The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly, any employees at the employment areas will almost undoubtedly arrive and leave by car.
The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: pslp172/4393  Respondent: 8826369 / Tim Madge  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1417  Respondent: 8827809 / Robert Wood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Glandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt. I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development on this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A2.47 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.
Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current 'soft' edge approach to Guildford.

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (BS). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13). The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of
development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the building of 400 houses at Garlick’s Arch. These are not needed in Send or the borough and the proposal was announced at the last minute without any prior consultation.

1. I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch. It is not needed and there is already an available site at Slyfield where it can be built.

1. I object to the proposed development at Garlick’s Arch because the site is home to ancient woodland which should be conserved and it is also subject to flooding.

I object to the proposed development at Garlick’s Arch as it is part of the Green Belt and helps stop merging of towns and settlements. This is the main purpose of the Green Belt. I believe it needs to stay as such.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: pslp172/3931  Respondent: 8828385 / Thomas Meredith  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
I object to the Policy A43, land at Garlick’s Arch, Send Marsh for the following reasons:

1. This totally ignores hundreds of previous objections by local residents.
2. There are no ‘exceptional circumstances’ as required by the National Planning Policy to take this area out of the Green Belt.
3. This will remove ancient woodland which cannot ever by regained.
4. Ripley and Send villages will merge, therefore defeating the purpose of the Green Belt.
5. The number of homes proposed is excessive. Send is a village. This is over-development to the extreme.
6. The area is subject to frequent flooding and is currently a Flood Zone 2 allocation.
7. The excessive traffic that will be generated will totally cause mayhem on the Send and Ripley roads. Already whenever there is a road closure nearby or traffic accident (almost a daily occurrence on the A3/M25) in the vicinity – the main Ripley, Send Marsh and Send roads are ridiculously congested or at a total standstill.
8. There is no proven demand for Travelling Show people sites in this location. This development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.
9. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlick’s Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement - often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I particularly object to Policy 43 - the proposed development at Garlick’s Arch which has significant implications for the local villages. The site has extensive ancient woodland which should not be destroyed. Previously the council has turned down development in this area due to the detrimental effect it would have on the Green Belt. Now the council proposes to go against its own advice. Small scale development was thought to be inappropriate & the council itself said, “There are no special circumstances which outweigh the substantial harm to the Green Belt…” so how can large scale development now be appropriate? The council needs to take notice of its own advice!

The scale & type of development is totally inappropriate for this area. The proposed 7000 sq. metres of industrial space would be much better situated at Slyfield. As the site floods, it is not suitable for this development nor the proposed 400 new houses. I do not believe that there is demand for so much commercial & industrial space. When premises have been made available previously through development in the village, it has proved very difficult to let or sell these sites. If there is demand, I do not know why the council removed the proposed plans for the North Slyfield Site from the local plan at the last moment.

In addition, the infrastructure cannot cope with large scale development. Local transport is extremely poor; bus times make it difficult to use buses to commute to the stations or to work in the towns & stop very early at night so are not suitable for evenings out, nor for young people going into the towns. Whole families have to rely on cars.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7119  Respondent: 8828929 / Janice Hurdle  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy 43 - the proposal to build 400 new houses at the Garlick’s Arch as the site already floods and this would be made worse if the site was developed. In addition, the house called Oatlands in Burnt Common Lane had a proposal for 25 houses turned down a couple of years ago so how can it now be right to allow 400 houses? This increase in population would completely change the village & create lots of additional problems.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/2248  Respondent: 8828929 / Janice Hurdle  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick’s Arch because I am concerned at the addition of travelling/showpeople pitches as this seems inappropriate alongside houses. The roads around Send & Ripley are also not suitable for their large vehicles & I am unsure as to why all 8 pitches should be placed in Send. Garlick’s Arch consists of ancient woodland in the green belt & there are no “exceptional circumstances” for developing it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPS16/5624  Respondent: 8835809 / Richard Golding  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT, this land is Green belt it contains two areas of ancient woodland 50% of the site is subject to flooding and is recognised locally as a FLOOD PLANE, any work carried to reduce the area flooded would increase the likely hood of flooding in Send Marsh, the Environment Agency undertook work a few years ago in Send Marsh to reduce the risk, but any work on Garlick’s Arch could neutralise the good work done. If the proposed development of 400 houses and industrial buildings takes place where will there surface water go, will it just be spirited away, it will certainly not soak into the ground under such a density of buildings, it will either finish up in the main drainage or the stream. Even if it goes into some form of soak away it will still finish up in the stream after percolating through the soil. I have attached a photograph of the flooding at Garlick’s Arch, when this photograph was taken 50% of the proposed site was flooded.

The ancient woodland on the site has protection under the NPPF section 118 if one locates a development of this size adjacent to woods it can not fail to damage it. I do realise the policy does allow exception for thing of national importance, but this certainly fails to meet that standard. 400 houses would give a minimum of 800 people 1600 feet tramping over the woodland. With this level of development there would be another 800 cars on the roads of Send assisting with the gridlock the council are working towards, I would also like to draw your attention to the fact the draft plan which was circulated for consultation had no mention of this site then by slight of hand two week before the plan went to council for a vote on adoption, this site appeared as an amendment to the circulated documents. This probable has more to do with the council wish to add additional entry points to the A3 and the gifting of the land for this by the owner of this site, Is this the correct way for a council to function? I don’t think so. The previous site proposed in the local plan for the industrial units has been dropped and Slyfield the main industrial area has been totally ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3234  Respondent: 8837313 / Maria Baker  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (82) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately I 00 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents fallowing a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site. National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I OBJECT STRONGLY to Policy A43, the use of land at Garlick’s Arch for the construction of 400 houses

1. There is no need for this housing on top of the 13,860 houses already proposed for the Borough
2. This site is NEW, was not included in the Regulation 18 draft and has not been consulted upon previously
3. It is Green Belt protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances to consider any override.
4. The site has conservation sensitivity as there are trees on the site from the 16th Century – part of the site is ancient woodland.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to strongly OBJECT to the last minute inclusion of the site at Garlick’s Arch in Send Marsh/ Burnt Common (A43 and A43a) the current draft of the Local Plan. This site is a major change at a very late stage, without prior consultation. Considering the severity of the change, I believe that its inclusion is inappropriate and potentially in breach of procedure. This was included less than two weeks before the draft was presented to Guildford Councillors, with no community consultation whatsoever, and appears to be in breach of Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to engage local communities in determining the Local Plan. Having sneaked this proposal in at the last minute without any consultation whatsoever with the community, the council has allotted a mere 6 weeks to register objections (half the usual time).

In addition to my objections based on procedural grounds, below is a list of objections based on the characteristics of the site, and the level of development proposed.

I object to destruction of ancient woodland (Policy P2, Policy I4)

Looking at the map supplied by GBC, approximately a fifth of the site at Garlick's Arch is made up of Ancient Woodland. It is also adjacent to another large parcel of Ancient Woodland. Ancient Woodland are at least 400 – 10,000 years old. To put this into context, the country is celebrating Elizabeth II’s 90th birthday this year. These woodlands have been in place since the reign of Elizabeth I or long before. According to the NPPF and planning advice on www.gov.uk, “Trees and woodland classed as ‘ancient’ or ‘veteran’ are irreplaceable. Ancient woodland takes hundreds of years to establish and is considered important for its wildlife, soils, recreation, cultural value, history and contribution to landscapes.” GBC should be doing everything it can to protect the small amount that is left in the borough. Ancient Woodlands are the Grade 1 listed buildings of our environment. We wouldn’t demolish a Grade 1 building for new development, we should protect Ancient Woodland in the same way.

I object to development in an area of good quality Green Belt (Policy P2, Policy I4)

This site lies within parcel B14, which according to the Guildford Borough Green Belt and Countryside Study, fulfils 3 of the 4 Green Belt criteria, that is to check the unrestricted sprawl of large built-up areas, to prevent neighbouring towns from merging into one another and to assist in safeguarding the countryside from encroachment. I believe that it is the duty of GBC to protect the Green Belt for current and future residents of Guildford. Building on the site at Garlick’s Arch is contrary to points 79 and 80 of the NPPF which states that “The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.” Planning Practice Guidance issued by the Government in March 2013 (Standard note: SN/SC/934) makes...
clear that “unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt.”

I understand that much of this site is in productive agricultural use. There are no exceptional circumstances for this site being developed on as required by the NPPF.

**I object to inappropriate level of development for Send, Send Marsh and Burnt Common (Policy I1)**

The proposal for Garlick's Arch site includes 7,000sqm of light and general industrial units as well as 400 houses and a 4 way on/off junction for the A3. This is an absurd level of development for the area will have a significant impact on the semi-rural village of Send. The village will become a significant junction on the A3 with increased vehicular and HGV traffic on the A247, that runs through Send village. The resulting noise and sound pollution as well as traffic congestion, will have a severe negative impact on the health and well being of current and future residents of Send. The current medical and educational facilities are not able to accommodate the large increase in population that would result from this oversized development. The need for additional housing has not been proven and additional industrial development could easily be incorporated at Slyfield.

**I object to development in Garlick's Arch which is at risk of flooding (Policy P4)**

The site at Garlick's Arch has been classified by the Environmental Agency as being at higher risk of flooding than the council's own assessment. It has flooded many times in previous years (please see attached photo of flooding at Garlick's Arch). The inclusion of this site shows that the local plan is not taking into adequate account the risk of flooding as required by the National Planning Policy.

I believe that the improper late inclusion of the Garlick’s Arch site, the inappropriateness of developing a high quality Green Belt site with Ancient Woodland, development on a site with high flood risk, and the significant level of development on the site, must result in the site being removed from the next draft of the Local Plan.

*I would like my comments to be seen by the Inspector.*

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**3) I OBJECT to the Policy A43 change at Garlick's Arch**

This site was a last minute addition to the last version of the local plan and it had received thousands of objections. Its inclusion in this version with increased plots for travelling show people shows a complete disregard for local residents who are already faced with overcrowded roads and medical and educational facilities.

Not only is there no proven demand for travelling show people plots in this area, this site is also not suitable for the provision of such plots according to Policy H1 which provides the strategic policy for the provision of plots for travelling show people where provision is being made for 500 homes or more. This plot currently has an already excessive 400 homes proposed, but below the 500 home threshold for triggering Policy H1. There is also no detail of how these sites will be accessed by the heavy vehicles associated with these plots. I object to the travelling show people plots as unnecessary and inappropriate.
This site is in the Green Belt and no "exceptional circumstances" exist to justify its development, especially on the massive scale that has been suggested. It contains areas of Ancient Woodland, which I believe should be given the same protection status as Grade 1 listed buildings. Ancient Woodland are at least 400 – 10,000 years old. According to the NPPF and planning advice on www.gov.uk, “Trees and woodland classed as ‘ancient’ or ‘veteran’ are irreplaceable. Ancient woodland takes hundreds of years to establish and is considered important for its wildlife, soils, recreation, cultural value, history and contribution to landscapes.” GBC should be doing everything it can to protect the small amount that is left in the borough. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site. This includes over 80 ancient oak trees that existed in the year 1600 or earlier. After all, we wouldn't tear down a Grade 1 building, why would we allow the destruction of Ancient Woodlands that have been in existence since at least the Tudor era? I object to development on this Green Belt site with Ancient Woodland.

This site is subject to frequent flooding and currently has zone 2 flooding allocation (zone 3 according to the Environmental Agency).

This development would join up the villages of Send, Ripley and West Clandon, defeating one of the key purposes of the Green Belt.

Ancient Woodlands are the Grade 1 listed buildings of our environment. We wouldn’t demolish a Grade 1 building for new development, we should protect Ancient Woodland in the same way.

**I object to development in an area of good quality Green Belt (Policy P2, Policy I4)**
This site lies within parcel B14, which according to the Guildford Borough Green Belt and Countryside Study, fulfils 3 of
the 4 Green Belt criteria, that is to check the unrestricted sprawl of large built-up areas, to prevent neighbouring towns
from merging into one another and to assist in safeguarding the countryside from encroachment. I believe that it is the
duty of GBC to protect the Green Belt for current and future residents of Guildford. Building on the site at Garlick’s Arch
is contrary to points 79 and 80 of the NPPF which states that “The fundamental aim of Green Belt policy is to prevent
urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their
permanence.” Planning Practice Guidance issued by the Government in March 2013 (Standard note: SN/SC/934) makes
clear that “unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other
harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt.”
I understand that much of this site is in productive agricultural use. There are no exceptional circumstances for this site
being developed on as required by the NPPF.

I object to inappropriate level of development for Send, Send Marsh and Burnt Common (Policy I1)

The proposal for Garlick's Arch site includes 7,000sqm of light and general industrial units as well as 400 houses and a 4
way on/off junction for the A3. This is an absurd level of development for the area will have a significant impact on the
semi-rural village of Send. The village will become a significant junction on the A3 with increased vehicular and HGV
traffic on the A247, that runs through Send village. Already the junction of the A247 and Tithebarns Lane is an accident
blackspot. The resulting noise and sound pollution as well as traffic congestion, will have a severe negative impact on the
health and well-being of current and future residents of Send. Already The current medical and educational facilities are
not able to accommodate the large increase in population that would result from this oversized development. The need for
additional housing has not been proven and additional industrial development could easily be incorporated at Slyfield.

With the addition of 400 houses here, and at some length to the nearest train station, we are going to see a huge increase
in local traffic. When the A3 is jammed, the lanes through East Clandon and Ockham become snarled and congested with
spill over traffic from the A3.

I object to development in Garlick's Arch which is at risk of flooding (Policy P4)

The site at Garlick's Arch has been classified by the Environmental Agency as being at higher risk of flooding than the
council's own assessment. It has flooded many times in previous years (please see attached photo of flooding at Garlick's
Arch). The inclusion of this site shows that the local plan is not taking into adequate account the risk of flooding as
required by the National Planning Policy Framework.

I believe that the improper late inclusion of the Garlick’s Arch site, the inappropriateness of developing a high quality
Green Belt site with Ancient Woodland, development on a site with high flood risk, and the significant level of
development on the site, must result in the site being removed from the next draft of the Local Plan.

I OBJECT to the Policy A43 change at Garlick’s Arch

This site was a last minute addition to the last version of the local plan and it had received thousands of objections. Its
inclusion in this version with increased plots for travelling show people shows a complete disregard for local residents
who are already faced with overcrowded roads and medical and educational facilities.
Not only is there no proven demand for travelling show people plots in this area, this site is also not suitable for the provision of such plots according to Policy H1 which provides the strategic policy for the provision of plots for travelling show people where provision is being made for 500 homes or more. This plot currently has an already excessive 400 homes proposed, but below the 500 home threshold for triggering Policy H1. There is also no detail of how these sites will be accessed by the heavy vehicles associated with these plots. I object to the travelling show people plots as unnecessary and inappropriate.

This site is in the Green Belt and no "exceptional circumstances" exist to justify its development, especially on the massive scale that has been suggested. It contains areas of Ancient Woodland, which I believe should be given the same protection status as Grade 1 listed buildings. Ancient Woodland are at least 400 – 10,000 years old. According to the NPPF and planning advice on www.gov.uk, “Trees and woodland classed as ‘ancient’ or ‘veteran’ are irreplaceable. Ancient woodland takes hundreds of years to establish and is considered important for its wildlife, soils, recreation, cultural value, history and contribution to landscapes.” GBC should be doing everything it can to protect the small amount that is left in the borough. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site. This includes over 80 ancient oak trees that existed in the year 1600 or earlier. After all, we wouldn't tear down a Grade 1 building, why would we allow the destruction of Ancient Woodlands that have been in existence since at least the Tudor era? I object to development on this Green Belt site with Ancient Woodland.

The removal in this draft of the local plan of industrial distribution space on this site is welcome.

This site is subject to frequent flooding and currently has zone 2 flooding allocation (zone 3 according to the Environmental Agency). The runoff from this site is channeled into a network of streams and channels through low lying Send Marsh before reaching the River Wey. Any increase in runoff from this site would be detrimental to the roads and houses of Send Marsh.

This development would join up the villages of Send, Ripley and West Clandon, defeating one of the key purposes of the Green Belt, and contrary to NPPF 79.

I find this policy contrary to NPPF 83, since 'exceptional circumstances' have not been demonstrated to justify altering Green Belt boundaries. I find this policy contrary to NPPF 87 & 88 due to the fact that ‘very special circumstances’ have not been met.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2243  Respondent: 8839745 / Ripley Parish Council (Suzie Powell-Cullingford)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My objections to Site A43 amendments relate to the provision of 6 residential plots for Travelling Showpeople and the associated buildings and storage facilities. This is entirely inappropriate within this Greenbelt site, which is surrounded by ancient woodland. There is no clear demand for this Travelling Showpeople site and it is in clear contravention of the Regulation 19 which identifies a ratio of 1 traveller site per 500 new housing units, with 500 units being the minimum number to justify the inclusion of a traveller site. Given that the Garlicks Arch A43 site plans for 400 units, I would strongly object to this allocation. In any event, this site is entirely unsuitable for such a large industrial use, with no obvious wide road access and no clear reasoning as to why it is being located in this proposed residential site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infant school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the Green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well, I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over nine years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being...
generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy II). Policy II requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 and M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. I object regarding A43 as The Garlick’s Arch site was discounted as recently as February and has been included to facilitate the building of the junctions (Policy A43A) at Burnt Common which in turn is there to facilitate the inappropriate developments in Policies A25 Gosden Hill and A35 Former Wisley Airfield.

I object to the inclusion of Policy A43 Land at Garlick’s Arch, the loss of the green spaces between local villages will result in the loss of village identities leading to an urban sprawl against the principles of the Metropolitan Green Belt, the cornerstone of planning policy.

I object regarding A43 as The Garlick’s Arch site was discounted as recently as February and has been included to facilitate the building of the junctions (Policy A43A) at Burnt Common which in turn is there to facilitate the inappropriate developments in Policies A25 Gosden Hill and A35 Former Wisley Airfield.

I support the reinstatement of allocation A43 Land around Burnt Common Warehouse, as set out in drafts of the Proposed Submission Local Plan reviewed by the Borough, Economy and Infrastructure Executive Advisory Board on 13 April 2016; following the removal of Policy A43.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the Garlics Arch proposal as it uses valuable green belt land and the green space between the settlements at Burnt Common, Send Marsh and Ripley resulting in unacceptable harm to the openness of the Green Bely and the vistas locally and from the Surrey Hills AONB.

I continue to object to the inclusion of the following policies:

A36-A41 inclusive in the Horsleys, A43 at Garlick’s Arch, A42 Clockbarn, and A58 There is no evidence that anyone has considered the cumulative impact of these developments together with the development at A35. The infrastructure proposed is totally inadequate and, as these stand at the borough boundary will have a huge impact on residents throughout the borough and further afield, particularly those who use the A3.

I object to the fact that the land required at Garlick’s Arch is said to be almost 29ha where only 13ha is required at 30dph.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

B.ii. Policy A43 – My Objections

5) Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

C.ii. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

I object to housing on this site. It's Green Belt (NPPF 89). What are the exceptional circumstances that require this site to be developed?

It contains ancient woodland (NPPF 118). What is the need that clearly outweighs the loss?

It is within 5km of the Thames Basin Heaths SPA, and therefore any development is subject to EU/UK legislation (NPPF 119). The impact cannot be mitigated with SANGs because there is no evidence base to support SANGs as required by NRM6 viii, NPPF 158 and 166.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. The Garlick’s Arch site is attractive open countryside and part of the permanent Green Belt which is protected under the National Planning Policy Framework. It also represents unrestricted sprawl. The site has a particular conservation sensitivity since it is covered in ancient woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600. The site is also subject to flooding.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended with the corresponding destruction of the Green Belt. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages. There will be yet more pressure on the infrastructure without any alleviation described in the plan

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3023  Respondent: 8854785 / Desmond McCann  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick's Arch. The allocation of 6 Travelling showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlick's Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the hiding of development by "deferment" (A24, A25, A26, A43). This version of the Plan has concealed some development planned to take place by "deferring" it beyond the period covered by the Local Plan. This is designed to have 2 effects: 1) to hide the number of houses actually being built (A24, A25, A26 - total of 1100 deferred, but still being built!), and ii) give an excuse for building houses on another site (A43 - 400/650 houses proposed) when they are not needed.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick's Arch. The potential of an increase from 400 houses at site A43 Garlick's Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages. There will be yet more pressure on the infrastructure without any alleviation described in the plan.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick's Arch. GBCs own reasons for including Garlick's Arch A43 in the 2016 version were - "The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm... (site allocation A25) [than the Burnt Common site did]". The site [A43] provides the employment floorspace needed in the plan to help meet identified needs" Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as both sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the 'required' industrial space is available there, so there is no reason for Garlick's Arch to be included.

I object to the lack of proper infrastructure planning for sites (A43 and A42). The Foreword to the plan by Paul Spooner includes on page 5: "We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan". The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlick's Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the Green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

</table>
There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site (Policy I4).

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons runs through the site, which will have the potential to be a health hazard for any residents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**I object** to policy A43 Garlick’s Arch

I object to a new site being introduced yet the consultation proceeds on sch 19 basis. No prior consultation on this site has taken place and including it seriously raises a major difference which has serious implications including a possible tunnel and the extra traffic to the entrance and exit yet no funding for additional roads for connecting / departing traffic to/from the tunnel.

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are ever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well we are aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available.

I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. We object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. We have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
24 POLICY A43 GARLICK’S ARCH

24.1 I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

24.2 It ignores all the thousands of previous objections made by local people

24.3 There is no proven demand for travelling show people plots in this location

24.4 There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

24.5 The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

24.6 This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

24.7 The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

24.8 Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

24.9 The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

24.10 I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

24.11 I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
24.12 I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

24.13 I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

24.14 I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

24.15 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

24.16 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

24.17 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

24.18 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

24.19 I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

24.20 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

24.21 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

24.22 Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

24.23 I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.
24.24 I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

24.25 I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

24.26 It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/5170  
Respondent: 8858881 / Stephen Meredith  
Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 and A43a in relation to plans for Garlick’s Arch. This site was only inserted into the draft plan at a late stage just before publication of the consultation draft. The site is not a sustainable site being far from infrastructure facilities and transport links. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt. There is no evidence in the plan of the exceptional circumstances required to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site. The development will cause harm to the ancient woodland by which the site is bordered - a number of trees are protected by Tree Preservation Orders (Policy D3). The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infant school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

The stated preference in the Plan is to make best use of previously developed land. Nonetheless a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would draw in a huge amount of ‘through’ traffic as the route from London/M25 to Woking would be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 would go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved. This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLP16/7312  Respondent: 8859585 / Claire Yates  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43  
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch. This is a stunning area of Green Belt land, with ancient woodland (which should be protected) and an expanse of meadow grass which supports a vast amount of wildlife, and which is a beautiful visual amenity with bird song and souring sky larks which are an environmental asset to the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/3323  Respondent: 8859585 / Claire Yates  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43  
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the Policy A43 change at Garlick’s Arch because:

- This beautiful ancient woodland deserves to be preserved, not destroyed.
- Brown Field sites should be used for housing developments which will have less impact on the natural environment.
- Very many species of mammal, insect and bird will be destroyed or lose their home.
- Our precious woodland helps to protect us from poisonous air pollutants by trapping metallic particles on their leaves (study by Lancaster University).
- It ignores all the thousands of previous objections made by local people.
- There is no proven demand for Travelling Showpeople plots in this location.
- It is beautiful permanent Green Belt and no ‘exception circumstances’ exist.
- It will cause over-development of our village and the number of homes is excessive.
- It is exquisite ancient woodland that existed at the time of Elizabeth I.
• It will join up Ripley and Send and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation.
• It is contaminated by lead shot accumulated over fifty years.
• It will generate excessive traffic that will block up the local roads of Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
20. POLICY A43AND A43a– Garlick’s Arch

I object to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed.

The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available.

Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from
the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1) Furthermore, several electricity pylons runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no
proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents
involving cyclists as a result of the development proposed under the local plan.
18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development
will result in the roads becoming ever more dangerous for pedestrians.
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of
improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the
infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have
been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development,
the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to
capacity, such as the electrical network and sewers. No plans to improve these services should mean no
development of the Garlick’s Arch site.
22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the
Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
already at capacity and suffering from funding cuts or freezes. Any further development without funding will
place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no
certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion
during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35),
Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk
road network. The A3 & M25 are already at capacity during peak hours and any development prior to
improvement of these roads will only make the situations worse.
24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also
mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The
significant level of development being proposed, particularly in the north east of the borough will lead to
considerable further congestion, despite any attempts to mitigate this through travel plans. This will be
particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will
have a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s
Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site
will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial
(B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which
allow for the removal of this land from the Green Belt (Policy P2).
26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken.
The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the
local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
if the site remains unsold regard to “up to date Traveller Accommodation Assessment” or “use of the land for affordable housing” raises very serious concerns about the suitability of the site for residential accommodation at all – within the 300 metre A3 Noise Corridor.

The amended Local Plan Strategy & Sites for A43 Garlic’s Arch totally overlooks the intense and persistent noise pollution from the A3 corridor which should have been assessed. Indeed it is an omission from the basic strategic plan. Best practice environment assessments in UK, Europe and Australia recognise potentially hazardous noise corridors for up to 300 metres from major trunk roads. The noise from the A3 at this location (full speed 70 mph+ traffic) is higher than in Guildford for 12+ hours every day including weekends. Noise levels are likely to exceed 70dBA for most of the site and up to 80dBA within 100 metres of the A3.

These noise levels are likely to be a physical and mental health hazard to residents in the area and especially to children if they wish to play outdoors or in summer where houses wish to have windows open. I suggest that the Borough Plan should have severe restrictions on new residential development with 200 metres of de-restricted stretches of the A3 throughout the Borough. Communities in Burpham are partially protected by a high berm and trees. To propose any new residential housing within 200 metres of the A3 (more than half this site) appears negligent or irresponsible. I will be seeking an independent investigation into this issue in Guildford. The only reference to noise concerns noise caused by travelling showpeople, not suffered by them. To propose to house Travelling Showpeople, Travellers, and Affordable Housing – the most vulnerable residential categories – in a high noise corridor area is more than irresponsible – it suggests deliberate prejudice against vulnerable groups.

Guildford Council already has a poor record for housing travellers by a major junction on the Blackwater Valley road. I am not a traveller but I lived in a caravan until I was 9 years old. I strongly oppose any new residential development in the A3 noise on community health and welfare grounds. I totally oppose use of this hazardous location for any vulnerable populations.

</tr>
<tr>
<td>The Plan states the preference is for making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light to local residents following a Council meeting on 11th May 2016.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Moreover, Guildford Borough Council’s own Green Belt &amp; Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.</td>

</tbody>
</table>
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, and these will have the potential to be a health hazard for any residents.

Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.
24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4600  Respondent: 8875329 / Katherine Cornwall  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
4. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
5. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
6. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
7. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
8. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
9. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the
neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.
24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1075  Respondent: 8875361 / P A Clarke  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT most strongly to the late addition of Garlick's Arch at Burntcommon (site no A43) to the above plan. Guildford Borough Council has not followed the correct process in adding Garlick's Arch at a very late stage to the new Draft Local Development Plan, and also by adding the new A3 road junction by the A247. They are trying to pass this under the short cut of Regulation 19, but it requires another full consultation under Regulation 18. This invalidates the whole process.

Garlick's Arch is an area of unspoilt Green Belt agricultural land of some 70 acres, which includes about 12 acres of ancient woodland (some of it dating back to the 16th century) and it should not be sacrificed for housing and industrial units. This site is an entirely unacceptable proposal. Any further industrial space required could easily be accommodated at Slylield.

Quite apart from losing Green Bell land, an estate of the proposed size of 400 houses plus 2 acres of industrial units, will generate extra traffic of about 800 cars and many HGV’s. This will put an unbearable pressure on all the roads around the Burntcommon roundabout especially at rush hour.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to policy A43, Land at Garlick's Arch. No exceptional circumstances exist to develop this beautiful site with an area of ancient woodland; an area that is also subject to frequent flooding. There is no proven demand for traveller pitches and the surrounding roads cannot cope with the additional traffic that would be generated by the 400 planned homes. Development here would join up the villages of Ripley and Send which defeats the key objective of the Green Belt. Destroying the trees and greenery which help absorb noise and air pollution from the A3 will mean higher pollution in our villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

6. I OBJECT to the location for new employment floorspace at Garlick's Arch - Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B 1 c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Gorlick's Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3468  Respondent: 8875457 / Mark Ground  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

15. I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B 1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I refer to the draft local plan with regard to further housing development on the site of Garlick's Arch between Kiln Lane and Burnt Common, with 400 residential units and industrial use.

This plan will trap the historic village of Ripley and also the village of Send between the entry from and exit to the already totally overcrowded A3. The village of Ripley is already overloaded with traffic from the A3, and Newark Lane as a consequence is becoming a death trap. The villages will be totally submerged in fast traffic racing through day and night.

It is an unviable plan when further out there is land available to such development without ruining the lives of innocent people who reside in these beautiful villages. We must preserve our history at all costs. I am also totally opposed to the frightening plan for development of the old Wisley Airfield. I travel on the A3 regularly, and the danger posed by more traffic joining the road at the Ripley turn-off does not bear thinking about. Please register my opposition to both plans.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Draft Local Development Plan - Send, Send Marsh & Burntcommon

I wish to OBJECT strongly against the addition of Garlick's Arch at Burntcommon (site no A43) to this Plan.

This area of unspoilt Green Belt agricultural land of some 70 acres .. which includes about 12 acres of ancient woodland (some of it dating back to the 16th century) is far too precious to be sacrificed to concrete and tarmac in the form of 400 houses and nearly 2 acres of industrial buildings and warehousing.

Quite apart from losing lovely Green Belt land, the extra traffic generated by an estate of this size, which will consist of about 800 cars and many HGV's, will put an unbearable pressure on all the roads around the Burntcommon roundabout (A247/B2215), especially at rush hour times. The proposal to create extra entry and exit slip roads from the A3, London bound, off the A247 Clandon Road will add grossly to the congestion.

As well as the roads being unable to cope with such huge population growth, neither will the local schools or the Villages Medical Centre.

This site is an entirely unacceptable proposal.

Please ensure that the Government's Planning Inspector sees this letter

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the extended development in the Green Belt (Policy P2, Site A43)
I object to the already large Garlick’s Arch (A43) site being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy. The increase in housing allocation here will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages. Indeed the inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch.

I object to the hiding of development by “deferment” (A24, A25, A26, A43)
This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have the effect of hiding the number of housed actually being built and giving an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the developments proposed on land at Garlick’s Arch policy A43 for 400 homes and 6 or 8 Travelling Showpeople plots. Again it ignores thousands of previous objections. There is no proven demand for Travelling Showpeople plots This Green Belt land is covered in ancient trees and intended to be a space between Ripley and Send, and “exceptional circumstances” have not been demonstrated. There is also a number of electrical pylons across the site and a corridoe must be made for maintenance of high tension transmission lines. The site is prone to flooding hence considered a flood zone 2. This scheme will again add to traffic congestion and air pollution along the old A3 and affect adjoining roads and put massive unwarranted pressure on existing infractures.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to building on the Green Belt at Garlick's Arch in Send, Clockbarn Nurseries and Send Hill because it is not justified by special circumstances and after all the Green Belt is meant be permanent.

I object to the proposed industrial development of 7,000 sq m, at Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If in fact there really is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick's Arch because it is covered in ancient woodland with trees going back to the 161 century and furthermore a risk of flooding.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- Housing at Site A43 Garlicks Arch would be on Greenbelt Land. The potential increase from 400 houses at site A43 Garlicks Arch is extremely harmful to the rural nature of the surrounding villages of Clandon, Ripley and Send and will cause an unnecessary coalescence of these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- The inclusion of six plots for travelling show people with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and there is no identified need within the local plan documentation. The allocation of six travelling show people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 local plan and so is out of scale with the proposed development.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43  
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I reiterate my objection to site A43 Land at Garlick’s Arch, Send Marsh, Burntcommon and Ripley I previously made to the 2016 consultation as building 400 houses on this site as this site was not included in the initial consultation of the Draft Local Plan in 2014 and it would be overdevelopment of Send and Ripley villages. Allocating travellers “pitches” in the twenty first century is outdated and instead the Council should be providing and encouraging suitable housing for traveller communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

8. I OBJECT to the increase of Industrial Units at Garlicks Arch when there is already an existing Industrial site in Burntcommon and suitable for increasing without any infrastructure alterations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the use of Land at Garlick’s Arch as Development site when over a number of years the primary refusal of previous extensions and small scale development has been REFUSED and I state the reason being, "Chapter 9 of the NPPF and there are no overriding reasons that would constitute very special circumstances to justify the harm that it would cause to the Green Belt"

GBC themselves have stated in the past previously to development around Burnt Common

" It is therefore considered that the substantial harm to the Green Belt, by reason of inappropriateness, and the harm caused would outweigh the benefits identified and therefore this application is recommended for refusal"

National Planning Policy promotes sustainable developments, with a sustainable means of transport. With ever reducing bus services in the area and no train station within reasonable and safe walking distance it is impossible for any development on this site to offer a sustainable transport solution. I suggest again that this development on this site is wholly inappropriate (Policy I3) development.

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland, that is marked as an area of Special Scientific Interest (SSSI) and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

I can observe both the Greenbelt and Woodland in question from my property, as a result I know that it has an abundance of wildlife, many of which are protected. It is home to many types of Owls (Tawny, Little and Barn) and a large number of bats, a number of songbirds, Cuckoos and Woodpeckers. In addition there are badgers setts, with a host breeding families of deer that roam across the land surrounding Tithebarns Land. In late summer, once the harvest has been made,
the fields host large gatherings of Canada Goose and visiting Egyptian Geese. I have also spotted breeding families of Kestrels, Red Kites and Bustards, as the long grasses the right feeding habitat. In recent weeks, I have also spotted several nesting Red-legged Partridge. As soon as construction starts, their habitat will be ‘at best’ at risk’ but most likely lost. I note that no wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. As a Governor of a local school, I am acutely aware of the pressure to provide services, so I would like to question how will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, the site has a number of several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents, associated with the transfer of electromagnetic radiation (EMR).

I would like to draw your attention to a report in 2001 from the National Radiation Protection Board (NRPB) said that there may be a very slight increased risk for leukaemia in children. A further study in 2005, looked at how close children lived to high voltage power lines when they were born. The aim of the study was to find out if this affected their chance of getting leukaemia. It found that children who lived within 200 metres from these lines had an increased risk of getting leukaemia. It also showed a smaller increase in risk for children living between 200 and 600 metres from these lines.

Again, further evidence highlighting that this site is not viable for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4309  Respondent: 8892737 / David Eagle  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement - often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

C.i.i. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two
businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I2). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I3). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/7659  **Respondent:** 8893057 / Dianne Garnett  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1.1 **We object** to policy A43 Garlick’s Arch

1.2 There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.3 The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

1.4 Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

1.5 The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

1.6 We object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

1.7 We object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

1.8 We object to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available.
1.9 We object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

1.10 We object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

1.11 We object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

1.12 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1.13 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

1.14 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

1.15 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. 1.16 We object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

1.17 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

1.18 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

1.20 Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

1.21 We object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. We have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are
already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1.22 We object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

1.23 We object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to new sites (Garlick’s Arch) being introduced as an after thought when it was not even considered in the previous plan. A slip road on the A3 at Burnt Common has been added to the Draft Local Plan without Highways England consent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5993  Respondent: 8896097 / Andrew Fordham  Agent:

21. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys.
Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car. The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt. I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no
certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion
during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35),
Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk
road network. The A3 & M25 are already at capacity during peak hours and any development prior to
improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also
mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The
significant level of development being proposed, particularly in the north east of the borough will lead to
considerable further congestion, despite any attempts to mitigate this through travel plans. This will be
particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will
have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s
Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site
will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial
(B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which
allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken.
The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the
local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Ripley Village/Send

I strongly object to the proposal for 400 houses between Burnt Common and Ripley. The proposal would practically join
the villages into one large urban sprawl and, again, the local roads cannot accommodate any more traffic.

13. I object to the late inclusion of site A43 Garlicks Arch in Green Belt and ancient woodlands

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
SITE A43 GARLICKS ARCH

This is Greenbelt Land and the revised plan is increasing the number of homes to a minimum of 400, which with all the other proposed developments to the north of the borough is extremely harmful to the rural nature of the surrounding villages of Send, Ripley, and Clandon.

Inclusion of 6 Travelling Showpeople plots and associated storage facilities is totally inappropriate in a rural environment in Greenbelt land. There is no identified need within the Local Plan document for this allocation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

More specifically I live in Send Barns Lane which has seen much increased traffic over the last 5 years. Each morning and evening the traffic is at a standstill and when there is a breakdown or even a minor traffic accident the congestion can last for part of the morning. If you give the green light to build over 400 dwellings at Garlick's Arch which could represent another 800 cars our lifestyle will be ruined. The local infrastructure is at bursting point, you even have to queue for petrol at the Burntcommon garage now at any time. The local medical centre has about a one week plus waiting time to see your doctor now, this new proposed influx of 25% to the population to our village will breakdown local services not to mention the local schools which already caters for children outside of the local area. Already you have approved building developments in the Send area including a narrow boat basin for 80 boats. There aren't 80 boats on the canal, this was approved I assume to gain access for future housing development which has not yet been applied for. When will the desire to make money over people's lives stop.

If you continue to wreck our countryside and village life we will end up just an extension/suburb of London. Please do not approve more massive housing industrial estates.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A43 change at Garlick's Arch, Send Marsh, again the addition of hundreds more new homes on Green Belt lands is not acceptable. The previous comments still stand, is not the GBC not listening to the previous objections of local people.
There are no exceptional circumstances existing to continue and over develop the Green Belt in this beautiful village with history dating back to Elizabethen times. The purpose of the Green Belt must not be ignored. We must safeguard our wonderful woodland and open countryside.

This particular land I understand is a flood zone 2 area and any further development will cause additional flooding during parts of the year. Local wildlife will also be affected. More additional traffic will bring pollution in air quality and noise. There is no justification for this proposal.

1. **I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)**

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land.

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site.

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly, any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.
Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
C.ii. Policy A43 Garlick’s Arch

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. The allocation of 28.9 ha is an excessive land grab into the Green Belt.
4. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
5. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
6. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
7. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
8. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
9. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure. Our villages are already suffering from severe congestion for much of the day. The proposed development under the plan will cause greater congestion in and around our villages.
10. Many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
11. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
12. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.
13. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.
14. I object to the lack of proper infrastructure planning for sites. Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
15. Despite the Garlick’s Arch site being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
16. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Any further development without funding will place further stress upon existing health services.

17. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). I have considerable concerns that development of the large residential sites identified at Wisley Airfield, Garlick’s Arch and Gosden Hill will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

18. I object on the grounds of poor air quality. The significant level of development being proposed will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

19. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley. Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

20. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site.

Comment ID: PSLPS16/1998  Respondent: 8900705 / Susan Fuller  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There was no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
C.ii. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to, capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/411  **Respondent:** 8901121 / Sandra Peter Eperon  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

*Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )*  

I object to the proposed development of the above sites for the following reasons:

Development of this area is totally inappropriate because Send and Ripley could not absorb 400 house and 700 square feet of industrial usage. As your plan does not include any infrastructure improvements it is obvious that at most times the traffic will become completely gridlocked. This does not take into consideration the proposed 4000 properties at Wisley and Gosden Hill Farm. The suggested four way entrances on to the A3 would also make a further impact on the area and would encourage traffic to and from Woking and Old Woking to use Send Road to reach this junction. Unless there is vast improvement to the infrastructure, e.g. shops, doctors, hospitals, dentists, schools all of which are already oversubscribed - where are all the people's facilities.

*Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )*  

**C.ii. Policy A43 Garlick’s Arch – My Objections**

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches  
2. It ignores all the thousands of previous objections made by local people  
3. There is no proven demand for travelling show people plots in this location  
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.  
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.  
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.  
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.  
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of
development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport.

With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4) It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.
I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

It is not legally compliant since the number of new houses required in Send which was 185 in April 2016 has now increased to 485 without a full consultation and is therefore illegal under regulation 18.

Employment needs figures are out of date, infrastructure requirements have been poorly or not addressed and the environmental sensitivity of the site ignored.

The addition of a new site like this without prior research or consultation is evidence that the council operates on a wing and a prayer agenda ignoring established legal criteria.

The area alongside the A3 and better known as the EWBANKS site which was removed from the 2014 plan on the grounds of the merging of settlement provision should likewise rule out the Gosden Hill site. However the former mentioned site should be reinstated in favour of all others as it is already brownfield in character and would not require the massive infrastructure changes required for the Garlick’s Arch development and would probably be far more acceptable to the residents of Send, if we have to have more homes in the area.

I object emphatically to any development at Garlick’s Arch. Council has failed to provide a need for self-build plots, additional employment floor space or travelling show people pitches, never mind in a valuable, rural Green Belt area which would be lost to the Nation. Send has no historical connection to these activities whatsoever and it appears that Send has been singled out for 'special attention'. An A3 'clover-leaf' junction (one assumes) goes 'hand in hand' with the Garlick’s Arch development plan. That idea in itself is ridiculous as:

1) It uses up more Green Belt land:

2) Destroys a proven functioning environment:

3) Burdens the A247 SendClandon Rd with M25 traffic destined to create deadlock in Old Woking. Should the Highways Agency ‘demand’ such an exit from the A3 it should by reason of common sense be at Burpham where it could be easily linked to the main Woking Rd (A320) through Slyfield. Has this even been considered?

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

 Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents. 

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6896  Respondent: 8904129 / Elizabeth Ross  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.
It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.
I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2017) and in particular to the changes affecting Ripley and Send, which make the Plan even worse than the 2016 proposals.

I object on these grounds:

**I object to the lack of proper infrastructure planning for sites (A43 and A42)**

The Foreword to the plan by Paul Spooner includes on page 5:
"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan."

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:
i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and
ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

| Land at Garlick’s Arch, Send Marsh, Policy A43 |
I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- The is no proven demand for Travelling Show people plots in this location
- It is beautiful permanent Green Belt and no ‘exception circumstances’ exist
- It will cause overdevelopment of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join p Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over 50 years
- It will generate excessive traffic that will add to the increasing flow of traffic with no options to add additional capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.
The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the Policy A43, land at Garlick’s Arch, Send Marsh for the following reasons:

1. This totally ignores hundreds of previous objections by local residents.
2. There are no ‘exceptional circumstances’ as required by the National Planning Policy to take this area out of the Green Belt.
3. This will remove ancient woodland which cannot ever by regained.
4. Ripley and Send villages will merge, therefore defeating the purpose of the Green Belt.
5. The number of homes proposed is excessive. Send is a village. This is over-development to the extreme.
6. The area is subject to frequent flooding and is currently a Flood Zone 2 allocation.
7. The excessive traffic that will be generated will totally cause mayhem on the Send and Ripley roads. Already whenever there is a road closure nearby or traffic accident (almost a daily occurrence on the A3/M25) in the vicinity – the main Ripley, Send Marsh and Send roads are ridiculously congested or at a total standstill.
8. There is no proven demand for Travelling Show people sites in this location. This development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.
9. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Attached documents:
Policy A43: Land at Garlick’s Arch (page 221)

I object to this proposal because the number of homes proposed would add to local traffic congestion which is already excessive at peak travel periods.

This was a sleight of hand by GBC in slipping this application into the Plan at such short notice. The site has never been proposed before and has not undergone a proper and full evaluation.

This site is also located underneath one or more pylons carrying power cables which constitute a health hazard for anyone and especially children living in such close proximity to them. There is evidence suggesting a link between cancer/Leukaemia and power lines and this has not been considered.

I also object to the location of any form of industrial activity which would increase traffic movements in that area leading to even greater traffic congestion. If additional industrial space is needed the ideal location is Slyfield which has the space to cater for it and there is a symbiotic relationship between the various activities on such a site. Slyfield has room to expand and accommodate extra capacity and is well located on the edge of the town.

If Garlick’s Arch proceeds it will create traffic chaos in all the approach roads through the villages of Send, Send Marsh and Ripley. There is simply no proven need to consider this site for industrial or housing, on any scale planned.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan.

If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

The proposal to build 400 houses and 7,000sq.m. employment space (light industrial/storage, warehousing) on virgin Green Belt land, lying outside the Send Marsh/Burnt Common village boundary, defies all logic. This area which includes ancient woodland is a refuge for deer and other wildlife. It was never considered as a Potential Development Area within the Council’s ‘Issues and Options report’ or identified for development in the 2014 consultation.

In 2014 the Council rejected a planning application from ‘Oldlands’ to build 25 houses in this location on sound planning grounds, so how is can now be considered apt to construct 400 houses and 7,000sq.metres of employment space there?

Apart from the fact that this is all Green Belt land, the infrastructure just cannot support such a development. Send Marsh/Burnt Common has one just shop (Waitrose), no doctors’ surgery, no schools and the local roads are already filled to capacity.

Any development at all in this area would be totally inappropriate and would be to the very substantial detriment of Send Marsh/Burnt Common as a village. The housing proposal alone would add 960 to the existing population of 2,341, an increase of 41%.

The proposed light industrial/storage facility would significantly detract from the open countryside aspect and add dramatically to the existing road use. It is totally inappropriate and would destroy the village’s demarcation from Ripley, creating urban sprawl.
This very late and very major change to the Local Plan proposals does appear to have not followed the correct due process and therefore shall, if approved by your Council, be subject to immediate legal challenge.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Fields around Danesfield, Send Marsh (GU23 6LS)

I refer to this area because it is not currently high profile but it is a significant site for other reasons.

I wish to object to this site although it is not specifically mentioned. However, I understand this site is regarded as 'safeguarded' and therefore could come into play should some of the sites drop out.

If you look at the maps then you will see that the far end and sides of Danesfield have had their boundaries inset and now the back gardens of these houses now are the proposed greenbelt boundary. As we are surrounded by open fields then this suggests that everything the otherside, ie open fields, would be redesignated as non greenbelt and therefore will be developed.

My comments on this site are as follows:

1. This site is on a flood plain. Over 37% of the site is in flood zones 2 or 3, with over 25% in flood zone. Therefore, this land is clearly not suitable for development and this was borne out whenever there is heavy rain and the land floods. I am reliably informed that the area becomes almost a large lake when there is a heavy downpour and this can be seen from the road and footpaths.

1. GBC policy and the Environment Agency are against developing on flood zones and so for this reason the land should not be built on or developed. GBC could face legal action from the Environment Agency if they were to go against this and spend tax payer's funds to defend such a claim. This would be an irresponsible use of tax payer's money.

1. I know photographic evidence showing the effect of flooding on the site have been sent to GBC and they have accordingly downgraded the site from a Potential Development Area to a Safeguarded Area.

1. Any building or hard standing will reduce the land available to absorb the run off from heavy rain falls and this will exaggerate the flooding. This could cause flooding and damage to adjoining property in Danesfield which may lead to future insurance claims.

1. There are many bats on this site which are protected under The Conservation of Habits and Species

1. The access into the site is limited to only two points of One entry is onto the busy Send Marsh Road which is narrow and unsuitable to carry more traffic. This entry point is near to a blind bend so there would be a safety concern and a potential accident black spot with approaching traffic from the direction of Send. The other entry point is into the side of Danesfield where the access is deliberately narrow as it is a residential road where many families live with young children. There is only just enough room to get two cars passing so a massive increase in traffic would be totally impractical as well as dangerous for all the small children who play in the road. Furthermore, there is an old established oak tree on the entry point which would have to be cut down and I believe this has a TPO on it.
1. As a resident of Send for 50 years, and with my family living here and our garden backing onto this site, I am very concerned about what is being discussed regarding potential building on the site. It would be an absolute travesty if this land were to be lost to building. This corner of Send Marsh is of an open rural nature and therefore totally unsuitable for insetting from the green belt.

1. Our village is loved and cherished by all those of us who live in Send. Marsh has a long history of generations of families living here and we all love the open countryside, the lovely walks, the beautiful views and the village life atmosphere. To commence on such a thoughtless and aggressive building program would bring this to an end and would mean that we could never go back to what we once had.

1. The site should not be termed "safe guarded" as the meaning of 'safe' does not seem to As I understand the term as used here, this site could be back on the table as a possible contender for consideration for planning permission if other sites do not get their planning granted. There would not be a democratic process for this site to then have a further round of public consultation as the date will have been passed. We would then be at the mercy of GBC and the planners.

1. Send Marsh has already seen a dramatic increase in the traffic flowing through it and into Send village at peak hours with long tailbacks from the traffic lights at Mays Corner. Send Marsh regularly sees delays getting onto the Portsmouth Road at Send Dip with long queues of traffic going towards Ripley and Burnt.

1. This site is at the back of Danesfield has limited access onto Send Marsh Road and if this was the only way out then this would put a lot of strain onto an already congested road. If the access was through Danesfield then this would seriously congest our road as it is very narrow and difficult to pass cars at various points.

1. This site should not be removed "inset" from the green belt as this would mean planning permission would surely be granted for the future.

1. The field behind Danesfield is a beautiful open space with much wildlife including deer and foxes as well as lots of birdlife. The field is enjoyed by those in the village who walk and take their dogs by the adjoining footpaths.

1. Send Marsh Road has a very narrow and dangerous bridge which would need to be widened to make it safer and the whole of the Send Marsh Road would need to be There is no mention of this in the plan.

1. Send Marsh does not have any infrastructure. There are no local shops, no school, no doctor's surgery and no public park. It comprises mainly all houses and so the addition of so many new houses will put huge pressure on the infrastructure on Send and Ripley, both of which can hardly cope with the current pressures. You would have to walk a considerable distance to access any of these services and so this would mean owners would have to use a car. This would seem contrary to the government's policy for us all being green and reducing pollution.

1. The bus routes to and from both villages are very poor and infrequent, about one per hour. Again it is essential to have a car. The roads are too narrow and dangerous for cyclists so this is not really an option.

1. By proposing greenbelt sites in the area means this land will be gone forever. It is essential we protect the greenbelt or we will simply be a concrete jungle joined to Guildford and Woking with no green space in between. These greenbelt areas are essential to everyday living to provide clean and open space for everyone to enjoy.

1. There are plenty of brownfield sites available which should also be considered. In addition, there are sites which have been given planning permission but builders are refusing to build on as presumably, they are waiting for house prices to increase so they can maximise their profits. If time limits should be placed on planning permissions granted to encourage building in any economic climate.

1. Send Marsh is poorly served by schools, particularly the secondary. It has become increasingly difficult to get children into George Abbot which is the closest school to the village. With the amount of houses to be built set to increase, where will the children go to school if we don't have a plan to build schools?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. POLICY A43 Pages 243-5

I object to the Garlick’s Arch (A43) proposed changes to this site which in combination would generate considerable activity in a most unsuitable location.

Pitches designated for Show People suggests large vehicle traffic movements and a further extension to the commercial premises that have already been added on that side of the road all of which is located in close proximity to the surrounding residential area.

Increasing the number of houses would mean a truly massive increase in the volume of traffic which will only be able to use the A3, Send Road and travelling through Ripley, all of which are unsuitable for the level of traffic associated with such a development in the vicinity of these two villages.

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause log jams of these villages. Current traffic movements struggle to keep moving especially in the peak times of school delivery, pick up and commuting through to the M25. On many occasions at 5 pm traffic gets backed up from the A3 down to the village of Ripley and I spend 40 mins waiting to get through Ripley. Your proposals would make a bad situation worse in relation to traffic, pollution and safety with several primary schools in the area.

1. Garlick’s Arch (A43) should not be extended or even developed with the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

1. I object to the allocation of 6 Traveling Show people sites in A34 Garlick’s Arch

The allocation of 6 Travelling Show people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Show people plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

1. The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

I further object to the Garlicks Arch site because if A58 Burt Common site and development at Gosden Hill Farm is also granted then the A3 corridor from Burpham to Ripley will be over developed and it will simply join up a sprawling set of developments. These in turn will lead to greater traffic density, slower journey times as well as increasing safety concerns for an infrastructure which cannot support this level of traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the lack of proper infrastructure planning for sites (A43 and A42)

The plan lacks any infrastructure proposals to support all the development. There are no proposed plans to upgrade roads or introduce new roads or links, and it is simply a plan of building additional housing and commercial facilities but expecting the current road system to support more traffic which it is incapable of doing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the New Park Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial
(B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches. It ignores all the thousands of previous objections made by local people. There is no proven demand for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the
development proposed in the local plan, which will result in more traffic using these narrow roads and a further
deterioration in the road surfaces. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley,
already suffer from parking problems. Further development around these villages will only result in more traffic and more
parking problems. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and
Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time,
particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper
cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these
developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the
development proposed under the local plan. The narrow rural roads do not have proper pedestrian footpaths. The
proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements
to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure
requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been
identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing
residents’ in the locality will see their quality of life significantly deteriorate in many ways. Many of the utilities in the
West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical
network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site. Without
proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical
Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and
suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing
health services. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There
is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion
during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch
(A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 &
M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make
the situations worse.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate
its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of
development being proposed, particularly in the north east of the borough will lead to considerable further congestion,
despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and
will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.
I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has
previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed
for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial
(B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land
from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The
Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services
such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
4. There is no proven demand for travelling show people plots in this location
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.
The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. **POLICY A43 AND A43a – Garlick’s Arch**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
### Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches.
2. It ignores all the thousands of previous objections made by local people.
3. There is no proven demand for travelling show people plots in this location.
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly object to Guildford Borough Councils plan to build over 14,000 new homes under the revised Draft Local Plan. This proposal will damage the local communities by over development in particular Clandon and Ripley.

I object to site A43 Garlicks Arch there is no suitable infrastructure to support the extra housing and population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Policy A43: Land at Garlick's Arch (page 221)

I object to this proposal because the number of homes proposed would add to local traffic congestion which is already excessive at peak travel periods.

This was a sleight of hand by GBC in slipping this application into the Plan at such short notice and more than any other proposal in the new plan raises questions about the planning processes, governance and legality. The site has never been proposed before and has not undergone a proper and full evaluation.

This site is also located underneath one or more pylons carrying power cables which constitute a health hazard for anyone and especially children living in such close proximity to them. There is evidence suggesting a link between cancer/Leukaemia and power lines and this has not been considered.

I also object to the location of any form of industrial activity which would increase traffic movements in that area leading to even greater traffic congestion. If additional industrial space is needed the ideal location is Slyfield which has the space to cater for it and there is a symbiotic relationship between the various activities on such a site. Slyfield has room to expand and accommodate extra capacity and is well located on the edge of the town.

If Garlick's Arch proceeds it will create traffic chaos in all the approach roads through the villages of Send, Send Marsh and Ripley. There is simply no proven need to consider this site for industrial or housing, on any scale planned.

I object to the proposed industrial development of 7,000 sq m at Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan.

If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

The proposal to build 400 houses and 7,000sq.m. of employment space (light industrial/storage, warehousing) on virgin Green Belt land, lying outside the Send Marsh/Burnt Common village boundary, defies all logic. This area which includes ancient woodland is a refuge for deer and other wildlife. It was never considered as a Potential Development Area within the Council's 'Issues and Options report' or identified for development in the 2014 consultation.

In 2014 the Council rejected a planning application from 'Oldlands'to build 25 houses in this location on sound planning grounds, so how is can now be considered apt to construct 400 houses and 7,000sq.metres of employment space there?

Apart from the fact that this is all Green Belt land, the infrastructure just cannot support such a development. Send Marsh/ Burnt Common has one just 'shop' (a Waitrose local housed within a petrol station), no doctors' surgery, no schools and the local roads are already filled to capacity. My daily commute requires me to drive along Send Road and as the only...
road connecting all the villages of Ripley, Glandon and Send it is already too heavily used and simply cannot accommodate any further significant increase in traffic volume. It only takes one small disturbance to the flow of traffic (for example a minor roadwork on the Send Road or along Broadlands) to completely bring traffic to a stop and cause a journey that should take 5 minutes to become 1 hour. This is something I have had to endure on numerous occasions in the last 18 months and I cannot begin to imagine the impact of 400 additional houses on this. Consider that if this development is permitted to go ahead by GBC, and the roads are simply unable to cater for the additional traffic (residential and industrial), it will not be desirable for new and existing residents who would most likely be affected by delays to their commute and personal travel or to businesses and could therefore discourage investment leaving empty units and properties.

Any development at all in this area would be totally inappropriate and would be to the very substantial detriment of Send Marsh/Burnt Common as a village. The housing proposal alone would add 960 to the existing population of 2,341, an increase of 41%.

The proposed light industrial/storage facility would significantly detract from the open countryside aspect and add dramatically to the existing road use. It is totally inappropriate and would destroy the village's demarcation from Ripley, creating urban sprawl.

This very late and very major change to the Local Plan proposals does appear to have not followed the correct due process and therefore shall, if approved by your Council, be subject to immediate legal challenge.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Fields around Danesfield, Send Marsh (GU23 6LS)

I refer to this area because it is not currently high profile but it is a significant site for other reasons.

I wish to object to this site although it is not specifically mentioned. However, I understand this site is regarded as 'safeguarded' and therefore could come into play should some of the sites drop out.

If you look at the maps then you will see that the far end and sides of Danesfield have had their boundaries inset and now the back gardens of these houses now are the proposed greenbelt boundary. As we are surrounded by open fields then this suggests that everything the otherside, open fields, would be redesignated as non greenbelt and therefore will be My comments on this site are as follows:

1. This site is on a flood plain. Over 37% of the site is in flood zones 2 or 3, with over 25% in flood zone 3. Therefore, this land is clearly not suitable for development and this was borne out whenever there is heavy rain and the land I am reliably informed that the area becomes almost a large lake when there is a heavy downpour and this can be seen from the road and footpaths.

2. GBC policy and the Environment Agency are against developing on flood zones and so for this reason the land should not be built on or developed GBC could face legal action from the Environment Agency if they were to go against this and spend tax payer's funds to defend such a claim. This would be an irresponsible use of tax payer's money.
1. I know photographic evidence showing the effect of flooding on the site have been sent to GBC and they have accordingly downgraded the site from a Potential Development Area to a Safeguarded Area.

1. Any building or hard standing will reduce the land available to absorb the run off from heavy rain falls and this will exaggerate the flooding. This could cause flooding and damage to adjoining property in Danesfield which may lead to future insurance claims.

1. There are many bats on this site which are protected under The Conservation of Habits and Species Regulations.

1. The access into the site is limited to only two points of entry. One entry is onto the busy Send Marsh Road which is narrow and unsuitable to carry more. This entry point is near to a blind bend so there would be a safety concern and a potential accident black spot with approaching traffic from the direction of Send. The other entry point is into the side of Danesfield where the access is deliberately narrow as it is a residential road where many families live with young children. There is only just enough room to get two cars passing so a massive increase in traffic would be totally impractical as well as dangerous for all the small children who play in the road. Furthermore, there is an old established oak tree on the entry point which would have to be cut down and I believe this has a TPO on it.

1. As a resident of Send and with my family living here and our garden backing onto this site, I am very concerned about what is being discussed regarding potential building on the site. It would be an absolute travesty if this land were to be lost to building. This corner of Send Marsh is of an open rural nature and therefore totally unsuitable for insetting from the green belt.

1. Our village is loved and cherished by all those of us who live Send Marsh has a long history of generations of families living here and we all love the open countryside, the lovely walks, the beautiful views and the village life atmosphere. To commence on such a thoughtless and aggressive building program would bring this to an end and would mean that we could never go back to what we once had.

1. The site should not be termed "safe guarded" as the meaning of 'safe' does not seem to apply. As I understand the term as used here, this site could be back on the table as a possible contender for consideration for planning permission if other sites do not get their planning granted. There would not be a democratic process for this site to then have a further round of public consultation as the date will have been passed. We would then be at the mercy of GBC and the planners.

1. Send Marsh has already seen a dramatic increase in the traffic flowing through it and into Send village at peak hours with long tailbacks from the traffic lights at Mays Corner. Send Marsh regularly sees delays getting onto the Portsmouth Road at Send Dip with long queues of traffic going towards Ripley and Burnt Common.

1. This site is at the back of Danesfield has limited access onto Send Marsh Road and if this was the only way out then this would put a lot of strain onto an already congested road. If the access was through Danesfield then this would seriously congest our road as it is very narrow and difficult to pass cars at various points.

1. The field behind Danesfield is a beautiful open space with much wildlife including deer and foxes as well as lots of bird! The field is enjoyed by those in the village who walk and take their dogs by the adjoining footpaths.

1. Send Marsh Road has a very narrow and dangerous bridge which would need to be widened to make it safer and the whole of the Send Marsh Road would need to be There is no mention of this in the plan.

1. Send Marsh does not have any infrastructure. There are no local shops, no school, no doctor's surgery and no public park area. It comprises if mainly all houses and so the addition of so many new houses will put huge pressure on the infrastructure on Send and Ripley, both of which can hardly cope with the current pressures. You would have to walk a considerable distance to access any of these services and so this would mean owners...
would have to use a car. This would seem contrary to the government’s policy for us all being green and reducing pollution.

1. The bus routes to and from both villages are very poor and infrequent, about one per hour. Again it is essential to have a The roads are too narrow and dangerous for cyclists so this is not really an option.

1. By proposing greenbelt sites in the area means this land will be gone. It is essential we protect the greenbelt or we will simply be a concrete jungle joined to Guildford and Woking with no green space in between. These greenbelt areas are essential to everyday living to provide clean and open space for everyone to enjoy.

1. There are plenty of brownfield sites available which should also be considered. In addition, there are sites which have been given planning permission but builders are refusing to build on as presumably, they are waiting for house prices to increase so they can maximise their profits. Ifeet time limits should be placed on planning permissions granted to encourage building in any economic cli

1. Send Marsh is poorly served by schools, particularly the secondary. It has become increasingly difficult to get children into George Abbot which is the closest school to the village. With the amount of houses to be built set to increase, where will the children go to school if we don’t have a plan to build schools?

I would like to place on record my objections which I would like to be seen by the Inspector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the Garlick’s Arch (A43) proposed changes to this site which in combination would generate considerable activity in a most unsuitable location.

Pitches designated for Show People suggests large vehicle traffic movements and a further extension to the commercial premises that have already been added on that side of the road all of which is located in close proximity to the surrounding residential area.
Increasing the number of houses would mean a truly massive increase in the volume of traffic which will only be able to use the A3, Send Road and travelling through Ripley, all of which are unsuitable for the level of traffic associated with such a development.

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause log jams of these villages.

- Garlick’s Arch (A43) should not be extended or even developed with the resulting urban sprawl. There are **no exceptional circumstances** for this site being removed from the Green Belt, as required by the National Planning Policy.

- **I object to the allocation of 6 Traveling Show people sites in A34 Garlick’s Arch**

The allocation of 6 Travelling Show people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be **no** inclusion of any Travelling Show people plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

- **The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch**

I further object to the Garlicks Arch site because if A58 Burt Common site and development at Gosden Hill Farm is also granted then the A3 corridor from Burpham to Ripley will be over developed and it will simply join up a sprawling set of developments. These in turn will lead to greater traffic density, slower journey times as well as increasing safety concerns for an infrastructure which cannot support this level of traffic.

**I object to the proposed insetting around Send and Send Marsh.** If the new insetting boundary is adopted, then the land and all the surrounding fields for several miles around our village, by default, will become available for development and building, attracting builders to develop and build on large swathes of open countryside.

This is a completely irresponsible and reckless policy with no regard to co-ordinated planning and will lead to an out of control building frenzy.

Further more, the local roads are already congested at peak times and development such as that proposed will on ly make matters worse and will probably give ri se to peak-time grid lock. The local infrastructure is inadequate for further development in this area..

FOR THESE REASONS I OBJECT TO THE PROPOSED DEVELOPMENT PLAN.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2586  Respondent: 8924577 / Charles Lee  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.
I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common.

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site.

Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site. National Planning Policy promotes sustainable developments, with sustainable transport.

With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3). The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. Comment ID: pslp172/4609  Respondent: 8928289 / Trevor Skerritt  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being...
generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
thoroughness in development of the draft Local Plan. Is the council so easily swayed by a developer who offers a wonderful carrot of providing free land for entry and exit points from the A3 in order that he can make a huge profit without any regard to Green Belt restrictions.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.
The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the
east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause
immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no
Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes
    per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land
    requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt
    Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at
every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of
the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by
National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy
walking distance and bus services across rural villages are forever reducing. Residents will have few options, but
to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore,
there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be
dependent on the car for transport. Greater consideration should be given to increasing the density of

Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial
(B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6127  Respondent: 8931233 / John Pemberton  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to development on the following specific sites-

Site A43 Garlicks Arch which was announced a week before the ‘plan’ was published. The site is subject to flooding and is segmented by high voltage pylons.

Site A43 on/off ramp at Burnt Common/Clandon where the implications for local traffic have not been thought through.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 changes at Garlick’s Arch increasing the housing between 400 and 650 homes and provision for travelling show people.

• The demand for show people plots is not explained.
• No exceptional circumstances are given for the use of the Green Belt
• This development would lead to the joining of Ripley, Send and West Clandon and destroy any notion of the Green Belt being used to separate villages.
• The traffic consequences for Ripley and Send are not explained.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the massive "Garlick Arch" proposal for houses & Commercial buildings, your A43 reference. The amount of people, their cars the lorries & vans will see many more vehicle movements on the narrow roads which are already very busy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two
businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Comment ID: PSLPS16/7732  Respondent: 8940225 / Glen Ruddy  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (BB).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)
Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the allocation at Garlick’s Arch – allocation A43 due to the loss of ancient woodland; the impact on all local infrastructure of another 400 houses; the site is too close to the A3 and will have poor air quality. There appears to be no joined up thinking on the various on/off junctions on the A3 – my understanding is that the SRN is meant to be for THROUGH TRAFFIC not local traffic. Numerous junctions will slow progress for all users and increase accidents due to more lane changes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to the Guildford draft local plan 2016

I write to object in the strongest possible terms to the draft Local Plan recently produced.

It is an act of gross cynicism on the part of the Council to reject the Planning Application for the former Wisley Airfield, and then immediately to produce a draft plan which would not only give a green light to such a development, but also add greatly to pressure on local amenities and infrastructure by threatening to disapply Green Belt planning restrictions in the same area. What changed overnight? Nothing.
The justified (and, for about 24 hours, persuasive!) objections to the Wisley development are only aggravated by other current proposals at Garlick’s Arch and elsewhere in the immediate area to which the Ripley Action Group are objecting. Local amenities and infrastructure simply cannot handle the pressures that would result. Local roads are choked, Ripley High Street is regularly impassable, there are problems over schools, access to work, access to medical facilities, and more.

These classes of development cannot be regarded as sustainable. Local roads are already inadequate for pedestrian and cycle access – particularly relevant to the problems of additional car use which would result from such intensive development in this rural area where public transport is wholly inadequate. Roads serving much of the threatened Green Belt insets simply cannot be enlarged. The proposals for on/off access to the A3 at Burnt Common would require extensive additions to routes which are the responsibility of the national Highway Authority, which as I understand it has no plans or funds for any such works within the time frame of the Plan. This is the antithesis of planning: it is ‘press on regardless and to hell with local residents, infrastructure and amenity’!

There are particular objections to Garlick’s Arch development:-

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- It has ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.

The Council seem to be volunteering Guildford for a far heavier level of development than is proposed by neighbouring boroughs. It appears to have doubled the assumed housing requirements compared with earlier estimates, but refuses to publish the SHMA report with its figures and assumptions. How can you expect any confidence in your consultation procedures if you present us with a ‘pig in a poke’?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to this site being included. It is in the Green Belt and there are no exceptional circumstances for its removal. Its inclusion is a major change from the previous draft and has not been consulted on previously. It has been ignored in the Strategic Highway Assessment.

There is no need for housing on this site because the local plan housing target is incorrect and inflated.

I object to the building of 400 homes and 7000 sq metres of Industrial Space at Garlick’s Arch. The site floods, and is in part ancient woodland and any building on the site would increase the off-run into the East Clandon Stream, and increase the risk of flooding downstream in Send Marsh despite the flood prevention works carried out following earlier incidents of flooding. The Pylons which march across this area would mean that the area of Green Belt sacrificed per home would be greater than alternative sites due to the need to allow space around the transmission lines. Also it is not clear that the suggested Industrial Space would be required if the reduced economic growth expected following the Brexit vote were properly reflected in the Council’s figures.

Site A43 Garlick’s Arch

The Society objects to the proposed building of 400 homes and 7000 sq metres of Industrial Space at Garlick’s Arch. The site floods, and is in part ancient woodland and any building on the site would increase the off-run into the
East Clandon Stream, and increase the risk of flooding downstream in Send Marsh despite the flood prevention works carried out following earlier incidents of flooding. The Pylons which march across this area would mean that the area of Green Belt sacrificed per home would be greater than alternative sites due to the need to allow space around the transmission lines. Also it is not clear that the suggested Industrial Space would be required if the reduced economic growth expected following the Brexit vote were properly reflected in the Council’s figures.

Comment ID: PSLPS16/5250  Respondent: 8961889 / F Turner  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
OBJECTION TO SITES RELATING TO POLICIES A43 & A43a: GARLICK'S ARCH, SEND MARSH, BURNT COMMON & RIPLEY

The proposal regarding Garlick's Arch was only submitted at a very late stage just before the consultation on the draft Local Plan began. It therefore needs to be considered under Regulation 18 rather than Regulation 19 rules.

It appears that an as yet unspecified developer has offered a new North facing slip road with access to the A3 in exchange for approval in principle to build at least 400 homes and an industrial estate on Green Belt land adjacent to this strategic highway for which Highways England are responsible. CPRE considers that a greater degree of transparency is required for this proposal to be assessed properly. It would for example be valuable to know when and how this offer has materialised and whether it is linked in any way with any other current proposal being considered in this locality in connection with the draft local plan.

It seems to us that this application has to be considered alongside several other development proposals which involve the A3 and depend on Highways Agency overview and agreement. These include the Wisley Airfield site (A35) for 2000 homes, which was unanimously refused by GBC at an earlier date before the draft local plan was available, the Gosden Hill site at Clandon/Burpham (A25) for 2,200 houses, the Slyfield Area Regeneration Project (A24) for 1,000 houses, and the Blackwell Fann site (A26) with 400 homes and an industrial estate at the Hogs Back for 1,800 homes. The common element to all these applications is that they depend on the input of the Highways Agency.

Additionally, we should bear in mind that the Royal Horticultural Gardens at Wisley, which is one of the largest tourist attractions in this part of England, have announced plans to expand visitor attendance from 940,000 to 1,400,000 in the years ahead which will be a further A3 traffic consideration that needs to be addressed. Without clarification from the Highways Agency as to how they intend to improve the traffic flow on the A3, which is already badly affected by peak hours congestion, and manage its various junctions with the M25, the B2251, the B2039, the A247, the A3100 and the A31 in particular, further assessment is premature.

Altogether over 7,000 houses are involved which seem certain to cause not only a crippling extra traffic burden for the A3 but also for our local road network.

It is not clear as yet how a 3 or 4 way on/off ramp at Burnt Common would work. It seems unlikely that it would alleviate traffic damage on a major scale for Clandon, Send or Ripley. CPRE therefore objects to this proposal which involves the loss of Green Belt to housing development, and is therefore directly against the Minister's statement that this would not be acceptable if local people were opposed to this and considered it inappropriate. CPRE OBJECTION.

CPRE further argues that it would be premature to include this proposal in the draft local plan as the overall implications of what is being considered are insufficiently described.

What changes (2016)/ further amendments (2017) do you suggest should be made to the document?

Attached documents:
The draft Proposed Submission Local Plan allocations for industrial / storage uses set out a number of considerations for each site, and these are directly quoted from the Plan in the table below. From this, it is clear that the North Slyfield Site has fewer constraints on development (and is therefore more deliverable) than the Submission Local Plan allocations. Please also note, as set out above, that the North Slyfield Site would be much more attractive to the market because it adjoins the existing premier industrial estate in Guildford and therefore benefits from existing infrastructure, business linkages and economies of scale.

There are also a number of other reasons why the North Slyfield Site is a better option for additional employment floorspace and should be prioritised, with the allocation reinstated. The full case for prioritising the North Slyfield Site can be summarised as follows:

**SARP**

1. The North Slyfield Site could meet the needs of a full range of Class B1c, B2 and B8 operators whereas the employment allocation at SARP is for Class B1c light industrial only.

2. The undeveloped parts of SARP share landscape characteristics with the North Slyfield Site and qualitatively there is little difference between them. However, SARP is closer to the River Wey and sensitive landscape and nature designations, and could therefore be said to be more sensitive.

3. The North Slyfield Site could be delivered now and within a five year timeframe. While SARP is a good option for additional light industrial floorspace, relocation of the sewage treatment plant and County depot and viability issues has hindered the scheme to date.

4. Employment allocation of the North Slyfield Site could help unlock SARP by relocating some of the existing or proposed light industrial uses at SARP to the extended SIE. This would allow more housing to be delivered at SARP and boost development value. In addition, the growth of SIE through this allocation would reinforce the case for bringing forward the proposed Clay Lane Link Road – another important Council aspiration.

**Wisley Airfield, Ockham**

This mixed-use allocation includes approximately 2,500 sq.m of B2 (industrial) and B8 (warehouse) floorspace, requiring 0.7 ha of land to build out.

1. The North Slyfield Site benefits from existing commercial infrastructure, linkages to other businesses and economies of scale; the small employment allocation at Wisley would not, and could not meet the needs of existing businesses wishing to expand or relocate within the urban area or to Guildford’s premier industrial location.

2. The North Slyfield Site is unconstrained by built and natural heritage and environmental constraints, unlike Wisley.

3. The North Slyfield Site benefits from existing natural boundary screening which would lessen the impacts of built development on the Green Belt / surrounding countryside; Wisley has no screening.

4. The North Slyfield Site is currently unused scrub; much of the Wisley allocation is currently farmed.

5. The North Slyfield Site could be delivered now and within a five year timeframe; there are question marks over the delivery of Wisley and a mixed use scheme was recently refused planning permission by the Council.

**Garlick's Arch, Send Marsh / Burntcommon**

This mixed-use allocation includes approximately 7,000 sq.m of B1(c) (light industrial), B2 (industrial) and B8 (warehouse) floorspace, requiring 1.75 ha of land to build out.
The North Slyfield Site benefits from existing commercial infrastructure, linkages to other businesses and economies of scale; the employment allocation at Garlick’s Arch could not meet the needs of existing businesses wishing to expand or relocate to Guildford’s premier industrial location or within the urban area.

The North Slyfield Site is set some distance from the houses on Jacobs Well Road and the existing boundary planting would attenuate noise; Burnt Oak is much closer to the residential properties to the north west of Burntcommon Lane and Portsmouth Road (B2215), and to the north east of Kiln Lane.

The North Slyfield Site is currently unused scrub; much of the Garlick’s Arch land is currently farmed. Again, the failure to allocate employment land “in the right place and at the right time” (as required by the NPPF) means that the Proposed Submission Local Plan has not been positively prepared, is ineffective and therefore unsound in this respect.

**The allocation of the North Slyfield Site for employment purposes did not arouse a significant degree of opposition from the general public or other stakeholders**

In response to the July 2014 draft Local Plan consultation, the Council received a very small number of representations in respect of removing the North Slyfield Site from the Green Belt and allocating it for employment purposes.

Ten responses either supported the allocation or did not object. Notably, this included support from the Guildford Society which backed the allocation particularly to accommodate displaced businesses in the town centre / at housing allocations.

Only 23 of the 20,000+ comments received by the Council raised concerns or objected to the North Slyfield Site (0.1% of all responses). There is therefore not a significant degree of local opposition to the North Slyfield Site’s removal from the Green Belt and employment allocation.

The key issues raised by respondents related principally to issues that have been addressed by NLP (on behalf of our client) in its original 29 November 2013 representations and which were found to be acceptable, at the time, by the Council in preparing the draft Local Plan (i.e. loss of Green Belt and the visual impacts of industrial development). Other matters including traffic, flood risk, noise and pollution impacts are capable of mitigation, would not have significant adverse impacts and would not outweigh the considerable economic and employment benefits. Importantly, these are development management matters which it would be appropriate to consider at the planning application stage.

Our letter (Annex 6) responding to the representations that were received contains further details.

**Conclusions**

The Proposed Submission Local Plan is unsound because it fails to positively and pro-actively plan for economic growth in the right place and at the right time as required by the NPPF:

1. The Plan fails to allocate a sufficient quantity of land in the Borough to meet demand and the need for employment floorspace, particularly for industrial and storage premises because the ELNA (2015) is 1) over-reliant on historic trends to estimate future requirements and 2) has limited consideration to local business and market conditions to inform the future requirements. These limitations reduce the soundness of the forecast requirements for industrial and storage land, and the actual amount of land that should be planned for should be higher than the currently proposed requirement. The failure to positively prepare to provide adequate employment land is also unsound because it is inconsistent with NPPF national policies to build a strong and competitive economy, and pro-actively meet the development needs of Guildford.

2. Qualitatively, the Plan fails to positively plan for additional employment land at SIE (a strategic employment site) to ensure that the premier industrial location in the Borough does not miss prospects to attract new businesses and retain existing, growing businesses. The ELNA itself highlights demand for businesses to locate to SIE, which currently has as little as 185sq.m of vacant industrial space, and limited prospects for intensification or additional space at the site. The North Slyfield Site is the only option available to expand industrial and warehousing at SIE and to plan for economic growth at the strategic location in the Borough where there is most demand.
3 Further, the North Slyfield Site is the only location that can support the industrial market in the Guildford Urban Area, and it is far more likely to be delivered than the proposed allocations at Wisley Airfield and Garlick’s Arch (which cannot draw on the market value of an established strategic industrial location).

4 Allocation of the North Slyfield Site would also have other benefits for Guildford Borough:

   • Providing land for displaced businesses could support the release of previously developed employment sites in the town centre for housing development in accordance with the Guildford Town Centre Vision.
   • Supporting housing delivery on urban brownfield sites would help ease pressure on the release of Green Belt land.
   • An allocation at the North Slyfield Site could also help to unlock the stalled SARP scheme by relocating some of the existing or proposed industrial / storage / light industrial uses at SARP to SIE, which would allow a greater proportion of housing to be developed at SARP and boost the potential development value of the project. The failure to take such benefits into consideration also indicates that the Proposed Submission Local Plan has not been positively prepared, is inconsistent with national policies and is, therefore, unsound.

5 In addition to the strong economic / employment arguments in favour of allocating the North Slyfield Site for employment purposes, it is equally important to recognise that the North Slyfield Site is not a sensitive part of the Green Belt. Its release from the Green Belt for development would satisfy all five purposes of the Green Belt and there is no reason for the Council to depart from its original acceptance of this finding. Furthermore, Wisley Airfield and Garlick’s Arch are more sensitive in landscape, heritage and habitat terms.

6 The other sites also have a number of constraints meaning that employment floorspace would be unlikely to be delivered within the short term (i.e. over the next five years). In contrast, the North Slyfield Site is readily available for development, with co-operative landowners and good quality infrastructure supporting delivery. It is also in a location that would be more attractive to the market and meeting demand. The risk profile associated with the North Slyfield Site is therefore low.

7 Finally, the allocation of the North Slyfield Site for employment purposes did not arouse a significant degree of opposition from the general public or other stakeholders.

For these reasons, the 4ha North Slyfield Site should be removed from the Green Belt and be allocated in the Guildford Local Plan for employment development within Classes B1c, B2 and B8. We urge the Council to reinstate the employment allocation for the North Slyfield Site in the Submission Local Plan that will be sent to the Planning Inspectorate for examination.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to Guildford Borough Council's draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:
- destroy views from the Hog's Back ridge - a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green belt increase tail backs on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

I object to the allocation of 6 Travelling Show-people sites in A34 Garlick’s Arch

The allocation of 6 Travelling Show-people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Show-people plots in A43 Garlick’s Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 as stated in section 4.2.24 of the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.
18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Comment ID: PSLPS16/7110  Respondent: 9042049 / Victoria Sandu  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the development of Garlick's Arch off the Portsmouth Road to include the building of 400 houses and 7000 m2 of industrial space. This site floods on occasion and is covered by ancient woodland, including trees dating from the 16th century.

The 'Housing Delivery' document in the draft local plan suggests that this site is required to facilitate the provision of a northbound on and a southbound off slip road onto the A3 from the A247, which will provide significant improvements to the highway network and is fully supported by Surrey County Council. This document then goes on to state that 'On this basis we consider that the benefits of developing this site outweigh the harm that may be caused by removing this land from medium sensitivity Green Belt. This constitutes the exceptional circumstances required to amend Green Belt boundaries...' The addition of two slip roads providing access to and from the A3 does not constitute 'exceptional circumstances' and I object to Guildford Borough Council using this as a justification to modify the Green Belt in this area.

- I object to the area at Garlick's Arch having an additional 7000m2 of industrial space added as the latest Employment Lands Needs Assessment 2015 shows a reduction in required floorspace of 80% from the previous plan made in 2013. If any additional floorspace is required this should be located at Slyfield Industrial Estate which has had valid plans to expand since 2014.

- I object to the lack of due process that Guildford Borough Council have followed in reaching the decision to add the development of Garlick's Arch at the last minute, prior to including in the latest Local Plan. Since 2014 every proposed major development in Send and Send Marsh has been changed, with the original proposal for an additional 430 houses in 2014 being reduced to 185 by April 2016, and suddenly being increased to 485 in May 2016. Such large changes require full consultation under Regulation 19 of the planning process - this process has not been followed.

I urge Guildford Borough Council to reconsider the above changes currently being considered as part of the Local Plan, and look forward to reviewing a new plan that has been amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3717  Respondent: 9062913 / Susan Parker  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

It ignores all the thousands of previous objections made by local people

There is no proven demand for travelling show people plots in this location
There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores
constraints.

The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha
and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not
28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times
the land required.

This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every
opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be
intent on conserving it rather than exploiting it.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National
Planning Policy.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking
distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on
motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to
improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for
transport. Greater consideration should be given to increasing the density of development in urban areas, such as
Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further
vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will
suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an
exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no
exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There
is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one
another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost
and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the
Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater
chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the
Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the
area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being
heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual
flooding risks of each site.

I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four
existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9
years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a
permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally
through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure
(Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road
and Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion
in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

I object to poor air quality (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Attached documents:

Comment ID: PSLPS16/3213   Respondent: 9094753 / D Jones   Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43  
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which
forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There was no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1780  Respondent: 9241793 / Nicky Wilson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

• The potential of an increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon, the villages will become a conurbation. Traffic congestion will increase through the villages and reduce the quality of life of villagers that have chosen to live in a green belt area.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

• The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

• The plan states that “if the [Traveller sites] remains unsold, the future use of the land should have regard to an up to date Traveller Accommodation Assessment (TAA) and Strategic Housing Market Assessment (SHMA), with specific consideration of the use of the land for affordable housing”. So even more travellers pitches and houses, which is unjustified.

• Section 4.2.22 of the Plan states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” So why do 75% of them have to be in Ripley? This is unbalanced and unfair.

• 1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, (site allocation A25) [ than the Burnt Common site did ]

• 2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

• The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch)

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2147  Respondent: 9298465 / Peter Grover  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Policy A43 & A43a: Garlick’s Arch & Slip Roads, Burnt Common

**I object** on the grounds that the scale of development in the borough is unsubstantiated (see sections 1.1 and 1.2 above).

**I object** on the grounds that the Strategic Traffic Assessment for the slip roads associated with this site fails to provide credible data on the traffic impacts on the A247 through West Clandon and Send.

**I object** on the grounds that (in conjunction with other sites) this proposal would lead to – or certainly facilitate – an almost continuous ribbon of development along the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I have considered this Policy alongside Policies A25 (Gosden Hill Farm) and A58 (land around Burnt Common Warehouse). Together these three Allocated Sites form two miles of almost continuous dense development alongside the A3 trunk road, with a short break of just 700 yards separating A25 from A58. Moreover, A25 is itself adjacent to Burpham which is already part of the existing Guildford conurbation. NPPF paragraph 79 states that “The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence”, and paragraph 80 states that the first of the five defined purposes of the Green Belt is “to check the unrestricted sprawl of large built-up areas”. Sprawl is exactly what these three Policies, taken together achieve.

The joint impacts of these three Policies are fundamentally at odds with the provisions of NPPF, and with the many ministerial statements concerning the importance of the Green Belt – in particular its openness and its permanence. I strongly object to this Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Site A43 / Garlick’s Arch

1. I object to this proposal. In isolation I would welcome the provision of a 4 way access to the A3 at Burnt Common as part of this development. However I feel very uncomfortable about the plan for this development alongside sites A35 & A25. This would create a band of housing development totalling 4400 properties in a ribbon running from M25 / J10 to Guildford on land that is greenbelt.
2. I am particularly worried about the traffic management around the Burnt Common area. This is already a busy junction with the Portsmouth Road and with potentially additional traffic from Woking, Clandon as well as those travelling north & south on the A3. I fear this would become a major bottleneck.

Please will you take my comments into consideration.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

This would profoundly alter the character of this sensitive area.

Ripley sits in a traffic junction lying between these six villages/locations; the traffic volumes created by these developments would dominate and ruin normal village life for all residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
6. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

12. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 at Garlicks Arch because it ignores the thousands of previous objections and this is Green Belt and Ancient Woodland. No Exceptional Circumstances exist here for ignoring Green Belt. There is no justification for Travelling Showpeople plots - why are these required? It is overdevelopment of the area and the number of homes planned is excessive. The land is prone to flooding and is also contaminated with lead shot.

I object to developments in Send rushed through into the draft local plan.

I object to the 400 houses and 7000 square metres of industrial and warehousing proposed for the GREEN BELT land at Garlick’s Arch. Where is the sound evidence that further housing and industrial space is needed in Send? The Government promised protection of the Green Belt. How is it that GBC can just override this? Once you start building on Green Belt there is no stopping and no going back. And for what purpose? There are no exceptional circumstances to build this large number of houses plus industrial space on Green Belt land. Where are all these people? Martin Grant has slipped in 6 new homes recently and more houses are planned near Vision Engineering. There is already industrial space in Tannery Lane plus the Marina and warehousing at Burnt Common (where there was to be housing – now cancelled). 400 houses will bring another 800 cars on to the roads plus an indeterminate number of children with insufficient school places. Doctors’ surgery would be overwhelmed.

I object to the proposed junction on the A3 at Burnt Common. More Green Belt land lost there. I live in Send Barns Lane and every morning and evening the road is at a standstill. Send is a village and cars can be parked on the road and people need to cross the road at various places. The heavy traffic coming through it to get onto the A3 at Burnt Common would absolutely destroy Send.

Re: Garlick’s Arch, Burnt Common

I strongly object to the proposed to develop the land known as Garlick’s Arch, Send Marsh/Burnt Common. This is a last minute change to the Local Plan and the manner in which this proposal was added by stealth is completely unacceptable. Due process was not conducted. My comments need to be seen by the Planning Inspector.

Public opinion is crucial as we all have to live and thrive in a community. Some reasonable growth in housing capacity is required and this has to be managed carefully and appropriately. The proposed development of in excess of 400 homes plus warehousing and industrial units is quite frankly ridiculous. The area simply cannot take any more. In the GBC’s literature (‘About Guildford’, Summer 2016) you state the following:

“One of the borough’s biggest assets is our significant green belt, and major consideration is given to protecting this.”

Borough Council election promises were to protect the Green Belt; evidence so far indicates that you are breaking these promises.

Key Reasons for objecting:

- Traffic Congestion: I object to what will be addition to the already congested roads in Send, Send Marsh and Ripley. The infrastructure in the area is not simply sufficient for hundreds of additional cars, haulage vehicles and cyclists, etc. The whole road system suffers greatly at peak times. Travelling from Send to Woking station takes ¾ hour rather than the usual 10 - 15 minutes. Ripley High Street cannot cope with the peak traffic at the beginning and end of the day even now let alone with more and more vehicles being channelled through the bottlenecks of Ripley and Send. Send Marsh Road, Portsmouth Road into Ripley and Send are already highly congested in the mornings and a further 400 houses cannot be tolerated on the road infrastructure. The M25/A3 Junction 10 is clogged from 0700 in the morning to well after 0900 and the tailbacks on the M25 towards junction 10 from the east start from at least the Leatherhead junction. More vehicles as a result of all the potential new houses are going to create mayhem, further delay and accidents.
- The quality of the roads: I object to the quality of the roads; both in terms of surface and width simply are not up to greater use. There are many pot holes causing damage to cars and cyclists (NB personally experienced damage to the car) and the situation will only worsen with the greater population
- Local services: I object to the already stretched local services and facilities in the immediate area. The Villages Surgery that services Send, Send Marsh and Ripley – would not be able to take more and more people. It is already nearly impossible to get an appointment with a Doctor. Local schools do not have the capacity for more people. The letterbox at the junction of Send Marsh Road and Portsmouth Road has just been removed; again an

- **The quality of the roads:** I object to the quality of the roads; both in terms of surface and width simply are not up to greater use. There are many pot holes causing damage to cars and cyclists (NB personally experienced damage to the car) and the situation will only worsen with the greater population

- **Local services:** I object to the already stretched local services and facilities in the immediate area. The Villages Surgery that services Send, Send Marsh and Ripley – would not be able to take more and more people. It is already nearly impossible to get an appointment with a Doctor. Local schools do not have the capacity for more people.

- **The beautiful countryside:** I object to the fact that the countryside surrounding Send, Send Marsh and Burnt Common is at risk of being lost. It needs to be preserved for future generations to enjoy. The area of Garlick’s Arch is agricultural green belt and ancient woodland and offers the appropriate break between the residential areas of Ripley and Send Marsh from the busy and noisy A3. I object to the continued onslaught by GBC of taking green belt land from the area which provides good breaks between Guildford, Woking and from the busy A3

- **Air Quality:** I object to the air pollution that will be greater if the industrial units and additional housing are built. More vehicles (especially haulage) will cause pollution. The area of Ripley, Send Marsh and Send are in a dip and has a micro climate; air pollution will languish in this dip

- **The need for additional housing:** I object to the assumption that additional housing is required in Send and Send Marsh. The need is simply not proven

- **Industrial units:** I object to the proposed relocation of industrial units from the proposal at Slyfield where there is sufficient and wanted expansion there

- **The outlook from the Maple Road development in Send Marsh:** I object to losing the view of the beautiful canopy of trees that line the view towards the A3 from Maple Road. The proposed development at Garlick’s Arch will destroy the skyline

Please do not destroy the existing communities that live in harmony with their environment (only just!) within the Send, Send Marsh, Ripley and Clandon areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
There is no proven demand for plots to accommodate Travelling Showpeople.

National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt land. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. It constitutes over development. These further changes to the plan are not required. It is an unsustainable location. It will undoubtedly cause traffic chaos on the minor surrounding roads.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion, anyone who lives in these areas will confirm that this is the case. Substantially more vehicle movements will result in even more congestion and greater pollution. Residents and the environment will suffer as a result.

This area contains ancient woodland dating back to the 16th century, which should be preserved. There is no good reason to tamper with it.

This site is identified as being in a Flood Zone 2 and regularly floods during winter months.

This site contains land which is heavily contaminated by many years of shooting with lead shot.

Above all, the changes to this site have completely ignored the thousands of previous comments from residents (who know the area best of all) during the 2016 Local Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to Policy A43 which I previously objected to that this land is Green Belt, with ancient woodland. The development would have a huge impact on the Flora, fauna and wildlife in the vicinity and development on this land will join the villages of Ripley and Send together defeating the object of the Green Belt. The local roads, doctors, schools, amenities are already struggling to cope with the existing residents and would be under pressure and would definitely not be fit to serve residents from another 400 homes.

Finally the housing numbers in the Local Plan has reduced by 39 per annum but Send’s contribution has increased with no justification, I therefore feel that consideration should be made to firstly the existing infrastructure especially A247 Send Road, Clandon Road and Portsmouth Road at Ripley, the bus service, doctors, schools, shops etc. should any development within Send be approved.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A43 Garlick’s Arch. Again, this proposal has taken no account of the huge number of objections. There has been no evidence to show the need for the addition of 6 travelling showpeople plots. The proposed enormous development in Green Belt is completely inappropriate and would change the village beyong measure creating a new town. Such overdevelopment in beautiful and ancient woodland would create a conurbation joining Send and Ripley. Green Belt is surely meant to protect against such a thing. There are really worrying issues about the great impact on traffic levels that such development would make on the local roads which are already congested, particularly at peak times.

Having lived in Send for 20+ years and locally in West Horsley for some 8 years prior to that, I have seen a rise in traffic and congestion problems on our local roads over this period. Such a large scale housing proposal can only cause traffic chaos. Again, flooding is likely to be an issue and the area is currently a flood zone 2 allocation. Moreover the land is contaminated by lead shot accumulated over 50 years.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Inadequate notification and planning for Developments 43 and 43a

The developments on Land a Garlick’s Arch were not included in the Draft Local Plan 2014, and it is only in the Draft Local Plan 2016 that I first learnt of them. Therefore, I object because it is unfair to make such a major change to the Plan with so little prior notification, and allow such a short consultation period of only 6 weeks.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the changes in this policy, because:

1) This development is far too large for the local area to cope with. It will effectively join villages of Send, Send Marsh, and Ripley, to form one contiguous built-up area; forming, within a short time, a new town effectively.

2) I object to space being allotted to accommodate Gypsies and/or Travelling Showpeople in this area. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature].

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposed development at Garlick's Arch of 400 houses as this was only included in the plan with only 2 weeks notice and without previous consultation and is not necessary for housing needs of the village or the borough. Also this site has a particular sensitivity as it is covered in ancient woodland with trees which date back to 16th century being endangered. The site is also frequently flooded.

I object to the proposed Industrial development at Garlick's Arch of 7,000 sq.m since a reduction of 80% in required employment floor space is shown in the latest Employment Land Needs Assessment 2015 (ELNA). Slyfield should be used if there is a need for 7,000 sq.m which has a 40ha site available.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO POLICY A43 change at Garlicks Arch because of the number of homes to be built despite previous objections. 6 plots for travelling showpeople is totally unnecessary as there is no proven demand. It will change the nature of Send and Ripley as two separate villages and will generate excessive amounts of traffic.

It is a flood risk area and is contaminated by lead shot.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Garlick's Arch

I hereby wish to lodge my official objection to the proposed development of 43.3 ha of land at Garlick’s Arch, Burnt Common.

This proposal was included a mere 2 weeks before submission to the full Council for approval at the end of June.

NO consultation with the general public, local people or anyone who uses this land (including myself) was entered into which is a terrible indication of the high-handed manner in which this proposed destruction of protected greenbelt land has been formulated.
This greenbelt land, containing ancient woodland, is in regular, sustainable use bringing enjoyment to many local people and should not have even been considered for development as it is protected by the NPPF in perpetuity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Site A43 I object to the development at Garlick's Arch for 400 houses because it was sprung on the village at the last moment with only 2 week's notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

Site A43 I object to the proposed industrial development of 7,000 sq m at Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015(ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40 hectare site available

I object to Policy A43. Land at Garlick's Arch, Send Marsh, Send

Now 400 homes and 6 Travelling Showpeople plots.
This ignores thousands of objections from local people and there is no proven demand for Travelling Showpeople plots in this location.

There are no 'exceptional circumstances' to remove this from permanent Green Belt and it will cause over development of Send Village.

It will remove the green break of ancient woodland between Send and Ripley. The site is flood zone 2 allocation and frequently floods.

Excessive traffic will be generated and block up the local roads of Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Re: Garlick’s Arch Site

I was horrified to learn just days ago that an amendment had been added to the Guildford Local Plan proposing a major new housing and industrial development between Sendmarsh Road and Burnt Common.

1. I object to the fact that this proposed new development appears to have been sneaked in through the back door just a few weeks after local residents had been notified of a significant reduction in planned new housing for Send. There has been no consultation with residents, and the Council’s Executive agreed the amendment fewer than five hours after it was submitted.

2. I object to the impact of such a development on air pollution, which will be significant, particularly with an inevitable increase in HGV's accessing and leaving the proposed industrial units. This will especially affect those people living on the Maple Road estate, where the land is much lower-lying than the Portsmouth Road, which runs along the back of these houses.

3. I object to this development because the infrastructure of the village simply cannot support it: Traffic joining the Portsmouth Road from both Sendmarsh Road and Broadmead Road is already extremely heavy during morning and evening rush hours, causing significant tailbacks through the village. There will also be a knock on effect from the increased traffic through Ripley, and on to the A3 at Burnt Common.

4. I object because of the already shocking quality of local roads – Sendmarsh Road and Polesden Lane especially have so many potholes that drivers are often forced to drive on the wrong side of the road, and there is a significant danger to cyclists. This will only worsen with the increase in traffic.

5. I object because there had already been sufficient planned expansion to the Slyfield Industrial estate in the form of light industry and warehousing, but I understand that this planned development has been withdrawn from the local plan, even though Slyfield is already used for this purpose and offers a much more appropriate site than what is being proposed.

6. I object to the inevitable increased pressure on local schools and medical facilities. The Villages Medical Practice is currently operating at full capacity, and all the doctors working there are concerned that they simply cannot provide sufficient medical care for the number of patients on their books. The Royal Surrey County Hospital is also at breaking point – not only is the amount of time it takes to be given an appointment after a referral unacceptable, but waiting times in A & E are horrendous. I have been admitted to the hospital three times this year as an emergency case, with waiting times before being transferred to the ward varying from eight to fourteen hours, even though government guidelines state that all cases should be seen within four hours. On the last occasion I was there for over five hours before even being assessed by a doctor, despite being 86 years old and in terrible pain.
A further 400 houses on top of the 185 already going ahead will put appalling pressure on the local infrastructure, and the planned industrial development – apart from being totally out of keeping with the area – will have a very negative impact on the local environment. I therefore object in the strongest possible terms and implore you to reconsider these ill-thought out proposals.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick’s Arch for the following reasons:

1. 6 travelling/showpeople plots is excessive. We do not currently have large numbers of travellers in this area, so how can this be justified?
2. I thought that development on Green Belt Land was only to be permitted in “exceptional circumstances”. There are none.
3. 400 new homes is also excessive. This will cause severe over-development of the village and will have a catastrophic effect on the local infrastructure. Traffic on the Portsmouth Road and Send Marsh Road is already a major problem during the morning rush hour and 400 new homes with at least one car per home will significantly increase this, not to mention the effect it will have on pollution levels.
4. Development on this scale will place an enormous strain on the already overstretched resources at The Villages Medical Practice and The Royal Surrey Hospital.
5. I would like to know why I cannot have one large oak tree in my garden cut down for environmental reasons, yet it is perfectly acceptable for developers to destroy acres of beautiful ancient woodland.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

New Proposals within the Updated Local Plan I should like to make comments on the following:- Site A43 Garlicks Arch Proposal for additional housing and travellers' plots is an overdevelopment of the site with little or no justification. Individual identities of Ripley, Send and Clandon would be lost. Huge amount of extra traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.
The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch) GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were:

a) The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, …(site allocation A25) [ than the Burnt Common site did ]”

b) The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/993  Respondent: 10620801 / E. H. and J. A. Strange  Agent:
I object to the new housing at A43 Garlicks Arch, as the development would cause many more cars to use the already clogged roads, through Ripley and Send.

Where there is much pollution now.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the late inclusion of the A43 Garlicks Arch development as resident of Burnt Common Lane this will have a substantial effect on myself and my family. This development will obviously completely change this small and sleepy hamlet of Send and Ripley. One of my main concerns is with regard to flooding. It is also a site with a large amount of ancient woodlands. The industrial development is certainly not needed, and with regard to the housing it my belief that the housing need for the area has been grossly exaggerated

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

There are no exceptional circumstances which allow for the removal of Garlick’s Arch from the Green Belt. Central Government states clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.
- The proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to new sites (Garlics Arch) being introduced as an “after thought” when it was not even considered in the previous plan. A slip road on the A3 at Burnt Common has been added to the draft plan without Highways England’s consent. This will only add to the existing congestion on the A3 and M25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object specifically to ‘Garlick’s Arch’ (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Travelling Showpeople sites in A34 ‘Garlick’s Arch’

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan. NB: A travelling showpersons site with associated storage is completely inappropriate in a rural environment, and I note the intention to release this land for additional housing in the future, should it prove an unnecessary allocation.

The inclusion of site A58 Burnt Common, removes the need for A43 Garlick’s Arch)

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

*The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm… (site allocation A25) [ than the Burnt Common site did ]” The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”*

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (Burnt Common and Garlicks Arch – which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives. A58 Burnt Common provides more than the “required” industrial space, so there is no reason for Garlick’s Arch to be included.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.
I object to the principle of hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan openly conceals some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:
i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and
ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/5205  Respondent: 10638209 / Wendy Rockhill  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The Foreword to the plan by Paul Spooner includes on page 5:

“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (BS). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy P3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that, with this site being added at the 11th hour, no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( )

Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I understand further to your plan to despoil this area of ancient woodland with 400 houses on Green Belt, you have now added 8 travelling/show people pitches without any real justification. The local plan HI policy states that ’Gypsy, Traveller or Travelling Showpeople accommodation should be provided on development sites of 500 homes or more while there remains an identified need’ - so why is Send being allocated 2 traveller pitches as well as these 8 travelling showpeople plots (once again Send is being disproportionally targeted). Traditionally when the funfair comes to Ripley the showpeople park on the Green for the week (in late October) and then leave to move to Guildford for Bonfire Night - so where is the identifiable need?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

2.1 A43 Land at Garlick’s Arch

I object to this site. It was not identified until June 2016 as a potential site for development. It had previously been rejected in the 2014 draft and no evidence has been produced to support the development of this site. The provision of 400 house totally distorts the Burn Common community and is massive addition to the population but with no addition amenities planned. There is one convenience store within walking distance. The schools and surgeries in Send and Ripley are too far to walk and in any case they are full in Send. The site contains ancient woodland of which there is very little in the parish of Send and the development has potential negative impact on this. The land is subject to flooding and the flood risk will be heightened by housing and industrial development. No case has been made for the industrial and commercial use of this site in preference to the alternative site at Burnt Common which was the preferred option from the draft plan in 2014 and up to and including the May 2016. Development of this site will have negative visual impact on the A3 and for views from the south of the A3 including the North Downs. The combination of Garlick’s Arch and Gosden Farm development will significantly alter the character of Guildford from a compact to county town to a sprawling urban conurbation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I also object to the Plan’s failure to explore or propose brown field sites for the required development. In the near vicinity to the Garlicks Arch site there is a significant surplus of land on an already developed site to the south of Burnt Common which could be developed without damage to the Green Belt and the loss of rare Ancient Woodland. It is incumbent on the Borough’s planners to identify such sites. I am very concerned about the manner in which the Garlicks Arch site was surreptitiously substituted for a brownfield development at Burnt Common at the last minute before publication.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Policy A43 change at Garlick’s Arch to allow for 400 homes and 6 Travelling Showpeople plots. This proposal will over-develop our village as this number of houses is unduly excessive and will erode the ancient woodland that has existed for hundreds of years. Guildford Borough Council should be protecting this area not developing it. It will join up Ripley and Send villages and will erode the Green Belt further and generate excessive traffic and block the already gridlocked roads. The area is prone to flooding and this proposal will increase the likelihood of further flood damage. There is no demand for Travelling Showpeople plots in this area, and ‘no exceptional circumstances’ exist to destroy the Green Belt status of this location. There are others areas in the Borough available for development. This area is already full to capacity, the Doctors Surgery and schools are struggling to cope with existing volumes as it is.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to development on permanent Green Belt and that GBC have failed to establish and demonstrate that exceptional circumstances exist to do so.

I object that it will defeat the purpose and role of the Green Belt and that Ripley and Send will effectively become joined up.

I object because it will cause over-development in our villages and the number of homes is excessive to demonstrated need.

I object because it will result in traffic that will further block the local roads.

I object because it will impact on infrastructure and GBC have failed to address this.

I object because it will destroy beautiful countryside and ancient woodland.

I object because existing flooding problems in the area will just become exacerbated.

I object to the inclusion of 6 Traveling Showpeople plots; there is no evidence that this is necessitated in this location.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlicks Arch, Where there are the "exceptional circumstances" that you need to build on ancient woodland, the area is currently a flood zone, it lays in the green belt, you will be causing congestion for our roads even more. There is no evidence that the travelling show people want to go there.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

4. I object to policy A.43.30ha the use of land at GARLICKS ARCH burnt Common designated for 400 houses and 7.000 sq.m of industrial and warehousing. There is no need for any more houses on top of the 13.860 already proposed for the borough. This proposed site is new and was not included in regulation 18 draft and has not been consulted upon previously. Its is Green Belt permanently protected by the NPPF which prevents the merging of settlements. THERE ARE NO EXCEPTIONAL CIRCUMSTANCES. This site has a particular conservation Sensitivity since it is covered with Ancient Woodland, trees which have existed in the 16th century and would be endangered. The proposed Industrial Development of 7.000 sq.m is simply not required since the latest employment land needs assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7.000 sq.m of Industrial space it should be at Slyfield.
A new 4 way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send. The Send road (A247) would be gridlocked all day, Send would be the through route to Woking for traffic leaving the M25 and the A3. The proposed 2,000 houses to be built at Wisley and the 2,000 at Burpham would make Send an impossible place to live.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2829   Respondent: 10721089 / Y Beraud   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Please note I wish to object to Travellers Plots on this site. The access for such large vehicles would mean major road restructure and also additional roads which would only add to the current grid lock, pollution noise and stress being experienced by local residents and commuters.

Added to which the roads are not maintained in good order now meaning additional roads would suffer the same plight in years to come. No proven demand.

I object to 400 homes being built at Garlick's Arch as this would mean another thousand vehicles accessing the local roads again causing grid lock, pollution noise and stress.

I object to this development as it will combine the villages of Send and Ripley into one large urban sprawl without any proven "exceptional circumstances" necessitating the use of precious Green Belt land with abundant wild life.

I object on the grounds that previous objections have clearly been ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 change at Garlick's Arch because there is no proven demand for a TRAVELLING SHOWPEOPLES PLOTS ON THIS LOCATION. This site is beautiful PERMANENT GREEN BELT and no EXCEPTIONAL CIRCUMSTANCES EXIST it is EQUISITE ANCIENT WOODLAND THAT EXISTED AT THE TIME OF ELIZABETH 1. This Policy will join up the villages of Ripley and Send and will Defeat the KEY PURPOSE OF THE GREEN BELT. The land in question is subject to Frequent Flooding and is currently a Flood 2 Allocation and also is Contaminated by Lead Shot accumulated over fifty years. The Excessive Traffic that will be Generate will Block the already exceptional busy Local Roads of Send and Ripley. This POLICY IGNORES all the Thousands of Previous objections made by Local PEOPLE.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy 43 Land at Garlick's Arch –400 houses, industrial buildings and slip roads on and off the A3. It is ridiculous to build 400 houses between Ripley and Send. It would join up the villages and increase the traffic through them so much. Industrial buildings could be built on the Burnt Common site or at Slyfield. The proposed slip roads would bring vast numbers of cars and lorries through Send, Old Woking, Clandon and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the development at Garlick’s Arch because the site is covered in ancient woodland. Trees which existed in the 16th century would be endangered. Additionally this site is also at risk of flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/8071  Respondent: 10722049 / Richard Smith  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing to object to the Policy A43 change at Garlick’s Arch because of the extra traffic that it will generate by building 400 new homes.

I travel past that area every day into Ripley and already the traffic build up can sometimes come right back to the new Waitrose on the roundabout. Ideally there should be a slip road made so that traffic coming from the south side of Ripley, Send and Clandon etc can go onto the A3 to London without having to pass through Ripley.

Also the land is Green Belt and for some reason Send is taking on a lot of development of new homes without the amenities to support it. It is already difficult to get Doctor’s appointments and the schools are full. I don’t understand why Guildford Borough Council feels it can build on Green Belt land when many of the residents, like myself, live here due to the countryside feel of the area and the village feel of Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to huge development at Garlick's Arch, Burnt Common. This is another development just slipped in without the necessary consultation. The roads around the area are already blocked during rush hour periods and they are not built to cope with the amount of heavy traffic already using them. Apart from a major junction at Burnt Common there does not appear to be any further improvement to the roads in the area. The A3 is already grid locked North and South Daily.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to policy A43 change at Garlicks' Arch. As it ignores all previous objections. There is no demand for travellers plots in this area. You will destroy ancient woodland which we as a county are supposed to be preserving. It is Green belt and is a flood two zone allocation. Where is all the traffic going to go.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7545  Respondent: 10723553 / Judith Pound  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO site A43 Garlick’s Arch – the surrounding roads do not have the capacity for the associated increased traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A43 change at Garlick's Arch because it is blatant destruction of Green Belt land, where there are no exceptional circumstances for this development to be allowed. It will mean that the villages of Ripley and Send are virtually joined up, which goes against the whole purpose of the Green Belt, which is supposed to be retained. The number of houses proposed is excessive and it will create massive levels of traffic that the roads cannot cope with (particularly with the ever increasing incidents on the A3 that cause traffic from there to divert to our local roads). The huge numbers of objections already made by local people have clearly not been listened to. Also this area floods easily and this would be made worse by building on it as a great deal of natural soakaway ability would be lost and in addition the land is contaminated with lead shot.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the development at Garlick’s Arch because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. It was a very late inclusion into the 2016 plan. No prior consultation was held with the residents of Send Marsh. This will increase the village by 25% and is not needed.

I object that ancient woodland dating back to the 16th century will be removed. How can you even contemplate cutting these down!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

I object to this Policy A43 at Garlick’s Arch because:

- The Local Plan H1 states that “Gipsy, Traveller or Travelling Showpeople accommodation should be provided on development sites of 500 houses or more where there remains an identified need”. Send has been disproportionately allocated 2 traveller pitches as well as all 8 showpeople plots, identified as needed in the borough until 2034. The developments of over 1500 houses at Gosden Hill and Wisley are only allocated 8 pitches apiece during the same period.
- This Policy ignores all the thousands of previous objections made by local people.
- The area is currently a floodZone 2 allocation and really is subject to frequent flooding.
- It will generate excessive traffic that will gridlock the local roads of Send and Ripley.

Abide by the already agreed Policy A43 page 144

The proposed changes to the agreed Policy are not legally compliant, neither are they sound and nor do they comply with the duty to co-operate.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A43

I write to object to plans in the above policy because again you have not listened to the hundreds of objections put to you last year, and you have increased the number of houses and included six sites for travelling showpeople. You have shown no evidence of the need for these sites on a beautiful Green Belt location and where you are required to show exceptional circumstances. This is gross over development of our village with an excessive number of homes for a village. There is beautiful ancient woodland at the site which has been there since the time of Elizabeth 1 and will join up Ripley and Send thereby defeating the purpose of the Green Belt. An additional 400 houses will cripple the roads around Ripley and Send and contaminate surrounding homes with noxious fumes from congested traffic. I am informed that there is lead shot accumulated over 50 years at the site which, as a parent, I would not want my children to live with.

• I object to the Policy A43 change at Garlick’s Arch
• This also ignores the thousands of previous objections made by local people
• There is no proven demand for ‘Travelling Showpeople Plots’
• It is sited on ancient woodland going back to Elizabethan Times
• It is a flood zone 2 allocation, and very prone to flooding in the winter months
• There will be an increase of an estimated 1000 vehicles trying to access the A3 and the A247. This increase in traffic would be linked to the proposed building plan for Wisley Airfield (600 homes +) creating a massive increase is the volume of traffic using the A3.
• Has any consideration been given to the number of fatal and serious accidents occurring regularly on the A3. If we were looking at the same amount of murders in the area what would be the result

The Garlick's Arch Policy A43, Policy A44 1.9ha. Policy 42. I object with the following points on these policies:

1. The building on the Green Belt at Send at Garlick's Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded. Garlick's Arch has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

2. The development at Garlick's Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks' notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

3. The proposed industrial development of7,000 sq mat Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

4. To building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the new marina will generate heavy traffic too. The lane and the main A247 road cannot take any more.

5. To the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented.
6. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

In the publication 'About Guildford' it is stated that 'less than 700 homes per year will be built in total'. Why are most of these homes being built in the Send Area? There are brown field sites which could be developed elsewhere, rather than in our beautiful Green Belt area around Send.

Why has Garlick's Arch suddenly been included at the last minute in the Development Plan? This doesn't match with the statement 'Only 1.6% of greenfield land will be taken and allocated for development' (again in the publication 'About Guildford'). No time has been given for adequate consultation here and it has not been included in previous consultations.

Is all the greenfield land coming from the Send and Ripley area?

The NPPF prevents the merging of settlements without any exceptions. Why has this been proposed?

I object to the proposed development of Land at Garlick's Arch, Burnt Common.

Policy A43

| Comment ID: PSLPS16/3991  Respondent: 10728321 / Michael Randles  Agent: |
| Document: | Proposed Submission Local Plan: strategy and sites 2016 / Policy A43 |
| **Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )** |
| I OBJECT TO the 400 houses proposed at Garlick's Arch and Industrial site. This seems an excessive number of houses (plus the others already mentioned). The doctors' surgery is working to full capacity and appointments are a problem already. The new school being built will take the pupils from the present two schools but cannot possibly cope with the great number of children expected from so many new homes. This site is also new and was not included in the Regulation 18 draft and has NOT been consulted upon previously. The site is Green Belt permanently protected by the NPPF. Ancient trees c1600 AD would be endangered. Large industrial space can be provided at Slyfield. |
| In conclusion, some new affordable homes would be welcomed in Send but the huge numbers proposed would overwhelm the already stretched infrastructure available, whether surgery, schools or narrow roads which would become completely gridlocked. |
| **What changes (2016)/further amendments (2017) do you suggest should be made to the document?** |
| **Attached documents:** |

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object:

1. The land is green belt It is a rural area and has not previously been built on.
2. The large number of houses would put pressure on already very overcrowded local roads
3. During rush hour the roads around Burntcommon already have extremely lengthy traffic queues. A new interchange for the A3 would make traffic problems much worse.
4. This is an important conservation area and contains areas of ancient woodland.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3031  Respondent: 10729281 / Richard Croxford  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed development at Gatlicks Arch (policy e 3). This site was included very late into the proposals, and I believe that the commercial needs-if true-could be catered for elsewhere (such as near Slyfield), The proposed amount of residential dwellings is excessive, and the site is clearly within the current Green Belt.

I object to the proposal for a new 4-way entry/exit slip-road (for A3 access) at Burnt Common (policy A43a). This would place enormous pressure on local roads and highways, and Send resident's-have already suffered a great deal in recent times with traffic congestion. Many residents fear that Send Road will become bogged down with additional traffic as a result of the various proposals (Wisley airfield, Garlick’ s Arch, Merrow and Burpham).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to policy A43 involving Garlick’s Arch (38ha), Burnt Common (400 houses and 7000 sq. m. of industrial and warehousing). This site is new and was not included in Regulation 18! It is Green Belt under NPPF protection.

I object that GBC have shown little sign of common decency and humanity towards us, the citizens of Send who pay rates to GBC which should be remembered!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4007  Respondent: 10729537 / Julia Osborn  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 policy change to include six travellers plots as the inclusion of traveller pitches is unnecessary according to the level set within the plan, Policy H1, 4.2.24 states that travel accommodation is required in developments of 500 homes or more to provide mixed communities; and Send has already been designated for travellers pitches in the 2016 draft of the Plan.

I also reiterate my objection in 2016 to A43, Land at Garlick’s Arch that this is overdevelopment. The Settlement Hierarchy 2014 classified Send as a large village but representations on behalf of Send Parish Council by Tibbalds Urban Planning and Design (2016) paragraphs 3.1 to 3.4 set out that this classification of Send as a large village only occurred due to the proximity if the Send Services to Burnt Common. As stated in paragraph 3.2 of Tibbalds (2016) submission has this not be the case then Send would have been classified a ‘Medium’ village and medium villages are “unsuitable for substantial growth but are capable of taking appropriate residential infill and development to meet local needs."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

It will join up Ripley and Send.

It is a flood zone.

It is ignoring thousands of previous objections.

There is no proven need and demand for traveller showpeople plots in this area.

The increased number of homes is excessive.

It is a clear failure of proper planning process.

Area has been targeted disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4157  Respondent: 10731265 / Liz Turner  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Garlick's Arch (policy A43)

This proposal to build 400 houses and 7,000 sq.m employment space (light industrial/storage, warehousing) on Green Belt land which lies outside the Send Marsh Burnt Common village boundary includes ancient woodland which provides a refuge for deer and other wildlife. This site has never been proposed as a Potential Development Area before and in fact your Council refused an application by 'Oldlands' to build 25 houses on part of this site just 2 years ago.

Development here would be totally inappropriate. It is Green Belt open farmland and the village has no infrastructure to support it. Send Marsh/Burnt Common has one just shop (Waitrose), no doctors' surgery, no schools and the local roads are already congested. The housing, proposal alone would add 960 to the existing population of 2,341, an increase of 41% and would lead to at least an extra 800 cars on our crowded roads.

The proposed light industrial/storage facility is totally inappropriate and the whole development would destroy the village's demarcation from Ripley, creating urban sprawl.
In my view, this late and very major change to the Local Plan proposals has resulted in a completely new Plan and has rendered the previous consultation worthless.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Secondly, Guildford Borough Council have not provided any evidence for the need of such a huge number of houses to be built in the area.

Thirdly, the former revised Local Plan put forward earlier this summer made a modest provision for housing and industrial development at Burnt Common on what is more or less a brown field site. I object to the current proposal to develop the Garlick's Arch site with 400 houses and industrial space. There is ancient woodland on this site which would be affected even if it were not built over. Industrial units would not provide job opportunities for local people but bring further traffic into the area including heavy vehicles. The building of this volume of housing would increase the volume of traffic on all the surrounding roads which are already hopelessly congested especially during peak hours. The stream which runs across this site and under the Portsmouth Road has flooded on at least two occasions since we have lived in the area. The local infrastructure cannot accommodate the increase in the number of inhabitants in local schools, the provision of medical care or shops.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Policy A43 change at Garlick's Arch as this will cause over development of Send village. The number of homes is excessive and it ignores all previous concerns raised with regard to the effect on the local infrastructure. It ignores the preservation of ancient woodland and the green buffer this site creates between the current residential area and the busy A3 road. It also ignores the flooding which occurs from the stream.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A34 Garlick’s Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

2. I object to the proposed new interchange onto the A3 at Burnt Common because it will cause severe congestion in Send and adjacent areas which are already very busy and I am not convinced it is needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4. I object to the development at Garlick's Arch for 400 houses and industrial development because it was so suddenly proposed by Guildford Borough Council, without following the accepted guidelines. It is also a site with ancient woodland which should be protected at all cost.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3867  Respondent: 10732193 / Leslie Bowerman  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object in particular to the proposal to build on Green Belt land in Send and Ripley at Garlick's Arch. It is not justified by any special circumstances or evidence of demand. There is absolutely no way that the building of some 400 houses and the allocation of 7,000 square metres of industrial land at Garlick's Arch can be justified, especially when there is brownfield space nearby and at the Slyfield industrial estate. This site is inappropriate because public transport there is wholly inadequate. It is liable to frequent flooding as happened again only recently. The Environment Agency has assessed the site as being at high risk of flooding. It has Ancient Woodland, including more than 80 ancient oak trees, and much wildlife. It would change the area from rural or at least semi-rural to suburban. There are no plans to improve local schools, medical facilities or utilities to cope with the extra population. Traffic would be virtually impossible both as there are already considerable delays on the road into Ripley, on the Guildford by-pass as is well-known, and along Send Road even without the imminent combining of both the present Send Schools. The proposal to build 400 houses at Garlick's Arch would double the number of houses in this area and thus alter very much for the worse the nature of this historic area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2414  Respondent: 10732193 / Leslie Bowerman  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object because the proposal ignores all the thousands of objections made by local people and makes things much worse by including even more houses, which looks like a punishment of local people having the temerity to object.

I object because there is no proven demand for travelling show-people in this location.

I object because this site is beautiful Green Belt land and there are no exceptional circumstances to merit removing this protection.

I object because it is grossly excessive development of our village and the number of houses proposed is overwhelmingly too many.

I object because this is a site of wonderful ancient woodland that dates back to medieval times.

I object because this proposal will connect Ripley and Send and defeat the key purpose of the Belt.
I object because the site often floods and is currently a Flood Zone 2 allocation.

I object because the site is contaminated with lead shot which has been accumulating for 50 years.

I object because the enormous amount of traffic which will be generated by this proposal will catastrophically clog up the roads of both Send and Ripley, many of which can barely take two lines of traffic. It will also make the clogging up of the nearby Guildford By-pass disastrously worse. One wonders whether the proposers of this policy ever use the by-pass, particularly travelling south, when bottle-necking can extend right to Burpham even on an ordinary weekday.

I object because potential obrectors have never been shown the figures on which the proposed number of additional houses is based and which can only be of benefit to those who stand to profit from such proposals. Justice must not only be done but must be visibly and manifestly be seen to be done, which is not possible without seeing the figures on which the proposal is based.

I would like to register my objection to the final draft local plan.

I would like my objection to be seen by the Planning Inspector.

Removing Send and Ripley from GREENBELT would be disastrous for communities and nature. Policy A43 at Garlick's Arch in particular must be rejected.

The boundaries between Ripley - Send - Woking - Guildford have been straining for some time but there are tiny pockets of GREENBELT between them that just about keep precious village life and conservation of our flora and fauna alive.
The policy A43 would demolish this - and to hold the responsibility for this is a great burden - I urge you to be strong and sensible and protect the history and nature and soul of our community.

Precious woodland and wildlife would be lost forever. The traffic congestion is already very difficult in peak hours - there are a large number of elderly people and families with young children in the area. Giving permission for this proposal would not only endanger the lives of residents, but ruin the village communities of Ripley and Send and Burnt Common.

The noise of traffic from A3 already intrusive but with a new interchange it would be unbearable and not healthy to live with.

If any warehousing is really necessary then Slyfield is the much more logical option.

Garlick's Arch contains ancient woodland and rare and precious wildlife. Nesting birds not commonly seen in the South East. We have flora and fauna to be proud of and it is ours and your duty to protect it. To keep this community safe. There is neither the need nor infrastructure to support a housing development of this magnitude.

GBC have not been honest and some council members downright underhand.

I would certainly question the motives and morality of Councillors Spooner in the proceedings as I know many people do.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I strongly object to the Policy A43 at Garlick's Arch. When the last policy was proposed, thousands of us objected and the Council have showed contempt for us by expanding the new proposal to include more homes, industrial warehousing and Travelling Showpeople plots. This greed and disrespect for residents and our precious Greenbelt is disgusting and I hope very much the planning inspector will reject their proposal.

Burnt Common and Garlick's Arch are beautiful permanent Green belt with ancient woodland and wonderful wildlife that we need to preserve for future generations.

The area is subject to flooding and proposal A43 will cause over development as the number of homes is quite excessive. It will generate excessive traffic that will block up the local roads of Send and Ripley.

I object to 400 houses and 7000 sq meters if industrial space at garlic field

It floods really badly and is covered by ancient woodland. There is no need to build an industrial site here when there are plenty of other sites in Guildford
e.g. Slyfield. There are plenty of brown field sites that can be built on therefore there is no need to build on Greenbelt. Also Guildford's housing requirements have been exaggerated but they won't disclose their calculations.

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

<tr>
<td>This land is part of the permanent Green Belt and no evidence of “exceptional circumstances” has been demonstrated which justify the change of use of greenbelt land. If I am wrong please advise me on the “exceptional circumstances” which exist. This area is subject to frequent flooding and is currently a flood zone 2 allocation. Historically it has existed as an ancient woodland since the time of Elizabeth 1. Are you suggesting that we totally disregard our English heritage for the sake of building homes on an area which already suffers from frequent flooding and for which there is no proven need for them to be built? Flooding is not only devastating for those it affects but has the knock on effect of additional costs to the local authority as well as insurance companies and it is the taxpayer who ends up footing the bill. This area is already overloaded by traffic and the additional homes and sites which are proposed will only add to traffic congestion and block up even further the roads of Send and Ripey. I require to see the evidence that indicates that there is a demand for Travelling Showpeople plots in this location.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The addition of 400 homes will seriously cause over-development of the villages of Ripley and Send, in effect joining them and defeating the key purpose of the green belt. The issue also remains of the inability of the current infrastructure i.e. schools, GP’s and hospitals to cope with this influx of additional people.</td>

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is definitely not required in terms of housing need either for the village or the borough. So what are the justifications?

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available. Please explain.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding. Please do not destroy 16th century trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed building of 400 houses and 7000 sq metres of industrial space at Garlick's Arch, opposite Send Marsh Road. If such industrial areas are necessary then this should be extension of the industrial space at Slyfield not in Send. Guildford council has also refused to disclose their calculations for the current demand for extra housing and I believe these 400 houses are not an essential requirement for this specific area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 change at Garlick’s Arch because this area of Green Belt is incredibly beautiful, consisting of ancient woodland that existed at the time of Elizabeth 1. The fundamental aim of green belt policy is to ‘prevent urban sprawl by keeping land permanently open, and consequently the most important attribute of green belts is their openness’. This area separates our two villages and therefore should be protected. I feel the objections from Send and Ripley residents are just being ignored again!! Furthermore, there is no evidence that Travelling Showpeople plots are needed in this area. Such development will only increase traffic around our village that is currently, during various times of the day, incredibly busy already. It is fundamentally wrong for our village to have to carry the burden of such an excessive number of houses which would only lead to one large conurbation.

Policy A43 Garlic Arch Development - 400 Houses etc

I object to the proposed plan and set out below some of the reasons. This is Green Belt and should remain so.

As set out in the *National Planning Policy Framework 2012, Sect 9.80*, Green Belt serves several purposes including:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from

There are no very special circumstances to allow such a development to take place on this site.

I fully endorse the Send Parish Council's response to this proposal.

Policy A43 Land at Garlick's Arch, Send.

Allocation - 400 Homes and 6 Travelling Showpeople Plots

I object to this policy and comment on the amendments only in this instance as requested (my previous comments from the 2016 consultation still apply).

I fail to see what exceptional circumstances exist to provide travelling showpeople such plots on Green Belt land and, coupled with the proposed homes allocation, create an urban sprawl in contravention of NPPF section 9.80.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the construction of 400 houses and industrial space at Garlick’s Arch opposite Send Marsh Road. This site floods and is covered by ancient woodland. If the site does not act as a natural flood plain the flood water will cause flooding in other residential areas. More houses will also mean more traffic congestion, more pressure on the Villages medical centre and more pressure on school places.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/180  Respondent: 10750593 / Jo Williams  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Once again I am compelled to write to you to raise objections regarding the local plan. I find it exasperating that I continuously have to raise objections to a local plan which demonstrates an absolute failure of a proper planning process. You have not made any attempt to mitigate and or amend the plan despite the significant volume of objections to the 2016 plan. Indeed Guildford Borough Council has made the situation even worse by combining proposals around Garlick’s Arch and Burnt common and not altering the proposals based on previous objections.

I object to the proposals to build 400 homes and 6 travelling show people plots on the land at Garlick’s Arch, Send Marsh, Policy A43, for the following reasons:

- Thousands of objections have been raised on this previously, this is in complete disregard to all previous objections
- There is no evidence of a demand to house travelling show people in this location,[Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]
- The land is in the Green Belt and no exceptional circumstances exist
- The number of homes is excessive ensuring complete over development of the village. There would be no definition of villages between Ripley & Send defeating the purpose of the Green Belt
- Infrastructure cannot support this. Traffic and pollution levels are already a major problem, schools and medical facilities, as required by law, are already over stretched
- The land is an ancient woodland that existed back in the reign of Elizabeth 1
- The area is subject to frequent flooding and is currently a flood zone 2 allocation, drainage remains substandard
- Due to local shooting facilities, the land is contaminated by lead shot

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy A43 (building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch). The site is covered by ancient woodland which must be protected and not destroyed for development purposes. The industrial space is not needed in this area. The housing proposal is excessive and brown field sites must be used as a first priority.

This proposal would create traffic congestion, pollution and an industrial area will generate unacceptable levels of heavy traffic through Send Village this would irrevocably damage the area and environment. Send must not become a Local Rural Centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. We object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch. No consultation took place on this, and GBC’s Green Belt & Countryside Report does not even cover Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY A43 Garlick's Arch

I object to the change of Policy A43 because it completely ignores the thousands of objections made by local residents to the previous draft local plan!

I object to the change of Policy A43 because the Green Belt was put in place to keep our villages, Ripley & Send, separate - this Policy defeats that purpose and there is no local need to build on this gorgeous Green Belt land of ours - and no exceptional circumstances apply.

I object to the change of Policy A43 because the number of homes is excessive and will cause over-development of the local area.

I object to the change of Policy A43 because the local infrastructure is already stretched to the limits, particularly local roads at rush hour.

I object to the change of Policy A43 because there are numerous environmental reasons why it is inappropriate, including: the area is ancient woodland, it floods frequently

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Site A43 Garlicks Arch

- Housing at this site would be on Greenbelt land.

- The potential increase from 400 houses at site A43 Garlicks Arch is extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon, and will cause coalescence of these villages.

- The inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and there is no identified need within the Local Plan documentation. The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and so is out of scale with the proposed development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act...
2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to Policy A43 changes at Garlicks Arch because:

1. No exceptional circumstances exist to lose Green Belt Land.
2. This wood dates from the time of Elizabeth 1st and should not be lost in the time of Elizabeth 2nd.
3. No special circumstances exist to justify 400 homes and 6 travelling showpeople plots.
4. Valuable Green Belt land sustains village life, prides area of natural beauty and defines villages, we do not want to become suburbs of Guildford or Woking.
5. The traffic situation of key times is a major problem in both Send and Ripley. Such a massive development will increase the problem enormously.
6. There is no proof of such a large increase in demand for housing in the area.

Comment ID: PSLPS16/6017  Respondent: 10765249 / Andy & Sonja Freebody  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infant school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.
Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2094  Respondent: 10765249 / Andy & Sonja Freebody  Agent:
Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the surrounding villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4. I object to the inclusion of the land at Garlick’s Arch, Send Marsh / Burnt Common and Ripley (A43).

Garlick's Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2).

Central Government state clearly that housing need is not an exceptional circumstance.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I would like to raise my objection to the revised local plan:

- A43 Garlick’s Arch and the addition of 8 Travelling pitches, is there actually a requirement in the local area?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Document:    Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Secondly, I object to policy A43 for the change at Garlicks arch for the following reasons. One: There is no proven demand for travelling show people plots in this area. Two: It will join Ripley up with Send, defeating the purpose of greenbelt, losing any sense of the traditional villages. Three- It is subject to frequent flooding- this land needs to be there to prevent issues flooding other houses downstream of the river. Four- It will create excessive traffic. Over the last 20 years the traffic has increased dramatically. If it continues to increase the whole area will become a permanently gridlocked.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6513   Respondent: 10773441 / Barry Marshall   Agent:
Document:    Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.
It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I also object to the late addition to site A43 at Garlicks Arch Burnt common for development in the Guildford local plan. This is completely unacceptable. It has been submitted late without prior consultation and is simply catastrophic for the area. The proposal is on an unacceptable scale for Send and Ripley villages to remain sustainable. The idea that that access to the A3 would be permitted is a total disaster for the whole area, Send is a settlement predominantly based along the main road of the village – Send Road. If there was access to the A3 at Garlick’s Arch, Send Road would become intolerably congested, unhealthy and unsafe. The A247 already has Send and Clandon schools located dangerously alongside, increases in traffic would risk serious harm to our children. Also the proposal for development on this site is far too large for the area of Send and Ripley to sustain, it will remove ancient woodland within greenbelt and essentially merge the two distinct villages which is the entire essence of greenbelt. Furthermore the local facilities, including, roads, sewerage and school provision are entirely unable to sustain such a development. The proposed size of developments in the plan is incredible; given NPPF 9, “moving from a net loss of bio-diversity to achieving net gains for nature” and NPPF 14, “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole”

I OBJECT to Policy A43 and A43a on Garlick’s Arch.
The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Specific objections to Policy A43 and A43a: Garlick’s Arch / Burnt Common / North Facing Slip Roads:

The proposal is for 400 houses and 7,000 sq m of industrial and warehousing space. I object to this proposal on the basis of the following:

- This site has appeared very recently, it was not included in the Regulation 18 Draft and has not previously been consulted upon

- It falls within green belt permanently protected by the NPPF which prevents merging of settlements

- The site is particularly sensitive from a conservation stand point, as it has ancient woodland with trees dating back to the 16th century

- This will add significant traffic to the local road infrastructure around Send and Send Marsh; these roads are already heavily over loaded, and there is no space to widen given the residential surrounds

No amount of expert studies can replace personal experience; I urge anyone considering these proposals to try and travel on the A247 road through Send at peak times to see how impossible it already is to travel between the A3 and Woking. The B368 through Send Marsh is used as an alternative when the A247 is overloaded, and this will become the next constraint. The surrounding proposed developments such as Gosden Hill Farm will without doubt also want to use the slip road and increase traffic through these already constrained and overloaded village roads.

- Services such as doctors are already overloaded in the Send / Send Marsh / Ripley area. It is close to impossible to get a doctor’s appointment within a 3 – 4 day window at the Villages Medical Practice as it stands with current population; where has this been considered, what is the plan to provide services to this significant addition of people?

- Flood risk: Over recent years the flooding in Send Marsh has become progressively worse with changing weather conditions. As example I quote winter of 2013 / 2014. Adding such as significant amount of development can only make this situation more severe.

- Nature of the village will be forever changed; Send and Send Marsh will no longer be rural villages given the scale of this development.

If there is a need for more industrial space (which I still question particularly in light of Brexit), then why would this not be an extension of the existing Slyfield Industrial Estate?

I trust my objections will be considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

2) I object to the Policy A43 change at Garlick’s Arch because:

This again is an increase in number of houses and now inclusion of 6 Travelling Showpeople plots.

1. This is an area with prolific birds and wildlife
2. There is no proven demand for Travelling Showpeople plots in this location
3. It is beautiful permanent Green Belt and no “exceptional circumstances” have been stated or proven
4. Separation of villages is a key objective of the green belt. This development will join up Ripley and Send and defeat the key purpose of Green Belt.
5. It is subject to frequent flooding and is currently a flood zone 2 allocation; I personally experienced this during heavy rains on recent years where the entire area is left flooded for days afterward.
6. It will generate excessive traffic in an area that is already struggling to cope with the volume of cars on the road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2394  Respondent: 10775137 / Wendy Lodge  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

With regards to Policy A 43,t object to the fact that this new site at Garlick's Arch was not included in the Regulation 18 draft and so has not been consulted on previously. This is, surely, wrong. How can you justify this?

I object to the proposed development of land at Garlick's Arch for housing and industrial use. We actually need 800 new homes in Guildford although Guildford Borough Council have suggested an outrageous figure of 13,860. There is no need whatsoever to develop Green Belt land, which includes significantly important woodland, to build yet another 400 homes.

I object to the proposal for 7,000 square metres of industrial use and warehousing at Garlick's Arch. It is simply not required, as the ELNA 2015 shows an 80% reduction in employment floor space since the previous assessment. If there is a need in Guildford there are previously approved plans for industrial use at Slyfield where existing infrastructure can support the development. If the Garlick's Arch development went ahead this would include a new 4-way junction with the A3 at Burnt Common that Send Village simply couldn't cope with.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2406  Respondent: 10775137 / Wendy Lodge  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick's Arch because:

It ignores all the thousands of previous objections made by local people.

There is no proven demand for Travelling Showpeople plots in this location and Guildford has more than enough traveller plots.

It is beautiful permanent Green Belt and no “exceptional circumstances” exist to allow development on it. Almost every week in the media Government Ministers state that the Green Belt must be protected and only developed where overarchong need is proved and yet Guildford Borough Council seem determined to destroy this area of ancient woodland that existed at the time of Elizabeth 1.

It will cause over-development of our village and the number of homes is excessive. It will join up Ripley and Send and defeat the key purpose of Green Belt. It is subject to frequent flooding and is currently a flood zone 2 allocation. It is
contaminated by lead shot accumulated over fifty years. It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1054  Respondent: 10776033 / Prue Robinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the development at Garlick's Arch for 400 houses, which was sprung on the village at the last moment with only 2 weeks' notice and without any prior consultation. This has been quite disgraceful. Also this proposed development is simply not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq mat Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick's Arch because the site has particular conservation sensitivity since it is covered in ancient woodland. Trees which have existed since the 16th century would be endangered. The site is attractive open countryside and part of the permanent Green Belt, with is protected under the National Policy Framework. It also represents an unrestricted sprawl and goes against the purposes of the Green Belt which include the prevention of merging towns and settlements. Oh yes, and the site is also subject to flooding!

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Land at Garlick's Arch, Send Marsh, Policy A43
I object most strongly to the changes made to Policy A43
These are my reasons:
It appears from the changes you have made to the proposal for homes and Travelling Showpeople plots that you have totally ignored the tens of thousands of previsous objections made by local people. What exactly are the 'exceptional circumstances' you claim exist? Please would you clearly define these? Six Travelling Showpeople plots is excessive and unprecedented especially as there is no proven demand for any whatsoever in this location. Garlick's Arch is a permanent and lovely Green Belt piece of ancient woodland that has existed since the 16th century. Apart from the loss of this unique area of woodland and the fact the Ripley and Send will effectively be joined and therefore defeat the key purpose of Green Belt, this area is subject to frequent flooding and has been given a 'flood zone 2' allocation. Added to this high risk of flooding there is accumulated lead shot in this particular area and it is therefore contaminated. The revised plan for 400 homes will cause an immense over-development of our village - this number of new homes is excessive. Will our doctors' surgeries be able to cope with the demand from the proposed number of new residents or the local schools be
able to offer places for the children? Very importantly, the additional traffic that your proposed plans/amended plans
would generate would be excessive. There are noticeable rush hours here with to the M25 - I am sure plan would cause heavy
roads in the area at least stationary traffic and queues that stretch from Old Woking you must be aware of this current
situation. Your changed traffic for many hours each day and totally gridlock all the twice daily.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4962  
Respondent: 10780929 / Naren Nanda  
Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site
will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c),
general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly
acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from
the Plan and replaced with the Garlick's Arch site.

There was no proper c onsultation-in-relatlon to the inclusion of this site. Why was a brownfield site removed and
replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004,
which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for
this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all,so
there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services
in the area and no train station within reasonable walking distance it is impossible for any development on this site to
offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There
are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders
(Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the
woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The
development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The
Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services
such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/296  Respondent: 10781505 / Donna Joyce  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to you to voice my objection to the new revised local plan in my area, Policy A43 Garlicks Arch, Send Marsh.

I strongly object for the following reasons:

1. It seems that even thou there was huge outcry from local residents the last time this was proposed the council have blatantly ignored the feelings of the locals here who already have to deal on a daily basis with increased traffic issues, noise and pollution.
2. The council both at local level and Surrey county council cannot maintain the roads that exist already there is an accident waiting to happen at the end of Send Marsh road at the junction with The old Portsmouth road this junction is always busy every morning with increased traffic from a new development this situation will be even worse than it is already.
3. Send Marsh is a little development in its own right! A new development will merge us with Send on one side and Ripley on the other, We will lose our identity.
4. Ancient woodland CANNOT EVER EVER BE REPLACED!!!
5. Travellers! There are plenty of sites up and down the country that can accommodate Travelling show people ( if they actually still exist?). I see no reason for any Traveller plots to be made available, This to my mind is an excuse by the council to make provision for a Gypsy site.
6. I am sure that you hear on a daily basis about the squeeze on services, Well just to confirm if you need to see your GP it is true you do need to book your illness six weeks in advance,
7. I am also convinced that these homes will NOT BE AFFORDABLE TO THE AVERAGE PERSON! This is of course on Ripley's doorstep and we all know that it is more expensive than the average area with regard to property prices, Estate agents and builders will have a certain way of pushing up the prices.
8. Flooding in and around Ripley and all along The Send marsh road are a huge problem during spells of heavy and prolonged rainfall, I am quite sure that as with other developments throughout the years no thought or provision is made for our drain and sewer networks
9. All in All to go ahead with any of these proposals all up and down the A3 corridor would be a TOTAL DISASTER, not only for the already existing residents, but for wildlife, air quality, and general ease of life.
10. Send and Send Marsh and Ripley cannot take the extra strain and so I therefore ask that this objection be taken into accout!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.
It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

**I OBJECT** to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**Comment ID:** pslp172/1574  **Respondent:** 10786113 / John Creasey  **Agent:**

**Document:**  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I also OBJECT TO POLICY A43 change at Garlicks Arch because of the number of homes to be built despite previous objections. 6 plots for travelling show people is totally unnecessary as there is no proven demand. It will change the nature of Send and Ripley as two separate villages and will generate excessive amounts of traffic.

It is a flood risk area and is contaminated by lead shot.

</table>
The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

1. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever.

2. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches. There is no proven demand for travelling show people plots in this location. The allocation of 28.9 ha is an excessive land grab into the Green Belt.

3. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

4. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

5. Local roads through the villages of Ripley, Send and Clandon already suffer from congestion and the lack of road infrastructure (Policy I1). An example of severe congestion for much of the day is the Newark Road and
Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The Plan does not provide an achievable strategy for improving capacity on these local roads.

6. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration of the road surfaces and additional parking problems.

7. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians and also bicycles, which have become a serious traffic issue since the Olympics.

8. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

9. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

10. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes.

11. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the new interchange on the A3 with Burnt Common because Send would have to take the traffic from the proposed 2000 houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm. Much of this traffic to and from the A3, M25, Woking and Guildford would go through Send. Send Barns Lane and Send Road are already overloaded, and quite often gridlocked during the morning and evening peak hours. This is would make this road impossible and would increase pollution and noise levels, which are already excessive. This must be avoided.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick's Arch, opposite Send Marsh Road. The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. Guildford's housing needs have been grossly exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 Change at Garlick's Arch because:

1. a) It ignores all the thousands of previous objections made by local people
1. b) It will generate excessive traffic that will block the local roads in Send and Ripley
1. c) There is no proven demand for Travelling Showpeople plots on this location
1. d) It will cause over development of our village and the number of homes is excessive
1. e) It is a beautiful permanent Green Belt and no "exceptional circumstances" exist
1. f) It will join Ripley up with Send and defeat the object of the Green Belt
1. g) It is an exquisite ancient woodland that existed in the time of Elizabeth 1
1. h) It is subject to frequent flooding and is currently in a flood zone 2 allocation
1. i) The land has been contaminated by lead shot for over fifty years

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1183  Respondent: 10798977 / Ian Brooks  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch’

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

Moreover, the inclusion of the site A55 Burt Common, removes the need for A43 Garlick’s Arch. The Borough Council’s reasons for including Garlick’s Arch A43 in the 2016 Plan were:

a) The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [than the Burnt Common site did ”
b) The site [A43] provides the employmentfloorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore the Borough Council is not following their own guidelines and objectives. There is no justification for this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7937  Respondent: 10799425 / Guildford Greenbelt Group (Susan Parker)  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We object to policy A43 Garlick’s Arch

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport.

Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. We object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt.

Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached. We object to the development at Garlick’s Arch because of flood risk.

The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well WE are aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-
considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute health." The significant level of development being proposed, particularly in the north east of the borough will lead to "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and only make the situations worse. We object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will network.

Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road during the plan period will stretch the police services further and is unsustainable. We object due to the congestion that existing health services. Police services are seeing funding reduced. The development of the proposed 13,860 homes Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity these services should mean no development of the Garlick’s Arch site.

Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. We object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. We have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways. Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services. Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable. We object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2).

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. We have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network.

The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse. We object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute
in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health. We object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2). It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We are writing to object to the proposed development at Garlicks Arch in Burnt Common policy A43. This proposal was added at very late notice after previously being assured by the council leader there would be no significant new changes to the DLP in Send. The use of regulation 19 further adds to the betrayal. This enormous new proposal must require a full consultation under regulation 19. The 2014 proposal for 430 houses was rightly reduced to 185 in April 2016. This late and hasty attempt to push through this plan increases the number to 485! A totally excessive and unneeded number based on inflated projections of population growth by GBC. The proposed light industrial units can easily be accommodated at Slyfield and the proposed 4 way junction to the A3 will cause traffic gridlock, noise and air pollution for local residents. All this without yet mentioning this 100 acre site is GREEN BELT (a word no longer found in the GBCs dictionary). With prime agricultural land, rare enough in Surrey, and ancient 16th century protected woodland within the boundary, this land must be saved. There is a brook running through the middle of the site essential for drainage and the area is prone to flooding already. The site prevents urban sprawl between Ripley and Send vitally important. The villages medical center already extremely busy and local schools cannot cope with the 25% population growth this plan will bring to our village. We have received emails from relevant ministers and Sir Paul Beresford stating government policy is to protect the Green Belt and listen to local residents in these matters. Why does GBC neither protect or listen to those it is elected to represent. Conservative Councillors ran for election on a protecting the Green Belt, now elected they stab us in the back.

I object to policy a43 garlick's arch;

once again, thousands of previous objections have been ignored and again there is no demand for so many houses or travelling show peoples plots at this location. This land is permanent green belt, and no exceptional circumstances exist
for development. It is prime agricultural land and contains ancient woodland that has existed since tudor times. Again, this area is prone to frequent flooding and contaminated by lead shots accumulated over 50 years. Living in Burntcommon Lane, we will be massively effected by this excessive development and planned new junction to the a3, massively increasing traffic in our area. Once again, this is green belt land that should not be built on, this will also join send and ripley into one continuous inhabited area, defeating the purpose of the green belt in seperating our villages.

Land at Garlick’s Arch, Send Marsh, Policy A43.

Now 400 homes and 6 Travelling Showpeople plots

I object to the Policy A43 change at Garlick’s Arch because:

• It ignores all the thousands of previous objections made by local people

• There is no proven demand for Travelling Showpeople plots in this location

• It is beautiful permanent Green Belt and no “exceptional circumstances” exist

• It will cause over-development of our village and the number of homes is excessive

• It is exquisite ancient woodland that existed at the time of Elizabeth 1

• It will join up Ripley and Send and defeat the key purpose of Green Belt

• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over fifty years
• It will generate excessive traffic that will block up the local roads of Send and Ripley

Comment ID: pslp172/1683  Respondent: 10803009 / M Robson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 proposed change at Garlick's Arch because:

• The amended plan ignores the thousands of previous objections from the local population.
• There is no proven demand for Travelling Showpeople plots in this location in the amended plan
• This area is a beautiful Green Belt area with many old mature trees. No exceptional circumstances exist.
• An area where wildlife and plants can grow preserving our heritage.
• It is land between the A3 and the village and protects the local residents from increasing noise and pollution from the A3.
• Green Belt is part of our village setting, it is what makes our village a village. Send residents live in a village as this is the setting Send offers: living close to protected Green Belt and not in a town.
• 400 homes and 6 Travelling showpeople plots will impact the village character of Send. Woking and Guildford are nearby to offer town amenities if required. The proposed 400 homes and 6 Travelling Showpeople plots are an excessive increase to Send / Ripley and this will result in overpopulation with more traffic impacting local roads and village.
• The area around London Road / Roundabout at Shell Garage / Portsmouth Road / A247, already has high levels of traffic in all directions, not just at peak times in the morning / evening but throughout the day / night.
• This area is particularly congested between 7:15 - 9:00 AM and 16:30 - 18:30 mainly by passing through traffic, impacting the local area. These roads serve as an alternative to the A3 leading to this congestion. Often the traffic is standing still during these hours.
• The proposed 400 homes and 6 Travelling Showpeople plots will impact traffic on these roads. These roads / junctions are unable to cope with more traffic. This will require more funding to rectify and impact locals with ongoing road works.
• The proposed 400 homes and 6 Travelling Showpeople plots will impact the local schools - the local Send school has just been extended and does not have sufficient capacity for more. This will require more local funding.
• The proposed 400 homes and 6 Travelling Showpeople plots will impact healthcare. The Villages Medical Centre does not have sufficient capacity at present, let alone for a substantial increase in residents. This will require more local funding.
• The proposed 400 homes and 6 Travelling Showpeople plots will impact ground pollution. Wildlife and flora are impacted. As the land is so near the A3 health for residents could be affected by asthma etc.
• The proposed 400 homes and 6 Travelling Showpeople plots will impact the flooding situation in the area. The area is already suffering from flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick’s Arch is and should be protected from development as Green Belt. There are no exceptional circumstances which justify its removal from the Green Belt (Policy P2). Central Government states quite clearly that housing need is not an exceptional circumstance.

The Plan states its preference to use previously developed land, but GBC has removed a brownfield site at Burnt Common and replaced it with Garlick’s Arch.

How can GBC justify not including this large brownfield site? This area is not suitable for large scale development due to poor transport provisions,

a lack of school places, medical facilities and utilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43) when there is an existing industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. This site was removed from the Plan without any reasoning. This again shows a lack of foresight and total disregard for the local community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/6065  Respondent: 10805537 / Robert Mote  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Garlick’s Arch has previously been protected from development as Green Belt, and there does not appear to be any justified exceptional circumstances which allow for the removal of this land from the Green Belt.

Last minute The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a
Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency (see objection 4.). There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I object to the Policy A43 change at Garlick’s Arch because:
• It ignores all the thousands of previous objections made by local people
• There is no proven demand for Travelling Showpeople plots in this location
• It is beautiful permanent Green Belt and no "exceptional circumstances" exist
• It will cause over-development of our village, with the proposed 400 additional homes being excessive
• It is exquisite ancient woodland that existed at the time of Elizabeth 1 – when its gone its "gone" for good, and the Council has an obligation to preserve and protect for future generations
• It will join up Ripley and Send, thereby further eroding our separate identities, and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over fifty years
• It will generate excessive traffic that will block up the local roads of Send and Ripley. The traffic at peak times is already excessive, and is organically getting worse even before any development
• Other infrastructure will also be placed under excessive strain – from medical facilities to schools, as well as power, water and sewage – all of which have shown signs of strain in recent years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. It has ignored thousands of objections about Roads and Schools the school situation getting worse this summer many NOT GETTING ANY OF THE SIX SCHOOLS APPLIED FOR this year.

1. Since when has there been a demand for Travelling Showpeople the heavy traffic this will bring through our village small roads many places it is impossible for two large vehicles to pass.

1. This is a working greenbelt land there are a lot more brown land available also gives work to people if you get rid of all greenery between villages it will become a concrete jungle and grind to a halt on our roads.

1. We will be destroying our history as this ancient woodland that has been there since Elizabeth 1.

1. It has overhead cables which I believe is dangerous to build under plus it is prone to flooding.

6. The extra traffic will bring our small roads to a standstill as there is no room for widening and as pointed out already there are places two large vehicle can't pass

7. As for an on off access to the A3 it is on a bend and will cause many accidents that is the the reason Burnt Common Lane was blocked off many years ago

8. The A3 was built to bypass our villages and help to relieve us of this congestion this will be going backwards and build this excessive amount of houses we will come to a stand still .

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Now on to A43 Garlicks Arch

I object to the proposal to build 400 homes & 6 Travellers plots.

For starters, I say Travellers and I MEAN travellers - [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]. Dont try and dissuade me from this idea, I have lived in this area since 1965 and several times travellers have had to be evicted from the locality.[Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature].

Now, 400 homes??? Where are all their vehicles going to be able to access the main roads, A3 and Portsmouth Road?

Where are they going to be able to sign on at a medical centre? This is stretched at present serving existing patients. Where are their children going to school? Send has a very nice new school, able to cope with children from the ages of 5 - 11 - EXISTING NUMBERS. Where do you propose the 400 new homes children learn?

All the above building is planned on the GREEN BELT which goes against all the previous promises to keep England Green.

|--------------------------|----------------------------------|
| **Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43 |
| **Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )** |
| **POLICY A43 AND A43a - Garlick's Arch** |
I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (88). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour, no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The addition of north facing ramps to the A3 at Burnt Common would have an enormous impact on local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

C.ii. Policy A43 Garlick’s Arch

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. The allocation of 28.9 ha is an excessive land grab into the Green Belt.
4. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
5. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
6. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
7. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
8. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
9. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure. Our villages are already suffering from severe congestion for much of the day. The proposed development under the plan will cause greater congestion in and around our villages.
10. Many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
11. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

12. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends: hundreds of cyclists pass through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

13. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

14. I object to the lack of proper infrastructure planning for sites. Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

15. Despite the Garlick’s Arch site being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

16. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Any further development without funding will place further stress upon existing health services.

17. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). I have considerable concerns that development of the large residential sites identified at Wisley Airfield, Garlick’s Arch and Gosden Hill will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

18. I object on the grounds of poor air quality. The significant level of development being proposed will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

19. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley. Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

20. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the changes in Policy A43 at Garlick's Arch because there is no proven demand for Travelling Showpeople plots at this location. It is beautiful permanent Green Belt containing ancient woodland, some of which has been around since the time of Elizabeth 1st. It is also subject to frequent flooding & is currently a flood zone 2 allocation. There are NO exceptional circumstances to build on it & it's development would defeat the key purpose of the Green Belt & effectively join up Ripley & Send. Together with the 400 proposed new homes on this site, 6 plots for traveling showpeople & their associated large vehicles will generate excessive traffic & will cause total gridlock in our area. It also does not take in to account the inadequate infrastructure of roads, schools & medical facilities, as required by law!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick's Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no "exceptional circumstances" exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley.

I object mainly about the building on the land known as A43 Garlicks Arch site area. This area is some fifteen to eighteen feet above Sendmarsh. At this moment the heavy rain is soaking into the fields. When its all concreted the water will obviously run down to Send Marsh and create a flooded area. Approximately 2 to 3 years ago. Over 1 million pounds was spent to avoid a flood, even with the fields taken so much of the water. What will happen when the fields become concrete? Surely we pay our rates and taxes to keep our lively hood safe.

Policy A43 I object to the land at Garlick's Arch designated for 400 houses. This site was not in the Regulation 18 draft and has not been consulted upon. The industrial development is not required and should be at Slyfield. The additional traffic resulting from such a development would increase the traffic on Send Road and Ripley which is already gridlocked at certain times of the day as is the A3. Thorough research and consultation would prove this site as impossible.

Please find attached photos taken of the floods at Garlick's Arch in November 2012. This is a recognised flood plain which drains down into Send Marsh. Hence the name Marsh. I object to the planning proposals for housing and industrial sites because of the unsuitability of the land and also because of the traffic which would be generated on already congested roads. An added factor would be that future purchasers would not be able to get cover for flood risk.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the Green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Plan states the preference is to use of previously developed land. Why have GBC removed a brownfield site at Burnt Common and replaced it with Garlick’s Arch?

Garlick’s Arch is not appropriate because:

- There is no transport infrastructure
- There are no plans to improve local schools, medical or utilities to cope with the increased needs these new homes
- The site is liable to flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.

I object to the employment strategy and impact at Garlick’s Arch

There is no need for new industrial sites at Garlick’s Arch. There is an existing brownfield industrial site at Burnt Common that could easily house the 7,000 sq m proposed. Why was this site was removed from the Plan without any reason?

I object to the lack of proper infrastructure planning for sites

The Plan does not identify adequate infrastructure improvements to support the scale of development, especially at Garlick’s Arch which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors, hospitals etc. are already at capacity. It is already extremely difficult to get a GP appointment in the local surgeries without a long wait.

Are there plans to improve the capability of the emergency services, police, ambulance, fire brigade to cover the extra houses in the north east of the borough?

I wish my objections to be taken into consideration and that the Plan is amended.

1. The development at Site A43 Garlicks Arch would be on Green Belt land, and there is no identified or exceptional need within the Local Plan documentation.
2. The potential of an increase from a minimum 400 houses up to a possible 650 at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause
merger of these villages. Villages should remain individual and not be merged into one huge conurbation. Local facilities, doctors, schools etc. cannot cope with this increase. Have you tried getting an appointment with a GP recently.

3. Section 4.2.22 of the Plan states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” So why do 75% of them have to be in Ripley? This is unbalanced and unfair.

4. Including six Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural area within the Green Belt and there is no identified need within the Local Plan. The allocation of six Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and therefore is out of scale with the proposed development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6015  Respondent: 10816993 / Jane Roberts  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infant school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.
Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I write to object to plans in the above policy because again you have not listened to the hundreds of objections put to you last year, and you have increased the number of houses and included six sites for travelling showpeople. You have shown no evidence of the need for these sites on a beautiful Green Belt location and where you are required to show exceptional circumstances. This is gross over development of our village with an excessive number of homes for a village. There is beautiful ancient woodland at the site which has been there since the time of Elizabeth 1 and will join up Ripley and Send thereby defeating the purpose of the Green Belt. An additional 400 houses will cripple the roads around Ripley and Send and contaminate surrounding homes with noxious fumes from congested traffic. I am informed that there is lead shot accumulated over 50 years at the site which, as a parent, I would not want my children to live with.

Comment ID: PSLPS16/517  Respondent: 10818529 / John Hales  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Furthermore, I fundamentally object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

I OBJECT TO the development at GARLICK ARCH.

This proposed development of 400 houses and an industrial area of 7000 sq m is on land that contains ancient woodland which is protected by the Green Belt.

IF it is found that the industrial area is required then, it should be at SLYFIELD, and not in a residential area.

The 400 houses, together with the new 4 way interchange and proposed developments at WISLEY and BURPHAM will increase the traffic on the Portsmouth road and Burnt common roundabout, which are already extremely busy most of the day.

These proposed developments will also result in more traffic using Send as the route to Woking. The roads through Send and Old Woking are extremely narrow with many parked cars which large vehicles have trouble navigating on their way through.

I wish to object most strongly to the proposed local plan proposals A42, A43, A43a A44 because:

Policy A43 30ha land at Garlicks Arch Burnt Common The proposal for an additional 400 homes outlined on the above policy is not required on top of the 13,860 homes already proposed for the borough. The above site is new and was not included on the Regulation 18 draft and has not been consulted on previously. The land in question is currently designated Green Belt and is permanently protected by the NPPF which prevents merging of settlements. The site has a particular conservation aspect as it is covered in ancient woodland dating from the 16th century and would be endangered by the scale of this development. The development of these sites will create a substantial increase in local traffic through Send and Ripley villages which are already very busy and congested at peak times.

The proposed industrial development of 7000sqm is not required as the latest employment Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft. If there is a need why can’t this be provided on the Slyfield or other industrial estates in the borough?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the Garlick’s Arch site.

This proposal has been included at a very late stage and has not been consulted upon previously. It was not included in the Regulation 18 draft.

There are no exceptional circumstances to warrant the development, but there are such circumstances which make it unacceptable, such as its conservation sensitivity, being covered with ancient woodland, with trees dating back to the 16th century.

According to the Land Needs Assessment 2015 (ELNA) required employment space has reduced by 80% since the previous draft plan, so is no need for the proposed 7000 sq m of industrial development on this site. If there is eventually such need, it should be situated at Slyfield.

I object to the Policy A43 Change at Garlick’s Arch because:

- It ignores all of the thousands of previous objections made by local people
- There is no proven demand for Travelling Show people plots in this location
- It is a beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will most certainly cause the over-development of our village and the number of homes is excessive
- It is an exquisite ancient woodland that has existed from the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of the Green Belt
- It is currently has a flood zone 2 allocation and is subject to frequent flooding
- It is contaminated by lead shot accumulated over 50 years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

POLICY A43-GARLICK’S ARCH, SEND MARSH

This proposed development of 400 houses and 6/8 Travellers’ Sites will cause the following problems:-

This is a designated Green Belt area and there have been many previous objections to any plans to build on this plot. It acts as a buffer both of noise and exhaust pollution between the A3 and the old A3 (Portsmouth Road between Send and Ripley).

This proposed development will cause the following problems:-

An approximation of at least an additional 600 cars-further pollution etc.

Where will the access to the development be?

The existing public transport system could not cope at peak times with a large increase in users.
Send Primary School has no further capacity for more pupils, and local secondary schools are in a similar position.

The Villages Medical Centre has no further capacity for more patients.

The current utilities infrastructure already struggles to meet the existing demands of the village (ie low water pressure, power ‘outs’) to upgrade the utilities to meet the increased demand will not only cause disruption to the existing customers, it will also further delay traffic.

**Attached documents:**

---

**Comment ID:** PSLPS16/6641  **Respondent:** 10822913 / Karen Dougherty  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There was no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

In addition, a recent Outline Planning Application (16/P/00783) for a smaller development on this site was refused by GBC for many of the above reasons, not least that the Green Belt should be protected. The report states that “there are no overriding reasons that would constitute very special circumstances to justify the harm that it would cause to the Green Belt”. How then can this much larger proposed development on the same site now be seriously considered as suitable?

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

I object because the stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

I object because this site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

I object because the site lies within the 400m to 5km zone of the Thames Basin Heaths Special Protection Area (TBHSPA). It has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site would have an adverse effect on the integrity of the Special Protection Area and will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4).
It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Having lived at this address for 24 years, I feel that in respect of Send and Ripley the change to the plan is disproportionate and out-of-keeping with the historical nature of this area.

2. I object. in the strongest possible terms, to the inclusion of 6 travelling showpeople plots. The clauses relating to the possibility to these plots subsequently being used for other development in the event of insufficient interest is indicative of the lack of evidence.

3. There is no evidence of a need for 6 Travelling showpeople lots. The clauses relating to the possibility of these plots subsequently being used for other development in the event of insufficient interest is indicative of the lack of evidence.

4. The inclusion of 6 Travelling showpeople plots is contentious and brutal in its application as it would result in the area being overdeveloped.

5. There is no evidence that 6 travelling showpeople plots would enhance the life of the local community and, furthermore, [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature].

6. This revision would impact adversely on my current quality of life.

I am, therefore, wholeheartedly against the change to Policy A43, and urge it to be rescinded please.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object in particular to the proposed development at Garlick’s Arch. The proposed 400 houses and commercial units would completely swamp existing local roads, schools & medical facilities. This would be further exacerbated by the proposed new interchange onto the A3 at Burnt Common that I also strongly object to. Current traffic levels are already too high around Burnt Common. Expanding the A3 junction would cause gridlock all day along A247 and Portsmouth Road. I also object to the Garlick’s Arch proposal on the grounds that it was not included in the previous consultation in 2014, and was added to the current proposed plan at very late notice, preventing proper due diligence from all interested parties. I also object to the proposed commercial development, as I believe it would make far more sense to expand the current commercial Slyfield area where I understand land is available

I object to the revised proposal for this plot as it will significantly eradicate the green belt area that delineates Ripley and Send, and create very significant increase in traffic from 400 homes that will totally swamp the existing modest local roads, especially Portsmouth Road and the A247. These roads are already under significant pressure from current population demands with frequent traffic jams delaying journeys to school and work. In addition, local infrastructure, especially schools and medical facilities will be swamped by the significant extra demand, requiring people to traffic further to reach such facilities in other areas, further exacerbating the traffic issues. I recognise the need for some new housing in the area, but 400 homes is totally disproportionate for this relatively small area.

A43 Garlicks Arch

The potential increase from 400 dwellings at this site is extremely harmful to the rural nature of the surrounding villages and will cause coalescence of these lovely villages and will have a huge impact on our already congested roads.

The inclusion of 6x Travellers plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and is not identified as a need within the Local Plan and is out of scale with the proposed development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing to let you know that I object to your plans to build on our green belt by putting over 400 houses and warehouses at Garlick Arch, Burnt Common, I moved to the village and paid a premium to do so, so I could bring my children up in a lovely village life and not bought up in a built up area, if I wanted to live in a built up area I would have moved to one! so having the green belt areas THAT SHOULD NOT BE BUILT ON, ensuring an nicer way of life. As it is living in the village has many more problems without adding more, the amount of traffic constantly cutting through, to reach the A3 makes going to work and driving to school a head ache, by you consenting more houses to be built, would be pure madness, the roads are just not built for the volume of traffic now let alone adding congestion to it, even by adding an extra road, I really can't see that, that will help. I'm sure you are aware, there are not enough schools in the area, it took me a long stressful time to secure school placements for my children, and getting into my local and nearest school was hell! By building 400 homes, you are looking at around 800 people plus moving in, where on earth do you think these children will go to school? As far as the GP surgery goes that is also at its limit, and getting an appointment to see your doctor is a joke, as there are not enough appointments to give out to the volume of people we have registered there now let alone adding another 800 plus people.

By sneaking these plans in at last minute is so out of order, this area SHOULD NOT BE REMOVED FROM THE GREEN BELT, and at the rate you are going both SEND & RIPLEY will no longer be villages, they will turn into a mass of houses and into a town, and that nobody wants to see happen, your plans for all these extra houses is NOT wanted or NEEDED.

These plans are new and they were not included in plans before, they are not needed on top of the 13,860 already proposed for the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch
The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlick's Arch as this development site is for 400 homes and therefore is not compliant with the minimum of 500 as stated in section 4.2.24 of the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch
The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages. Ripley village has already recently provided a number of new dwellings and re-development. Further proposed local development and loss of green belt will adversely affect the character and increase traffic to an already busy location (especially when traffic incidences occur on the A3 and M25)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3155  Respondent: 10828737 / Claire Dawson  Agent:

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch)

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were:
a) The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [ than the Burnt Common site did ]"
b) The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.
Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available and therefore there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the lack of proper infrastructure planning for sites (A43 and A42).

The Foreword to the plan by Paul Spooner includes on page 5: "We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan".

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this statement in respect of both A43 Garlick's Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and therefore should not go ahead.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch, opposite Send Marsh Road. The site floods and is covered by ancient woodland. The industrial space is not needed in this area; there is already an industrial area at Slyfield. Guildford’s housing requirements have been shown to be grossly exaggerated. With proper use of brownfields sites this Green Belt site is not required.

1. I object to the fact that this news it eat Garlick's Arch was not included in the Regulation 18 draft and so has not been consulted on previously. This is, surely, wrong.

I object to the proposed development of land at Garlick's Arch for housing and industrial use. We actually need 800 new homes in Guildford although GBC have suggested 13,860.

There is no need whatsoever to develop Green Belt land, which includes significantly important woodland, to build yet another 400 homes.

I object to the proposal for 7,000 sq m of industrial and warehousing at Garlick's Arch. It is simply not needed, as the ELNA 2015 shows an 80% reduction in employment floor space since the previous assessment. If there is a need in
Guildford there are previously approved plans for industrial use at Slyfieid where existing infrastructure can support development. If the Garlick's Arch development went ahead this would include a new 4-way junction with the A3 at Burnt Common that Send simply couldn't cope with.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to plans for a 4-way interchange at Burnt Common for several reasons. There is no need to build over Green Belt land to provide this interchange. If this junction was developed it would result in a huge increase in traffic through Send on the A247. The road is already struggling with traffic at peak times and this is only going to get worse when the new schools open in Send Barns lane. Increased traffic through the village will probably result in calls by groups to restrict parking to allow traffic flow, further implying on residents of Send and detrimental to local businesses. If the 2,000 houses proposed for both Wisley and Burpham go ahead it will only increase traffic further. I object to this proposal as Government guidance to planners was that Green Belt should only be built on if there are exceptional circumstances requiring this to happen. There are no exceptional circumstances at Garlick's Arch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick’s Arch because:

It ignores all the thousands of previous objections made by local people

There is no proven demand for Travelling Showpeople plots in this location and Guildford has more than enough traveller plots.

It is beautiful permanent Green Belt and no “exceptional circumstances” exist to allow development on it. Almost every week in the media Government Ministers state that the Green Belt must be protected and only developed where overarching need is proved and yet Guildford Borough Council seem determined to destroy this area of ancient woodland that existed at the time of Elizabeth 1.

It will cause over-development of our village and the number of homes is excessive. It will join up Ripley and Send and defeat the key purpose of Green Belt. It is subject to frequent flooding and is currently a flood zone 2 allocation. It is contaminated by lead shot accumulated over fifty years. It will generate excessive traffic that will block up the local roads of Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object in particular to the proposed development at Garlick’s Arch. The proposed 400 houses and commercial units would completely swamp existing local roads, schools & medical facilities. This would be further exacerbated by the proposed new interchange onto the A3 at Burnt Common that I also strongly object to. Current traffic levels are already too high around Burnt Common. Expanding the A3 junction would cause gridlock all day along A247 and Portsmouth Road. I also object to the Garlick’s Arch proposal on the grounds that it was not included in the previous consultation in 2014, and was added to the current proposed plan at very late notice, preventing proper due diligence from all interested parties. I also object to the proposed commercial development, as I believe it would make far more sense to expand the current commercial Slyfield area where I understand land is available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the revised proposal for this plot as it will significantly eradicate the green belt area that delineates Ripley and Send, and create very significant increase in traffic from 400 homes that will totally swamp the existing modest local roads, especially Portsmouth Road and the A247. These roads are already under significant pressure from current population demands with frequent traffic jams delaying journeys to school and work. In addition, local infrastructure, especially schools and medical facilities will be swamped by the significant extra demand, requiring people to traffic further to reach such facilities in other areas, further exacerbating the traffic issues. I recognise the need for some new housing in the area, but 400 homes is totally disproportionate for this relatively small area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to Policy A43 change at Garlicks Arche - 400 homes and 6 travelling show people plots

The plan has ignored thousands of objections from the local people of Send

There is no proof of the need for Travelling Show people plots in this location

The Village of Send is on Green Belt Land and therefore should only be built on in exceptional circumstances
The increase in houses will cause over-development of our villages
The number of homes is excessive and is not necessary
It is an ancient woodland and should be preserved
It goes against the Green Belt Policy to prevent urban sprawl
The site is currently a flood zone 2 allocation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:
I object to building 400 houses and 7,000 square metres of industrial space at Garlick’s Arch - I bought a house in Send Marsh 25 years ago to enjoy the peace and tranquility of the villages in Send and Ripley and to bring my family up in a safe, healthy environment. The industrial area is at Slyfield where future industrial development should be. A small housing estate was built on the back of the Send Marsh estate where I live this has impacted severely on the traffic flow on and off the estate; ill thought road layouts and noise pollution.

I must object most strongly to the various policies proposed in the latest process of the new Draft Local Plan, covering:- Policy A42 Clock barn Nursery, Tannery Lane, Garlic's Arch Send Marsh Policy A43, Land at Burnt Common, Policy A58.

Although different developments, all variations to the Policies seem to be proposed without any regard to existing residents.

It seems that no consideration has been given to the effect they will affect the general infrastructure of the village, at peak times now, the roads are very busy, if these proposals are allowed to go ahead there will be gridlock night and morning. Problems occur with flooding now, again this will only worsen, there is also the consideration that some of the proposals are not required, the travelling Showpeople plots at Garlic's Arch as one and industrial or warehousing at Burnt Common.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposal A43 which would permit build houses on Green Belt land, which includes the land at Garlick's Arch. Local residents have made their feelings very clear in the past and will never willingly accept the erosion of our Green Belt just to appease developers who could use brownfield sites if they were prepared to put in the extra money required. Local services are already stretched and the added traffic will reduce everyone's quality of life.
There are no alternative routes other than back roads when traffic comes to a standstill at the moment; those 'backroads' will be unpleasant and dangerous places to live, walk or drive. Add in the vehicles of over 500 houses in Send, 1500 at Wisley and 1500 at Gosden Hill, and the area will grind to a traffic-polluted halt.

I object to the proposal A43 and A44 to include traveller pitches anywhere in the immediate area because there is absolutely no proven need for these. However, to disproportionately allot such sites in Guildford Borough as whole on the area around Send is not acceptable as there should be a more even distribution over the entire Borough. How come Wisley and Gosden Hill are only allocated 8 each for their proposed developments of over 1500 homes, whilst Send gets 10?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I also object to Policy A43 change at Garlick's Arch because:
Once again it ignores the thousands of objections already made by local people.
There is no proven demand for Travelling Showpeople plots in this location.
It is permanent beautiful Green Belt and no exceptional circumstances exist.
It will cause over-development of our village and the number of homes is excessive. It is an exceptional ancient woodland dating back to the reign of Elisabeth I.
It is subject to frequent flooding and is currently a flood zone 2 allocation.
It is contaminated by lead shot accumulated over 50 years.
It will cause traffic chaos and choke the village roads which are already blocked during rush hours

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7331  Respondent: 10833025 / M Wright  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

I object to policy A43 Garlicks Arch.

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

This proposal was never in the regulation 18 draft, and as such has never been consulted on, and was slipped into the Local Plan at the last minute.

This site is green belt comprising of woodland and meadows between the A3 and Send and Ripley. This site has a particular sensitivity since it is covered in ancient woodland, some trees date back to the 16th century.

It is permanently protected by the NPFF which prevents the merging of settlements, there are no exceptional
circumstances to develop this land.

To destroy a natural boundary between the A3 and the villages would be incredibly damaging to them. The obvious increase in pollution caused by massive amounts of extra traffic would be hazardous to health of residents young and old of both Ripley and Send. The existing boundary also absorbs some noise and pollution from the A3 itself.

The proposed industrial development of 7000 sq m is simply not needed since the latest Employment Land Needs Assessment 2015 shows a reduction of 80% in required employment floorspace from the previous draft plan. Additionally GBC have not provided any evidence of a requirement for this. Basically this means that industrial space at Burntcommon is not required. Even if there was a requirement for 7000 sq m of industrial space it should be at Slyfield where there is already available space.

Furthermore, a new 4 way interchange onto the A3 at Burntcommon to serve this development would be disastrous for Send. Send Road A247 would become gridlocked all day, as it would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2000 houses at Wisley and the 2000 houses at Burpham. Send cannot take that amount of traffic.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

This proposal was never in the regulation 18 draft, and as such has never been consulted on, and was slipped into the Local Plan at the last minute.
This site is green belt comprising of woodland and meadows between the A3 and Send and Ripley. This site has a particular sensitivity since it is covered in ancient woodland, some trees date back to the 16th century.

It is permanently protected by the NPFF which prevents the merging of settlements, there are no exceptional circumstances to develop this land.

To destroy a natural boundary between the A3 and the villages would be incredibly damaging to them. The obvious increase in pollution caused by massive amounts of extra traffic would be hazardous to health of residents young and old of both Ripley and Send. The existing boundary also absorbs some noise and pollution from the A3 itself.

The proposed industrial development of 7000 sq m is simply not needed since the latest Employment Land Needs Assessment 2015 shows a reduction of 80% in required employment floorspace from the previous draft plan. Additionally GBC have not provided any evidence of a requirement for this. Basically this means that industrial space at Burntcommon is not required. Even if there was a requirement for 7000 sq m of industrial space it should be at Slyfield where there is already available space.

Furthermore, a new 4 way interchange onto the A3 at Burntcommon to serve this development would be disastrous for Send. Send Road A247 would become gridlocked all day, as it would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2000 houses at Wisley and the 2000 houses at Burpham. Send cannot take that amount of traffic.

1. **OBJECT** to the location for new employment floorspace at Garlick's Arch -Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

1. OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (BS).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the development at Garlick’s Arch for 400 houses and 7000 square metres of industrial space. The A3 is already at a very high capacity; the additional traffic from the houses and an industrial site would lead to severe congestion, nearing (or even reaching) gridlock. I also object to the industrial space on the grounds that the Employment Land Needs Assessment 2015 (ELNA) shows a reduction in required employment floor space from the previous draft plan of 80%, so it is simply not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been there for decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPS16/7495

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. Central Government states clearly that housing need is not an exceptional circumstance and, therefore, there are no exceptional circumstances which allow for the removal of Garlick’s Arch from the Green Belt (Policy P2). The Plan states that Brownfield Site should be used in preference and yet Guildford Borough Council have removed the Burnt Common proposal and replaced it with Green Belt land at Garlick’s Arch. There are other reasons that this site is unsuitable which have already been mentioned such as frequent flooding, lack of transport infrastructure, the site of ancient woodland with accompanying wildlife habitat and the lack of schools and medical facilities.

Objections to Guildford Borough Proposed Submission Local Plan (June 2017)

I am objecting to the Guildford Borough Proposed Submission Local Plan (June 2017) and the changes around Ripley and Send, which have increased development so that this Plan is even worse than the 2016 proposals.

I object to the increased A43 Garlicks Arch development. It is Green Belt land and has no identified or exceptional need with the Local Plan Documentation.

I object to the proposed 6 Travelling Showpeople plots. There is no need for this many and the designated formula is for 1500-1999 home on the same site. There are 400 houses proposed on the site so 6 is too many for the amount of houses.

I object to this many Traveller plots in the Ripley/Send per se. In Section 4.2.22 of the Plan it states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” So why do 75% of them have to be in Ripley? This is unbalanced and unfair.

I object to the change in wording and likely consequences on ‘Affordable Homes’. In the 2016 version of the Plan (Policy 4.2.23) it stated that Developers will be expected to provide land for affordable homes at nil value. Now it just says “Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.” Developers can just pay money to the Council to avoid including affordable homes. This is disgraceful!

I object to the site proposed under Policy A43 which is one of the last minute additions to the GBC Plan. Development of Garlick’s Arch will destroy ancient woodland and Green Belt land. The requirement for a further 400 homes must be justified along with the need for 7000sq m of industrial space when the Slyfield site would seem to have the necessary acreage available for this purpose.

I object to the proposed changes under Policy A43 of the Plan for 400 homes and 6 Travelling Showpeople Plots at Garlick’s Arch. Once again this proposal ignores all previous concerns with respect to the development of this site in respect of loss of Green Belt, traffic congestion, drainage, lead pollution and the destruction of ancient woodland. It would also seem to be totally as much as anything else to locate Travelling Showpeople on a residential development such as that being proposed. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I strongly object to Policy A43, Garlicks Arch, with its proposed A3 junction, 400 houses and a large area of industrial and warehousing 7000sq metres. This would significantly impact all aspects of Send’s life – the A247 is gridlocked at both ends of the working day and whenever the A3 has an accident- the local schools and medical centre would be overlooked, this site is new and is on Green Belt protection through NPPF, lastly it was not included in the regulation 18 draft.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Finally I enclose a cutting from the before mentioned “About Guildford” publication, in particular the paragraphs leaded “your questions about the local plan answered”

“questions. Will there be developments along the A3 from J10 of M25 to beyond the Hogs back?

Answer NO

It then proceeds to explain that in fact there will be some developments.

The paragraph alongside it to the right states “the plan rejects any schemes that would have a detrimental effect on the green belt.

I submit that policy A43. Garlicks Arch proposal cannot be considered to be anything other than detrimental to the green belt.

Such comments in print from “Guildford Borough Council” are in my opinion designed to confuse folks who are very worried over the prospects of the potential disruption of the status quo and all we hold dear.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the policy A43 at Garlicks arch because I feel that NO "EXCEPTIONAL CIRCUMSTANCES" exist to warrant the destruction of this ancient woodland and the resultant loss of permanent Green Belt, also there us no proven demand for plots for travelling showpeople to be located here abouts, furthermore the excessive number of homes will virtually join ripley and send and have a detrimental impact on local roads and byways and ignores the flood zone 2 allocations and the fact that the land is contaminated by over 50 years of lead shot accumulation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed new development at Garlick's Arch. GBC has failed to demonstrate the need for a further 400 houses in addition to those already included in the Plan, or the need for such an extensive industrial/warehouse development. The area, which is currently Green Belt, includes ancient woodland, which, once lost, could never be replaced. The area already has an established industrial site at Slyfield. Given the latest Employment Land Needs Assessment 2015 showed an expected 80% reduction in the required employment floor space from the previous draft plan, this could easily be accommodated at Slyfield.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed changes for the allocation of 400 homes and 6 Travelling Showpeople Plots at Garlick's Arch under Policy A43 of the Plan. The proposal ignores all previous concerns that the development of Garlick's Arch will destroy ancient woodland and Green Belt land together with the very real possibility of causing drainage problems for the areas of Send Marsh that are downstream of the site. The number of houses proposed at this site is excessive and will undoubtedly adversely affect the local traffic situation in Send and Ripley and will be the start of a 'bridge' of development which will join the two villages thereby defeating the purpose of the Green Belt provision. I would also question whether there is a proven need for Travelling Showpeople Plots at this location especially as it would seem wholly inappropriate to locate what are effectively commercial sites within a residential area.

Policy A43- Land at Garlick's Arch, Send marsh

I OBJECT TO POLICY A43 CHANGE AT GARLICK'S ARCH because

1) it will generate much more traffic than we already have to put up with
2) it will join the villages of Send and Ripley (Ripley already overloaded with traffic from Junction 10 on the M25 and a 'short-cut' for traffic from the A3 which ends up in Send!)
3) the thousands of objections that have been made by local people previously have been totally ignored
4) the site frequently floods
5) OUR GREEN BELT AND THE ANCIENT WOODLANDS (DATING BACK TO THE TIME OF ELIZABETH 1) SHOULD BE LEFT AS THEY ARE!

<td>I object to the development at Garlick’s Arch, which is being proposed as the site for 400 houses and also 7000 square metres of industrial space. The Employment Land Needs Assessment 2015 (ELNA) has concluded that there has been a dramatic reduction in the employment floor space needed, down 80% from the previous ELNA of 2013. This means that there is no longer the need for this industrial space. Also regarding the industrial space, together with the proposed 400 houses at this site; the pressure on an already heavily used A3 would be too great, leading to severe delays, increased accident risk and potential gridlock.</td>

I object also to Policy A 43 designated for 400 houses and 7,000 sqm for industrial use at Burnt Common, our local roads cannot cope with any further rise in traffic levels, Potters Lane in particular already becomes congested and dangerous with narrowing sections and tight bends, especially at peak times during the day. Potters lane has become a ‘rat run’ at rush hour especially in the morning and I have witnessed to many accidents and near misses in the 20 years I lived in Potters Lane. A life will be lost if the weight of traffic increases beyond the level it is.

I strongly object to Policy A43 regarding development at Garlick's Arch as this means destroying a beautiful ancient woodland and huge canopy of trees and will cause massive over development of our village with the number of homes being proposed as excessive. Development of Garlick's Arch will generate a huge amount of additional traffic and cause massive congestion in the local roads in Send and Ripley. There is no proven demand for travelling showpeople plots in this location. Pollution levels will rise and these are already a concern in this area. This proposed development is already subject to frequent flooding. It will effectively join Send and Ripley together and defeat the key purpose of Green Belt land.

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause
coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I strongly object to policy A43 because there is no need for traveller sites in the green belt.

[Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

#Also 400 homes is an unreasonable burden for us to assume. Not to mention the fact it is a flood area.

I object to policy A43 Garlicks Arch due to the following points.

There is no proven demand for plots to accommodate Travelling Showpeople.

National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt land. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. It constitutes over development. These further changes to the plan are not required.

It is an unsustainable location. It will undoubtedly cause traffic chaos on the minor surrounding roads. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion, anyone who lives in these areas will confirm that this is the case. Substantially more vehicle movements will result in even more congestion and greater pollution. Residents and the environment will suffer as a result.

This area contains ancient woodland dating back to the 16th century, which should be preserved. There is no good reason to tamper with it.

This site is identified as being in a Flood Zone 2 and regularly floods during winter months.

This site contains land which is heavily contaminated by many years of shooting with lead shot.
Above all, the latest changes to this site have completely ignored the thousands of previous comments from residents (who know the area best of all) during the 2016 Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7664  Respondent: 10844993 / Simon Wright  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A43 Garlicks Arch.

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for
only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

This proposal was never in the regulation 18 draft, and as such has never been consulted on, and was slipped into the Local Plan at the last minute.

This site is green belt comprising of woodland and meadows between the A3 and Send and Ripley. This site has a particular sensitivity since it is covered in ancient woodland, some trees date back to the 16th century.

It is permanently protected by the NPFF which prevents the merging of settlements, there are no exceptional circumstances to develop this land.

To destroy a natural boundary between the A3 and the villages would be incredibly damaging to them. The obvious increase in pollution caused by massive amounts of extra traffic would be hazardous to health of residents young and old of both Ripley and Send. The existing boundary also absorbs some noise and pollution from the A3 itself.

The proposed industrial development of 7000 sq m is simply not needed since the latest Employment Land Needs Assessment 2015 shows a reduction of 80% in required employment floorspace from the previous draft plan. Additionally GBC have not provided any evidence of a requirement for this. Basically this means that industrial space at Burntcommon is not required. Even if there was a requirement for 7000 sq m of industrial space it should be at Slyfield
where there is already available space.

Furthermore, a new 4 way interchange onto the A3 at Burntcommon to serve this development would be disastrous for Send. Send Road A247 would become gridlocked all day, as it would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2000 houses at Wisley and the 2000 houses at Burpham. Send cannot take that amount of traffic.

I was very surprised to see the new development plan.

Having read the previous plan and having attended the meeting in April at Lancaster village hall, nothing had previously been mentioned about the two areas below:

**Policy A 43 30 ha land at Garlick's Arch Burnt Common.**

Whilst in principle it seems like a good idea to have both on and off access to the A3 at the Burnt Common roundabout, I am concerned about the effect it will have on the already congested local roads. We have massive lorries coming through
Clandon (another problem) and now there would be even more, using this interchange from the M25/A3 to get to Woking. The road passing through Send is very congested for long periods during the day and this would only exacerbate the problem.

If we build houses but no offices, where do the people go to work? They all have to get in their cars to drive to work. Industrial units mean more big lorries on the narrow and already congested roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Whoever it may concern.

I am very concerned about the plans for Garlick's Arch and the associated increase in traffic on the roads.

Many of the surrounding roads are very narrow and we have had wing mirrors gone and sides of cars badly scratched.

Although the new entrance and exit onto the A3 sounds good I am concerned at the increase in lorries and cars this would generate going through the already very congested Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2569  Respondent: 10846145 / Phillipa Bottomley  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

I object to the Policy A43 change at Garlick’s Arch because the scale of the development is inappropriate for local roads, schools and surgeries. This will have a significant impact on traffic through Send, Ripley and Clandon, and will have a material impact on local schools, access to medical services and the Woking trains. This development will connect Ripley to Send developing a single conurbation contrary to the aims of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the Policy A43 change at Garlick Arch because again it has ignored the thousands of previous objections by local people. This proposal will also erode the Green Belt and no exceptional circumstances can be justified i.e. plots for travellers. The number of homes proposed is excessive and will cause an over-development of our village. It will cause increased flooding possibilities in a flood zone 2 area and cause further traffic congestion on the roads of Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1.1 I object to policy A43 “Garlick’s Arch” on the grounds that;

1.2 Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided

1.3 The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result

1.4 I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

1.5 I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

1.6 I object to the proposal to build 7,000 sq.m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available.

1.7 I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
1.8 I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

1.9 I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

1.10 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1.11 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

1.12 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

1.13 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

1.14 I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

1.15 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

1.16 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

1.17 Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

1.18 Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

1.19 I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.
1.20 I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

1.21 I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

1.22 It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1.1 I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

1.2 It ignores all the thousands of previous objections made by local people

1.3 There is no proven demand for travelling show people plots in this location

1.4 There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.5 The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

1.6 This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

1.7 The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

1.8 Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. 1.13 I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

1.14 I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

1.15 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1.16 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

1.17 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

1.18 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

1.19 I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
1.20 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

1.21 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

1.22 Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

1.23 **I object** due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1.24 **I object** to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

1.25 **I object** to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

1.26 It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Greenbelt was created to protect rural communities and to stop urban sprawl. The villages in Guildford Borough need this protection and therefore any plans to erode the Green Belt must be abandoned.

The proposals outlined in the Local Plan do not state how the Borough intends to address the education, health, pollution, and public transport problems that the increase in the population in the area will cause.

To sum it up we feel the number of houses proposed throughout the entire borough is far too large. The erosion of the Green Belt should must not be allowed. The increase of vehicles on the roads will increase the pollution in the area adding to health problems.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

6. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley

Garlick’s Arch is within the Green Belt. There are no exceptional circumstances which allow for its removal. Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land. Why have GBC removed a brownfield site at Burnt Common and replaced it with Garlick’s Arch?

Garlick’s Arch is not appropriate because:

- There is no transport infrastructure.
- There are no plans to improve local schools, medical or utilities to cope with the increased needs these new homes
- The site is liable to flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Please find below my objections to the Revised Local Plan:

- The development at Site A43 Garlicks Arch would be on Green Belt land, and there is no identified or exceptional need within the Local Plan documentation.
- The potential of an increase from a minimum 400 houses up to a possible 650 at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause merger of these villages. Villages should remain individual and not be merged into one huge conurbation. Local facilities, doctors, schools etc. cannot cope with this increase. Have you tried getting an appointment with a GP recently.
- Section 4.2.22 of the Plan states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” So why do 75% of them have to be in Ripley? This is unbalanced and unfair.
- Including six Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural area within the Green Belt and there is no identified need within the Local Plan. The allocation of six Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and therefore is out of scale with the proposed development.

I object to the building of 400 houses and 7000sq metres of industrial space at Garlick's Arch, opposite Send Marsh Road. The site is covered in ancient woodland which is home to many animals and birds which would be impacted by the destruction of the woodland. The industrial space could be accommodate instead at Slyfield which would avoid the destruction of ancient woodland. Guildford's housing needs could be met by the proper use of brownfield sites, thereby preserving the Green Belt and upholding election promises.

A43 Garlicks Arch, Send

I strongly object to 400 new homes and an industrial site. The additional strain on our resources in the village ie. schools and doctors surgery will be horrendous. The extra traffic through our beautiful village including HGV's is not acceptable. We in the village do not want a new 4 way junction for the A3. This site should remain as greenbelt with its beauty and wildlife.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to the Policy A43 change at Garlick's Arch because:

There is no proven demand for Travelling Showpeople in this location

It is green belt land and no exceptional circumstances exist

The number of homes is excessive and not needed in our village

It will generate excessive traffic and block up already busy roads in Send

The land is subject to flooding and is currently a flood zone 2 allocation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3557  Respondent: 10852289 / Barry Scott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to plan A43 which includes the 30 hectares of Garlick's Arch in this Plan A43. This site is new and was not included in the Regulation 18 Draft, and has not been consulted on previously. It forms part of the Green Belt and is permanently protected by the NPPF, which is there to prevent the merging of settlements. It also contains around 5 hectares of ancient woodland, some of which dates back to the 16th century the plan includes the building of 400 houses and nearly 2 acres of industrial buildings and warehousing. The ENLA of 2015 shows an 80% reduction in employment space over that of 2013, therefore industrial space at Burntcommon is no longer required. Quite apart from losing Green Belt land, the extra traffic generated by an estate of this size, which will consist of about 800 cars and many HGV’s, will put an unbearable pressure on all the roads around the Burntcommon roundabout (A247/B2215), especially at rush hour times. As well as the roads being unable to cope with such huge population growth, neither will the local schools or the Villages Medical Centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Land at Garlicks Arch, Send Marsh, Policy A43

I object to the Policy A43 change at Garlicks Arch because:

• It ignores all the thousands of previous objections made by local people
• There is no proven demand for Travelling Showpeople plots in this location
• It is beautiful permanent Green Belt and no exceptional circumstances exist
• It will cause overdevelopment of our village and the number of homes is excessive
• It is exquisite ancient woodland that existed at the time of Elizabeth 1
• It will join Ripley and Send and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over 50 years
• It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. **POLICY A 43.30 ha LAND AT GARLICK’S ARCH, Burnt Common, designated for 400 houses and 7,000 sq m of industrial and warehousing.** There is no need for any more houses on top of the 13,860 already proposed for the borough. This site is **NEW** and was not included in the Regulation 18 draft and has **NOT** been consulted upon previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The proposed industrial development of 7000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80 in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield. A new 4-way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send. Send Road (A247) would be gridlocked all day. Send would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. Send cannot take it. In fact, leaving Send Close to join the A247 always takes several minutes due to the traffic loads, during peak times takes a lot longer. The proposals now being brought forward will increase the traffic loads to a huge degree to an unacceptable level.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

WE OBJECT to Policy A43 and A43a on Garlick’s Arch.
The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be aribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a Brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons runs through the site, which will have the potential to be a health hazard for any residents.

WE OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to policy A43.30ha Land at Garrick's Arch. There is no need for more houses on top of the 13,860 already proposed by the borough. It is Green Belt protected by the NPPF which prevents the merging of settlements. It is covered in ancient woodland with trees dating back to the 16th century and once lost, is lost forever. The latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80Yo in required employment floor space from the previous draft plan. Therefore the proposed industrial development of 7000sq m is not needed. The obvious place for any new industrial development is at Slyfield, Guildford - an industrial site already set up and running. There would then be no need to have to build a new 4-way interchange onto the A3 at Burnt Common to serve this industrial development. Surely saving money!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the 2016 draft local plan for reasons as follows

1. The underhand and cynical way Guildford Borough Council pushed in a proposal for 400 houses and 7000 sqm of industrial space and a 4 way junction at Garlick’s Arch Burnt Common. This will entail destroying ancient woodland and encroaching on Green Belt Land. This proposal was supposed to be at Slyfield a brown field site altered at the last minute. Anyone local to the area will remember half of send marsh flooded when water came down from Clandon and Newlands corner across the A3 at the dip and flooded Send Marsh as the stream couldn’t cope with the amount of water. Remove the woods and natural soaking system is gone. Concreting over these woods is madness do we need industrial units in this area? So much for protecting Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

POLICY A43 LAND AT GARLICK'S ARCH, Burnt Common, designated for 400 houses and 7000 sq m of industrial and warehousing. I object to these plans as I feel there is no need for any more houses on top of the 13,860 already proposed for the borough. This site is NEW and was not included in the Regulation 18 draft and has NOT been consulted upon previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The proposed industrial development of 7000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80 in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield. A new 4-way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send. Send Road (A247) would be gridlocked all day. Send would be through route to Woking for traffic leaving the M25 and A3, the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. Send cannot take it. In fact, leaving Send Close to join the A247 always takes several minutes due to the traffic loads, during peak times takes a lot longer. The proposals now being brought forward will increase the traffic loads to a huge degree to an unacceptable level.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the building of 400 houses and industrial space at Garlick's Arch.

This is an area of ancient woodland and should remain so.

The junction of the Send Marsh Road and the Old Portsmouth Road is always difficult and at times dangerous.

There is a 40mph on this stretch of road, and we have witnessed many accidents and near misses at this junction in the 26 years we have lived here.

Building 400 homes and an industrial site will have an effect on vehicles trying to exit the Send Marsh Road and will increase the number of accidents/near misses occurring.

There is no requirement for industrial space at this site can and should there be the need then this should be accommodated within the existing site at Slyfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/6803  Respondent: 10857249 / Alice Pashley  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement-often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to building 400 Houses and 7000sq meters of industrial Space at Garlicks Arch opposite Send Marsh Road.

This is Green Belt Land with Ancient Woodland, and is prone to considerable flooding. The industrial space is definitely not needed as there is adequate space at Slyfield Green, and the owners at Slyfield are keen to have extra use there if there is in fact a need at all for extra industrial Space.

If GBC used the brownfield sites this Green Belt land would not be needed.

The gridlock that this development would cause on the local Roads would be massive.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A43 Garlick’s Arch

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no
exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available.

I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.1 object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green belt (Policy P2).

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Policy A43 change at Garlick’s Arch because:

It makes no reference to and ignores all the previous objections made by local people who will have to live with the consequences

There is no known demand for 6 Travelling Showpeople plots in this location

This is permanent Green Belt and no “exceptional circumstances” for its removal exist, and, if this occurs, Ripley and Send will no longer be separated and therefore the purpose of Green Belt will no longer exist as well

It will cause over-development and destruction of our village and 400 homes is excessive, causing excessive traffic which the roads of Send and Ripley cannot cope with. The roads are currently at breaking point and this can only make matters worse.

It is beautiful ancient woodland that existed at the time of Elizabeth 1 and should be left alone for future generations

This is currently a flood zone 2 allocation and already has frequent flooding

There is contamination by lead shot accumulated over fifty years

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

The proposed development of 400 homes at Garlick's Arch

I object to the development of so many homes on this site. There is no proven need for this number of houses. It is inappropriate and will overload facilities in the village. There are no special circumstances which would support this development.

I object on the grounds that this site at Burnt Common floods every year. Building would create problems for other areas of the village and potentially the road networks as well.

I object to this development on conservation grounds and am surprised that it should be considered. The area is covered in ancient woodland with trees dating back 400 years.

The Proposed Industrial development of 7,000 sq m at Garlick's Arch

I object to this proposal because it is superfluous. The requirement for employment space need ELNA 2015 is reduced by 80% from the 2014 plan. A 40ha site with planning permission is already available at Slyfield and this development could be easily and better accommodated there.
I object to this development on the grounds that there are already a number of rural businesses adjacent providing local employment. These would disappear if this development were to go ahead.

1 POLICY A43 GARLICK’S ARCH

1.1 **I object** to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

1.2 It ignores all the **thousands of previous objections** made by local people

1.3 There is no proven demand for travelling show people plots in this location

1.4 There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.5 The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

1.6 This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

1.7 The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

1.8 Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

1.9 The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

1.10 I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.
1.11 I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

1.12 I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

1.13 I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

1.14 I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

1.15 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1.16 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

1.17 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

1.18 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

1.19 I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

1.20 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

1.21 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

1.22 Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
1.23 I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1.24 I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

1.25 I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

1.26 It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A43 change at Garlick's Arch because:-

It ignores all the thousands of previous objections made by local people
There is no proven demand for Travelling Showpeople in this location which would seriously affect the value of properties.

It is beautiful permanent Green Belt and "no exceptional circumstances" exist.

It will cause serious implications to the village and the number of proposed homes is excessive as our schools are already stretched to their capacity.

It is exquisite ancient woodland that existed at the time of Elizabeth 1 so should always be preserved.

It will join up Ripley and Send and defeat the key purpose of Green Belt.

It is already subject to frequent flooding and is currently a flood zone 2 allocation.

It is contaminated by lead shot accumulated over more than fifty years.

It will generate excessive traffic that will block up the local roads of Send and Ripley which are already at an unacceptable level.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the plan to build 400 houses at Garlick's Arch. Guildford's housing requirement has been exaggerated, and is non transparent and undemocratic. Proper use of brown field sites would be sufficient.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to strongly object to the proposed development at the Garlick's Arch site. I object for the following reasons:

- the proposed housing would be on Greenbelt Land

- the potential increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

- the inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and there is no identified need within the Local Plan documentation. The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and so is out of scale with the proposed development.

- the potential for a substantial increase in industrial floorspace from 7000 sq m to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document.

- the potential for a Waste Management Facility at site A58 Burnt Common as briefly mentioned in policy 4.4.23a does not allow for full and proper consultation.

- the increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane will have a significant impact on the already highly congested local rural road network around and within Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed development at Garlick's Arch because an additional 400 plus homes together with the proposed industrial site would create huge repercussions to the local environment and community. The local roads are already overcrowded, particularly at peak time in the morning and evenings. Additionally, local health care and schooling is unable to accommodate an influx of people on this scale.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been
assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient woodland that surrounds the site and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be
particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the proposed building of 400 houses and 7000 square metres of industrial space at Garlick's Arch.

Guildford's housing requirements have been shown to be exaggerated as has the need for industrial space. The latter, if required, should be at Slyfield. The Garlick's Arch site is prone to flooding and includes ancient woodland. Development on such a large scale would be grossly disproportionate and local services and road networks would be unable to sustain it.

I object to the development at Garlick's Arch for 400 houses and 7000 sq metres industrial space, firstly because it was sprung on the village at the last moment with only 2 weeks' notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. Secondly This GREEN BELT SITE is liable to flooding and it is covered by ancient woodland, providing an invaluable barrier from the noise pollution from the A3 and providing relief from air pollution caused by the huge volume of traffic flowing in this area. It is not needed as there are still brown field sites such as Slyfield which can be used, Figures from Guildford Borough Council on projected housing requirements have been shown to be grossly inflated and I believe they have yet to give details on how these calculations have been formulated.

Attached documents:

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

10. I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the Policy A43 change at Garlick’s Arch because:

It ignores all the thousands of previous objections made by local people

There is no proven demand for Travelling Showpeople plots in this location

It is beautiful permanent Green Belt and no “exceptional circumstances” exist

It will cause over-development of our village and the number of homes is excessive

It is exquisite ancient woodland that existed at the time of Elizabeth 1
It will join up Ripley and Send and defeat the key purpose of Green Belt

It is subject to frequent flooding and is currently a flood zone 2 allocation

It is contaminated by lead shot accumulated over fifty years

It will generate excessive traffic that will block up the local roads of Send and Ripley

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the way in which the Garlick’s Arch development was added to the local plan. There is no need for 400 houses in addition to the 13,860 proposed for the borough. This proposal has not been consulted upon. A new 4 way interchange would cause traffic chaos on already congested roads in the village of Send.

**Comment ID:** pslp172/4507  **Respondent:** 10867585 / Hugh Shanks  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of
development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.
18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to, capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.
22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to site allocation A43, land at Garlick’s Arch, in the local plan being used for housing and industrial use: it is green belt and protected by the NPPF which prevents merger of settlements. There are NO exceptional circumstances

- I object to site allocation A43, land at Garlick’s Arch, in the local plan being used for housing and industrial use as this is a new site and was not included in the Regulation 18 draft and has not been consulted upon previously
• I object to site A43 being used for industrial use as there is no proof that it is needed and if it is needed it should be at Slyfield which is already an industrial location and where there is room to expand and where there are similar businesses. Slyfield has been turned down by GBC planning seemingly in favour of Garlick’s Arch which is a rural location.
• I object to site A43 being used for 7000sq metres of industrial space because land off the A3 slip road at Burnt Common had a proposal for industrial use and where there is already industrial use was, at the last minute, taken out of the proposed local plan.
• I object to site A43 being used for 400 houses/homes and 7000sq metres of industrial space because this land is liable to flooding, in fact the Portsmouth Road floods even with a small amount of rain. The rain drains down from Surrey Hills and the small culvert that is designed to take the flood water and the expensive work that the environment agency did about 10 years ago will not be adequate if all the proposed building is done on land at Garlick’s Arch.
• I object to site A43 being used for 400 houses/homes and 7000sq metres of industrial space because this land is covered by ancient woodland and trees from 16th century would be endangered.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Having lived in the area for 36 years, I feel that these changes to the plan is disproportionate and out of keeping with the historical nature of this area.

2. There is no evidence that 6 Travelling Showpeople plots would enhance the life of the local community.

3. The inclusion of 6 Travelling Showpeople plots is contentious in its application as it would result in the area being overdeveloped.

4. I object to the inclusion of 6 Travelling Showpeople plots in an area which currently enjoys `Green Belt’ status.

5. There is no evidence of a need for 6 Travelling Showpeople plots. The clauses relating to the possibility of these plots being used for other development in the event of insufficient interest is indicative of lack of evidence.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the statement under A43 that there is a stated opportunity that this will improve bus frequency and encourage travel to and from the site. It is hard to understand how the development of the number of houses proposed will in fact change the current occasional bus service to sufficiently reliable and frequent but service that can be relied upon for travel to and from employment.

I object under A43 the opportunity to reduce the flood risk. Any development will increase the risk both locally and in the area in general. All surface water drains to the Wey navigation which frequently overflows during periods of high rainfall and development put increased pressure on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Plans A42, A43 and A44: The village of Send and Send march have limited access, and no public transport which can be relied on for travel to employment. Therefore the creation of new homes within these areas will dramatically affect the already congested road network. It is noted that under the plan A43A there are new slip roads for the A3, and this is supported, however this will not by anyway relive the existing problem. The fact is during the rush hour periods and frequently on the weekends the A3 is congested from around the BP services to the M25. All new homes will still be served by the existing North bound slip at Ripley as it will take commuters closer to the M25. In fact it may encourage more of the existing A3 north bound traffic to travel through the over used village roads.13

I object to the statement under A43 that there is a stated opportunity that this will improve bus frequency and encourage travel to and from the site. It is hard to understand how the development of the number of houses proposed will in fact change the current occasional bus service to sufficiently reliable and frequent but service that can be relied upon for travel to and from employment.

I object under A43 the opportunity to reduce the flood risk. Any development will increase the risk both locally and in the area in general. All surface water drains to the Wey navigation which frequently overflows during periods of high rainfall and development put increased pressure on this.

---

I OBJECT strongly to this attack on the use of the Green belt in this New local Plan, which has Just been thrust upon the residents of this area of Send, Send Marsh and Burnt Common.

This New Plan is a real assault on this area which, on the previous Plan, was designated about 45 or so houses placed on it, now we Suddenly told you intend to build 400 Houses plus an Industrial Development On precious Green Belt Land, Outrageous!!

This development Is totally Inapropriate and unnecessary, and will devastate the Village together with Ripley which we have lived in for thirty five years.

The amount of extra traffic that will be generated by the 400 houses Plus the new Interchange will overwhelm us all. At present it is Intolerable at certain times of the day. This will Just add to Total Gridlock, with traffic using this village as a cut through from the A3 to Woking.

The infrasructure within the village is overburdened now, let alone what will happen when this plan is ever adopted. The Roads are full, the schools are Full, and the Health Centre is overflowing especially as it now is responsible for Ripley residents also.

As a council you have a responsibility to look after your residents in rural villages, maintaining a certain Quality of Life for us all

This Plan is really Flawed and I therefore OBJECT to it. please submit this to the Inspector,

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A43 Land at Garlick's Arch

Yet again you have ignored the many objections from both Ripley and Send. My main objection is to building on this protected area in the green belt (which is appalling for a Tory council to consider), in addition to which, it is not suitable anyway with its flooding potential and contaminated ground. Again the road structure around will not cope with the additional cars as it doesn't now. The need for Travellers and Showpeople plots are not at all warranted as you have already allocated some in the Send Hill area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPS16/6635  Respondent: 10869729 / Ralph Clark  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? (), is Sound? (), is Legally Compliant? ()

I object to the proposals A42, A43 and A44 for a total of 485 homes and 2 travellers pitches in Send on the following grounds:

1. The increased housing will bring with it at least 1-2 cars per household which will add further traffic to the small village roads particularly at peak times. These roads already struggle to cope with current traffic levels.
2. Like much of Surrey the roads around Send are in a poor state and the increased traffic in the area will only add to their deterioration.
3. The increase in population of Send will impact on services such as the Villages Medical Centre where it is already difficult to arrange appointments with the Doctors.
4. There is no need whatsoever for industrial developments in Send as raised in A43. Send is not and never will be the right location for industrial premises being a rural village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1466  Respondent: 10869857 / A.C. Smith  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? (), is Sound? (), is Legally Compliant? ()

I object to Policy A43 (Land at Garlick’s Arch). The proposal is for up to 7,000 square metres of industrial and other employment space and 400 dwellings. The industrial space is simply not required, since the latest Employment Land Needs Assessment 2015 shows a reduction of 80% in required employment floor space compared with the 2014 Draft Local Plan. New industrial space if required can be accommodated at Slyfield, and it is quite unnecessary to site it at Garlick’s Arch.

Furthermore, the additional traffic generated by so much employment space, coupled with the traffic generated by the 400 new dwellings and Policy 43A (new A3 intersection at Burnt Common), would overwhelm the local road network. In particular the A247, through Send to Old Woking, is likely to become completely gridlocked for much of the day, with
Potential serious consequences in terms of noise and air pollution, physical danger etc. for people whose houses front on Send road, as well as serious inconvenience to other people in the area. It has to be appreciated that Send Road ends at a roundabout in Old Woking where it debouches into narrow winding streets. There is no scope for increasing traffic capacity through these streets, which are already heavily congested at certain times. The proposals for Gosden Hill Farm and Wisley Airfield will only further exacerbate the traffic problem.

Furthermore, the additional local population from the 400 new dwellings at Garlick’s Arch cannot be accommodated by the existing infrastructure of schools, medical services etc.

*Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )*  

I further object to the Garlick’s Arch development. 400 homes and large industrial space will create not only a crowded, unpleasant living environment, but traffic meltdown. Clearly, nobody in the local planning department is local at all, as if they were, they would already be stuck in very high volume traffic on a daily basis, and know that this huge development will bring us all to a standstill. Don’t be fooled that an additional access point to the A3 will ease this, quite the opposite, drivers will simply join the queue in a different place, and queue back onto the local roads too. I therefore also object to the new interchange, that will simply add more queues to the existing ones, not ease any congestion at all.

I have made each of my objections clear, and I hope that those I elected to represent my family and I will listen carefully to the explicit and grave concerns voiced by a whole community. Should this development go ahead regardless, it will be a very sad day for democracy.

</table>
The footings and excessive number of houses to be built will inevitably upset the water table and therefore could cause flooding in houses already built. This happens when the water accumulating on flood plain is displaced and has to find the easiest path. This will cause a knock on effect to so many areas, not least damage to existing houses. As has happened in Walton on Thames, West and East Mosley. As our climate changes and there could be more periods of heavy rain this will be a crucial aspect for the planning committee to address. Making sure that existing flood plains are able to do the intended role of holding access water in times of need.

The joining up of Ripley and Send will defeat the key purpose of the Green Belt, to keep green space between the communities for them to maintain their identity as a functioning community and not and amorphous mass of dwellings with no community identity.

Re: the latest changes to the Local Plan 2017 in respect of Garlick's Arch and the Burnt Common sites:

**My background:** We have lived in this house since 1981 and chose to live in this area due to its accessibility to the open countryside, the community and village atmosphere and facilities. We took into consideration the easy access for us to work in London and the environs.

Already this is becoming impossible to do in a decent time frame, as the traffic is excessive on the A3 and M25 between Junctions for the M23 and the M40. Adding so many more households with cars who will need to use these routes will make travel impossible. Taking into account the plans for a Town on Wisley Airfield, the plans for Merrow, this will only be exacerbated.

I am very aware that we need to provide more housing for young people to stay in the area, houses for older people to down size and social housing. This can be done within the area of the village envelope for Send and the village envelope for Ripley. Doing this without overwhelming the facilities and infrastructure already in place.

I object strongly to the Policy A43 changes to Garlick's Arch for the following reasons:

- I wrote previously to make my thoughts known about the proposed plan and at that time thousands of other local people made their objections clear and this seems to have been ignored in the continued development of this plan.
- I have not been convinced that there are exceptional circumstances for the Green Belt to be ignored and therefore changing the use to allow more development in the future without having to consult with the communities is not acceptable.
- As I said in my opening paragraphs that the plans are unnecessarily excessive in the number of dwellings to be built. Changing the very nature and fabric of our community.
- Send and Sendmarsh are on the flood plain, which is allocated as Flood Zone 2.

Zone 2 Medium: Land having between a 1 in 100 and 1 in 1,000 annual probability of river flooding; or land Probability having between a 1 in 200 and 1 i n 1,000 annual probability of sea flooding. (Land shown in light blue on the Flood Map)

Taken from: Guidance
Flood risk and coastal change

From: Department for Communities and Local Government Part of:
Planning practice guidance and Planning system Published:
6 March 2014

• The footings and excessive number of houses to be built will inevitably upset the water table and therefore could cause flooding in houses already. This happens when the water accumulating on flood plain is displaced and has to find the easiest path. This will cause a knock on effect to so many areas, not least damage to existing houses. As has happened in Walton on Thames, West and East Mosley. As our climate changes and there could be more periods of heavy rain this will be a crucial aspect for the planning committee to address. Making sure that existing flood plains are able to do the intended role of holding access water in times of need.

• The joining up of Ripley and Send will defeat the key purpose of the Green Belt, to keep green space between the communities for them to maintain their identity as a functioning community and not an amorphous mass of dwellings with no community identity.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the proposed development at Garlick's Arch. The site floods and is covered by ancient woodland. The proposed industrial development is not required in this Green Belt site.

I object to the proposed development at Garlick's Arch. An area which floods, is covered in lovely old woodland should not be bulldozed to over stress the local infrastructure and put in industrial areas where they should not be. What is the purpose of Sly Field industrial estate if not to accommodate industrial needs? This is another dodgy deal being done to benefit a developer with no concern to the Greenbelt or the impact on those who live here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1847  Respondent: 10876833 / J. C. ROBSON  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object in the strongest possible way to Policy A43 change at Garlick’s Arch because:

• It ignores the thousands of previous objections from the local population.
• There is no proven demand for Travelling Showpeople plots in this location.
• This area is a beautiful Green Belt area with many mature trees from hundreds of years ago. No exceptional circumstances exist.
• An area where wildlife and plants can grow preserving our heritage.
• It is land between the A3 and the village and protects the local residents from noise and pollution from the A3.
• Green Belt is part of our village setting, it is what makes our village a village. Send residents live in a village as this is the setting Send offers: living close to protected Green Belt and not in a town.
• 400 homes and 6 Travelling showpeople plots will impact the village character of Send. Woking and Guildford are nearby to offer town amenities if required. The proposed 400 homes and 6 Travelling Showpeople plots are an excessive increase to Send / Ripley and this will result in overpopulation with more traffic impacting local roads and village.
• The area around London Road / Roundabout at Shell Garage / Portsmouth Road / A247, already has high levels of traffic in all directions, not just at peak times in the morning / evening but throughout the day / night.
• This area is particularly congested between 7:15 - 9:00 AM and 16:30 - 18:30 mainly by passing through traffic, impacting the local area. These roads serve as an alternative to the A3 leading to this congestion. Often the traffic is standing still during these hours.
• The proposed 400 homes and 6 Travelling Showpeople plots will impact traffic on these roads. These roads / junctions are unable to cope with more traffic. This will require more funding to rectify and impact locals with ongoing road works.
• The proposed 400 homes and 6 Travelling Showpeople plots will impact the local schools - the local Send school has just been extended and does not have sufficient capacity for more. This will require more local funding.
• The proposed 400 homes and 6 Travelling Showpeople plots will impact healthcare. The Villages Medical Centre does not have sufficient capacity at present, let alone for a substantial increase in residents. This will require more local funding.
• The proposed 400 homes and 6 Travelling Showpeople plots will impact local air quality, water resources, ground pollution. Wildlife and flora are impacted. As the land is so near the A3 health for residents could be affected by asthma etc.
• The proposed 400 homes and 6 Travelling Showpeople plots will impact the flooding situation in the area. The area is already suffering from flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4771  Respondent: 10876993 / Michael Hurdle  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object -

1) This is land is Green Belt - designed to prevent sprawl and the merging of settlements. No ‘exceptional circumstances’ have been claimed – indeed there has been little time to address this or the other issues below. This site was not in the 2014 Section 18 original draft Local Plan, nor in the revised Section 19 Local Plan in April 2016, and appeared just **thirteen days** before the Council met to recommend consultation – a poor way to make significant decisions.

2) **The development is too large** – the proposal for 400 homes plus light industrial facilities represent an increase of about a quarter the size of Send village. People living there will use the Send schools and the Send-based Villages Medical Centre which serves Send and Ripley. These are currently working at capacity. 400 homes at Garlick’s Arch would provide too many patients and pupils for present arrangements, and not enough to make feasible the building of a new school or new medical facilities.

3) **Congestion** - The proposed new links to the A3 would mean a large increase in traffic through Send and at the Burnt Common Roundabout; these road are already jammed at times. It is claimed that it is not permitted to link the Garlick’s Arch site directly to the A3, so traffic to and from the site would use the narrow Burnt Common Lane, the Portsmouth Road, Burnt Common Roundabout and the A247 Clandon Road before accessing the new links, hugely adding to local traffic. Even if the direct link to the A3 could be made, MANY vehicles from Garlick’s Arch traffic would be bound to use the A247 through Send to Woking, going through Burnt Common Roundabout.

The A247 and Burnt Common Roundabout are already gridlocked at busy times; any further traffic would cause significant delays for longer periods, and consequently higher levels of traffic pollution ( diesel particulates, carbon monoxide and oxides of nitrogen ).

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.
I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

I wish to comment on the above document.

I have been a resident of Send for 13 years and very much enjoy the rural feel of the village. That said I also understand the real need to provide homes and particularly homes that can be afforded. I am therefore not against development where it is required and appropriate to the community in which it is set.

In general I do not believe that the LP you propose has housing provision which is either required or appropriate.

I OBJECT to the housing need assessment. The over provision of housing in the LP by 30% is outside government policy and places significant pressure on the borough. In addition the inability to recognise the constraints of the large area of green belt in the borough has lost an opportunity to reduce the housing need for real and legitimate reasons. Consequently wholly unsuitable sites have been identified including Garlick's Arch in Send.

The lack of any opportunity to scrutinise the assumptions of the housing need assessment was also unfortunate...and poor government.

At the May meeting of your Cabinet authority was given to the Lead Officer to add minor changes to the LP before it hit your Council meeting. Consequently Garlick’s Arch and the commercial site plus the new junction was added. This was not a minor change and I would suggest your council acted wrongly in considering the matter at Council.

I OBJECT to Garlick’s arch development. The huge increase in houses in our village will have a devastating affect on our roads and community facilities. With respect to roads your plan does not provide any information on the traffic implications in the area. Our roads are overflowing at certain times of the day, we have very few buses and no sustainable routes for cycling...and more are they propose in your plan.

Garlick’s has been badly thought through with developers interests being placed in advance of your residents.....shame on you all!!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (BB).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the lack of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to plan A43 the inclusion of the 30 hectares of Garlick's Arch in this Plan A43. This site is new and was not included in the Regulation 18 Draft, and has not been consulted on previously. It forms part of the Green Belt and is permanently protected by the NPPF, which is there to prevent the merging of settlements. It also contains around 5 hectares of ancient woodland, some of which dates back to the 16th century the plan includes the building of 400 houses and nearly 2 acres of industrial buildings and warehousing. The ENLA of 2015 shows an 80% reduction in employment space over that of 2013, therefore industrial space at Burntcommon is no longer required. Quite apart from losing Green Belt land, the extra traffic generated by an estate of this size, which will consist of about 800 cars and many HGV's, will put an unbearable pressure on all the roads around the Burntcommon roundabout (A247/B2215), especially at rush hour times. As well as the roads being unable to cope with such huge population growth, neither will the local schools or the Villages Medical Centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the building of 7000sq metres of industrial space and 400 houses at Garlick’s Arch opposite Send Marsh Road. The site floods regularly and is covered by ancient woodland, up to 500 years old, which is home to a variety of wildlife. The industrial space is not required and the additional heavy loads of commercial traffic will need to pass through Ripley village in order to gain access to the A3 and M25. There is already provision for commercial space at Slyfield industrial estate and this should be fully developed before additional sites within Green Belt locations are used. With regards to the 400 houses at Garlick’s arch, the currently existing brownfield sites within Guildford and its surrounding areas should be fully utilised before any housing is agreed within Green Field sites. Guildford has refused to share the methodology behind calculating the upcoming housing requirements and therefore no weight should be given to the use of these calculations when planning additional housing capacity.

I further OBJECT to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I further OBJECT to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4. I object to the inclusion of land at Garlick's Arch, Burnt Common and the proposed 400 houses and 7000 sq m of industrial warehousing on that site (Policy 43). Policy A43 and A43A were included at the last minute. They were not in the Regulation 18 draft and had not been consulted upon prior to the inclusion 2016 Local Plan.

5. I object to the impact of Policy A43 on ancient woodland on that site, on noise pollution and air pollution levels. The site is also prone to flooding.

6. I object to the impact of Policy A43 and A43A on local infrastructure. Congestion levels on A247 are already increasing at an alarming rate and will be further exacerbated by the development of Garlick's Arch as the residents will have to rely on the use of private cars.

7. I object to the unsustainable nature of the site at Garlick's Arch (Policy 43).

8. I object to the inclusion of policy A43 of 7000sq m of industrial warehousing as the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft. Slyfield Industrial Estate still has spare capacity and could accommodate any additional warehousing need if required.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

C.ii. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Attached documents:

---

Comment ID: PSLPS16/3146  Respondent: 10889985 / Ruth Macdonald  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to make the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments with sustainable transport. With ever reducing bus services in the area and no railway station within reasonable walking distance, it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

C.ii. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists pass through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.
The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I Object to the Policy A43 change at GarlicKs Arch because:

There is no proven demand for Travelling Showpeople plots in this location.

No Exceptional circumstances exist to remove this area from the green belt.

It would be an overdevelopment of our village with an excessive number of homes.

It is subject to frequent flooding and not suitable for building.

It will cause excessive traffic which will cause major congestion to Send & Ripley.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

I object to the Policy A43 change at Garlick's Arch because:

- The LOCAL PLAN H1 states "Gypsy, Traveller or Travelling Showpeople accommodation should be provided on development sites of 500 homes or morewhilst there remain an identified need" Send has disproportionately been allocated 2 traveller pitches as well as all 8 travelling showpeople plots identified as being needed in the borough until 2034. The developments of over 1500 houses at Gosden Hill and Wisley are only allocated 8 pitches a piece during the same period
- The area floods regularly and is in FLOOD Zone 2.
- All the THOUSANDS of previous objections by local people have been ignored
- There is NO PROVEN DEMAND for Travelling showpeople plots in this location.
- It is beautiful, permanent Green Belt and "no exceptional circumstances" exist.
- This overdevelopment will cause traffic problems on local roads.

---
Abide by the already agreed Policy A43 pages 144 Land at Garlick's Arch, Send Marsh. The proposed changes to the agreed Policy are not legally compliant, neither are they sound and not do they comply with the Duty To co-operate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the land at Garlick's Arch being developed for 400 houses and 7,000 sq metres of commercial premises on this Green Belt site. This is a late addition to the Plan and has not been consulted on. There are no "exceptional circumstances". This scale of development at this location does not have the infrastructure to support it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6425  Respondent: 10894945 / Peter Pearce  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to building 400 houses and 7000 of industrial space at Garlick's Arch.

Guildford's Housing Requirements seem to be rather vague and ill defined and very likely over exaggerated.

The Local Plan seems to be without adequate corroborative information as to how the Housing Requirement assessment numbers were reached, nor does it provide the arithmetic to substantiate how such numbers were arrived at.

The GBC Scrutiny Committee seem to have failed to properly evaluate the methodology employed, question or challenge the Paper paid for by the GBC to support their own view! Such failings do not seem to have been questioned by GBC Leaders when making their own assessment either by oversight or conveniently to suit their position.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6377  Respondent: 10895009 / Holly Broughton  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• I object to the development at Garlick's Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing
need either for the village or the borough. It was a very late inclusion into the 2016 plan. No prior consultation was held with the residents of Send Marsh. This will increase the village by 25% and is not needed.

- I object that no explanation or planning has been given to the impact on the infrastructure i.e. roads, schools, dentists, doctors, congestion, and pollution.
- I object that the building will be on a site that regularly floods. Will this push the problem further down into the village? I live in Greyfriars Road. If this development causes my house to flood I will sue the Council for any damage incurred plus the devaluation of the property.
- I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available and where developers are anxious to create this type of building.
- I object that 4 businesses employing a number of people will be forced off the land against their will.
- I object that ancient woodland dating back to the 16th century will be removed. How can you even contemplate cutting these down!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
6. **I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)**

Garlick's Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick's Arch.

The site is not appropriate because:

- There is no sustainable transport
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

7. **I object to the damage to the historic environment as a result of the scale of the proposed development (Policy 03)**

The Garlick's Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

9. **I object to the Borough Wide Strategy (Policy S2)**

GBC's proposal for 13,860 new houses without any constraints to reduce the overall housing figure, differs from all the other Borough Councils in Surrey.

The Plan is unbalanced across the borough; there's too much development in the north east of the borough (Wisley [A35], Ripley/Send [A43] and Clandon [A25]). 36% of all the Plan's new housing is proposed in this area, which has only 11% of the existing housing.

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages .

10. **I object to the proposed Infrastructure Schedule (Appendix C)**

The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick's Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

12. **I object to the employment strategy and impact at Garlick's Arch (A43) (Policies E2 and E5)**

There is no need for new industrial sites at Garlick's Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed.

That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick's Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

13. **I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)**
The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), should not take place.

14. I object to the lack of proper infrastructure planning for sites (Policy II)

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick's Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough

I wish these objections to be fully taken into consideration and that the plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
and was not included in the Regulation 18 draft. This land is ancient woodland and should be preserved. These houses and the proposed industrial buildings would link up the villages of Ripley and Send and generate a huge amount of traffic on roads which are already heavily congested. The A247 through Send is at a standstill during the morning and evening rush hours and there is a bottleneck at Old Woking onto roads which cannot be widened or improved. Other traffic going through Ripley or Clandon would also be on roads which are narrow and already congested. Councillors must know that the A3 is also often at a standstill during peak hours so why would they want to force more traffic onto these roads?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6004  Respondent: 10898113 / V A Lewis  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the underhand way in which GBC pushed through the Garlick’s Arch proposal for an additional 400 houses, warehousing, and 7,000 sq.m of industrial space. It was a matter of hours between the proposal in the morning on 24th May and being pushed through to the council meeting and into the draft plan the same day, with no time for consultation or transport assessment. This requires full consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6005  Respondent: 10898113 / V A Lewis  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the plan for 400 houses and 7,000 sq.m of industrial and warehousing space at Garlick’s Arch. There is no need for any more houses on top of the 13,860 already proposed for the borough. I object that the industrial and warehousing site has been moved from Slyfield where it had been on a previous plan. Slyfield is where it should be and not in a residential area and it is questionable as to whether it is needed at all.

I object that ancient woodland at Garlick’s Arch will be endangered, some trees dating to the 16th century.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2852  Respondent: 10898113 / V A Lewis  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick's Arch because - It ignores all the thousands of previous objections made by local people, there is no proven demand for Travelling showpeople plots in this location, the local plan HI policy states
"Gypsy, Traveller or Travelling Showpeople accommodation should be provided on 500 HOMES OR MORE, Send has been disproportionately allocated 2 traveller pitches and 6 travelling showpeople plots whereas the developments of over 1500 houses at Gosden hill and Wisley are only allocated 8 pitches each. Surely anyway residential developments are not suitable to this use.
- It is green belt and no 'exceptional circumstances exist
- It is overdevelopment of our village
- It is beautiful ancient woodland
- It will would lead to a large increase in traffic gridlocking local roads which are
- lane and some single track
- It is contaminated by lead shot

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

It is still a designated flood zone.

It will mean further loss of Green Belt and by linking Send/Clandon and Ripley almost to Burpham negates the key purpose of the Green Belt.

It will destroy ancient woodland which will increase the risk of flooding.

The excess traffic is unsustainable and will cause extra wear on already poor roads.

The area cannot sustain the increase in population and cars which would result in overloading the infrastructure.

There are gypsy sites close by and no demand for sites for Travelling Showpeople in this location.

I Object to building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch, opposite Send Marsh Road. This site is covered in ancient woodland, which should be preserved. The site is prone to extensive flooding. The industrial space, if required, should be sited at Slyfield and the extra housing is surplus to Guildford’s housing requirement.

I object to policy A43 change at Garlick’s Arch for the following reasons: Again this change totally disregards the thousands of previous objections. It is a beautiful area of Green Belt with very valuable and beautiful ancient woodland – something which is totally irreplaceable. It is a massive development for a village of this size causing Ripley and Send to join up, something which Green Belt land is designed to prevent. Again – another development in this area will massively increase the congestion on surrounding roads, something which is already a particular problem in our area.

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I object to Garlick's Arch being built on as it is a site which is covered in ancient woodland and should be preserved as such. Once our history is destroyed, it will be gone forever and there will be no going back.' The local road infrastructure for Send and Ripley is not suitable if the Garlick's Arch proposal for industrial and housing developments are allowed to go ahead.

The local roads are totally unsuitable for HGV's and any large increase in general traffic.

Site A43 – I object to the proposal of potentially 400 Homes and 7000 sq m of industrial and warehousing use. I object on 3 grounds as follows:-

The number of 400 is completely out of proportion to the Send area existing population

The infrastructure is already inadequate as detailed for Site A43a.

The site includes a large area of ancient woodland which cannot be replaced.

I Object to Policy A43-Land at Garlick's Arch, Send Marsh/Burnt Common and Ripley.
It is proposed that 400 houses and 7000 sq. m of industrial warehousing are built on this site. This site is NEW, was not included in Regulation 18 draft and has not been consulted upon previously. The site in question is within the Green Belt and includes ancient woodland with tree preservation orders in place. With regards to the warehousing why do we need this here in Send? Since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in floor space from the previous draft plan is there really a need for 7000 sq. m of industrial units here?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

You have managed to completely ignore all the previous objections to this development and have increased the houses from 400 to 600 and added 6 traveling show people plots.

The excessive amount of traffic that will be generated from this site will cause immense congestion on already congested roads and lanes in Send and Ripley. Please note whenever there is a problem on the A3, Send and Ripley become gridlocked add in 600 extra homes and we wont be going anywhere!

Our schools are already oversubscribed we only have one doctors surgery which is already under pressure to support the local villages of Ripley, Send and W Clandon.

The site is within the Green Belt along with an ancient woodland and no exceptional circumstances exist. If this development is allowed to go ahead it will join up Ripley and Send defeating the key purpose of the Green Belt.

Why is there a need for 6 traveling show people plots? There is no proven demand for such sites in this location.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to policy A43 Garlicks Arch Send Marsh because this increase completely ignores all previous objections, the traffic is already terrible up to the shell roundabout at to the junction opposite garlicks arch at send march road, it will grid lock traffic all through send and back to old woking. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]. Green belt should always be protected, this is a travesty that our children and grandchildren will blame you all for, Ripley and send will no longer be villages but a town we might as well rename as RIPSENDOFFLY which if approver is what you have done, who would want to buy a home on land with polluted land (lead shot) lets see you and the developer cover that one up to purchasers, ancient wood land and frequent flooding which will be made much worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/4263  **Respondent:** 10906145 / Joe Gervasio  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

I object to the development at Garlick’s Arch. It was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the Borough. Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use previously developed land, but in this draft GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch, which is part of the permanent Green Belt.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding.
- The site has a particular conservation sensitivity since it is covered in ancient woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
- It is a wildlife habitat, but no wildlife report for the site is in the Local Plan.
- There are no plans to improve local schools, medical or utilities to cope.

Moreover, this site was included at the last minute with no section 18 consultation with the local community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/4266  **Respondent:** 10906145 / Joe Gervasio  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). It is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space (which is highly doubtful) it should be at Slyfield where there is a 40ha site available.
Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/842  Respondent: 10906145 / Joe Gervasio  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should ne no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects,

1. i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!) , and
2. ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. a) The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [ than the Burnt Common site did ]”
2. b) The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

I object to the lack of proper infrastructure planning for sites (A43 and A42)
The Foreword to the plan by Paul Spooner includes on page 5:

“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

There lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object to the proposal to develop the Garlick's Arch, Burnt Common area near Ripley & Send. The plan is totally disproportionate to our already overstretched local amenities of schools, roads, doctors etc. The land is green belt and should remain that way. I also believe that the land is part of the flood defences for Send Marsh, particularly the Maple Road development where I live, and I strongly object to any proposal which endangers the welfare of me and my family.

Other sites in the nearby area are also green belt land and should remain that way. There are other brown field sites more suitable for this type of development , if it's needed at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to in particular to the scale of development at Garlick's Arch and Merrow which will produce significant extra traffic volumes into and from Woking via Send Road and Potters Lane. Neither of these roads can safely or effectively handle increased traffic flows.

<tr>
<td>Whilst I think we all realise that there is a need for more housing within the local borough, planning an additional 400 houses <strong>and</strong> industrial space at this site is just reckless. The A247 leading through Send barely copes with the traffic it already has. I realise the idea of Site A43a (new slip road) is designed to avoid just this but realistically it will not happen. It goes without saying that anyone looking to commute towards London will head through Send to Woking to catch a fast service to London (25 Minutes and numerous services in an hour) vs heading over to Clandon or Horsley, a journey which takes nearly twice as long and only every half hour. Many of the secondary schools closest to the area are the other side of Send, heading towards Woking. The A247 is incredibly narrow in parts and cannot be widened. Even with the current traffic there often are long tail backs along that road, especially heading towards the roundabout at Old Woking; the roads in Old Woking also are just too narrow for more traffic. Furthermore; Send just does not have the infrastructure (schools, GP, public transport, local shops etc) to cope with so many more homes / people / cars.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>As for the industrial site; there is sufficient land surrounding Slyfield Industrial Estate; and this should be extended first, before any additional industrial estates are contemplated elsewhere. And if Slyfield cannot be extended</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
for whatever reasons, there are other brownfield sites that should be considered before very precious green belt is. Heavy industrial traffic will result in hugely increased levels of noise and pollution; levels already high enough as it is.

Finally, it needs to be remembered that the site A43 is known to flood; for that reason alone this site should not be built upon. The large area of Ancient Woodland needs to be protected. Woodlands are vital to environmental air control and also our very precious wildlife; something which it sadly seems GBC doesn’t really worry or care about.

I object to 400 homes and 6 Travelling Show People plots.

Unacceptably this ignores 1000s of previous objections

Demand for Travelling Show People Pitches is an unproven requirement

This is permanent Green Belt land and there are NO ’exceptional circumstances’.

This will result in overdevelopment with excessive homes.

This is an ancient woodland dating to the time of Elizabeth I

Ripley and Send will become one and defeat the key purpose of Green Belt

It is Zone 2 flood allocations area and subject to frequent flooding

it is contaminated by lead shot

it will congest further the already busy roads in Send & Ripley

There is no infrastructure to support the residents ie medical services and all three (infant, junior and secondary) phases of education

3/ I OBJECT to building 400 houses and 7000 m² of industrial space at garlics arch. The site floods significantly and is covered by ancient woodland and industrial space is not required in the vicinity where there is plenty nearby at Slyfield.
Guildford's housing requirements have been shown to be exaggerated significantly and they have refused to disclose their calculations. 400 houses will have major impact to Send and Ripley and the infrastructure cannot simply cope with a development of this size. It's too big and must be removed from the local plan. This was also sneaked in at the last minute from a proposal all of 100 houses which is still too many on such valued ancient land.

I STRONGLY OBJECT to the proposed building of 400 houses and 7000m² industrial space at Garlick's Arch.

This is an unbelievably large development for the area. The road systems are already up to and beyond capacity and the extra road traffic from both cars and lorries will be unbelievably bad for congestion and the environment. Undoubtedly this will ruin the aspect of the focal area with regard to both Send Marsh and Burnt Common. This is a development totally disproportionate to local needs and will overwhelm local infrastructure.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to Policy A43, Garlick’s Arch, Send Marsh. This is Green Belt land and should not be touched for development at all. It provides a green lung between the pollution and noise of the A3 and the communities of Sendmarsh and Burnt Common. Building on this lane will exacerbate health issues in the local community in particular those relating to respiratory problems and stress. This policy ignores the thousands of strong objections. By the local communities. This area includes ancient woodland this is rare in South East England. The development will lead to urban sprawl with the joining up of Ripley and Send. The building of 400 homes
in this area will overwhelm the local road system which is already at its limit during peak times (e.g. turning right from Send Marsh Lane onto the Old Portsmouth Road can take 20-30 minutes at rush hour in the mornings before these additional homes are included). The land is not suited to development due to its Flood Zone 2 allocation and need to be decontaminated of load accumulated over fifty years. Also, the Council has not proven the need for Travelling Showpeople plots. The bottom line is that the Guildford Borough Council has not provided evidence for exceptional circumstances to justify development of this Green Belt Land.

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I have a number of points to make about the proposed extra housing around the area of Send and Ripley. It would be nice to receive answers to specific questions rather than an automated answer that goes to every writer. I refer specifically to Garlick's Arch (Policy A43) and Burnt Common (Policy A58).

Does this area actually require more housing? I have heard that this is not so.

If it really is so, I'm not against either of these areas having more houses, on condition that my points (c) and (d) are acted upon, with information about your ideas and plans; nothing has so far appeared.

It must surely be obvious to anybody, as I've said before more than once, that if you build 400 more houses, that means 700 more cars. And yet, at an AGM of our road's Association some years ago (Boughton Hall Avenue is a private road) someone from GBC actually said that 'planning for housing is obtained first, and the infrastructure will follow'. What rubbish! So, to my next point:

If you wish to add housing, what about roads? Newark Lane (and therefore central Ripley) is an appalling snarl-up every morning; make it one-way? Then what about the other way? Re-instate traffic lights at Burnt Common roundabout? Create a north-bound access to A3 to the south of that roundabout, to ease the pressure on Ripley? Add traffic lights to the A2215/Send Marsh road junction? Make the A247 through West Clandon a B road, so that you are then able to add traffic calming devices? It seems to me to be essential that all these points need to be considered *before* you begin to add more houses, yet no mention of any of these points ever appears in what we read.

Houses, please, not travellers' pitches or industry. Industry can be added to Slyfield,

The huge development at Garlick’s Arch is also poorly planned. Aside from the area having a particular conservation sensitivity, covered as it is in ancient woodland, the site is prone to flooding. The idea of putting 7000 sqm of industrial space there seems particularly inappropriate, especially with the nearby Slyfield site still relatively under-utilised and with space available. During the planning meeting held in Send recently a number of speakers decried the ‘solution’ being offered for development of the A3 in this area. Apparently the new interchange would offer nothing to route traffic away from those roads in the vicinity which currently direct traffic to the A3. Indeed this interchange would serve only to further burden the roundabout complex at Burnt Common.

Site A43 – I object to the proposal of potentially 400 Homes and 7000 sq m of industrial and warehousing use. I object on 3 grounds as follows:-

The number of 400 is completely out of proportion to the Send area existing population.

   The infrastructure is already inadequate as detailed for Site A43a.

   The site includes a large area of ancient woodland which cannot be replaced.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Agent: 

Document: Proposes Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the building of 7000sq metres of industrial space and 400 houses at Garlick’s Arch opposite Send Marsh Road. The site floods regularly and is covered by ancient woodland, up to 500 years old, which is home to a variety of wildlife. The industrial space is not required and the additional heavy loads of commercial traffic will need to pass through Ripley village in order to gain access to the A3 and M25. There is already provision for commercial space at Slyfield industrial estate and this should be fully developed before additional sites within Green Belt locations are used. With regards to the 400 houses at Garlick’s arch, the currently existing brownfield sites within Guildford and its surrounding areas should be fully utilised before any housing is agreed within Green Field sites. Guildford has refused to share the methodology behind calculating the upcoming housing requirements and therefore no weight should be given to the use of these calculations when planning additional housing capacity.

I further OBJECT to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I further OBJECT to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan.

I object to a new interchange with the A3 at Burnt Common. Due to the proposed developments in the area; of some 6300 dwellings and 7000 sq metres of industrial space, this new interchange will increase traffic in the Parish considerably. The road infrastructure around Send is just not adequate even under present conditions. It would mean grid lock on most roads around Send particularly on Send Road, Polesden Lane and Sendmarsh Road. We were assured by Councillors from Guildford at a recent Local meeting that the local road infrastructure would be improved to accommodate the extra traffic however the funds that were stated for this work were wholly inadequate and in any event the present road widths cannot be widened [which in my view would be necessary] due to existing houses on each side.

I object to building 400 houses and 7000 metres of industrial space at Garlick’s Arch, opposite Sendmarsh Road. The ancient woodland will be affected and the area is subject to flooding. The industrial space is not needed and in fact some industrial units on Polesdon Lane are currently vacant. Such space should be allocated to brown field sites for example at Slyfield. The increase in population due to this development will overwhelm the Parish schools and medical facilities and as already mentioned the additional traffic will cause traffic jams particularly at peak times as well as being harmful to the health of those living next to the main highways.

**400 houses and 7000 sq metres of industrial space at Garlick’s Arch**

I object very strongly to this development. I cannot believe that anyone would suggest such an enormous development on this land. There seems to be no joined up thinking here. The A3, the M25 and Send Road already grind to a halt many times each day simply because of the sheer volume of traffic. This not only causes delayed journeys but also air pollution from stationary cars. Such an enormous development can only exacerbate the problem as well as cause other pressures on our village.

Comment ID: pslp172/4513  
**Respondent:** 10922913 / Henry Dowson  
**Agent:**

**Document:**  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
4. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
5. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
6. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
7. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
8. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
9. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
10. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
11. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
12. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
13. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
14. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
15. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43) being taken out of the Green Belt and used for development. Government states that need for housing is not an ‘exceptional circumstance’ and therefore there are NO exceptional circumstances to allow building on this site.

I object to the total lack of consultation and last minute addition of (A43) Garlick’s Arch. This came as a complete shock to local residents.

I object to development on the Garlick’s Arch (A43) site as it has wildlife and ancient woodland which has not been taken into account.

I object to development on the Garlick’s Arch (A43) site as it is prone to flooding and therefore unsuitable to build on.

I object to a new proposed industrial site at Garlick’s Arch (A43). It is not needed and there is already room for the proposed 7,000m2 at Slyfield where it is already set up for industrial purposes.

I object to removing Send, Ripley, Clandon, Galick’s Arch (A43), Wisley Airfield (A35) and Gosdon Farm (A25) all from the Green Belt as it would produce an unwanted urban sprawl. There are no exceptional circumstances for these being removed, as required by the National Planning Policy.

The development at Garlick’s Arch for 400 houses. This has not been the subject of any prior consultation and the need is not evidenced.

The proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

The development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

<td>I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.</td>

I object to the development of the 400 houses at Galick’s Arch. It was included in the Local Plan at the last possible moment, with no prior local consultation. It is not required in terms of housing need either for the village or the borough.

I also object to the development of the 400 houses at Galick’s Arch on the basis that the site is liable to severe flooding. The ancient woodland is a particularly sensitive area that must not be disrupted in any way.

I object to the fact that this site was not included in the Regulation 18 draft and has not been consulted upon previously. Full consultation is required.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A43

I object to the above Policy change at Garlick’s Arch which is now 400 homes and 6 travelling show people plots.

Why do the previous thousands of objections appear to be ignored by the Council?

This land is green belt – the Government itself states the following:-

Green Belt serves five purposes:

- to check the unrestricted sprawl of large built-up areas
- to prevent neighbouring towns merging into one another – Send and Ripley will become one if these homes are allowed to be built.
- to assist in safeguarding the countryside from encroachment
- to preserve the setting and special character of historic towns
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land

So as there are no exceptional circumstances why are these being ignored in respect of Garlick’s Arch that has been around for hundreds of years.

I have lived in Send Marsh for 21 years and in all that time there has never been a proven demand for Travelling show people spaces.

Already at peak times it is very difficult to get out of Send Marsh Road onto the old A3 and these homes will only generate additional traffic – additionally if there is a problem on the main A3 all the traffic filters down through the old A3.

I do not believe that sufficient thought has been given to the infrastructure of the whole area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3366  Respondent: 10925217 / AW Winterborne  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to building 400 houses and 7,000 sqm of industrial space at garlics arch opposite send marsh road. the site floods constantly and is covered by ancient woodland, the industrial space is not needed but if it were it should be at slyfeild; Guildford housing requirements have been shown to be grossly exaggerated and they have not refused to disclose their calculations. with proper use of brownfield site, this greenbelt site is not needed!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6528  Respondent: 10925409 / Tina Higgins  Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The Local Plan which does not maximise the use of existing brownfield sites – these should be regenerated and used for housing – in particular the Social Housing which this flawed model does not correctly address. The Brownfield site at Burnt Common should be used for new housing needs and not the greenbelt site at Garlick’s Arch

- The Local Plan does not consider flooding risks (Garlick’s Arch),
- seeks to decimate ancient woodland (Garlick’s Arch),
- does not consider the impact upon wildlife (Garlick’s Arch),

and seeks to include industrial usage on a greenbelt site (Garlick’s Arch) rather than using a Brownfield site (Burnt Common)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the many previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of the village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
• It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.
The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43) Garlick’s Arch is protected from development as Green Belt. To repeat, there are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Plan states the preference is to use of previously developed land but GBC have, for no reason, removed a brownfield site at Burnt Common and replaced it with Garlick’s Arch.

It defies logic that this site could even be considered when there are so many reasons that make it wholly inappropriate:

- The site is liable to frequent flooding. The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore, the Council’s assessment is not good enough to be included in the plan.
- The transport infrastructure would become unsustainable
- It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I object to changes relating to policy A43 Garlick’s Arch because:

- Again you have ignored the thousands of previous objections.
- There are no ‘exceptional circumstances’ required to develop on this Green belt.

- It will generate excessive traffic along the Clandon Road with associated noise and light pollution. This will be made even worse if the adjoining Policy A58 is implemented.

- It would appear that there is no demand for Travelling Showpeople plots.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch, opposite Send Marsh Road. The site is inappropriate because currently it is covered by ancient woodland and is prone to flooding during periods of only light or moderate rainfall. This proposal represents poor planning and management because existing brownfield sites in Slyfield and elsewhere could be used. Furthermore, it is evident that the industrial space proposed is not actually needed but is seen as a stepping stone to further developments in the area. Owing to the notion that industrial
developments beget further developments and the erosion of the Green Belt as a result, I believe that such planning is destructive and ethically wayward. The lack of transparency over the data that supports the construction of 400 houses at Garlick’s Arch reinforces my belief about the planning. I would be grateful if clear data could be presented to support this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the building of 400 houses and 7,000 square metres of industrial space being approved for Garlick's Arch within the Green Belt. If a need for it had been demonstrated in the Plan, it could be located in an existing brownfield area such as Slyfield. Also, the land at Garlick's Arch floods and is covered by ancient woodland and therefore not suitable for housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed Garlick’s Arch development (A43)

I object to the development of 400 houses and 7,000 sq m of industrial buildings and warehousing. There is no need for further housing on top of the 13,860 already proposed for the borough. This site is a new addition to the Plan and was not included in the regulation 18 draft: therefore it has NOT been consulted upon previously. It is an inappropriate location due to the permanent Green Belt status which prevents merging of settlements and is not an exceptional circumstance.

If there is a need for a further 7,000 sq m of industrial space, it should be at Slyfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/6205  Respondent: 10940833 / Natasha Taylor  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The site was inserted in the draft plan at a late stage just before publication of the consultation draft. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys.

Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt. I have seen no evidence in the proposed local plan that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council may have been offered the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land, if needed, could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available.)
Accordingly enabling development was not necessary. The same principle applies here.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

A43 Land at Garlick Arch, Send, Send Marsh/Burnt Common and Ripley

This proposed development of 400 homes and an industrial estate is too large for the area. Admittedly part of the site is a Brown Field site already developed for commercial uses. However the local infrastructure will be unable to cope with the large amount of traffic generated (possibly 1000 vehicles). The suggested new slip road onto the A3 northbound would help to stop vehicles going through Ripley Village. However take a look at the A3 northbound on a Monday morning during the peak time (during term time) and you will see that the traffic is stationary back to Burnt Common, therefore people will still go though Ripley Village to queue jump and that will cause a traffic jam there.

The Greenbelt was created to protect rural communities and to stop urban sprawl. The villages in Guildford Borough need this protection and therefore any plans to erode the Green Belt must be abandoned.

The proposals outlined in the Local Plan do not state how the Borough intends to address the education, health, pollution, and public transport problems that the increase in the population in the area will cause.

To sum it up we feel the number of houses proposed throughout the entire borough is far to large. The erosion of the Green Belt should must not be allowed. The increase of vehicles on the roads will increase the pollution in the area adding to health problems.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the building of 400 houses at Garlick's Arch. Building 400 houses at this location would put undue strain upon the roads and facilities of Send and Ripley and contribute greatly to the creeping suburbanisation of the area. Bear in mind also the close proximity of the new houses to the pollution and noise from the A3 traffic, which will only increase in future years.
I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

I trust that due account will be take of my views.

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.
Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the development at Garlick's Arch because the stream which runs through that area ends up across the road from our house, in Send Marsh Road, and it has flooded in the past. The new development would increase the amount of run-off into the stream, by replacing soft, permeable, vegetated surfaces with new hard sw-faces, and therefore increase the risk of flooding downstream on Send Marsh Road. The development site also has a particular conservation sensitivity as it includes much old woodland. I believe trees which existed in the 16th century would be endangered. The site itself is also subject to flooding.

- I also object to the development at Garlick's Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks' notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.
- I object to the proposed industrial development of 7,000 sq m at Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

**I OBJECT** to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

C.ii. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two
1149

businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I2). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley, and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlick’s Arch
as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

1. The Plan is self-inconsistent in respect of traveller sites.

A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:  
i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!) , and
ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:  
i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!) , and
ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

I object to the potential and ill-defined increase in housing allocation at A43 ***Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43) Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I hereby wish to object to the amendments to the Local Plan having already objected to the original local Plan for many reasons, including the following:

- Any development at Site A43 Garlicks Arch would be on Green Belt land, and there is no identified or exceptional need within the Local Plan documentation
- The inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Green Belt and there is no identified need within the Local Plan
- The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. The Plan is self-inconsistent and therefore not properly constituted.
- The potential of an increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.
- The plan states that “if the [Traveller sites] remains unsold, the future use of the land should have regard to an up to date Traveller Accommodation Assessment (TAA) and Strategic Housing Market Assessment (SHMA), with specific consideration of the use of the land for affordable housing”. So even more travellers pitches and houses, which is unjustified.
- Section 4.2.22 of the Plan states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” So why do 75% of them have to be in Ripley? This is unbalanced and unfair.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The Plan is self-inconsistent in respect of traveller sites. A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22,) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects: i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!) , and ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposed development at Garlick’s Arch. This is ancient woodland plus there is absolutely no justification in that number of houses or the industrial space.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A 43 being changed to 400 homes and 6 traveller sites. You have completely ignored all the objections and the number of homes is totally unjustified. It is ancient woodland of which there is precious little left and will virtually join up Send and Ripley ignoring the reason for Green Belt. Again the traffic will be a nightmare as the roads around are gridlocked during the rush-hour every day.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to this and simply don't understand how development of an area under the protection of green belt can be considered or allowed. What possible "exceptional circumstances" can be shown to make this acceptable? None.

It seems clear to me that the inclusion now of pitches for "travelling show people" is simply a blatant attempt to drive this through despite the thousands of objections you have received! Suggesting there is a need for travelling show people pitches is blatant use of a minority to get your way , even suggesting such a need even exists is ridiculous and I am sure meets some planning exception to allow you to bypass the green belt protection. You should be ashamed. Why would you use some an approach to destroy a lovely and ancient wooded area? Just to build some 400 homes to meet some central government quota which takes NO consideration of impact, you would destroy this land? appalling. This is unacceptable and should not proceed.

I would like to object to the Garlick’s Arch land being included in the Guildford Local Plan for housing or industrial development.

Being a resident of the Send Marsh ‘Wimpey’ Estate, we overlook the Garlick’s Arch land with only one row of houses and the Old Portsmouth Road between us and the boundary to the land, and have lived here for sixteen years. We therefore have quite a ‘working knowledge’ of the area, its roads and local services.

The Site

Although the Garlick’s Arch land, from a plan view on a map, looks to be a perfect housing development site, let’s look at it closer.
Firstly, there is a watercourse that weaves across the centre of the land – this stream crosses under the Old Portsmouth Road and then along the backs of the houses opposite our home on Maple Road. This stream has flooded on a number of occasions before affecting a number of the homes in Maple Road and Send Marsh Road. I feel sure that the new development would not allow surface water drainage to be fed into our already overloaded local drainage system so the water will be discharged into the stream presenting an increased risk of flooding to our existing homes.

The land is bordered by two main roads – the A3 to the south east, and the Old Portsmouth Road to the northwest. We can hear the A3, quite loud at times, even though Maple Road is at least 500 metres distant at the closest point – Homes on the Garlick’s Arch land could be within metres of this major artery to London and the M25, placing them in Noise Exposure Category Zones C and D (Planning Policy Guidance No. 24).

1. Noise Exposure Category Zone C is classified as land that “Planning permission should not normally be granted. Where it is considered that permission should be given, for example because there are no alternative quieter sites available, conditions should be imposed to ensure a commensurate level of protection against noise.” Please note the underlined phrase – there are other local sites much more distant from the motorway network such as the Wisley Airfield site which would be much more suited to residential development.

2. Noise Exposure Category Zone D is classified as land where “Planning Permission should normally be refused.”

A proportion of the land is wooded – it would be unacceptable to lose this habitat and tree screen between the A3 and our estate.

This land is Green Belt ... other than a few houses and a small business unit, the proposed site is undeveloped fields and woodland. Wouldn’t it be better to build on brownfield sites, such as Wisley Airfield which, despite claims to the contrary, is brownfield as it has a 70m x 2.0km strip of concrete runway (14 hectares) down the middle of the site along with 1.2 hectares of other hard surface for hangers, taxiways and maintenance areas.

The Surrounding Area

The Garlick’s Arch land acts as part of a ‘separator’ between Send and West Clandon, helping to maintain the individuality of the villages rather than allowing them to melt together into one large mass of housing.

Local Roads, Infrastructure and Services

• The increased traffic flows onto the Old Portsmouth Road from an additional 400 homes on the Garlick’s Arch land would only make the already appalling traffic conditions here worse. In the morning it often takes 5-10 minutes to turn out of Send Marsh Road onto the Old Portsmouth Road, there are traffic queues into Ripley Village, there are queues and the Burnt Common Roundabout, there are queues trying to get into Send Village, and accessing the A3 southbound can be a challenge (and you have to go through Ripley if you want to go north on the A3).

• The few local schools – Send Primary and Ripley Primary – are already full to bursting point. Between them, they have only 90 places to offer every year and their buildings would not take further expansion without massive investment, the overloaded surrounding roads inadequate already to deal with the daily school-runs.

• It is already difficult to get to see a Doctor on the first day of an illness – an additional 1800 people (400 homes with two adults and 2.7 children) would make it impossible to get medical advice when you need it at the local surgery.

• Local services and organisations – such as Send Help, Little Owls Nursery, Send and Ripley Scouts and Guides are all current stretched to the limit ... the area just cannot take any more people.

I realise that my one voice doesn't count for much, but mine is one voice in a crowd of other voices all quoting the same thing, "Please, not Garlick's Arch!".

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from...
the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
A43: Land at Garlick’s Arch, Send March

Now 400 homes and 6 Travelling Show People plots

- I object to the Policy A43 change at Garlick’s Arch because:
  - It ignores all the thousands of previous objections made by local people
  - There is no proven demand for Travelling Show People plots in this location
  - It is beautiful permanent Green Belt and no “exceptional circumstances” exist
  - It will cause over-development of our village and the number of homes is excessive
  - It is exquisite ancient woodland that existed at the time of Elizabeth 1
  - It will join up Ripley and Send and defeat the key purpose of Green Belt
  - It is contaminated by lead shot accumulated over fifty years
  - It will generate excessive traffic that will block up the local roads of Send and Ripley.

Comment ID: pslp172/3764  Respondent: 10953569 / Karen Church  Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write with reference to the local plan and in particular the changes to the site A43 Land at Garlick's Arch, Send Marsh Burnt Common and Ripley. In section 4.2 Housing Policies, Policy H1 section 7 states:

(7) Accommodation for Gypsy, Traveller or Travelling Showpeople (whether they meet the Planning Policy for Traveller Sites definition or not) accommodation should be provided on development sites of 500 homes or more whilst there remains an identified need. For 500 to 999 homes two pitches or plots should be provided, for 1,000 to 1,499 homes four pitches or plots, for 1,500 to 1,999 homes six pitches or plots and for 2,000 or more homes eight pitches or plots.

The land at Garlick's Arch is proposed to have 400 new homes built on it making it too small a development to include accommodation for travelling show people.

The impact of the 400 new homes (excessive for the size of the site and surrounding area) in the small village of Send and the impact on the traffic on the Portsmouth road can only be made even worse with the addition of the large vehicles, that usually travel in convoy, that are associated with travelling show people.

The future of the area and indeed the whole country is going through a period of extreme change and uncertainty following the country's decision to leave the European union. Foreign investors who bought property and left it standing empty purely because it would increase in percentage value better than any bank interest rate have stopped buying property. There has also been a slowdown in migration into Britain from EU countries. This will reduce the strain on the housing market and hopefully the government will put steps in place to get some of the hundreds of thousands of empty properties in the country available to rent or buy. I strongly believe we should protect our green belt land and keep our villages within it. There are may steps that can be taken to improve the housing situation without concreting over the south east of England.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4205  Respondent: 10953793 / Hugh Thomas  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to 400 houses and 7000 sq metres of industrial space at Garlick’s Arch being brought forward as a last minute proposal without any warning and without it having been mentioned at all in the earlier Draft Local Plan. This attempt to push it through under Regulation 19 instead of Regulation 18 and thereby deny residents a proper process of consultation is a further manifestation of the contempt in which Guildford Councillors hold the electorate. This is a clear breach of administrative law.

I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch because the site includes ancient woodland, too valuable to destroy. The site floods as photographic evidence and local testimony can confirm as a result of the East Clandon stream overflowing and surface water being trapped.

I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch since this would increase the number of dwellings in Send (including Send Marsh and Burnt Common) by about 25% without a commensurate increase in services and infrastructure. There is already severe pressure on doctors’ surgeries, school places and other essential facilities which would seriously worsen. Infrastructure issues are substantially the responsibility of Surrey County Council but there is no evidence that SCC has formulated an infrastructure plan, or the means by which the infrastructure would be paid for, in respect of this site or any other site. What we were told at one public meeting, that the council thinks about infrastructure afterwards, is typical of a woefully inadequate approach to the whole Local Plan.

I OBJECT to 7000 sq metres of industrial space at Garlick’s Arch because the space is not needed since there is inadequate take up of existing space in the area, but if it were needed it would make very much more sense to locate it at Slyfield. In any event Garlick’s Arch is an unsuitable location for industrial space given the proximity of existing houses.

I OBJECT to this policy

Comments: gridlock on the Portsmouth road, particularly when considered together with the Wisley Airfield proposal!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches  
2. It ignores all the thousands of previous objections made by local people  
3. There is no proven demand for travelling show people plots in this location  
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.  
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.  
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.  
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.  
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.  
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.  
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.  
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)
Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1407  Respondent: 10956161 / Pauline McCallister  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to the extended development in the Green Belt (Policy P2, Site A43)
I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

1. I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks
Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. a)The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [ than the Burnt Common site did ]”
2. b)The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.
The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

C.ii. Policy A43 Garlick’s Arch – My Objections

I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

It ignores all the thousands of previous objections made by local people

There is no proven demand for travelling show people plots in this location

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one
another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.
Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/3283  Respondent: 10957313 / R Holmes  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- Proposed site is Green Belt. All Green Belt land must be protected.
- Significant adverse effect on quality of life for existing local residents and the character of the locality.
- Local Infrastructure is totally inadequate.
- Access road network not adequate: the traffic along the A3 is at a standstill at some point most weekdays (and some weekends) between Burpham and the A31 Hog’s Back junction and northbound at peak times towards the M25 at junction 10. If there is a problem on the A3 northbound towards the M25, Motorists try to beat part of the traffic jam by taking advantage of the B2215 London Road slip road to continue via Burnt Common and Ripley and filter back onto the A3 near Wisley. Obviously this causes even more Queues on Local Roads. If there are any major incidents on the M25, again local roads become more congested than normal.
- Local Link Road Networks would not cope with the added number of cars, let alone cans and lorries. There are already queues at peak times on the A247 at the old Woking roundabout the Burnt Common Roundabout and the B2215 into Ripley
- Much more pollution for the area – noise, light, air.
- Site covered by ancient woodland.
- Potential for increased crime and nuisance (Nearest Police station was in Ripley but has now been closed)
Community Issue Re Housing: Medical Centre in Send Barns Lane (Shared with Send, Send Marsh, Burnt Common and Ripley) – Difficulty Getting Appointment Now and no public transport operates along send barns lane to the centre.

There are no busses towards Woking on a Sunday at present and bus times (Mon-Fir) would need to increase at peak times and later in the evenings back from Woking railway station (Last bus back to Send/Ripley is currently 19:30 hrs)

The cycling network is not adequate or safe. It will be even worse if more cars, van and Lorries come into the area. If the council really mean to encourage more cyclists then the cycle lanes need to be separate from the roads. Putting dotted lines on the roads is no good and not safe.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

With regard to public transport, I mentioned that he last bus back from Woking mainline railway station was at 1930hrs. This service has been cut and now the last bus back from Woking that goes past Send Marsh Green and then Burnt Common is at 1820hrs. this time is unacceptable for any commuters/daytrippers and will mean an increase in the number of cars using the already congested roads.

I not only object to the 400 homes but also to the additional proposal of 6 travelling showpeople plots for the same reasons as set out in my original objection response dated 15 July 2016.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to register my objection to the inclusion of Garlick's Arch development in new local plan.

Gbc have not only failed to follow correct process but this policy A43 was introduced in cynical, dishonest manner without due consultation. The site is green belt covered in ancient and precious woodland with trees and wildlife we have a duty to safeguard.

The industrial development is not required at this site - if indeed it is at all required, which is questionable, then Slyfield is the obvious choice.

The roads between Ripley, Send and Guildford are already gridlocked in rush hour. To increase traffic by allowing this proposal is detrimental to health and welfare of community; dangerous for area with high numbers of children - and grossly negligent to what is permanently protected green belt land.

I strongly object to the Policy A43 at Garlick's Arch and urge you to reject this proposal.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 at Garlick's Arch because it ignores the huge amount of previous objections made by local people such as myself.

There is no proven demand for Travelling Showpeople plots in this location and the over development of our village and the number of homes proposed is totally excessive.

The impact on our roads is very worrying and dangerous as lots of local children walk and cycle to school and the roads cannot cope with any more traffic and congestion.

The negative impact on destroying the Green Belt is obvious and this must be protected at all costs. Frequent flooding would be much worse and natural habitats for animals and insects destroyed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site (Policy 14).

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/ further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick's Arch is protected from development as it is classified as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The site is wholly inappropriate because:

- There is no sustainable transport infrastructure
- The site is liable to frequent flooding
- The site has ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: PSLPS16/4235 | Respondent: 10959009 / Rebecca Claridge | Agent: |
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43 |

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which
forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

OBJECTION
Green Belt Ripley and Horsley Surrey – PLEASE REMOVE Garlicks Arch and other sites on green belt land from the Draft Local Plan

I object to the draft Local Plan including Green Belt areas in Ripley Surrey and Horsley as well as Former Wisley Airfield Ockham

Please remove Green Belt sites from the draft Local Plan

There is plenty of land within the Guildford Borough for development without touching Green Belt

Richard Rogers renowned Government Advisory Architect has confirmed that there is no need to touch Green Belt Land for development in England

There is plenty of derelict land to develop

Developers are sitting of enough land to meet all housing needs but land bank, for profit

Why not address this and encourage development on land held by commercial developers?

Please remove Green Belt from your draft local Plan and retain the green belt sites and ensure Surrey villages are protected from monstrous developments overwhelming the size of the villages and hamlets

Please do not change the status of Green Belt Sites in Guildford Borough

I object on this basis to the draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the development at Garlick’s Arch for 400 houses because it was brought to our attention at the very last moment with only 2 weeks’ notice and without any prior consultation with the residents and is not required in terms of housing need by either the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. Should there be a credible need for this space, it should be located at Slyfield where there is already an industrial estate and there is a 40ha site available.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Similarly, I object to the development at Garlick’s Arch for 400 houses. The late introduction of this site into the Local Plan, without any prior consultation, is solely due to the availability of private funding for the proposed new interchange proposal at Burnt Common in conjunction with the Wisley development. It would never be considered for development on its own merit due to its ancient woodland and its susceptibility to flooding.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

I write with reference to the draft local plan and its impact on the Green belt and in particular the villages of Ripley and Send. I am a resident in Send Marsh and moved to this area three years ago specifically because it was in the green belt and therefore should be protected from over development. Whilst I can understand the need for some expansion in the housing stock and I am encouraged by the number of brownfield sites in the local plan, the proposed 400 houses and 7000 sq m of industrial units and warehousing at Garlick' Arch, Burnt Common on green belt land is completely over the top. It is not in keeping with the housing density of the surrounding area and there are no plans to increase any services to
support the potential 800 people and their children that could live there. The road network around Ripley and Send cannot support the extra traffic that this number of properties would generate. There are already long queues through all the villages at rush hour with the current population.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk.
road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/ Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6022  Respondent: 10962689 / Martin Ladd  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge.
concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4450  Respondent: 10962689 / Martin Ladd  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I am emailing to register my STRONG objections to the new proposed local Guildford Plan.

I object: Firstly, the proposed development at Garlicks Arch, site A43 is on green belt land - this land is protected and should NOT be built on. There is no need for this communicated by the Local Plan documentation.

I object: The potential increase from 400 houses at site A43 Garlicks Arch will be harmful to the rural nature of the villages of Ripley and Send. These are small rural villages that will be destroyed with this level of development. Please listen to its inhabitants!!!! This increase is not justified by the local plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object: The allocation of 6 travelling Showpeople plots with storage facilities is completely inappropriate for the rural area. Associated traffic will also be a great problem.

I object: Whilst the Plan (Section 4.2.22) states that there are sufficient sites for 8 plots for Travelling Showpeople - why do 6 of them have to be in Ripley???? This is unfair and badly planned.

I object: The plan is inconsistent in regards to the travelling Showpeople plots - according to the 2017 plan, these plots are also designated as housing. This plan is poorly thought out and is inconsistent.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch. No consultation took place on this, and GBC’s Green Belt & Countryside Report does not even cover Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding.
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without transparent justification – if indeed it can be justified. Furthermore, the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the development at Garlick’s Arch for 400 houses because it was sprung on Send and Ripley at the last moment with only 2 weeks’ notice, without any prior consultation and is not required in terms of housing need either for the villages or the borough.
2. I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding. Any development here would be permanent and in perpetuity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4205  Respondent: 10967489 / Jenny Jackson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the allocation of 6 Traveling Showpeople sites in A34 ‘Garlick’s Arch’

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan. NB: A travelling showpersons site with associated storage is completely inappropriate in a rural environment, and I note the intention to release this land for additional housing in the future, should it prove an unnecessary allocation.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burnt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm… (site allocation A25) [ than the Burnt Common site did ]”

The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (Burnt Common and Garlicks Arch – which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives. A58 Burnt Common provides more than the “required” industrial space, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4521  Respondent: 10967649 / Ian Cornwall  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming even more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

I object to building 400 houses and 7000sq metres of Industrial space at Garlicks Arch for the following reasons:

- on environmental grounds: this is on ancient woodland and on largely undeveloped land. If additional industrial sites are required they should be on brownfield sites for example at Slyfield or if really needed in the area at Burnt Common, where there is already some industrial development

- the addition of this number of houses would alter the character of both Ripley and Send and would put significant additional strain on the infrastructure (roads, schools, health)

- the development was not mentioned in the previous consultation document

I object to the Policy A43 change at Garlick's Arch, Send Marsh because:

- It ignores all the thousands of previous objections made by local people
- The is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no ‘exception circumstances’ exist
- It will cause over development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join p Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over 50 years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Comment ID: PSLPS16/1688  Respondent: 10970337 / Chris Crawshay  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of the 30 hectares of Garlick's Arch in this Plan. This site is new and was not included in the Regulation 18 Draft, and has not been consulted on previously. It forms part of the Green Belt and is permanently protected by the NPPF, which is there to prevent the merging of settlements. It also contains around 5 hectares of ancient woodland, some of which dates back to the 16th century.

Any further industrial space required could easily be accommodated at Slyfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4384  Respondent: 10970497 / Michael Cook  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt
is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the
neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley
will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on
the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100
or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been
assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of
river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be
re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss
of four existing successful rural businesses, which have been in existence for over 30 years and another two
businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their
premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will
have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs
centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road
infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for
example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon.
The proposed development under the plan will cause greater congestion in and around our villages. The Plan
does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send
are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.
I object to the development proposed in the local plan, which will result in more traffic using these narrow roads
and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from
parking problems. Further development around these villages will only result in more traffic and more parking
problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley,
the roads serving the village will become even more congested. Cycling has become a popular past time,
particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no
proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents
involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development
will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of
improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the
infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have
been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development,
the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to
capacity, such as the electrical network and sewers. No plans to improve these services should mean no
development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the
Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
already at capacity and suffering from funding cuts or freezes. Any further development without funding will
place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no
certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion
during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35),
Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk
road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Policy A43 - Garlick’s Arch

- Ignores all the thousands of previous objections
- What case is there to dump Travelling Show People at this location
- It is Green Belt and these policies are not "Exceptional Circumstances"
- Change the current the whole nature of Sendmarsh beyond recognition
- Destruction of Woodland that has been in existence since Elisabeth I
- Ripley and Send will cease to be separate entities - just one continuous housing scheme
- The traffic flow is already terrible at rush hours and no plan (a3 extra access) will alleviate this - such proposals are hogwash and trying to coin people

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

** I object to the employment strategy and impact on Garlicks Arch (A43) (Policies E2 and E5) The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of
Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** pslp172/4633  **Respondent:** 10987905 / Marika Chandler  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be
dependent on the car for transport. Greater consideration should be given to increasing the density of
development in urban areas, such as Guildford, where more practical sustainable transport options can be
provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion.
Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the
environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there
to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt
is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the
neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley
will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on
the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100
or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been
assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of
river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be
re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss
of four existing successful rural businesses, which have been in existence for over 30 years and another two
businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their
premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will
have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs
centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road
infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for
example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon.
The proposed development under the plan will cause greater congestion in and around our villages. The Plan
does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send
are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.
I object to the development proposed in the local plan, which will result in more traffic using these narrow roads
and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from
parking problems. Further development around these villages will only result in more traffic and more parking
problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley,
the roads serving the village will become even more congested. Cycling has become a popular past time,
particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no
proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents
involving cyclists as a result of the development proposed under the local plan.
18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development
will result in the roads becoming ever more dangerous for pedestrians.
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of
improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the
infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have
been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development,
the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to
capacity, such as the electrical network and sewers. No plans to improve these services should mean no
development of the Garlick’s Arch site.
22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of
this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

I OBJECT to policy A43.30 the development of new four way interchange onto the A3 which would mean that narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already crowded and vulnerable to traffic jams. Further traffic from this development would result in permanent gridlock. It simply would not work.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A43

I OBJECT to the development at Garlick’s Arch for 400 houses and 7,000 m2 of industrial units because according to the latest Employment Land Needs Assessment 2015 (ELNA) shows a 80% reduction in the requirement for employment floor space from the previous draft plan. I also object in the way it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation. This is not required in terms of housing need either for the village or the borough Approx 50% of the area is subjected to flooding, it contains two Ancient Woods Which do have some protection under the NPPF guild lines clause 118 this, amount of development will destroy the woods. Space exists at Slyfield for the industrial units and the residential property should go into Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6800  Respondent: 10992225 / Emma Ringshaw  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is for making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this
site. Why was a brownfield site removed and replaced by a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light to local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, and these will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no need for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but
The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the development at Garlick’s Arch. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the potential increase from 400 houses at site A43 Garlicks Arch. It is harmful to the rural nature of the surrounding villages.

I would like to object to the latest changes to the plan.

I object to Policy A43 , Land at Garlick’s Arch Send Marsh, because it will cause overdevelopment to the local area and will generate a level of traffic which the village cannot cope with. The village already struggles to cope with existing traffic levels. The number of homes is excessive.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.
Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2052  Respondent: 10995297 / Peter Cormack  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on their way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.
18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for
turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO the late inclusion of site A43 Garlicks Arch. This has been slipped in at the very last moment without proper consultation. The added 400 houses will cause overcrowding of our schools and doctors surgery. Our Villages Medical Centre is already over subscribed and difficult to get doctors appointments. Another 800 minimum people would completely swamp this facility. The 7000 sq mtrs of industrial area would also increase the amount of Commercial Vehicles in the area using the local roads. We hardly need industrial buildings, as past developments have stood empty for years.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO building 400 houses and 7000 sq meters of industrial space at Garlick's Arch, opposite Send Marsh Road. This will create unsustainable amounts of traffic on the already extremely busy Send Marsh Road and Portsmouth Road. The queue of traffic is often down as far as the Saddlers Arms pub. It will become impossible to get onto Portsmouth Road with any additional houses or industrial space.

Some of the new development is intended to be "affordable" housing. Surely it makes more sense to build these closer to the areas, and public services, where jobs are based, i.e. Guildford itself, to prevent increased volumes of commuters down the A3? Why doesn't Guildford Borough Council consider building 'upwards', on existing or redeveloped sites, instead of destroying woodland in the Green Belt?

In addition, building on this site increases the risk of flood, in an area already prone to flooding.

I object to the proposed development at Garlick’s Arch, Burnt Common, Policy A43

This is partly ancient woodland, and the proposal to develop it with a mix of industrial warehousing and residential properties would undoubtedly lead to the loss or damage to these ancient trees, plus the resultant run off of rainwater would increase the likelihood of flooding to properties including my own further downstream, it would appear that no consultation with the environment agency who recently invested in flood defences along our stretch of the East Clandon Stream has taken place.

I object to your Policy A43,

Again you have ignored all previous objections and offered no alternative plans to alleviate the concerns of local residents.

No demand for Travelling Showpeople has ever been shown or proven to exist.

The government is at this time reviewing in a White Paper its housing policy to protect " Aged or Veteran Trees and Ancient Woodland" yet you are proposing to build over them!

The land is in a flood zone 2 category area and any development will undoubtedly increase runoff into the East Clandon Stream which has in the past flooded local properties and is at this time being re surveyed by the Environment Agency.

This proposed development will also increase pressures on local roads, Schools and Medical facilities.

I would like to register my strong objections to the 2016 Draft Local Plan.

The NPPF prevents the merging of settlements without any exceptions. There are no exceptional circumstances.

Why has this been proposed?

I object to the proposed development of land at Garlick’s Arch Burnt Common. Policy A43/A43a. There are ancient woodlands at Garlick’s Arch and this area should be conserved, there are trees dating back to the 16th century which could be felled or damaged. Also adding 400 homes and 7000 sq m of various types of employment space as well as new 4 way junction for the A3 would cause significant stress on local services and roads, which are already unable to cope. This site presents a significant change from the Regulation 18 consultation in 2014. Where is the infrastructure??

I object to Policy A43 – Land at Garlick’s Arch, Send Marsh
Travelling Show People plots in this location? **There is no demand.** The number of homes is too great and will cause over-development of our village. **Our wonderful, beautiful ancient woodland that existed at the time of Elizabeth I cannot not be chopped down.** The government is at this moment reviewing the protection of ancient woodland and greenbelt. **Send and Send Marsh are already subject to flooding frequently and is currently a flood zone 2 allocation.** Lead shot has accumulated over fifty years so parts of the area is contaminated. **Send and Ripley and local areas are already too congested with traffic this proposed development will just exacerbate the problem.** The traffic noise is already at an unbearable level.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to proposal A43 concerning housing development at Garlick’s Arch. I object because the development means the loss of ancient woodland, rare in this area, which is home to local fauna, notably hares in this instance, and which is full of bluebells in spring. I object because I believe the woodland helps to keep noise from the A3 at bay, protecting Send Marsh residents in particular. I object because the villages of Send, and indirectly Ripley, are ill equipped to accommodate such a large development. I object because there is a very poor bus Public Transport network linking the villages to Guildford, Woking and towns further afield, and it will additionally mean more environmental damage with everyone relying on their private vehicle because of the lack of buses. I object because for Send this means an increase of 25% in the number of residents and it is not fair that one small village should be swamped by this development. I object because the villages do not have the required infrastructure: overstretched medical facilities, a lack of Junior/Primary School spaces, insufficient shops, as well as a paucity of Secondary education places in this area, meaning children being transported at cost by numerous coaches morning and evening to ensure they arrive at their place of education. I object because the Portsmouth Road will become even more of a nightmare owing to congestion from traffic. I object because a much smaller housing development was rejected a few years ago and the same reasons for the application being turned down then still exist (the refusal stated that the application represented inappropriate development in the Green Belt and also was unacceptable for various reasons because the site was within the 400m to 5km zone of the Thames basin heaths Special Protection Area - has the TBHSPA moved?), so I fail to understand this more recent, unexpected, proposal.

I object to this proposal A43 in addition on the grounds that an industrial site is totally out of keeping with the locality and totally undesirable adjacent to a housing development. The proposed four way junction on the A3 here is, I
understand, being facilitated by the permission granted to the landowner for the housing development. I object that this payback is disproportionate. I object because it suggests that financial greed is an overriding factor in considering this development, not a well considered plan to provide accommodation for a needy population.

I object to proposal A43, i.e. the north and south bound slip roads onto the A3 which were considered inappropriate when the road was constructed. I object because the local residents will suffer undesirably from the increase in traffic and noise. I object because some of the adjacent land is currently farmed and increased pollution will be unacceptable. I object because it will bring yet more traffic from outside the village through Send, especially large vehicles, and there is already an issue at peak travelling times along the A247 including Send Road, Send Barnes Lane and Broadmead, not to mention the road through West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

My second objection is to Policy A43 where 6 Travelling Showpeople Plots are now proposed. I have already objected to the number of proposed new homes and these objections stand. Now I would like to know: What evidence and which "exceptional circumstances" are being used as justification for this new requirement? The proposal to remove an ancient woodland with its wildlife population and replace it with residential development and Travelling Showpeople Plots is ignominious. The development here will create one vast housing estate in combination with the Send Marsh (Wimpey) estate on the other side of the road and more or less join up Send and Ripley.

I see no way in which Send and Ripley can accommodate such an increase in demand for medical facilities, schools and shops. I am sure you can also see that there will be another inevitable increase in the traffic using the local roads which are already busy and congested for a large part of each day. Here I will point out the speeds of the vehicles travelling along Send Barnes Lane in the vicinity of Send Primary School. There is a real danger to the school children at the start and end of the school day. The attempt to reduce speed by moving the speed restriction sign has not been very effective.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is protected from development as it is classified as Green Belt. There are **no exceptional circumstances** which allow for its removal from the Green Belt (Policy P2).

Central Government state clearly that housing need is **not** an exceptional circumstance.

The site is wholly inappropriate because:
• There is no sustainable transport infrastructure
• The site is liable to frequent flooding
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham
School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.
The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

I object to the employment strategy and impact at Garlick's Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick's Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

I OBJECT to Policy A43 (400 houses & 7000 sq metres of industrial space at Garlick’s Arch).

The site includes ancient woodland which must NOT be encroached upon by any extent.

Additional traffic and noise will severely and adversely destroy the Green buffer between the A3 and Send.

Adoption of this policy and will set a precedent for further development along the A3 corridor between M25 and Guildford.

All traffic into and out of this site will route through Send’s already busy roads, and industrial area will generate unacceptable levels of heavy vehicle traffic.

Send must NOT become a Local Rural Centre.

The site must NOT be developed and the Policy must be abandoned

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick’s Arch as it again completely ignores the thousands of previous objections made by local people. I feel very strongly that this will cause over-development of our village with an excessive number of houses which will destroy ancient woodland, which is permanent Green Belt land where no "exceptional circumstances" exist. As well, it will generate excessive traffic which existing local roads in Send and Ripley will not be able to cope with. We already have frequent traffic chaos from traffic using the village as a cut through from the A3. The proposed development will also join up Ripley and Send and defeat the key purpose of Green Belt. I also object to the siting of Travelling showpeople on this site when there has been no proven demand at this location.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object. As a local resident I object on the grounds that 400 home & substantial industrial building will put significant strain on the local infrastructure particularly the already busy roads and in terms of the homes strain on the doctor surgery & local schools with no outlined plan to mitigate the risk. The requirements to pay “significant regard to the ancient woodland within the site” does not guarantee all said woodland will be protected and preserved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposal to build 400 houses together with 7000 sq metres of industrial buildings at Garlick’s Arch. Many of us in Send live on a flood plain with an archaic drainage system and we do not wish to have this exasperated; Garlick’s Arch is also subject to flooding and is on a higher level. I feel strongly that this is not the area for industrial buildings – this is a village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed development at Garlicks Arch. There is no justification in destroying fields and woodland, there is absolutely no justification for adding traffic to an already overburdened road system. You may consider that the Ripley By Pass was constructed to alleviate the traffic in the area. What possible motive is there to completely negate the
purpose of the by pass. Every morning the main A3 is blocked from the M25 back to Burpham. Great idea to put 400 houses to add even more traffic that tries to cut through our villages.

The council is elected to represent the views of its residents, not to empire build.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk roads.
road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

400 houses and 7000 sq. metres of industrial space at Garlick’s Arch

I object to this development.

The infra structure of Send, Ripley or Clandon could not possibly support this size of development. The roads, schools, doctors etc. are already over stretched.

This is a Green Belt site of ancient woodland that is prone to flooding. It would be totally wrong to build factories or houses on it. What is the evidence that we need additional industrial space? Also it appears that the housing needs of Guildford are being hugely exaggerated.

Even if there was a need for this development this site would increase the traffic flow onto the A3 and the M25 which are already extremely overburden. It can take 45 minutes to travel three miles south on the A3, past the Wooden Bridge bypass, almost every day during busy periods. Not to mention Northbound towards the M25 which can be at a standstill for long periods on a very regular basis.

Why was this development not listed on the original Local Plan? How could such a huge development be such a last minute thought? It sounds extremely suspicious!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed industrial site at Garlick’s Arch. There is no need for such a site. The Employment Land Needs Assessment 2015 shows a reduction in required employment floor space from the previous draft plan. If the Council truly believes there is a need for such a large amount of industrial space it should be located at the current Slyfield site.

I object to the development of the 400 houses at Garlick’s Arch. It was included in the Local Plan at the last possible moment, with no prior local consultation. It is not required in terms of housing need either for the village or the borough. Also the site is liable to severe flooding and the woodland is a particularly sensitive area that must not be disrupted in any way.

I object to the fact that this site was not included in the Regulation 18 draft and has not been consulted upon previously. Full consultation must take place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A43 I object to the development of Garlick's Arch. This is supposed to be an area of permanent Green Belt with ancient woodland from Elizabethan days and, so far, no exceptional circumstances have been put forward to explain why the land should be used for development. The addition of 8 Travelling Showpeople plots is unnecessary. This is the entire complement of this type of plot required of Guildford Borough Council. Why are all to be at Garlick's Arch when it is an area of outstanding beauty?

In addition, this area is prone to flood with a flood zone allocation 2. If developed, this flooding will be intensified to the detriment of the surrounding countryside.

I am still unclear where all the children from this development will go to school. Send School has no capacity.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. The Garlick’s Arch site is attractive open countryside and part of the permanent Green Belt which is protected under the National Planning Policy Framework. It also represents unrestricted sprawl. The site has a particular conservation sensitivity since it is covered in ancient woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600. The site is also subject to flooding.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to building 400 houses and 700 square metres of industrial space at Garlick’s Arch. This land, opposite Send Marsh Road has the distinguished heritage of being ancient woodland. It is inappropriate to consider building on such land, not only because of its provenance, but also because it tends to flood. Industrial buildings, even if they are genuinely required, would be better sited at the existing Slyfield industrial estate. Guildford’s housing needs have been markedly over-estimated: no calculations as to how the supposed number of new houses required have been made available for scrutiny. This serves to further undermine Guildford Council’s position.

If new houses really do need to be built, a far more sensible approach would be to utilise brownfield sites. Once green fields and woodland have been submerged in concrete they are lost and gone forever. Not just for our generation. Not just for the time being. For generations to come. What an appalling legacy.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
I object to the proposed development of Garlick's Arch (both residential and industrial) and Gosden Hill because it breaches green belt and would be an example of ribbon development with building creeping down the A3.

I object to the way that Garlick's Arch was incorporated into the local plan at the last minute without proper consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Land at Garlick's Arch (Policy A43):

This potential ribbon development along the A3 will, as above, clog up already busy local roads, which are already struggling to cope with ever increasing traffic volumes.

There is widespread opposition to the excessive scale of the development proposed, which will blur the distinct village characters of Ripley and Send by making the whole area just one large dormitory.

I object to the provision of traveller plots, [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature].

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

15.1 OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the
Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4567  Respondent: 11023585 / Jean Walker  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore,
there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be
dependent on the car for transport. Greater consideration should be given to increasing the density of
development in urban areas, such as Guildford, where more practical sustainable transport options can be
provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion.
Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the
environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there
to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt
is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the
neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley
will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on
the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100
or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been
assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of
river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be
re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss
of four existing successful rural businesses, which have been in existence for over 30 years and another two
businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their
premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will
have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs
centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road
infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for
example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon.
The proposed development under the plan will cause greater congestion in and around our villages. The Plan
does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes under the villages of West Clandon, East Clandon, Ripple, and Send
are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.
I object to the development proposed in the local plan, which will result in more traffic using these narrow roads
and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from
parking problems. Further development around these villages will only result in more traffic and more parking
problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley,
the roads serving the village will become even more congested. Cycling has become a popular past time,
particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no
proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents
involving cyclists as a result of the development proposed under the local plan.
18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development
will result in the roads becoming ever more dangerous for pedestrians.
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of
improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the
infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have
been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development,
the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to
capacity, such as the electrical network and sewers. No plans to improve these services should mean no
development of the Garlick’s Arch site.
22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

A43 Land at Garlick’s Arch, Send

- The land is floodplain for Clandon Stream, putting housing in this area at risk of flooding as well as housing further up and down stream due to no replacement floodplain being provided.
- Area of ancient woodland and associated wildlife will be impacted on by the developments
- The local adjoining roads do not have sufficient capacity (especially at rush hour) to take additional traffic that would be generated by this development.
- The proposed industrial usage is not required. There are currently empty units next to the existing industrial area and the nearby Slyfield industrial estate.
- Public transport is not sufficient meeting demand of potential additional passengers to encourage vehicles to be left at home to undertake local journeys.

I object to the 2017 Revised Local Plan by Guildford Borough Council (GBC) for the following reasons:

Housing at Site A43 Garlicks Arch would be on Greenbelt Land.

The potential increase from 400 houses at site A43 Garlicks Arch is extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and there is no identified need within the Local Plan documentation.

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and so is out of scale with the proposed development.

I object to building 400 houses and 7000sq metres of industrial space at Garlick’s Arch. The site is prone to flooding and is covered by ancient Woodland. The industrial space is not required, or should be incorporated within existing industrial sites at Slyfield. Proper use of Brownfield sites should also be used to prevent this incursion into the Green Belt. Guildford’s housing requirement has shown to be exaggerated, therefore disputing the need for these houses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1985  Respondent: 11032705 / Mike Tarrant  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I object Policy A43 Garlick’s Arch. Send Marsh/Burnt Common/Ripley

To the building of 400 houses on this site, Because it was not include in the regulation 18 draft and has not been previously consulted upon.

It is on Green belt, permanently protected by NPPF to prevent the merging of settlements. There are no exceptional circumstances to take this site out of the Green Belt.

The site is covered in Ancient Woodlands, containing trees that have stood since the 16th Century, this area must be conserved for future generations.

I object Policy A43 cont… to the Warehousing and Industrial units which are included in the Policy.

Employment Lands Needs Assessment (ELNA) 2015 shows an 80% reduction from the previous ELNA carried out by GBC in 2013 for employment space.

If Industrial and Warehousing units are required, I question why the Cassidy Slyfield Ltd. North Slyfield site, allocated in 2014 By Guildford Council for Industrial and Warehouse use, was withdrawn from the Local Plan recently.

Surely expanding an existing Brown field industrial area is better than creating a new one on Green Belt Land!

Also heavy traffic would be attracted to Garlick’s Arch site from the M25 and A3, a lot of it also using the A247, which is not suited to this traffic!

I object because GBC’s Transport Assessment was not available to Councillors for the vote taken on 24th May for these proposals. It was published on 6th June! Infrastructure requirements must be assessed before major proposals are voted on.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )
I object to Policy A43: Garlick’s Arch. Send Marsh/Burnt Common/Ripley.

Because, the addition of self-build and custom plots. Development is not required or wanted.

I object to the addition of 8 Travelling/Show people pitches. Because, the Local Plan H1 states that Traveller or Travelling Show people accommodation should be provided on developments of 500 homes or more. This development is for 400 homes, so does not meet the required criteria.

Because, this site is on Green belt, permanently protected by NPPF to prevent the merging of settlements ie Ripley/Send Marsh/Send. There are no exceptional circumstances to take this site out of the Green Belt.

The site is covered in Ancient Woodlands, containing trees that have stood since the 16th Century, this area must be conserved for future generations.

I object because, this site is subject to flooding and has a flood zone 2 allocation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the
neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clndon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clndon, Burcham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.
24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7247  Respondent: 11033057 / Jo Komisarczuk  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I Object that the plan for Garlicks Arch (A43) was added in the late evening of the day of the Council executive meeting, just a week before the full council passed the draft local plan for public consultation.

I Object that there are no provisions for any infrastructure around Garlicks Arch (A43), there are already issues with getting existing children into primary and secondary education around these villages. The Drs requires at least a two week wait for an appointment, the mobile library no longer serves the local area and the lanes are constantly full of fast moving traffic. This is totally unsustainable.

I object to the inclusion of the land for new on off ramps at Garlics Arch. (A43a) This is just not sustainable nor has it been thought through. It will draw huge numbers of cars into the area which is already at traffic capacity, causing a huge detrimental effect to the villages in the area. Once the vehicles are heading to or from the site, they are immediately in local minor roads, which are not designed for the traffic load which will occur, even if none of the new housing and warehousing were built this plan would be unsustainable. With the new housing figures there will be huge extra numbers of cars trying to gain access, via West Clandon, where two lorries cannot pass at some point, through Burnt Common and Send where the traffic is residential all through the villages of Send and Old Woking, and the roundabout at Send, Old Woking, cannot possibly deal with such new traffic flows. This has not been thought through at all, it will bring the entire area from the M25 to the A3 and all the surrounding villages to complete Grid Lock, which will have huge impact to the health of those living in these areas.

I Object to the damage of the Historic Environment and woodland at Garlicks Arch (A43) building will double the building on the area and the ancient woodland including over 80 mature trees and associated plants and animals will be lost forever.

I Object to the proposed Infrastructure Schedule C, which takes no account of the proposed use of the land at Garlicks Arch and is therefore not fit for purpose.

I object to the lack of infrastructure planning for the sites Policy I1, which does not take account of Garlicks Arch at all, and for other sites it just appears to use existing infrastructure, when in these villages all services are at capacity currently.
I Object to the poor air quality which will inevitable result from such huge development in such a small area, this can only led to greater pollution not just for the construction of the homes but also for their use, and that of associated vehicles which can only harm the existing residents and also the health of the new residents too. The area is already polluted by the A3 and the M25, increasing the land use for housing to such an extent can only add to this already difficult situation for those living here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Comment ID: pslp172/3847 | Respondent: 11033057 / Jo Komisarczuk | Agent: |
| Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43 |
| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |

I strongly object to: The plan A58, land at Burnt Common, London Road was I believe removed from the previous version of the plan, which they claimed at the time was why they could now add A43 Land at Garlick’s Arch. So why is it back, bigger and worse for anyone living in the area?

I strongly object to the use of Green Belt for anything as it is a way to stop villages merging and also being the lungs for London and our area. These were the stated purposes when the Green Belt was set up, so what exactly has changed?

I strongly object to A43 Garlick’s Arch, this new plan is against our wishes, with thousands of objections already made by local people. There is no infrastructure to support any such building, as these quiet country roads and lanes are already overloaded and often jammed, particularly during rush hour and at the school times. This is a beautiful, green permanent Green Belt area for which no exceptional circumstances have been given for removing it from the green belt, which are required by the National Planning Policy. The proposed development of this land will join the villages of Ripley, Send, West Clandon and the hamlet of Burnt Common into one large conurbation, which when included with other proposed plans within the local plan, will extend as far as Guildford Borough goes towards Leatherhead, including East Clandon and the Horsleys as well as Wisley and Ockham; basically into one large mass of housing. The number of homes required in A43 is totally excessive and unnecessary, and we can all be assured that these will not be homes for local young people but large four plus bedroom, mini mansions especially as the council has given the builders permission to pay their way out of building affordable homes in policy 4.2.23. The land at A43 Garlick’s Arch is frequently flooded, and is currently a flood zone 2 allocation, it is across Burnt Common Lane from me, so I know how often is floods, and that the water has even got into the gas mains on several occasions in the last decade. The land included an ancient woodland area, which can never be replaced; why remove this and all the creatures that live within it? The history around it, this area was very popular with the Tudors, and their history is part of our villages. Why are travelling show-people plots suddenly needed in this part of Guildford, there has never been a request for such before. It also is inconsistent with A50 Whittles Drive Normandy, which has approximately 14 sites that more than covers the need, therefore what reason is there to build even more in A43 Garlick’s Arch?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Comment ID: PSLPS16/1902 | Respondent: 11033825 / Peter Heath | Agent: |
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43 |
| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |
I object to building 400 houses and 7,000 metres of industrial Space at Garlick's Arch, opposite Send Marsh Road. I object because this land is designated as Green Belt. It is also known that drainage in this area is bad, noise from the A3 will blight properties, traffic and population density will be considerably increased without any proposed improvement in infrastructure. If Industrial Space is required, it should be sited at Slyfield or the original proposed area of Ewbank's Auction House at Burnt Common.

I object to a new interchange with the A3 at Burnt Common because increased traffic from proposed sites at Wisley Airfield, Gosden Hill, Burpham and Blackwell Farm (approaching 6,000 houses in total) that needed to reach Woking and its railway connection with London, would have to go through Send. Send Road is already overloaded with traffic - its roundabout connection at Broadmead with Old Woking is always a stress point now -this extra traffic will swamp it! Noise and pollution levels, already dangerously high, will become toxic!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
It will remove the green break of ancient woodland between Send and Ripley. The site is flood zone 2 allocation and frequently floods.

Excessive traffic will be generated and block up the local roads of Send and Ripley.

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

And I object to the term ‘Inset’ being used to to mean ‘Remove from the Green Belt’. The correct term is ‘Remove from the Green Belt’.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the development at Garlick’s Arch for 400 houses and 7000 square metres of industrial space. This area is prone to flooding. It also has ancient woodland, just the kind of specific area the Green Belt was established to protect.

The industrial space is also unnecessary, based on the current Employment Land Needs Assessment 2015 (ELNA). This shows a reduction of 80% in required employment floor space from the previous draft plan.

I also understand that Slyfield actually has a large area which would be much more suited.

---

1. I Object to the site A43 Garlick’s Arch

Garlick’s Arch is a 100 acre site of Green Belt and ancient woodland which should be protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the 2017 Revised Local Plan by Guildford Borough Council (GBC) for the following reasons:

Housing at Site A43 Garlicks Arch would be on Greenbelt Land.

The potential increase from 400 houses at site A43 Garlicks Arch is extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt and there is no identified need within the Local Plan documentation.

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and so is out of scale with the proposed development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

...
I object to the huge amount of additional housing and the Industrial development at Garlick’s Arch. The Area is green space and is not suited to this level of development, the road system can only just cope currently particularly in 'rush hour' times and is often at a standstill when there are hold ups on the A3 and traffic diverts along the Old Portsmouth road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1707  Respondent: 11036705 / Brian Slade  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to POLICY A 43.30 ha LAND AT GARLICK’S ARCH Burnt Common 400 house and 7,000sq metres of industrial and warehousing. There is no need for any more houses or even as many houses as the new Local Plan states are needed (13,860) - neither is there any need for the additional 7,000 sq metres of industrial and warehousing space. If there is a need for more industrial space it could easily be developed on the existing industrial site at Slyfield. A new 4 - way A3 interchange to service this development (which for the reasons stated above) would therefore not be needed. In addition there is photographic evidence of flooding on the site. If it were developed it would destroy the village communities of Send, Ripley and West Clandon and their quality of life and health and cause major problems in relation to Road Safety.

I OBJECT to the fact that POLICY A 43.30 ha is a NEW site not included in the Regulation 18 Draft and has NOT been consulted on previously. It is Green Belt land permanently protected by the NPPF which prevents the merging of settlements. *There are no exceptional circumstances.* It is a sensitive conservation site covered in ancient woodland and trees which have been there since the 16th Century and which would then be endangered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 change - Land at Garlick's Arch, Send Marsh because, where despite thousands of objections it is now proposed that 400 homes and 6 Travelling Showpeople Plots are constructed despite there being no proven demand for Showpeople Plots in this area which is permanent Green Belt with no "exceptional circumstances" containing ancient woodland dating back to Elizabeth 1 that GBC are proposing to destroy. It is currently a Flood Zone 2 allocation having frequent flooding and is contaminated land with lead shot following 50 years of shooting activity. The proposed development will generate excessive traffic on roads that already get gridlocked in Send and Ripley at peak times and also join up Ripley and Send which is contrary to the key purpose of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7223  Respondent: 11036737 / Charley Penny  Agent:
Areas of Garlick’s Arch are known for flooding and with increased building works it means more surface run off and higher likelihood of flooding in other areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to Policy A43 Garlicks Arch for 400 homes and 6 travelling show people pitches for the following reasons:

- it ignores all the many previous objections by local people
- there is no proven demand for the travelling show people plots in this location
- there is no proven need for the houses on this site because the local plan housing target is incorrect, inflated and ignores constraints
- I object to Garlicks Arch being removed from the Green Belt. National Planning Policy (NPPF) requires exceptional circumstances for Green Belt boundaries to be altered or for development on Green Belt. None have been demonstrated here justifying the proposed boundary changes. The loss of Green Belt here will result in urban sprawl and neighbouring villages merging into one another. There would be harm to openness and permanence to the Green Belt itself, loss of amenity and encroachment on the countryside, contrary to paras 79-80 NPPF.
- this area is at serious risk of flooding. Why has the Council’s own flood risk assessment (SFRA) ignored the risks as set out in the environment agency’s flood map? This says the site is in a flood zone 3 from a river, which is highest risk category. Yet the SFRA puts it at zone 2. The commissioned assessment is therefore not fit to be relied on to support this policy in the local plan.
- I object to the potential loss of Ancient woodland on the site. The ancient woodland surrounds the site on 2 sides and runs through the centre of the site which includes over 80 ancient oak trees dating back to the year 1600. The proposed development would have a permanent and detrimental impact on this woodland.
- the plan does not provide an achievable strategy for sustainable infrastructure around this site. Roads are already at capacity. The villages of Send and Ripley are suffering severe congestion now, and there is no plan for this to be improved.
- this site has been added to the plan at the eleventh hour, has not been properly thought out, and no infrastructure, including roads, water sewerage, utilities, etc have been planned. This is incompetent and tantamount to neglect on the part of those drawing up this local plan.
- I object to the loss of rural employment on this site. The Policy A43 as it stands threatens the loss of 4 existing successful rural businesses, which have existed for over 30 years, and another 2 businesses for over 9 years both of which support many jobs. They do not wish to lose their premises. They support many in employment.

This policy (A43) is unplanned, contrary to National Planning Policy as specified above and unrealistic. I object to it being in the draft local plan 2017.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to the inclusion of strategic site Policy (A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000 sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)
I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

1. I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
