**Brownfield Development**, where I understand that you feel that you have used up all GBC brownfield sites. Whilst I know that you are required to consult with neighbouring Boroughs, I would like to be categorically assured that GBC have examined with Waverley and other Boroughs the possibility of using their brownfield sites before encroaching on our Borough’s green belt.

**Sites A36 and A41.** I am in favour of the elimination of these potential sites in the plan.

I look forward to hearing from you again as the consultation progresses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**A36, RAMADA HOTEL**

This Green Belt site is located outside the Defined Settlement Boundary of East Horsley and proposes a density of development that is out of keeping with the character of the surrounding area. As a gateway site to the village along the A246, the proposals would be harmful to the character of the area. Moreover, vehicular access is not ideal given its proximity to two sharp bends on the A246.

**Site A36 Hotel,Guildford Road, East Horsley**

170. I object to this site being included.

171. This site is an example of extension of the settlement boundary, along with insetting, to encourage building on the greenfield part of the site as well as the existing built area and car park.
172. I do not accept the proposed change to the settlement boundary and any future development should be restricted to the brownfield part of the site.

173. The hotel is a valuable component of the local tourist industry and non-viability has not been proved and the main Chown-built building at the front of the site is a local icon and part of the local heritage.

174. A change of use to housing would lead to increased traffic movements from the site on to the busy A246 at peak times. In particular, this would involve commuters attempting to turn right to travel to Guildford, Horsley Station, local schools, the A3 and the M25. These right turns across a busy road are in close proximity to other junctions, a petrol station and bends in the road.

175. If non-viability of the existing hotel use is proved satisfactorily then an alternative use, that does not generate commuter traffic, should be a care home, or smaller homes for retired people (freeing up larger homes elsewhere for families), could be sensible alternative options. The existing green space would provide a useful open space area for these alternative developments.

176. The recent planning application for this site identified the need for a pedestrian crossing on the A246 on sustainability grounds - so that residents could have safe access to the infrequent bus service. However, past discussions have suggested that a crossing is not viable at this location for a number of reasons given by SCC appear to be suggesting that a pedestrian island refuge will be sufficient but I am not convinced that there is room for this or that it will be safe.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( Yes ), is Legally Compliant? ( )

The Ramada Hotel does not provide a local amenity of much value. It is a suitable site for redevelopment, as long as it keeps within the current building footprint and does not extend into any open areas of grassland which surround it. Horsley has a need for smaller dwellings, especially for downsizing. A courtyard development, perhaps with some flats, combed with starter homes and flats would for younger people starting out would provide a lively new community base in East Horsley.

We object to the changes to Policies A36 to A41 (East and West Horsley)

1. The number of potential development sites has been reduced by two (A36 and A41, representing a total of 138 dwellings). This leaves four sites (A27-40) which still represent a total of 395 new dwellings.
2. Marginal changes such as these would still leave 70% of all new development in the borough built on Green Belt sites. No “exceptional circumstances” or any other justification is advanced for this strange imbalance.
3. The deletion of two Horsley sites fails to correct the issue of relative overdevelopment in East and West Horsley, which is both excessive in absolute terms and disproportionate in relation to the rest of the borough.
4. No attempt is made to assess the cumulative impact on the Horsleys – either of the four sites now proposed, or of Site A35 (Three Farms Meadow, alias “Wisley Airfield”), with over 2,000 new homes only 2 miles away. This piecemeal approach leaves the future of the Horsleys at the mercy of ad hoc planning applications, which is the opposite of what a Local Plan should intend.
5. The new plan Policies put greater emphasis on the need for adequate facilities and infrastructure to underpin development. But this is not reflected in any new wording on the Horsley sites, thus leaving most local objections unaddressed. Again, this defect curtails the plan’s usefulness as a practical planning tool at a site level and undermines its credibility among residents.
6. The plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the Horsley sites, including public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops. These were fully set out in responses to last year’s public consultation.
7. The density of new housing on the four Horsley sites too is inappropriate, being greater than anywhere in the locality at present.
8. Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries. The plan presents no arguments for this which, contrary to NPPF paragraph 79, will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.
9. Collectively, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre and the popular Olympic cycle route. These examples of positive planning depend on a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are hostile to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: pslp172/2176  Respondent: 8774113 / Ian Elliott  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Overall comment – the local plan has adopted a ‘lazy’ policy of developing green belt at the expense of sourcing and maximising brownfield sites in urban areas.

Specific comment – Horsley area - the removal of the A36 ‘Thatchers’ hotel site makes no planning sense and causes an adverse knock-on effect to other local areas. As a previously developed ‘brownfield’ site this is a perfect location to add housing at little detriment. It is unclear why this site has been removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

5  Site Allocation Policies

5.1. There are 5 East Horsley sites identified in the LAA, two of which are allocated under Local Plan policies, whilst the adjacent parish of West Horsley has 6 sites identified in the LAA, four of which are allocated in the Local Plan. I would comments on these site policies are as follows:

5.2. Policy A36 Hotel, Guildford Road proposes to re-develop the current Thacher’s Hotel for housing. Whilst I do not object to housing development on this landmark site located at the entrance of the village, it is absolutely essential that it is developed in a manner that is in keeping with its prominent location. The site is close to the East Horsley Conservation Area and housing designs and site configuration must reflect the sensitivity of this setting. There is some concern over the loss of employment of which there is very little in the village and the also the loss of the hotel as a base for tourists. My principal concern is over the number of houses proposed for this site - approximately 48 dwellings. (Original SHLA said 32) At 48 units it gives an implied gross housing density of 37 dwellings per hectare, which is exceptionally high for this site. The average housing density across the East Horsley Settlement Area is 8.1 dwellings per hectare and the highest density found in any of the roads around this location is 13 dwellings per hectare and that included some semi-detached homes. Less than 30 units would be more appropriate for this location

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy Site 36 Land Former Thatchers Hotel East Horsley site no longer in Local Plan

I support the removal of this site for housing development.
• It could if re developed with housing [as pointed by the inspector] result in the over development of a key edge of village site.
• There is a case for retaining the current use as a Hotel.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/709  Respondent: 8795553 / Robert Taylor  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A36: Hotel, Guildford Road: I OBJECT to this policy. The housing numbers proposed in this policy are far too high for this prominent landmark location, resulting in a housing density that is out of keeping with this area and the village of East Horsley in general.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Thatchers Hotel - proposed replacement by 48 dwellings

This is unacceptable. GBC themselves have already rejected the planning proposal previously submitted by the owners of Thatchers. I live directly behind Thatchers, and proposed development would adversely affect my wellbeing, and my right to peaceful enjoyment of my life (under the provisions of the Human Rights Act) by virtue of increased noise and light pollution. In addition public safety would be compromised and adversely affected - the entrance/exit to Thatchers is already a safety hazard, opening as it does on to the busy A246 on a bend; the additional and more frequent traffic from 48 houses would make it positively dangerous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4611  Respondent: 8817153 / Paul Ives  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We applaud the decision to omit this policy from the Draft Local Plan. This policy would have increased traffic access risk on a dangerous bend of the A246.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I therefore object to the following policies:

Policy A36 - Hotel, Guildford Road, which is proposing a housing density of 37 dwellings per hectare. An added factor to object to is the loss of a local amenity.

This land is within the Green Belt and I object to this proposal

Policies A37, A38, A40 and A41-Land in West Horsley. All areas within the Green Belt and which would represent an increase in housing of 36%. This would lead to the destruction of the village character and have enormous impact on the infrastructure of both East and West Horsley. I therefore object to these policies.

Policy A35 - Land at former Wisley Airfield. This proposes a new town in the heart of the Surrey Green Belt. It would have a major impact on the local villages and roads and would contravene Metropolitan Green Belt policy. I therefore object to it.

I have only commented specifically on policies that affect East and West Horsley as these are the villages that I know. I am sure that people in other villages will be making their thoughts known about their particular areas. However, I reiterate that I object to the Proposed Submission Local Plan for the whole of the Guildford Borough because I consider the reasoning behind the need for 25% increase in housing to be flawed. I also consider that the Council has not taken the wishes of its electorate into consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/379  Respondent: 8820929 / A J Stuart  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the potential six main development sites contained in the Draft local Plan which are located in and around the Horsleys:
Thatchers Hotel (Ref. A36 ID2044) is a very busy area of the village, the traffic is heavy and this hotel defines the edge of the village with a local landmark- to allow the construction of up to 48 houses on this site would be totally wrong, in my view.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/131  **Respondent:** 8823553 / Rick Day  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( No ), is Legally Compliant? ( Yes )

In principle this seems an ideal site but there are 3 considerations: as one drives through East Horsley on the A246 there appear to be few dwellings (because most are tucked away from the main thoroughfares) and so a large development on this corner plot could destroy that illusion and alter the observable nature of the village; Horsley Towers is immediately in the background of this plot so that any development ought to be low rise; the replacement of hotel accommodation with housing would appear to be at odds with Policy E6 to preserve visitor accommodation. Therefore where are the lost rooms to be located?
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/5429  Respondent: 8824833 / Stephen Stuart-Matthews  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I fully support the removal of new housing planned on site A36 Ramada Thatchers Hotel from the draft Local Plan 2017. Increasing numbers of visitors to Guildford Borough will need the hotel space. This hotel provides accommodation with relatively easy access to RHS Wisley the largest growing visitor attraction in the Borough. It also provides welcome employment for young people in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Site A36: Thatcher’s Hotel, East Horsley (48 houses)

Of the 6 sites (36-41), this is the least impactful as it only proposes the addition of 48 new houses. However, the main issue regarding this proposal is one of road access and safety because, as will be known, Thatcher’s Hotel sits between two very sharp bends and includes an already very busy junction, particularly in the mornings due to (in particular) people going to work and primary school traffic. Additionally, the nearby village shops of East Horsley are in two separate ribbon-strips but both already have inadequate car parking facilities (as does the railway station) and there is no land available for the expansion of either.

Equally, the very limited shops in West Horsley are served by nothing more than a small lay-by which has no room for expansion. These are problems NOW before any additional houses are built which will bring an additional 120 cars based on an average of 2.5 cars per property. For these reasons, I hold SIGNIFICANT RESERVATIONS against this proposal but do not object to it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/8251  Respondent: 8843361 / Adrian Atkinson  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to policy A36 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A36

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Policy A36 proposes to re-develop the current Thatcher's Hotel for housing.

My principal concern is over the number of houses proposed for this site - approximately 48 dwellings. This number gives an implied gross housing density of 37 dwellings per hectare, which is exceptionally high for this location. The average housing density across the East Horsley Settlement Area is 8.1 dwellings per hectare and the highest density found in any of the roads around this location is 13 dwellings per hectare.

*I would only support development at this location if it has a significantly lower housing density more in keeping with the character of the village.*

Proposed development of Thatchers Hotel.

There is just no confidence in the Authorities locally at their ability or willingness to respect the mood of dwellings in the villages.

Time and again approval is granted for developments that have met with huge groundswell of local opposition.

The rights of the individual are ignored.

The initial plans shown on this development show complete disregard for the local mood, image, trends.

Attached documents:
I am comfortable that the loss of the hotel would not significantly adversely impact East Horsley. I am also of the view that given this is already a developed site (e, brownfield) it represents the type of site the Council should be looking to develop rather than seeking out entirely greenfield sites.

Developing the site would also give the opportunity to upgrade that part of the A246, perhaps putting in roundabouts at the junctions with Ockham Road South and Chalk Lane, to reduce speeds and dangerous turns.

If there is to be development then I would not object to development at this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

A36 - Thatcher’s Hotel, East Horsley

This is a long-standing East Horsley village hotel (I well remember visiting it as a child in the 60's for the afternoon tea which it was well known for). As well as being a significant employer it has provided valuable and scarce rural accommodation for visiting tourists, but, if it is now not economically viable, then I would support a housing development at this site if it was kept in character with its position and relative to the rest of East Horsley.

The current 48 dwellings proposed works out at 37 per hectare which considerably exceeds the highest density of 13 per hectare found in any of the roads around East Horsley. Therefore could not support this site in the Local Plan unless the number of dwellings was reduced to produce a considerably lower housing density.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Other reasons notwithstanding, I endorse the proposal to remove site A36 from the former Local Plan insofar as it addresses completely concerns voiced previously over the safety of vehicles and their occupants intending to leave this site onto the busy A246 Guildford to Leatherhead road due to inadequate sight lines coupled with two adjacent road junctions.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

None

<td>It would also seem to me a mistake to demolish Thatchers which will presumably be necessary to accommodate so many new houses. The property was designed by Frank Chown who, along with the Earl of Lovelace, gave East Horsley its architectural heritage and so it should be preserved. There are also now very few hotels in an area that currently attracts tourists due to its wide range of cultural and leisure attractions and I am sure Thatchers could maximise its capabilities as a business in the area.</td>

Of the 6 sites (36-41), this is the least impactful as it only proposes the addition of 48 new houses. However, the main issue regarding this proposal is one of road access and safety because, as will be known, Thatcher's Hotel sits between two very sharp bends and includes an already very busy junction, particularly in the mornings due to (in particular) people going to work and primary school traffic. Additionally, the nearby village shops of East Horsley are in two separate ribbon-strips but both already have inadequate car parking facilities (as does the railway station) and there is no land available for the expansion of either.

Equally, the very limited shops in West Horsley are served by nothing more than a small lay-by which has no room for expansion. These are problems NOW before any additional houses are built which will bring an additional 120 cars based on an average of 2.5 cars per property. For these reasons, I hold **SIGNIFICANT RESERVATIONS** against this proposal but do not object to it.

I wish to object to Thatchers Hotel being included in the new Local Plan for development of 48 houses.

This proposal creates a density of 12 houses per acre whilst the local density in this area is 4 houses per acre. This would be a considerable over development of the site. It would create a detrimental visual appearance on the eastern entrance to the village against the parkland setting of adjacent Horsley Towers.

The proposed use of the existing access onto Guildford Road will create a hazardous situation with up to 100 cars leaving and entering the site onto the very busy A246 especially at peak times. The location of the access set between 2 dangerous S bends ,3 other roads ,a busy petrol station ,a pub with car park, some cottages is totally unsuitable and dangerous.

I consider this hotel is a good local amenity providing a number of facilities for local residents to this site including a bar, restaurant, meeting and conference rooms ,weddings and accommodation for visitors. This would all be lost including local employment at a time when more housing for Horsley is under consideration.

There is very limited public transport available to this site whilst the train station is a 25-30 min walk and with car spaces generally fully occupied during weekdays.

There are no local job opportunities available for new residents.

A major part of this site 'is in a Green Belt area and there are no exceptional circumstances to justify a development. A planning application for development of this site with a similar number of houses was recently refused by Guildford BC with good sound reasons.

There is therefore no requirement for this site to be included in the new Local Plan and it should be delated.

Building 48 houses at Thatchers Hotel is a particular concern for me as my garden wall runs along one boundary. This wall was built in about 1970 when Thatchers decided to build a swimming pool. They built up the land on their side and built a very unstable wall which is very high on my side. After the first rain this wall started moving so cement had to be put along it to stabilise it. Any excavating and building near the wall could be very dangerous and cause the wall to collapse.

Also the amount of cars coming on to an already very dangerous bend of the A246 where there is Chalk Lane, the Shell Garage, the turning to the village, entrance to Guildford Lodge Drive, and the Duke pub would be horrendous.

1. The Thatchers Hotel proposal would both take away an important local amenity while providing an out-of-character estate on the edge of the village. The A246/Ockham Road junction is already subject to regular rush-hour gridlock and the increased traffic would only make this worse. There is also the safety issue of further traffic entering the A246 at an already busy location.

SITES

POLICY A36: Hotel Guildford Road. OBJECT. For all of the reasons previously outlined - the current infrastructure cannot take a further 48 new homes. Medical Centre and local Primary School are already at capacity. Roads are unfit for current usage, let alone increased usage. The owners of the new homes will need to travel to work (as work options are very few in the Village) so road and rail usage will increase. The plan also shows no consideration for the Green Belt nor the preservation of one of Horsley’s finest landmarks. It will also lead to loss of employment.

Site A36 Thatchers Hotel

I have no objection in principle to development on this brownfield site but I think there should be very strict design rules for the area as Thatchers sits just outside the edge of the East Horsley conservation area next door to the historic Grade II* listed Horsley Towers and the hotel which was built by renowned local architect, Frank Chown (who built many of the lovely houses in East Horsley) reflects the ambience and openness of the area. This is the only brownfield site available for development in the village, although recently a planning application on this site was rejected because a need for a local hotel was considered paramount. The application, of course included large houses (good profit margins) when in fact the village needs smaller dwellings.

1. SITES POLICIES
Of the many sites policies set out in the Proposed Submission Local Plan, we comment upon those in East Horsley as well as several in the surrounding area which may affect the village.

Five East Horsley sites are identified in GBC’s Land Availability Assessment (‘LAA’), two of which are allocated under policies in the Proposed Submission Local Plan. The adjacent parish of West Horsley has six sites identified in the LAA, four of which are allocated in the Proposed Submission Local Plan. Our comments on these site policies are as follows:

**POLICY A36: Hotel, Guildford Road**

Policy A36 proposes to re-develop the current Thatcher’s Hotel for housing.

EHPC is concerned about the loss of this long-standing village hotel and significant employer. However, assuming that the employment loss can be justified, (which is a condition of Policy A36), then EHPC is broadly supportive of housing development at this location, providing it is done in a manner that is in keeping with its prominent landmark position at the entrance to the village. The site is also close to the East Horsley Conservation Area and housing designs and site configuration must reflect the sensitivity of this setting.

Whilst we endorse many of the requirements set out in Policy A36, our principal concern is over the number of houses proposed for this site - approximately 48 dwellings. This number gives an implied gross housing density of 37 dwellings per hectare, which is exceptionally high for this location. The average housing density across the East Horsley Settlement Area is 8.1 dwellings per hectare and the highest density found in any of the roads around this location is 13 dwellings per hectare.

EHPC would only support development at this location if it has a significantly lower housing density.

**SITES POLICIES**

Policy A36 Thatchers Hotel

An application for this development was very wisely refused by GBC earlier in the year on many grounds. I do not see the logic therefore for including this site in the Local Plan. Also now that the new opera house has received planning permission there is likely to be even more demand for hotel rooms in the village.

Site A36 - Hotel, Guildford Road, East Horsley

I OBJECT to this site being included. It is in the Green Belt and there are no exceptional circumstances for its removal. The recent planning application for change of use and development of 49 dwellings on this land was, quite rightly, rejected so there can be no justification for including the whole site in the local plan as a development site for housing. Any redevelopment of this site should be restricted to the brownfield part.

I OBJECT to the change to the settlement boundary required to facilitate this development.

There is no need for housing on this site because the local plan housing target is incorrect and inflated, and no justification for its change of use.

East and West Horsley Sites : A36 to A41

I object to these sites which encroach on the Green Belt.

1. I object to the policy Site A36 (Hotel). Although safeguards are proposed for the historic setting the housing density is well above surrounding area (37 dwellings per hectare compared to 8.1) and will be out of keeping. The access to the site will be tricky because of the busy A246 road and special arrangements will be needed for traffic. A very significant reduction in the housing density would be needed to make this site acceptable.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the changes to Policies A36 to A41 (East and West Horsley)

The number of potential development sites has been reduced by two (A36 and A41, representing a total of 138 dwellings). This leaves four sites (A27-40) which still represent a total of 395 new dwellings.

Marginal changes such as these would still leave 70% of all new development in the borough built on Green Belt sites. No “exceptional circumstances” or any other justification is advanced for this strange imbalance.

The deletion of two Horsley sites fails to correct the issue of relative overdevelopment in East and West Horsley, which is both excessive in absolute terms and disproportionate in relation to the rest of the borough.

No attempt is made to assess the cumulative impact on the Horsleys – either of the four sites now proposed, or of Site A35 (Three Farms Meadow, alias “Wisley Airfield”), with over 2,000 new homes only 2 miles away. This piecemeal approach leaves the future of the Horsleys at the mercy of ad hoc planning applications, which is the opposite of what a Local Plan should intend.

The new plan Policies put greater emphasis on the need for adequate facilities and infrastructure to underpin development. But this is not reflected in any new wording on the Horsley sites, thus leaving most local objections unaddressed. Again, this defect curtails the plan’s usefulness as a practical planning tool at a site level and undermines its credibility among residents.

The plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the Horsley sites, including public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops. These were fully set out in responses to last year’s public consultation.

The density of new housing on the four Horsley sites too is inappropriate, being greater than anywhere in the locality at present.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries. The plan presents no arguments for this which, contrary to NPPF paragraph 79, will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre and the popular Olympic cycle route. These examples of positive planning depend on a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are hostile to this.

Thatchers Hotel ReDevelopment

Two issues here. There is no other local hotel accommodation unless you go further south to Guildford or to Leatherhead/Cobham as the adjoining DeVere is NOT open to the general public. With the approval of the Opera House at West Horsley Place, removing our one hotel accommodation seems a remarkably stupid move, loosing local jobs and business. Plus the hotel is very full many nights. Secondly I live opposite the hotel and can attest that the A246 is a very busy road coming into the turn at that corner. With an additional 100 odd cars going in and out at the junction without the imposition of a roundabout or traffic lights, there will be huge accidents and no matter what increase congestion for which there has been no plan. Plus as the first planning application showed, such a development will negatively impact on Horsley Towers.

I OBJECT to the inclusion of these sites.

This constitutes serious level of over-development of these villages, particularly Wet Horsely which has retained its open connection with the green belt.

The construction of 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough; it would destroy the rural character of these communities.

7. SITES POLICIES

A36 Thatchers Hotel

Comment: It is appreciated that this site lends itself to housing, but the Plan for 48 houses and apartments is a density of 37 dwellings per hectare which I consider far too high as the average housing density in East Horsley is 8.1 dwellings per hectare.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY A36: Hotel, Guildford Road

The subject of this policy, The Thatcher’s Hotel, is an iconic landmark; a long-standing Tudor style village hotel set at the eastern entrance to East Horsley village.

Policy D3: Historic Environment of the draft plan states that

“Guildford borough’s historic environment is intrinsically part of what makes Guildford the place it is, that it acknowledges the wider social, cultural, economic and environmental benefits that conservation can bring to our community and that it will conserve and enhance the historic environment in a manner appropriate to its significance.”

It further states that:

“Heritage assets are an irreplaceable resource and works which would cause harm to the significance of a heritage asset, whether designated or non-designated, or its setting, will not be permitted without a clear justification to show that the public benefits of the proposal considerably outweigh any harm to the significance or special interest of the heritage asset in question.”

I OBJECT to this policy as I believe that The Thatcher Hotel is part of this historic environment and that this policy runs contrary to Policy D3.

Furthermore Policy E6: The leisure and visitor experience. States:

“The loss of existing visitor, leisure and cultural attractions, including arts and entertainment facilities, hotels and indoor sports venues, will be strongly resisted unless replacement facilities of an equivalent or better standard and provision are proposed in a location equally accessible to the facility’s current catchment area.”

I believe that The Thatcher Hotel is such an existing visitor attraction. Not only does it cater for visitors by providing accommodation and restaurant facilities but attracts visitors by virtue of providing rooms for receptions, parties and so forth.

Therefore I OBJECT to this policy as it runs contrary to Policy E6

My final concern is over the number of houses proposed for this site - approximately 48. This number gives a gross housing density of 37 dph. The average dph in East Horsley is 8.1 dph. According to the local parish council the highest density found in any of the roads around this location is 13 dwellings per hectare.

The proposed dph is therefore approximately 9 times the average in the village, which makes it exceptionally high for this location.

Thus, I OBJECT to Policy A36 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
22.2 The number of potential development sites has been reduced by two (A36 and A41, representing a total of 138 dwellings). This leaves four sites (A27-40) which still represent a total of 395 new dwellings.

22.3 Marginal changes such as these would still leave 70% of all new development in the borough built on Green Belt sites. No “exceptional circumstances” or any other justification is advanced for this strange imbalance.

22.4 The deletion of two Horsley sites fails to correct the issue of relative overdevelopment in East and West Horsley, which is both excessive in absolute terms and disproportionate in relation to the rest of the borough.

22.5 No attempt is made to assess the cumulative impact on the Horsleys – either of the four sites now proposed, or of Site A35 (Three Farms Meadow, alias “Wisley Airfield”), with over 2,000 new homes only 2 miles away. This piecemeal approach leaves the future of the Horsleys at the mercy of ad hoc planning applications, which is the opposite of what a Local Plan should intend.

22.6 The new plan Policies put greater emphasis on the need for adequate facilities and infrastructure to underpin development. But this is not reflected in any new wording on the Horsley sites, thus leaving most local objections unaddressed. Again, this defect curtails the plan’s usefulness as a practical planning tool at a site level and undermines its credibility among residents.

22.7 The plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the Horsley sites, including public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops. These were fully set out in responses to last year’s public consultation.

22.8 The density of new housing on the four Horsley sites too is inappropriate, being greater than anywhere in the locality at present.

22.9 Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries. The plan presents no arguments for this which, contrary to NPPF paragraph 79, will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

22.10 Collectively, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre and the popular Olympic cycle route. These examples of positive planning depend on a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are hostile to this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ) is Sound? ( ) is Legally Compliant? ( )

1 POLICIES A36 to A41

1.1 I object to the changes to Policies A36 to A41 (East and West Horsley)

1.2 The number of potential development sites has been reduced by two (A36 and A41, representing a total of 138 dwellings). This leaves four sites (A27-40) which still represent a total of 395 new dwellings.

1.3 Marginal changes such as these would still leave 70% of all new development in the borough built on Green Belt sites. No “exceptional circumstances” or any other justification is advanced for this strange imbalance.

1.4 The deletion of two Horsley sites fails to correct the issue of relative overdevelopment in East and West Horsley, which is both excessive in absolute terms and disproportionate in relation to the rest of the borough.

1.5 No attempt is made to assess the cumulative impact on the Horsleys – either of the four sites now proposed, or of Site A35 (Three Farms Meadow, alias “Wisley Airfield”), with over 2,000 new homes only 2 miles away. This piecemeal approach leaves the future of the Horsleys at the mercy of ad hoc planning applications, which is the opposite of what a Local Plan should intend.

1.6 The new plan Policies put greater emphasis on the need for adequate facilities and infrastructure to underpin development. But this is not reflected in any new wording on the Horsley sites, thus leaving most local objections unaddressed. Again, this defect curtails the plan’s usefulness as a practical planning tool at a site level and undermines its credibility among residents.

1.7 The plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the Horsley sites, including public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops. These were fully set out in responses to last year’s public consultation.

1.8 The density of new housing on the four Horsley sites too is inappropriate, being greater than anywhere in the locality at present.

1.9 Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries. The plan presents no arguments for this which, contrary to NPPF paragraph 79, will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

1.10 Collectively, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre and the popular Olympic cycle route. These examples of positive planning depend on a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are hostile to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1) Thatchers Hotel and Horsley Towers:

> I am disappointed to see this development proposal. There are very limited places to walk for Drinks and Casual Meals and this will remove a necessary scenic retreat leaving only one Pub.

> Heavy Rain last year demonstrated drainage and flooding problems along roads slanting down into the Village. Further remedial action is needed before exacerbating the problem with this elevated site development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

2) Development of plots near St Martin's Close, East Horsley; and Thatcher's Hotel

The proposal to build houses on these brownfield sites offers a good opportunity for development. However, the plan does not make clear the plans for infrastructure and amenities that increased housing presents.

1. **Parking and traffic**

It is proposed that two sites near St Martin's Close will each contain 15 houses and the third 10 houses. The document gives no information as to the size of proposed houses to be built on the site but from the density of the proposed houses it would appear that they are to be terraced. The 10 current houses and 4 maisonettes on St Martin's Close are also terrace/semi detached and do not have driveways. Therefore all traffic from the current houses and maisonettes park on the road. Basing this on an average of at least 1.5 cars per household for the borough of Guildford and accounting for the fact that each house has a garage this still means that there are upwards of 7 cars parked on the road already. There is a small car park behind the houses but this is predominantly used by people working in the parade of shops at Bishopsmead and the postmen/post vans. People parking on St Martin's Close include visitors to the sheltered housing, members of bowling club, staff and visitors to Limegrove Residential Home, and users of the St Martin's church. This means that demand for parking is high and often all available parking is taken. If the new houses are not to include sufficient parking further demand will be put on St Martin's Close and its current residents. The plan also does not make clear where the access road to the new houses would be located. St Martin's Close, with cars parked, becomes a single laned road along which cars pass in both directions. Increased traffic flow to the new houses would make passage along this road more difficult. Is it proposed that access to the new houses would be from the main road? If access to the new development is from the existing roads in the Close, or the access road to the garages, I would object most strongly to the proposed development.
The proposed development of Thatcher's hotel will also increase the number of cars using the A246 and roads though the village. The junction onto the A246 from the village is already highly congested at peak times, with traffic waiting considerable amounts of time to join the A246/turn into Ockham Road South. If such a development does take place how will this junction be improved?

1. **Drainage**

Is the current drainage system able to accommodate waste water from an additional houses? Also, will there be a reduction of land into which rainwater can drain? The current Local Plan does not include flood information from the previous few years where the village was adversely affected by the amount of rain that we had. This meant that access out of the village became difficult as the access road to the A3 was flooded from about Christmas until March/April. This meant that East Horsley encountered increased traffic using the A246 to exit the Horsleys.

**3. Schooling**

Increased housing will mean increased numbers of children. The local school, The Raleigh, is the only state school in the Horsleys, is already over-subscribed and does not have the space to expand further. New classrooms had to be added in 2012/2013 to accommodate the current children being educated. Northcote and Nightingale Crescents, on which the school is located, are small village roads meaning that parking is very problematic with daily traffic jams and difficulty for local residents trying to leave or return to their houses. Traffic starts arriving at the school from 7.30am for the breakfast club and continues until past 6pm for the after school club.

Children from the Raleigh school then attend the Howard of Effingham Secondary School. This school is also over-subscribed and historically (in 2007) pupils from the Raleigh School were sent to other secondary schools in the Surrey area, many much further away and taking hours to access by public transport (Therfield at Leatherhead, the 5th nearest SCC secondary school to East being 11.8km away; ranked 51 out of 86 in Surrey for GCSE passes; Bishop David Brown at Sheerwater, the 9th nearest school at a distance of 12.5km; ranked 83 out of 86 in Surrey for GCSE passes; and Christ's College and Guildford, the 13th nearest school at a distance of 13/8km; ranked 84 out of 86 in Surrey for GCSE passes). Although this led to children at the Raleigh being assured of a place at the Howard of Effingham Secondary School further increasing the demand for places from Horsley children may mean that such a scenario happens again.

3) My next objection is in particular to the proposed development of 48 houses on the Thatcher's site. Ref A36. This is adjacent to a conservation area and an area of historic interest. The new development would totally change the character of this area and obscure the views of Horsley Towers and obliterate the surrounding countryside on the edge of an AONB. This disregards your policy point under Environment 2. " To protect these areas of conservation.....". The A246 is already busy in this area with regular tail backs in each direction and difficulty finding a break in the traffic to pull out.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

9. Proposed development of Thatcher's Hotel (A36)

I object to this proposal.

Thatcher's Hotel is a longstanding amenity of East Horsley. Increased patronage appears likely when the new West Horsley Place opera commences. While the NPPF (para 89) allows for redevelopment of previously developed sites within the Green Belt, the redevelopment must not have a greater impact on the openness of the Green Belt than the existing development.

Erecting 48 houses on the site implies a density, and spatial orientation, clearly at odds with this criterion. Reasonable alternatives, such as converting the existing buildings into flats (like the sympathetic conversion of Maranello House on the main shopping parade), and without increasing the scale or existing footprint of the hotel, do not appear to have been considered.

Access to and from the A246 at the present entrance to the hotel would likely be insufficient, and any enlarged or new entrance onto the A246 would increase traffic, and worsen an existing hazard in the vicinity of a sharp bend, which has been the scene of multiple accidents over the years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to these policies Utterly disproportionate! The impact of clustering of such huge numbers of dwellings in a low density Village area is tantamount to vandalism. A thinner spread, based on demonstrable figures, across the whole borough might have lesser impact does not seem to have been considered. This part of the borough appears to have been selected for a disproportionate burden.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

On a more positive note I applaud the Council's proposal to remove site A36 as a potential building site. Plainly the existing hotel on this site is potentially viable - particularly with the arrival of the Grange Park opera - and the advantages of retaining it comprehensively outweigh the very arguable merits of building houses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the plan to build on the site of Thatchers Hotel. The A246 main road at this point is already severely congested, especially where the road bends round sharply with fast-moving traffic. A hundred or so extra cars joining the road here in order to access the station, schools, shops and the A3 will cause much added congestion and the risk of serious accidents.

Loss of agricultural land

1. The proposals, in particular in relation to Blackwell Farms would remove a large proportion of the working agricultural land that is proximate to Guildford. This is important both for the food it produces but also for its importance in providing an educational gateway for children living in the town to ensure they understand how their food is produced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Having read the revisions to the local plan I am writing to strongly object to the local plan as it currently stands. Whilst I recognise that there are improvements such as stopping the development of the Thatcher’s site, I am fundamentally opposed to any development of the green belt in the borough of Guildford or any proposal to inset East Horsley from the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A36-A41 East and West Horsley
I object to the changes to Policies A36-A41 (East and West Horsley). The potential development sites have been reduced by two (A36 and A41) representing 138 dwellings. This leaves 4 sites which still represent 395 new dwellings. I object to all of these 4 sites remaining for the following reasons:

- they collectively represent in absolute terms, overdevelopment in East and West Horsley and in relation to the rest of the borough this is disproportionate. The many objections from residents have not been heeded, and the imbalance has not been corrected.

- no “exceptional circumstances” or any justification has been given in the plan for this unaccountable imbalance where 70% of all new development in the borough is to be on Green Belt sites

- the sites situated on the edge of the existing development in the Horsleys encroach on surrounding open fields and would require the extension of settlement boundaries. The plan does not give reasons or justification for this and the effect of development of new buildings here would be contrary to NPPF para 79 because it will contribute to urban sprawl by lessening and reducing the value of the Green Belt areas separating the Horsleys from neighbouring settlements.

- I object to any change of the settlement/village boundary reducing Green Belt as it would not only harm the openness and permanence of the Green Belt but would allow further applications for development on green fields. These fields serve the purposes of the Green Belt (para. 79-80), and also represent prime farm land. This would be contrary to a commitment in the local plan to protect Green Belt in the borough.

- the total of the four sites in Horsley breach NPPF 81 which encourages access to Green Belt for use of its amenity and recreation value

- these remaining policies will unnecessarily urbanise and be detrimental to the rural character of the Horsleys with no exceptional circumstances for this having been given in the plan. This justifies the continuing objection from residents. I would urge the plan to adopt the previous positive planning that protects the Green Belt first and foremost.
-although the new plan puts great emphasis on need for adequate facilities and infrastructure to support development, this
has not been stated in any new wording related to the Horsleys and therefore has failed to address the local concerns and
objections. The plan merely presents the prospect that there will be harm to both villages and resulting in harm to the
Green Belt itself.

- the plan to allow the density of new housing as still presented in the amendments is still too great and inappropriate for
the locality.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the changes to Policies A36 to A41 (East and West Horsley)

- The number of potential development sites has been reduced by MERELY TWO (A36 and A41, representing a
total of 138 dwellings). This leaves four sites (A27-40) which still represent a total of 395 new dwellings.
- Marginal changes such as these would still leave 70% of all new development in the borough built on Green Belt
sites. No “exceptional circumstances” or any other justification is advanced for this strange imbalance.
- The deletion of two Horsley sites fails to correct the issue of relative overdevelopment in East and West Horsley,
which is both excessive in absolute terms and disproportionate in relation to the rest of the borough.
- The plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the
Horsley sites, including public transport, traffic, road safety, parking, schooling, medical facilities, sewage,
flooding/surface drainage and shops. These were fully set out in responses to last year’s public consultation.
- The density of new housing on the four Horsley sites is inappropriate, being greater than anywhere in the
locality at present. Collectively, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to
the Green Belt and its amenity and recreation value.

1. SITES POLICIES

Of the many sites policies set out in the Proposed Submission Local Plan, I comment upon those in East Horsley as well as several in the surrounding area which may affect the village.

Five East Horsley sites are identified in GBC’s Land Availability Assessment (‘LAA’), two of which are allocated under policies in the Proposed Submission Local Plan. The adjacent parish of West Horsley has six sites identified in the LAA, four of which are allocated in the Proposed Submission Local Plan. Our comments on these site policies are as follows:

POLICY A36: Hotel, Guildford Road

Policy A36 proposes to re-develop the current Thatcher’s Hotel for housing.

I am concerned about the loss of this long-standing village hotel and significant employer. However, assuming that the employment loss can be justified, (which is a condition of Policy A36), then I am broadly supportive of housing...
development at this location, providing it is done in a manner that is in keeping with its prominent landmark position at the entrance to the village. The site is also close to the East Horsley Conservation Area and housing designs and site configuration must reflect the sensitivity of this setting.

Whilst I endorse many of the requirements set out in Policy A36, my principal concern is over the number of houses proposed for this site - approximately 48 dwellings. This number gives an implied gross housing density of 37 dwellings per hectare, which is exceptionally high for this location. The average housing density across the East Horsley Settlement Area is 8.1 dwellings per hectare and the highest density found in any of the roads around this location is 13 dwellings per hectare.

I would only support development at this location if it has a significantly lower housing density.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing for formally and strongly object to the 2016 Draft Local Plan. Please see my comments outlined below.

I OBJECT to Policy A36: Hotel, Guildford Road, East Horsley - site for approx 48 new homes
- My family and I regularly use this site for boarding and leisure, it would be terrible if it were replaced

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41:

- Amount of new housing far exceeds local
- Housing density excessive when compared with existing
- Would transform the Horsleys into a sizable town, something for which no case is made.
- No local support
- Collective impact of these 6 sites on a small part of the borough not Should not be treated as isolated, separate sites.
- Total amount of new building out of scale with the plan ned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt
- Sites Key infrastructure Jacking. No adequate provision is made to increase it -e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding.
- No account taken of additional impact of Wisley Airfield site on Horsleys.
- Extension of settlement boundaries too permissive. Horsleys characterised by streets with development along only one side of the Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don't contribute to Green Belt "open ness".
- Green Belt gap with neighbouring settlements hugely narrowed, especially if Wisley Airfield is built on.
- Will harm compliance with NPPF 81- e. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of G range Park Opera's new "Theatre in the Woods".
- Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter
- Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

In particular I OBJECT to the continued inclusion of sites A36 to 41 (East and West Horsley). The latest version of the proposed Local Plan reduces the number of sites proposed in this area but 4 remain with a proposed total of 395 new homes. This to me is not in proportion to the rest of the Borough. There seems to me to be no regard to the impact that this number of new homes will have on the immediate area, given also the proposed number of new homes at Site A35 only 2 miles away. In addition the density of new housing proposed on these sites is far too high compared to that of the local area and no regard appears to have been given to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY A36: Hotel, Guildford Road

The Thatcher’s Hotel is something of a landmark in East Horsley and to those who pass through.

Policy D3: Historic Environment of the draft plan states that

“Guildford borough’s historic environment is intrinsically part of what makes Guildford the place it is, that it acknowledges the wider social, cultural, economic and environmental benefits that conservation can bring to our community and that it will conserve and enhance the historic environment in a manner appropriate to its significance.”

It further states that:

“Heritage assets are an irreplaceable resource and works which would cause harm to the significance of a heritage asset, whether designated or non-designated, or its setting, will not be permitted without a clear justification to show that the public benefits of the proposal considerably outweigh any harm to the significance or special interest of the heritage asset in question.”

I OBJECT to this policy as I believe that The Thatcher Hotel is part of this historic environment and that this policy runs contrary to Policy D3.
Furthermore Policy E6: The leisure and visitor experience. States:

“The loss of existing visitor, leisure and cultural attractions, including arts and entertainment facilities, hotels and indoor sports venues, will be strongly resisted unless replacement facilities of an equivalent or better standard and provision are proposed in a location equally accessible to the facility’s current catchment area.”

The Thatcher Hotel attracts visitors to the area by providing accommodation and restaurant facilities. It also caters for those wishing to hold receptions, parties etc. by providing rooms for this sort of thing. Therefore it is surely a visitor attraction. forth.

Therefore I OBJECT to this policy as it runs contrary to Policy E6

Furthermore the density of houses proposed for this site (37 dph ) is much higher than currently exists within East Horsley (8.1 dph). According to the local parish council the highest density found locally to the proposed site is 13 dwellings per hectare.

The proposed dph is therefore approximately 5 times the average in the village, which I think is very high for this location.

Thus, I OBJECT to Policy A36 on the grounds that it is out of keeping with local character, context and distinctiveness, and therefore breaches the NPPF and emerging GBC Policy H1.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

On the information available to date we do not envisage infrastructure concerns regarding wastewater infrastructure capability in relation to this site.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

### Comment ID: pslp172/2204  Respondent: 17301377 / Amanda Obrien  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I object to the new local plan, my reasons are as follows;

Sites A36-41 (East and West Horsley)

This submission focuses on changes made to the 2016 draft Local Plan. In the case of Sites A36-41, the changes are minimal. This ignores the high volume of serious objections submitted to this part of the plan.

The number of potential development sites has been reduced by two (A36 and A41, representing a total of 138 dwellings). This leaves four sites (A27-40) which still represent a total of 395 new dwellings.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

### Comment ID: pslp172/2680  Respondent: 17340193 / Surya Hotels (S Dulai)  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( No ), **is Legally Compliant?** ( )

The Councils latest AMR suggests a housing supply of a little over 2 years, which reflects a persistent failure to address the OAN. The calculation of 5YHLS takes account of sites identified in the SHLAA but which do not benefit from planning permission or an allocation. Site A36 is one of the sites that it is suggested could be drought forward within 5 years.

The site is available and could be developed for housing within 5 years.

The site is allocated for residential development in the submission draft of the East Horsley Neighbourhood Plan.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The site should be reinstated as a housing allocation in the Local Plan, in part to reflect the putative Neighbourhood Plan allocation.

Lanpro Services are acting on behalf of Surya Hotels in relation to their Thatcher’s Hotel site in East Horsley, who have instructed Lanpro to review the current Guildford Borough Proposed Submission Local Plan: Strategy and Sites Consultation Document.

It is appreciated that Guildford Council are only seeking comments, at this stage, on the changes that it is proposing to make to the plan and on the new and updated evidence base. As such, these comments will focus on the proposed changes to The Horsleys – East Horsley (south) and Horsleys – East Horsley Proposals Maps. Lanpro are supportive of the changes made to the proposals maps.

The Thatcher’s Hotel, East Horsley

The Hotel extends to an area of approximately 1.6 hectares on the edge of the village of East Horsley.

The site is currently occupied by Thatcher’s Legacy Hotel with its associated car parking and landscaped areas. It is accessed from the A246 Epsom/Guildford Road which runs to the west and south of the site.

The topography of the site generally slopes gently upwards from north to south with a slightly steeper incline towards the southeast corner. Current site levels on the southern boundary are generally lower than those of the adjacent A246. There is well established natural vegetation around the site, particularly to the south and west along the perimeter boundary. The site does not contain any Public Rights of Way or bridleways.

The site in its entirety measures approximately 1.6 hectares. The footprint of the existing buildings cover an area of 0.24 hectares, which is approximately 14.5% of the overall site. Hard standing accounts for a further 0.39 hectares, which is approximately 24.5% of the total site area. The existing built form and hard standing combined cover 0.63 hectares, approximately 39% of the overall site.

The remainder of the site that is not occupied by the built form or development includes areas of grass, vegetation, signage, lighting and more formal garden seating areas closer to the building.

A part full, part outline application for the substantive demolition of the hotel buildings and change of use of the retained parts from hotel use (C1) to residential use (C3) (full application) and the erection of dwellings (outline application) to provide a total of up to 49 new dwellings was dismissed at Appeal on 9th February 2017 (Council Ref. 15/P/02354, PINS Ref. APP/Y3615/W/16/3158653).

The Horsleys – East Horsley (south) and Horsleys – East Horsley Proposals Maps

It is noted that the Local Plan proposes a number of changes to the proposals map, including:

- Removal of site allocation A36 (The Thatcher’s Hotel);
- Alterations to the Green Belt Boundary; and
- Alterations to the identified settlement boundary, to include the whole village settlement area.
Settlement Boundary

We support changes made to the identified settlement boundary, including removing East Horsley, particularly The Thatcher’s Hotel site, from the Green Belt. These changes will give clarity and certainty in supporting a wider range of uses regarding either the expansion or redevelopment of the existing hotel use, or the future redevelopment of the site.

Site Allocation A36

With regards to site allocation A36, it is noted that the Council’s principal reason for removing the hotel is due to, “insufficient evidence to demonstrate the loss of the hotel.” Following the refusal of the earlier scheme in 2017, the owners of the site are considering their next steps regarding the redevelopment of the hotel, which is likely to include providing further evidence to address the Inspector’s views on this issue. As such, it is possible that further evidence to justify the allocation could be available prior to the Examination In Public to support the redevelopment of the hotel.

Furthermore, it is noted that the most recent draft of the East Horsley Neighbourhood Plan, published 21st March 2017 (and after the Inspector’s decision), retains this site as an allocation for housing development (as Site 4). Policy H6 of the Neighbourhood Plan proposes an allocation of up to 22 dwellings, providing that the loss of the hotel facility must be appropriately justified in the planning application in accordance with the applicable local plan.

The changes proposed to the East Horsley Proposals Map does not identify a replacement allocation for the 22 dwellings proposed by The Thatcher’s Hotel site. As such, we would suggest that an alternative approach to this site could be to retain the allocation on the basis that it may facilitate the expansion/improvement/ diversification of the hotel to make it viable as enabling development, or retain the allocation to enable the redevelopment of the hotel site, depending on the site only being developable when the Local Authority is satisfied that the loss of the hotel has been justified, following the further work being done to look at demand and supply of bed spaces and the overall short to medium term viability of the hotel.

Development Proposal for The Thatcher’s Hotel

As with the previously refused scheme, it is considered that the site can accommodate up to 49 dwellings.

Any proposed development would involve the demolition of the majority of the existing hotel and outbuildings, with the exception of the original Chown building, which could be retained and converted into private flats. 35% of the proposed dwellings would be provided as affordable.

Development of this site would comply with general NPPF policies relating to the use of brownfield sites, specifically paragraph 111 which states that, “planning policies and decisions should encourage the effective use of land by re-using land that has been previously developed.”

Summary

Lanpro supports the alterations proposed to the settlement and Green Belt boundary as it would allow for the redevelopment of the hotel and its wider site. However, we would welcome the retention of the site allocation A36, to support the redevelopment and expansion of the hotel site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Site Policy A36 Thatchers Hotel East Horsley site is no longer in the Local Plan and I support its’ removal for housing development and believe there is a case for retaining the current use as a Hotel.

Total records: 94.
Proposed Submission Local Plan Regulation 19 representations (2016 and 2017)

Document part: A37 - Land at and to the rear of Bell and Colvill, Epsom Road, West Horsley
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to you with regard to the Proposed Local Plan, as I am the owner of [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], which constitutes part of one sites in the plan allocated for development, namely of A37: Land at and to the rear of Bell and Colvill, Epsom Road, West Horsley on pages 209 and 210 of the plan.

Whilst I am not educated in land development matters I feel is important you have input from a homeowner and village resident whose circumstances will be affected by the proposed plan.

Initially, I write to state that I wholeheartedly support the plan. Whilst my family and I enjoy living in West Horsley, and enjoy the delights of a semi-rural environment, we have long felt that the area should be sharing the national burden for housing and that is unacceptable to continue to "fight off development" and expect other locations to deal with the challenge. Furthermore if we are to sustain our rural villages into the future we need to ensure that there is sufficient and suitable housing that encourages young people and families to live in them.

It is clear to me that Guildford Borough Council's plan has been well researched and thought through, and offers the best solution for increased housing whilst protecting the rural feel of the borough. Infill between existing dwellings, on sites such as ours, are definitely more acceptable than extending village boundaries into large areas of open fields.

The plans to make West Horsley an inset village, and specifically the allocation of the site we form part of are both sensible and executable such that the majority of the site is away from public gaze, and can be developed in a sensitive way, in-keeping with the context of the village, to provide suitable additional housing required, and contribute to the Council's housing requirements.

As I am sure you are already aware, the site is made up of land owned by four different people. I have marked up the owners, including myself, on the diagram below:-

I am in dialogue with [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], both of whom have confirmed that they are keen to develop their land either individually, or together .

I myself am agreeable to development [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], individually or as part of the whole plot, including road access either through my plot from The Street, or via Bell and Colvill.

It should be noted, for reference, that I have a pre-emption agreement with Mr Witherby, since his land was originally part of [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], that should he come to sell his land I have first option to purchase his land. Since the publication of the draft plan, I have been approached by a number of "developers" and "land agents/ consultants", all of whom have formulated plans which suggest between five and seven houses of three to four bedroom size and a similar number on the land adjoining [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] owned by [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] (red and green areas on the diagram above) could be built in line with planning regulations.
The houses' design and appearance would be in keeping with the village, thus retaining the village's integrity and character.

My current position is that I would look to move plans forward quickly in consultation with the Council planning department as soon as possible, within the confines of the Local Plan coming into force.

With specific reference to the National Planning Policy Framework, I am flexible as to whether the site falls within the 6-10 year timescale for the wider site development, or it can be developed on a smaller scale as either just [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], or to include the adjoining land within the shorter timescales of 0-5 years.

Additional factors that make the site both suitable and attractive for development are:-

- It is not agricultural land
- It is not contaminated by previous use such as a former industrial site
- It would not require change of use as it has an existing dwelling and outbuildings
- Direct access to the public highway can be provided from The Street
- It does not represent a major site, and therefore will have minimal effect on biodiversity
- The site is solely under my ownership

In summary I firmly believe that the site can be developed quickly, and in keeping with the character of the village to support the Council's need to provide additional suitable housing in the Borough, and I would very much like to keep it in the plan as available for development.

I fully support the plan and the inclusion of our site and if I can be of any further assistance please do not hesitate to contact me.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

With regard to site A37 in the plan. I am one of the landowners and would like to re-state my support for the proposed development of the site. I understand that the phasing has been amended for the site and is now due for delivery in the first 5 years of the plan. Again I am in full support of this and believe the site can easily be delivered in that timescale.

Site A37 land at and to the rear of Bell and Colvill, Epsom Road, West Horsley

177. I object to this site being i Guildford Borough Council have proposed moving the settlement boundary and insetting the enlarged village in order to allow a development for which there are no exceptional circumstances. Much of the site is greenfield, close to buildings of historic interest and is in a rural location in full view of visitors to the area. The proposed development pays no respect to its setting.

CPRE OBJECTION TO HORSLEY SITES A37, A38, A39, A40, & A41

CPRE objects to the proposal for six main development sites in the two attractive communities of East and West Horsley. Altogether these add up to more than some 535 new houses. Both villages are currently washed over by the Green Belt. The new development will be made possible by means of “insetting” which CPRE opposes in the draft Local Plan as it facilitates the growth of communities such as these which are together distinguished by their openness within a rural area. CPRE also objects to the extension of the settlement boundary south of the A246 and the progression of linear development towards Effingham and Ockham where the development of 2,000 houses is being proposed for the former Wisley airfield only some 2 miles away.

There are a range of constraints which have to be taken into account when reviewing these new proposals but have been ignored in the draft local plan. We are informed, for example, that Thames Water has advised GBC that the current wastewater network in this area is unlikely to be able to support the demand anticipated from all this ambitious and
unexpected development growth. If this were to go ahead, the foul drainage system all the way to the treatment works North of Ripley will not be able to cope and would have to be upgraded through substantial investment.

The proposed expansion of housing on this scale will lead to major problems in terms of educational school provision. The following schools in the area are already operating at near or full capacity: Raleigh School, the Howard of Effingham School, and the private Glenesk and Cranmore Schools. It should be remembered that children in Ripley are currently having to be sent to schools in Shearwater in Woking and even to Addlestone.

Surrey County Council has published no plans for creating further school places for children of all ages for the Horsleys, or for the traffic management and environmental improvement scheme they have promised between 2019 and 2023.

CPRE objects to the volume of high density new housing proposed for the Horsleys which amounts to some 35% more homes because it will harm the character, identity, and setting of these villages. NPPF requires that new residential development must respect these elements of the community environment which will be entirely lost by building on the scale envisaged and should be limited drastically to take account of the infrastructure deficit.

The heritage buildings at Hatchlands belonging to the National Trust, and at West Horsley Place, where the new proposal for the Grange “Opera in the Woods” has been approved by GBC, must be protected against what appears likely to be unsustainable development which will overwhelm the local community environment for ever. West and East Horsley will be swamped with extra cars and people using the shops, stations, village halls, sports facilities, medical services, parking space and public transport. Paragraph 87 of the NPPF makes clear that inappropriate development is by definition harmful to the Green Belt and should not be approved except in very special circumstances. We do not agree with the draft Local Plan that this community should be a candidate for “insetting” to facilitate development on the scale suggested. We object to what is proposed and will oppose any suggestion that “exceptional circumstances” justify amending the Green Belt boundary in the way described at this draft Local Plan consultation as we consider this approach unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/894  Respondent: 8659489 / Helen Bennett  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

The Bell & Coleville site is suitable for housing development, but these plans seem to include a large tract of land behind the brownfield site. Every time an extra field is taken into building part of the rural nature of the Horsleys disappears for ever. The actual site of the garage, showroom and parking should be redeveloped, but no more.

<tr>
<td>5.4. Policies A37, A38, A40 &amp; A41 in West Horsley</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
5.4.1. The LAA has identified 6 sites in West Horsley for potential development, the four largest having allocation policies within the Local Plan. The total housing number arising from these 6 sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a significant increase of 36% over the plan period, an enormous proportional increase by any standards.

5.4.2. The four policy sites are all located within the Green Belt. One is a partly Brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these Settlement Boundary movements appear highly questionable and in no way meet the requirements of the NPPF that such boundary movements are only to be made in exceptional circumstances. These movements clearly represent a deliberate pushing back of Settlement Boundaries in order to provide more Greenfield sites for housing development.

5.4.3. The only point in favour relates two of the sites one being partly brown field and back infill of earlier ribbon development and the other are small paddocks used for grazing horses. It is stretching the rules nevertheless to justify removing them from the Green belt. The infilling proposed will create a hard edge interface with the countryside for which there could be little justification or mitigation.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A37

Do you consider this section of the document; complies with the Duty to Cooperate?  ( ), is Sound?  ( ), is Legally Compliant?  ( )

Bell & Colvill Garage (Ref. A37, ID16) is, again a very busy road intersection where Cranmore School traffic queues daily obstructing and completely blocking the road for all other users every morning and evening. To add a further possible 40 houses, so perhaps 80 more vehicles into this already busy area is in my view absurd and irresponsible. There are children who are forced to walk down Shere Road, where there are no pavements, or street lights, or central marking, and they already have to dodge the fast paced traffic, then cross the main A246 to catch their school bus (to the nearest secondary state school). To exacerbate the traffic volumes is making an already bad situation worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate?  ( ), is Sound?  ( ), is Legally Compliant?  ( )

Traffic flow, due to a combination of regular daily traffic combined with access and departure from Cranmore School (450 pupils), has long been a major problem and any additional homes and associated cars in this immediate vicinity will cause havoc. Similary, the very limited shops in West Horsley are served by not nothing more than a small lay-by with no room for expansion. These are problems NOW before any additional houses are built that will inevitably mean an additional 100 cars based on an average of 2.5 cars per property. For these reasons, I hold SIGNIFICANT RESERVATIONS against this proposal but do not object to it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
**Site A37: Bell & Colville Garage, West Horsley (40 houses)**

Traffic flow, due to a combination of regular daily traffic combined with access and departure from Cranmore School (450 pupils), has long been a major problem and any additional homes and associated cars in this immediate vicinity will cause havoc. Similarly, the very limited shops in West Horsley are served by nothing more than a small lay-by with no room for expansion. These are problems NOW before any additional houses are built that will inevitably mean an additional 100 cars based on an average of 2.5 cars per property. I OBJECT to policy A37. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF.

I object. I believe it is within 5km of the Thames Basin Heaths SPA, and therefore any development is subject to EU/UK legislation (NPPF 119). The impact cannot be mitigated with SANGs because there is no evidence base to support SANGs as required by NRM6 viii, NPPF 158 and 166.

I am comfortable that the loss of the garage would not significantly adversely impact West Horsley. As with site A36 above, I am also of the view that this is already a developed site (e, brownfield) it represents the type of site the Council should be looking to develop rather than seeking out entirely greenfield sites.

A condition of the development would have to be to ensure the local surface water flooding problems after the development were reduced compared to the problems currently being experience, ie, the development would need to include significant investment in upgrading the drainage infrastructure for the areas affected by the development.

If there is to be development then I would not object to development at this site, with the condition that the drainage infrastructure is upgraded as set out above.

A37, A38, A40, A41 located in West Horsley

The four proposed sites, totalling 385 dwellings, all lie within the Green Belt at the edge of the settlement area. For a village with approximately 1100 dwellings at the 2011 Census, this represents an increase of 35% over the plan period, an enormously high percentage by any standards.

The justification for making changes to the settlement boundaries in order to meet unfulfilled housing need as suggested in the Green Belt and Countryside Study commissioned by GBC is questionable since the NPPF states that every movement in settlement boundaries must be justified by 'exceptional circumstances'. The boundary movements clearly represent an decision to push back the boundaries to provide more greenfield sites for housing development.
Boundary movements are also contrary to the principles of the Metropolitan Green Belt. West Horsley and the adjacent village of Ockham (where development at the former Wisley Airfield is also proposed) represent the first line of defence against the urban sprawl of London outside the M25 circle. By seeking to expand settlement boundaries and infilling on any green space in these rural locations means this 'line of defence' is eliminated.

The premise in Policy P2 of the Local Plan: 'We will continue to protect the Metropolitan Green Belt therefore seems completely opposite to what is proposed for West Horsley (and all other villages whose settlement boundaries are proposed to be altered).

Village expansion on the scale being suggested for West Horsley will not be sustainable. There is only one small shop at the southern end of the village, no post office and a bus service which operates on a very limited weekday basis. The high volume of new housing would add to the already overstretched facilities in East Horsley which both East and West Horsley residents already use. Traffic generation will be considerably worse on the roads, and even worse if the Wisley Airfield proposal is included as Horsley station would be one of two stations closest to this development and parking is already at a premium during the week. It is fanciful for the Local Plan (or indeed the developers for Wisley Airfield) to suggest that commuters will cycle to the station in anything other than very small numbers.

The roads are unlit, many are narrow and winding in nature and have poor sightlines with concealed driveways (including my own).

Given the scale of the proposed development in West Horsley, the inevitable loss of village character and the impact on the infrastructure across West and East Horsley, I OBJECT to the site Policies A37, A38, A40, A41.

POLICIES A37, A38, A40 & A41, located in West Horsley

I OBJECT to POLICIES A37, A38, A40 & A41, given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley. The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

1. **Effects on Travelling**

   The time it takes to drive to the station from my home to Horsley station is already protracted due to high traffic volumes around East Lane/Ockham Road South, particularly during school drop-off times.

   The addition of a further 385 houses in the immediate area will make matters markedly worse, and from talking to officers in the GBC planning department, no traffic analyses or journey time assessments have yet been earned out to determine the extent.

   The station car park is already full on most working days, and there is no apparent means of expanding it.

   The trains are becoming increasingly more intensively used, and the proposed addition of an extra station at Merrow is likely to lead to even more congestion and uncomfortable conditions for passengers further up the line.

   How is it to be expected that developers will be able to mitigate these effects (under sustainable Transport Policy i3)?

   1. **Access to Shops and Local Facilities**
No thought has been given to the increased parking demand resulting from these developments. Parking at the shops in any of the three retail areas is already difficult at the best of times. Has anyone carried out an assessment of the implications of adding a possible 700 more cars in East and West Horsley? No, of course not.

Recruitment of doctors to work in GP surgeries is known to be a national problem and the local medical centre is already increasingly stretched, going by lengthening waiting times for appointments. How is GBG going to address this issue? It can't.

REPRESENTATIONS BY BELL AND COLVILL LTD ON THE GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN STRATEGY AND SITES; JUNE 2016.

**Introduction**

ShrimplinBrown Ltd are instructed by Bell and Colvill Ltd (B&C, Our client) to submit the following representations to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites document, June 2016.

ShrimplinBrown have undertaken a comprehensive review of the Draft Guildford Local Plan document as well as the relevant supporting evidence base. In accordance with the guidance set out within the Planning and Compulsory Purchase Act 2004 as amended by the Localism Act 2012, the following representations relate specifically to the “legal compliance” and “soundness” of the draft Local Plan. As well as the specific tests of soundness set out in the NPPF.

These representations should be read in conjunction with the attached summary information and Design and Access Statement drawn from the recent planning application and which provides further analysis of the site capacity for land at Bell and Colvill together with assessment and justification of site potential.

For ease of reference we have set out our representations within this single document which addresses the relevant questions set out within the questionnaire and makes clear references to specific; paragraphs, policies and site allocations within the draft plan.

A completed copy of the Council’s Questionnaire is also enclosed.

**QUESTION 1: THE EVIDENCE BASE AND SUBMISSION DOCUMENTS**

The majority of the Evidence Base is considered robust, although the Council have not published an update on CIL. This will be a key document in assessing and evaluating the deliverability of sites and other plan commitments, in particular the level of affordable housing sought from new development.

Our Client is concerned that the 40% target for affordable housing provision has been determined on the basis of assumptions from the Preliminary Draft of the CIL Charging Schedule. Furthermore, the affordable housing threshold does not take account of National Guidance (see additional comments on Policy H2 below).

UN SOUND There is insufficient JUSTIFICATION for the affordable housing policy which is based on an outdated Evidence Base and which is not based on up to date information in relation to CIL. The Policy is also inconsistent with National Guidance.

**QUESTION 2 AND 3: LEGAL COMPLIANCE AND SOUNDNESS**

As a whole our Client considers that the Local Plan may be deemed to be legally compliant and sound subject to comments in relation to specific policies which for ease of reference we consider in turn below.
As a general point we are concerned that the Council have failed to “…assess the likely cumulative impacts on development in their area of all existing and proposed local standards…” (Paragraph 174 of the NPPF).

In particular our Client has concerns regarding the cumulative impact of; Affordable Homes (Policy H2); Policy D1 (Making Better Places); Policy D2 (Sustainable Design, Construction and Energy) and the Council’s future proposals for CIL (only a preliminary charging schedule currently published)

The wider conformity with National guidance is considered individually below in our responses to individual policies.

QUESTION 4: DUTY TO COOPERATE

Our Client have no specific comments to make on the Duty to Co-operate at this stage.

QUESTION 5: EXAMINATION

Our Client wishes to reserve the right to attend the Examination. They are the owners of land which is included in Site Allocation A37- Land at and to the rear of Bell and Colvill, Epsom Road, West Horsley and thus wish to reserve the right to attend the Examination in order to clarify any details relating to the site allocation, site capacity or to present evidence relating to any policies which could impact on the effective delivery of the allocation.

QUESTION 6: THE CONTENT OF THE PLAN

Our Client wishes to make the following comments on the Draft Plan.

POLICY H2: AFFORDABLE HOMES

Our Client is supportive of the need to make appropriate provision for affordable housing, however, they wish to make the following specific comments in relation to; the viability and justification of the affordable housing target set out within Policy H2.

Compliance with National Guidance

The Council’s policy does not take account of Paragraph: 031 Reference ID: 23b-031- 20160519 of the NPPG.

This states that there are specific circumstances where contributions for affordable housing and tariff style planning obligations (section 106 planning obligations) should not be sought from small scale and self-build development. This follows the order of the Court of Appeal dated 13 May 2016, which give legal effect to the policy set out in the Written Ministerial Statement of 28 November 2014 and should be taken into account.

These circumstances are that;

• Contributions should not be sought from developments of 10-units or less, and which have a maximum combined gross floorspace of no more than 1000sqm
• In designated rural areas, local planning authorities may choose to apply a lower threshold of 5-units or less. No affordable housing or tariff-style contributions should then be sought from these developments. In addition, in a rural area where the lower 5-unit or less threshold is applied, affordable housing and tariff style contributions should be sought from developments of between 6 and 10-units in the form of cash payments which are commuted until after completion of units within the development. This applies to rural areas described under section 157(1) of the Housing Act 1985, which includes National Parks and Areas of Outstanding Natural Beauty.

The clear intention and wording of the Ministerial Statement is to ensure that smaller scale development (10 units or less) are not burdened by the need to provide affordable housing or other contributions. This must clearly apply to both financial contributions as well as on-site provision.

For the avoidance of doubt a lower threshold should only be applied in ‘rural areas’ which meet the definition in the Housing Act. This should not include sites within defined settlement boundaries i.e. a lower threshold would not be appropriate within the revised West Horsley settlement boundary. Furthermore, our Client cannot, however, see any
grounds for a lower target to be applied anyway in the Borough and indeed there is no support for such an approach from the Council’s evidence base.

The Local Plan does not reference the Ministerial Statement and relies on Evidence Base which pre-date the Court of Appeal Decision. The Guildford Borough Council Local Plan Viability and Affordable Housing Study, Final Report, December 2014 references the relevant National Guidance at 2.2.7 to 2.2.12, however, no justification is provided for setting aside the policy provision.

Flexibility in the application of the target

Although it is agreed that, where possible, a sufficient level of affordable housing should be provided on site, this should be subject to viability considerations and should, on a site specific basis, take into consideration other regeneration benefits or sites costs. The policy should include a greater degree of inherent flexibility to specifically recognise the need for reduced levels of on-site provision or off-site contributions on sites that would otherwise be undeliverable.

The Council must be certain that the affordable housing target that is ultimately adopted is realistically attainable and will not hold back development. The policy should also include safeguards to prevent the policy being rigidly applied and being used as a brake on development.

Setting the affordable housing target

We understand the pressing need for affordable housing within the District and overall our Client supports the approach to extend the requirement across a wider range of sites, taking account of the National limitations on sites of 10 units or less. Our Client considers that the threshold should be set at 11 units. There is also no justification for setting an additional size threshold of 0.17 hectares.

It is deemed appropriate that the Council have adopted a level playing field by setting a single fixed target, however, the 40% level is deemed unrealistic particularly in the context that affordable housing completions as a proportion of total supply have only hit 31% of the period 2008-2013. This is without the added burden of a CIL charge.

It is considered that the proportion of affordable housing should remain at 35% with clear flexibility written into the policy to reduce this when development otherwise be unviable.

The policy should also clarify that the affordable threshold should be derived on a ‘net increase of units’ to enable the offset of existing housing stock.

Off-site contributions

The policy text makes no provision for off-site contributions which will be essential on some smaller and medium size schemes (11 units or more) to ensure that they are workable, viable and ultimately deliverable. To be robust the policy must include a specific mechanism within the policy wording to allow offsite contributions in appropriate circumstances. Reference is made to this at paragraphs 4.2.36 – 4.2.37, however, there needs to be a specifically included within the policy text.

Any formula must also be tested and subject to public consultation and should not be left for publication as supplementary guidance.

It must also be recognised that alternative sites cannot always be identified and it is unrealistic to specify that land values for affordable housing must always be provided at nil value.

It is considered that the statement at paragraph 4.2.38 that ‘the vast majority of development in most locations in the Borough are viable providing an affordable housing contribution of 40 per cent.’ Is misleading. The viability work is based on specific scenarios and it is not considered that this provides a reliable basis for the threshold and percentage adopted.
In order to ensure that development comes forward in the short term the approach outlined at paragraph 4.2.39 may only realistically be applied once the plan, and any CIL charge has been adopted. Where land has been acquired or options signed in advance the Council should adopt greater discretion in negotiations.

Finally, Affordable housing is a dynamic sector and accordingly the Council should ensure that this policy does not prejudice the delivery of; key worker or Private Rented Sector schemes which can make schemes in their entirety more accessible.

UNSOUND: The published Affordable Housing Evidence Base is not considered to provide the necessary justification for the 40% target. The target should be reduced to 35%

No justification is provided for setting aside the National Policy which limits the requirement for affordable housing on sites of 10 units or less. The threshold should be set at sites of 11 units or more, and no site size threshold should be included.

Flexibility must be included within the policy wording to enable the negotiation of off-site affordable housing contributions.

POLICY P2: GREEN BELT

Our Client fully supports the proposal to inset villages from the Green Belt, including West Horsley. This is essential to ensure that the Council maximise the opportunities for housing delivery, particularly in the earlier years of the Local Plan.

SUPPORT POLICY

POLICY P5: THAMES BASIN HEATHS SPECIAL PROTECTION AREAS

Our Client considers that in assessing the requirement for mitigation within five and seven kilometres of the SPA the threshold of 50 net new dwellings is too low and would place a further unreasonable restriction on development.

The supporting text states that 80% of visitors come from within seven kilometres of the SPA, however, this does not quantify the proportion from the outer reaches of the zone of influence (5-7 kilometres).

This consideration is more relevant to the larger strategic sites and it is suggested that a threshold of 100 or 150 units should be imposed. Furthermore, the uncertainty presented by the case by case assessment will curtail the delivery of sites and could stifle housing delivery.

UNSOUND: The assessment of schemes of 50 net new dwellings within 5-7 kilometres of the SPA is not JUSTIFIED and would threaten the EFFECTIVENESS of the Plan.

RECOMMENDED CHANGE: Increase the threshold to at least 100 units.

POLICY D4: DEVELOPMENT IN URBAN AREAS AND INSET VILLAGES

B&C fully support the proposed southern extension to West Horsley (As shown on the Proposals Map)

However, whilst the overall objectives of the policy guidance set out at Policy D4 are acknowledged and broadly supported by Our Client it is considered that the tone of the policy could serve to curtail rather than encourage the development of the specific site allocations identified in the Plan. Paragraph 4.5.46 suggests that the policy is targeted to windfall opportunities, however, the wording could still be applied to ‘all new development’ including site allocations. Our Client contend that this would undermine the delivery of Site Allocations and impact on the delivery of the Council’s housing target.

The expansion and development of edge of settlement sites will necessitate some changes in scale, massing and height. It will also be necessary to build at increased densities in order to ensure the most effective use of land. Whilst it will be important to ensure that new development successfully integrates within areas and does not impact on the amenities of
neighbours the Borough requires a step change in the delivery of housing, particularly in urban areas. As such
settlements and places will need to sensitively evolve.

UNSOUND: As currently drafted the policy will not be EFFECTIVE in securing the delivery of Site Allocations. It is
suggested that the policy is re-worded as follows.

“Development will be deemed acceptable in principle for all of the Site Allocations identified at pages 123-126. The
approximate site densities should be achieved wherever possible subject to compliance with other plan policies.

Other new development in the urban areas of Guildford, and Ash and Tongham, and inset villages should
• Be developed with reference to the layout, scale, form, massing, height and materials of surrounding buildings
  and structures;
• Take account of the existing grain and street pattern
• Conserve, and where possible enhance designated heritage assets
• Ensure that the amenities enjoyed by the occupants of buildings are protected.

To avoid confusion the policy should also specifically identify the Inset Village Areas where it is intended that this
criteria will be relevant. Similarly these criteria should not serve as a brake on the delivery of Site Allocations.

SITE ALLOCATION A37: LAND AT AND TO THE REAR OF BELL AND COLVILL, EPSOM ROAD, WEST
HORSLEY

The council’s decision to allocate land as part of Site Allocation A37 and the amendment to the village settlement
boundary is fully supported by the Evidence Base as follows:

LAA, February 2016

The LAA identified development potential for circa 40 houses on land encompassing the eastern part of the Bell and
Colvill site together with land to the north and west. In highlighting the potential of the site the LAA noted that the site is
very close to other residential properties and services in the village.

A Phase 1 contamination survey has been undertaken for the Bell and Colvill site which has shown that there is no
ground contamination which would prevent residential development.

The site is in Flood Zone 1. The LAA concludes that access from the A246 could be appropriately adapted.

The Bell and Colvill garage site is located outside of the conservation area.

Green Belt and Countryside Study, 2014

The Council have undertaken a detailed assessment of the Green Belt and Countryside across the entire Borough which
led to the proposed amendments to settlement boundaries set out in the Draft Plan including the proposed revisions to
include additional land to the north-west and south of West Horsley.

The enclosed finger of land comprising the Bell & Colvill garage site and land to the north was highlighted within the
document as a logical location for the extension of the settlement and has been carried forward to the Proposed
Submission Draft Plan.

Landscape and Character Assessment, 2007

The site is not within a sensitive location within the LACA and development of the site would contribute positively to
enhancing the characteristics of the Ockham and Clandon Wooded Rolling Claylands.

The development plot is well contained by the existing settlement and a firm defensible southern boundary created by the
Epsom Road. Development in this location will clearly not lead to fragmentation of the landscape.
Summary

Our Client supports the proposed allocation for up to 40 residential dwellings. Residential use is the most appropriate use for the site.

The Bell & Colvill site already functionally forms part of the settlement and the currently undeveloped land to the north is enclosed on all sides. The development of these sites would form a natural rounding off of the settlement and will offer opportunities to; build new housing, rationalise the existing Bell and Colvill business and strengthen boundary landscaping.

The Council’s evidence base work has clearly highlighted the appropriateness of directing new development to West Horsley (north and south) and this work supports the proposed amendment to the Settlement boundary and the specific allocation of the site for development.

Whilst planning permission was refused in January 2016 for a scheme of 9 units this decision was on the basis of current policy and is subject to an appeal. As set out in the LAA the decision was predominantly on the grounds of inappropriate development in the Green Belt, which will be addressed through the proposals in the Draft Local Plan, and as such does not have a bearing on this allocation. Further details relating to the application accompany these reps.

Landownership, the likely need to relocate part of the Bell and Colvill business, and the nature of the collective landholding mean that it is very unlikely that the entire Site Allocation will come forward as an entire block. Whilst the garage site is likely to be developed in isolation it could in the future facilitate access into the rear plot without undermining short term potential.

SUPPORT SITE ALLOCATION A37: LAND AT AND TO THE REAR OF BELL AND COLVILL, EPSOM ROAD, WEST HORSLEY INCLUDING THE PROPOSED REVISION TO THE SOUTHERN EXTENT OF THE WEST HORSLEY SETTLEMENT BOUNDARY TO INCLUDE LAND AT B&C AND THE IDENTIFICATION OF THE SITE AS PART OF A WIDER OPPORTUNITY.

Land at Bell and Colvill (Part of Site Allocation A37)

A Planning Application was submitted in October 2015 for the following proposal:

“Construction of nine dwellings (two pairs of 3 bed semi-detached, two pairs of 4 bed semi-detached & 1 x 4 bed detached) with associated access improvements, car parking and landscaping following demolition of existing workshop, showroom, three residential properties and removal of hardstanding, on land at Bell & Colvill (Horsley) Ltd, Epsom Road, West Horsley, Leatherhead, KT24 (LPA Ref: 15/P/02122).”

In pre-application discussions and during the course of the planning application the following detailed matters were confirmed by Guildford Borough Council and Statutory Consultees:

- The site represents in its entirety previously developed land where the principle of residential development is acceptable, subject to compliance with paragraph 89 of the NPPF1;
- Whilst outside of the currently identified settlement boundary the Council accept that it may be reasonably considered as part of the village of West Horsley;
- The site is within the 5km to 7km buffer of the Thames Basin Heaths Special Protection Area where development has no impact on the Special Protection Area;
- The proposals will not result in the loss of employment use but rather the reorganisation and rationalisation of space. The Council confirmed that they have no objection to the proposal in this regard;
- The existing built form on the site is of no architectural merit and there is no objection to its demolition;
- There would be no material harm to the setting and significance of the Conservation Area;
- There would be no harm to the residential amenity of existing or proposed residents;
- The proposed dwellings would be able to coincide with the retained Bell and Colvill site in an acceptable manner;
• The proposals would reduce the number of access points on to the access road and the proposed development would result in a slight decrease in vehicular movements. The County Highway Authority has not raised any objections in relation to highways Impact or the proposed Site Access;
• Each dwelling would be allocated two on-site car parking spaces which would meet the Council’s maximum standard;
• There are no protected species or habitats on site which would be adversely impacted by these proposals;
• There are no significant trees on the site and trees on neighbouring land may be protected by a condition to secure root protection measures;
• The application site is in Flood Zone 1;
• The site can be developed using sustainable urban drainage systems which may be secured by means of condition.

The Council determined under delegated powers to refuse the application on 13th January 2016 for two reasons:

1. The proposal represents the redevelopment of a previously developed site. However, due to the scale, bulk and massing of the proposed dwellings, particularly at first floor and roof level, the quantum of development, together with the proposed layout, the development would have a greater impact on the openness of the Green Belt than the existing development on the site. In addition, while the proposal may be considered to be located within a village, the development does not represent a limited infill. As such, the proposal represents inappropriate development within the Green Belt which is harmful by definition. Furthermore, in itself, the proposal would result in an adverse impact on the openness of the Green Belt. No very special circumstances have been put forward that would outweigh the inherent harm. As such, the proposal is contrary to policy RE2 of the Guildford Borough Local Plan (as saved by CLG Direction on 24/09/07) and the National Planning Policy Framework.

2. By virtue of the bulk, scale and design of the proposed buildings, along with the layout of the development, the proposal would detract from the character of the area. The proposal would result in an urban appearance, and which would represent a visually discordant and incongruous addition to the surrounding area. The proposal is therefore contrary to policy G5 of the Guildford Borough Local Plan (as saved by CLG Direction on 24/09/07) and advice contained in the National Planning Policy Framework.

Our Client strongly disagrees with the reasons for refusal and has submitted a planning appeal (Ref: APP/Y3615/W/16/3154084).

In any event neither of these reasons for refusal undermine the underlying principle of development on the site. The reasons relate specifically to the assessment of the particular proposals in its current context and under the limitations of current adopted and National policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Design and Access Statement.pdf (3.0 MB)
facilitates the growth of communities such as these which are together distinguished by their openness within a rural area. CPRE also objects to the extension of the settlement boundary south of the A246 and the progression of linear development towards Effingham and Ockham where the development of 2,000 houses is being proposed for the former Wisley airfield only some 2 miles away.

There are a range of constraints which have to be taken into account when reviewing these new proposals but have been ignored in the draft local plan. We are informed, for example, that Thames Water has advised GBC that the current wastewater network in this area is unlikely to be able to support the demand anticipated from all this ambitious and unexpected development growth. If this were to go ahead, the foul drainage system all the way to the treatment works North of Ripley will not be able to cope and would have to be upgraded through substantial investment.

The proposed expansion of housing on this scale will lead to major problems in terms of educational school provision. The following schools in the area are already operating at near or full capacity: Raleigh School, the Howard of Effingham School, and the private Glenesk and Cranmore Schools. It should be remembered that children in Ripley are currently having to be sent to schools in Shearwater in Woking and even to Addlestone.

Surrey County Council has published no plans for creating further school places for children of all ages for the Horsleys, or for the traffic management and environmental improvement scheme they have promised between 2019 and 2023.

CPRE objects to the volume of high density new housing proposed for the Horsleys which amounts to some 35% more homes because it will harm the character, identity, and setting of these villages. NPPF requires that new residential development must respect these elements of the community environment which will be entirely lost by building on the scale envisaged and should be limited drastically to take account of the infrastructure deficit.

The heritage buildings at Hatchlands belonging to the National Trust, and at West Horsley Place, where the new proposal for the Grange "Opera in the Woods" has been approved by GBC, must be protected against what appears likely to be unsustainable development which will overwhelm the local community environment for ever. West and East Horsley will be swamped with extra cars and people using the shops, stations, village halls, sports facilities, medical services, parking space and public transport. Paragraph 87 of the NPPF makes clear that inappropriate developments by definition harmful to the Green Belt and should not be approved except in very special circumstances. We do not agree with the draft Local Plan that this community should be a candidate for "insetting" to facilitate development on the scale suggested. We object to what is proposed and will oppose any suggestion that "exceptional circumstances" justify amending the Green Belt boundary in the way described at this draft Local Plan consultation as we consider this approach unsound. CPRE OBJECTIOCPRE

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
boundary movements are only to be made in ‘exceptional circumstances’. These movements clearly represent a deliberate pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, we consider these proposed movements in settlement boundaries to be invalid.

These proposals are also contrary to the principles of the Metropolitan Green belt. West Horsley represents one of the first ‘lines of defence’ against London urban encroachment outside of the M25 circle. Yet these policies will eliminate a significant part of this defence as they seek to expand the boundaries of this village and fill-in every bit of green space within this rural setting.

It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, I object to the site allocation policies A37, A38, A40 and A41.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I write to you with regard to the Proposed Local Plan, as along our house and land at 20 The Street form part of the site which makes up A37,a plot allocated for development.

I am in full support of the plan and the inclusion of our site (20 The Street) as I believe it is critical to the continuance of West Horsley and its unique character that we have housing available to encourage new young people and families to this beautiful part of Surrey.

By building on infill sites such as ours rather than allocating large areas of open fields this can be achieved with minimal effect on the environment and outlook of the village. In fact the site that we form part of will not even be seen from the road.

My husband has had early conversations with some developers and I know that their ideas are considerate and in keeping.

I should also make clear that 20 The Street can be developed individually or as part of the whole plot, including road access either through our land or via Bell and Colvill.

My husband and I are in a position such that we could and would like to move plans forward quickly in consultation with the Council planning in accordance with the Local Plan.

Therefore, with specific reference to the National Planning Policy Framework, we are flexible as to whether the site falls within the 6-10 year timescale for the wider site development, or it can be developed on a smaller scale as either just 20 The Street within the shorter timescales of 0-5 years.

In conclusion I fully support the plan and the inclusion of our site and if I can be of any further assistance please do not hesitate to contact me.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I ACCEPT that this brownfield site would be acceptable as a site for residential development (subject to application details).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Site A37 - Bell & Colvill

The only presently allocated site in the southern half of the village, there is a pedestrian walkway down The Street heading north into the heart of the village, but no dedicated cycle routes. The existing network of footpaths, etc immediately north of the site and east of The Street offer a good facility down to the railway bridge at the southern end of East Lane, thence there is a well-used public way across to East Horsley and the railway station. The northern half of West Horsley is not nearly so well served.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing regarding the above, to strongly object to the following:

1. The removal of West & East Horsley villages from the green belt by insets The implication of which will completely change the character, balance and nature of these villages for ever, losing historic value and precious green belt. There is no ‘exceptional’ justification for building on this green belt.
1. The proposal of high density housing within West & East Horsley, is a staggering increase of over 35% more homes. However, there is no evidence of improved infrastructure. Already these villages combined have only one overcrowded medical centre, one over subscribed under 11's academy school and badly potholed roads. The inevitable increase in cars on the roads, will not only further damage the road surfaces and create traffic congestion, but parking for the shops and railway station will become a nightmare.

The drainage in the Horsley's is barely coping at the moment, and it is understood from Thames Water that further housing developments, will be unlikely to cope and the foul drainage system will need to be upgraded.

1. West Horsley appears to have a disproportionately high increase in housing (35%), compared to other locations eg: Ash & Tongham 16% and Guildford Town 11%. This coupled with the 2000 homes proposed on the former Wisley Airfield site, which has reappeared in The Guildford Plan, will have a totally unreasonable and unjust impact on the Horsley villages.

I urge you to please give my comments consideration, by keeping West & East Horsley villages within the green belt and not redefining the boundaries, to avoid unsuitable, unnecessary and unsustainable housing developments.

I question the necessity for all these extra houses. I am not against the development of the Bell and Colville site A37 if the houses are small and affordable as this will tidy up the area. But there is no need for anything larger than a 3 bed semi detached house, there are plenty of larger houses for sale in the local Estate Agents.

OBJECT. I object to the scale of the building work being proposed for East Horsley – an increase of 36% - and to the fact that the four proposed sites are currently all within the Green Belt. I object because of the strain it would place on current infrastructure and because it would destroy the character of the village. The Council seems committed to pushing back settlement boundaries to provide more greenfield sites for new housing. In short, to destroying the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The Horsleys are ill equipped to cope with significant development as any rational analysis will quickly expose.

1. a) The road network

East and West Horsley can only be accessed on restricted roads

From the South

Ockham Road South is restricted so that a lorry and car cannot pass at Lynx Hill and the road remains narrow into the village.

The Street has limited access at the Bell and Colville roundabout and near Edwin road it is reduced to single file traffic.

From the North

Ockham Road North is a narrow country road which can’t take two lorries passing.

Old Lane is narrow, with a number of hazardous bends and a difficult junction into Cobham road.

From the West

The road from Cobham is the best route into Horsley but it is restricted at the railway bridge on Forest road. This road takes a lot of traffic as it is the access road from Horsley to supermarkets at Cobham.

From the East

A series of narrow roads provide access from Burntwood but none are capable of sustaining significantly increased traffic.

1. b) Retail Structure

The retail environment at Station Parade consists of 25 premises plus 3 at the bottom of Cobham Way, including a library, post office, chemist, 5 restaurant/cafes, butcher, baker and 2 mini supermarkets. The largest of these units are approximately 170-200 sq. m. There is no room for expansion of retail premises nor for the provision of extra parking places. This cannot be expanded or developed to a worthwhile retail centre. Bishopsmead, to the south of East Horsley is much smaller and similarly constrained. West Horsley has virtually no retail presence.

1. c) Infrastructure

There is already pressure on school places, doctors surgeries and parking. The Horsleys cannot sustain a significant increase in demand. In addition, there is limited space for expansion of any of these facilities.

1. d) The Geography of the Horsleys

The Horsleys lie just north of the A246 which runs to the north of the North Downs. Rainfall on this area flows north and causes periodic flooding in heavy rain. There are frequent problems with storm drains flooding in the Horsleys. Green belt land in and around the Horsleys is needed to absorb this water run off. Further building will exacerbate this problem.
SPECIFIC OBJECTIONS

1. I OBJECT to the basis on which the housing requirements have been calculated. As they are not transparent they lack credibility.

1. I OBJECT to the final target housing number (based on a mathematical model which has not been disclosed) which is almost 70% higher than the official national estimates for population growth in the Borough.

The second site that would seem to be a reasonable possibility is A37, Bell and Colvill Garage. Currently this is a rather messy area and a well designed site could improve it. The proximity to local buses is an added advantage.

I object to the Guildford Local Plan 2016 for the following reasons West Horsley should remain in the Green Belt.

An increase of 35% of housing would have a big impact on our village.

Our local State schools are already full and children would have to travel further to school which would then see an increase in traffic.

Parking at the station is at a premium during the week.

Most families now own two cars so with an increase of 35% housing we would see an increase of 70% in traffic. Our roads and pavements are already in a poor state.

Our roads would be gridlocked.

Thames Water have advised that the current waste water network in the area is unlikely to be able to support demand anticipated and would need upgrading.

The proposed increase would be totally out of character with our village which has many old buildings and a mix of different housing styles.

We live in an area of Outstanding Natural Beauty and it should be preserved for future generations to enjoy.

The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a
village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

The four policy sites are all located within the Green Belt. One is a partly brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these settlement boundary movements appear to us highly questionable and in no way to meet the requirements of the NPPF that such boundary movements are

only to be made in ‘exceptional circumstances’. These movements clearly represent a deliberate pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, we consider these proposed movements in settlement boundaries to be invalid.

These proposals are also contrary to the principles of the Metropolitan Green belt. West Horsley represents one of the first ‘lines of defence’ against London urban encroachment outside of the M25 circle. Yet these policies will eliminate a significant part of this defence as they seek to expand the boundaries of this village and fill-in every bit of green space within this rural setting.

It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, I object to the site allocation policies A37, A38, A40 and A41.

A39 East Horsley A38, A40, A41 West Horsley

Object

EPC objects to the over-development of our neighbouring parishes of East and West Horsley. These four proposed site selections will add approximately 445 housing units in what is presently Green Belt. We see this as overdevelopment of these two neighbouring villages. There is also the impression that land is being inset from the Green Belt for the sole purpose of meeting housing targets, and not for the reasons allowable for insetting set out in the NPPF. If development of these areas of land is permitted it will lead to the increasing erosion of the Green Belt between the Effingham/Bookham boundary and Guildford.

There are over 120 Effingham residents who live within the East Horsley settlement area and these residents will be particularly impacted by the increased traffic these site selections will generate. Many residents believe the narrow rural roads in the area are inadequate to support, safely, the construction traffic that will use these roads over many years.

As there needs to be some development this site seems to be more appropriate than some as it is already concealed behind the ribbon development. However the field facing long reach should be taken out of consideration as it provides the open green space that is so special for the villages.

‘What are we going to do with West Horsley in the New Local Plan?’ asked John.

‘Well’ said Jack ‘the village has about 11/1200 houses and we propose to increase the size by 40 to 50% and build a further 500 to 600 houses’

‘Won’t that put a huge strain on all the services because I understand the area is close to gridlock in any case?’ said John ‘and what do the residents have to say about it?’

‘Almost without exception the residents are extremely upset but we have learnt to ignore the torrent of protests from the last plan and have produced a new plan that incorporates the same sites as our previous plan. As far as strain on services is concerned, I must admit that doctor’s surgeries are full, the local schools are all full, the railway station car park is full and has no potential for expansion, parking in the village is well nigh impossible at peak times, the narrow unlit lanes cannot possibly cope with more traffic and the road surfaces are appalling and always have been, the road junction to the A3 has dangerous levels of pollution let alone the congestion and of course we all know that the M25 at Junction 10 is a complete lottery but normally blocked’ said Jack.

‘I am no rocket scientist’ said John ‘but why on earth therefore are you intending to make matters so much worse?’

‘Well you see we have been forced by the Government to identify large swathes of land on which houses can be built in order to accommodate our burgeoning population and we feel we have no option.’
‘But isn’t Surrey already the most densely populated county in the whole of England with 683 people per sq.km. so who decides what quantity of extra housing is needed?’ enquired John.

‘That’s a moot point’ replied Jack ‘but we have conducted something called the SHMA and have come up with a figure but I must admit it is a touch subjective’

‘Surely however, since Brexit there is now an intention to control our borders and thereby reduce immigration and ergo the demand for housing. I note that the biggest losers on the stockmarket as soon as ‘Leave’ was confirmed were the housebuilders (down 30%) so I would imagine I am not alone in this contention. Will you be revising your SHMA downwards in light of this?’

‘Probably not. It’s gone too far.’

‘And what’s this I hear that you intend to build on protected Greenbelt land and in many cases before you have attempted to develop Brownfield sites?’ John demanded.

‘We have come up with what we think is a master stroke’ said Jack. ‘Brownfield sites are invariably more expensive to develop so Greenbelt sites are cheaper and less time consuming. In the case of West Horsley we have decided, subject to the Govt. Inspector agreeing with us, to remove the village from the Greenbelt so we can build anywhere and render any local protest impotent.

Incidentally we are proposing to try this ruse on approximately 15 equally pretty Greenbelt Surrey villages. It will make our lives so much easier’.

‘That’s verging on scandalous’ said John ‘so what is the point of involving the local residents in your ‘presentations’ if nothing can be altered?’

‘Transparency old boy’ said Jack ‘transparency.’

Further to the above I OBJECT to the proposal to build 135 houses at The Manor Farm site for the following reasons:-

1) My amenity will be severely blighted with the houses in the adjacent field to the north of my house having complete visual access over my garden and swimming pool.

2) The light will be reduced and the gorgeous sunsets will not be seen.

3) The road of Long Reach is a 4.6 metre wide lane with no pavements or lighting. I believe it is suggested that there should be an access to the site from Long Reach. It would be impossible for two construction lorries to pass each other and, as I have mentioned many times in the past, the road is reduced to a single lane because of a half mile queue of cars parked nose to tail with no passing places by those using the football club. I have sent many photos already of the mayhem caused. How fire engines/ambulances etc. could get through is beyond me. It is worth taking into account that the current single track lane to the site is used and was originally constructed solely for access to the Montesorri school and was only granted on the basis that the entrance gate is closed by 18.00 hrs every day. Any building work would be a real and significant hazard for the young children who go there.

4) The field in question is used every year as a car park for over 250 cars for the annual Horsley Football Club tournament (please see photo). The organisers have told me that the tournament, which has been running for over 25 years, will have to close if this field becomes unavailable as there is no viable parking alternative. I would have thought that GBC should be promoting sport and not reducing it.
5) If, heaven forbid, a housing estate gains approval it will have to cope with the floodlights already in place and also those that have recently been approved by GBC for the main pitch and of course the noise. Not ideal.

6) Councillor Paul Spooner of GBC has proudly trumpeted that only 1.6% of Greenbelt land in the Borough will be affected by the building proposals. This of course is massively misleading and is probably designed so to be. After all it makes good reading but a great proportion is A.O.N.B. which cannot be built on. At a rough estimate 25% of Horsley’s current Greenbelt land is being put up for building. Nobody was able, or willing, to answer my question on this point at last week’s presentation at East Horsley village hall.

7) I am non-plussed as to why West Horsley is being so disproportionately targeted. Perhaps it’s because it is the second closest village to London in the borough and developers will make more money here than elsewhere. How do you quantify an ‘affordable’ house in this area?

8) The plan is that all four of the sites adjacent or near to my house will now be developed simultaneously in years 0-5 (whereas the Manor Farm Site was originally proposed for years 6-10). Can you imagine what traffic carnage this would cause let alone dust, noise etc.. The developers (Thakeham Homes) have advised that because of the high water table at the Manor Farm site all the 135 houses will need to be piled which will probably drive us all bonkers.

9) A Department for Communities and Local Government spokesman said ‘Ministers have repeatedly been clear that demand for housing alone will not justify changing Green Belt boundaries’. (Daily Telegraph 25/4/16). What has empowered GBC to believe they are entitled to do otherwise. Surely a truly exceptional circumstance is required?? GBC call the removal from the Green Belt ‘insetting’ but the field next to my house which is set in beautiful quiet countryside is outside the curtilage of the village as has been declared in previous appeals by a Govt. Inspector.

10) Lastly, and most importantly, my wife and I feel we will have to abandon the house we have loved and nurtured for over 35 years. We could not stand the awful intrusion but our option to sell is already severely reduced because I doubt if anyone else could as well. A local Estate Agent reckons the house is already devalued by £300,000 because of the proposed development and that is if a buyer can be found which he says will now be difficult.

The Nature Reserve at Manor Farm is inaccessible and tucked away at the back of it. Few even know of it and is mostly used by dog walkers that live nearby. That is not a Nature Reserve.

It is a small and unattractive piece of land deliberately created by the landowner to defeat the lack of SANG between Ripley and Effingham Commons. I object to its inclusion as SANG on the grounds that it is ineffective as a nature reserve, little used and with limited access.

OBJECT. Site is Greenbelt and should be protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Effect of the Proposals on West Horsley.

I believe that the plans would have a severely detrimental effect on the character of the village. Given the profits to be made by housing development within Surrey, once sites are designated for future development, that development will surely be brought forward quickly and to the maximum density permitted.

Specific comments are as follows:

- Several of the proposed development sites (particularly Manor Farm, ref A38/ID 15 and East Lane, ref A41/ID 2063) would have the effect of contributing to a merged settlement of East and West Horsley, when I believe that the open character of the countryside here should be protected by safeguarding the countryside along East Lane, Long Reach and Green Lane which continues to separate the two settlements and which contributes to the rural character of West Horsley. I understand that there is a proposal for the Raleigh School to develop a new site on the East Lane site, which again I object to for the same reason of impact on rural character.

- The suggested density of housing is totally out of character with the rest of West Horsley. Building to this increased density is particularly inappropriate in the peripheral locations which are planned for development.

- The proposed development sites are on the outer edge of the village and so would reasonably be expected to generate considerable additional traffic, as the development will be some distance from the station and the centre of the villages. Anyone who has spent any time in and around the village could tell you that the network of rural roads and lanes which surrounds the village simply do not have the capacity to serve this level of proposed additional development, and any extension of the road network would not only destroy the character of the village, but also the surrounding roads which would continue to pass through Green Belt land.

- I have strong concerns over the capacity of infrastructure such as drainage and sewerage.

- Localised flooding and poor surface water drainage is already a significant problem in the area. Since moving to the area I have witnessed first hand flooding along Ockham Road North, Green Lane and Ripley Lane. This has occurred on one or more occasions each winter in recent years and therefore is clearly not a "once in a decade" or "once in a lifetime" event. The fields planned for development must play a role at present in helping to drain this area, and additional development would both remove this drainage capacity and create additional issues of surface drainage.

- Additional development of any significant scale will cause significant strain on the village school and doctors surgery (the later located in East Horsley), which are running close to capacity. Adding extra capacity to these services cannot easily be resolved, even if possible through entirely developer funded schemes, without fundamentally altering the geographic make-up of the villages there is little or no land in the core of the village to accommodate any additional services. Developing these facilities on the periphery of the village (which as noted above is now proposed for a potential extension of the Raleigh School) would once again fundamentally alter its character and position in its rural context.

- East and West Horsley are thriving villages, which do not need artificial support through rapid expansion of population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Views of the Local Community in West Horsley.

The strength of feeling throughout the village against the proposed relaxation of the planning guidance is considerable. This opposition is shared by all of the local residents that I have spoken to, as well as by the West Horsley Parish Council.

I believe that the views of those who have chosen to make their homes within the community should be paramount when making decisions which will have such a radical and irreversible impact on the village.

Indeed my view is supported by recent planning guidance which supports greater involvement of local communities in the planning process. If localism is to mean anything, Guildford Borough Council should be listening to the views of the local community whose lives and well being would be so adversely affected by the plans.

Removing East and West Horsley from the Green Belt and encouraging additional development on such a scale would exclude and ignore the strong feelings of the local community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I wish to comment on this site, but please note my comments also apply to Sites A37, A39, A40 and A41.

These sites are all Green Belt sites and their development will cause great harm to the Green Belt. There are no special circumstances that outweigh the harm that will be done to the green belt. Thus this policy is not lawful.
This is covered in more detail in the attachment.

the development of this site (and A39, A40 and A41) will cause the merger of the villages of East Horsley and West Horsley. This is clearly the councils intention, as it seeks to inset these villages from the Green Belt, with a total of 363 ha (3.6 square kilometres) to be removed from the Green belt, with little regard given to the quality of the new proposed Green belt boundaries. These large housing developments will submerge the pattern of development in these villages as the housing density is much higher than housing already present, and the style will be little boxes, so loved by developers. The NPPF specifically states that one of the purposes of the Green Belt is to stop the merger of towns - but in fact this is a deliberate policy of GBC. There is a recognition of the need to prevent towns from merging, as this draft local plan includes a proposal to create new Green Belt around Ash Green village, to prevent it merging with Ash and Tongham. It is a remarkable contradiction that on the hand GBC seek to promote the merger of neighbouring villages, but on the other hand seek to prevent. In one case the policy to ensure the merger happens is to remove the villages from the green belt, with the addition of large numbers of new dwellings, but on the other hand, to create new green belt to halt housing development to prevent Ash Green village from merging with its neighbours. These different proposals are in the same plan - and the contradiction in them seems lost on the architects of the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:  Site objection.pdf (617 KB)
Site A38: Manor Farm, West Horsley: (135 houses)

This is the largest of the six sites proposed in the Horsleys and as such would provide 135 additional houses, 300-400 people and in excess of 300 cars. This proposed development would incorporate the Grade II listed Manor Farm House and fall within a designated green corridor with a nature reserve. The nearby village shops of East Horsley are in two separate ribbon-strips but both already have inadequate car parking facilities (as does the railway station) and there is no land available for the expansion of either. Similarly, the very limited shops in West Horsley are served by nothing more than a small lay-by and again with absolutely no room for expansion. These are problems NOW before any additional houses are built. For the above reasons, I OBJECT to this proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am a resident of West Horsley, have lived in this village for 18 years and want to strongly object to the potential removal of West Horsley from the Green Belt leading to the insetting and extending of the 2003 Local Plan Settlement Area boundaries, in particular with regard to the proposed development site at Manor Farm.

With the potential of 135 new homes to be built on the Manor Farm site, and given that the majority of households on average have 2 + cars and 4 family members the pressure this will create on already under resourced facilities such as schools, the road network, drainage, medical services and local parking and train services is unsustainable. Whilst I understand there is increasing pressure on local housing, I feel there are better sites that do not impinge on the Green Belt.

I believe an increase in housing at Manor will fundamentally not work and irrevocably change the balance in the village to a completely unsupportable and unsustainable level.

I OBJECT to the proposal for Manor Farm laid out in the Local Plan

</table>

The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.
The four policy sites are all located within the Green Belt. One is a partly brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these settlement boundary movements appear to me highly questionable and in no way to meet the requirements of the NPPF that such boundary movements are only to be made in ‘exceptional circumstances’. These movements clearly represent a deliberate pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, I consider these proposed movements in settlement boundaries to be invalid.

These proposals are also contrary to the principles of the Metropolitan Green belt. West Horsley represents one of the first ‘lines of defence’ against London urban encroachment outside of the M25 circle. Yet these policies will eliminate a significant part of this defence as they seek to expand the boundaries of this village and fill-in every bit of green space within this rural setting.

It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, I OBJECT to the site allocation policies A37, A38, A40 and A41.

1. Development Site referenced Policy A38

In particular, I object to the proposal for the building of 135 homes on land to the west of West Horsley, (Referenced Policy A38, land at Manor Farm). The majority of land on this site is classified as moderate to good agricultural land and is currently in use as pasture for grazing horses and houses a livery stable. I question the need to remove such agricultural land from the Green Belt. Surely it is important to preserve agricultural land for future generations. This site makes a significant contribution to the openness of the Green Belt. The National Planning Policy Framework of March 2012 requires planners to "recognise the character and beauty of the countryside and take into account all the benefits of the best and most versatile farmland".

In addition, the site is a haven for wild life, frequented by deer, foxes, small mammals, reptiles, bats and a large variety of birdlife.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Since the consultation in 2016, only one proposed development site in West Horsley (Site A 41) has been removed from the Local Plan, leaving four sites, A37, A38, A39 and A 40. This means that the eastern side of the Borough is scheduled to take a greater proportion of new homes within the Green Belt. This is land which is closest to London, green belt land which is most needed to prevent the encroachment of the Metropolitan conurbation. With particular reference to site A38, land to the west of West Horsley (land at Manor Farm) where it is proposed to build 135 homes, the majority of the land on this site is classified as moderate to good agricultural land and is currently in use as pasture for grazing horses and houses a livery stable. I question the need to remove such agricultural land from the Green Belt. Surely it is important to preserve agricultural land for future generations. This site makes a significant contribution to the openness of the Green Belt surrounding the village. The National Planning Policy Framework of March 2012 requires planners to “recognise the character and beauty of the countryside and take into account all the benefits of the best and most versatile farmland”. The Guildford Local Plan 2017 must recognise this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

As a resident of West Horsley you will not be surprised to learn that I vehemently object to the Plan's proposals for building more than 2500 new homes in this vicinity. It is Green Belt land and should remain so. There is no justification for development on this scale in this area, and there are certainly no "exceptional circumstances" to allow the Council to build on the Green Belt here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I Object to Policy A38.

It could never satisfy Policy S1.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object most strongly to your proposal to build 135 houses at the so-called Manor Farm Site. We already have high density housing in Long Reach, not only on the road itself but also in the two original council housing cul-de-sacs namely Woodside and Farley's Close. An aerial view of the site would suggest that it could fit in like a piece in a jigsaw. However, there is a noticeable exception and that is the northern boundary which does not follow the line and is indisputably outside the natural envelope of the village. The field contained therein should not be included in the plan and it seems to have been tacked on to make the site more appealing by having possibly two access points. The fact that the road Long Reach is completely unsuitable as an artery seems to have escaped the attention of the planners. I genuinely feel that it's a possibility that no member of the planning committee has ever visited it, certainly not at a weekend!

To attempt to shoe-horn in further cheek-by-jowl housing would create a volume with which the village simply couldn't cope. It's not just the schools, doctors' surgeries, roads, trains, station car parks etc. being ridiculously over-subscribed, it's more than that. The seemingly vindictive attempt to blight West Horsley with this site and all the others would reduce this village to a congested dormitory and change it's character forever whilst the developers can walk away with full wallets leaving the residents to pick up the pieces.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Representations on the Proposed Submission Local Plan: Strategy and Sites, June 2016
Representations by Thakeham Homes Ltd
Site: Land to the west of West Horsley – Policy A38

Vail Williams have been appointed by Thakeham Homes Ltd to make representations on Guildford Borough Council Regulation 19 Submission Local Plan, June 2016.

These representations focus on Policy A38: Land to the west of West Horsley. The proposed allocation of this site is for residential use (C3) and this is fully supported.

National Policy & Strategic Policies

The National Planning Policy Framework (NPPF) contains a presumption in favour of sustainable development, as set out in paragraph 14, and this “golden thread” runs through both plan making and decision taking. For plan making Paragraph 14 states that:

“Local Planning Authorities should positively seek opportunities to meet the development needs of their area” and “local plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change ....”

The second part of paragraph 14 states that, for decision taking, this means:

“Approving development proposals that accord with the development plan without delay ....”
The requirement to deliver sustainable economic development, including homes, businesses and industrial units, infrastructure and thriving local places is further highlighted in Paragraph 17 of the NPPF (Point 3). It is clear there is a significant thrust at national level ‘to boost significantly the supply of housing’ (NPPF para 47.)

The Local Plan policies contained within the GBLP submission document, need to comply with the National Planning Policy Framework (NPPF). The plan must demonstrate that it is positively prepared, justified, effective, and consistent with national policy.

**Policy S1: Presumption in favour of sustainable development**

Policy S1 (Presumption in favour of sustainable development) within the Submission Plan for Guildford Borough Council reflects the requirement of the NPPF and it is welcomed that the Council will take a positive approach that reflects the presumption in favour of sustainable development. It is also supported that the Council will work proactively with applicants, jointly to find solutions that mean proposals can be approved wherever possible. This is a positive strategic policy within the Local Plan, reflecting national guidance, and it is noted in paragraph 4.1.1 beneath Policy S1 that “Local plans must plan positively to seek opportunities that meet the areas’ objectively assessed development needs and be flexible enough to adapt to rapid change”. Given the plan period of 20 years, the requirement for flexibility within planning policy to respond to changes over a long period is important and should be engrained throughout the plan.

**Policy S2: Borough wide strategy**

Policy S2 (Borough wide strategy) confirms that the Council will make provision for 13,860 new homes over the plan period (2013/2033). These figures represent the latest evidence gathered through the West Surrey Strategic Housing Market Assessment (SHMA) September 2015. The policy also continues and identifies other requirements for different use classes; including employment floor space.

Along with the overall housing number, Policy S2 contains a table setting out the indicative annual housing split and this runs from the year 2018/19 to 2032/33. The figures contained within the table increase towards the latter part of the Plan period and the policy states this is “reflective of timescales associated with the delivery of strategic sites and infrastructure.”

The total housing numbers identified within the table total 10,395. This is obviously short of the requirement for 13,860; as identified in the opening sentence of Policy S2. However, it is noted that the indicative annual housing targets start in the year 2018, whereas the Plan period runs from 2013. It is considered this is misleading and the table should cover the whole Plan period, including actual completions in the years preceding adoption. This would provide a clearer indicative annual approach demonstrating how the Council are going to deliver the overall housing requirement for the Plan period. This should also incorporate the required flexibility within the housing figures, to ensure that the overall target is met and sufficient flexibility is built into the plan, as required by the NPPF.

As already mentioned the NPPF contains a presumption in favour of sustainable development and flexibility, it is therefore suggested that within the first sentence of Policy S2 that the words “at least” are inserted in relation to the 13,860 new homes. The figure contained within Policy S2 should not be absolute and any further proposals that are sustainable and in accordance with the NPPF and the development plan, should be approved without delay.

**Proposed wording for Policy S2: Borough wide strategy**

“During the plan period (2013-33), we will make provision for at least 13,860 new homes…”

This proposed wording will also facilitate the Duty to Cooperate, allowing the flexibility to contribute to the wider unmet need within the Housing Market Area.

**Policy H1: Homes for all**
Policy H1 (Homes for all) provides guidance on housing mix and density, along with specialist housing. The Policy is supported in terms of its aim to deliver a wide choice of homes to meet a range of accommodation needs and that development should provide a suitable mix of housing. It is considered important that site specific characteristics are taken into account and this is identified within both the housing mix section and the density section of Policy H1.

With regard to density, the Policy states that “new residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. Residential densities will vary dependent upon the local area, context and character and the sustainability of the location”. This ability to respond through detailed design to local circumstances is supported as it offers flexibility within the planning and design process.

The Local Plan states that it will consist of two parts, with the current document setting out the vision, aims and strategy for the Borough up to 2033 and the second part (Local Plan: Development Management Policies) containing detailed development control policies. This will provide the Council the opportunity to expand upon the key areas identified within Policy H1 in relation to local character, context, distinctiveness and site characteristics.

For the site Land to the west of West Horsley (Policy A38) this provides the flexibility to deliver at least the number of homes (135) identified, with the potential to respond to local character and ‘make the most efficient use of land’ through the detailed design and application stage.

**Policy H2: Affordable Homes**

National policy seeks to ensure the delivery of “a wide choice” of homes and to “widen opportunities for home ownership” through the creation of “sustainable, inclusive and mixed communities” (NPPF paragraph 50). Along with Policy H1, which contains details on housing mix, Policy H2 (Affordable homes) seeks to provide “sufficient housing to meet the needs of the borough’s population will ensure that the borough thrives, with mixed, balanced communities” (GBC LP 4.2.33).

Whilst a suitable mix of housing is required and supported through national policy, there is still the overriding requirement to “to boost significantly the supply of housing” (NPPF paragraph 47). Any housing policy, including and specifically in relation to affordable housing, needs to ensure effective delivery over the Plan period and also be flexible enough to respond to changing circumstances.

The delivery of housing, especially affordable housing, continues to dramatically alter with various new proposals seeking to increase the delivery of overall housing numbers. A wide range of housing products are available including: starter homes, shared ownership, shared equity, discount market rent, rent to buy, along with market housing and affordable and social rent.

Given the wide range of housing products available and the constantly shifting economic circumstances, it is considered that Policy H2 needs to be flexible and not overly prescriptive to ensure constant housing delivery over the Plan period.

Policy H2 also, in the first bullet point, states that “affordable homes will be provided: on sites providing five or more homes…” The thresholds, for affordable housing, have been regularly challenged and reviewed recently and the proposed policy is, as currently worded, contradictory to national policy including:

Paragraph: 017 Reference ID: 23b-017-20160519, which states: “Are there any exceptions to the 10-unit threshold? Local planning authorities may choose to apply a lower threshold of 5-units or less to development in designated rural areas…”. This follows the Court of Appeal decision (May 2016) where the Department for Communities and Local Government won its appeal over a ruling that planning policy for affordable housing requirements on small-scale developments was unlawful.

Proposed wording for Policy H2: Affordable housing

Along with ensuring the threshold reflects the latest legal and national policy situation, we propose the following amendments to ensure adequate flexibility and continuous delivery over the plan period:
“...The tenure and size of affordable homes provided on each qualifying site must contribute, to the Council’s satisfaction, towards meeting the mix of affordable housing needs reflecting local demand and having regard to identified in the Strategic Housing Market Assessment 2015, or subsequent affordable housing needs evidence. This currently includes a tenure split of at least 70% rented, with the remainder being other forms of affordable housing. Affordable rent must be no more than the maximum level set out in our most recent housing guidance or strategy. Developers will be...”

It is also proposed that the following should be added to the policy to ensure deliverability:

“Proposals that are unable to meet affordable housing requirements will be supported by clear viability evidence to establish deliverability.”

**Green Belt and Countryside Study**

For Policy A38 (Land to the west of West Horsley), the Green Belt and Countryside Study identifies the area (C14) as low sensitivity. The actual site is referenced as C14-C and it concludes that it is a “Potential Development Area (PDA) surrounding villages”. For site A38, it is agreed that the site is suitable for residential development and it should be inset from the Green Belt.

**Land to the west of West Horsley: Land Availability Assessment**

The site is identified within the Land Availability Assessment (LAA) site reference 15. The LAA identifies the site to be “located between Bens Wood Nature Reserve (non-statutory) to the north, Northcote Road to the east, East Lane to the south, and Long Reach to the west”. It terms of site character the LAA concludes “the site is physically and visually enclosed by a local undulation, hedgerows and existing residential development”. The site is adjacent to existing roads and vehicular access can be provided.

The LAA identifies that there is a Grade II listed building on site (Manor Farm House), which will need to be preserved as part of any new development. This requirement is recognised and endorsed.

The proposed development will require the provision of Suitable Alternative Natural Greenspace (SANG) and bespoke SANG will be provided (as detailed below).

It is confirmed that the site and the proposed SANG is under the control of Thakeham Homes Ltd and is immediately available and achievable for residential development. The site is capable of providing at least the 135 residential units (C3) as proposed in the allocation Policy A38.

Attached as part of these representations is a Concept Plan (BMD 14.023.DR.001A) that demonstrates the site is capable of achieving a high quality layout, respecting the listed building and character of the surrounding area, whilst delivering the housing units required in Policy A38. The site boundary includes the bespoke SANG provision to the north and illustrates the proposed access roads from both Long Reach road and East Lane. The overarching conclusions of the LAA assessment, for this site, are supported.

**Infrastructure Delivery Plan (IDP)**

As mentioned above, the site is required to provide SANG and details are contained with the IDP 2016. Specifically for Land at Manor Farm East Lane, West Horsley, (Policy A38), paragraph 4.23 states that: “we expect the developers of the following sites to deliver bespoke SANGs to mitigate their own developments... Land at Manor Farm East Lane...”

The attached Concept Plan (BMD 14.023.DR.001A), encompasses the whole site including the provision of SANG as required by policy and detailed in the IDP. Thakeham Homes confirm that the site is available and deliverable for residential (C3) development including the provision of bespoke SANG as detailed on the attached Concept Plan.
Policy A38: Land to the west of West Horsley

Having considered the National and Strategic Policies requiring housing development, the proposed allocation A28 identifies requirements (including the listed building and SANG) and opportunities (green corridors and links to the SANG) for the site. The attached Concept Plan (BMD 14.023.DR.001A) demonstrates the site is capable of accommodating at least 135 residential units whilst respecting local heritage and providing, including links to, the bespoke SANG provision to the north.

In conclusion, the site is available for development, is being actively promoted by Thakeham Homes, and there are no overriding site constraints. The attached Concept Plan demonstrates that detailed design is able to respond to site specific characteristics and also provide bespoke SANG. There are no overarching policy or site specific reasons why the site should not be allocated for residential (C3) use in accordance with Policy A38.

The site is available, achievable, and deliverable within the short term and will enable the delivery of much needed housing within the early part of the plan period. The proposed allocation, through Policy A38, of the land to the west of West Horsley, is fully supported.

Summary and Conclusion

The site (A38) is available and suitable for residential development of at least the 135 (C3) units identified in policy. There is single developer interest, Thakeham Homes, so the site can be quickly progressed and deliver much needed homes early in the plan period. There are no significant infrastructure requirements that would preclude development and the provision of bespoke SANG is achievable; as demonstrated on the attached Concept Plan.

The proposed allocation of Land to the west of West Horsley (Policy A38) is fully supported. It is in the ownership of two supportive landowners who wish to work jointly with Thakeham Homes to provide at least 135 residential units, contributing to the housing requirement early in the plan period.

Examination

Given the importance placed on housing delivery at a national level and within the Guildford Local Plan, and the comments within this representation, we wish to express our desire to appear at examination and attend any pre-examination meetings.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1.2 As advised by the Council, these representations will comment only on changes made to the 2016 version of the Proposed Submission Local Plan. They should therefore be read alongside and in conjunction with representations made by Dandara Ltd to the 2016 Proposed Submission Local Plan dated June 2016 and included alongside these additional representations for completeness.

1.3 Dandara Ltd are promoting land located to the west of Shere Road, south of the A246 Epsom Road and east of Wix Hill in West Horsley for residential development. A full description of the site is included in Section 3.0 of our original 2016 representations with a red line site location plan reproduced in Figure 1 below:

[Figure 1: Site Location Plan]

1.4 The majority of the site was identified as a Potential Development Area (PDA) within the Guildford Green Belt and Countryside Study (GBCS) under site reference E4-B and provided with an indicative capacity of 56 new homes. The site was also included within the Guildford Borough Land Availability Assessment 2016 (LAA) and provided with site ID 2175 ‘land to the south of West Horsley, Shere Road’ (n.b. error in our original 2016 representations giving LAA site ID of 2025). A full assessment of the GBCS and the identification of land to the west of Shere Road as a PDA was included in Section 4.0 of our original 2016 representations. Figure 2 overleaf refers:

[Figure 2: PDAs in West Horsley (South)]

1.5 These further representations will focus on specific changes made to the original 2016 Proposed Submission Local Plan as well as the supporting updated evidence base which includes:
- West Surrey Strategic Housing Market Assessment: Guildford Addendum Report 2017;
- Guildford Borough Land Availability Assessment (LAA) 2017 Addendum;
- Sustainability Appraisal of the Guildford Borough Local Plan 2017;
- Topic Paper: Housing Delivery 2017;
- Topic Paper: Duty to Cooperate 2017;

**Do you consider this section of the document; complies with the Duty to Cooperate?**

I wish to object to the contents of the Guildford local plan for the following reasons: We already have a crowded village with many facilities under heavy strain:

The Raleigh school is already full with no room for expansion and other schools are full to capacity.

Car parks at the station and in the village are heavily used.

Thames water have advised that the current waste water network in the area is unlikely to be able to support demand anticipated and would need upgrading.

East and West Horsley will be swamped with extra cars and people using shops, station, village halls sports and other facilities.

Medical facilities would be put under strain.

New Local Plan (2016)

It would appear that Guildford Council have not listened to the comments previously made by many people criticising the 2014 draft local plan and have swept all these comments under the carpet as if they did not exist. They have now proceeded with the new GBC local plan as if nothing had happened.

Any new developments should be in keeping with the character of the two villages and within the present existing boundaries of East and West Horsley.
By moving the village boundaries - a very sneaky way of land grabbing, will in no way enhance the character of the existing villages. The infrastructure in the area is already struggling and would be unable to cope with the volume of traffic which would be increased by the proposed Local Plan Strategy.

The local infrastructure will need to be improved to meet the present needs of an expanding population as a result of any new developments.

With the proposal of over 500 houses in East and West Horsley, with the majority in West Horsley, there have been no proposals for a new primary school in the area despite the fact the Raleigh School cannot now cope with current demand for school places.

Also no thought seems to have been given that infrastructures such as health - no commitment for a new doctor’s surgery, education, transport. The roads around the Horsleys are already at breaking point.

If the proposal for over 2,000 houses at the Wisley development proceeds the roads around the Horsley's would certainly be unable to cope with all the additional traffic.

<td>I have been a resident of West Horsley, a wonderful village, for the past 18 years and am totally opposed to the villages potential removal from the Green Belt, then “insetting” and extending the 2003 Local Plan Settlement Area boundaries, in particular with regard to the Proposed development site at Manor Farm. With the potential of 135 new homes to be built on the Manor Farm site, and given that the majority of households these days have 2 or more cars, ( and increase of 270 cars &amp; journeys on the road each day )I and most residents believe this would create an unsupportable issue for :</td>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed building sites for Manor Farm, West Horsley. The current village infrastructure and road system is already under strain from individual building projects. The traffic alone from these proposed new sites will be extremely damaging to the village environment, the safety of the residents and existing dwellings along the routes that will be used by building plant traffic.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We have concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing drainage infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

The proposed development exceeds the capacity trigger levels for available network. Developer funded impact study required to understand implications of development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the fact that no changes have been made to the proposals to inset East and West Horsley from the Green Belt since the 2016 Consultation.

I object to the proposal to move the boundary of East Horsley’s area of residential settlement south of the A246. This proposal has not been justified and appears arbitrary. This area abuts the Surrey Hills AONB and raises the prospect of inappropriate development in this sensitive area.

I object to the fact that though new paragraph 2.10b places emphasis on the need for adequate infrastructure to be in place this has not been applied to East or West Horsley. Though the dropping of sites A36 and A41 is welcome, the proposals still mean an extra 255 new hoses for West Horsley, an increase of some 25%. There are no proposals for any improvements or additions to an infrastructure which is already stretched with waiting lists at all levels for the local primary school, substantial waiting times for appointments at the local medical centre and parking at Horsley railway station at its limit on normal working days. I therefore object to the proposals for sites A37, A38, A39 and A40.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

2.1 The schedule of sites at page 143 of the Submission Local Plan indicates a change to the quantum of development proposed although the allocation remains at ‘approximately 135 homes’ as worded.

2.2 Objection is made regarding the overall quantum of development proposed within the local plan (as noted within the housing section above) and given the overall change we believe the quantum of housing suggested within Policy A38 could be augmented further by adding ‘for a minimum of 135 homes…’.

2.3 This would reflect Criterion m) of Policy D4 reflecting the need to make most effective use of available land; it would contribute towards the overall shortfall in supply indicated in the first five years of the Plan; it would contribute towards reinstating the Boroughs objectively assessed housing need to that required through the 2015 SHMA; and it would contribute towards the Borough’s Duty to Cooperate with its neighbouring authorities in meeting the otherwise unmet needs across the HMA.

2.4 The approach to remove ‘maximum or an approximate number’ and provide certainty as a ‘minimum’ has been highlighted through discussions at the Waverley Examination at the end of June 2017 (as Counsel for Guildford Borough Council would confirm). Further, the policy as currently drafted implies a cap on the quantum of development considered acceptable and in this respect does not comply with the spirit of the NPPF which seeks to promote housing growth. Indeed one of the Core Planning Principles at paragraph 17 of the NPPF states that planning should:

‘Proactively drive and support sustainable economic development to deliver the homes, business and industrial units, infrastructure and thriving local places that the country needs. Every effort should be made objectively to identify and then meet the housing, business and other development needs of an area, and respond positively to wider opportunities for growth.’

2.5 Therefore a revision to the drafting to either ‘for a minimum’ or ‘at least’ 135 homes is suggested.

2.6 We Object to the amended to the allocation which states “…including some self-build and custom house building plots”. The Government has indicated a commitment to self-build and custom house building plots but have not yet issued policy in relation to the initiative. Government guidance at the time of determining a planning application would be a material consideration that will be looked at as part of the planning balance. We therefore object to the inclusion of this clause as this stage as being premature and pre-empting confirmation of the Government’s future policy.

2.7 Under the ‘Key Considerations’ section of Policy A38, the considerations section should be positively worded to ‘design out’ those aspects through good planning and design. We also recommend the inclusion at point (4) to the specific SANG – ‘SANG9 (Bespoke Suitable Alternative Natural Green Space (SANG) Bens Wood, West Horsley.’

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Site A39 - Land near Horsley Railway Station**

Part of this land nearest to the main road through East Horsley should be reserved for additional car parking for Horsley station users. This land is within a short walk of Horsley station. Demand for car parking at Horsley station could exceed the capacity of current station car park, particularly as this station could be the preferred station by commuters from the proposed Wisley airfield development.

**Site A39 Land near Horsley Railway Station, Ockham Road North, West Horsley**

**180. I object** to this site being included. It is a greenfield site in the Green Belt and Guildford Borough Council have proposed moving the settlement boundary and insetting the enlarged village in order to allow a development for which there are no exceptional circumstances.
181. This development is likely to add significantly to existing flooding issues and puts housing next to Lollesworth Wood which will impact adversely on its biodiversity.

182. Access is proposed next to the railway bridge at a point where the narrow pavement is heavily used by children walking to and from the nearby schools. Traffic is also particularly heavy in this vicinity at school run times.

183. Strangely, the "opportunities" include "Green Corridors and linkages to habitats outside of the site" when the proposal represents a major reduction in these features.

Environmental Impact of Proposed Housing in Horsley: Flood Risk

Building the large numbers of houses proposed in the Draft Local Plan will significantly increase the risk of flooding. I strongly object to the proposal in the Draft Local Plan for housing development in Ockham Road North, adjacent to Horsley station. This housing would be located in a floodplain. Housing on this site will adversely affect local drainage patterns, having a knock on effect further down the drainage basin. Increase in the volume of run-off due to paving over of arable land, coupled with higher incidence of flash-flooding caused by Global warming, will result in a greater frequency of abnormal fluvial discharge events, beyond the capacity of the existing drainage system. This will increase the likelihood of homes in the vicinity being flooded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

5.3. Policy A39: Land behind Ockham Road North, near Horsley railway station. Proposes a housing development of some 100 dwellings on a 5.7 hectare site that is well hidden behind the houses on the western side of Ockham Road North. Access is to be secured by demolishing the first two houses next to the railway bridge. This site will provide a good location for housing including affordable homes as it is centrally located in the village close to shops and railway station. The site is partly in flood zone 3 and would restrict numbers of units built. Because of its central location it could provide some employment opportunities in the form of offices and as an extension to the station car park.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Policy A39:** Land behind Ockham Road North, near Horsley railway station. I OBJECT to this policy. The movement in Green Belt boundaries needed to bring this site within the Settlement Area is not valid. There are no exceptional circumstances to justify it, the boundary move proposed is to shift from a 'main river line' to the edge of a piece of woodland - effectively moving from a strong defensive barrier to a weaker one. The proposed policy also involves the loss of prime agricultural land. Moreover, around 30% of this site is designated as Flood Zone 3. Accordingly, this move is not supportable and this site should be dropped as a policy from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**POLICY A39, located in East Horsley**

This site is for 100 dwellings and has been added since the 2014 local plan. This site is unsuitable for this number of houses as it will have very limited access onto Ockham Road South which is right up against the northern side of a railway bridge with a busy vet and a restaurant on the southern side.

The site is also prone to flooding in certain areas.

In addition, as a result of the additional dwellings, the local infrastructure will be unable to cope; in particular:

- The local schools, both primary and secondary, are already completely full and would not be able to take additional children. This matter is not addressed in the local plan.

- Public transport is currently inadequate with poor bus services and station car parks that are already full.

- Local roads are also unfit for purpose being very busy and in poor condition.

- The nearest medical centre, in East Horsley, is totally overstretched with appointments being difficult to obtain.

- There are only a couple of small shops in West Horsley with most residents doing their shopping in East Horsley village. Traffic and parking in East Horsley Village is already too great for the facilities.

For the above reasons I OBJECT to the above-named Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

This proposed development wasn't included in the Local Plan in 2014 but now the field which is in the Green Belt is being proposed as the site for the building of 100 houses with the entrance to the new development being by the railway bridge in East Horsley. The impact of Policy A39 on the surrounding area would be unsuitable because,

- the access to this site is next to a railway bridge and an area of road very prone to flooding
- the access is also next to a vet and a restaurant all of which have cars coming and going on to an already busy road
- the access to and from the site is close to the steps down from the station and is where many people cross when returning home
- the area is within the Green Belt
- the surrounding area's infrastructure is insufficient to cope with the additional 100 houses
- the roads are unfit for purpose being narrow and poorly maintained with many local roads having no paths
- the local Medical Centre in East Horsley is already overstretched with difficulties obtaining appointments at present
- the schools in the local area are already over subscribed so would not have the capacity to admit new pupils
- the public transport in the area is inadequate

For these reasons I OBJECT strongly to Policy A39.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/1620  Respondent: 8805249 / Peter Warburton  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Although small changes have been made to Site Policy A39, these are not material and GBC is still proposing to include this Green Belt site within the revised Local Plan.

In particular the change in the inset boundary proposed in the Pegasus Green Belt & Countryside Study for this site has no merit whatsoever. This study proposes the movement of the settlement boundary westwards from behind the houses on the western side of Ockham Road North up to the eastern boundary of Lollesworth Wood, thereby removing over 5 hectares of agricultural fields from the Green Belt. The present Green Belt boundary line is defined by a deep and well-maintained drainage ditch classified by the Environment Agency as a ‘river line’. As such, this river line represents a highly defensible Green Belt boundary. Therefore, I believe the justification for moving this boundary under current Green Belt rules is unsound.

The site also has other serious deficiencies for development with nearly a third of the land being classified as Flood Zone 3. The site is also directly adjacent to an important SNCI, as GBC’s revised policy has now belatedly recognised.

I OBJECTS to Site Policy A39, land near Horsley railway station
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** pslp172/2184  **Respondent:** 8820417 / Simon Marshall  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A39

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

On Policy A39 arbitrary wording has been added to include self-building or custom building plots within the allocation of 100 dwellings in order to make the policy compliant with national legislation as opposed to what is appropriate for the site. The allocation of 100 dwellings on this site contravenes Policy D4 which inter alia states that:

"Ensure appropriate density to make the most efficient use of the land whilst responding to local character and context".

100 houses on a 5.7ha site does not respond to local character and context given the nature of the immediately surrounding houses and the general established density of development in the village of East Horsley.

The inclusion of self-build or custom build plots will not enable this density to be achieved as these type of developments will require a greater plot size to make them viable.

I therefore object to the inclusion of Policy site A39 as a site for 100 homes as this is not a site that is capable Of sustaining this number of dwellings the principles of Policy D4 are to be observed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Site A39 – I OBJECT to the proposed development on this site on the grounds of access. It is on a stretch of the Ockham Road North which narrows as it approaches the railway bridge. Traffic at present has to slow down at that point particularly if there is a lorry on the same stretch of road. The pavement at that point is narrow and is regularly used by school children, commuters and shoppers. There is no viable way of widening the road to improve pedestrian safety.

**Do you consider this section of the document; complies with the Duty to Cooperate? (Yes), is Sound? (No), is Legally Compliant? (Yes)**

The use of this site would appear to blur the distinction between East and West Horsley. Since East Lane and the roads from it are all in West Horsley and your own designation has it that this site is in East Horsley that would appear self-evident. Therefore use of this site would appear to be against the policy for the inset villages of retaining a distinct identity. Presuming that access will be from Ockham Road this site should be reduced to provide a green space boundary between the new development and Heatherdene of at least 75m.

I **OBJECT** to this proposal because, quite apart from the fact that the land is on the flood-plane, development is totally impractical because of the hugely inherent dangers that will be caused by as many as 250 new cars entering the narrow Ockham Road North from this site.

This is a 'line of sight' issue because safe access from the development onto Ockham Road North will be blocked by the railway bridge. I am well aware that a prospective and seemingly well informed/confident developer, has already purchased one house (the one nearest to the railway line) and holds an agreement to purchase the second house should planning permission be granted. However and irrespective of where an access road is positioned, there will be significant road safety issues particularly with young children making their way along the narrow pavement to either Glenesk Pre-Preparatory School or The Raleigh School. It should also be noted that at drop-off and collection time at Glenesk, many parents park their car towards the railway bridge and then walk down to collect their children which will cause additional road safety issues for cars pulling out of this proposed development.

Furthermore, Ockham Road North (and South), given the narrowness of their width (having been built more for the pony & trap or stagecoach era than today's motorcars which, inevitably, means wide 4x4's, long wheel-based couriers and supermarket vehicles), already carry far too much traffic of which a significant number of drivers completely ignore the speed limit of 30mph. The nearby village shops of East Horsley are in two separate ribbon-strips but both have inadequate car parking facilities (as does the railway station) NOW and there is no land available for expansion.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

I object. It's Green Belt (NPPF 89). What are the exceptional circumstances that require this site to be developed?

It is within 5km of the Thames Basin Heaths SPA, and therefore any development is subject to EU/UK legislation (NPPF 119). The impact cannot be mitigated with SANGs because there is no evidence base to support SANGs as required by NRM6 viii, NPPF 158 and 166.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Comment re specific site (Ockham Road North): I am especially concerned about access to this site and the safety implications. The access would appear to be close to the railway bridge on the west side of Ockham Road North, one of the busiest roads in the area and one which is heavily used by pedestrians. Heavy lorries have to move into the middle of the road in order to fit under the railway bridge (which has been hit several times by such lorries). Coming from the A3, if the lorry drivers see that there is nothing coming the other way, they often move into the middle of the road earlier than they might, right at the point of the supposed access point. This WILL cause an accident at some stage, either vehicular or to a pedestrian, because the sight lines will compromise traffic and pedestrian safety.

This is currently an undeveloped Green Belt field close to the village. While many details remain to be proposed, development on this site raises issues of principle: Green Belt, flooding and proximity to the Thames Basin Heaths SPA. If this site were to remain in the MGB the proposal would be inappropriate and thus not permitted. As a large proportion of the site lies within a Functional Floodplain and a Zone 3 Floodzone, it is entirely unsuitable for residential development. The site lies within 400 metres to 5 km of the TBH SPA, and SANG will need to be found if development is to be considered.

Site A39 is on Metropolitan Green Belt land and I do not believe that the Council has made a defensible argument for developing on the Green Belt. As such I object to the development of site A39 on these grounds.

In addition, any site which is developed must have adequate infrastructure to support it. This includes transport, schools and flood defence. This statement is relevant for all proposed developments. In relation specifically to site A39:

- The area around Ockham Road North is already highly prone to flooding, with the road prone to severe flash floods with any heavy rain. The gardens in the vicinity frequently develop large pools of water following heavy rain. Site A39 is acknowledged to be a flood zone and is extremely boggy after heavy rain. With a significant increase in impenetrable ground, due to the roads, driveways, patios and rooves associated with 100 houses, the current problem would become worse and in my view would present a significant risk of more serious flooding causing flood damage to homes downstream of the development. I am pleased that the Council has acknowledged, within Policy A39, the need to ensure no increase in flood risk on the site or elsewhere. However, given the incidences of flood damage across the UK in recent years, it does not seem to me to be at all sensible to build such a large quantity of houses on or close to a known flood zone. Any development of the site should only be considered if the developers were required to invest the sums required to result in an improved drainage system and lower risk of flooding in all affected areas after the development had been completed compared to the current situation. Only that way can the Council be sure that its requirement for “no increase in flood risk” be achieved.

- While the site is close to the train station the train service is already extremely crowded. With additional users from site A39 and other sites proposed in the Horsley and Ockham area, it is highly likely that the trains to and from Waterloo will be standing room only. The train journey is 50 minutes.

I object therefore to the proposal for Site A39.

POLICY A39: Land behind Ockham Road North, near Horsley railway station

I OBJECT to Policy A39 which proposes a housing development of some 100 dwellings on a 5.7 acre green-field Green Belt site behind the houses on the western side of Ockham Road North. Access is to be secured by demolishing the first two houses next to the railway bridge.

As discussed earlier, EHPC considers that the proposed western movement of the settlement boundary needed to bring this site within the settlement area is unjustified and contrary to NPPF rules. If this boundary movement is invalid, as we believe, then this site remains a part of the Metropolitan Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

However and irrespective of where an access road is positioned, there will be significant road safety issues particularly with young children making their way along the narrow pavement to either Glenesk Pre-Preparatory School or The Raleigh School. It should also be noted that at drop-off and collection time at Glenesk, many parents park their car towards the railway bridge and then walk down to collect their children which will cause additional road safety issues for cars pulling out of this proposed development.

Furthermore, Ockham Road North (and South), given the narrowness of their width (having been built more for the pony & trap or stagecoach era than today’s motorcars which, inevitably, means wide 4x4’s, long wheel-based couriers and supermarket vehicles), already carry far too much traffic of which a significant number of drivers completely ignore the speed limit of 30mph. The nearby village shops of East Horsley are in two separate ribbon-strips but both have inadequate car parking facilities (as does the railway station) NOW and there is no land available for expansion.

**POLICY A39: Land behind Ockham Road North, near Horsley railway station** OBJECT. The proposal to build 100 dwellings on a green-field Green Belt site can only be achieved by the proposed western movement of the settlement boundary needed to bring this site within the settlement area. I believe that this is unjustified and contrary to NPPF rules. If so, then the site must remain a part of the Green Belt. I also object because of the strain it would place on current infrastructure as outlined in Policy A36 above.

Policy A39 proposes a housing development of some 100 dwellings on a green-field Green Belt site behind the houses on the western side of Ockham Road North. The proposed western movement of the settlement boundary needed to bring this site within the settlement area is unjustified and contrary to NPPF rules. If this boundary movement is invalid then this site remains a part of the Metropolitan Green Belt.
As such and with no ‘very special circumstances’ to justify housing development upon it, I OBJECT to Policy A39.

1. **FLOODING**

Being a resident of Heatherdene, West Horsley, our gardens flood every winter.

The field behind our house designated “Land near to Horsley Station and next to the railway” has been earmarked in the draft local plan for one hundred houses. A large percentage of this land is FLOOD ZONE 3. During the last winter this field was on Amber alert (imminent major flooding). How can it be possible to consider a piece of land that FLOODS all the surrounding gardens, FLOODS that section of Ockham Rad North with horrendous surface water, that commuters are constantly soaked and most of them walk with there umbrellas pointed towards the floor to stop major surface water from being kicked up from cars and lorries. Recently a development of houses in Fetcham was built near a flood plain. Even though it was built with specialist foundations and drainage to protect the houses from flooding, it flooded almost immediately after sustained heavy rain. Causing the houses to be unsaleable.

The proposed entrance is too near the Railway arch on Ockham rd north, where lorries travel frequently into the middle of the road to make sure the clear the underside of the bridge.

It is an accident waiting to happen, in the truest sense!

Recently in Fetcham, a development was built on a site that floods. Even though, specialist flood resistant foundations and drainage were installed, the site flooded, causing damage to the properties and rendering them unsellable.

Site A39 Land to the west of Horsley Railway Station, north of the railway line and west of Ockham Road North, East Horsley

I strongly object to the development on this Green Belt site. I wonder how well the producers of the plan even looked at the site. The reasons for objection are:

- The land is outside the settlement boundary.
- The land is in the Green Belt and adjoining undisturbed listed ancient woodland.
This site is generally very wet and is extremely wet in prolonged rainy periods. The back gardens of the properties along the edge of this field (west side of Ockham Road North and in Heatherdene) routinely have persistent surface water during the winter despite a good sized watercourse running along the eastern edge of the site. Roughly 40% of the site (the Eastern sector) is a Zone 3 floodzone and a Functional Floodplain. A Zone 3 floodzone has an annual probability of flooding of 1% or more and is the most severe category of floodzone identified by the Environment Agency. More seriously, under the Environment Agency’s definitions a Functional Floodplain comprises land where water has to flow or be stored in times of flood. Land within this zone is considered to flood with an annual probability of 1 in 20 or greater in any year. Development on such land does not seem at all sensible given the flooding problems in the Borough in recent years. Serious surface water issues also occur on the road just outside this proposed site. Attempts to mitigate this water flow would also cause serious issues further north where the watercourse goes underground, back up could occur and flood adjoining properties which are designed as a development for the elderly. A near neighbour remembers walking along Ockham Road North in 1968 in calf deep water after heavy rainfall.

We understand that access will be provided just north of the rail bridge. This would be feeding 200 cars (potentially) at peak times onto a very busy, narrow road with poor sight lines for both those trying to join Ockham Road North and those driving down the road seeing the potential vehicles leaving the site. The access is also opposite one of Horsley’s Grade 2 listed historic Lovelace buildings. Completely inappropriate.

POLICY A39: Land behind Ockham Road North, near Horsley railway station

Policy A39 proposes a housing development of some 100 dwellings on a 5.7 acre green-field Green Belt site behind the houses on the western side of Ockham Road North. Access is to be secured by demolishing the first two houses next to the railway bridge.

As discussed earlier, EHPC considers that the proposed western movement of the settlement boundary needed to bring this site within the settlement area is unjustified and contrary to NPPF rules. If this boundary movement is invalid, as we believe, then this site remains a part of the Metropolitan Green Belt. As such and with no ‘very special circumstances’ to justify housing development upon it, EHPC OBJECTS to Policy A39.

Although small changes have been made to Site Policy A39, these are not material and GBC is still proposing to include this Green Belt site within the revised Local Plan.
In our previous Local Plan submission EIIPC asserted that the removal of this site from the Green Belt was not adequately justified by GBC or their consultants Pegasus.

In particular the change in the inset boundary proposed in the Pegasus Green Belt & Countryside Study for this site has no merit whatsoever. This study proposes the movement of the settlement boundary westwards from behind the houses on the western side of Ockham Road North up to the eastern boundary of Lollesworth Wood, thereby removing over 5 hectares of agricultural fields from the Green Belt. The present Green Belt boundary line is defined by a deep and well-maintained drainage ditch classified by the Environment Agency as a ‘river line’. As such, this river line represents a highly defensible Green Belt boundary. Therefore, we believe the justification for moving this boundary under current Green Belt rules is unsound.

The site also has other serious deficiencies for development with nearly a third of the land being classified as Flood zone 3. The site is also directly adjacent to an important SNCL as GBC’s revised policy has now belatedly recognised.

We trust that GBC will also belatedly recognise the serious deficiencies of this site and remove it altogether from the Local Plan. Until such time:

**EHPC strongly OBJECTS to Site Policy A39, land near Horsley railway station**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to policy Site A39.( by the Railway Line) This is currently in the Green Belt with a clear and defensible boundary of a deep ditch. Moving the boundary to the edge of Lollesworth Wood will impact on this ancient woodland. This is an area of Ockham Road North that is subject to regular surface water flooding with a
drainage system unable to cope. Part of the site is zone 3 floodplain. The proposed density of housing is greater than in the surrounding area. Should this proposal be continued the number of houses should be substantially reduced to lessen the flooding effect of more impermeable surfaces and to provide adequate space for flood prevention measures including the creation of a pond and a wetland which could have biodiversity benefits.

Policy A39: Land near Horsley Railway Station, Ockham Road North, East Horsley

The Site is included in the Guildford Borough Proposed Submission Local Plan: Strategy and Sites (2017) as a draft allocation (Site Allocation A39 – Land near Horsley Railway Station, Ockham Road North, East Horsley) for approximately 100 dwellings. We welcome and support the Site’s removal from the Green Belt and its identification as a Site Allocation for approximately 100 dwellings. As set out in our response to Policy P2 below, the Site does not serve any of the five purposes of the Green Belt identified in paragraph 80 of the Framework. Furthermore, the Site is highly sustainable and is a logical solution in delivering much needed housing. Overall it is considered important for the Council to retain the Site’s allocation to ensure that the Borough’s housing needs can be met.

Part of the changes made to the Proposed Submission Local Plan: Strategy and Sites (2017), Draft Policy A39 identifies a requirement for this site allocation for approximately 100 homes to include some self-build and custom housing plots. As set out in our response to Policy H1 below, we support the principle of the requirement for self-build and custom housebuilding on sites providing 100 homes or more. We however object to a requirement to provide some self-build and custom house building plots on this site if less than 100 homes are delivered. We suggest the wording of the policy is amended to require some self-build and custom housing plots on this site for a scheme comprising 100 homes or more. If less than 100 homes are provided on this site the policy should not require any some self-build and custom housing plots. We consider this is a reasonable approach that would be consistent with Policy H1.

Site A39 - Ockham Road North:

Although strictly being in East Horsley, this site is also on the north side of the railway line, and is directly adjacent Horsley station. Areas of West Horsley would greatly benefit from a foot/cycle path running alongside this site on the northern side of the railway line to afford easy and safe commuter access to Horsley station.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to this development based on the density and impact on the centre of the village and direct impact this will have on the area. My reasoning:

- The village is congested at key times in and around the shops and station and this will increase that congestion. In addition this will increase the pressure on local amenities and services, already at capacity in some cases to handle the current population. This development will have a negative impact on capacity

- The development also creates the precedent to allow large size developments on village green spaces; the mitigation of allowing Green corridors to allow wildlife is not needed if the site remains undeveloped

- The development also results in the playing fields being entirely encircled, which is a clear indication this area will be approved for development in future; this is a further loss of amenity (currently used by the Raleigh School and other groups

- The current transport provision is at capacity, with station carparking full, inadequate retail parking, limited on-street parking; I do not want to a development which necessitates the increase in parking under tarmac to meet the demands of more traffic

**POLICY A39: Land behind Ockham Road North, near Horsley railway station**

My objection follows on from my comments above in the section “Policy P2: Green Belt, b) Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley”.

Policy A39 proposes a housing development of 100 dwellings on a 5.7 acre green-field Green Belt site behind the houses on the western side of Ockham Road North. This is dependent upon the proposed western movement of the settlement boundary needed to bring this site within the settlement area.

The NPPF is quite clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. I do not believe this policy demonstrates any such circumstances and is therefore unjustified and contrary to NPPF rules. If this boundary movement is invalid then this site remains a part of the Metropolitan Green Belt. Therefore the housing development proposal would be invalid.

I OBJECT to Policy A39 as it fails to demonstrate the exceptional circumstances required to move the settlement boundary.

<td>Village</td>
</tr>
<tr>
<td>Ward</td>
<td>Clandon and Horsley</td>
</tr>
</tbody>
</table>

I have a number of concerns in relation to the proposed removal of site A39 and Horsley overall from the green belt:

- **There is no safe access to this proposed site.** The access proposed raises major Health & Safety issues. Even at present the close proximity of the railway bridge means access from driveways to Ockham Road North at this
point is restrictive & dangerous in normal hours. At peak commuting and school hours this is even worse and becomes very dangerous and accidents have happened at this point.

- **Local flooding is a major concern at this site** The proposed site builds on land which is at the moment acts as a flood plain curbing the issue which already exists about local flooding which doesn’t just occur with heavy downpours but also with light rain showers.

- At this point **Ockham Road North becomes dangerous** as it floods beyond the curb height and as such pedestrians and cars are put in danger.

- Many houses on Ockham Road North **experience significant domestic flooding** and this site will make them even more susceptible. The flood issue also has a major impact on domestic drainage and means that toilets, sinks and bath water backs up and becomes a health & safety issue. This site will substantially increase the susceptibility of the local housing and infrastructure to the risk of flooding.

- **False criteria for proposing to take Horsley from green belt** There is a lack of understanding of the area in relation to the description and therefore false criteria on which the draft has been proposed eg: The East vs West Horsley point above, the designation of Station parade is completely misleading and bears no resemblance to a few village shops and a small franchised convenience store and an infrastructure which can ill cope with existing residential need.

- **Infrastructure**: No-where in the plan has infrastructure been addressed. It is already an intolerably long wait to access the local GP’s and dentists at a base level. Nor is there any mention of the already inadequate lane (they cannot even be designated as roads) & footpath structure.

- **Local employment is minimal** and the majority of the resident population have to travel to and from the village using either an already inadequate road system or public transport and no additional car parking which again is already limited.

- Overall the proposal to take Horsley from the green belt and this proposed site does not take into account major flooding and infrastructure issues and as a consequence is at best not viable and at worst dangerous at a number of levels.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Horsley Planning Objection: June 2016 2

Infrastructure: No-where in the plan has infrastructure been addressed. It is already an intolerably long wait to access the local GP’s and dentists at a base level.

Lanes: There is no mention of the already inadequate lane; as they cannot in most situations be designated as roads; & footpath structure which are already inadequate and poor in structure.

Local employment is minimal and the majority of the resident population have to travel to and from the village using either an already inadequate road/lane system or public transport and no additional car parking is planned which again is already limited. Overall the proposal to take Horsley from the green belt and this proposed site does not take into account major flooding and infrastructure issues and as a consequence is at best not viable and at worst dangerous at a number of levels.

Objection to East Horsley local plan

With reference to:

A39  Land near Horsley railway station, Ockham Road North, East Horsley

Houses proposed C100 (c3)

Location Village

Ward Clandon and Horsley

I have a number of concerns in relation to the proposed removal of Horsley from the green belt and site A39

- **There is no safe access to this proposed site.** The access proposed raises major Health & Safety issues. Even at present the close proximity of the railway bridge means access from driveways to Ockham Road North at this point is restrictive & dangerous in normal hours. At peak commuting and school hours this is even worse and becomes very dangerous and accidents have happened at this point.

- **Local flooding is a major concern at this site** The proposed site builds on land which is at the moment acts as a flood plain curbing the issue which already exists about local flooding which doesn’t just occur with heavy downpours but also with light rain showers.

  At this point **Ockham Road North becomes dangerous** as it floods beyond the curb height and as such pedestrians and cars are put in danger.

  Many houses on Ockham Road North **experience significant domestic flooding** and this site will make them even more susceptible. The flood issue also has a major impact on domestic drainage and means that toilets, sinks and bath water backs up and becomes a health & safety issue.

- **False criteria for proposing to take Horsley from green belt.** There is a lack of understanding of the area in relation to the description and therefore false criteria on which the draft has been proposed eg: The East vs West Horsley point above, the designation of Station parade is completely misleading and bears no resemblance to a few village shops and a small franchised convenience store and an infrastructure which can ill cope with existing residential need.

  **Infrastructure:** No-where in the plan has infrastructure been addressed. It is already an intolerably long wait to access the local GP’s and dentists at a base level.

  **Lanes:** There is no mention of the already inadequate lane; as they cannot in most situations be designated as roads; & footpath structure which are already inadequate and poor in structure.

  **Local employment is minimal** and the majority of the resident population have to travel to and from the village using either an already inadequate road/lane system or public transport and no additional car parking is planned which again is already limited.

Overall the proposal to take Horsley from the green belt and this proposed site does not take into account major flooding and infrastructure issues and as a consequence is at best not viable and at worst dangerous at a number of levels.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
A39: Land near Horsley Railway Station, Ockham Road North

Site A39 is on Metropolitan Green Belt land and I do not believe that the Council has made a defensible argument for developing on the Green Belt. As such I object to the development of site A39 on these grounds.

In addition, any site which is developed must have adequate infrastructure to support it. This includes transport, schools and flood defence. This statement is relevant for all proposed developments. In relation specifically to site A39:

- The area around Ockham Road North is already highly prone to flooding, with the road prone to severe flash floods with any heavy rain. The gardens in the vicinity frequently develop large pools of water following heavy rain. Site A39 is acknowledged to be a flood zone and is extremely boggy after heavy rain. With a significant increase in impenetrable ground, due to the roads, driveways, patios and rooves associated with 100 houses, the current problem would become worse and in my view would present a significant risk of more serious flooding causing flood damage to homes downstream of the development. Given the incidences of flood damage across the UK in recent years, it does not seem to me to be at all sensible to build such a large quantity of houses on or close to a known flood zone. Any development of the site should only be considered if the developers were required to invest the sums required to result in an improved drainage system and lower risk of flooding in all affected areas after the development had been completed compared to the current situation.

- While the site is close to the train station the train service is already extremely crowded. With additional users from site A39 and other sites proposed in the Horsley and Ockham area, it is highly likely that the trains to and from Waterloo will be standing room only. The train journey is 50 minutes.

I object therefore to the proposal for Site A39.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Land behind Ockham Road North, near Horsley railway station

OBJECT. I object to building on a green-field Green Belt site. Moving the boundaries to achieve this is unjustified. The infrastructure cannot sustain these houses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

In particular, site A39: Land behind Ockham Road North, near Horsley railway station

I wish to make it clear that I have read and fully support all of East Horsley Parish Council's comments on the draft plan. I have not repeated them here, but please take that as understood.

I wish to take particular note of plans to build in section A39. My comments are as follows:

1) This is land designated as Green Belt and it is not clear to me that a redesignation is permissible under the reasons given in the local plan.

2) There is and can only be limited access to the site and any further access will require new road junctions onto Ockham Road North which at certain times of day is already heavily congested.

3) There is already a severe problem with drainage in the area and the plot in question regularly floods. The Environment Agency have recorded this risk. Adding residential property to this site will only exacerbate these problems and place both any new dwellings and those existing buildings in the area at greater risk of flooding. This risk does not appear to have been considered in any of the assessments and should at the very least necessitate a pause while the appropriate survey work is conducted.

4) The borough council have already proved themselves to be incapable of maintaining the sewerage systems to a standard that can deal with the level of rainwater run off currently required. Ockham Road North regularly floods. There is no evidence to suggest that this will be any better in future and additional housing stock will only make it worse.

5) There is no evidence of demand for this type of housing in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I live on Ockham Road North in East Horsley in front of the proposed siting of the 100 houses – A39.

I object to this site for numerous reasons. Firstly the field is an enormous flood plain which is either saturated with water or bone-dry and cracked – due to the soil constituents being mostly clay. Our garden is exactly the same. Every time it rains, the water creeps up the garden and threatens to flood our house and my neighbours’ houses. This is also aggravated by the run off from the railway line.

If any houses are built on the site, where will this water go? Our houses will flood for sure. Given the size of the site, how can any flood measures guarantee to handle all the water from 5.7 acres? The small stream between our garden and the site will not be able to handle it all.

Further when it rains the drains running from our houses out to the road are incapacitated and do not allow water to drain so that water comes back up into the house. This has happened this summer and so can only become worse in the winter. With the climate changing in the UK with less frequent but greater downfalls, this can only add to the impact. Adding more pressure to the drainage network is not acceptable. Are the developers prepared to fully indemnify every householder on Ockham Road North for the cost of moving and the loss of value of their house if the flood measures were ineffective?

Demolishing the 2 houses next door but one to us will also result in huge noise pollution as residents from this site drive in and out. We live in East Horsley because it is a quiet village and in the Green Belt. To have an additional 100 houses behind us will change the nature and character of the village.

It should also be noted that, in the mornings and evenings, it is virtually impossible to pull out of our drive. How much worse will it be when there are potentially another 100 cars trying to pull out or turn in at those times?

Objections to Guildford Borough Council Plan proposals for Horsley, specifically proposed housing development, West of Ockham Road North, ‘Site Allocation A39’
I would like to register three specific objections, summarised below, to the proposal for development of the land adjacent to Ockham Road North (‘Site Allocation A39’) in the GBC Proposal’ arising from the proposal to remove this area from the Greenbelt around Horsley.

The land above, comprising open pasture, is flanked on one side by the Stratford Brook and its floodplain and on the other by the ancient Lollesworth Woods. As such it comprises an integral part of the greenbelt both for Horsley and the wider area. The land is flat, poorly drained, flood prone and unsuitable for application of ‘Sustainable Urban Drainage Schemes’ (SUDS) that would mitigate these risks. Access to the site is also problematic given the drainage problems on Ockham Road North (see below, Objection 1). These concerns and some of the evidence to support them are summarised in the three objections below:

**Objection 1. Frequent Flooding on Current Access Road to Ockham Road site**

Horsley residents using Ockham Road North, one of the main road and pedestrian routes through the village, are familiar with the hazards arising from overflowing storm drains and standing water that accumulates in this area whenever heavy rainfall is experienced (for example on July 15th, 2016, photography available). There are several areas on Ockham Road North that suffer from inadequate storm drainage, however the most severe appears to be just north of the railway bridge and coincident with the proposed entrance to the A39 site. This common experience of Horsley residents is corroborated by the current Environment Agency (EA) flood maps which also show a high risk of flooding from surface water along this section of Ockham Road North. In addition to these issues on Ockham Road North the only access to the site appears to be via a new road (see GBC A39 map) across land designated as Zone 3 flood risk by the Environment agency (see EA flood map for planning), raising questions about the resilience of this route for access by the emergency services.

**Objection 2. Flood Prone Character of Site A39**

The land comprising Site A39 is virtually flat. British Geological Survey (BGS) maps and boreholes show that the fields are underlain by a thin (< 1m) veneer of sand and gravel above the thick impermeable London Clay Formation (see also Objection 3 for implications of the latter). These sands and gravels comprise the deposits of streams that flowed through the area from the high chalk downland south of Horsley towards the Thames Basin to the north in the recent geological past when climate was somewhat wetter than present. Today, the Stratford Brook which flows north to south across the area is a modern remnant of this older drainage system and is classified as a ‘Main River’ by the Environment Agency. Environment Agency maps show that ~ 30-40% of the land outlined in GBC Site A39 (excluding area used for access road to Ockham Road North) comprises the floodplain of the Stratford Brook and fall within the Environment Agency highest Zone 3 Flood Risk classification.

Just as with the poor drainage along Ockham Road North the experience of local residents adjacent to the fields comprising Site A39 confirms the location of flood prone areas suggested by Environment Agency maps. Observations of standing water and additional streams not shown on current maps, both in winter and summer however, suggest the EA maps may actually underestimate frequency of flood events and hence current and longer term risks. Hence the Evidence Base for current evaluation of the local drainage may be inadequate.

**Objection 3. Unsuitability of Land for ‘Sustainable Urban Drainage Schemes’ (SUDS)**

The land comprising Site A39 is unsuitable for ‘Sustainable Urban Drainage Schemes’ (SUDS) that would commonly be used to mitigate the additional runoff/flood risk associated with development of the site, according to a recent British Geological Survey Report (BGS Report GR_205554/1, September 2014) focussed on this area. The occurrence of the impermeable London Clay Formation at shallow depths (<1m) across the entire site suggests a very high likelihood of persistent or seasonally shallow groundwater. As a consequence, engineered solutions, such as infiltration ponds, to cope with additional runoff caused by development would probably not be satisfactory (see map).

**In summary,** there are three objection about the suitability of the land adjacent to Ockham Road North (Site A 39) for development and hence no justification for removal of this land from the Greenbelt. Specifically:

1. The approach roads are poorly drained and the single access point crosses an EA Zone 3 floodplain.
2. All of the land comprising Site A39 formed a floodplain in the recent geological past. Approximately 30-40% of land (excluding approach road) now comprises the floodplain of Stratford Brook and has the highest EA Zone 3 flood risk classification.

3. The area is poorly drained and unsuitable for sustainable drainage systems (SuDS) schemes that might mitigate risks associated with development according to the British Geological Survey (BGS).

Significantly, the experience of local residents tends to confirm the accuracy of the current Environment Agency Maps regarding the location of flood prone areas associated with Site A39.

Hence I urge the Council to maintain the current settlement boundaries and Green Belt land around Horsley and reject proposals for development of the land comprising Site A39.

POLICY A39: Land behind Ockham Road North, near Horsley railway station

Policy A39 proposes a housing development of some 100 dwellings on a 5.7 acre green-field Green Belt site behind the houses on the western side of Ockham Road North. Access is to be secured by demolishing the first two houses next to the railway bridge.

As discussed earlier, I consider that the proposed western movement of the settlement boundary needed to bring this site within the settlement area is unjustified and contrary to NPPF rules. If this boundary movement is invalid, as I believe, then this site remains a part of the Metropolitan Green Belt. As such and with no ‘very special circumstances’ to justify housing development upon it, I OBJECT to Policy A39.

On Policy A39 arbitrary wording has been added to include self-building or custom building plots within the allocation of 100 dwellings in order to make the policy compliant with national legislation as opposed to what is appropriate for the site. The allocation of 100 dwellings on site contravenes Policy 1D4 which inter alia states that: "Ensure appropriate density to make the most efficient use of the land whilst responding to local character and context". 100 houses on a 5.7ha site does not respond to local character and context given the nature of the immediately surrounding houses and the general established density of development in the village of East Horsley. The inclusion of self-build or custom build plots will not enable this density to be achieved as these type of developments will require a greater plot size to make
them viable. I therefore object to the inclusion of Policy site A39 as a site for 100 homes as this is not a site that is capable of sustaining this number of dwellings if the principles of Policy D4 are to be observed.

Environmental Impact of Proposed Housing in Horsley: Flood Risk

Building the large numbers of houses proposed in the Draft Local Plan will significantly increase the risk of flooding. I strongly object to the proposal in the Draft Local Plan for housing development in Ockham Road North, adjacent to Horsley station. This housing would be located in a floodplain. Housing on this site will adversely affect local drainage patterns, having a knock on effect further down the drainage basin. Increase in the volume of run-off due to paving over of arable land, coupled with higher incidence of flash-flooding caused by Global warming, will result in a greater frequency of abnormal fluvial discharge events, beyond the capacity of the existing drainage system. This will increase the likelihood of homes in the vicinity being flooded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2257  Respondent: 15464161 / Toby Marshall  Agent:

We have concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing drainage infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

The proposed 135 dwellings exceed the capacity trigger levels for available network. Developer funded impact study required to understand implications of development.

3.1.2 Assessment of climate change
Within your plan the following four sites are based on high level flood risk information:
POLICY A39: Land near Horsley railway station, Ockham Road, North, East Horsley (assessment based on Flood Zones)
POLICY A40: Land to the north of West Horsley (assessment based on Flood Zones)
POLICY A50: Land at Whittles Drive, Aldershot Road, Normandy (assessment based on Flood Zones)
POLICY A54: Lakeview, Lakeside Road, Ash Vale (assessment based on detailed flood model (Blackwater 2007) 1 in 100 year flood)
Although you have deemed these to have passed the flood risk sequential test as noted below we would expect that at planning application stage detailed flood modelling is undertaken.
We note that the new climate change allowances haven’t been specifically mentioned in the Level 2 SFRA or local plan. However, the majority of allocated sites have detailed modelling where the 1 in 1000 year (0.1% annual exceedance probability) is available, these sites have been assessed against the 1 in 1000 year flood. For the purpose of accuracy and clarity we recommend that this approach of using the 1 in 1000 year flood event to account for climate change is clearly set out in the SFRA Level 2.
If these sites are adopted, at the planning application stage we would expect an assessment of climate change (using the new allowances) to be undertaken by applicants. We recommend applicants consult with the most recent national climate change guidance including our Thames Climate change guidance.

The wastewater network capacity in this area may be unable to support the demand anticipated from this development. Local upgrades to the existing drainage infrastructure are may be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a potential wastewater network capacity constraint, the developer should liaise with Thames Water to determine whether a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered is required. The detailed drainage strategy should be submitted with the planning application.
Proposed Submission Local Plan Regulation 19 representations (2016 and 2017)

Document part: A40 - Land to the north of West Horsley
The proposals for West Horsley would result in a massive increase in village size with consequent loss of character. Simply put, there are too many homes for a village without the necessary infrastructure and the proposals constitute a major assault on Green Belt land. The current settlement area does not need to be extended. Current housing is varied in size and style and is low density as befits a village of this character. It is ill-considered and inappropriate to build clusters of 100 or so houses at much higher density.

Over the years the number of households in East and West Horsley have increased slowly due to a few houses being built each year but spread throughout the two villages. To build the 500 houses proposed would overwhelm the villages and their facilities.

The Raleigh school is oversubscribed- even children living in the Horsleys cannot all obtain a place. This school and the two independent schools create high volumes of traffic at peak times with considerable congestion at the various pinch points throughout the village.

The proposed development of over 500 additional homes in East and West Horsley will result in hundreds of additional school-aged children in need of a school place. This is ill-considered and not supportable.

Both of the major roads running through the village (B2039 and East lane/The Street) are crossed by low, railway bridges and each have pinch-points where the roads very narrow. On East Lane, very close to proposed major developments, there is a very narrow section which does not permit twoway traffic flow. East Lane is therefore particularly unsuited to significant increase in traffic flow. The Street frequently floods and is impassable after heavy rain. Residents would have to commute to work via A3 or A246 or drive through East and/or West Horsley to get to the station or school.

Fields and gardens alongside Ockham Road North flood regularly and the water table is high for the majority of the year. The proposed development of site A40 would exacerbate flooding risk to neighbouring houses and roads. Flood mapping in the consultation document recognizes this problem but the site remains as one for potential development.

The proposed development site A40 also surrounds a successful and highly regarded campsite with some 130 pitches. Currently this is a quiet rural area with bountiful wildlife- deer, foxes, rabbits and a large variety of birdlife. The proposed development of site A40 would destroy this environment and most likely this successful local business.

This is a very large tract of agricultural land in the green belt. It is difficult to visualise the changes to the village landscape when all of these proposals are added together, but if every piece of open land is built on it will simply be an
enormous housing estate with few amenities and no social centre. Some limit development adjacent to Nightingale Close and Nightingale Avenue to the south of the footpath/track could be absorbed but not the several acres being proposed.

Flood Risk and Inadequate Drainage and Sewerage

There have been drainage problems in the area around Waterloo Farm leading to localised flooding and backed up drains - about 5 years ago we had sewage across our back garden where the water level in the system had risen above that of some of the drain covers - notably one on our property. This had backed up from the main sewer. These sewers could not cope with any further development in the area.

The area around and to the rear of Waterloo Farm is also low lying and always floods in periods of heavy or sustained rainfall. Evidence of the wetness of the area can be seen by the thriving willow trees behind Waterloo Farm. This makes this area most unsuitable for housing.

Specific Comments on Potential Development Area Ref A40/ID 975 (Land at Waterloo Farm/ Ockham Road North)

I am making detailed comments only about this site because it is in close proximity to where I live, and therefore I have a greater level of understanding of some of the detailed issues. I am sure that similar concerns will be raised by other locals in connection with each of the other potential development areas, and my opposition is to all of the potential development as are around West Horsley, as well as the redesignation of Green Belt Boundaries, rather than just this site.

With reference to this site, I believe that development on this site would cause an unacceptable increase in the risk of surface water flooding affecting existing houses in areas such as Ockham Road North and Nightingale Avenue. These are already designated as Flood Zone 2 and 3 (medium and high risk) as is part of this development site and as mentioned above, surface water flooding has been an issue here in recent years.

I also have concerns about how this site could be accessed. Both Green Lane and the current small access road to the Camping and Caravan Site do not provide good road access for a development of this size and junction access on to the Ockham Road would be dangerous. Any access through Nightingale Avenue (for example created by an additional access point at the North of the road) would also not be suitable. Once again, the junction onto Nightingale Avenue would not safely carry additional traffic, and the road network is already under particular strain during the school run. This route is also not suitable or safe for additional pedestrian access (and pedestrian access down Ockham Road North is also challenging as it requires crossing the road several times). At present there are no footpaths along Nightingale Avenue and it is not possible to widen what is a small residential road in order to allow safe access.

Whilst partially enclosed by housing, especially to the East, this site comprises pleasant fields which help to contribute to the rural character of the village, and to the semi-rural character of the housing stock along Ockham Road North. This proposed development would therefore sit on a gateway into the village. At present the village gradually becomes more developed as one drives down the Ockham Road and enters East Horsley, or turns into East Lane to continue through West Horsley. Significant development here, with attendant infrastructure such as highway improvements or pedestrian crossings, would significantly alter the rural context of the village by creating a far more stark and harsh boundary to the village.

A stables use the land in the northern half of this plot and clearly further erosion of land available for this sort of recreation puts further pressure on the provision of suitable land for the local population to indulge in healthy outdoor pursuits.

Access to these fields is quite restricted being already surrounded by existing housing. Access required for large vehicles for development would create considerable disruption. The loss of view and amenity provided to all these houses by being adjacent to the countryside would be of huge detriment to these residents who enjoy this outlook, myself included.

I am sure that within the Guildford Borough many more “brown field” and urban sites can be identified rather than creating huge development in the villages of Surrey.

Clearly there are other areas in West Horsley that are considered for development too. All of these areas carry some of the same ill-considered reasoning for development. Overall any large increase in development within the village would seriously strain the facilities and infra structure at present in place.

As a broad outline I object to the large scale increases in building that the Proposed Submission Plan suggests. My wife and I strongly disagree with the removal of the Green Belt Status from the villages of Surrey and in particular that of West Horsley.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ). is Sound? ( ). is Legally Compliant? ( )

I OBJECT to this proposal at Waterloo Farm because this particular tranche of land for a number of reasons which include the fact that this land is subject to an unacceptable flood risk from the combination of a high groundwater table and the lack of surface water run-off. Ockham Road North was closed for several weeks in 2014 because of flooding, and indeed still floods regularly. This site is on flat land with clay soil on the downhill side of the Horsleys where floodwater from any new development will simply accumulate and back up onto existing properties nearby. Furthermore, the envisaged development misjudges the problems of safe access which are definitely not simply limited to flooding. Nor will they be overcome by the proposal to extend the existing 30mph zone past the site entrance. Worthy of note is that repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police: this despite the fact that data collected in 2015 clearly demonstrated that traffic volume had doubled in the past 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been permitted and additional housing of this magnitude (120 houses I 300 cars) will merely add to the existing hazards along this narrow and already dangerous stretch of road.

I OBJECT to policy A40 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy 40 – I Object. By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This is contrary to Policy E5 – Rural Economy.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby.

Policy A40 underestimates the problems of safe access and egress. Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly.

The site access for such a large number of houses is dangerous. Highways England and Surrey Police, show that traffic has doubled over the last 15 years and that the average speed on this section of Ockham Road is 52mph, with maximum speeds of over 80mph. Additional housing will add to several hazards along this stretch of road.

The boundary of this site is also the proposed new Green Belt and settlement boundary. Its north western boundary is not defendable as it just runs through the middle of a field/garden. Some trees have been recently planted in token gesture to create a green belt boundary. This was to overcome access issues of the past - another wrong does not make it right!

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A40

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Surface Flooding Danger to existing properties due to run off from the proposed Waterloo Farm site.

With specific reference to the proposed 120 home Waterloo Farm site which is closest to my home post coded GU236PD. Junction Ockham Road North and Green Lane.

I sincerely believe that if the Waterloo Farm site is permitted my home will be flooded.

I believe other households might be similarly affected; and I wonder whether we might succeed in an action against Guildford Borough Council for negligence.

Could the council also be prosecuted for deliberately enabling the health risks associated with flooding to afflict local residents?

**The Environment Agency’s own mapping shows that parts of the waterloo farm site are likely to be subject to flooding.**
This has already been mentioned as a problem area for potential development in the Pegasus report for the original discarded local plan.

One day in 2000 huge amounts of water ran down Ockham Road North from East Horsley, and water ran through the front gardens too.

From November 2012 until February/March 2013 the entire area around West Horsley South and East Horsley North was completely waterlogged. Sometimes water flowed over the roads instead of beside them.

In January 2014 diluted sewage flowed over Green Lane not far from the junction with Ockham Road North due to waterlogged land and inadequate drainage. This year the ditches have again been overflowing onto Green Lane.

There is an onward slope towards Ripley and Ockham. Extra water due to run off must ultimately end up there increasing flood risk.

Climate change science indicates that periods of heavy rainfall and flooding are likely to increase in future years.

It is madness to build on land that must hold and slowly drain down hundreds of thousands if not millions of gallons of water.

**Access to Waterloo Farm using Green Lane and/or the camp site road is clearly inadequate.**

Both of these roads are single carriageway only. In addition they both join into Ockham Road North which is a winding road with limited visibility in places and a 40mph limit which is generally ignored. Often speeds of 60mph have been recorded just where traffic would emerge from Green Lane. There is very poor visibility for all drivers. Increased traffic flow into and out of these two junctions would inevitably lead to accidents in these circumstances.

The Green lane Ockham Road North Junction is particularly risky.

Green Lane is specifically used by walkers, dog walkers, cyclists and horse riders (there is a nearby holistic riding school) for recreation because it is a low traffic country lane, and also provides a safe corridor for them between similar use areas. In addition it provides a space for humans to interact with wild and pet animals which are life enhancing to us all.

The Waterloo Farm site off Ockham Road North is land subject to a high flood risk, so should not be built upon. If the Council allows it to be built upon, my home will flood.

Access to Waterloo Farm would be via single-carriageway lanes with poor visibility, wholly inadequate for the likely volume of construction traffic, residents’ traffic and suppliers’ traffic.

I object to Policy A40, near Horsley Railway

40% of this proposed development site is zone 3 floodzone and Functional Floodplain. There are drainage ditches that serve the site and run behind the properties in Heatherdene. There is also a winter stream that runs from this site across the back of nos. 10, 11 and 12 Heatherdene and down under the ground through Weston Lea. The stream runs for about 3 months of the year and appears to have been completely missed by the Environment Agency’s maps of the site. Clearly, an area that already deals with a lot of water flow is unsuitable for housing development. In addition, an access junction beside the railway bridge in Ockham Road North will cause a lot of delay and potential danger with difficult sightlines on an already busy road.

I OBJECT TO WATERLOO FARM SITE, BORDERING GREEN LANE

SPECIFIC OBJECTIONS TO BUILDING 120 HOUSES ON THE LAND ADJACENT TO GREEN LANE, GU23 6PQ

DRAINAGE: We live directly next to one of the borders of this site, at the end of the smaller Green Lane. We have had to dig a deeper ditch next to this field due to rain water filling and spilling out of this drainage ditch. We can see that the field becomes very boggy and are concerned about the standard of drainage the developers would put there. How will the current drainage points cope?

LOCAL SEWERAGE: The main Green Lane now becomes flooded and water runs down like a river after each heavy rain storm. Faeces and used toilet roll have seeped out of the drain and pushed up the cover on several occasions. Some tarmac from the road has also been pushed up. The council have repaired this and it has still happened again.
It smells and is a very unpleasant sight. If the local council are not repairing this to a standard where it does not happen again, how can they ensure drainage and sewerage will be sustainable for such a large increase in housing?

**THE INFRASTRUCTURE PROPOSED IS NOT ADEQUATE AND SUSTAINABLE**

The plans propose a cycle and pedestrian footpath to come off the Waterloo Farm site, directly on to the part of Green Lane with the leaked sewerage.

**I STRONGLY OBJECT TO ANY FURTHER FOOTPATH OR ROAD ACCESSING GREEN LANE.**

**TRAFFIC ON GREEN LANE**

This is a narrow road with currently much foot traffic, including a popular dog walking area. Horses are kept on either side of Green Lane and there are 2 dog day care facilities, all of which have to use Green Lane for access and exit.

There are no footpaths and it is too narrow to build them. A gas pipe runs down one side and a stream is on the other, which due to the level of REGULAR flooding down the road. It would be disastrous if the stream was filled in, as it’s vital for drainage in the area.

More local houses along Long Reach and Ockham Road North being allowed to use Green Lane as a cut through, would be dangerous.

The amount of pedestrians, horse riders, dog walkers and cars currently needing to use Green Lane is enough.

**I OBJECT TO MORE CARS AND PEDESTRIAN’S ACCESSING GREEN LANE. IN MY OPINION IT WOULD BECOME DANGEROUS FOR THOSE OF US, INCLUDING CHILDREN, HORSES AND DOGS WHO LIVE ON GREEN LANE AND USE IT DAILY.**

Site A40 - Waterloo Farm:

At the northern periphery of the village, this site has a northern link to Green Lane which could feasibly be improved to afford a safe and pleasing route for walkers and cyclists down to Long Reach and Ripley Lane beyond. The southern boundary backs onto Nightingale Crescent and Northcote Crescent but with no way through towards Horsley station, whereby the only feasible direct route is along the busy Ockham Road North, having a pavement on one side but again with no dedicated cycle way.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events that accompanies climate change. The “appropriate mitigation” suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt “exceptional circumstances”.

Policy A40 underestimates the problems of safe access and egress. Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A40 underestimates the problems of safe access and egress. Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly.

These problems are not confined to flooding and are not addressed by the proposal to extend the existing 30mph zone past the site access. Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum speeds of over 80mph. No traffic calming measures have been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glenesk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road’s increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course’s planning application to re-landscape its site using bulk waste transported from London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Please see below a summary of a number of concerns which I have in relation to the proposed removal of site A40 from the green belt:

Firstly as the access is shown on the proposed the site is actually in East Horsley and not West Horsley.

There is no safe access to this proposed site. The access proposed raises major Health & Safety issues. Even at present the close proximity of the railway bridge means access from driveways to Ockham Road North at this point is restrictive & dangerous in normal hours. This is exacerbated at peak hours of school and going & coming back from work times at which it becomes very dangerous and accidents have happened at this point.

The proposed site builds on land which is at the moment curbing the issue which already exists about local flooding which doesn’t just occur with heavy downpours but also with light rain showers – example pictures are available.

At this point Ockham Road North becomes dangerous as it floods beyond the curb height and as such pedestrians and cars are put in danger.

The flood issue also has a major impact on domestic drainage and means that toilets, sinks and bath water backs up and becomes a health & safety issue. This site will substantially increase the susceptibility of the local housing and infrastructure to the risk of flooding.

There is a lack of understanding of the area in relation to the description and therefore false criteria on which the draft has been proposed eg: The East vs West Horsley point above, the designation of Station parade is completely misleading and bears no resemblance to a few village shops and a small franchised convenience store and an infrastructure which can ill cope with existing residential need.

No-where in the plan has infrastructure been addressed. It is already an intolerably long wait to access the local GP’s and dentists at a base level. Nor is there any mention of the already inadequate road & pavement structure.

Local employment is minimal and the majority of the resident population have to travel to and from the village using either an already inadequate road system or public transport and no additional car parking which again is already limited.

Overall this proposed site does not take into account major flooding and infrastructure issues and as a consequence is at best not viable and at worst dangerous at a number of levels.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A40

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to the development of Waterloo Farm, Horsley

Planning permission for 3 dwellings was rejected in 2014

The land is regularly flooded and waterlogged

The area is categorised as a Paddock, with mature trees and wildlife.

There is insufficient access routes for households or emergency services.

120 dwellings would have massive impact on traffic on the Ockham Road

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Development of greenbelt land in the Horsleys (plots: Waterloo Farm, Manor Farm, East lane, Bell and Colville, Ockham Road North

1. Is the information on which the housing projects been made sound?

Population forecast form the ONS- recent data from the ONS (SNPP 2012) suggest that migration into the borough is much lower than the figures used when the Local Plan was compiled. In addition international migration accounts for between a half and two thirds of Guildford's population growth and it is this international migration that is now being discouraged by central government further reducing the need for such a large number of houses to be built. Therefore, proposed building should be adjusted likewise. Before development is allowed to encroach on greenbelt areas existing brownfield sites must be used and then an assessment as to the need for more houses made.

1. How will the proposed increase in houses affect the character of the Horsleys?

NPPF paragraph 158 states that "Each local planning authority should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area.” How have the Horsleys been defined as a Rural District Centre? The draft Local Plan states that Station Parade has a large supermarket. Surely Budgens cannot be described as a large supermarket, being classified under the Sunday Trading Act 1994 as a small shop or convenience store? The classification of the Horsley as Rural District Centre is flawed and as such must be amended and the impact of this classification on the local plan corrected.

In addition, the local plan proposes to increase the number of houses in the Horsleys by nearly 35%. How can such an increase in the number of houses preserve the character of the area? Such an increase will result in the villages no longer being villages.

1. Has sufficient provision been made for infrastructure and amenities?

- parking
- roads
- schools
- public transport
- medical facilities
- drainage

The local plan needs to consider the parts of a development needed in addition to houses. If a village or town were being built from scratch houses would form just a small proportion of the overall development. Other areas to be considered would include drainage, roads, schools, medical facilities, shops, parking. In my comments on the use of StMartin's Close site for development I have touched upon current demands on schools, drainage, parking- all of which will be further negatively impacted by allowing development of the greenbelt areas of the Horsleys.

Development of the greenbelt areas and the potential influx of people into the village will also place further demand on public transport. Horsley station is already very busy with trains being very full. The Horsley bus service is sporadic and often not at times or bus stops that are convenient or needed.

Greater numbers of people will also place demand on the local Medical Centre where booking an appointment that is not required as an emergency can be difficult.
More people will also mean more cars. The Horsleys are villages with roads that are typical of a village- being winding and narrow. These roads are already suffering from increased traffic flow and delivery lorries, becoming pot holed and of a poor standard. The roads are also used by other people. The Horsley are popular with cyclists, especially following their inclusion in the Olympic cycle route. On many of the roads visibility, due to the winding and narrow nature of the roads, is poor meaning that overtaking cyclists is often risky and dangerous. Further road users would make the roads more congested and dangerous. Many of the village roads have no pavements meaning that pedestrians have to walk along the narrow winding roads. More cars will deter pedestrians further adding to the number of cars on the road.

**Guildford Borough Council’s use of terminology**

How much control will GBC have over future development as the plan uses language where developers are "expected and should follow" what GBC say? This language is non directive. Surely developers must and should be required to comply with GBC directives on the houses built.

In conclusion, although there is a need for increased provision of housing in the borough I feel that the data on which the local plan has been based is flawed, meaning the conclusions based on these figures not sound. In addition, the plan has made no consideration as to retaining the character of the villages or infrastructure and amenities that a large development would need.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality now.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (East of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a “Theatre in the Woods” – making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has been adopted by cyclists as a permanent asset, including the annual Prudential cycle race. These and future examples of “positive planning” depend on protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing.
Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events that accompanies climate change. The “appropriate mitigation” suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt “exceptional circumstances”.

Policy A40 underestimates the problems of safe access and egress. Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly.

These problems are not confined to flooding and are not addressed by the proposal to extend the existing 30mph zone past the site access. Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum speeds of over 80mph. No traffic calming measures have been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glenesk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road’s increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course’s planning application to re-landscape its site using bulk waste transported from London.

Plot A40

I particularly object to developing the land, currently part of the curtilage of Waterloo Farm. The site is rural in character and enhances the setting of the historic farmhouse. This would be unacceptable backland development. The site is regularly waterlogged and floods (as does our back garden and the campsite). Houses on this site would further exacerbate drainage problems in this area. The main sewer which crosses the site would also constrain development. The settlement boundary along the rear boundaries of properties on Nightingale Crescent should be retained.

The amount of development proposed for East and West Horsley is out of proportion with the rest of the Borough. It is unbalanced and unfair to propose such a high level of housing in one small village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

A stables use the land in the northern half of this plot and clearly further erosion of land available for this sort of recreation puts further pressure on the provision of suitable land for the local population to indulge in healthy outdoor pursuits.

Access to these fields is quite restricted being already surrounded by existing housing. Access required for large vehicles for development would create considerable disruption. The loss of view and amenity provided to all these houses by being adjacent to the countryside would be of huge detriment to these residents who enjoy this outlook, myself included.

I am sure that within the Guildford Borough many more “brown field” and urban sites can be identified rather than creating huge development in the villages of Surrey.

Clearly there are other areas in West Horsley that are considered for development too. All of these areas carry some of the same ill-considered reasoning for development. Overall any large increase in development within the village would seriously strain the facilities and infra structure at present in place.

As a broad outline I object to the large scale increases in building that the Proposed Submission Plan suggests. My wife and I strongly disagree with the removal of the Green Belt Status from the villages of Surrey and in particular that of West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7537  Respondent: 11058913 / Tarn Stroud  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A40
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT ESPECIALLY TO POLICY A40:

This land is currently Green Belt land used for agriculture and should not be used for housing development. In addition, part of the land is a level 3 flood risk and Ockham Road North, to the east of the development is frequently awash with flowing water following heavy rain.

The winter stream flowing west to east along the southern end of Heatherdene and the school playing field as yet does not overflow in times of heavy rain. However, this stream is not shown in current Environment Agency maps used for planning drainage requirements.

Water seepage, pooling and flooding on Ockham Road North to the north of the railway bridge in East Horsley regularly poses a great hazard to pedestrians due to splashing from cars, coaches and lorries. As the road is not very wide, and pedestrian pavement is only on one side of the road, vehicles often pass very close to the pedestrian making the splashing hazard not just unpleasant but also dangerous, particularly for children. In winter, this stretch of Ockham Road North and the pedestrian pavement are often covered in black ice, even after dry weather, due to the water seepage onto the road and pavement.

This underlying geology of the area is an impermeable layer of clay only about one meter beneath the surface. The Local Plan provides no protection for the existing residents of Heatherdene and Ockham Road North that areas that do not currently flood will not become prone to flooding as a result of development on the adjacent site.

Safe access and egress at Site A40 unachievable, owing to the regular flooding of Ockham Road North to the north of the railway bridge and poor sight lines, narrow access to existing properties and inadequate pavements for elderly and schoolchildren.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2.1 Figure 1 shows the area of land owned by Mr and Mrs Neilson outlined in yellow. The land has been promoted as part of a wider development site which is outlined in red has been identified as a housing allocation for circa 120 units in the Proposed Submission Local Plan and is referred to as Land to the North of West Horsley, under policy A40.

2.2 A substantial part of the wider development site is owned by a developer in the form of Persimmon Homes. We have been in discussions with Persimmon Homes relating to the inclusion of their land within the allocation and there is a will on all sides to collaborate if that represents the best outcome for addressing the broader housing needs of the

2.3 The land to the west of the proposed allocation is heavily wooded and this mature landscape boundary is an important feature in containing the site from future sprawl. The woodland to the west of the proposed allocation might be too small to be used as formal SANGS land, however it could be made available to the public to assist with offsetting the perceived impact development may have on the Thames Basin SPA. It should therefore also be included as part of the allocation.

2.4 To the south west of the site is a lake, with housing development to the south eastern, eastern and northern boundaries. Mr and Mrs Neilson’s land parcel, and the wider site is therefore well contained both physically and visually.

2.5 The land currently lies within the Green Belt and adjoins the village of West Horsley (North). The site, along with all of the other proposed West Horsley allocation sites in the Proposed Submission Local Plan are within 400m to 5km of the Thames Basin Heaths SPA. The Proposed Submission Local Plan however states that Suitable Alternative Natural Green Space (SANGS) is likely to be available in the area.

2.6 The latest survey carried out by West Horsley Parish Council identified a local tolerance of up to 75 new dwellings in the village within the Local Plan. Assuming the entire proposed allocation site at Oakland Farm can be built out, it has the potential capacity for circa 120 units and therefore it could easily provide the required housing numbers within a single, self-contained site.

2.7 There is no relevant planning history for Mr and Mrs Neilson’s part of the identified allocation site beyond a certificate of lawful use or development for a small extension to an existing pool house. This does not affect the area being promoted for development.

2.8 The proposed allocation site has since been assessed as being Suitable, Available and Achievable in the SHLAA June 2014, Ref: 975, 2027, 1. It was also identified in the Proposed Submission Local Plan as a site allocation for new homes and was identified as a potential development area within the Green Belt and Countryside Study (GBCS) Ref: C14-A.

3 KEY CONSIDERATIONS

The Proposed Submission Local Plan document sets out the site in Policy A40. It identifies the key considerations as:

- Flood risk
- Surface water flood risk
- Access

FLOOD RISK

3.1 The Environmental Agency flood mapping identifies part of the overall site as being within Flood Zones 2 and 3, however only the very north east tip of Mr and Mrs Neilson’s land (being the position of the existing residential dwelling) is shown as being within Flood Zone 2 or 3.

3.2 Persimmon have however carried out their own flood modelling of the site and surrounding area and the results confirm that neither the site nor the access roads are within Flood Zone 2 or Figure 2 below shows the flood modelling carried out by Persimmon which clearly demonstrated that there is no flood risk to the site or the access roads:
3.3 Persimmon have confirmed that their own flood risk assessments stipulate:

‘flood risk as previously identified by the Environment Agency is not as was initially thought. Capita has rated the site as a ’4’ with regards to flood risk suitability. This score means that the site is of less concern with regards to flooding. The conclusions reached by Capita as part of this SFRA was that “area to the north east of the site is shown to be within the Flood Zone 3. Should development be avoided in these areas, and appropriate SuDS developed on site…..it is likely that the site could pass the technical part of the Exception Test”. The surrounding area of the site is predominately in Flood Zone 1 as identified by Capita therefore there is little or no flood risk with this.

In addition to the work undertaken by Capita, Persimmon has carried out its own detailed flood modelling for the site and the immediate surrounding area. This modelling was carried out on a worst case scenario and the outcome of this was that under this scenario, Ockham Road North and importantly the access into the site remains dry and is not subject to flooding. The modelling work also incorporated climate change allowances in line with newly released Environment Agency/DCLG guidance. This detailed modelling has clearly shown the Environment Agency’s mapped flood extents to be overestimating the actual scenario and further advances Capita’s assessments. Therefore, Persimmon are of the opinion that the unreliability of the Environment Agency data should not be used further and that the more detailed and up-to-date, site-specific modelling carried out as part of our assessments should be relied upon.’

3.4 The flood risk has been addressed through Persimmon’s flood risk modelling and assessment which will be submitted as part of their representations for the wider site.

3.5 It should be highlighted that Mr & Mrs Neilson’s land could be brought forward independently in any event as a stand-alone site.

ACCESS

3.6 Access was also identified as a key considerat Access is however not a risk to the deliverability of Mr and Mrs Neilson’s site as there are two existing vehicular access points that could serve the land parcel. The first is controlled by Mr and Mrs Neilson, and is the access off Green Lane which currently serves Oakland Farm. It should be noted that whilst Green Lane itself is a relatively narrow road, the Highways boundary extends significantly beyond the existing line of tarmacadam, and can easily be widened. All necessary upgrades would be made to the road, regarding widening and improving its surface, as well as the junction with Ockham Road North. The second is an existing vehicular right of way across the track running west off Ockham Road North, which is being proposed by Persimmon as the principal access to their site. Mr and Mrs Neilson’s land could therefore be accessed without the need for any land acquisition and is deliverable with or without the development of the wider allocation site.

3.7 The site is also well connected on foot, with a permissive path running adjacent to the west of the subject woodland, around the camp site, to Bens Wo This woodland is understood to have been planted in 2001 as a public amenity, with funding through the EU and DEFRA through the Countryside Stewardship Scheme. Further, there are extensive footpaths via Whitehall Lane, which is at the junction of Green Lane and Ockham Road North, being only some 250 yards from the property.

3.8 The site at Oakland Farm is also within walking distance to the station and both the Raleigh School and Glenesk Pre Prep. In addition it is located within close proximity to the nearest accessible natural and semi-natural greenspace, as identified in the East Horsley and West Horsley (North) Sustainability Assessment Walking Distance The site is located one mile away from the centre of East Horsley where much of the local facilities which can serve residents’ day-to-day needs are found. These facilities include a number of local shops, including a Budgens convenience store, a newsagents, post office, pharmacy and bank. The village hall lies to the rear of these shops and is easily accessible from the main high street. The main line rail station is also located close to the high street and this allows access to London Waterloo via a direct train which takes under an hour and includes stops at larger stations such as Leatherhead, Epsom, Wimbledon and Clapham Junction allowing access to large employment areas and facilitating onward travel.

3.9 The settlement hierarchy, published in May 2014 and used as part of the evidence base for the emerging Local Plan, notes that East Horsley has a population of 3,785 (2011) and is ranked as the 3rd most sustainable location within the
borough (out of 32). In addition to the highly rated sustainability of East Horsley, the site lies close to West Horsley which is ranked as the 13th most sustainable location within the borough (out of 32).

4 GREEN BELT

4.1 The final key restriction regarding the development of the proposed allocation site at Oakland Farm is its Green Belt. West Horsley is a medium sized village which was identified in the Local Plan Strategy Issues and Options to be removed from the Green Belt. The proposed allocation site is completely enclosed and as such the risk of future development sprawl is minimal.

4.2 There are 5 purposes to the Green Belt which have been set out below in relation to this proposed allocation site.

To check the unrestricted sprawl of large built-up areas

4.3 The proposed allocation site adjoins the medium sized village of West Horsley which is not considered to be a large built up. To the north, east and south east of the site is existing residential development. To the west and south is a mature tree belt and lake, forming natural barriers to future development sprawl. It is therefore considered that this site is not required to be in the Green Belt in order to prevent the village from sprawling.

To prevent neighbouring towns merging into one another

4.4 The nearest other settlement to the site is Ockham, some 1.25km away. West Horsley is currently detached from Ockham by Green Lane which runs along the north of the site, as well as a further 25km of open countryside and farms. To the west is Send Marsh, separated by 6.5km of open countryside as well as the A3 and further smaller roads. It is therefore the case that development of the proposed, well contained site, could have little if any impact in respect of the merging of neighbouring towns and there is therefore no necessity for the site to remain within the designation to support that aim.

To assist in safeguarding the countryside from encroachment

4.5 As set out in the two points above, the site is surrounded by existing residential development and a strip of mature woodland. Development of the site would therefore fill a gap in the pattern of existing residential development and would not encroach into the open countryside.

To preserve the setting and special character of historic towns

4.6 West Horsley is not considered to have any special or historic character. Paragraph 86 of the NPPF states that if the character of the village needs to be protected for reasons beyond its contribution to the openness of the Green Belt, ‘other means should be used, such as Conservation Area or normal development management policies, and the village should be excluded from the Green Belt.’ This section of the village is not considered to contribute significantly to the openness of the Green Belt and as such it should be excluded.

To assist in urban regeneration, by encouraging the recycling of derelict and other urban land

4.7 The West Surrey SHMA found that the objectively assessed need was 1,729 homes per annum for the region between 2013 and 2033, 693 of which are to be provided within the Guildford local planning area per annum. It is therefore necessary for the Local Planning Authority to consider a range of sites, both brownfield and green. Of course brownfield sites should be developed first, however the Council has recognised that the existing available brown field sites within the area are not sufficient to meet current housing requirements. There is therefore a clear indication that the Council will need to identify Greenfield land, much of which will be Green Belt if it is to meet housing requirements. On this basis there is a strong case for this identified site to be removed from the Green Belt to allow for beneficial development.

4.8 The proposed allocation site was identified in the SHLAA 2014 as having development potential for circa 114 flats or houses on the basis of a density of 14 dp. It was identified in the Proposed Submission Local Plan as an allocation site for approximately 120 dwellings.
5 CONCLUSION

5.1 This planning appraisal has been carried out by the professional planning team at Batcheller Monkhouse on behalf of Mr and Mrs Neilson, regarding the land at Oakland Farm, Green Lane, Ockham Road North, West Horsley, to be submitted as formal representations to the Proposed Submission Local Plan Consultation.

5.2 The land at Oakland Farm has been identified as part of a wider site for allocation in the Guildford Proposed Submission Local Plan (policy A40), much of which is owned by Persimmon. The Proposed Submission Local Plan raises key considerations for the site which include flood risk and access. It is considered that both these matters have been addressed in this planning appraisal, with reference made to an independent flood risk assessment and flood modelling commissioned by Persimmon, and confirmation that the vehicular access is already secure. The owners of Oakland Farm are in ongoing discussions with Persimmon, as well as a number of other builders who are keen and willing to develop Oakland Farm.

5.3 This appraisal considers the site in the context of the 5 purposes of the Green Belt and finds that it makes no contribution to the openness of the Green Belt, nor does it contribute to the purposes of including land within the des. The land should therefore remain as an allocation in the final version of the Local Plan and should be removed from the Green Belt as has been proposed. The site would provide a range of good quality houses within the next 1-5 years in a suitable location with minimal visual impact. There is minimal risk of outward expansion of the site in the future, and the site is capable of providing the full housing requirement for West Horsley.

5.4 It is therefore considered that this land is the preferred allocation site for the village and should remain as such moving forward to the final version of the Local Plan. The owners will continue to promote the site for residential development in the immediate term and have substantial developer interest.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. INTRODUCTION

1.1 This planning appraisal has been carried out by Batcheller Monkhouse on behalf of Mr and Mrs Neilson, to provide an up to date site assessment of land at Oakland Farm, Green Lane, Ockham Road North, West Horsley in the context of the Guildford Borough Proposed Submission Local Plan.

1.2 The land at Oakland Farm has been identified for allocation in the Guildford Proposed Submission Local Plan as part of a wider site referred to as Land to the North of West Horsley, under policy A40. The purpose of this report is to address why this proposed allocation site should continue to be included in the final version of the Local Plan and why the site should be removed from the Green Belt.

1.3 This document provides a brief description of the site, designations and restrictions, a brief review of key considerations raised in the Proposed Submission Local Plan and an assessment of the contribution to the purposes of the Green Belt. The previous representations which were submitted to the Council in March also included an assessment of the site in relation to competing sites also identified as housing allocations in the Draft Local Plan.

2. SITE AND SURROUNDINGS
2.1 Figure 1 shows the area of land owned by Mr and Mrs Neilson outlined in yellow. The land has been promoted as part of a wider development site which is outlined in red. The wider area outlined in red has been identified as a housing allocation for circa 120 units in the Proposed Submission Local Plan and is referred to as Land to the North of West Horsley, under policy A40.

2.2 A substantial part of the wider development site is owned by a developer in the form of Persimmon Homes. We have been in discussions with Persimmon Homes relating to the inclusion of their land within the allocation and there is a will on all sides to collaborate if that represents the best outcome for addressing the broader housing needs of the borough.

2.3 The land to the west of the proposed allocation is heavily wooded and this mature landscape boundary is an important feature in containing the site from future sprawl. The woodland to the west of the proposed allocation might be too small to be used as formal SANGS land, however it could be made available to the public to assist with offsetting the perceived impact development may have on the Thames Basin SPA. It should therefore also be included as part of the allocation. There is a permissive path adjoining the woodland.

2.4 To the south west of the site is a lake, with housing development to the south eastern, eastern and northern boundaries. Mr and Mrs Neilson’s land parcel, and the wider site is therefore well contained both physically and visually.

2.5 The land currently lies within the Green Belt and adjoins the village of West Horsley (North). The site, along with all of the other proposed West Horsley allocation sites in the Proposed Submission Local Plan are within 400m to 5km of the Thames Basin Heaths SPA. The Proposed Submission Local Plan however states that Suitable Alternative Natural Green Space (SANGS) is likely to be available in the area.

2.6 The latest survey carried out by West Horsley Parish Council identified a local tolerance of up to 75 new dwellings in the village within the Local Plan period. Assuming the entire proposed allocation site at Oakland Farm can be built out, it has the potential capacity for circa 120 units and therefore it could easily provide the required housing numbers within a single, self-contained site.

2.7 There is no relevant planning history for Mr and Mrs Neilson’s part of the identified allocation site beyond a certificate of lawful use or development for a small extension to an existing pool house. This does not affect the area being promoted for development.

2.8 The proposed allocation site has since been assessed as being Suitable, Available and Achievable in the SHLAA June 2014, Ref: 975, 2027, 13. It was also identified in the Proposed Submission Local Plan as a site allocation for new homes and was identified as a potential development area within the Green Belt and Countryside Study (GBCS) Ref: C14-A.

3. KEY CONSIDERATIONS

The Proposed Submission Local Plan document sets out the site in Policy A40. It identifies the key considerations as:

- Flood risk
- Surface water flood risk
- Access

FLOOD RISK

3.1 The Environmental Agency flood mapping identifies part of the overall site as being within Flood Zones 2 and 3, however only the very north east tip of Mr and Mrs Neilson’s land (being the position of the existing residential dwelling) is shown as being within Flood Zone 2 or 3.

3.2 Persimmon have however carried out their own flood modelling of the site and surrounding area and the results confirm that neither the site nor the access roads are within Flood Zone 2 or 3. Figure 2 below shows the flood modelling carried out by Persimmon which clearly demonstrated that there is no flood risk to the site or the access roads:

3.3 Persimmon have confirmed that their own flood risk assessments stipulates:
‘flood risk as previously identified by the Environment Agency is not as was initially thought. Capita has rated the site as a ‘4’ with regards to flood risk suitability. This score means that the site is of less concern with regards to flooding. The conclusions reached by Capita as part of this SFRA was that “area to the north east of the site is shown to be within the Flood Zone 3. Should development be avoided in these areas, and appropriate SuDS developed on site…..it is likely that the site could pass the technical part of the Exception Test”. The surrounding area of the site is predominately in Flood Zone 1 as identified by Capita therefore there is little or no flood risk with this.

In addition to the work undertaken by Capita, Persimmon has carried out its own detailed flood modelling for the site and the immediate surrounding area. This modelling was carried out on a worst case scenario and the outcome of this was that under this scenario, Ockham Road North and importantly the access into the site remains dry and is not subject to flooding. The modelling work also incorporated climate change allowances in line with newly released Environment Agency/DCLG guidance. This detailed modelling has clearly shown the Environment Agency’s mapped flood extents to be overestimating the actual scenario and further advances Capita’s assessments. Therefore, Persimmon are of the opinion that the unreliability of the Environment Agency data should not be used further and that the more detailed and up-to-date, site-specific modelling carried out as part of our assessments should be relied upon.’

3.4 The flood risk has been addressed through Persimmon’s flood risk modelling and assessment which will be submitted as part of their representations for the wider site.

3.5 It should be highlighted that Mr & Mrs Neilson’s land could be brought forward independently in any event as a stand-alone site.

ACCESS

3.6 Access was also identified as a key consideration. Access is however not a risk to the deliverability of Mr and Mrs Neilson’s site as there are two existing vehicular access points that could serve the land parcel. The first is controlled by Mr and Mrs Neilson, and is the access off Green Lane which currently serves Oakland Farm. It should be noted that whilst Green Lane itself is a relatively narrow road, the Highways boundary extends significantly beyond the existing line of tarmac, and can easily be widened. All necessary upgrades would be made to the road, regarding widening and improving its surface, as well as the junction with Ockham Road North. The second is an existing vehicular right of way across the track running west off Ockham Road North, which is being proposed by Persimmon as the principal access to their site. Mr and Mrs Neilson’s land could therefore be accessed without the need for any land acquisition and is deliverable with or without the development of the wider allocation site.

3.7 The site is also well connected on foot, with a permissive path running adjacent to the west of the subject woodland, around the camp site, to Bens Wood. This woodland is understood to have been planted in 2001 as a public amenity, with funding through the EU and DEFRA through the Countryside Stewardship Scheme. Further, there are extensive footpaths via Whitehall Lane, which is at the junction of Green Lane and Ockham Road North, being only some 250 yards from the property.

3.8 The site at Oakland Farm is also within walking distance to the station and both the Raleigh School and Glensk Pre Prep. In addition it is located within close proximity to the nearest accessible natural and semi-natural greenspace, as identified in the East Horsley and West Horsley (North) Sustainability Assessment Walking Distance Plan. The site is located one mile away from the centre of East Horsley where much of the local facilities which can serve residents’ day-to-day needs are found. These facilities include a number of local shops, including a Budgens convenience store, a newsagents, post office, pharmacy and bank. The village hall lies to the rear of these shops and is easily accessible from the main high street. The main line rail station is also located close to the high street and this allows access to London Waterloo via a direct train which takes under an hour and includes stops at larger stations such as Leatherhead, Epsom, Wimbledon and Clapham Junction allowing access to large employment areas and facilitating onward travel.

3.9 The settlement hierarchy, published in May 2014 and used as part of the evidence base for the emerging Local Plan, notes that East Horsley has a population of 3,785 (2011) and is ranked as the 3rd most sustainable location within the borough (out of 32). In addition to the highly rated sustainability of East Horsley, the site lies close to West Horsley which is ranked as the 13th most sustainable location within the borough (out of 32).

4. GREEN BELT
4.1 The final key restriction regarding the development of the proposed allocation site at Oakland Farm is its Green Belt location. West Horsley is a medium sized village which was identified in the Local Plan Strategy Issues and Options to be removed from the Green Belt. The proposed allocation site is completely enclosed and as such the risk of future development sprawl is minimal.

4.2 There are 5 purposes to the Green Belt which have been set out below in relation to this proposed allocation site.

To check the unrestricted sprawl of large built-up areas

4.3 The proposed allocation site adjoins the medium sized village of West Horsley which is not considered to be a large built up area. To the north, east and south east of the site is existing residential development. To the west and south is a mature tree belt and lake, forming natural barriers to future development sprawl. It is therefore considered that this site is not required to be in the Green Belt in order to prevent the village from sprawling.

To prevent neighbouring towns merging into one another

4.4 The nearest other settlement to the site is Ockham, some 1.25km away. West Horsley is currently detached from Ockham by Green Lane which runs along the north of the site, as well as a further 1.25km of open countryside and farms. To the west is Send Marsh, separated by 6.5km of open countryside as well as the A3 and further smaller roads. It is therefore the case that development of the proposed, well contained site, could have little if any impact in respect of the merging of neighbouring towns and there is therefore no necessity for the site to remain within the designation to support that aim.

To assist in safeguarding the countryside from encroachment

4.5 As set out in the two points above, the site is surrounded by existing residential development and a strip of mature woodland. Development of the site would therefore fill a gap in the pattern of existing residential development and would not encroach into the open countryside.

To preserve the setting and special character of historic towns

4.6 West Horsley is not considered to have any special or historic character. Paragraph 86 of the NPPF states that if the character of the village needs to be protected for reasons beyond its contribution to the openness of the Green Belt, ‘other means should be used, such as Conservation Area or normal development management policies, and the village should be excluded from the Green Belt.’ This section of the village is not considered to contribute significantly to the openness of the Green Belt and as such it should be excluded.

To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

4.7 The West Surrey SHMA found that the objectively assessed need was 1,729 homes per annum for the region between 2013 and 2033, 693 of which are to be provided within the Guildford local planning area per annum. It is therefore necessary for the Local Planning Authority to consider a range of sites, both brownfield and green field. Of course brown field sites should be developed first, however the Council has recognised that the existing available brown field sites within the area are not sufficient to meet current housing requirements. There is therefore a clear indication that the Council will need to identify Greenfield land, much of which will be Green Belt if it is to meet housing requirements. On this basis there is a strong case for this identified site to be removed from the Green Belt to allow for beneficial development.

4.8 The proposed allocation site was identified in the SHLAA 2014 as having development potential for circa 114 flats or houses on the basis of a density of 14 dph. It was identified in the Proposed Submission Local Plan as an allocation site for approximately 120 dwellings.

5. CONCLUSION

5.1 This planning appraisal has been carried out by the professional planning team at Batcheller Monkhouse on behalf of Mr and Mrs Neilson, regarding the land at Oakland Farm, Green Lane, Ockham Road North, West Horsley, to be submitted as formal representations to the Proposed Submission Local Plan Consultation.
5.2 The land at Oakland Farm has been identified as part of a wider site for allocation in the Guildford Proposed Submission Local Plan (policy A40), much of which is owned by Persimmon. The Proposed Submission Local Plan raises key considerations for the site which include flood risk and access. It is considered that both these matters have been addressed in this planning appraisal, with reference made to an independent flood risk assessment and flood modelling commissioned by Persimmon, and confirmation that the vehicular access is already secure. The owners of Oakland Farm are in ongoing discussions with Persimmon, as well as a number of other builders who are keen and willing to develop Oakland Farm.

5.3 This appraisal considers the site in the context of the 5 purposes of the Green Belt and finds that is makes no contribution to the openness of the Green Belt, nor does it contribute to the purposes of including land within the designation. The land should therefore remain as an allocation in the final version of the Local Plan and should be removed from the Green Belt as has been proposed. The site would provide a range of good quality houses within the next 1-5 years in a suitable location with minimal visual impact. There is minimal risk of outward expansion of the site in the future, and the site is capable of providing the full housing requirement for West Horsley.

5.4 It is therefore considered that this land is the preferred allocation site for the village and should remain as such moving forward to the final version of the Local Plan. The owners will continue to promote the site for residential development in the immediate term and have substantial developer interest.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In particular I should like to OBJECT to the Waterloo Farm site (policy A40), given the impact that this will have on Green Lane as a single track road wholly unsuited to the increased volume of traffic that will inevitably result from it being used as a cut through by the residents of the new homes, together with the more general impact on the quiet rural character of the immediate vicinity. I am also concerned by the build-up of traffic on Ockham Rd North that will result from those coming from the A3 queuing to turn right into the site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings
I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.
After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

<tr>
<td>This comment refers directly to the draft allocation Policy A40: Land to the north of West Horsley.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>This policy remains unchanged and Persimmon Homes support this. The majority of the land included within the draft allocation is land owned by Persimmon Homes. Persimmon are the UK's largest house builder with the resources and desire to build out this site. The land included within this policy remains available, developable and deliverable within the next five years. Persimmon are however concerned by the inclusion of the element of self-build and custom house building plots within the allocation. The inclusion of this is not based on any evidence formally published which suggests that there is a need or demand for these plots on this site. Persimmon Homes fully intend to build out the dwellings themselves using their own resources. It is unclear as to where these self build and custom plots would be located.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>This site is proposed to deliver a significant proportion of local housing needs within West Horsley and is a key site for development. It is unclear as to the level of demand in the local area for custom and self-builders and the Council register is not made public. Persimmon Homes have not been approached regarding the provision of self-build and custom plots on their owned land.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Persimmon would request that the reference to the custom house building and selfbuild plots are removed from this policy as the inclusion is unjustified. The inclusion of this will also jeopardise the delivery of a logical, sensitive housing development within West Horsley which will provide a suitable quantum of development, including affordable homes, in an area where this is much needed.</td>

OBJECTION TO REMOVE THE HORSLEYS FROM THE GREEN BELT AND SPECIFICALLY TO THE WATERLOO FARM PROPOSED SITE

I have recently moved into the area, and did so because of the countryside view open to the rear of my property, being the paddock of Waterloo Farm. I had no idea that within a matter of a few months I would be facing the prospect of potentially 120 houses being built to the rear of my property.

I would like to object to this potential site, as it would affect my privacy and light to the rear of my property. This area already suffers from drainage problems and the property to the rear is currently designated paddock. It would also majorly devalue my property as it is the privacy, light and view that I bought my home for. We also have a multitude of wildlife to the rear of the property. Deer often venture into my garden, as well as pheasants, rabbits and many birds. Bats can often be seen in the early evening sky. I seriously doubt this would occur if the paddocks and open land are replaced by new homes.

Horsley is a quiet country village, and with the amount of new homes you hope to build, this will no longer be the case. This is not why myself, and many others, have moved into the area.

I do not believe that the local infrastructure can cope with the numbers of new houses you propose. The schools are full, roads in poor condition, medical facilities stretched, drainage in this area is extremely poor and there is little parking available already.

I WANTED TO ADD THE FOLLOWING TO MY OBJECTION BELOW:

I have now discovered that the land behind me (Waterloo Farm) had planning permission refused by the Council in 2014 for three detached houses to be built on my boundary for the following reasons:

R14/P/00012 on 27 Feb 2014:

THE PROPOSED DEVELOPMENT OF THREE DWELLINGS HAS THE POTENTIAL TO INCREASE THE RISK OF FLOODING IN AN AREA WITH A HIGH RISK OF SURFACE WATER FLOODING. NO INFORMATION HAS BEEN SUBMITTED TO DEMONSTRATE HOW THE DEVELOPMENT WOULD SUCCESSFULLY MITIGATE AGAINST FLOODING. THIS IS CONTRARY TO POLICY AND G1(6) OF THE GUILDFORD BOROUGH LOCAL PLAN 2003 (AS SAVED BY CLG DIRECTION ON 24/9/07) AND GUIDANCE CONTAINED IN THE NATIONAL PLANNING POLICY FRAMEWORK.

Further this site is constrained by:

- The main sewer along the campsite boundary.
- Sewers and surface water sewers, from Nightingale Crescent crossing the site.
- Flooding and waterlogged ground.
- Existing mature trees on the site and along the boundaries.

I would like to add that with recent weather which has included torrential rain and storms, this water runs all the way down Nightingale Crescent into my garden and literally floods the area around my home. On occasion we have been unable to leave our front door without wellingtons because of the pond that appears. Already this is a problem and will be even moreso if this development occurs.

The inclusion of this triangle of land for such a small number of new houses, would have very little impact on your housing figures. It would result in the loss of the Green Belt and create undesirable back land development behind Waterloo Farm, which I have been advised is an important historic building.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1452  Respondent: 15323041 / Jane Doherty  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A40

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

The four policy sites are all located within the Green Belt. One is a partly brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these settlement boundary movements appear to me highly questionable and in no way to meet the requirements of the NPPF that such boundary movements are only to be made in ‘exceptional circumstances’. These movements clearly represent a deliberate
pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, I consider these proposed movements in settlement boundaries to be invalid.

These proposals are also contrary to the principles of the Metropolitan Green belt. West Horsley represents one of the first 'lines of defence' against London urban encroachment outside of the M25 circle. Yet these policies will eliminate a significant part of this defence as they seek to expand the boundaries of this village and fill-in every bit of green space within this rural setting.

It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, I OBJECT to the site allocation policies A37, A38, A40 and A41.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2331  Respondent: 15385601 / Richard Fletcher  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to housing at Site A40, particularly the back land site to the SW of Waterloo Farm.

This triangle of land is constrained by:

- the main sewer along the campsite boundary
- sewers and surface water sewers, from Nightingale Crescent crossing the site
- flooding and waterlogged ground
- existing mature trees on site and along its boundaries

The inclusion of this land, for two or three houses, would have very little impact on the Council’s housing figures, but would mean the loss of the Green Belt and create undesirable back land development, which would adversely affect the character and setting of Waterloo Farm, an important local historic building. The existing ‘settlement boundary’ along the rear boundaries of Nightingale Crescent should remain.

The Council should also note that it refused an application for 3 houses here in 2014.

One of the reasons for refusal of outline planning permission for the erection of three detached dwellings (access only to be considered). R14/P/00012 on 27 Feb 2014 was:

The proposed development of three dwellings has the potential to increase the risk of flooding in an area with a high risk of surface water flooding. No information has been submitted to demonstrate how the development would successfully mitigate against flooding. This is contrary to policy and G1(6) of the Guildford Borough Local Plan 2003 (as saved by CLG Direction on 24/09/07) and guidance contained in the National Planning Policy Framework.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
To whom it may concern,

We would like to STRONGLY OBJECT to the above proposed development.

We visit Horsley all the time because of the countryside feel and incidentally have friends who overlook the paddock of Waterloo Farm. We are disgusted that she will face the prospect of looking at 120 new houses.

It will undoubtedly create further noise pollution as well as affecting the light of many families’ homes as well as the privacy.

I am sure the roads & infrastructure of the area would undoubtedly not be able to cope either.

Horsley countryside preservation society. My concerns for the Horsleys and objections.

- Objections to removing Green Belt.
1. Loss of countryside which provides recreation and space for our children to connect with nature, so vital in mental health in this electronic age.
2. Such a large increase in population- 533 new houses- will increase traffic congestion and also impact on rail services locally.
3. The suggested increase in land available, noted in ‘extension of boundaries’ clause, must be [scraped] on- an invidious practice our supermarkets indulge in.
4. The housing plan must include downsize and affordable houses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1.7 Detailed Planning permission, since lapsed, was granted in 2010 (Ref 10/P/01550) for conversion of the barn to two residential units. An outline planning application was made for 3 dwellings at the southern end of the site in 2014 (Ref 14/P/00012). The application was refused essentially on the grounds of policy (Green Belt) It is clear that GBC have considered the Site suitable for residential development albeit in the event of a change of current policy towards the Green Belt.

1.8 The Site is included in the draft emerging Local Plan as a housing allocation of 120 units as part of a wider allocation including land held by Persimmon Homes. Persimmon Homes are also submitting a Representation for Policy A40. The Site has been promoted through the Local Plan process since 2008 and we are very pleased to see it included as part of a draft allocation and strongly support this.

1.9 The Site is surrounded by immediate residential development. The argument for sustainable development is enhanced by the existing established housing that encircles Policy A40, and which runs along Green Lane, Ockham Road North and Nightingale Avenue.

1.10 The Site is sustainable, available and deliverable and can provide for housing within the next five years to meet GBC short term need.

1.11 The proposed adjustment of the Settlement Boundary, as it effects Waterloo Farm, could be described as “rounding off” and would complement a nucleated pattern of development appearing as a natural, unobtrusive extension to the existing boundary.

2.0 HOUSING AND POLICY CONTEXT

Guildford BC planning context & housing numbers

2.1 This representation is in response to the Regulation 19 consultation phase for the pre-submission version of the draft Local Plan. WYG are pleased to have been given the opportunity to make representations on this concerning the Site and general planning matters within the Borough. WYG are also pleased that Guildford BC has acknowledged the significant challenges that the borough faces in delivering sufficient housing to meet its needs. The previous interim housing figure of 322 dwellings per annum agreed in May 2012 did not take account of up to date assessments of housing need and therefore was not NPPF compliant. The reliance on this figure has meant that Guildford BC has significantly under-delivered on their housing requirements over the past five years as shown in the below table:

<table>
<thead>
<tr>
<th>Year</th>
<th>Net completions</th>
</tr>
</thead>
<tbody>
<tr>
<td>10/11</td>
<td>190</td>
</tr>
<tr>
<td>11/12</td>
<td>262</td>
</tr>
<tr>
<td>12/13</td>
<td>234</td>
</tr>
<tr>
<td>13/14</td>
<td>137</td>
</tr>
<tr>
<td>14/15</td>
<td>242</td>
</tr>
</tbody>
</table>

2.2 As the housing completions above show, Guildford has not only been under-delivering against the now up-to-date Objectively Assessed Need (OAN) but there has also been consistent under-delivery against the interim housing target.

2.3 The most recently produced Annual Monitoring Report (AMR), published in October 2015 for the period 2014/2015 showed that net completions of dwellings in the borough for this period was 242 and that the majority of homes completed in this period are on sites of under 20 homes. As the AMR notes:
“The number of new homes completed this year (2014/15) is still lower than required to meet our objectively assessed need…contributes to a growing deficit of new homes”.

2.4 The recommendation within the AMR following this states that:

“Housing provision is currently restricted by the lack of available and deliverable development land in the borough….delivery rate is only likely to increase when larger areas of land are suitable and available for development”.

This shows the necessity for suitable and available sites to be considered and this should apply to all sites within the borough that meet this criteria. Our client is the landowner of Waterloo Farm and the Site is available for development. We have set out below the reasons as to why the site should be considered suitable and deliverable in order to assist in the supply of land to contribute to meeting the chronic housing needs in the Borough. Consideration should be given to the Site as suitable and available regardless of its designations.

Objectively Assessed Need

2.5 Guildford Borough has an identified (OAN) of 693 dwellings per annum following the conclusions of the West Surrey Strategic Housing Market Assessment (SHMA) produced in September 2015 by GL Hearn. This assessment was carried out as part of the Housing Market Area (HMA) known as West Surrey which included Waverley and Woking in addition to Guildford.

2.6 The most recent population projections produced by Office of National Statistics (ONS) shows that by 2037, the population of Surrey is expected to increase by over 200,000. This increase is anticipated to be greater than shown by the 2012 population figures. The 2012 figures informed the SHMA which in turn has provided the basis around which the housing requirement for the new Local Plan is formed. It can be expected that a large proportion of this increase will be in the West Surrey HMA due to its proximity to London, strong rail connections and reputation as being part of the commuter belt and a desirable place to live. It is on this basis that we would question the validity of the figures and believe that the OAN to inaccurate and should be revised upwards taking into account the increases based on the 2014 projections as opposed to the 2012 figures. This should, in turn, mean that the housing requirements in the new Local Plan should also be revised upwards and the identification of other sites for development should be considered as part of this process.

Five-year supply of deliverable housing land

2.7 Paragraph 47 of the NPPF states that there is a requirement for Local Planning Authorities (LPA) to:

“Identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements with an additional buffer of 5%....where there has been a record of persistent under-delivery of housing, LPAs should increase the buffer to 20%”.

2.8 It has been established that GBC cannot demonstrate a robust five year supply of deliverable housing land and at best the Council can show 2.5 years supply whilst at worst this drops to 1.4 years. It is therefore clear that without significantly more available land, Guildford cannot expect to be able to show a five year supply. The NPPF para 83 states that “Green Belt boundaries should only be altered in exceptional circumstances”. However, as the site is surrounded by development, and is in many respects an area of “washed over” Green Belt, we conclude that the site should be looked on favourably as a suitable development site in the 0-5 year time frame.

Housing requirements within new Local Plan (2013-2033)

2.9 The pre-submission version of the draft Local Plan makes provision for the delivery of 13,860 new homes over the plan period (2013-2033). This equates to 693 dwellings per annum which matches the identified housing need through the SHMA. The draft Local Plan states that:

“The delivery of new homes is expected to increase over the plan period, reflective of timescales associated with delivery of strategic sites”.
The draft Local Plan sets out the housing delivery in different tranches as below:

<table>
<thead>
<tr>
<th>Year</th>
<th>Housing Number</th>
<th>Year</th>
<th>Housing Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>2018/2019</td>
<td>500</td>
<td>2026/2027</td>
<td>700</td>
</tr>
<tr>
<td>2019/2020</td>
<td>550</td>
<td>2027/2028</td>
<td>700</td>
</tr>
<tr>
<td>2020/2021</td>
<td>600</td>
<td>2028/2029</td>
<td>785</td>
</tr>
<tr>
<td>2021/2022</td>
<td>600</td>
<td>2029/2030</td>
<td>790</td>
</tr>
<tr>
<td>2022/2023</td>
<td>700</td>
<td>2030/2031</td>
<td>790</td>
</tr>
<tr>
<td>2023/2024</td>
<td>700</td>
<td>2031/2032</td>
<td>790</td>
</tr>
<tr>
<td>2024/2025</td>
<td>700</td>
<td>2032/2033</td>
<td>790</td>
</tr>
<tr>
<td>2025/2026</td>
<td>700</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.11 The above shows that there is proposed to be an increasing level of delivery over time as the plan progresses through the plan period. On this basis, to ensure the minimum housing requirements are achieved, over the first five years of the plan an average of 693 dwellings per annum are to be delivered. This raises an immediate concern given that GBC cannot demonstrate a five year land supply of any better than 2.5 years. As the net completions table also shows, the first two years of the plan period 2013/14 and 2014/15 have delivered significantly fewer than 693 dwellings per annum. Therefore it is vital that existing allocations in the draft Local Plan are retained and that those which are suitable and deliverable, particularly within the near future, such as the 120 deliverable units in allocation A40 at Waterloo Farm, remain within the Plan and are supported in coming forward as soon as possible within the 0-5 year time frame.

3.0 JUSTIFICATION FOR THE ALLOCATION

Horsley in Plan Making

3.1 The site was identified within the previous emerging Local Plan which was released in 2014. The site has been promoted throughout the development of the emerging Local Plan process and previous representations for this site were submitted in September 2014 as part of the Local Plan consultation under regulation 18 (attached as Appendix A for your information). In addition, the proposed development of part of the Site has been the subject of a formal Outline application submitted by Alliance Planning (now part of WYG) for 3 houses (reference 14/P/00012). This application was refused at the time for 4 reasons. Reason 1 was due to the site location, outside of any housing allocation and within the Green Belt, and is the subject of this and the previous representations. Reasons 2-4 relate to technical matters and developer contributions which could all be overcome in any future application submission.

3.2 Importantly, the refusal raised no issues in relation to:

- Highways and Transport
- Residential Amenity
- Mains Drainage and Utilities Provision
- Trees and Vegetation; or
- Ecology.

Senior Planning Officers (Policy) visited the site and walked the boundaries in March 2014. Details of discussions are included as part of Appendix C.

3.3 The emerging Local Plan, through the draft strategy and sites document, has allocated the land at Wisley Airfield for a mixed use development, including the provision of up to 2068 dwellings. The recently refused planning application (planning ref: 15/P/00012) has shown the difficulty in achieving a consent through a local decision and a reliance on a possible determination through appeal. This creates a great deal of uncertainty as to whether the anticipated housing as part of this proposed development can be delivered in a timely manner and therefore contribute to the Borough’s pressing needs.
housing need. Therefore the reliance on such a site should be limited. It is possible that up to 2100 dwellings may have to be delivered elsewhere in the borough. We recommend therefore that suitable nearby sites should be taken forward where there is a clear ability to deliver housing numbers. This would apply to the site at Ockham Road North. We therefore recommend that the Council should consider all sites that are considered suitable and deliverable and this particular site is one which meets these criteria. We strongly suggest the allocation should remain when taking the pre-submission plan to examination with the existing quantum of development as identified. If however, the Council decides not to allocate this wider site, the Waterloo Farm site should in any case be included in the settlement boundary, as it is already enclosed on all sides.

Access

3.4 There is a suitable road access to the site, which currently serves the Caravan site, Waterloo Farm and Lake and Shepherd Cottages, the additional traffic generation and pedestrian footfall for a small number of dwellings would not result in any transport concerns. The existing access/egress into the site is therefore considered to be appropriate. As part of the wider allocation, it is our understanding that suitable upgrades will be made to both the access road and the junction with Ockham Road North, where necessary to accommodate 120 units or the existing road would be suitable with minor improvement if the Waterloo Farm site only is allocated (included within the settlement boundary, excluded from the Green Belt).

Flood Risk

3.5 Previous concerns have been raised concerning flooding matters. The previous representation for the regulation 18 was accompanied by a Flood Risk Assessment prepared by Peter Brett Associates see Appendix B. Persimmon Homes have conducted further extensive work regarding this aspect which has been submitted as part of their representation for the site, which concludes that:

“The modelling work also incorporated climate change allowances in line with newly released Environment Agency/DCLG guidance. This detailed modelling has clearly shown the Environment Agency’s mapped flood extents to be overestimating the actual scenario…”

Their modelling further demonstrates that suitable mitigation can be provided onsite to overcome this technical matter lowering the flood risk on the site and therefore the principle of development, and therefore a deliverable allocation on this site should be considered as appropriate, notwithstanding the previous refusal.

Sustainability

3.6 The site is located a short walk from the centre of Horsley and situated alongside existing residential development. The site represents a logical infilling of available land to the rear of Nightingale Avenue to the south. Para 14 of the NPPF states that a presumption in favour of sustainable development is at the heart of planning, which should be seen as a golden thread running through both planmaking and decision-taking. There is an existing wide footway running along Ockham Road North which provides a safe pedestrian route that is used by a large number of people to access the centre of east Horsley.

3.7 The settlement hierarchy, published in May 2014 and used as part of the evidence base for the emerging Local Plan, notes that East Horsley has a population of 3,785 (2011) and is ranked as the 3rd most sustainable location within the borough (out of 32). In addition to the highly rated sustainability of East Horsley, the site lies close to West Horsley which is ranked as the 13th most sustainable location within the borough (out of 32).

3.8 The site is located less than a mile away from the centre of East Horsley where many of the local facilities which can serve residents’ day-to-day needs are found. The main line rail station is also located close to the high street and this allows good access to London Waterloo via a train service which takes under an hour and includes stops at larger stations such as Leatherhead, Epsom, Wimbledon, Clapham Junction (east) and Guildford (west); allowing access to large employment areas and facilitating onward travel.

3.9 Raleigh Primary, Glenesk Preparatory and Montessori Nursery are within 1/2 mile radius. Cranmore Nursery and Preparatory is within 2 miles. These schools provide suitable education for children up to the age of 11 and secondary
school education is provided by Howard of Effingham and Manor School which are within 2 miles of the site in nearby Effingham. We note that Raleigh School is also within the draft allocation to be enlarged and relocated to Policy A41. This proposal is one of few infrastructure projects being considered as part of the plan and we are also in support of this much needed facility.

3.10 The Site lies on Ockham Road North exactly midway (some 2 miles) between direct access to the A3 etc and the A246 (Guildford /Leatherhead/Epsom). These two direct road access points ensure high sustainability of the site and allow further access on to the M25 road network which links to Heathrow and Gatwick airports in addition to the wider national strategic road network through the M3, M4 and M40 motorways. This allows for the development to have a suitable mix of transport options through either using the strategic road network or utilising the train line. Access to the train line is provided by a wide footway and the road from the site down into East Horsley is 30 mph and is considered to be safe for all to use. The Infrastructure Delivery Plan (IDP) states that there are to be additional highway improvements made within the West and East Horsley areas through a traffic management and environmental improvement scheme which is to planned to be delivered between 2019 and 2023. This would further enhance the highway safety with the local area through traffic calming measures as well as ensuring the character of the two areas remains as present.

3.11 The development of this small part of site A40 for several units would not require the highway works to competed first, as such this section of the site should be considered as deliverable within the 0-5 year time frame. For the wider site there would be the opportunity to contribute to the traffic calming measures by extending the existing 30mph speed limit past the site access.

Landscape and Visual Assessment

3.12 The Site comprises an area of residential garden surrounded by trees and dense landscaping on all sides, with residential dwellings beyond on the south. The site is away from public rights of way and as discussed within the Regulation 18 representation, Officers walked the site and found it to be secluded with very few views in or out. Therefore the Site is considered to have low landscape impact and it does not contribute to the wider open landscape value of the Green Belt. This is further supported by the councils separate proposal to remove this area from the Green Belt altogether.

3.13 The Site, having an overall low landscape sensitivity and a low landscape value, is considered to have a high capacity to successfully accommodate residential development, particularly that of 2 – 2.5 storey residential development, sensitively designed through siting, layout and massing, set within the existing woodland buffer, complemented by a comprehensive landscape framework and green infrastructure proposals, resulting in very limited landscape and visual effects on the surrounding area, including the Green Belt. It should also be noted that a strip of land within this allocation is within the designated settlement boundary.

3.14 The combination of the low landscape character sensitivity and low visual sensitivity, result in low overall landscape sensitivity for the Site.

Suitable Alternative Natural Greenspace (SANG)

3.15 The Site falls within the 5km buffer zone of the TBH SPA at Ockham and Wisley Common and therefore, in line with saved policy NRM6 of the South East Plan, it is necessary to provide suitable mitigation for the proposed development. For this section of the allocation, if brought forward on its own, it would likely fall within the thresholds for a financial contribution to be provided as part of the development. Alternatively SANG may be provided onsite as part of the wider A40 allocation.

Density of Development

3.16 The overall allocation of A40 is 8 ha (some 20 acres). At 120 dwellings this would suggest a density of 15 per ha / 6 per acre. This would allow for a relatively low density so as not to result in the “over development” of the villages or a strain on services.
3.17 The Councils LAA February 2016 identifies the sire as REF975: This document concludes that the side is acceptable in all respects subject to drainage having being relocated; the previous PBA report and attached PBA reports demonstrate acceptability in the respect

4.0 CONCLUSIONS

Conclusion

4.1 In conclusion, Site Allocation A40 represents the opportunity for a sustainable extension to what is one of the most sustainable settlements in the Borough of Guildford, and indeed is regarded as the most sustainable of the villages outside the urban areas of Guildford, Ash and Tongham. It is well connected to the existing community and facilities which will remain accessible to prospective residents. The increase in population that results from this extension to the physical extent of the village also helps to support the continued viability of local services.

4.2 It has been demonstrated in this submission that the site is suitable for the development proposed as it is directly adjacent to and bound by existing areas of housing. The proposals would consolidate the form of the settlement in this location which would result in a less dispersed pattern of development than exists at present to the north of the main service centre at East Horsley. New development on this site would be fully contained both within the site itself and within the perceived extent of the village which lies further to the south. The Development in this location would not encroach into wider more open areas of the Green Belt further from the village. The plan also identifies the site as inset from the Green Belt, further supporting the case for the development of the site.

4.3 Housing development would be compatible with the surrounding land uses which are well-established and enclose our site. These include areas of housing to the north, east and south, and the Camping and Caravanning Club of Great Britain site to the west.

4.4 A summary of the benefits of the site are below:

- This site will provide several residential units in the Waterloo Farm part of the site with a total of 120 units across the allocation within a sustainable location.
- The settlement of East Horsley is an appropriate location for additional housing and is among the best performing villages in the Borough in terms of their sustainability credentials and in terms of the access these provide to local services.
- The proposed uses would be compatible with adjacent land uses.
- The site is well-contained and enclosed by existing physical features and development, forming a natural extension of and would be contiguous with the residential environment of the settlements of East Horsley and West Horsley.
- The site has defensible boundaries which will ensure that the development will not harm the purpose or openness of the wider Green Belt or landscape value.
- The site is not constrained by any other sensitive planning designations.
- The site would not impact materially on any existing residential properties.
- The site is deliverable within 1 – 5 years, there being no insurmountable obstacles or technical issues to delivery in terms of highway, drainage, SPA or the capacity of existing utilities.
- The scheme will generate section 106 contributions and provide SANG mitigation.

4.5 The site should be allocated as the wider site A40, or if not, Waterloo Farm as a further inset from the Green Belt in this part of Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
- A098810 Appendix B FRA.pdf (1.9 MB)
- A098810 Appendix A Regulation 18 reps Chris Roe.pdf (2.2 MB)
As new resident with a 19 month year I child I write with great concern regarding the site proposals within the West and East Horsley green belt.

The Waterloo Farm site would back straight on to our family home and the density of new houses would quite literally damage the quality of living we have worked so hard to create.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We have concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing drainage infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to under estimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

There is a history of some sewer flooding. Developer funded impact study required to understand implications of development.

I also have a particular concern about site A41 because of its prominence and its contribution to the Green Belt setting of the village. This site was added in the current consultation and is the most unsuitable of all the proposed village sites by virtue of its location.

**Site Allocation A41**

1. **At no stage in the previous draft Local Plan process and subsequent consultation did this site appear for consideration, now suddenly it has been included in the present draft Local Plan Strategy & Sites increasing the development burden within West Horsley.**

2. The site to the south of East Lane, adjoining Lollesworth Lane is an important green space to be viewed and enjoyed when traversing East Lane in either direction.

3. This site is unsustainable and unsuitable for the proposed density of development due in part to its green belt status; in part to infrastructure fragility and incapacity (drainage and road surfaces - both of which are already failing due to lack of ongoing investment to improve capacity)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

A41, Land adjacent to South of West Horsley  
This is a rural Green Belt site unrelated to any significant development and remote from shops and public transport. It is an unsustainable site on which unsustainable development is proposed contrary to government advice as set out in the National Planning Policy Framework. If such a scale of development is necessary, which is disputed, there are several much better sites in the area that should be considered.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Site A41 Land to south of West Horsley  
186. I object to this site being included. Guildford Borough Council have proposed moving the settlement boundary and insetting the enlarged village in order to allow a development for which there are no exceptional circumstances. This is a very obvious intrusion into the openness of the Green Belt.

187. Strangely, the "opportunities" include "Green Corridors and linkages to habitats outside of the site" when the proposal represents a major reduction in these features.

Sites A36 to A41- general reasons for objection

---
188. These sites and some smaller sites identified with densities that are very much higher than, and out of proportion with, the nature of this locality represent a massive increase in the population of The Horsleys and will destroy their character. Further development in the form of infilling and inappropriate development will take place as a result of the proposed insetting.

189. No genuine consideration has been given to the traffic impacts (the baseline traffic flows modelled for this area were severely understated) or adequacy of local services to support this growth. Public transport is very poor and these sites will generate a large volume of additional car journeys on roads that already have queuing. The site proposals are unsustainable.

190. The Infrastructure Development Plan largely ignores this area of the Borough with a token £1m added at the last minute, apparently as an afterthought, for an "East Horsley and West Horsley traffic management and environmental improvement scheme". Residents have been given no indication as to what this entails and I suspect that it has been given no real consideration. Residents have no idea whether the scheme will be acceptable in terms of any undesirable impacts that it might have or whether it will be effective.

Proposed Submission Local Plan: strategy and sites 2016

Site A41 – Land South of West Horsley

SUPPORT FOR LAND ALLOCATION

It is considered the site allocation meets the requirement of the National Planning Policy Guidance (NPPG) in that the Council undertook a Land Availability Assessment (LAA) which assessed land available for housing development. The LAA assessed sites in terms of suitability and sustainability. Site (A41) was identified as part of that exercise, and therefore was fully explored in terms of its suitability. The assessment and ultimate inclusion in the LAA 2016 illustrates that the site is suitably located for development.

In terms of availability, the land is open grass land with no impediment to development. Furthermore, in terms of ownership it is immediately available and in this respect also meets the requirements of NPPG.
It is recognised that the site lies outside the identified West Horsley settlement boundary and within the Green Belt. However, within the Councils ‘Green Belt and Countryside Study’ the site is identified as a potential development area under reference C14-D. The findings of the study indicate that the land scores ‘One’ against the purposes of the Green Belt. Accordingly Volume 4 of the Green Belt and Countryside Study suggests that this land could be inset from the Green Belt.

The site is categorised in the Landscape Character Assessment as falling within Rural Character Area E2 – ‘Wooded Rolling Claylands’. This requires that new development needs to respect the landscape and townscape character and local distinctiveness of the area. Given the allocated site area of 4.8 hectares, there will be sufficient space to develop the land for both housing whilst also providing sufficient landscaping, (tree and shrub planting) appropriate to the identified character area.

In all respects I support this proposal as Site A41 is able to meet all the requirements of the NPPG in respect of allocations and, can be appropriately developed to meet the Councils identified housing shortfall.

The removal of the site A41 which would have been used as a sustainable location for a new school is short sighted and indicates that the council have little feel for the needs of local people. In turn the development of the present school site would have alleviated the pressure on other more contentious sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

A41 The removal of this site from the revised local plan is short sighted to say the least.

The site A41 was given to the school to build a school fit for purpose, at the moment there are approx 430 pupils in a school build for 200 max children with 18 in a class currently there are 32 in each class almost double.

A waiting list of 96 currently.

The outdoor area is totally insufficient for 430 children.

Sports facilities in the school are just not viable on safety grounds.

Quality of life in classrooms in hot/cold weather is unacceptable.

Windows are single glazed in upstairs rooms, already a bird flew into one and the glass smashed..not acceptable.
The parking is inadequate and causes problems between the school and residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Again, traffic congestion and road safety are of major concern given that an additional 90 houses will produce somewhere in the region of 200+ cars. East Lane (where this site is situated) is a tight two-lane road that was built for the pony & trap /stage coach era but which already carried a significant volume of traffic with people turning off the Ockham Road and/or the Drift into East Lane to go to The Raleigh School and/or make their way towards Guildford and other environs. The fact that The Raleigh School is served by East Lane means that some young children make their way to school on bikes I scooters etc and any additional cars will only increase the risk of tragic accidents. The village shops of East Horsley are in two separate ribbon-strips but both already have inadequate car parking facilities (as does the railway station) and there is no land available for expansion. Similarly, the very limited shops in West Horsley are served by nothing more than a small lay-by and again with absolutely no room for expansion. For the above reasons, I OBJECT to this proposal.

GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN: STRATEGY AND SITES 2016
REPRESENTATIONS BY MR M O'HARA AND RESIDENTS OF WEST HORSLEY

I am instructed by the following residents of West Horsley to OBJECT to the proposed site allocation under Policy A41: Land to the South of West Horsley:

- Mr Martin O’Hara & Mrs Janet O’Hara [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]
- Mr Julian Colborne-Baber & Mrs Clare Colborne-Baber [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]
- Mr Robert Beale & Mrs Clodagh Beale [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]
- Mr Richard Wills & Mrs Jenny Wills [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]
- Mr Paul Douet & Mrs Nicola Douet [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]
- Mrs Patricia Rutter [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]
- Mr Peter Edwards & Mrs Debra Edwards [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]

The above all reside in West Horsley in very close proximity to the proposed site allocation.

Basis of Objection

The inclusion of the proposed allocation of the land to the south of West Horsley under Policy A41 is unsound.

A Local Plan may only be adopted if it is sound. As a matter of government policy, soundness requires a plan to be positively prepared, justified, effective and consistent with national policy[1]. Within these four heads it should enable the delivery of sustainable development in accordance with the National Planning Policy Framework (‘NPPF’) and be deliverable over its period.

Consistency with National Policy

The site is presently situated within established Green Belt. The policy on protection for the Green Belt is contained in section 9 of the NPPF, which sets out the fundamental aim of Green Belt policy:
79. The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.

([1] National Planning Policy Framework, paragraph 182)

Policy on development in Metropolitan Green Belt is set out at paragraphs 79 – 92 of the National Planning Policy Framework (‘NPPF’). Inappropriate development is, by definition, harmful to Green Belt and the NPPF states that it “should not be approved except in very special circumstances” (paragraph 87). Local planning authorities are advised to “regard the construction of new buildings as inappropriate in Green Belt” (paragraph 89).

Although it is possible for a local planning authority to conduct a review of Green Belt land and consider redefining boundaries which add or take away Green Belt land in order to meet local planning requirements, paragraph 83 of the NPPF states:

83. Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.

The paragraph above sets out that a Green Belt review should only happen in “exceptional circumstances”. This concept is further elaborated on in paragraph 82 as being “for example when planning for larger scale development such as new settlements or major urban extensions”.

As the Green Belt in Surrey is established with detailed boundaries, “exceptional circumstances” must be demonstrated to necessitate the change to its boundaries[2]. It is self-evident that a development plan review is not an exceptional circumstance. Paragraph 84 of the NPPF advises:

84. When drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channeling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary.

The NPPF therefore requires site allocations to be sustainable development, as defined in the NPPF, capable of being carried out in practical terms and, in the Green Belt, justified by exceptional circumstances. For the reasons set out below, we are of the opinion that the allocation of this site under Policy A41 is not sustainable development and is not justified by exceptional circumstances. We are also of the opinion that the removal of the adjoining field and part of Lollesworth Wood from the Green belt is also not justified by exceptional circumstances.

Justification

In March 2014 the Government published new web-based Planning Practice Guidance to accompany and give further detail about the policies in the NPPF. This guidance sets out that unmet housing need in a particular area is unlikely to meet the “very special circumstances” test to justify Green Belt development:

Unmet housing need is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt[3].

On 4 October 2014 the former Government announced that it had updated its online Planning Practice Guidance. The aim of this was to reaffirm local authorities’ abilities to “safeguard their local area against urban sprawl, and protect the green lungs around towns and cities”. The then Government said that it wanted to make planning policy clear that housing need does not justify the harm done to the Green Belt by inappropriate development. The new guidance reads:

Do housing and economic needs override constraints on the use of land, such as green belt?

The National Planning Policy Framework should be read as a whole: need alone is not the only factor to be considered when drawing up a Local Plan.

The Framework is clear that local planning authorities should, through their Local Plans, meet objectively assessed needs unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole, or specific policies in the Framework indicate development should be restricted. Such policies include those relating to sites protected under the Birds and Habitats Directives, and/or designated as sites of special scientific interest; land designated as Green Belt, local green space, an area of outstanding natural beauty, heritage coast or within a national park or the Broads; designated heritage assets; and locations at risk of flooding or coastal erosion.

The Framework makes clear that, once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.

Do local planning authorities have to meet in full housing needs identified in needs assessments?

Local authorities should prepare a Strategic Housing Market Assessment to assess their full housing needs.

However, assessing need is just the first stage in developing a Local Plan. Once need has been assessed, the local planning authority should prepare a strategic housing land availability assessment to establish realistic assumptions about the availability, suitability and the likely economic viability of land to meet the identified need for housing over the plan period, and in so doing take account of any constraints such as Green Belt, which indicate that development should be restricted and which may restrain the ability of an authority to meet its need.

In December 2014 the Planning Minister, Brandon Lewis, wrote to the Chief Executive at the Planning Inspectorate about strategic housing market assessments. This letter set out the relationship between housing figures produced as part of a Strategic Housing Market Assessment and those in a Local Plan and how to take into account constraints such as Green Belt land:

“However, the outcome of a Strategic Housing Market Assessment is untested and should not automatically be seen as a proxy for a final housing requirement in Local Plans. It does not immediately or in itself invalidate housing numbers in existing Local Plans.

Councils will need to consider Strategic Housing Market Assessment evidence carefully and take adequate time to consider whether there are environmental and policy constraints, such as Green Belt, which will impact on their overall final housing requirement. They also need to consider whether there are opportunities to co-operate with neighboring planning authorities to meet needs across housing market areas. Only after these considerations are complete will the council’s approach be tested at examination by an Inspector. Clearly each council will need to work through this process to take account of particular local circumstances in responding to Strategic Housing Market Assessments[4].”

The overall extent of development required in the borough necessary to meet the employment and housing needs in the borough as set out at Policy S2 has not been satisfactorily defined having regard to the methodology summarised above.

The West Surrey Strategic Housing Market Assessment (SHMA) assesses an Objectively Assessed Need (OAN) of 693 dwellings per annum “but does not take into account land supply, policy or other constraints to development” (paragraph 1.2, Guildford Summary Report – October 2015). This figure is acknowledged as

(4) Letter from Brandon Lewis to the Chief Executive at the Planning Inspectorate about strategic housing market assessments, 19 December 2014)
including upwards adjustments to support growth in student numbers and higher migration levels than are shown in the 2012-based Population Projections and represents an OAN 23% higher than the need calculated through London sensitivity analysis (paragraphs 4.1 – 4.2, Guildford Summary Report – October 2015).

Policy S2 of the Draft Local Plan applies uncritically this OAN figure to identify a housing requirement of 13,860 dwellings for the plan period (20 years @ 693 dpa). There is no evidence to indicate that in defining this figure the Council has undertaken a careful consideration of “whether there are environmental and policy constraints, such as Green Belt, which will impact on their overall final housing requirement” and which indicate that development should be restricted. The Proposed Submission Local Plan’s proposal to make provision for 62% of this total dwelling requirement on land that is currently Green Belt is not supported by adequate justification. An full explanation should be provided of the methodology used and process undertaken by the Council to reach its housing requirement figure and why the OAN figure has not been moderated in light of a ‘careful consideration’ of the constraints applying in the district.

The burden of meeting what the Council has defined as its development needs is proposed to fall disproportionately on the rural east of the borough. Within this area, West Horsley is allocated to bear an excessive proportion of this development, despite the countervailing reasons put forward in previous consultation rounds by many local residents (e.g. narrow roads; areas of flood risk; access to school places and medical facilities; parking availability at the stations etc.).

The proposed allocation of this site for 90 homes is in addition to 3 other sites proposed for allocation in West Horsley (under Policies A37, A38 and A40). In total, if all four allocations are confirmed, the total number of new houses proposed in West Horsley is 385 homes – a significant addition to the existing village.

Additionally, there are a further 100 homes proposed on the fields behind Ockham Road North and Heatherdene up to Lollesworth Wood (Policy A39) in East Horsley.

Whilst my clients are not opposed to new houses in West Horsley per se, this scale of potential development in West Horsley is excessive and is not supported by the Guildford Borough Economic Strategy 2013 – 2031. West Horsley is remote from the existing centres of employment and the new Economic Development Site proposals which are focussed on the opposite side of the Borough.

Additional Points of Objection

1. The proposed amendment to the Green Belt boundary in this location resulting from the allocation of the site does not have sufficient regard to its intended permanence in the long term or its capability of enduring beyond the plan period (contrary to NPPF paragraph 83)

If the allocation of this site under Policy A41 is adopted, the prospect of further infilling and extension of the settlement on adjacent undeveloped sites south of East Lane and north of Lollesworth Wood will significantly increase, further harming the Green Belt and the purposes for which it has been designated in this area. Development would result in greater risk of encroachment and coalescence between West Horsley (North) and West Horsley (South) and harm to the existing character of the village.

The proposed revision to the Green Belt boundary in this location has been poorly considered and has not been clearly defined using “physical features that are readily recognisable and likely to be permanent” contrary to the guidance at NPPF paragraph 85. In addition, the removal of the adjacent field and part of Lollesworth Wood to the south of the Policy A41 site from the Green Belt is not justified by exceptional circumstances.

Allocation of the site will not “promote sustainable patterns of development” and the wildlife / environmental amenity loss of this site is likely to result in significant detriment to the village’s character and harm to the biodiversity and natural environment of the adjoining Lollesworth Wood SNCI (contrary to Sustainability Objective 1 of the Sustainability Appraisal framework set out at Table 4.1 of the GBLP Sustainability Appraisal)

2. The assessment of sensitivity in the context of the five purposes of Green Belt set out in the Guildford Borough Green Belt and Countryside Study produced by Pegasus Planning Group (see Evidence Base), on which the proposed removal of the Policy A41 site from the Green Belt is based, is flawed. The land parcels used to assess sensitivity are ill-considered and mask significant variations in function and character of different areas within each land parcel. As a consequence, the
conclusions drawn are subjective and inconsistent and do not provide a robust basis from which objective decisions can be made. This is reflected in inconsistent conclusions about the extent to which different land parcels fulfil Green Belt purposes as set out in the Sensitivity Table.

3. The parish of West Horsley’s open, semi-rural, character makes an important contribution to the openness of the Green Belt in this part of the parish. This is a specific and differentiating characteristic of West Horsley over its neighbour, East Horsley, which the Council has failed to recognise.

This rural landscape character is highly valued by West Horsley residents and is detailed in general terms within the Guildford Borough Council Landscape Character Assessment. In many ways the character of West Horsley is defined by the open views from the roads either entering or passing through the village settlement.

Upon entering the village from any direction roads such as Ockham Road North, Long Reach, Ripley Lane and (to a lesser degree) Shere Road have a clearly defined precedent of the settlement being on one side of the route and there being open vistas across fields/meadows/farmland or into woodlands on the other.

No less important to the village character, however, is the fact that the main vehicular traffic route through the village (along East Lane/The Street) currently benefits from a ‘green gap’ to the north between The Rectory (approximately opposite Northcote Road) to Grovelands Farm (beyond the railway bridge) and to the south between Roundtree Farm and the Railway Cottages (at the railway bridge). This area, centred on the Lollesworth Lane/Long Reach junction, is in many ways the ‘heart and lungs’ of the village.

Allocation of this site is completely counter to the wishes of the West Horsley residents. Its value is confirmed following the West Horsley Household Survey April 2015, whereby 615 village households (out of 1121 households) returned questionnaire results. The survey identified the following consistent strong opinion:

- 95.55% agreed or strongly agreed (87.68% strongly agreed / 8.27% agreed) that West Horsley should retain its rural character, defined by open spaces, parkland and green space.
- 92.15% agreed or strongly agreed (80.22% strongly agreed / 11.93% agreed) that West Horsley should retain the open aspect and strategic natural spaces along East Lane, The Street, Ripley Lane, Epsom Road and Long Reach, which reinforce the village’s rural nature.

The findings of the West Horsley Household Survey April 2015 are being used to inform the preparation of a Neighbourhood Plan for West Horsley (the West Horsley Neighbourhood Plan Steering Group has appointed rCOH to assist on working up the Neighbourhood Plan).

This site is essential to the village’s rural identity and character and it is vitally important that this open aspect is maintained through what is, in effect, the centre of the village. If adopted, Policy A41 would allow this open space to become the only development (existing or proposed) of any significant depth along the whole of the southern side of the East Lane/The Street corridor and would severely compromise this ‘green gap’ between the northern and southern parts of West Horsley, contrary to at least 2 of the 5 essential purposes of Green Belt as defined at NPPF paragraph 80 (namely, to check unrestricted sprawl and to assist in safeguarding the countryside from encroachment – functions which this part of the Green Belt, including the site, is recognised as performing at paragraph 8.2 in the Guildford Borough Green Belt and Countryside Study).

Development of the site will not be consistent with the distinctive settlement pattern of the village and the important relationship between the built development and the surrounding landscape, and will harm important views of the village from the surrounding landscape and from within the village of local landmarks, contrary to Policy D4 of the Draft Local Plan.

4. This site has not previously been included as a Potential Development Site (PDS) within previous draft versions of the emerging Local Plan and assessment of the site in background studies forming the evidence base for this allocation is based on factually incorrect information. In particular:
In the Guildford Borough Land Availability Assessment (LAA) 2016 – Page 388 in respect of site reference 2063 (‘the site of East Lane) it states under ‘summary of land designations’ – ‘Green Belt adjoining settlement boundary’. This is incorrect. The site does not abut the 2003 defined Village settlement boundary at all.

The Guildford Borough Green Belt and Countryside Study produced by Pegasus Planning Group, Volume III – Appendix VI – Sustainability Walking Distance Plans for Land Surrounding the Villages refers to the above site, plus the field beyond that the Council now propose removing from the Green Belt (together with a section of Lollesworth Wood) as site D. All the assumed walking paths to (i) Nearest Local Centre, (ii) Healthcare Facility and (iii) Railway station presume that access can be gained to Lollesworth Lane via the (undesignated) field to the south fronting Lollesworth Lane. This field (used for grazing sheep) is owned by one of my clients (Mr & Mrs Richard Wills of Lollesworth Farm) who advise that they would permit no access route across their field.

5. There is insufficient infrastructure capacity to accommodate the allocation of this site, in addition to the other sites proposed for allocation in West Horsley (north) and East Horsley. In particular, there is insufficient capacity both at junior (The Raleigh) and senior (The Howard of Effingham) school level. The Raleigh has recently indicated to local residents that it cannot further increase capacity on its existing site and is considering relocating, raising further concern about potential erosion and harm to the Green Belt.

The Horsley Doctors Surgery is already at capacity. The existing utilities infrastructure in the area would be further stretched, probably beyond acceptable limits. Water pressure in the area is already poor and surface water drainage along East Lane is a continual problem throughout the autumn and winter months. The addition of further built environment and associated hard landscaping south of East Lane would only exacerbate the problem. Indeed, as referenced in the Land Availability Assessment (see Evidence Base), Thames Water have commented that the current wastewater network in this area is unlikely to be able to support the demand anticipated from this development. Drainage infrastructure is likely to be required to ensure sufficient capacity is brought forward ahead of the development. The Draft Guildford Borough Infrastructure Delivery Plan 2016 also identifies a significant Surface Water Flooding hotspot in and around West Horsley. Without the preparation of a drainage strategy to determine the exact impact on the infrastructure and the significance of the infrastructure to support the development, the deliverability of housing on this site is unclear.

Conclusion and Request for Amendment

The inclusion of the proposed allocation of the land to the south of West Horsley under Policy A41 is unsound in that, having regard to the advice at paragraph 182 of the NPPF it is neither consistent with national policy nor justified. I therefore request, on behalf of my clients, the removal of this proposed allocation site from the Local Plan and the retention of this site and the adjoining field and part of Lollesworth Wood within the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

In particular I would like to STRONGLY OBJECT to the inclusion of Policy A41: Land to the south of West Horsley.
The Policy A41 site is, in my opinion, essential to the village’s semi-rural identity and character and it is vitally important that this open green aspect is maintained through what is, in so many ways, the centre of the village.

If the Proposed Local Plan is adopted, Policy A41 would allow this open space to become the only development (existing or proposed) of any significant depth along the whole of the entire southern side of the East Lane / The Street corridor and would severely compromise this ‘green gap’ between the northern and southern parts of West Horsley. Any development on this land would fundamentally change the character of the village and be harmful to the openness of the Green Belt. At no point does it adjoin the current village settlement boundary, as defined in the 2003 Local Plan and it is, in no way, a natural extension of the village’s current built environment and sticks out like a wart or carbuncle into the otherwise protected landscape.

Any development on this site would not be consistent with the distinctive settlement pattern of the village and the important relationship between the built environment and the surrounding landscape (i.e. development on one side of the route only). In my opinion, it will also harm important views of the village from surrounding landscape (from Lollesworth Lane) and from within the village of local landmarks (of Lollesworth Wood), contrary to Policy D4 of the Proposed Local Plan.

Furthermore, the Guildford Borough Green Belt and Countryside Study produced by Pegasus Planning Group states in paragraph 13.15 “For a village to be potentially inset within the Green Belt it would need to be demonstrated that recognisable, defensible and permanent Green Belt boundaries could be provided that would ensure they are retained in the long term.” I do not believe that such real boundaries have been identified or used in respect of this site allocation under Policy A41.

The proposed amendment to the Green Belt boundary in this location, resulting from the allocation of the site, does not therefore potentially have sufficient regard to its intended permanence in the long term or its capacity of enduring beyond the plan period. Indeed, in my opinion it is contrary to NPPF paragraph 83 and contrary to the guidance of NPPF paragraph 85, as it has not been clearly defined using physical features that are readily recognisable and likely to be permanent. In my opinion, the proposed revision to the Green Belt boundary in this location has been very poorly considered.

If the allocation of this site is adopted, the prospect of further infilling and extension of the village settlement defined in the 2003 Local Plan on adjacent undeveloped, but currently protected, sites south of East Lane and north of Lollesworth Wood would significantly increase, raising the spectre of further subsequent harm to the Green Belt and the purposes for which it has been designated in this area. Development of any nature in this location would result in the greater risk of encroachment and coalescence between the two built settlements in West Horsley and would fundamentally harm to the existing open and natural character of the village.

This is clearly contrary to at least two of the five essential purposes of Green Belt as defined at NPPF paragraph 80 (namely to check unrestricted sprawl and to assist in safeguarding the countryside from encroachment); functions which this part of the Green Belt, including this site, is recognised as performing at paragraph 8.2 of the Guildford Green Belt and Countryside Study produced by Pegasus Planning Group.

The proposed allocation of this site will not “promote sustainable patterns of development” as most potential residents, if this site were to be developed, would not walk the mile or so to the local facilities (shops / doctors / station etc.) in East Horsley and would further add to the traffic issues in the vicinity.

In addition, the wildlife / environmental amenity loss of this site is likely to result in a significant detriment to the village’s biodiversity and natural character. This site is immediately adjoining the Lollesworth Wood SNCI.

GBC’s own Proposed Local Plan Policy I4: Green and blue infrastructure; states that “Permission will not be granted for proposals that are likely to materially harm the nature conservation interests of local sites unless clear justification is provided that the need for development clearly outweighs the impact on biodiversity.” Local Sites are earlier defined in the policy as including such Sites of Nature Conservation Importance (SNCI).
Such a proposal will inevitably cause harm to the biodiversity and natural environment of the adjoining Lollesworth Wood SNCI. Indeed, this proposal is, in my opinion, contrary to Sustainability Objective 1 of the Sustainability Appraisal framework set out at Table 4.1 of the Guildford borough Local Plan Sustainability Appraisal.

Finally, I would advise that the assessment of this site, in at least two background studies forming the evidence base for this Site Allocation, is based on incorrect information.

In particular:

1. In the Guildford Borough Land Availability Assessment (LAA) 2016 – Page 388 in respect of site reference 2063 (‘the site of East Lane’) it states under ‘summary of land designations’ – “Green Belt adjoining settlement boundary”. This is incorrect. As previously stated, and unlike any of the other three sites proposed in West Horsley, this site currently has no boundary that adjoins the village settlement boundary as defined in the GBC Local Plan 2003.

2. Also, the Guildford Borough Green Belt and Countryside Study produced by Pegasus Planning Group, Volume III – Appendix VI – Sustainability Walking Distance Plans for Land Surrounding the Villages refers to the above site, plus the field beyond that GBC now propose removing from the Green Belt together with a section of Lollesworth Wood, as site D. All assumed walking paths to (i) Nearest Local Centre, (ii) Healthcare Facility and (iii) Railway Station are presuming that access could have been gained to Lollesworth Lane via the undesignated (save that it has been proposed to be removed from the Green Belt) field to the south and fronting Lollesworth Lane. This field is currently used for grazing sheep and is owned by Mr & Mrs. Richard Wills of Lollesworth Farm and they have advised me and others that they would not permit such access route across their field, therefore the assumption used by Pegasus Planning Group is incorrect, which should have a material effect on their conclusions and lead me to believe that their sustainability conclusions are, at best, suspect.

I would therefore specifically OBJECT to the amendment of the Green Belt boundary in this area, to both the site encompassed by Policy A41 and to the field and wood beyond Policy A41 site, whereby an adjacent field and part of the Lollesworth Wood (SNCI & Ancient Wood designated) to the south, beyond the site allocated under Policy A41, have also been removed from the Green Belt.

I genuinely cannot think of any reason for this amendment, save for as a potential second phase development and surely it cannot be considered to be justified by “exceptional circumstances” when no alternative use is currently proposed and its current and historic use is as pasture?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I believe that the inclusion of the proposed allocation of land to the south of West Horsley under Policy A41 is unsound. Allocation of this specific site and its Policy is neither consistent with national policy, nor is it justified. I believe therefore that this proposed allocation site be removed from the Local Plan and that it be returned to the protection offer by its Green Belt designation. I do not believe that the case for “exceptional circumstances” has been proven for the proposed change in Green Belt boundary here, or indeed in many other locations in and around the borough.

Furthermore, I believe that the proposed removal of the field and part of Lollesworth Wood to the south of the above site from the Green Belt should also be reconsidered and returned to the protection offered by its current Green Belt designation. I do not believe that the case for “exceptional circumstances” has in any way been proven for the proposed change in Green Belt boundary here either.
Attn. Planning Policy Team, Guildford Borough Council

Further to your letter, dated 7th June 2017, inviting me to take part in the targeted consultation on Guildford Borough Council’s Proposed Submission Local Plan: strategy and sites (2017), I am writing to you in SUPPORT of the specific proposed change to the Proposed Submission Local Plan relating to the deletion of the previously proposed Policy A41.

I am pleased to note that the site, previously indicated for housing under Policy A41, has now been removed from the housing sites allocation and now remains within the protection of the Green Belt designation. May I take this opportunity to express my thanks for your decision to remove the threat of a built development and ‘return’ this important natural area of West Horsley to the protection of the Green Belt area. I trust that it can now rightly remain a most important contributor to the essential open character of the village.

1. Policy A41 (West Horsley) – Object
   1. Loss of Green Belt Land
   2. Extension of Settlement Area of West Horsley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2655  Respondent: 8839297 / David Mackay  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The removal of this site from the plan is to be welcomed as its possible future use for a relocated and enlarged primary school would represent a better use of the land than yet more housing and address my reservations regarding the level of primary school provision in the area. However, I assume the existing school site would then be used for housing, offsetting partially or entirely the housing removed from the plan by deleting this site. The removal of this site from the
plan will not therefore result in a reduction in the adverse impact of the plan on the roads, medical facilities, shop and station parking in West and East Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I would like to see the removal of this site accompanied by the removal of one of the other sites in West Horsley (A38 or A40) to achieve a genuine reduction in the amount of extra housing imposed on the area.

Attached documents:

Comment ID: PSLPS16/8134  Respondent: 8843361 / Adrian Atkinson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A41

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to policy A41 There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

There are no exceptional circumstances proven

I STRONGLY OBJECT on the grounds that the boundary of this site totally fails to comply with the defensible boundary requirements set out in NPPF paragraph 85, and in the Green Belt and Countryside Study

This is a very last minute site not included in the regulation 18 consultation. This is a perverse inclusion being late and clearly not strategically aligned to defendable green belt boundaries set out in paragraph 85 of the NPPF. The site is included in the new proposed settlement by deviating, for no planning or logical reasons, the permanent and defendable green belt boundary of East Lane into an open field, following some hedges and trees only for it to return to the same boundary of East lane some 100m further along. The only logical and defendable boundary is the continuation of east lane to the Street/Long reach without deviation of it. A41 passes all the test of the Green belt as does the land on 3 sides of it which are proposed to remain in the Green Belt and outside the Village boundary. There are no exceptional circumstances for this site to be proposed for 90 houses and the green belt and village boundary should not be changed to incorporate it. This site, whatever, is planned on it should be removed from the village and remain in the Green Belt and outside the village boundary as defined by that part of east Lane consistent the defensible boundary requirements set out in NPPF paragraph 85, and in the Green Belt and Countryside Study.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to policy A41 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF.
I object to the proposed increasing of the number of development sites in West Horsley with the suggested inclusion of the 2 sites relating to the Raleigh School; current main site of the school and the playing fields of Western Lee. This is a developer led speculative proposition to shoehorn the carbuncle of a site that is site 41 into the plan based upon the enabling development of a new School. If the school was to be moved it can be financially accommodated without the need for 20+ houses and a sportshall (described as a community hall but the plan will be that it is privately owned) on site 41. It is greed not need that is driving this suggestion. There are rumours that additional houses will be proposed on site A38. The two current sites can be developed by Surrey CC, who own the sites, a piece of land can be bought and a new school can be built out of the proceeds if a need for that to happen can be identified by SCC. There is no need to tie the suggested need to a development deal involving two land owners

General objection for Sites A36-41 (East and West Horsley). It is perverse for exceptional circumstances to be claimed to destroy the character of ancient villages, the home of Sir Walter Raleigh, to create a mega-village at the very frontier of the perpetual Metropolitan Green belt, whereas, Ash and Tongham, at the other end of the borough beyond the London green belts is actually getting its own brand new green belt under Policy P3 using the total opposite exceptional circumstance. This is wrong.

The 6 and possibly 8 (if the council think the opportunistic Raleigh School development is progressed) Horsley sites should not be considered individually but the areas should be looked at on the basis of cumulative impact on the contiguous villages of East and West Horsley.

Building 533+ new houses on these 6 or 8 sites, plus at least another 90 on small sites is disproportionate relative to the rest of the borough and is totally out of character for West Horsley. It will destroy the rural character of this community.

The plan needs to be balanced, something the Council Leader is at pains to reiterate at every opportunity. Under this “balanced” plan, rural West Horsley will increase in size by over 35%. Whereas the area where the new green belt will go and the home of the council leader, Ash and Tongham will only get 16% and Guildford urban area only 11%. This is not balanced, not by any perverse interpretation of the word. The plan has to be sustainable, balancing out economic, environmental and Social requirements of the borough in accordance with Paragraph 7 of the NPPF. In the relation to West Horsley this is being brushed aside for disproportionate development. Urban and beyond the green belt are being spared inflated development at the expense of protected greenbelt such as West Horsley.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, medical facilities, sewage, surface drainage and shops.

The harmful impact of these sites is magnified by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with 2,100 new homes only 2 miles away (see below).

The density of new housing on the 6 or 8 Horsley sites is inappropriate and out of keeping with the locality and against the NPPF

Sites situated on the edge of existing development in West Horsley encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
West Horsley has specific and differentiating characteristics from East Horsley in that it benefits from a semi-rural nature and the loss to development of the sites being considered would change the village’s characteristics forever. I particularly STRONGLY OBJECT to the addition of a new proposed site for 90 homes on land to the south of West Horsley (Policy A41) which is along East Lane, in completely rural surroundings. Throughout West Horsley, one of the defining characteristics of the village is that where there is settlement on one side of the road, there are green fields or woods or open spaces on the other side, thereby giving the village its rural nature. The site covered by Policy A41 is inconsistent with the aims of the National Planning Policy Framework (NPPF) and the nature of the village of West Horsley. It does not adjoin any existing Local Plan 2003 settlement boundary and would seriously affect the rural character of the main arterial route through the village.

1. Development Site referenced Policy A41

I object to the proposed development of land to the south of West Horsley in East lane (Referenced Policy A41) which has been added to the Guildford Borough Proposed Submission since the public consultation on the Draft local Plan in 2014 with a proposal to build 90 new houses. Again this is good agricultural land, currently in use as pasture for grazing horses. East lane is a lane, precisely as the name suggests. It is narrow and poorly maintained, with little room for large vehicles to pass. For most of its length there is only one footpath which changes sides, thus causing pedestrians to have to cross the road. Recently a new pinch point was created outside Waterloo Farm Cottage, where a footpath has been installed, allowing only a single lane for traffic. As mentioned in Point 3 above, East lane is frequently flooded with surface water after only a moderate amount of rainfall. It certainly would not accommodate the large volume of increased traffic as a result of developments on this and the site referenced Policy A38).
In summary, I strongly object to the Guildford Borough Proposed Submission particularly the removal of the village of West Horsley from the Metropolitan Green Belt and the inclusion of the proposed large development sites for West Horsley. There appears to be little or no plan to prioritise the use of brownfield sites and no allowance for 'windfall sites' (which were counted by Mole Valley Council in their local Plan).

Again, traffic congestion and road safety are of major concern given that an additional 90 houses will produce somewhere in the region of 200+ cars. East Lane (where this site is situated) is a tight two-lane road that was built for the pony & trap / stage coach era but which already carried a significant volume of traffic with people turning off the Ockham Road and/or the Drift into East Lane to go to The Raleigh School and/or make their way towards Guildford and other environs. The fact that The Raleigh School is served by East Lane means that some young children make their way to school on bikes / scooters etc and any additional cars will only increase the risk of tragic accidents. The village shops of East Horsley are in two separate ribbon-strips but both already have inadequate car parking facilities (as does the railway station) and there is no land available for expansion. Similarly, the very limited shops in West Horsley are served by nothing more than a small lay-by and again with absolutely no room for expansion. For the above reasons, I OBJECT to this proposal.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Please allow us to make some comments on the latest draft. First, thank you for removing Site A 41 from the list of development sites in the previous version; we note, however that this site is being retained for a possible rebuilding of a local school. In view of its proximity to our house, this would be unsatisfactory to us, and we would object to such a proposal.

I object to Policy A41 (Land to the South of East Lane)

I object to the development of this site for 90 houses as it is Green Belt land and it contributes to the openness and rural feel of West Horsley Village. I also object to the application to use this land to relocate The Raleigh Primary School as the need for this development hasn’t been proven. While the school is popular and has a long waiting list, including some children in Horsley, the school’s sibling policy has resulted in approximately one third of pupils coming from villages outside of East and West Horsley. Until this situation has been examined and it is established whether a change in this policy would lead to enough places for children for whom this is their local school, I cannot see any reason to increase the size of the school. If the reason for moving the school is other than the need to expand, then I am yet to be persuaded that the impact of additional housing on the school’s current site is worth the irreversible loss of Green Belt Land. Until the need and substance of this application has been fully considered and consulted on, I oppose the application.

As residents of West Horsley for over 25 years, we are writing to you in SUPPORT of the specific proposed change to the Proposed Submission Local Plan relating to the deletion of the previously proposed Policy A41.

We are pleased to note that the site, previously indicated for housing under Policy A41, has now been removed from the housing sites allocation, remaining within the protection of the Green Belt designation.

We would like to thank you for your decision to remove the threat of a built development and maintain this important natural area of West Horsley under the protection of the Green Belt area.

It can now remain a vital contributor to the open character of the village, which we believe is essential.
We thought it was appropriate to express our support specifically for this particular change to the proposed Submission Local Plan (2017).

I am pleased to see the removal of site A41. However, this appears to be little more than lip-service to the very real concerns expressed by many people living in West Horsley who experience the significant constraints the existing infrastructure presents on a daily basis now.

The NPPF is clear that a Council’s need for additional housing does not constitute special / exceptional circumstances for building in the green belt. Reference to ‘affordable homes’ in this vicinity is, of itself, misleading as “affordable” in West Horsley at 80% of market value puts the price approaching £500k!

1. I object strongly to policy Site A41 ( East Lane). This encroachment into the Green Belt is a travesty of bending the rules to accommodate an opportunistic developer. There is at present a clear boundary along East Lane, there is no defensible boundary for the proposed site which the site map shows is an irregular chunk taken out of the Green Belt. It should be rejected.

3. Policy A41

I specifically object to the Proposed Site - Policy A41

- The Local Plan has included a new site - Policy A41 with a proposal to build 90 homes
- This site is open fields green belt land and the land is one of the most important rural aspects of the village
- The Policy will irrevocably destroy the character of West Horsley village as one of its most important rural features is that on the entry roads to the village (mainly Long Reach in this instance) there is a vista across fields as there is only development on one side of the road
- The fields included in Policy A41 do not satisfy the criteria for development - they do not abut the currently defined village settlement on any side and so cannot be considered an extension of the settlement or infill
- Development on a current site of open fields in green belt land surrounded by undeveloped countryside is in breach of the government's guidelines on building in the green belt
- Residents on East Lane have previously had their planning applications refused on the basis that it interferes with the green belt contained in Policy A41 - why has this now changed?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1560  Respondent: 10843905 / G King  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Site Allocation A41 – Strongly object

Is on green belt and backs onto ancient woodland. This side of East Lane is not densely populated and retains a rural aspect and openness. I notice that in recent months the owners of the land have allowed the hedges to fall into neglect in an attempt to obscure the openness.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6861  Respondent: 10843905 / G King  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Site Allocation A41 – Strongly object

Is on green belt and backs onto ancient woodland. This side of East Lane is not densely populated and retains a rural aspect and openness. This was not identified as a site for development previously yet is added because the landowner has made it available.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy A41. By permitting a development of this area a larger green area inside gets locked in by the development. There is no good reason given for this change of the settlement boundary. The existing adjacent houses have a rural character, which would be destroyed by a new development in this location.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I Object to Policy A41.
It could never satisfy Policy S1.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

With regard to one of the sites the Council now proposes to delete Bewley Homes is supportive of this amendment for the reasons set out below:

Land to the South of West Horsley (Policy A41) – SUPPORT: Bewley Homes supports the proposed deletion of this draft allocation from the Plan by the Council. This site is in a location known for surface water flooding as identified by the Council. As such and in accordance with the sequential approach the Council should be looking at locations where surface water flood risk is not an issue such as Bewley Homes’ promotion site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPS16/869  Respondent: 15245697 / Justine Butler  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A41

I OBJECT TO site A41 land to south of West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1480  Respondent: 15325569 / Oscar Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A41

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A41 the new draft local plan which contains a new proposal to build 90 homes on the open fields (green belt land) of West Horsley in addition to the already proposed 135 houses at Manor Farm (Policy A38), 120 houses at Waterloo Road (Policy A40) and 40 at Bell and Colvill (Policy A37).

I have lived in East Lane all my life and I think that this new site (A41) is one of the most distinguishing rural aspects of the village and if allowed to be developed will destroy the character of West Horsley. West Horsley is a rural village and one of its main features is that on the entry roads to the village (mainly Long Reach in this instance) there is a vista across fields as there is only development on one side of the road. These fields have no houses on any side and do not abut the currently defined village settlement on any side and so cannot be considered an extension of the settlement or infill at all. It doesn't appear to me to be suitable land for development without destroying the green belt and the current village.

There is also no infrastructure for all these new homes. There are only 2 shops in West Horsley, no post office, no medical centre and very little public transport. The roads are already very busy with traffic and the new houses will only add more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/3953  Respondent: 15466433 / Caspar Walker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A41

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

This new site will totally destroy the character of West Horsley. West Horsley is a rural village and one of its main features is that on the entry roads to the village (mainly Long Reach in this instance) there is a vista across fields as there is only development on one side of the road. These fields do not abut the currently defined village settlement on any side and so cannot be considered an extension of the settlement or infill at all. I cannot understand why this piece of land would have been picked for development at all as it does not satisfy any of the criteria for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
## Comment ID: PSLPS16/4502  Respondent: 15486113 / Ian and Margaret Walker  Agent:

### Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A41

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

### 2 - Objection to the number of houses being built in the four proposed sites - specifically policy A41:

A suggested 35 percent increase in housing in West Horsley is a monstrous figure for this community. Vast developments impinge on the rural nature of villages and destroy the very reason why people want to live there.

The purpose of the Green Belt is to provide 'lungs' for a Metropolitan Area and West Horsley village serves that purpose. This particular proposal to build 90 homes on the open fields will destroy that. For ever it's been possible to take quiet country walks starting at Lollesworth Lane across to the Sheepleas and beyond, appreciating the rural aspect from the start.

As a Nation we need to protect villages like West Horsley and concentrate on developing in areas where there IS sufficient infrastructure to support new homes. Guildford Borough Council need to consider this very carefully and ensure that the much needed new homes that are built are not going to impact on this valuable commodity which once lost can never be retrieved.

This is not a NIMBY objection but an appeal for common sense.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

## Comment ID: PSLPS16/7724  Respondent: 15501217 / Luke Sarti  Agent:

### Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A41

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of Policy A41 relating to land south of East Lane. This is in contravention of para 85 NPPF which states that borders must clear and readily recognised. The natural border is the wood to its east. The inclusion of this site is not in keeping with the current settlement and character of the village; houses front East Lane up the woods to the east of this site which borders the road for approximately 400 yards. The land is green belt, no exceptional circumstances are made.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

## Comment ID: pslp172/2136  Respondent: 15590465 / Peter Edwards  Agent:

### Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A41

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Further to your letter, dated 7th June 2017, inviting me to take part in the targeted consultation on Guildford Borough Council’s Proposed Submission Local Plan: strategy and sites (2017), I am writing to you as I fully support the proposed change to the Proposed Submission Local Plan relating to the deletion of the previously proposed **Policy A41**.
It is pleasing to see that the site which had been previously indicated for housing under policy A41 has now been removed from the allocation sites for housing and now remains within the protection of the Green Belt designation. It is a greatly appreciated decision that means that this natural and beautiful area of West Horsley has been returned to the protection of the Green Belt area and will remain as such to the enhancement of the ruralness and open spaces which make Horsley the beautiful place that it is.

Thank you for this proposed change and I personally give you my full support re your decision.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6808  Respondent: 15604833 / Susan Vaughan Jones  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A41

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. At no stage during the previous draft local Plan process and subsequent consultation was this site proposed for consideration; now suddenly it has been included in the present draft Local Plan increasing the development burden within West Horsley
2. The site to the south of East Lane adjoining Lollesworth Lane is an important green space to be viewed and enjoyed when traversing East Lane in either direction

1. This site is unsustainable and unsuitable for the proposed density of development due in part to its green belt status; in part to infrastructure fragility and incapacity (drainage and road surfaces - both already failing due to lack of ongoing expenditure to improve capacity)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

 Whilst I am not opposed to new housing in West Horsley per se; the scale of this proposed development in West Horsley is excessive and as set out above not reflecting need in any way. In particular I am most strongly opposed to site A41. This site is critical to West Horsley’s semi-rural identity and character and it is vitally important that this open green aspect is maintained through what is, in so many ways, the centre of the village. Adoption of A41 would enable this open space to become the only development of any significant depth along the whole of the southern side of the East lane / The Street corridor and would severely compromise this ‘green gap’ between the northern and southern parts of West Horsley.

This is contrary to at least two of the five essential purposes of Green Belt as defined at NPPF paragraph 80 (namely to check unrestricted sprawl and to assist in safeguarding the countryside from encroachment – functions which this part of the Green Belt, including this site, is recognised as performing at paragraph 8.2 of the Guildford Green Belt and Countryside Study).

This site had not previously been include as a potential development site within previous draft versions of the emerging Local Plan and assessment of this site, in background studies forming the evidence base for this Site Allocation, is based on incorrect information.

Two key incorrect bases are:

1. In the Guildford Borough Land Availability Assessment (LAA) 2016 – Page 388 in respect of site reference 2063 (‘the site of East Lane’) it states under ‘summary of land designations’ – “Green Belt adjoining settlement boundary”. This is incorrect. Unlike any of the other three sites proposed in West Horsley, this site currently has no boundary that adjoins the village Settlement boundary as defined in the GBC Local Plan 2003.

1. Also, The Guildford Borough Green Belt and Countryside Study produced by Pegasus Planning Group, Volume III – Appendix VI – Sustainability Walking Distance Plans for Land Surrounding the Villages refers to the above site, plus the field beyond that the Council now propose removing from the Green Belt (together with a section of Lollesworth Wood) as site D. All assumed walking paths to (i) Nearest Local Centre, (ii) Healthcare Facility and (iii) Railway Station are presuming that access could have been gained to Lollesworth Lane via the undesignated (save that it has been proposed to be removed from the Green Belt) field to the south and fronting Lollesworth Lane. This field is currently used for grazing sheep and is owned by Mr & Mrs. Richard Wills of Lollesworth Farm and they have advised me and others that they would not permit such access route across their field, therefore the assumption used by Pegasus Planning Group is incorrect and may well have a material effect on their conclusions.

Furthermore, any development on A41 would not be consistent with the distinctive settlement pattern of the village and the important relationship between the built environment and the surrounding landscape (i.e. development on one side of the route only). In my opinion, it will harm important views of the village from surrounding landscape (from Lollesworth Lane) and from within the village of local landmarks (of Lollesworth Wood), contrary to Policy D4 of the Proposed Local Plan.

Allocation of the site will not “promote sustainable patterns of development” and the wildlife / environmental amenity loss of this site is likely to result in a significant detriment to the village’s character. Furthermore it will cause harm to the biodiversity and natural environment of the adjoining Lollesworth Wood SNCL. Indeed, this is contrary to Sustainability
Objective 1 of the Sustainability Appraisal framework set out at Table 4.1 of the Guildford Borough Local Plan Sustainability Appraisal.

Policy I4: Green and blue infrastructure; states that “Permission will not be granted for proposals that are likely to materially harm the nature conservation interests of local sites unless clear justification is provided that the need for development clearly outweighs the impact on biodiversity.” Local Sites are earlier defined in the policy as including Sites of Nature Conservation Importance (SNCI).

Furthermore, there is no reason at all for the amendment to the Greenbelt behind the field beyond site A41 other than to prepare for a potential second phase development in the next Local Plan and surely it cannot be considered to be justified by “exceptional circumstances” when no alternative use is currently proposed and its current and historic use is as pasture?

I strongly object to the alteration of the Greenbelt around A41 and the field beyond and to the inclusion of A41 in the Local Plan.

Across any of the adopted sites in West Horsley, careful consideration must be given to the proposed density of any future developments. The current proposed density is not appropriate for such rural and semi-rural village location and are out of character for the village as it currently largely comprises low density housing, with a considerable mix of ages and housing styles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Our representations with respect to Policy A41 are set out in Section 4 of our submission.

**Representation on Policy A41: Land to the South of West Horsley**
Introduction

1. This representation is submitted on behalf of Countryside Properties in response to the Council’s decision to allocate Land to the South of West Horsley as a Strategic Site Allocation (Policy A41) in the Regulation 19 Proposed Submission Local Plan.

1. This pastoral farmland, of approximately 8 ha, has been identified in the Submission Local Plan as a housing allocation for approximately 90 homes (C3). The site comprises of 2 fields currently used as pasture and paddocks.

1. Below we briefly set out why we consider the proposed allocation is less sustainable than our Client’s site on land to the south of New Pond Road,

1. With regard to the landscape and visual impact of the proposed allocation and Green Belt considerations, we refer below to the key findings of the ‘Site Comparison Study’ prepared on behalf of our Client by Barton The full findings of the Study are set out in Appendix 4.3.

1. In terms of sustainability we draw upon the findings of the Sustainability Appraisal (SA) of the Guildford Proposed Submission Local Plan, which we have, where necessary, amended to address inaccuracies that we have noted with respect to our Client’s These results are set out in a table (see Appendix 4.4).

Landscape and Visual Impact

1. Barton Willmore has produced a Site Comparison Study, which provides a comparative assessment of our Client’s site against 4 other sites that have been identified as housing allocations within the Proposed Submission Local These were selected on the basis that they are also located outside of the settlement boundaries, within the Green Belt and are non-strategic. The sites are:
   - Policy A38: Land to the West of West Horsley
   - Policy A41: Land to the South of West Horsley
   - Policy A44: Land to the West of Winds Ridge and Send Hill, Send
   - Policy A47: Land to the East of The Paddocks, Flexford

2. Below we identify some of its key findings with respect to the impact of the development of Site A41 on landscape character:
   - Potential for substantial loss of vegetation along East Lane to accommodate the frontages of new development and new access routes which would comprise hedgerows and mature trees, particularly along its boundaries;
   - Further urbanisation and also the perception of encroachment of the settlement pattern in a southerly direction; and
   - Visual effects to views from the adjoining properties, and PRoW

3. With respect to the contribution that Site A41 makes to the function of the Green Belt, Barton Willmore identified that:
   - Development would result in the erosion of the semi-rural lane character of East Lane which would become wholly suburban in character in this location, with residential development on both sides and therefore would result in substantial encroachment.
   - Development in a southerly direction from East Lane would result in an alteration to the settlement pattern. Furthermore, there is no robust defensible boundary to the southern part of the site, so the local landscape to the south would therefore be subject to further development pressure.

4. Barton Willmore’s study concludes that our Client’s site is comparative with the other sites in relation to landscape and visual considerations, in that it does not score significantly differently from the others to warrant its exclusion from the Proposed Submission Local Plan. In fact, our Client’s site scores considerably better in some respects to the other sites with regard to landscape and visual considerations, for example, our Client’s site is of lesser tranquillity due to the fact that it is adjoined by New Pond Road, and does not contain any footpaths, listed buildings or notable landscape features within the site.

Sustainability
5. JBPA has produced a Site Comparison Table (Appendix4) which looks at the same 4 sites identified in the Barton Willmore Assessment in terms of their overall sustainability as proposed housing allocations. It also compares these sites with our Client’s land at New Pond Road, Farncombe, and with land to the south of Normandy and north of Flexford (Site A46) which has been brought forward as a new proposed housing allocation at the Proposed Submission Draft stage of the Local Plan. A separate representation on Site A46 is included with our submission in section 5.

6. When considering sustainability, we have drawn initially upon the findings of the Sustainability Appraisal (SA) of the Guildford Proposed Submission Local We have, however, where necessary amended the scorings to address inaccuracies that we have noted in the SA with respect to our Client’s site. This includes correcting the distance to the nearest Primary School as the SA suggests this is less than 2km, when in fact it is less than 1km. We have also identified from available MAFF records that our Client’s land contains Grade 3 agricultural land, as opposed to Grade 1 land which is identified in the SA.

7. Below we set out our key conclusions when comparing Site A41 with our Client’s site:
   ◦ Site A41 scored poorly (red) in relation to 8 sustainability criteria, whereas our Client’s site only scored poorly in 3 criteria.
   ◦ Site A41 is further from a key employment site, healthcare facilities, recreation facilities, a secondary school and a railway station than our Client’s site.
   ◦ Site A41 is closer to a European Site (SPA and SAC) and a Designation of Local Importance than our Client’s site.
   ◦ Our Client’s site scored worse than A41 with respect to flood risk, and its location within the AONB, however we have demonstrated in our site specific representation in relation to our Client’s site (Section 3) that it makes limited to no contribution to the special qualities and features of the Surrey Hills AONB, and that the area of the site within a flood zone has been agreed with the Environment Agency and will be left.

Conclusion

8. Informed by the findings of Barton Willmore’s “Site Comparison Study” and the Sustainability Appraisal of the Guildford Proposed Submission Local Plan, this representation sets out why we consider the proposed allocation at land to the South of West Horsley (Site A41) is less sustainable and suitable than our Client’s site on land to the south of New Pond Road, Farncombe.

9. Barton Willmore’s study identifies that the site makes a substantial contribution to two Green Belt purposes and its development has the potential to have substantial visual effects, including the loss of vegetation along East Lane to accommodate the frontages of new development; adverse visual effects to views from the adjoining properties, and PRoW 98; and the perception of encroachment of the settlement pattern.

10. With respect to Sustainability we have determined that the site scored poorly (red) over significantly more sustainability criteria than our Client’s Thus, our Client’s site represents a more sustainable location than a comparable site identified in the Proposed Submission Local Plan.

Tests of Soundness

11. We consider that there is a risk of the Local Plan being found unsound with the proposed allocation of Site A41, instead of our Client’s site on land to the south of New Pond Road, because it will not be ‘justified’, as it does not represent the most appropriate strategy, when considered against the reasonable alternatives.

Proposed Modifications

12. In view of the above considerations, we believe that Land to the South of West Horsley (Site A41) should be removed from the Local Plan prior to submission for Examination.

We have concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing drainage infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to underestimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.

There are limited surface water sewers in the area so would need to understand the drainage strategy for this proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A41

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of Policy A41 relating to land south of East Lane. This is in contravention of para 85 NPPF which states that borders must clear and readily recognised. The natural border is the wood to its east. The inclusion of this site is not in keeping with the current settlement and character of the village; houses front East Lane up
the woods to the east of this site which borders the road for approximately 400 yards. The land is green belt, no exceptional circumstances are made.

Introduction
1. These representations are submitted on behalf of Mr Stephen Isaac (who owns the greater part of site A41) and the Raleigh School. They are to address proposed changes in the amended draft local plan.

2. The south-west part of A41 (extending to some 1.05 ha and identified as parcel 7 on the conceptual plan) is owned by Mr Duncan Roe but who is not a party to these representations. It is relevant to note that Mr Stephen Isaac has a binding covenant over "parcel 7" prohibiting the erection of any buildings without his consent: accordingly he is able to control any development over that part of A41.

Previous Submissions
3. On 15 July 2016 submissions were made to, primarily, relocate the Raleigh School from its present 2 sites onto A41 and to increase it from a 2FE to a 3FE primary school: this partly to take up the existing waiting list but also having regard to the inevitable additional need arising from the new housing proposed in the locality. The cost being funded through the redevelopment of the school's existing sites.

4. It is not intended to repeat the points made in the previous submissions but, instead, to append them to these further (current) submissions.

Current Submissions
5. From the response to our July 2016 submissions it would appear that the principle reason for not accepting the relocation of the Raleigh School onto A41 was the uncertainty as to the viability and, therefore, deliverability of the site for that purpose. These submissions, therefore, address the viability (and hence deliverability) of the site.

Enclosures
i. Location Plan to identify the Raleigh School and A41 in the context
ii. Site A-11: Conceptual Master Plan (July 2017)
iii. indicative housing site layout for the Raleigh School campus site
iv. A copy of the July 2016 Submissions

6. Before dealing with the viability aspects we would point out that, having considered public views, the conceptual plan has been amended to substantially reduce the extent of housing from 1.45 ha down to some 0.50 ha. Thus, rather than 20 very low density dwellings, it is now proposed to have 10 smaller low/medium density dwellings. The effect of this is to increase very significantly the amount of open green space. It will be noted that the area now proposed to be utilised either as open playing fields or as paddocks is increased by over 50% from the July 2016 proposal to some 3.3 ha: now virtually 70% of the site.

7. The location of the new school and its associated car park has also been moved closer to East Lane which we believe is a more realistic site for the built part of the new school. In addition a drop-off/pick-up parking area is shown intended to be formed by a green "Grasscrete" type construction.
8. In order to assess the viability it is necessary to have a realistic assessment of the number of dwellings that the school's existing two sites might accommodate. For this purpose an indicative, policy compliant, layout plan has been produced for the main campus site (that extends to some 1.09 ha) which, being a slightly awkward shape and surrounded by housing, has to have proper respect to adjoining properties.

9. The indicative layout plan shows 17 x 3 and 4-bedroom open market dwellings and 11 (39.3%) x 2 and 3-bedroom affordable dwellings. In addition 0.13 ha of public open space is indicated. This gives a density of some 25.7 dph on the gross area or 29.2 dph on the net area. Thus the density is relatively low and I have no doubt could be increased but, for the purpose of assessing the viability it is appropriate to work on a conservative, rather than optimistic density. However the reality is that the site can readily accommodate at least 30 dwellings.

10. The playing field site extends to some 1.34 ha and has the benefit of full vehicular and pedestrian access over Weston Lea with such right of way having been reserved when the Weston Lea site was sold by Surrey County Council to New Ideal Homes in 1984 and where specific reference in the reservation was made in the possible residential development of the playing field site.

11. We are aware that, at present, the Environment Agency Flood Map for Planning indicates the east half of the playing field as being within Flood Zone 3. We have had informal discussions with the promoters of site A39 who have advised that the EA has accepted that their Flood Map is incorrect and are in the process of redrawing it. The effect will be that, probably, no more than 0.25 ha will be within Flood Zones 2 or 3. With local evidence indicating that the playing field has not suffered from flooding in living memory it would be appropriate to utilise part of that 0.25 ha as public open space. Thus a realistic assessment for the playing field is some 35 dwellings.

12. The school has taken formal advice of Knight Frank which suggests that (based upon planning permission being granted for the redevelopment as outlined) the two sites should yield a land value of some £13.0 million allowing for a 40% affordable housing provision. It is relevant to note that GBC has the ability to reduce the affordable housing provision where viability may be an issue. Thus the affordable housing provision was reduced to 20% this would add some £2.0 million to the land value.

13. The 10 houses proposed for A41 should realise a land value of £2.5 million. A further factor is that there will be significant Infrastructure Contributions from the new housing proposed under the new local plan within the school's catchment area. This should generate a further, approximate, £1.5 million available for primary education provision that should be made available specifically for the benefit of the third form entry element of the new Raleigh School: such being largely required to service those new dwellings.

14. Thus the redevelopment of the Raleigh's existing 2 sites, the 10 dwellings proposed on A41 and the infrastructure contributions should yield an aggregate of some £17 million (or £19 million if the affordable housing is reduced to 20%) for the new 3FE primary school and sports hall on A41.

15. It is further relevant to note that this does not factor in any financial contribution from Surrey County Council, as the statutory education provider, for the third form element of the 3FE primary school.

16. Based upon information provided to us by Surrey County Council an "all in" cost for the new 3FE primary school (as indicated on the conceptual plan) is likely to be some £13.0 million. The sports hall will add a further £2.5 million giving an aggregate of some £15.5 million. Thus there is an approximate £1.5 million (or £3.5 with a 20% affordable provision) cushion between the anticipated development costs and the land value (including infrastructure contribution) proceeds.

17. The Raleigh School would not embark on this project unless they were confident that it was a financially viable proposition. We trust that this further information will demonstrate that viability (and hence deliverability) is not an issue. Accordingly the amended draft local plan can be further amended to reflect the redevelopment of the Raleigh School's existing sites and its relocation onto A41 as proposed.

Proposed designation of Playing Field
18. We were concerned to see the proposal to designate the West Lea playing field as Open Space. Entirely without prejudice to the submissions detailed above, if you are still minded not to accept the relocation of the Raleigh School onto A41 then we consider the designation of the playing field as Open Space would be wholly inappropriate for a piece of land that would then, by necessity, remain a private playing field for a primary school. Thus, under those circumstances, the designation of that land should remain purely for what it is (and therefore would continue to be): Playing Fields.

I object to this development because the additional traffic from that development coupled with the traffic from the new marina with 80 berths which you have agreed further down Tannery Lane which is mainly a single lane with passing places.

The Marina was identified as a high priority requirement and something the village apparently ‘had to have’. Having spoken to many locals, it would appear that this would have been so far down their list of requirements to actually not be on the list at all! It was a travesty the development was voted through by GBC when clearly there were valid objections.

These same objections remain and will be compounded by the inclusion of the Clockbarn nursery site. This additional traffic will be unable safely to join the much overused main road through Send. This road is the main through road from Woking to the A3 and M25 which is already used to capacity especially by articulated trucks and heavy vehicles for which the road was never designed. Additional traffic joining from Tannery Lane would have great difficulty and any attempt to ease the problem with a roundabout or traffic lights would simply exacerbate the situation.

The access point is so narrow it would clearly be a safety hazard and a potential accident black spot. Vehicles would not be able to join the main road and so would back up along Tannery Lane at peak times. This would be really dangerous and if there was an emergency then the necessary services would be unable to gain access to the site and attend the incident and this could have serious consequences.

GBC has a responsibility to its residents to ensure proposed developments meet highways safety standards and I fail to see how an access point at a narrow junction of Send Road and Tannery Lane will meet this.

**A42 Clockbarn Nursery, Tannery Lane**

As stated many times previously, this narrow lane does not lend itself to accommodating more traffic. It should also be noted that planning permission for 63 apartments is already granted at the Tannery under reference 14/P/00575 and 00576 as amended. An additional 45 houses on Clockbarn Nursery would increase the number of dwellings in Tannery Lane by nearly 400%.

The junction with Send Road (A247) is busy and has poor sight lines. In the other direction it enters Papercourt Lane which is even narrower. The land currently floods, despite the recent improvements to the road drainage from digging out ditches. A planning application for a large Marina in the same lane was recently granted and the spoil from this development was to be placed on this land. These actions will only exacerbate this flooding problem for everyone in the lane, and for properties in Send Road and Wharf Lane.

Clockbarn Nursery is designated as agricultural land within the Green Belt. The fact that it has been allowed to deteriorate should not be a passport to changing its status. It is a nesting habitat for bats which are a protected species.

Residential Land Allocations in Send, Send Marsh/Burnt Common

6.01 Send Parish Council object to the following proposals related to residential land allocations included within the 2017 draft Guildford Local Plan:

- Site A42 – Clockbarn Nursery, Tannery Lane, Send – 60 homes.

The reasons for objection are detailed below.

6.02 The 2016 draft Local Plan included Clockbarn Nurseries on Tannery Lane as a residential site allocation for 45 homes. As part of the consultation process, Send Parish Council made representations to Guildford Borough Council regarding this allocation. These representations stated Send Parish Council’s concerns regarding the undue stress that the development would exert on the village’s infrastructure and the flooding concerns of the site. Other information, such as with the marina application, emphasised other aspects, such as the importance of the area to flora and fauna, such as bats. Further information on these concerns can be seen in greater detail in Send Parish Council’s representations made in July 2016.

6.03 The 2017 draft Local Plan once again includes a residential allocation on the site of Clockbarn Nurseries. However, despite the site not changing in size, this allocation has been altered to increase the allocation from 45 new homes to 60 new homes. It is not clear on what basis the plan has deemed an increase to be acceptable.

6.04 Send Parish Council view this increase in the proposed number of homes on the Clockbarn site to be unacceptable. The stretch of Tannery Lane that connects the site to the Send village is narrow and it is difficult for vehicles to pass, especially large commercial vehicles that would be involved in the construction process. Short term parking along this stretch further limits accessibility to this site. Pedestrian infrastructure would be required in order to create a safe environment that pedestrians can use. Furthermore, the consented Marina scheme on the adjacent land and any proposed intensification of Send Business Centre (see also 5.07 – 5.13 above) would significantly increase vehicular flow along Tannery Lane, past the Clockbarn Nursery site. The increase in the number of proposed homes from 45 to 60 would simply exacerbate this problem, making the issues of accessibility and pedestrian safety even more acute.

6.05 The parish council are also concerned that the cumulative, strategic picture regarding transport and the impact on Send Road is not clear enough in the current plan.

6.06 Changes sought to make the Local Plan sound:

- Remove Allocation A42.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the proposal to build 45 houses at Clockbarn Nursery. This would be additional to housing development at the Tannery, and the major scheme for further marina space in the area. The local roads are wholly inadequate for the totality of all this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3590  Respondent: 8566049 / Mr David W Lazenby  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A 42, for an Increase in number of houses in Tannery Lane. No proper reasons are offered for this large increase which would aggravate the road traffic congestion, and overload local services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3187  Respondent: 8571137 / G Mansbridge  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to POLICY A42, CLOCKBARN TANNERY LANE: because it will illegally erode the Green Belt in Send Village, cause more flooding due to the greater number of houses proposed and worsen traffic problems and pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3723  Respondent: 8574369 / Douglas French  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the building of 45 houses on the Clockbarn site in Send (ref A42) which is designated as agricultural land within the Green Belt. The fact that it has been allowed to deteriorate should not be a passport to changing its status. It is not suitable because it has poor access and the road cannot take the additional vehicular traffic which 45 houses would generate.

I OBJECT to the Building of 45 houses on Clockbarn because the road already suffers from serious overload, as previously accepted by Surrey County Council. An additional 45 houses would increase the number of dwellings in Tannery Lane by nearly 400% because planning permission already exists for 63 apartments at the Tannery business centre site under reference 14/P/00575 and 00576 as amended. It is disingenuous for GBC to express the belief that these may not be built. GBC gave permission and the owner has the right and locally it is understood the intention of building
them. Indeed work has commenced. Added to this would be the traffic generated by building and servicing the new narrow boat basin or “marina” under reference 14/P/00289. The road cannot cope with the traffic volume it currently has and could not possibly accommodate the massive increase in vehicular traffic consequent on these three developments. In simple terms if the number of dwellings increased by 400% so would the volume of domestic traffic in addition to an increase in commercial traffic. This does not bear thinking about.

I OBJECT to the building of 45 houses on Clockbarn because this massive increase in traffic would severely impact the junction of Tannery Lane and Send Road where there is a problem every day because of poor visibility for traffic emerging from the side road causing danger and congestion to traffic on the main road. The suggestion that this would be alleviated by traffic lights is completely wrong as the installation of temporary traffic lights in Send Road earlier this month demonstrated. When traffic has to stop in either direction, as it does for traffic lights, Send Road quickly gets gridlocked.

I OBJECT to the building of 45 houses on Clockbarn because it fails to take into account the cumulative impact on traffic volumes in the rest of Tannery Lane. Tannery Lane is very narrow, twisty and dangerous for its entire length. Much of it is single track with passing places and blind spots. There is a problem all the way down with vehicles trying to pass each other. When they meet they very often have to reverse in order to find a passing place. The problem is exacerbated by the high proportion of HGVs and large commercial vehicles currently going to the business centre, and destined to increase when the narrow boat basin is built. Tannery Lane is also very long. The biggest problem, which is often overlooked because planners fail to go there, is the stretch beyond the business centre going north. The final stretch of Tannery Lane before it joins Polesden Lane is only 9 feet wide for a distance of nearly 400 metres and cannot be made wider because of the nature reserve. A significant proportion of the traffic, estimated at about one third, enters Tannery Lane via Polesden Lane or Papercourt Lane which are themselves extremely narrow, especially Papercourt where some of the front garden boundaries on either side of the road are within little more than three metres of each other. There is also the extremely dangerous blind bend to the right when joining Newark Lane. These lanes were not meant for the high number of cars, vans and lorries which currently use them and could not possibly cope with an increase of the amount which would follow from this development, on top of the others.

The suggestion sometimes made that Tannery Lane could be widened totally fails to appreciate the constraints which exist. Any attempt to widen it would be defeated by the fact that the entrance from Send Road does not provide space for any significant widening; the Papercourt Lane exit is so narrow that front gardens on both sides of the lane would have to be compulsorily purchased; the stretch from Prews Farm Cottages to Papercourt Farm runs immediately alongside Papercourt Marshes so there is no scope for widening and in any event further traffic would damage Papercourt Marshes; the stretch from Papercourt Farm to the junction with Polesden Lane is single track nine feet wide which also runs alongside Papercourt Marshes. In any event a widening of Tannery and Papercourt by itself would be insufficient - because of the bends it would need to be straightened as well, a hugely expensive and well-nigh impossible task. In the whole of the Borough of Guildford, if one set out to find somewhere to build houses, Tannery Lane would be close to the bottom of the list of potential sites from the point of view of road access.

I OBJECT to the building of 45 houses on Clockbarn because there are virtually no pavements. The increase in traffic would therefore mean that pedestrians would face much greater risk. The only surfaced pavement in Tannery Lane is the first short section from Send Road confined to the north side. The other side is unsurfaced. After Peasblossom Cottage (about 80 metres from the junction with Send Road) there are no further pavements on either side for its entirety. Pedestrians walk in the road and have to dodge the traffic as best they can.

In addition to vehicular traffic it is used by residents and their visitors on foot: residents from Send Road and adjacent roads walking their dogs; walking groups and ramblers (on their way to Newark Priory, Ockham Mill and the Pyrford Water Meadows); equestrians; sports and recreational cyclists (because it is in the guide books as part of the cycling network based on Ripley); and anglers who fish in the Wey Navigation. It is therefore enjoyed by a lot of people whose safety should not be further jeopardised, and for whom a village amenity should not be ruined completely, by increasing any more the excessive number of vehicles the road already has to cope with.

Tannery Lane is an ancient rural road which is rich in wildlife which should not be damaged by pollution caused by increased traffic volumes. Clockbarn itself is a nesting habitat for bats which are a protected species, making it not only unsuitable to build there but a criminal offence to do so. Additional traffic pollution and noise alongside Papercourt Marshes will be detrimental to wildlife there too.
I OBJECT to building 45 houses at Clockbarn because all the land in that area is prone to flooding. Although the Environment Agency maps include the area in flood zone 1 the reality is different, as a great deal of photographic evidence and local testimony can show.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/1571  Respondent: 8574369 / Douglas French  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn Nursery in Tannery Lane because the increase to 60 homes in place of 45 homes will overcrowd the site and result in even more traffic on Tannery Lane, which is a long, narrow and twisting lane with few passing places and many blind corners. I do not understand why Guildford Councillors cannot see the dangers that this poses to drivers, cyclists and pedestrians alike. The A247 junction with Tannery Lane is already a dangerous crossroads with poor lines of sight which will become even busier.

Surface water flooding in the area is already bad, will be worsened by the concreting over of this land.

Clockbarn Nursery, Tannery Lane, Policy A42

3.1 I object to the Policy 42 change at Clockbarn Nursery in Tannery Lane. It is regrettable that notwithstanding the hundreds of representations explaining to GBC why this site was unsuitable for 45 houses, they have chosen to increase the number by one third to 60 houses. All the reasons previously advanced against 45 are still relevant only more so. Building 60 houses would exacerbate even more than 45 the extremely dangerous road junction where Tannery Lane joins the A247 Send Road. The road is narrow, there are no pavements beyond the first 100 or so metres and pedestrians, cyclists and country ramblers are currently at considerable risk. Increasing the concentration of houses and therefore of cars would be contrary to common sense.

3.2 I object to 60 houses because it would erode the Green Belt in Send village even more than 45. Clockbarn is within sight of the conservation area of the Wey Navigation and no exceptional circumstances have been shown. Before Green Belt land is used for housing it is necessary to show that exceptional circumstances exist. As a series of Court of Appeal cases have shown it has to be demonstrated that the harm to the community at large by taking Green Belt for housing would be less than if it were not taken. The crucial words, which the last version of the local plan ignored and this one continues to ignore, are “to the community at large”. As the Court of Appeal has pointed out one cannot rely on objectively assessed needs for housing without at the same time having regard to the policy restraints. Exceptional circumstances will not exist unless the potential harm to the Green Belt has been shown to be outweighed by other considerations. Harm to the Green Belt is one of the factors which the NPPF requires to be taken into account.
3.3 I object to the building of 60 houses on this site because of the presence of common and soprano pipistrelle bats all over the site and their roosts on the adjacent plot. This would be in danger of breaching the Wildlife and Countryside Act 1981 (Section 5), the Conservation of Habitats and Species Regulations 2010 (Schedule 2).

3.4 The site is full of other wild life too including some rare birds. Since it is within 5 km of the Thames Basin Heaths Special Protection Area development on this site could be contrary to Guildford Council’s own SPA Avoidance Strategy. As such it should not be included in the local plan.

3.5 The NPPF makes it clear that “the planning system should contribute to and enhance the natural and local environment by… minimising impacts on biodiversity and providing net gains in biodiversity where possible” (Para 109).

Since this objective will be virtually impossible to realise on this site it should not be included in the local plan.

3.6 GBC must be aware that the recent Surrey Wildlife Survey of flora and fauna showed that Surrey has suffered a very much higher rate of loss in species than the UK as a whole – 12% as compared to a national loss of 2%. Of a total of 404 priority species almost 31% are already locally extinct in Surrey while 37% are threatened or in worrying decline. When considering developments GBC should have regard to their obligations in this direction. If they are prepared to ignore them they should be asking themselves whether they are acting responsibly.

3.7 We are asked under Regulation 19 to restrict our comments to changes in the local plan. My objection to 60 houses should not be interpreted as an acceptance of 45. As made clear in 2016 my objection is to any houses at all on what I consider to be an unsuitable site. So my comments this time should be read in conjunction with what I said in 2016 and 2014.

Objections relating to both Send Business Park, Green Belt Policy 2 at paragraph 4.3.15 and Clockbarn Nursery, Policy A42.

4.1 I object to both developments on the grounds of susceptibility to surface flooding. There is considerable surface water flooding risk in Tannery Lane, as residents know only too well from their experience almost every year. It does not appear from their evidence base that GBC has explored this adequately in the same way as they did not do so in respect of last year’s narrowboat basin application to which they could usefully refer. GBC’s level 2 Strategic Flood Risk Assessment 2016 makes no reference to Tannery Lane at all. It may be that they are relying on wet spots data from Surrey County Council but this is known to be inadequate. Primary sources, such as Envirocheck, whose work is based on the British Geographical Survey Flood Data, show ground water at 0.4 metres below ground level on the bend in the road near Maybankes. This is at the eastern corner of the Clockbarn site.

4.2 Local testimony asserts that some of the buildings at Send Business Park suffer from ground water flooding affecting their foundations which appears to be exacerbated by proximity to the Wey Navigation. This makes the site unstable and unsuitable for further development.

4.3 GBC’s Strategic Flood Risk Assessment needs updating. The aggregate effect on flood risk of the Narrowboat Basin, plus Clockbarn plus Send Business Park would contravene paragraph 100 of the NPPF, that inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk. At the very least all sources of flooding need to be correctly assessed which GBC has not done.

4.4 There is no recognition of the impact of these developments on sewage facilities which are already at full capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Land at Clockbarn Nursery, Tannery Lane, Policy A42

Objection

Send’s contribution has been increased at this site with no justification despite a reduction in overall housing numbers in the borough and the large number of previous objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3188  Respondent: 8586017 / Leslie Brown  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to this development because of the additional traffic from that development coupled with the traffic from the new marina with 80 berths which you have agreed further down Tannery Lane which is mainly a single lane with passing places. This additional traffic will be unable safely to join the much overused main road through Send. This road is the main through road from Woking to the A3 and M2S which is already used to capacity by general traffic including articulated trucks both local and European plus all manner of other heavy vehicles for which the road was never designed. There is also an increasing number of cyclists who are more at risk without a cycle lane for which there is no room and who slow the traffic down because they are difficult to pass. Additional traffic joining from Tannery Lane would have great difficulty and any attempt to ease the problem with a roundabout or traffic lights would simply exacerbate the situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY A42 Pages 241-2

I object to the proposed increase of a further 16 houses on the Clockbarn Nursery site. Traffic movements from that site coupled with traffic accessing the Marina development and then trying to join Send Road would cause considerable problems for residents and through traffic alike. Send Road is already used to capacity by traffic heading to and from Junction 10 on the M25 and was never intended to be used by today's very large articulated trucks. The essential traffic islands to enable pedestrians to cross represent an additional hazard plus the increasing number of cyclists exposed to rising levels of exhaust pollution.

Comment ID: PSLPS16/8222  Respondent: 8589953 / Michael R. Murphy  Agent:  

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to building 45 houses at Clockbarn Nursery.  

There is inadequate access and high local traffic volume.  

Planning permission has been given for 64 apartments at the Tannery and for building the Marina. This will generate additional heavy traffic. By adding another 45 houses this will greatly add to the traffic already there it will be even more chaotic. The junction with Send Road is already very dangerous for vehicles joining the Main Road, this proposal will make it even worse.  

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to CLOCKBARN NURSERY TANNERY LANE POLICY A42 because:

Increasing the homes from 60 instead of 45 is an increase of 33% is far too many.

Why have all the previous objections been ignored and then you have added to the number of houses?

The Junction of Tannery Lane and the A247 are at gridlock, lots of times each day at present, and coming out from this junction is VERY DANGEROUS.

Adding any houses to Tannery Lane would add to the danger but 60 houses with say another 120 vehicles as well as delivery vans will give constant gridlock, and accidents.

It will add to the existing surface water flooding.

As a boat user on the River Wey Navigation it will detract from the lovely views from this Canal.

It will further erode our precious Green Belt, which the Government is Committed to keep.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY A42

1. I object to the development of Clockbarn Nursery (A42). The site has very restricted access along Tannery Lane. Tannery Lane is narrow and is already overused as a route to the local Business Park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7198  Respondent: 8591521 / Mark Daniell  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to A42. Tannery Lane has already been designated for the development of a marina which will put more traffic on a narrow road. There is inadequate access to the proposed site for 45 houses and the increase in traffic will cause more burden on Send Road which is frequently solid with cars.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/408  Respondent: 8594721 / Mr Peter Eperon  Agent:
I object the A42: Clockbarn Nurseries, Tannery Lane.

This lane is also very narrow and, because of recent Marina approval it will make access into Send Road even more dangerous.

To summarise:
All these proposals are being built on what was green belt and it seems extremely underhand by moving the green belt boundary Jines. This goes against the Secretary of State guidelines and Government planning Minister. A letter received received from Sir Paul Beresford in July, 2014 stated that only in exceptional circumstances could properties be built on green belt land. These proposals could be built on brown fields and do not show special reasons for green belt building. With reference to Send Hill development this a complete residential area and could not cope with a large increase in traffic including commercial lorries being used by travellers. However the Clock Barn site is more suitable for commercial vehicles. I am also surprised that Ewbanks brown belt site was suddenly abandoned as it would seem more appropriate for industrial usage and homes. I would be most interested to know how and why this occurred and the other sites suggested were put in at the last moment before the meeting on 24th May. This gives very short notice for discussion.

A copy of this letter is being sent to the Secretary of State, Ministry of Planning, our local Member of Parliament and Prime Minister, David Cameron.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

In specific terms, I objected to the original proposal to build 45 homes in Tannery Lane, which is narrow and twisting, with a junction in the village that is often difficult to negotiate, and Tannery Lane itself already serves as a terrifying drive or walk for locals with goods vehicles, vans and the like coming from and going to the industrial units by the Wey. Guilford's response to this is to INCREASE the number of homes being considered. I therefore also object to Policy A42; a one-third sized increase in the number of houses now being proposed and I fail to see how this increase will improve the traffic at the junction in the village I have already objected to. We are already in danger of losing countryside views from the banks of the Wey, and this development will be fully visible from the towpath. Any housing in this low-lying area will obviously affect the situation with drainage, and may cause flooding in the locality on a more frequent basis, or in residential areas that do not currently flood.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

15. I object to the building of 45 houses at Clockbarn Nursery, Tannery Lane (Policy A42) on the grounds of inadequate access to and from the site. The roads surrounding the site are already hazardous, narrow and windy. Tannery Lane has already had planning permission granted for 64 houses and a marina and the location will not be able to cope with any more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2987  Respondent: 8598561 / Sarah Belton  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A42 - both to the original 45 homes and the latest increase to 60 homes, on the basis that it is on greenbelt land; that local roads are unsuitable and unable due to existing congestion to take further traffic increases, in particular the A247 Send Road. Tannery Lane is a narrow lane requiring single lane traffic in parts and unsuitable for increased traffic flow. I am also aware as a resident of Send for 14 years, that the proposed site in Tannery Lane is low-lying and subject to flooding, as are a number of other areas in Send and Send Marsh, and hence it is entirely unsuitable for housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2393  Respondent: 8598785 / Mr Roger Parslow  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42 change at Clockbarn in Tannery Lane because:

• It will increase access and traffic problems on Tannery Lane and at the A247 junction
• It will make erosion of the Green Belt in our village worse
• It will impact open countryside views from the River Wey Navigation
• The housing proposed has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

I am writing to file my strong objections to the following amendments made to the Local Plan.

Clockbarn Nursery, Tannery Lane, Policy A42:

I object to Policy A42 as the number of homes planned has been increased from 45 to 60 homes. This is an increase of 33% and ignores all previous objections from local residents.

Tannery Lane is a single track narrow lane which has traffic and access problems onto the A247. Send Business Park traffic is already a problem without increasing this by more homes.

The Policy will erode more Green Belt. As Guildford Borough Council is a Conservative Constituency who promised not to build on Green Belt - this is totally unacceptable.

There is surface water flooding in this area and building homes on this land will add to the problem.

The countryside around Send will be lost and the rural feel of the area which is part of the attraction of Send.

<tr>
<td>I object to Policy A42 of the Local Plan because you have ignored my original objection and increased the number of houses from 45 to 60 houses. This will further increase the traffic entering Send Barnes Road. This road and intersection is already too narrow to take the existing traffic. The footpath at the nearby traffic lights is far too narrow, this footpath is used by mothers and children on the way to and from school. The path is so narrow that mothers cannot walk side by side. This is an accident black spot about to happen. This development is a further erosion of the green belt, which the Prime minister has said will not happen.</td>

I object to 45 houses at Clockbarn Nursery.

I object to this site because of the inadequate access and traffic volume. In one direction Tannery Lane is very narrow and twisty, being reduced to single lane traffic in many spots with passing places only; in the other junction onto Send Road is very dangerous and inadequate. Planning permission has already been given for a marina and 64 apartments which will
increase the traffic greatly. I request that my comments are shown to the Planning inspector who will decide on the Plan and also please confirm that you have received my objections. Thank you.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

(1) I object to the Policy A42 change at Clockbarn in Tannery Lane because:

The latest draft plan proposes 60 homes in place of 45 homes is 33% more than previously proposed. This shows a completed disregard for the previous comments and objections of the community.

Now more homes than previously proposed means all impacts previously stated will be greater, including:

1. This is an area with prolific birds and wildlife
2. Future access and traffic problems in Tannery Lane and at the A247 junction
3. Erosion of the Green Belt in our village
4. Surface water flooding, which is already a problem, will become even worse
5. It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the increase in housing proposed in Tannery Lane, A42. The housing at this site has been increased by a third since the 2016 plan. There are no proposed to improve the local road network (only to add more junctions with the A3). This region is already VERY congested and the failure to consider how to improve and support the local road network in relation to this increase in housing is senseless. This increase in housing should not be allowed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

A42 Clockbarn Nursery

There were thousands of objections to the original submission and these have been completed ignored. Rather than reconsidering the proposal in light of the objections the number of houses has been increased even more. The fact that this area is unable to sustain the increased traffic, erode the Green Belt further, add further problems to an area that already and seriously impact on the River Wey surrounding countryside.

2.1 A42 Clockbarn Nursery

I wish to object to this development. While this a brownfield site, my objection lies in the road access to the site. The junction of Tannery Road and Send Road is extremely narrow and will continue to be used by large lorries supplying the Tannery Business site. The road becomes single track beyond the Tannery. In addition to the narrowness many cars are parked close to the junction limiting site lines and causing difficulties in manoeuvrings (see figure 1)

I wish to object to the following policies affecting Send.

Site A42 -an increase of 15 new houses on the site

The demand for housing overall has decreased in the Local plan yet the number of houses in Send has increased. This site is down a single track lane with no pedestrian or cycle provision and is already busy with heavy vehicles attending the Send Business Centre.

1. Policy A42. Clockbarn Nursery, Tannery Lane, Send. Allocated for 60 houses in place of the previous 45 houses. Apart from being lined both sides with green fields for much of its length, Tannery Lane is a narrow route turning off from the middle of Send and where it turns off there is existing development either side adding to the traffic turning into it will cause further delays through the middle of the village and require a significant amount of infrastructure work.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3901  Respondent: 8817537 / Kim Meredith  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn Nursery in Tannery Lane for the following reasons:

1. There has been an increase in proposed building of houses from 45 to 60 – this is ridiculously too many for our area.
2. This totally ignores hundreds of previous objections by local residents.
3. Access to Tannery Lane at the A247 junction is not viable for the amount of traffic that will be incurred.
4. Tannery Lane itself if not capable of being used by large or numerous vehicles – it is a Lane.
5. This will be eroding even more of the Green Belt.
6. There is already bad surface water flooding in this area. This can only increase the problem.
7. This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

I object to the lack of proper infrastructure planning for sites (A43 and A42)
The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan".

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlick’s Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

1. Policy A42 (Send) – Object
   1. Loss of Green Belt Land
   2. Extension of Settlement Area of Send

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing to OBJECT to the level of development proposed for Site A42, Clockbarn Nursery, Tannery Lane, Send.

Tannery Lane is prone to surface water flooding, and the development of 45 new houses on this small plot of land would result in increased traffic along this narrow lane (single track in parts, without pedestrian pavements along most of its length), which is already under stress from existing traffic flows.

I do not believe that there is adequate space on this site to provide the number of houses proposed and adequate parking for its residents. The lack of sufficient car parking will result in more parking problems in the village. As public transport is poor in the village, it is likely that each of the houses will require one, if not two cars. If we take an average of 1.5 cars per house (which is the average level of car ownership in Guildford Borough, according to the 2011 Census), this would mean and additional 67.5 additional cars from this development. Given a very conservative estimate of one return journey a day for each of those cars, this would result in at least an extra 135 car moments on this already congested and narrow lane.

This level of development is inappropriate for this site and should be significantly reduced.

I would like the Inspector to see this comment.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

2) I OBJECT to the Policy A42 change at Clockbarn in Tannery Lane

I, along with hundreds of other residents as well as Send Parish Council have already objected to the earlier number of 45 homes on this site in the previous version of the plan. Incredibly, the current version of the plan actually proposes to increase the number of homes on this site to 60, a further increase of 33%, showing complete disregard to previous comments. I object to the designation of this site for 60 homes.

This site is prone to surface water flooding and this level of development will only make it worse.

Tannery Lane is a single lane track in points and traffic is already busy on the junction of Tannery Lane and A247. An extra 240 car journeys per day (60 x 2 cars x 1 return trip) from this location will exacerbate existing congestion in this narrow toad and in particular on this corner.

This particular plot is within Green Belt and thus development here within Green Belt, or changing the Green Belt boundary will be contrary to one of the important functions of Green Belt which is to provide separation between villages. No 'exceptional circumstances' exist to justify the development of this site.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3874  Respondent: 8839521 / Lynn Yeo  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the proposal to inset Send Business Park from the Green Belt, Policy A42

This is effectively an old non-conforming user in an area of outstanding countryside adjacent to the beautiful Wey Navigation. Further expansion or development at this location detracts from the openess of the Green Belt and is inappropriate. It is in a high sensitivity area of Green Belt on the banks of the River Wey, opposite some water meadows, adjacent to a Conservation Area and close to a SSSI. It is not clear why the ‘high sensitivity’ Green Belt designation given to this site in the 2016 version of the plan has been removed in order to inset Send Business Centre and the adjoining land from the Green Belt. I object to the removal of this site from the Green Belt.

There is highly restricted vehicular access along Tannery Lane in both directions. This road narrows to a single lane track in sections and would not be able to cope with any significant increase in vehicular traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4333  Respondent: 8839553 / David Burnett  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to OBJECT to the development proposed for Site A42, Clockbarn Nursery, Tannery Lane, Send.

It is unclear whether the houses proposed here are in addition to the existing shed / warehouse based businesses that are here, or instead of.

The site currently has derelict green houses, but this does not mean that the site is brown field – in fact the site is high value green belt land. Any development here should not be to the detriment of the character of the area, and should have particular regard to the Corridor of the River Wey conservation area (which this site sits within, and your plan document titled: Guildford_borough_Proposed_Submission_Local_Plan_-_strategy_and_sites_compressed.pdf fails to mention).

Tannery Lane is prone to surface water flooding, and the development of 45 new houses on this small plot of land would not help. Placing housing here would result in increased traffic along this narrow lane (single track in parts, without pedestrian pavements along most of its length), which is already under stress from existing traffic flows.

I do not believe that there is adequate space on this site to provide the number of houses proposed and adequate parking for its residents. The lack of sufficient car parking will result in more parking problems in the village. As public transport is poor in the village, it is likely that each of the houses will require one, if not two cars. If we take an average of 1.5 cars per house (which is the average level of car ownership in Guildford Borough, according to the 2011 Census), this would mean and additional 67.5 additional cars from this development. Given a very conservative estimate of one return journey a day for each of those cars, this would result in at least an extra 135 car moments on this already congested and narrow lane.
In developing this site in its entirety Guildford Borough Council are missing an opportunity to connect the River Wey Navigation to the village, either via Tannery Lane or Wharf Lane – via footpath or recreation ground – which would provide much needed leisure and fitness opportunities close to nature.

This part of Send has very little or nil street lighting – thus wildlife has flourished due to the adjacent field, hedgerows, meadows, and river Wey. I have seen bats, owls, deer, and many magnificent birds crossing in the vicinity of this plot. I would not like to see this impacted in any way.

The sewer system in Send already cannot cope with the level of housing and the new Vision Engineering factory and several of the newer developments are already pumping out their sewage at night. I don’t see how 45 houses will help the situation.

This level of development is inappropriate for this site and should be significantly reduced.

I would like the Inspector to see this comment.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to changes to Guildford’s Draft Local Plan, which call for an increase in the number of houses at Clockbarn Nursery from 45 to 60 houses.

I objected when 45 houses were proposed here. More housing has been approved along Tannery Lane (04/P/00576) and has yet to be built. Already the junction between Tannery Lane and Send Road cannot cope.

This particular plot is within Green Belt and thus development here within Green Belt, or changing the Green Belt boundary will be contrary to one of the important functions of Green Belt which is to provide separation between villages.

It will make surface water flooding, which is already bad, even worse.

It will impact open countryside views from the River Wey Navigation.

Vehicular access to this site is poor, as it is along a narrow section of Tannery Lane.

There are industrial units on this site and it is unclear from this policy’s proposal whether these will stay or go, making the use of this site unclear (poor planning).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Clockbarn Nursery, Tannery Lane - Policy A42 I object to the proposal that the number of homes should be increased to 60 for the following reasons:-

- Tannery Lane is narrow and has poor visibility
- The A247 is a very busy road and problems at the junction with Tannery Lane will be considerably worse

I object to housing on this site. It's Green Belt (NPPF 89). What are the exceptional circumstances that require this site to be developed?

It is within 5km of the Thames Basin Heaths SPA, and therefore any development is subject to EU/UK legislation (NPPF 119). The impact cannot be mitigated with SANGs because there is no evidence base to support SANGs as required by NRM6 viii, NPPF 158 and 166.

1. I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more vehicle movements.

This has been increased by a third since the 2016 version of the Plan. This will be a disaster for the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the Policy A42 change at Clockbarn in Tannery because:

• Send Road is already an extremely busy road, very heavily congested with traffic, more housing at Tannery Lane will increase traffic and pollution in Send Road.
• The increase to 60 homes in place of 45 homes is 33% more and too much
• It ignores all the hundreds of previous objections made by local people
• It will worsen access and traffic problems in Tannery Lane and at the A247 junction.
• It will make erosion of the Green Belt in our village worse.
• It will make surface water flooding, which is already bad, even worse.
• It will impact open countryside views from the River Wey Navigation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In addition to my concerns written to you on 18 July 2016 I wish to register further objections to the following amended policies that directly affect our community in Send:

1. Policy A42 Clockbarn Nursery, Tannery Lane, Send

Guildford Council has recently approved the development of a major new Marina development on Tannery Lane, in addition to the existing commercial operations at Send Business Park. Tannery Lane is a narrow, twisty, single track road with blind access to the A247 Send Road. This is already a dangerous and congested junction. The previous 2016 proposal A42 for 45 houses on Clockbarn Nursery was already unsuitable for this location. The proposed increase from 45 to 60 houses on this site will:

• clearly exacerbate all the previous planning objections for this site – traffic congestion and pressure on sewage infrastructure.
• In addition the extra houses will substantially increase pressure on parking and hence on service and emergency access e.g. ambulance transport for elder residents.
• This increase may appear trivial but is irresponsible for the welfare of new and existing residents in the neighbourhood.
• The development is proposed before the infrastructure impact of the new Marina can be assessed.

I object to A42 Clockbam Nursery Tannery Lane. I have previously objected in 2016 to building 40 houses but this has now be increased to 60. My objections to the 2016 plan remain valid. Site A42 is not sustainable for building houses as Tannery Lane and Papercourt Lane's are narrow and cannot cope with this number of homes being built in addition to a Narrowboat Basin which has been approved and is only accessible by Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1.1 We object to policy A42 Clockbarn Nursery

1.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.3 The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

1.4 The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

1.5 Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

1.6 Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

1.7 The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

SITE A42 TANNERY LANE, SEND

The increase from 45 to 60 new homes. This may seem small but with poor public transport in the area every home will be reliant on cars.

Why does GBC continue to ignore the people they serve? Concentrating most of the development in the NE of the borough is a recipe for traffic disaster and poor air quality. Why not spread the housing throughout the borough equally?
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockburn in Tannery Lane because instead of reducing demands the GBC have chosen to increase the number of new home by a third. All previous reasons for objection have been ignored making far worse the present access and traffic problems in Tannery Lane and the A247 junction. Send must retain its Green Belt and not add to the problems of surface flooding during parts of the year.

The river Wey Navigational Canal which flows through Send is a natural beauty and views for walking in open countryside. This must not be impacted further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the Policy A42 change at Clockharn Nursery in Tannery Lane
The addition of a further 15 residential units to a total of 60 units with the consequent increase in traffic in Tannery Lane and the A247 junction.
The effect of addition people on the local schools and Doctor's surgery.
The destruction of the Green Belt by this development.
The increase in surface water flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object the A42 Clockbarn Nurseries, Tannery Lane.

This lane is also very narrow and, because of recent Marina approval, will make access into Send Road even more dangerous.

To summarise:
All these proposals are being built on what was green belt and seems extremely underhand by moving the green belt boundary lines. This goes against the Secretary of State guide lines and Government planning Minister. A letter received from Sir Paul Beresford in July, 2014, stated that only in exceptional circumstances could properties be built on green belt land. These proposals could be built on brown fields and do not show special reasons for green belt building. With reference to Send Hill development this is a complete residential area and could not cope with a large increase in traffic including commercial lorries used by travellers. However the Clockbarn site is more suitable for commercial vehicles. I am also surprised that Ewbanks brown belt site was suddenly abandoned as it would seem more appropriate for industrial usage and homes. I would be most interested to know how and why this occurred and the other sites suggested were put in at the last moment before the meeting on the 24th May. This gives very short notice for discussion.

A copy of this letter is being sent to the Secretary of State, Ministry of Planning, our local Member of Parliament and Prime Minister, David Cameron.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Clockbarn Nursery, Tannery Lane, Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The plans have increased from 45 homes to 60 homes which is 33% and this is too much
- It ignores all the hundreds of previous objections submitted by local people
- It will increase problems with the traffic flow in Tannery Lane and at the A247 junction, which suffers from excess traffic flow when the A3 is blocked – a frequent occurrence
- It will cause erosion of the Green Belt in our village
- It will increase surface water flooding, which is already a problem and is increasing with further development
- It will impact on the open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2893  Respondent: 8911873 / Tamsin Meredith  Agent:

I object to the Policy A42 change at Clockbarn Nursery in Tannery Lane for the following reasons:

1. There has been an increase in proposed building of houses from 45 to 60 – this is ridiculously too many for our area.
2. This totally ignores hundreds of previous objections by local residents.
3. Access to Tannery Lane at the A247 junction is not viable for the amount of traffic that will be incurred.
4. Tannery Lane itself if not capable of being used by large or numerous vehicles – it is a Lane.
5. This will be eroding even more of the Green Belt.
6. There is already bad surface water flooding in this area. This can only increase the problem.
7. This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3172  Respondent: 8913985 / Lynda Newland  Agent:

I object to the Policy A42 change at Clockbarn in Tannery Lane.
Further increase in the number of proposed houses will increase traffic problems through Send and along Tannery Lane which is a narrow minor road.

It also erodes into the Green belt in the village and ignores all the previous objections.

**Policy A42: Clockbarn Nursery, Tannery Lane, Send (page 219)**

I object to this development because the additional traffic from that development coupled with the traffic from the new marina with 80 berths which you have agreed further down Tannery Lane which is mainly a single lane with passing places.

The Marina was identified as a high priority requirement and something the village apparently ‘had to have’. Having spoken to many locals, it would appear that this would have been so far down their list of requirements to actually not be on the list at all! It was a travesty the development was voted through by GBC when clearly there were valid objections.

These same objections remain and will be compounded by the inclusion of the Clockbarn nursery site. This additional traffic will be unable safely to join the much overused main road through Send. This road is the main through road from Woking to the A3 and M25 which is already used to capacity especially by articulated trucks and heavy vehicles for which the road was never designed. Additional traffic joining from Tannery Lane would have great difficulty and any attempt to ease the problem with a roundabout or traffic lights would simply exacerbate the situation.

The access point is so narrow it would clearly be a safety hazard and a potential accident black spot. Vehicles would not be able to join the main road and so would back up along Tannery Lane at peak times. This would be really dangerous and if there was an emergency then the necessary services would be unable to gain access to the site and attend the incident and this could have serious consequences.

GBC has a responsibility to its residents to ensure proposed developments meet highways safety standards and I fail to see how an access point at a narrow junction of Send Road and Tannery Lane will meet this.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. **POLICY A42 Pages 241-2**
I object to the proposed increase of a further 16 houses on the Clockbarn Nursery site. This is a totally unsuitable site anyway for a high density development. Your proposal to increase the number of houses completely exacerbates the situation further.

Traffic movements from the site coupled with traffic accessing the new Marina development and then trying to join Send Road would cause considerable problems for residents and through-traffic alike. To access Send Road from Tannery Lane is very limited at the best of times currently, and trying to join it with your proposals, particularly at peak times, would be even more difficult.

Pollution concerns: Send Road is already used to capacity by traffic heading to and from Junction 10 on the M25 and is used as a rat run off these roads. Send Road and the narrow lanes and roads close by were never intended to be used by today’s very large articulated trucks. The essential traffic islands to enable pedestrians to cross Send Road represent an additional hazard plus the increasing number of cyclists exposed to rising levels of exhaust pollution.

Access from the opposite end of Tannery Lane is through very narrow roads with limited passing areas means this access is impossible. The traffic from the Marina and the Clockbarn Nursery site would be forced to come and go via the Send Road junction thus making driving and access even more impossible!

Policy A42: Clockbarn Nursery, Tannery Lane, Send (page219)

I object to this development because of the additional traffic that will be generated from that development. Coupled with the traffic from the new marina with 80 berths which you have agreed further down Tannery Lane, this will create a completely unmanageable level of traffic both in the volume and size of vehicles trying to pass along a very narrow country road which is mainly a single lane with passing places.

The Marina was identified as a high priority requirement and something the village apparently 'had to have'. Having spoken to many locals, it would appear that this would have been so far down their list of requirements to actually not be on the list at all! It was a travesty the development was voted through by GBC when clearly there were valid objections and once again, as with many of the other sites proposed, raises questions about the democratic decision making processes at GBC.

These same objections remain and will be compounded by the inclusion of the Clockbarn nursery site. This additional traffic will be unable safely to join the much overused main road through Send. This road is the main through road from Woking to the A3 and M25 which is already used to capacity especially by articulated trucks and heavy vehicles for which the road was never designed. Additional traffic joining from Tannery Lane would have great difficulty and any attempt to ease the problem with a roundabout or traffic lights would simply exacerbate the situation.

The access point is so narrow it would clearly be a safety hazard and a potential accident black spot. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the building of 45 homes on the site of Clockbarn Nursery. The land is Grade 1 Agricultural Land and should be used accordingly. So far as I can see, no allowance at all has been made in the Local Plan for the increased food consumption required to feed the additional mouths implied by the 693 homes per year foreseen by the plan. Also, there is already inadequate access to the various buildings and industrial sites along Tannery Lane and the junction with Send Road is hazardous to the extent that significant amounts of traffic access the other end of Tannery Lane via Send Marsh Road and Polesden Lane. Planning permission has already been granted for 64 apartments at The Tannery and for the building of a Marina. Enough is enough; Tannery Lane can take no more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a devastating impact on the already highly congested local rural road network around Send and Ripley. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the changed policy A42 Clockbarn Nursery to 60 homes.

It ignores all the hundreds of previous objections made by local people

The increase to 60 homes in place of 45 homes is 33% more and too much.

It will worsen access and traffic problems in Tannery Lane and at the A247 junction.

It will make erosion of Green Belt worse.

It will make surface water flooding, which is already bad, even worse.
It will impact open countryside views from the River Wey Navigation.

The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

The site has very restricted access along Tannery Lane which is narrow and for most of its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

I object to the Policy A42 change at Clockburn in Tannery Lane because instead of reducing demands the GBC have chosen to increase the number of new home by a third. All previous reasons for objection have been ignored making far worse the present access and traffic problems in Tannery Lane and the A247 junction. Send must retain its Green Belt and not add to the problems of surface flooding during parts of the year. The river Wey Navigational Canal which flows through Send is a natural beauty and views for walking in open countryside. This must not be impacted further.

The road along Tannery lane is so narrow cars have to stop and allow oncoming cars to pass in places.

Lorries jam up now, more will be ridiculous.

Any further development here is most unacceptable.

Policy A42 – Clockbarn Nursery, Tannery Lane. I strongly object to the change of increasing the number of homes in the draft local plan. As in my comments in the paragraph above, this is in an area of natural beauty and it will be destroyed by building upon it. The traffic infrastructure simply cannot take it. Send and Ripley are already gridlocked during a high percentage of each week as it is!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to policy A42 change at Clockbarn Nursery, Tannery Lane due to the following points:

The site has very restricted access along Tannery Lane which is single track for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical with 45 homes, so an increase of 33% is just ridiculous.

Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with traffic for 45 extra homes, so an increase is not going to work.

Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. The traffic for this development has not yet been added to the current traffic situation.
The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane, so an increase in homes just exacerbates the problem.

This change ignores hundreds of previous objections. These have been made by people who live locally, the people who know the area best, they should be listened to, not pushed to one side.

Surface water flooding will be increased with the original number of homes, additional homes will make the situation worse still.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6933  Respondent: 10551617 / L Truscott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A42 Clockburn Nursery, Tannery Lane this site is classified as agricultural in the green belt. Access is unsuitable either way you whether off Send Road which is very busy and congested at peak times or via Papercourt Lane which is narrow. Tannery Lane itself is a very narrow bendy lane with poor sight lines and under pressure from existing traffic as there are many places that two cars cannot pass each other, the lane has no pedestrian footpath apart from a narrow uneven pavement at the top of the lane, the lane is prone to flooding. We have to consider planning application 04/P/00576 for 64 apartments already approved with the addition of these suggested 45 it would result in an increase of 500%. Also the recent approved application 16/P/002289 land to the north of Tannery Lane and east of Wharf Lane is noted that the nursery to the west of this site is Clockarn site A42 provides foraging habitat for bats. This would appear as a mitigation measure for approval of 16/P/02289 and it would not now be appropriate to destroy this wildlife corridor to the west of the marina development by building houses on the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42 change at Clockbarn Nursery as I did previously and feel that to increase the number of homes from 45 to 60 in this draft and at this location after previous objections is unacceptable. Tannery Lane is a narrow lane at either end with no pavement apart from 250 metres on one side from the entrance off the A247 and many of the homes have no off street parking and park on the road causing passing problems to vehicles using Tannery Lane. The junction of Tannery Lane with the A247 is dangerous despite the recent addition of double yellow lines as the sight lines pulling out are very bad, this will worsen with the increased traffic from the proposed houses. The infrastructure of the A247 is at full capacity during rush hour with traffic queues and busy throughout the whole day any additional traffic will worsen this problem. Tannery Lane suffers from problems with Lorries and cars trying to pass on route to the Send Business Park, this will also become busier as the recent planning application for the Marina was passed and work has started. I have concerns for the Flora, fauna and wildlife in this area such as bats, deer, foxes and many different species of birds. This development could have an impact on the countryside and could affect the view from the Wey Navigation. Finally Tannery Lane is prone to flooding and this would need to be addressed.

LAND AT CLOCKBARN NURSERY, TANNERY LANE, POLICY A42A.

I OBJECT to the proposed change of use because;
1. It totally ignores all previous objections when the proposal was for 45 houses and now proposes 60.
2. Access to Tannery Lane is very restricted from both ends and could not cope with all the traffic this development would generate.
3. It is out of keeping with the open country feel of this area and is what the Green Belt is all about.

I have written in the past objecting to the disproportionate development being planned for Send and I gather that despite receiving over 10,000 objections, the new plan continues to 'target' Send and that we are only 'allowed' to comment on changes. Proposal A42 Clockbarn Nursery has an increased density of housing -up a third even though it has been pointed out repeatedly that Tannery lane is not suitable for an increase in traffic as it is narrow, with poor sight lines meaning it is often hard to see on-coming traffic. In addition to the traffic issue there is the problem of local services which are at full capacity now and cannot sustain a substantial increase in the village population -there seems to be no mention of school places, doctors etc.

2.3 A42 Clockbarn Nursery

I wish to object to this development. While this a brownfield site, my objection lies in the road access to the site. The junction of Tannery Road and Send Road is extremely narrow and will continue to be used by large lorries supplying the Tannery Business site. The road becomes single track beyond the Tannery. In addition to the narrowness many cars are parked close to the junction limiting site lines and causing difficulties in manoeuvrings (see figure 1)

I object to the increase in housing proposed in Tannery Lane (site A42)
This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.
Clockbarn Nursery, Tannery Lane, Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because the increase to 60 houses in place of 45 homes is not in keeping with the rural area and Tannery Lane is very narrow and is not sufficiently wide enough to carry the significant increase in traffic. It is already treacherous at points along the lane and it will impact the open countryside views and will unnecessarily erode the Green Belt status of the area. The Marina development has already been given the go ahead and the area cannot cope with more building development.

I object to the proposal to build 45 houses at Clockbarn. There is inadequate access and this would create an excessive and unsupportable increase in traffic volume. This would become more hazardous for people trying to access the main road and leave the lane. Tannery Lane is obviously unable to accommodate the volume of traffic that would result.

I object to this change as it is undemocratic - the proposed increase disregards (and indeed flies in the face of) the many objections previously made by local people.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the building of 45 houses at Clockbarn Nursery because of inadequate access and traffic. Tannery Lane is far too narrow and twisty to withstand any further volumes of traffic. The junction with Send Road is already hazardous for vehicles trying to join the main road. Planning has already been granted for 64 apartments and a marina in Tannery Lane both of which will generate additional traffic and even more pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42 change at Clockbarn Tannery Lane because the proposed increase of homes is much too much, also it ignores all the hundreds of previous objections made by local people. The traffic and access problems will increase in tannery lane and at the A247 junction also it will make an erosion of the Green Belt in our village worse, there is at present surface water flooding and this proposal will make the situation worse and also it will impact open countryside views from the the river Wey navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42 Clock Barn Nursery - 45 houses. This, together with the 63 apartments already granted planning permission at the Tannery site, would increase traffic on Tannery Lane so much. The lane is already narrow and twisting, with many blind bends, and reduced width on several stretches. It is also liable to flooding. The junction with Send Road is very difficult to negotiate and cannot be improved because of width restrictions.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to policy A42 change at Clockbarn Nursery Tannery Lane because you have increased the number of homes from 45 to 60.

This ignores the previous objections made by local residents. Each home will have at least two cars, the roads are lanes, where do you propose all the extra traffic will go on already congested roads? The area floods already what happens to all the extra water draining from concreted drives and roads?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the increase in number of houses proposed for site A42 Clockbarn Nursery Tannery Lane. I have previously objected in 2016 to building 40 houses but this has now be increased to 60. My objections to the 2016 plan remain valid. Site A42 is not sustainable for building houses as Tannery Lane and Papercourt Lane's are narrow and cannot cope with this number of homes being built in addition to a Narrowboat Basin which has been approved and is only accessible by Tannery Lane.

I object to Policy A42 change at Clockbarn Nursery, Tannery Lane because it reduces the Green Belt protection of the village. The number of houses proposed is too many (an increase of a third on what was indicated before) and will cause traffic issues - the local roads are already too clogged up and not suited to additional traffic levels and Tannery Lane itself would not be able to cope with further traffic. Local residents have already strongly objected to it- this has clearly been ignored when drawing up these changes.

Do you consider this section of the document; complies with the Duty to Cooperate? (No), is Sound? (No), is Legally Compliant? (No)

I object to the Policy A42 change because:

- Shows an increase of 15 houses on original 45.
- The housing demand number in the Local Plan has dropped by 39 houses per annum from 2018 – 2034. Despite this Send’s contribution has increased with no justification.
- It is an increase of 33% more and that is too much.
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction

Policy A42

I write to object to the above policy because of the increase in the number of houses intended for this site. Rather than listen to the hundreds of objections put to you last year that the number was too many, you have chosen to increase the number to 60. This shows you are really not listening. Increased traffic at the crossroads with the A247, particularly at busy times when children are walking alone or being walked to and from the local schools will make for a dangerous situation. Parking is already busy round that junction and additional traffic will create a gratuitous situation for accidents.

I object to the change of Policy A42 Tannery Lane, Send.

(Notification that the plan should be increased to building of 60 homes)

• This would be totally disproportionate to the original notification of 45 homes, and an increase of 33 %. I have objected to the earlier proposal anyway, the location of this site (in my opinion) is not even suitable to 45 homes. 10 maybe acceptable. This narrow lane is recognized locally as one of the remaining country lanes in Send. It has been in place for hundreds of years It has little infrastructure in place, is narrow road and not suited to any increase of traffic whatsoever

• Further down the lane, (which has no passing places at all) is a Trading Estate used by commercial vehicles. The building of a Marina on the River Wey is now in progress. As time goes on, this will also contribute to an increase in heavy vehicles using the lane.

• It would appear that the hundreds of previous objections by local people have been totally ignored.

• Should 60 houses be constructed (and excepting that most households now have more than one vehicle), it would raise traffic level to an excess amount attempting to join the A247 at peak times. Should the developers agree to pay for a traffic light controlled junction as a 'sweetener', consideration must be given to the fact that there is already traffic lights at the junction with Send Road and Send Barnes Lane. This would add to further traffic disruption (which is bad enough at the present time (the A247 being the main link road between the A3 and Woking)
• Pollution by car fumes would be substantially increased by queuing traffic.
• Also please bear in mind the safety of children attending Send First School and using the foot paths in Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2451  Respondent: 10729537 / Julia Osborn  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to removing the Send Lakes from being a (Site of Nature Conservation Interest) SNCI status. Bats, Herons, Kingfishers and Hedgehogs are all part of the wildlife that can been seen in and around the lakes. The local plan should encourage this through policies aimed at preserving the lakes SNCI status as a part of the local plan’s environmental sustainability. It should not be removing them from SNCI sl.at.1 Js. The lakes act as an important ‘green lung”and wildlife corridor for the village.

I object to site A42 Oockbarn Nursery Tannery Lane. In recent documentation for planning application 14/P/02289 - Land to the north of Tannery Lane and east of Wharf Lane Send, surface water was considered an issue (see item 4.3 Noo technical Drainage report by Stilwell Partnership. In response a drainage strategy was submitted by Johns Associates proposing - Surface water run off is to be managed by digging deeper ditches around boundaries of the site, infiltration and attenuation ponds. This land adjoining site A42 Clockbam Nursery. The building of houses on Clockbam has potential to add pressure to land drainage and increasing the risk of surface water flooding. This scenario is not covered in GBC's Surface Water Management Plan (SWMP) as this plan preceded approval of application 14/P/02289. The SWMP is a necessary part of the evidence base to ensure that Local Plans manage flood risk as required by the NPPF - but with regard to site A42 this is not covered by SWMP and this site is not compliant with NPPF requirements to manage flood risk from all sources.

Moreover, in the case officer report for approved application 14/P/02289 - Land to the north of Tannery Lane and east of Wharf Lane Send it is noted that the nursery to the west of this site (i.e. Clockbam Nursery, site A42) provides foraging habitat for bats. This would appear as a mitigation measure for approval of application 14/P/02289 and it would not now be appropriate to destroy this wildlife corridor to the west of the Marina development by building houses on the site.

I object to site A43a Burnt Common on and off slip roads to the A3. The traffic impact on the A247 through Send and Clandon and surrounding B roads would be immense. Air quality monitoring has not been undertaken on the A247 ahead of this proposal. This new road junction is a significant change between the Regulation 18 and Regulation 19 consultation and people have not had opportunity to be involved or consulted accordingly.

I object to site A43 Land at Garlick's Arch, Send Marsh, Bumtcornmon and Ripley and building 400 houses on th.is site as th.is site was not included in the initial consultation of the Draft Local Plan in 2014. This number of houses is out of scale and all proportion for a village settlement. Moreover, this area of land is identified as Green Belt within the evidence base document, Guildford Borough Green Belt and Countryside Study - Volume N (2014). See page 62. This site is a significant change between the Regulation 18 and Regulation 19 consultation and people have not had opportunity to be involved or consulted accordingly.

I object to site A44 Send Hill. This site is a significant change between the Regulation 18 and Regulation 19 consultation and people have not had opportunity to be involved or consulted accordingly. Moreover, this area of land is identified as Green Belt within the evidence base document, Guildford Borough Green Belt and Countryside Study - Volume N (2014).

I object to Gosden Hill site A25 (building 2000 houses) and I object to land at former Wisley Airfield site AJS (building 2000 houses) Both these developments are at odds with the sustainability corridor and the impact on junction 10 of the M25 would be enormous.

2) **Object to Policy A42 change at Clockbarn Nursery Tannery Lane** to building 60 houses.

2.1) I object to the building of an even greater number of houses at site A42 because the draft Local Plan proposals **Jack a full Level 2, Strategic Flood Risk Assessment (SFRA) of Tannery Lane** to consider the cumulative impact of all development proposals for this area of Send (i.e. the development of a Narrowboat Basin, proposed expansion of the Send Business Park and building an increased density of houses at Clockbarn Nursery.)

Paragraph 100 of the NPPF states “Inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk.” And that “Local Plans should be supported by a Strategic Flood Risk Assessment and development policies to manage flood risk from all sources, taking account of advise from the Environment Agency …”

While Tannery Lane is outside of Flood Zone 3, these categories are based on Sea/River Flooding. To fully conform to NPPF guidance all sources of flooding need to be considered in the Strategic Flood Risk Assessment (SFRA), including surface water and ground water flooding.

Evidence presented in relation to the Narrowboat basin application 14/P/02289 John Associates Environmental Statement Vol 8 Water, pages 27-28, reference British Geographical Survey Flood Data by Envirocheck which shows the areas of Send as having ‘high susceptibility’ to Groundwater (which includes Tannery Lane). Further, on page 32 of John Associates Environmental Statement Vol 8 Water, the Environment Agency has Groundwater monitoring borehole W02a, to the west of Prews Landfill site and to the east of the Narrowboat basin site and almost opposite to the house ‘Maybanks’ (which you can see via the map on page 33), as having recordings of shallow groundwater between 0.4 and 1.9 meters below ground. Site A42 Clockbarn Nursery is in the close proximity to the area of Tannery Lane.

2.2) I also object because it is overdevelopment for a small rural B classified road when a Narrowboat basin is already being constructed and expansion of the Business Park is proposed in this 2017 draft Local Plan. A full traffic assessment of Tannery Lane is needed in view of all proposals in this area of Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the building of 45 houses at Clockbarn nursery, as the traffic would have to exit the site either via Tannery Lane – which is a single track road or via the traffic lights in Send, causing even further congestion in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1369  Respondent: 10731361 / Joan Bagnall  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In particular I object to policy A42 with the increase of homes from the earlier proposal at Clockbarn Nursery site in Tannery Lane. This road is single track which would create congestion and further problems at the difficult junction with the A247 Send Road. On the assumption that each property would have at least one vehicle and the additional vehicles resulting from the construction of a marina further up the Lane this would be quite out of proportion. This would be a further incursion into the valuable green belt adjacent to the National Trust River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

7) I object to the proposal to build 45 houses at Clockbarn Nurseries because the extra traffic generated by the building work and by probably 100 extra vehicles from residents of the new houses would bring circulation on Send Road (the A247) to an end at certain times of the day. Access to and from the proposed houses onto the A247 will be difficult particularly for large vehicles as is already shown by traffic accessing the former tannery buildings. The Send end of Tannery Lane is narrow and winding enough now to cause problems, but real problems will be caused by extra traffic trying to access the Newark Lane end of Tannery Lane which is barely wide enough for one vehicle and even more winding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2413  Respondent: 10732193 / Leslie Bowerman  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object because the previous plan to build 45 houses on the site was bad enough. The extra 15 houses now proposed will exacerbate the problems and shows contempt to the hundreds of Council taxpayers who previously objected to the 45 houses then proposed. No evidence has been produced to show that any houses are required here, especially for the extra number now proposed.

I object because access and traffic problems will be very much worse in Tannery Lane at the junction with the A247 in Send Road and totally disastrous at the Newark Lane junction. Tannery Lane for most of its length is winding and barely wide enough for one vehicle. There is no footpath and houses abut directly onto the road.

I object because the proposal will worsen erosion of the Green Belt in Send.

I object because surface water is already a serious problem and this proposal will make it very much worse.

I object because the proposal will detract from countryside views from the River Wey Navigation.

1. I object to the development of 45 houses at Clockbarn Nursery (Policy A42) because of poor access and traffic volume. Tannery lane is very narrow, has a tight junction with Send Road and will also have to accommodate extra traffic from already approved plans for a Marina and for 64 houses at The Tannery.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the 45 houses at Cockburn Nursery; Tannery Lane is pretty dangerous to drive down as it is. its very narrow in parts and with sharp bends. The Junction onto Send main road is extremely hazardous as cars try to get onto the main road. This will be even worse when it's already dangerous.

I object to Policy A42 due to the increase from 45 to 60 homes which equates to a third more in density and is ignoring previous objections by local people to the original plan for Clockbarn Nursery. It will increase already difficult traffic problems at the junction of Tannery Lane and the A247. It will affect what is at the moment nice open countryside and spoil another part of the Green Belt area. Added to this is the risk of surface water flooding which is already experienced across the Broadmeads. Surely it is not wise to increase this threat.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I object to the building of 45 houses at Clockburn nursery. Such an action would be incredibly irresponsible of the local council. Traffic along Send Road is extremely high and consequently it is hazardous for cars trying to join it from Tannery Lane. The future additional housing at Tannery and the new marina development will only increase traffic on this road and therefore exacerbate the danger.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** pslp172/1591  **Respondent:** 10742753 / Debbie Leane  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I object to policy A42 change at Clockburn in Tannery Lane. How can the council justify a 33% increase to 60 homes from 40, again ignoring the objections of the local people and placing the entire burden on Send village? This will only further exacerbate the traffic problems and dangers we already face around Tannery lane and the junction of the A247. Also and even more importantly, such development of housing would spoil the outstanding views from the River Wey.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I object to Policy A42 in respect of the increase in the number of proposed housing at Clockbarn Nursery by a third. The development is on a narrow lane unsuitable for larger volumes of traffic and will worsen the busy and uncontrolled junction with the A247, particularly with the impact with the ill thought out plan to enlarge the junction on the A3 at Burnt Common with the inevitable and unacceptable increase in the volume of traffic using the village as a through route to and from Woking - it will be impossible to turn right out of Tannery Lane at busy times. Policy A42 also ignores the large volume of objections previously made to the development of this site and is an affront to local democracy which is supposed to seriously consider local opinion, not dismiss it out of hand and worsen the situation.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )
I object to the proposed developments on scale and infrastructure basis.

National Planning Policy Framework 2012 Sect 4 paras 34,35,36,37. Send is already congested during rush hours and school times with long queues forming along the A247 on a regular basis. Any junction improvements with Tannery Lane will exacerbate the situation as increased traffic will back up along the A247 in busy periods. Yellow lines along the route would cause difficulties for access to the shops and schools and force parking into residential roads. Tannery Lane is single track for most of its length and is wholly unsuitable for any increased traffic flow from the proposed new developments. It would also be dangerous for walkers and cyclists. Not only would this adversely impact Send village but also at the other end into Ripley via Papercourt Lane or Polesden Lane (both single width) onto Newark Lane. Access into Ripley onto the B2215 at this point is single width and any increased traffic flow would be unacceptable by any reasonable standard. The A3 at Ripley is often queued northbound due to frequent congestion at M25 Wisley J10 towards Heathrow.

Transport links are poor. Buses to Woking and Guildford are approximately every hour and hardly convenient in rush hour. Getting to Clandon station is more difficult and time inefficient. Whether Send Villages Medical Centre could cope with additional population is questionable as it is often difficult to get a prompt appointment now e.g. 10 days recently.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPS16/3256  Respondent: 10750945 / Lorna Crispin  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A42 building 45 houses at Clockbarn Nursery.

Tannery lane is a narrow country lane and not suitable to take any more traffic. The junction with Send road will become significantly more hazardous it will also create rat runs around the network of country lanes around Papercourt and
Ripley will become more of a cut through and dangerous. Development of this area would destroy Green Space habitat and destroy the buffer between Send Village and the Tannery Lane business area.

This site must not be developed.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Firstly, I object to Policy A42 for the change at Clockburn Nursery. The reasons for this statement include: It will create a third more than the previous amount of homes here. This is an unacceptable increase. Tannery Lane is narrow and not designed for lots of cars and this increase in homes will cause a lot of traffic issues. It will become more dangerous for people trying to be fit and healthy, lots of people walk and cycle along here and as a nation trying to encourage exercise and fitness in an age of obesity and health related problems this should be considered not only here but in the rest of the surrounding area where roads are already congested and cycling hazardous. Building into the Greenbelt will impact the local countryside—something that distinguishes this area from that of areas nearer to London and in effect our area will become part of outer London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** pslp172/3168  **Respondent:** 10773825 / Pierre Foskett  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I also object to the Policy A42 change at Clockburn Nurseries in Tannery Lane because of the increase in traffic this will cause and the safety of the road junctions in the village. There will be further strain in amenities such as schools, medical centres etc which are currently straining under the pressures of recent housing developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** pslp172/1626  **Respondent:** 10774817 / Jack Aboe  **Agent:**
I object to the increase of housing on this site primarily due to the poor road access to the site and the likely increase of traffic through Send.

Comment ID: pslp172/1727   Respondent: 10774881 / Kate Cheyne   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

(1) I object to the Policy A42 change at Clockbarn in Tannery Lane because:

The latest draft plan proposes 60 homes in place of 45 homes is 33% more than previously proposed. This shows a completed disregard for the previous comments and objections of the community.

Now more homes than previously proposed means all impacts previously stated will be greater, including:

1. This is an area with prolific birds and wildlife
2. Future access and traffic problems in Tannery Lane and at the A247 junction
3. Erosion of the Green Belt in our village

1. Surface water flooding, which is already a problem, will become even worse
2. It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/2410   Respondent: 10775137 / Wendy Lodge   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42, Clockbarn Nursery, Tannery Lane.

This policy INCREASES previous proposals by a third from 45 to 60 homes. This is far too many. Tannery Lane is very narrow and the junction with Send Road is busy. this proposal will only make that worse.

Thousands of people use the Wey Navigation and its towpath recreationally every year. They do so to enjoy the countryside and views along the canal. This proposal will seriously affect the canal between the Broadmead Bridge and Tannery bridge, already built up on too much on the Send bank.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to building 45 houses at Clockbam because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. It is a country LANE. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Clockbarn Nursery, Tannery Lane, Policy A42
I object most strongly to the changes made to Policy A42
These are my reasons:
I note that the changes you have made actually increase the number of homes from 45 to 60 - a 33% rise which is too much. This ignores all the hundreds of previous objections made by local people - I cannot understand why you have done this. The access and traffic problems that already exist in Tannery Lane and at the A247 junction will worsen that is for sure. Erosion of the Green Belt in our village will become worse along with the surface water flooding, which is already a serious problem. The countryside views from the River Wey Navigation that are enjoyed by so many will be spoiled.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Development of this part of Send will result in even more traffic on the heavily congested A247. Furthermore, Tannery Lane is a country lane that was never designed to cope with the levels of traffic that 60 additional houses would bring. I objected when it was 45 (along with hundreds of other objectors). How upscaling this by a third, without improvement to the infrastructure (and flash flooding situation during heavy rain) could even be considered is truly alarming.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: pslp172/2938  Respondent: 10784769 / Jane Baker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I therefore strongly object to the following:
Clockbarn Nursery, Tannery Lane, Policy A42
Now 60 homes in place of 45 previously.

The increase of 45 houses to 60 is 33% more and too much.
It will worsen traffic problems at Tannery Lane (Please note this is a LANE) and at the already dangerous junction of A247.
It will erode the green belt of the village even more.
It will worsen surface water flooding which is already bad.
It will impact on the countryside views from the River Wey Navigation which is enjoyed by many people visiting the county as well as locals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1570  Respondent: 10786113 / John Creasey  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO POLICY A42 because you have increased the number of house from 45 to 60, an increase of 33%. There A lot of objections to the original number were raised so why increase it? I feel this increase is unacceptable and will lead to a considerable increase in traffic on an already extremely busy road.

The Government policy was to protect the green belt which you seem to ignore. The land around Send already floods in winter so where will the water go when it is concreted over? Probably to flood the existing houses.

Send is an ancient village mentioned in the Domesday Book so building on the greenbelt will destroy the nature of the village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/765  Respondent: 10793281 / Paul Woodington  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Clockbam Nursery, Tannery Lane, Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The large number of previous objections made by the local people has been ignored.
- The increase from 45 homes to 60 homes is too high.
- It will make worse the traffic problems in Tannery Lane and at the A247 junction.
- There is already surface water flooding and this will make it worse.
- The open countryside views from the River Way will be ruined.
- The Green Belt in our area has already been eroded and this will worsen the situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to building 45 houses on Clockbarn Nursery because of the inadequate access and traffic volume. Tannery Lane is a quiet single lane country road and is far too narrow and bendy to take any more traffic. The traffic volume has increased dramatically since the Business Park has grown and it is very dangerous. I have seen six cars backing up each way to get around a bend on many occasions. The junction to Send Road is also extremely hazardous for vehicles trying to access the main road. Planning permission has been granted for 64 homes on the Tannery Site and a new Marina both of which will generate heaving traffic.

There are also bats on the site which are a protected species. We also see Lapwings and Cuckoos every Spring and early Summer. All these endangered species will disappear. Every winter we get flooding in our garden, so badly that we have to pump out the water to stop incursion into the house. Building on this area will increase this risk.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2631  Respondent: 10798369 / Gail Hollis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42 change at Clockbarn Nursery Tannery Lane, Send, because:

a) There is an increase of 33% in the number of homes from 45 to 60. This is far too many for this rural area.

b) The traffic along Tannery Lane and at the junction to the A247 (Send Road) is already very busy during rush hour. The increase in houses and therefore traffic will make it intolerable.

c) Severe water surface flooding will be made even worse.

d) It will have a greater impact on the countryside views from the River Wey.

e) Hundreds of previous objections from local people seem to have been ignored

We object to policy A42 Clockbarn Nursery

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area. The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical. Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all
times of the day including lorries. This narrow country lane cannot cope with any more traffic. Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable. The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

As residents of Burnt Common our area has been threatened with irreversible and excessive development on all sides completely destroying what is left of our rural landscape.

I object to policy A42 change at clock barn in Tannery Lane because;

there has been a 33% increase in planned new homes from 45 to 60 ignoring hundreds of previous objections and adding to traffic congestion at the a247 junction. Contributing to increased surfaced water flooding which already exists. It will impact on the countryside surrounding the river wey navigation and it is greenbelt land which should not be built on.

**Clockbarn Nursery, Tannery Lane, Policy A42**

*Now 60 homes in place of 45 homes previously*

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much
- It ignores all the hundreds of previous objections made by local people
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane because: 

• The change represents an increase of 33% in homes and this is excessive for the area 
• It ignores the hundreds of objections made by locals previously 
• Further increase in housing development will negatively impact the traffic problems in the area. Traffic on the A247 junction is already an issue. 
• Further increase in housing development will negatively impact the Green belt 
• Further increase in housing development will negatively change the character of our village to worse 
• Further increase in housing development will impact the views from the River Wey Navigation 
• Further increase in housing development will impact the local school. More places will be required in a school that has little capacity. 
• Further increase in housing development will impact negatively on local population health. The Villages Medical Centre is already maximised and can’t deal with more demand. 

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane because:
The increase to 60 homes in place of 45 homes is 33% greater than previous Plan, which itself was too
It will seriously worsen access and traffic problems in Tannery Lane and at the A247 junction, which is
currently bad at peak times. This is likely to push more traffic down the narrow lanes and towards Papercourt Lane
It will make erosion of the Green Belt in our village worse
It will make surface water flooding, which is already bad, even worse – something that all climate change forecasts suggest will become a major issue if removal of flood plain and run-off areas are removed
It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Starting with A42 Tannery Lane

I object to the proposal to increase dwellings from 45 to 60.

You gave permission for the marina and we presumed this would mean an amount of extra buildings but NOT 60. The narrow roads from Send Road or Polesden Lane to access the proposed building land are completely unsuitable - services are stretched to bursting point and traffic which is at present extremely heavy will become impossible.

More objections are covered by A43.

All the above building is planned on the GREEN BELT which goes against all the previous promises to keep England Green.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A42 and the increase in the number of homes at Clockbarn in Tannery Lane. The increase to 60 homes will only increase access and traffic problems - Tannery Lane was entirely unsuitable to having 45 new homes, now you propose 60. The number of cars and increase in traffic is unsupportable on this lane - recent guidelines reducing the pollution to young people and the elderly due to idling engines will impact on vulnerable people living locally as well as to the schools in our area. Not only that, flooding is likely to increase, as well as the reduction of green belt. It seems you are determined to link up villages in the area, completely wiping out green belt. On this basis, I also object to Policy 2 (4.3.15), which removes Send Business Park out of the green belt. As a dog walker and nature lover - you are destroying recreational space and damaging what little wildlife we have left in the area. In addition I object to Policy A43, which now has 400 homes recommended for this site - This is permanent, historic green belt and covered by the no exceptional circumstances clause - the number of homes is huge and again, will impact heavily on the traffic in the area - traffic that is already a problem - creating a new access road onto the A3 will just add to the congestion in both directions.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I just wanted to write and register my objection to the latest draft of the local plan and its impact on Send village. As one of the previous objectors, I know that you had over 30,000 objections to the last iteration of this plan - yet the new amendments have done nothing to improve, or take into account the numerous problems that it will generate for the local area. It appears that Guildford Borough Council (GBC) has not taken into account any of the objections made during the last round of consultation - this appears GBC are just paying lip-service to public consultation.

Attached documents:
• It will worsen access and traffic problems in Tannery Lane and at the A247 junction

Policy A42 Clockbarn Nursery, Tannery Lane, Send

I object to the fact that the proposed number of homes has been increased from 45 to 60 which is incredible you having had so many previous objections to this site. Tannery lane is a very narrow lane with poor,dangerous, access at either end and quite unsuitable for a large development. The site is on Green Belt Land which is subject to flooding and will the development will impact on the River Wey Navigation. There are already sewage problems in this area as the local plant is unable to cope with excess rain water.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

It seems you GBC have a complete disregard for us local residents of Send & Ripley, we rise thousands of objections to building on the Green Belt surrounding our village and you go ahead and change your local plan, so we all have to object again, but this time you increase your greed for land and housing. Therefore i object to the Policy A42 change at Clockbarn in Tannery lane because it is a third more home then the original proposal, Tannery lane itself is very narrow and very prone to flooding, beside the gridlock and pollution you will be causing on the already congested roads, and also impacting on the open countryside to impacts of pollution and building.

8. The increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane, Send will have a significant impact on the already highly congested local rural road network around and within Ripley. There are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network. Every day there are jams and problems on the local roads and this is only going to intensify with more and heavier traffic. More houses means yet more pressure on already stretched local services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the above policy because of the increase in the number of houses intended for this site. Rather than listen to the hundreds of objections put to you last year that the number was too many, you have chosen to increase the number to 60. This shows you are really not listening. Increased traffic at the crossroads with the A247, particularly at busy times when children are walking alone or being walked to and from the local schools will make for a dangerous situation. Parking is already busy round that junction and additional traffic will create a gratuitous situation for accidents.

DRAFT LOCAL PLAN SITES A42, A43, A44- PLEASE PASS LETTER TO INSPECTOR

I object as a Send resident to the above proposals.

1. The number of new house builds being proposed in Send, Send Marsh and Burnt Common. 485 is excessive and not necessary. 485 houses could mean 1940 people and 970 cars. The infrastructure will not be able to cope. There are already new houses to be built on the Vision Engineering site.

2 I object to the 7000 sq m of warehousing being included in A43. Burnt Common already has warehouse facilities further down the road not near housing.

3 I object to the amount of extra traffic and pollution these proposals will bring to an already Busy area. The permission for the Marina is soon to test this further.

4. I object to the proposal of Send being removed from the Green Belt. Our Green Belt is an area separating us from Guildford and Woking, plus a safe haven for wildlife. There are many ancient trees around this area, especially in the A43 proposal.

POLICY A42-CLOCKBARN NURSERY, TANNERY LANE

Even ignoring the fact that the Council has proposed an increase of planning permission from 45 to 60 houses on this site, the access and egress from Send Road into/out of Tannery Lane is totally unsuitable (ie very narrow and often obscured visibility) and similarly at the junction into Newark Lane (at the Ripley end of the road). The Lane is basically single track with passing areas along its whole length and there are already existing businesses established at the old Tannery/ Send Business Park site.

This proposed housing development will also cause the following problems:-

An approximation of an additional 100 vehicles thus creating at least 200 movements per day, causing more pollution.

Send Primary School has no further capacity for more pupils, and local secondary schools are in a similar position.
The Villages Medical Centre has no further capacity for more patients.

The current utilities infrastructure already struggles to meet the existing demands of the village (ie low water pressure, power 'outs')-to upgrade the utilities to meet the increased demand will not only cause disruption to the existing customers, it will also further delay traffic.

It is a change of land usage-causing further loss of green belt/agricultural into domestic occupation, which will not only affect the view from the Wey Navigation but also, can it be guaranteed that any development here will not cause pollution to the waterway? Or cause further surface flooding?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed 45 houses at Clockbarn as the existing roads (Tannery Lane) are very narrow and struggle to cope with current traffic levels. Adding further houses would cause major traffic issues all day long that would also impact Send and Send Marsh areas. In addition, permission has already been granted for a marina development that current infrastructure will not be able to cope – a second development is just nonsensical.

I object to the expanded size of this plot from 45 to 60 homes in an area with very narrow existing roads. Currently, there are significant traffic jams in the immediate areas during morning and evening, and adding 60 homes will cause considerably more congestion on roads that are not designed for such levels of use. Furthermore, the views and sense of local countryside in this area will be lost with this increase in new housing. Existing Send school and medical facilities will not be able to cope with a further 60 families needs and hence new residents will have to travel further to schools and medical facilities outside the area causing further traffic congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I strongly object to the increase in housing proposed in Tannery Lane (site A42). This has been increased by a third since the 2016 version of the Plan and will have a significant impact on the already highly congested local rural road network around Send. This proposal appears in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." Despite this statement there are no proposals to improve the local roads, instead, to add more junctions with the A3 thereby...
increasing congestion on the Trunk and Local road network. A totally inappropriate site and a very worrying proposal for local residents!

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:
"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan".

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this statement in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and therefore should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

11. I strongly object to the increase in housing proposed in Tannery Lane (site A42). This has been increased by a third since the 2016 version of the Plan and will have a significant impact on the already highly congested local rural road network around Send. This proposal appears in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." Despite this statement there are no proposals to improve the local roads, instead, to add more junctions with the A3 thereby increasing congestion on the Trunk and Local road network. A totally inappropriate site and a very worrying proposal for local residents!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42, Clockbarn Nursery, Tannery Lane.

This policy INCREASES previous proposals by a third from 45 to 60 homes. This is far too many. Tannery Lane is very narrow and the junction with Send Road is busy. this proposal will only make that worse.

Thousands of people use the Wey Navigation and its towpath recreationally every year. They do so to enjoy the countryside and views along the canal. This proposal will seriously affect the canal between the Broadmead Bridge and Tannery bridge, already built up on too much on the Send bank.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed 45 houses at Clockbarn as the existing roads (Tannery Lane) are very narrow and struggle to cope with current traffic levels. Adding further houses would cause major traffic issues all day long that would also impact Send and Send Marsh areas. In addition, permission has already been granted for a marina development that current infrastructure will not be able to cope – a second development is just nonsensical.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Clockbarn Nursery Policy A42

I object to the expanded size of this plot from 45 to 60 homes in an area with very narrow existing roads. Currently, there are significant traffic jams in the immediate areas during morning and evening, and adding 60 homes will cause considerably more congestion on roads that are not designed for such levels of use. Furthermore, the views and sense of local countryside in this area will be lost with this increase in new housing. Existing Send school and medical facilities will not be able to cope with a further 60 families needs and hence new residents will have to travel further to schools and medical facilities outside the area causing further traffic congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1686  Respondent: 10829121 / Julie Brown  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42 change at Clockbarn in Tannery Lane - increase in homes from 45 - 60

The Village of Send is on Green Belt Land and therefore should only be built on in exceptional circumstances

The number of homes has increased from 45 to 60, which is 33% MORE. This is unacceptable.

The plan has ignored thousands of objections from the local people of Send

The traffic access and congestion around Tannery Lane and the A247 will be made worse

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

It appears that little attention has been paid to the previous planning objections as allowing for the fact that we need more houses our part of Guildford has been targeted disproportionate.

I must object to the additional homes suggested for Policy A42 at Clockbarn Nursery from 45 to 60 this will cause gridlock for the centre of Send, together with the additional problems of erosion of the Green Belt and exacerbate flooding problems.

Comment ID: PSLPS16/7334  Respondent: 10833025 / M Wright  Agent:
I object to policy A42 Clockbarn Nursery

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

Conclusion:

It appears that GBC are desperately and naively clutching at straws to find what they think are suitable sites to include in the Local Plan, instead of carefully identifying already suitable Brownfield sites. GBC need to realise how important the Green Belt is, and stop treating it as a free space to indiscriminately destroy for generations to come.

This Local Plan seems to have been thrown together with no real thought, we need a ‘common sense’ Local Plan, not this rubbish.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposal to build 45 houses at Clockbarn Nursery, on Tannery Lane. There are already 64 houses planned for the area, plus the development of a marina, on a narrow, single track country road which cannot take the traffic. The planned building of these houses is already too much for this site (which also consistently floods) so adding 45 more houses would be disastrous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposal to build 45 houses at Clockbarn Nursery on Tannery Lane. The lane is winding and narrow, with several blind corners, and is only wide enough for one vehicle at a time in many places. To build here would require a huge remodelling of the area and complete construction of a new road, thus decimating this Green Belt land, which is actually prone to frequent flooding (The area is called Send Marsh for a reason). It also acts as an important buffer between Send Marsh and Send.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane because,
The increase to 60 homes in place of 45 homes is **33% more** and too much for the area and therefore making the current access and traffic problems affecting Tannery Lane and A247 junction during rush hour and school drop off/collection worse.

The current removal of the Green Belt in our village will increase, and there will no longer be views of the River Wey Navigation that we and our children currently enjoy.

Surface water flooding which is already an issue, will worsen.

The previous objections by the local people to this have obviously been ignored.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A42 change at Clockbarn Nursery, Tannery Lane due to the following points:

The site has very restricted access along Tannery Lane which is single track for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical with 45 homes, so an increase of 33% is just ridiculous.
Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with traffic for 45 extra homes, so an increase is not going to work.

Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. The traffic for this development has not yet been added to the current traffic situation.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane, so an increase in homes just exacerbates the problem.

This change ignores hundreds of previous objections. These have been made by people who live locally, the people who know the area best, they should be listened to, not pushed to one side.

Surface water flooding will be increased with the original number of homes, additional homes will make the situation worse still.

I object to policy A42 Clockbarn Nursery

There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the Policy A42 change at Clockbarn in Tannery Lane because the increase in homes will worsen the chronic traffic conditions through Send and associated roads (as per my response to earlier draft Local Plans), and the impact on other services. This will be exacerbated if Policy A43 is also enacted.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Comment ID:** pslp172/382  **Respondent:** 10846241 / John Ford  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the Policy A42 change at Clockbarn in Tannery Lane because despite the many objections made previously by local people the development has been increased by 33%. Obviously this will make worse the traffic problems in Tannery Lane and at the A247 junction.

In addition it will increase the Green Belt erosion, surface water flooding and spoil the views on the River Wey Navigation.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**Comment ID:** PSLPS16/6771  **Respondent:** 10846625 / Frank Drennan  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1.1 **I object** to policy A42 “Clockbarn Nursery” on the grounds that;

1.2 The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

1.3 The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

1.4 Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

1.5 Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

1.6 The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
1.1 I object to the changed policy A42 Clockbarn Nursery to 60 homes.

1.2 It ignores all the hundreds of previous objections made by local people.

1.3 The increase to 60 homes in place of 45 homes is 33% more and too much.

1.4 It will worsen access and traffic problems in Tannery Lane and at the A247 junction.

1.5 It will make erosion of Green Belt in our village worse.

1.6 It will make surface water flooding, which is already bad, even worse.

1.7 It will impact open countryside views from the River Wey Navigation.

1.8 The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

1.9 The site has very restricted access along Tannery Lane which is narrow and for most of its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

1.10 Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

1.11 Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

1.12 The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

• The increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane, Send will have a significant impact on the already highly congested local rural road network around and within Ripley. There are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network. Every day there are jams and problems on the local roads and this is only going to intensify with more and heavier traffic. More houses means yet more pressure on already stretched local services.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to the Policy A42 change at Clockbarn in Tannery Lane because:

You have increased the number of houses and not reduced the number in your plan.

The traffic problems in Tannery Lane and the A247 junction are already dangerous and will worsen.

It will ruin and make the erosion of the Green Belt in our village worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3560   Respondent:  10852289 / Barry Scott   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the building of 45 houses at Clockbarn nursery because of inadequate access and traffic volume. This road is far too narrow to take on more traffic with the junction with Send Road being hazardous when trying to pull out into the main road. there is already a development going ahead including 64 apartments and a marina which will increase congestion in this road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3132   Respondent:  10852289 / Barry Scott   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Clockbarn Nursery, Tannery Lane, Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase in the number of proposed homes on the plan has increased by a third, with no reasonable justification
- It ignores all the hundreds of previous objections made by local people
- It will increase problems with the traffic in Tannery Lane and at the A247 junction
- It will cause erosion of the Green Belt in our village
- It will increase surface water flooding, which is already a problem, and increasing with further development
- It will impact on the open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the policy A42 change at Clockbarn in Tannery Lane because:

a) The 33% increase in housing is over excessive.

b) Previous objections by local people have been ignored.

c) Traffic problems between Tannery Lane at the junction with A247 would be worse.

d) Green Belt erosion would worsen.

e) Flood risks would worsen.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPS16/7911  Respondent: 10856801 / Jennifer Tigwell  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the building of houses at Clockbarn Nursery.

The junction with Tannery Lane and the Send Road is permanently busy and potentially dangerous.

It is not an easy junction to get in and out of - at any time of day.

Tannery Lane is nothing more than a country lane. To build additional housing and the proposed Marina, combined with the proposed A3 interchange will undoubtedly have a major and damaging effect on residents and traffic congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6940  Respondent: 10858977 / Angela Otterson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to building 45 houses at Clockbarn Nursery.

There is inadequate access and high local traffic volume.

Planning permission has been given for 64 apartments at the Tannery and for building the Marina. This will generate additional heavy traffic. By adding another 45 houses, this will greatly add to the traffic already there. It will be even more chaotic. The junction with Send Road is already very dangerous for vehicles joining the Main Road, this proposal will make it even worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane because,

The increase to 60 homes in place of 45 homes is 33% more, therefore a significant increase on stretched area and too much for the area and therefore making the current access and traffic problems affecting Tannery Lane and A247 junction during rush hour and school drop off/collection worse.

The current removal of the Green Belt in our village will increase, and there will no longer be views of the River Wey Navigation that we and our children currently enjoy.

Surface water flooding which is already an issue, will potentially worsen.

The previous objections by the local people to this have obviously been ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Clockbarn Nurseries, Tannery Lane
Proposal for 45 houses
I object to this proposal as there is no requirement for these houses

I object also on the grounds that Tannery Lane is narrow and winding and this development in addition 64 homes which already have planning permission and the new Marina will create real problems for motorists as well as endangering cyclists and pedestrians

I object as this development will exacerbate problems at the Send Road/Tannery Lane junction which is already hazardous

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/676  Respondent: 10859585 / Irene Grainger  Agent:
I object to Policy A42 change at Clockbarn in Tannery Lane because:

The increase to 60 homes is totally unacceptable, especially as I felt 45 was too many

It ignores all the previous objections raised by the local people

It will seriously worsen access and already unacceptable traffic problems in Tannery Lane and at the A247 junction

It will make erosion of the Green Belt in our village worse

It will make surface water flooding a much more serious threat than it already is

It will impact countryside views from the River Way Navigation and will greatly affect the wildlife

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Therefore I strongly object Policy A42

The increase to 60 homes in place of 45 homes is 33% more and too much.

It will make erosion of the Green Belt in our village worse.

It ignores the hundreds of objections made by our village.

It will cause traffic problems in Tannery Lane at the junction of Tannery Lane and A247.

It will make surface water flooding, which is already a problem, even worse.

It will interrupt the open countryside views.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to 45 houses at Clockbarn Nursery. Inadequate access and insufficient consideration of traffic volume.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

policy A42. My home overlooks the proposed site in Tannery lane and I object strongly to 60 new homes up from 45. The infrastructure (sewage, schools, doctors) will not take the additional homes, this is absolute madness and you have totally disregarded any comments I have made.

We already flood in some parts of the village and additional building will make it worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A42

Because the original plan of 45 homes in itself is far too many but to now increase to 60 is far beyond the village and the road and traffic problems it will create to even contemplate.

I fear for the safety of the local children and the hundreds more that will be joining them. The area can be prone to flooding.

I object to **Clockbarn Nursery, Tannery Lane, Policy A42** because:

- The increase to 60 homes in place of 45 homes is 33% more and too much especially given all the previous objections
- It will worsen traffic problems in Tannery Lane and at the A247 junction
- The Breen belt should be protected with NO exceptions
- It will make surface water flooding, which is already bad, even worse

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

I feel it most necessary to write to you again to object to the various proposed increases in the new draft Local Plan 2017 for Send Ward.

Policy A42 Tannery Lane:

I object to the increase of 33% in homes for this area of Send as it will put an excessive burden on the road access onto Send Road (the main road through Send) which is already overloaded at present, especially from Burnt Common to Old Woking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposals A42, A43 and A44 for a total of 485 homes and 2 travellers pitches in Send on the following grounds:

1. The increased housing will bring with it at least 1-2 cars per household which will add further traffic to the small village roads particularly at peak times. These roads already struggle to cope with current traffic levels.
2. Like much of Surrey the roads around Send are in a poor state and the increased traffic in the area will only add to their deterioration.
3. The increase in population of Send will impact on services such as the Villages Medical Centre where it is already difficult to arrange appointments with the Doctors.
4. There is no need whatsoever for industrial developments in Send as raised in A43. Send is not and never will be the right location for industrial premises being a rural village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposed development at Clockbarn Nursery. Tannery Lane is narrow, with poor access, and the junction with the A247 is already a bottleneck. Another 45 residences will create chaos and is simply inappropriate. The apartments proposed for further down this pretty lane, used by walkers, children on bikes and other cyclists, simply cannot be adequately accessed via the one track lane. Widening this lane will destroy footpaths and farmland. More concrete, less nature. I am pretty sure that’s not what anyone voted for.

Clockbarn Nursery, Tannery Lane (Policy A42)
- The number of homes has been increased by 33% on the previous plan, ignoring all concerns raised about traffic and safety issues with the congested A247 junction
- Erosion of the green belt, along with associated declines in quality of life for current residents and visitors to the Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3544  Respondent: 10869985 / Alan Blackburn  Agent:

Clockbarn
I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

Burnt Common / Garlick's Arch
I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the A247 would be gridlocked all day.

I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25.

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.
I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to this proposal as anyone who lives in send who uses Tannery Lane knows the small rural lane is utterly unsuitable for further developments to take place, turning into Send Road from Tannery takes an age and is difficult to exit to Send Road. You have already allowed, despite objections which I assume were again just ignored, a marina no one wanted and which we all knew was a precursor to further development requests. Not only have we been ignored but you have this time decided to INCREASE the number of houses for the site by 30 odd%. The impact on traffic, the green belt, amenities and the area itself makes this a completely unacceptable development.

I object in the strongest possible way to the Policy A42 change at Clockbarn in Tannery Lane because:

- The change represents an increase of 33% in homes and this is excessive for the area
- It ignores the hundreds of objections made by locals previously
- Further increase in housing development will impact the traffic problems in the area. Traffic on the A247 junction is already an issue.
- Further increase in housing development will impact the Green belt.
- Further increase in housing development will change the character of our village for the worse.
- Further increase in housing development will impact the views from the River Wey Navigation.
- Further increase in housing development will impact the local school. More places will be required in a school that has little capacity.
- Further increase in housing development will impact local health care. The Villages Medical Centre is already maximised and can’t deal with more demand.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Anyone with an ounce of sense would realise that Tannery lane is a narrow bendy road joining Send Road at a dangerous junction with two schools within a 500 meter radius. The traffic in Send, at peak hours, is heavily congested and additional traffic emerging from Tannery Lane will only make matters worse. The congestion is the result of bottlenecks
at both the Burnt Common and Old Woking roundabouts. The traffic in Send has already been exacerbated by the recent planning permission for 64 apartments and a marina further down Tannery Lane. A ridiculous idea!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to building 45 houses at Clockbarn Nursery. The traffic in Send is already heavily congested and further traffic emerging from Tannery Lane will only make this worse. Traffic improvements at the junction will not help, as the congestion is the result of bottlenecks at both the Burnt Common and Old Woking roundabouts. Planning permission has already been granted for 64 apartments and a marina further down Tannery Lane which will impact future traffic so to consider further development cannot be justified. Tannery lane is a narrow and bendy road joining Send Road at a very difficult and potentially dangerous junction.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Comment ID: PSLPS16/7430  | Respondent: 10880609 / S. Groves  | Agent: |
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42 |
| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |

I OBJECT to the building of 45 houses at Clockbarn Nursery because of the inadequate access and increased traffic volume. Tannery Lane is far too narrow and winding, with limited passing places and visibility, to take any further traffic loads. The junction with Send Road is already over-crowded and hazardous both when turning in to Tannery Lane, or exiting on to Send Road. Planning permission has already been granted for 64 apartments at the Tannery and for building the Marina, both of which will already create additional burdens on the tiny lane and its traffic load and further development will only exacerbate this situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: PSLPS16/6352  | Respondent: 10881217 / Ben Stevens  | Agent: |

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane. The plan to build sixty homes instead of the 45 originally suggested is ridiculous. This is a 33% increase instead of a reduction of 33% which would suit that particular site. Sixty houses are far too many. It would ensure that current traffic problems in Tannery Lane are worsened and also a large building development there will add extra surface water will add to the flooding issue which exist on that site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to building 45 houses at Clockbarn because of inadequate access and increased traffic volume this would create. Tannery Lane is a narrow lane that couldn’t sustain more traffic. Plus the junction with Send Road is already very hazardous for vehicles trying to turn onto the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- It shows an increase of 15 houses on the original, already agreed, 45.
- The Local Plan (H1) has shown a DECREASE in demand for houses by 39 houses per annum from 2018 - 234. Despite this Send's allocation has been increased arbitrarily.
- It will worsen already difficult traffic issues in Tannery Lane itself and at the junction with the A247.
- It will erode the GREEN BELT in out village even more.

ABIDE BY THE ORIGINAL, AGREED POLICY IN ORDER TO BE LEGALLY COMPLIANT WITH REGARD TO ALL THE LOCAL SUBMISSIONS AND OBJECTIONS PREVIOUSLY SUBMITTED Policy A42 Pages 241-2 is neither sound nor does it comply with the Duty to Co-operate

Clockbarn Nursery, Tannery Lane - Policy A42 I object to Policy A42 change which increases the number of homes to 60 from 45 for the following reasons;-

Traffic problems at the junction with the A247 (Send Road) will be made even more difficult.

Tannery Lane is a narrow country road with poor visibility and in many places is single track with few passing places.

Any increase in population in Send will cause additional strain on services, especially medical.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3818  Respondent: 10897665 / Sue French  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42 Clock Barn Nursery, Tannery Lane where 45 houses are proposed. Permission has already been granted for 63 apartments at the Tannery site and the 45 proposed at Clock Barn would bring so much additional traffic on Tannery Lane which, as a narrow and winding lane with restricted width in many places, is simply not fit for this increased burden. The junction with Send Road and Tannery Lane is already dangerous enough without extra traffic. This is agricultural land and is also the habitat of bats and flooding is also a concern. It should not be included in the Local Plan.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy 42a Clockbarn Nursery Tannery Lane - 45 houses. Tannery Lane is a country lane with no pavements and is very twisting with many blind corners and restricted widths with no room for passing cars let alone the many bigger lorries and vans which serve the Tannery industrial site. 63 new apartments have already been granted planning permission at the Tannery, and together with the 45 houses at Clockbarn would generate a huge increase of traffic in the lane, which is also liable to flooding. The junction at Send Road is already dangerous with difficult sight lines.

Clockbarn is agricultural land which is now overgrown but is a habitat for deer, foxes, rabbits, bats and many birds. We do not want to see this wildlife disappear from our countryside.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

It will cause worse flooding in the Tannery Lane area.

If the Marina is built there it will exacerbate traffic in an area of narrow, poorly surfaced lanes.

It will be eroding the Green Belt and will impact on the Wey Navigation.
The original plan for 45 homes was excessive and to increase it by a third is ludicrous. The increase in population will strain existing resources and infrastructure.

The increase in traffic will worsen an already heavily used road system in both directions, towards Send, Ripley and Clandon and also towards Old Woking a busy junction already.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to building 45 houses at Clockbarn Nurseries. This is totally inappropriate use of this land. There is inadequate access, Tannery Lane is a small country lane and should remain as such. This area can already be hazardous, especially for vehicles trying to join Send Road, and this volume of traffic is already destined to increase the building of 64 apartments at The Tannery and the Marina on the canal. This lane will not be able to take any more traffic and should not be increased in size to accommodate any extra vehicles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A42 change at Clockbarn in Tannery Lane where there has been an increase from 45 homes to 60. This change takes no account of hundreds of previous objections made by local residents. The increase in numbers of homes will have a seriously detrimental effect on the traffic in the area, particularly as Tannery Lane is a small country road and should remain as such. This development is a significant erosion of the Green Belt in our area and is totally out of keeping with the rural nature and views across the River Wey Navigation.

I strongly object the building of 45 houses opposite my property at Clockbarn Nurseries for the same reasons that I have argued against development on that plot previously: Tannery Lane is too narrow to withstand extra traffic; the junction between Tannery Lane and Send a Road is already very hazardous and with the planned marina and additional buildings the road is already at capacity. Scant regard has been given to previous objections and, quite frankly, enough is enough.

1. I object to Policy A42-Clockburn Nursery, Tannery Lane, Send.

As a regular walker along this lane I wish to point out how dangerous the junction onto the A247 is. There is limited vision when turning either right or left due to resident's parked cars along Send Road. Tannery Lane itself is narrow and at times there is only room for one vehicle at a time at the junction to Send Road due to residents cars parked outside their houses. The lane itself becomes a single track lane and is far too narrow for it to take any more traffic along it. There is already planning permission granted for 64 apartments at The Tannery and for building a Marina. With the added addition of the proposed 45 houses this stretch of road would become very hazardous and dangerous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In the original draft plan 45 homes were on the plan now it has increased to 60! The road junction with Tannery Lane and the A247 is very narrow the visibility for turning out of this junction is restricted by parked vehicles along the main road and the lane itself by residents and shoppers.

Tannery Lane itself by its name is only passable as a single-track lane with passing places; it will not be able to sustain the increased traffic arising from the extra homes suggested. I regularly walk this route and have seen first hand the
problems of vehicles trying to turn out of the lane onto the main road. It would seem you have completely ignored the views of all the local objectors in this matter.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A42 Clockbarn nursery tannery lane because the increase to 60 homes as even 45 homes would bring far too much traffic to a road that is nearly impossible to exit on to the main road. Assuming 2 cars per home, this would bring 120 cars which would bring grid lock to central Send.

This increase completely ignores all previous objections.

The locality is already subject to local flooding - which will be made worse, which the developers will get away with, the local council will ignore and the local residents have to put up with yet again.

I OBJECT to the development at Clockbarn Nursery. Tannery Lane is narrow, winding and already suffers heavy vehicle movements for the industrial units. The proposed 45 houses, together with the 65 houses already approved, will create a traffic nightmare at the junction of Tannery Lane and Send Road.

1. I object to building 45 houses at Clockbarn, Send.
I object to this because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more vehicle movements.

I wish these objections to be fully and individually taken into consideration. Please acknowledge receipt and confirm that they will be placed before the Planning Inspectorate.

I object to the increase in housing proposed in Tannery Lane (site A42)
This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

1. I object to the building of 45 houses at Clockbarn Nursery, Tannery Lane (Policy A42) on the grounds of inadequate access to and from the site. The roads surrounding the site are already hazardous, narrow and windy. Tannery Lane has already had planning permission granted for 64 houses and a marina and the location will not be able to cope with any more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT

For the same reasons I object to Site Allocations A43 & 44; the A247 cannot cope with any more traffic and the village of Send (and surrounding areas) does not have the infrastructure to cope. Send has one GP surgery that is already oversubscribed and one has to wait a good number of weeks for an appointment (if one is lucky). There are “two” bus services, the 462 and the 463 which alternate to run once an hour and the first bus does not get people to Woking in time (fast train connection) to get to London (where many people work) for a work start time before 09h00 – the very first bus of the day only gets to Woking at 08h05 – which means most people will rely on their cars to get to work and their children to school, especially as there is no secondary school within walking distance.

In addition traffic coming from Tannery Lane trying to merge onto Send Road already struggles due to cars parking on the kerbs / alongside the kerbs. It’s very poor visibility and it will be a major safety risk having even more cars.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I would like to raise the following objections to the plans proposed to impose a change of use on the Clockbarn nursery site (A42) and to develop and build 45 residential dwellings.

- The current Clockbarn site is presently agricultural land within the Greenbelt and should have such status preserved.
- Tannery Lane does not have the width to accommodate the recent increased traffic, particularly as a result of the development of the Tannery light industrial estate which generates at least 100 cars and tens of commercial vehicles passing along it each working day. An additional increase in vehicles resulting from this proposed residential development would create a traffic congestion situation that the lane simply could not accommodate.

- Present traffic turning right into Tannery Lane from Send Road (A247) often creates a queue backing up Send Road as a result of the volume of traffic passing along the A247, being a main artery between the A3 and Woking. This creates delays for what is already a busy route for many, especially in peak traffic times.
- Present traffic turning out of Tannery Lane onto the Send Road (A247) frequently backs up down Tannery Lane as the volume of traffic passing along the A247 means vehicles must wait a considerable time for an appropriate gap in the traffic to turn out of Tannery Lane.
- An increase in the volume of vehicles passing in and out of Tannery Lane would exacerbate this existing problem.
• The width of Tannery Lane heading towards Newark Lane is, in some places, only a car's width wide and has several blind corners. Additional traffic simply cannot be accommodated along this stretch of the lane. It would be impractical to look to widen this stretch as it is primarily bordered by residential front gardens and Papercourt Marsh.

• Tannery Lane is a route to which many walkers, joggers, dog walkers, cyclists and hikers take to get to the River Wey with its towpaths and footpaths. An increase in traffic, which would result from this proposed development, would make this route hazardous for those not in vehicles.

• There is an existing approved planning application in place for some 64 houses to be built on land associated with the Tannery light industrial unit. I propose that the Council give serious consideration to this fact in determining the validity of an additional residential development at Clockbarn. Should the Clockbarn development be approved, the number of residential dwellings that could be constructed along this 1/2 mile section of Tannery Lane is excessive and unwarranted.

• I propose that the Council also take into account the recent approval of the marina development, again adjacent to the Tannery light industrial units. Whilst not approved for any residential dwellings, the facilities proposed will give rise to an increase in traffic, both of private and commercial use and should be considered in conjunction with the Clockbarn proposal.

The combined and collective consequences of all of these approved and proposed developments along Tannery Lane will have an irreversible impact on a Surrey country lane that does not have the capacity to accommodate the overenthusiastic interpretation of the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to building 45 houses at Clockbarn Nursery. This is due to the inadequate access and traffic issues that will arise surrounding roads including Tannery Lane which is far too narrow and twisty to take any more traffic. The junction with Send Road is already very dangerous for vehicles trying to join the main road and permission has previously been given for apartments at the tannery and for building at the marina both of which will generate further heavy traffic. These roads can not take any more and the junctions is already dangerous so please do not allow this site to be developed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
only. At the entrance to Tannery Lane a combination of residences and a motor business mean that a number of vehicles can regularly be seen parked on both sides of the Lane, as indeed are they often along Send Road. This is a very often a very difficult junction to get in and out of during the working week and would be made much worse by the addition of 64 houses. In the opposite direction the road is much more of a single track, with little opportunity of expansion. This really hasn’t been thought through at all. Given that I believe planning permission has already been granted for the Marina along Tannery Lane - which will undoubtedly generate traffic - I do not see this as at all feasible.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane. It now appears that you are planning to build sixty homes instead of the 45 originally suggested. This is a 33% increase instead of a reduction which would suit that particular site. Sixty houses are far too many. It will ensure that current traffic problems in Tannery Lane are made even worse and the extra surface water will add to the potential flooding problems which exist.

I OBJECT to the building of 45 houses at Clockbarn Nursery because of the inadequate access and increased traffic volume. Tannery Lane is far too narrow and winding, with limited passing places and visibility, to take any further traffic loads. The junction with Send Road is already over-crowded and hazardous both when turning in to Tannery Lane, or exiting on to Send Road. Planning permission has already been granted for 64 apartments at the Tannery and for building the Marina, both of which will already create additional burdens on the tiny lane and its traffic load and further development will only exacerbate this situation.

I object to building 45 houses at Clockbarn Nursery because of inadequate access and traffic. The junction of Tannery Lane with Send Road is even now extremely dangerous with heavy lorries accessing Send Business Park. Tannery lane is very narrow and winding, there are no hard paved footpaths on the roads leading to this site including Tannery Lane, Papercourt Lane and Polesden Lane, so the elderly and those with prams have to walk on the road dodging traffic. Permission has already been unfortunately granted for a Marina and 64 apartments both of which, when built; will further increase traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A42 change at Clockbarn in Tannery Lane because:

- There is an increase in the number of homes now planned which ignores previous objections raised by local people, that there should be no development at all on this site.
- It worsens access and traffic problems in Tannery Lane and at the junction with Send Road.
- It will spoil the views of the countryside especially along the River Wey and further reduce the Green Belt around the village.

2. 45 houses at Clockbarn Nursery

I object to the building of 45 houses at Clockbarn Nursery. Tannery Lane is far too narrow to take any more traffic and will only lead to even further congestion on to Send Road. I live further along Send Road and can confirm that this road is already over its maximum capacity of traffic. Every day traffic is at a ‘stand still’ outside my house and I have to endure the fumes. Many times in one week I have to wait patiently to be allowed out of my drive. Also our school and doctors’ surgery are already over stretched.

I object to building 45 houses at Clockbarn Nursery. Tannery Lane is an inadequate thoroughfare to access this site due to its narrowness and bends. It currently already supports heavy traffic. It frequently floods during rainfall, largely owing to the poor condition of the road. The junction with Send Road is already hazardous enough, with speeding cars driving through as they exit the A3. On top of all the foregoing, heavy traffic will be generated by the proposed 64 apartments at the Tannery and the building of the marina.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane, Send will have a significant impact on the already highly congested local rural road network around and within Ripley. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

I object to this proposal as anyone who lives in Send who uses Tannery Lane knows the small rural lane is utterly unsuitable for further developments to take place, turning into Send Road from Tannery takes an age and is difficult to
exit to send Road. You have already allowed, despite objections which I assume were again just ignored, a Marina no one wanted and which we all knew was a precursor to further development requests. Not only have we been ignored, but you have this time decided to INCREASE the number of houses for the site by 30 odd%. The impact on traffic, the green belt, amenities and the area itself makes this a completely unacceptable development.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I OBJECT to the building of 45 houses on the Clockbarn site in Send (ref A42) which is designated as agricultural land within the Green Belt. The fact that it has been allowed to deteriorate should not be a passport to changing its status. It is not suitable because it has poor access and the road cannot take the additional vehicular traffic which 45 houses would generate.

I OBJECT to the Building of 45 houses on Clockbarn because the road already suffers from serious overload, as previously accepted by Surrey County Council. An additional 45 houses would increase the number of dwellings in Tannery Lane by nearly 400% because planning permission already exists for 63 apartments at the Tannery business centre site under reference 14/P/00575 and 00576 as amended. It is disingenuous for GBC to express the belief that these may not be built. GBC gave permission and the owner has the right and locally it is understood the intention of building them. Indeed work has commenced. Added to this would be the traffic generated by building and servicing the new narrow boat basin or “marina” under reference 14/P/00289. The road cannot cope with the traffic volume it currently has and could not possibly accommodate the massive increase in vehicular traffic consequent on these three developments. In simple terms if the number of dwellings increased by 400% so would the volume of domestic traffic in addition to an increase in commercial traffic. This does not bear thinking about.

I OBJECT to the building of 45 houses on Clockbarn because this massive increase in traffic would severely impact the junction of Tannery Lane and Send Road where there is a problem every day because of poor visibility for traffic emerging from the side road causing danger and congestion to traffic on the main road. The suggestion that this would be alleviated by traffic lights is completely wrong as the installation of temporary traffic lights in Send Road earlier this month demonstrated. When traffic has to stop in either direction, as it does for traffic lights, Send Road quickly gets gridlocked.

I OBJECT to the building of 45 houses on Clockbarn because it fails to take into account the cumulative impact on traffic volumes in the rest of Tannery Lane. Tannery Lane is very narrow, twisty and dangerous for its entire length. Much of it is single track with passing places and blind spots. There is a problem all the way down with vehicles trying to pass each other. When they meet they very often have to reverse in order to find a passing place. The problem is exacerbated by the high proportion of HGVs and large commercial vehicles currently going to the business centre, and destined to increase when the narrow boat basin is built. Tannery Lane is also very long. The biggest problem, which is often overlooked because planners fail to go there, is the stretch beyond the business centre going north. The final stretch of Tannery Lane before it joins Polesden Lane is only 9 feet wide for a distance of nearly 400 metres and cannot be made wider because of the nature reserve. A significant proportion of the traffic, estimated at about one third, enters Tannery Lane via Polesden Lane or Papercourt Lane which are themselves extremely narrow, especially Papercourt where some of the front garden boundaries on either side of the road are within little more than three metres of each other. There is also the extremely dangerous blind bend to the right when joining Newark Lane. These lanes were not meant for the high number of cars, vans and lorries which currently use them and could not possibly cope with an increase of the amount which would follow from this development, on top of the others.
The suggestion sometimes made that Tannery Lane could be widened totally fails to appreciate the constraints which exist. Any attempt to widen it would be defeated by the fact that the entrance from Send Road does not provide space for any significant widening; the Papercourt Lane exit is so narrow that front gardens on both sides of the lane would have to be compulsorily purchased; the stretch from Prews Farm Cottages to Papercourt Farm runs immediately alongside Papercourt Marshes so there is no scope for widening and in any event further traffic would damage Papercourt Marshes; the stretch from Papercourt Farm to the junction with Polesden Lane is single track nine feet wide which also runs alongside Papercourt Marshes. In any event a widening of Tannery and Papercourt by itself would be insufficient - because of the bends it would need to be straightened as well, a hugely expensive and well-nigh impossible task. In the whole of the Borough of Guildford, if one set out to find somewhere to build houses, Tannery Lane would be close to the bottom of the list of potential sites from the point of view of road access.

I OBJECT to the building of 45 houses on Clockbarn because there are virtually no pavements. The increase in traffic would therefore mean that pedestrians would face much greater risk. The only surfaced pavement in Tannery Lane is the first short section from Send Road confined to the north side. The other side is unsurfaced. After Peasblossom Cottage (about 80 metres from the junction with Send Road) there are no further pavements on either side for its entirety. Pedestrians walk in the road and have to dodge the traffic as best they can.

In addition to vehicular traffic it is used by residents and their visitors on foot: residents from Send Road and adjacent roads walking their dogs; walking groups and ramblers (on their way to Newark Priory, Ockham Mill and the Pyrford Water Meadows); equestrians; sports and recreational cyclists (because it is in the guide books as part of the cycling network based on Ripley); and anglers who fish in the Wey Navigation. It is therefore enjoyed by a lot of people whose safety should not be further jeopardised, and for whom a village amenity should not be ruined completely, by increasing any more the excessive number of vehicles the road already has to cope with.

Tannery Lane is an ancient rural road which is rich in wildlife which should not be damaged by pollution caused by increased traffic volumes. Clockbarn itself is a nesting habitat for bats which are a protected species, making it not only unsuitable to build there but a criminal offence to do so. Additional traffic pollution and noise alongside Papercourt Marshes will be detrimental to wildlife there too.

I OBJECT to building 45 houses at Clockbarn because all the land in that area is prone to flooding. Although the Environment Agency maps include the area in flood zone 1 the reality is different, as a great deal of photographic evidence and local testimony can show.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy A42: Clockbarn Nursery, Tannery Lane, Send

Proposed Allocation: 45 Houses

Response: Objection

- Proposed site is Green Belt. All Green Belt Land must be protected.

- Adverse affect on quality of life for existing local residents and the character of the locality.

- Local infrastructure is totally inadequate.

- Link road network not adequate: There are queues at Peak times on the A247 at the Old Woking roundabout, the Burnt Common roundabout, the B2215 through Ripley and getting on or off at some local A3 Junctions, especially leading to the M25 Junction 10.

- Tannery lane itself is very narrow and in parts single track. Papercourt lane and Polesdon lane leading on from Tannery Lane are also very narrow/single track. Cyclists and, with great care, walkers (sometimes backing into busses to let cars go past) use these lanes as there is access to the river Wey lowpath. These lanes are not suitable for increased vehicular activity.

- The junction with Send road (A247) is hazardous. There was a previous suggestion of putting traffic lights at the junction of Tannery Lane with Send Road. If this proposal still exists, it is not viable. There are already traffic lights just as a short distance away at the main crossroads with Send Marsh Road, Send Hill and Send Barns Lane. A second set of lights would cause even more congestion than at present.

- Adverse impact on the natural environment, including visual.

- Site near special protection area.

- More pollution - light, noise, air

- Tannery Lane not served by public transport. Last bus back to Send from Woking mainline railway station id 19:30 HRS which is far too early. No buses through Send road/Send Marsh road on a Sunday.

- Potential for increased crime and nuisance (nearest Police station was in Ripley but has now been closed).

- Community issue: the medical centre in Send Barns Lane is shared with Send Marsh, Burnt Common and Ripley and is consequently very busy. There can often be a wait of up to 7-10 days for a standard appointment. No public transport operates along Send Barns Lane to the medical centre.

Surrounding Road Network:

- The traffic along the A3 is at a standstill most weekdays between Burpham and the A31 Hogsback Junction.
- If there are any major incidents on the M25 or A3, the local roads are even more congested than normal.

This amended policy has increased the number of homes from approximately 45 homes (C3) to approximately 60 homes (C3) and therefore all my objections from the original response still remain.

I mentioned in my original response that for anyone using public transport, the last bus back to Send from Woking mainline railway station was 1930hrs which was far too early and no bus service runs through Send Road/Send Marsh Road on a Sunday. Since writing that response, the last bus back to Send from Woking mainline railway station has been cut to 1820hrs!! also, from Guildford, the last bus that goes through Send has been cut and now leaves Guildford at 1825hrs.

For existing Send commuters/daytrippers the public transport to/from rail stations was not good enough and mean they have to use their cars. These cuts make is even more abysmal. This policy (A42) would mean an increase in cars on the roads as people from any new development in Send would also need to use their cars.

One of the changes that the council has made in its ‘Local Plan 2017 – Policy ID3: sustainable transport for new developments’ is:-

(2)(d) The provision and improvement of public and community transport.

Send has had their public transport bus timetable cut and I couldn’t find under the ‘Local Plan 2017 – Infrastructure Schedule – BT Bus Transport’ any mention of bus improvements for Send.

I object to building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to the proposed development of the Clockbarn estate in close proximity to Garlick’s Arch. Tannery Lane is very narrow and cannot take existing HGV traffic which seeks to divert into Polesden Lane, and Newark Lane, placing people and infrastructure in peril – the bridges have only been rebuilt in the very recent past and Newark Lane as it joins Ripley High Street is extremely narrow. In addition to the permission granted for 64 houses at the Tannery site, and developments at the marina, the Tannery Lane, Papercourt Lane and Polesden Lane simply cannot take any more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn Nursery, Tannery Lane because:

- The plans have increased from 45 homes to 60 homes which is 33% and this is too much
- It ignores all the hundred of previous objections made by local people
- It will increase problems with the traffic in Tannery Lane and at the A247 junction
- It will cause erosion of the Green Belt in our village
- It will increase surface water flooding, which is already a problem and is increasing with further development
- It will impact on the open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to building 45 houses at Clockbarn Nursery due to inadequate access and traffic volumes. Tannery Lane is far too narrow and twisty to take any more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road, there have been a number of accidents. Planning permission has previously been given for 64 apartments at the Tannery and for building the Marina, both of which will generate additional heavy traffic. The lane cannot take any more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to your Policy A42,
The increase in proposed density totally ignores all previous objections, takes no account of the traffic problems that this development will create in Send village and surrounding “country” roads, it also will put greater pressure on local medical facilities and schools.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Policy A42. Clockbarn Nursery, Tannery Lane, Send. Allocated for 60 houses in place of the previous 45 houses. Apart from being lined both sides with green fields for much of its length, Tannery Lane is a narrow route turning off from the middle of Send and where it turns off there is existing development either side adding to the traffic turning into it will cause further delays through the middle of the village and require a significant amount of infrastructure work.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposal A42 concerning Clockbarn Nursery in Tannery Lane. This is on the grounds that this is a lane, narrow in many places and not suitable for accommodating more traffic which will arise with the construction of 45 more houses. I object because the junction with Send Road is also already very difficult to navigate and I foresee potential accidents as well as congestion. I object because the construction of a marina has been granted permission already which will again increase traffic along Tannery lane. I object because there is also a flooding risk along the lane which has not been resolved. I object because of the fauna (many bats nest here) and flora which will be compromised

Comment ID: pslp172/3949  Respondent: 11006241 / Sally Harrison  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My first objection is to Policy A42 where the number of houses proposed has increased from 45 to 60 ie an increase of 33% which is enormous.
Tannery Lane is a problem for traffic as it is, as a result of inadequate parking in Send, making the junction with Send Road difficult to navigate at most times of the day. The lane is also very narrow. As with many residential developments, inadequate parking provision for residents and their visitors will lead to them parking on Tannery Lane, aggravating the situation. Increased housing will bring even more people in cars onto the A247 which is congested at peak times and busy during the rest of the day as it is a cut through to Woking from the A3, and furthermore regularly used as a training route for HGVs. Together with the proposals for a new junction with the A3 at Burnt Common, which will bring yet more traffic through the village, this is going to be a serious problem.

This development will also impact negatively on views from the Wey Navigation.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I OBJECT to Policy A42 (45 houses at Clockbarn Nursery Tannery Lane Send).

Tannery Lane is too narrow to support the additional traffic that would be generated by any development that this policy provides for, the junction with Send Road will become significantly more hazardous than it already is, and the network of lanes around Papercourt and towards Ripley will become more of a cut through and dangerous.

Development of the site would destroy a valuable Green Space habitat, and destroy the buffer between Send Village and the Tannery Lane Industrial area.

The site must NOT be developed and the Policy must be abandoned

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane because this increase from 45 to 60 homes is far too much and ignores the hundreds of prior objections made by local people against this planned development. It will lead to further traffic problems already experienced at the Tannery Lane and A247 junction and will make surface water flooding even worse. Importantly it will erode the Green Belt in our village.

CLOCKBARN NURSERY POLICY A42

60 homes in this area would be completely inappropriate with the existing access for Tannery Lane. This is an area of Send where congestion is already at a peak and your proposal would mean an addition of another say, 150 cars. We do not have the infrastructure for the addition of all these homes and cars. I object to this proposal.

The idea of increasing the number of houses proposed on this site is ridiculous? As someone who has lived near by for many years and [unreadable word] the traffic problem in Tannery Lane where in places the road is only wide enough to take one car. I think the community who vote [unreadable words] are without any common sense.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The idea of increasing the number of houses proposed on this site is rediculous? As someone who has lived near by for many years and [unreadable word] the traffic problem in Tannery Lane where in places the road is only wide enough to take one car. I think the community who vote [unreadable words] are without any common sense.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy A42 because of the impact to the village of increased housing in an area where access is via very narrow country lanes.

The addition of yet more vehicles adding to a road network that can barely cope with the current levels of traffic.

It is also a direct infringement of green belt land

45 houses at Clockbarn Nursery

I object to this development.

Tannery Lane is again a narrow rural lane that will suffer from the building of a Marina and 64 apartments which I believe have already been approved. So additional houses would be most unsuitable.

Send Road is far too busy as it is with frequent traffic jams that grid lock the whole village. It would be totally wrong to have any more traffic entering Send Road from any further Tannery Lane development. The junction onto Send Road from Tannery Lane is already a dangerous crossroad which cannot be improved without demolishing extremely old cottages on the left or a garage on the right. The other end of Tannery Lane is a single track that runs towards Ripley and Pyrford which could certainly take no more traffic.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A42. Tannery Lane is an extremely winding and narrow road with little scope for increased traffic. The addition of a further 15 houses to the already planned 45 to make a total of 60 new houses will overload the access road considerably and lead to traffic jams and an increased number of accidents, some of which could be fatal. The junction of Tannery Lane with Send Road (A247) is particularly dangerous despite the new double yellow lines and is already the site of accidents. This situation will only worsen if the local plan is carried out.

As with Garlick's Arch, flooding is already a known problem along Tannery Lane and development of the size suggested will intensify this.

Once again, Guildford Borough Council are paying no attention to the Green Belt which will be further eroded by this development with loss of the openness required to protect the countryside.

Development of this part of Send will result in even more traffic flow on the already heavily congested A247. Furthermore, I do not think that a quiet country road, such as Tannery Lane, should be subjected to levels of traffic that it was never designed to cope with. I also note that the 60 homes are proposed on this development, representing a 33% increase on the previous number put forward. Aside from the traffic problems already outlined, this represents far too high a number.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to building 45 houses at Clockbarn Nursery. Tannery Lane is a narrow, winding road. The junction with Send Road is already hazardous for vehicles emerging to join the main road. There will already be an increase in traffic on Tannery Lane, as planning permission has previously been granted for 64 apartments to be built at the Tannery and for a Marina to be built. This little lane will not support more traffic! It would result in the junction with the main road becoming absolutely treacherous.

I request that my comments above are shown to the Planning Inspector who is responsible for deciding on the implementation of the Local Plan in respect of Send Village.

A42 Clockbarn Nursery, Tannery Lane, Send

• The access to the site is not adequate for regular traffic and the potential volumes during construction and after construction.
• Tannery Lane is unlit and is far too narrow and bendy for 2-way traffic without footpaths, especially with the other planning permission granted for 64 apartments and a Marina further along Tannery Lane.
• The junctions joining adjacent roads are also not sufficient to take additional traffic regularly.
• The local adjoining roads do not have sufficient capacity (especially at rush hour) to take additional traffic that would be generated by this development.
• The risk of the land flooding putting housing in this area at risk and displacing the risk to adjacent existing housing unnecessarily.
• Public transport is not sufficient meeting demand of potential additional passengers to encourage vehicles to be left at home to undertake local journeys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to building 45 houses at Clockbarn Nursery because it is Green Belt land (see above) and there is not sufficient access for the resulting increased traffic volume. Previously approved Planning Permissions for apartments and Marina near the Tannery will of themselves generate increased traffic volumes - the narrow lanes could not take all this increased traffic and will make the junction with Send Road all the more dangerous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A42. Clockbarn Nursery, Tannery Lane, Send.

Increase from 45 homes (previously) to 60 homes.

This is a 33% increase in a small location, which is excessive and ignores hundreds of previous objections by local people.

It will make worse the traffic problems in the narrow and winding Tannery Lane. There has already been a successful application for 64 houses at the Marina further down Tannery Lane and another application is pending to build houses on the garage site on the corner.

The junction with Tannery Lane and the A247 Send Road is notoriously difficult to negotiate. The bad surface water flooding in the Lane will become worse.

It will adversely affect the open countryside views from the River Wey Navigation.

I object to the building of 45 houses at Clockbarn Nursery. Planning permission has already been given for 64 houses in Tannery Lane, an area already unsuited to further development, due to both its frequent flooding and the narrow and winding lane. The lane simply cannot take the traffic an additional 45 houses would bring.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| 8. Policy A42 Clockbarn Nursery  
I object to the changed policy A42 Clockbarn Nursery to 60 homes because  
-it has ignored hundreds of objections from local people  
-it will erode Green Belt in the village to the overall detriment to the openness of Green Belt in the borough  
-the need for these houses has not been proven or verified as the housing target has been found to be incorrect, inflated and ignores constraints  
-housing need does not amount to” exceptional circumstances “ in accordance with NPPF guidance  
-the disregard of constraints of roads and risk of overdevelopment after many objections.  
-the draft plan should on the contrary put in place protections for this site, to stop inappropriate development, to preserve the amenity of the surrounding area which involves Green Belt. In view of the above I submit that this policy in its present form continues to be misguided and I object to it being in the local plan 2017. | | |

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to building 45 houses at Clockbarn Nursery - Tannery Lane is too small to cope with the extra traffic and the junction with Send Road is already very dangerous and cars have to pull out into the oncoming traffic to get out as it is.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3289  Respondent: 11037313 / Debbie Greener  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• The permanence of the open River Way countryside will be permanently lost. Quite clearly that is counter to the key tenets of the NPPF. There are no exceptional circumstances.
• Yet again you are ignoring the clear concerns of local people. Why?
• Tannery lane is not appropriate for the development you seem determined to allow. Why don’t you come and have a look at the narrow nature of the lane (it is a lane) that is wholly unsuitable for the amount of additional traffic that would be generated.
• There is a 33% increase in homes. Why? This ignores the wishes of local people and exacerbates the above problems.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the increase in housing proposed in Tannery Lane (site A42)
This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** pslp172/3852  **Respondent:** 11040705 / Patricia Cullimore  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the increase in housing proposed in Tannery Lane (site A42) especially proposing that there be an increase from 45 to 60 homes. Are there also proposals to help with the increased build-up of traffic? Building these houses will destroy the beautiful open countryside and increase the risk of flooding.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** pslp172/2954  **Respondent:** 11041569 / Peter Belton  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A42 - both to the original 45 homes and the 33% increase to 60 homes, as this is on green-belt land; local roads are unsuitable and congested, in particular the A247 Send Road, plus Tannery Lane is too narrow for two way traffic and increased traffic flow. I know that the proposed site in Tannery Lane is subject to flooding, as a resident and walker in the area for many years.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPS16/1591  **Respondent:** 11042369 / Huw Williams  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to building 45 houses at Clockbarn Nursery.

Tannery Lane is a narrow and twisty lane unsuited to large volumes of traffic, and its junction with Send Road is already hazardous for vehicles leaving the lane. Send Road is already subject to traffic problems at peak periods – an increase in
traffic exiting Tannery Lane will add to these problems, especially in view of other proposals in the draft Plan (see below).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to building 45 houses at Clockbarn. The available road infrastructure simply cannot support it. Tannery Lane is far too narrow to take any substantial traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic.

I object to the fact that this site was not included in the Regulation 18 draft and has not been consulted upon previously. Full consultation is required.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object to the following changes to the local planning proposal for the following reasons.
Clockbarn Nursery, Tannery Lane Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because you have increased the number of houses by 33% which is too much and ignores the hundreds of previous objections made by local people. If this goes ahead it will cause traffic problems in Tannery Lane and worsen the problems at the A247 junction, erode the Green belt in the village and worsen surface water flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5418  Respondent: 11047169 / Margaret Sherborne  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Tannery Lane is too narrow to cope with houses being built at Clockbarn Nursery. The junction is already difficult to navigate and more traffic will make it impossible, especially at peak times. There is existing planning permission for the marina at the Tannery and 64 apartments. The infrastructure of Tannery Lane will struggle to cope with this without any further developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4138  Respondent: 11047201 / Peter McGowan  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to building 45 houses at Clockbarn Nursery. Tannery Lane is an inadequate thoroughfare to access this site due to its narrowness and bends. It currently already supports heavy traffic. Often it floods. The junction with Send Road is hazardous now. On top of all the foregoing, heavy traffic will be generated by the proposed 64 apartments at the Tannery and the building of the marina.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7256  Respondent: 11048481 / Patrick Oven  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I do not object to the proposed building on site A42, Clockbarn Nursery, behind Send Road and Tannery Lane, on a derelict site, provided adequate access and exit provided by improving the junction between the two roads. I will detail my specific objections below.
I OBJECT to the proposed change to policy 42, increasing from 45 to 60 the number of homes proposed for this site because:

1) the number proposed, an increase of 33% on this small site, is way too high for the existing infrastructure of the site to cope with. The turn from Tannery Lane onto the A247, Send Road, is already an extremely difficult one, with very limited visibility in both directions along the main road. At busy times of the day it is virtually impossible to emerge from the junction safely, especially if turning right. The additional vehicles using this junction from this proposed development will further exacerbate the problem. Further proposed development in the Send area under this plan will further increase the problems at this junction.

First, by adding to the traffic on the main A247 from:-

a) the proposed development at Garlick's Arch, policy A43, 400 houses as present proposed, but likely to increase in due course,

b) Send Hill, policy A44, 40 houses proposed, and

c) the proposed industrial/warehousing development at Burnt Common, policy A58, a minimum of 7,000 sq m, leading inevitably to an increase in commercial and in particular, HGVs, using Send Road to and from the site.

Second, by additional traffic using the junction from Tannery Lane to that using it at present, from one definite, and one potential source:-

the definite source - being traffic from the Cartbridge Basin Marina in Tannery Lane which is at present in course of construction,

the potential source - should Send Business Park be inset from the Green Belt as proposed at paragraph 4.3.15 - clearly this would inevitably lead to further development of this small business park in the very narrow part of Tannery Lane, with the additional traffic generated by it also having to use the junction with Send Road, A247, since the only alternative route being towards Newark Lane Ripley, with even narrower lanes to negotiate. The proposals for Send Business Park will form the subject of a separate objection in due course.

2) The sewerage system in Send is already at full capacity according to Affinity Water. Additional housing will exacerbate this problem - unless there is a proposal to increase sewage capacity. None has been made.

This policy, with its lack of any proposal for infrastructure improvements, is in direct contradiction to the words of the Council Leader, Councillor Paul Spooner, in his introduction to the Local Plan :-

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the Borough. The delivery of sites allocated in the plan is contingent upon the provision of new infrastructure which is a key theme of our local plan".

So where is the infrastructure upgrade? - simple, there is nothing proposed.
3) This proposal utterly disregards the hundreds of objections made last year to the previous proposal at this location, for
the lesser figure of 45 homes.

4) Open views from the Wey Navigation, National Trust land, will be removed by the provision of a housing estate
between the Navigation and Send Village.

5) Run-off from the additional houses will add to the existing problem of surface water flooding in Send Road and
Tannery Lane - see comments at 2) above.

6) It is already proposed to inset Send from the Green Belt - the subject of a further objection - see post. This proposal
will further reduce the semi-rural nature of the village, to its detriment.

It should not be assumed that, by objecting to the additional 15 homes proposed at this location, that I am by implication,
agreeing to the original proposal for 45 homes at this site. I am merely confining my objections to what I am permitted to
object to at this stage of the process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and far too much
- It ignores all the hundreds of previous objections made by local people
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the building of 45 houses at Clockbarn Nursery – as a cyclist using Tannery lane on my daily route to work I
am well aware that the

road is not suitable for any additional volume of traffic, as will be caused by further development along this lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. We object to Policy A42, the development at Clockbarn in Tannery Lane because it is too large a development for the village and will: increase the traffic problems on the A247 through Send, ignores the many previous objections, will make surface water flooding worse in the area and will impact on views from the Wey Navigation (which the Countryside Vision Strategy seems to support protecting).

Attached documents:

---

Now 60 homes in place of 45 homes previously

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much
- It ignores all the hundreds of previous objections made by local people
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation

Attached documents:

---

I object to this development on the Wey flood plain. Further development in this location will increase the likelihood of flooding and also increase traffic levels on Tannery and Papercourt lanes which are single track country lanes.

Attached documents:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Land at Clockbarn Nursery,Tannery Lane, Policy A42

I object that Send’s Contribution has been increased at this site with no justification despite a reduction in overall housing numbers in the borough’s plan and the large number of objections to the previous proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3529  Respondent: 11077025 / David Williamson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change for the following reasons:

- The 33% increase from 45 to 60 homes is excessive
- This flies in the face of hundreds of objections already made by local residents
- It will only worsen traffic congestion, air pollution and dangers to residents and their families in Send, Tannery Lane and at the A247 junction
- It will set a precedent for further erosion of Green Belt in the village and surrounding areas

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4266  Respondent: 11095905 / Joanna Holden  Agent:
We object to Policy A42, the development at Clockbarn in Tannery Lane because it is too large a development for the village and will: increase the traffic problems on the A247 through Send, ignores the many previous objections, will make surface water flooding worse in the area and will impact on views.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the building of 45 houses at Clockburn Nursery.

Planning permission has already been granted for 64 apartments and a Marina, both of which were widely opposed by the local community. The inadequacy of Tannery Lane and the nearby roads to cope with the additional traffic caused by this unwanted development must not be compounded by adding even more traffic if the Clockburn Nursery development is granted. This over-development must not be allowed to happen if we are to avoid appalling traffic destroying the enjoyment of this quiet village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the proposal to build 45 houses on Clockbarn Nursery for the following reasons. There could be another 90 odd cars on the road, and the nearest road to join would be the already crowded Send Road. The other roads are narrow country lanes which join up with a network of other narrow country lanes.

Oh! Yes! And these lanes will also be shared with the new marina on the river Wey in Tannery Lane, Send that has already been granted planning permission for 80 berths plus the buildings that will support that project.

I object to the increase in the population (together with other housing proposals) that will put additional strain on the educational and medical facilities in the village.

<tr>
<td>I object to policy A42 Clockbarn Nursery. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area. The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical. Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic. Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable. The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.</td>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to this development on the Wey flood plain. Further development in this location will increase the likelihood of flooding and also increase traffic levels on Tannery and Papercourt lanes which are single track country lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the 1/3rd increase in housing from 45 (already unsustainable ) to 60. It will create traffic chaos in Tannery and Papercourt Lanes and is likely to lead to an increase in head-on collisions in these single track roads which are already too frequent. The adjacent water meadows on the flood plain just cope with current rainfall; this development could cause flooding several times a year both at the site itself and to all properties which currently lie at the edge of the flood zone.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Clockbarn Nursery, Tannery Lane, Send, Policy A.42, Now 60 homes in place of 45 homes previously, I object to the Policy A42 change at Clockbarn in Tannery Lane because the increase to 60 homes in place of 45 homes is too much- a third more. It ignores all the hundreds of previous objections made by local people. It will put pressure on the local infrastructure and worsen access and traffic problems in Tannery Lane and Send Road. It will add to the surface water flooding that we already have a problem with. It will further alter the village becoming more urban losing more Green Belt which was to protect natural or semi natural environments and to protect unique character of rural communities.

We note that this site allocation has been significantly reduced in area from the previous consultation document which is a positive step forward and welcomed by the National Trust, however, the area to the north is largely green field and open, falling within the setting of the River Wey Navigations.

The Trust will therefore continue to ensure that the special character of the landscape and views are protected or improved in line with Policy G11 of the Local Plan. We therefore request that the ‘requirements’ for the redevelopment of the site are updated to not just require a ‘sensitive design, siting and form of development, given the edge of village/semi-rural location’ but also that the design has due regard to the setting and amenity of the River Wey and the Conservation Area.

We wish to continue to be consulted on future versions of this document and any planning applications on the sites discussed above, or any others, affecting National Trust land and property.

**POLICY A42 Clockbarn Nursery, Tannery Lane, Send**

**I object** – The proposal to build additional housing on the Clockbarn site will only add to the traffic and poor access problems in the very narrow single track Tannery Lane with dangerous junctions at both ends. There is already planning permission for 63 houses to be built next to Tannery House, a new Narrowboat Basin is currently being built with access on to Tannery Lane and the proposal to make Send Business Centre into a Strategic Employment Site would mean increased traffic accessing this site as well!
I have often thought that the Clockbarn site with its large derelict greenhouse could be better used as a car park for the village (which has very little parking for its village centre and recreation ground) or even could have a few properties built on it classed as affordable or social housing to help those who cannot afford to live in the village once they have left home. However I feel the number of 60 houses far exceeds what is acceptable on the Clockbarn site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to 45 houses at Clockbarn Nursery.
I object to this site because of the inadequate access and traffic volume. In one direction Tannery Lane is very narrow and twisty, being reduced to single lane traffic in many spots with passing places only; in the other the junction onto Send Road is very dangerous and inadequate. Planning permission has already been given for a marina and 64 apartments which will increase the traffic greatly.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the changes in Policy A42, Clockbarn Nursery, Tannery Lane, Send because the proposal is now for 60 homes instead of 45. Tannery Lane is not built to cope with a lot of traffic. At one end it is barely more than a one lane track with occasional passing places that floods, and at the other, the junction onto the A247 is not adequate to deal with any volume of traffic. It is a dangerous junction that gets very congested at busy times as it is. The road has surface
flooding issues, more than would be indicated from the Councils records, which local photographs show. It is also eating into the Green Belt and will affect the countryside views from the Wey Navigation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the building of 45 houses at Clockbarn Nursery because of the inadequate access and increased traffic volume. Tannery Lane is far too narrow and winding, with limited passing places and visibility, to take any further traffic loads. The junction with Send Road is already over-crowded and hazardous both when turning in to Tannery Lane, or exiting on to Send Road. Planning permission has already been granted for 64 apartments at the Tannery and for building the Marina, both of which will already create additional burdens on the tiny lane and its traffic load and further development will only exacerbate this situation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A42 change at Clockbarn in Tannery Lane because the increase by 33% of homes to be developed, from 45 to 60, is too many for such a small area. It ignores all my previous objections to this proposal and, in fact, has made it worse than before even though I, and many others, objected strongly to this proposal. It worsens traffic issues in Tannery Lane, which is already a small single lane in places, and erodes the green belt. There is increased risk of flooding due to surface run off and it will affect the natural topology and countryside around the area which has already been designated as Green Belt.

Policy A42, Clockbarn Nursery
The number of proposed homes has increased from 45 to 60, a 33% increase which is too many for this site.
It will worsen access and traffic problems in Tannery Lane and at the A247 junction.

It will continue the erosion of the Green Belt around Send which must be protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I have already objected in previous consultations to the Local Plan but this latest draft has become just plain ridiculous.
Why is Send bearing the brunt of development and why isn't there development south of Guildford, where I believe a lot of the councillors live?? To move to detail, here are my objections to the latest proposals.

I object to Policy A42, Clockbarn Nursery, Tannery Lane, where the number of houses has been increased to 60, instead of 45. This is just plain madness. The local infrastructure will not support such a huge development, which is 33% more than what was previously proposed, and that was far too much. Traffic will be gridlocked every morning throughout Send, right through Send Road and Send Barns Lane. It is frequently at a complete stand still every workday morning already and it will be impossible to circulate in Send at rush-hour times.

The Green Belt will be eroded and Send will no longer be a village but will become a suburb of Woking and Guildford. The whole atmosphere will be completely changed in the village. The beautiful open countryside views from the River Wey will be ishot for ever with this badly planned over-development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/167  Respondent: 15068737 / Angela Blaydon  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42 because this amendment is a 33% increase to the original plan putting even more stress on local infrastructure and totally ignoring the hundreds of previous objections made. This increase will also add to already bad traffic problems and is eroding more Green Belt. Apart from impacting on the views from the Wey Navigation it will undoubtedly have a serious effect on already bad flooding in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

41 POLICY A42 CLOCKBARN NURSERY

41.1 I object to policy A42 Clockbarn Nursery

41.2 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

41.3 The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area.

41.4 The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical.

41.5 Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic.

41.6 Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

41.7 The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

Clockbarn Nursery, Tannery Lane, Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because the increase to 60 houses in place of 45 homes is not in keeping with the rural area and Tannery Lane is very narrow and is not sufficiently wide enough to carry the significant increase in traffic. It is already treacherous at points along the lane and it will impact the open countryside
views and will unnecessarily erode the Green Belt status of the area. The Marina development has already been given the go ahead and the area cannot cope with more building development.

Clockbarn Nursery, Tannery Lane, Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because the increase to 60 houses in place of 45 homes is out of character and not in keeping with the rural setting. Tannery Lane is extremely narrow and not wide enough to carry significant increases in traffic. It is already dangerous along the lane and will impact the open countryside views and will unnecessarily erode the Green Belt status of the area. The Marina development has already been approved and the area will be saturated if there is more building development.

I object to the Policy A42 change at Clockbarn in Tannery Lane because the increase in homes ignores all previous comments, will worsen the chronic traffic problems through Send and associated roads, and makes no provision for increase in supporting social infrastructure in local schools, surgeries, roads or public transport. This development requires an expansion of existing local GPs Practices (none referenced in Section 6, Health and Social Care), an increase in Early, Primary and Secondary Education provision (none referenced in Section 4 Education), and material traffic management measures throughout Ripley, Send and Clandon (other than LRN7 and LRN20 none referenced in Section 1, Transport).

I object to the change to Policy A42 at Clockbarn, Tannery Lane as:-
1. There are an additional 15 houses, the local roads will not be able to cope with the additional traffic causing congestion and safety issues for local children walking to school and playing.
2. The land is Green Belt
3. It will increase the risk of surface water flooding in the local area, which is already an issue
4. The local infrastructure is not in place for the increase in housing e.g. the medical centre is already at capacity and Send Primary size cannot be increase to accommodate the additional intake.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to your proposals for an increase in the already worryingly high number of homes to be built in Tannery Lane as this would cause unacceptable levels of traffic in this area. I also feel that the proposed development would have a detrimental effect on the Papercourt Nature Reserve which plays an important part in the conservation of birds, animals and plants.

I object to the Policy A42 proposal change in Tannery Lane on the grounds that firstly it erodes the Green Belt in our village along with some other plans for the area, but just as important the density of housing is too great for the village. So no additional housing should be contemplated anyway. The lane itself is narrow and the junction into the main village road inevitably will increase hold ups and delays, in turn will increase pollution from the resulting extra traffic, which in turn is putting too much pressure on the road through Send, already a main route to Woking.

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a devastating impact on the already highly congested local rural road network around Send and Ripley. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

As a resident of Tannery Lane, I particularly object to the proposal to inset Send Business Park from the Green Belt Tannery Lane and the surrounding roads are already under pressure from disproportionately high traffic. Further expansion or development will hugely detract further from the green belt and current feeling of relative rural peace.

I and my family, neighbours and local residents will continue to pursue our objections for as long as it takes

I object to building 45 houses at Clockbarn Nursery (Policy A42) because Tannery Lane is too narrow, and is inadequate for more vehicles. I myself was once nearly in collision with another car there, even though both vehicles were observing the speed limit. The other vehicle came round a sharp bend at speed, swerved to avoid my car (which by then was stationary) and damaged a wheel against the kerb.

I object to the Policy A42 proposing to build 60 new homes instead of 45 home in Tannery Lane. We, the residents of Send, have objected to previously 45 houses. To increase the number to 60 houses would make the situation even worse with the traffic problems and the further erosion of the Green Belt. When reading the proposal, it makes me think that the planners have never visited the area around the Tannery Lane.

I object to the changes to Policy A42 at Clockbarn in Tannery lane.

The houses have now increased from 45 to 60, that's a 33% rise.

GBC have totally ignored the hundreds of objections to this site. Tannery lane is a small country lane, it suffers from surface water flooding, it has no footpaths nor street lighting and is single track in its entire length! The road is a country lane! You drive along it with extreme care, as speeding motorists using it as a cut through while using a sat nav, forcing you into the hedges and up the banks. Tannery lane joins the A247 at a dangerous crossroads, where you have to edge out in hope you don't hit a speeding car on the busy main road! The newly painted double yellow lines prove worthless as cars still park on them making the sight lines dangerous!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the change in policy which has increased the number of houses to 60 (33% more) from the previously proposed 45 houses at Clockbarn Nursery. This area is subject to surface water flooding which this will exacerbate and will bring even more traffic onto the A247 Send Road. This will either create a bottleneck at the junction of the A247 and Tannery Lane or feed it through narrow and single track rural roads towards Newark Lane.

This policy change will increase the erosion of the Green Belt in our village and will impact upon open countryside views around the precious River Wey navigation.

How can it be acceptable to increase the amount of houses from 45 to 60 at Site 42 Tannery Lane? This is an extremely narrow road which cannot cope with the size of this development. In turn, this will have a grave impact on the surrounding local and rural roads.

I object to the changes to Policy A42 at Clockbarn in Tannery Lane because:-

- The increase of 33% in the number of homes is too great.
- The previous objections by local people have been ignored.
- Traffic problems in Tannery Lane will be considerably worsened.
- The erosion of the Green Belt will be unacceptably increased.
- Flooding risk, already bad, will become worse.
- There will be a negative impact on the countryside views from the River Wey Navigation.

Once again Send is being targeted with an inappropriate number of houses in a Green Belt area, where our roads, medical facilities and school are not up to coping with [illegible word] and needs.

I strongly object to Policy A.42 on the grounds that it is Greenbelt and the access on to the A247 is already lethal and a further 60 – not 45 as primarily planned, houses would be dangerous. It is a narrow country lane.

The 2017 Draft Local Plan now proposes an increase in the development envisaged in the 2016 Draft Local Plan. 60 homes are now planned in place of the 45 homes originally proposed— an increase of one third. This completely ignores previous objections to the traffic problems which will be caused by this development on a site which is served by very narrow roads and the increase in the number of homes now proposed can only make matters worse. It will also increase the impact of surface water flooding which is already a problem in this area.

I object to Policy A42 primarily because it is an erosion of the green belt and will spoil open countryside along the Wey Navigational. In addition the access road i.e. Tannery lane is a narrow country lane with passing places for oncoming traffic. 60 houses with an average of 2 cars per house will put an unrealistic strain on the road. Also the junction of tannery lane at either end is wholly unsuitable to this amount of traffic and will cause traffic issues.

Policy A42

a. A 33% increase in the number of homes when there were so many objections to the original 45 makes no sense whatsoever. The process is illogical and appears to be designed to bulldoze plans through which is undemocratic.

b. It will worsen access and traffic problems at the junction of Tannery Lane and A247 junction. Vehicular access to Tannery Lane is extremely limited.

c. It will worsen water flooding which is already bad.

Clockbarn Nursery, Tannery Lane, Policy A42

I object to Policy A42 as the number of homes planned has been increased from 45 to 60 homes. This is an increase of 33% and ignores all previous objections from the residents of Send. Tannery Lane is a single track narrow lane which already has traffic and access problems, to add potentially another 120 cars to this road will only increase the chance of road rage and the possibility of a nasty incident. The Policy will erode more Green Belt. As Guildford Borough Council is a Conservative Constituency who promised not to build on Green Belt - this is totally unacceptable, remember it is the Send residents who helped put you into power and can easily remove you. There is continual flooding in this area and building homes on this land will add to run off and cause additional flooding and distress to householders. The countryside around Send and the rural feel of the area will be lost, this is part of the attraction of Send, residents will not allow this to be ruined.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of this site within the local plan. Development of this site will be used to justify future development plans in the area that will have a significant impact on the semi-rural location that the plans specifies; while careful design can mitigate the immediate impact, I believe that it would have significant impact on the area in the longer-term. Access to the site will be via Tannery Lane that will experience a greater volume of traffic in the near future following the approval of plans for 64 apartments at the tannery and building of the Marina and any further development at Clockbarn nursery would further exacerbate this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A42 change as the increased number of homes proposed for the Clockbarn nursery site fails to account for the previous objections to the original 45 houses proposed for this site. I am concerned that it will have a significant negative impact upon traffic along tannery lane and, in particular, the junction between tannery lane and the A247. I am also concerned that this development is will negatively impact upon the Wey Navigation, as it will impede what are currently open countryside views protected by the Greenbelt.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42 of the Local Plan because you have ignored my original objection and increased the number of houses from 45 to 60 houses. This will further increase the traffic entering Send Barnes Road. This road and intersection is already too narrow to take the existing traffic. The footpath at the nearby traffic lights is far too narrow, this footpath is used by mothers and children on the way to and from school. The path is so narrow that mothers cannot walk side by side. This is an accident black spot about to happen. This development is a further erosion of the green belt, which the Prime minister has said will not happen.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A42 Clockbarn Nursery, Tannery Lane.

Reasons for objection to the proposals of 2016 are well documented and remain valid. An increase of a further 15 houses in addition to the original 45, representing a 33.3% increase is completely unjustified and can only exacerbate further, an already deleterious situation in the immediate locale. In addition it will contribute to worsening the situation at the A247 junction with the London Road.

Object to building 45 houses at Clockbarn Nursery because of inadequate access and traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has already been granted for 64 apartments at the Tannery and for building the Marina both of which will generate additional extra traffic. The junction is already too dangerous.

I object to Send Village being removed from the Green Belt. The Green Belt was intended to be permanent, as required my the National Planning Policy Framework, and there are no special circumstances to justify abandoning it. Send's Green Belt provides an essential buffer stopping Woking and Guildford becoming one conurbation. Local Councillors
and central government gave a clear election promise to protect the Green Belt and this reneges on it. Developers will be quick to take advantage and there will be nothing to stop them.

1. I object to additional construction on Tannery Lane. There is already planning permission for building there but the road there is very narrow and additional development should be out of the question. This is a quiet country lane which we use to walk the dogs. It adjoins the canal and to widen this road and turn it into a busy through route is incomprehensible. The entrance to this road to the main road from Ripley and Send Road is extremely narrow and cannot take further traffic.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase from 45 homes to 60 in this area is unacceptable. This is too many for our village to support. This is a beautiful area adjoining the river and is at present a narrow country lane and access is very restricted.
- GBC have not listened to residents who know that this will create traffic havoc on Tannery lane and the A247.
- Again the erosion of the Green Belt shows the disdain with which our local council views our village and its residents concerns.

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4065  Respondent: 15251105 / Michael McGrath  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
I object the change to Policy A42 because:

- This is a 33% increase on the original proposal (to which I and many hundreds of residents of Send have previously objected to) and would be even more inappropriate for reasons including increasing urbanisation, leading to unreasonable stresses on existing transport infrastructure and services, and the lack of any additional capacity for the local GP Centre and the newly amalgamated Send School.

<td><strong>Site Allocation A42</strong></td>
</tr>
</tbody>
</table>

5.5 Proposed Site Allocation A42: Clockbarn Nursery, Tannery Lane, Send (Page 144), is allocated for new homes (Class C3), with the gross number of homes provided over the plan period now shown as having increased from 45 homes to 60.

5.6 The increase in the number of dwellings identified in the allocation is supported. This represents a more realistic reflection of the capacity of the site to provide new housing if this is to be done in an efficient manner which optimises the nature of the opportunity that exists to do this. It is considered that the optimal capacity of the site is higher than 60 dwellings and that there remains additional capacity to provide housing at an appropriate density. Through careful and sensitive design, particularly in relation to the context provided by adjacent areas of housing, the capacity of the site and the contribution that this makes towards providing new housing whilst avoiding the need to allocate additional sites elsewhere in the Borough (particularly in more sensitive or less sustainable areas), can be maximised.

5.7 The addition of Requirement (3) in the summary table relating to Policy A42 on Page 241 of the document reflects the addition of the designation of the area as the River Wey Navigation. This amendment is welcomed since it affords appropriate recognition of the presence of the River Way Navigation and the proximity of the site to the river itself. It is acknowledged that new development would need to respect the setting of the river corridor and ensure that there is no detrimental impact.

Please see attached for context of representations.

<td><strong>Policy A42: Land at Clockbarn Nursery, Tannery Lane, Send</strong></td>
</tr>
</tbody>
</table>
6.1 The revised policy position in relation to the Clockbarn Nursery site which recognises its increase in capacity from 45 to 60 dwellings is welcomed. The reasoning for this outlined in the Land Availability Assessment (2017 Addendum), is that the scale of the allocation has been “Reconsidered in light of further evidence and understanding of potential capacity”.

6.2 Danescroft (Send) LLP, remain committed to achieving the redevelopment of the Clockbarn Nursery site in a manner which is appropriate to the context provided by the built form in the immediate vicinity, while continuing to make efficient use of land. This is particularly the case since other potential development sites within or adjoining Send are no longer anticipated to come forward as part of the revision of the Local Plan.

6.3 it is therefore considered that a density of approximately 25dph which would result from a development of 60 dwellings, would fail to make efficient use of land, particularly since this relates to a relatively unconstrained site immediately adjoining an existing settlement which is previously developed in character and nature.

6.4 In light of the reduction in the number and range of sites identified elsewhere in the Borough, it is considered that any new housing development should be expected to provide a higher density of housing with potential to provide up to 40dph. Initial master planning and feasibility work has confirmed that a density of 40dph can be achieved alongside the provision of on-site open space to meet the required standards. Providing new residential development at this density would also reflect the context of existing housing areas elsewhere in Send. Providing 40 dwellings per hectare would better reflect the optimum density for dwelling provision and would represent a more appropriate and sustainable quantum of development in this location, while reducing the need for additional housing to be provided in less suitable locations for development elsewhere in the Borough.

6.5 A higher density housing allocation would result in a greater number of market and affordable homes being provided. The latter would be a proportion of the overall number of dwellings being provided. Therefore, the net effect of increasing the allocation would be to increase the number of affordable homes being provided as a result of its development. The Sustainability Appraisal Report (which accompanies the Local Plan: Strategy and Sites), refers to the need to meet the full extent of both objectively assessed (OAN), and affordable housing needs, a higher rate of dwelling provision than that being promoted and planned for in the draft Local Plan would be required.

6.6 The presence of only one other allocated housing site elsewhere in Send which could be developed to provide for new housing reflects the fact that this is one of only two sites considered suitable for providing additional housing to meet local needs in the village for the duration of the plan period. In order to facilitate its development it is essential that this opportunity is maximised, particularly given the presence of Green Belt boundaries drawn tightly around the defined limits of Send where there is little scope for further development.

6.7 In conclusion, the proposed allocation of the site at Clockbarn Nursery for redevelopment as housing and its removal from the Green Belt are supported. Policy A42 identifies the site as suitable for residential development, and proposes that it is allocated for approximately 60 homes. We fully support the proposed allocation of this site for residential development which would represent a significant enhancement to the local environment as well as providing much-needed new housing. However, it is considered that the site has the potential to make a greater contribution towards the housing supply than is currently envisaged. The approach to achieving this is set out in the representations.

Conclusion

6.8 The proposed amendments to the Guildford Local Plan: Strategy and Sites are generally regarded as positive changes to the plan which more accurately reflect the potential and suitability of Site A42: Clockbarn Nursery, Tannery Lane, Send, to provide new housing. The increase in the housing allocation at this site from 45 to 60 dwellings reflects the reassessment of its capacity by the local planning authority and represents a recognition that this represents one of only two sites in or adjoining Send that can provide new housing for to accommodate growth over the timescale associated with the new Local Plan.

6.9 The reduction in the scale of dwelling provision across the Borough is however of some concern given the previous under-delivery of housing across the Borough and throughout the wider housing market area, as is the differential phasing of housing provision with higher rates of dwelling provision anticipated later in the plan period. Danescroft (Send) LLP
would support the use of the previous dwelling provision target of 693 as opposed to 654 in the current iteration of the plan, and for a consistent annual average to be used throughout the timescale of the Local Plan.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

1 A beautiful country lane, Tannery Lane, a haven amongst the huge roads nearby will become clogged with fast traffic speeding dangerously down country lanes and causing more gridlock with the A247.

2 The increase from 45 to 60 houses in unacceptable to us in the village as it will put pressure on already stretched infrastructure such as roads, schools, medical services etc.

3 This erosion of the Green Belt is a violation in my opinion. We need to preserve the green spaces for ourselves and future generations. When we decided to buy a house here it was not because the place was going to become a huge building site. We fear our house price will diminish as this become and undesirable place to live.

4 One to the attractions to moving to this area was the River Wey navigations and the beautiful countryside and views on our doorstep. This is being threatened by unnecessary development. Wildlife flourishes on the river and any encroachment on its territory is unacceptable.

Comment ID: pslp172/1331 Respondent: 15293793 / Anita Norman Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

POLICY A42 – CLOCKBARN NURSERY, TANNERY LANE

The increase in the number of residential units from 45 to 60 (+15) is over a 30% uplift on a relatively small site and will lead to a cramped overdevelopment and an unacceptable increase in hardstanding to accommodate the increased parking and access roads resulting in further erosion of the Green Belt.

Tannery Lane is a narrow secondary road that in parts is almost a single track width and therefore traffic problems will be more frequent commencing with the construction of the development requiring large vehicles and plant to manoeuvre into and out of Tannery Lane.

The junction of Tannery Lane with Send Road is very restricted and requires substantial improvement to accommodate the increased use and to provide adequate safety for both pedestrians and vehicles.
The proposal would severely impact on the open aspect of the surrounding Green Belt and in particular the views from the River Wey Navigation.

The increase in units now proposed by the Council completely ignores the hundreds of previous objections made by local people.

Recent flooding issues in and around the immediate area highlight the need for a conscience approach to development and by increasing the number of residential units on this site the incidence of flooding will be increased.

The recent approval of the planning application (14/P/02289) for the Cartbridge Traditional Narrowboat Basin on the River Wey Navigation, (construction works are now underway) already puts pressure on the Tannery Lane junctions with Polseden Lane and Send Road. Therefore the cumulative effect of both developments will result in an increase in the potential for accidents at the road junctions unless substantial highway improvements are made. Also there are over 50 parking spaces within the Cartbridge Basin application site which, together with the associated hardstanding, severely impact on the rural nature of the surrounding Green Belt area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• The increase in units now proposed by the Council completely ignores the hundreds of previous objections made by local people.

I object to the Policy A42 change at Clockbarn in Tannery Lane because the increase to 60 houses in place of 45 homes is excessive. Tannery Lane is extremely narrow and not wide enough to carry significant increases in traffic. It is already dangerous along the lane and it will impact the open countryside and will unnecessarily erode the Green Belt status of the area. The Marina development has already been approved and the area would be over-development.

Specifically, I strongly object to Policy A42 change at Clockbarn in Tannery Lane because:
• It will cause extreme congestion at the junction with the A247. Already, at certain times of the day during the working week the whole village is gridlocked. This proposal will only serve to exacerbate the problem
• It will remove greenbelt land which gives the village its 'village feel'
• It will damage open countryside views from the River Wey Navigation and create an eye sore
• It will risk increasing the likelihood of surface water flooding

I have lived on Send Road/Send Barns Lane for the last 40 years and I have very serious concerns about the changes to the local plan that will significantly impact Send and the surrounding villages.

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is **33% more** and too much
- It ignores all the **hundreds of previous objections** made by local people including myself.
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction - there is simply no way this junction can take additional traffic.
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation
- The schools in Send Barns Lane are already impacted by traffic and this causes issues at the beginning and end of the school day.

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

I object to Policy A42 change at Clockbarn in Tannery Lane - now 60 homes instead of 45

The Village of Send is on Green Belt Land and therefore should only be built on in exceptional circumstances Traffic is already a problem around Tannery Lane and the increase in houses will make it worse.

I object to this development plan. The 45 proposed houses will add further traffic to an area soon to be overwhelmed. The lane the junction with Send road is not big enough to cope. The planning permission already granted for the development at the Tannery will only see further traffic volume.

I OBJECT

Policy A42

Clockburn Nursery, Tannery Lane, Send

This will cause unacceptable traffic levels in Tannery Lane. To the east of the exit the road is narrow (single track in places) with several blind bends exiting into Newark Lane which itself feeds a very narrow and congested junction on to the B2055 in Ripley High Street whilst to the west it feeds onto the A247 a junction with restricted sight lines due to parked cars during the day. It will also add to the additional traffic generated by the proposed marina which is also accessed via Tannery Lane

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

3. Specific Sites

Clockbarn Nursery Tannery Lane (Site No. A42)

- Scale of development: I OBJECT to the proposed increase from 45 to 60 homes because increased development in the area will harm the open aspect of the area and views associated with the Wey.
- Scale of development: I OBJECT to the proposed increase from 45 to 60 homes because this area is acknowledged by river users as being part of one of the very few quiet stretches along the Wey Navigation. Any increase in development scale will reduce this ambience.
- Traffic Infrastructure Capacity: I OBJECT to the proposed increase from 45 to 60 homes because increased development in the area will create additional traffic movements which existing very narrow roads and the Tannery Lane/A247 intersection cannot safely support.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/8242  Respondent: 15341441 / Gillian Thorpe  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42, 45 houses proposed to be built in Clockbarn Nursery, Tannery Lane. Tannery Lane is a country, single access and the staggered cross roads- junction with Send Road is already dangerous, especially due peak times. This will just add to the growing congestion in Send. Planning permission has previously been given for 64 apartments at the Tannery and for building the marina, both of which will generate additional traffic (large vehicles for boats etc) The lane cannot cope with any more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy A42—change to the Clockbarn in Tannery Lane the increase of the number of houses to 60 is totally excessive and will exacerbateSend which is already at capacity during rush hours. It will impact on the village setting, drainage and local amenities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4. I OBJECT to building 45 houses at Clockbarn Nursery, due to inadequate access and traffic volumes. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has already been given for 64 apartments further along along Tannery lane which will generate additional heavy traffic. This now additional housing would compound an already dangerous situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the Policy A42 change at Clockbarn in Tannery Lane because: It ignores all previous objections by residents, and is a 33% increase in homes over and above the original ill conceived plan. Which would exacerbate existing traffic and flooding issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the Policy A42 change at Clockbarn in Tannery Lane because: It ignores all previous objections by residents, and is a 33% increase in homes over and above the original ill conceived plan. Which would exacerbate existing traffic and flooding issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1642  Respondent: 15342529 / Lesley Peed  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to building 45 houses at Clockbarn Nursery owing to inadequate access and traffic volume. Tannery Lane is far too narrow to take any more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has previously been given for 64 apartments at the Tannery and for building the Marina, both of which will generate additional heavy traffic. The junction is too dangerous already and will make it much worse.

The plan appears to be ill-though through and wholly irresponsible as it would have the following impact on the local community: -

- Threat to area of natural wildlife and beauty
  - Ongoing threat of total erosion of the Green Belt and the wildlife it encompasses
  - Destruction of a tranquil, peaceful environment
- Disruption during the construction phase
  - Noise from building work
  - Roadworks causing intolerable traffic congestion
  - The construction of trenches along Tannery Lane for additional drainage, electrical services and supply of mains gas (there is no supply of mains gas along Tannery Lane and beyond - residents are instead reliant on oil or LPG).

- Concerns of additional traffic, which would cause gridlock as the narrow lanes are ill-equipped to

  - Tannery Lane - when driving, care is required with pedestrians, where there is no Turning out of Tannery Lane into Send Road can be extremely hazardous as large vans tend to park close to the junction obstructing the view of traffic to the right and left. The junction would benefit from a mini roundabout. This situation is bad enough with existing traffic - it would become intolerable with extra traffic generated.
  - Papercourt Lane would become a rat-run - narrow passing points on blind bends - cars frequently have to pull over or reverse into passing points to allow traffic to pass through. My car was recently damaged by a large SUV which was struggling to get past it.
  - Newark Lane access into Ripley Village is narrow and barely copes with current traffic levels. The road was built in an era where vehicles were much narrower - today wide 4 wheel drive vehicles struggle to get past. There is no opportunity to increase the road width due to the proximity of legacy housing to the narrow pavements. Newark Lane towards Pyrford is narrow and twisty - even now extreme care has to be taken with cyclists and turning right into Warren Lane is currently very hazardous due to a blind bend, on a steep hill. Additional traffic levels would make driving along Newark Lane intolerable.
  - Send Road - even with existing traffic levels extreme traffic congestion was recently encountered towards Old Woking when temporary traffic lights were installed. With higher traffic volumes this gridlock would become intolerable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to policy A42

Tannery Lane is a narrow country lane which already suffers from too much traffic using it. To build 45 new homes on the Clockbarn Nursery site would cause even more traffic congestion in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1670  Respondent: 15343745 / Stephanie Harris  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A42 - Clockbarn Nursery, Tannery Lane

I object to the development plan under policy A42. This area, especially the road infrastructure, cannot cope with the further development. The lane and junction with Send Road is simply too small and the added traffic volume will only serve to further congestion the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1677  Respondent: 15344641 / Ann Court  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the building of 45 houses at Clockbarn Nursery.

   Tannery Lane has as exceptionally narrow and winding road, in places only room for one car and if you meet a lorry there is no room for manoeuvre.

   Also a very hazardous junction coming from Tannery lane to join the Send Road, the sight vision is dreadful with parked cars either side of

   the junction onto the main road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to building 45 houses at Clockbarn Nursery owing to inadequate access and traffic volume. Tannery Lane is far too narrow to take any more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has previously been given for 64 apartments at the Tannery and for building the Marina, both of which will generate additional heavy traffic. The junction is too dangerous already and will make it much worse.

The plan appears to be ill-thought through and wholly irresponsible as it would have the following impact on the local community: -

- Threat to area of natural wildlife and beauty
- Ongoing threat of total erosion of the Green Belt and the wildlife it encompasses
- Destruction of a tranquil, peaceful environment
  - Disruption during the construction phase

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

2. I OBJECT to building 45 houses at Clockbarn Nursery in Tannery Lane will cause more traffic problems and a great deal more lorries & cars will be using the existing lane; also the building of a Marina will cause great problems and be very The junctions are already taking a high volume of traffic and are known locally to be dangerous; adding extra vehicles to this including boats on trailers, etc will only serve to exacerbate these issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to building 45 houses at Clockbarn Nursery - inadequate access and traffic volume. Tannery Lane is far too narrow and twisty to take any more traffic and Send Road junction already hazardous for vehicles trying to join main road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object Policy A42 Clockbarn Nursery. Tannery Lane. 45 Houses.

As Planning permission has already been granted for development of a marina and 64 apartments (Despite strong local objection) in this narrow lane. Further development will only increase traffic in this narrow lane to an already dangerous junction with the A247.
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- I object to building 45 houses at Clockbarn as it has inadequate access and the junction with Send Road is already dangerous for vehicles exiting onto the main road. Tannery Lane is a ‘lane’ and is totally inadequate to take large quantities of traffic of any kind. It would also make it extremely hazardous for pedestrians or cyclists. There is already planning permission for 64 houses and a marina which will also generate heavy traffic. The road cannot sustain any more traffic.

1. There has been an increase in proposed building of houses from 45 to 60 – this is ridiculously too many for our area.
2. This totally ignores hundreds of previous objections by local residents.
3. Access to Tannery Lane at the A247 junction is not viable for the amount of traffic that will be incurred.
4. Tannery Lane itself if not capable of being used by large or numerous vehicles – it is a Lane.
5. This will be eroding even more of the Green Belt.
6. There is already bad surface water flooding in this area. This can only increase the problem.
7. This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

Clockbarn A42

I objected to the previous proposal to the marina development on Tannery Lane for reasons of traffic etc and the suspicion that further development proposals would follow. More houses here will exacerbate the problem further and I object again to this additional 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
A42 Clockbarn Nursery, Tannery Lane

- This is an increase in the scale of development not reduction
- Traffic problems will be worse
- More green belt erosion, against the stunning river way
- Is this not a flood zone?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2409  Respondent: 15390273 / Roderick Hutchison  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

I object to the housing development at Clockbarn Nursery. Once again the proposed development would greatly increase the traffic along a narrow road, particularly given that the Marina development will also lead to increased traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2413  Respondent: 15390369 / Lewis Thorpe  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

In addition to the other proposals, I object to Policy 42, 45 houses proposed to be built in Clockbarn Nursery, Tannery Lane. Tannery Lane is a country, single access and the staggered cross roads- junction with Send Road is already dangerous, especially due peak times. This will just add to the growing congestion in Send. Planning permission has previously been given for 64 apartments at the Tannery and for building the marina, both of which will generate additional traffic (large vehicles for boats etc) The lane cannot cope with any more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2427  Respondent: 15391329 / Marian Tarrant  Agent:
I object Policy A42 Clockbarn Nursery. Tannery Lane. 45 Houses.

As Planning permission has already been granted for development of a marina and 64 apartments (Despite strong local objection) in this narrow lane. Further development will only increase traffic in this narrow lane to an already dangerous junction with the A247.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed development at Clockbarn Nursery. Tannery Lane is narrow, with poor access, and the junction with the A247 is already dangerous. Another 45 residences will create chaos The apartments proposed for further along this lane, where I enjoy walking and running, alongside many others, simply cannot be adequately accessed via the one track lane. Widening this lane will destroy footpaths and farmland. More concrete, less nature. Another erosion of the Greenbelt.

A42

I object to the inclusion of this site within the local plan. Development of this site will be used to justify future development plans in the area that will have a significant impact on the semi-rural location that the plans specifies; while careful design can mitigate the immediate impact, I believe that it would have significant impact on the area in the longer-term. Access to the site will be via Tannery Lane that will experience a greater volume of traffic in the near future following the approval of plans for 64 apartments at the tannery and building of the Marina and any further development at Clockbarn nursery would further exacerbate this.

I object to the proposal for building 45 houses at Clockbarn. It feels as if comments made by residents of Send are simply ignored from one planning proposal to the next. I sat through the planning meeting where planning permission was granted for a marina on Tannery Lane. Even though the problems of vehicle access along Tannery lane and at its exits – a narrow windy lane with stretches of single passing, with an extremely narrow and windy residential stretch, if traffic continues onto Papercourt Lane, and a tricky junction onto the A247 in Send where visibility to turn out onto the main road is very tricky and hazardous – were raised by many, those who voted to grant permission in no way addressed those issues –the permission to develop the Green belt seemed to be granted on the basis that there were ‘special circumstances’ thereby making it acceptable. The requirements attached to the permission for the marina only appear to address the issues of a pathway through to Wharf Lane and the widening of a 200m stretch towards Send Road. This will not be adequate to eradicate traffic problems from this development and will certainly not support further development. I have never understood what the special circumstances are that would justify introducing hazardous traffic levels to our area and there was the additional concern, at the time, that granting of this permission would lead to further applications in this area, Tannery Lane cannot take any more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1.

I object to the building of 45 houses at Clockbarn Nursery. The added traffic will bring congestion and hazards to an already busy and narrow country lane. The Business Park on Tannery Lane is already working at capacity so it is impossible to imagine how the traffic would be managed at the junction of Tannery Lane and Send Road. A cursory glance demonstrates how difficult that junction is to navigate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42 change at Clockbarn Nursery, Tannery Lane because the proposed housing has increased by 33% from 45 to 60 homes on a road with very restricted access: being effectively single lane in places. Tannery Lane is already used by many motorists as a cut through and is particularly dangerous in winter, as there are no street lights and no restriction on speed. There have already been hundreds of objections by Send residents to the inevitable increase in traffic on this road. This is also an area prone to serious surface water flooding, making it unsuitable for increased housing.

Specifically, I object to Policy A42 change at Clockbarn in Tannery Lane because:
• It will cause extreme congestion at the junction with the A247. Already, at certain times of the day during the working week the whole village is gridlocked. This proposal will only serve to exacerbate the problem
• It will remove greenbelt land which gives the village its 'village feel'
• It will damage open countryside views from the River Wey Navigation and create an eye sore
• It will risk increasing the likelihood of surface water flooding

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

45 houses at Clockbarn Nursery in Tannery Lane - I know and have driven this lane on numerous occasions and object to this proposal. It is ludicrous given that you can only fit one car down the lane and it is very narrow! The roads just do not support the level of increased traffic, the proposal will be hazardous to the public and environment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4334 Respondent: 15438049 / David A Sprigings Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

3. I object to site allocation A42 Clockbarn Nursery, Tannery Lane, Send as it is totally wrong to increase the number of planned homes from 45 to 60 when the total number of homes in the borough during the period of the plan has been calculated as 1,434 lower than the 2016 draft Local Plan. There is therefore no justification for an increase on this site.

7. I object to Site Allocation A42 Clockbarn Nursery, Tannery Lane, Send, as the delivery of all site allocations is contingent upon the delivery of new physical infrastructure (see Foreword extract above) whilst the plan does not include any Utility Infrastructure at all for A42: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 2 Utilities pages 320- 325, which contains NOTHING in respect of A42 in respect of Electricity and Gas distribution and supply; Water supply; Wastewater connections and treatment; Flood risk reduction : surface water mitigation measures, so sufficient physical infrastructure for utilities is NOT planned for.

8. I object to Site Allocation A42 Clockbarn Nursery, Tannery Lane, Send, as the delivery of all site allocations is contingent upon the delivery of new physical infrastructure (see Foreword extract above) whilst the plan does not include any Transport Infrastructure at all: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 1 Transport pages 310-316, which contains nothing specific to A42, just a
vaguely worded LRN 20 Send Road/Send Barnes Lane (Send) traffic management and environmental improvement scheme which will do nothing to overcome the increased congestion in the narrow Tannery Lane arising from 60 new homes being built, an increase of 15 from 2016.

9. I object to Site Allocation A42 Clockbarn Nursery, Tannery Lane, Send as the delivery of all site allocations is contingent upon the delivery of new green infrastructure (see Foreword extract above) whilst the plan does not include any Green Infrastructure at all: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 3 Green Infrastructure pages 325-328, which contains NOTHING in respect of Clockbarn Nursery, Tannery Lane in respect of Green Infrastructure. To the contrary, the existing Green Infrastructure will be significantly reduced by the building of 60 new homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We object to the Policy A42 change at Tannery Lane because increasing the number of homes from 45 to 60 will worsen access and traffic problems in Tannery Lane and at the A247 junction, it is an erosion of the Green Belt and will impact open countryside views.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3105  Respondent: 15446753 / David Boyce  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.
I object to building 45 houses at Clockbarn Nurseries because of inadequate access and traffic volumes (please see below).

The increase in homes from 45 to 60 seems like far too much for the area and it ignores all the previous objections which have been made by local people in the village.

The traffic at the Tannery Lane junction and the main road (A247) is already bad as this is a difficult junction to exit - the proposals can only make matters far worse.

This area is subject to flooding - there is a flood plain nearby. The proposal does not contain good plans for removal of surface water.

This village benefits from the Wey Navigation Canal and its open countryside is an asset. So many houses will mar the views which attract tourism on the canal to the area.

I object to building 45 houses at Clockbarn Nursery because of inadequate access and traffic volume. The junction with Send road is already dangerous for vehicles trying to join the main road. Planning permission has previously been given for 64 apartments at the Tannery and for building the Marina both of which will generate additional heavy traffic.

I OBJECT to the development of 45 houses at Clockbarn Nursery, as Tannery Lane is narrow and unsuitable for any additional amount of traffic, the junction onto Send road is already difficult, hazardous and dangerous at times. This on top of the existing granted planning permission would be a very poor decision to allow.

I object to this proposal.

This rural country lane, Tannery Lane, has already had permission granted for the building of a marina and 64 apartments. These will cause a huge increase in traffic using this very narrow lane and also an increase in the traffic exiting the lane onto Send Road (A247).

Send Road is already extremely busy and frequently at a standstill because of the amount of traffic travelling between the A3, Woking, Guildford and other villages in the borough. Residents living along Send Road are either inhaling traffic fumes because of the traffic jams or in danger trying to cross this busy road. On many occasions Send residents have requested traffic calming measures and a pedestrian crossing but have only been given 3 traffic islands which are constantly being damaged.

Herewith my objections to this dreadful Guildford Plan.
I want these objections to be passed on to the Government Inspector.

Will you please confirm that you have received this email and that my objections are being passed on to the Inspector.

I OBJECT to building 45 houses at Clockbarn Nursery.

There is inadequate access and high local traffic volume.

Planning permission has been given for 64 apartments at the Tannery and for building the Marina. This will generate additional heavy traffic. By adding another 45 houses, this will greatly add to the traffic already there it will be even more chaotic. The junction with Send Road is already very dangerous for vehicles joining the Main Road, this proposal will make it even worse.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the change to Policy A42, Clockbarn Nursery in Tannery Lane. because it hugely increases house numbers, it will cause huge traffic problems, and it once again ignores the many previous objections made by concerned local people.

Guildford Borough Council are failing to defend the Green Belt, and failing to take note of the concerns of local people.

I call on GBC to listen to the concerns local residents are raising, act on their objections, and accordingly amend the Local Plan 2017.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

a) Access is already poor with Tannery Lane being far too narrow to accomodate the proposed increase in housing. Access onto Send Road (A247)is dangerous with vehicles often parked on the kerbs adjacent to the junction. The other direction along Tannery Lane is single track in places. Any increase in car numbers is going to exacerbate these problems.

b) A proposed increase of 33% is far too much (45 homes was already pushing the limits)

c) This proposal seems to ignore all previous local objections - why is this so?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A42 Clockburn nursery site. Tannery Lane, Send
I object to the increase of 15 houses (60 instead of the previous 45).
  a) The site is prone to surface flooding.
  b) The beautiful countryside of the Wey Navigation flora and fauna will be permanently damaged,
  c) increase in traffic in Tannery Lane, a lovely narrow country lane, and particularly at the junction with the A247 which will become a dangerous area opposite The children's playing field.
  d) There is no justification for the increase, ignoring hundreds of previous objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much
- It ignores all the hundreds of previous objections made by local people
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation
I OBJECT to building 45 houses at Clockbarn Nursery because inadequate access and traffic volume. Tannery Lane is far too narrow and twisty to take any more traffic. The junction with Send Road is already very hazardous for vehicles trying to join the main road. Planning permission has previously been given for 64 apartments at the Tannery and for building the Marina, both of which will generate additional heavy traffic. The lane cannot take any more. The junction is too dangerous already and will be made much worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Herewith my objections to this terrible Guildford Plan. Will you please pass these objections to the Government Inspector. Will you please confirm that you have received this email and that my objections are being passed on to the Inspector.

I OBJECT to building 45 houses at Clockbarn Nursery. There is inadequate access and high local traffic volume. Planning permission has been given for 64 apartments at the Tannery and for building the Marina. This will generate additional heavy traffic. By adding another 45 houses, this will greatly add to the traffic already there it will be even more gridlocked. The junction with Send Road is already very dangerous for vehicles joining the Main Road, this proposal will make it far more dangerous.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to CLOCKBARN NURSERY TANNERY LANE POLICY A42 because: Increasing the homes from 60 instead of 45 is an increase of 33% is far too many.
Why have all the previous objections been ignored and then you have added to the number of houses?

The Junction of Tannery Lane and the A247 are at gridlock, lots of times each day at present, and coming out from this junction is VERY DANGEROUS.

Adding any houses to Tannery Lane would add to the danger but 60 houses with say another 120 vehicles as well as delivery vans will give constant gridlock, and accidents.

It will add to the existing surface water flooding.

As a boat user on the River Wey Navigation it will detract from the lovely views from this Canal.

It will further erode our precious Green Belt, which the Government is Committed to keep.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the building of 45 houses at Clockburn Nursery.

The inadequacy of Tannery Lane and the nearby roads to cope with the additional traffic caused by the unwanted development of 64 apartments and a marina must not be compounded by adding even more traffic if the Clockburn Nursery development is granted. This over-development must not be allowed to happen if we are to avoid appalling traffic destroying the enjoyment of this quiet village.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A42 change at Clockburn Nursery, Tannery Lane due to the following points:

The site has very restricted access along Tannery Lane which is single track for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical with 45 homes, so an increase of 33% is just ridiculous.

Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with traffic for 45 extra homes, so an increase is not going to work.

Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. The traffic for this development has not yet been added to the current traffic situation.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane, so an increase in homes just exacerbates the problem.

This change ignores hundreds of previous objections. These have been made by people who live locally, the people who know the area best, they should be listened to, not pushed to one side.

Surface water flooding will be increased with the original number of homes, additional homes will make the situation worse still.

I object to policy A42 changes at Clockbarn in Tannery Lane because: There is no need for housing on this site, the local plan housing target is incorrect. The figures quoted way exceed the local need, the local requirements are for social housing and not large executive boxes as favoured by developers to maximize profits. The revised proposal to increase the development by 33% makes a mockery of THE GREEN BELT. The site is part of the permanent GREEN BELT at Send and should remain undeveloped in order to preserve the amenity of the surrounding area. Any development will create URBAN SPRAWL along the Wey Navigation and have a very negative effect on this asset of Guildford Borough. The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical. Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I utterly object to building 45 houses at Cockbarn nursery. There will be inadequate access and vastly increased traffic volumes, without mentioning the likely increased volumes of traffic for Woking station which already boasts some of the most busy rush hour services in the country (this applies to all the proposed development). The junction with send road is already very dangerous for cars and lorries trying to join the main road. This will be on top of the previous planning permission granted at the tannery and the marina which will themselves greatly increase traffic volumes

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I Object to the Policy A42 change at Clockbarn in Tannery Lane

because the proposed increase to 60 houses is pushing the limit for how the local infrastructure can cope in particular the narrowness of Tannery Lane for which there is probably no resolution without demolishing existing properties and also the very poor sightlines on the junction with the A247.

When the original proposals were published I did not object as the village does need extra houses but this is typical council thinking that if few people object then they can pile even more houses on to the plan and get away with it.

Comment ID: PSLPS16/6097  Respondent: 15584065 / Amy Gervasio  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the houses proposed at Clockbarn Nursery because the lane there just will not cope with that sort of traffic! It is too narrow and twisty. The junction with the main road through Send is already overloaded and cannot take the added amount of traffic resulting from possibly an extra 90 to 100 cars generated by 45 houses!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6103  Respondent: 15584097 / George Gervasio  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- I object specifically to the proposed Clockbarn Nursery development in Send. Tannery Lane is not wide enough or straight enough to allow the amount of traffic generated by 45 houses. The junction of Tannery Lane, Sandy Lane with Send Road is a nightmare now. This amount of development will make it impossible and Tannery Lane cannot be widened at this junction as there is housing on either side.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.
Clockburn Nursery, Tannery Lane

I object to the development proposal for 45 houses, again because of inadequate access and volume of traffic. Tannery Lane is far too narrow and has a number of bends making additional traffic an obvious non starter. It is already hazardous for vehicles attempting to join the main Send Road. Planning permission has previously been given for 64 apartments at the Tannery and building a Marina, both of which will generate additional heavy traffic.

In particular I have issues with Guildford’s plans for the following developments as they do not show consideration for their surroundings, the impact the influx of large numbers of people will have on village life or the roads that will receive increased traffic flow.

Clockburn Nursery, Tannery Lane (45 houses) covers an area where there is already a marina and 64 apartments planned. Tannery lane is a single track road that already takes far too much traffic. The quality of the road is poor and the edges non-existent and walking along these roads impossible. It emerges at Send Road at a cross roads that is already horrendous to navigate.

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

• The increase to 60 homes in place of 45 homes is 33% more and too much
• It ignores all the hundreds of previous objections made by local people
• It will worsen access and traffic problems in Tannery Lane and at the A247 junction
• It will make erosion of the Green Belt in our village worse
• It will make surface water flooding, which is already bad, even worse

• It will impact open countryside views from the River Wey Navigation

Page 253 of 327  Document page number 474
I object to building 45 houses at Clockbarn Nursery. This is a ridiculous idea. Tannery lane is a narrow and bendy road joining Send Road at a very difficult and potentially dangerous junction. The traffic in Send is already heavily congested and further traffic emerging from Tannery Lane will only make this worse. Traffic improvements at the junction will not help, as the congestion is the result of bottlenecks at both the Burnt Common and Old Woking roundabouts. The future traffic has already been exacerbated by planning permission for 64 apartments and a marina further down Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We strongly object to the plan to erect 45 new houses at Clockbarn Nursery due to the impact of the increased level of traffic. Tannery Lane is a regular route for us and we constantly feel to be at risk to our safety due to the narrow width, winding road and volume of traffic. Anything that adds to this is not acceptable and risks injury to an even greater extent than now.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- Yet again you are ignoring the clear concerns of local people. Why?

- Tannery lane is not appropriate for the development you seem determined to allow. Why don’t you come and have a look at the narrow nature of the lane (it is a lane) that is wholly unsuitable for the amount of additional traffic that would be generated.

- There is a 33% increase in homes. Why? This ignores the wishes of local people and exacerbates the above problems.

- The permanence of the open River Way countryside will be permanently lost. Quite clearly that is counter to the key tenets of the NPPF. There are no exceptional circumstances.

POLICY A42 CLOCKBARN NURSERY

I object to policy A42 Clockbarn Nursery. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area. The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical. Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic. Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

Policy A42 Clockbarn Nursery, Tannery Lane

The proposed allocation for 45 homes in the previous draft plan on green belt land was objected to & I object again to this revision which now proposes a 33% increase to 60 homes. Tannery Lane is unsuitable for the quantity of traffic which would be generated, as is the junction with the A247, and there are no exceptional circumstances to warrant development on the green belt.

Site A42: Clockbarn Nursery, Tannery Lane, Send

The Parish is very concerned that additional development will exacerbate the existing traffic congestion in the village. The cumulative impact of proposed allocation A44, Send Business Centre and unimplemented planning permission 14/P/02289 for a new marina to the north of Tannery Lane could introduce significant levels of new traffic to the surrounding streets.

Tannery Lane is narrow, making it very difficult for vehicles to pass along the entire length, especially for larger commercial vehicles. This often results in vehicles needing to reverse to find a suitable passing place. Currently short-term parking occurs along Tannery Lane and Send Road, which can lead to reductions in visibility for drivers emerging from the side road. Tannery Lane narrows towards the northern end and the 400m stretch before the junction with Polesden Lane is c.2.75m wide. The road cannot be widened due to the adjacent nature reserve.
Tannery Lane also provides poor pedestrian access. There is a short section of pavement on the southern side of the lane, running approximately 100m north east of Send Road. The remainder of Tannery Lane has no provision for pedestrians, with few opportunities for improvement due to the narrow carriageway.

Although Environment Agency flood maps include the site in flood zone 1, the land currently floods, despite recent improvements to drainage. Send Parish therefore urge the Council to re-consider this proposed allocation in light of traffic and flooding issues.

Attached documents:
Future Planning & Development provide planning advice to our client Send Surrey Ltd in respect of their site Land Heath Drive Send, Woking, Surrey, GU23 7EP (‘the site’).

This Statement has been prepared in response to the Guildford Borough Council Proposed Submission Local Plan consultation (Regulation 19) which ends on 18 July 2015.

The 2.51ha site is privately owned by Send Surrey Ltd. The site is proposed to be allocated as Open Space in the Proposed Submission Local Plan. Our client has previously made representations to promote the site for housing through the Local Plan process.

Section 20 of the Planning and Compulsory Purchase Act 2004 (as amended) requires that local plans must be positively prepared, justified, effective and consistent with national policy in accordance with guidance set out in the National Planning Policy Framework (NPPF).

Send Surrey Ltd. does not consider that the draft Local Plan submitted by Guildford Borough Council meets the definition of “sound” set of in paragraph 182 of the NPPF.

The objections focus on two specific policy areas with regards to the soundness of the plan: open space and housing delivery. Both of these policy areas are pertinent to our clients’ interests in developing the site for housing, however the representations are submitted without prejudice to the development aspirations of Send Surrey Ltd.

The remainder of this statement is set out as follows:
a. The background to the site
b. The allocation of the site in the Local Plan
c. Assessment of the housing policies
d. Assessment of the open space polices
e. Assessment of the soundness of the plan
f. Proposed modifications to the plan

**Background**

**Site Description**

The 2.51ha site is located at Land Heath Drive Send, Woking, Surrey GU23 7EP in the north-western corner of the village of Send. The site is privately owned and currently has no formal use.

The site is bound by the Wey Navigation Canal to the north and west. To the south and east the site is bound by residential development which effectively forms the northern edge of the built-up part of the village.

The site is privately owned with no legal rights of way across the site. The site does not have any formal footpaths within it, however, at present, it is not enclosed.

The site is undeveloped and includes a number of mature trees with the denser tree coverage around the northern and western boundaries and open space within the centre of the site.

The site is covered by a group Tree Preservation Order (TPO). The TPO was confirmed on 9 September 1997. The Emergency TPO was made following the felling of a number of trees undertaken by a previous owner of the site. The TPO was justified upon the basis that the group of trees provided high amenity value; particularly from the Wey Navigation.

The site is in a sustainable location with easy access to services provided within the village of send and public transport links to the facilities and services provided within neighbouring villages and towns. The site is not at risk of flooding and is located within Flood Zone 1.

**Ownership and Opportunity of Delivery of Housing**
The site is owned by a single company called Send Surrey Ltd (registered number 10173245). The company intends to develop the site for housing. The site is available, viable and deliverable for housing in the short-term (0 – 5 years).

Taking account of existing constraints and access, the site could deliver in the region of 30 – 40 units. The existing tree coverage and edge of settlement location encourages a low density development of around 25 dwellings per hectare over the developable part of the site which is around 1.5ha. The protected 1ha of land will ensure that the northern and western boundary of the site would retain its tree lined perimeter; this is the part of the site which contributes to the site’s visual amenity value. An indicative layout for 32 units is provided in Appendix 1.

Any residential development will provide 40% affordable housing in line with policy. The housing mix will respond to local needs and also the physical constraints of the site.

2.10 The development of the site provides an opportunity for a natural extension to the built-up part of the village whilst retaining the key features of amenity and providing public access through the site to enable it to function as open space.

Planning Background

2.11 The site was submitted to the Strategic Housing Land Availability Assessment (SHLAA) in 2014. The site was identified (reference number 052) as a potential low density site for 16 units within a timeframe of 11 to 15 years. The low density and delayed timeframe proposed by the Council was due to its perceived uncertainty of deliverability due to the multiple ownership of the site at the time. The SHLAA extract is given in Appendix 2.

2.12 The Draft Local Plan was published for consultation in June 2014 (Regulation 18).

The Draft Local Plan amended the settlement boundary to include the site. It also proposed to inset the site from the Green Belt. The Draft Local Plan Proposals Map inset for Send is given in Appendix 3.

2.13 The site was however discounted for housing in the Land Availability Assessment (May 2016) due to suitability concerns over protected open space, the TPO covering the site and the impact on the Corridor of the River Wey.

Legislative Framework and National Planning Policy Framework (NPPF)

Plan-making Policies

Paragraph 182 of the NPPF provides guidance on the Examination of Local Plans. It states “The Local Plan will be examined by the Planning Inspectorate whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. A local planning authority should submit a plan for examination which it considers is “sound” – namely that it is:

- Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;
- Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence;
- Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and
- Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

Paragraph 167 relates to the appropriate use of the evidence base in the plan making process. It states “Wherever possible the local planning authority should consider how the preparation of any assessment will contribute to the plan’s evidence base. The process should be started early in the plan-making process and key stakeholders should be consulted in identifying the issues that the assessment must cover”

Open Space Policies

Open Space is defined in the NPPF as:
“All open space of public value, including not just land, but also areas of water (such as rivers, canals, lakes and reservoirs) which offer important opportunities for sport and recreation and can act as a visual amenity”

Paragraph 72 of the NPPF states “Access to high quality open spaces and opportunities for sport and recreation can make an important contribution to the health and well-being of communities. Planning policies should be based on robust and up-to-date assessments of the needs for open space, sports and recreation facilities and opportunities for new provision. The assessments should identify specific needs and quantitative or qualitative deficits or surpluses of open space, sports and recreational facilities in the local area. Information gained from the assessments should be used to determine what open space, sports and recreational provision is required”

Paragraph 74 of the NPPF states “Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless:

• an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or
• the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or
• the development is for alternative sports and recreational provision, the needs for which clearly outweigh the loss.”

Housing Policies

Housing delivery is at the heart of the NPPF. Paragraph 17 sets out the overarching core planning principles to underpin the plan making and decision taking process, one of which is to objectively identify the need for housing (and other development) and set out a clear strategy for allocating sufficient land which is suitable for development. Paragraph 47 relates specifically to housing supply and states “To boost significantly the supply of housing, local planning authorities should:

• use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area, as far as is consistent with the policies set out in this Framework, including identifying key sites which are critical to the delivery of the housing strategy over the plan period;
• identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements with an additional buffer of 5% (moved forward from later in the plan period) to ensure choice and competition in the market for land. Where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to 20% (moved forward from later in the plan period) to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land;
• identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15;
• for market and affordable housing, illustrate the expected rate of housing delivery through a housing trajectory for the plan period and set out a housing implementation strategy for the full range of housing describing how they will maintain delivery of a five-year supply of housing land to meet their housing target; and
• set out their own approach to housing density to reflect local circumstances

The Allocation of the Site

The allocation of the site is set out on the Proposed Submission Local Plan Proposal Map, extract below: <see attachments>

The site is designated as Open Space (pink line) and Conservation Area (brown line). The site, and the wider village, have been inset from the from the Green Belt boundary (green dashed line). There is no proposed settlement boundary to the village.

Send is a Rural Local Centre in accordance with the Hierarchy of Retail and Service Centres. The function of such centres is to provide for everyday retail and service needs for the local population of that immediate area with larger ones also including a number of more specialist comparison shops
The Proposed Submission Local Plan proposes to allocate the site as open space under Policy I4 - Green and Blue Infrastructure.

Policy I4 states “Open space (encompassing all open space within urban areas, land designated as Open Space on the Policies Map and all land and water that provides opportunities for recreation and sport) will be protected from development in accordance with the NPPF”

The preamble to the policy clarifies the role that open space plays “Public open space is particularly important due to the positive contribution it makes to the character of our settlements, our health and social interaction, and forms the backbone of the green infrastructure network in our settlements. Therefore it is considered that cumulatively these spaces form a valued asset of strategic importance that should be protected as a strategic priority”

Strategic Policy S2 sets out the growth in the borough over the plan period. With specific regards to housing, the policy states “During the plan period (2013-33), we will make provision for 13,860 new homes… The delivery of homes is expected to increase over the plan period, reflective of timescales associated with the delivery of strategic sites and infrastructure. The housing target each year is as set out below, however, this is not a ceiling, and earlier delivery of allocated sites will be supported where appropriate, subject to infrastructure provision”

The policy sets out its annual housing targets over the plan period:

<table>

**Open Space Policy Assessment**

The site is allocated as Open Space under policy IC4 in the Proposed Submission Local Plan.

The evidence base prepared in support of the policy is the Guildford Open Space, Sport & Recreation Assessment 2016 – 2033 (June 2016) in addition to the Assessment of Sites for Amenity Value (May 2016). Together, the assessments are
the primary evidence base documents produced in support of the open space policy – Policy I4 – in the Proposed Submission Local Plan.

The Open Space Sport & Recreation Assessment identifies land of public value across the borough. The assessment identifies that the site is “Accessible Natural Green Space” (brown shading on extract below). This housing typology is incorrect; this land does not meet the criteria by virtue of the fact that it is privately owned.

The Assessment of Sites for Amenity Value is an evidence base document produced in support of the open space policy IC4.

The assessment sets out a methodology to score various sites’ amenity value. The methodology assesses sites on a number of criteria as set out in Table 1 (page 8). The criteria includes: aesthetic value, access to the site, access to community facilities; access within the site; biodiversity; links to other green infrastructure; derelict or damaged land and overall amenity value.

The specific scores in relation to the above criteria are not given in the report; however the assessor’s comments in relation to the site are given as follows “Access to the site off a cul-de-sac and along an informal footpath running through the trees, sycamore dominated semi-mature trees with nice understory, some very mature oak and chestnut trees. View in and out of site”

The site came out with an amenity value score of ‘high’, this in turn led to the allocation of the site as Open Space on the Proposed Submission Proposal Map in accordance with the allocation methodology.

This assessment is however wrongly informed and therefore the evidence base is flawed in respect of this site.

**Housing Delivery Policy Assessment**

Strategic policy S2 seeks to deliver 13,860 units over the plan period. The annual housing targets set out in the policy have been adjusted to provide more units towards the later stages of the plan period.

The bulk of the housing is to be delivered by development in the Guildford urban area and a number of strategic sites at Gosden Hill Farm and Blackwell Farm (3,940 units, Policies A25 and A26) and the Former Wisley Airfield (2,100 units, Policy A35). These sites have been earmarked for delivery in 1-15 year period in Table 1 of the Local Plan (page 26). The Housing Topic Paper highlights that the early years of the plan are more dependent on a number of smaller sites, than a lesser number of larger sites.

**Soundness of the Plan**

Open Space

Open space is defined in the NPPF as land of public value which provides opportunities for sport and recreation and can act as a visual amenity.

The land allocated for open space is privately owned land with no access to the public and therefore does not provide for any sport or recreation opportunity. It is however acknowledged that, to a degree, there is some amenity value; however, this alone is not sufficient to justify the site’s allocation for open space.

Paragraph 72 of the NPPF requires that policies should be based on robust and up-to-date assessment of the needs for open space identifying specific needs and quantitative or qualitative deficits or surpluses.

The site has been erroneously identified as being public land. This has led to it being identified as suitable for assessment as open space. Upon this basis, the allocation of the site is not sound.

It is acknowledged that the site holds some amenity value. The amenity value relates to the visual appreciation of the trees lining the River Wey viewed from the north of the village; this is the only vantage point from which the trees can be fully viewed.
Although there is some amenity value, the amenity value is the only benefit the site has with regards to the recognised function of “open space” as set out in the NPPF. It has no recreational or sporting value. Furthermore, there is no prerequisite for open space to be of amenity value, the primary function is for sport and recreation, in some instance it “can act as a visual amenity”.

The amenity value of the site has been recognised through the Tree Preservation Order for the site. It is our view that the TPO is sufficient to protect the amenity value of the site. The allocation of the site for open space is therefore unnecessary and unduly restrictive. This is unsound in accordance with the need for plan to be justified based on proportionate evidence.

It is also important to highlight that the village is surrounded by Green Belt; this is land which is designated principally for its amenity value. The proposed removal of the site from Green Belt in the current plan and allocation for open space (adjoining Green Belt) is somewhat perplexing because it does not meet with the objective of allocating open space for amenity value. Open space is often allocated to provide relief from built form where it can be appreciated and is of its highest public value.

The amenity value of the site is limited due to it adjoining the Green Belt and being outside of the built-up part of the village. In addition, the site’s location on the edge of the village results in there being little distinction between amenity value of the site and the amenity value of the surrounding Green Belt. If, on the contrary, the site was accessible open space in the middle of the village distinguishable from the built form of the village, e.g. a village green, then an open space allocation would be warranted. We believe that the evidence base has failed to acknowledge this in the methodology and for this reason the policy cannot be said to be justified based on proportionate evidence.

Housing

7.10 Paragraph 47 requires that local authorities to ensure that their plan meets the objectively assessed housing need for housing consistent with the policies in the framework. Where an authority has a persistent record of undelivery, a 20% buffer should he added (moved forward from later in the plan period).

7.11 Guildford Borough Council has completed 728 dwellings in the past 3 years, on average less than 250 a year, and less than 300 a year over the past 7 years, failing to meet the targets carried over from the South East Plan.

7.12 In light if this record of persistent undelivery, there is no dispute that a 20% buffer should be applied. However, the local authority has made clear that it is not possible to deliver the 20% buffer along with the accrued shortfall (2,019 units) in the first five years. In accordance with the NPPF, the plan should make provision for 6,177 units in the first 5 years. As the plan has not identified sufficient land to meet with this requirement in line with the NPPF, the plan has not been positively prepared and is therefore not sound in accordance with paragraph 182 of the NPPF.

7.13 Notwithstanding the above, Guildford are unlikely to meet with the housing targets set out in Policy S2; these are staggered over the plan period. The approach of staggering the housing targets over the plan period is unsound. In reality this is only likely to exacerbate housing supply issues later on in the plan period.

7.14 The delivery of the strategic sites is vital to meeting the overall housing supply. The plan however does not specify however if these sites are to be delivered in the short (0-5 years), medium (6-10 years) or longer (11-15 years) term. The plan states they will be delivered in 1-15 years, this is not in accordance with the guidance in paragraph 47 of the NPPF.

7.15 In a wider economic context, it is important to acknowledge that the implications of Brexit on housing delivery are likely to be severe. There are a number of factors that are likely to have an impact on housing delivery, these issues are most likely to manifest in the delivery of large-scale strategic sites being developed by national house builders. For these reasons we believe that more emphasis should be placed on the identification of small-medium sized sites in addition to the allocation of additional strategic sites.

7.16 With regards to housing the plan is not effective; it is not deliverable over the plan.

To this end, it is not sound.

Use of Evidence Base
7.17 Paragraph 167 of the NPPF states that wherever possible the local authority should consider how the preparation of an assessment will contribute to the plan’s evidence base. It requires that the process should start early in the plan-making process and key stakeholders should be consulted in identifying issues.

7.18 With regards to the assessments that have informed the open space policy, i.e. the Guildford Open Space, Sport & Recreation Assessment 2016 – 2033 (June 2016) in and the Assessment of Sites for Amenity Value (May 2016), their preparation has not been in accordance with national planning policy.

7.19 These assessments were published in May and June 2016. These then informed policies which were included in the Proposed Submission Local Plan for the first time upon its publication in June 2016.

7.20 The open space allocations were not in the previous iteration of the Local Plan and, as such, this did not give interested parties an opportunity to comment on these policies or indeed any time to prepare any rebuttal to these designations with supporting evidence, for example, an arboricultural survey, ecological survey, open space assessment or landscape and visual impact assessment. The opportunity to provide such evidence would have provided a more robust evidence base and a sounder basis for allocation.

7.21 To this end, the plan is not justified and has not been considered against other alternatives or based on proportionate evidence. This is clearly an unsound approach to plan making.

** Recommended Modification of the Plan **

Due to the open space designation being unsound, it is respectfully requested that the Inspector removes the open space allocation from the site. With specific regard to the site, the open space designation is not necessary with the existing TPO.

Notwithstanding any inaccuracies in the evidence base, the process of allocating open space commenced too late in the plan making process. We are therefore also of the view that the entire open space allocations should be re-consulted upon.

If the Inspector is of the view that the open space allocation is justified, the applicant would like to recommend a modification to the allocation.

The modification would involve the decreasing the size of the open space allocation to the area shown on the site layout plan (Appendix 1). This would comprise a 1ha strip of open space along the northern boundary of the site. This would retain the trees which contribute to visual amenity.

This modification would also be compatible with the development of the inner parts of the site. Should any application for development be made on the site; the Send Surrey Ltd could consider making this strip of land accessible to the public, to be used as public open space (although the site would be held by Send Surrey Ltd). This would significantly improve the function of the area as open land, however this will only be achievable if delivered as part of a housing development and any such development will only be feasible if the proposed open space allocation for the site is removed.

The plan does not provide sufficient land for housing to meet the objectively assessed need as required by the NPPF. We recommend that the plan is re-consulted upon and further sites identified to meet the housing supply requirements consistently over the plan period. The current approach is not sound and is likely to exacerbate housing supply issues later on in the plan period.

In addition, the housing targets are have been modified so that the local authority has some prospect of maintaining a 5YHLS, however, in doing so, this will stop development coming forward on the basis of there being no 5YHLS. This again, will exacerbate housing supply issues later on in the plan period.

Allowing housing application to come forward and be assessed in accordance with the presumption in favour of sustainable development in the absence of a 5 year housing land supply is an important function of the NPPF with regards to boosting the supply of housing. Staggering the annual housing to avoid such a circumstance prevailing is
counterproductive as it restricts this key function of the NPPF to boost supply. Therefore we believe the housing targets must be annualised over the plan and recommend this as a modification.

**Executive Summary**

The site is deliverable, located sustainably, has good potential for vehicular and pedestrian connectivity and is enclosed by defensible boundaries formed from existing and consented development ensuring the openness of the Green Belt is not affected.

Accordingly, the site was supported to accommodate significant residential development by the April 2014 Green Belt and Countryside Study and the July 2014 draft Local Plan.

However, the rationale set out within the 2016 Housing Delivery Topic Paper applies a blanket approach which results in the site not being allocated in the draft Local Plan 2016. Such an approach denies the opportunity to consider the value of the site as demonstrated by its exclusion from the 2016 sustainability appraisal despite it being considered an allocated site in the 2014 draft Local Plan. This approach, which does not consider the comparative value of this deliverable site, calls the soundness of the Local Plan into question.

Based on a comparative assessment of the site, its sustainability and deliverability it should be included in the Local Plan as a residential allocation contributing to meeting the housing need of the Borough.

**1.0 Introduction**

1.1 This document will consider the sites involvement in the Guildford Borough Local Plan process to date, whether the site could be developed, how the site compared to those proposed to be allocated in the Local Plan and whether the site should be allocated for residential development in the Local Plan.
1.2 This document should be read in conjunction with the submitted Site Appraisal and covering letter.

2.0 The site and the local plan process 2013-2016

October 2013 Issues and options

2.1 The site was not included in the 2013 Issues and Options document on the basis that the Council did not consider that the site was deliverable as the owner had not responded to the call for sites. However, Mr Cook, of his own volition entered into dialogue at the time concerned that the Council had not approached him.

April 2014 Greenbelt and Countryside Study

2.2 The site was thereafter considered in the Green Belt and Countryside Study of which the relevant part (volume V) identified parcel of land B16A as the application site (plus some surrounding land). The Study, the relevant extract of which is attached at Appendix A, was published in April 2014 prior to the draft Local Plan 2014 being published.

2.3 The Study, which considered whether Send has capacity for a ‘Major Village Expansion’, categorised the wider area the site lies in as a ‘high sensitivity’ Green Belt area. However, it made several observations that the site:

- “is relatively unconstrained in environmental capacity terms”;
- “has a bus service rating of 3 within GBC’s Settlement Hierarchy document which is classed as a good service”;
- “provides opportunities for pedestrian linkages to the River Wey towpath connecting to Old Woking and vehicular access to the A247 Send Road via Tannery Lane”;
- “provides an opportunity to form a waterfront development”;
- “Send scored highly in terms of total community facilities and was ranked 5th in terms of the sustainability assessments within the GBC settlement hierarchy”
- “the score of 24 in terms of community facilities is higher than a number of similar sized settlements”;
- “provides opportunities to accommodate a major expansion without significantly compromising the openness of the wider Green Belt across the Borough”;
- “would not result in settlement coalescence due to the physical separation provided”;
- “would not likely affect any historic setting” and
- “the impact on openness would be limited be enclosure provided by treebelts following the River Wey Navigation to the north, treebelts following Tannery Lane and hedgerows to the east”.

2.4 In conclusion the Study “considered that a Potential Major development Area at land parcel B16A (which includes the site) to the north of Send would be appropriate as a major village expansion as the sustainability credentials outweigh the potential harm to the openness and purposes of the Green Belt”.

2.5 It was therefore not surprising that the site was included for residential development in the draft Local Plan 2014.

July 2014 draft Local Plan (Regulation 18)

2.6 The site, as part of a wider parcel of land including Clockbarn Nurseries and land to the south of Tannery Lane, was included for up to 215 residential dwellings in the draft Local Plan 2014 an extract of which is attached at Appendix B.

2.7 In allocating the site the draft Local Plan recognised that “there is an opportunity to provide a mix of uses in this area, resulting in leisure facilities and new homes (including at least 45% affordable homes), close to a strategic employment site (Send business centre). This also makes use of the former nursery that is now disused”.

August 2014 draft Sustainability Appraisal

2.8 The sites allocation for residential development in the 2014 draft Local Plan was further strengthened by the sites high score in the subsequent 2014 draft sustainability appraisal an extract of which is attached at Appendix C.

September 2015 planning approval for the construction of a marina (14/P/02289)
2.9 The sites allocation was again further supported by the approval, in September 2015, of a marina to serve the River Wey Navigation a plan of which is attached at Appendix D. By allowing the application the Council, due to the existing Send Business Centre and Clockbarn Nurseries, enclosed the site changing its character and bringing it within the form of Send.

June 2016 Sustainability Appraisal

2.10 It was surprising, given the Council had previously not only accepted the benefits of, but had actively promoted, the site as a residential allocation, that the site was not considered by the June 2016 sustainability appraisal. This is confirmed by an e-mail from the Council attached at Appendix F.

2.11 This is particularly surprising given that the methodology of the Sustainability Appraisal states (at paragraphs 5.13 and 5.14) that:

“Specifically, in-line with regulatory requirements, there is a need to explain how work was undertaken to develop and then appraise reasonable alternatives, and how the Council then took into account appraisal findings when finalising the Proposed Submission Plan.

More specifically still, this part of the report sets out to present information regarding the consideration of reasonable alternative spatial strategies, i.e. alternative approaches to the allocation of land to meet housing (and economic) needs”.

2.12 Given that the site has previously been considered appropriate for development, and this was confirmed by the draft 2014 Sustainability Appraisal, the fact that the site, as a realistic prospect for accommodation residential development, was not even considered by the 2016 Sustainability Appraisal is surprising and must call into question the soundness of the draft Local Plan.

June 2016 Housing Delivery Topic Paper

2.13 The rationale for applying a blanket restraint on the site is set out in the Housing Delivery Topic Paper 2016 which seeks to focus residential development as follows:

<see attachment>

2.14 This approach disregards the previous assessment of the site that lead to its positive score in the 2014 draft Sustainability Appraisal and its inclusion as an allocation in the 2014 draft Local Plan. Not only does it disregard this previous work but it prohibits any assessment of the site at all going forward because it is currently sited in the green belt. Such an approach gives no weight to the conclusions of the 2014 Countryside and Green Belt Study (which considered the site favourably) or the change in circumstances at the site (i.e. its enclosure by the approval of the marina, the proposed allocation of Clockbarn Nurseries and existing development) which could arguably lead to the conclusion that site should not be included within the Green Belt designation.

2.15 This approach applies too much weight to the Green Belt designation at too early a stage in the Local Plan process and relies heavily of large allocations being deliverable early within the plan process which, accordingly, calls into question the soundness of the Local Plan.

June 2016 Local Plan (Regulation 19)

2.16 Given the methodology that had been set out in the Housing Delivery Topic Paper it was not possible for the site to be considered for inclusion by the Council in the draft Local Plan 2016. However, development is proposed at Send on Clockbarn nursery and this is set out in the extract from the local plan at Appendix G.

3.0 Should the Green Belt designation be changed?

3.1 The site was included in the Green Belt by the 2003 Guildford Local Plan. However, the context of the site has changed since this time with its increasing integration into Send. To the north the site is bounded by the River Wey Navigation and the consented marina, to the north east by Send Business Centre, to the east by the vehicular access to the consented marina, to the south by Clockbarn nursery and to west by residential development adjoining Send Road.
3.2 It is therefore appropriate to consider whether the Green Belt designation should still apply to the site by assessing it against the five tests set out at paragraph 80 of the NPPF:

<table>
<thead>
<tr>
<th>NPPF Test</th>
<th>The Site</th>
</tr>
</thead>
<tbody>
<tr>
<td>“to check the unrestricted sprawl of large built-up areas”</td>
<td>The proposed site would infill between existing and consented development having little impact upon the openness of the Green Belt.</td>
</tr>
<tr>
<td>“to prevent neighbouring towns merging into one another”</td>
<td>Development of the site would not lead to the actual, nor perceived, merging of two settlements.</td>
</tr>
<tr>
<td>“to assist in safeguarding the countryside from encroachment”</td>
<td>The presence of Send Business Centre, Clockbarn Nurseries and the consented marina has introduced development around the site. The development of the site would not extend the built form of Send into the countryside as it has already occurred at this location.</td>
</tr>
<tr>
<td>“to preserve the setting and special character of historic towns”</td>
<td>The development of the site would not harm the setting or special character of a historic town.</td>
</tr>
<tr>
<td>“to assist in urban regeneration, by encouraging the recycling of derelict and other urban land”</td>
<td>To meet the housing need of the Borough development must occur and it is appropriate to direct it to the least harmful locations with regard to protecting the countryside. Due to the existing and consented development surrounding the site its development would not be considered as encouraging development within the countryside.</td>
</tr>
</tbody>
</table>

3.3 Given the above it can be reasonably considered that the site does not portray the characteristics of a site within the Green Belt as it does not contribute to the openness of the Green Belt due to the presence of existing and consented development enclosing the site.

4.0 Can the site be developed?

4.1 As set out within the supporting Site Appraisal the site could be developed without resulting in any demonstrable harm for a range of dwellings from 50 to 140 dwellings in addition to the provision of open space for the local community. This section will consider the reasons why the site is suitable and deliverable within the earliest stages of the draft Local Plans housing delivery trajectory.

4.2 The site is immediately deliverable as the land is within the control of Mr Cook and there are no known legal or ownership issues that would constrain the site coming forward for immediate development.

4.3 The site is located in a sustainable location when regard is had to the economic, social and environmental dimensions.

4.4 The site would not harm the openness of the Green Belt as it has defensible boundaries encompassed by existing and consented development.

4.5 The site is not located within a designated sensitive landscape and does not fall within any other 'sensitive area' as defined in Regulation 2 of the Environmental Impact Assessment Regulations 2011.

4.6 The site can accommodate a high quality of design that respects local distinctiveness in accordance with policy D1 of the draft Local Plan 2016 and includes affordable homes in accordance with policy H2 of the draft Local Plan 2016.
4.7 The site has good existing vehicular access due to the recent formation of an access to the marina and also has the potential to create a further access onto Tannery Land and offer vehicular permeability to the site allocated to the immediate south at Clockbarn Nurseries.

4.8 The amenity of occupiers of the existing residential dwellings to the western boundary of the site can be respected through careful design and layout.

4.9 The site is located close to local services and facilities and can support safe and easily accessible pedestrian permeability to these facilities and services.

4.10 The site can provide open space for the benefit of the local community. Open space would be provided in each phase of development option one as follows: phase one 0.65ha; phase two 0.33ha; and phase three 0.72ha. If development option two is chosen the same would apply but a further 1.55ha of open space would be provided in lieu of phase three. This could include the potential expansion of the marina.

4.11 The introduction of residential development would respect the River Wey Corridor the policy designation for which is arbitrarily drawn. The proposed development would enhance the purposes of establishing the River Wey Corridor by providing opportunities to improve education by increasing understanding of the River Wey Navigation and its associated habitats in accordance with policy E6 of the draft Local Plan 2016. Therefore, the introduction of residential development would enhance the River Wey Corridor Conservation Area in accordance with policy D3 of the draft Local Plan 2016.

4.12 The site would support economic development in Send supporting existing employment sites such as at Send Business Centre. This is in accordance with policy E5 of the draft Local Plan 2016.

4.13 The site is not of any significant agricultural value as it primarily constitutes infill from the excavation of the adjacent (now full) landfill site that was previously formed of gravel.

4.14 Because of the history of the infilling of the surface of the site all the material imported was certified as clear so the site has no known land contamination.

4.15 Whilst the northern part of the site identified as a mineral safeguarding zone no evidence has been put forward by Surrey County Council to state why this particular parcel of land has an overriding value in that regard.

4.16 The site can be connected to existing gas, electricity, telecommunication, foul sewerage and water services.

4.17 The site is within EA Flood Zone one where the introduction of residential development is considered acceptable. A Sustainable Urban Drainage Scheme (SUDS) would complement a landscaping strategy.

4.18 The site is not within an Air Quality Management Area (AQMA).

4.19 The ecological value of the site is primarily within the existing hedgerows and mature trees along the field boundaries and River Wey Navigation corridor on the northern part of the site. These habitats would be enhanced by the introduction of residential development.

5.0 Comparison with sites proposed to be allocated in the 2016 draft Local Plan

5.1 The methodology employed through the adoption of the Housing Delivery Topic Paper results in a situation whereby many smaller extensions to the Green Belt to accommodate sustainable, deliverable and often appropriate development cannot be considered.

5.2 The methodology also results in significant allocations to large sites being relied upon heavily to meet the housing needs of the Borough – such as almost 4,000 dwellings through extensions to Guildford and 2,000 dwellings at the former Wisley airfield. This places significant pressure on these larger sites, often funded by international finance, to meet the housing need rather than spreading the allocations in a more robust and measured way which reflects the financing structure of smaller sites that often renders them more deliverable as they are robust from international economic pressures.
5.3 The methodology also places significant weight on the Green Belt designation whereas often a development outside of, but adjacent to, the Green Belt may have more of an impact on it than an infill development such as that this representation advocates. This is clearly the case here in that the assessment of the proposed development on the purposes of the Green Belt results in the conclusion that there is little impact on the openness of the Green Belt due to the surrounding existing and consented development. However, as an example, the proposed allocation at Burntcommon (sites A43 and A43A) are located next to the A3 within the Green Belt and have a much greater impact that would be appreciated by far greater people than the site north of Tannery Land.

5.4 A further example is presented by the limited agricultural value of the site as a result of it being formed from extracted material from the adjacent former landfill to the South of Tannery Lane. This is in stark contrast to the high agricultural value of other allocated sites.

5.5 It is this level of assessment that the blanket methodology has restricted and, in doing so, the soundness of the emerging Local Plan must be called into question.

6.0 Should the site be allocated for residential development in the local plan?

6.1 It has been demonstrated that the site is deliverable, located sustainably, has good potential for vehicular and pedestrian connectivity and is enclosed by defensible boundaries ensuring the purpose of the Green Belt is not affected.

6.2 It has been further demonstrated that the previous designation of the land as within the Green Belt should be reconsidered in light of existing and consented development that encompasses the site and reduces its openness.

6.3 However, the rationale set out within the 2016 Housing Delivery Topic Paper applies a blanket approach which results in the site not being allocated in the draft Local Plan 2016. Such an approach denies the opportunity to consider the comparative value of this deliverable site and calls the soundness of the Local Plan into question.

6.4 Based on a comparative assessment of the site, its sustainability and deliverability it should be included in the Local Plan as a residential allocation contributing to meeting the housing need of the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<full document attached>

1.1 Executive Summary

The site is deliverable, located sustainably, has good potential for vehicular and pedestrian connectivity and is enclosed by defensible boundaries formed from existing and consented development ensuring the openness of the Green Belt is not affected.
Based on a comparative assessment of the site, its sustainability and deliverability it should be included in the Local Plan as a residential allocation contributing to meeting the housing need of the borough.

1.2 Purpose of this document

This document provides a site appraisal and indicative layout to illustrate the development potential of land adjacent to the village of Send, to support a representation to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites consultation June 2016. This appraisal should be read in conjunction with the Policy Appraisal and covering letter which, along with two indicative plans, form the representation to the Regulation 19 Local Plan consultation.

1.3 Site Location

The site currently consists of approximately 4.6 hectares of low value agricultural land. Planning permission has been secured for a Marina to enhance the facilities of the River Wey Navigation to the north of the site. The River Wey Navigation defines the northern boundary of the site, whilst the rear of houses along Wharf Lane and Send Road abut the site’s western boundary. Tannery Lane runs along much of the site’s eastern boundary, providing access into the site (potentially from the existing marina access).

The former Clockbarn Nurseries lies along the southern side of the site, and has been allocated for development in the draft Local Plan 2016 (Policy A42). The development of the adjoining site (subject to this representation) will deliver housing in this sustainable location, while integrating with the development of the Nurseries land to form a natural extension of the village, with the River Wey Navigation marina and Send Business Centre naturally defining the limits of the development.

2.1 Site Context

The Send Parish Plan 2007 provides a useful overview of the village. Send is described as a thriving Surrey village of 1600 households. The village has a long history, and is mentioned in the Domesday Book. It has grown from a small settlement around the New Inn and the adjacent river crossing, with pre-war housing built along Send Road. Further areas of linear housing along Potters Lane and Send Road and housing areas around Send Marsh and Burnt Common were built in the post-war period.

Send benefits from a range of local facilities including:

- Shops, local services, pub and cafés/ restaurants, mostly concentrated in the local centre;
- Post office;
- Employment provision including at Send Business Centre and Vision Engineering;
- Recreational facilities including recently improved play and exercise facilities at the Recreation Ground, as well as the public rights of way network which gives access to the local countryside and Wey Navigation;
- Send Church of England First School and St Bede’s Church of England Junior School;
- The Villages’ Medical Centre and chemist; and
- Community facilities and places of worship including St Mary’s Church, Send Methodist Church, Send Village Club and Lancaster Hall.

The majority of these facilities are located within easy walking distance of the site.

2.2 Local Character

A study has been undertaken of the character of Send with the aim of identifying the key features of the settlement. This analysis has been used to guide the design of the proposed development.

The density of residential development within the village varies, with densities often being below 25 dwellings to the hectare. However, a recent development at Sandfields was developed at a density of 31 dwellings per hectare, and the Walnut Tree Place development is slightly higher at 36 dph. Building heights are predominantly two-storey, with some buildings providing further accommodation within roof...
spaces.
There are also a number of single storey bungalows. Various layouts are evident in the village, with linear traditional development lining the key routes. More recent infill and extensions include cul-de-sac developments and development around small open spaces. Dwellings are detached, semidetached or arranged in short terraces, fronting onto roads. There is also a range of parking provision with many plots providing parking in front of dwellings, although parking is also provided to the side of plots, within garages and on street.

Send has a range of architectural styles, reflecting the different ages of its buildings. Key features include:
• Hanging tiles;
• Brick and render external walls;
• Plain brown or red clay tiles, interlocking tiles and grey slate;
• Hipped, half hipped or gabled ended pitched roofs;
• White sash and casement windows;
• Dormer windows; and
• Brick porches and chimneys.

2.3 Landscape Features
The site benefits from the current key green and blue infrastructure:
• The River Wey Navigation – the Navigation runs along the site’s northern boundary facilitating the approved marina; and
• Trees and hedgerows – the site’s field margins are lined by trees and hedgerows. The development of the site would retain the vast majority of these green assets, using retained and enhanced field boundaries to provide the basis of the landscape framework for the development.

The largely agricultural nature of site means that development is not expected to have significant adverse ecological effects. Indeed, a the introduction of residential development has the potential to deliver ecological enhancements through the provision of new aquatic and terrestrial wildlife habitats.

A scheme can be developed for the site which ensures that there are no unacceptable impacts on the ecology of the wider area, including designated sites such as the Papercourt Marches SSSI to the east.

2.4 Connectivity and Access
As set out above, the site benefits from being in close proximity to a range of local facilities, and thus provides opportunities for journeys to be made on foot or by bicycle. Pedestrian and cycle facilities around the site are currently poor with a lack of footway on most of Tannery Lane and no cycle lanes or off street routes in the close vicinity of the site. The development of the site provides the opportunity to contribute to the improvement of facilities for these transport modes for the benefit of the local community.

A number of public rights of way run close to site boundaries, providing an existing network into which the development can connect. There is the opportunity to enhance the network with additional links.

Vehicular access to the site is provided by Tannery Lane, and the development of the site can contribute to any necessary works to improve the junction of Tannery Lane, Send Road and Sandy Lane. Tannery Lane is currently used by HGVs accessing the Send Business Centre, and the development could contribute to measures to improve the road alignment to enable vehicles to pass more easily.

The nearest bus stops are located on Send Road within 150 metres of the site. Arriva 462 and 463 bus routes serve these stops, combining to provide an hourly service between Guildford and Woking through Send.

2.5 Flood Risk
Although the low lying surrounding context of the site is dominated by water, the site itself lies within Flood Zone 1, the least vulnerable designation that is therefore the most suitable for residential development. The residential development of the site would include proposals to sustainably address surface water issues, ensuring that the development at least maintains current volumes and quality of surface water run off.

2.6 Landscape Character and Views

The key landscape features of the site consist of the blue and green infrastructure set out above. The residential development of the site would retain and enhance these features as far as possible. The visual effects of the scheme on the Wey and Godalming Navigations Conservation Area would be a key consideration, with appropriate setting back of buildings and landscaping to minimise visual effects and ensure that the development preserves and enhances the Conversation Area.

The relatively flat nature of the site and its context, and the existing trees and hedgerows result in a site that is visually self contained. Careful consideration would need to given to immediate views into the site, particularly from adjacent residential development. The treatment of boundaries and inclusion of landscape buffers would be important in providing visual screening.

2.7 Site Opportunities and Constraints

The above analysis has highlighted a number of key opportunities and constraints which provide the framework for the residential development of the site. These are:

• The site provides the opportunity to deliver a mix of new homes, including affordable homes for local people, in a sustainable location close to local facilities;
• The River Wey Navigation is a key site feature and provides the opportunity to create a high quality waterside environment. The need to protect or improve the special character of the Navigation is also a constraint;
• Tannery Lane can provide accesses to the site at a range of locations, and the scheme provides the opportunity to improve the alignment of the lane;
• The development of the site can contribute to improvements to the junction of Tannery Lane, Sandy Lane and Send Road to ensure that additional vehicular traffic can be suitably accommodated within the road network;
• The scheme will need to carefully consider the relationship with adjacent existing development;
• The existing pedestrian network (including public rights of way) must be retained, and forms the basis for the creation of new linkages. There is an opportunity to improve the currently poor cycle and pedestrian provision in the vicinity of the site, including improved footway provision on Tannery Lane. Send Road currently acts as a barrier to pedestrian movement, and there is the opportunity to provide crossings at the junction with Tannery Lane;
• Development of the site must ensure that there is no adverse impact on nearby designated sites, including the Site of Nature Conservation Importance and Sites of Special Scientific Interest. There is the opportunity to enhance the site’s ecological value; and
• Existing trees and hedgerows that contribute to the character of the site should be retained and guide the layout of the scheme. These provide the starting point for the development of a high quality landscape framework for the site.

3.1 Residential Site Allocation

Indicative plans setting out how residential development could be accommodated on the site have been developed to illustrate how it could deliver an attractive extension to the village. The scheme has the potential to deliver up to 140 units (development option 1) and can be developed in phases, or in part.

The Concept Plan opposite (page 17) shows indicatively how the units could be laid out on the site.

Development option 2 (shown overleaf (page 18)) shows an approach that could accommodate 90 dwellings but retains a large area of open space adjacent to the Wey Navigation for the purposes of further respecting the setting of the River
Wey Navigation, providing valuable amenity space for the local community and enabling additional ecological enhancement.

3.2 Delivering New Homes

The extension to the village can be well-integrated with the existing and proposed adjacent built form. The figures provided indicate a density of approximately 30 dwellings per hectare, reflecting a balance between the objectives of making the best use of the land while at the same time respecting the local character of Send.

Building heights would be predominantly two storey, with some dwellings having accommodation in the roof. The scheme could accommodate a mixture of unit types, sizes, styles and tenures, and will include affordable housing for local people. The marina and Wey River Navigation provide the opportunity to develop waterside units, the design of which can draw on marine themes. Architectural detailing and materials can make reference to the local vernacular as evident in the character of the local area (see Section 2). Thus elements such as brick and render external walls, plain clay tiles and slate for roofs, hanging tiles, decorative brickwork, brick porches and chimneys, and white sash and casement windows would be likely to feature within the scheme.

3.3 Access and Movement

Vehicular access could be provided from Tannery Lane to serve the development both from a new access point to the south of the approved marina access (or in combination with the marina access), and through the adjacent Clockbarn Nurseries development.

As set out in Section 2, the scheme can contribute to improvements to the alignment and width of Tannery Lane, as well as to the junction of Tannery Lane, Sandy Lane and Send Road. These improvements would address any issues created by additional traffic created by the development, and would also improve local pedestrian infrastructure by providing safe crossing facilities for Send Road. New pedestrian links can be provided to connect with the existing pedestrian network, and there may be potential for the scheme to contribute to the delivery of a new footway along Tannery Lane close to the village centre.

3.4 Landscape Strategy and Open Space

The proposed residential development would be delivered with a high quality landscape strategy including the following key elements:

- Existing trees and hedgerows of value to be retained and enhanced, and forming an important input into the layout of the scheme;
- A significant landscape buffer zone to be provided along the Wey Navigation;
- Further landscape buffer zones and planting to be provided between the proposed development and neighbouring residential areas;
- Linear open spaces and gardens to provide visual and green links through the development;
- The adjacent marina and associated landscaping would form a key landscape feature to which the residential development can respect; and
- A series of open spaces would be incorporated into the scheme, connected by green links through the development. Providing green links to the waterside would be a key feature of the strategy.

3.5 Local Facilities

In addition to bringing forward new homes including affordable housing, the site’s developers would enter into a legal agreement (or make payments under the emerging Community Infrastructure Levy) to provide significant financial contributions towards local infrastructure and services. A site specific legal agreement may also be required to contribute to the upgrading of the access to the site. The exact nature and amount of these contributions will be defined as the proposals progress, but it is envisaged they will relate to issues such as healthcare, children’s services, education, sports and leisure provision.
3.6 Sustainability

The proposals have the potential to deliver a sustainable development in its broadest sense. Key aspects of the sustainability of the scheme could include:

• Scheme layout to maximise solar gain and natural lighting through the orientation of the majority of the dwellings to the south, east and west;
• Sustainable energy including energy efficiency measures and possible generation of power from decentralised, renewable or low carbon energy sources;
• Amenity space and access to the waterside;
• A safe and secure design underpinned by Secured by Design principles;
• Transport design to encourage walking and cycling for local trips;
• Protection and enhancement of the site’s ecological value;
• Use of sustainable and locally sourced materials wherever possible;
• An integrated approach to water demand and rainwater disposal using sustainable urban drainage systems as far as possible; and
• A waste management strategy to promote resource efficiency in construction and encourage recycling in operation.

3.7 Place-Making

Character
• Traditional Surrey vernacular integrated into the village.
• Brickwork and render, hanging tiles, plain tile and slate roofs.
• Gabled, half hipped and hipped roofs.
• Decorative brickwork and traditional chimneys and porches.
• White framed windows and doors, bay windows.
• Contemporary waterside development.
• Waterside housing drawing on marine theme with potential for timber boarding and balconies. Street Scene
• Homes to provide frontages to activate streets.
• Hedges, timber fences, open meadow areas, gravel paths.
• Detached, semi-detached and short runs of terraced housing.
• Shared surfaces on lanes.

Landscaping and Open Space
• Retain the existing trees as far as possible.
• A landscape buffer zone along the Wey Navigation.
• Open spaces and gardens providing green links through the development.
• Play space for children.

Working with the Village
• Easy walking and cycling to the village centre and facilities.
• Pedestrian crossing facilities on Send Road.
• Financial contributions to local facilities.

<td>I object to the lack of proper infrastructure planning for sites A43 and A42. The lack of any plan for either the physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlick's Arch and the A42 Clockbarn Nursery in Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan and should not go ahead.</td>

<td>We object to the changed policy A42 Clockbarn Nursery to 60 homes. It ignores all the hundreds of previous objections made by local people. The increase to 60 homes in place of 45 homes is 33% more and too much. It will worsen access and traffic problems in Tannery Lane and at the A247 junction. It will make erosion of Green Belt worse. It will make surface water flooding, which is already bad, even worse. It will impact open countryside views from the River Wey Navigation. The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area. The site has very restricted access along Tannery Lane which is narrow and for most of its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical. Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic. Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable. The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.</td>

Comment ID: pslp172/80  Respondent: 17133121 / Catherine Rose  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- I object to the increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane, Send which will have a significant impact on the already highly congested local rural road network around and within Ripley. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

- I object to the fact that this is even a consideration. Has anybody from the Council driven through these areas, specifically in rush hour time?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/242  Respondent: 17148161 / Sally Hall  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish object to the Policy A42 change at Clockbarn in Tannery Lane because:

- There is an increase from 45 homes to 60 homes which is more than a 33% increase in plan
- There are currently access and traffic problems in Tannery Lane and at the A247 junction and this plan will only exacerbate all the issues
- River Wey Navigation open countryside views will be impacted
- Obviously there will be further erosion of the Green Belt, and that will make it worse for the village
- Current water surface flooding is already bad and this plan will make it worse
- You have blatantly ignored the previous objections made by local peoples which run into hundreds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/283  Respondent: 17158657 / Sylvia Allison  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My husband and I strongly object to Policy A42 as it now stands because we look out of our window on weekday mornings now and see the queues of traffic in Send Marsh Road trying to get out onto the Portsmouth Road. To build more houses which would add to it is absolutely crazy. In the 14 years we have lived here the traffic has increased enormously- it has to stop somewhere and we consider it cannot handle such proposed development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the Policy A42 change at Clockbarn in Tannery Lane because:

33% increase 45 homes to 60 is too much.

It creates traffic problems in Tannery Lane and at the A247 junction.

Loss of Green Belt to our village.

Creates more surface water flooding.

Loss of countryside views from the River Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the Policy A42 change at Clockbarn in Tannery Lane Send because :-

• The 33% INCREASE from 45 to 60 homes is not acceptable because there is insufficient space in the site unless the Council is happy to build slums of the future!
• All previous objections regaring this development have been ignored
• The infrastructure, particularly the width of Tannery Lane, cannot accommodate the increased traffic generated by this scheme and Send Business Park. Hence there is a risk of traffic accidents within Tannary Lane and it junction with the A247 which has poor sight lines.
• The increase in effluent requiring treatment at Ripley Sewerage works, together with other proposed schemes could result in difficulties in confirming with the Water Framework Directive in relation to the discharge of treated effluent into the river Wey/Wey Navigation canal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy A42 change at Clockbarn in Tannery Lane because the increase by 33% of homes to be developed, from 45 to 60, is too many for such a small area. It ignores all my previous objections to this proposal and, in fact, has made it worse than before even though I, and many others, objected strongly to this proposal. It worsens traffic issues in Tannery Lane, which is already a small single lane in places, and erodes the green belt. There is increased risk of flooding due to surface run off and it will affect the natural topology and countryside around the area which has already been designated as Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A42 – I object to Policy A42 as the infrastructure of Send cannot manage such an increase in housing. Traffic is already unmanageable in the village and at peak times can take between 15-20 minutes to get out of Send; significantly impacting journey times to schools and work. This is also against previous objections made by local residents and will impact the surrounding countryside / greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Clockbarn Nursery, Tannery Lane, Policy A42
I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- It ignores all the hundred of previous objections made by local people
- The plans have increased from 45 homes to 60 homes which is 33% and this is too much
- It will increase problems with the traffic in Tannery Lane and at the A247 junction
- It will cause erosion of the Green Belt in our village
- It will increase surface water flooding, which is already a problem and is increasing with further development
- It will impact on the open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to raise further objections to plans for the Send area. Please find a summary of my objections as follows:

Clockbarn Nursery, Tannery Lane, Policy A42
I object to the Policy A42 change at Clockbarn in Tannery Lane because:
• The increase to 60 homes in place of 45 homes is 33% more and is already too much
• It ignores all the thousands of previous objections made by local people that live in Send
• It will worsen access and traffic problems in Tannery Lane and at the A247 junction
• It will make erosion of the Green Belt in our village worse
• It will make surface water flooding, which is already bad, even worse
• It will impact open countryside views from the River Wey Navigation
• The local school and doctor’s surgery are already at capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Clockbam Nursery, Tannery Lane, Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

• The large number of previous objections made by the local people has been ignored.
• The increase from 45 homes to 60 homes is too high.
• It will make worse the traffic problems in Tannery Lane and at the A247 junction.
• There is already surface water flooding and this will make it worse.
• The open countryside views from the River Way will be ruined.
• The Green Belt in our area has already been eroded and this will worsen the situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

the increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane will have a significant impact on the already highly congested local rural road network around and within Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/941  Respondent: 17221377 / Mr s Sinai  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

As residents of Burnt Common our area has been threatened with irreversible and excessive development on all sides completely destroying what is left of our rural landscape.

I object to policy a42 change at clock barn in Tannery Lane because;

there has been a 33% increase in planned new homes from 45 to 60 ignoring hundreds of previous objections and adding to traffic congestion at the a247 junction. Contributing to increased surfaced water flooding which already exists. It will impact on the countryside surrounding the river wey navigation and it is greenbelt land which should not be built on.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1100  Respondent: 17241889 / John Hackney  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A42 change as the increased number of homes proposed for the Clockbarn nursery site fails to account for the previous objections to the original 45 houses proposed for this site. I am concerned that it will have a significant negative impact upon traffic along tannery lane and, in particular, the junction between tannery lane and the A247. I am also concerned that this development is will negatively impact upon the Wey Navigation, as it will impede what are currently open countryside views protected by the Greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A42 change at Cockbarn in tannery lane because:

- I believe it should not take place in the first place, however a further increase in the number of homes is proposed which make the situation even worse
- The traffic in this area is getting worse and especially at the A247 junction
- Green belt land is protected in law and I see no reason that it should be built on.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1710  Respondent: 17285249 / Stephen Green  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Specifically, I object to Policy A42 change at Clockbarn in Tannery Lane because:

- It will cause extreme congestion at the junction with the A247. Already, at certain times of the day during the working week the whole village is gridlocked. This proposal will only serve to exacerbate the problem
- It will remove greenbelt land which gives the village its ‘village feel’
- It will damage open countryside views from the River Wey Navigation and create an eye sore
- It will risk increasing the likelihood of surface water flooding

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to Policy A42 change at Clockbarn in Tannery Lane for the following reasons:

The increase to 60 homes is excessive especially as I consider 45 is too many!!

It ignores all the many previous objections raised by the local people

It will serious worsen access and already unacceptable traffic problems in Tannery Lane and at the A247 junction

It will make erosion of the Green Belt in Send village worse

It will make surface water flooding a more serious threat than it is at present

It will impact countryside views from the River Way Navigation and will greatly affect the treasured wildlife

Clockbarn Nursery, Tannery Lane, Policy A42

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

• The plans have increased from 45 homes to 60 homes which is 33% and this is too much
• It ignores all the thousands of previous objections made by local people
• It will increase problems with the traffic in Tannery Lane and at the A247 junction
• It will increase surface water flooding, which is already a problem and is increasing with further development
• It will impact on the open countryside views from the River Wey Navigation
• It will cause erosion of the Green Belt in our village

SITE A42, TANNERY LANE

An increase in size from 45 to 60 homes is proposed. Again, the traffic impact is significant on an already busy road in peak times and the knock on effect on Ripley

I have lived on Send Road for the last 20 years and I have very serious concerns about the changes to the local plan that will significantly impact Send and the surrounding villages.

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

• The increase to 60 homes in place of 45 homes is 33% more and too much
• It ignores all the hundreds of previous objections made by local people including myself.
• It will worsen access and traffic problems in Tannery Lane and at the A247 junction - there is simply no way this junction can take additional traffic.
• It will make erosion of the Green Belt in our village worse
• It will make surface water flooding, which is already bad, even worse
• It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

This area of Send is totally unsuitable for building 60 new homes as access via Tannery Lane from Send Road is very dangerous and the lane itself is narrow. It is also part of the Greenbelt and an attractive area of the village to walk.

Further to the above I wish to object to Clockbarn Nursery, Tannery Lane, policy A42 because:

- a 33% increase in homes from 45 to 60 is simply too much as the local infrastructure cannot cope e.g. access and traffic issues at A247 junction

- surface water flooding, already an issue, will worsen

- continual erosion of the greenbelt.

- it ignores the hundreds of previous objections.

I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A42 (Tannery Lane, Send) because

Subsequent to the previous plan, you have further increased the amount of planned homes from 45 to 60 which is at odds with hundreds of previous objections to this development;

It will place the local roads under further significant strain. This road connects to Send Road (A247) which is a traffic hotspot during peak times with significant load heading into Woking or heading to the A3. Traffic turning into and leaving Tannery Lane causes severe delays and this situation could only worsen with this proposed development;

It erodes the Green Belt in our village and puts pressure on local house values.

In addition, I object to the proposed development on site A42. On the other side of me, I have Tannery Lane, site A42, with the increase from 46 to 60 homes.

What about the affordable housing which is not clearly stated?!

Already at the traffic lights in Send, traffic is held up for several changes of lights. The area cannot take more traffic on the roads.

Already we are blocked in when the newly extended primary school parents block our access. If there was to be a fire or ambulance needed, our homes cannot be accessed as it is. The school can't take any more families. The Doctor's surgery cannot take any more load.

It is not right that 40% of development is in this area, so near to Send Marsh and Wisley Airfield.

Policy A42 - Clockbarn Nursery, Tannery Lane
1. I object to your proposal to increase the 60 homes in place of the 45 homes, Which amounts to an increase of 33%. How can you justify this increase?

2. It ignores the hundreds of objections raised by local people already.

3. It will without doubt have a serious impact on traffic levels and traffic problems in Tannery Lane and at the A247 junction

4. It will also make the erosion of the green belt in Send Village much worse.

5. It will also make surface water flooding, which is already a problem far worse.

6. It will have an effect on the open countryside views from the River Wey Navigation

I object because the previous plan to build 45 houses on the site was bad enough. The extra 15 houses now proposed will exacerbate the problems and shows contempt to the hundreds of Council taxpayers who previously objected to the 45 houses then proposed. No evidence has been produced to show that any houses are required here, especially for the extra number now proposed.

I object because access and traffic problems will be very much worse in Tannery Lane at the junction with the A247 in Send Road and totally disastrous at the Newark Lane junction. Tannery Lane for most of its length is winding and barely wide enough for one vehicle. There is no footpath and houses abut directly onto the road.

I object because the proposal will worsen erosion of the Green Belt in Send.

I object because surface water is already a serious problem and this proposal will make it very much worse.

I object because the proposal will detract from countryside views from the River Wey Navigation.
Site A42 Tannery Lane, Send

The increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane will have a significant impact on the already highly congested local rural road network around and within Ripley. The access from Tannery Lane onto Newark Lane is a single track road, with passing spaces, extra traffic on this road will invariably lead to additional congestion and high possibility of accidents.

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much
- It ignores all the hundreds of previous objections made by local people
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation
- It will worsen traffic congestion in the local area which is already busy and often sees heavy traffic during and after peak hours, even when the major roads have cleared.

There is no infrastructure, (schools, roads, shops, etc.), in place or proposed, to support the increased demand that will result from this development. It will increase the risk posed to cyclist using Tannery Lane and the surrounding roads. There is no proposal to improve cyclist's safety on these narrow country roads that will see an increase in motor vehicle traffic. This is of particular concern to me as I transport my children to and from nursery, by bicycle, along these roads.

I suggest that the number of housing be reduced from 60 to 45 at Site A42 in Tannery Lane.
I object to the increase in housing proposed in Tannery Lane (site A42)

Policy A42 Clockbarn Nursery, Tannery Lane

The proposed allocation for 45 homes in the previous draft plan on green belt land was objected to & I object to this revision which now proposes a 33% increase to 60 homes. Tannery Lane is unsuitable for the quantity of traffic which would be generated, as is the junction with the A247, and there are no exceptional circumstances to warrant development on the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A42 change at Clockbarn Nursery Tannery Lane, Send, because:

1. a) There is an increase of 33% in the number of homes from 45 to 60. This is far too many for this rural area.

1. b) The traffic along Tannery Lane and at the junction to the A247 (Send Road) is already very busy during rush hour. The increase in houses and therefore traffic will make it intolerable

1. c) Severe water surface flooding will be made even worse.

1. d) It will have a greater impact on the countryside views from the River Wey.

1. e) Hundreds of previous objections from local people seem to have been ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the Policy A42 change at Clockbarn in Tannery Lane because again this could also radically change the drainage in the area.

Many of my previous points also are reliant on this plan including the increase in traffic and more erosion of the greenbelt.

Given that so many objections were made to the previous plan it seems that by increasing the size of the development with this plan you are totally ignoring the wishes of the local community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the Policy A42 change at Clockbarn in Tannery Lane. The sixty homes you are planning to build on that site are far too many. Sixty houses built there which will home sixty families will hugely exacerbate the problems that already exist in Tannery Lane and at the A247 junction. In addition to increased traffic problems, sixty homes built there will mean extra surface water which will lead to increased flooding in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: pslp172/2855  Respondent: 17368705 / Reginald and Mavis Perryman  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We object to policy A42 - to the original 45 homes and the increase to 60 homes, on the basis that it is in the Green-belt and is flood-plain: and that local roads including Tannery Lane and the A247 are too narrow and the latter already severely congested. As residents of over 50 years, we know this area is prone to flooding, but also that is an area of open space close to the Wey Navigation much used by walkers both local and those visiting the area.
I object to the Policy A42 change at Clockbarn Nursery in Tannery Lane for the following reasons:

1. There has been an increase in proposed building of houses from 45 to 60 – this is ridiculously too many for our area.
2. This totally ignores hundreds of previous objections by local residents.
3. Access to Tannery Lane at the A247 junction is not viable for the amount of traffic that will be incurred.
4. Tannery Lane itself if not capable of being used by large or numerous vehicles – it is a Lane.
5. This will be eroding even more of the Green Belt.
6. There is already bad surface water flooding in this area. This can only increase the problem.
7. This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

I object to the lack of proper infrastructure planning for sites (A43 and A42) The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlick’s Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

It will make erosion of the Green Belt in our village worse
It will make surface water flooding, which is already bad, even worse
It will impact open countryside views from the River Wey Navigation
It will worsen traffic congestion in the local area which is already busy and often sees heavy traffic during and after peak hours, even when the major roads have cleared.
There is no infrastructure, (schools, roads, shops, etc.), in place or proposed, to support the increased demand that will result from this development.
It will increase the risk posed to cyclist using Tannery Lane and the surrounding roads. There is no proposal to improve cyclist’s safety on these narrow country roads that will see an increase in motor vehicle traffic. This is of particular concern to me as I transport my children to and from nursery, by bicycle, along these roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3039  Respondent: 17381601 / Madeleine Stevens  Agent: 

I object to the Policy A42 change at Clockbarn in Tannery Lane because:
The plan to build sixty homes is unacceptable. This is a 33% increase of the original amount of building on that site instead of a reduction of 33% which would at least be more realistic. Sixty houses would be far too many. Traffic problems in Tannery Lane would naturally increase and the risk of flooding would increase further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: pslp172/3082  Respondent: 17383969 / Maureen Mitchell  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the increase in housing proposed in Tannery Lane (site A42):

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3181  Respondent: 17399681 / Anthony Smith  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

There is virtually no infrastructure planning for sites A42, A43 and A44, which between them will have a serious impact on all local infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3184  Respondent: 17399873 / Christine Costa  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A42: Clockbarn Nursery, Tannery Lane.

I object to Policy 42. Tannery Lane is a Lane in the heart of Send which is a village. Building 60 homes in place of 45 is an increase of 33% which the lanes cannot support. Send has already seen the closure of its post office and there is only one local shop that can provide grocery essentials. Not everyone has a car and the local bus service is abysmal; where will residents shop?

Tannery lane is a narrow lane and meets Send Road (A247). It is already a difficult access and further housing and an increase in traffic will only make this junction more difficult to navigate and cause increased noise for residents.
Surface water flooding is an existing issue in this area and this will worsen.

Finances should be committed to improving the problems in the village, not making them worse.

Hundreds of objections have been made to this proposal and the Council should not be ignoring its residents and voters.

Policy A42 Clockbarn Nursery, Tannery Lane. I object because: this is further increase 15 homes on 45 the was previously objected to; It degrade access and increase traffic notably in Tannery Lane and at the junction to A247; This is already a busy road in the mornings and evenings and it's is a bottleneck when A3 has traffic issues, which is frequent; It eroding the Green Belt of village well beyond that which is acceptable; There is inadequate allowance for surface water flooding prevention and river flash floods; It degrades the aesthetics of yhe area which is major reason for choosing to live here.

I object to policy A42 change at Clockbarn in Tannery Lane where there has been an increase from 45 homes to 60. This change takes no account of hundreds of previous objections made by local residents. The increase in numbers of homes will have a seriously detrimental effect on the traffic in the area, particularly as Tannery Lane is a small country road and should remain as such. This development is a significant erosion of the Green Belt in our area and is totally out of keeping with the rural nature and views across the River Wey Navigation.

This development is a significant erosion of the Green Belt in our area and is totally out of keeping with the rural nature and views across the River Wey Navigation.
I object to the increase in homes, the surrounding infrastructure and amenities available to existing residents of Send and Ripley is inadequate already, not to mention the current traffic congestion and condition of roads - the lack of council support for the conditions of these to be renewed, of which increase resulting traffic and car numbers from this increase in dwellings, will exacerbate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to this proposal as anyone who lives in send who uses Tannery Lane knows the small rural lane is utterly unsuitable for further developments to take place, turning into Send Road from Tannery takes an age and is difficult to exit to send Road. You have already allowed, despite objections which I assume were again just ignored, a marina no one wanted and which we all knew was a precursor to further development requests. Not only have we been ignored but you have this time decided to INCREASE the number of houses for the site by 30 odd%. The impact on traffic, the green belt, amenities and the area itself makes this a completely wrong.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3597  Respondent: 17418401 / Charles Penny  Agent:
I strongly object to the increase of houses at Clockbarn Nurseries (Site A42)

The areas around the site of A42 is not at all suitable for a further increase from 45 to 60 homes. Tannery Lane and Papercourt Lane are single track lanes for the large majority and not suitable for more cars and with the Marina the lanes will simply not be able to cope. This will push further traffic from the smaller lanes onto the A247 and Newark Lane which are already heavily under pressure especially in peak times.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical. Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic. Planning consent has already been granted, rather unwise, given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable.

The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

There is no need for housing on this site; the local plan housing target is incorrect. The figures quoted way exceed the local need; the local requirements are for social housing and not large executive boxes as favoured by developers to maximize profits.

I object to building 45 houses at Clockbarn Nurseries because of inadequate access and traffic volumes ( please see below).
I object to the policy A42 because I wish our village to remain in the Green belt and this plan alters that situation.

The increase in homes from 45 to 60 seems like far too much for the area and it ignores all the previous objections which have been made by local people in the village.

The traffic at the Tannery Lane junction and the main road (A247) is already bad as this is a difficult junction to exit - the proposals can only make matters far worse.

This area is subject to flooding - there is a flood plain nearby. The proposal does not contain good plans for removal of surface water.

This village benefits from the Wey Navigation Canal and its open countryside is an asset. So many houses will mar the views which attract tourism on the canal to the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3712  Respondent: 17424897 / Peter Sanderson-Byrne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan".
The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3797  Respondent: 17427713 / The Aldertons Farm Residents Company Limited  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• The increase in the number of residential units from 45 to 60 (+15) is over a 30% uplift on a relatively small site and will lead to a cramped overdevelopment and an unacceptable increase in hardstanding to accommodate the increased parking and access roads resulting in further erosion of the Green Belt.
• Tannery Lane is a narrow secondary road that in parts is almost a single track width and therefore traffic problems will be more frequent commencing with the construction of the development requiring large vehicles and plant to manoeuvre into and out of Tannery Lane.
• The junction of Tannery Lane with Send Road is very restricted and requires substantial improvement to accommodate the increased use and to provide adequate safety for both pedestrians and vehicles.
• The proposal would severely impact on the open aspect of the surrounding Green Belt and in particular the views from the River Wey Navigation.
• The increase in units now proposed by the Council completely ignores the hundreds of previous objections made by local people.
• Recent flooding issues in and around the immediate area highlight the need for a conscience approach to development and by increasing the number of residential units on this site the incidence of flooding will be increased.
• The recent approval of the planning application (14/P/02289) for the Cartbridge Traditional Narrowboat Basin on the River Wey Navigation, (construction works are now underway) already puts pressure on the Tannery Lane junctions with Polseden Lane and Send Road. Therefore the cumulative effect of both developments will result in an increase in the potential for accidents at the road junctions unless substantial highway improvements are made. Also there are over 50 parking spaces within the Cartbridge Basin application site which, together with the associated hardstanding, severely impact on the rural nature of the surrounding Green Belt area.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I object to the increase in housing proposed in Tannery Lane (site A42)

This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the Policy A42 change for the following reasons:

- The 33% increase from 45 to 60 homes is excessive
- Please don’t ignore hundreds of objections already made by local residents
- It will worsen traffic congestion, air pollution and dangers to residents and their families in Send, Tannery Lane and at the A247 junction. The roads are too narrow.
- It will set a precedent for further erosion of Green Belt in the village and surrounding areas

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A42
Now 60 homes in place of 45 homes previously

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

- The increase to 60 homes in place of 45 homes is 33% more and too much
- It ignores all the hundreds of previous objections made by local people
- It will worsen access and traffic problems in Tannery Lane and at the A247 junction
- It will make erosion of the Green Belt in our village worse
- It will make surface water flooding, which is already bad, even worse
- It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Policy A42 Clockbarn Nursery, Tannery Lane

The proposed allocation for 45 homes in the previous draft plan on green belt land was objected to & I object to this revision which now proposes a 33% increase to 60 homes. Tannery Lane is unsuitable for the quantity of traffic which
would be generated, as is the junction with the A247, and there are no exceptional circumstances to warrant development on the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. **POLICY A42 Pages 241-2**

I object to the proposed increase of a further 16 houses on the Clockbarn Nursery site. This is a totally unsuitable site anyway for a high density development. Increasing the number of houses completely exacerbates the situation.

Traffic movements from the site coupled with traffic accessing the new Marina development and then trying to join Send Road would cause considerable problems for residents and through-traffic alike. Access from Tannery Lane to Send Road is very limited and trying to join it, particularly at peak times, would be extremely difficult.

Send Road is already used to capacity by traffic heading to and from Junction 10 on the M25 and is used as a rat run off these roads. Send Road was never intended to be used by today’s very large articulated trucks.

The essential traffic islands to enable pedestrians to cross represent an additional hazard plus the increasing number of cyclists exposed to rising levels of exhaust pollution.

Access from the opposite end of Tannery Lane is through very narrow roads with limited passing areas which will render this access effectively impossible. This means that traffic from the Marina and the Clockbarn Nursery site would be forced to come and go via the Send Road junction.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>I object to Policy A42 change at Clockbarn Nursery to increase the number of homes by 33% on this site from 45 to 60 and after hundreds of previous objections which were ignored is unacceptable. Tannery Lane is a narrow lane with blind bends and cars frequently have trouble passing each other. Turning into Tannery Lane from the A247 only 5 of the 10 dwellings have off street parking and parking by residents on the road causes passing problems and at times moving their vehicles to allow for lorries to get through, this will become worse with increasing numbers of vehicles. Vehicles turning in from or exiting onto the A247 have very poor sight lines at this junction due to parked cars. The pavement in Tannery Lane itself for pedestrians is outside these homes and is in a very bad state of repair there fore it is very dangerous to walk down Tannery Lane with vehicle movements. The recent planning application for the Marina development is already adding to vehicular problems. Surface water flowing in this area is a problem and will be made worse with development and needs to be addressed. Finally the countryside and wildlife of which can be seen regularly will be hugely affected.</td>

at Garlicks Arch. This was sprung on the village at the last moment, only 2 weeks notice and without any prior consultation.

The infrastructure requirements have not been properly considered and are inadequate to deal with the proposed housing levels. Our roads, doctors and schools will be unable to cope. Industrial space is not needed and if it was could be accommodated on the Slyfield industrial estate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy A43: Land at Garlick’s Arch (page 221)

I object to this proposal because the number of homes proposed would add to local traffic congestion which is already excessive at peak travel periods.

This was a sleight of hand by GBC in slipping this application into the Plan at such short notice. The site has never been proposed before and has not undergone a proper and full evaluation.

This site is also located underneath one or more pylons carrying power cables which constitute a health hazard for anyone and especially children living in such close proximity to them. There is evidence suggesting a link between cancer/Leukaemia and power lines and this has not been considered.

I also object to the location of any form of industrial activity which would increase traffic movements in that area leading to even greater traffic congestion. If additional industrial space is needed the ideal location is Slyfield which has the space to cater for it and there is a symbiotic relationship between the various activities on such a site. Slyfield has room to expand and accommodate extra capacity and is well located on the edge of the town.

If Garlick’s Arch proceeds it will create traffic chaos in all the approach roads through the villages of Send, Send Marsh and Ripley. There is simply no proven need to consider this site for industrial or housing, on any scale planned.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan.

If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

The proposal to build 400 houses and 7,000sq.m. employment space (light industrial/storage, warehousing) on virgin Green Belt land, lying outside the Send Marsh/Burnt Common village boundary, defies all logic. This area which includes ancient woodland is a refuge for deer and other wildlife. It was never considered as a Potential Development Area within the Council’s ‘Issues and Options report’ or identified for development in the 2014 consultation.

In 2014 the Council rejected a planning application from ‘Oldlands’ to build 25 houses in this location on sound planning grounds, so how is can now be considered apt to construct 400 houses and 7,000sq.metres of employment space there?
Apart from the fact that this is all Green Belt land, the infrastructure just cannot support such a development. Send Marsh/Burnt Common has one just shop (Waitrose), no doctors’ surgery, no schools and the local roads are already filled to capacity.

Any development at all in this area would be totally inappropriate and would be to the very substantial detriment of Send Marsh/Burnt Common as a village. The housing proposal alone would add 960 to the existing population of 2,341, an increase of 41%.

The proposed light industrial/storage facility would significantly detract from the open countryside aspect and add dramatically to the existing road use. It is totally inappropriate and would destroy the village’s demarcation from Ripley, creating urban sprawl.

This very late and very major change to the Local Plan proposals does appear to have not followed the correct due process and therefore shall, if approved by your Council, be subject to immediate legal challenge.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Fields around Danesfield, Send Marsh (GU23 6LS)

I refer to this area because it is not currently high profile but it is a significant site for other reasons.

I wish to object to this site although it is not specifically mentioned. However, I understand this site is regarded as 'safeguarded' and therefore could come into play should some of the sites drop out.

If you look at the maps then you will see that the far end and sides of Danesfield have had their boundaries inset and now the back gardens of these houses now are the proposed greenbelt boundary. As we are surrounded by open fields then this suggests that everything the other side, ie open fields, would be redesignated as non greenbelt and therefore will be developed.

My comments on this site are as follows:

1. This site is on a flood plain. Over 37% of the site is in flood zones 2 or 3, with over 25% in flood zone. Therefore, this land is clearly not suitable for development and this was borne out whenever there is heavy rain and the land floods. I am reliably informed that the area becomes almost a large lake when there is a heavy downpour and this can be seen from the road and footpaths.

2. GBC policy and the Environment Agency are against developing on flood zones and so for this reason the land should not be built on or developed. GBC could face legal action from the Environment Agency if they were to go against this and spend tax payer's funds to defend such a claim. This would be an irresponsible use of tax payer's money.

3. I know photographic evidence showing the effect of flooding on the site have been sent to GBC and they have accordingly downgraded the site from a Potential Development Area to a Safeguarded Area.
1. Any building or hard standing will reduce the land available to absorb the run off from heavy rain falls and this will exaggerate the flooding. This could cause flooding and damage to adjoining property in Danesfield which may lead to future insurance claims.

1. There are many bats on this site which are protected under The Conservation of Habits and Species Regulations.

1. The access into the site is limited to only two points of One entry is onto the busy Send Marsh Road which is narrow and unsuitable to carry more traffic. This entry point is near to a blind bend so there would be a safety concern and a potential accident black spot with approaching traffic from the direction of Send. The other entry point is into the side of Danesfield where the access is deliberately narrow as it is a residential road where many families live with young children. There is only just enough room to get two cars passing so a massive increase in traffic would be totally impractical as well as dangerous for all the small children who play in the road. Furthermore, there is an old established oak tree on the entry point which would have to be cut down and I believe this has a TPO on it.

1. As a resident of Send for 50 years, and with my family living here and our garden backing onto this site, I am very concerned about what is being discussed regarding potential building on the site. It would be an absolute travesty if this land were to be lost to building. This corner of Send Marsh is of an open rural nature and therefore totally unsuitable for setting from the green belt.

1. Our village is loved and cherished by all those of us who live Send Marsh has a long history of generations of families living here and we all love the open countryside, the lovely walks, the beautiful views and the village life atmosphere. To commence on such a thoughtless and aggressive building program would bring this to an end and would mean that we could never go back to what we once had.

1. The site should not be termed "safe guarded" as the meaning of "safe" does not seem to As I understand the term as used here, this site could be back on the table as a possible contender for consideration for planning permission if other sites do not get their planning granted. There would not be a democratic process for this site to then have a further round of public consultation as the date will have been passed. We would then be at the mercy of GBC and the planners.

1. Send Marsh has already seen a dramatic increase in the traffic flowing through it and into Send village at peak hours with long tailbacks from the traffic lights at Mays Send Marsh regularly sees delays getting onto the Portsmouth Road at Send Dip with long queues of traffic going towards Ripley and Burnt Common.

1. This site is at the back of Danesfield has limited access onto Send Marsh Road and if this was the only way out then this would put a lot of strain onto an already congested road. If the access was through Danesfield then this would seriously congest our road as it is very narrow and difficult to pass cars at various points.

1. This site should not be removed "inset" from the green belt as this would mean planning permission would surely be granted for the

1. The field behind Danesfield is a beautiful open space with much wildlife including deer and foxes as well as lots of The field is enjoyed by those in the village who walk and take their dogs by the adjoining footpaths.

1. Send Marsh Road has a very narrow and dangerous bridge which would need to be widened to make it safer and the whole of the Send Marsh Road would need to be There is no mention of this in the plan.

1. Send Marsh does not have any infrastructure. There are no local shops, no school, no doctor's surgery and no public park. It comprises of mainly all houses and so the addition of so many new houses will put huge pressure on the infrastructure on Send and Ripley, both of which can hardly cope with the current pressures. You would have to walk a considerable distance to access any of these services and so this would mean owners would have to use a car. This would seem contrary to the governments' policy for us all being green and reducing pollution.
1. The bus routes to and from both villages are very poor and infrequent, about one per hour. Again it is essential to have a The roads are too narrow and dangerous for cyclists so this is not really an option.

1. By proposing greenbelt sites in the area means this land will be gone It is essential we protect the greenbelt or we will simply be a concrete jungle joined to Guildford and Woking with no green space in between. These greenbelt areas are essential to everyday living to provide clean and open space for everyone to enjoy.

1. There are plenty of brownfield sites available which should also be considered. In addition, there are sites which have been given planning permission but builders are refusing to build on as presumably, they are waiting for house prices to increase so they can maximise their profits. I feel time limits should be placed on planning permissions granted to encourage building in any economic climate.

1. Send Marsh is poorly served by schools, particularly the secondary. It has become increasingly difficult to get children into George Abbot which is the closest school to the village. With the amount of houses to be built set to increase, where will the children go to school if we don’t have a plan to build schools?

I would like to place on record my objections which I would like to be seen by the Inspector.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO THE PLANS OUTLINED IN POLICY A43 on the grounds that this area is Green Belt and is therefore protected from development. It is a wildlife habitat. What does The Council propose to do about this? The brownfield industrial site at Burnt Common is large enough for the 7,000 sq. m. suggested for further development. If the Council builds on this area, the small, beautiful country villages of Ripley and Send will become suburbs of Guildford in no time at all and their uniqueness and beauty will be lost forever. Please don’t touch our Green Belt! This why we moved to this area, because it is unspoilt! I also object to the plan for 400 new homes, on the grounds that there is insufficient infrastructure to maintain this level of development, viz: health centres, schools etc. I also strongly object to the manner in which this plan was put forward at the last moment, without consultation.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

POLICY A43 AND A43a – Garlick’s Arch

We object to Policy A43 and A43a on Garlick’s Arch.
This site had been previously considered and rejected before the previous draft of the Plan. The site was then inserted in this draft only hours before its publication without any consultation. We have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

This is a cavalier approach to public engagement by the Council.

1. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

1. The site is susceptible to flooding and development will cause harm to the ancient woodland on and by the site.

1. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

1. The Council appears to view the development as an enabling site to obtain land and developer funding for slip roads on/off the A3. This is not an exceptional circumstance to justify taking Green Belt land. The slip road land if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham school was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

1. The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

1. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7291 Respondent: 8562561 / Mrs C Sheard Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I OBJECT to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.
I OBJECT to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

This would involve loss of one of the very few remaining areas of woodland in the vicinity. Ancient woodland is irreplaceable. Much of the woodland was planted hundreds of years ago, in fact many of the oaks show great age.

400 Houses is an outrageous number for any small village to accommodate. It would virtually raise the number of residences in the villages by 25%. The implications for traffic are dramatic. Every day Portsmouth Road is stacked back from the M25 to the Send Road traffic lights from 8.00am to about 9.15am and then the flow is reversed in the evening. There is serious concern about air pollution from the cars that sit in the roads with engines running. The access to the Portsmouth road is poor from the proposed development. It is very near to the Burnt Common Lane junction.

The addition of the industrial buildings so close to housing is undesirable and perfectly good sites are available at Slyfield Industrial area. There are also electric pylons on this land which must be addressed in the event of development.

This Garlick’s Arch site abuts the East Clandon Stream. The stream frequently floods onto the Portsmouth Road and the A3. Furthermore, with so many buildings being added the run off the land onto the stream will be aggravated. We understand that the site is built on London Clay. This means that every time there is the potential for the stream to rise, the land floods. (see attached photograph) In addition the trees that are being removed will also exacerbate the problem. The copse is home to and regular visiting place for deer, foxes, owls, bats, rabbits, hares not to mention having a carpet of bluebells in spring.

Much of the Garlick’s Arch area is used for country pursuits in varying ways. The large field abutting Burnt Common Lane is still farmed which is rare in the borough. Pheasants are raised in this and the adjoining wooded area. There is a Clay pigeon shooting syndicate which use the land to the end of Kiln Lane. Dog walkers are regular users of the lanes and surrounding fields.

We understand from the Guildford Lead Councillor for Infrastructure, Matt Furniss, that the 400 houses proposed is the pay back required by the landowner for the land gift being offered for the four way junction to the A3. We are of the opinion that the payment is disproportionate to the benefit for our Village.

The infrastructure needs to be in place before the site is considered for development because the pressure on the current roads is too great. Parking in the village is already stretched. There is no bus service at all to the Villages Medical Centre which is already oversubscribed.

The large field mentioned in this application was subject to a planning application for 25 houses on the Oatlands side site a couple of years ago but was turned down but yet here it is again with a suggestion of 400 houses this time.

In a more recent planning application for the land at Oldlands Field Yard which is adjacent to this current development, permission was refused by Guildford Borough Council and the following two extracts are from the letter of refusal. Surely the same reasons would apply to the land now proposed for 400 houses and an industrial development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The parish council made objections to the site at Garlick’s Arch in 2016, and the objection to the residential element is maintained.

The changes introduce a provision for travelling showpeople into this allocation. Policy H1 provides the strategic policy for the provision of plots for travelling showpeople and seeks to secure such plots where provision is being made for 500 homes or more. Garlick’s Arch is proposed for only 400 homes, and the parish council therefore question the suitability of the site to accommodate such plots. Whilst there is no detail of how these sites might be accessed, neither Burnt Common Lane nor Kiln Lane are suitable for the sort of vehicles that might be expected at such plots.

The changes to policy H1, sub-section (6), remove reference to the impact upon the visual amenity of such provisions. The parish council would wish this wording to remain. Whilst the site allocation text introduces reference to visual amenity in para (7) of policy A43, this is not felt to be equivalent to the wording lost from H1.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Vehicles in the area using the local roads. We hardly need industrial buildings, as past developments have stood empty for years.

I OBJECT TO site A43A the on and off ramp at Clandon/Burnt Common. This will cause complete chaos in the area, as all roads leading to the junction are country roads leading from Clandon, Ripley and Send. At present it only takes an incident at Wisley /Junction 10 of the M25 and our villages are swamped with traffic. This junction will make the whole situation worse as the local roads are so narrow and are unable to be widened to suit increased traffic flow. The Send Road only leads to similar narrow roads in Old Woking and Hoebridge areas, which are also unable to be widened.

This is a rural Green Belt site unrelated to any significant development and remote from shops and public transport. It is an unsustainable site on which unsustainable development is proposed contrary to government advice as set out in the National Planning Policy Framework. If such a scale of development is necessary, which is disputed, there are several much better sites in the area that should be considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1451  Respondent: 8568193 / Miss Edwina Attwood  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

15.1 OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site.

Why was a brownfield site removed and replaced with a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. Development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4528  Respondent: 8568193 / Miss Edwina Attwood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/ Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

**Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )**

This is green belt. It is not suitable for industrial development. The A247 cannot handle the present traffic load let alone an increase in the number of larger forms of transport. The local infrastructure and services cannot handle another 400 homes, the schools, doctors and all other services are already overloaded in this area. Please think again as this area is not suitable for this plan.

A43 Garlicks Arch

The stated, albeit unproven, need by GBC is 400 homes. Normal residential density is 30 homes per ha. Land required would therefore be 13 ha. Land actually proposed to be allocated is 28.9 ha. This is more than double land required in beautiful irreplaceable Green Belt.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

On reviewing the proposed local plan, I object to Policy 43 - land at Garlick's Arch.

The land suffers from being a Flood Zone, I understand it is Zone 3. Looking at recent flooding I consider this should be reviewed. There are electric pylons on the site which would put development into the second five year period. The site has Ancient Woodland dating back to the 16th Century!

The addition of 400 new home is a major increase in the local population is this wise?

The need for schools, Doctors surgeries, transportation and with only one shop in the locality.

At the last meeting the Garlick's Arch replaced the Burnt Common Nurseries site which had been in since the beginning had been thoroughly reviewed. The site already has three industrial units totalling 5000 square metres and is logical to extend. The proposal is for small industrial units to met the local requirements.

The site can also handle 100 new houses which would not put undue pressure on local facilities.

Policy A43a - Land for new north facing slip roads to/from A3 is dependent on the owners of Garlick's Arch gifting the land for the slip road on condition of receiving planning permission for housing. Use of slip roads will have a severe impact on the population of Wisley, Send, the Clandon's and other local populations.

The decision was made before they built the Wisley bypass not to have slip roads to/ from A3. With the increase in traffic why should this have changed?

Site A43 Land at Garlick's Arch

191. I object to this site being included. The inclusion of this site is a major change from the previous draft and has not been consulted on previously. It is a large development that was not included in the strategic highway assessment. There are no exceptional circumstances to justify the removal of the site from the Green Belt.

192. Ancient woodland will be put at risk and, strangely, the "opportunities" include "Green Corridors and linkages to habitats outside of the site" when the proposal represents a major reduction in these features.

193. The site is unsustainable as its location will generate a large volume of car journeys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3785  Respondent: 8574369 / Douglas French  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to 400 houses and 7000 sq metres of industrial space at Garlick's Arch being brought forward as a last minute proposal without any warning and without it having been mentioned at all in the earlier Draft Local. This attempt to push it through under Regulation 19 instead of Regulation 18 and thereby deny residents a proper process of consultation is a further manifestation of the contempt in which Guildford Councillors hold the electorate. This is a clear breach of administrative law.

2. I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick's Arch because the site includes ancient woodland, too valuable to The site floods as photographic evidence and local testimony can confirm as a result of the East Clandon stream overflowing and surface water being trapped.

3. I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick's Arch since this would increase the number of dwellings in Send (including Send Marsh and Burnt Common) by about 25% without a commensurate increase in services and infrastructure. There is already severe pressure on doctors surgeries, school places and other essential facilities which would seriously worsen. Infrastructure issues are substantially the responsibility of Surrey County Council but there is no evidence that SCC has formulated an infrastructure plan, or the means by which the infrastructure would be paid for, in respect of this site or any other site. What we were told at one public meeting, that the council thinks about infrastructure afterwards, is typical of a woefully inadequate approach to the whole Local Plan.

4. I OBJECT to 7000 sq metres of industrial space at Garlick's Arch because the space is not needed since there is inadequate take up of existing space in the area, but if it were needed it would make very much more sense to locate it at In any event Garlick's Arch is an unsuitable location for industrial space given the proximity of existing houses.

5. I OBJECT to a new interchange with the A3 at Burnt Common because Send would have to take traffic from the proposed 2000 houses at Wisley Airfield, 2000 at Gosden Hill and 1850 at Blackwell Farm as well as 485 from Send itself. This is in addition to what it takes at the moment. Much of this traffic to and fro the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded, would face gridlock. This would exacerbate noise and pollution levels which are already excessive and is wholly unacceptable.

6. I OBJECT to the new interchange with the A3 at Burnt Common because it is being presented as a way of facilitating the movement of a massive increase in vehicles whereas in reality it would cause havoc on the A247 and the many feeder roads in Ripley and Clandon in addition to Send.

7. I OBJECT to the fact that Guildford Councillors approved the Local Plan before the Transport Assessment had even been published which indicates what scant regard they had for the traffic implications which are at the forefront of residents’ They have to contend with the problem every day in terms of delays, pollution and noise which are already destroying our villages as decent places in which to live.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the Policy A43 change at Garlick’s Arch because it is beautiful permanent Green Belt land which will be spoilt by the building of 400 homes and 6 Travelling Showpeople plots. It will join up Ripley and Send and defeat the key purpose of Green Belt land. The area is subject to frequent flooding and is contaminated by lead shot accumulated over fifty years. The local roads around Send and Ripley will be overwhelmed by the traffic generated by this development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Land at Garlick’s Arch, Send Marsh Policy A43

Now 6 travelling show people plots in addition to 400 houses

5.1 I object because there is no proven demand for travelling show people plots in this location and GBC has produced no tangible evidence to support their claim that there is. Such a site needs to have parking and turning for lorries and trailers, a service and cleaning area, on site storage and accommodation for show people and their families. Access for this from Kiln Lane or Burnt Common Lane would be very difficult, if not impossible.

5.2 By objecting to this, which I am permitted to do under Regulation 19, I am not implying that I prefer what was proposed before. I do not favour any development at Garlick’s Arch for all the reasons given.

5.3 I object to the policy change at Garlicks’ Arch which now includes some custom and self-build accommodation because:

5.4 The site is contaminated by lead shot which cannot easily be cleaned up because it has accumulated over 50 years

5.5 It is subject to frequent flooding (for which photographic evidence can be provided) and is in flood zone 2 making it an unsafe and unsuitable site choice.

5.6 It ignores the thousands of objections made previously to the previous proposals.

5.7 It is permanent Green Belt Land and no exceptional circumstances have been demonstrated.

5.8 It would destroy ancient woodland dating back to the time of Elizabeth 1

5.9 The site is not near any public transport so residents would be obliged to rely on their cars.

5.10 There are six rural businesses currently on the site and I object to the destruction of rural employment which would result from GBC’s proposals.

5.11 It passes belief that in the whole of Guildford Borough this inaccessible, contaminated, ancient woodland site in the Green Belt, largely unserved by public transport, is the best location that can be found for houses and travelling show people plots.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object to the latest Guilford Local Plan which is not sustainable. In particular I object to:

The late inclusion of the site A43 Garlick's Arch opposite the Send Marsh Road. This is a Green Belt area covered by ancient woodland and prone to flooding. The industrial space planned of 7,000 sq. metres is not needed and mis-placed. If it were needed it should be at Slyfield. In addition the need to build 400 houses on this site is based on dubious calculations which the Council have refused to disclose. With proper use of Brownfield sites the building on this Green Belt site is not needed. There are no exceptional circumstances to build on this or any other Green Belt site in this area. Furthermore, these houses will generate more traffic for our already over busy roads and place even more pressure on local services such as Doctors and Schools especially with the other very large local developments included in the Local Plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlicks's because:- It ignores my and thousands of other previous objections made by the local population.

How can you justify the need for Travelling Showpeople plots here?

This is Green Belt and Ancient woodland and no 'Exceptional Circumstances' exist.

It is over development of our villages and number of homes is excessive.

This will exacerbate the already problem of flooding in this location.
It will severely add to the already congested roads of Send and Ripley.

Furthermore I understand that it is contaminated with lead shot.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the disproportionate amount of development in one area of the borough. Garlick's Arch site at Burnt Common for at least 400 homes and an industrial site. I understand that this land was turned down earlier for a site for 25 homes as unsuitable. How can it now sustain 400. This land is an area of great natural beauty and is home to deer, badgers, many variety of birds and rare flora and fauna.

3. POLICY A 43— Garlick's Arch.
This policy would increase the population of the Send Marsh/Burnt common vilage by 49% and completely destroy its rural character. The new policy adds 8 travelling/show people pitches to this development making it even more inappropriate for the area. How can the Council incorporate this Policy into the plan when less than 3 years ago it refused a planning application from "Oldlands" to build only 25 houses in the same location. How can it then insist it that it applies consistent and good practice.

I therefore object to the revised proposal as:
* the village has no shops or infrastructure to support this development.
* there would be considerable additional extra traffic onto roads already congested throughout the villages olof Send,
Send Marsh/Burnt Common and Ripley.
* no exceptional circumstances have been informed to us that would exist to destroy this Green Belt area or the area of ancient woodlands.
* No proven demand has been shown for travelling/show people pitches in this area
* it would completely destroy the rural character of the area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

A43 and 43A

I object to these policies

These sites are remote from transport links except the A3, so the business activity and the residential units will add to the traffic on this congested route. Traffic from Woking which currently finds a number of different ways to access the A3 and M25 will now all be channelled through the unsuitable narrow road through Send to Burnt Common which already has long queues in the rush hour, which will be exacerbated when the new primary school building, which has its entrance on this road, is completed soon. Similarly traffic from Albury, Shere and Gomshall, Chilworth and Shalford will now be channelled along the A247 through West Clandon to access the A3 at Burnt Common. The A247 is a most unsuitable narrow road for heavy traffic, too narrow in places for two wide vehicles like HGVs to pass each other without routinely mounting the narrow pavement which runs on one side of the road only. Pedestrians have to cross and re-cross the road as the footpath is not continuous on one side of the road.

These sites were introduced at a late stage (Regulation 19) as a very late addition to the draft plan. This does not accord with para 155 of the NPPF which requires ‘early and meaningful engagement and collaboration with neighbourhoods…………A wide section of the community should be proactively engaged’. This clearly did not happen in relation to these sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1236  Respondent: 8581345 / Gillian Leggatt  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My objection is to the density of housing and employment use planned for this site. The traffic generated by the proposed buildings will enormously increase the present congestion in this area and in the village of Ripley where parking space is at a premium. Traffic on narrow roads in the surrounding area, already used as 'rat runs' will increase, and there will be great pressure on the local schools and doctor's surgeries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
This site has appeared only at Reg. 19 stage. It was not been disclosed previously at Reg. 18. There has been little time to assess and comment on this proposal. In fact the Policy simply offers Green Belt land for ‘development’ which could mean, if accepted, anything from a sewage farm, refuse tip, office buildings, housing, warehousing with vast numbers of HGV’s onto a B road to even a scrap yard.

The policy is so ‘open’ and ‘vague’ it simply cannot be judged on its merits. It is currently open land which also happens to be Green Belt land. No mention of this is included in the Policy. It is of major concern that it is extremely close to the Policy A25 site (Gosden Hill), also Green Belt land. The removal of both sites from the Green Belt destroys the very basic principles of the Green Belt purpose by permitting ribbon development alongside the A3.

Thus the inclusion of this site is unsound as it destroys Green Belt principles of openness and separation of communities.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Land at Garlick’s Arch, Send Marsh, Policy A43.**

*Now 400 homes and 6 Travelling Show people plots*

I object to the Policy A43 change at Garlick’s Arch because:

- It is permanent green belt and no exceptional circumstances exist
- It ignores all the **thousands of previous objections** made by local people
- It will cause over-development of our village and the number of homes is excessive
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It will generate excessive traffic that will block up the local roads of Send and Ripley

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4).
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to this proposal because the number of homes proposed would add to local traffic congestion which is already excessive at peak travel periods. This site is also located underneath one or more pylons carrying power cables which constitute a health hazard for anyone and especially children living in such close proximity to them.

I also object to the location of any form of industrial activity which would increase traffic movements in that area leading to even greater traffic congestion. If additional industrial space is needed the ideal location is Slyfield which has the space to cater for it and where there is a symbiotic relationship between the various activities on such a site.

Comment ID: pslp172/2897  Respondent: 8586017 / Leslie Brown  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

POLICY A43 Pages243-5
I object to the proposed changes to this site which in combination would generate - considerable activity in a most unsuitable location. Show people pitches implies large vehicle traffic movements and a further extension to the commercial premises that have already been added on that side of the road all of which is located in close proximity to the surrounding residential area. In any case the proposed Show people sites contravenes your own guidelines of two pitches on developments of 500 to 1999 houses.
I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
| 1. | I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches |
| 2. | It ignores all the thousands of previous objections made by local people |
| 3. | There is no proven demand for travelling show people plots in this location |
| 4. | There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints. |
| 5. | The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required. |
| 6. | This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it. |
| 7. | The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. |
| 8. | Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided. |
| 9. | The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. |
| 10. | I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached. |
| 11. | I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site. |
| 12. | I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. |
| 13. | I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600. |
| 14. | I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads. |
| 15. | Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. |
I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

I OBJECT to building 400 Houses and 7000 sq meters of industrial Space at Garlicks Arch opposite Send Marsh Road. This is Green Belt Land with Ancient Woodland, and is prone to considerable flooding. The industrial space is definitely not needed as there is adequate space at Slyfield Green, and the owners at Slyfield are keen to have extra use there if there is in fact a need at all for extra industrial Space.

If GBC used the brownfield sites this Green Belt land would not be needed.

The gridlock that this development would cause on the local Roads would be

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO POLICY A 43 because:

It ignores thousands of previous objections made by us local people.

It will cause even more traffic congestion, which is dreadful already, gridlocking the Roads in and out of Send and Ripley.

It will fill in the gap between Send Marsh and Ripley, so defeating the purpose of the Green Belt.

It will cause over development of our village and this number of homes is excessive.

There are NO "exceptional circumstances" existing to use our precious , beautiful Green Belt Land.

The beautiful Ancient Woodland in this site has been there since Elizabeth the First and must be protected for future generations.
Being a flood zone 2 allocation it is prone to frequent flooding, so the surface water will be moved onto the lower ground where I live.

There is a clay pigeon shooting site here which has polluted the ground with lead shot for over 50 years.

There is NO PROVEN demand for Traveling Show people plots here.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed development of the above sites for the following reasons:

1. Development of this area is totally inappropriate because Send and Ripley could not absorb 400 house and 7000 square feet of industrial usage. As your plan does not include any infrastructure improvements it is obvious that at most time the traffic will be become completely gridlocked. This does not take into consideration the proposed 4000 properties at Wisley and Gosden Hill Farm. The suggested four way entrances on to the A3 would also make a further impact on the area and would encourage traffic to and from Woking and Old Woking to use Send Road to reach this junction. Unless there is vast improvement to the infrastructure, e.g. shops, doctors, hospitals, dentists, schools - all of which are already over subscribed - where are all the people's facilities.

I object to Policy A43 citing the building of 400 homes on the Garlick's Arch site as there is no proof these homes are actually required - indeed I understand there has been a reduction in housing numbers in the Borough - and it is a beautiful area of Green Belt with no exceptional circumstances to make this proposal tenable. Local residents were extremely vocal in their previous objections to this site and with other local developments also planned there can be no proven need for the number of homes suggested in this location. It is a crime to deprive our descendants of the right to enjoy the Green Belt as we have done in our lives so far, and there are absolutely NO exceptional circumstances that would EVER make that right here. Nothing has changed, other than the Borough's seeming determination to destroy as much Green Belt as they can by handing it over to developers who will fail, as per most other large developments across the country, to meet any promised requirements for affordable housing, or the provision of services, claiming 'poverty' when it comes to any actual build. Experience shows they will only build what they can make most out of, and the rest of the population pays for their profits in terms of a lost quality of life and place a huge burden on what are effectively still semi-rural services (water, drainage electricity supplies etc). Surely you are required by Law to make sure the infrastructure is in place PRIOR to such large-scale building proposals.

We have complained previously that our village would be completely overwhelmed by such an enormous and sudden increase of people and cars; the newly built school and stretched doctors' surgery could not cope with the extra demand. Local buses and trains are not the best service, and thus most would intend to travel by car, increasing traffic at all times, but at peak times to a level that would become unbearable. Should the village become busier than currently, and living on Potters Lane, where we have recently been operating a Speedwatch campaign we have seen 1000 drivers breaking the speed limit, this sort of practice is bound to increase along all smaller back roads that are not built for such traffic. Pedestrians are in danger now, let alone when there are thousands more vehicles trying to pass through and around the village, and accidents will occur more often.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A43

I object to the proposal to build 400 houses and 7,000 m sq of industrial use and warehousing at Garlick's Arch. There is no need for any more houses on top of those already proposed for the borough. This site is NEW and not included in the Regulation 18 draft and has not been consulted on previously. It is Green Belt permanently protected by the NPFF which prevents merging of the settlements. There are no exceptional circumstances. The site has particular conservation sensitivity as it is covered in ancient woodland. The proposed industrial development of 7,000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous plan. If there is a further need for industrial space, then it should be at Slyfield. A new 4-way interchange onto the A3 at Burnt Common would put substantial pressure on the already overloaded Send Road (A247) as it would be the through route for Woking for traffic leaving the M25 and A3 and the proposed new houses at Wisley and Burpham.

I object to the inclusion of policy A43 of 7000sq m of industrial warehousing as the Latest Employment Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft. Slyfield Industrial Estate still has spare capacity and could accommodate any additional warehousing need if required.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Policy A43 change at Garlick’s Arch (including the potential of an increase from 400 houses) because:

- It will cause over-development of our village and the number of homes is excessive
- It will generate serious traffic problems at peak times that will block up the local roads of Send and Ripley. We already have serious tailbacks for example on the T junction where Send Marsh Road meets Portsmouth Road
- It ignores the thousands of previous objections made by local people
- The housing targets for the area are unrealistic. If they can only be achieved by erosion of the green belt, then they should not be enforced. The government is imposing these targets whilst at the same time claiming to want to protect the Green Belt. This is highly contradictory and very disappointing for the standards we should expect in this country.

Policy A43 – I object to this policy as -

1. The changes to the current village boundary to create Garlic's Arch are only minor so this housing proposal remains disproportionate and unacceptable.
2. Changes to Garlic's Arch boundary do not address the impact on the infrastructure around Send Marsh, Burnt Common and Send.
3. The development would have a negative impact on the green belt, the ancient woodland, natural water courses and will have a negative effect on the whole area effectively doubling the size of Send Marsh. The proposed access points to the A3 at Burnt Common takes no account of the impact on the immediately surrounding road
network nor the local infrastructure. The junctions will only serve to congest the whole area rather than relieve it and as such can not be seen as a benefit to justify further development.

4. The Garlic's Arch changes do not address the gross over development of the Send Marsh area on a green field site that is an environmentally unsuitable area so close to the A3. As such the site remains unsustainable.

v. There are no special circumstances that justify the loss of this green belt.

1. The provision of traveler/showperson pitches is inappropriate and will be abused. Better to associate the minimum number to an industrial area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

This comment also relates to proposal A43a. While I have no objection to the proposal, which makes a significant contribution to the required housing total, I am disappointed that there is no recognition either here or in the more general documents, of the proximity of Woking, and particularly the Rail Station. There is understandable concern about the generation of increased traffic on the A247 from both increase in housing and the new slip roads. As was pointed out at the consultative meeting, it is difficult to see how the A247 can be improved, even with the sum of money allocated, to meet this demand. Can there not be more imaginative solutions, in conjunction with Woking Borough Council and Railtrack, leading to

- safe (i.e separated from vehicles) cycle routes through Send and;
- a park and ride facility to the west of Burnt Common roundabout, on land previously suggested for light industrial and housing?

We object to the plans for building houses and industrial units on the Green Belt land at Garlicks Arch.
Ripley does not have the facilities needed to cope with 400 additional homes. We don’t have sufficient schools, there is already a serious lack of car parking in the village and despite the plans for the new slip road on to the A3 at Burnt Common, this will increase the traffic through the village in the long term.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

In regard to the final consultation of the Local Plan 2017 I have a number of detailed comments and objections listed below but first I’d like to make three general points. Firstly, our local MP, Sir Paul Beresford, has been re-elected in part on his commitment to the preservation of the Green Belt as expressed in his response to the draft last year and yet, you as a Council, have chosen to ignore not only that but also the views of many many people. You may be trying to play a game by insetting from the Green Belt first and so claiming that any subsequent building is not on the Green Belt, but that is frankly dishonest. Secondly at a time when your overall target homes numbers have reduced you have chosen to increase the allocation to Send in this version of the plan. Thirdly, the central government planning guidance against which your Local Plan should have been prepared includes the following:

"Local planning authorities should seek opportunities to achieve each of the economic, social and environmental dimensions of sustainable development, and net gains across all three. Significant adverse impacts on any of these dimensions should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued." (my emphasis)

The final Plan you have now created, especially in regard to my first two points and my objections below, has significant adverse impacts in respect of at least two of these (social and environmental) and is highly questionable on the third (economic).

I object to the policy A43 change at Garlick’s Arch because:

(a) It is beautiful Permanent Green Belt and no "exceptional circumstances" exist
(b) It will cause over-development of our village and the number of homes is excessive
(c) It is exquisite ancient woodland that existed at the time of Elizabeth I
(d) It will join up Ripley and Send and defeat the key purpose of the Green Belt
(e) It will generate excessive traffic that will block up the roads of Send and Ripley
(f) It ignores the thousands of previous objections

Land at Garlick's Arch, Send Marsh, Policy A43

I strongly object to Policy A43 change at Garlick's Arch as it ignores all previous objections from thousands of local people.

There is no proven need for plots for "Travelling Showpeople". The shear title of these people indicates they should be "travelling" and therefore do not need a permanent plot. The title is misleading - they are not "show people" which indicates some sort of Circus. Circus people keep moving. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature].

This area is a permanent Green Belt site and there are absolutely no "exceptional circumstances" for this Policy.

The Policy Plan will cause over development of our Village and the number of homes is excessive.

Once again 400 homes will amount to another six to eight hundred cars on the local roads. roads are at virtual grid lock now at peak periods.

This Plan will virtually join Ripley and Send villages thus doing away with the Green Belt. The ancient woodland of this area has existed since the 15th Century and the reign of Elizabeth 1st.

The area is also subject to frequent flooding and is currently in a flood zone 2 allocation. Is this to be ignored as well as the Conservative promise of not building on Green Belt.

The land is contaminated by lead shot accumulated over 50 years. That entering the water table is a potential health hazard.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

CPRE OBJECTION TO SITES RELATING TO POLICIES A43 & A43a : GARLICK’S ARCH, SEND MARSH BURNT COMMON & RIPLEY

The proposal regarding Garlick’s Arch was only submitted at a very late stage just before the consultation on the draft Local Plan began. It therefore needs to be considered under Regulation 18 rather than Regulation 19 rules.

It appears that an as yet unspecified developer has offered a new North facing slip road with access to the A3 in exchange for approval in principle to build at least 400 homes and an industrial estate on Green Belt land adjacent to this strategic highway for which Highways England are responsible. CPRE considers that a greater degree of transparency is required for this proposal to be assessed properly. It would for example be valuable to know when and how this offer has materialised and whether it is linked in any way with any other current proposal being considered in this locality in connection with the draft local plan.

It seems to us that this application has to be considered alongside several other development proposals which involve the A3 and depend on Highways Agency overview and agreement. These include the Wisley Airfield site (A35) for 2000
homes, which was unanimously refused by GBC at an earlier date before the draft local plan was available, the Gosden Hill site at Clandon/Burpham (A25) for 2,200 houses, the Slyfield Area Regeneration Project (A24) for 1,000 houses, and the Blackwell Farm site (A26) with its A3 and A31 access at the Hogs Back for 1,800 homes. The common element to all these applications is that they depend on the input of the Highways Agency.

Additionally, we should bear in mind that the Royal Horticultural Gardens at Wisley, which is one of the largest tourist attractions in this part of England, have announced their plans to expand visitor attendance from 940,000 to 1,400,000 in the years ahead which will be a further A3 traffic consideration that needs to be addressed. Without clarification from the Highways Agency as to how they intend to improve the traffic flow on the A3, which is already badly affected by peak hours congestion, and manage its various junctions with the M25, the B2251, the B2039, the A247, the A3100 and the A31 in particular, further assessment is premature. Altogether over 7,000 houses are involved which seem certain to cause not only a crippling extra traffic burden for the A3 but also for our local road network.

It is not clear as yet how a 3 or 4 way on/off ramp at Burnt Common would work. It seems unlikely that it would alleviate traffic damage on a major scale for Clandon, Send or Ripley. CPRE therefore objects to this proposal which involves the loss of Green Belt to housing development, and is therefore directly against the Minister’s statement that this would not be acceptable if local people were opposed to this and considered it inappropriate. CPRE OBJECTION.

CPRE further argues that it would be premature to include this proposal in the draft local plan as the overall implications of what is being considered are insufficiently described.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

CPRE has to point out that these applications were added late to this consultation and are only now being considered for the first time.

Garlick’s Arch and Burnt Common are within the Green Belt and both sites adjoin the A3. If progressed, these proposals would amount to urban sprawl and objectionable linear development.

The 400 houses proposed at Garlick’s Arch involves the loss of Ancient Woodland and would be subject to flooding. The communities at Ripley, Send and West Clandon would all suffer from increased traffic congestion as a result and the rural identity of these villages would be substantially harmed.

CPRE is concerned at the way in which provision is made for Travelling Show people at this site when it is clearly still uncertain as to whether the proposal will advance further. It has been suggested that this development depends on financial support from the developer at the former Wisley Airfield whose planning application was refused unanimously by the GBC Planning Committee and is now the subject of an Appeal in September. CPRE considers it premature to make any proposed development decision at Garlick’s Arch before the Appeal decision is known.

It is also premature to take these policies further before the Highway England plans for the A3 are known. It is only then that it can be reviewed whether “exceptional circumstances” would apply to justify the housing proposed and the provision of the Travelling Show People site on Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Garlick’s Arch is at risk of flooding and is classified by the Environment Agency as being at higher risk than the Council’s assessment. I object to development in areas which are at risk of flooding (Policy P4). The original plan had included land at Burnt Common where there was a brownfield site this new site is absolutely wrong as it has ancient woodland and GBC’s Green Belt & Countryside Report does not even cover this site.(A43)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

POLICY A43 AND A43a – Garlick’s Arch

We object to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

We have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham school was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement - often at speed. It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.
The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**We object** to policy A43 Garlick’s Arch

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. We object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached. We object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well, we are aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site. We object to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available. We object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. We object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600. We object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads. Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. We object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces. Many
of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems. With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. We object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. We have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways. Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services. Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable. We object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. We have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse. We object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health. We object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2). It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43 
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.
The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There was no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be
dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.
22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Although this land is not particularly desirable, being alongside the A3, it does contain important woodland that should be preserved and conserved as a wild life habitat. Some high density small homes could be built on the boundary of the current housing line. Any thoughts about commercial, light industrial or stage facilities are entirely inappropriate and would bring nothing to benefit the local community. Anyone employed there would need to travel in by car. There is no sense of sustainability in planning for this kind of industrial development. If homes are needed some could be built here, but not unwanted and unnecessary industrial units.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2296  Respondent: 8667713 / Victoria Sinnett  Agent: 

20.POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement often at speed. It has narrow bends with poor sight lines, an infants school and a humpbacked bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which
forces pedestrians to cross and recross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.
Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. I object to Policy A43 and to the inclusion of the 30 hectares of Garlick's Arch in this Plan. This site is new and was not included in the Regulation 18 Draft, and has not been consulted on previously and is therefore improperly included.

Even so it forms part of the Green Belt and is permanently protected by the NPPF, which is there to prevent the merging of settlements. It also contains around 5 hectares of ancient woodland, some of which dates back to the 16th century.

Furthermore any further industrial space required could easily be accommodated at Slyfield.

However, the traffic chaos that this proposal will generate is the reason for my next objection;

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I very strongly object to the draft local plan for many reasons – and I wonder if any of the Councillors have really considered this proposal, and many others in the neighbourhood –Over 600 houses in Horsleys, 400 in Burnt
Common, 2000 houses on Gosden Hill Farm (Burpham) plus a number of smaller sites in nearby villages. These add up to in excess of 5000 new dwellings in this neighbourhood.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Taken together with the development of the Gosden Hill site, the outcome would be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would do great environmental damage to local communities. There is no significant requirement for local traffic to access the A3 to the north. The addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this proposal.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.
18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the allocation at Garlick’s Arch – allocation A43 due to the loss of ancient woodland; the impact on all local infrastructure of another 400 houses; the site is too close to the A3 and will have poor air There appears to be no joined up thinking on the various on/off junctions on the A3 – my understanding is that the SRN is meant to be for THROUGH TRAFFIC not local traffic. Numerous junctions will slow progress for all users and increase accidents due to more lane changes.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43) Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There was no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

1. I object to the building on the Green Belt at Send at Garlick’s Arch and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded. I have cycled to work from Ripley to Camberley for over 25 years and in this time the volume of traffic has increased massively. If we are serious about the environment and wish to encourage more people to give up the car then we must resist further development and erosion of the green belt. Our road system simply cannot cope.

2. I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need. No assessment is presented which projects the pull factor this scale of development will have to people already living in London. Living to so close to one of the largest cities in the world Guildford will just act as London overspill - what % of this figure is overspill - 80%?

3. I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the actual development that is really needed for locals not London overspill can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

4. I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day. As a Cyclist using this road every day I am seriously concerned about pollution and safety on this road. It will just become a major cut through to/from Woking with traffic from the clockwise M25 using this instead of the M25 J11. Old Woking is grid locked as it is - no account of the development by Woking Borough Council in and around this area is considered which has already increased congestion i.e. the massive development at Willow Reach (nr Woking Football Ground).

5. I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also
subject to flooding. It also proved a natural barrier from the A3 reducing pollution and traffic noise. So very few sites of ancient woodland remain and this should be preserved at all costs.

6. I object to the proposed massive development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and the local infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for
turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the policy A43 change at Garlick's Arch as: This is a precious natural barrier between Ripley & Send, It has long been established as an ancient woodland, It is an area susceptible to flooding, It will add extra traffic to existing roads which are already carrying more than are manageable at busy times of the day.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling...
development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

---
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arc site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Godden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

(Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/2469  Respondent: 8746753 / Miles Hackett  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the changes in Policy A43, Garlick’s Arch, Send Marsh because now in addition to the 400 homes, which now includes self build and custom plots, the proposal also includes 8 travelling/showpeople pitches where there is no proven demand for plots in this location.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.
The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

15.1 OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site.

Why was a brownfield site removed and replaced with a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. Development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the
neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.
24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge
concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsustainable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial
(B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2513  Respondent: 8771265 / H C MacKinnon  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. POLICY A43 AND A43a – Garlick's Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• It ignores all the thousands of previous objections made by local people
• There is no proven demand for Travelling Showpeople plots in this location
• It is beautiful permanent Green Belt and no “exceptional circumstances” exist
• It will cause over-development of our village and the number of homes is excessive
• It is exquisite ancient woodland that existed at the time of Elizabeth I
• It will join up Ripley and Send and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over fifty years
• It will generate excessive traffic that will block up the local roads of Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of Garlick's Arch site.

This proposal has been included at a very late stage and has not been consulted upon previously. It was not included in the Regulation 18 draft.

There are no exceptional circumstances to warrant the development, but there are such circumstances which make it unacceptable, such as its conservation sensitivity, being covered with ancient woodland, with trees dating back to the 16th century.

According to the Land Needs Assessment 2015 (ELNA) required employment space has reduced by 80% since the previous draft plan, so is no need for the proposed 7000 sq m of industrial development on this site. If there is eventually such need, it should be situated at Slyfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/264  Respondent: 8775169 / Shaun Cheyne  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Specific objections to Policy A43 and A43a: Garlick’s Arch / Burnt Common / North Facing Slip Roads:

The proposal is for 400 houses and 7,000 sq m of industrial and warehousing space. I object to this proposal on the basis of the following:

- This site has appeared very recently, it was not included in the Regulation 18 Draft and has not previously been consulted upon
- It falls within green belt permanently protected by the NPPF which prevents merging of settlements
- The site is particularly sensitive from a conservation standpoint, as it has ancient woodland with trees dating back to the 16th century.

- This will add significant traffic to the local road infrastructure around Send and Send Marsh; these roads are already heavily overloaded, and there is no space to widen given the residential surroundings.

No amount of expert studies can replace personal experience; I urge anyone considering these proposals to try and travel on the A247 road through Send at peak times to see how impossible it already is to travel between the A3 and Woking. The B368 through Send Marsh is used as an alternative when the A247 is overloaded, and this will become the next constraint. The surrounding proposed developments such as Gosden Hill Farm will without doubt also want to use the slip road and increase traffic through these already constrained and overloaded village roads.

- Services such as doctors are already overloaded in the Send / Send Marsh / Ripley area. It is close to impossible to get a doctor’s appointment within a 3 – 4 day window at the Villages Medical Practice as it stands with current population; where has this been considered, what is the plan to provide services to this significant addition of people?

- Flood risk: Over recent years the flooding in Send Marsh has become progressively worse with changing weather conditions. As example I quote winter of 2013 / 2014. Adding such as significant amount of development can only make this situation more severe.

- Nature of the village will be forever changed; Send and Send Marsh will no longer be rural villages given the scale of this development.

If there is a need for more industrial space (which I still question particularly in light of Brexit), then why would this not be an extension of the existing Slyfield Industrial Estate?

I trust my objections will be considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

(2) I object to the Policy A43 change at Garlick’s Arch because:

This again is an increase in number of houses and now inclusion of 6 Travelling Showpeople plots.

1. This is an area with prolific birds and wildlife
2. There is no proven demand for Travelling Showpeople plots in this location
3. It is beautiful permanent Green Belt and no “exceptional circumstances” have been stated or proven
4. Separation of villages is a key objective of the green belt. This development will join up Ripley and Send and defeat the key purpose of Green Belt
5. It is subject to frequent flooding and is currently a flood zone 2 allocation; I personally experienced this during heavy rains on recent years where the entire area is left flooded for days afterward
6. It will generate excessive traffic in an area that is already struggling to cope with the volume of cars on the road

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4579  Respondent: 8787969 / K Britton  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
potential for the stream to raise, the land floods. In addition the trees that are being removed will also exacerbate the problem. The copse is home to and regular visiting place for deer, foxes, owls, bats rabbits, hares not to mention a carpet of bluebells in spring.

The wooded part of this land contains ancient oaks. Many of these oaks are hundreds of years old. The land is bordered on other sides by Kiln Lane and Burnt Common Lane, both are narrow residential lanes and totally unsuitable for large amounts of traffic. Both lanes exit onto the B2215 Portsmouth Road. This road is a feeder road to the A3 and M25 which is heavily congested both night and morning.

Policy A43a This policy relates to a four way junction giving North and South bound entrances and exits to the A3. Whilst many local people would welcome easier access to the A3, the local feeder roads are all narrow and already congested. The Clandon Road A247 is again already heavily congested night and morning. When the road reaches the village of West Clandon where it becomes The Street, it narrows down even further. It is totally unsuitable as an access to the A3.

The Northbound access would run over a piece of Manorial land owned by the Manor of Dedswell and Papworth, surely such land should be preserved.

The implications for traffic are dramatic. Every day Portsmouth Road is stacked back from the M25 to the Send traffic lights on the A247 from 8.00am to about 9.15am every day and then the flow is reversed in the evening. As there are no improvement planned for the A247 and other surrounding feeder roads this is an unsuitable change.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the last minute inclusion of the Garlick’s Arch site. This is extending the ribbon development of Ripley and will result in urban sprawl it is also on the site of an ancient woodland and is in the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2423  Respondent:  8796481 / Sally Erhardt  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
1. I object to the extensions to the development of the Green Belt. I object the the extension of Garlicks’s Arch site (A43). Green Belt should NOT be built on and this extension is UNACCEPTABLE.

2. There is significant confusion within the plan as to the reason for including Garlick’s Arch A43 in the plan. Reasons of separation between Send Marsh/Burnt Common are being ignored as BOTH sites are in the plan. The proposed changes to this plan are poorly thought out.

3. I object to the increase in housing at Garlick’s Arch A43. The potential increase in housing at Garlicks Arch will be extremely harmful to the rural nature of Ripley, Send and Clandon. These villages, as I’m sure you know, have a great rural history and this will be destroyed.

4. I object to the allocation of 6 travelling show people sites in A34 Garlicks Arch. There should be no inclusion of Travelling show people plots as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4387  Respondent: 8796673 / Suzanne Burroughs  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Cladon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Cladon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been
assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be
particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Garlick’s Arch proposal.

This site was removed from consideration before the previous draft of the plan was issued.

I, along with many others, do not understand how this site has been brought back into the plan.

I do not believe exceptional circumstances have been shown to justify taking this site out of the Green Belt. This site was not discussed in the Green Belt and Countryside study and there seems to have been no consideration of the justification for removing it from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of
Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1959  Respondent: 8798849 / David Williams  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.
• I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
• It ignores all the thousands of previous objections made by local people
• There is no proven demand for travelling show people plots in this location
• There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
• The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
• This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
• The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
• Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
• The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
• I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
• I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
• I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
• I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
• I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
• Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
• Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
• With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no
proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

- The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.
- I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
- Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
- Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.
- Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
- I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.
- I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.
- I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
- It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

The development will cause harm to the ancient woodland on and by the site. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4). This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11) Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a) The addition of north facing ramps to the A3 at Burnt Common would be a significant negative impact for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

William Taylor - Objection to Local Plan

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to these areas on small roads which cannot be Improved and which were never designed for the current traffic levels let alone increases in traffic levels that would result if the proposal to build new on/off access to the A3 at Burnt common (A43a) were to proceed. The proposed Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the late inclusion of the new site known as Garlick’s Arch and the proposal to build hundreds of houses and thousands of square feet of industrial units on that land. No exceptional circumstances exist, there is ancient woodland and industrial development should be located and restricted to the current industrial development at Slyfield, where there is room for further development.

A43 Garlicks Arch

There were thousands of objections to the original submission and these have been completed ignored. This is overdevelopment, riding roughshod over the Green Belt and in effect turning two villages, Send and Ripley into one town.
There is no evidence for the need for the Travelling Showpeople sites. The infrastructure is not capable of managing the current traffic let alone what this will create.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4500  Respondent: 8801505 / Paul Edwards  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two
businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I2). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

<td>2.2 A43 Land at Garlick’s Arch</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

I object to this site. It was not identified until June 2016 as a potential site for development. It had previously been rejected in the 2014 draft and no evidence has been produced to support the development of this site. The provision of 400 house totally distorts the Burn Common community and is massive addition to the population but with no addition amenities planned. There is one convenience store within walking distance. The schools and surgeries in Send and Ripley are too far to walk and in any case they are full in Send. The site contains ancient woodland of which there is very little in the parish of Send and the development has potential negative impact on this. The land is subject to flooding and the flood risk will be heightened by housing and industrial development. No case has been made for the industrial and commercial use of this site in preference to the alternative site at Burn Common which was the preferred option from the draft plan in 2014 and up to and including the May2016. Development of this site will have negative visual impact on the A£ and for views from the south of the A3 including the North Downs. The combination of Garlick’s Arch and Gosden Farm development will significantly alter the character of Guildford from a compact to county town to a sprawling urban conurbation.

The comments in relation to Policy A25 as to the Green Belt also apply to these sites.

These Policies make no mention of the traffic impact on the A247 through West Clandon all of which is in the Green Belt. That impact will be severe. Appendix B of the comments by Surrey County Council on the 2014 Draft Plan included the following:

"...the A247 [which] is a very heavily trafficked A class road and carries a heavy proportion of HGVs".

Sec also observed that there was "a very limited bus route".
Buses on route 463 run between Guildford and Woking via West Clandon. There are five buses a day to Woking running at intervals of two hours or more, the last passing Clandon station at 1740 hours; only one of these services runs through Ripley. There are seven buses a day to Guildford at intervals varying from 1½ hours to over 2 hours, the last passing Clandon Station at 1902 hours. There has been a recent consultation on a reduction of bus services but no decision has yet been announced.

The Land Availability Assessment 2016 in relation to the site stated correctly that the closest railway station is Clandon, that the pedestrian footway along the A247 is narrow in places, that it switches to different sides of the road and that there are bus stops close to the station. It made no mention of the infrequency of buses.

It is inevitable that a substantial proportion of residents at Garlick's Arch would need to use Clandon Station to get to and from work and would travel by car since the station is about 1½ miles away. The station car park has spaces for 150 cars and is already used to full capacity. A number of people use Clandon station because of the difficulty of parking at other stations on the line, including Effingham. Rail users travelling when the car park is likely to be full are often dropped and picked up on return thus generating additional trips. In addition to those living at Garlick's Arch, there would be persons travelling to work at Garlick's Arch as well as commercial traffic generated, some of which would use the A247 through West Clandon.

The Strategic Highway Assessment Report ("SHAR") prepared by SCC this year based on data provided by Guildford BC calculates the number and distribution of vehicle trips to and from each development site based on various scenarios. Table 3.3 gives the weekday average AM trips on Scenario 2 which adds development to 2031 of the most likely strategic sites under the Local Plan (but without mitigation schemes) to trips on Scenario 1 which consists of background growth plus developments for which there is already permission.

The total Scenario 1 figure in Table 3.3 for Garlick's Arch is zero, there being no permitted development. Under Scenario 2, 116 weekday average AM peak hour departures are forecast, consisting of 100 cars, 13 LGVs and 3 HGVs and 44 vehicle arrivals are forecast, 38 being cars. The peak hours are wrongly shown on page 20 as 1600 - 1900 whereas they should be 0700 - 1000 (see page 7). The average peak hour must be the total for the three hours divided by three and clearly understates the actual peak hour which will be much more concentrated. For reasons which are not explained, although Scenario 2 adds to the Do-minimum Scenario 1, seven AM departure trips are shown for Clandon in Table 3.2 covering Scenario 1 but zero departures are shown in Table 3.3.

At para 4.2.2 of SHAR it is stated that Scenario 2 traffic demand for all development proposed in the Local Plan "shows a marked deterioration in the performance of the network when compared with Scenario 1".

Table 4.1 forecasts that under Scenario 3, which includes mitigation measures among which are the slip roads under Policy 43a at Burnt Common, there would be an increase in southbound traffic along the A247 Clandon Road at an average AM peak hour from 936 vehicles per hour under Scenario 1 to 1269 vph which is 36%. That Table shows the ratio of traffic flow to theoretical capacity ("RFC") under Scenario 3 as 1.1, as a result of which "flow breakdown and extensive queues can be expected"; the level of service ("LOS") is shown as "F" which indicates "every vehicle moves in lockstep with the vehicle in front of it with frequent slowing required".

At para 5.1.7 it is stated that the results of the assessment indicate that if the schemes in the Department of Transport's Road Investment Strategy ("RIS") are not forthcoming the residual cumulative impact of the Local Plan on the highway network could be considered severe. This is of course viewing the highway network in the borough as a whole. It must follow that the effect of particular developments on specific roads such as the A247 would be more severe.

The SHAR is a statistical exercise based on differing scenarios and does not consider any features of particular roads such as the A247. I have already referred above to the comments of Surrey County Council on the A247 in respect of the 2014 Draft Plan and to the Land Availability Assessment 2016 which mentioned the narrowness of the footpath in places and the switches to different sides of the road.

Table 4.4 which I have referred to above estimates the southbound traffic on the A247 at an average AM peak hour as 936 vehicles on Scenario 3. The flow of northbound traffic along the A247 going towards the A3, London via Ripley and Woking may if anything be greater. Although the weight of traffic slows speeds at peak hours, at other times the 30mph limit is regularly ignored by lorries and cars also. The width of the A247 varies, being quite narrow in places, and
the sight lines are poor particularly at the hump baked bridge over the railway (a photograph of which I provided with my comments in 2014), outside the church, outside the school, beside Summers and at Lime Grove. There is a particular problem when lorries or buses pass each other. It is not possible to see any scope for mitigation of the traffic problems on the A247. The traffic lights at the junction between the A247 and the A246 have caused problems of their own. The existing traffic problems on the A247 in Clandon are serious. Policies A43, and much more so A43a, would make them severe.

Policies A43 and A43a are not legally compliant in particular for the reasons set out in answer to question 2. The evidence base and submission documents are so extensive and difficult to access that it has not been possible to consider most of their content in any detail within the short time limit allowed. The passage cited from the judgement of Webster J applies here but has not been observed.

Policies A43 and A43a are not sound for the reasons given in my answer to question 3 coupled with the matters set out in my comments above on those policies.

My comments on question 4 apply to Policies A43 and A43a.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

Although the Planning Policy for Traveller Sites (2015) states at para 17 that land removed from the Green Belt to meet an identified need for a traveller site should be specifically allocated in the plan as a traveller site only, no specific allocation has been made. Requirement (7) refers to 'village' in the singular without specifying which village. It is quite likely that several large vehicles with trailers will liaise in convoy to the same destination, creating an additional problem is using the A247.

Leave the existing Green Belt boundary unchanged.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

This site is in the Green Belt - developing it will cause great harm to the Green Belt. No special circumstances have been given for this development, other than the need for houses, which is not an adequate reason. This is covered in more detail in the attachment.

The sequential test has not been employed at this site and so its flood risk should prevent its development.

Nor is there any need for extra employment land. This is solely because AECOM, who produced the Employment Land Needs Assessment adopted an unambitious target for land use efficiency. This target was just to be the same as the
national average. But because land in the borough is expensive and 89% of the borough is Green belt, there is a need for a much more ambitious land use efficiency, so land use efficiency is better than the best. This would eliminate the need for employment land on this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Site objection.pdf (617 KB)
general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tr>
<td>I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley POLICY (A43)</td>
</tr>
</tbody>
</table>
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.
18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause...
coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1346  Respondent: 8813601 / Gaenor Richards  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion in the Local Plan of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There was no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the 400 houses and travellers sight on Garlicks Arch.

This bis much too many houses the only reason they will be affordable is because of the travellers sight.

We are a very quirt village with areas of greenbelt all around and it will be detrimental to the environment wild life and services to the villagers as the doctors surgeries hospital appointments and school places are all in short supply now

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3899  Respondent: 8817537 / Kim Meredith  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43, land at Garlick’s Arch, Send Marsh for the following reasons:

1. This totally ignores hundreds of previous objections by local residents.
2. There are no ‘exceptional circumstances’ as required by the National Planning Policy to take this area out of the Green Belt.
3. This will remove ancient woodland which cannot ever by regained.
4. Ripley and Send villages will merge, therefore defeating the purpose of the Green Belt.
5. The number of homes proposed is excessive. Send is a village. This is over-development to the extreme.
6. The area is subject to frequent flooding and is currently a Flood Zone 2 allocation.
7. The excessive traffic that will be generated will totally cause mayhem on the Send and Ripley roads. Already whenever there is a road closure nearby or traffic accident (almost a daily occurrence on the A3/M25) in the vicinity – the main Ripley, Send Marsh and Send roads are ridiculously congested or at a total standstill.
8. There is no proven demand for Travelling Show people sites in this location. This development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.
9. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
4. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
5. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
6. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
7. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
8. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
9. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the
neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. 26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** pslp172/2073  **Respondent:** 8819457 / Howard Turner  **Agent:** 

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43 

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Policy A43 - Garlick's Arch

I have 'previously objected to the proposed development of 400 houses on this Green Belt and good agricultural land. The new policy A43 adds 8 travelling/showpeople pitches to this development rendering the policy even more inappropriate for the area. The Borough Council is reminded that less than 3 years ago it refused a planning application from 'Oldlands' to build just 25 houses in the same location. The Council cannot therefore incorporate this policy within the Plan and still maintain that it applies consistent and good practice.

This policy would increase the population of the Send Marsh/Burnt Common village by 49% and totally destroy its rural character.

I therefore strongly object to the revised proposal on the grounds that:

a) the village has no shops or other infrastructure to support the development:
b) the additional traffic generated would create major congestion on the already busy roads throughout the villages of Send, Send Marsh/Burnt Common and Ripley:
c) no exceptional circumstances exist to destroy this Green Belt land or the ancient woodland it contains:
d) there is no proven demand for travelling/showpeople pitches in this location, and
e) it would join up and destroy the distinct character of the villages of Send Marsh/Burnt Common and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**POLICY A43 AND A43a – Garlick’s Arch**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.
I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the building on the Green Belt at Send at Garlick’s Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded. Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch, The Plan should develop the existing brownfield site at Burnt Common rather than developing Garlick’s Arch (A43).
The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope. A43

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Policy A43 and Policy A43A**

We have noted that Policy A43 and A43A were introduced into the draft at very short notice and without any consultation under section 18 of the Local Plan Regulations 2012.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.

**We object to the inclusion of Policy A43 in the plan due to the high flood risk associated with this site and we conclude that this aspect of the plan is unsound.**

The Transport June 2016 topic paper suggests on page 25 that the slip roads in Policy A43A could provide a four way junction for Policy A25 Gosden Hill Farm. We note that this is only an aspiration and for that reason this suggestion does not appear in the draft Local Plan. We have explained on page 7 that there is an over-riding need for a four way junction north of Potters Lane at Gosden Hill Farm if that development is to go ahead. That being the case, there is no need for slip roads onto the A3 at Garlick’s Arch and therefore Policy A43A should be deleted.

**We object to the inclusion of A43A in the plan on the basis that there must be a four way junction north of Potters Lane at Gosden Hill Farm and therefore there is no need for slip roads onto the A3 at Garlick’s Arch.**

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
