

- The evidence base especially the West Surrey SHMA and the Guildford addendum 2017 has been challenged by other experts including NMSS.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The new requirements set out in para. 9 of the infrastructure section for site A35 show how inadequate and unsuitable this site is and highlight the basic flaws in this proposal. Its proximity to the Thames Basin Heaths Special Protection Area and its scale will in reality be environmentally damaging despite the placebo of a SANG. The residents of such a site will all need at least one car per household, they will very largely have to commute to work and the proposals for alternative transport are not realistic. The proposals for local shops, school and medical centre will not materialise until late in the project and will no doubt be subject to the uncertain availability of funds at that time. In the meantime the development will place an unacceptable burden on the already stretched infrastructure of surrounding communities. In particular it is highly questionable whether the proposed bus service will prove economically viable and it will in any case be unsuitable for the narrow local roads. There is nothing sustainable about this proposal and it continues to be folly to build such a car dependent site next to two already overloaded main roads, the M25 and the A3 whose problems are acknowledged elsewhere in the plan (para 2.14a)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3378  Respondent: 17406209 / Guildford Vision Group (Andrew Black)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

POLICY A35 - Former Wisley airfield, Ockham

4.40 The concerns around highways impact as set out against policy A26 remain the same for this site. GVG is more concerned that the size of site, at 2,000 units, is not big enough to support the proposed community in its own right. GVG believes the development of this site will lead to substantial pressure on the existing infrastructure, both locally and in Guildford town centre, and this is not currently mitigated under the proposed Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
As previously set out, I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site because of the constraints on the site and the physical location.
2. Too far from railway stations.
3. Limited footpaths and safe walking or cycling routes.
4. Located next to and close to very congested motorway M25 and A road A3 which are frequently at grid lock throughout the day.
5. Local roads and back roads are not safe alternatives to blocked motorways and are very busy normally which has lead to consistent accidents due to dangerous black spots (Black Swan junction).
6. Train services already to congested and limited parking.
7. Local roads not safe for bus services, cars, cycles and walking commuters. Unrealistic.
8. RHS Wisley is near to this site and during shows causes increased traffic congestion and incidents.
9. Limited employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
10. I object to the negative impact to heritage sites.
11. remove this site from the local plan.
12. I object to this development because it will not improve the dangerously high pollution levels in this area.
13. I object because the plans includes a new road for the Elm Corner residents which involves having to navigate our way through the new development particularly when there is a better alternative for the residents available to the Council.
14. I object to the proposed Submission Local Plan.
15. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
16. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
17. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
18. I object to the extension of the plan period by 1 year as it has not been identified as a major change
19. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
20. I object to the Council wasting tax payers and residents’ time and money by not following due process and ignoring previous representations.
21. I object to the 10% buffer in the housing number over the plan period.
22. I object to the evidence base which is not transparent and has been challenged.
23. I object to the transport evidence base including the Highways assessment report.
24. I object to the transport assessment which used prescribed vehicle movements from this site with no justification.
25. I object to the housing number, particularly as the Council have not, as required used any constraints such as green belt, infrastructure, air quality. I believe that the housing number is unsound and unnecessary as housing shortage is not in Surrey but in inner London where low paid workers need to live to be near to their work.
26. I object to the apparent disregard the damage caused by nitrogen deposition and high pollution levels.
27. I object to policy S2 because the figures in the AHT table do not add up.
28. I object to the quantity of space allocated for retail in the town centre.
29. I object because the schooling offered is inadequate for this area both pre-school, primary, Junior and High school. Not enough thought has been given to the future need.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** pslp172/3390  **Respondent:** 17408481 / Colin Brewer  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is further from railway stations than any other identified strategic site.
2. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
3. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
- The evidence base is unsound, out of date and inconsistent. Particularly the SHMA, (2017 Guildford Update), the ELNA, the SHAR, the Green Belt and Countryside Study, and the Air Quality review.

- there is no comprehensive list of the evidence base making it impossible to know what the Council relies upon.
- it is littered with basic errors, including simple mathematical errors.
- the drafting is weak and unenforceable.
- there is no justification for including TFM (site A35) due to sustainability, air quality, impact on the TBHSPA, green belt, infrastructure cost.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Due to the rural location and constraints of the site it is the least sustainable strategy site in this and previous versions of the plan. Its inclusion cannot be justified in any way due to:

1) Local roads and railway stations being at capacity

2) Being adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junctions in the country (J10)

3) The increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House, negatively impacting the setting of these buildings and the wider Ockham Conservation Area

4) The increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB

5) The change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

6) The removal of additional 3.1 ha from the green belt without any justification

7) The failure of the council to remove this site from the local plan despite receiving 1000's of objection from local residents and statutory consultees.

8) The major changes made to the plan mean that this should not be a Regulation 19 Consultation. This type of consultation needs to be on the totality of the plan rather than the proposed changes.

9) There is no clear justification for the removal of one strategic site over site A35.

10) The plan is unsound within the original time frame and the council have chosen not to address this. They have ignored previous representations and not followed due process.

11) The transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

12) The housing number is unsound and open to legal challenge. The Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc.

13) The council claim this plan protects the borough's most important countryside, landscapes and heritage. It most certainly DOES NOT.

It is very apparent that the council have not taken on board many of the comments made previously on issues such as poor drafting and errors. When a comparison of the allocated sites is made there is clearly extremely inconsistent weighting on the various restrictions to suit their ends.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I continue to object to the inclusion of the Land at Wisley Airfield (A35) in the draft Local Plan for many reasons, including:

1. It is further from railway stations than any other identified strategic sites.
2. It is adjacent to the most congested stretch of strategic road network in the county and close to the most congested junction in the country (J10).
3. Local roads are at capacity particularly when the SRN is not free-flowing.
4. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
5. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs. It is unrealistic to suggest sustainable methods of travel such as cycling and walking could be used.
6. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
7. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

Despite having received thousands of objections from both local residents and statutory consultees, the council has failed to remove this site from the Local Plan and yet other sites have been removed. I can see no clear justification for this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3579  Respondent: 17417633 / Claire Attard  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to OBJECT once again to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan. I have already sent in my objections on previous occasions and would like you to pass on these comments together with all my previous comments to the Inspector. There are numerous errors in the plan and it has a considerable lack of clarity.

Below, I have highlighted some of the major objections I have as to why I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan:

1) I object, unreservedly, to the increased area of the site as this now backs on to our house, UPTON FARM, which is one of the heritage sites in Ockham, and would have a HUGE impact on our outlook and views all around. Not to mention the noise pollution, environmental impact, and loss to our quality of life. We have spent years adhering to the stringent Heritage Rules to make sure this house is in keeping with its period and history.

2) I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

3) Local roads are at full capacity and often grid-locked in the rush hours, particularly when the weather is bad, when taking the children to the local school.

4) It is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10).

5) The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”!
6) The change to the site boundaries are not identified correctly on the plan (Appendix H p16) - I object to this.

7) I object to para 21 which “limits” development in flood zone 2 and 3. Development should be EXCLUDED in flood zone 2 and 3.

8) I object to the fact that the council has failed to remove this site from the local plan, despite receiving 1000’s of objections from local residents and statutory consultants.

9) I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

10) I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

11) I object to the Council wasting tax payers and residents’ time and money not following due process and also ignoring previous representations over the years.

12) I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

For all the above reasons, and numerous other reasons, I consider this plan is unsound and should be removed from the plan as soon as possible.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** pslp172/3615  **Respondent:** 17419649 / Fiona Angus  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing again to the council to object to the inclusion of A35 Three Farms Meadows in the draft local plan.

I object for the following reasons:

1 it is next to one of the most congested rounds in the country and will result in the area being gridlocked with traffic and an unacceptable deterioration in traffic issues in the village of Ripley. Many of the residents would use their cars to travel to work or drive to Woking result in serious issues in Ripley Newark lane.

2 it is also opposite Wisley garden which is a very popular visitor attraction. They are proposing to increase visitor numbers by 500,000 which in combination with this proposed development will result in the entire area becoming gridlocked.

3 I object that the council has not removed this development from the plan. This overdevelopment on green belt has been repeatedly turned down and the council has received thousands of objections from residents. The high number of houses is totally unsound.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junction in the country (J10).
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.
12. Opportunity (3) should be common to all sites and is not unique to this site.
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
16. I object to the removal of additional 3.1 ha from the green belt without any justification.
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. Indeed, in ordinary words and common language, I believe that this draft local plan, and these revisions, in totality, but in particular relating to Three Farm Meadows are “bonkers”!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I have already objected to the proposed development at Three Farm Meadows. I am now contacting you to object to the proposed changes to the Guildford Borough Council Local Plan as it affects that site (policy A35). The submission plan is, in my view, unclear, unreliable and unsound and contains a significant number of errors. In particular, I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

In my view, the significant modifications being made to the plan mean that it is inappropriate to have a regulation 19 consultation – I note that no clear explanation has been provided by the council as to why it considers it to be appropriate. In addition, the Council appears to be wasting tax payers money and residents time and money as a result of not flowing due process and ignoring previous representations.

I remain opposed to the inclusion of Three Farms Meadow (A35) in the draft Local plan for the reasons set out in my email last year. I would reiterate that Three Farm Meadows is a Green Belt Site of more than 60% agricultural land alongside meadows which are natural habitat for badgers, bats and protected species. It is also a site of Natural Conservation Interest and home to three species of RPB ‘red list’ birds which are on the ‘at risk’ register. There can be no doubt that the proposed development would significantly change air quality for the worse.

Please ensure that this email, together with my original comments on the proposed development are passed on to the relevant inspector.

I object to the proposal to increase the area to 95.9 hectares because:

The building of what is virtually a New Town will result in a volume of traffic which will gridlock our already overcrowded local roads and raise the pollution levels which are already above safe limits.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object once again (3rd Time) to any development of the site referenced above for the following reasons:

a) It will generate over 4000 traffic movements a day. I presume Guildford Council reads the daily news reports that the rest of the World is trying to reduce pollution and protect an already damaged environment? This development will create traffic, noise and pollution precisely through its location, and this is totally unacceptable in the World today.

b) It will require additional schools, medical facilities and policing to support the community, which cannot even be adequately provided in the local area at present, so why create more demand through this development, when there are no funds for the existing local Authority services?

c) The site is Green Belt and should not be developed on, and the roads are already congested and cannot support any increased traffic (The A3 and the M25 are permanently jammed with traffic). Furthermore, there are no funds to maintain the roads if they are built, and some of the surrounding Councils cannot even repair the existing roads.

d) When this application was originally proposed we didn't have Brexit which apparently inter alia is expected to reduce EU immigration. If we no longer have so many people coming into the UK every year, there presumably won't be a short term pressing need to build as many houses, and even less of a reason to destroy the countryside to build the additional housing as proposed in this application.

Hopefully the application will finally be rejected so we don't waste further time and money on this, when there are so many more important issues like providing better education in the schools, reducing class sizes, and investing in our teaching, medical and policing staff.

I believe the Planning process needs reforming so that the environment can be protected for the long term and against short-term development. Perhaps the Government should also bring in Development Land Tax which most European Countries already successfully apply.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to comment on the proposed changes to the above Plan.

Despite what I imagine must be thousands of objection letters to Three Farm Meadows being included as a Strategic Site reviewing the documentation I see that it still listed as a potential site for inclusion.

I know my wife’s concern for this area being considered is from a traffic perspective and inability for the area to sustain this volume of development, to which I wholeheartedly agree but my other concern is that of the green belt, or rather loss of it. There appears to be changes to the green belt boundaries with no justification and which do not appear to have been identified correctly on the Plan. (Appendix H page 16). There is no justification given for the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact. We will also have increased negative impact of the views of the Areas of Outstanding Natural Beauty.

I am aware that this consultation is supposed to be comments just on the changes to the Plan not a reiteration of initial concerns but just in case my strength of feeling is lost – I object strongly to the Three Farm Meadows area, A35, being included on this Plan - our infrastructure does not support it and the unsupported estimated housing needs figures and associated building are threatening to destroy areas of green belt and views unnecessarily.

I appreciate it is tax payers money which is used to further delve into figures, predictive housing number needs etc but I am sure that we are local residents want this to happen. I am sure further investigation and analysis of the surrounding road and railway networks alone are warranted before this can area can ever be included.

As you have asked for our opinion please do listen to our concerns and incorporate them in your planning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I would like to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan. There are numerous errors in the plan and it has a considerable lack of clarity.

I have written some of the major flaws and my objections in the inclusion of policy A35, Three Farms Meadows in the draft Local Plan.

- Local roads are at full capacity and often grid-locked in the rush hours, particularly when the weather is bad, when taking the children to the local school.

- I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

- The change to the site boundaries are not identified correctly on the plan (Appendix H p16) - I object to this.

- I object, unreservedly, to the increased area of the site as this now backs on to our house, UPTON FARM, which is one of the heritage sites in Ockham, and would have a HUGE impact on our outlook and views all around. Not to mention the noise pollution, environmental impact, and loss to our quality of life. We have spent years adhering to the stringent Heritage Rules to make sure this house is in keeping with its period and history.

- I object to para 21 which “limits” development in flood zone 2 and 3. Development should be EXCLUDED in flood zone 2 and 3.

- The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”!

- I object to the fact that the council has failed to remove this site from the local plan, despite receiving 1000’s of objections from local residents and statutory consultants.

- It is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10)

- I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

- I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

- I object to the Council wasting tax payers and residents’ time and money not following due process and also ignoring previous representations over the years.

- I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

For all the above reasons, and numerous other major and minor reasons, I believe this proposal is unsound and should be removed from the plan as soon as possible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to confirm my continued objection to the inclusion of A35, Three Farm Meadows in the draft Local Plan for the reasons as given below:

- It is the least sustainable site in both this and previous versions of the plan because of the constraints on the site and the physical location.
- It is further away from any railway stations than any other identified strategic site.
- It is adjacent to one of the most congested stretches of strategic road network in the country (ie M25 Junction 10)
- Local road are already at capacity particularly when there have been any incidents thus making the SRN not free flowing.
- Public transport is already having to negotiate the overcrowded SRN and is therefore unreliable and subject to frequent delays.
- It is also adjacent to one of the most popular visitor attractions in the south-east, the RHS at Wisley which attracts huge numbers. Any regular events which take place several times per year already result in extra traffic chaos and I feel this has certainly not been taken into account.
- There is insufficient employment available on site so that all residents will have to travel to work. It is unrealistic to assume that people will walk/cycle on narrow local road on a regular basis. As a long term cyclist I have ceased riding due to the dangers of other road users.
- I also object to any changes within the green belt boundaries.
- I also object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objections from local residents and statutory consultants.
- I wonder and object to the fact that there has been no clear explanation why the council think it appropriate to have a regulation 19 consultation when the changes are major and needs to be based on the totality of the plan rather than the proposed changes.
- I object to the inclusion of A35 as it will not contribute to the 5 year housing projection due to constraints notably in the provision of sewage capacity
- I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
- I object to a 10% inclusion buffer in the housing number over the plan period as it totally unnecessary.
- I object to the transport evidence base including the SHAR 2016 Highways assessment report which has already been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
- I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
- I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBSPA etc. I believe that the housing number is unsound and open to legal challenge.
- I object to the apparent disregard for the impact of in-combination development on the THSPA, particularly damage caused by nitrogen deposition and high pollution levels.
- I object to the differences in the housing figures set out in the Annual Housing Target table. Another glaring example of why the plan is not sound.
- I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I also object to the reliance of the Carter Jonas study update 2017 which includes “demand” for retail space from companies that are already in administration.

I consider the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to object in the strongest possible terms to the plans submitted for reconsideration this September, following the rejection last year of the plan to develop the former Wisley Airfield at Three Farm Meadows. Any development in this area is unwarranted and will seriously damage the locality.

Please ensure that the existing concerns of all the local residents to this plan are conveyed to the Inspectors and that they are aware of the volume of objections against this development which cannot proceed to spoil this local area.

The application was rejected by GBC on hood ground last year when TFM should have been removed from the Local Plan. It is wrong to bring it back for consideration when it was turned down on so many grounds and for very good reasons.

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   ▪ The associated traffic increase from the RHS has not been taken into account.
   ▪ The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account.
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
12. Opportunity (3) should be common to all sites and is not unique to this site
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
16. I object to the removal of additional 3.1 ha from the green belt without any justification
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

36. Guildford Borough Council should not be entertaining any proposals from a Cayman Islands registered company. These types of entity are often associated with financial crime and tax evasion. In effect, Guildford Borough Council will be out of step with UK Government policy to not have any dealings with non-transparent entities, if this application proceeds.

Please consider all of the above and ensure that plans for an enormous town in the most inappropriate location are again refused. There are many other parcels of land around that can be considered for housing which would not impact on a small community in this way.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3855  Respondent: 17433409 / Julie Iles  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to site A35, Former Wisley Airfield, as the overall area of the site has increased to 95.9 ha, which implies loss of more open countryside to development. There is insufficient infrastructure to provide for the traffic and there is an insufficiency of sustainable transport links. The proposed mitigation is totally inadequate to avoid excessive traffic on the existing country lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I have the following objections to the proposed development at Three Farms Meadows, Wisley, and to the Guildford Borough Council Local Plan. Please confirm that all of these comments together with all my previous comments have been passed to the Inspector.

1. I object to the inclusion of Three Farms Meadows in the draft Local Plan for a number of reasons including:
   - It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
   - It is further from railway stations than any other identified strategic site.
   - It is close to one the most congested junction in the country (M25 Junction 10).
   - Local roads are at capacity particularly when the SRN is not free-flowing.
   - Any public transport (bus) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs.
   - It is adjacent to the most popular visitor attraction in the south-east, RHS Wisley, where visitor numbers are increasing every year.
   - There is insufficient employment available locally so that almost all residents will have to travel to work.

2. I object that the increased area, being on the south of the site facing the Surrey Hills AONB, will increase the negative impact of the views from the AONB.

3. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

4. I object to the fact that the Council has failed to remove this site from the local plan despite thousands of objections from local residents and statutory consultees.

5. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A Regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

6. I object to the extension of the plan period by one year as it has not been identified as a major change.

7. I object to the inclusion of a 10% buffer in the housing number over the plan period as unnecessary.

8. I object to the housing number and I believe that the housing number is poorly based and open to legal challenge.

9. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development.

I object to the Council wasting the time and money of tax payers and local residents by not following due process and ignoring previous representations. I consider, for the reasons listed above, that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Wisley Airfield and fields lie adjacent to the A3/M25 junction which is a pollution hotspot in Surrey (CPRE) and until air quality at this junction can be brought within legal levels, then proposing the addition of a village and two schools next to the junction seems highly irresponsible and possibly illegal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I require confirmation that all of these comments together with all my previous comments are passed to the Inspector.

I reserve my right to appear at the inquiry and present my evidence.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

- It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
- It is further from railway stations than any other identified strategic site.
- It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
- Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
- Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
- Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
- It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
- The associated traffic increase from the RHS has not been taken into account.
• The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
• There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
• The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station
• It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
• The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
• Opportunity (3) should be common to all sites and is not unique to this site
• I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
• I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
• I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
• I object to the removal of additional 3.1 ha from the green belt without any justification
• I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
• I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
• I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
• I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
• I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
• I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
• I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
• I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
• I object to the extension of the plan period by 1 year as it has not been identified as a major change
• I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
• I object to the Council wasting tax payers and residents' time and money not following due process and indeed ignoring previous representations.
• I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
• I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
• I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
• I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
• I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
• I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
• I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4099  Respondent: 17454433 / Landowners Consortium Wisley (Sir or Madam)  Agent: CBRE (jonathan stoddart)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

CBRE Ltd and Strutt and Parker act on behalf of a consortium of landowners who, between them, legally own the land identified within the appended location plan – see Appendix 1. The landowners that make up the consortium include: the Harris’ (Land at Bridge End Farm); the Matthews’ (Land at 2 Yew Tree Cottages); and the Fieldings (Land at Little Upton). Within these representations, we refer to this consortium of landowners as the ‘Client’.

Our Client’s land comprises predominantly agricultural fields, with agricultural buildings and dwellings. It extends to approximately 20 hectares in area and is located between Ockham Lane and the former Wisley Airfield.

This letter sets out the relevant background to this consultation, and our Client’s representations in response to the Proposed Submission Local Plan: strategy and sites’ (2017) consultation.

Background

Our Client’s land falls within the strategic allocation for the Former Wisley Airfield (Policy A35).

The principle of introducing a new settlement at Wisley Airfield initially emerged through the preparation of Guildford Borough Council’s (‘GBC’) evidence base: Green Belt and Countryside Study, Volume V (April 2014). Since then, strategic allocation A35 has been developed as part of the preparation of the Local Plan. The planning preparation process and associated evolution of strategic allocation A35 is summarised below.

The landowners who make up the consortium we currently represent have independently submitted representations to previous consultations in the plan making process. These representations are included at Appendix 2.

Regulation 18: Draft Local Plan Strategy and Sites document (2014)

In the summer of 2014, GBC consulted on the Draft Local Plan Strategy and Sites document. This document included a draft site allocation for a new settlement at the Former Wisley Airfield (Policy A35).

The land allocated extended to 69ha in area and was related to the Airfield land only – see map at Appendix 3. The Thames Basin Heath Special Protection Area (‘SPA’) Exclusion Zone (within 400m of the SPA) was excluded from the allocation as this land is not considered to be appropriate for new residential development. The land owned by our Client was also not included within the allocation at this time.
The draft site allocation proposed up to 2,100 homes, which is equivalent to 30 dwellings per hectare (dph) when applied to the proposed site area of 69ha. The application of a 30dph housing density is consistent with the methodology used within GBC’s evidence base.

In the summer of 2016, GBC consulted on the Proposed Submission Local Plan: Strategy and Sites document. This version of the plan also included a draft site allocation for a new settlement at the Former Wisley Airfield (Policy A35).

However, in this revision, the site allocation area included additional land to the south of the airfield as this had been confirmed as available by the relevant landowners, some of whom we represent currently. The total site area, which is illustrated in Appendix 4, is 92.8ha.

The total number of homes proposed remained at 2,100 within Policy A35, despite the additional land included within the allocation boundary. The resulting housing density is equivalent to 23dph, lower than the 30dph proposed in the 2014 version of the allocation and used within GBC’s evidence base methodology.

The latest version of the Local Plan is the subject of this consultation response. Like the versions before it, the 2017 plan includes a strategic allocation for a new settlement at the Former Wisley Airfield (Policy A35).

Since previous versions, the boundaries of site allocation A35 have been extended further to include the Land at Little Upton Cottages which is owned by the Fieldings and forms part of the consortium we now represent. The proposed site allocation now comprises 95.9ha in area and the revised boundaries are shown on the associated map provided at Appendix 5.

Despite the increased size of the site allocation area, the quantum of development proposed remains similar to earlier versions of the plan – i.e. “approximately 2000” conventional homes (Class C3). The resulting housing density provides fewer than 21dph, which is considerably lower than the 30dph proposed in the 2014 version of the allocation and used within GBC’s evidence base methodology.

On behalf of our Client, who as mentioned comprises a consortium of landowners to the south of the Former Wisley Airfield, our response to this revision of the plan is set out below.

**Wisley Airfield Outline Planning Application**

Outline planning permission for development of a new settlement at the site of the former Wisley Airfield (see Appendix 6 for a site plan) was refused by GBC on 8 April 2016 (LPA ref. 15/P/00012). Refusal was predominantly on the grounds of inability to demonstrate very special circumstances to outweigh harm to the Green Belt, a policy test which will not apply should the proposed allocation in the emerging Local Plan be adopted. This planning application sought permission for up to 2,068 residential dwellings, up to 60 sheltered accommodation units, retail, leisure and commercial uses as well as other supporting infrastructure.

The applicant has since lodged an appeal against the decision to refuse the application (PINS ref. APP/Y3615/W/16/3159894) which has been recovered by the Secretary of State. If the Secretary of State determines that the appeal should be allowed, then permission will effectively be obtained for the full extent of residential and other development set out within Policy A35 as currently drafted, but on only part of the land allocated for the development of the new settlement. Under the current bespoke programme the inquiry will take place in September 2017.

**Representations**

**Context**

The National Planning Policy Framework (‘NPPF’) sets out the tests against which Local Plans should be prepared and assessed. Local Plan policies should follow the approach of the presumption in favour of sustainable development.
The principal test guiding policy adoption is that of ‘soundness’, namely that the plan should be (NPPF paragraph 182):

- “Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;
- Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;
- Effective – the plan should be deliverable over its period and based on effective joint working on crossboundary strategic priorities; and
- Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.”

It is against these categories that the emerging Local Plan has been reviewed and against which the following representations have been made.

Principle of Strategic Allocation A35

As mentioned in previous representations, our Client fully supports the proposed release of the land identified by Policy A35 from the Green Belt, and the associated proposals to promote the creation of a new settlement on this land.

Extent of Strategic Allocation A35 Boundary

Our Client supports the extension of the strategic allocation boundary to include the land shown on the map at Appendix 1. The proposed boundary more closely reflects the scale of land identified and assessed within the supporting evidence base for the Local Plan, and (in line with paragraph 85 of the NPPF) also utilises physical and permanent features to create a defensible Green Belt boundary.

Delivery of the New Settlement Proposed in Strategic Allocation A35

As currently worded Policy A35 does not seek to impose specific phasing requirements for the delivery of the site, and instead states that GBC will have regard to the “delivery and timing of the key infrastructure requirements on which the delivery of the plan depends”. Our Client supports this approach, as it allows for flexibility in the phasing and delivery of new development where it is appropriately serviced and does not seek to impose delivery and phasing requirements which might otherwise serve to limit or frustrate delivery on the site.

It is worth noting that the land owned by our Client has alternative access, via Hatch Lane, which does not rely on the access routes created by the Wisley Airfield outline planning application. This access arrangement may assist with the early delivery of new development, particularly housing, which is a core objective of the Government’s Housing White Paper (2017). Notwithstanding the fact that the allocated land is served by several access points, we encourage increased connectivity through the new settlement, including links between the Wisley Airfield site and our Client’s land.

Quantum of Housing Proposed within Strategic Allocation A35

As detailed out in the ‘Background’ section, through the evolution of the plan the boundaries of strategic allocation A35 have been extended, and as a result the size of the site has increased significantly from 69ha to 95.9ha. This represents a circa 40% increase on the initial site area. As set out above, our Client supports the inclusion of this additional area as it is reflective of the Local Plan evidence base and addresses the Green Belt boundary principles set out in the NPPF.

This 40% increase in area however has not been reflected in the proposed quantum of development to be provided at the site in relation to housing, other uses and infrastructure. The current version of the allocation proposes “approximately 2,000” Class C3 homes, which is fewer than the 2,100 homes proposed when the allocation was initially introduced in 2014. If the quantum of housing was to increase by the same proportion as the site area, then circa 2,940 homes would be proposed (at 30dph). Whilst it may not be necessary to specify this number within the allocation wording, it is clear that the current reference to “approximately 2,000” homes is not appropriate as it does not respond to the additional capacity which the additional strategic allocation land could provide. Instead we suggest that the allocation wording is revised to
reflect the potential to deliver a greater quantum of development to reflect the additional land. It is considered that a range of residential yield should be identified, such as “…in the region of 2,000-2,500 dwellings…”.

The revised wording would then reflect the fact that the land allocated to the south of the airfield site is capable of delivering a high number of new homes, with Wisley Airfield potentially delivering circa 2000 homes as part of the pending planning appeal. Clearly the exact number of homes should be determined through proper masterplanning of the site, and the allocation wording could be further adapted to capture this.

In our Client’s view, the above identified key considerations would suggest that draft Policy A35 as currently worded does not accurately reflect provisions of the NPPF and the opportunity for sustainable development. Our Client suggests that greater flexibility is introduced to draft Policy A35 to allow for a more significant contribution of development, particularly in relation to residential dwellings, with specific reference to a higher number.

For the reasons set out above, our Client considers that Policy A35 of the Proposed Submission Local Plan as currently drafted is unsound with respect to development capacity as it is not:

- ‘Positively prepared’ – Additional development brought through the strategic allocation would further assist in meeting the development needs of GBC and neighbouring authorities. The development potential has not been maximised bearing in mind the significant uplift (40%) in land being promoted, and particularly when there is scope for the Wisley Airfield appeal to meet the current draft allocation for 2,000 units alone;
- 'Justified' – As it is not the most appropriate strategy with consideration to the principles of the evidence base and inappropriate reliance on the scope of the outline planning application and planning appeal;
- ‘Effective’ – The allocation currently fails to maximise the opportunities to deliver development provided by the release of Green Belt land, and therefore does not make the most efficient use of land, and so would not positively contribute to addressing cross-boundary strategic housing priorities; and
- ‘Consistent with National Policy’ – As it could do more to “boost significantly the supply of housing” (paragraph 47) and promote sustainable development.

Conclusion

The proposed extension of the strategic allocation boundary to include our Client’s land is supported as it reflects GBC’s evidence base and addresses the Green Belt boundary principles set out in the NPPF. Also supported is the exclusion of specific phasing and sequencing requirements, as this could frustrate the delivery of the new settlement.

Our Client does not however support the proposal to provide “approximately 2,000” homes as set out in the Spatial Vision (p22) and in Policy A35 (p225), as we do not believe that GBC has positively addressed the additional land (circa 27ha) which has been included since the allocation was introduced in 2014.

In order to be found sound we request that the Local Authority amend Policy A35 to state that the site can accommodate, “in the region of 2,000-2,500 homes”. Policy A35 (1) should therefore read:

This is a residential lead mixed use development, allocated for:
(1) In the region of 2,000 – 2,500 homes (C3), including some specialist housing and self-build plots, and;
The exact number can then be determined through proper masterplanning of the site.

I trust that the above provides informative comments to the current consultation. I would be grateful if you could please confirm safe receipt of these representation and for above comments to be considered and included in the final version of the emerging Local Plan.

In addition, we request to be kept informed on the Examination proceedings and request to reserve the ability to take part in the Examination Hearings on behalf of our Client.

[Appendices in attachment]

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including the following:

1. I object to the disregard for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.
2. I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.
3. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
4. The changes to the plan can only be made if the previous plan was ’unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.
5. I object to the fact that the council has failed to remove this site from the local plan despite receiving over 50,000 objections from local residents and statutory consultees.
6. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
7. I object to the removal of additional 3.1 ha to be removed from the green belt without any justification.
8. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will increase the negative impact of the views from the AONB.
9. Opportunity (3) should be common to all sites and is not unique to this site.
10. It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
12. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
13. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
14. It is further from railway stations than any other identified strategic site.
15. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.
16. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.
17. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
18. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
19. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
20. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
21. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design”.
22. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.
23. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
24. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
25. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
26. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
27. I object to the Council wasting taxpayers' time and money not following due process and in particular ignoring previous representations.
28. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
29. I object to the Housing number which is unsound and open to legal challenge.
30. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” Yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Please confirm that all of these comments together with all my previous comments are passed to the Inspector.

I continue to object to the inclusion of Policy A35, Three Farms Meadows, in the draft Local Plan for many reasons including:

1. I object to the increased area of the site as this now abuts and overlooks another heritage asset, Upton Farm, negatively impacting the setting of this building and the Ockham Conservation Area.
2. I object to the fact that the increased area, being on the south of the site facing the North Down AONB will adversely impact the views from the AONB.
3. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
4. It is the least sustainable strategic site in this plan because of the constraints on the site and the physical location.
5. It is too far from railway stations.
6. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junctions in the country (J10).
7. Local roads are at capacity particularly when the A3 is not free-flowing (accidents, diversions, roadworks etc).
8. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded A3 and will therefore be unreliable and subject to frequent delays.
9. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

10. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000 per annum.
   ◦ The associated traffic increase from the RHS has not been taken into account, and
   ◦ The regular events at the RHS, which attract 1000’s more visitors several times a year, and the resultant traffic has not been taken into account

11. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

12. It remains unclear when/if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

13. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

14. I object to para 22 as this does not reflect the impact of the buildings on the surrounding rural area.

15. I object to the fact that the council has failed to remove this site from the local plan despite receiving over 50,000 objections from local residents and statutory consultees.

16. I object to the Proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

17. I object to the Council wasting taxpayers and residents’ time and money not following due process and indeed ignoring previous representations.

18. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

19. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

20. I object to the transport evidence base which has been criticised for using out of date modelling software and is therefore unreliable.

21. I object to the housing number which I believe is unsound.

I consider for the reasons listed above and other reasons, that this plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.

It is further from railway stations than any other identified strategic site. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

It is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (M25/J10).

Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc). The frequent accidents at the Black Swan crossroads demonstrates the danger of relying on local roads. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.

It remains unclear when and if the Ockham DVOR/DME beacon will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.

I object to the fact that the increased area, being on the south of the site facing the North Downs AONB will increase the negative impact of the views from the AONB.

I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).

I object to the removal of additional 3.1 ha to be removed from the green belt without any justification.

I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the fact that the council has failed to remove this site from the local plan despite receiving over 50,000 objections from local residents and statutory consultees.

I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A Regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

The changes to the plan can only be made if the previous plan was ‘unsound’ and the changes should explain how they will make the plan sound. I object to the absence of proper procedure, leaving an unsound plan not capable of being accepted.

I object to the Council wasting tax payers and residents’ time and money not following due process and in particular ignoring previous representations.

I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

I object to the inclusion of Site A35 as it will not contribute to the 5-year housing projection due to many constraints including the provision of a new sewerage facility.

I object to the Housing number which is unsound and open to legal challenge.

I object to the disregard for the impact on the Thames Basin Heaths SPA, particularly the damage caused by nitrogen deposition and high pollution levels.

I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” Yet the figures in the table add up to 9,810. 12. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
13. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10).
14. It is further from railway stations than any other identified strategic site.
15. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum. The Plan has not taken into account the associated daily traffic increase to and from the RHS as well as for the regular events at the RHS which attract 1000’s more visitors several times a year.
16. It is the least sustainable strategic site identified in this version and in previous versions of the plan because of the constraints on the site and the physical location.
17. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
18. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc).
19. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
20. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
21. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate despite talking of “good urban design.”
22. I object to the increased area of the site as this now abuts and overlooks the Ockham Conservation Area.
23. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
24. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
25. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
26. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and in particular ignoring previous representations.
28. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
29. I object to the Housing number which is unsound and open to legal challenge.
30. I object to Policy S2 where it states: “4.1.9a The figures set out in the Annual Housing Target table sum to a total of 12,426 homes.” Yet the figures in the table add up to 9,810. The difference of over 20% demonstrates the lack of understanding of the housing requirements of the Borough. It is also an example of why the Plan is not sound.

For the reasons listed above and numerous other reasons I consider that the plan is unsound and not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object strongly to the inclusion of Three Farm Meadows in the Draft Local Plan for a number of reasons.

1. It is very much part of the Green Belt and I object to the change of the Green Belt Boundary to the Eastern End of the site.
2. I object to the fact there has been no clear explanation as to why the council think its appropriate to have a regulation 19 consultation when the changes are major.
3. The location of the build is totally unsuitable and unsafe, the site is extremely close to the most congested road network (A3 and M25) and most congested M25 junction of all (junction 10).
4. It is also adjacent to RHS Wisley where a huge number of visitors which will increase by 500,000 per annum, which will then entail more traffic leading off the A3 or onto the M25 slip road.
5. Any added public transport will have to face the crowded SRN and this would result in serious delays and unreliable services. The station car park already struggles with the amount of cars and the site is furtherest from the station than any other strategic site.
6. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is totally unnecessary.
7. I object to the increased area of the site as this now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Consecrations Area.

These are just some of the huge number of reasons why this site should not be included in the Local Plan, I have objected so many times and yet the Council are still failing to remove the Three Farm Meadows Site from the Local Plan. I hope you finally take in what all the local residents have been trying to say and realise what a huge effect this will have on the beautiful, historic and peaceful village of Ockham. You are destroying a piece of History.

Please please please remove this site from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I. WAG objects to the fact that there has been no clear explanation from the Council as to why they think it is appropriate to have a regulation 19 consultation when the changes made are major, for example the removal of a strategic site and a reduction in the housing number.

II. WAG also objects to the fact that there is no clear explanation why the Plan period has changed particularly as this has not been either justified or clearly identified.

III. WAG objects to the Council wasting tax payers’ and residents’ time and money not following due process and indeed ignoring previous representations.

WAG notes that the quality of evidence remains poor and is in some cases out of date and in most cases inconsistent. For example:

IV. WAG objects to the fact that there is no comprehensive list of the evidence base. See below:

[see attachment for image]

It is incumbent on the Council to ensure that the evidence base is readily accessible and completely transparent. WAG is of the opinion that the evidence is neither easily accessible nor transparent.

V. WAG objects to the use of the West Surrey SHMA and the Guildford addendum 2017 as these documents are based on false premises (inflated student number for example) and notes that the review by the independent expert Neil McDonald on behalf of the Guildford Residents’ Association questions the soundness of the SHMA. (Appendix 2)

V. WAG also objects to the transport evidence bases including the SHAR 2016 Highways assessment report which has been criticised by Mouchel, amongst many others for using out of date software and it is therefore unreliable.

VI. WAG continues to object to the use of the highly inconsistent Green Belt and Countryside Study and its numerous addenda as this document is subjective, misleading and inconsistent and therefore unreliable.

VII. WAG objects to the ELNA and in particular the Carter Jonas study update 2017 which includes “demand” for retails space from companies in administration.

With regard to the policies in the plan WAG makes the following comments:

VIII. WAG objects to the inclusion of a 10% buffer in the housing number over the plan period as we are advised by counsel that this is unnecessary.

IX. WAG objects to the housing number and in particular the fact that the Council have not, as required, used any constraints such as green belt, infrastructure, AONB, air quality, TBHSPA etc. WAG believes that the housing number is open to legal challenge.

X. WAG objects to the quantity of space allocated for retail in the town centre. Retail is changing and the need for “bricks and mortar” reducing. This space could be much better utilised as a sustainable residential space within easy walking distance of employment and establish transport links.

XI. WAG objects to the calculations used for industrial space which appear to use a far lower ratio than the industry standard resulting in unnecessary land take which has an impact on the use of green belt land.

XII. WAG objects generally to the poor drafting and apparent lack of proof-reading. An example of this is policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” when in fact the figures in the table add up to 9,810. It is impossible for members of the public to understand this kind of error/lack of clarity.

XIII. WAG objects to the fact that a number of policies use words such as “seek” and “request” which would render the policies unenforceable. All of these weasel words should be replaced without exception with strong verbs such as “require” and “demand”.

XIV. WAG objects to the apparent disregard for the impact of air pollution on residents of the borough and considers that the evidence submitted on air quality is not only woefully inadequate but also misleading.

XV. WAG objects to the fact that no account appears to have been taken on the impact of pollution on the TBHSPA particularly the damage caused by nitrogen deposition. It is an undeniable fact that the level of growth proposed by this plan will result in increased traffic movements and by extension increased polluting emissions. Any argument that relies on potential changes to the make-up of the vehicle fleet in terms of fuel source is clearly premature.

XVI. WAG objects to the fact that there is no consideration of the impact of in-combination development on the TBHSPA especially the large proposed developments in neighbouring authorities.

XVII. WAG objects to the fact that there is no justification for the removal of the strategic site at Normandy over and above the removal of any other strategic site and in particular site A35 on many grounds but most notably on sustainability grounds.

In relation to the specific allocation of site A35, WAG has a number of objections as outlined below:

a. WAG objects to the inclusion of site A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of infrastructure and in particularly the sewerage constraint due to lack of any spare capacity at Ripley sewage works.

b. WAG objects to the fact that the Council appear to have directed that the transport assessment for site A35 uses prescribed vehicle movements from site with no justification. WAG believes this makes the transport evidence subject to challenge due to bias on behalf of the Council.

c. WAG objects to the inclusion of site A35 as it is the least sustainable site identified in both this version and previous versions of the plan because of the constraints of the site and the physical location which is adjacent to the TBHSPA.

d. WAG objects to this site due to the fact that it is further from the railway stations than any other strategic site and in fact further from the railway than any other site in the borough save for the land between Seale and Shackleford

e. WAG objects to the inclusion of site A35 in spite of unanimous rejection of planning application 15/P/00012 on 14 grounds.

f. WAG objects to the inclusion of site due to the fact that it is adjacent to the most congested stretch of strategic road network in the county and close to one of the most congested junctions in the country (J10). The SRN in this location is currently operating significantly over-capacity and the proposed improvements both uncertain in design and timescale.

g. WAG objects to the fact that the withdrawal of the objection from Highways England dated 5th October 2016 almost certainly does not take into account the approval granted to the RHS Wisley on 5th October 2016 which has a significant impact on traffic. The assertion that RHS traffic does not impact the peak hour traffic is clearly false as day visitors leave the Gardens during the afternoon peak as any local resident will confirm.

h. WAG objects to the inclusion of site A35 due to the fact that the local road network is also at capacity and is severely adversely affected when the SRN is not free-flowing at times of accidents, diversion, roadworks etc.

i. WAG objects to the allegation that public transport provision will be able to mitigate the impact of this allocation especially as bus routes to/from Guildford will have to utilise the over-crowded SRN in one/both directions and therefore will be unreliable and subject to frequent delays.

j. WAG objects to the inclusion of site A35 due to the fact that any public transport (bus services) provision to Horsley and/or Effingham junction will impact the safety of the local road network as the lanes are not legally wide enough to accommodate PSVs, particularly when sustainable methods of travel such as cycling and walking are being promoted on the same lanes at the same time. This is not only unrealistic but it is also unsafe.

k. WAG objects to the allocation of site A35 due to the fact that the mitigation to address the impact of increased traffic will not address the commuters travelling to Woking station.
l. WAG objects that due to the fact that site A35 is adjacent to the most popular tourist attraction in the south-east, the RHS at Wisley where the visitor numbers are due to increase by 500,000 visitors per annum and that the associated traffic increase has not been properly modelled or taken into account; and

m. WAG objects to the fact that nor has any account been taken of the traffic resulting from the regular events at the RHS which attract 1000’s more visitors several times a year in the consideration of the allocation of site A35.

n. WAG objects to the fact that the inclusion of site A35 has not properly taken into account the impact of the changed boundaries of the allocation on the adjoining heritage assets and in particular the impact on the setting of Bridge End House (Grade II) and Upton Farm (Grade II) in addition to the known impact on Yarne and also impact the setting of the Ockham conservation area.

o. WAG objects to the fact that the increased allocation at site A35, being on the south of the site facing the Surrey Hill AONB will further negatively impact the views to and from the AONB.

p. WAG objects to the removal of an additional 3.1ha of land from the green belt without any justification.

q. Furthermore, WAG objects to change of the site boundaries of allocation A35 as these are not identified clearly or correctly on the plan (Appendix H p16)

r. WAG objects to the unjustified change in the green belt boundary at the eastern end of the site especially as this now encloses an area of high archaeological interest which will prove difficult to develop in the light of the archaeological finds in the surrounding area.

s. WAG objects to the fact that the impact of the OCK/DVOR has not been properly taken into account in the allocation of site A35. It remains unclear when/if this will be decommissioned as the timetable has already slipped. The constraints on the site due to the DVOR are significant and if it is not decommissioned will severely limit the availability of the site to deliver enough land to make the allocation viable.

t. WAG objects to the fact that insufficient weight has been given to the sustainability of allocation A35 due to the lack of employment available onsite meaning that almost all residents will have to travel to work. As already identified above it is unrealistic and unsafe to assume people will walk/cycle to work on narrow unlit local roads on anything more than a very occasional basis.

u. WAG notes that the changes in the opportunities listed in site allocation A35 reinforce why this site is totally inappropriate, talking of “good urban design” – just what is needed in a rural area.

We also include for completeness Appendices damage to the TBHSPA (Appendix 3), relating to Air quality (Appendix 4) and ecology (Appendix 5). Whilst these appendices have been prepared for the forthcoming appeal on a planning application to all intents and purposes the same as site allocation A35 they are all relevant and need to be taken into account.

For all the reasons already identified by the Wisley Action Group together with the reasons listed above it is quite clear that site allocation A35 is unsustainable.

The Wisley Group continues to have very serious concerns on the soundness of the evidence base and objects in the strongest of terms on the proposed submission plan.

....

A further change which flows from the 2017 changes therefore to delete the former Wisley Airfield allocation. Since it must be accepted by the Council that its 2016 housing requirement is unsound and that too much housing was allocated in that draft, the question is, even on the Council’s figures, what changes should be made to reduce the supply. Given the harm identified by our 2016 representations, the former Wisley Airfield should be deleted to reflect the reduced requirement. Instead the changes propose to remove sites which are more sustainable and more easily developed. All references to development at the former Wisley Airfield, including in the proposed changes, should be deleted. The case for that scheme is further diminished by its failure to contribute to the five year housing land supply. The 2017 Land Availability Assessment Addendum projects the first units coming forward in 2022/23.
The changes fail to take into account developments which have been approved or are proposed since the submission draft, in particular the RHS Wisley consent and Highways England’s plans for the M25 junction 10.

**A35 Former Wisley Airfield**

This policy should be deleted for the reasons given above.

In respect of the proposed changes:

At paragraph (21), development should be excluded in flood zones 2 and 3, it should not merely be limited.

At paragraph (22), there should be sensitive design at the proposed built up area boundaries, rather than at the site boundaries. The site boundary to the north is quite separate to the edge of the proposed village because of the proposed SANGs. A significant gap between site boundary and built development is also likely to the south. Sensitive design at the site boundaries is not what is needed, the effects of the development on its surroundings will be from the built area.

The changes to the opportunities to refer to ‘good urban design’ and ‘high quality architecture’ which should be sought on any urban site. It does draw attention to the harmful nature of the proposals which are for a high density urban form of development, including buildings of up to five storeys, rather than a village.

The 2017 proposed changes contain an enlargement of the allocation site boundary to include three further fields to the south east of the development. The A35 section of the 2017 document does not however show this as a change: it is only apparent when the 2016 and 2017 plans are compared or when the appendices are examined. It brings further development close to the Ockham conservation area. There is no discernible justification for this further increase in the development area. Additionally a further alteration to the Green Belt boundary is proposed, removing land at the Ockham Lane/Old Lane junction. This is wholly unjustified and there are no exceptional circumstances for making the change.

The proposed reductions in the housing land requirement and supply do not go far enough whilst the extension of the plan period is not justified. The changes do however strengthen the reasons for deleting the former Wisley Airfield site in its entirety.

We agree that the housing requirement in the 2016 plan was too high, however the reduction in the 2017 proposed changes (from 693 to 654 dwellings per annum) is insufficient.

There is no justification for moving the end date of the plan back by a year. The 2016 plan was not unsound because of its duration. The only reasons which there may be for the change are to increase the housing requirement (by adding a year) and to delay the delivery of new housing (by proposing 850 houses, so above the annual requirement) in that final year (see para 4.1.9). This goes towards a solution for Guildford’s housing needs of strategic sites which may take a long time to come forward (such as Wisley) rather than promoting smaller, sustainable sites within the urban area which are able to provide homes much sooner.

Whilst the buffer over the plan period has been reduced to 10% from 14%, it is still unnecessary. The only requirement for a buffer is for the five year housing land supply and that draws forward housing from within the plan period. There is no justification for any buffer over the plan period.

WAG commented in its 2016 representations that the over-allocation of housing meant that there was no justification for including the former Wisley Airfield (A35) given the harm it would cause. That case is strengthened by the reduction in the housing requirement.

A further change which flows from the 2017 changes therefore to delete the former Wisley Airfield allocation. Since it must be accepted by the Council that its 2016 housing requirement is unsound and that too much housing was allocated in that draft, the question is, even on the Council’s figures, what changes should be made to reduce the supply. Given the harm identified by our 2016 representations, the former Wisley Airfield should be deleted to reflect the reduced requirement. Instead the changes propose to remove sites which are more sustainable and more easily developed. All references to development at the former Wisley Airfield, including in the proposed changes, should be deleted. The case
for that scheme is further diminished by its failure to contribute to the five year housing land supply. The 2017 Land Availability Assessment Addendum projects the first units coming forward in 2022/23.

The changes fail to take into account developments which have been approved or are proposed since the submission draft, in particular the RHS Wisley consent and Highways England’s plans for the M25 junction 10.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I particularly object to the inclusion of the large scale development of Three Farms Meadows which has already been unanimously rejected by Guildford Borough Council in recent months. Where we live such a development would create unnecessary damage to the environment and in conjunction with the approved development at RHS Wisley, would put an impossible strain on local infrastructure in particular, the narrow congested and already dangerous country lanes around the site.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I continue to object to the inclusion of policy A35, Three Farms Meadows, in the draft Local Plan. Much of the above general comment in relation to the Horsleys is also applicable to this site. Primarily, the proposal removes 3.1 h of land from the Green Belt without any justification. There are no special reasons for this as such for it is effectively unsustainable because of its location and the constraints of the site. Junction 10 of the M25 is unworkable at times and even the proposed improvement of the junction will not alter the totally restricted access to this site from the A3/M25. In this respect, it is will rely at that end on the same junction on the A3 as RHS Wisley, a major visitor attraction with its own plans for expansion. The access at the other end of the A35 site is from narrow country lanes and any substantial increase in traffic including bus services there will make them even more dangerous than they are now and increase the deterrent effect on walking/cycling to the various railway stations. I could also mention problems with drainage, flooding, insufficient sewerage, lack of medical services, schools, transport connections in the surrounding areas as well.

Quite apart from the wholly unsustainable nature of the site on all levels, any substantial development of it, such as that presently proposed and under appeal, will have an overwhelming effect on the Horsleys and other nearby villages, already faced with proposals for their own expansion in the draft Local Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
9. The identified mitigation to address the impact of increased traffic will not address commuters travelling to Woking rail station.

10. It is uncertain when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

14. The increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

16. I object to the removal of additional 3.1 ha from the green belt without any justification.

17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.

18. I object to para 21 which "limits" development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000s of objection from statutory consultees and local residents.

For the reasons listed above and numerous other reasons cited by Ripley Action Group, Wisley Action Group, Horsley Countryside Preservation Society all of whom I fully support, this plan is unsound and not fit for purpose.

I urge you to amend the draft plan taking the above concerns fully into consideration, including removal of the former Wisley Airfield from the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

build. Implementing new technologies and the construction of a major treatment works extension or new treatment works could take up to ten years. The wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Strategic drainage infrastructure is likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a wastewater network capacity constraint, the developer should liaise with Thames Water and provide a detailed drainage strategy with the planning application, informing what infrastructure is required, where, when and how it will be delivered.
