Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to the building of 400 houses and industrial development at Garlicks’ Arch. The area is marshy and the woodland is particularly endangered, with very old trees which must be preserved. The traffic, particularly at rush hour times, which is dreadful, will be vastly increased in this area and the infrastructure at present is at bursting point. Our doctors and schools will be unable to accommodate the vast new numbers of residents in this area, if development goes ahead.

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I OBJECT TO 400 homes and 7,000 sq metres of industrial space at Garlick’s Arch opposite the end of my road. This Green Belt site is should not be used when there are other spaces that can be used . Slyfield is already a site for industry and is a more appropriate area for the proposed industrial space. It is totally out of order to mix industrial space with a residential area.

I object to the extended development in the Green Belt (Policy P2, Site A43) Garlick’s Arch. Because why should you build on this beautiful Green Belt site, which already has sufficient houses in the area, when there are plenty of more appropriate sites around the Guildford area where there would be less overcrowding? We already experience a great deal of traffic at certain times of the day and building here will just add to the congestion. I was at risk of being flooded in 2000 and am concerned that the infrastructure will not support additional building and will increase the threat of flooding again in the area.
I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch. There have been travellers using the fields behind my house over the last 12 months and they have left the fields in a dreadful condition.

[Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

It will take a great deal of money to restore the land to its former use for agriculture.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

C.ii. Policy A43 Garlick’s Arch – My Objections

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 and A43a on Garlick’s Arch.

This site had been previously considered and rejected before the previous draft of the Plan. The site was then inserted in the Draft Plan only hours before its publication without any consultation. I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site. This is a cavalier approach to public engagement by the Council.

1. The site is not a sustainable site, being far from any infrastructure facilities and transport links. The bus service is infrequent and future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

1. The site is susceptible to flooding and development will cause harm to the ancient woodland on and near the site. See my comment on Policy P4 above.

1. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

1. The Council appears to view the development as an enabling site to obtain land and developer funding for slip roads on/off the A3. This is not an exceptional circumstance to justify taking Green Belt land. The slip road land if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential, Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

1. The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A-road. In places it is too narrow for two lorries to pass causing them to mount the pavement, often at speed. (During the last week of the consultation period of this Plan, a resident of West Clandon had his car written off by a negligent car driver coming the other way and occupying 2/3 of the road at an obvious pinch point which is typically littered with broken wing mirrors.) It has narrow bends with...
poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for cyclists and pedestrians.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford. There is vague talk in the plan of link roads between Gosden Hill and Garlick’s Arch, all meeting at an enlarged A3 intersection at Burnt Common. The existing intersection is unlit and is accident prone. Adding two or three slip or feeder roads at this point will add to the confusion and public danger

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Policy A43 Garlick’s Arch – Objections**

- The amount of land to be taken out of the Green Belt seems well in excess of the space needed to build 400 homes. What will be the fate of the excess land?
- Garlick’s Arch (A43) is an unsustainable location. The nearest station is about 1.5 miles away and the bus services are infrequent. Residents will be dependent on cars.
- There is no proven demand for travelling show people plots in this location.
- Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways. The development will cause additional traffic on the A3 and the A247 and B2215 in Ripley, Send and West Clandon.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I object to the late addition of the A43 Garlicks Arch site to the plan. Garlick’s Arch has previously been protected from development as Green Belt. The Plan proposes that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2). There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. local residents were only aware of this inclusion following a Council meeting on 11th May 2016.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

---
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

There is an abundance of wildlife in this area, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. There are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

15. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to building 400 houses and 7000 sq meters of industrial space at Garlick’s Arch.

The industrial space is not needed, but if it were this is not a suitable location for it. There is an established industrial zone at Slyfield, and any additional requirement should be located there.

If 400 houses were built on this Green Belt land the character of the local community would be totally transformed. Existing roads would not be able to cope with the additional traffic – they are already severely congested at peak times – especially if the proposed site at Gosden Hill Farm proceeds plus the proposed new A3 interchange at Burnt Common.

There are already difficulties in obtaining appointments at the local Medical Centre and the local primary and secondary schools are already over-subscribed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- It ignores the thousands of previous objections made by local residents
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated with lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the roads of send and ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I **object** to the proposed industrial site at Garlick’s Arch. There is no need for such a site. The Employment Land Needs Assessment 2015 shows a reduction in required employment floor space from the previous draft plan. If the Council truly believes there is a need for such a large amount of industrial space it should be located at the current Slyfield site.

My son, Luke Botha, age 8 would also like to raise his objection I relation to the proposed development at Garlic arch. As a resident of the area and as the future of our country I think the children should be listened to. They see things simply and as they are and without political bias or financial motivation.

“I think it is a bad idea to build houses and factories at Garlic Arch, because you will chop all the trees down and the air will become more polluted for the people living here. There will also be lots more cars and trucks and they
will make lots of pollution too. I think it is a stupid idea because all the trees and bushes will be destroyed and all
the animals and birds that live there will die. I don’t think it will be a good place to live because it will be really
noisy and dirty living next to the A3. I think the roads are too busy and it isn’t safe for the children to cross the
road, like at the school. (Send First school)” – Luke Botha, age 8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a
shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and
transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars
for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will
cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this
important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be
used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling
development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory
purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of
this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for
turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td></td>
<td></td>
</tr>
<tr>
<td>5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be
particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Comment ID: pslp172/271  Respondent: 11044161 / Kerry Denholm-Price  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A43

I object to the Policy A43 change at Garlics Arch with particular reference to the specific points listed below.

Given the area is classified as Green Belt the A43 changes fail to demonstrate that an ‘exceptional circumstance’ exists which would justify development of this scale on a Green Belt site.

The increased development proposed under the A43 changes exacerbates the disproportionate size of the development in respect of both locality and the contribution to the overall target for new development in the wider Borough being assigned to the area. The number of homes now being proposed for the site represents over-development of the Send Marsh area and would result in the joining up of the villages of Ripley and Send which is fundamentally against ‘Green Belt’ principals.

The land represented in the A43 changes provides a valuable natural flood control in an area that already struggles with a high water table and periods of flooding in winter despite the installation of extensive flood control channels. The proposal to replace this natural area of flood defence with housing on the scale proposed in the A43 changes would further exacerbate flooding in the wider area to the detriment of the local residences and infrastructure and as such is at best a misguided proposal and at worst an irresponsible one.

The local road infrastructure is inadequate to cope with the demand of existing traffic further development as proposed in the A43 changes will overload the existing road systems to the point of gridlock and result in increased pollution exposure for the villages of Ripley, Send Marsh and Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Comment ID: PSLPS16/4135  | Respondent: 11047201 / Peter McGowan  | Agent: |
I object to building 400 houses and 7000 sq metres of industrial space at Garlick's Arch, opposite Send Marsh Road. The site is inappropriate because currently it is covered by ancient woodland and because it regularly floods. This proposal represents poor planning and management because existing brownfield sites in Slyfield and elsewhere could be used. Furthermore, I understand that the industrial space proposed is not actually needed. The proposal to build 400 houses seems extraordinary in terms of the lack of transparency over the data that supports building this number of houses in this location. I would be grateful if clear data could be presented to support this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

I object as it is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this
site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
2) I object to the inclusion of the land (A43) at Garlicks Arch, Send Marsh/Burnt Common as it forms an important green buffer between the A3 and Burnt Common with a large area of Ancient woodland together with wildlife and IT IS GREENBELT.

The Council have numerous brown field sites and land which would be better suited for this kind of development

The land is liable to flooding and there has been no FRA (flood risk assessment) carried out

The inclusion of this site would overburden the villages of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the proposed development at Garlick's Arch, site A43. It follows from what I have said above that there can be no justification, on the grounds of exceptional circumstances, to remove Garlick's Arch, from the Green Belt. I FURTHER OBJECT the proposal to build at Garlick's Arch, 400 houses, 7000 sq m of warehousing and a four way junction with the A3. This proposal was not included in the original 2014 draft Local Plan nor in the revised one introduced earlier this year. So if it is so essential, why has it only been introduced as recently as 11th May this year, tacked onto the end of the agenda at a meeting of the Council Executive? This stinks of a developer led proposal, a conclusion that is justified by the owner of the land offering it to the Council free provided he is allowed to build 400 houses. If the Council had thought that development on this site was appropriate, why had they not included it in either of their earlier proposed plans? They knew the land was there - it did not suddenly appear like an Icelandic volcanic island! The first time this was even publicly mooted was 11th May. That allowed less than 14 days to the full Council meeting on 24th May which was intended to adopt the plan and put it to the Inspector. It is manifestly obvious that this proposal must have been in the offing for some considerable time prior to 11th May. The conclusion is clear and inevitable: the Council knew how controversial this proposal was going to be and sought to introduce it in as low key a way as possible allowing virtually no time for residents to object. it was a cynical and underhand attempt to subvert the democratic process and to stifle debate, to ensure that the proposal reached the Inspector rather than being fully considered at a full Council before its inclusion in the proposed plan. The intention clearly was to have a 3 line whip on the members of the overwhelming majority Conservative Group to nod it through - which is precisely what happened. Proper public consultation did not happen. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature.]

There is no clear evidence that there is any need for the proposed 13,860 houses in this plan, let alone that 400 of them should be at Garlick's Arch. The almost 14,000 figure of "needed" houses also fails to take account of planning constraints. The Council has refused to disclose how it has reached its SHMA, and there has to be strong suspicion that it has placed excessive weight on the number of students in the Borough, who are not permanent residents, disregarded the number of empty homes in the area, and over-estimated the effects of immigration - which, though they could not have known this at the time the plan was prepared, may now, since "Brexit", be lower even than originally anticipated as indicated at 1) above.

There is no demonstrated need for 7000 sq m of warehousing at this location. The Employment Needs Land Allocation of 2015 suggests there should be an 80% reduction in employment floor space. This warehousing was originally intended to go onto the existing Burnt Common site a few hundred yards to the south-west, which at least had the benefit of being an existing industrial site. Garlick's Arch, both as a potential industrial site and for housing, is inappropriate. It is not only Green Belt land, but much of it is Ancient woodland, and as such even more deserving of preservation. The belt of woodland provides a visible and audible barrier for residents on Portsmouth Road, Burnt Common, from the A3. Parts of
the site are prone to flooding - and indeed were under water in January this year. If there really is a need for such warehousing, it should be at Slyfield industrial estate off the A320 between Guildford and Woking. That site was originally to be extended, is low quality land with few houses in the vicinity and could have access improved by the provision of a new access road and junction in the Clay Lane area to and from the A3. It simply makes no sense to create a new industrial site, let alone on a green belt site with Ancient Woodland on it, when there is space available at an existing industrial location. Astonishingly, in writing to those acting for the proposed developers at Slyfield, that land was described by the Council as "sitting in a high sensitivity parcel", not to be developed "unless there is strong justification for doing so". Garlick's Arch however, in the same correspondence provided to me, was described as "medium sensitivity". North Slyfield is assessed as "contributing more towards the purposes of the Green Belt" than Garlick's Arch. This is surely astonishing that an area that is both Greenbelt and Ancient Woodland should be so lowly regarded. It seems to me that the Council is deliberately overstating the sensitivity of the land adjacent to Slyfield - poor quality boggy marsh, and understating that of Garlick's Arch because it is determined to build at the latter and not further develop Slyfield. This conclusion is strengthened by the next thing the Council said to those acting for the Slyfield developers... "it" (Garlick's Arch)... "has in addition to the benefits of meeting our industrial need, significant further benefits in that it facilitates a new on/off slip with the A3. We also consider that the site is more accessible to the strategic road network compared to the North Slyfield site which will assist HGV access to and from the site with less impact on the local road network and residents".

The Council's conclusion takes no regard of the effect on people living in Burnt Common, Send Marsh or Send itself, who would have their already overcrowded roads laden with even more HGVs. The proposed junction is the real clincher. This is the real reason the Council wishes to develop Garlick's Arch - to provide a junction that will assist the proposed developments further afield at Wisley and Gosden's Farm. They have not been honest about this, but Send, Send Marsh and Burnt Common are to be sacrificed on the altar of developer-led building to allow the Council to reverse its decision to refuse the Wisley airfield proposal. It clearly fears "planning by appeal" given the applicants are a wealthy Cayman Islands based company who can afford to fight the refusal. The junction is not needed at Garlick's Arch and the effect on the area of this proposal is out of all proportion to its supposed advantage. The infrastructure in the area, roads, sewers, medical facilities and schools, are already at full capacity. They simply could not cope with the additional burden imposed by the Garlick's Arch proposal. The proposed junction would not merely service the immediate area. Traffic using the M25 clockwise and intending to go to Woking, instead of leaving at junction 11 or 12, would leave at 10, thus avoiding some of the delays that build up from that junction, travel the short distance, 2 miles, down the A3 to the new junction then leave there and travel along Send Road, already at full capacity morning and evening, adding to pollution and noise.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3910  Respondent: 11048481 / Patrick Oven  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
by the back door clearly to limit the public's right to legitimately object. There is clear collusion between the landowner and the Council. This policy utterly stinks.

2) There is absolutely no demonstrated need for 6 travelling showpeople's plots at this location. Policy A50, Whittles Drive, Normandy, provides all the plots of this nature that are likely to be required within Guildford Borough. There is no evidence to show that these additional ones are needed. Indeed in the Plan there is discussion as to how these plots could be used for housing in the event they are not taken up by showpeople - hardly a ringing endorsement of the "need" for them!

3) Within the limited scope for objections provided by the manner in which this proposal was introduced in 2016, there has been massive response from the residents of Send, Send Marsh and Ripley against this proposal last year. This has been totally ignored by the Council, other than to remove the proposal for 7000 sq. m of warehousing/light industrial from Garlick's Arch and move it to Burnt Common, policy A58, and increase its amount to a minimum of 7000 sq m. Clearly the reason for the removal of the industrial use from Garlick's Arch is to allow space for further house building on this site later - facilitated by the proposed insetting of this site from the Green Belt, along with the rest of Send and Ripley.

4) This is at present, Green Belt land. As such "exceptional circumstances" have to be proved to allow development on it. No such evidence has been provided by the Council, who seem intent on simply insetting the site from the Green Belt to avoid having to show reason to permit development on it.

5) Building on this land will lead to the effective joining of Ripley, Send Marsh, Send and West Clandon, thus entirely defeating the principle of the Green Belt.

6) The land comprises a large amount of formal "ancient woodland", predating the accession of Elizabeth I, 1558. As such there is a strong public interest in retaining it as such.

7) The land currently floods regularly, and is a flood zone 2 allocation. Adding tarmac and concrete will significantly exacerbate a clear existing problem.

8) The proposal for 400 homes on one site is a) excessive and b) disproportionate for Send, Ripley, Send Marsh and Burnt Common.

a) Excessive. The infrastructure in the area being utterly insufficient to cope, roads, sewage, schools and doctors' surgery all being inadequate to cope with probably 1200 additional people and 800 vehicles. No proposal is made in the plan to address this, save for the addition of a new 4 way junction on and off the A3 at Burnt Common - but that not being proposed to be built until after the houses have been built. See the observations made at A) 2) above, re Clockbarn Nursery, policy A42, which are equally applicable here.

b) Disproportionate. Send and Ripley, in the north-east corner of Guildford Borough, have 11% of it's population. Yet the Plan proposes 40% of the development for them, the majority of it accounted for by policy A43, Garlick's Arch. Yet Policy A46, land to the south of Normandy and north of Flexford, which proposed 1100 homes, has been removed in its entirety, whilst Gosden Hill Farm Merrow has its number reduced from 2000 to 1700, and near the Hog's Back, Blackwell Farm's proposed homes has been reduced from 1800 to 1500. This merely emphasises how utterly disproportionate the Garlick's Arch proposals are. Many in the Send area believe it has been punished by Guildford Council for its temerity in electing two Guildford Green Belt Councillors in 2015 - a sentiment this proposal does nothing to dispel.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the **thousands of previous objections** made by local people, including myself
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- And finally, as to my initial point It will generate excessive traffic that will block up further the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3553  **Respondent:** 11048769 / Peter Harmer  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to building 400 houses and 7000 square metres of industrial space at Garlick’s Arch – using existing brownfield site areas for development rather than an ancient woodland on Green Belt land would seem to be far less destructive and would avoid additional risk of flooding in an area where water drainage and flooding are already issues. Living adjacent and at an elevation just below this planned development and knowing that we are already in a flood risk area I cannot help feel this development would only cause future problems. Additionally the buffer offered by this strip of woodland between the housing in Send Marsh and the ever increasing traffic of the A3 is very important for both air quality and noise reduction.

The development of this area, necessitating the loss of an extremely valuable relief of green belt woodland, additional flooding risk and increased traffic loading local to an already difficult junction, against utilisation of existing brownfield sites does not seem necessary or progressive.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3450  **Respondent:** 11049473 / Victor Bates  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.
The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick's Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of...
development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the wide development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>I think that the number of houses allocated to this site is ridiculous, I don't have a problem with houses being built here but the number suggested is far too high. The infrastructure in the area can not cope with that amount of additional cars/people. Where are the children going to go to school? Send CoE is already oversubscribed as is Ripley primary and then it is a whole different ball game with secondary schools - there is just not the availability of places. Also the access on and off the A3 even if you add an additional junction at Burnt Common to go North Bound, it is going to cause an already busy road to be choked every day. Yes it would relieve the amount of traffic going through Ripley but Send Barns Lane and Send Marsh Road will become a nightmare - especially as the new entrance to Send School will be in Send Barns Lane and both roads are used to cut through to Woking. And if the Wisley Airfield gets granted the whole area is just going to be inundated with cars spoiling an otherwise quiet haven between Woking and the M25. Please do not grant that many houses on this site!</td>

<td>I OBJECT to Policy A43 and A43a on Garlick’s Arch. The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car. The site is susceptible to flooding and will not make a suitable site. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt. I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site. It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A Road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.
The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to this proposed development on existing green belt, its siting by the A3 will expose residents to noise and poor air quality from the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6731  Respondent: 11061185 / Peter Komisarczuk  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43) Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it to be removal from the Green Belt (Policy P2). Central Government states clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch. No consultation took place on this, and GBC’s Green Belt & Countryside Report does not even cover Garlick’s Arch. I am appalled that we were not consulted; this is surely inappropriate behavior by GBC. There were reports in the local paper about the meeting at which this proposed Plan was so called “debated” which showed utter contempt by GBC for due process, for considered debate and the gagging of dissenters. This is not good government nor does it appear democratic.

As has been said, no doubt in thousands of objections, the site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to flooding
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope with the proposed development.

As previously stated your assumptions need to be looked at again in light of Brexit as well as all these aspects noted above.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/435  Respondent: 11061345 / Ewbank’s Organisation  Agent: DMH Stallard LLP (Geoff Smith)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We act on behalf of Ewbank’s, and attach our Submissions on the ‘Proposed Submission Local Plan: Strategy and Sites’ (June 2016) for your consideration.
Our objections relate to the omission of the Land around Burnt Common Warehouse as a development site, and propose that it be re-instated in Policy A43 for approximately 100 homes (C3), and at least 7,000 square metres of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8).

1. Introduction

1.1 DMH Stallard act on behalf of ‘Ewbanks’, on planning matters in relation to the Ewbank’s Burnt Common Auction Rooms site, which is located to the south of the settlement of Send Marsh/Burnt Common.

1.2 These representations relate to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites 2016, which covers the period 2018 to 2033.

1.3 Our representations focus on objecting to the proposed removal of the allocation of Land around Burnt Common Warehouse, London Road, Send, for employment and residential purposes. This allocation comprised employment uses of either (or a mix of) light industrial (use class B1(c)); general industrial (B2); and storage and distribution (B8).

1.4 This site allocation was not only in the Draft Local Plan (2014) (Site 74), but also in the Draft Version of the Proposed Submission Local Plan considered by the Guildford Borough’s Economy and Infrastructure Executive Advisory Board on 13 April 2016, and in the papers for the meeting of the Borough Council’s Executive Committee. The Report to the Executive stated:-

“Send Marsh/Burnt Common – this site is located in a yellow (medium) sensitivity land parcel. Our Employment Land Needs Assessment identifies a need for industrial land and this site is the only suitable and deliverable site identified by the Green Belt and Countryside Study that could meet this need”.

1.5 We were therefore astonished that a Supplementary Information Sheet was presented to the Executive Meeting on 11 May 2016 which proposed to remove this site from the Local Plan, and replace it with a site at Garlick’s Arch, with an increased housing allocation from 100 homes to 400 homes, as well as up to 7,000 square metres of employment.

1.6 Our objections focus primarily on the reasons given in this Supplementary Information Sheet, which we submit are not drawn from any of the ‘evidence base’ documentation which has been produced throughout the preparation of the Local Plan. The proposed site allocation at Garlick’s Arch should therefore be deleted from the Local Plan, and the Land around Burnt Common Warehouse be reinstated.

1.7 Section 2 of these objections set out reasons why the Land around Burnt Common Warehouse, London Road, Send, should be reinstated as an allocation for employment and housing. Section 3 identifies those Policies in the Proposed Submission Version of the Local Plan which should be amended, and Section 4 sets out the proposed wording of these proposed amendments.

2. Omission Site: Land around Burnt Common Warehouse, London Road, Send

2.1 We submit that this site, which was not only included in the Draft Local Plan in 2014, but also in the draft of the Proposed Submission Local Plan in April 2016, should be reinstated as an allocated site. We submit that the proposed inclusion of land at ‘Garlick’s Arch’ for housing and employment is ‘unsound’ as it is not based on the extensive ‘evidence-base’ for this Local Plan. We will address all of the four reasons for this proposed change, as set out in the Supplementary Information Sheet to the Council’s Executive Committee on 11 May 2016, to demonstrate that these are not ‘sound’ reasons to support the proposed development at Garlick’s Arch. We will then comment on any relevant general policies on the Plan for completeness.

2.2 In the Draft Local Plan 2014 this site was “Site 74” described as being 13.4 hectares in area, with existing uses of storage and distribution (B8) and undeveloped land. It also contains the Ewbank’s Burnt Common Auction Rooms and associated car parking. It was one of the “Land Around Villages” Site Allocations, proposed for:- “Light industrial (B1(c)), general industrial (B2), storage and distribution (B8), or Light industrial (B1(c)), general industrial (B2), storage and distribution (B8) and housing (C3).” The Plan also included this site in Policy 13: Economic...
Development, as a new strategic employment site, called 'Land around Burnt Common Warehouse, Send’, and defined on the Guildford Borough Overview Map (Appendix E of the Draft Plan).

2.3 In the Draft Plan 2014, it described this site as follows: “The site contains and surrounds an existing site of three warehouses. Within the site, land to the east of the existing warehouses is suitable for new homes including at least 45% affordable houses. Land to the west of the existing warehouses is suitable for new employment uses (B1c, B2 and B8). If new homes are not provided, the whole of this site is suitable for new employment uses (B1c, B2 and B8).”

2.4 This same site was also included in the April 2016 Version of the Proposed Submission Local Plan as “Site Allocation A43 – Land around Burnt Common warehouse, London Road, Send”. It proposed: “Homes (C3) (approximately 100) and employment floorspace (B1(c), B2, B8)”. In support of this proposed allocation, it states: “Key considerations:-- Location of employment uses and houses within the site.- Appropriate green buffer between residential and employment uses.” It is also contained within “Policy E1: Sustainable employment”, where it states: “When developed, the new employment site at Burnt Common will be treated as a Strategic Employment Site”.

2.5 This site was further confirmed in the Report to the Council Executive of 11 May 2016, when it stated that “this site is the only suitable and deliverable site identified by the Green Belt and Countryside Study that could meet this need”).

2.6 In the light of this consistent approach to the proposed allocation of this site in the Draft Plan 2014 and in the April 2016 Version of the Proposed Submission Local Plan, and the extensive evidence base supporting these versions, we were astounded to see that the site has now been deleted from the Plan, in a ‘Supplementary Information Sheet’ to the Council Executive of Wednesday 11 May 2016, and replaced with a totally new site to the east, described as ‘Garlick’s Arch’, Send Marsh/Burnt Common, without in our view any valid explanation.

2.7 The reasons given for this ‘last minute’ change are in our view unconvincing, in that they do not introduce any new evidence for allocating this site which would not have been available to the Council officers when the previous (April) revision of this Proposed Submission Local Plan was prepared. Four reasons were given in this Supplementary Information Sheet, and we comment on these in turn. Reason 1: The new site will provide land to facilitate the provision of on/off access to the A3, which will provide significant improvements to the highway network and is fully supported by Surrey County Council. This has been discussed with Highways England and further technical work will be undertaken to address their initial comments.

2.8 At no stage up to May 2016 has there been any reference to the need for the proposed employment and housing at Land around Burnt Common Warehouse to include a link onto the A3. This includes the draft Proposed Submission Local Plan published less than a month before this executive meeting. The discussions between Guildford Borough Council, Surrey County Council and Highways England must have been taking place over several months, if not longer, and at no time were Ewbank’s contacted to discuss this matter.

2.9 We are further concerned that the Council state that this proposed junction works on the A3/A247 may be required to form part of the wider transport solutions for the proposed New Settlement off the A3 on Land at the former Wisley airfield, Ockham (Site Allocation A35 for 2,000 homes approx.). In the “Transport Topic Paper – June 2016”, one of the accompanying evidence base documents for the Pre-Submission Plan, paragraph 5.52 states: “New north facing junctions to the A3 are also proposed at the A247 Burnt Common interchange. These accesses are referenced as SRN9 ‘A3 northbound on-slip at A247 Clandon Road’ and SRN10 ‘A3 southbound off-slip at A247 Clandon Road’ in the Appendix C Infrastructure Schedule. These junctions are being promoted to mitigate the impact of the level of strategic planned growth and in particular the development traffic flows resulting from the development of a new settlement at the former Wisley airfield site (site allocation Policy A35), as well as limiting any increase in traffic joining and leaving the A3 at the Ockham interchange.”

2.10 We submit that the previously proposed Site Allocation at Land around Burnt Common Warehouse has excellent vehicular access, and there is no reason to delete the site on highway grounds, which appears to have been the case. The Draft Plan stated that this site could be developed in the short term (1 – 5 years), and there was no reference to any transport or access constraints to its immediate development.
2.11 The site has excellent vehicular access onto the London Road (B2215) with ample capacity for the traffic which would be generated from the proposed new development on this site. This must have been recognised by the Borough Council in identifying this site for employment and housing, and there has been no change in circumstances since the publication of the Draft Plan in 2014, or the April 2016 Version of the Proposed Submission Local Plan.

2.12 There are also opportunities for road re-alignments directly adjacent to the Land around Burnt Common Warehouse site, which would improve both the vehicular access into the site itself, and also the overall traffic flows in the immediate vicinity of the site. We would be pleased to engage with Guildford Borough Council, Surrey County Council, and Send Parish Council to discuss these opportunities in detail. **Reason 2: The (new) site location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, Merrow Lane, Guildford (Site Allocation Policy A25).**

2.13 The proposed site allocation at Gosden Hill Farm was also contained in the Draft Plan, and the Borough Council considered that there was a sufficient separation between the two sites at that time. There has been no change in circumstances since the Draft Plan, and so we consider that any concern relating to the separation distances between these two sites is totally without foundation.

2.14 Both at the Draft and Submission Plan stages of the Local Plan the Gosden Hill Farm site has been proposed for a mix of uses, including 2,000 homes; employment uses; education; local retail centre; community and health services; park and ride; and travellers pitches. The Submission Version (page 180) also proposes that part of the site, adjacent to the A3, will need to remain ‘open’ as a ‘green buffer’, in order to ensure that sufficient separation is maintained between the site and Send Marsh. In the Draft Submission Version (April 2016), both of these sites were being proposed for development, and there was no reference to any concern over the proximity of these two sites. There can therefore be no justification for the statement in the Supplementary Information Sheet in May 2016 that there is a need for ‘greater separation’, and to delete the Land around Burnt Common Warehouse in favour of the Garlick’s Arch site.

2.15 The Green Belt and Countryside Study, a major ‘evidence base’ document for this Plan, also confirmed that there are no concerns over the proximity of these two sites from a ‘separation of settlements’ aspect. Volume 2 (February 2013) and Volume 2 Appendix (April 2014) both identify Gosden Farm/Nuthill Farm as a Potential Development Area (Land Parcels C1 and C2), as well as Land around Burnt Common Warehouse (Land Parcel B13).

2.16 To reinforce our submission that this Green Belt Study did not express any concerns regarding the proximity of these two sites, the Environmental Capacity Analysis of the Land at Burnt Common Site (B13) (Volume 3), confirms that this site is a Potential Development Area, and is:--“Surrounded by defensible boundaries including treebelts following London Road and Clandon Road to the north and east, tree cover following the A3 to the south, and hedgerows near the commercial area to the east of the PDA.”This underlines that the Land at Burnt Common is a well screened self-contained site, and that there is no ‘evidence-base’ justification for removing this site from the Submission Plan on the grounds of needing greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, Merrow Lane, Guildford (Policy A25). **Reason 3: The Site provides the employment floorspace needed in the plan to help meet identified needs.**

2.17 The Land at Burnt Common, unlike the Garlick’s Arch site, is already an identified employment site. The Draft Plan states:--“The site contains and surrounds an existing site of three warehouses. Within the site land to the west of the existing warehouses is suitable for new employment uses (B1c, B2 and B8)”It also makes reference to the fact that the whole site has potential for new employment uses. It is also significant that the western part already contains the Ewbank’s Auction Rooms and related car parking area. This is therefore an obvious site to retain in the Plan for employment purposes, and no reason is given in the Supplementary Information Sheet for deleting this employment site.

2.18 There will also be a significant adverse impact on the residents of Burnt Common and Send Marsh if the employment allocation is at Garlick’s Arch. All the employment traffic will need to use the existing roads, including the B2215 east of the Burnt Common roundabout, and also through the villages, as there will be no direct access off the A3 from the proposed new A3 junction. No such adverse impact would result from new employment of the Land at Burnt Common, as vehicular accesses already exist from the B2215 London Road.
2.19 It is significant that in allocating the Land at Burnt Common for employment, no concerns were expressed relating to the access arrangements or traffic generation from the site. Therefore there is no reason why this proposed allocation for employment should be removed from the Plan. On the contrary, this decision will inevitably result in a significant adverse impact on the villages in Burnt Common and Send Marsh.

2.20 As has been referred to, the Land at Burnt Common is already an established employment site, with significant buildings and related car parking within the site, well screened from the wider landscape. The Garlick’s Arch site, in contrast, is a totally greenfield site, with no existing employment, and is also prominent in the landscape. It is therefore bad planning to introduce new employment development on this land, when there is an obvious alternative on Land at Burnt Common, which has significant existing employment uses; has substantial built development; and is well screened.

2.21 The Submission Plan confirms the importance of a healthy economy, and that it is essential to provide new employment land of the right type, in the right places, and at the right time. The Land at Burnt Common fulfils all of these aims, and would provide land in the short term, unlike Garlick’s Arch, which would require significant infrastructure works before the employment land would be available. The proposed new slip-road onto the A3 would not be delivered until the period 2021 and 2027, as stated in Appendix C of the Submission Plan (Infrastructure Schedule – References SRN9 and SRN10; A3 northbound and southbound off slips at A247 Clandon Road). The employment land at Garlick’s Arch will not be developed in the first 10 years of this Plan. Whereas the Land at Burnt Common could be developed immediately.

2.22 The Guildford Borough Employment Land Needs Assessment (September 2015) concludes that there could be a need of up to 47,000 square metres of office/research and development floorspace, and 5.3 hectares of industrial/storage land, and that this should be provided through the Plan period 2015 to 2033. The Land at Burnt Common would provide flexibility to provide new employment throughout this period; especially at the early stages. Garlick’s Arch, in contrast, would only be able to provide employment land from the mid 2020’s, and is therefore less able to provide the employment delivery required throughout the period of the Plan.

2.23 In selecting new employment sites in this Plan process, up until May 2016 “Land around Burnt Common Warehouse” has consistently been included. It was in the Draft Plan – Policy 13/Site 74 (2014), and in the Draft Pre-Submission Plan – Policy E1 and Site A43 (April 2016). These plans confirm that the site is suitable for employment development B1c, B2 and B8, either the whole of this site, or in part with the remainder being allocated for housing.

2.24 Even in April 2016, the Executive Report to the Council’s Executive Meeting on 11 May 2016 stated that the Land around Burnt Common Warehouse Send was the only suitable and deliverable employment site that could meet the need for a new employment site. It stated in paragraph 4.19:-“Our Employment Land Needs Assessment identifies a need for industrial Land and this site is the only suitable and deliverable site identified by the Green Belt and Countryside Study that could meet this need”.

2.25 Despite this support for the Land around Burnt Common Warehouse for new employment in April 2016, no mention whatsoever is made of this site in the Council’s Employment Topic Paper June 2016, the ‘evidence base’ for employment allocations despite the consistent support for this site throughout the Plan making process. Instead, there is only a reference to Land at Garlick’s Arch for 7,000 square metres of a mix of light industrial (B1(c)), general industrial (B2), and storage and distribution (B8). We submit that this site selection is contrary to the Council’s own site selection process for new employment sites up to April 2016, and as such is a ‘flawed’ allocation, and should be deleted, and the employment allocation on Land around Burnt Common Warehouse should be re-instated. Reason 4: The site has additional capacity for residential development and can provide these homes in the early period of the plan, assisting with meeting the backlog accrued as early as possible in the plan period.

2.26 The Draft Proposed Submission Local Plan (April 2016) proposed 100 homes on Land around Burnt Common Warehouses as well as the proposed new employment. This proposed allocation was made in accordance with the significant evidence-base in site selection for Potential Development Areas in the Guildford Borough Green Belt and Countryside Study.

2.27 The reason for the proposed change from allocating this site to proposing to allocate 400 new homes on Land at Garlick’s Arch, is not drawn from the ‘evidence base’, and is therefore flawed. It is not identified in the Green.
Belt and Countryside Study as a Potential Development Area when assessing the Land around Send Marsh/Burnt Common for potential development.

2.28 Our concern over this change in allocation not only relates to the lack of an “evidence base” to support the proposed allocation, but also the proposed scale of new housing in relation to the size of Send Marsh/Burnt Common. The proposed development of 400 new homes at Garlick’s Arch would be totally out of scale with the existing community, and would result in a population increase in the order of 1000 new residents. This would increase the existing population of Send Marsh and Burnt Common, which is currently 1,931 by approximately 50% (Green Belt and Countryside Study Volume 5 “Send Marsh and Burnt Common – Major Village Expansion”). This would not only be out of scale with the existing community, but would also place unacceptable pressure on existing facilities and services, such as the local primary school; nursery; and medical centre.

2.29 Serious concerns over the proposed scale of new housing which would result from the development of 400 new homes at Garlick’s Arch were strongly expressed by local residents at the ‘Local Plan Awareness Meeting’ held at the Lancaster Hall, Send on 14 June 2016. Strong objections were expressed both on the location and the scale of the proposed new housing at Garlick’s Arch.

2.30 This proposed scale of new housing at Garlick’s Arch would also cause significant traffic congestion in Send Marsh/Burnt Common. Much of the new traffic would travel north through the village to Woking, along the A247. The present A247 junction at Old Working, immediately north of the village, is already over-capacity during the rush hour, with significant "tailbacks". This would be accentuated with this additional traffic, resulting in unacceptable traffic delays.

2.31 As well as the issue of "scale", The Council’s “evidence base” also concludes that the Garlick’s Arch site is less sustainable as a housing site than Land around Burnt Common Warehouse. This is set out clearly in Volume 5 of the Green Belt and Countryside Study (April 2014).

2.32 It is important to note that the only reason that Garlick’s Arch was considered for development (in Volume 5 of the Green Belt and Countryside Study) was that at that time a policy option being considered was to identify major village expansions “Potential Major Development Areas”. This policy option has not been incorporated into the Proposed Submission Local Plan, as Table 1 of the Plan only makes reference to “village extensions”, which is consistent with the allocation of Land around Burnt Common Warehouse.

2.33 In the consideration of the sustainability of both the Land around Burnt Common Warehouse and Garlick’s Arch, the sustainability ranking for Land around Burnt Common Warehouse was higher than the Garlick’s Arch site. The higher ranking of Land around Burnt Common related to:-

- walking distance to nearest primary school
- walking distances to the nearest local centre/village shop/post office
- walking distance to nearest healthcare facility
- walking distance to nearest railway station
- average walking distance to nearest recreation facility
- walking distance to the nearest Accessible Natural and Semi-Natural Greenspace walking distance to the nearest community/village hall

2.34 As well as Garlick’s Arch not being as sustainable a site as Land around Burnt Common Warehouse, it also has significant environmental constraints. It contains three substantial areas of Ancient Woodland, including Garlick’s Arch Copse in the northern and western parts of the site, and Oldlands Copse on the eastern part of the site. Development on this site will inevitably increase the risk of these important areas of woodland being adversely affected.

2.35 Garlick’s Arch site is also prominent in the landscape. The land is currently farmland, and slopes away to the south, and as such is very exposed to long distant views and also from the A3 which borders the southern boundary of the site. In contrast, the Land around Burnt Common Warehouse is contained in the landscape, with strong natural boundaries, and is also a site which already contains significant development, including warehouses, offices, the Ewbank Auction Rooms, and related car parking and infrastructure.
2.36 The central part of the Garlick’s Arch site is also designated as a flood risk area, and totally unsuitable for built development, either housing or employment. The whole site is therefore unsuitable to allocate for housing and employment, as it has the obvious characteristics of the countryside, including agriculture, characteristics which are clearly identified in the Environmental Capacity Study (Volume 3 of the Guildford Borough Green Belt and Countryside Study – Section 10 and 11). In contrast, the development of the Land around Burnt Common Warehouse would not result in the loss of any good agricultural land, and has capacity to accommodate new development, including employment and housing, as is identified as such in the Green Belt Study.

2.37 In the light of all this evidence, we submit that no justification has been given to replace the proposed housing at Land around Burnt Common Warehouse with Land at Garlick’s Arch. There is no necessity to create new slip-lanes onto the A3, as the Land around Burnt Common Warehouse is more than capable of being developed for housing and employment using the existing road infrastructure. In contrast, the proposed new slip-lanes would inevitably and unnecessarily generate more traffic in Burnt Common/Send Marsh, as the Borough Council state that these new slip roads would be used by existing (and future) users of the Ockham interchange. This level of traffic will therefore increase significantly, due to the increased traffic generated by proposed new development along the A3 especially the proposed development at the former Wisley airfield site.

2.38 We therefore submit that the Garlick’s Arch site should be deleted, and the Land around Burnt Common Warehouse be reinstated. It is not only a more sustainable site more in scale with the existing village, but the whole site has the flexibility to either be developed for a mix of housing and employment, or alternatively to be developed for employment in its entirety. This was put forward in the Draft Version of the Proposed Submission Local Plan in April 2016, and should be reinstated in the Plan, and the Garlick’s Arch site deleted in its entirety.

Strategic Policies

3.1 We support the stated need to provide some of the housing requirement in the Borough as Village Extensions. However, any housing allocation needs to be proportionate to the size of the village. We submit that the proposal to allocate 400 new homes at Garlick’s Arch is disproportionate in scale to the existing village, and will increase the population by approximately 50%. It should therefore be deleted, and the housing allocation of 100 new homes on Land around Burnt Common Warehouse be reinstated.

3.2 We support Policy S2 which proposes between 4.7 and 5.3 hectares of industrial employment land (B1(c), B2 and B8). We submit that Land around Burnt Common Warehouse is the most suitable location for such uses, a view consistent with the Borough Council’s own view up to May 2016. We object to the proposed employment at Garlick’s Arch, and submit that the significant “evidence base” which has been published by the Borough Council does not support this proposed allocation, and is therefore “unsound”.

Protecting Policies

3.3 We support the identification of settlement boundaries for those villages that are of a scale and form that enable a boundary to be established with a degree of certainty (para 4.3.25). However, any proposed village extensions, such as at Send Marsh/Burnt Common, should be proportionate in scale with the existing village. We object to the proposed Garlick’s Arch extension of Send Marsh/Burnt Common as it is not only a site which is not supported for development on the Plan’s evidence base, but also is out of scale with the size of the existing village, and would almost double the existing population.

Employment Policies

3.4 We support the proposed requirement for additional land (B1c, B2 and B8) of between 4.7 hectares and 5.3 hectares. We further support the statement in the Policy that there is a need to ensure that there is an adequate supply of employment land over the Plan period.

3.5 We object to the deletion of Land around Burnt Common Warehouse, Send Marsh/Burnt Common as a new Strategic Employment Site, and its replacement by land at Garlick’s Arch. The land at Garlick’s Arch is not supported by any “evidence-base” documentation. In addition, this site is dependent on the construction of the newly proposed north facing slip roads to/from the A3 at Send Marsh/Burnt Common. We propose that the wording in the Draft Proposed Submission Local Plan (April 2016) in Policy E1 be reinstated to read: “When developed, the new employment site on land around Burnt Common Warehouse, London Road, Send, will be treated as a Strategic Employment Site.”
would then make this plan ‘sound’, as the allocation of this site would be consistent with the Council’s “evidence-base,” and with the statement in the Executive Report to the Council’s Executive Meeting on 11 May 2016 on the Land around Burnt Common that: “this site is the only suitable and deliverable site identified by the Green Belt and Countryside Study that could meet this need.”

3.6 We object to Site Allocation A43 “Land at Garlick’s Arch, Send Marsh/Burnt Common for 400 homes (C3) and employment floorspace (B1c, B2 and B8). The reasons why this proposed allocation is not ‘sound’ is fully set out in Section 3 of this submission. It is not supported by the Council’s extensive “evidence-base”, and should therefore be deleted.

3.7 This Site Allocation should be replaced by Land around Burnt Common Warehouse, London Road, Send, and included as Policy A43 in the Draft Proposed Submission Version of the Local Plan April 2016. In addition, as the site has the flexibility of being able to accommodate employment uses on the whole site, the wording in the policy should be amended to read “at least 7,000 square metres of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8)”.

4. Recommendations

4.1 We propose that the following changes be made to the Proposed Submission Local Plan to make it sound:-

Policy A43

Delete Land at Garlick’s Arch, and replace with the following:-

POLICY A43: Land around Burnt Common Warehouse, London Road, Send

Allocation

The site is allocated for approximately 100 homes (C3) and at least 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8)

Requirements

- The new homes are to be provided on the eastern part of the site (east of the existing B8 use), with an appropriate green buffer between the residential use and employment uses.
- Light industrial (B1c) will be located towards the residential area, with general industrial (B2) and storage and distribution (B8) located on the western side of the site

Description

Location Village
Ward Send
Ownership Private
Area (size) 13.4 ha
Existing use Pastoral farmland and storage and distribution (B8)
LAA reference Site 152
Key considerations Location of employment uses and housing within the site Appropriate green buffer between residential and employment uses
Delete the text in this policy which states:-

“When developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common, will be treated as a Strategic Employment Site”.

And replace with:-

“When developed, the new employment site on Land around Burnt Common Warehouse, London Road, Send, will be treated as a Strategic Employment Site”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

14. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.
It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly object re Policy A43 – Land at Garlick’s Arch, Burnt Common and Policy A43a re land for new north facing slip roads to/from A3 at Send Marsh/Burnt Common

1. I object to the late inclusion of this very large development. Does it not require full consultation under Regulation 18.
2. Where is the proof that this amount of industrial space is required, based on the ELNA 2015 and surely Slyfield is a better and already established site.
3. I ask for a re-examination of the real Housing needs and treatment of foreign students in the numbers.
4. I very strongly object to the removal of Send from the Green Belt (Policy P2)
5. I believe that all the local services will be placed under unsustainable strain.
6. The increased traffic flow will severely affect existing residents in terms of volumes, congestion, noise, emissions and change of life of a modest village. Does the standard of life of existing ratepayers not count?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council may have been influenced by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sqm of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to make the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream that runs through the site is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that could be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which is protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour, no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north but the addition will draw in a huge amount of ‘through’ traffic.
The route from London/M25 to Woking would be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 would go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial
(B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
## POLICY A43 - Proposed development at Garlicks Arch

I object to the proposed development for the following reasons:

- This area is Green Belt land. Government guidelines state that this should only be built on in exceptional circumstances. An exceptional need for this huge proposed development has not been demonstrated.
- The location is completely unsuitable for a development of any size, as no transport infrastructure exists apart from the local roads, which are already up to capacity. All that would result would be gridlock from the huge number of additional cars caused by a new development, as well as the increase in danger to local children and families from the extra vehicles and resulting increase in air pollution.
- Local schools and medical services are already oversubscribed. A new development would further exacerbate the traffic problems as people are forced to travel further afield to access these and other services.
- Electrical, telecoms and sewerage infrastructure in this area are not capable of supporting a development of this size.
- The ancient wooded area that would be destroyed is important and extensive, and irreplaceable flora and fauna would be wiped out.

To summarise: a development of any scale in this location is completely inappropriate, and would serve only to produce homes that would make no contribution to the community, as it would worsen the quality of life for all concerned.

I object to this development and ask that the application be rejected.

### What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Attached documents:**

---

## I object to the Policy A43 change for the following reasons:

- No ‘exceptional circumstances’ to justify this use of Green Belt land exist
- It ignores the thousands of previous objections already made by local residents
- The site is ancient woodland from the time of Queen Elizabeth 1 and cannot be replaced
- The development would effectively join up the villages of Send and Ripley, defeating the very purpose of Green Belt land
- It is currently a Zone 2 Flood area and development will make matters considerably worse
- It will generate massive amounts of additional traffic that the local road network simply cannot cope with

### What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Attached documents:**
We object to Policy A43 for land at Garlick’s Arch as it will increase traffic congestion on the A3 and A247, both of which are susceptible to gridlock at the slightest incident. It is also on ancient woodland, has no proven demand for development of this type.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to building 7000 square metres of industrial space and 400 houses at Garlick's Arch, opposite Send Marsh Road (A43).

The industrial space is not needed and should be either located at the Burnt Common site, that should be restored to its brown-field status, or to the excellent facilities at Slyfield. The housing requirements for Guildford have been grossly exaggerated and not openly disclosed. There are numerous brownfield sites that should be used for future development. Only when these sites have been exhausted should alternative sites be considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The next objections are for policy A43 and A43a,

I object to the use of Green Belt land to build 400 houses and some industrial/storage space at Garlick’s Arch. Send would cease to be a village and become a suburb of Guildford.

I object to the creation of new slip roads into the main traffic areas. This would create more chaos to areas already grid-locked at peak travel times.

No need/or surveys to support this statement ... Just try being trapped on these main roads for hours in the blazing heat orfreezing cold as already happens!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: pslp172/2739  Respondent: 11097729 / Sheila Brown  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 chan2e at Garlick's Arch, Send Marsh, Send, because
• it ignores all the thousands of previous objections made by local people to the housing,
• there is no proven demand for Travelling Show-people plots in this location.
• it is part of the Green Belt and no "exceptional circumstances" exist
• This could result in more traffic to cause mayhem on the local roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2938  Respondent: 11098241 / Sammy Chalk  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7081  Respondent: 11098369 / Neil & Nicki Covington  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

WE OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43) Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of
Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016. Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site. National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4). This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A43 Garlick’s Arch. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. There is a danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached. I object to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of
people; none of them want to leave their premises. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads. Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces. Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems. With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. I object to the lack of proper infrastructure planning for sites (Policy 11) which requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways. Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services. I object on the grounds of the congestion that development will cause to the trunk roads, A3/M25 (Policy 12). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the Garlick’s Arch site (A43) because it will further increase traffic on the A247. The site should not be promoted as a distribution hub.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the building of 400 houses and 7000 sq metres of industrial space at Garlick's Arch opposite Send Marsh Road. I feel it would impact on nature in the woodland. Again the road infrastructure and increased volume of traffic would not be acceptable and the impact on local services, which are struggling to cope as it is, would be unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I OBJECT to the sustainable employment policy (Policy E1)
If developed, the new employment site at Garlick’s Arch, Send Marsh/ Burnt Common (A43), would be treated as a Strategic Employment Site. The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

1. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7079 Respondent: 11150913 / Sarah Marshall Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.
It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/7481  Respondent: 11151009 / Maggie Smith  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposal to develop land at Garlick’s Arch (Policy A43). The proposed development of industrial and commercial sites would significantly increase the volume of traffic through Send Village to and from the Waking area and beyond. Send Road already carries a high volume of traffic heading to and from the A3 and M25 which causes serious congestion at peak times in particular. The road infrastructure in the village simply could not sustain a further significant increase in traffic.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Following the last consultation on the draft local plan for Send, the plan was adjusted and we were informed that there would not be further development to the plan. I trusted that this would be the case. The late amendment to the plan came as a dreadful shock. Guildford B.C. have not followed correct process. Since 2014 GBC. has changed every major site in Send proposed for development and has now added a massive new road junction. I object. I object to the proposed housing development at Garlick's Arch and I object to the proposed large industrial site, for the following reasons:

1. Potential flooding which would impact seriously on Send Marsh. I understand that this is a distinct possibility.
   1. Traffic congestion on this already very busy area. The traffic generated by a large industrial site would make life intolerable. The amount of traffic on the Portsmouth Road already makes it extremely difficult for the elderly and disabled to cross the road other than at the crossing in Ripley Village.
   1. Lack of infrastructure to support additional needs for education and medical services of the large number of new residents.
   1. Poor public transport services which obliges residents to travel by car.
   1. Garlick’s Arch is home to ancient and irreplaceable woodland.

I object to the proposed enormous housing development at Wisley. If this plan was previously rejected by Guildford Council, why is this proposal now considered viable? What has changed?

I object that there is no proposal to provide access to the A3 for the the development which would seriously impact on Ripley and Send, where traffic is busy at all times and subject to gridlock at critical times of the day.

I object at the sudden proposal to remove Ripley, Send, Clandon and other villages from the greenbelt. The open fields are the lungs of the district, in addition, they do much to ease potential flooding. A most casual glance at the surface water which spreads across the area after rainfall would alert one to the risk of flooding.

The villages provide a buffer between Guildford and Woking, and will become urbanised without the infrastructure and resources needed for support.

What is the purpose of consultation? Consultation is offered, due response is made, draft plans amended, then new and more extensive proposals are offered for consultation. This time there is a short period allowed for consideration of a weighty document which is accessible only with difficulty, by the unprofessional reader who would be affected. I object.

I further object to the disproportionate development concentrated in one area of the borough.

Please reply to this letter and ensure that it is put before the Inspector.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location and [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist and financial back-handers to the council from the developers does not equate to “exceptional circumstances”
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

Land at Garlicks Arch, Send Marsh Policy A.43, **Now 400 homes and 6 Travelling Showpeople plots**, I object to Policy A.43 because It will cause over-development of our village and the number of homes is excessive. It will join up Ripley and Send and defeat the key purpose of Green Belt which is to protect natural or semi natural environments, protect unique character of rural communities that might be absorbed by expanding suburbs. It is beautiful permanent Green Belt and no “exceptional circumstances” exist, with beautiful bluebell woods, this ancient woodland that existed at the time of Queen Elizabeth I. It is subject to frequent flooding. I object because I do not believe there is a proven demand for Travelling Showpeople plots in this location. It ignores all the thousands of previous objections made by local people. I especially object because of the pressure on the local infrastructure, on our village services and the excessive traffic that will gridlock the already busy roads of Ripley and Send.

I object – The proposal at Garlick’s Arch was a surprise additional site, included only 13 days before the Borough Council met to recommend consultation? The original site at Burnt Common was for only 100 houses, this new development would have 400 houses plus industrial facilities! I have already pointed out that the roads are congested in Send so how will they copy with even more traffic from such a large development.

The new Send Primary School I understand is already to capacity and the Villages Medical Centre currently cannot take on any more patients so where is the proposed infrastructure for these proposals?

As stated before this is Green Belt land with ancient woodland and should be protected.

**POLICY A43 Land at Garlicks Arch, Send Marsh**

I object – My previous objections to the building on this Green Belt site as stated in my 2016 response are still relevant. The addition of 8 Travelling Show People plots are a concern to me as surely they have very large vehicles and this site will be unsuitable for them due to poor access from the very narrow lanes, Kiln Lane and Burnt Common Lane? Would they want to be located in the middle of a housing estate with 400 houses and is there a proven demand for these plots?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

b. Garlic's Arch and Burnt Common Interchange (site nos. A43 and A43a)

1. **Outside current development boundary:** I OBJECT since this development lies outside the existing housing outline of the village, and should therefore be deleted to avoid both loss of green belt land and creeping development between Send, Woking, and Guildford.

2. **Traffic Infrastructure Capacity:** I OBJECT to the proposed new interchange onto the A3 at Burnt Common since this would generate significant new traffic movements that surrounding roads cannot accommodate.

3. **Traffic Infrastructure Evidence:** I further OBJECT to the proposed new interchange onto the A3 at Burnt Common since associated transport evidence is incomplete and does not justify additional A3 access at this location.

4. **General Infrastructure:** I OBJECT to development at Garlick’s Arch for 400 houses as there is insufficient infrastructure to support the development, including utilities, social amenities, schooling, public transport, and medical facilities.

5. **Industrial use:** I OBJECT to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is not a sustainable development. It is removed from the major population centres in Guildford and Woking necessitating a large increase in public transport services and/or major additional traffic movements for staff travel and business logistics. If there is a need for 7,000 sq m of industrial space within the Borough it should be located at Slyfield where there is a 40ha site available and where it would be largely welcomed.

6. **Flooding:** I OBJECT to development at Garlick’s Arch. This area is classified by the Environment Agency as being in a higher flood risk area than the Council’s own assessment and has flooded many times in recent years. Therefore the Council’s own assessment is invalid and the site must not be developed.

7. **Environment:** I OBJECT to the destruction of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

This site was not given the consultation required.

It was added in an underhand manor and slipped in at the last minute to 'hide it' from local people and there right to comment. The borough councillor's from the Guildford Green Belt Group and Lovelace where treated in a terrible manor due to their rightful objections at the meeting held a week ago and I feel an apology should be given at the least. A full consultation under regulation 18 should be applied as it was only put in last minute, not the cheeky undemocratic regulation 19.
I will also send this to the local planning consultation/ GBC millmead and I shall be completing the questionnaire on the website.

I object to the proposal to build 400 houses and 7000sqm of industrial space at Garlick’s Arch.

This site was not included in the Regulation 18 Draft Local Plan so has not had full consultation. The manor in which it has been slipped into the Plan is underhand and unfair. The site is subject to flooding and is covered by ancient woodland. The Industrial space is not needed here and any extra space required should be included in the existing industrial site of Slyfidd. The projected housing figures I understand to have been exaggerated, so there is no need for this number of houses to be built in and around Send.

I object to the changes in Policy A43, Garlick's Arch, Send Marsh because now in addition to the 400 homes, which now includes self build and custom plots, the proposal also includes 8 travelling/showpeople pitches where there is no proven demand for plots in this location. It is clearly over development of a village and potentially will join up Send Marsh, Burnt Common and Ripley. At the moment these areas are distinctly separate with great space between each area but this large development will change this. Again, it is on Green Belt land which incorporates an ancient woodland, all of which will be destroy The land is subject to flooding and the new development will generate a lot more traffic which the existing local roads cannot deal with.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2873  Respondent: 15062625 / Stephen Groves  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the building of 7000sq metres of industrial space and 400 houses at Garlick’s Arch opposite Send Marsh Road. The site floods regularly and is covered by ancient woodland, up to 500 years old, which is home to a variety of wildlife. The industrial space is not required and the additional heavy loads of commercial traffic will need to pass through Ripley village in order to gain access to the A3 and M25. There is already provision for commercial space at Slyfield industrial estate and this should be fully developed before additional sites within Green Belt locations are used. With regards to the 400 houses at Garlick’s arch, the currently existing brownfield sites within Guildford and its surrounding areas should be fully utilised before any housing is agreed within Green Field sites. Guildford has refused to share the methodology behind calculating the upcoming housing requirements and therefore no weight should be given to the use of these calculations when planning additional housing capacity.

I further OBJECT to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I further OBJECT to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 change at Garlick's Arch because the site floods regularly (designated as flood zone 2) and is covered by ancient woodland, up to 500 years old, which is home to a variety of wildlife. The currently existing brownfield sites within Guildford and its surrounding areas should be fully utilised before any housing is agreed within Green Field sites. There is no proven demand for traveller sites in the location and the addition of 400 houses in a small area defies all previous objections to this proposal and is a total over-development of the village. It will essentially create a "super-village" by which Ripley and Send are amalgamated in to one and the increase in volume of traffic within the
small roads and lanes around the villages will not be able to cope. There are no proposals around the increase in additional services, such as schools, doctors, shops or road improvements for the local village.

Policy A43, Land at Garlick's Arch.

This block of land includes ancient woodland and should remain in the Green Belt.

Another 400 homes is far too many for this site and will cause excessive traffic to the local roads.

There is no proven demand for plots for Travelling Showpeople in this area.

There are insufficient schools and facilities to cope with such a large increase in the local population.

I am responding to the proposal at the above location.

I object to the above proposal on the following 3 grounds:

1) I object to Send being removed from the Green Belt. All three of the proposals including the land behind the school and adjacent woodland will affect this.

2) I object to the proposed development at Garlick's Arch. This is a new site and was a late addition to the Regulation 18 draft. The extra traffic has not been mentioned and would be far too much for the site.

3) I object on the grounds that GBC have not followed the correct procedure. Full consultation will not be permitted under the short cut Reg. 19 which GBC are trying to implement. The" last minute" attitude to this proposal should not be permitted.

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |
| Policy A 43 Over 400 houses would need an impact assessment on local services ie GP, hospital and schools. There is no need for industrial land at Garlick’s Arch, this should be allocated to Slyfield. Further junctions added to the A3 would created traffic chaos in Send – there is already gridlock daily at rushhour. Destruction of ancient woodland (possibly with bat population) would cause runoff down the hill to Send Marsh Road, creating a flood risk. |
| I would like my comments to be seen by the Inspector. |

| I strongly object to this proposal. The site has a particular conservation sensitivity as it is covered in ancient woodland dating from the 16th century. I believe there are bats in this location. There is no need for new houses on top of the |
13,860 already proposed for the borough. Building residential homes on this site is crazy. The noise from the A3 will be deafening for the residents. Homes will be very close to electricity pylons.

There will be an unacceptable increase in traffic on the already busy Portsmouth Rd. Send Rd will become gridlocked. The proposed industrial development of 7000 sq m is not required.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

I object strongly to the proposal. There will not be enough school places for the children of the residents of the proposed 400+ houses. The proposal will also put an unacceptable strain on the existing GP surgery where it is difficult enough to get appointments now.

Land at Garlick's Arch, Send Marsh, Policy A43. Now 400 homes and 6 Travelling Show people plots

I object to the Policy A43 change at Garlick's Arch because:

• It ignores all the thousands of previous objections made by local people
• There is no proven demand for Travelling Showpeople plots in this location
• It is beautiful permanent Green Belt and no "exceptional circumstances" exist
• It will cause over-development of our village and the number of homes is excessive
• It is exquisite ancient woodland that existed at the time of Elizabeth 1
• It will join up Ripley and Send and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over fifty years
• It will generate excessive traffic that will block up the local roads of Send and Ripley

I object to **Policy A43 change at Garlick’s Arch** because existing objections have been completely ignored and Guildford Borough Council are riding rough shod over the objections they have already received. This area is permanent Green Belt and no proposed study has been done as to why this is necessary. This area is ancient woodland going back to Tudor times and is, again, over-development of Send village. Why, oh why, is Send being penalised in this way? There has been no proper planning and seems to be a whim and a general desire to ruin and destroy the Green Belt and the village atmospheres of Send and Ripley. There will be no separate villages, just one sprawling conglomeration if this development takes place.

Again, all the roads surrounding Send and Ripley will be one big traffic jam every morning and evening and for a large part of the day.

Where is the proven demand for Travelling Showpeople plots in this location? What is the evidence for the need of Travelling Sites?

Policy A43.

I object to the development of the 30 ha of land at Garlick’s Arch. This refers to a completely new site added to the local plan and was not included in the Regulation 18 draft and has not been consulted upon. This land is Green Belt permanently protected by the NPPF that prevents the merging of settlements. There are no exceptional circumstances. In fact the site is covered in ancient woodland and there is no reason to build here as this would be in excess of the already proposed numbers for the Borough. The proposed industrial development would be better served by locating at Slyfield with other industrial units. In fact the company involved would prefer to be at Slyfield as it is more convenient for them. An increase in the junction at Burnt Common would increase substantially the traffic flow in the area, which, when there is a problem on the A3, gridlocks the local roads already. With easier access to and from the A3 this would increase the amount of traffic substantially on local roads, with M25 traffic using the A3/Send route to Woking, and include movement from any proposed housing at Wisley and Burpham if actually built.

( )

I object to **Policy A43**, which is ignoring the thousands of previous objections as well as adding travelling showpeople plots for which there is no proven demand. This is Green Belt land and there are no exceptional circumstances existing to warrant granting permission for this development on exquisite ancient woodland dating back at least to the 16th century. This development will also erode any division between the villages of Ripley and Send and defeats the key purpose of Green Belt. This land currently has a flood zone 2 allocation and therefore unsuitable for habitation, apart from the fact that the soil is contaminated by lead shot and will generate excessive traffic onto already heavily used local roads that are also already in an appalling condition.

I object re **Policy A43 - Land at Garlick’s Arch, Burnt Common**

and **Policy A43a re land for new north facing slip roads to/from A3 at Send Marsh/Burnt Common**

1. The 2014 proposal for 430 houses went down in April 2016 to 185 in the face of significant local opposition to disproportionately high proposed development in Send. The method of late inclusion of a new very substantial development is of great surprise. Should this not require a full consultation under Regulation 18?
2. Is Industrial space still actually required at Burnt Common since I understand the Employment Land Needs Assessment 2015 (ELNA) shows an 80% reduction in employment space need from the previous ELNA. In any event, a full case has been presented for such development at Slyfield which appears a superior choice.
3. I still have doubts about real Housing need numbers and ask you to re-examine the treatment of foreign students in the numbers.
4. I strongly **object to the removal of Send from the Green Belt (Policy P2)** and also building along the Portsmouth road and the A3 on the Land at Garlick’s Arch. It may not be of marked beauty but it provides a vital role as countryside rather than town and a “breathing space” break for residents and travellers. What are the exceptional reasons for taking it out of Green Belt?
5. I believe the infrastructure of Schools, Doctors, Shops will be unable to cope- have they been consulted? In addition the, recently reduced, bus service is minimal.
6. My major concern is about the huge impact of such a development on Burnt Common Roundabout and the Send Road, A247, which already has high use and peak hour queuing. The plan talks of “quality of life and environment” but the effect of future increased noise, emissions, crowding - all factors to adversely affect existing residents who chose to live here, as opposed to future projected through traffic users - does not seem to be taken into account. Road schemes to try to maintain the same throughput rate on higher volumes does not make life nicer for local residents but is purely an efficiency exercise.
7. If increased car usage from this housing development, with increased heavy commercial traffic from the industrial site, were then added to by developments at Wisley and also Burpham also wishing to use this roundabout and route, then an ugly local environment will have been created.
8. Needless to say, a new changed interchange on the A3 would introduce substantial volumes of changed traffic movement from the M25 and A3 and destroy this pleasant village.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We are writing to object to the proposed development at Garlicks Arch in Burnt Common policy A43. This proposal was added at very late notice after previously being assured by the council leader there would be no significant new changes to the DLP in Send. The use of regulation 19 further adds to the betrayal. This enormous new proposal must require a full consultation under regulation 19. The 2014 proposal for 430 houses was rightly reduced to 185 in April 2016. This late and hasty attempt to push through this plan increases the number to 485! A totally excessive and unneeded number based on inflated projections of population growth by GBC. The proposed light industrial units can easily be accommodated at Slyfield and the proposed 4 way junction to the A3 will cause traffic gridlock, noise and air pollution for local residents. All this without yet mentioning this 100 acre site is GREEN BELT (a word no longer found in the GBCs dictionary). With prime agricultural land, rare enough in Surrey, and ancient 16th century protected woodland within the boundary, this land must be saved. There is a brook running through the middle of the site essential for drainage and the area is prone to flooding already. The site prevents urban sprawl between Ripley and Send vitally important. The villages medical center already extremely busy and local schools cannot cope with the 25% population growth this plan will bring to our village. We have received emails from relevant ministers and Sir Paul Beresford stating government policy is to protect the Green Belt and listen to local residents in these matters. Why does GBC neither protect or listen to those it is elected to represent. Conservative Councillors ran for election on a protecting the Green Belt, not elected they stab us in the back.

I object to policy a43 Garlick's Arch;

once again, thousands of previous objections have been ignored and again there is no demand for so many houses or travelling show peoples plots at this location. This land is permanent green belt, and no exceptional circumstances exist for development. It is prime agricultural land and contains ancient woodland that has existed since Tudor times. Again, this area is prone to frequent flooding and contaminated by lead shots accumulated over 50 years. Living in Burnt Common Lane, we will be massively effected by this excessive development and planned new junction to the a3, massively increasing traffic in our area. Once again, this is green belt land that should not be built on, this will also join Send and Ripley into one continuous inhabited area, defeating the purpose of the green belt in separating our villages.

*Strongly object* to the above plan. This is so shocking in every words.

Council cynically pushed through this proposed plan at the last minute.

There is no justification to build 400 homes and some industrial space on this site.

This site has a particular conservation sensitivity since it is covered in ancient woodland.

This plan is new and was not included in the regulation 18 draft and has **NOT been consulted** upon previously.

Please find below my home address and I want my comments to be seen by the inspector.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

*I object to the extended development in the Green Belt (Policy P2, Site A43)*

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are **no exceptional circumstances** for this site being removed from the Green Belt, as required by the National Planning Policy.

*I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch*

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be **no** inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

*I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch*

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

I object to these proposed changes as the current proposition is for over thirteen thousand additional houses to be built in the borough of Guildford which is considered enough to meet current projected growth in this area. In addition, this site was not included in the original regulation 18 draft and has not previously been consulted on and it is green belt permanently protected by NPPF which aims to prevent the merging of settlements. This site is covered by ancient woodland is is of particular conservation interest. Also, the proposed industrial site development of 7000 sq m is simply not required. We have a recently built small office block on the Send road has just been converted to flats. This is an indication that further industrial buildings are not required in this area. Also, Send village already acts as a through road to Woking and any further building in this area would lead to gridlock and a reduction in life quality for the residents of this area.

Land at Garlik’s Arch, Send Marsh, Policy A43

I object to the Policy A43 change at Garlick’s Arch because:
• It ignores all the thousands of previous objections made by local people
• The is no proven demand for Travelling Showpeople plots in this location
• It is beautiful permanent Green Belt and no ‘exception circumstances’ exist
• It will cause overdevelopment of our village and the number of homes is excessive
• It is exquisite ancient woodland that existed at the time of Elizabeth 1
• It will join p Ripley and Send and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over 50 years
• It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
42.6 I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

42.7 I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

42.8 I object to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available.

42.9 I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

42.10 I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

42.11 I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

42.12 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

42.13 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

42.14 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

42.15 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

42.16 I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
42.17 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

42.18 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

42.19 Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

42.20 Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

4.21 I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

4.22 I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

4.23 I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

4.24 It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Document: | Proposed Submission Local Plan: strategy and sites 2017 / Policy A43 |
| Do you consider this section of the document; complies with the Duty to Cooperate? | ( ) | is Sound? | ( ) | is Legally Compliant? | ( ) |

1.1 I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

1.2 It ignores all the thousands of previous objections made by local people

1.3 There is no proven demand for travelling show people plots in this location
1.4 There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

1.5 The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

1.6 This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

1.7 The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

1.8 Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

1.9 The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

1.10 I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

1.11 I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

1.12 I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

1.13 I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

1.14 I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
1.15 Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

1.16 Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

1.17 With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

1.18 The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

1.19 I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

1.20 Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

1.21 Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

1.22 Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

1.23 I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1.24 I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

1.25 I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

1.26 It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We are writing to object to the proposed development at Garlicks Arch in Burnt Common policy A43. This proposal was added at very late notice after previously being assured by the council leader there would be no significant new changes to the DLP in Send. The use of regulation 19 further adds to the betrayal. This enormous new proposal must require a full consultation under regulation 19. The 2014 proposal for 430 houses was rightly reduced to 185 in April 2016. This late and hasty attempt to push through this plan increases the number to 485! A totally excessive and unneeded number based on inflated projections of population growth by GBC. The proposed light industrial units can easily be accommodated at Slyfield and the proposed 4 way junction to the A3 will cause traffic gridlock, noise and air pollution for local residents. All this without yet mentioning this 100 acre site is GREEN BELT (a word no longer found in the GBCs dictionary). With prime agricultural land, rare enough in Surrey, and ancient 16th century protected woodland within the boundary, this land must be saved. There is a brook running through the middle of the site essential for drainage and the area is prone to flooding already. The site prevents urban sprawl between Ripley and Send vitally important. The villages medical centre already extremely busy and local schools cannot cope with the 25% population growth this plan will bring to our village. We have received emails from relevant ministers and Sir Paul Beresford stating government policy is to protect the Green Belt and listen to local residents in these matters. Why does GBC neither protect or listen to those it is elected to represent. Conservative councillors ran for election on a protecting the Green Belt, now elected they stab us in the back.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I have been a Send Marsh resident for over 20 years and I am writing to object to the latest change made by Guildford Borough Council concerning the draft local plan for Send, in particular the designation of the Garlick's Arch site.

This objection is on grounds that not only is this site unsuitable for a number of reasons of which I will elaborate throughout the course of this email, but that the manner in which this last minute amendment to the local plan has been executed, which I do not believe has been carried out in a fair and transparent manner; considering the time-frame, the extent of the amendment and finally the lack of consultation with residents, Parish council and the necessary regulatory bodies concerned with proposed development.

Firstly I would like to bring your attention to the application 16/P/00783 on Oldlands Field Yard, a small area of the recently earmarked site for mass development on the Garlick's Arch site, of which there is a proposal for 9, two storey dwellings that was filed almost exactly a month (12th April) prior to this latest last minute amendment to the local draft plan on 11th May. This appears to be too much of a coincidence and exemplifies the seeming lack of transparency and stealth tactics employed by Guildford Borough Council and developers in seeking approval to develop part of the site in question, which would provide a 'foot in the door development' and platform to further develop the wider site and strengthen the case for the inclusion of the Garlick's Arch site within the draft local plan. Furthermore, there is evidence to support this possibly cynical view in the possibly over-comprehensive extent of accompanying reports to the 9 dwelling development, and the transport modelling being undertaken by Surrey County Council and Highways England, which would reveal that GBC have known about the change in site designation for the local plan and benefits afforded by the initial 9 dwelling development for some time. There has however been a lack of publicity and public consultation for both these cases, and the change in site designation in the amendment comes 8 working days prior to the full council meeting - surely unacceptable in view of the above and considering the extent of the change and impact of an additional 300 dwellings on both the villages of Send and Ripley. If not mandatory, surely there is a duty of care to notify the residents of these areas affected for even the site being included provisionally, despite the 6 week allotted public consultation period after the decision reached on 24th May.

The site in question is deemed to be medium sensitivity in terms of Greenbelt yet it is being considered for mass development when there are not only low sensitivity areas available in close proximity but a list of brownfield sites - arguably in more strategic locations with regards to the industrial designation of the site, available for re-use in for example, Slyfield, as per the 'previously developed site' report also published by GBC. In the mass development study and village expansion survey it evaluates that Ripley is unsuitable - how then can a development site of this scale be promoted in the local plan that will implicate Ripley for the very reasons that deemed it unsuitable! These sites cannot be
treated in isolation, and this site at Garlick's Arch straddles both parish council zones and will have wide-ranging implications for the residents and well-being of not only Ripley and Send, but also Clandon.

I object to the housing need assessment - It is forecast that the population of the Guildford borough is actually set to plateau and decrease (and any statistics contrary to this are surely inflated by the false counting of university students who do not reside past their degree period), so surely therefore there is no need to increase the 13,860 houses already proposed for the borough by 300 in this development, and certainly no local need in Send to expand the Village by 25%.

One of the reasons for the preservation of Greenbelt is preventing Urban sprawl and preventing the merging of towns and settlements - the site at Garlick's Arch, once fully developed would represent the single largest development in the area, not only in isolation but also if coupled by the Send Marsh Road/ Linden Way housing estate positioned opposite, only separated by the Portsmouth Road.

The site is not only Greenbelt land but also has 4.6 hectares of permanently protected ancient woodland which requires Forestry commission consultation and approval for any development in close proximity to in the first instance. Has the council considered this or given any thought to the implications the removal or damage to this woodland will have on not only the UK's ancient woodland stock but to the damage to local biodiversity and habitats of wildlife?

The impact of this site on congestion and road traffic is another element which seems to have been overlooked by GBC. Whilst there is assessed benefits by GBC in the 11th May amendment of an additional junction onto the A3, surely this is short-sighted considering the resulting increased congestion on not only the A3 from this but also on the surrounding local roads of which, during traffic gridlocks, will be used by road users to avoid the A3. In addition, as identified by GBC in a congestion and traffic strategy report published in 2014, the Wisley A3/M25 interchange is already a bottleneck for traffic congestion.

At a micro scale, The Portsmouth Road adjacent to the site and in particular the junction with Send Marsh road of which this new development is within 350 yards of, already experiences a high level of congestion and traffic

If we are to further assess the potential impact of this mass development in terms of education provision, it is already well known and publicised that this area of Surrey is well oversubscribed. The increase in 400 dwellings will not just place further strain on this system but will be untenable considering that during the period 2014/15, not only the schools within catchment area of this site but within a circa 15-20 mile radius, currently experience an average ratio of 2 applicants per place for both primary and secondary education.

These are pertinent points which require careful thought in relation to the sustainability of the Guildford Borough as a place for quality of life offer in the long term, in particular the areas of Ripley and Send. Mass development proposals in unsuitable locations and on unnecessary scales such as this cannot be justified.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the planning application A43 and A43a on two main grounds.

Firstly the amount of traffic: the excess of traffic caused by these developments, on what is already an overworked junction between Sendmarsh Road and the old Portsmouth Road into Ripley, will not only cause long delays for traffic at all times but will endanger to the public trying to cross the road or be picked up on the School run coaches.

Secondly the increase on our overstretched public services in the Send area: as a member of the Send Villages Medical Centre P.P.G I know that the Surgery is now overrun with it’s current Patient base. Send local Schools just can just about cope, so how can you justify extra houses and factory outlets without providing extra facilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Land at Garlick's Arch, Send Marsh, A43

I object to this policy because

There is no proven demand for Travelling Showpeople plots in this location

This is beautiful Green Belt countryside and there are no "exceptional circumstances" that should allow building on this land

It will join up Ripley and Send and defeat the purpose of the Green Belt

It is subject to frequent flooding

It will cause over development of our village and the number of homes is excessive

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. Under Policy A43 you are proposing an additional 400 houses and 7,000sqm of industrial/warehousing. I object to this on the following grounds; this site is new and was not included in the Reg 18 draft so has not been consulted on previously (see 1. above), the land is Green Belt and as such is permanently protected by the NPPF which prevents the merging of settlements, the 7,000sqm of industrial space is not required since the latest ELNA shows a reduction of 80% in required employment floor space since the previous draft plan and 485 new house would create additional demand on the local school which has not got the capacity to cope.

1. Under Policy A43 you are proposing a new interchange for the A3. I object to this on the grounds that this would create an unacceptable increase in volume of traffic coming onto the A247 and through Send. It would inevitably result in the junction becoming the chosen route for traffic coming from the south on the M25 wanting to access Woking and the village and roads could not cope with this increased volume.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Land at Garlick’s Arch, Send Marsh, Policy A43

I object to the change to Policy A43 because its ignores the thousands of objections made by local people. These changes will cause over development of the village and the number of homes is excessive. It will create a join between Ripley and Send which defeats the purpose of the Green Belt and there are no exceptional circumstances to justify the undermining of this beautiful and permanent Green Belt area which includes woodland dating back to Tudor times. This change will generate excessive traffic blocking up the local roads of Send and Ripley. There is also no proven demand for the Travelling Show people plots proposed for this location.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

With regards to the development of Garlicks Arch and the destruction of open countryside to facilitate even more housing and industrial premises I object to what is clearly madness on the part of GBC.

Send and Old Woking already are subjected to ever growing levels of traffic and to develop this area along with the provision of a 4 way slip for the A3 will compound this. There is brown site land available in current industrial locations such as Slyfield to satisfy the councils desired development.

Object to the 2016 Draft for Building Houses in Garlicks Arch Ripley mainly as I live around that area and it will have a negative impact on traffic going through and getting held up on Burnt Common Lane.

I like to walk my dogs around there. It is lovely to have our green belt and the wildlife needs to feel safe and able to remain there.

I Object to all Erosion of the green belt which would include Clandon building of houses and Send and Burpham, Ripley, Wisley. The negative effect it will have on car pollution and green peace and devastating traffic chaos across the region.

I object to the removal of any villages such as Send, Clandon, Ripley, Wisley. These are my key areas which I feel strongly about and adore the walks around the countryside with my two dogs.

I object to the limited consultation Period of all of this going ahead

I object to the houses being built in Send, Wisley, Ripley, Burpham, Clandon with no or little evidence for the alleged housing need numbers.

I object to the lack of immediate provision for new schools. if we remain the same then there will not be a huge demand on NHS or Schooling needs.

I object to the lack of any immediate provision for doctors surgeries in Send or Ripley area.

I object to Garlicks Arch and the new roundabout system that will be developed to handle all the traffic, the Ripley Bypass already struggles when the M25 gets blocked, so this would be ridiculous and not work.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Object to the 2016 draft for building houses in Wisley, Clandon and Send.

I live just across from Garlicks arch and I go to London from Clandon Station

At this minute in time these areas cant hold so much traffic and it is not sustainable to allow all the opposed housing to go ahead.

The Ramp for the A3 will have dramatic implications.

I object to the Erosion of all Green belt in the areas of Garlick Arch, Wisley, Clandon, and Send

I object to Limited Consultation Period

My daughter will be going to Clandon School and I object to the number of houses being built.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/359  Respondent: 15102049 / Malcolm Holland  Agent:
I object to Policy A43 because
1. ignores previous objections
2. it is permanent green belt
3. total over development of already developed village
4. ancient woodland that should be persevered
5. joins two villages and defeats green belt purpose
6. more flooding
7. contaminated with lead shot
8. extra traffic for which local road not built for

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/86  Respondent: 15102209 / Martin Manktelow  Agent: 

Policy A43 This particular site is set partly on farmed land and part in ancient woodland which is used for many country pursuits such as shooting, clay pigeon shooting and dog walking.

The land abuts the East Clandon Stream which floods most winters. The land is bordered on one side by the A3 and this very busy road would not make a good neighbour. The proposal is to place 400 houses on one part of the land and a range of industrial buildings to be placed on the rest. Furthermore, with so many buildings being added the run off the land onto the stream will be aggravated. I understand that the site is built on London Clay. This means that every time there is the potential for the stream to raise, the land floods. In addition the trees that are being removed will also exacerbate the problem. The copse is home to and regular visiting place for deer, foxes, owls, bats rabbits, hares not to mention a carpet of bluebells in spring

The wooded part of this land contains ancient oaks. Many of these oaks are hundreds of years old. The land is bordered on other sides by Klhn Lane and Burnt Common Lane, both are narrow residential lanes and totally unsuitable for large amounts of traffic. Both lanes exit onto the B2215 Portsmouth Road. This road is a feeder road to the A3 and M25 which is heavily congested both night and morning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/1389  Respondent: 15102497 / Alison Parrott  Agent: 
I object to the above as the number of homes is excessive and will cause over development of the village, doing away with the space between Ripley and Send. There is no demand for traveller sites here and will tear up beautiful and ancient woodland, which cannot be replaced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/92  Respondent: 15103873 / Paul Johnston  Agent:

I am emailing you to say that I strongly object to Policy A43 and A43a.

As a resident in Burntcommon I feel that these would be disastrous to the local area. In addition to destroying a beautiful green belt area it would bring significantly increased traffic volumes to an already stretched local road network.

In my view Policy A43a is absolute insanity and would significantly impact the traffic volume past my house and through the village of Send to an untenable level. If a traffic assessment report has been completed showing the predicted impact on the local road network I would be grateful if you could send it to me.

Please ensure that my comments are seen by the Planning Inspector

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/104  Respondent: 15106593 / Louise Clark  Agent:

I am writing to object to the proposed planning at Garlicks Arch for the building of houses. This is an unspoilt wildlife area with horses, deer, rabbits etc, streams and an allotment area.

It would create an enormous amount of traffic, therefore blocking roads and transforming this peaceful village. Please do not let this go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6567  Respondent: 15106593 / Louise Clark  Agent:
I object to building 400 houses and 7000 sq metres of industrial space at Garlicks Arch. The site is ancient woodland with many wild animals, including bats, deer, red kites, badgers, pheasants. The site would not make a clean environment for residents with ever-growing pollution from the already over-used A3. It is covered by electrical pylons and cables.

The A3 is already choked most of the day with traffic approaching the M25 and in the evening around the A3 Guildford bypass. The local infrastructure cannot support this and there are other areas that would suit development better with a totally new junction onto the M25 required.

Industrial space should be extended at Slyfield which is already deemed INDUSTRIAL! Brownfield sites should be better utilised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/105  Respondent: 15106785 / Giles Puckle  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- I object to the site at Garlick's Arch being developed on the grounds that this development is simply unsustainable. Living opposite the proposed site I am aware of the lack of local bus services, the lack of a railway station within a thirty minute walk and the lack of local infrastructure in terms of schools, doctors surgeries and shops. The proposed development of an additional 400 houses here will severely impact the lives of us local residents.

- Local police services, which are already seeing funding reduced are stretched now, so I object to the proposed development at Garlick's Arch and Wisley Airfield as it will stretch these resources even further.

I hope that common sense prevails and that all of the objections of local residents who care deeply about our community are listened to.

We are writing to object to the proposed development at Garlicks Arch in Burnt Common policy A43. This proposal was added at very late notice after previously being assured by the council leader there would be no significant new changes to the DLP in Send. The use of regulation 19 further adds to the betrayal. This enormous new proposal must require a full consultation under regulation 19. The 2014 proposal for 430 houses was rightly reduced to 185 in April 2016. This late and hasty attempt to push through this plan increases the number to 485! A totally excessive and unneeded number based on
inflated projections of population growth by GBC. The proposed light industrial units can easily be accommodated at Slyfield and the proposed 4 way junction to the A3 will cause traffic gridlock, noise and air pollution for local residents. All this without yet mentioning this 100 acre site is GREEN BELT (a word no longer found in the GBCs dictionary). With prime agricultural land, rare enough in Surrey, and ancient 16th century protected woodland within the boundary, this land must be saved. There is a brook running through the middle of the site essential for drainage and the area is prone to flooding already. The site prevents urban sprawl between Ripley and Send vitally important. The villages medical centre already extremely busy and local schools cannot cope with the 25% population growth this plan will bring to our village. We have received emails from relevant ministers and Sir Paul Beresford stating government policy is to protect the Green Belt and listen to local residents in these matters. Why does GBC neither protect or listen to those it is elected to represent. Conservative councillors ran for election on a protecting the Green Belt, now elected they stab us in the back.

Land at Garlick’s Arch, Send Marsh, Policy A43

I object to the Policy A43 change at Garlick’s Arch to allow for 400 homes and 6 Travelling Showpeople plots. This proposal will over-develop our village as this number of houses is unduly excessive and will erode the ancient woodland that has existed for hundreds of years. Guildford Borough Council should be protecting this area not developing it. It will join up Ripley and Send villages and will erode the Green Belt further and generate excessive traffic and block the already gridlocked roads. The area is prone to flooding and this proposal will increase the likelihood of further flood damage. There is no demand for Travelling Showpeople plots in this area, and ‘no exceptional circumstances’ exist to destroy the Green Belt status of this location. There are others areas in the Borough available for development. This area is already full to capacity, the Doctors Surgery and schools are struggling to cope with existing volumes as it is.

Land at Garlick’s Arch, Send Marsh, Policy A43

I object to the Policy A43 change at Garlick’s Arch to allow for 400 homes and 6 Travelling Showpeople plots. This proposal will saturate our village as this number of houses is unduly excessive and will destroy the ancient woodland that has existed for hundreds of years. Guildford Borough Council should be protecting this area not developing it. It will join up Ripley and Send villages unnecessarily and will erode the Green Belt further and generate excessive traffic, blocking the already gridlocked roads. The area is prone to flooding and this proposal will increase the likelihood of further flooding. There is no demand for Travelling Showpeople plots in this area, and ‘no exceptional circumstances’ exist to
destroy the Green Belt status of this location. There are others areas in the Borough available for development. This area is already bursting at the seams, the Doctors Surgery and schools are struggling to cope with existing volumes as it is.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/212  Respondent: 15107041 / Andy Williams  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Once again I am compelled to write to you to raise objections regarding the local plan. I find it exasperating that I continuously have to raise objections to a local plan which demonstrates an absolute failure of a proper planning process. You have not made any attempt to mitigate and or amend the plan despite the significant volume of objections to the 2016 plan. Indeed Guildford Borough Council has made the situation even worse by combining proposals around Garlick’s Arch and Burnt common and not altering the proposals based on previous objections.

I object to the proposals to build 400 homes and 6 travelling show people plots on the land at Garlick’s Arch, Send Marsh, Policy A43, for the following reasons:

• Thousands of objections have been raised on this previously, this is in complete disregard to all previous objections
• There is no evidence of a demand to house travelling show people in this location,[Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]
• The land is in the Green Belt and no exceptional circumstances exist
• The number of homes is excessive ensuring complete over development of the village. There would be no definition of villages between Ripley & Send defeating the purpose of the Green Belt
• Infrastructure cannot support this. Traffic and pollution levels are already a major problem, schools and medical facilities, as required by law, are already over stretched
• The land is an ancient woodland that existed back in the reign of Elizabeth 1
• The area is subject to frequent flooding and is currently a flood zone 2 allocation, drainage remains substandard
• Due to local shooting facilities, the land is contaminated by lead shot

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5976  Respondent: 15107777 / Paul Ayers  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the building on the Green Belt at Send at Garlick’s Arch, because it is not justified by special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded.
I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 (Garlick’s arch, now 400 homes and 6 traveller plots) changes because:

The land is beautiful, ancient woodland and in a permanent Green Belt area.

There is not a demand for 400 houses in Send, the demand is nearer to Guildford

This plan over allocates housing in Send as opposed to other villages

I object to taking land out of the Green Belt, whose purpose is to protect villages, and prevent urban sprawl

Our village of Send is a small rural village which cannot support 400 extra homes: the infrastructure is inadequate, especially roads which are frequently jammed with traffic

It is often flooded and is currently flood zone 2

There is no demand for Travelling Show people plots here

You have ignored all our previous objections

I would like to register my objection i.e. I object - to the Guildford local plan 2016 involving Garlicks Arch. Thanks
Here are my reasons

1. **Not protecting the Green Belt**
   I object to the proposals to remove Ripley, Send and Clandon from the Greenbelt. There are no special circumstances to do this. Once taken the green belt is lost forever.

2. **Disproportionate size of sites in relation to rural locations**
   I object to the allocation of land to the strategic sites of Wisley Airfield, Garlicks Arch (Ripley/Send border) and Gosden Hill (Clandon). The proposed development of these sites will have a disproportionate impact on the surrounding local villages. They will have a permanent impact on each of these communities.

3. **Unbalanced allocation of development in one area of the Borough**
   Between the M25 and Burpham, a distance of only about 5 miles it is proposed that over 6,500 houses are built. This represents over 40% of the housing proposed in the Local Plan. I object to this area being hit so hard by the allocation of development, which is disproportionate to the rest of the Borough.

4. **Congestion on the trunk roads, A3/M25**
   I object to the development of the strategic sites due to A3 and M25 already being at capacity during peak hours. Highways England has no plans to look at improving the A3 before 2020. It is therefore not sustainable to identify sites for further development which will worsen the congestion on these motorways and trunk roads.

5. **Congestion on the local village roads and lanes**
   Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. I object to further development which will cause greater congestion in and around our villages.

6. **Unsuitability of our local roads for heavy vehicles and more traffic**
   Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

7. **Poor air quality concerns**
   Further congestion, particularly in built up residential areas will only lead to greater levels of air pollution. I object to further development, which will result a fall in the air quality.

8. **Lack of proper infrastructure planning for sites**
   I object to the lack of planning and implementation of infrastructure. For example at Garlick’s Arch. Without improvements to the infrastructure prior to development, the existing residents’ quality of life will significantly deteriorate in many ways. How will the local services such as doctors and schools cope?

9. **Lack of Utilities Capacity**
   Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. I object to the development of Garlick’s Arch on the ground that there is little capacity in these networks.

10. **Sites being planned in unsustainable locations**
    Many of the strategic sites e.g. Wisley Airfield and Garlick’s Arch, are in unsustainable locations. They do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. I object on the grounds that these sites are not sustainable.

11. **Parking issues in local villages caused by larger population**
    Many of the affected villages, such as Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems. To which I object.

12. **Local healthcare facilities will be overwhelmed**
    Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. I object due to the further stress it will put upon existing health services.

13. **Local policing facilities will be overwhelmed**
    Police services are seeing funding reduced. The development of the likes of Garlick’s Arch and Wisley Airfield will stretch the police services further and I object.

14. **Local social welfare facilities will be overwhelmed**

15. **Local shops/restaurant facilities will be overwhelmed**

16. **No protection of heritage assets**
17. No protection of the environment
18. Overdevelopment of sites
19. Not meeting the needs of local communities
20. Insufficient affordable housing
21. Poor quality of layout and housing design
22. Insufficient consideration of SPA, SSI and Conservation Area issues
23. Lack of proper cycle lanes on local roads
24. Lack of proper pedestrian footpaths on local roads
25. Current SHMA figure of 693 p.a. too high

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/114  Respondent: 15109121 / Larry Bottomley  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

So specifically:

Policy A43 30 ha land at Garlick’s Arch Burnt Common.

Building at Garlick’s Arch means that on and off access to the A3 at the Burnt Common roundabout will be required but will also have a significant impact on the already congested local roads. We have massive lorries coming through Clandon, Send has a significant congestion problem at rush hour through to Old Woking and better access at Burnt Common to the A3/M25 will have a very damaging impact on both villages.

The road passing through Send is very congested for long periods during the day and this would only exacerbate the problem. The addition of 400 houses at Garlick’s Arch with no local offices or other places of work, increases those that need to drive to work. The addition of Industrial units will likely mean more large lorries on the narrow and already congested roads.

400 houses will increase pressure on Send First and St Bede’s (already full) and the Villages Medical Centre (where currently getting a timely appointment is challenging).

Without consideration of these resources or an integrated transport plan, I object to Policy A43.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the suggestion of new houses at Garlick’s Arch, Burnt common does not need new houses. The site has not been consulted on properly and is a conservation area. The implications of the extra traffic will grid lock send. The infrastructure cannot cope.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/137  Respondent: 15109985 / Shane Sayed  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

With regard to the proposal for 400 homes on green belt land at Garlick's Arch near Burnt Common I have the following objections:

(1) The area proposed for housing development is Green Belt land and I strongly object to this area of woodland being lost forever and turned into a housing estate. My family regularly use this area for recreation purposes and do not want to lose this area of natural beauty.

(2) I object to the Wisley Airfield, Garlicks Arch (Ripley/Send border) and Gosden Hill (Clandon) sites being used for housing development as the nearby villages do not have the infrastructure to support the increase in traffic, population. I also object to the disproportionate amount of housing being proposed for these areas as the level of congestion will rise to an unacceptable level in the surrounding roads, lanes and major thoroughfares.

(3) There is already a very high level of traffic congestion in Ripley high St as well as the junction off the A3 into Send village and I object to the increase in traffic that would materialise as a result of the proposed development. I also object to the vast increase in traffic that would arise on the junction between the M25 and A3.

(4) I object to the additional strain that the Villages Medical Centre, Send will have as a result of the large increase in population in the area. This service is already overstretched and the development will exacerbate the problem.

Regarding the proposal for 400 homes on green belt land at Garlick's Arch near Burnt Common I have the following objections:

(1) This area is Green Belt land and I strongly object to losing this area of woodland which my young family uses on a very regular basis.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/146  Respondent: 15110177 / GORDON TURNER  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Policy A43, 30 ha Land at Garlicks Arch. There is no need for anymore houses on top of the already proposed 13860 houses in the plan. An industrial centre there is a complete joke how will Send A247 deal with the increased HGV traffic? I do await you thoughts on this as I live on Send Barns Lane and are probable in a better place to judge the impact it would have than people at GBC unless you wish to come and stay at my address for some days to get first hand experience.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I live in Rose Lane in Ripley and I am very concerned to hear the proposal of building new homes on the site of Garlick Arch. There are many reasons as to why I object to this, preserving the green belt is vital in the survival of woodland that has existed for decades and the destruction of this will not only make the area an eye sore but the destruction of wildlife habit I strongly object to.

Secondly the road leading to and from Ripley is already congested and any additional traffic will add to this congestion which will make life unbearable for the local residents who like me have lived a village lifestyle for a number of years and I object to the added noise pollution, general congestion, air pollution and parking issues, traffic jams this will create before, during and after the homes are built.

The facilities in Ripley itself will not be able to cope with the parking situations that will increase to an already overcrowded situation to which I also very strongly object too.

The only parking facilities in Ripley are the ones in White Hart Meadows and this is overcrowded each and everyday posing major issues for the residents and this will only increase as there are very few local shops which won't cope with the demand hence I object to the housing on Garlick Arch as the area would not cope with the demands.

I believe that Ripley is a village not a new mini town and well not be able to cope with the burden of extra traffic, people and congestion and pollution. It is an area a beauty and this atmosphere will be destroyed if new homes are built in and around the surrounding areas of Garlick Arch. I, strongly object to the proposal and the green belt must and should survive for the reasons I have stated above and for a wide variety more and the proposal should be dismissed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to Policy A43 at Garlicks Arch as: -
1. The addition of 6 Travelling Showpeople plots – is there really a requirement in the local area?
2. Thousands of objections to proposals and the volume of housing have been made and ignore with the same number of houses being included, of which the infrastructure is not in place and will cause huge safety issues in an area where there are already several near-misses with the junction of Burnt Common Close. It will cause over development of the area and the village.
3. There are no exceptional circumstances for building on this Green Belt land, more so on the ancient woodland
4. Increased risk of flood (currently a flood zone 2 allocation)
5. The land is contaminated by lead shot

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/738  Respondent: 15114145 / Barry Roads  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A43

I object to the above Policy change at Garlick’s Arch which is now 400 homes and 6 travelling show people plots.

Why do the previous thousands of objections appear to be ignored by the Council?.

This land is green belt – the Government itself states the following:-

Green Belt serves five purposes:

- to check the unrestricted sprawl of large built-up areas
- to prevent neighbouring towns merging into one another – Send and Ripley will become one if these homes are allowed to be built.
- to assist in safeguarding the countryside from encroachment
- to preserve the setting and special character of historic towns
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land

So as there are no exceptional circumstances why are these being ignored in respect of Garlick’s Arch that has been around for hundreds of years.

I have lived in Send Marsh for 21 years and in all that time there has never been a proven demand for Travelling show people spaces.

Already at peak times it is very difficult to get out of Send Marsh Road onto the old A3 and these homes will only generate additional traffic – additionally if there is a problem on the main A3 all the traffic filters down through the old A3.

I do not believe that sufficient thought has been given to the infrastructure of the whole area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2301  Respondent: 15114721 / Leslie Macnair  Agent:
I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to Policy A43 Change Land at Garlick's Arch, Send Marsh because:

- It is a huge over-development of the village
- It will generate large amounts of traffic onto the roads leading to Ripley, Send and the A.247 to Woking.
- There are no exceptional circumstances that justify the size and increase in this policy
- It will make a ribbon development between Send and Ripley
- The proposed increase ignores all previous objections made by local people for the placing of all these houses on Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing to express my very strong objection to the draft proposal for Garlicks Arch in Send Marsh.
As a resident of the Send Marsh area I object to these proposed plans as I feel strongly that the proposed plans are completely disproportional to the size of the Send and Ripley village area and will irreparably damage the character of this small village community.

In addition, this small village does not have the facilities or infrastructure to support such a vast increase in the population. The area is already unable to cope with the traffic in peak travel times and additional housing will create even more pressure on our struggling roads. The roads through Send, Ripley and Clandon are very narrow and bendy and already struggle during rush hour. Parking is a very big concern in the area already with many cars parked out in the road making it difficult for cars to move through the area and for cyclists to use the roads safely. The area is poorly served for public transport, the nearest train station is 50 minute walk and buses are expensive and only operate twice an hour (if you are lucky!).

The local area is not equipped to support an increase in demand for local services such as schools and the doctor's surgery. It is already challenging to obtain an appointment with my GP.

I have lived in this area all of my life and gratefully enjoy the small community atmosphere of this area. The proposed plans are excessive and completely disproportionate for this rural community and the damage caused by this proposed plan will irreparably damage the area and its natural beauty. The area proposed for development is an area I regularly walk around and it would be gutting to think this area will no longer be the same.

I hope you take my objection into consideration and I would appreciate receipt of my email so that I know my views have been carefully considered.

I object to the proposed plans for the development of Garlick's Arch and to the proposal to remove Send from the Greenbelt.

I object to the development of Garlick's Arch on the basis that I understand these houses are in addition to the number of houses already proposed for the borough and that they are an unnecessary destruction of Greenbelt land. Also, should this development go ahead there is no infrastructure, Roads, Transport facilities, Medical facilities, Schools etc, to support the additional population these houses would bring. With regard to the Industrial Development there appears to be no justification whatsoever for this as I understand that this replaces the industrial development planned for Slyfield which is obviously a much better site for such development.

I object to Policy A43 , the change at Garlick's Arch. It ignores all the previous objections, there is no proven demand for
travelling showmen's plots in the location.

It is in an area of outstanding historical beauty being in ancient woodlands some 600 year old.

I object most strongly too to the fact it will link Ripley and Send and destroy the green belt between the villages.

Another example of lack of consideration for the openness of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43  
**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the fact that Guildford Borough Council has not provided evidence in terms of the Employment Land Needs Assessment 2015. Also the infrastructure in the village of Send just does not exist to support any of this proposed development.  
I object to Send being removed from the green belt. I accept the need for new housing but there is no reason these should be built on green belt land when there are so many brownfield sites available.  
I object to the fact that the "final draft" of the Local Plan which has been prepared without the requisite full consultation under Regulation 18. This has changed vastly from the one originally proposed (and objected to) in 2014, increasing the number of proposed houses from 430 to 485, and adding a new road junction which was not mentioned in the earlier Plan.  
I object to the proposed new homes on the land west of Winds Ridge and Send Hill. Again, this was not included previously. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented.  
I object to the proposal for 400 houses and 7000 sqm of industrial and warehousing at Garlick's Arch, and a new interchange onto the A3 at Burnt Common. This would cause major problems due to the increase in the amount of traffic coming through the village of Send.

I object to the proposed developments in The Guildford local plan 2016. I object to green belt land been taken to be used for housing and industrial use. Particularly at Garlick's Arch where there is ancient woodland at risk. I object to the huge impact that the Guildford local plan 2016 would have on the environment.

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2017) and in particular to the changes that affect Ripley and Send, which appear to make the Plan even worse than those proposed in 2016.

Please record my objections as follows:

1. I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the allocation of 6 Travelling Show-people sites in A34 Garlick’s Arch

The allocation of 6 Travelling Show-people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Show-people plots in A43 Garlick’s Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 as stated in section 4.2.24 of the Plan.

This is a response to the updated Local Plan. I would like to strongly object to the new proposals which are even worse than before.

1. Over 40% of all the proposed development is now in the North East of the Borough which is too much for this small rural area. This will destroy the substantial parts of the precious Green Belt and will be extremely disruptive for residents. Furthermore, it will apply unsustainable pressure on roads, schools and GP surgeries.

2. Developments at Site A43 Garlick’s Arch will destroy substantial parts of the countryside. No need has been identified for this development. It is absolutely vital that the Green Belt is preserved – once it has gone, it will be gone forever. It will also encourage more building on green space throughout the country. Future generations will suffer for this loss.

3. Six additional Traveller plots have been added to the proposals for Garlick's Arch (Section 4.2.22 of the plan). This is unbalanced and unfair. These plots and accompanying storage facilities are completely unsuitable for the rural area. Why do 75% of these plots have to be in Ripley?

4. The possibility of an additional 400 houses at the Site A43 Garlick's Arch is extremely damaging for villages of Ripley, Send and Clandon and will lead to a further increase of the local population, bringing even more traffic to the area which means even poorer air quality and congestion.

Policy A43, 30 ha of land at Garlick’s Arch, Burnt Common, designated for 400 houses and 7,000 sq m of industrial and warehousing.

I object because:

- the site was not included in the regulation 18 draft and the site has not been consulted on previously;
- it is currently Green Belt and building on the site will undermine Send’s village status;
- a new 4 way interchange onto the A3 would make Send a through route for traffic leaving the A3 and M25 for Woking, overloading the road through Send village;
- proposed improvements to the A247 through Send would not alleviate the congestion situation because the bottleneck is at the Old Woking roundabout – there is simply no road capacity leading to the A247 from Woking to allow traffic to flow – there are already long queues and delays during peak times;
- the need for additional industrial development has not been demonstrated.

| I object to Policy A43, 'The Garlick's Arch development. The 400 houses proposed would increase the existing population disproportionately to the existing population, and overwhelm the Villages Medical Centre and local schools. St. Bede's School, Send is being rebuilt on the basis of existing pupil numbers, and the proposed expansion of population would very quickly make it inadequate. New housing developments attract predominantly young families with school age children. |

| I object to Policy A43 change at Garlick's Arch because the number of homes is excessive and the addition of 8 travelling/show people pitches is unnecessary. Send Marsh is currently a flood zone and the addition of these houses is very worrying. It will generate much more traffic which at peak times blocks traffic in Send and Ripley. I object strongly to any more intrusion on the Green Belt in this beautiful area. |
| I object to Policy A58 at Burnt Common because there is no need to build warehouses in the middle of the Green Belt when there are many empty sites for this purpose at Slyfield and Guildford. This would also create more traffic on already congested roads. |
| I object to any more. |

Just emailing my protest at all the houses you want to build in send marsh and the surrounding areas, not only is this area already over populated and trying to get from home to work in rush hour is manic as it is, and you want to add more congestion and add the the problems, it's crazy! We also have a hard enough time trying to get an appointment at the doctors surgery so adding more people to this area will be making matters worse than what they already are, same goes with the schools, this is an increasing problem, I'm sure I do not need to say any more, we pay a premium to live in a village and what you are proposing to do is going to turn our lovely villages into a town, and myself like many others bought our houses away from the hustle and bustle of busy towns, I see this is not a government proposal and only a Guildford borough council one, I strongly disagree with what you are wanting to do, it would make many people viewing your plans very angry and see GBC as being greedy and just thinking of the profits many more houses would bring in. This is a protest from my household not only myself and that's 5 people.

re the GBC plan to build over 14,000 new homes under the revised draft local plan such as Garlicks' Arch, Wisley and Gosden Hill.

It is bad enough getting out of Send Marsh Road onto Portsmouth Road in rush hour times and this area CANNOT cope with additional housing and traffic. Soon there will be a fatal collision as the roads cannot cope with this extra traffic.

The extra road traffic will also affect the M25 around junction 10 and the A3 south bound to Guildford. Both of which can be very congested. It's not just the amount of vehicles, but the extra noise and air pollution they will emit.

We purchased Bramble way in Send Marsh specifically because it was in a green belt environment. We do not want this green belt taking away and becoming a suburb of Guildford/Woking which it will become with no green space in between and a mass of housing and traffic.

Therefore I want to formally confirm that:

I OBJECT TO any/all erosion of the green belt
I OBJECT to any 'in-setting' of any villages from the green belt
I OBJECT to the planned development in one area of the borough which cannot sustain this
I OBJECT TO the limited consultation period and last minute inclusion of new sits with less than 2 weeks notice - THIS IS UNACCEPTABLE
I OBJECT to the lack of provision for new schools and doctors which are already under strain with the population increase
I object to the lack of any evidence for the alleged housing numbers.

We do not wish to live in a large town hence we moved to a village in the green belt.

There are sufficient brown sites available and Woking and Guildford are already inundated with tower blocks of new flats.

We strongly object to the way Guildford B.Council is attempting to reduce green belt and built houses and incur congestion where it is not appropriate.

I object to the Policy A43 proposing to build 400 homes and 6 travelling show -people plots at Garlick’s Arch. There is no evidence that the travelling show-people plots in this area are needed. And is there solid evidence that 400 new houses are needed in this area? I have read different articles in the press suggesting that the estimates for the new housing in the area are overestimated especially now when Britain is entering the Brexit negotiations.

Have the planners considered the fact that this land is subject to frequent flooding and it currently a flood zone 2 allocation? Also, I thought that only in the “exceptional circumstances” the permanent Green Belt area can be built on. What constitutes “exceptional circumstances” in this case?

I am writing as a very concerned resident of Send, to object to the proposed developments at Garlick's Arch, Burnt common and land on Winds Ridge Send Hill.

I strongly object to the removal of Send from the Green Belt, something that I thought the government had put on their manifesto to protect. As this is mainly a Conservative council I thought this is something that you would be looking to uphold. It seems I, like many other voters have been misled!

The Green Belt was established to limit this type of over development, and to remove it would merge Woking into Guildford. Once a field has been built upon it will never return to its original state, it will be lost forever!

I work as a Driving Instructor and use the roads daily. In the last five years my job has become increasingly difficult, just trying to get between pupils and to teach them safely. On average the A246 which runs through our village is completely blocked both morning and night at least twice a week. This can be due to a road repair in old Woking, a broken down lorry or more regularly now, a crash on either the A3 or M25 leading to vehicles exiting these roads in favour of the local roads.

The A247 has houses both sides for most of it with limited parking, so cars are parked on the road, reducing it to single lane status in many places. The junction with Broadmead roundabout leads in to small roads, already carrying far more cars than they were ever designed to do. This road also has dense terrace housing with no parking other than on the road. Have you ever tried driving down this road in the evening or when the A3 is blocked? It is simply gridlocked. The air pollution from the stationary cars and lorries is awful!

The proposed development at Garlick's Arch and the new on off slip roads from the A3 will turn our village into a solid roadblock at peak times, the road simply cannot carry the increase in traffic the development will bring!

I believe this site was a late addition to the plan and was put through under Regulation 19, and has not been previously consulted upon! This land is covered with ancient woodland and protected by the NPPF. Surely this is one of the sites the Green Belt was set up to protect, and is protected by this government! The scale of housing and industrial development is beyond belief!

The other sites on Send Hill and Winds Ridge are on single track rural roads, again not consulted upon, some of which is landfill with vents visible above the ground. These are country roads, quite and peaceful places and not suitable for the kind of development that is being proposed!

I appreciate that Send needs to play it's part in filling the need for housing, but this is a clear case of overdevelopment! Get this wrong and village life and all it brings will be lost forever, in the name of wealth and greed!

Please pass my comments on to the Planning Inspector.

**Comment ID: pslp172/2538  Respondent: 15143937 / Helen Strudwick  Agent:**

| Document: | Proposed Submission Local Plan: strategy and sites 2017 / Policy A43 |
Policy A43 – I see that the proposed employment space at Garlick’s Arch has now been move to Burnt Common under Policy A58 and I will comment on that later. I object to the proposed 8 travelling show people plots on this site in addition to the 400 homes because there is no proven demand for them in this location and the lorries that will go along with these people will cause further congestion and pollution on the local roads.

The Local Plan H1 policy states that “Gypsy, Traveller or Travelling Show people accommodation should be provided on development sites of 500 homes or more whilst there remains an identified need”. Send has been disproportionately allocated 2 traveller pitches as well as all 8 travelling show people plots identified as needed in the borough until 2034. The developments of over 1500 houses at Gosden Hill and Wisley are only allocated 8 pitches apiece during the same period. In addition the proposed location of these sites do not conform with the Guildford Borough Council’s own traveller policy in terms of the identified needs of this ethnicity of people; e.g. distance from schools, shops, transport and the need to join a community of people.

This land is ancient woodland allocated as Green Belt to avoid Ripley and Send being joined up. It is also subject to frequent flooding and has a flood zone 2 allocation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I see that the proposed employment space at Garlick’s Arch has now been move to Burnt Common under Policy A58 and I object to the proposed 8 travelling show people plots on this site in addition to the 400 homes because there is no proven demand for them in this location and the lorries that will go along with these people will cause further congestion and pollution on the local roads.

The Local Plan H1 policy states that “Gypsy, Traveller or Travelling Show people accommodation should be provided on development sites of 500 homes or more whilst there remains an identified need”. Comment ID: PSLPS16/8034  Respondent: 15144065 / Margaret Heard  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object again in reference to policy P2, in particular to the land at Garlicks arch (A43) being removed from the green belt, as 'The Plan' states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

I object to development in areas which are at risk of flooding (Policy P4), as the Plan does not take properly address the flood risk as required by National Planning Policy. The site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

I object to the proposed Infrastructure Schedule. The Infrastructure Schedule sets out the key infrastructure requirements the Plan depends on. There is no schedule for Garlick’s Arch (A43), so the Plan takes no account of the infrastructure required for this site. It is therefore not fit for purpose.

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

I object to the lack of proper infrastructure planning for sites (Policy I1). The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The inclusion of 6 plots for travelling showpeople to the A43 Garlicks Arch site is frankly ludicrous in a rural environment within the Greenbelt. Our roads can’t cope with the size of the vehicles and storage facilities they will come equipped with. Why does Ripley have to have 75% of these plots? This is totally unacceptable and completely unbalanced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the policy changes A43 at Garlicks Arch, Send Marsh because -

1. The allocation of Travel lers/Showpeople sites is already excessive and out of all proportion even with reference to Local Plan Hi.
2. There are no "exceptional" circumstances for this important green belt to be developed and it is an important contribution to the control of flooding in the area which has sometimes been widespread in recent years.
3. Excessive traffic will result in increasing congestion, pollution and potential health risks to the local area and its residents.

Garlick's Arch policy.
I object to the building of 400 homes and 6 Travelling Show People plots
- How would the occupancy of these plots and the flow of equipment to and from the plots be monitored
- HGVs would be required to move large equipment thus contributing to the existing traffic problems
- Building on this land would result in over development with no demarcation between villages thus defeating the purpose of the Green Belt.
- This area is subject to flooding with flood zone 2 status
- It is contaminated by lead shot arising from shooting clubs, accumulated over many years
- It contains beautiful ancient woodland, the destruction of which would be a tragedy for the area and wild life
- The existence of high voltage pylons across this land has been ignored. These will provide a serious Health and Safety risk to occupants of the Traveler sites when they move equipment. This is Green Belt land and should remain so.

Policy A43 - Garlick's Arch - I object to GBC intending to build 400 homes on this green and agricultural land and purposely destroying ancient woodland and in the process removing wild life habitat. Plus, I object to the addition of 6 Travelling Show People plots which would result in increased parking spaces for large vehicles and storage space. If this goes ahead it will fill our roads with more cars and HGVs.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the proposed development at Garlic's Arch. This is ancient woodland and farmland. There is no proportion to the scale development compared to the existing number of homes in Send Marsh, Burnt Common, and Ripley.

1. I also object to the proposed development at Garlic's Arch because it will create increased traffic issues, pressure on local doctors, and schooling. There is no local secondary school without rush hour bus or train journeys.

1. Last year I wrote to Guildford council for a kerb to be installed outside my house. The response that this is normal for villages in the countryside. I object to the basis on which the proposed plan is diverting from existing principles and proposing 400 homes within 2 minutes walk from my house!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Policy A43: Garlicks Arch

The site is allocated for approximately 400 homes (C3), including some self-build and custom house building plots, and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8)6 Travelling Showpeople plots (sui generis).

Policy H3: Rural exception homes

(1) Small affordable housing developments, including pitches for travellers, will be permitted to meet identified local affordable housing needs provided that:

(a) the site adjoins or is closely related to, and in safe and easy reasonable walking distance of a defined or a non-defined rural settlement, and

(b) the number, size and tenure of homes would be appropriate to meet, or to contribute to meeting, the identified local affordable housing needs of the local community

Policy A43a: Land for new north facing slip roads to/from A3 at Send Marsh/Burnt Common

I agree with the removal of industrial usage (A43) on greenbelt as per National Planning Policy, but object to the inclusion of Travelling Showpeople plots.

I continue to object to the inappropriate use of ancient Green Belt land for 400 new houses (A43). This is not sufficient justification (H3) or exceptional circumstances. This is reckless destruction of green belt.

The argument in Policy H3 that it is ok to use green belt land for affordable housing if it is reasonable asking distance to a rural settlement is also not valid. Send is a good 60min walk, and Ripley 45min. This is unreasonable.

Furthermore the local Train station at Clandon is 60min walk. Furthermore the number and size of have no bearing on the needs of the local community! We have no need in Send, Ripley or Clandon for 400 new homes.

I continue to object to the need for a new slip road, especially since it has increased in size to 4.5ha and has no stated purpose or value. It will only lead to further congestion in and around our villages which are gridlocked daily.

I wish these objections to be fully taken into consideration and that the Updated Plan be amended accordingly.

I object to the Guildford Local Plan for the following reasons:
5.) The inclusion of land at Garlick's Arch, Send Marsh/ Burnt Common and Ripley (Policy A43)

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/343  **Respondent:** 15155393 / Heidi Powell  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Site A43 / Garlick’s Arch**

1. I object to this proposal. In isolation I would welcome the provision of a 4 way access to the A3 at Burnt Common as part of this development. However I feel very uncomfortable about the plan for this development alongside sites A35 & A25. This would create a band of housing development totalling 4400 properties in a ribbon running from M25 / J10 to Guildford on land that is greenbelt.

2. I am particularly worried about the traffic management around the Burnt Common area. This is already a busy junction with the Portsmouth Road and with potentially additional traffic from Woking, Clandon as well as those travelling north & south on the A3. I fear this would become a major bottleneck.

Please will you take my comments into consideration.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/346  **Respondent:** 15155617 / David Vallath-Patel  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

**Comment ID:** PSLPS16/8305  **Respondent:** 15156673 / Emma France  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

Policy A 43. 30 ha Land at Garlick's Arch, Burnt Common, designated for 400 houses and 7,000 sq m of industrial and warehousing. There is no need for any more houses on top of the 13,860 already proposed for the borough. This site is NEW and was not included in the Regulation 18 draft which has NOT been consulted upon previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The proposed industrial development of 7,000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield. A new 4-way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send. Send Road (A247) would be gridlocked all day. Send would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. Send cannot take it.

The proposed industrial development of 7,000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield. A new 4-way interchange onto the A3 at Burnt Common to serve this development would be disastrous for Send. Send Road (A247) would be gridlocked all day. Send would be the through route to Woking for traffic leaving the M25 and A3, the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. Send cannot take it.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The site is not appropriate because:

- The site has Ancient woodland and is a wildlife habitat. Any ancient woodland should be protected for future generations.
- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding.
- There are no plans to improve local schools, medical or utilities to cope.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding.
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

1. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the proposed development at Garlic's Arch. This is ancient woodland and farmland. There is no proportion to the scale development compared to the existing number of homes in Send Marsh, Burnt Common, and Ripley.

1. I also object to the proposed development at Garlic's Arch because it will create increased traffic issues, pressure on local doctors, and schooling. There is no local secondary school without rush hour bus or train journeys.

1. Last year I wrote to Guildford council for a kerb to be installed outside my house. The response that this is normal for villages in the countryside. I object to the basis on which the proposed plan is diverting from existing principles and proposing 400 homes within 2 minutes walk from my house!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY A43

Land at Garlicks Arch, Send Marsh

Do we in Send really need 400 homes? They won't be affordable to the young of the area which means my youngsters will be pushed out. As far as I know the travelling showman live in the Dorking area not Send. Any residents in these houses you plan on building won't like the big diesel vehicles and generators travelling in and out. Now we know diesel is a dangerous polluter why put them in an area with houses.

Below are my objections to the above plan:

1. I object to the excessive number of houses proposed for the Garlick's Arch site, Policy A43 changes.

   It will ruin the character of both Send and Ripley.

   The extra traffic generated by the new residents will lead to chaos on the local roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to Policy A43 for various reasons. The tens of thousands of objections already made are simply ignored by GBC. The number of homes is excessive. The junction of the B368 Send Marsh Road and B2215 Portsmouth Road is already extremely difficult to exit particularly when turning right and the c1000 additional cars in Garlick’s Arch will make this whole area a traffic nightmare. Also the whole area of Garlick’s Arch floods every Winter and there is much documented
photo evidence of this as there is a clay shooting club who use the area and they regularly shoot over what is essentially a lake. It has a flood zone 2 allocation. There is NO proven demand for travelling showpeople plots in this location.

Far from reducing the number of homes proposed for this site, the Council have again ignored substantial objections made regarding the impact of this site and have also added a proposal for six travelling show-people plots. This despite there being no proven demand for this number of plots in this location. The proposals for this site are excessive, represent a substantial erosion of the Green Belt, and will generate huge amounts of traffic which the road system in Send and Ripley is completely unfit to cope with.

Policy A43

a. Once again, the process is illogical. Thousands of previous objections have been ignored. This makes no sense.

b. It will join up the villages of Ripley and Send, and defy the whole purpose of the greenbelt.
c. The local road infrastructure in Send and Ripley is not able to handle the resulting increase in traffic volumes.

d. This ancient woodland has been there for many hundreds of years. It fails “exceptional circumstances” criteria for developing the greenbelt.

e. Demand for housing figures have decreased since the last plan, yet despite this, the houses allocated to Send has gone up. Again this makes no sense.

Land at Garlick's Arch, Send Marsh, Policy A43
I strongly object to Policy A43 change at Garlick's Arch as it ignores all previous objections of the local people. There is no proven need for plots for "Travelling Showpeople" in this area. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] This is not wanted in Send or Ripley, Policy 43 should be abandoned forthwith. This area is a permanent Green Belt site and there are absolutely no "exceptional circumstances" for this Policy. The Policy Plan will cause over development of Send and Ripley the number of homes is excessive. Once again 400 homes will amount to another six to eight hundred cars on the local roads. The local roads are already at grid lock at peak periods, as stated earlier the chance of road rage and the possibility of a nasty incident will increase. The ancient woodland of this area has existed since the 15th Century and the reign of Elizabeth 1, what gives you the right to destroy it??? The area is has a flood zone 2 allocation, is this to be ignored as well as the Conservative promise of not building on Green Belt.

Secondly , I object to policy A43 for the change at Garlicks arch for the following reasons.
One: There is no proven demand for travelling show people plots in this area.
Two: It will join Ripley up with Send, defeating the purpose of greenbelt, loosing any sense of the traditional villages.
Three- It is subject to frequent flooding- this land needs to be there to prevent issues flooding other houses downstream of the river.
Four- It will create excessive traffic. Over the last 20 years the traffic has increased dramatically. If it continues to increase the whole area will become a permanently gridlocked.

Policy A43 – I see that the proposed employment space at Garlick’s Arch has now been move to Burnt Common under Policy A58 and I will comment on that later. I object to the proposed 8 travelling show people plots on this site in addition to the 400 homes because there is no proven demand for them in this location and the lorries that will go along with these people will cause further congestion and pollution on the local roads.

The Local Plan H1 policy states that “Gypsy, Traveller or Travelling Show people accommodation should be provided on development sites of 500 homes or more whilst there remains an identified need”. Send has been disproportionately allocated 2 traveller pitches as well as all 8 travelling show people plots identified as needed in the borough until 2034. The developments of over 1500 houses at Gosden Hill and Wisley are only allocated 8 pitches apiece during the same period. In addition the proposed location of these sites do not conform with the Guildford Borough Council’s own traveller policy in terms of the identified needs of this ethnicity of people; e.g. distance from schools, shops, transport and the need to join a community of people.

This land is ancient woodland allocated as Green Belt to avoid Ripley and Send being joined up. It is also subject to frequent flooding and has a flood zone 2 allocation.

I refer to the draft Local Plan and specifically the part relating to what you call Garlick’s Arch, Burnt Common.
This is designated for 400 houses and industrial and warehousing. I object to the proposal. I currently use the land for clay pigeon shooting.

I believe this site is a new proposed site for building and has not been the subject of previous consultation. It is Green Belt and there are no exceptional circumstances allowing for any building on it. There is an area of ancient woodland.

A new 4-way interchange onto the A3 at Burnt Common would be disastrous for Send and would open Send as a through route for traffic leaving the M25 and A3 for Woking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to site A43 Garlick’s Arch, and the destroying of wildlife habitats on this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to site A43 Garlick’s Arch. The alteration to now allocate a minimum of 400 houses, and add 6 show people Plots will have a significant impact on the quality of life for people already living in the area, because of huge increase in traffic trying to use our already clogged roads.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the plans outlined for Site A43. This site is new to the overall plans and was not included in the Regulation 18 draft proposal and so it has not previously had any level of consultation. The removal of this land from the Green Belt requires exceptional circumstances and I do not see that the case has been made for this; in the long-term, developments such as this one may be detrimental to the overall goal of preventing urban sprawl and the merging of settlements such as Guildford and Woking. The provision of housing on this scale at this location would also have a significant impact on the schools in the local area; for example, Send infant school is currently being rebuilt but there is no plan for any increase in capacity. I understand that the site contains an ancient woodland and so the development would endanger trees from C16 and so there are conservation issues with the selection of this site.

I also object to the plans for the industrial development; the 2015 Employment Land Needs Assessment indicated a reduction of 80% in the requirements for employment floor space while this proposal is a repeat of that contained in a previous draft local plan that used an older evidence base. If there is a need for further development of industrial space, there should be consideration given to an expansion of Slyfield as this seems to be a very appropriate site for such.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the proposed changes to policy A43 as it takes no account of the many objections to this development made in the response to the 2016 draft Local Plan. I have seen no evidence of demand for plots for travelling showpeople at this site and I also do not see that there are any ‘exceptional circumstances’ that would justify development on the Green Belt at this location. The total number of homes proposed is very high considering the overall size of Send village without any planned increase in infrastructure necessary for such a development. It also seems likely to join Send and Ripley, thereby directly going against one of the key purposes of the Green Belt. I am also concerned about the impact of this number of homes upon the local traffic system.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy A43 I object to the land at Garlick's Arch designated for 400 houses. This site was not in the Regulation 18 draft and has not been consulted upon. The industrial development is not required since the latest Employment Land Needs Assessment 2015 shows a reduction of 80% in required floor space from the previous draft plan. There is a 40ha site available at Slyfield. The additional traffic resulting from such a development would increase the traffic on Send Road and the Portsmouth Road at Ripley which are already gridlocked at peak times as is the A3.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. Insufficient thought has been given to how the local infrastructure could cope with the additional traffic.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available. The office block on the Portsmouth road at Burnt common has remained unoccupied for 10 years.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding, with regular flooding on Portsmouth road where the river had to be diverted and culverted at the intersection with Send Marsh Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A43, the development of 400 houses at Garlick's Arch. This is a huge development to be built on the green belt. This is unreasonable and out of all proportion to local needs. The Old Portsmouth Road from Burnt Common to the A3 roundabout is already overloaded. The intersection in Ripley regularly blocks solid during busy periods as does the slip road onto the A3. At the Burnt Common intersection the roundabout is regularly blocked with queues in all directions trying to feed from and on to the A3 slip into and onto Send Barns Lane.

I also wish to object to the setting aside for travellers and show people. Ther is no justifiable need. Your addendum notes state that you determined the need by 'asking them' very scientific. They children and mothers on these uncontrolled sites are particularly denied access to proper healthcare, and education. We need to break the cycle and provide permanent occupation, close to the services they need. Local services are already overloaded, local children already have to be bussed out of the area for their education.

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

Policy A 43. 30ha LAND AT GARLICK'S ARCH,BURNT COMMON

I object to the size of this development on Green Belt land as it would have the affect of practically joining Ripley and Send together. This seems to have replaced the Burnt Common site which together with Slyfield would have been more suitable for some industrial development. The new 4-way interchange onto the A3 at Burnt Common to serve this development would be a disaster for Send and the traffic it would generate on the A247 Send Road through the village. This would become an even busier through route to Woking on an already, at times, gridlocked road, taking many heavy lorries, with the access to two schools directly in to this traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I Object to the site A43 Garlick’s Arch

Garlick’s Arch is a 100 acre site of Green Belt and ancient woodland which should be protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

13. We object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site.

Why was a brownfield site removed and replaced by a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

**Land at Garlick’s Arch, Send Marsh, Policy A43.**

*Now 400 homes and 6 Travelling Showpeople plots*

We object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the **thousands of previous objections** made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

I also object to 400 houses and 7000 Metres of Industrial space at Garlick’s arch, there is plenty of Industrial space at Slyfield. It is totally inappropriate at Garlick’s Arch because apart from flooding, it is ancient woodland.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPS16/6421  **Respondent:** 15225281 / Roger Gamlin  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no special circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement has been complied with for this site. It only come to light for local residents following a Council meeting on 11th May 2016.

National planning policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. The site is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. The development of the site will increase the risk of flooding. There are other sites that do not flood that can be developed and therefore this site should not be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and wood peckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

Given the site’s proximity to the A3 it will suffer from considerable noise pollution, which would be detrimental to all residents. The level of traffic along the A3 and with the road often being congested will result in a poor air quality for the site.

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Policy A43 Garlick’s Arch

I object to Policy A43 because it is permanent Green Belt and must be preserved for future generations.

There is no proven demand for Travelling Showpeople Plots.

It will cause overdevelopment in the village which is already bursting at seams, There are no exceptional circumstances which warrant demolishing ancient woodland which has been a beauty spot since Queen Elizabeth 1.

This will generate excessive traffic compounding a traffic flow problem.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Garlick’s Arch (Policy A43)

I strongly object to the proposed development of this area and its inclusion at a very late stage in the Proposal which would appear to be questionable in-so-far as ‘Correct Process’ has not been followed
This area is unsullied Green Belt land partially covered in ancient woodland, that was not considered as a potential ‘Development Area’ in the 2014 consultation. In fact during 2014 a planning application to build 25 houses in this area was rejected on ‘Sound Planning Grounds’.

It is therefore, to my mind, inconceivable that suddenly it has become acceptable to build 400 houses together with 7,000 sq.metres designated for light industrial usage on this Green Belt Land.

In additional to all this, is the fact that there is no existing or potential infrastructure which would be required to support such a development.

Further, the Employment Land Needs Assessment 2015 shows an 80% reduction in employment space from the previous ELNA conducted by GBC in 2013, which indicates that there is absolutely no need for the proposed 7,000 Sq.m. development at Burnt Common

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Policy A43 Garlick’s Arch –Send Marsh, Burnt Common and Ripley

Again, the many thousands of objections to the proposed development in the 2016 Consultation have been completely ignored with respect to this Green Belt land.

Now 8 Pitches/Plots for ‘Travelling/Showpeople have been added to the original 400 houses, without any proven demand or requirement.

There has not been any visible consideration given to the infrastructure which would be required to support this type of expansion. This proposal is impractical

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Please note my objection to the draft local plan. I particularly object to the villages of Send, Ripley and Clandon being removed from the Green Belt and site A43 Garlicks Arch. This kind of development will have a negative impact of the surrounding area and affect the 'atmosphere' of the villages. Ripley is a particularly thriving community based around traditional village activities. Over population and ever increasing traffic will greatly affect this. Already there are limited school places and demand on other local facilities in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document? Attached documents:

4. I object to the inclusion of land at Garlick's Arch, Burnt Common and the proposed 400 houses and 7000 sq m of industrial warehousing on that site (Policy 43). Policy A43 and A43A were included at the last minute. They were not in the Regulation 18 draft and had not been consulted upon prior to the inclusion 2016 Local Plan.

5. I object to the impact of Policy A43 on ancient woodland on that site, on noise pollution and air pollution levels. The site is also prone to flooding.

6. I object to the impact of Policy A43 and A43A on local infrastructure. Congestion levels on A247 are already increasing at an alarming rate and will be further exacerbated by the development of Garlick's Arch as the residents will have have to rely on the use of private cars.
7. I object to the unsustainable nature of the site at Garlick's Arch (Policy 43).

8. I object to the inclusion of policy A43 of 7000sq m of industrial warehousing as the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft. Slyfield Industrial Estate still has spare capacity and could accommodate any additional warehousing need if required.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to 400 houses and 7000 sq metres of industrial space at Garlicks Arch opposite Send Marsh Road. The site floods and is covered by ancient woodland. The industrial space is not required but if it were it should be at Slyfield. Guildford housing requirements have been shown to be grossly exaggerated and you have refused to disclose your calculations. With proper use of brownfield sites the Green Belt is not needed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the local plan of building on Green Belt land. Site A43 Garlick's Arch increase of housing will be extremely harmful to the rural area of Ripley, Send and Clandon.

The inclusion of 6 x travelling show people plots with storage facilities is entirely inappropriate on Green Belt Land with the designated formula for 1500 to 1999 homes is out of scale.
The increase of industrial floor space to an unspecified amount does not provide enough information for a proper consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

6. The inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch, which has ancient woodland, is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance. The Plan states the preference is for the use of previously developed land. GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the developments as Garlicks Arch is protected as it is in a Green Belt area and there are no exceptional circumstances to remove it from the Green Belt as housing need is not an exceptional circumstance as stated by Central Government.

The plan states that it would be preferable to use previously developed land but Guildford Borough Council have removed a brownfield site at Burnt Common without reason.

I object to the proposed new industrial sites at Garlicks Arch as this will result in a loss of employment for local people in the four existing rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

We object to the following with reference to the above development.

We object to the Local Plan as the development proposed is not sustainable.

We object to not protecting Green Belt land between the villages. Ripley, Send and Clandon

We object to due to congestion that development will cause to the local village roads and lack of road infrastructure.

We object to development in areas which are at risk of flooding and have done so in the past.

We object to the inclusion of the land for new on/off ramps at Burnt Common.
We object to the inclusion of the land at Garlick’s Arch, Send Marsh/ Burnt Common and Ripley.

We object to the poor air quality that extra traffic will make within the villages as traffic use to connect with M25 and A3 every day.

We object to the lack of proper infrastructure planning for site.

We object to 400 houses and 7000 sq meters of industrial buildings opposite Send Marsh road. The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. Guildfords housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green belt is not needed.

Policy A43 Land at Garlick’s Arch, Send Marsh.

1) it ignores all the thousands of previous objections made by local people.

2) there is no proven demand for Travelling Showpeople plots in this location.

3) it is beautiful permanent Green Belt and no “exceptional circumstances” exist.

4) it will cause over-development of our village and the number of homes is excessive.

5) it is exquisite ancient woodland that existed the time of Elizabeth1.

6) it will join up Ripley and Send and defeat the key purpose of Green Belt.

7) it is subject to frequent flooding and is currently a flood zone 2 allocation.

8) it is contaminated by lead shot accumulated over fifty years.

9) it will generate excessive traffic that will block up the local roads of Send and Ripley which have very heavy traffic now without accommodating extra traffic this will cause.

The plan is to build 400 new homes under a revised local plan. This would surely cause havoc.

I also object to the lack of evidence for the provision of new schools, doctors surgeries, not to mention drainage/sewage facilities and public transport. Chaos would be caused by traffic. In this day and age the norm has become for most houses to have 2 or 3 cars. The mind boggles at the number of cars on these local roads at any one time, especially in rush hour.

I object also to the short amount of notice given to the inhabitants of the above mentioned villages.

12. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)
There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1370  Respondent: 15248481 / Jamie McCallister  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to the extended development in the Green Belt (Policy P2, Site A43)
I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch
The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch
The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.
The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

*The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [ than the Burnt Common site did]*”

*The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”*

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

I object to the Policy A43 change because:

- It disregards the overwhelming number of previous objections from local residents which have been ignored.
- The inclusion of pitches for travellers and showpeople is contrary to any proven evidence that there is a demand for such facilities in the foreseeable future.
- The land at this location is Green Belt and must be retained to prevent increasing urbanisation and to preserve the natural habitat of ancient woodland and allow biodiversity to function alongside built-up environments.
- The area has high levels of existing vehicle movements along the A3, A247 and B2215 routes and any reduction in green spaces reduces the opportunities for atmospheric CO2

I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site
will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4). This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14).

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11).

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I object to the location for new employment floorspace at Garlick's Arch - Site A43 (Policy E2).

Proposals for new industrial, warehousing and storage (use Class B 1 c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

** I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)
Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT TO THE PLANS OUTLINED IN POLICY A43 on the grounds that this area is Green Belt and is therefore protected from development. It is a wildlife habitat. What does The Council propose to do about this? The brownfield industrial site at Burnt Common is large enough for the 7,000 sq. m. suggested for further development. If the Council builds on this area, the small, beautiful country villages of Ripley and Send will become suburbs of Guildford in no time at all and their uniqueness and beauty will be lost forever. Please don’t touch our Green Belt! This why we moved to this area, because it is unspoilt! I also object to the plan for 400 new
homes, on the grounds that there is insufficient infrastructure to maintain this level of development, viz: health centres, schools etc. I also strongly object to the manner in which this plan was put forward at the last moment, without consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.
Garlick’s Arch

1.27 Garlick’s Arch at 400 homes, represents an approximate increase of 56% on the total household numbers in Send Marsh / Burnt Common. This can only be considered to be ‘substantial growth’. The size of the allocated site and the number of new dwellings proposed cannot be considered to represent a ‘proportionate extension’ of the village but rather representative of substantial growth.

1.28 Policy A43 and the allocation of ‘Land at Garlick’s Arch, Send Marsh, Burnt Common and Ripley’ is therefore contrary to the settlement hierarchy established in the evidence base for the emerging Local Plan and its inclusion in the Local Plan is therefore considered to be unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Overview

9.1 This section provides an overview and assessment of the relevant allocated sites which are currently set out in the Proposed Submission Local Plan: Strategy and Sites June 2016.

9.2 In total the Proposed Submission Local Plan: Strategy and Sites June 2016 sets out a total of 37 allocated sites which relate to housing (C3) or mixed use redevelopment.

9.3 As set out in Section 4 of these representations the proposed allocations for housing delivery within the Borough rely heavily on strategic sites which are intended to deliver the majority of the overall OAN requirement.

9.4 Key sites also allocated within Send Marsh include site allocation numbers A43 and A43a which relate to ‘Land at Garlicks Arch, Send Marsh, Burnt Common and Ripley’ and ‘Land for new north facing slip roads to/from A3 at Send Marsh / Burnt Common’.

9.5 Further consideration of these sites are set out below

Land at Garlick’s Arch, Send Marsh, Burnt Common and Ripley

9.6 ‘Land at Garlick’s Arch, Send Marsh, Burnt Common and Ripley’ is allocated for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) as set out in Policy A43 of the Proposed Submission Local Plan: Strategy and Sites June 2016.
9.7 The site is approximately 30 ha in size and is stated to have an existing use of paddock and builder’s yard. This includes Grade 2 agricultural land as set out in the spreadsheet which accompanies Table C – Site Options Appraisal of Appendix IV of the Sustainability Appraisal (SA).

9.8 It is noted that this ‘site’ was not previously included in the Regulation 18 consultation for the emerging Local Plan and has been included at a very late stage in the development process of the Local Plan. The draft of the plan presented to the Executive Advisory Board on 13th April 2016 did not include the Garlick’s Arch. By the time the plan was considered at the Extraordinary Council meeting on 24th May 2016, it had been added.

9.9 ‘Land around Burnt Common Warehouse’ which was the previously allocated strategic site in the Regulation 18 consultation has now been removed from the proposed allocations.

9.10 Section 9 of these representations considers the performance of ‘Land at Garlick’s Arch, Send Marsh, Burnt Common and Ripley’ in the Sustainability Appraisal. This illustrates that the site performs poorly when compared to the other sites considered for Send and Send Marsh against several criteria including flood risk, distance from nearby amenities including schools, railway stations and recreational facilities. In addition the site is also categorised in the Sustainability Appraisal as high quality agricultural land and not previously developed land which also contributes to its poor performance against the appraisal criteria.

9.11 Send Marsh/Burntcommon is designated as a ‘large village’ which is defined in the ‘Guildford Borough Settlement Hierarchy’ as being “unsuitable for substantial growth but capable of accommodating a proportionate extension.”

9.12 The office for national statistics breaks down the 2011 Census records into various neighbourhood areas. The relevant areas in relation to our site are:

- Neighbourhood Area Guildford 001D – Burnt Common
- Neighbourhood Area Guildford 001E – Send Marsh.

9.13 The statistics for these areas show that there are 456 households in Send Marsh and 505 in Burnt Common. Based on the mid 2011 population estimates this gives an average of 2.68 people per household across both neighbourhood areas.

9.14 Using the Council’s population figure of 1,931 from 2011 for Send Marsh / Burntcommon and applying this 2.68 average then there are estimated to be approximately 720 households in Send Marsh / Burntcommon.

9.15 Garlick’s Arch at 400 homes therefore, represents an approximate increase of 56% on the total household numbers in Send Marsh / Burntcommon. This can only be considered to be ‘substantial growth’. The size of the allocated site and the number of new dwellings proposed cannot be considered to represent a ‘proportionate extension’ of the village but rather representative of substantial growth.

9.16 Policy A43 and the allocation of ‘Land at Garlick’s Arch, Send Marsh, Burnt Common and Ripley’ is therefore contrary to the settlement hierarchy established in the evidence base for the emerging Local Plan and its inclusion in the Local Plan is therefore considered to be unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The Garlick's Arch Policy A43. Policy A44 1.9ha. Policy 42. I object with the following points on these policies:

1. The building on the Green Belt at Send at Garlick's Arch, Clockbarn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded. Garlick's Arch has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the h century would be endangered. The site is also subject to flooding.

2. The development at Garlick's Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks' notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

3. The proposed industrial development of 7,000 sq m Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

4. To building 45 houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is far too narrow and bendy to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the new marina will generate heavy traffic too. The lane and the main A247 road cannot take any more.

5. To the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The subsoil of the existing site contains documented unsafe land fill waste which is currently vented.

6. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A43A. I object to this policy on the following point:

1. The proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day. I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/M25.

I object to the development at Garlick's Arch for 400 houses, which was sprung on the village at the last moment with only 2 weeks' notice and without any prior consultation. This has been quite disgraceful. Also this proposed development is simply not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick's Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick's Arch because the site has particular conservation sensitivity since it is covered in ancient woodland. Trees which have existed since the 16th century would be endangered. The site is attractive open countryside and part of the permanent Green Belt, with is protected under the National Policy Framework. It also represents an unrestricted sprawl and goes against the purposes of the Green Belt which include the prevention of merging towns and settlements. Oh yes, and the site is also subject to flooding!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1059  Respondent: 15262273 / Michael Mead  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
I have previously objected to the proposed development of 400 houses on this Green Belt prime Agricultural land and historic woods. The new policy A43 now adds eight travelling/showpeople pitches to this development rendering the Policy even more inappropriate for the majority of G Rated properties within a 2 mile radius of this area.

The Borough council is reminded that in past 2/3 years it refused planning application for Oldlands to build 25 houses in the same location. The Council therefore cannot still incorporate this Policy within the Plan and still maintain that it applies Consistant Practice in their Planning Policy.
This proposal would increase the local population so considerably and destroy totally the villages of Send and Ripley which in reality is not something that Ratepayers, in West Clandon, Send, and Ripley together with outlying areas would be prepared to accept. There is certainly no genuine reason to destroy Green Belt and Ancient Woodland which it contains, when Brown field sites within GBC areas could be used.

Comment ID: PSLPS16/1065  Respondent: 15263073 / James Walker  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

15.1 OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4627  Respondent: 15263073 / James Walker  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the
neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.
24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

15.I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4602  Respondent: 15263905 / Philip Walker  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been
assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be
particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 Land at Garlic Arch. This is a new site and was not included in the Regulation 18 draft and has not been consulted on previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances since it is covered by and ancient woodland. The proposed industrial site if singularly not required since the latest Employment Land Needs Assessment 2015 (ENLA) shows a reduction of 80 per cent in requirement needs of employment floor space from the previous draft plan. A new four way interchange on to the A3 at Burnt Common to serve this development would create gridlock. Have you ever tried crossing the road especially in the rush hour nigh impossible. This is a ridiculous idea and really needs to be looked at very carefully. A full transparency should be made available and looked into very carefully, otherwise gridlock will be the result. These roads are not suitable for thousands of cars.

• I object to Policy A43 which covers 30ha of land at Garlick's Arch, Burnt Common on multiple grounds:
  ◦ Again, this site is a new entry in the Plan and was NOT included in the Regulation 18 draft or previous consultations.
  ◦ There is no need for an additional 400 houses on top of the 13,860 already proposed for the borough.
  ◦ The proposed industrial development of 7000 sq m is not required: the latest Employment Land Needs Assessment 2015 (ENLA) shows an 80% reduction in required employment floor space from the previous draft plan. If such space should indeed be required, it should be located at sites already serving this purpose, such as Slyfield.
The site contains ancient woodland, an already too rare occurrence in these environs for which the loss would be significant.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

RPC objects to the insetting of Send and Burnt Common in general, but particularly objects to the extension of the settlement to exclude the Garlick’s Arch site from the Green Belt and to allocate the land for built development. In the case of Site A43 and Site A43a, Send Marsh/Burnt Common, the insetting of the Garlick’s Arch allocation appears to have no other justification than the very late substitution of the Garlick’s Arch site at the Executive Meeting on 24th May 2016 itself.

The site continues to serve a number of the Green Belt purposes and is an important green buffer to the A3 and of ecological and landscape importance.

There is nothing stated in the reasoned justification in the Plan to indicate that any exceptional circumstances exist to justify the allocation and the insetting of the Green Belt boundary.

It does not appear to have been identified by the process of criteria-based assessment of site through which other sites were identified for allocation and there is no explanation for the substitution of the original A43 allocation “land around Burnt Common Warehouse” which was much more appropriate, given its largely previously developed character.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A43 “Garlick’s Arch”

62. This site is currently open rural greenfield land within the Green Belt. It has been allocated, at the last moment, for 400 homes and up to 7000 sq m of either B1(c) light industrial or a mix of Bi(c), B2 Industrial and/or B8 storage and distribution. The emergence of this site only in the Regulation 19 draft of the PSLP means that the principle of the allocation of site has not been subject to the earlier consultations and this is the only opportunity to influence the Plan before its submission to the Secretary of State. This is particularly regrettable and prejudicial given that the proposal of this site as a site for 400 new dwellings, and the provision of slip roads to A3 via policy A43A only emerged through the decision of the Council’s Executive on 11 May 2016. This meeting was held without proper notice or any opportunity for consultation to make an unexplained substitution for the site given the same policy number, on previously developed land west known as Land around Burnt Common warehouse, London Road, Send, allocated for approximately 100 homes and 7000 sq m of B class industrial uses.

63. The ministerial foreword to the NPPF by minister Greg Clark states: “because planning policy itself has become so elaborate and forbidding – the preserve of specialists, rather than people in communities. This National Planning Policy Framework changes that. By replacing over a thousand pages of national policy with around fifty, written simply and clearly, we are allowing people and communities back into planning.” [emphasis added]

64. The NPPF makes it clear that:
“69 The planning system can play an important role in facilitating social interaction and creating healthy, inclusive communities. Local planning authorities should create a shared vision with communities of the residential environment and facilities they wish to see. To support this, local planning authorities should aim to involve all sections of the community in the development of Local Plans and in planning decisions, and should facilitate neighbourhood planning.”

65. Those words sound more than a little hollow in the context of this decision, which has not gone through the exhaustive process of sieving and consulting on site allocation proposals. It is plain that the late introduction of this important and damaging proposal took place in direct breach of the approach in NPPF which seeks to involve and consult communities about proposals that affect them.

66. The site was identified in the Pegasus Report Vol 5 in 2013 as site B14, together with site B13 as part of a possible – “major village expansion”. This was rejected and not taken forward in the 2014 draft Local Plan, although the previously developed site “Land around Burnt Common warehouse “… B13 was originally allocated as A43. RPC did not object to that allocation.

67. However, the deletion of the original A43 site and its substitution with the Garlick’s Arch site is unacceptable for a number of reasons.
68. The site was assessed in the Guildford Borough Land Availability Assessment (LAA) February 2016, but as far as the RPC has been able to establish, this is the only recent assessment of the site.

69. The assessment in the LAA is woefully inadequate. The site is in an unsustainable location, poorly served by public transport, with little or no access to services and community facilities and with a noise environment dominated by traffic noise from the A3. The site does not appear to have been considered as part of the SEA/ Sustainability Assessment and it is not clear why the additional 300 dwellings are required in this location.

70. There has been no assessment of ecological impacts either in terms of species or habitats. Yet the site is well known for the presence of red kites, sparrowhawks. Bats (several species), Owls (several species) badgers, deer, foxes, and many species of invertebrates.
71. It is not clear whether, given its late inclusion, statutory consultees such as Natural England were consulted over its inclusion. The public were not consulted.

72. A site of this scale and nature should have been proposed through the local plan process so as to ensure proper consultation. It was not considered in any earlier draft of the Local Plan. Its sudden inclusion remains a complete mystery to RPC.

73. The site is largely open rural countryside of both landscape and ecological importance providing a green buffer between the heavily trafficked A3 and the settlement of Burnt Common.

74. The site fully satisfies retention within the Green Belt and serves a number of Green Belt functions and makes an important contribution to local openness.

75. The site is fundamentally unsuitable for housing development and the compromised nature of the site, by constraints such as the presence of high volumes of traffic in close proximity and the large high voltage pylons which cross the site longitudinally, as well as areas of ancient woodland mean that development would either result in substantial harm to the ancient woodland, species and habitat, lead to unacceptable living conditions or would not make best use of land. There is no masterplan to show how the scale of development envisaged would be accommodated.

76. Previous development, with much more limited housing development (up to 25 units) (Planning Reference 14/P/00219 February 2014) on this site has been refused because of the adverse effect on the Green Belt and the rural character of the site. If 25 dwelling units comprised harm to the rural and open character of the site, 400 units must be the cause of very much more substantial harm. In addition, Planning Ref 16/P/00783 Oldlands Field Yard (Outline) 9 dwelling houses April 2016 was also refused on 07/06/2016 because of the impact on the openness of the Green Belt, the significant effect on the Thames Basin Heaths Special Protection Area (TBHSPA) and the loss of rural economy.

Non sustainable location

77. The site does not represent sustainable development for several reasons.

78. Firstly the site does not provide a sustainable location, both in respect of access to transport, services and other facilities.

79. Poor access to public transport would mean high dependency on the private motor car for residents’ access to schools, shops, medical facilities, doctors’ surgeries, and all the requirements of day to day living. The size of the site at 400 units would not be capable of sustaining facilities on-site and there are no cycle routes or segregated cycling or walking areas. Clandon Station is 2 miles distance with limited parking, no cycle path and a footpath that changes sides repeatedly. The only bus service is an infrequent rural bus service. No sustainable transport assessment has informed the allocation.

80. The industrial use of the site would also be likely to generate additional traffic and use by car for those employed at the site. There is no evidence of demand for 7000 sq m of new B class uses on such a site.

81. Secondly, in terms of harm to the environment the development of the site would be likely to cause a number of substantial impacts, including harm to ecology, landscape and damage to, or loss of ancient woodland.
82. The late introduction of this allocation means that it has not formed a part of the 2016 Sustainability Assessment and no separate environmental impact assessment has been carried out in respect of the development of the site.

83. The impacts of ecology of the development of 400 units on the site have simply not been assessed and are unknown.

84. No ecological study or assessment appears to have been made.

85. Significant parts of the site are Ancient Woodland and protected by Tree Preservation Orders. Ancient woodland and veteran trees are widely recognised for their importance to biodiversity and as host for protected species.

86. The site is within 400m of the Thames Basin Heath SPA.
87. There is local knowledge of several species of owls, several species of bats, badgers, deer, foxes, red kites, sparrow hawks, invertebrates resorting to the site. It is considered likely that protected mammals, bats and birds are breeding within the site.

Poor living conditions

88. Thirdly, the site is likely to suffer from poor living conditions; in particular noise and air quality impacts from proximity to the A3 and the creation of the new junction with the A3 trunk road under allocation A43a. It is understood that a study is being carried out for the neighbourhood plan, but that exercise has not been completed and did not inform the allocation.

Pylons

89. The site is traversed by large high voltage electricity pylons, which will require a safeguarded zone beneath them where residential development cannot take place. In addition there is mention of the possibility of re-siting these pylons however it remains unclear about the cost implications or who will be funding this.

Flood risk

90. The assessment of flood risk is flawed. Large parts of the central part of the site are high risk (Zones 2&3) and flood annually. The haste with which the site has been allocated means no proper flood risk assessment has been made. Neither the extent, frequency and potential for mitigation or its effect on the developable area have not been considered. Such an assessment should be made before, not after, allocation.

Loss of agricultural land

91. The land is assessed as Grade 2 agricultural land. The agricultural use of the land will be lost if the site is developed for 400 units and 7000sq m of industrial. Loss of the best or most versatile land to development should be avoided.

Deliverability

92. Deliverability is essential to soundness. Astonishingly, no assessment has been made of the potential of the site to deliver the 400 units having regard to the proximity of the A3 and the weight and volume of traffic. The LAA is silent on this matter, not even making a note of the issue.
93. There is no assessment of the viability of development on this site or its deliverability given the range of significant constraints.

94. There is no explanation as to why a potentially suitable site (i.e Land Around Burnt Common Warehouse( B13, the previous 2014 Plan’s A43) was dropped and replaced by this fundamentally unsuitable site for the development of substantial new housing.

Conclusions

95. The allocation of Garlick’s Arch is fundamentally unacceptable in a number of respects and would not constitute sustainable development, contrary to the NPPF. The allocation has not been informed by evidence of its environmental impacts or its suitability for development and this aspect of the SPLP is plainly not sound.

RPC objects to this allocation and recommends a modification to the Plan in that the allocation should be deleted in its entirety.

Policy A43a Land for new north facing slip roads to/from A3 at Send Marsh/Burnt Common

Areas of land on both sides of the A3 are identified for future highway work in providing slip roads for the A3. The provision of land for slip roads to the A3 in allocation A43a is largely to provide enhanced highway access so as to serve inappropriate large scale housing development elsewhere in the Send/Ripley area; in particular, the sites at A25 Gosden Hill Farm and Site A35 at former Wisley Airfield currently served by the inadequate rural network and including 400 units proposed on the Garlicks Arch site.

96. The slip roads A43a are not in any Highways Programme and their delivery is very uncertain. Highways England have no provision to look at the A3 in any area until at least 2020/2022 and therefore it is unknown whether these slipways will ever be developed. Infrastructure should be in place before development commences.

97. There does not appear to have been any report to the Executive Committee to support this allocation and the LAA 2016 is hopelessly inadequate as an assessment of the environmental impact on the site or as an assessment of its suitability for the development proposed. RPC are concerned that it appears that Members were compelled to make the decision to allocate the site with very little information and without any proper assessment of the constraints of the site or any evidence of its deliverability.

Conclusions

98. RPC objects to this allocation and recommends that the Plan should be modified so that the site should be excluded from the allocations and from development and its current Green Belt status should be retained.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/8318  Respondent: 15278465 / Chris Wright  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick’s Arch because:

1. This is permanent Green Belt land and there are no “exceptional circumstances” to change this.
Huge objections from local residents have been ignored by you.

It is absolutely criminal to destroy ancient woodland that is rare and should be cherished not destroyed.

The joining up of Ripley and Send would create a polluted busy corridor and is against Green Belt principles.

It would increase traffic in our area to an unacceptable point.

There are too many houses proposed for this site for the area, roads and infrastructure to support.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPS16/1281  **Respondent:** 15284673 / Andrew Bell  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I strongly object to late inclusion of site A43 Garlicks Arch due to the following reasons:

There must be no development on designated Greenbelt land. It’s too important to the balance of the local community and the environment. Even a small area will make a big difference to wildlife. It’s what makes this area a pleasant place to live and visit. I object to any insetting of any villages from the Greenbelt.

The development will destroy the character of the surrounding area.

This development will cause more flooding due to the density or the proposed housing.

This development will add to existing local traffic congestion at peak times. There are constant backups and delays with current levels of traffic.

This development will cause more cramped conditions on commuter trains to London, lack of train station parking spaces etc.

The industrial site will add to the hot holes and the poor condition of all local roads.

This development will add to mean more local children will not get a place at their local school. There is no plan to meet secondary school requirements.

This development will put more pressure on the local medical centre in Send.

This development will not provide affordable housing due to their cost and the location is too far from Woking or Guildford where residents are likely to work

This development is poorly thought through and seems to be driven by an attitude of let’s build lots of homes, destroy the local area and make some money! Why not start with the brownfield sites first. How about focussing on the infrastructure first!

Please don’t destroy Ripley and Send.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

I am writing to Object to the Policy A43 change at Garlick’s Arch because despite the changes:

- It still recommends providing a large amount of new homes, which is always going to have an enormous impact on a local community.
- It will still generate more traffic which will cause more congestion on local roads in and around Send and Ripley.
- The air quality will get worse with the increase in vehicles.
- It still means a greater pressure on, already overstretched, local public services.
- It still does not feel like there is an exceptional circumstance to remove land from the Greenbelt.
- It begs the question, what happened to all the thousands of previous objections?

**POLICY A43 – LAND AT GARLICKS ARCH, SEND MARSH**

The proposal for 400 residential units and 6 travelling showpeople's plots on a Green Belt site is contrary to current policies and ignores the many thousands of objections previously made by local people.

No ‘Special Circumstances’ exist or have been put forward to justify development on this Green Belt site.

The development will put extreme pressure on local roads and when considered with the other nearby proposals for development currently being put forward by the Council in the Draft Local Plan, (both residential and commercial/industrial), will result in gridlock at peak times with the resultant detriment to the quality of life and environment in the area, particularly considering the impact that the proposed North and South slip roads on to the A3 would make by drawing more traffic on to the local road network.

Residential development alongside major highways is known to cause health problems in the very young and old and if this site is developed the long term impact on the residents will in turn put more pressure on local and County Health facilities, particularly if the A3 slip roads abutting one side of the site, (as previously mentioned) are constructed thus increasing traffic flow around the site. The A3 is a major Trunk road that will inevitably become overloaded in the not too distant future given the lack of infrastructure improvements proposed by the Council to cope with the influx of traffic with regard to both proposed imminent and long term development.

The site contains ancient woodlands and should be protected (and enhanced) against development that might impinge upon the quality of the surrounding area and adversely affect the survival of the trees which are regarded as an important amenity for the area and can be seen from distant views.

Garlicks Arch adds to the important Green Barrier that separates the villages of Ripley and Send Marsh and any erosion of this will set precedent and eventually result in the merging of the two villages contrary to National Green Belt policy.

The site is currently designated as within Flood Zone 2/3 and as such development within Flood Plains should be avoided. If development is inevitable then Surface Water mitigation/management must ensure that flood water is properly dealt with and **NOT** directed so as to cause flooding elsewhere on existing developed land.

There is no proven demand to accommodate Travelling Showpeople in this area who, by the very nature of their business, will bring more traffic problems for the Ripley and Send villages when transporting very large vehicles to and from the site, where the visual impact of the vehicles and structures when stored, will be detrimental to the surrounding area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the plan for the Garlick's Arch, for there is not the need for the number of houses proposed, nor the industrial site. It will also mean the closure of the Clay Pigeon Shooting club on land by Kiln Lane, as well as impinging on the attraction of the surrounding area. The club has been there since 1980 and will be unable to relocate, thus removing a facility enjoyed by upward of 100 members and guests.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the inclusion of Garlick's Arch (A43)

Garlick's Arch is Green Belt and there are no exceptional circumstances which allow for it's removal from the Green Belt (Policy P2) - housing need is NOT an exceptional circumstance.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

GBC have removed a brownfield site at Burnt Common replaced it with Garlick's Arch, despite the preference for previously developed land in the Plan.

The site is not appropriate because:

- It floods regularly
- There is no adequate public transport, and no plans to improve local roads
- GBC do not propose to improve local schools, medical or utilities to cope
- It has ancient woodland and is home to many wildlife There is no wildlife report for the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Garlick’s Arch (A43)
Garlick’s Arch is protected Green Belt land. There are no excuses for removing it from the Green Belt.
The land has no transport infrastructure, it’s liable to flooding and the woodlands (including more than 80 ancient oaks) and the wildlife they support should be preserved for future generations.

Air quality (Policy I3)
I have huge concerns about the air quality/ increased air pollution, which will have an impact on the health of residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the inclusion of the land at Garlick's Arch (A43)
Garlick's Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it's removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.
The Plan states the preference is to use of previously developed land, but GBC have replaced a sustainable brownfield site at Burnt Common with Garlick's Arch.
The site is not appropriate because:

• There is no sustainable transport
• The site is liable to frequent flooding
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the
• There are no plans to improve local schools, medical or utilities to cope.
• The Draft Local Plan Infrastructure schedule does not provide for this site at all

Furthermore, no Section 18 consultation took place on this site prior to this site's inclusion in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

POLICY A43 AND A43a – Garlick’s Arch

We object to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

We have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road land is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham school was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.) The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the
pavement- often at speed. It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4410  Respondent: 15300385 / Mark Harding  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

POLICY A43 – LAND AT GARLICKS ARCH, SEND MARSH

• The proposal for 400 residential units and 6 travelling showpeople plots on a Green Belt site is contrary to current policies and ignores the many thousands of objections previously made by local people.
• No ‘Special Circumstances’ exist or have been put forward to justify development on this Green Belt site.
• The development will put extreme pressure on local roads and when considered with the other nearby proposals for development currently being put forward by the Council in the Draft Local Plan, (both residential and commercial/industrial), will result in gridlock at peak times with the resultant detriment to the quality of life and environment in the area, particularly considering the impact that the proposed North and South slip roads on to the A3 would make by drawing more traffic on to the local road network.
• Residential development alongside major highways is known to cause health problems in the very young and old and if this site is developed the long term impact on the residents will in turn put more pressure on local and County Health facilities, particularly if the A3 slip roads abutting one side of the site, (as previously mentioned) are constructed thus increasing traffic flow around the site. The A3 is a major Trunk road that will inevitably become overloaded in the not too distant future given the lack of infrastructure improvements proposed by the Council to cope with the influx of traffic with regard to both proposed imminent and long term development.
• The site contains ancient woodlands and should be protected (and enhanced) against development that might impinge upon the quality of the surrounding area and adversely affect the survival of the trees which are regarded as an important amenity for the area and can be seen from distant views.
• Garlicks Arch adds to the important Green Barrier that separates the villages of Ripley and Send Marsh and any erosion of this will set precedent and eventually result in the merging of the two villages contrary to National Green Belt policy.
• The site is currently designated as within Flood Zone 2/3 and as such development within Flood Plains should be avoided. If development is inevitable then Surface Water mitigation/management must ensure that flood water is properly dealt with and NOT directed so as to cause flooding elsewhere on existing developed land.
• There is no proven demand to accommodate Travelling Showpeople in this area who, by the very nature of their business, will bring more traffic problems for the Ripley and Send villages when transporting very large vehicles to and from the site, where the visual impact of the vehicles and structures when stored, will be detrimental to the surrounding area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the Policy A43 change at Garlick’s Arch to allow for 400 homes and 6 Travelling Show people plots. This proposal will saturate our village as this number of houses is excessive and will destroy the ancient woodland that has existed for hundreds of years. Guildford Borough Council should be protecting this area. It will join up Ripley and Send villages unnecessarily and will erode the Green Belt and generate excessive traffic, blocking the already gridlocked roads. The area is prone to flooding and this proposal will increase the likelihood of further flooding. There is no demand for Travelling Showpeople plots in this area, and ‘no exceptional circumstances’ exist to destroy the Green Belt status of this location. There are others areas in the Borough available for development. This area is already over-burdened, the Doctors surgery and schools are struggling to cope with existing volumes as it is.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to Policy A43 change at Garlick's Arch because:
• There is no proven demand for Travelling Showpeople plots in this location
• It will cause the village to be 'over-developed' with the consequent impact on local services such as schools and health services which are already stretched
• It will join up the villages of Ripley and Send into one ribbon development and so defeat the key purpose of having a Green Belt
• It is a flood zone 2 area
• It will cause excessive traffic which will increase air pollution and cause congestion

4). I object to the inclusion of the land at Garlick's Arch, Send Marsh J Burnt Common and Ripley (A43).

Garlick's Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it's removal from the Green Belt (Policy P2).Central Government state clearly that housing need is not an exceptional circumstance.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1397  Respondent: 15304897 / Richard Baker  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1416  Respondent: 15304929 / Rosemary Wood  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick's Arch.
The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Glandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt. I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development on this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A2.47 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current 'soft' edge approach to Guildford.

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (BS). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13). The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:**  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

---

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the **thousands of previous objections** made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley - this is of significant concern to me as I live on Send Barns Lane, the traffic is already heavy and can also be very fast.

**Objections to Guildford Borough Proposed Submission Local Plan (June 2016)**

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

I am objecting on the following points:

1. **I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)**

Garlick’s Arch is protected from development as Green Belt. There are **no exceptional circumstances** which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is **not** an exceptional circumstance. The inclusion of this site was added to the Local Plan at the last minute without any consultation or notification to the local residents and as a homeowner in the road that runs alongside this development the local infrastructure, air quality and ancient woodland the site would destroy have all been disregarded.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch. No consultation took place on this, and GBC’s Green Belt & Countryside Report does not even cover Garlick’s Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure – the roads around the site, apart from the main road are little more than country lanes, at points only one car wide, as soon as the main road backs up, which it does at peak times, cars (including myself) head for the lanes and these will become impassable.

• The site is liable to frequent flooding, every time it rains the Portsmouth Road opposite the site floods despite improvements. At the end of Burnt Common Lane the gas mains becomes flooded regularly and this effects the entire road – check this with the Gas Board who have to pump it out.

• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan, Kites, deer and many other species are found on this site.

• There are no plans to improve local schools, medical or utilities to cope – it almost impossible to get an appointment at the local surger as it is.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/1408  Respondent: 15312769 / Norah Johnson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the fact that the site at Garlick’s Arch and Gosden Farm are traversed by electricity pylons.

“A UK study of 29 000 cases of childhood cancer, including 9700 cases of leukaemia, found a raised risk of childhood leukaemia in children who lived within 200 m of high voltage lines at birth compared with those who lived beyond 600m (relative risk 1.7)

There was also a slightly increased risk for those living 200-600 m from the lines at birth (relative risk 1.2, P for trend < 0.01); as this is further than can readily be explained by magnetic fields it may be due to other aetiological factors associated with power lines.”

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/3249  Respondent: 15312769 / Norah Johnson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch.

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch.
The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [ than the Burnt Common site did ]”

The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

I object to the amendments to the Local Plan policy A43 changes at Garlick's Arch.

You have totally ignored the 32,000 comments made by the local people and are not representing the wishes of the electorate that put you in office.

You have included provision for travelling show people where no demand has been made at this location.

This is an area of ancient woodland included in the Green Belt and you have shown no 'exceptional circumstances' to build on this area.

To put 400 homes in such a small area is excessive and will join Ripley, Burnt Common and Send together which will take away the character of the villages around Guildford which is a feature of this area.

This area, especially where it joins onto the Portsmouth Road is liable to flooding and it has effected the gas main several times on the corner with Burnt Common Lane and further built development will make this problem worse as there will be less ground to soak up the rain, and is currently a zone 2 allocation.

The fields at Garlick's Arch are contaminated with years of lead shot.

The traffic situation in the area id already at capacity at certain times of day and when there are traffic problems on the A3 and M25 and adding thousands of cars in this area will only cause gridlock.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A43. I OBJECT to Garlick's Arch being built on.

This is greenbelt land and will be completely destroyed if there are 400 houses and industrial and warehousing developments built there. There is no exceptional circumstances to build on this land. There is no need for industrial developments in Send, build at Slyfield where one already exists. Trees cannot be replaced quickly and act a noise barrier to the A3. There is also not enough Secondary Schools in the area to cater for that many extra people. Additionally, there are no buses or trains to prevent anybody locally having a car at commuting times, you cannot even get back from Woking Station long after 7pm!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A43 change at Garlick's Arch for the following:

The proposal to build 400 new homes will result in excessive traffic throughout the Send & Ripley roads which are already overcrowded. The residents of these 400 homes will require amenities in the local area such as doctors & dentists surgery which are currently struggling to keep up with current demand. A doctors appointment can take up to a week to secure.

The proposal for travelling showpeople plots has increased since the last plans and there is no evidence any plots are required in the Send area.

The Green Belt and woodland around Garlicks Arch is irreplaceable, loss of it will result in the joining up of the villages of Ripley & Send defeating one of the key purposes of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A43 change at Garlick's Arch - now 400 homes and 6 travelling showpeople plots

There is no proof of the need for Travelling Show people plots in this location. The Village of Send is on Green Belt Land and therefore should only be built on in exceptional circumstances. This development stops the green belt achieving one of its purposes to prevent urban sprawl and the increase in houses would represent over-development of our villages.

It will result in Send, a small village, becoming overdeveloped.

Too many new houses for the current infrastructure to cope with.

The local roads in Send and Ripley are extremely busy with commuter traffic everyday and wouldn't be able to cope with all the extra cars etc.

The area is subject to flooding so not suitable for further development.

An area of ancient woodland, part of the Green Belt, would be destroyed for an unnecessary development.

Very few travelling shows come to this area so I can't see a need to accommodate them

I OBJECT

POLICY A 43

. 30 ha LAND AT GARLICK'S ARCH, Burnt Common, designated for 400 houses and 7,000 sq m of industrial and warehousing. There is no need for any more houses on top of the 13,860 already proposed for the borough. This site is NEW and was not included in the Regulation 18 draft and has NOT been consulted upon previously. It is Green Belt permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The proposed industrial development of 7000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

6. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
b. Garlic’s Arch and Burnt Common Interchange (site nos. A43 and A43a)

1. **Outside current development boundary**: I OBJECT since this development lies outside the existing housing outline of the village, and should therefore be deleted to avoid both loss of green belt land and creeping development between Send, Woking, and Guildford.
2. **Traffic Infrastructure Capacity**: I OBJECT to the proposed new interchange onto the A3 at Burnt Common since this would generate significant new traffic movements that surrounding roads cannot accommodate.
3. **Traffic Infrastructure Evidence**: I further OBJECT to the proposed new interchange onto the A3 at Burnt Common since associated transport evidence is incomplete and does not justify additional A3 access at this location.
4. **General Infrastructure**: I OBJECT to development at Garlick’s Arch for 400 houses as there is insufficient infrastructure to support the development, including utilities, social amenities, schooling, public transport, and medical facilities.
5. **Industrial use**: I OBJECT to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is not a sustainable development. It is removed from the major population centres in Guildford and Woking necessitating a large increase in public transport services and/or major additional traffic movements for staff travel and business logistics. If there is a need for 7,000 sq m of industrial space within the Borough it should be located at Slyfield where there is a 40ha site available and where it would be largely welcomed.
6. **Flooding**: I OBJECT to development at Garlick’s Arch. This area is classified by the Environment Agency as being in a higher flood risk area than the Council’s own assessment and has flooded many times in recent years. Therefore the Council’s own assessment is invalid and the site must not be developed.
7. **Environment**: I OBJECT to the destruction of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• **Traffic Infrastructure Capacity:** I **OBJECT** to the proposed development because this would generate significant new traffic movements that surrounding roads cannot accommodate.

• **Flooding:** I **OBJECT** to development at Garlick’s Arch because the area is classified by the Environment Agency as being in a higher flood risk area (zone 2) than the Council’s own assessment and has flooded many times in recent years. Therefore the Council’s own assessment is invalid and the site must not be developed.

• **Environment:** I **OBJECT** to the destruction of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

I OBJECT to the fact that the first notification I received of the proposed changes to include development of Garlicks Arch was as in early June via a leaflet distributed by a concerned neighbour and not via Guildford Borough Council.

I OBJECT to the fact that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment which shows that industrial space at Burnt Common IS NO LONGER NEEDED. I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

I object to Policy 43. Land at Garlicks Arch.

There is no proven need for additional 400 new houses on top of the 13,860 already proposed by the borough.

The Surgery at Send cannot cope, the local schools cannot cope. The entire plan is ill conceived.

Summary.

Your plans have blighted my family home for years, the plan originally put a development at the back of my house, and now your new plans have changed it to the development at the front of my family home. Therefore having a huge detrimental effect on the value, and destroying our views of the farmland at the front. Therefore your poorly thought through local plan have provided uncertainty and anxiety to myself and my family.

As no speed restrictions, speed camera or traffic calming measures on the blind corner heading towards Send over the A3 is an accident waiting to happen. As it is we can only turn left when leaving our home and even then it is very dangerous.

You have not addressed the infrastructure requirements such as schools, health centres and hospital capacity, in these proposals, for new homes.

Therefore this plan needs to be thought through and new alternative proposals need to be looked at.

RE: OBJECTION to Guildford Borough Council 2016 Revised Draft Local Plan  

I am writing to object to the revised draft 2016 Local Plan for the reasons listed below:  

1. I OBJECT to Policy A43 Garlick's Arch as this was a late substitution for an alternative site known as Land at Burnt Common (also included in the 2014 Draft Local Plan). There was no consultation on this substitution, following an emergency meeting of the Executive on 11th May 2016. This does not comply with Regulation 18 of the Planning and Compulsory Purchase Act 2004 relating to the Statement of Community Involvement, as
there has not been any community information or consultation regarding Garlick's Arch site. In addition, this site substitution also remained as the same policy number ie A43, which has led to further confusion within the local community. The original Policy A43 site of brownfield land at Burnt Common is already designated as industrial and indeed the owners of this site have already spent at least two years developing planning proposals with GBC to include 100 homes in addition to a fully developed industrial site, with ample space to accommodate at least an additional 7000 sq m. The Garlick's Arch site however is not suitable for development given that it is designated as Green Belt (policy P2). The Local Plan clearly states a preference for best utilising previously developed land. Why then has a brownfield site been removed and replaced with a Greenbelt site?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed development at Garlick's Arch. The destruction of ancient woodland will still result in unacceptable levels in the increase of noise and pollution to the residents of Send marsh and Burnt common. It is also an important habitat for declining numbers of hedgehogs and thrushes and the wild life.

I object to the number of houses and industrial units at Garlicks Arch. I question the need for those houses in the area.

Comment ID: PSLPS16/1557  Respondent: 15340929 / Claire Smylie  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to make the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which is protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/4708  Respondent: 15340929 / Claire Smylie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been
assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be
particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Policy A43/A43a - I strongly object to a new interchange with the A3 at Burnt Common as this would generate a huge volume of traffic through the village. It is already congested during rush hours especially with the school on Send Barnes Road. When the northbound lanes of the A3 are congested both in the morning and evening rush hours (which is most weekdays) Send Village is totally congested and then many local drivers speed down country lanes (Potters Lane) to avoid Send Road/Send Barnes Road and drive dangerously. Additional traffic will only exaggerate the situation.

Additional housing at Garlick's Arch will exasperate and add to the local chaos on the roads and the already stretched amenities. I therefore strongly object to building 400 Houses and 7000 sq metres of industrial space at Garlick's Arch. The site floods and is covered by ancient woodland. The industrial is not needed as there are many offices and warehouses sitting idle in the local area. Fill these sites first before developing more empty units. Any new industrial units should be built at Slyfield where there is already an established site and the rods can cope with the traffic. Guildford's housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.

In addition to the other proposals, I object to Policy A42, 45 houses proposed to be built in Clockbarn Nursery, Tannery Lane. Tannery Lane is a country, single access and the staggered cross roads- junction with Send Road is already dangerous, especially due peak times. This will just add to the growing congestion in Send. Planning permission has previously been given for 64 apartments at the Tannery and for building the marina, both of which will generate additional traffic (large vehicles for boats etc) The lane cannot cope with any more traffic.

there is no proven need to supply Pit he's for travelling show people. This is a green belt area which separates two villages. Building on flooded areas, contaminated by lead is not an ideal place for building. As a home owner, I would not wish to purchase a dwelling on such land as it would pose an insurance problem. Again, Send and Ripley cannot operate an excessive new dwellings. The roads and entities would suffer.

2. I OBJECT to building 400 houses and 7000 sq metres of Industrial space at Garlick's Arch, Opposite Send Marsh Road. This is an area of Ancient woodland and very prone to flooding indeed recently over half a million pounds was spent downstream of this location to prevent flooding to houses in Maples Road and surrounding area's. The Industrial space is not needed but could however already be accommodated at Slyfield Park in nearby Guildford. Guildford Boroughs housing requirements have been shown to be grossly over exaggerated, and they refuse to disclose what formula they use to arrive at their calculated requirements. Proper use of Brownfield sites within the Borough should eliminate the need to encroach on such a Green Belts area!

Attached documents:

Comment ID: pslp172/1551  Respondent: 15341985 / William Walker  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 change at Garlick's Arch because:

It ignores the thousands of previous objections made by local people. It will cause extensive over development of our village and the number of homes is excessive. It will generate more traffic which will not only block up the local roads of Send and Ripley, but also the major A3 trunk road into Guildford which already struggles to cope with current traffic levels during rush hour periods.

It is also a flood zone 2 allocated area, and subject to frequent flooding. There is also no proven demand for Travelling Show-people plots in this location.
I OBJECT to the location for new employment floor space at Garlick's Arch:

Proposals for new industrial, warehousing and storage (use Class 81c, 82 and 88) floor space will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floor space to be located at Garlick's Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (BB).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance its impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that, with this site being added at the 11th hour, no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

Inadequate notification and planning for Developments 43 and 43a

The developments on Land a Garlick’s Arch were not included in the Draft Local Plan 2014, and it is only in the Draft Local Plan 2016 that I first learnt of them. Therefore, I object because it is unfair to make such a major change to the Plan with so little prior notification, and allow such a short consultation period of only 6 weeks.

I object to policy A43

The land at Garlicks Arch is covered in ancient woodland with some of the trees dating back as far as the sixteenth century.

The wildlife and fauna is prolific in this area and it is a major part of the green belt which must be protected.

This area also allows for natural drainage of surface water.
The National Planning Policy Framework prevents the merging of settlements and if this development was allowed then it would contravene that policy.

The infrastructure is not in place to accept such an increase in traffic.

The local area is already at breaking point at peak periods and this development would virtually bring the area to a standstill at peak times.

The doctors surgery could not take all of the predicted numbers of new people moving into the area.

The local schools would be in the same position as the doctors surgery, with more people than it could cope with.

Guildford Council have just refused planning permission for nine dwellings on Oldlands Field Yard, planning application number 16/P/00783, which is part of the Garlick's Arch site. All of the reasons for refusal given by the council for this development must surely then apply to the whole of the Garlic's Arch area.

I object strongly to the building at Garlick's Arch which is covered in ancient woodland. This land should be protected by the NPPF which prevents the merging of settlements.

I also object to the slip roads at Burnt common as the A247 is already a very busy road and dangerous to cross. It would cause a 'rat-run' through send.

Policy A43 & A43a - Land at Garlick's Arch, Send Marsh/Burnt Common and Ripley  

I object to the housing and industrial developments proposed under policies A43 and A43a. The existing road infrastructure, local medical centre, school and shops would be completely overwhelmed. The new slip roads and junction would funnel traffic to Woking, it would become a complete bottleneck - thereby raising a completely new problem. The lovely countryside feel of the area would be lost. Please consider developing brownfield sites as part of industrial development.
I am also questioning the process under which Guildford Borough Council are consulting. These are new developments and therefore should be subject to a full consultation under Regulation 18. Consulting via Regulation 19 in this manner feel like a cheat.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the building of 400 houses and an Industrial space at Garlick Arch.

This site in particular is covered with woodland and pasture and certainly never intended for building purposes.

The site floods dreadfully, water coming off the A 3 into the stream which then floods the fields.

We have photographic proof of this as it is Cobham Sporting Gun Club site and has been for the best part of 30 years and floods often.

The Industrial proposal should be sited at Slyfield which would be ideal to extend and keep in one place.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan. Please ensure that I receive written confirmation that you have received this correspondence by emailing me your acknowledgement.

Please also ensure that my objections are seen by the relevant Planning Inspector.

I have itemised my objections below but also wish to support some of my points by recalling personal experience and other observations (A-C)

1. **FLOODING:** The Garlick's Arch area is a catchment area for The East Clandon. This stream poses a significant flood risk to parts of Send Marsh, especially when there is heavy rainfall in a short time period. Any development of the Garlick's Arch area will significantly increase the rate of "run off" and this is likely to overwhelm the capacity of the stream though Send Marsh.
2. Increased traffic congestion: Traffic levels in the area are already high. The road infrastructure cannot cope with more. This is highlighted when there is a problem on the A3 or M25. Traffic diverts through the Ripley / Burnt Common area and there is gridlock.

I respectfully remind Guildford Borough Council that it has a duty of care to residents and this must be taken into consideration when evaluating the impact of traffic in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/6519  Respondent: 15349281 / Steve Aptel  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I object to building 400 houses and 7000sq metres of industrial space at Garlick's Arch. This area is known to flood. It is part of the Green Belt and is covered by ancient woodland. With proper use of brownfield sites, this Green Belt site is not needed. It would also add additional traffic to the Portsmouth Road and through both Ripley and Send. The local area does not have capacity at the doctors surgery or at the local primary schools. There is already huge concerns by current local residents about the lack of secondary school places for this area, to which this would add increased demand.

The proposed minimum of 400 houses to be built, coupled with the sites for "Travelling Show People" (why do they need permanent sites if they are "Travelling"?), and storage, is a development far too large for the area. The houses will be on Green Belt Land and result in a huge conurbation when coupled with the proposed development of Wisley Airfield. The roads in this area are already greatly overcrowded, with often poor air quality as a result. It will also involve the destruction of woodland full of glorious oaks which are a haven for wildlife.

2. I OBJECT to building 400 houses and 7000 sq metres of Industrial space at Garlick’s Arch, Opposite Send Marsh Road. This is an area of Ancient woodland and very prone to flooding indeed recently over half a million pounds was spent downstream of this location to prevent flooding to houses in Maples Road and surrounding area’s. The Industrial space is not needed but could however already be accommodated at Slyfield Park in nearby Guildford. Guildford Borough’s housing requirements have been shown to be grossly over exaggerated, and they refuse to disclose what
formula they use to arrive at their calculated requirements. Proper use of Brownfield sites within the Borough should eliminate the need to encroach on such a Green Belt area!

2) I object to Policy A43 change at Garlick’s Arch because: It ignores the thousands of previous objections made by local people. It will cause extensive over development of our village and the number of homes is excessive. It will generate more traffic which will not only block up the local roads of Send and Ripley, but also the major P3 trunk road into Guildford which already struggles to cope with current traffic levels during rush hour periods. It is also a flood zone 2 allocated area, and subject to frequent flooding. There is also no proven demand for Travelling Show-people plots in this location.

14. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I object to the late inclusion of the Garlick's Arch site A43 opposite the Send Marsh Road. This is a Green Belt site with ancient woodland and is prone to flooding. The planned 7000 sq metres of industrial site is not suitable and if required should be sited at Slyfield where there is already adequate space for such warehousing. Also the requirement of 400 houses on this site is based on dubious calculations which Guildford Council have refused to disclose. With proper use of Brownfield sites in and around Guildford, this Green Belt site is not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.

- There are no plans to improve local schools, medical or utilities to cope.

1. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object most strongly to the plan to build 400 houses and 7000 sq m of industrial spaces at Garlick’s Arch. As well as threatening ancient woodland, this proposal destroys the green swathe of land which is all that separates Send Marsh
(where I live) from the traffic and pollution of the A3. The implications of the infrastructure of roads and local services (the Medical Centre and schools for example) are unsupportable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Moving back to the inclusion of land at Garlick's Arch (A43) where a mix of residential and Industrial buildings are placed within the GB, I object to this. Why was the perfectly acceptable BF site at Burnt Common removed from the Plan, late on. There is no evidence that the proper procedure and consultation has been carried out due to the apparent haste in which the action took place. Sec. 18 of the Planning and Compulsory Purchase Act 2004 requires the LA. to consult and involve the local community.

Policy A43 Land at Garlick's Arch, Send Marsh
I object to the A43 changes at Garlick's Arch as follows:
1. You have completely ignored the thousands of previous objections made by local people
2. Why should there be a plot for Travelling Show people in this location when there is no proven demand for this? These people lead a transient lifestyle and therefore there is no need to provide them with a plot of land.
3. You have not provided nor can you justify your reasons for proposing to build on the beautiful permanent Green Belt, there are no exceptional circumstances to allow you to do this.
4. Your proposals will mean our village is 'over developed' and the number of homes excessive.
5. We have beautiful and exquisite ancient woodland that have existed since the time of Elizabeth 1, why do you want to destroy this?
6. These changes will join up Ripley and Send and completely defeat the purpose of the Green Belt
7. This area is subject to flooding and is currently in flood zone 2 and it is contaminated with lead shot which has built up over the last 50 years
8. It will generate more traffic that will cause chaos in the local roads of Ripley and Send

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of
this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for
turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham
School was that the redevelopment of the school was not essential. As and when it became essential Government funding
would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being
unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the
pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge
concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which
forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and
make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current
“soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site
will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c),
general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the
removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly
acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from
the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this
site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the
Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of
Community Involvement, has been complied with for this site. This only came to light for local residents following a
Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so
there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services
in the area and no train station within reasonable walking distance it is impossible for any development on this site to
offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There
are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders
(Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the
woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The
development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The
Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services
such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any
residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

1. **POLICY A43 AND A43a – Garlick’s Arch**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.
The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4666  Respondent:  15368993 / Tessa Spink  Agent:  
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no
proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to 400 houses and 7000 sq metres of industrial space being built at Garlick's

This will create frequent gridlock due to the extra vehicles. Also when there is a problem/crash or excessive rainfall the Ripley Bypass is often closed and traffic is sent through Send and Ripley - creating miles of traffic queues in all directions. The pointless destruction of ancient woodlands would make the pollution in this area far greater than the problems that already exist. The accurate calculations for housing have not been released, therefore this is unjustifiable and unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I Object to the building of 400 houses and 7000 sq metre of industrial space at Garlicks Arch opposite Send Marsh Road. This site floods and is covered by ancient woodlands. The industrial space here is not needed, and would be better sited at Slyfield. Woodland should be protected and conserved - once gone it cannot be reclaimed - there are better brown field sites that could used.

There is heavy traffic already on local roads as rushhour traffic tries to find "cut throughs". Our Roads cannot cope with such an increase in population, this will result in infrastructure overload

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

13.  I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (82) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultat ion in relation to

the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the proposed new interchange onto the A3 at Burnt Common because the Transport Evidence is incomplete and unreliable and shows there will be congestion because Send would be used as a cut through to the A3/ M25.
• I object to the fact that infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing Roads, doctors and schools will be unable to cope.

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.
The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement - often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

C.ii. Policy A43 Garlick’s Arch – My Objections

>> 1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

>> 2. It ignores all the thousands of previous objections made by local people

>> 3. There is no proven demand for travelling show people plots in this location

>> 4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

>> 5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
21. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement-often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object Policy A43 Garlick’s Arch. Send Marsh/Burnt Common/Ripley

To the building of 400 houses on this site, Because it was not include in the regulation 18 draft and has not been previously consulted upon.

It is on Green belt, permanently protected by NPPF to prevent the merging of settlements. There are no exceptional circumstances to take this site out of the Green Belt.
The site is covered in Ancient Woodlands, containing trees that have stood since the 16th Century, this area must be conserved for future generations.

I object Policy A43 cont… to the Warehousing and Industrial units which are included in the Policy.

Employment Lands Needs Assessment (ELNA) 2015 shows an 80% reduction from the previous ELNA carried out by GBC in 2013 for employment space.

If Industrial and Warehousing units are required, I question why the Cassidy Slyfield Ltd. North Slyfield site, allocated in 2014 By Guildford Council for Industrial and Warehouse use, was withdrawn from the Local Plan recently.

Surely expanding an existing Brown field industrial area is better than creating a new one on Green Belt Land!

Also heavy traffic would be attracted to Garlick’s Arch site from the M25 and A3, a lot of it using the A247, which is not suited to this traffic!

I object because GBC’s Transport Assessment was not available to Councillors for the vote taken on 24th May for these proposals. It was published on 6th June! Infrastructure requirements must be assessed before major proposals can be voted on.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement often at speed. It has narrow bends with poor sight lines, an infants school and a humpbacked bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and recross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4357  Respondent: 15386017 / Gareth Sinnett  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of
development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory
purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to make the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

---

Comment ID: PSLPS16/2358  Respondent: 15388641 / Eva Hay  Agent:

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the development at Garlick’s Arch because the site is covered in ancient woodland and is within the Green Belt and should stay that way. 16th century trees would be endangered. This area is also subject to flooding.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch. The latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan so this is not required. Any industrial development needed should be built Slyfield where there is a 40ha site available.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. This totally ignores hundreds of previous objections by local residents.
2. There are no ‘exceptional circumstances’ as required by the National Planning Policy to take this area out of the Green Belt.
3. This will remove ancient woodland which cannot ever by regained.
4. Ripley and Send villages will merge, therefore defeating the purpose of the Green Belt.
5. The number of homes proposed is excessive. Send is a village. This is over-development to the extreme.
6. The area is subject to frequent flooding and is currently a Flood Zone 2 allocation.
7. The excessive traffic that will be generated will totally cause mayhem on the Send and Ripley roads. Already whenever there is a road closure nearby or traffic accident (almost a daily occurrence on the A3/M25) in the vicinity – the main Ripley, Send Marsh and Send roads are ridiculously congested or at a total standstill.
8. There is no proven demand for Travelling Show people sites in this location. This development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.
9. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3). The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be
dependent on the car for transport. Greater consideration should be given to increasing the density of
development in urban areas, such as Guildford, where more practical sustainable transport options can be
provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion.
Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the
environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there
to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt
is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the
neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley
will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on
the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100
or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been
assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of
river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be
re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss
of four existing successful rural businesses, which have been in existence for over 30 years and another two
businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their
premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will
have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs
centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road
infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for
example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon.
The proposed development under the plan will cause greater congestion in and around our villages. The Plan
does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send
are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.
I object to the development proposed in the local plan, which will result in more traffic using these narrow roads
and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from
parking problems. Further development around these villages will only result in more traffic and more parking
problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley,
the roads serving the village will become even more congested. Cycling has become a popular past time,
particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no
proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents
involving cyclists as a result of the development proposed under the local plan.
18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development
will result in the roads becoming ever more dangerous for pedestrians.
19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of
improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the
infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have
been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development,
the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to
capacity, such as the electrical network and sewers. No plans to improve these services should mean no
development of the Garlick’s Arch site.
22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Garlick's Arch should be protected from development as previously undeveloped Green Belt. This site is over 100 acres of grade 2 agricultural land surrounded by designated ancient woodland and traversed by a stream flowing into the River Wey. There are no exceptional circumstances which allow for the removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Local Plan states their preference is for the use of previously developed land, but GBC have removed a current industrial brownfield site at Burnt Common and replaced it with Garlick's Arch. This late substitution on 11th May 3016 with no prior consultation with the local community is in direct contravention of NPPF. In addition, I object to the allocation of the same policy site number A43 for both sites ie the removed site A43 “the land at Burnt Common” and the substituted site A43 Garlick’s Arch. This is not acceptable and suggests a degree of duplicity by GBC and not being fully open and transparent in this substitution.

One wonders also if the “gifting” of the land and financial provision for the construction of the A43a ramps at a suggested cost of £20million paid for by the owner/developer of Garlicks Arch (all of which has been publicly confirmed by Cllr Paul Spooner and Cllr Matt Furniss and recommended by them both as a good thing) is one of the key factors in the decision to substitute in Garlick’s Arch as site A43? It appears that this site is being heavily promoted by GBC as an enabling facility for site A25 Gosden Hill. This is completely unacceptable and I object in the strongest terms.

The sites A43 and A43a are not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan. There is substantial anecdotal evidence from local residents of the existence of significant numbers of wildlife at Garlicks Arch who utilise this land as a wildlife corridor in between Send and Ripley. There are bats, owls, deer, badgers, red kites, and many other species of flora and fauna.
- There are no plans to improve local schools, medical facilities or utilities to cope.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the employment strategy and impact at Garlick's Arch (A43) (Policies E2 and E5)

There is no requirement for a new industrial site at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7000 sq m proposed, That site was removed from the Plan without any reasoned argument or consultation.

Furthermore the development at Garlick's Arch would result in the loss of four existing successful rural businesses, which have been on site for many decades employing local people and are therefore clearly sustainable. These businesses do not wish to relocate to new premises.

Garlick’s Arch A43 and A43a

As previously stated I believe the A247 through old woking cannot cope with current levels of traffic never mind more. I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough. I don’t believe more houses are required here in a green belt area. I object to the proposed industrial
The development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available. I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding!

I have objected to many of these proposals before. I hope the council are listening this time and we don’t have to do this all over again. I object in the strongest possible terms to these proposals which destroy our green belt and urge the council to redevelop within urban areas and brownfield sites. I know these are less attractive to developers but so be it. We owe it to our children and future generations to protect our countryside and honour the trust that has been placed in us to do that.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

A43 Land at Garlick’s Arch 400 homes & traveller sites! Where is the evidence for this requirement, this is massive over-development and in green belt. Why are we not protecting the greenbelt and the area. This completely contravenes the very idea and intent of green belt to stop is joining up villages, along with the others it will destroy the essence of these villages..

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this
site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
development. The area, which is currently Green Belt, includes ancient woodland, which, once lost, could never be replaced. The area already has an established industrial site at Slyfield. Given the latest Employment Land Needs Assessment 2015 showed an expected 80% reduction in the required employment floor space from the previous draft plan, this could easily be accommodated at Slyfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Additional housing (A43) at Garlick's Arch will exasperate and add to the local chaos on the roads and the already stretched amenities. I therefore strongly object to building 400 Houses and 7000 sq metres of industrialspace at Garlick's Arch. The site floods and is covered by ancient woodland. The industrial is not needed as there are many offices and warehouses sitting idle in the local area. Fill these sites first before developing more empty units. Any new industrial units should be built at Slyfield where there is a ready an established site and the roads can cope with the traffic. Guildford's housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. **POLICY A43 AND A43a – Garlick's Arch**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2426  Respondent: 15390785 / Francesca Molossi- Murphy  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (BB). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Also heavy traffic would be attracted to Garlick’s Arch site from the M25 and A3, a lot of it using the A247, which is not suited to this traffic!

I object because GBC’s Transport Assessment was not available to Councillors for the vote taken on 24th May for these proposals. It was published on 6th June! Infrastructure requirements must be assessed before major proposals can be voted on.

<td><strong>Additional housing (A43) at Garlick's Arch will exasperate and add to the local chaos on the roads and the already stressed amenities. Therefore strongly object to building 400 Houses and 7000 sq metres of industrial space at Garlick's Arch.</strong> The site floods and is covered by ancient woodland. The industrial is not needed as there are many offices and warehouses sitting idle in the local area. Fill these sites first before developing more empty units. Any new industrial units should be built at Slyfield where there is already an established site and the roads can cope with the traffic. Guildford's housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.</td>

<tr>
<td>I further object to the Garlick’s Arch development. 400 homes and large industrial space will create not only a crowded, unpleasant living environment, but total traffic meltdown. I am stuck in very high volume traffic on a daily basis, and know that this huge development will bring us all to a standstill. An additional access point to the A3 will ease this, quite the opposite, drivers will simply join the queue in a different place, and queue back onto the local roads too. I therefore also object to the new interchange, that will simply add more queues to the existing ones, not ease any congestion at all.</td>

I object to Garlick's Arch being built on as it is a site which is covered in ancient woodland and should be preserved as such. Once our history is destroyed, it will be gone forever and there will be no going back. The local road infrastructure for Send and Ripley is not suitable if the Garlick's Arch proposal for industrial and housing developments are allowed to go ahead. The local roads are totally unsuitable for GV's and a large increase in general traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Plan is self-inconsistent in respect of traveller sites. A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots …” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:

i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and

ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2456  Respondent: 15397953 / Gillian Dobson  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it's removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Gartick's Arch.

The site is not appropriate because:

• There is no sustainable transport infrastructure
• The site is liable to frequent flooding
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan
• There are no plans to improve local schools, medical or utilities to cope

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2460  Respondent: 15398241 / Paul McNamara  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Thirdly, I object the proposed development of Garlick’s Arch. Building 400 houses and 7000sq metres of industrial space is unnecessary. There is no need for additional industrial space and removes the buffer between the villages and the A3. It seems clear to me that this is a sweetheart deal between the potential developers and GBC. Burnt Common is a
brownfield site that could more easily be used. Garlick’s Arch floods easily and regularly and as such makes it an
unviable development option. To continue, there is no sustainable transport infrastructure to allow Garlick’s Arch to be
successful – the local railway station at Cladon is already very busy and the car-park is already 100% full every day and
bus routes are minimal. So, it’s likely each new resident will have a car, leading to increased pollution and health risks.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/959  Respondent: 15398529 / Judith Linnegar  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

I wish to register my objection to the revised local plan for the A43 site, Garlicks Arch.

The impact this will bring on the already stretched local resources and infrastructure will be catastrophic for Ripley and
surrounding area.

The housing will be on greenbelt land and the potential increase of housing will be extremely harmful to the rural nature
of the surrounding villages of Ripley, Send and Cladon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

A43

I object to the plans outlined for Site A43. This site is new to the overall plans and was not included in the Regulation 18
draft proposal and so it has not previously had any level of consultation. The removal of this land from the Green Belt
requires exceptional circumstances and I do not see that the case has been made for this; in the long-term, developments
such as this one may be detrimental to the overall goal of preventing urban sprawl and the merging of settlements such as
Guildford and Woking. The provision of housing on this scale at this location would also have a significant impact on
the schools in the local area; for example, Send infant school is currently being rebuilt but there is no plan for any
increase in capacity. I understand that the site may be prone to flooding and contains an ancient woodland and so the
development would endanger trees from C16 and so there are conservation issues with the selection of this site.

I also object to the plans for the industrial development; the 2015 Employment Land Needs Assessment indicated a
reduction of 80% in the requirements for employment floor space while this proposal is a repeat of that contained in a
previous draft local plan that used an older evidence base. If there is a need for further development of industrial space,
there should be consideration given to an expansion of Slyfield as this seems to be a very appropriate site for such.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
20. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. I have personally been involved in an accident at this junction within the last 5 years due to heavy traffic queing and obstructing the sight line to exit Oak Grange Road. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from
the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4) It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: | pslp172/4726 | Respondent: | 15398657 / Kim Roberts | Agent: |
| Document: | Proposed Submission Local Plan: strategy and sites 2017 / Policy A43 |
| Do you consider this section of the document; complies with the Duty to Cooperate? ( ) | is Sound? ( ) | is Legally Compliant? ( ) |
| 1. | I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches |
| 2. | It ignores all the thousands of previous objections made by local people |
| 3. | There is no proven demand for travelling show people plots in this location |
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no
proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site. National Planning Policy promotes sustainable developments, with sustainable transport.

With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1240  Respondent: 15406145 / Paul Moore  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There appear to be no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were
1. **The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [than the Burnt Common site did]”**

2. **The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”**

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. **POLICY A43 AND A43a – Garlick’s Arch**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.
The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to Garlick's Arch and its proposal to build the 400 homes and 7,000 sq meter industrial space. It does not seem to be supported by any evidence that it is needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to POLICY A43, adding a further 400 houses (this on top of the already unsustainable 13,860 dwellings) and 7,000 square meters of commercial premises, all of it on Green Belt without any "exceptional circumstances". The way this site has been introduced without the required consultation serves to confirm that GBC planning members are thumbing their noses at proper procedure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

13. I object to the inclusion of the land at Garlick's Arch, Send Marsh/ Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. It has not been confirmed to why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this
I am also concerned that the fields behind my property will be used as site access/egress with a typical works compound, and of course the construction site, for the entire works period. Given, it's proximity this will see a 24 hour security fenced and lit compound. Movements of heavily construction traffic within a short distance from my house, will happen 5 or 6 days a week to amount to thousands of movements of material away and deliveries. My whole family will suffer the consequences of noise pollution, dust pollution, and construction activity for the duration of the development.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This increased funneling will cause immense damage to those arwas with narrow roads, all increasing the possibility of road traffic accidents.

This Plan does not address the needs of local communities of the Borough in this regard. Ther has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPS16/7508  Respondent: 15418849 / Sarah Smith  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick’s Arch, as this area regularly floods and building additional housing there would mean that water needs to go somewhere else, causing further flooding. It is also an area of ancient woodland. With proper use of brownfield sites, this green belt site is not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7516  Respondent: 15419489 / Janet Drew  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the planned construction of 400 houses and 7000 square metres of industrial space at Garlick's Arch. This would destroy ancient woodland and completely alter the nature of Send and Ripley villages to become one big strip development. Send Road and Sendmarsh Road, as well as Polesden Lane, are already extremely busy roads with traffic jams and queues on many mornings, particularly during term time. Traffic flows would be hugely increases as a result of such a housing development and the industrial development would increase the flow of large lorries which are already having to mount pavement on Sendmarsh Road to pass one another. There would be danger to pedestrians and from traffic based pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.
Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate.

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan.

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders.

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site.

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of "through" traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot b.e improved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2728  Respondent: 15421633 / Julia Cogan  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In addition I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required
employment floor space from the previous draft plan and there are plenty of examples of unused existing floor space that should be utilised before provision of more. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available. The additional traffic that would be brought to the area by an industrial area will not be able to be serviced by the road infrastructure and the proposal for the new interchange will in no way help.

The Garlick’s Arch site also has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding. Economic growth in the Guildford area should not require the loss of our rural heritage or be targeted at an area that cannot cope with it.

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( )  **is Sound?** ( )  **is Legally Compliant?** ( )

I object to the 400 new proposed homes at Garlic Arch, with new roads belching out onto an already busy roads.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Additional housing (A43) at Garlick's Arch will exasperate and add to the local chaos on the roads and the already stretched amenities. I therefore strongly object to building 400 Houses and 7000 sq metres of industrial space at Garlick's Arch. The site floods and is covered by ancient woodland. The industrial is not needed as there are many offices and warehouses sitting idle in the local area. Fill these sites first before developing more empty units. Any new industrial units should be built at Slyfield where there is already an established site and the roads can cope with the traffic. Guildford's housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.

In addition to the other proposals, I object to Policy A42, 45 houses proposed to be built in Clockbarn Nursery, Tannery Lane. Tannery Lane is a country, single access and the staggered cross roads- junction with Send Road is already dangerous, especially due peak times. This will just add to the growing congestion in Send. Planning permission has previously been given for 64 apartments at the Tannery and for building the marina, both of which will generate additional traffic (large vehicles for boats etc) The lane cannot cope with any more traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding.
- It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Thirdly, I object to building 400 houses and 7000sq m of industrial space at Garlick’s Arch. The area has no need for additional industrial space and if necessary, surely would be better placed and served at Slyfield. This area also buffers the village from the A3. Who would want to live in such proximity to the A3 with its noise and pollution? This is a lovely area with ancient woodland that should not be destroyed.

I object to building 400 houses and 7000 square metres of industrial space at Garlick’s Arch which is currently the site of ancient woodland. Brownfield areas around Guildford should be used for this, NOT precious Green Belt land. There is no road infrastructure to support these additional houses. The A3 is already backed up way before rush hour.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY A43 AND A43a – Garlick’s Arch

I object to Policy A43 and A43a on Garlick’s Arch.

This site had been previously considered and rejected before the previous draft of the Plan. The site was then inserted in this draft only hours before its publication without any consultation. I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site. This is a cavalier approach to public engagement by the Council.

1. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and being cut back and future residents will have to rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

1. The site is susceptible to flooding and development will cause harm to the ancient woodland on and by the site.

1. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

1. The Council appears to view the development as an enabling site to obtain land and developer funding for slip roads on/off the A3. This is not an exceptional circumstance to justify taking Green Belt land. The slip road land if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current funding for the slip roads is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham school was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

1. The development will put more traffic on to the A247 through West Clandon-a road which Surrey County Council says cannot be improved. This road is already very heavily used at peak times and when the A3 suffers problems. It is unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. The development will only exacerbate the problem and make the road even more congested and unsafe for pedestrians including children walking to and from the school.

1. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed and there are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. So why was a brown field site at Burnt Common, capable of accommodating approximately 100 houses, removed from the Plan and replaced with the Garlick’s Arch site? There was no proper consultation in relation to the inclusion of this site.

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

1. I OBJECT to the inclusion of strategic site Policy A43 Garlick’s Arch and its late
substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to building 400 houses and some 7000 sq m of industrial space at Garlicks Arch. The site floods and is an ancient woodland. The industrial space, if needed, should be at Slyfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
However the slip road land if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding should be available for it. (One of the reasons for turning down the so-called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running South past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement - often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for Southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4).

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a).
The addition of North facing ramps to the A3 at Burnt Common would have serious repercussions for local communities. There is no requirement for local traffic to access the A3 to the North, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the East of Guildford (Merrow etc.) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas, as the traffic would be on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I Object;

To the building of 400 houses at Garlick's Arch, this IS Greenbelt, also a flood area, and increased access by cars etc would be a danger to Local residents. Warehousing should be based at Slyfield were their already is an industrial Estate with adequate access and fewer residential house to upset. I object to taking down more of our beautiful old trees and woodland which has existed since the 16th Century. There are so many industrial sites which remain empty after building, is this going to be the case here. waiting to be vandalised, graffiti and made to look an eyesore.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the New Local Plan in principal, since it fails to achieve Guildford Borough Council's stated objective of "protecting the borough's most important countryside, landscapes and heritage". This New Plan fails to achieve any of these objectives in the case of Send Village in particular, whose History dates back past the Middle Ages and proposes development of 480 houses and 7,000 sq metres of industrial and warehousing space, which will destroy Send's living environment; local countryside; areas of natural beauty; and cause harm to ancient woodlands - let alone a village community which has survived for hundreds of years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the fact that POLICY A 43.30 ha is a NEW site not included in the Regulation 18 Draft and has NOT been consulted on previously. This is Green Belt land, permanently protected by the NPPF, which prevents the merging of settlements. There are no exceptional circumstances. It is a sensitive conservation site with ancient woodland and trees which have been there since the 16th Century and which would be irreparably damaged.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3482  Respondent: 15429985 / Jennifer Slade  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to POLICY A 43.30 ha LAND AT GARLICK'S ARCH Burnt Common for the building of 400 houses and 7,000 sq metres of industrial and warehousing. If there was need for more industrial space, it could be developed more easily on the existing industrial site at Slyfield and no new 4-way A3 interchange would be needed in this environmentally sensitive area. There is photographic evidence of flooding on the site, making it unsuitable for housing. If this area was developed it would destroy the village communities of Send, Ripley and West Clandon and the quality of life and health of its residents and cause major problems in relation to Road Safety. There is no need for any more houses in this area, or even as many houses as the new Local Plan states are needed (13,860) - neither is there any need for the additional 7,000 sq metres of industrial and warehousing space.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 change - Land at Garlick's Arch, Send Marsh because despite thousands of previous objections to development, it is now proposed that 400 homes and 6 Travelling Showpeople Plots are constructed. GBC has produced no evidence for any proven need for Showpeople Plots in this area, which is permanent Green Belt with no "exceptional circumstances". This area contains irreplaceable ancient woodland, dating back to Elizabeth I, which GBC is now proposing to destroy. It is currently a Flood Zone 2 allocation having frequent flooding and is a health risk for people and animals, being contaminated land with lead shot following 50 years of shooting activity. The proposed development will generate excessive traffic on roads that already get gridlocked in Send and Ripley at peak times and also remove the main area of green space between the villages of Ripley and Send, which is contrary to the purpose of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object very strongly to the 2016 draft local plan.

I object to the disproportionate amount of development in the area, particularly to the Garlick Arch site at Burnt Common for at least 400 homes. The Portsmouth Road is already heavily laden with traffic and drivers often cut through this road in order to ‘short cut’ the jam on the A3 leading to the M25. The villages of Ripley, Wisley, Send, and Clandon are constantly affected by traffic when the main roads are jammed, a regular occurrence. How can the addition of 2,000 homes at the Wisley site be considered in view of traffic congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the last minute inclusion of new sites with less than 2 weeks notice, leaving people very little time or no time at all to even address their concerns. Most people have hectic lives and this must be taken into consideration in local plans.
I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the statement under A43 that there is a stated opportunity that this will improve bus frequency and encourage travel to and from the site. It is hard to understand how the development of the number of houses proposed will in fact change the current occasional bus service to sufficiently reliable and frequent but service that can be relied upon for travel to and from employment.

I object under A43 the opportunity to reduce the flood risk. Any development will increase the risk both locally and in the area in general. All surface water drains to the Wey navigation which frequently overflows during periods of high rainfall and development put increased pressure on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch
The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**
I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site and has not been consulted on previously. This is not only permanently protected Green Belt, but also a site of ancient woodland containing trees planted in the 16th century, and serving as a rich habitat for wildlife and plants. The industrial development of this site is completely unnecessary. There is a more appropriate site ready and available at Slyfield. There is also a history of flooding in this area.

I OBJECT to Policy A43.30 the development of a new four-way interchange onto the A3 which would mean that the narrow Send Road (A247) would be the main route for traffic leaving the M25 and A3. It is already overcrowded and vulnerable to traffic jams and this proposal would be an utter disaster for Send and Ripley villages. Further traffic from this development would result in gridlocked roads. Send will be the through route to Woking for traffic leaving the M25 at Junction 10, the new houses proposed at Wisley, and the new development proposed at Burpham – our roads cannot cope with this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43, Garlick’s Arch, Send Marsh; Despite 1000s of previous objections this site is still being proposed for development. This a site of ancient woodland and a beautiful area of green belt – no exceptional circumstances exist that should allow for this area to be built on. The increase in traffic from the 400 homes on its own will cause gridlock on our already overburdened roads, but in conjunction with other proposed sites in Send and the surrounding area is just madness.

I object to the allocation of 6 travelling showpeople sites in Policy A43, Garlick’s Arch. There is no proven demand for Travelling showpeople plots in this location, and combined with Policy A44 Winds Ridge, we will have a total of 8 of these plots - this is too much for our area.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
5. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is currently protected from development as Green Belt.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch, however, the Plan’s preference states that previously developed land should be considered first.

There are no planned increases in schools or Doctor’s surgeries.

The local secondary schools are already too full for local residents to gain access to – our children’s allocated school was a 40 minute bus ride away which is why I ended up paying for private education!

It is already virtually impossible to get an appointment at our local Doctor’s surgery in Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3049

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43) since there is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed but that site was removed from the Plan without any reasoning.

Developing Garlick’s Arch would cause the loss of 4 local rural businesses which are successful.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which are clearly sustainable since they have been for there decades employing local people.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object, to the proposal to build 400 houses and 7000 sq. metres of industrial space at Garlick’s Arch (Policy A43), opposite Send Marsh road. This site is covered by ancient woodland; industrial sites will destroy this forever. The extra industrial space, if required, could be added to the current industrial area in Slyfield, as adding to this industrial area would have much less impact. As Guildford’s housing requirements have been shown to be grossly exaggerated with a refusal to disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)
I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch
The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

Regarding: ‘The Local Plan’
I request that my comments below be seen by the planning Inspector:

I OBJECT to the building of 400 houses and 7000 square metres of industrial space at Garlick’s Arch Burnt Common for the following reasons:

1. My property in Manor Road, Send Marsh where I have lived for 45 years is now classed as being in a flood plain area. This was narrowly spared from flooding in the late 1960s. I feel that the development of the area known as Garlicks Arch will greatly increase the risk of flooding in Send Marsh village which includes my property. The Send stream which boarders the rear of my property carries surface and flood water. Although flood protection improvements were made several years ago in Send Marsh Road, the level of the stream on some occasions can be very high during heavy rainfall. Consequently I am greatly concerned of the risk posed by further surface drainage water running off of a large development / concreted area.

1. Due to traffic at peak times of the day, the junction of Send Marsh Road with the Portsmouth Road can be both difficult and dangerous. Further traffic in this immediate vicinity will greatly increase this already present problem.
1. I cannot understand why Guilford Borough Council wish to deplete the Green Belt within its boundaries instead of prioritising existing brown field sites. The character of this borough is strengthened by having individual villages such as Send and Send Marsh which enhance the beauty of the this part of Surrey. I therefore strongly object to Send Marsh / Send losing its Green Belt Status. Local councillors together with central government gave a promise to protect the Green Belt. Therefore you as a council should uphold this pledge.

I OBJECT to a new interchange with the A3 at Burnt common because of the increase in local traffic including from the proposed 2000 new houses at Wisley Airfield. Additional local traffic would affect the already busy Portsmouth Road and particularly Send Road which is often at gridlock already during peak times.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

• Garlick's Arch (policy A43)

The proposal to build so many new houses and light industrial storage/workshops on what is part of the Green Belt defies
all reason. We have been constantly told that the green belt was safe and it was essential for it to remain in place in order
to prevent urban sprawl.

Villages need to keep their separate identities but if the green belt barriers are ripped down then how is this to be
achieved? I object to any in-setting of any villages in the Green Belt. Last year an application to build 25 houses on part
of this site was refused, so how can the building of 400 houses suddenly become acceptable? This is a disproportionate amount of development in one area of the borough.

Send Marsh /Burnt common has no shops and very limited resources – I hardly think that “Little Waitrose” can be listed as a shop when it only an overpriced addendum to the garage. The doctor's surgery is over-subscribed and getting an appointment is becoming a significant problem. I understand that plans have been mooted to reduce further the bus timetable in the area. In order to go about one's normal everyday life recourse will have to be made to the motor car.

I object to site policy and at Garlick's Arch Send Marsh, Burntcommon and Ripley and A43a Land for new north facing slip roads to/from A3 at Send Marsh/Burntcommon as I believe that the circumstances leading to the inclusion of these site policies in the Local Plan are in breach of regulation requirements under The Town and Country Planning Act.

They were only presented to Guildford Borough Council on 11 May 2016, just 13 days before the Executive Meeting of the Council to agree putting the updated Draft Local Plan, including these two site policies, out for Public Consultation. I believe that this is in breach of regulations as there was totally insufficient pre-consultation under Regulation 18.

The very late addition of A43 Land at Garlick's Arch Send Marsh, Burntcommon and Ripley is clearly demonstrated by the Inclusion on GBC's Local Plan website of a draft version of the Submission Document, dated June 2016 on the front cover, which includes A43 (2016 classification) as Land at Burntcommon Warehouse with 100 homes, which Is site proposal 74 from the 2014 Draft Local Plan. This is still there on 10/07/2016.

The very late inclusion of A43 and A43a is also clear from the fact that in the Local Plan section on page 04 of the Council's Summer 2016 issue of "About Guildford", which was delivered in June 2016, it says "...In April this year we published the revised Draft local Plan.."

How could the Council publish the revised Draft Local Plan in April 2016 when site allocations A43 and A43a were not presented to the Council for inclusion in the revised Draft Local Plan until 11 May 2016 and the Executive did not approve the draft for submission for Public Consultation until 24 May 2016?

Is the Council trying to mislead the public by suggesting that the current Draft Local Plan was published in April?

I object to site policy A43 Land at Garlick's Arch and A43a Land for new north facing slip roads to/from A3 at Send Marsh/Burntcommon as I believe that the circumstances leading to the inclusion of these site policies are, at best, highly unorthodox and irregular and need thorough checking by the Planning Inspectorate.

I understand from a very reliable source that the land for Site Policy A43a Land for new north facing slip roads to/from the A3 at Send Marsh/Burntcommon has been gifted to the Council by Its owners and that those owners have also offered to pay the £20m cost of A43a.

Isn't it a strange coincidence that part of the land at Site A43 land at Garlick’s Arch is also owned by the owners of the land being gifted to the Council for Site A43a, which, if site A43 is approved, would no doubt result in an extremely large Financial windfall for the owners?
Isn’t it also a strange coincidence that these are the very same sites which were only proposed to the Council for inclusion in the Draft Local Plan on 11 May 2016, which I believe to be in breach of regulations as in 11 above?

Although I understand that the cost of the A3/A247 on/off slip roads is to be borne by the owners of the land, the Draft Guildford borough Infrastructure Delivery Plan 2016 shows on page 68 the £10m likely cost for each of the two slip roads as "Developer funded". If the cost IS to be borne by the land-owners who have gifted the land to the Council, it is very misleading to state in the plan documentation that the cost is to be Developer funded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the inclusion of 400 new homes on site policy A43 Garlick's Arch Send Marsh, Burntcommon and Ripley as there is no need for this many to be built. The site 74 Land around Burntcommon warehouse which included 100 new homes should have the 100 homes reinstated and increased to 159. The plan Sustainability Appraisal page 110 shows 100 as Housing Capacity for Use H and a further 59 Housing Capacity for Use E, so 159 in total.

I object to inclusion of site policy A43 Land at Garlick's Arch, Send Marsh/Burntcommon and Ripley as it is an area of Ancient Woodland which includes a number of trees with Tree Preservation Orders. These beautiful trees should be retained and there should be no building on this site.

At the Council Executive Meeting on 24/05/2016 I was appalled by the comment from one Councillor in support of inclusion of site policy A43 "they are only trees, they are going to die anyway".

Yes, they will die (eventually) anyway, but this very short-sighted view ignores the fact that the trees date back to the 16 Century and the life span of such trees is several times that of any houses or industrial buildings, as well as being much better to look at and benefiting the environment instead of harming it.

I object to inclusion of site policy A43 Land at Garlick's Arch, Send Marsh/Burntcommon and Ripley on the grounds of the harm it would do to the local environment.

In terms of the environment the words of Tony Juniper, President of the Wildlife Trusts, are much better than my own so I quote his from the Spring 2016 issue of Surrey Nature, published by the Surrey Wildlife Trust:

"Many people have become used to hearing that looking after our environment and conserving nature is an unaffordable luxury, especially during times of economic hardship. Nothing could be further from the truth. The more research we have the more we see that nature is not a distraction from our interests as a country, but is essential for our health, wealth and security. At a time of rising population, increased demand for resources and pressure on the land it is more vital than ever that this message is heard".

I object to inclusion of site policy A43 Land at Garlick's Arch, Send Marsh/Burntcommon and Ripley on the grounds of the harm it would do to the local environment in terms of noise pollution.

At the Executive Council Meeting on 24/05/2016 a point made supporting the proposed amendment to remove A43 Garlick's Arch from the Draft Local Plan was that the noise problem from A3 traffic to residents living on the other side of Portsmouth Road from Garlick's Arch would be worsened by felling the Ancient Woodland on the site.
The response from the Leader of the Council was that the trees do not form a noise barrier, a view which was met with derision from the members of the public present, including myself.

I also object to A43 on the grounds of Noise Pollution as noise metering has, I understand, been carried out between Garlick's Arch and the A3 and, I am assured, the readings in decibels exceed the allowable noise level for the building of new homes so none should be built there.

It seems that the Council chooses to ignore anything which is a barrier to its plans.

I object to the inclusion of Site Policy A41 Garlick's Arch, Send Marsh and Burntcommon and Ripley on the grounds of its adverse impact on wildlife on the site.

The site has numerous species including Badgers, Bats, Deer, Red Kite and their habitat would be destroyed by this development. I believe that the Water Vole, now rare in this country, has also been seen.

I understand that no wildlife study has been undertaken in respect of this site which appears to be another procedural shortcoming.

I object to site policy A43 Land at Garlick's Arch and A43a Land for new north facing slip roads to/from the A3 at Send Marsh/Burntcommon in respect of the proposed timing of these developments in the Draft Local plan.

Site A43 and at Garlick's Arch is stated to be suitable for the first phase of planned development (first 5 years) (Executive 11 May 2016 Supplementary Information page 8 Delivery "...the Garlick's Arch site is deliverable in the first five years of the plan") whilst page 68 of the Draft Guildford borough Infrastructure Delivery Plan 2016 shows both SRN9 "A3 northbound on-slip at A247 Clandon Road" and SRNIO "A3 southbound off-slip at A247 Clandon Road" to be delivered between 2021 and 2027.

Does no-one involved with the Draft Local Plan have any common sense or apply any logic to these plans, especially in respect of development timing schedules?

If it is the case that, should both these site policies be approved and delivered with A43 first and A43a some years later, the traffic congestion in the local area would be an absolute nightmare.

The very numerous heavy lorries that would be required to remove huge trees and deliver vast amounts of building materials to site A43 would have to use existing inadequate roads, either off the A3 through Ripley or via the Burntcommon roundabout at the junction with the A247.

This would be intolerable and dangerous. Portsmouth Road junction with Send Marsh Road is already a dangerous black spot for accidents, as I know to my cost since a car drove into mine there earlier this year, the other driver having ignored the Give Way signs for traffic turning onto Portsmouth Road from Send Marsh Road. The existing junction of the A247 and the A3 southbound on-slip is also an existing dangerous accident black spot. Both of these would only become worse and more dangerous with these planned developments, as would the junctions of Burnt Common Lane, Kiln Lane and Grove Heath Road with Portsmouth Road.

I object to site policy A43 Land at Garlick's Arch Send Marsh/Burntcommon in respect of the lack of infrastructure planning for the site.

The sections of the Guildford borough Infrastructure Delivery Plan 2016 in respect of Utilities:

Electricity & Gas Distribution & Supply pages 76/77/78

Water Supply pages 78/79

Wastewater Connections & Treatment pages 79/80

Flood Risk Reduction: Surface Water Mitigation Measures pages 80/81

contain no mention whatever of A43 Garlick's Arch.
How can this planned site development go ahead when there are apparently no plans whatsoever to provide the utility infrastructure which would be required to support 400 homes and 7000 sq mts of industrial/warehousing development?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4335  Respondent: 15438049 / David A Sprigings  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to site allocation A43 Garlick's Arch as it is totally wrong to increase the number of planned homes by the addition of Travelling Showpeople plots when the total number of homes in the borough during the period of the plan has been calculated as 1,434 lower than the 2016 draft Local Plan. There is therefore no justification for an increase on this site.

The Foreword on page 5 by Councillor Paul Spooner - Leader of the Council, includes the following in the fourth paragraph:
"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated is contingent on the provision of new infrastructure, which is a key theme of our Local Plan. The Council will work with infrastructure providers and developers to ensure that sufficient physical, social and green infrastructure is provided during the plan period".

As the "delivery of sites allocated in this plan is contingent upon" the provision of new infrastructure is a change in the plan it can be commented upon and gives rise to the following objections, in conjunction with changes to site allocations

I object to Site Allocation A43 Land at Garlick's Arch, Send Marsh Burnt Common and Ripley as the delivery of all site allocations is contingent upon the delivery of new physical infrastructure (see Foreword extract above) whilst the plan does not include any Utility Infrastructure at all for A43: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 2 Utilities pages 320-325, which contains NOTHING in respect of Garlick's Arch in respect of Electricity and Gas distribution and supply; Water supply; Wastewater connections and treatment; Flood risk reduction: surface water mitigation measures, so sufficient physical infrastructure for utilities is NOT planned for.

I object to Site Allocation A43 Land at Garlick's Arch, Send Marsh Burnt Common and Ripley as the delivery of all site allocations is contingent upon the delivery of new green infrastructure (see Foreword extract above) whilst the plan does not include any Green Infrastructure at all for A43: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 3 Green Infrastructure pages 325-328, which contains NOTHING in respect of Garlick's Arch in respect of Green Infrastructure.

To the contrary, the existing Green Infrastructure at Garlick's Arch will be almost wholly taken away due to the planned wanton destruction of the current Ancient (some dating back to the 16th century) and other woodland.

I object to the addition to site allocation A43 Garlick's Arch of 6 Travelling Showpeople plots with associated storage facilities as this is wholly inappropriate in the rural environment of Send Marsh, Burnt Common, Send and Ripley within the Green Belt.

I object to the addition of 6 Travelling Showpeople plots to site allocation A43 Garlick's Arch as this site allocation is outside the scope of the GBC 2017 Local Plan policy in respect of such sites which is as follows:

Point 4.2 Housing Policy, Policy H1 Homes for all, which begins on page 35 includes the following on page 36 under the heading Gypsy, Traveller and Travelling Showpeople pitches and plots:

(7) Accommodation for Gypsy, Traveller or Travelling Showpeople (whether they meet the Planning Policy for Traveller Sites definition or not) should be provided on development sites of 500 homes or more whilst there remains an identified need. Also page 40 "Gypsy, Traveller and Travelling Showpeople accommodation is required within development sites of 500 homes or more to help create sustainable, mixed use communities with suitable accommodation for all".

A43 Garlick's Arch is therefore OUTSIDE THE SCOPE OF THIS POLICY.

I object to the addition of 6 Travelling Showpeople plots to site allocation A43 Garlick's Arch as the GBC 2017 Local Plan Policy for such plots ((7) on page 36) shows that 6 pitches or plots should be provided for development sites of 1500 - 1999 homes and so A43 Garlick's Arch is totally outside the scope of this policy.

I object to the addition of 6 Travelling Showpeople plots to site allocation A43 Garlick's Arch as there is no justification for locating in Send Marsh/Burnt Common 75% of the total of 8 such plots identified for the whole of the borough.

I object to the inclusion of site allocation A43 Garlick's Arch in the 2017 Local Plan Submission as the main underlying reasons for adding this site to the plan in May 2016 are now defunct.

Supplementary Information provided to Councillors for the GBC Executive Meeting on 11 May 2016, at which A43 Garlick's Arch was very belatedly added to the 2016 Local Plan submission, included the following main reasons for its inclusion instead of the previous site allocation A74 Land around Burnt Common warehouse:
- The site location affords greater separation between Send Marsh/Burnt Common and the proposed site location at Gosden Hill Farm, Merrow Lane, Guildford.

- The site provides the employment floorspace needed in the plan to meet identified needs.

As the maximum 7000 sq m industrial/warehousing floorspace included in A43 Garlick's Arch has now been removed from this site allocation in the 2017 Local Plan submission and moved back to the part of the Burnt Common area close to the previous A74 Land around Burnt Common warehouse, though changed to minimum of 7000 sq m, **the above reasons used in 2016 to justify the inclusion of A43 Garlick's Arch in the Local Plan are no longer valid and so A43 Garlick's Arch should be totally removed from the 2017 Local Plan Submission, as well as any future variants that GBC may come up with.**

I object to the addition of 6 Travelling Showpeople plots to site allocation **A43 Garlick's Arch** as point 4.2.20 on page 40 says "National planning policy for Gypsy, Traveller and Travelling Showpeople is set out in the National Planning Policy Framework and Planning Policy for Traveller Sites and we will expect all new sites to meet the requirements of national policy. **New pitches and plots should have adequate utility services** and ...."

However, the plan does not include any Utility Infrastructure at all in respect of A43: see 2017 Draft Local Plan Submission Appendix C INFRASTRUCTURE SCHEDULE pages 309-338 and, in particular 2 Utilities pages 320-325, which contains NOTHING in respect of A43 in respect of Electricity and Gas distribution and supply; Water supply; Wastewater connections and treatment; Flood risk reduction : surface water mitigation measures, so "adequate utility services" as required for Travelling Showpeople plots by national Planning Policy for such plots have not been planned for. This is a further reason to remove these plots from A43 Garlick's Arch.

I object to the addition of 6 Travelling Showpeople plots to site allocation **A43 Garlick's Arch** based on the Commentary on A43 Garlick's Arch, Send Marsh contained on page 75 of the 2017 Sustainability Appraisal, which says in respect of A43:

- Strategic Development Site

- There is no available alternative site that can provide Travelling Showpeople plots in the first five years of the plan to meet need.

**This is a total contradiction** as Policy S2 under 4.1.9 on page 29 includes "Larger Development sites, including the strategic development sites, will deliver the majority of new development in the 6-10 and 11-15 year periods of the plan". The Travelling Showpeople plots cannot be delivered both in the first five years of the plan and "in the 6-10 and 11-15 year periods of the plan".

I object to the addition of 6 Travelling Showpeople plots to site allocation **A43 Garlick's Arch** as the only reason that the commentary in the 2017 Sustainability Appraisal includes "There is no available alternative site that can provide Travelling Showpeople plots in the first five years of the plan to meet need" is that the Sustainability Appraisal 2016 commentary on site allocation **A46 Land to the south of Normandy and north of Flexford** includes "There is no available alternative site that can provide Travelling Showpeople plots in the first five years of the plan to meet need" and this site allocation has been removed from the 2017 Draft Plan Submission whilst the area it covers is still there.

I can see no justification for the switch in the plan to A43, especially as A43 is **outside the scope of the GBC policy in respect of Travelling Showpeople plots.**

I object to the addition of 6 Travelling Showpeople plots to site allocation **A43 Garlick's Arch** as the Local Plan Submission 2017 shows a total need of 8 Travelling Showpeople plots in the borough during the period of the plan (see Policy S2 page 30 "We will identify 4 permanent pitches for Gypsies and Travellers and 4 permanent plots for Travelling Showpeople (as defined by Planning Policy for Traveller Sites) within Guildford borough between 2017 and 2034, Whilst the needs of Gypsies, Travellers and Travelling Showpeople who do not meet the planning definition fall outside this allocation, in order to meet their assessed needs we will seek to provide 41 permanent pitches for for Gypsies and Travellers and 4 permanent plots for Travelling showpeople who do not meet the definition". At the
same time on the site allocation summaries on pages 142-145 Site Allocation A50 Whittles Drive, Normandy on page 145 shows Allocated uses Travelling Showpeople plots (suigeneris) and the column Gross number of homes (approx.) over the plan period shows 14, which is MORE than the total identified need of 8 for the borough and so meaning that that NONE are needed on site allocation A43 Garlick's Arch. The same figure 14 also appeared against A50 under Total number of homes (approx.) for Travelling Showpeople sites in the 2016 draft Local Plan, page 125.

I object to site allocation A43 Garlick's Arch as I strongly object to Requirement (10) under the heading Travelling Showpeople plots "Following completion of the site and a further 18 months of marketing, if the site remains unsold, the future use of the land should have regards to an up to date Traveller Accommodation Assessment (TAA) and Strategic Housing Market Assessment (SHMA), with specific consideration of the use of the land for affordable housing" on the following grounds:

a. This "Requirement" is contingent on the Travelling Showpeople site remaining unsold but this should NOT be included in this site allocation in the first place as it is outside the scope of Council Policy on Travelling Showpeople plots.

b. It is totally wrong and unjustified to increase the number of planned homes on this site allocation when the total number of homes in the borough during the period of the plan has been calculated as 1,434 lower than the 2016 draft Local Plan. There is therefore no justification for any future increase on this site.

I object to site allocations A35 Wisley Airfield, A43 Garlick's Arch and A58 Landn around Burnt Common as the scheduled delivery of the important local transport infrastructure developments is unjustifiably late in the process, eg: - A43 Garlick's Arch is stated to be available in the first five years of the plan with 400 homes (0) and 6 Travelling Showpeople plots proposed: "There is no available alternative site that can provide Travelling Showpeople plots in the first five years of the plan to meet need", 2017 Sustainability Appraisal. - A58 Land around Burnt Common warehouse, London Road, Send: Land Availability Assessment (2017 Addendum) page 15: "There is a realistic prospect that development will be delivered within the first five years of the Local Plan"; page 16 "Timescale 0-5 years". - SRN 9 and SRN 10, new A3/A247 junctions are stated to be scheduled during the period 2021 to 2027. (Guildford Borough Transport Strategy 2017 page 22).

LRN7 Interventions to address potential highway performance issues resulting from the development at former Wisley Airfield site, including various mitigation schemes to address issues affecting Ripley High Street, A3 Ockham Interchange and M25/A3 Junction 10, are stated to be scheduled for likely delivery during the period 2021 to 2033. (Guildford Borough Transport Strategy 2017 page 23).

It seems ridiculous that the Local Plan is based on developments A43 and A58 taking place or at least begun BEFORE the required improvements to major local transport networks. Unless the major road network improvements take place before the site developments, the Ripley/Send Marsh/Burntcommon/Send/Clandon area will be subject to severe traffic congestion arising from the site developments with very limited access for the vast number of heavy vehicle journeys that will be required which will cause an absolute nightmare for traffic in these villages. It will make Portsmouth Road even more dangerous than it is already at its various junctions.

The addition of new A3/A247 junctions (A43a; SRN9, SRN10) will not help the area of these villages as it will encourage far more traffic to join/leave from the A3 via the A247 meaning much more traffic through Clandon, with its very narrow bends on the A247, and Send in particular, the latter making it more dangerous for pupils, parents and staff at Send Primary School and also more dangerous for both patients and staff at The Villages Medical Centre, as well as local residents and businesses in Send.

Although the draft Local Plan includes reference to the Highways England (HE) Proposed M25/A3 Junction 10 improvement it takes no account of the HE intention to close off access from the A3 northbound onto Wisley Lane, which includes access to RHS Wisley. The HE plan is to only have access to Wisley Lane from a slip road running parallel to A3 northbound, its only access being from the Ockham Interchange (Ockham/Ripley roundabout) which will only be accessible from the southbound A3, with NO ACCESS FROM THE NORTHBOUND A3.

Although HE say that there will be signs on the northbound A3 advising drivers to go to the M25 junction roundabout, turn around and leave the A3 southbound at Ockham Interchange for Wisley/RHS Wisley, human nature being what it is
most such drivers will leave the A3 northbound at London Road B2215 and drive through Burnt Common, Send Marsh and Ripley to get to Ockham Interchange for access to RHS Wisley. So every time an event takes place at RHS Wisley we can expect even worse traffic congestion through Burnt Common, Send Marsh and Ripley which makes the building of 400 homes at Garlick's Arch on Portsmouth Road even less appropriate, and Travelling Showpeople with heavy vehicles for fairground equipment an even bigger mistake. A43 Garlick's Arch should be removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3130  Respondent: 15439425 / Abigail Cruse  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq. m proposed. That site was removed from the Plan without any reasoning?

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government states clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3155  Respondent: 15440161 / Linda Daniell  Agent:
2. I object to Policy A43 Garlicks Arch and the building of 400 houses and industrial space and new road junction. Having been a resident of Send for 20 years and previously a teacher at the First School for 10 years, I am aware of the impact this would have on both the schools and traffic. Because of its proximity to the A3 and M25, there have always been recurring difficulties with congestion on the road through Send at peak times. Any incidents on major roads causes huge queues in the village. This has implications for people getting to work and school. When I taught at the school, it was not uncommon for children and staff to be delayed in reaching school following accidents. This would only be exacerbated by increasing the population in this area. Additionally, I object to the destruction of ancient woodland and the loss of natural habitats this would cause. I do see any disclosure of detailed calculations as to the number of new houses Guildford requires. This should be transparent before we consider using Green belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.
21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.
It is understood the Council's eyes may have been turned by the possibility of receiving free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/3226  Respondent: 15442561 / Tegan Meredith  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the building of 400 houses at Garlick’s Arch. These are not needed in Send or the borough and the proposal was announced at the last minute without any prior consultation.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch. It is not needed and there is already an available site at Slyfield where it can be built.

I object to the proposed development at Garlick’s Arch because the site is home to ancient woodland which should be conserved and it is also subject to flooding.

I object to the proposed development at Garlick’s Arch as it is part of the Green Belt and helps stop merging of towns and settlements. This is the main purpose of the Green Belt. I believe it needs to stay as such

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3952  Respondent: 15442561 / Tegan Meredith  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43, land at Garlick’s Arch, Send Marsh for the following reasons:

1. This totally ignores hundreds of previous objections by local residents.
2. There are no ‘exceptional circumstances’ as required by the National Planning Policy to take this area out of the Green Belt.
3. This will remove ancient woodland which cannot ever be regained.
4. Ripley and Send villages will merge, therefore defeating the purpose of the Green Belt.
5. The number of homes proposed is excessive. Send is a village. This is over-development to the extreme.
6. The area is subject to frequent flooding and is currently a Flood Zone 2 allocation.
7. The excessive traffic that will be generated will totally cause mayhem on the Send and Ripley roads. Already whenever there is a road closure nearby or traffic accident (almost a daily occurrence on the A3/M25) in the vicinity – the main Ripley, Send Marsh and Send roads are ridiculously congested or at a total standstill.
8. There is no proven demand for Travelling Show people sites in this location. This development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.
9. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlick’s Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to building 400 houses and 7000 sq metres of industrial space at Garlick's Arch, opposite Send Marsh Road. The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. Guildford's housing requirements have been shown to be grossly exaggerated and they have disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.

21. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the Draft Plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council may have been attracted by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding should be available for it. (One of the reasons for turning down the so-called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running South past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement - often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for Southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.
The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4).

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a).

The addition of North facing ramps to the A3 at Burnt Common would have serious repercussions for local communities. There is no requirement for local traffic to access the A3 to the North, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the East of Guildford (Merrow etc.) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas, as the traffic would be on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

11. I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2) and therefore GBC is acting outside their terms of reference.

The Plan states the preference is to make the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of this habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:

   i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!) , and
   
   ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

1. I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT TO 400 HOUSES and 7000 sq METRES OF INDUSTRIAL SPACE AT GARLICKS ARCH ,opposite Send Marsh RoadThe site floods and is covered by ancient woodland.The industrial space could be comfortably located elsewhere for example Slyfield.There seems no desire to explore and develop brownfield sites.Again this would put more pressure on traffic with an escalation in the number of motor accidents.Having lived in Potters Lane for 20 years I have already witnessed this increase.On one evening there were 4 accidents outside my home at the bottom of Potters lane within the space of an hour.The river Wey is more prone to flooding.Road water runoff now more prevalent.Access onto and ingress from A3 is particularly dangerous.this road should be closed.discussions with the police suggest they are very supportive of this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 4.jpg (53 KB), 2.jpg (113 KB), 1.jpg (88 KB), 3.jpg (34 KB)
**Comment ID:** PSLPS16/5423  **Respondent:** 15448289 / Paul Miller  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement - often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.
The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for putting houses on this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for...
example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham...
School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.
The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I **object** to the policy A43 very strongly.

I wish our village to remain in the Green Belt and I cannot see any 'exceptional circumstances' which might enable the council to consider removing us. Living here and purchasing a home here was because of the Green Belt protection to our wonderful countryside. Ripley and Send/Burnt Common are distinct village areas. This proposal tries to link them up resulting in a semi-urban sprawl which goes against the policy of the Green Belt.

Local villagers have already made strong objections which appear to have been ignored! There is no proven demand for Travellers plots in this location.

The number of houses proposed for our village needs is excessive and will cause huge over development of our area. The road networks are already extremely busy and this proposal will result in a huge increase of traffic. Local roads and junctions with the main A3 simply will not cope with the extra influx. Additional traffic jams will result causing untold delays and inconvenience to people trying to commute to London or deliver children to local schools.

The area is subject to flooding (it is currently a flood zone 2 area) - further development will only make matters worse.

The area in question has been used over many years for shooting and the land is contaminated by lead shot.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPS16/3412  Respondent: 15449697 / Kevin Hewton  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to register my objection to the above planning application in and around Send / Ripley

My objection is based on

1. Over density of New Houses
2. The local schools do not have the capacity to take in all the expected children
3. Send Surgery is already oversubscribed making it difficult to get an appointment, additional residents would exasperate this
4. The traffic through Send and Ripley already causes gridlock at certain times of the day additional vehicles would again exasperate this

<td></td>
<td></td>
</tr>
</tbody>
</table>
Air quality and noise level for house holders along the A247 must also be considered

Our local Send Surgery (which is my local surgery also) cannot accommodate more patients.

Our local schools are also filled to capacity.

In 2014 the council rejected a planning application from Oldlands to build 25 houses on very sound planning grounds, so now, how is an application to build 400 houses and 7.000sq metres of industrial buildings even being considered?

Residents in Send, Ripley and West Clandon purchased their properties in villages because all are surrounded by Green Belt.

As ratepayers of Guildford Borough Council, they cannot have this Green Belt destroyed and should be more protected in line with the current government policy by their Council.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the employment strategy and impact on Garlick’s Arch (A43) (Policies E2 and E5)

The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3489  Respondent: 15451457 / Camilla Bell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

<td>I OBJECT to the proposed site 43 at Garlicks Arch. As a local resident of Send Marsh for 30 years and born in West Clandon before that, I have seen a lot of changes to the area along with the increased traffic. The proposal to build 400 houses along with industrial and offices on this site is beyond belief. The area is not the right place to put industrial units, and are they really needed. If they really are needed it would be best if they were kept</td>

together with existing areas. The development of the housing alone would lead to the increase in traffic along the Portsmouth and the Send Marsh road junction and surrounding roads will lead to nothing more than total congestion. As for the proposed new slip roads for the A3 this will only compound the traffic issues for the surrounding roads and make it impossible. The queues at the Send Marsh road, Portsmouth road junction in the mornings along with other times of the days and even weekends is getting worse and worse as it is, without adding more cars, 2 per household on average, 800 plus commercial vehicles, ok not all at the same time but peak times will be horrific. Add to that the increased noise, (it never seems to be quite now,) along with added pollution it just gets worse and worse.

The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The impact on Send village of such a disproportionately-sized development would be very negative and would permanently alter the fabric of the village and community. The infrastructure and amenities would not be able to cope with such a development and there is clearly no plan to develop them.

The Garlick's Arch site is in the green belt and so should be off limits to development. Aside from that though, it is in a flood zone and so is in any case unsuitable for development.

I appreciate that houses and industrial units are needed in the area but I would ask that the council prioritises existing brownfield sites before destroying the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to this proposal.

How could this proposal have been such a last minute thought? It is such a large development I have no confidence that the implications of it have been thought through. If it is not a last minute thought then why have we not been informed of it before? It is highly suspicious, surely it cannot be legal to deprive us of a full length consultation period?

This plot of land creates an important buffer between Send Marsh and the A3 and also prevents the village of Send merging with Clandon.

What are the special circumstances that would allow 400 houses to be built on this flood prone, Green Belt with ancient woodland, when the housing numbers that we have been told we need are highly questionable?

Why do we need 700 square metres of more industrial space when GBC has failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) which shows an 80% reduction in employment space from the previous ELNA carried out by GBC in 2013.

This proposal would be right next to the A3. So again air quality for those living in the 400 houses should be questioned. Building sound proofing bunds does not protect the inhabitants from air pollution.

The high density housing and industry would also add to the already congested A3, M25 and A247. In addition to developments proposed at Wisley and Gosden Hill Farm. It would also create a huge burden on our other facilities e.g. schools and medical centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policies A43 and 43A- I object to the inclusion of A43 as the site is a flood risk and to A43A on the basis that there must be a 4 way junction north of Potters Lane at Gosden Hill Farm and therefore there is no need for slip roads onto the A3 at Garlick’s Arch.

I OBJECT to building 400 Houses and 7000 square meters of industrial Space at Garlicks Arch opposite Send Marsh Road.
This is Green Belt Land with Ancient Woodland, and is prone to considerable flooding. The industrial space is definitely not needed as there is adequate space at Slyfield Green, and the owners at Slyfield are keen to have extra use there if there is in fact a need at all for extra industrial Space.

If GBC used the brownfield sites this Green Belt land would not be needed.

The gridlock that this development would cause on the local Roads would make the already overly congested and busy roads impassable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)
There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.
The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)
Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.
The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed development of 400 homes and an industrial development at Garlick's Arch on the grounds that the noise and extra traffic from an already busy A3 would have a detrimental effect on the surrounding villages and its residents. The A3 already suffers from gridlock at certain times of the week and if there should be an accident, of which there are many on the A3, the subsequent closure of the A3 leads to chaos on the surrounding roads causing tailbacks through West Clandon, Chilworth and Ripley and Send.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to the development on the grounds that Garlick's Arch provides a buffer to residents against Noise and pollution and as it is covered in ancient woodland, should be conserved.

I object on the grounds that the busy A3 leads directly to the Royal Surrey Hospital and any gridlock, closures or delays on this busy road, could cause potential loss of life if ambulances are not able to get to the hospital.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I further object on the grounds that 400 homes on one site is excessive and will put further strain on hospital services, Medical Centres, schools and general services. Send, Ripley and Clandon are rural and should remain that way. Any development should be moderate to meet requirements and not excessive to line the pockets of greedy developers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the change to Policy A43 Land at Garlick’s Arch as it not only ignores previous objections to the number of proposed houses, but adds 6 Travelling Showpeople plots, for which there is no proven demand in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)
Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

It appears from the changes you have made to the proposal for homes and Travellers plots that you have totally ignored the numerous pervious objections which were made by local people. Exactly what are the 'exceptional circumstances' that you claim exist? A clear definition of these would be helpful, please? Six Travellers plots is excessive as there is no proven demand for any whatsoever in this locality. Garlick's arch is a permanent piece of ancient woodland from the 16th century. Apart from the loss of this unique area of woodland and the fact that Ripley and Send will effectively be joined and therefore defeat the key purpose of the Green Belt, this area is subject to frequent flooding and has been given a 'Flood Zone 2' designation.

This revised plan for 400 homes will cause an immense over-development of our village and the removal of a flood plain. Will our doctors surgeries be able to cope with the demand from the proposed number of new residents or the local schools be able to offer places for children. Very importantly, would the roads be able to cater with the additional traffic, which would be excessive. Your changed plans would cause heavy traffic for many hours each day and queues that would stretch from 'Old Woking' to the M25. You must be aware of the current state of affairs of near gridlock on all roads in the area at least twice daily.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

12. I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq. m proposed. That site was removed from the Plan without any reasoning.

The development at Garlick’s Arch would result in the loss of four existing rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

15. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site.

Why was a brownfield site removed and replaced with a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. Development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/164  Respondent: 15463009 / P M Proctor  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Site A43 Garlicks Arch
I object to the increase in houses to a figure over 600. I further object to the provision for Travelling Showpeople Plots,
which would obviously involve the use of articulated lorries and other transportation vehicles. These would be wholly
unsuitable in this area, especially when accessing on to the B2215 road. The proposed inclusion of these plots is out of
line with the original plan and is in a Green Belt area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

21. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a
shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and
transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars
for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will
cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this
important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be
used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling
development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory
purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of
this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for
turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham
School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. **I object to development in areas at risk of flooding (Policy P4)**

The Environment Agency classifies the site at Garlick's Arch (A43) as being in a higher risk than the Council's own assessment. The plan does not take adequate account of the flood risk as required by National Planning Policy, especially as this area has flooded many times in recent years.

**I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)**

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

**I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)**

Damage will be caused to the ancient woodland of oak trees at Garlicks Arch site (A43) proposal, and the loss of green space and amenity.

**I object to the proposed Infrastructure Schedule (Appendix C)**

There is no schedule for Garlicks Arch (A43); the plan takes no account of the infrastructure required for this site and therefore it is not fit for purpose.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the building of 400 houses and 7000sq metres of industrial space at Garlicks Arch. This was sprung on the village at the last moment, only 2 weeks notice and without any prior consultation.

The infrastructure requirements have not been properly considered and are inadequate to deal with the proposed housing levels. Our roads, doctors and schools will be unable to cope. Industrial space is not needed and if it was could be accommodated on the Slyfield industrial estate.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 change at Garlick's Arch because it ignores all the thousands of previous objections made by local people, this is a beautiful permanent Green Belt area and the number of houses proposed is excessive and increased traffic will block up the local roads of Send and Ripley. Also there is no proven demand for Traveller Showpeople plots in this location.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I vehemently object to building 400 houses and 7000 sq meters of industrial space at Garlicks Arch. I have just moved away from the Slyfield industrial estate to an area that I am assured by law cannot be touched for such purposes. We have paid a very hefty premium for the privilege of living in such a place, and will continue to pay the mortgage for many, many years to come. The site floods and is also ancient woodland that needs protection for the generations to come. If industrial space is needed it should be cited with the existing in Slyfield where we have just moved away from. We have been shown no calculations of Guildford housing requirement calculations so there is no basis to plan for the huge number of addition houses being suggested. I also object to the accelerated way these proposals were pushed forward with the hope of the local community not having time to Object.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
I object to policy A43 change at Garlicks Arch because:

- I do not see any exceptional circumstances that should force the erosion of green belt land
- It will remove the 'green belt' between Ripley and Send that is necessary for the survival of our native species such as Hedgehogs
- It will generate further traffic that will clog up the area to the detriment of all those currently living here
- A further 400 homes will put further pressure on local services, which are currently at breaking point; transportation, hospitals, education etc.
- There is no proven requirement for travelling show people plots
- It will spoil the current beauty and openness of the area, which is what attracted my family and I in the first place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I would like to voice my objections as a Send resident to the following elements of the local plan:

I OBJECT to the building of 400 houses at Garlick's Arch along with the proposed 7000 meters of industrial space. This is a site that floods and the calculations for the need such a large housing development has to my knowledge not been disclosed. This is a new site and was not included in the Regulation 18 draft and has not been consulted on previously. The local infrastructure cannot support such an increase in local residents. Overstretched schools and medical centre will not be able to cope with such developments.

Slyfield offers a much better site for industrial development - if needed at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the Policy A43 change at Garlick's Arch because:

a) It will link Ripley and Send with no green buffer between the 2 villages.
b) Again there is no consideration of the thousands of previous objections to this proposal from local residents and the increase in numbers of houses to 400 is massively excessive.

c) It is an inappropriate site on account of frequent flooding and it represents a rare piece of ancient woodland which should be conserved and not destroyed.

d) Excessive traffic will again be generated on the Old Portsmouth Road which is already very busy (especially when there is a blockage on the A3). Ripley and Send come to a standstill with the current overflow traffic from the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to building 400 houses and industrial space at Garlick's Arch. This area contains an ancient woodland and to develop it would be an environmental disaster effecting wildlife and destruction of many species. The area is prone to flooding which would increase, plus pollution. 400 houses has the potential for another 800 cars on the road and this coupled with lorries, vans etc to serve industrial units who would either travel through Ripley and Send, - a rush hour nightmare. This is turning our villages into urban areas and is contrary to Green Belt regulations.

Policy A43 Land at Garlick's Arch. Send Marsh.

I object to the addition of eight travelling/show people pitches.

a) There is NO demand for these pitches in this area.

b) There is NO legal requirement for this provision - Guildfords's own 'drop-in event describes this provision as "Sui generis". Translated it means to hinillier a generous gesture.

c) The local plan policy states "Gypsy, traveller or travelling show people accommodation should only be provided on development sites of 500+ homes NOT 400

d) The council has ignored thousands of objections to the proposal for 400 houses on this site. The impact on both Ripley & Send in terms of traffic jams. insufficient intiastructure and services.

e) The site is Ancient woodland and permanent Green Belt of historical interest which should not be de-classified. There is NO justification that would meet the criteria of "Exceptional circumstances."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4072  Respondent: 15470145 / Linda Eyre  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2)

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Comment ID: PSLPS16/4118  Respondent: 15473473 / Gordon Prosser  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 in that the proposed industrial development of 7000 sq m is simply not required. In addition, any proposal to have a traffic interchange (4 way) onto the A3 at Burnt Common would lead to impossible numbers of HGV’s etc, and Send is already overburdened with traffic from 6 am to 7 pm on weekdays.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I also object to the developments a43, a44, a43a for the same reasons.
I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Glandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here. The A247 running south past this site through the centre of West Glandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians. The development will cause harm to the ancient woodland on and by the site. (Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford. Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2). The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016. Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site. National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution.
Development on this site is wholly inappropriate (Policy I3). If the stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4). This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3). The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4). It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1). Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a) The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. "Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved. This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4775  Respondent: 15474849 / Timothy Yorath  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of the flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the Character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Comment ID: PSLPS16/4155  Respondent: 15475297 / Jane Patricia Chandler  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the Green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well, I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over nine years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no uncertainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 and M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Common, Send Marsh and Ripley. The development of 400 homes at the Garlick’s Arch site will cause coalescence with
Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

Comment ID: PSLPS16/5558  Respondent: 15479681 / George Smith  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no
prior consultation with the local This site should be protected as it is agricultural land that is previously undeveloped and
within the Green Belt. There is no sound reasoning as to why the Garlick’s Arch site was substituted at the last minute on
24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield
site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100
homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt
Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with
Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances
for this site being removed from the Green Belt, as required by the National Planning Policy.

1. I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site
according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks
Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section
4.2.24 of the Plan.

1. I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of
the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were
1. a) The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) than the Burnt Common site did”

2. b) The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to new sites (Garlicks Arch) being introduced as an afterthought when it was not even considered in the previous plan. A slip road on the A3 at Burnt Common has been added to the Draft Local Plan without Highways England consent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement - often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

1. I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
**I object to development in areas at risk of flooding (Policy P4) The Environment Agency classifies the site at Garlicks Arch (A43) as being in a higher risk than the Council's own assessment. The plan does not take adequate account of the flood risk as required by National Planning Policy, especially as this area has flooded many times in recent years**

**I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43) Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.**

**I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3) Damage will be caused to the ancient woodland of oak trees at Garlicks Arch site (A43) proposal, and the loss of green space and amenity**

**I object to the proposed Infrastructure Schedule (Appendix C) There is no schedule for Garlicks Arch (A43); the plan takes no account of the infrastructure required for this site and therefore it is not fit for purpose**

**I object to the employment strategy and impact on Garlicks Arch (A43) (Policies E2 and E5) The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).**

**I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley**

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt. Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

**I object to the Local Plan as the development proposed is not sustainable**

13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car. The Plan has nothing to improve the infrastructure for Garlick’s Arch.

The development should be in urban areas where there is sustainable transport.

**I object to not protecting the Green Belt**

I object to removing Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43) and the resulting urban sprawl. There are **no exceptional circumstances** for these villages and sites being removed, as required by the National Planning Policy.

The Plan should develop the existing **brownfield** site at Burnt Common rather than developing Garlick’s Arch (A43).

**I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)**

There is too much traffic in our villages already and this plan will cause more congestion in Ripley, Send and Clandon, with no plan to improve that.

The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses means dangerous and unsustainable traffic.

**I object to the damage to the historic environment as a result of the scale of the proposed development**

The Garlick’s Arch (A43) proposal would double the built area in the locality, and would irrevocably damage the character of the Ancient Woodland on the site, which includes over 80 ancient oak trees.

**I object to poor air quality concerns**

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

**I object to the lack of proper infrastructure planning for sites**

The Plan does not identify adequate infrastructure improvements to support the huge scale of development, especially at Garlick’s Arch (A43) which has no infrastructure projects in the Infrastructure Schedule to support it. Local services, utilities and sewerage, doctors etc. are at or close to capacity.

There are no plans to improve the capability of the medical and police/emergency services to cover the 5000+ houses in the north east of the borough.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

I object to the employment strategy and impact on Garlicks Arch (A43) (Policies E2 and E5)

The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: spslp172/4471  Respondent: 15483713 / Claire Walker  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

** I object to development in areas at risk of flooding (Policy P4)

The Environment Agency classifies the site at Garlicks Arch (A43) as being in a higher risk than the Council's own assessment. The plan does not take adequate account of the flood risk as required by National Planning Policy, especially as this area has flooded many times in recent years

** I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

** I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

Damage will be caused to the ancient woodland of oak trees at Garlicks Arch site (A43) proposal, and the loss of green space and amenity

** I object to the proposed Infrastructure Schedule (Appendix C)

There is no schedule for Garlicks Arch (A43); the plan takes no account of the infrastructure required for this site and therefore it is not fit for purpose
** I object to the employment strategy and impact on Garlicks Arch (A43) (Policies E2 and E5)

The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)
Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)
There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

SITE A43 GARLICKS ARCH

The revised plan is increasing the number of homes to a minimum of 400 on what is Greenbelt Land. This and other proposed developments in the north of the borough is in danger of harming the rural nature of the surrounding villages of Send, Ripley, and Clandon.

Inclusion of 6 Travelling Showpeople plots and associated storage facilities is totally inappropriate in a rural environment in Greenbelt land. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]. There is no identified need within the Local Plan document for this allocation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- I object to a Local Plan which does not consider flooding risks (Garlick’s Arch)
- I object to a Local Plan which seeks to decimate ancient woodland (Garlick’s Arch)
- I object to a Local Plan which does not consider the impact upon wildlife (Garlick’s Arch)
- I object to a Local Plan which seeks to include industrial usage on a greenbelt site (Garlick’s Arch) rather than using a Brownfield site (Burnt Common)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4496  Respondent: 15486017 / Neil Higgins  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to a Local Plan which includes 400 houses and 7,000 sq feet of industrial usage (A43) in an area where only recently you correctly turned down an application for only 25 houses. Housing Need is not an exceptional circumstance which justifies the removal of land from the Green Belt. Simply because a Landowner and a Developer are seeking to make millions of pounds profit – that greed is not an exceptional circumstance which justifies the removal of land from the Green Belt. Neither is there an exception circumstance justified when those said Land owners and developers effectively offer a bribe of paying for the ramps to the A3 (A43A). On every moral and ethical test this is not something which can be justified and should be removed from the Local Plan.

I trust that you will consider all of the objections which I have raised above. That you will determine that all my objections are reasonable and as a consequence you will accept that the Local Plan, as currently written, is flawed and requires significant amendments before being presented again.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substitute at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I understand the owners of Garlick's Arch are gifting the land for these new slip roads. What the plan does not make clear is that Policies A43 and A43a are actually inter-dependent in that the gifting of this land is dependent on the owner's receiving planning consent for housing.

The Garlick's Arch site has a number of problems with it that will, in no doubt, lead to lengthy delays in its development. For example the site is in Flood Zone 3, the existence of four pylons on site and the ancient woodland.

The Garlick's Arch site was included in the Plan at the twelfth hour- it has not been the subject of the rigorous scrutiny that has been applied to all other sites. I cannot understand why it was a last minute replacement for another site, Burnt Common, that has been the subject of prior development as it already has on it three industrial units. Furthermore this site was previously highlighted as important in meeting the industrial needs of the Borough.

The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.
I would like to object to the below proposed new developments for the below reasons. We accept that extra housing is needed, but it is important to get the numbers and locations right, which based on my objections below does not seem to be happening.

Please can my below comments be shown to the Planning Inspector who will make the decision. Please also send an email receipt that this has been received.

I OBJECT to building 400 houses and 7000 sq meters of industrial space at Garlick's Arch, opposite Send March Road. This will create unsustainable amounts of traffic on the already extremely busy Send March Road and Portsmouth Road. My busiest part of my journey to work in the morning is getting from Send March Road onto Portsmouth Road, and the queue of traffic is often down as far as the Saddlers Arms pub. It will become impossible to get onto Portsmouth Road with any additional houses or industrial space.

In addition, the site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. Guildford's housing requirements have been shown to be grossly exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt site is not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government states clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 land at Burnt Common Ware house which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.</td>

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5084  Respondent: 15500161 / Joanna Scott  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14) Why not?

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1) Some of my friends have struggled to get school places as it is!
Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham...
School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (BB).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and redkites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to a new interchange with the A3 at Burnt Common because Send would have to take traffic from the proposed 2000 houses at Wisley Airfield, 2000 at Gosden Hill and 1850 at Blackwell Farm as well as 485 from Send itself. This is in addition to what it takes at the moment. Much of this traffic to and fro the A3, M25, Woking and
Guildford would go through Send. Send Road, which is already overloaded, would face gridlock. This would exacerbate noise and pollution levels which are already excessive and is wholly unacceptable.

I OBJECT to the new interchange with the A3 at Burnt Common because it is being presented as a way of facilitating the movement of a massive increase in vehicles whereas in reality it would cause havoc on the A247 and the many feeder roads in Ripley and Clandon in addition to Send.

I OBJECT to the fact that Guildford Councillors approved the Local Plan before the Transport Assessment had even been published which indicates what scant regard they had for the traffic implications which are at the forefront of residents’ worries. They have to contend with the problem every day in terms of delays, pollution and noise which are already destroying our villages as decent places in which to live.

I OBJECT to building 400 Houses and 7000 sq meters of industrial Space at Garlicks Arch opposite Send Marsh Road. This is Green Belt Land with Ancient Woodland, and is prone to considerable flooding. The industrial space is definitely not needed as there is adequate space at Slyfield Green, and the owners at Slyfield are keen to have extra use there. You do not in fact need at all extra industrial Space.
If GBC used the brownfield sites this Green Belt land would not be needed.
The gridlock that this development would cause on the local Roads would be in addition to the congestion that there already exists around this area and getting the developers to bribe SCC with a new junction will only add to the congestion by pulling in extra traffic trying to access the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT TO POLICY A 43 because:
It ignores thousands of previous objections made by us local people.
It will cause even more traffic congestion, which is dreadful already, gridlocking the Roads in and out of Send and Ripley.
It will fill in the gap between Send Marsh and Ripley, so defeating the purpose of the Green Belt.
It will cause over development of our village and this number of homes is excessive.
There are NO "exceptional circumstances" existing to use our precious, beautiful Green Belt Land.
The beautiful Ancient Woodland in this site has been there since Elizabeth the First and must be protected for future generations.

Being a flood zone 2 allocation it is prone to frequent flooding, so the surface water will be moved onto the lower ground where I live.

There is a clay pigeon shooting site here which has polluted the ground with lead shot for over 50 years.

There is NO PROVEN demand for Traveling Show people plots here.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)
Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance. What will happen for doctors, dentists and schools? It is bad enough already.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5119  Respondent: 15502817 / Linda Margaret Cutbush  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)
Why is it deemed necessary for a new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of existing successful rural businesses, which have been there for decades employing local people and are therefore clearly sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the inclusion of strategic site Policy (A43 Garlick's Arch) and its late substitution in the Local Plan with no prior consultation with the local community. Attached documents:

I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.
The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Policy A43 - Garlick’s Arch

I object -

1) This is land is Green Belt - designed to prevent sprawl and the merging of settlements. No ‘exceptional circumstances’ have been claimed – indeed there has been little time to address this or the other issues below. This site was not in the 2014 Section 18 original draft Local Plan, not the revised Section 19 Local Plan in April 2016, and appeared just thirteen days before the Council met to recommend consultation – a poor way to make large decisions.

2) The development is too large – the proposal for 400 homes plus light industrial facilities represent an increase of about a quarter the size of Send village. People living there will use the Send schools and the Send-based Villages Medical Centre which serves Send and Ripley. These are currently working at capacity. 400 homes at Garlick’s Arch would provide too many patients and pupils for present arrangements, and not enough to make feasible the building of a new school or new medical facilities.

3) The proposed new links to the A3 would mean a large increase in traffic through Send and at the Burnt Common Roundabout; these road are already jammed at times. It is claimed that it is not permitted to link the Garlick’s Arch directly to the A3, so traffic to and from the site would use the narrow Burnt Common Lane, the Portsmouth Road, Burnt Common Roundabout and the A247 Clandon Road before accessing the new links, hugely adding to local traffic. Even if the direct link to the A3 could be made, some vehicles from Garlick’s Arch traffic would be bound to use the A247 through Send to Woking, going through Burnt Common Roundabout.
The A247 and Burnt Common Roundabout are already gridlocked at busy times; any further traffic would cause significant delays for longer periods, and consequently higher levels of traffic pollution (diesel particulates, carbon monoxide and oxides of nitrogen).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5311  Respondent: 15504929 / William Scott  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (88). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).
This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy 03).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

Why not?

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11) Some of my friends have struggled to get school places as it is!

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy A43 Garlick's Arch due to the following points.

There is no proven demand for plots to accommodate Travelling Showpeople.

National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt land. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. It constitutes over development. These further changes to the plan are not required.

It is an unsustainable location. It will undoubtedly cause traffic chaos on the minor surrounding roads. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion, anyone who lives in these areas will confirm that this is the case. Substantially more vehicle movements will result in even more congestion and greater pollution. Residents and the environment will suffer as a result.

This area contains ancient woodland dating back to the 16th century, which should be preserved. There is no good reason to tamper with it.

This site is identified as being in a Flood Zone 2 and regularly floods during winter months.

This site contains land which is heavily contaminated by many years of shooting with lead shot.

Above all, the latest changes to this site have completely ignored the thousands of previous comments from residents (who know the area best of all) during the 2016 Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the fact that the first notification I received of the proposed changes to include development of Garlicks Arch was in early June via a leaflet distributed by a concerned neighbour and not via Guildford Borough Council.

I OBJECT to the fact that GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment which shows that industrial space at Burnt Common IS NO LONGER NEEDED.

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start considering improving the A3 before 2020. Clearly no real improvements are possible in the timeframe of this Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

There is no sustainable transport infrastructure.

The site is liable to frequent flooding

The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.

There are no plans to improve local schools, medical or utilities to cope.
I object to the employment strategy and impact at Garlick's Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to policy A43 Garlick’s Arch. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. There is a danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need for a Strategic Employment Site in this location when there is ample spare space available at Slyfield (40 ha) and the Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. I object to the loss of rural employment on the site as the development would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy II) which requires improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object on the grounds of the congestion that development will cause to the trunk roads, A3/M25 (Policy 12). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. The A3 & M25 are already at capacity during peak hours and development prior to improvement of these roads will make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3469  Respondent: 15509057 / Richard Golding  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the policy A43 changes at Garlick’s Arch because:

This land is GREEN BELT it contains two areas of ancient woodland 50% of the site is subject to flooding and is recognised locally as a FLOOD PLANE (see attached photographs), it carries a flood zone 2 allocation any work carried out to reduce the area flooded would increase the likely hood of flooding in Send Marsh, the Environment Agency undertook work a few years ago in Send Marsh to reduce the risk, but any work on Garlick’s Arch could neutralise the good work done.

If the proposed development of 400 houses and 6 travelling show peoples’ plots were built where will their surface water go, will it just be spirited away, it will certainly not soak into the ground under such a density of buildings.

The proposal for 400 homes totally ignores the thousands of previous objections made by local people, and there is no proven demand for travelling show peoples plots in this location.

The ancient woodland on the site has protection under the NPPF section 118 if one locates a development of this size adjacent to woods it can not fail to damage it. I do realise the policy does allow exception for thing of national importance, but this certainly fails to meet that standard. A UK wide state of nature survey undertaken in 2016 shows
worrying trends, so Surrey Wildlife Trust landscape manager Mile Waite undertook a state of nature survey in Surrey and this showed that Surreys flora and fauna appears to be fairing particularly badly with losses far higher than the national level – 12% compared nationally 2%. Of a total of 404 priority species of national conservation concern almost 31% are locally extinct in Surrey while 37% are threatened or in worrying decline leaving 32% considered stable or recovering. The proposed development will not improve the situation it would have a negative effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

I object to the employment strategy and impact on Garlicks Arch (A43) (Policies E2 and E5)

The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham
School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.
The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** pslp172/4366  **Respondent:** 15570817 / Tom Edelsten  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial
(B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c),
general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

POLICY A43 AND A43a – Garlick’s Arch

I object to Policy A43 and A43a on Garlick’s Arch.

This site had been previously considered and rejected before the previous draft of the Plan. The site was then inserted in the Draft Plan only hours before its publication without any consultation. I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site. This is a cavalier approach to public engagement by the Council.

1. The site is not a sustainable site, being far from any infrastructure facilities and transport links. The bus service is infrequent and future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

1. The site is susceptible to flooding and development will cause harm to the ancient woodland on and near the site. See my comment on Policy P4 above.

1. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

1. The Council appears to view the development as an enabling site to obtain land and developer funding for slip roads on/off the A3. This is not an exceptional circumstance to justify taking Green Belt land. The slip road land if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential, Government funding...
would become available. Accordingly enabling development was not necessary. The same principle applies here.)

1. The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A-road. In places it is too narrow for two lorries to pass causing them to mount the pavement, often at speed. (During the last week of the consultation period of this Plan, a resident of West Clandon had his car written off by a negligent car driver coming the other way and occupying 2/3 of the road at an obvious pinch point which is typically littered with broken wing mirrors.) It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for cyclists and pedestrians.

1. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford. There is vague talk in the plan of link roads between Gosden Hill and Garlick’s Arch, all meeting at an enlarged A3 intersection at Burnt Common. The existing intersection is unlit and is accident prone. Adding two or three slip or feeder roads at this point will add to the confusion and public danger.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2) especially when there are suitable sites in brownfield areas that could be developed.

The Plan states the preference is to making the best use of previously developed land. Yet two weeks before the start of consultation a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses and the industrial provision, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3). The site has an abundance of wildlife, some of which are protected. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at such a late stage no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk...
road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

I object to the building of 400 houses and 7000 sq ft of industrial space at Garlick's Arch. This is in the greenbelt area and there are definitely brown belt sites in the area that are ripe for development and would keep the green belt in tact. I also understand that the requirement for housing in the Guildford area is not as high as has been specified.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced by a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object to Policy A43 (Land at Garlicks Arch, Send Marsh).

The reasons for my objections are as follows: -

The surrounding Send Marsh area is subject to frequent flooding. A flood plan was put in place a few years ago to try and avoid flooding in the area of Send Marsh Road, between the junctions of Greyfriars Road and Maple Road. The environment agency said at the time that the measures put in place would be suitable for a 1 in 100 years event but this has by no means been as successful as was promised and there is still areas where water lays during prolonged rainfall.

The Environment Agency Plans were based on the surrounding area being a woodland area. Changing the Garlicks Arch area to a housing estate would drastically alter the plans the Environment Agency’s put in place. I attended the open session with the town planners at East Horsley Village Hall and the only comments they could offer was that the site would have to solve its own drainage problems. The fact is there is no where for the water to go other than down the hill to this area of Send Marsh Road. My house has nearly been flooded on a number of occasions. If these plans were to go ahead I would expect a cast iron guarantee from Guildford Council that my house would never be flooded or that they would compensate me in full if it did happen. Are the council willing to give this guarantee? I would like a response on that point please.

I am not against development and building houses. I do not have a problem with building on the Wisley site which I consider to be brownfield due to the amount of concrete that exists for the now unused runway. The land at Garlicks Arch is however permanent Green Belt land, it is woodland and meadowland that needs to be preserved. We should not be building on Green Belt land and use Brownfield sites instead. Again at the open session with the town planners at East Horsley Village Hall I asked why we were not using more Brownfield sites and the reason I was offered was that many Brownfield sites had multiple landlords and it was difficult to get them all to agree to use the land. A problem being difficult is not a reason to destroy woodland that has existed for hundreds of years.

There is already a traffic jam every workday morning, during rush hour, in Send Marsh Road heading up to the junction of Portsmouth Road and again in the evening. The main Portsmouth Road could not cope with the additional traffic that 400 new homes would create and definitely could not cope with large Travellers vehicles. People who do not live in the area would not be aware of the problems the large vehicles cause every year when the Ripley Bonfire takes place to have this type of chaos on a regular basis would be totally unfair on the residents.

There is already sufficient provision for Travellers in Ripley so I do not see why we need to provide more plots.

The Send Marsh area is already densely populated with issues around school places and an over-subscribed Doctor’s surgery. It is already difficult to get a doctor’s appointment this policy is clearly an over development of an area that is already creaking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/5813  Respondent: 15575137 / Charlotte Procter  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- I OBJECT to the 400 houses and a new interchange with the A3 being put at Burnt Common because Send will have to take a vast increase in traffic if this happens. This traffic would come from the proposed 2000 new houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and Blackwell Farm. Much of the traffic from these areas would go to and from the A3, M25, Woking and Guildford through Send. Send is already overloaded with traffic and it would be gridlocked if it had to take on so much more. The pollution levels would also become even worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I Object to the inclusion of Garlick’s Arch (Policy A43) on grounds of congestion

The addition of 400 homes to the Village of Send will result in increased congestion in an already congested area. The impact will be felt in the villages of Send, Clandon and Ripley to name a few.

The only improvements included in the plan to the road network are in the form of two new slip roads which are not expected till “between 2021-27” and at a cost of £10,000,000 each it is possible that they will never be delivered.

I object to the inclusion of Garlick’s Arch (Policy A43) on grounds of sustainability

The addition of 400 homes to the Village of Send is a disproportionate amount of development in this village and there is a complete lack of provision for infrastructure such as Doctors Surgeries or Schools.

To be clear the local plan has allocated the site for “400 homes and up to 7,000 square metres of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8)”. There is NO provision for retail, surgeries or schools. The closest shop referred to as a Waitrose is actually a Little Waitrose in the petrol station.

I object to the inclusion of Garlick’s Arch (Policy A43) on grounds of deliverability

The deliverability of Garlick’s Arch is highly questionable due to the following:

- Large areas of Garlick’s Arch being in Flood Zones 2 and 3.
- Four electricity pylons running through the centre of the site.
- Ancient Woodland dating back to the 16th Century boarding and within the site.
- Pollution levels currently recorded.
- No existing screening protecting the site from noise or visual impact of the A3.
- Ecological impact.

I object to the inclusion of employment area within Garlick’s Arch (Policy A43)

The creation of a second employment area in Send Village is unnecessary and at the detriment of the village. There is an existing industrial are Burnt Common Nurseries comprising of three industrial units totalling 50,000 square feet. These units are fully occupied and there is sufficient open land to accommodate a further 7,000 square metres.

Combining the two industrial areas will create a strategic employment site for the borough. Whereas locating the new industrial area in close proximity to residential may put of potential tenants concerned about restrictive working hours and will result in increased traffic and road safety issues.

I object to the inclusion of Garlick’s Arch (Policy A43) and Land for new North facing slip roads to/from A3 (Policy A43a) on the grounds of transparency

The Local Plan is misleading in that it does not state that Policy A43 and Policy A43a are intrinsically connected due to the owners of Garlick’s Arch gifting the land for the slip roads on the condition of receiving planning permission for housing.
Each of these Policies states a number of “Key Considerations” and “Requirements” none of which is that each policy is subject to the adoption of the other.

I object to the inclusion of Garlick’s Arch (Policy A43) and Land for new North facing slip roads to/from A3 (Policy A43a) on the grounds of insufficient information

The last minute inclusion of Garlick’s Arch means that it has not been threw the rigorous scrutiny that all the other sites have. As previously mentioned there are flood risk zones 2 & 3, ancient woodland and known wildlife on the site.

I object to the inclusion of Garlick’s Arch (Policy A43) on the grounds of scale

The allocation of “400 homes and up to 7,000 square metres of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8)” is unsupported. For the larger sites included in the local plan scaled drawings have been produced to show how the development will be accommodated. For Garlick’s Arch there appear to be no such drawings. Of particular interest is how much land will be lost to noise, visual and safety buffers between the A3 (including slip roads) and the rest of the site. Secondly the Flood zones 2 & 3 will need to be accommodated along with woodland and wildlife. How much developable land does this leave?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPS16/6016  **Respondent:** 15581665 / Laura Daboo  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43  

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infant school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
CHAOS ON OUR LOCAL ROADS

I OBJECT TO the disproportionate amount of development in one area of the Borough

400 HOUSES AND 7000sq METRES OF INDUSTRIAL SPACE AT GARRICKS LANE

40 HOUSES AND TWO TRAVELLERS PITCHES AT SEND HILL

45 HOUSES AT CLOCKBARN NURSERY

WISLEY SITE 2000 HOMES STILL IN THE LOCAL PLAN

GOSDEN HILL 2,200 HOMES

I OBJECT TO the limited consultation period

VERY SNEAKY LAST MINUTE INCLUSION OF NEW SITES (LESS THAN 2 WEEKS )

I OBJECT TO the lack of Doctors Surgeries to cope with increased residents

HOW WILL THE ROYAL SURREY COPE WITH THOUSANDS MORE PATIENTS

WHERE WILL THEY PARK ?????

THATS IF THEY EVEN ARRIVE IN TIME FOR THEIR APPOINTMENT DUE TO SUCH CONGESTION AROUND THE CATHEDRAL EXIT ON THE A3

I OBJECT TO lack of schools to cope with more residents.

WHERE IS THE SPACE !!!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6020  Respondent: 15582177 / Caroline Collins  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like these objections to be seen by the planning Inspector.

My objection is based on the following: -

There is already sufficient housing proposed for the borough (18,860) so there is no need for this additional development.

This is a New site and was not included in the Regulation 18 draft and has not been consulted upon previously.

This is Green Belt land permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances here.

The site is a place of natural beauty and a natural conservation area which has existed since the 16th Century.
The proposed industrial development is not required (the latest Employment land Needs Assessment 2015 (ELNA) shows a reduction of 80% from the previous draft plan. Any industrial space should be located at the already industrialised site at Slyfield.

A new 4 way interchange onto the A3 would cause even more traffic problems to an already daily congested area. The surrounding roads are not suitable or sufficient to take even more traffic.

In short this is an unsuitable development that should not proceed. Whilst I appreciate we need to provide housing and industrial accommodation we must stop using Greenfield sites until we have exhausted all of the Brownfield options that exist in the borough, of which you will be well aware there are many. We must ensure that we manage land in the borough so that we leave future generations areas of natural beauty that they can enjoy and use.

Send Marsh was also known for flooding and to take away more trees and natural sources for the rain water is madness when other options are available.

I object to the late inclusion of site A43 Garlicks Arch.

I object to site A43a the on and off ramp at Burnt Common / Clandon as this will make the traffic problems currently suffered by Ripley and Send far worse, attracting vehicles from a wide area into trying to access the A3 and M25. When there is an accident or breakdown on the A3 or M25 the villages and surrounding become grid locked, this proposal will cause this to happen even sooner.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I vehemently object to building 400 houses and 7000 sq meters of industrial space at Garlicks Arch. I have just moved away from the Slyfield industrial estate to an area that I am assured by law cannot be touched for such purposes. We have paid a very hefty premium for the privilege of living in such a place, and will continue to pay the mortgage for many, many years to come. The site floods and is also ancient woodland that needs protection for the generations to come. If industrial space is needed it should be cited with the existing in Slyfield where we have just moved away from. We have been shown no calculations of Guildford housing requirement calculations so there is no basis to plan for the huge number of addition houses being suggested. I also object to the accelerated way these proposals were pushed forward with the hope of the local community not having time to Object.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to policy A43 change at Garlicks Arch because;

- I do not see any exceptional circumstances that should force the erosion of green belt land
- It will remove the 'green belt' between Ripley and Send that is necessary for the survival of our native species such as Hedgehogs
- It will generate further traffic that will clog up the area to the detriment of all those currently living here
- A further 400 homes will put futher pressure on local services, which are currently at breaking point; transportation, hospitals, education etc.
- There is no proven requirement for travelling show people plots
- It will spoil the current beauty and openness of the area, which is what attracted my family and I in the first place.

Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

I object to proposals to build on land known as "Garlick's Arch"

Proposal A 43.

There are no justifiable reasons for ripping out an area of ancient woodland and is an example of why the green belt has to be maintained almost at any cost.

Part of the site is below the road level of the A3 and would require an enormous amount of earthworks similar to that at Burpham to provide sound absorption and diffusion.

There is no particular need for industrial space to be on our doorstep, as we have moved on from the 18th century and do not need a workplace just round the corner from where we live. There is a perfectly good industrial park at Slyfield Green, but a few minutes away, and with the ability to expand onto relatively poor land if there was such a demand.

** I object to the Policy A43 change at Garlick's Arch because the proposal is still completely irresponsible in it's destruction of historic woodland without bothering to find some justification or exceptional circumstances to warrant this course of action.

The proposed area for the development is alongside of the A3 and is either level with or below the road level, which will require enormous sound barriers to be built to make the homes habitable.

One of the purposes of the Green Belt was to stop uncontrolled ribbon development along highways between individual towns and villages and this proposal will remove at a stroke the majority of the separation between Send and Ripley.

The Local Plan H1 Policy states that 'where there is an identified need sites for Gypsy, Traveller or Travelling Showpeople should be provided on developments of 500 homes or more, yet this requirement seems to be thrown out of the window when it comes to developments in Send. Is it related to the fact we have elected 'Independent' councillors.

1. ** I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

   Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government clearly state that housing need is not an exceptional circumstance.
The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
• There is no sustainable transport infrastructure.
• The site is liable to frequent flooding
• It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
• There are no plans to improve local schools, medical or utilities to cope.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the building of 400 houses and 7000 sq m of industrial space at Garlick’s Arch. This field floods regularly so is not suitable for purpose. Also, there is no need for this huge industrial space to be built on this site when there’s a brownfield site up the road in Slyfield that can take any of this sort of development. It will just ruin this land and bring in loads of traffic and pollution.

I OBJECT to the fact that Garlick’s Arch and Gosden Hill are in green belt land and therefore should not be used for building whatever because safeguarding the green belt stops developers from creating urban sprawls and this is what we will get if these sites are developed. Nowhere will be safe from development if the council keeps changing the boundaries of the green belt to suit their purposes.

POLICY A43 AND A43a – Garlick’s Arch
I object to Policy A43 and A43a in relation to plans for Garlick’s Arch. This site was only inserted into the draft plan at a late stage just before publication of the consultation draft. The site is not a sustainable site being far from infrastructure facilities and transport links. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt. There is no evidence in the plan of the exceptional circumstances required to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site. The development will cause harm to the ancient woodland by which the site is bordered - a number of trees are protected by Tree Preservation Orders (Policy D3). The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement - often at speed. It has narrow bends with poor sight lines, an infant school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

The stated preference in the Plan is to make best use of previously developed land. Nonetheless a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would draw in a huge amount of ‘through’ traffic as the route from London/M25 to Woking would be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 would go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved. This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Comment ID: pslp172/3664  Respondent: 15585281 / Val Woodland  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to policy A43 change at Garlick's Arch because

* it is on permanent Green Belt land,
* there are no exceptional circumstances,
* it would join Send and Ripley, which defeats the purpose of Green Belt,
* it is on ancient woodland

I also object to Policy A58 at Burnt Common because

* it is in the middle of Green Belt
* Slyfield and Guildford industrial areas still have empty units
* the 2017 Employment Land Need Assessment shows a reduction in demand for industrial land
* there will be a severe impact on local traffic

There is no need for large quantities of new, expensive housing in Send for wealthy people who will then perpetuate the 'not in my backyard' approach to further new housing.

I do, however, think there is a major need for affordable housing in Send, but I see no need for it to be on Green Belt or ancient woodland.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

15. **I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)**

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

I object to the employment strategy and impact on Garlicks Arch (A43) (Policies E2 and E5)

The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2185  Respondent: 15585793 / Mark Horigan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/6217  Respondent: 15585921 / Michael Hickey  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the above plan for the following reasons:

I object to the use of Green Belt land which should be protected by the NPPF which prevents the merging of settlement.

I object to this plan because there are no exceptional circumstances that would warrant destruction of Green Belt land that is covered by ancient woodland and is a particularly sensitive conservation area.

I object to the use of protected Green Belt land for industrial development since land will be available at Slyfield Industrial Park should it be needed, which according to the latest Employment Land Needs Assessment 2015, it is not (80% reduction in employment floor space.

I object to the erosion of quality of life though inadequate infrastructure to support this development. The proposed takes no account of GBC's Transport Assessment which highlights infrastructure overload. Improving access in a limited part of the system (Burnt Common) simply gridlocks adjacent areas such as Send and Ripley.

I object to the lack of social infrastructure to support this plan. Health, Education and Transport provision in this area is already inadequate within the hinterland of the proposed development.

I object that this site is new and was not included in the Regulation 18 draft and has not been consulted on previously.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the development of some 400 houses plus 7000sq m of industrial and warehousing building on the Garlicks Arch’.

The Portsmouth Road is often used as a substitute for the A3 in terms of speed and bad driving, which would multiply with the level of additional traffic which must be anticipated with the proposed development on this site. I live in nearby Send Marsh and often see instances of drivers taking high risks in pulling out of Send Marsh Road into the Portsmouth Road. Again the potential for quite serious traffic collisions would be increased from the level of the increase in traffic flow along the Portsmouth Road. This particular junction is badly in need of traffic safety measures as it stands, the increase of significantly more traffic would increase the potential for collisions to an unacceptable point. The consequences of an accompanying increase of heavy goods vehicles associated with the proposed industrial site are self-evident.

The thought of a major increase in traffic flow facing local people needs to be seriously considered before any approval is given to the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

I object to the employment strategy and impact at Garlick’s Arch (A43) (Policies E2 and E5)

There is no need for new industrial sites at Garlick’s Arch (A43). There is an existing brownfield industrial site at Burnt Common that could easily accommodate the 7,000 sq m proposed. That site was removed from the Plan without any reasoning.

Furthermore the development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been for there decades employing local people and are therefore clearly sustainable.

### Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I would like to register an objection to the above named local plan and the above section for the following reasons:

1. Impact of traffic on Send village and neighbouring villages as a result of an additional 400 homes being built. Improvements to road network in the form of two new slip roads is not expected till between 2021-33 and at a cost of £10m each it is highly likely they will never be delivered.
2. The addition of 400 homes to the small village of Send is a disproportionate amount of development and there is a complete lack of provision for Doctors Surgeries or Schools.
3. The creation of a second employment area in Send when there are existing industrial units at Burnt Common Nurseries and space to expand to satisfy the demand. The proposed mixed development will cause issues such as road safety due to mixing commercial and private vehicles in the development. Secondly the proximity of the industrial units to the residential may put of potential tenants concerned about restrictive working hours.
4. The Garlick’s Arch site is in the Green Belt and used for agricultural purpose. Any development will result in the loss of rural employment.
5. The Local Plan is misleading in that it does not explain that Policies A43 and A43a are intrinsically connected due to the owners of Garlick’s Arch gifting the land for the slip roads on condition of receiving planning permission for housing.
6. The deliverability of Garlick’s Arch in 0-5 years is highly questionable due to the following – Garlick’s Arch being in Flood Zone 3, Four electricity pylons running through the centre of the site, Ancient Woodland dating back to the 16th Century, Pollution levels currently recorded, No existing screening protecting the site from noise or visual impact of the A3.
7. The Garlick’s Arch site replaced the Burnt Common Nurseries Site which was included in all previous drafts of the local plan and was allocated for industrial use and housing. Whereas the Garlick’s Arch site is Green Belt and has never been previously developed the Burnt Common Nurseries site has been previously developed and includes three industrial units totalling 50,000 square feet. This site was previously highlighted as key to meeting the industrial needs of the Borough.
8. The last minute inclusion of Garlick’s Arch means that it has not been threw the rigorous scrutiny that all the other sites have.

**I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)**

The proposed population growth at site A43 in particular (48% - 3.2% per annum over the plan period), where 400 new homes are being proposed, is an unsustainable and entirely ill-conceived one. The Office of National Statistics projects a growth of 0.57% across the whole UK for the same period, therefore I am curious as to how the architects of the GBC Local Plan consider this to be a sensible one. I also refer you to the lack of due process in your own planning procedures, whereby a last-minute change was made in April/May 2016 to the GBC Local Plan to add the Garlick's Arch development. From October 2013-May 2016 there had been no reference made to a development at Garlick's Arch. Instead there had been regular consultation on Burnt Common Warehouse. This latter development was inexplicably deleted from the proposals in May 2016 and replaced with a previously unmentioned development at Garlick's Arch, adding a further 300 homes to the Local Plan. Such an act is exceptionally bad practice (I concur entirely with Tibbalds Planning and Urban Design in this regard); please could the Council explain why it considers making this last-minute decision, after almost three years of consultation, an example of acceptable policy-making? **I therefore restate my objection to policy A43; it should be removed.**

*What changes (2016)/further amendments (2017) do you suggest should be made to the document?*

**POLICY A43 AND A43a – Garlick’s Arch**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.
I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments with sustainable transport. With ever reducing bus services in the area and no railway station within reasonable walking distance, it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and
transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly, any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Garlick’s Arch, opposite Send Marsh Road, (400 houses and 7,000 sq. Metres of industrial space) slipped in at the last moment in the hope it would be overlooked. This particular site reeks of underhandedness and it would be interesting to know who has a vested interest in this going ahead. Such a large number of houses and industrial buildings on virgin green fields is criminal in the extreme. Guildford has plenty of existing industrial complexes that would welcome expansion and which already have the infrastructure in place to take the traffic generated. Such a large number of houses and influx of people will totally change the character of the area. Where are the extra schools and doctors to support these numbers? We are struggling now to get appointments with our doctors and our children into our schools of choice right now, increase the population by 25% and it will be impossible

Document:   Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object strongly to the 2016 draft Local Plan for the proposed development of 400 homes at the Garlic Arch site on the Ripley/Send borders on the grounds that this proposal would include the destruction of ancient establish broad leave woodland and the large scale destruction of agricultural land. Both of these areas are an important part of the local green belt.
I object strongly to the 2016 draft Local Plan for the proposed development of 400 homes at the Garlic Arch site on the Ripley/Send borders on the grounds that both these areas are strategic for the natural absorption of local rainwater runoff. Even with these natural areas, the Environment Agency deemed it a necessity to spend considerable sums in 2006-2007 to protect Sendmarsh and Maple Roads from repeat flooding from Garlic Arch runoff. Calculations for these defences would NOT have taken into account the additional problems that would inevitable result from building over this natural ground absorption. If the proposal were to go ahead, Sendmarsh residents would be at a substantially greater risk of flooding and be severely disadvantaged by increased insurance premiums and devaluation of property.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the 2016 draft Local Plan for the proposed development of new industrial sites (under policy E2 and E5) in the Garlic Arch area. Existing brown field sites within the borough are already far better suited to new industrial developments without the need to destroy additional agricultural land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2552  Respondent: 15590849 / Nigel Freebody  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object strongly to the 2017 revised draft Local Plan for the proposed development of housing at Garlic Arch (site A43) on the Ripley/Send borders. The removal of the previous limit of 400 new homes leaves the site entirely open ended for additional destruction of Green Belt land. This is both ambiguous and unacceptable.
I object to the 2017 revised draft Local Plan for the expansion of previously proposed new industrial sites at Garlic Arch (site A43). Existing brown field sites within the borough are already far better suited to these industrial developments without the need to destroy additional Green Belt land.

I object to the 2017 revised draft Plan for inclusion under the development of Garlic Arch (site A43) of travelling showpeople plots with storage facilities. There is no justification for such inclusion within the Green Belt area and sacrifice of Green Belt land for this purpose seems inappropriate and cavalier.

I object to the 2017 revised draft Plan proposals for the number of showpeople plots at the Garlic Arch (site A43). The proposed allocation is disproportionate to the number of possible homes on the site as compared with other local development plans, such as the Wisley aerodrome site.

I strongly object to the maintained inclusion of the woodland area at Garlic Arch (site A43). There is absolutely no justification for the wholesale destruction of this well-established ancient woodland. At the very least, this woodland area should be removed entirely from any proposals for development of the remainder of the site.

I object strongly to the 2017 revised draft Local Plan for the proposed development of increased number of homes at the Garlic Arch (site A43) because, as outlined in previous objections, both these areas are strategic for the natural absorption of local rainwater runoff. Additional homes over and above the previously stated limit of 400 homes will only further exacerbate the water runoff problems and further increase the flood risk.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
at Gosden Hill Farm, … (site allocation A25) than the Burnt Common site did]”

b) The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

14. I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

The most distressing element of this plan is that such a large proportion of the overall proposed development is being targeted on this small part of the borough. It is simply disproportionate and there is little understanding being shown by those elected to represent our views. I trust, therefore, that these objections will be given your full attention and that the Plan is amended accordingly.

---

**Comment ID:** PSLPS16/6560  **Respondent:** 15594817 / Toni Thompson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document: complies with the Duty to Cooperate? ( ), Sound? ( ), is Legally Compliant? ( )**

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

• I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Infrastructure Plan as it takes no account of the proposed development in Garlick's Arch - proper consultation and inclusion of this development has obviously not happened, so the plan is flawed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I further object to the development at Garlick's Arch due to the inadequate assessment of flooding risk - as evidenced by the Environment Agencies assessment being higher than GBC's. Every winter the drainage from Burnt Common Lane onto Portsmouth road floods, despite previous attempts to improve the situation. Our house has also been flooded previously, causing pain and increased insurance premiums, so the low risk assessment has obviously not included previous incidents in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of
Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I object to building 400 houses and 7000m² of industrial space at Garlick’s Arch. Ancient woodland! Subject to flooding! Plenty of brownfield sites already available in the borough! Slyfield is already the industrial centre of Guildford Borough so why create another one especially as there is an over supply of industrial space in the area at the moment and for the foreseeable future. In addition, Guildford’s housing plan requirements have been shown to be grossly exaggerated and when challenged, the council refuses to release their calculations

Garlick’s Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

There is no sustainable transport infrastructure.

The site is liable to frequent flooding

The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.

There are no plans to improve local schools, medical or utilities to cope.

---
Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for its removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding.
- The site has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

I Object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is protected from development due to it's Green Belt status. There are no exceptional circumstances which allow it's removal from the Green Belt (Policy P2) - Central Government clearly state that the need for new housing is not an exceptional circumstance.

The Plan clearly states the preference is to use previously developed land, but Guildford Borough Council have removed a brownfield site at Burnt Common, and replaced this with Garlick's Arch.

The Garlick's Arch is not appropriate because:

- there is no sustainable transport infrastructure
- the site is liable to frequent flooding
- it contains ancient woodland and is a wildlife habitat - yet there is no wildlife report for the site in the Plan
- there are no plans to increase local school places or local medical services, or any plans to improve local utilities in order to meet the additional demand from these new houses.
I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement—often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this...
site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43).

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

Garlick’s Arch (policy A43) This was a very late and very major change to the Local Plan proposals does appear to have not followed the correct due process so should be removed. The proposal to build circa 400 houses and 7,000sq.m. light industrial/storage, warehousing Green Belt land, lying outside the Send Marsh/Burnt Common village boundary, defies all logic. This area which includes ancient woodland is a refuge for wildlife, and a clear separation for the A3 and the village. It was also never considered as a Potential Development Area within the Council’s ‘Issues and Options report’ or identified for development in the 2014 consultation. In 2014 the Council rejected a planning application from ‘Oldlands’to build 25 houses in this location on sound planning grounds, so the council should not now consider the
construction of 400 houses and 7,000 sq. metres of employment space there? There is insufficient infrastructure to support such a development. Send Marsh/Burnt Common has one just petrol station with a small shop, one local doctors’ surgery that is full, no schools and the local roads are already filled to capacity especially the Clandon Road. Any development in this area would be totally inappropriate and would be detrimental of Send Marsh/Burnt Common as a village. The housing proposal alone would add a 41% (960) increase to the existing population of 2,341. The proposed would significantly detract from the open countryside aspect and add dramatically to the existing road use.

I OBJECT TO the late inclusion of site A43 Garlicks Arch.
### Comment ID: PSLPS16/7250  Respondent: 15602529 / Darren Lambert  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), Sound? ( ), is Legally Compliant? ( )**

1. I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

2. I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

10. I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

### Comment ID: PSLPS16/6767  Respondent: 15602817 / Paul Douek  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), Sound? ( ), is Legally Compliant? ( )**

I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

### Comment ID: PSLPS16/7414  Respondent: 15603297 / Rony Douek  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), Sound? ( ), is Legally Compliant? ( )**

I object to development in areas at risk of flooding (Policy P4). The Environment Agency classifies the site at Garlicks Arch (A43) as being in a higher risk than the Council's own assessment. The plan does not take adequate account of the
flood risk as required by National Planning Policy, especially as this area has flooded many times in recent years. Flooding has been a particular concern in 2013 and 2015, with considerable damage to properties in the areas. I do not want this exacerbated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7416   Respondent: 15603297 / Rony Douek   Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43) in the plans. Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

- I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3). Damage will be caused to the ancient woodland of oak trees at Garlicks Arch site (A43) proposal, and the loss of green space and amenity

- I object to the proposed Infrastructure Schedule (Appendix C). There is no schedule for Garlicks Arch (A43); the plan takes no account of the infrastructure required for this site and therefore it is not fit for purpose

- I object to the employment strategy and impact on Garlicks Arch (A43) (Policies E2 and E5). The development will result in the loss of existing local successful businesses, which have been employing local people over many decades, and are therefore sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7266   Respondent: 15603361 / Ann Watkins   Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to A43 Garlick’s Arch – the site floods and is covered in ancient woodland. The industrial space is not needed and if necessary could be accommodated at Slyfield. With proper use of brownfield sites this Green Belt site is not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6786   Respondent: 15603489 / Simon Pitt   Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. **I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)**

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Garlick's Arch is protected from development due to its Green Belt status. There are no exceptional circumstances which allow its removal from the Green Belt (Policy P2) - Central Government clearly state that the need for new housing is not an exceptional circumstance.

The Plan clearly states the preference is to use previously developed land, but Guildford Borough Council have removed a brownfield site at Burnt Common, and replaced this with Garlick's Arch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory
purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

**Attached documents:**

---

**Comment ID:** pslp172/4465  **Respondent:** 15608801 / Beth Fuller  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 - 30ha land at Garlick’s Arch, Burnt Common designated for 400 houses and 7,000m2 of industrial and warehousing. There is no need for any more houses on top of the 13,860 already proposed for the Borough. This site is new and was not included in the Regulation 18 draft and has not been consulted on previously. It is Green Belt permanently protected by the NPPF which prevents further merging of settlements. There are no exceptional circumstances. The site has a particular conservation sensitivity since it is covered with ancient woodland. Trees which existed in the 16th Century would be gravely endangered. The proposed industrial development of 7,000m2 is simply not required since the last ELNA in 2015 shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000m2 of industrial space it should be at Slyfield. A new four-way interchange onto the A3 at Burnt Common would be disastrous for Send. The traffic in Send Road (A247) would be gridlocked all day. Send would become the through route to Woking for traffic leaving the M25 and A3, the proposed 2,000 houses at Wisley and the 2,000 houses at Burpham. The village of Send simply could not take this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Please accept this as an OBJECTION to policies A43 and A43a of the Proposed Submission Guildford Local Plan.

I will elaborate on the detail of the objections below, but I wish to state that I was extremely disappointed by the sudden and inexplicable removal of the Burnt Common Nursery site to the southeast of the Garlick’s Arch site; especially since this site had been included in previous drafts of the Local Plan and I understand that Guildford Borough Council had also highlighted it as key to meeting the industrial needs of the Borough:

1. Burnt Common Nurseries has previously been developed and as such constitutes ‘brown field’ development with no loss of valuable agricultural land.
2. The site is effectively screened from the A3, the B2215 (London Road) and from the A247 (Clandon Road). These three roads also form definitive boundaries to the site to prevent further ‘development creep’.
3. The site already includes c.50,000 ft² of industrial units. The landowner/potential developer has produced a scheme to bring further employment to the area through a sympathetic, landscaped industrial development. This is readily deliverable.
4. The same landowner has proposed a scheme of c.100 houses adjacent to the village but screened from existing properties. The access is good, the scheme is readily deliverable, the scale of the development is sustainable for the local village and, to the best of my knowledge, the local population are broadly supportive of this proposal. Instead of including this readily deliverable mixed employment/residential scheme, Policy A43 is proposed instead:

1. With no apparent consultation, the village of Send Marsh is now confronted by a scheme to add c.400 houses and 75,000 ft² of industrial space on green belt land with no overriding justification.
2. The 30 ha site is not screened in any way from the A3 (which would cause significant traffic noise and disruption to future inhabitants), the B2215 Portsmouth Road or from the houses in Burnt Common Lane.
3. The site currently constitutes agricultural land (and not a paddock as suggested), plus woodland which is believed to date to the C.16th. No justification has been provided for the development of this area or for the loss of important habitats and mature trees; but these significant issues do call into question the overall deliverability of the scheme.
4. The site is in Flood Zone 3. No detail has been provided as to how this is to be addressed in order to permit development; but this, again, suggests that the site is not readily deliverable.
5. Regarding residential development and the risk of electro-magnetic radiation, the site is traversed by high voltage power lines and pylons forming part of the National Grid.
6. 400 houses are likely to add over 1,000 people to the local community. There is no mention of how this many families will be accommodated by the existing schools, shops, doctors, dentists and other infrastructure. Furthermore, public transport is limited, so it can safely be assumed that the majority of these houses will have one or two cars each with associated parking and congestion issues; especially at peak times.
7. It is not clear how 400 houses can be situated on this site, plus the development of some 75,000 ft² industrial space; how the two can be separated and how safe access for both users can be provided.
8. There is no mention within the Draft Local Plan that Policies A43 and A43a are apparently connected due to the owners of Garlick’s Arch gifting the land for the slip roads on condition of receiving planning permission for housing. This, in itself, calls into question the motivation for inexplicably dropping the Burnt Common Nursery site and including a significantly less deliverable and sustainable alternative.
9. Due to the costs of the construction for the on/off slip roads detailed in Policy A43a, it is questionable whether they will ever be constructed. In the event of the Borough Council/Highways Agency having both the funds and the motivation to build the slip roads in the future, the land could be acquired at that time by commercial agreement or CPO as required. There is no need for the Borough Council to involve itself in a dubious linked-transaction that could give rise to questions about collusion.

To conclude, a mixed use redevelopment at the site of the former Burnt Common Nurseries is supported. Policy A43 and its conjoined policy A43a is opposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I object to building 400 houses and 7000m² of industrial space at Garlick’s Arch. Ancient woodland! Subject to flooding! Plenty of brownfield sites already available in the borough! Slyfield is already the industrial centre of Guildford Borough so why create another one especially as there is an over supply of industrial space in the area at the moment and for the foreseeable future. In addition, Guildford’s housing plan requirements have been shown to be grossly exaggerated and when challenged, the council refuses to release their calculations.
I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43).

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the Draft Local Plan Infrastructure schedule does not provide for this site at all.

Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but Guildford Borough Council have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.

The site is not appropriate because:
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c),
general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
There is no need for the new employment floorspace to be located at Garlick’s Arch in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) would have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

There is already sufficient housing proposed for the borough (18,860) so there is no need for this additional development.

This is a New site and was not included in the Regulation 18 draft and has not been consulted upon previously.

This is Green Belt land permanently protected by the NPPF which prevents the merging of settlements. There are no exceptional circumstances here.

The site is a place of natural beauty and a natural conservation area which has existed since the 16th Century.

The proposed industrial development is not required (the latest Employment land Needs Assessment 2015 (ELNA) shows a reduction of 80% from the previous draft plan. Any industrial space should be located at the already industrialised site at Slyfield.

A new 4 way interchange onto the A3 would cause even more traffic problems to an already daily congested area. The surrounding roads are not suitable or sufficient to take even more traffic.

In short this is an unsuitable development that should not proceed. Whilst I appreciate we need to provide housing and industrial accommodation we must stop using Greenfield sites until we have exhausted all of the Brownfield options that exist in the borough, of which you will be well aware there are many.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. **Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a
shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and
transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Garlick's Arch is Greenbelt. I want to protect our greenbelt for our future generations. It is precious and it is loved by our communities. It creates a better environment for us and a happier, healthier place to live. We cannot live happy lives with endless sprawl. We need access to green spaces and this is a protected site. It has not purpose being suggested for housing, which should be built on brownfield sites only and in urban areas. Our natural environment cannot be replaced and should not ever be considered appropriate to develop.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7059  Respondent: 15619073 / Paul Collins  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Crownhall Estates (CE) has long standing land promotion agreements in place with the owners of land falling within the overall allocation (edged blue) as shown hatched red on the plan.
2. These land promotion agreements predate the identification of this allocation in the current Draft Local Plan and the promotion of the larger allocation by Ptarmigan Land (PL) on behalf of the owners of that land.
3. Sites A and B are previously developed land which could accommodate circa 35 dwellings accessed from Portsmouth Road and Burnt Common Lane respectively.
4. Sites A and B are deliverable housing sites in their own right (as defined by Footnote 11 to Framework Paragraph 47 in that they are available now, offer a suitable location for development now, and are achievable with a realistic prospect that viable housing could be delivered on the site within five years) and both could assist the Council to identify and maintain a 5 year supply as part of the identified annual housing requirements for the district from the base date of 2018 without reliance upon or prejudice to the delivery of the larger allocation or the intended access to same from the A3 (Site Allocation A43a) later in the plan period.
5. However, CE is willing to work with PL and Guildford Borough Council (GBC) to enable the comprehensive development of the wider site as envisaged in the allocation and to ensure that development on each land parcel is complementary to the other and planned in manner that forms an effective and efficient holistic development
of the overall allocation for its intended purpose but considers that in the circumstances here the wording of Draft Policy 43 will need to be amended (possibly by adding more detail as to how it is envisaged that the overall package will be delivered particularly with regard to component elements and phasing) so as to allow these two deliverable sites to be released so that they can assist the Council to maintain a 5 year supply whilst the remaining and larger developable part of the site (for years 6 – 10) is put in place with the corresponding level of infrastructure.

6. CE looks forward to working with PL and GBC so as to deliver this allocation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( )

I am writing to oppose the development of land near Ripley.

The proposed site for housing is in the Local Plan as "Garlick's Arch".

Although GBC have been consulting with the public on the draft local plan since 2014 the Garlick's Arch development was only included in the plan just two weeks before it went to the full Council for approval at the end of June.

This area is beautiful and large scale development would desecrate the wonderful countryside here. Furthermore, my local clay pigeon shooting club (Cobham Sporting Gun) operates on this land and is a wonderful example of the kind of british country pursuit that this land development would quash.

Ripley and the surrounding land has an old world charm of an idyllic british village. Wholesale development would forever change the area awfully.

I implore you to reconsider developing here.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( )

I object to the proposed change from Protected Open Space to C3 housing for the following reasons:

1. The town would lose a valuable open space which complements the Cathedral and makes it the landmark that it is. Moreover lights from the proposed houses would reduce the impact of the Cathedral at night.
2. The site has a long history of problems of drainage and subsidence, and a housing development there would exacerbate these problems, adversely affecting properties lower down the hill.
3. There are already major traffic problems affecting local roads, and the additional cars from the 100 extra houses in the area would make the current situation considerably worse.

I do hope that when the local plan is considered for these reasons this change in use will be rejected.

I object to the plans for Garlicks Arch. Our infrastructure is already struggling with the current occupancy in the area. Our roads are regularly gridlocked, particularly Send Road and Send Marsh Road with the flow of traffic onto the A3, which would only increase with an extra 400 houses and services to the proposed industrial units. Services such as the local schools and doctors are already at full capacity, with it being increasingly difficult to get a doctors appointment even for young children. This issue would only amplify with the proposed developments. Our roads and pavements are already in a state of disrepair and an increase of pedestrians and vehicles will only make this matter worse.

I object to the late inclusion of the A43 Garlicks Arch development as resident of Burnt Common Lane this will have a substantial effect on myself and my family. This development will obviously completely change this small and sleep hamlet of Send and Ripley. One of my main concerns is with regard to flooding. It is also a site with a large amount of ancient woodlands. The industrial development is certainly not needed, and with regarding to the housing it my belief that the housing need for the area has been grossly exaggerated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to any and all erosion of the green belt, there is precious little left in this area of the county. In setting local villages will destroy the area (Policy P2).

The area surrounding Burnt Common is now subject to a disproportionate level of suggested housing and development (Policy A43).

This was not included in the Regulation 18 Draft and therefore has not been consulted on previously, it seems a cynical method of circumventing the correct process. I object.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- The area surrounding Garlick’s Arch contains ancient woodland, protected by its position within the current green belt. Any relaxation of the planning rules to allow development in this area will open the door to further development. I object to this in the strongest terms.
- The proposed development of 400 homes directly on the large field adjacent to the A3 with an additional (and unnecessary 7000 sq m industrial area) will destroy a local business and the ‘Cobham Sporting Gun’ shooting club which has been in existence for the last 25 years. I feel extraordinarily aggrieved that a site, covered in woodland will be removed and sold for in excess of 20 times its current value (on the basis of grant planning approval for housing). I object to this strongly.
- Existing infrastructure, already under pressure will in no way benefit from increased residential accommodation in the area. There appears to be no provision for more schools or doctors surgeries to offset this increase in population. I object to this on the basis it is unsuitable in the extreme.

**Comment ID:** PSLPS16/7335  **Respondent:** 15641281 / Paula Redmond  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which permit the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the last minute, a more appropriate and equivalent brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11 May 2016.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. A Habitats Assessment has been carried out but there is absolutely no mention of wildlife species affected in the report. No wildlife report has been conducted on the site. (Policy I4). Bats are specially protected and no specific assessment has been carried out in accordance with the Wildlife and Countryside Act 1981.

It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPS16/7351  Respondent: 15641569 / Trevalyn Gregory  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the development at Garlick’s Arch for 400 houses because it was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 sq m at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 sq m of industrial space it should be at Slyfield where there is a 40ha site available.

I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7355  Respondent: 15641665 / John Savin  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

With regard to commercial floorspace provision, I strongly object to this being sited at Garlick’s Arch. Commercial floorspace should be directed to existing employment areas of the Borough such as Slyfield, where there is sufficient space to accommodate the quantum of floorspace apparently required, rather than release greenfield land for development in a rural location.

Overall, whilst it is appreciated that new housing is required in the Borough, I question the need for new employment floorspace on the basis of the existing level of vacancies in the local area. I also strongly believe that the Local Plan should not be an opportunity for the Council to ride rough-shod over established planning policy without a careful and detailed assessment of all the alternative options for development.

I respectfully request that my objections as detailed above are taken into account in the context of the Local Plan Review.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
With regard to commercial floorspace provision, I strongly object to this being sited at Garlick’s Arch. Commercial floorspace should be directed to existing employment areas of the Borough such as Slyfield, where there is sufficient space to accommodate the quantum of floorspace apparently required, rather than release greenfield land for development in a rural location.

Overall, whilst it is appreciated that new housing is required in the Borough, I question the need for new employment floorspace on the basis of the existing level of vacancies in the local area. I also strongly believe that the Local Plan should not be an opportunity for the Council to ride rough-shod over established planning policy without a careful and detailed assessment of all the alternative options for development.

I respectfully request that my objections as detailed above are taken into account in the context of the Local Plan Review.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the Garlicks Arch development A43, which will place unnecessary strain on local infrastructure and has not demonstrated exceptional circumstances to alter the green belt. The site also includes ancient woodland, is subject to flooding and currently supports the rural economy through small businesses. It will particularly increase traffic through West Clandon accessing the A3 and M25. This site is billed as being an enabling site due to its potential to provide an on and off slip for the A3 north and southbound respectively. This has not been agreed by Highways England, may not be in the best location and will not be progressed until some time after Garlick’s Arch has been developed due to the finances required, thus impacting on the road network substantially.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 and A43a on Garlick’s Arch.

This site had been previously considered and rejected before the previous draft of the Plan. The site was then inserted in the Draft Plan only hours before its publication without any consultation. I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site. This is a cavalier approach to public engagement by the Council.
1. The site is not a sustainable site, being far from any infrastructure facilities and transport links. The bus service is infrequent and future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

1. The site is susceptible to flooding and development will cause harm to the ancient woodland on and near the site. See my comment on Policy P4 above.

1. The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

1. The Council appears to view the development as an enabling site to obtain land and developer funding for slip roads on/off the A3. This is not an exceptional circumstance to justify taking Green Belt land. The slip road land if needed could be safeguarded in the Plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential, Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

1. The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A-road. In places it is too narrow for two lorries to pass causing them to mount the pavement, often at speed. (During the last week of the consultation period of this Plan, a resident of West Clandon had his car written off by a negligent car driver coming the other way and occupying 2/3 of the road at an obvious pinch point which is typically littered with broken wing mirrors.) It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road more congested and unsafe for cyclists and pedestrians.

1. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford. There is vague talk in the plan of link roads between Gosden Hill and Garlick’s Arch, all meeting at an enlarged A3 intersection at Burnt Common. The existing intersection is unlit and is accident prone. Adding two or three slip or feeder roads at this point will add to the confusion and public danger.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the development at Garlick’s Arch for 400 houses because the plan was sprung on the village without any prior consultation and only 2 weeks’ notice. The development is not required in terms of housing need either for the village or the borough.

I object to the proposed industrial development of 7,000 m² at Garlick’s Arch because it is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft plan. If there is a need for 7,000 m² of industrial space it should be at Slyfield where there is a 40 ha site available.
I have been a resident to Send Marsh for over 20 years and I am writing to object to the latest change made by Guildford Borough Council concerning the Draft Local plan for Send, in particular the designation of the Garlicks Arch site.

This objection is on grounds that not only is this site unsuitable for a number of reasons of which I will elaborate throughout the course of this email, but that the manner in which this last minute amendment to the local plan has been executed, which I do not believe has been carried out in a fair and transparent manner; considering the time-frame, the extent of the amendment and finally the lack of consultation with residents, Parish council and the necessary regulatory bodies concerned with proposed development.

Firstly I would like to bring your attention to the application 16/P/00783 on Oldlands Field Yard, a small area of the recently earmarked site for mass development on the Garlick's Arch site, of which there is a proposal for 9, two storey dwellings that was filed almost exactly a month (12th April) prior to this latest last minute amendment to the local draft plan on 11th May. This appears to be too much of a coincidence and exemplifies the seeming lack of transparency and stealth tactics employed by Guildford Borough Council and developers in seeking approval to develop part of the site in question, which would provide a 'foot in the door development' and platform to further develop the wider site and strengthen the case for the inclusion of the Garlick's Arch site within the draft local plan. Furthermore, there is evidence to support this possibly cynical view in the possibly over-comprehensive extent of accompanying reports to the 9 dwelling development, and the transport modelling being undertaken by Surrey County Council and Highways England, which would reveal that GBC have known about the change in site designation for the local plan and benefits afforded by the initial 9 dwelling development for some time. There has however been a lack of publicity and public consultation for both these cases, and the change in site designation in the amendment comes 8 working days prior to the full council meeting - surely unacceptable in view of the above and considering the extent of the change and impact of an additional 300 dwellings on both the villages of Send and Ripley. If not mandatory, surely there is a duty of care to notify the residents of these areas affected for even the site being included provisionally, despite the 6 week allotted public consultation period after the decision reached on 24th May.

If we are to evaluate the previously executed studies by GBC with regards to the Greenbelt strategy, and the Mass development and Village expansion evaluation - this change in site designation to Garlick’s Arch seems to be contradictory. The site in question is deemed to be medium sensitivity in terms of Greenbelt yet it is being considered for mass development when there are not only low sensitivity areas available in close proximity but a list of brownfield sites - arguably in more strategic locations with regards to the industrial designation of the site, available for re-use in for example, Slyfield, as per the 'previously developed site' report also published by GBC. In the mass development study and village expansion survey it evaluates that Ripley is unsuitable - how then can a development site of this scale be promoted in the local plan that will implicate Ripley for the very reasons that deemed it unsuitable? These sites cannot be treated in isolation, and this site at Garlick's Arch straddles both parish council zones and will have wide-ranging implications for the residents and well-being of not only Ripley and Send, but also Clandon.

With regard to the 'exceptional circumstances' required by borough council to justify removing Greenbelt for development, as stated in the National Planning Policy Framework - on what basis are the reasons given (as per the local plan amendment, of meeting the needs of housing stock) when this housing need is not proven? It is forecast that the population of the Guildford borough is actually set to plateau and decrease (and any statistics contrary to this are surely inflated by the false counting of university students who do not reside past their degree period), so surely therefore no need to increase the 13,860 houses already proposed for the borough by 300 in this development, and certainly no local need in Send to expand the Village by 25%.
This view is further reinforced in terms of the employment floor space designated for the development of 7000 sqm since the ELNA shows a reduction of 80% required from the previous draft plan. Surely from a strategic perspective the site at Syfield is more suited for this type of development, should 7000 sqm still be deemed necessary. One of the reasons for the preservation of Greenbelt is preventing Urban sprawl and preventing the merging of towns and settlements - the site at Garlick's Arch, once fully developed would represent the single largest development in the area, not only in isolation but also if coupled by the Send Marsh Road/ Linden Way housing estate positioned opposite, only separated by the Portsmouth Road. Surely there is no justification for development for Garlick's Arch purely on the basis of the site location opposite an already large housing development as this would go against reducing sprawl and the merging of settlements, and of course the lack of accompanying local amenities - all of which, at present, are out of walking distance.

The implications on-site are also elements of the development proposal for Garlick's Arch which seem to have been overlooked, despite having been identified through both the Mass development and Village expansion analysis carried out by GBC. The site is not only Greenbelt land but also has 4.6 hectares of permanently protected ancient woodland which requires Forestry commission consultation and approval for any development in close proximity to in the first instance. Has the council considered this or given any thought to the implications the removal or damage to this woodland will have on not only the UK's ancient woodland stock but to the damage to local biodiversity and habitats of wildlife? Other site implications identified in the report are the risk of flooding due to the high spatial priority flood plane which cuts across the site from SE to NW. Surely then GBC cannot agree to develop the site on moral and practical grounds due to this known risk but also from the point of providing housing offer that lacks quality considering its close proximity to the A3 of which this development and accompanying junction alone will increase the traffic-based noise which will implicate the quality of life for those resident.

The impact of this site on congestion and road traffic is another element which seems to have been overlooked by GBC. Whilst there is assessed benefits by GBC in the 11th May amendment of an additional junction onto the A3, surely this is short-sighted considering the resulting increased congestion on not only the A3 from this but also on the surrounding local roads of which, during traffic gridlocks, will be used by road users to avoid the A3. In addition, as identified by GBC in a congestion and traffic strategy report published in 2014, the Wisley A3/M25 interchange is already a bottle-neck for traffic congestion. Needless to say, an increase in motorists from not only the development at Burpham of 2000 new homes but also Wisley of 2000 homes, plus of at least 400 from not only in the area as a result of the Garlick's Arch development who may join at Ripley, but also of those joining the A3 one junction prior to this bottleneck from neighbouring Send, Clandon and Woking. It should also be highlighted that the increase in industrial based motor transit from the industrial designation of the site, will almost certainly exacerbate this identified bottle-neck.

At a micro scale, The Portsmouth Road adjacent to the site and in particular the junction with Send Marsh road of which this new development is within 350 yards of, already experiences a high level of congestion and traffic red zone during peak times. This development will not only exacerbate this issue through the increase in a potential average of 400 extra cars resident to the site, but also visitors to the site, and the increased volume of those turning in and out of the site will create further traffic flow disruption to the Portsmouth Road. The Send Marsh Road junction in question has also been the site of many traffic accidents in the past few years and the development of this site will further increase the risk of future road incidents. A counter argument which may be raised by GBC to an increase in car congestion resulting from this site - taking into account the proximity to bus stops and train stations, is surely invalid considering the infrequency of the buses that service this area (hourly or two hourly respectively) and the distance and time taken to walk to the nearest Train station at Clandon - a 1.7 mile journey which would take approx 30 min walk when 20 min walking journey is recommended to local hubs which provide transport linkages to nearest urban centre. Notwithstanding this, the conditions for walking to this station are unsuitable considering the quality of the pavement service, the termination of the pavement at various points along the Clandon road, and the lack of adequate street lighting to enable a commuter to comfortably and safely get there and back on foot.

The scale of the change as a result of the change in site designation is also something that requires scrutinising - nowhere in the amendment issued on the 11th May does it justify why firstly a net increase of 300 dwellings is required, in light of the previously agreed designation in the previous addition of the local plan of circa 100 dwellings, or responsive to any statistics; considering that there have been past assurances from councillors stating that this very situation would not re-emerge, or provides insight into how this will be supported locally or assesses the impacts on the local infrastructure and amenities. Has the council given any thought to how the local doctors surgery or shops in both Send and Ripley will cope with at least 400 additional households to support?
If we are to further assess the potential impact of this mass development in terms of education provision, it is already well known and publicised that this area of Surrey is well oversubscribed. The increase in 400 dwellings will not just place further strain on this system but will be untenable considering that during the period 2014/15, not only the schools within catchment area of this site but within a circa 15-20 mile radius, currently experience an average ratio of 2 applicants per place for both primary and secondary education. Any increase in student yield therefore, despite the ratio of students per household forecasted in the accompanying education infrastructure statement, will place further strain on the education provision, and with no known strategy publicised which identifies this problem or an accompanying local school development or expansion program in relation to this site, something will have to give and one could suggest at least in the short term that this will be the quality of education offer available.

These are pertinent points which require careful thought in relation to the sustainability of the Guildford Borough as a place for quality of life offer in the long term, in particular the areas of Ripley and Send. Mass development proposals in unsuitable locations and on unnecessary scales such as this cannot be justified when this places the very reason people want to live in this area and wider borough, at risk.

To summarise:

I object to the site designation at Garlick’s Arch

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7540  Respondent: 15652833 / Don Babington  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. There is a danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.

I object to the proposal to build 7,000 sq m of light industrial, general industrial or warehousing on the site at Garlick’s Arch. There is no need to place a Strategic Employment Site in this location when there is plenty of spare space available at Slyfield (40 ha). The Employment Land Needs Assessment (ELNA) 2015 has been reduced by 80% since the ELNA 2013. There is no longer any need to place industrial development in the Green Belt when there are plenty of brownfield sites available.

I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces. Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1) which requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object on the grounds of the congestion that development will cause to the trunk roads, A3/M25 (Policy 12). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

**Policy A43 Garlick's Arch, Send Marsh**

I object to the proposed allocation for 400 homes and 6 travelling show people plots. There are no exceptional circumstances to warrant development on the green belt. There is insufficient services infrastructure for housing and show people plots, nor any justification for concentrating 6 of the proposed 8 borough-wide show people plots within Send. The road network is insufficient for housing development on this scale and for extra large vehicles associated with show people's livelihood.

I object to the late inclusion of site A43 Garlicks Arch

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Comment ID: PSLPS16/7645  Respondent: 15658497 / Philip Williams  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43.30 the proposed development of Garlicks Arch designated for 400 houses and an industrial estate. This is a new site not included in the Regulation 18 draft and has NOT been consulted on previously. It is not only permanently protected green belt but also a site of ancient woodland with some trees planted in the 16th century. The site floods and is covered by ancient woodland. The industrial space is not needed but if it were it should be at Slyfield. Guildford’s housing requirements have been shown to be grossly over exaggerated and they have refused to disclose their calculations. With proper use of brownfield sites this Green Belt is not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7701  Respondent: 15664609 / Diane Pengilly  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The plan does not adequately fulfil the flood risks as advised by National Planning Policy. The Environmental Agency have stated that the site at Garlick's Arch (A43) is a higher flood risk than stated in the Council's Plan and this area has flooded many times in the past. I object strongly that the Council would ignore this considering the flood issues we have experienced increasingly over recent years!

I object to the destruction of Ancient Woodland and the wildlife that lives there. The Council have spent hundreds of thousands of pounds in Surrey redeveloping woodland and heathland to encourage indigenous species and I can't understand why they turn about face to destroy green belt now...? To destroy over 80 oak trees when oak trees are under threat in this country currently...

**Land at Aldertons Farm and SANG land due west of Aldertons Farm**

In respect of the ‘Land at Aldertons Farm’, despite previous support from GBC the removal of the allocation from the previous draft is not supported. Compelling reasons for the site’s inclusion were previously put forward, accepted by GBC and still very much remain in place and we believe that the site is capable of providing a sensible option for growth within the Borough to help contribute towards the housing need in the immediate to short term. In addition, the previously allocated SANG provision would provide a key piece of infrastructure that would allow new homes to occupied without any reliance on any third party landowner. This SANG, the design of which has been approved in principle by Natural England, would provide 8ha of new publicly accessible open space for the benefit of new residents of any potential development and existing residents of the Village. The delivery of this SANG is further enhanced by the fact that both the residential and SANG components are under a single ownership which demonstrates deliverability.

In summary and to reiterate:–

Aldertons Farm is for a 6.2ha site situated to the east of Aldertons Farm south of Send Marsh Road, Send Marsh. Barratt David Wilson Developments has a contractual arrangement with the landowners and as such, the site is deliverable once consent is issued and all planning conditions and obligations have been met. Barratt David Wilson Homes is one of the largest housing developers in the UK and has the funds available to make an immediate detailed planning application on this land should it be allocated. This site has the following benefits:

- It is available and deliverable in the short term (1-5 years)
- It is surrounded by residential properties on 3 sides
- It has an existing access off Send Marsh Road
- Capacity to provide for circa 120 residential units
- The site is in a sustainable location for housing
- Low risk flood zone (zone 1)
- No major ecology constraints
- No harm to the setting of Aldertons Farm
- Mature landscaping to key perimeter boundaries
- Adjoining SANG at Aldertons Farm (Site 106 – July 2014 draft LP) Design agreed in principle with Natural England. The SANG also has the capacity to allow other sites within 4km to come forward, therefore unlocking further supply.

Barratt David Wilson Homes (Southern Counties) has a proven track record of delivering high quality residential development in the south east of England and would seek to implement any planning consent on this land without delay, providing more certainty on delivery in years 1-5 of the plan period.

In terms of the present Green Belt status of the site, Paragraph 80 of the NPPF reinforces the five purposes of the Green Belt, as follows:–

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.
Whilst any proposed development of the site at Aldertons Farm would clearly increase the size of Send Marsh, concerns over an ‘unrestricted sprawl’ would be allayed by the neighbouring SANG land which would likely be transferred to the council and thus preserve the status of the countryside to the western boundary. With the land abutting existing residential to the other 3 boundaries there is a clear, defined boundary with which to check any sprawl. The sites location would not lead to any pressure of merging with neighbouring towns.

The approach towards the allocation of smaller sites within the document is supported, as it assists in helping to bring a range of locations and options for growth to the Borough at a more measured and sustainable rate and a more certain supply of housing to allow time for the strategic sites to be delivered later on in the plan period.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Sustainability Appraisal – ‘Land at Aldertons Farm’**

The Council have published their Sustainability Appraisal (June 2016) alongside the draft plan and the intention is that this SA ‘identifies, describes and evaluates’ the likely significant effects of implementing both the plan, and the ‘reasonable alternatives’.

The overall content of the SA demonstrates how the approach to ‘reasonable alternatives’ has been carried out and within the document, Table 6.2 ‘Spatial Strategy Alternatives’ reveals that a total of 8 Options were considered which all reflected the OAN with a range of alternative % buffers added. In 7 of the 8 Options the ‘Land at Aldertons Farm’ was included (Send Marsh amber rated sites) within the aggregate housing total and identified as one of the spatial strategy alternatives. With this being so, ‘Alderton’s Farm’ was clearly assessed and determined to be a viable option for growth by GBC in several OAN scenarios and indeed, within the SA, Section 6.3 ‘A stepwise process to develop reasonable alternatives’, the alternative spatial strategies were assessed against both growth and location options and a footnote on page 29 to the comment of ‘best performing site of the three sites at Send’, states that:-

‘Aldertons Farm (c.100 homes) benefits from being located to the north of the village, away from the A3 (recognising the objective of avoiding continuous development along the A3 and maintaining the gap to Guildford.’

In light of the above, the decision therefore to omit ‘Aldertons Farm’ from its previous allocation appears at odds with the assessment given within the SA. The late decision to allocate ‘Land at Garlicks Arch’ (Allocation ref A43) in place of this appears contrary to ‘avoiding continuous development along the A3’ given its location and in a similar vein to strategic allocations elsewhere in the Borough, is subject to significant infrastructure coming forward to enable development. Namely, a new slip road and junction on to the A3 close to Burnt Common. Again, this places serious concerns over the reliability of supply derived from this site, particularly in the short term. Without getting into too much detail it is unclear whether the capacity of this site has been robustly tested. There are a number of technical constraints that need to be considered such as flood risk, noise disturbance and the presence of ancient woodland which could reduce the development footprint. It is also unclear if Highways England support new access arrangements onto the A3 in this location. It should be noted too that Allocation A43 was included at late notice and without prior consultation before it was reported to the Full Council meeting in May 2016.

In terms of comparing ‘Aldertons Farm’ with other sites that could come forward from ‘Inset villages and infill development within identified Green Belt villages’ within the SA, an accompanying ‘Site options Appraisal findings’ matrix is included within the appendices. When reviewing ‘Aldertons Farm’ against other sites which have been selected in the ‘Horsley’s’ for example, the number of ‘reds’ and ‘ambers’ are comparable, even though access to some of these other allocations is unclear and are also reliant on SANG within third party control before they can come forward. It
seems perverse that Alderton’s Farm, an unconstrained and immediately deliverable site has been omitted from the plan in favour of site’s which do not appear to have a satisfactory access. (A38, A39 and A40). Whilst these ‘green belt villages’ are rightly identified as a source of supply, there appears little consistent rationale applied to the choice of site for allocation.

In view of the above there are serious concerns over the soundness of the plan in being able to demonstrate a 5 year supply of housing. The latest AMR states within Table 3 ‘Calculation of five year supply’ that only a 1.4 year supply of housing can be demonstrated and that it will not be until 2022/23 (at the earliest) that the OAN figure of 693 is met. From the base date of 2013/14, and just in the first two years of the housing land supply, a deficit of 1007 homes against the OAN figure of 693 has already accumulated.

The allocation of the Alderton Farm site, promoted by a national housebuilder, would provide an immediate source of supply in years 1-5 and go some way to addressing the immediate shortfall.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7731  Respondent: 15666625 / Anna Ruddy  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I OBJECT to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (Blc), general industrial (B2) and storage and distribution (BB).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site.

There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Send Parish Council object to allocation A43 on the grounds that it is not justified. The site is allocated for 400 C3 residential units and up to 7,000 sq m of B1c/B2/B8 employment use, however this major allocation has only been included in the most recent versions of the draft Local Plan and is not supported by the evidence base.

The July 2014 Draft Local Plan allocated three sites in Send, Send Marsh / Burnt Common for whole or partial development for residential purposes. These sites are as follows:

Site 74 - Land around Burnt Common warehouse, London Road, Send - B employment uses and up to 100 homes
Site 75 - Land at Tannery Lane, Send (including Clockbarn Nurseries) - 215 homes
Site 76 - Land to east of Aldertons Farm, Send Marsh - 116 homes

This 2014 version of the Local Plan allocated a total of 431 homes in Send and Send Marsh / Burnt Common. This is compared to 185 homes allocated in the initial draft of the Proposed Submission Local Plan (dated May 2016) before allocation A43 was changed. This clearly indicates that following the 2014 consultation it was recognised that 431 homes in Send was over development. The reduction to 185 reflects a more appropriate level of development. The last minute change to 485 homes in the most recent version of the Proposed Submission Local Plan represents a significant increase that is clearly unjustified by the evidence base.

After consulting on the Local Plan in July 2014, the Council drafted an updated version of the Local Plan for review by the Council before being published for consultation in June 2016. This version of the draft Local Plan was considered by the Economy and Infrastructure Executive Advisory Board (The ‘Board’) on 13 April 2016 and included the following allocations for Send, Send Marsh and Burnt Common. The Board did not raise any concerns or propose any changes to these allocations:

Site A42 – Clockbarn Nursery, Tannery Lane, Send – 45 homes
Site A43 – Land around Burnt Common Warehouse, London Road, Send – 100 homes with B employment uses
Site A44 – Land West of Winds Ridge – 40 homes

Send Parish Council has previously raised concerns about the suitability of these sites due to the lack of capacity on narrow local roads, but consider an allocation of 185 homes to represent a more appropriate level of development than the 485 now included with the draft Submission Local Plan. The Parish may wish to have the opportunity to allocate appropriate sites through the neighbourhood plan process.
The Guildford Council Executive met on 11 May 2016 to review the draft Proposed Submission Local Plan before it was published for consultation. The draft version of the Plan included the same allocations as were reviewed on 13 April 2016, however as a result of this meeting the decision was made to remove from the draft Local Plan site allocation policy A43 Land around Burnt Common Warehouse and replace it with a new site known as Garlick’s Arch, with proposals for 400 homes and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) uses. The justification for this change is provided as ‘the Interim Director of Development be authorised, in consultation with the Leader of the Council, to make such minor alterations to improve the clarity of the document as he shall deem appropriate’.

The reasons for this last minute change in allocation are wholly unjustified. Firstly, it is unreasonable to consider the proposed changes to be ‘minor’ considering they involve allocating a further 300 homes to a village with a population of only 1,931 and delete the previous allocation around Burnt Common Warehouse that has been carefully considered, consulted upon and adapted since the first iteration of the Local Plan Issues and Options Paper in October 2013. This is a wholly inappropriate approach to the Local Plan making process and represents bad practice.

At no point up to May 2016 had any allocation been made relating to the Garlick’s Arch site. It had been included in the February 2016 Land Availability Assessment ref. 2258, but had not been allocated. Since the site was only identified as a potentially developable site in February 2016 and was not included in drafts of the Proposed Submission Local Plan as late as May 2016, this indicates that insufficient consideration has been given to its allocation.

Section 21 of the January 2013 Green Belt and Countryside Study examined how Green Belt Boundaries could be re-defined around Send Marsh and Burnt Common to accommodate a major settlement expansion. This study includes the land at Garlick’s Arch as plot B14-A. The appraisal recognises that Send Marsh and Burnt Common lack community facilities and would require a significant population increase far beyond what is currently proposed in order to create a ‘critical mass’ of population. This indicates that the current proposal for 400 new homes on the Garlick’s Arch site would introduce homes to a settlement with few facilities, requiring new residents to travel to other settlements for work, shopping and leisure. Indeed, Sustainability Appraisal of the draft Submission Local Plan, in Appendix IV Site Options, appraises all sites considered potentially suitable for allocating in the Local Plan. A traffic light approach is used to appraise individual sites. Allocation A43, Garlick’s Arch, is considered to be the poorest performing of the sites considered potentially suitable in Send, Send Marsh and Burnt Common, with red traffic lights against the following criteria: SNCI/LNR; key employment site; flood risk; recreation facility; town/district/local centre or shop; primary school; secondary school; high quality agricultural land; previously developed land; and railway station. In fact, the Sustainability Appraisal considers it to be one of the poorest performing of all sites considered to have potential.

Send Parish Council consider the Land around Burnt Common Warehouse to be a more appropriate allocation that has been given the necessary consideration through the Local Plan consultation process. Despite the late changes outlined above, the Key Diagram contained within the proposed Submission Local Plan (page 18) indicates that land around Burnt Common Warehouse is identified as a Strategic Employment Site rather than that at Garlick’s Arch. The draft Proposed Submission Local Plan was reviewed by the Guildford Borough Executive Committee. The supporting papers for this meetings stated:

“Send Marsh/Burnt Common – this site is located in a yellow (medium) sensitivity land parcel. Our Employment Land Needs Assessment identifies a need for industrial land and this site is the only suitable and deliverable site identified by the Green Belt and Countryside Study that could meet this need”.

No evidence is provided to explain how circumstances changed in the following month before the Local Plan was published for consolation to justify the change in allocation. It would appear from the meeting minutes that this change was only made to accommodate additional housing and a new slip road to the A3, but as this statement demonstrates in sections two, three and four, these changes are unsustainable, unjustified and unnecessary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>We have concerns regarding Wastewater Services in relation to this site. Specifically, the wastewater network capacity in this area is unlikely to be able to support the demand anticipated from this development. Upgrades to the existing drainage infrastructure are likely to be required to ensure sufficient capacity is brought forward ahead of the development. Where there is a capacity constraint the Local Planning Authority should require the developer to provide a detailed drainage strategy informing what infrastructure is required, where, when and how it will be delivered. At the time planning permission is sought for development at this site we are also highly likely to request an appropriately worded planning condition to ensure the recommendations of the strategy are implemented ahead of occupation of the development. It is important not to underestimate the time required to deliver necessary infrastructure. For example: local network upgrades can take around 18 months to 3 years to design and deliver.</td>

From a review of the GBCS both elements of the site fall within a parcel of land (B13-D), which as previously stated, has been identified as a PDA. Paragraph 1.37 of Volume I of the GBCS states that the land parcel in which the site falls within has the potential to accommodate appropriate development without compromising the purposes of the Green Belt in which it is located. It is noted to be an area that is surrounded by defensible boundaries and these include built physical features (roads) and significant tree screening.

The site, and indeed wider land parcel in which it is located is isolated from the wider green belt by the A3, the London Road and the Clandon Road which surround the site, making it an enclosed triangular parcel of land that is very much separated from the wider Green Belt. This helps to further ensure that development of the site (and wider land parcel) would not harm the character or appearance of the Green Belt in which it is located and would not set a precedent. This scenario is very similar to, and is supported by, the Burpham Court Farm development known as Weybrook (now a housing development with a large Sainsbury’s supermarket) which is also between the A3 and an A3 slip road in a triangular shape.

The Council accepted the above and proceeded to allocate the site in the Draft Local Plan for commercial and residential development. The subsequent change was very late in the day.

The tree belts surrounding the site serve an important function when considering the visual impact of the site as well as reinforcing the sites’ isolation from the open Green Belt. Tree belts follow London Road (including within the central reservation) and Clandon Road to the north and east, there is also significant tree cover following the A3 to the south and hedgerows near the commercial area to the east of PDA. This ensures that the site is well screened and as such views of any development would be extremely limited. Additional landscaping will be incorporated into the proposed development to ensure that any perceived areas of weakness in the existing landscaping can strengthened, particularly along its eastern boundary with the existing depot.

The GBCS also notes that the site is relatively unconstrained in environmental capacity terms and as being in an area of existing development. In addition, that assessment was based on a larger site, including more open land to the north of the old A3 London Road. Therefore, the BCN part of the site is even better in itself than the overall site assessed in landscape terms.

This further supports the Council’s own previous conclusions that that development of the identified land parcel (and therefore the site) will not harm the purposes of the Green Belt and is the best site to allocate in this locality.

In terms of impact on existing residential amenity, the site is located at a sufficient distance from surrounding residential dwellings so as not to have an adverse impact on outlook or privacy. Furthermore, the site is well screened by existing mature tree boundaries and this will be enhanced as part of the proposed development. The site is also situated at a slightly lower level from the surrounding area which ensures that any development on the site will not appear overbearing.

As previously stated a landscaped tree buffer will be created between the existing depot and any new residential dwellings to ensure that future residential amenity is protected.

The only residential property which has a direct view towards the site is a single first floor window in Thatched Cottage, which is to the north east of the site. However, due to the extensive tree cover that surrounds the site views from this window are limited, and additional landscaping can be incorporated into any development proposal to ensure that any views are not sufficiently detrimental and built form can be located at an appropriate distance from this boundary to prevent issues of overlooking/ loss of privacy etc.

As previously stated, access can be provided directly from the London Road. It serves the adjacent depot and auction centre and the residential dwellings on Woodhill/ Vicarage Lane. The south-west bound carriageway of the road is wide enough to accommodate two lanes of traffic and the southern side of the road is currently hatched and could be easily modified to safely accommodate the new access. As such it would be possible to provide two lane traffic if required, although this is unlikely as a part of a residential scheme. In terms of traffic generation, there would be an increase, however the direct accessibility onto London Road is a benefit in this regard. Given London Road is a main road (formerly the A3), and experiences relatively low traffic movements, there is capacity to accommodate a moderate
residential and commercial development. Furthermore, it provides direct and efficient access to the A3, A247 and the wider highway network.

Finally, the site is not within an area that is subject to flooding.

Deliverability
In terms of deliverability the site at BCN recommended for progression to the Submission Local Plan, excluding the Ewbanks site, is in single ownership, is available and deliverable with 1-5 years (subject to securing planning permission). It can satisfactorily accommodate the 7000 square metres of employment space and 100 homes. The Newship Groups sister company has significant experience of developing residential estates, ensuring comfort in that respect. The Newship Group has a track record of developing industrial and warehousing development, with sufficient funds, providing further certainty of delivery (this cannot be said of the Garlicks Arch site).

Further comment on the Garlick’s Arch site
The Garlick’s Arch site would provide 400 dwellings, a quantity of employment floorspace (in Use Classes B1c, B2, B8) and a new northbound onslip to the A3 trunk road from Clandon Road (A247) and a new southbound offslip from the A3 trunk road to Clndon Road.

That part of the Garlick’s Arch site on the northern side of the A3 is approx. 31.7ha. This compares with the size of the existing settlement of Burnt Common/ Send Marsh, which occupies approx. 70ha. The Garlick’s Arch site would therefore result in approximately a 50% increase in the size of the village. Given the settlement is described as a rural village, this is an unjustifiable increase in the size of the settlement.

This is the wrong place for employment space. It would be unrelated to any other conventional employment space and result in employment space spread across Burntcommon rather than concentrated in a more logical and appropriate location.

The Local Plan also includes a proposal for the provision of new slip roads onto the A3 to/ from Clndon Road. These are considered necessary highway improvements for one or more of the following:

1. The proposed development;
2. To facilitate other development allocated in the emerging Plan;
3. To facilitate other development envisaged in the emerging Plan.

All new development is required to propose highway measures necessary to make that development acceptable in planning terms, so if the new slip roads onto the A3 are required to make the proposed development at Garlick’s Arch acceptable in planning terms that would not comprise very special circumstances.

A similar conclusion is drawn for point 2 above i.e. to facilitate other development allocated in the emerging Plan. It is the case that new residential development allocated at the Gosden Hill site benefits from access to and from the A3 in all directions as follows:

1. Off slip from A3 southbound at Burpham and then access via New Inn Lane;
2. On-slip onto the A3 northbound via Clay Lane;
3. Off slip from A3 northbound at Burnt Common, A247 through West Clandon; A25 west and then to the Gosden Hill site via Park Lane and Merrow Lane;
4. On-slip onto the A3 southbound at Burnt Common (via the above in reverse).

Thus, there is no demonstration of very special circumstances to facilitate other development allocated in the emerging Plan.

WYG notes that other development envisaged in the Plan includes a long term aim of placing the A3, as it passes through Guildford, in a tunnel. The tunnel would potentially commence in the vicinity of the junction of the A3 with Woking Road and follow a south-westerly alignment, emerging at ground level south of Farnham Road. Whilst this is a very high level and the feasibility of the tunnel has yet to be proven, it would offer a number of benefits to the town, not least of which would be the re-routing of through traffic away from a busy stretch of road that is likely to become more heavily
used as a result of planned new development. The provision of a tunnel also offers the opportunity to connect the two parts of the town and carry out environmental enhancements.

Unfortunately, some vehicles are precluded from travelling through tunnels and measures would need to be provided to enable such vehicles to leave the A3 before entering the tunnel. South of Guildford, a new junction would be required in any case (to enable vehicles to continue travelling south along the A3 or west along the A31). This would not impact upon Burnt Common. At the northern end of the tunnel, a new junction would not need to be provided however, as the existing junction with Woking Road provides a southbound off-slip and northbound on-slip, in addition to the London Road/A3100/Clay Lane existing slip roads.

As a result, it is the case that a new southbound off-slip and northbound on-slip are not required at Burnt Common to facilitate the tunnel under the A3.

As a result, the proposed allocation at Garlick’s Arch does not offer any very special circumstances that warrant a development of the size indicated in the emerging Plan. The allocations for both the slip roads and the Garlicks Arch site should therefore be removed from the Local Plan.

Should new slip roads onto the A3 to/ from Clandon Road be required by Highways England, these could in any case be provided without developing the Garlick’s Arch site. The land could be safeguarded pending a review of the Plan, which would in any case be required once Highways England determine whether the A3 at Guildford is to be widened or placed into a tunnel. This is the appropriate approach to take and recognised on page 9 of the Transport Strategy for the Borough:

‘Our proposed draft Local Plan will ensure that development at the Gosden Hill Farm site will safeguard the ability to create an all-movements A3 junction to the east of Guildford, until such time as Highways England determine whether or not this is required for their A3 Guildford scheme.’

Thus, there is no requirement in highway and transport terms to allocate the Garlick’s Arch site at this time.

Furthermore, development of the GA site would result in a significant adverse impact on the Green Belt due to the topography and open character of the site, which rises to the south and west, from a low point at the north-eastern end. There are clear and expansive views into and over the site from a range of locations around the site. As a result of its topography and the views into and across the site it has a significant beneficial impact on the openness of the Green Belt. The site contributes to the purpose and function of the Green Belt.

As a result, development on the site would significantly reduce openness, harming a key purpose and function of the Green Belt.

One of the reasons for removing the Burnt Common site in favour of the GA site, as referred to earlier in this letter, was to afford greater separation between Send Marsh/ Burnt Common and the proposed site allocation at Gosden Hill Farm. This is erroneous and an illogical conclusion for the following reasons:

- The Burnt Common Nurseries site is already partly developed;
- The Burnt Common Nurseries site is well contained and enclosed from views from the A3;
- The Burnt Common Nurseries site is smaller than the Garlick’s Arch site and contains features that are not characteristic of the rural landscape;
- The Garlick’s Arch site in comparison contains features that are characteristic of the rural landscape and is in agricultural use;
- There is a change in levels;
- A large part of the Garlick’s Arch boundary is un-vegetated which offers an open and unrestricted view into the site, particularly from the south-east;
- The lack of boundary vegetation at the Garlick’s Arch site allows visibility into the site on a scale not possible at Burnt Common Nurseries.
Thus, the development of the Garlick’s Arch site would have a greater adverse impact on the Green Belt and lead to a reduction in the separation between Send Marsh/ Burnt Common and the proposed site allocation at Gosden Hill Farm to a greater degree and extent than if the Burnt Common Nurseries site is developed as proposed.

Furthermore, the Ewbank’s auctions westernmost triangle of land could be excluded from the allocation; with a suitably landscaped boundary between the allocated site and the Ewbank’s auctions site, there would be a consequent increase in separation between Send Marsh/ Burnt Common and the proposed site allocation at Gosden Hill Farm.

The Garlick’s Arch site is too large for the size, character and function of the settlement; it is not required to enable an improved junction onto and from the A3 north of Guildford and there are significant Green Belt and landscape constraints indicating the site should not be developed.

This compares with the Burnt Common site, which is enclosed and development on the site would not result in a loss of openness or impact on the purpose and function of the Green Belt.

The Garlick’s Arch site contains areas of ancient woodland that could be fragmented by development of the site.

This compares with the Burnt Common site, which does not contain environmental designations; the ancient woodland adjacent to the BCN site would be retained and linked to the wider area through strengthened tree belts. Development of the Burnt Common site would be at a low density, allowing space for existing flora and fauna and enhance biodiversity through the provision of a range of habitats in close proximity, including trees, hedgerows, open grassland, a pond and areas of undisturbed ground. Finally, this would all be provided within an enclosed setting that would not result in light pollution or a significant increase in artificial light; thus respecting the environment for the future.

The proposed residential development of the Burnt Common Nurseries site potentially includes children’s play facilities, a village green and space around the dwellings. The commercial development is separated from the residential dwellings by the existing warehouse, which is well enclosed and screened by existing vegetation. This will be supplemented to strengthen wildlife links to and from the ancient woodland and residential development would not be located unacceptably close to existing noise generating sources.

Finally, the provision of a range of residential and commercial development that is proportionate and commensurate with the size, character and function of Burnt Common/ Send Marsh, benefits the local area without having a serious adverse impact on local services and facilities. It is clear therefore that a development of this type contributes to the three main aims of sustainable development – social, economic and environmental.

Conclusion
It is considered that given the subject sites’ location, its sustainability credentials, housing need in the Borough and the assessments of the GBCS it represents a prime opportunity for residential and commercial development that it has been demonstrated is proportionate and commensurate with the size, character and function of the existing settlement.

It is considered that up to 100 dwellings could be achieved on the eastern portion of the site, which would represent a suitably low density of development. This in turn enables the site to retain an open and spacious character, and retention and sympathetic enhancement to the existing ancient woodland through strengthening the tree belts around the site to provide wildlife corridors to adjacent areas.

It is considered that the Council should re-allocate the Burnt Common Nurseries site in the emerging Local Plan for the following summary reasons:

• The site is in a sustainable location – BCN site placed first whilst GA site last in GB&CS 2014;
• The Council considers that the village can accommodate future development, commensurate to its size, character and function. The proposed allocation at BCN is commensurate to the size, character and function of Burntcommon and Sendmarsh;
• There is a real need for housing in Guildford. Currently the Council do not have a 5 year supply of housing and have no reasonable prospect of achieving this for some years through existing allocations. Therefore, in accordance with the NPPF the Council should consider favourably proposals for housing where the principles of
sustainable development can be achieved. This is particularly the case where sites are identified as being deliverable and capable of providing a high proportion of affordable dwellings;
• There is a real need for commercial development on this site in the form of B1(c), B2 and B8 uses as acknowledged by the Council and supported by Lambert Smith Hampton;
• The BCN site is an existing partly previously developed commercial employment site. It makes much more sense to consolidate employment at Burnt Common in one location, rather than spread it over two.
• The Council twice previously identified and allocated the site for future housing and employment development in the emerging Plan, demonstrating its acceptable credentials;
• Residential use of the site would be compatible with adjacent land uses and form a natural extension of and be contiguous with the residential environment of Burnt Common/ Send Marsh, which is listed in the settlement hierarchy as a large village;
• Commercial development would be most logical on this site due to the existing employment development on the site and Newship Group experience;
• The site has defensible boundaries which will ensure that its development will not harm the purposes or openness of the wider Green Belt;
• Separation to Gosden Hill Farm can be achieved by removal of the Ewbanks auction part of the previous allocation;
• The site is similar to the previously developed site Weybrook in Burpham (now a housing development with a Sainsbury’s supermarket) which also lies between the A3 and a slip road.
• The site is isolated from the wider Green Belt, being a very enclosed site in functional, landscape and visual terms;
• The site is not constrained by any other sensitive planning designations;
• There were relatively few objections to the previous allocation of the BCN site in the 2014 Plan. This position has been supported in our recent discussions with both Send Parish Council and those residents involved in Save Ripley, both of whom, as we understand it, support our site as opposed to the Garlicks Arch site. The relative weight of public opinion should be strongly taken into account when concluding on the best site in this area;
• The BCN site is deliverable within 1 – 5 years, demonstrated also by the existing single owners experience and their employment development credentials;
• The BCN site would not impact materially on any existing residential properties;
• The BCN site is well screened already by mature tree planting;
• The BCN site is located around and between existing development – residential to the east and commercial to the west;
• Allocation of the Garlick’s Arch site would potentially result in much of the local road network in Send/ Ripley exceeding its theoretical operational capacity should highway improvements not be provided;
• The inclusion of the proposed new slip roads at Garlick’s Arch would result in significant levels of traffic re-routing locally (i.e. along the A247) and would therefore still not materially improve the local highway network overall;
• The inclusion of the slip roads at Garlick’s Arch would not have a material direct benefit to the local or strategic highway network and would simply result in the rerouting of traffic elsewhere (i.e. the A247 Clandon Road) to the detriment of other parts of the local highway network;
• There is no need for the Garlick’s Arch site to be allocated in the emerging Plan at this time and if necessary, the site/ appropriate land could be safeguarded for highway improvements to the A3 as part of a review of the Plan once Highways England determine the optimum solution for the A3 through Guildford;
• The Garlick’s Arch site is too large for the size, character and function of the settlement; it is not required to enable an improved junction onto and from the A3 north of Guildford and there are significant Green Belt and landscape constraints indicating the site should not be developed; and
• If other strategic sites in the Green Belt (such as Wisley) not be allocated for development, the Burnt Common Nurseries site becomes all the more relevant and necessary to enable the Council to achieve its objectives.

With all of the above in mind we strongly assert that the most logical, reliable, commensurate and credible allocation for employment space, with the least constraints, is the land around the existing Burnt Common Warehouse.

It is suitable, developable and deliverable for both commercial and residential development. As such the site should be included in the Council’s Submission Local Plan and excluded from the Green Belt in any Green Belt review.

In particular, the site at Garlick’s Arch (A43) is classified by the Environment Agency as being in a higher risk than the Council’s own assessment. This area has flooded many times in recent years and therefore the Council’s assessment is not good enough to be included in the plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43) Garlick’s Arch is protected from development as Green Belt. There are no exceptional circumstances which allow for it’s removal from the Green Belt (Policy P2). Central Government state clearly that housing need is not an exceptional circumstance.

The Plan states the preference is to use of previously developed land, but GBC have removed a brownfield site at Burnt Common replaced it with Garlick’s Arch.
The site is not appropriate because:

- There is no sustainable transport infrastructure.
- The site is liable to frequent flooding.
- It has Ancient woodland and is a wildlife habitat, but no wildlife report for the site is in the Plan.
- There are no plans to improve local schools, medical or utilities to cope.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the late inclusion of the site A43 at Garlicks Arch. The scale of development proposed is disproportionate both to the size and character of the villages of Send and Ripley and also in respect of the borough as a whole, with far too much development focused in one area. The site is liable to flooding and not supported by adequate infrastructure to enable sustainable methods of transport, meaning new residents will have a high reliance on cars. Many of the routes between Ripley, Clandon and the surrounding areas are tiny country lanes, which are in poor condition and do not accommodate traffic in both directions at once. The main routes through Clandon, Ripley and Send are already highly congested during rush hours and at other times of the day, particularly where problems arise on the A3. The route through...
Clandon in particular is barely wide enough in places to allow the passing in both directions of heavy goods vehicles. I have seen no plans for additional railway stations to support sustainable travel around these developments and Highways England has no plans to improve the A3/M25 trunk roads (which are already severely strained) within the timeframes necessary to accommodate this plan.

The huge number of houses and large industrial space proposed will stretch the local villages’ amenities (utilities, doctors and schools are already close to or at capacity), cause further traffic problems on routes that are already severely strained during busy periods and harm the environment in a greenbelt area surrounded by ancient woodland, which is home to an abundance of wildlife, including some protected species.

There has been no adequate consultation on this additional development, which was added late to the draft in May 2016.

The industrial site is an unnecessary addition to this area, where there are seemingly other sites available which are far more appropriate for this type of development, in particular around Slyfield, which is already industrialised and would not pose such a threat to protected areas and wildlife habitats.

Comment ID: PSLPS16/8001  Respondent: 15698017 / Katie Taylor  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

- There are no exceptional circumstances which allow for the removal of this land from the Green Belt, as required by national policy. Housing need is not enough to constitute exceptional circumstances.
- The scale of the development proposed is far too large as the neighbouring villages do not have the infrastructure to support the proposed number of houses. Schools are already at or near capacity and there inadequate railway facilities or bus routes to prevent an inevitable over reliance on cars. There is no infrastructure schedule for Garlick’s Arch, so the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.
- The roads in Send, Ripley and Clandon are not sufficient to cope with additional traffic flow that would inevitably arise from a development of this size. The proposed inclusion of an industrial estate is likely to increase the use of the roads by heavy goods vehicles and the roads, which are already in poor condition are unlikely to be able to support this. The extra traffic will also have a severely detrimental impact on the environment.
- The woodland surrounding Garlick’s Arch is centuries old, includes a number of trees protected by Tree Preservation Orders and is home to many species of wildlife. Development on the scale proposed is likely to severely damage animal habitats. I have been unable to locate a wildlife report carried out on this site and it seems the severe environmental impacts of the proposed developments have not been properly considered.
- The land is also susceptible to flooding and this does not seem to have been properly taken into account, with the Environment Agencies flood risk ratings being higher than that specified by the Council.
- There has been no adequate consultation on this development.

| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43 | Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) | |
| | I object to the Garlick’s Arch industrial development because the figures reportedly show a reduction in the need for this kind of development and yet Garlick’s Arch was slipped into the Local Plan despite non-greenbelt land being available. | |
| | I object to the Garlick’s Arch development due to the tendency of the land to flood | |
| | What changes (2016)/further amendments (2017) do you suggest should be made to the document? | |
I object to the erosion of the greenbelt, the development of the Garlicks Arch area and especially the development of an on/off ramp to the A3 at West Clandon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the proposed development of the Garlick’s Arch site at Burnt Common for at least 400 homes plus industrial site. There is insufficient infrastructure in the surrounding villages of Clandon and Ripley to make this development viable. Further, it is not appropriate to clear the ancient woodland and the accompanying habitat for this development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

The site is not appropriate because, there are no plans to improve schools, surgeries, or utilities.

Garlick’s Arch is protected from development as Green Belt, and I do not believe there are valid 'exceptional circumstances' for its removal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

These developments will inevitably lead to a merging of all the areas which are at present separate entities, Wisley Airfield, Ripley including Garlick's Arch to Send and on to Clandon and Burpham. We wish to remain villages - we all live here because they are villages. The development is far too concentrated in this part of the borough and GBC has made it a feature of their plan with larger numbers than other Borough Councils in Surrey. I therefore object to the Borough Wide Strategy (Policy S2) and the SHMA figure of 693 houses per year as being too high (Appendix D).

Garlick's Arch is at risk of flooding and is classified by the Environment Agency as being at higher risk than the Council's assessment. I object to development in areas which are at risk of flooding (Policy P4). The original plan had included land at Burnt Common where there was a brownfield site this new site is absolutely wrong as it has ancient woodland and GBC's Green Belt & Countryside Report does not even cover this site. (A43) Ripley and Send together only have about 3000 households and the development would damage the historic environment as a result of the scale of the proposed development (Policy D3).

With lack of good air quality due to congestion especially in the construction stage, although even now there are problems with the numbers of diesel vehicles especially HGVs, I have concerns about healthy living. (Policy I3) This is a great place to live, but GBC is intent on destroying it.

Please take my objections into consideration and amend the Plan so that housing sites are reduced in this area for not only are we surrounded by all of this proposed by GBC, we also have to live with extra traffic due to a proposal by Woking Borough Council for houses only a mile or so away at Pyrford. This is not NIMBYism but a cry for help as you will destroy our way of life entirely.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Garlick's Arch (A43) being extended and the resulting urban sprawl, half a mile away from where I live. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Travelling Showpeople sites in A43 Garlick's Arch as the development only includes 400 houses and therefore no provision is necessary as this is not compliant with the minimum of 500 as stated in section 4.2.24 of the plan.

I object to the hiding of development by "deferment" for sites A24, A25, A26 and A43. I object to the potential and ill-defined increase in housing allocation at A43 Garlick's Arch. The potential of an increase at site A43 will be extremely harmful to the rural natures of the surrounding villages of Ripley, Send and Clandon and will cause an urban site as buildings abut local boundaries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4573  Respondent: 15711265 / Jonathan Dowling  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two
businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I2). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).
26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A43 – My Objections

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and theA247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends when cyclists pass through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be
re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of
four existing successful rural businesses, which have been in existence for over 30 years and another two
businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their
premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will
have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs
centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road
infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for
example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon.
The proposed development under the plan will cause greater congestion in and around our villages. The Plan
does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send
are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.
I object to the development proposed in the local plan, which will result in more traffic using these narrow roads
and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from
parking problems. Further development around these villages will only result in more traffic and more parking
problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley,
the roads serving the village will become even more congested. Cycling has become a popular past time,
particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no
proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents
involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development
will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of
improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the
infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have
been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development,
the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to
capacity, such as the electrical network and sewers. No plans to improve these services should mean no
development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the
Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
already at capacity and suffering from funding cuts or freezes. Any further development without funding will
place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no
certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion
during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35),
Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk
road network. The A3 & M25 are already at capacity during peak hours and any development prior to
improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also
mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The
significant level of development being proposed, particularly in the north east of the borough will lead to
considerable further congestion, despite any attempts to mitigate this through travel plans. This will be
particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will
have a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

I object to the inclusion of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/8199  Respondent: 15724353 / Arvind Parmar  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 and A43a on Garlick's Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling...
development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of the land at Garlicks Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch is Green Belt and has ancient woodland and has a thriving wildlife habitat, which should be protected. There is no infrastructure, it floods and the the Draft Local Plan Infrastructure schedule does not provide for this site at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/8227  Respondent: 15725409 / Nicholas Ward  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches. It ignores all the thousands of previous objections made by local people.

There is no proven demand for travelling show people plots in this location.

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan.

Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

We object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached.
We object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay.

Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

We object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

We object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

We object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

We object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
We object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

We object to poor air quality (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

We object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The site is located immediately to the northwest of the A3 (Ripley Bypass), on the southeastern edge of Send Marsh, approximately 2km to the southwest of Ripley and 6km to the northeast of Guildford. The site largely comprises agricultural land, with a relatively small area of commercial land in the centre of the site. High voltage electricity pylons run through the centre of the site across its full length. A substantial tree belt, comprising an element of ancient woodland, screens the northwestern corner of the site, with another patch of woodland located on the southeastern boundary with the A3. A small brook also runs through the eastern portion of the site.

Following previous representations on behalf of the landowners and ongoing engagement with the Council, we welcome the proposed allocation of this site in the draft Local Plan for residential-led development. We set out below our support for the broad strategy and specific elements of the draft Local Plan. We also where appropriate suggest alterations to the proposed policies and supporting text where we consider that these would assist in enhancing the soundness of the Local Plan when adopted.

SUMMARY AND CONCLUSIONS

This document sets out our representations on the Guildford Borough Local Plan Proposed Submission Draft on behalf of our client, Ptarmigan Land. Our client controls the land identified within the enclosed Site Location Plan, Site Constraints and Framework Plans which comprises the vast majority of the land identified within the draft allocations set out at Policies A43 and A43a, and is committed to the delivery of this site for residential-led mixed use development in the early years of the plan following its adoption. This site therefore has the potential to make a valuable contribution towards the Borough’s significant development needs, as well as providing additional benefits such as the dedication of the land necessary to deliver the new slip roads onto the A3 detailed in Policy A43a.

Our client welcomes the release of the site from the Green Belt and its allocation for residential-led development as detailed within Policy A43, and welcomes the opportunity to work constructively and collaboratively with the Council to shape the emerging proposals for the site, informed by an extensive range of technical assessments and masterplanning work. Our client is also broadly supportive of the Council’s proposed overall development strategy as set out within the current consultation draft of the Local Plan, although as detailed above there are certain aspects which we would encourage the Council to consider further in order to ensure all the proposed policies are fully robust and sound, having regard to the tests set out within paragraph 182 of the NPPF.

We trust the Council will take the above comments into account in the production of the final draft of the plan, and we welcome the opportunity to work collaboratively and constructively with the Council as matters progress. Please do not hesitate to contact Iceni Projects should you wish to discuss matters further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policies A43 & A43a: Land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley, & Land for New North Facing Slip Roads to/from A3 at Send Marsh/Burnt Common

As stated above, the vast majority of the land included within the allocations identified by Policies A43 and A43a is controlled by our client, who is committed to delivering a sustainable residential-led development.
It should be noted that the land required to deliver the slip roads onto the A3 (as identified within Policy A43a) is also controlled by our client, and that they are willing to set aside this land for the purposes of delivering the slip roads in conjunction with the allocation of Site A43 for development as currently proposed within the draft policy. Importantly, the development of Site A43 will not be dependent on the delivery of these slip roads, and indeed is likely to be completed in advance of the slip roads, so as to ensure that the site can provide the maximum possible contribution to the Council’s housing needs within the next five years. The enclosed illustrative Framework drawing demonstrates how the site layout and access can be appropriately designed to accommodate these future slip roads onto the A3, which will be independently delivered, on land controlled by and offered by our client by the relevant authorities. Further details of the slip road design are provided in the Highway Design Note enclosed at Appendix A1.

We strongly support the proposed allocation of the land at Garlick’s Arch for residential-led mixed use development as detailed within Policy A43. The provision of a significant number of new residential dwellings on this available and deliverable site will assist in meeting the Borough’s significant housing needs, and will help to create a ‘critical mass’ of population required to achieve a sustainable mixed community in Send Marsh/ Burnt Common. The site is available for development immediately and can be delivered within the next 5 years, as unlike a number of other allocations in the Local Plan it is (a) solely within the ownership of two parties committed to working together with Ptarmigan Land and (b) not reliant on the provision of additional infrastructure prior to development taking place. The delivery of this allocation shortly after adoption of the Local Plan will therefore assist in meeting housing needs in these crucial early years and minimise the cumulative deficit expected when the housing trajectory is assessed against the annualised requirement. We therefore consider Policy A43 to be positively prepared and therefore sound in accordance with paragraph 182 of the NPPF, as it will assist in meeting Guildford’s objectively assessed needs.

The release of this site from the Green Belt, as indicated by the proposed inset boundary on the Proposals Map, is justified by the Council’s evidence base, including the Green Belt and Countryside Study. Volume 2 of the Study assesses the site as only meeting two of the purposes of Green Belt as defined by the NPPF, indicating that the site does not prevent neighbouring settlements from merging and does not preserve the setting and special character of an historic town. Whilst the assessment does consider that the site makes some contribution towards checking the eastward sprawl of the village and safeguarding the countryside from encroachment, in our view the A3 (Ripley Bypass) provides a significant long term, logical defensible eastern boundary to Send Marsh/ Burnt Common. Furthermore, the existing areas of trees/ancient woodland, enhanced with further landscaping, as shown on the enclosed plans would perform the function of checking eastward sprawl and safeguarding the countryside from encroachment in perpetuity. Accordingly recognisable and enduring new boundaries can be formed to the Green Belt at the southern and eastern edges of the proposed village inset. As such, this site represents a logical and justifiable release from the Green Belt in order to meet the pressing development needs of the Borough established within Draft Policy S2, whilst providing a permanent Green Belt boundary consistent with the guidance contained in Chapter 9 of the NPPF.

We further note that Volume 5 of the Green Belt and Countryside Study finds that potential impacts on the openness of the Green Belt resulting from development at this location could be limited by new tree belts on the site, and that development of this site as a major village expansion would be appropriate as the potential improvements to the sustainability credentials of the village (i.e. contributions towards ensuring the viability of local shops, education, healthcare facilities and services) would outweigh the potential harm to the openness and purposes of the Green Belt. We would also add that as shown on the illustrative masterplan, our client fully intends to remove the high voltage electricity pylons from the site, and re-route the cables underground. The existing pylons represent a significant urbanising feature of the landscape as seen from the existing properties to the north and west, and also in terms of longer distance views from the south on the opposing side of the A3. The presence of the pylons further undermines the existing status of the land as Green Belt, and through the removal of these features and careful planting of landscaping, the outlook from both the A3, and from longer distance views from the south, east and west of the site will be enhanced through the removal of an urbanising feature that encroaches upon the open countryside. We therefore consider the proposed allocation to be entirely justified by the Council’s evidence base and compliant with national policy, and thus is considered sound in accordance with the tests set out at paragraph 182 of the NPPF.

As noted within the Council’s 2016 Land Availability Assessment (LAA), there are no anticipated technical constraints to development of this site, and it is anticipated that it could be acceptably developed for a residential-led mix of uses in a relatively short timeframe following adoption of the Local Plan. The 2016 LAA notes that whilst a small area of the site is located within Flood Zones 2 and 3, the majority is within Flood Zone 1 and therefore not at risk of flooding. Meanwhile appropriate access is expected to be achievable, and there are some existing sustainable transport options
which can be improved. Appropriate mitigation of potential impacts on the Thames Basin Heath SPA can be achieved through contributions towards SANG provision, and as concluded by the Council’s assessment, there is no known reason why well designed new homes and commercial uses in this location should have an unacceptable impact on the environment, existing and future occupiers. The main relevant constraints and opportunities for this site are identified on the enclosed Site Constraints Plan, and the initial masterplan prepared on behalf of our client responds specifically to the identified constraints to demonstrate an appropriate, suitable and viable layout for residential-led development. A full suite of technical assessments will be undertaken in the coming months to inform further detailed masterplanning work and to demonstrate the suitability of the site for the proposed form and scale of development. The results of these assessments will be presented to the Council and the Inspector in due course.

The enclosed illustrative Framework diagram demonstrates how the proposed development of the site can be achieved, having regard to the identified constraints and opportunities. It is anticipated that the main development parcels will be accommodated around the retained woodland and areas of floodplain, which will provide a green corridor throughout the development and serve to limit the potential impact of the proposals on the openness of the Green Belt adjacent to the site. Send Marsh/ Burnt Common does not currently benefit from any significant areas of park/public amenity space and the site has the capacity to accommodate a large area dedicated to sports facilities/ public open space in its centre as a natural focal point and a hub within which our client will explore the potential to provide appropriate services or facilities for the local community. It is anticipated that the broad development parcel within the southwestern corner of the site, closest to the A3 and the new slip roads, would be most appropriate for an element of employment floorspace. The provision of commercial uses in this area, coupled with a landscape bund and acoustic fence will ensure the amenity of future residents is appropriately protected with regard to noise from the A3, whilst also serving to visually screen the site from the road. Appropriate space within the layout will be left to accommodate the future slip roads onto the A3, and the land will be dedicated for this purpose (with actual delivery of the new infrastructure being undertaken by the relevant authorities at a future date, independent of the proposed development on the wider site).

With regard to transport, the Transport Feasibility Appraisal (TFA) provided at Appendix A1 demonstrates that the delivery of a residential led mixed use development accords with the guiding principles of the NPPF; namely:

- The site is well located to encourage people to travel by a variety of modes;
- Safe and suitable access can be provided for all; and,
- The residual impact of the quantum of development envisaged is unlikely to be severe, albeit is accepted that this will need to be considered in further detail over the coming months.

The TFA also sets out how the A3 slip roads could be delivered, together with the outcome of initial feasibility discussions that have been held with highways officers at Highways England, Surrey County Council and Guildford Borough Council. It is worthy to note that the evidence presented within the TFA shows that the area of land that has been safeguarded is sufficient for the relevant authorities to construct the slip road in accordance with current design guidelines, subject to further detailed work being undertaken having regard to the outcome of topographical surveys and detailed traffic modelling. To this end, it is evident that Ptarmigan Land’s intention to safeguard this land will enable Guildford Borough Council to realise a key aspect of its emerging Transport Strategy, and in particular Strategic Road Network Measures 9 and 10.

With regard to the specific requirements of Policy A43, we support the intention for the site to be delivered for predominantly residential uses. The ownership and physical status of the site render it suitable, viable and appropriate to development immediately, providing a substantial contribution to meeting the Borough’s housing needs in the early years of the Local Plan. Indeed, initial masterplanning work has indicated that in excess of 400 new homes could be achieved, and that up to approximately 500 may be deliverable on this site, subject to further detailed technical assessments and masterplanning exercises. Accordingly, whilst as stated above, the intention to provide an element of employment floorspace is supported - in order to deliver employment opportunities for local people and create a sustainable, mixed community that reduces the need to travel, we would welcome greater flexibility in the wording of the policy, allowing for a sliding scale of development that can deliver “up to 7,000 sq. m” of such commercial floorspace, and/or up to 500 new homes (as opposed to 400). We would also encourage the policy wording to allow for additional flexibility in terms of the specific employment generating uses that will be permitted on this site, so as to enable development to respond to local demand and market conditions.
By allowing for ‘up to 7,000 sq. m of commercial floorspace’ on Site Allocation A43 it ensures that any potential reduction in the amount of commercial floorspace as a result of demand, or potential to provide provision elsewhere in the village inset, would not render the policy wording inaccurate or prohibitive to other options. Consequently, by allowing for an upper ceiling of 500 homes, it would provide additional flexibility in this regard to make efficient use of the land, should the final development provide less than 7,000 sqm of commercial floorspace. It is anticipated that development of the site broadly in accordance with the high level illustrative Framework plan enclosed with this submission would be entirely compliant with such amendments to this policy.

The development of this site as set out in Policy A43 will also result in a number of benefits in addition to the provision of residential dwellings and employment floorspace at an early stage of the plan period to help meet the Borough’s development needs. These are anticipated to include the removal of the overhead electricity pylons currently running the length of the site, which are expected to be replaced as part of the development with underground cables. Clearly this will have a significant positive impact, both in terms of the local visual impact and amenity of local residents, and the general impact of the site on the openness of the surrounding Green Belt. Furthermore, the potential provision of local facilities and the contribution towards a ‘critical mass’ within the village will improve the overall sustainability of Send Marsh/ Burnt Common, whilst the provision of land for the new slip roads onto the A3 will facilitate a very substantial benefit to the local community and the wider Borough in terms of the provision of critical infrastructure.

Having regard to the above, we therefore strongly support Policies A43 & A43a, and would welcome the opportunity to work constructively with the Council in the coming months to ensure the prompt development of the site to achieve the Council’s key aims for this allocation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Representation on the Local Plan proposed submission draft

3.25 We strongly support the continued intention to allocate the land at Garlick’s Arch within the latest version of the Local Plan for residential-led development. As discussed in our previous representations, the vast majority of the land included within the allocation is controlled by our client, who is committed to delivering a sustainable residential development at this location. Our client is also able to provide the land required to deliver the slip roads onto the A3 as identified within Policy A43a, thereby providing a significant benefit in terms of mitigating the impacts of growth in the area, including at the former Wisley airfield. To this end and in direct response to representations submitted by Highways England to the previous Local Plan consultation, our client is in the process of preparing a Statement of Common Ground (SOCG) with Highways England, Guildford Borough Council and Surrey County Highways Authority.

Employment Uses

3.26 The latest version of Policy A43 as set out in the June 2017 consultation document removes reference to the previously proposed B1(c)/B2/B8 employment uses. The area of land our client identified for delivery of the 7,000 sqm of employment uses previously identified in Policy A43 covered approximately 2 hectares. As such, whilst we have no in-principle objection to the proposed deletion of this use, it is important to find an appropriate alternative use for the 2 hectares to ensure a viable and sustainable development, and to ensure employment needs are appropriately provided for elsewhere as necessary. Accordingly, we maintain that this area of the site is entirely suitable for either a) additional
to provide additional plots within the Plan to accommodate those Travelling Showpeople at Whittles Drive who do not
the short term need, arises from overcrowding and doubling-up on these existing plots, and hence there is a requirement
Assessment indicates that the need identified for additional Travelling Showpeople plots over the plan period, particularly
further two net additional plots at Policy A50 of the draft Local Plan. The Council's 2017 Traveller Accommodation
existing 12 plots in Guildford are located at land at Whittles Drive, Aldershot Road, Normandy, which is allocated for a
3.30 With regard to the spatial distribution of accommodation for Travelling Showpeople in the Borough, we note that the
made available by the proposed deletion of employment uses on the land at Garlick's Arch and transferred the
2017 Traveller Accommodation Assessment are met, and it seems likely that the Council has simply identified the land
allocation has seemingly created a requirement to identify additional plots elsewhere to ensure the needs identified in the
residential dwellings, alongside other uses including retail and community facilities. The proposed deletion of this
'land to the south of Normandy and north Flexford' (Policy A46), which was to provide approximately 1,100 new
3.29 As explained within the June 2017 Housing Delivery Topic Paper, the 6 Travelling Showpeople plots identified for
the policy to be unsound and contrary to the requirements of paragraph 182 of the NPPF, as it would not be justified.
Travelling Showpeople Plots

3.28 The other principal change to the previous version of the Local Plan published in June 2016 is the proposed
inclusion of a requirement for the provision of 6 plots for Travelling Showpeople. We strongly object to this proposed
amendment to Policy A43. As noted above, requiring this site to include provision for Travelling Showpeople would be
inconsistent with Policy H1, which indicates that sites of 500 homes or more should provide Gypsy & Traveller or
Travelling Showpeople accommodation. Clearly, as the site is currently allocated for approximately 400 dwellings, it
does not exceed the 500 dwelling threshold set out in Policy H1 (and would not do so even if the 2 hectares previously
allocated for employment uses are now utilised for housing) and thus there would not appear to be a policy justification
for inclusion of the Travelling Showpeople plots within the allocation. Furthermore, based on the thresholds set out
within Policy H1, a site would not be required to deliver 6 pitches or plots unless 1,500 to 1,999 dwellings were
proposed. Clearly, the scale of development here is significantly below this threshold. We assume that the thresholds in
Policy H1 were devised having regard to a robust evidence base and reasoning regarding the level of Gypsy & Traveller or
Travelling Showpeople accommodation that it would be suitable, viable and sustainable to provide alongside a
development comprising general market and affordable housing, and as such it would not appear to be justifiable to
simply ignore these thresholds in this particular case. We are unaware of any justification put forward by the Council as
to why the land at Garlick’s Arch should be an exception in this regard, and we thus consider this proposed amendment to
the policy to be unsound and contrary to the requirements of paragraph 182 of the NPPF, as it would not be justified.

3.27 The deletion of the proposed employment element of the allocation set out at Policy A43 releases approximately 2
hectares of land and thus clearly presents a key opportunity to make efficient use of the site to maximise the residential
dwellings that can be accommodated here be that as standard housing provision or for a specialist form of housing such as
a Care Home, thereby assisting to meet the Borough’s very significant housing needs. As noted above in relation to
Policies S2 and H1, it is imperative that relatively unconstrained sites which are capable of delivering a significant
to quantum of residential dwellings within the early years of the Plan following adoption, such as this site, are brought
forward as early as possible, and that their development potential is maximised in order to ensure a sufficient supply of
housing land is identified.

Travelling Showpeople Plots

3.28 The other principal change to the previous version of the Local Plan published in June 2016 is the proposed
inclusion of a requirement for the provision of 6 plots for Travelling Showpeople. We strongly object to this proposed
amendment to Policy A43. As noted above, requiring this site to include provision for Travelling Showpeople would be
inconsistent with Policy H1, which indicates that sites of 500 homes or more should provide Gypsy & Traveller or
Travelling Showpeople accommodation. Clearly, as the site is currently allocated for approximately 400 dwellings, it
does not exceed the 500 dwelling threshold set out in Policy H1 (and would not do so even if the 2 hectares previously
allocated for employment uses are now utilised for housing) and thus there would not appear to be a policy justification
for inclusion of the Travelling Showpeople plots within the allocation. Furthermore, based on the thresholds set out
within Policy H1, a site would not be required to deliver 6 pitches or plots unless 1,500 to 1,999 dwellings were
proposed. Clearly, the scale of development here is significantly below this threshold. We assume that the thresholds in
Policy H1 were devised having regard to a robust evidence base and reasoning regarding the level of Gypsy & Traveller or
Travelling Showpeople accommodation that it would be suitable, viable and sustainable to provide alongside a
development comprising general market and affordable housing, and as such it would not appear to be justifiable to
simply ignore these thresholds in this particular case. We are unaware of any justification put forward by the Council as
to why the land at Garlick’s Arch should be an exception in this regard, and we thus consider this proposed amendment to
the policy to be unsound and contrary to the requirements of paragraph 182 of the NPPF, as it would not be justified.

3.29 As explained within the June 2017 Housing Delivery Topic Paper, the 6 Travelling Showpeople plots identified for
the land at Garlick’s Arch were originally proposed for a much larger allocation in the west of the Borough, known as
‘land to the south of Normandy and north Flexford’ (Policy A46), which was to provide approximately 1,100 new
residential dwellings, alongside other uses including retail and community facilities. The proposed deletion of this
allocation has seemingly created a requirement to identify additional plots elsewhere to ensure the needs identified in the
2017 Traveller Accommodation Assessment are met, and it seems likely that the Council has simply identified the land
made available by the proposed deletion of employment uses on the land at Garlick’s Arch and transferred the
outstanding 6 plots onto this site, without any further detailed assessment of justification.

3.30 With regard to the spatial distribution of accommodation for Travelling Showpeople in the Borough, we note that the
existing 12 plots in Guildford are located at land at Whittles Drive, Aldershot Road, Normandy, which is allocated for a
further two net additional plots at Policy A50 of the draft Local Plan. The Council’s 2017 Traveller Accommodation
Assessment indicates that the need identified for additional Travelling Showpeople plots over the plan period, particularly
the short term need, arises from overcrowding and doubling-up on these existing plots, and hence there is a requirement
to provide additional plots within the Plan to accommodate those Travelling Showpeople at Whittles Drive who do not

housing; b) an alternative appropriate compatible use such as a Care Home; or c) an element of employment (B1(c)/B2/
B8) uses if required. Whilst paragraph 4.151 of the Council’s June 2017 Housing Delivery Topic Paper suggests that the
employment element of the allocation has been deleted in response to some concerns raised that the employment uses
may not be compatible with residential dwellings, we are not aware of any evidence which would substantiate such
concerns. Clearly, there are innumerable examples of where industrial/commercial uses have been successfully
accommodated within relatively close proximity to residential dwellings, and with appropriate masterplanning and
mitigation measures where necessary we are not aware of any technical reasons as to why an element of employment uses
could not be accommodated on this site if required. Notwithstanding this, we note that employment uses are now
proposed at the site known as ‘land around Burnt Common warehouse, London Road, Send’ (Policy A58) instead, and
provided employment needs are appropriately met elsewhere we have no objection to the principle of deleting the
proposed employment use for the land at Garlick’s Arch, provided the land which was allocated for employment uses is
appropriately utilised for either additional residential development, or an appropriate alternative use such as a Care Home
instead.

Travelling Showpeople Plots

3.28 The other principal change to the previous version of the Local Plan published in June 2016 is the proposed
inclusion of a requirement for the provision of 6 plots for Travelling Showpeople. We strongly object to this proposed
amendment to Policy A43. As noted above, requiring this site to include provision for Travelling Showpeople would be
inconsistent with Policy H1, which indicates that sites of 500 homes or more should provide Gypsy & Traveller or
Travelling Showpeople accommodation. Clearly, as the site is currently allocated for approximately 400 dwellings, it
does not exceed the 500 dwelling threshold set out in Policy H1 (and would not do so even if the 2 hectares previously
allocated for employment uses are now utilised for housing) and thus there would not appear to be a policy justification
for inclusion of the Travelling Showpeople plots within the allocation. Furthermore, based on the thresholds set out
within Policy H1, a site would not be required to deliver 6 pitches or plots unless 1,500 to 1,999 dwellings were
proposed. Clearly, the scale of development here is significantly below this threshold. We assume that the thresholds in
Policy H1 were devised having regard to a robust evidence base and reasoning regarding the level of Gypsy & Traveller or
Travelling Showpeople accommodation that it would be suitable, viable and sustainable to provide alongside a
development comprising general market and affordable housing, and as such it would not appear to be justifiable to
simply ignore these thresholds in this particular case. We are unaware of any justification put forward by the Council as
to why the land at Garlick’s Arch should be an exception in this regard, and we thus consider this proposed amendment to
the policy to be unsound and contrary to the requirements of paragraph 182 of the NPPF, as it would not be justified.

3.29 As explained within the June 2017 Housing Delivery Topic Paper, the 6 Travelling Showpeople plots identified for
the land at Garlick’s Arch were originally proposed for a much larger allocation in the west of the Borough, known as
‘land to the south of Normandy and north Flexford’ (Policy A46), which was to provide approximately 1,100 new
residential dwellings, alongside other uses including retail and community facilities. The proposed deletion of this
allocation has seemingly created a requirement to identify additional plots elsewhere to ensure the needs identified in the
2017 Traveller Accommodation Assessment are met, and it seems likely that the Council has simply identified the land
made available by the proposed deletion of employment uses on the land at Garlick’s Arch and transferred the
outstanding 6 plots onto this site, without any further detailed assessment of justification.

3.30 With regard to the spatial distribution of accommodation for Travelling Showpeople in the Borough, we note that the
existing 12 plots in Guildford are located at land at Whittles Drive, Aldershot Road, Normandy, which is allocated for a
further two net additional plots at Policy A50 of the draft Local Plan. The Council’s 2017 Traveller Accommodation
Assessment indicates that the need identified for additional Travelling Showpeople plots over the plan period, particularly
the short term need, arises from overcrowding and doubling-up on these existing plots, and hence there is a requirement
to provide additional plots within the Plan to accommodate those Travelling Showpeople at Whittles Drive who do not
Currently, it would therefore be logical and sustainable to accommodate this need as close as possible to the existing Travelling Showpeople plots, given the likely associations between the families wishing to secure their own plot and those remaining at Whittles Drive. However, the Council has not adequately demonstrated a need for such plots.

3.31 Furthermore, it is unclear whether the existing families at Whittles Drive that are in need of their own plots would actually utilise the new plots in Send Marsh/Burnt Common, given the significant distance between them and uncertainty regarding whether they would be suitable for these particular Travellers. Given the lack of evidence as to whether these proposed new plots would be suitable in this regard, it cannot be concluded that this element of the policy has been positively prepared as required by paragraph 182 of the NPPF. Consequently, we consider that the proposed amendment of Policy A43 to include provision for Travelling Showpeople plots is unsound, as there is no evidence that this will actually meet the identified need for such plots.

3.32 Having reviewed the Council’s evidence base documents, it would appear that no specific assessment has been undertaken regarding the suitability of the land at Garlick’s Arch for the provision of 6 Travelling Showpeople plots, and that the plots appear to have simply been transferred from the now deleted site A46 once it had been decided that the employment floorspace previously identified for the land at Garlick’s Arch was to be relocated at site A58. The June 2017 Sustainability Appraisal Update suggests (at Table 10.1) that the land at Garlick’s Arch was identified as an alternative site for the 6 pitches originally allocated for the land to the South or Normandy and north of Flexford on the basis that “[t]here is no available alternative site that can provide Travelling Showpeople plots in the first five years of the plan to meet need”. It is assumed that the reference to the first five years of the plan is actually intended to refer to the first five years following adoption of the plan. Regardless, this commentary would appear to provide the only explanation as to why the Council is now proposing a requirement for 6 Travelling Showpeople plots as part of the development of the land at Garlick’s Arch. However, the Sustainability Appraisal does not provide any further evidence as to why other sites could not accommodate this need within the first five years following adoption of the plan, and as such we consider this proposed amendment to Policy A43 to be unsound, as it is not justified having regard to the requirements of paragraph 182 of the NPPF.

3.33 In order to facilitate a comparison between the strategic sites identified as being suitable for delivery of a portion of Gypsy & Traveller/Travelling Showpeople accommodation and to demonstrate how the requirements of Policy H1 are intended to be met, we set out in Appendix 1 a table identifying all sites proposed for residential-led development that exceed the 500 dwelling threshold identified within Policy S2, as well as the land at Garlick’s Arch in light of its proposed allocation for 6 Travelling Showpeople plots. It should be noted that those sites allocated solely for Gypsy & Traveller pitches or Travelling Showpeople plots, which will deliver the remainder of the requirement, are not included for the purposes of this comparison. The table highlights that site A29 (‘land to the south and east of Ash and Tongham’) is not currently allocated for any Gypsy & Traveller or Travelling Showpeople accommodation, despite being of a sufficient size to require the provision of 6 pitches or plots. It is unclear why no provision is made for Gypsy & Traveller or Travelling Showpeople accommodation on this site. We understand that planning permission has been granted for development of part of the site already, however, the Council has not provided any evidence as to why provision for Travellers could not be made as part of the remainder of the allocation. Based on the trajectory included within the 2017 Addendum to the Land Availability Assessment, the Ash and Tongham urban extension is expected to deliver residential dwellings immediately following adoption of the Local Plan, and thus provides an opportunity for early delivery of Gypsy & Traveller pitches or Travelling Showpeople plots. As such, the Council has not adequately demonstrated a need to provide Gypsy & Traveller pitches and Travelling Showpeople plots on sites under 500 dwellings in order to meet identified needs (in addition to those provided on smaller sites identified for solely for Travellers).

3.34 As discussed above, even if the Council were to consider it necessary to identify sites below the 500 unit threshold in order to meet the identified needs, this would be contrary to the approach identified within Policy H1, and as such this policy would require amending. Any such amendments would need to be justified by the appropriate evidence to demonstrate that delivery of Gypsy & Traveller pitches or Travelling Showpeople plots on sites comprising less than 500 dwellings would be suitable, sustainable and viable.
3.35 Having regard to the above, if additional land is still required to accommodate Gypsy & Traveller/ Travelling Showpeople needs and this cannot be delivered as part of residential-led developments in accordance with the requirements of Policy H1, it may be necessary for the Council to identify additional small sites dedicated solely to Gypsy & Traveller pitches/ Travelling Showpeople plots. We would therefore encourage the Council to undertake a full assessment of potential sites in order to identify any additional capacity in this way if necessary.

3.36 On the basis of the above points, we strongly object to the proposed amendment to Policy A43 to require 6 Travelling Showpeople plots to be provided as part of the residential development of the site. In our assessment, the proposed amendment would be unsound, having regard to the requirements of paragraph 182 of the NPPF, as it would not be justified, positively prepared or effective. A requirement for 6 plots on site A43 would fundamentally contradict the Council’s own policy as set out at Policy H1, and it has not been demonstrated that the provision of Travelling Showpeople plots in this location would actually serve the identified need. Meanwhile the Council has not provided sufficient evidence or justification as to why it would be acceptable in principle to require a site of this size to accommodate Gypsy & Traveller/ Travelling Showpeople accommodation, or why this site in particular would be suitable for such provision (or indeed why this site would be the only/ most suitable site to accommodate any outstanding need).

3.37 In order to make the policy sound, we therefore consider that the proposed amendment relating to the provision of 6 Travelling Showpeople plots should be deleted. Should the land originally proposed for employment floorspace on this site no longer be required, we consider that it would be appropriate to increase the proposed quantum of residential development in order to ensure the development of this site, and the contribution it makes towards the supply of housing in the Borough, is maximised. The enclosed vision document indicates that up to approximately 500 dwellings could be appropriately accommodated on the site, or that provision could be made for an alternative appropriate use such as a care home in addition to the 400 homes having regard to the technical and masterplanning work undertaken to date. We therefore request that the Council update the wording of the policy to reflect this potential capacity and ensure that it does not artificially constrain the future development of this site and its potential contribution to the Borough’s housing supply.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Appendix 1.pdf (193 KB)
village negating any further future expansion into the Green Belt to the south-east. A planted landscape buffer, potentially including a bund and acoustic fence, serves to mitigate any noise generated by the A11.

The plan (left) summarises the key considerations. The following pages describe these in more detail. Full technical reports include:

- Transport and Access
- Utilities
- Air Quality
- Arboriculture Survey
- Archaeology
- Noise

Transport and Access

The NPPF is predicated on the assumption that new developments are located in areas that provide people with a choice of travel modes and are able to provide safe and suitable access for all. There is also a presumption that new developments should only be resisted on highways and transportation grounds when it can be demonstrated it will lead to a severe impact upon the local transport networks.

When considered against this background it is evident that the allocation of the Land at Garlick’s Arch is well placed to accord with these principles. An overview of the benefits associated with the development at the Site is provided below, with a more detailed assessment provided in the Technical Appendices.

Opportunities to walk and cycle

The Land at Garlick’s Arch is well connected to an existing network of pedestrian and cycle routes that have the potential to encourage future residents to make use of these important modes of transport. However, there are currently gaps in the existing infrastructure that may limit existing residents in Send Marsh from using these modes and/or accessing the new community facilities that will be provided at the Land at Garlick’s Arch. For example, there are not any pedestrian crossing points provided between the residential areas to the north of Portsmouth Road and the bus stops that are located adjacent to the Site.

Development at the Land at Garlick’s Arch therefore offers the potential to address these limitations for the benefit of existing and future populations alike. This is likely to include new footways along Portsmouth Road and the introduction of formal pedestrian crossings.

Opportunities to travel by public transport

The local pedestrian network provides excellent connectivity to the local bus network with the closest bus stops located adjacent to the Portsmouth Road/Burnt Common Lane junction. The bus services that operate from these bus stops follow routes that incorporate key local employment and retail centres. It is possible to undertake longer journeys by a combined busrail trip as the bus services that operate along Portsmouth Road also access Clandon railway station.

To ensure good access to public transport to and from the Site, pedestrian links to the existing bus stops on Portsmouth Road will be provided. These can be supplemented by the creation of new bus stops within the Site. The delivery of the latter will be dependent upon the outcome of discussions with local bus operators, but, subject to further detailed review and agreement with the existing operators, it is considered viable to divert either of the existing routes that serve the site without having a significant impact upon their current timetables. The additional patronage as a result of the new residents will be an additional benefit to the viability of the services.

Access to the highway network

The local highway network is focused around Portsmouth Road, which provides a connection to Guildford town centre to the west and Junction 10 of the M25 Motorway to the east via the A3. As part of the Strategic Highway Network, the A3 also links the Site with Portsmouth and the M3 Motorway (via the A31) to the south west. It is therefore evident that the Site is well located with respect to key local centres and the wider region.
However, the A3 does not currently benefit from a junction that caters for all movements. To this end, existing residents of Send Marsh, Burntcommon and the wider area are required to travel relatively long distances to access the A3. This places sensitive areas of the local highway network, including Ripley village centre, under stress.

Development at the Land at Garlick’s Arch provides the opportunity to address this as Ptarmigan Land is willing to facilitate the safeguarding of land for new ‘on’ and ‘off-slips’ to the A3, which forms a key part of GBC’s emerging Transport Strategy that is being developed to assist with the delivery of the housing and employment requirements of the emerging Local Plan.

Notwithstanding this, an initial highway impact assessment has established that increases in traffic associated with a large scale mixed-use development at the Land at Garlick’s Arch are unlikely to materially affect the operation of the local highway network without the new A3 slip roads in place. It has also been shown that the emerging access strategy for the site will provide a safe and suitable means of access in accordance with the NPPF.

Access to local services

The Land at Garlick’s Arch is relatively well located to a range of facilities and services that can be accessed by walking, cycling and public transport in accordance with the guiding principles of the NPPF. However, it is understood that Send Marsh and Burntcommon have previously received a poor rating from GBC for their access to community facilities.

From a transportation perspective it is considered that a major mixed use development at the Land at Garlick’s Arch will provide a quantum and mix of development that can deliver a step change in the availability of local services. For example, the inclusion of a local centre, new village green and SANG will significantly increase the offer that is available to existing residents thereby reducing the length and frequency of journeys.

Utilities

Data on the location of existing utilities in and around the site has been obtained from the statutory undertakers and this demonstrates that there are no significant constraints to delivery of the Site.

It is proposed that pylons that pass through the site will be under-grounded to improve visual amenity.

Air Quality

We have completed an initial High Level Review of the Air Quality Issues.

A review of current information has indicated that air quality at the Site is likely to be characterised as having low to moderate concentrations of background pollutants exacerbated by contributions from the local road network, principally the A3 Ripley bypass to the south of the Site with current traffic flows exceeding 90,000 vehicles per day. As a result placement of residential units immediately adjacent to this road within the Site will need to be carefully considered.

Given the range of mitigation options available, as detailed in the accompanying reports, and the relatively low concentration of urban background pollutants in this area away from the A3, it is not considered likely that air quality will present a constraint to the granting of outline planning permission for the residential development of this Site.

Archaeology

A desk-based archaeology and heritage assessment has been completed for the Site. The Surrey Historic Environment Record and History Centre have been consulted as have Historic England’s Archive and National Heritage List for England. These and online sources informed a site walkover. No designated heritage assets lie close to the Site and given topography and existing development and vegetation, no designated heritage assets would be adversely affected by development of the Site. Although the general pattern of the landscape is recognisable on 18th century maps, early field boundaries have been removed except on the edges of some woodland where wood banks survive. The only structure on the Site is a large late twentieth century metal and breeze-block building with no special architectural or historical interest. ‘Garlick’s Arch’ itself is a culvert under the road marking the western boundary of the site and this appears to have been replaced in modern times.
There is nothing archaeological recorded for the Site and limited evidence in the area. The land may only have been brought into agricultural use in recent centuries and medieval settlement is likely to have been dispersed and to have lain away from the Site. The construction of the A3 radically redefined the landscape post-war. Past and continuing cultivation and tree roots will have truncated any sub-surface remains which do lie within the Site.

The Site has low archaeological potential. Although sub-surface remain may lie within the Site area, it is almost certain that they would be typical, locally significant features which could be dealt with through further investigation ahead of construction and would not constrain scheme design.

**Noise**

A noise impact assessment has been prepared to test the site’s suitability for residential development. The assessment has been based on detailed environmental noise measurements and predicted noise levels at the site, under open site conditions.

The noise predictions have been carried using the noise-modelling suite Cadna/A, in accordance with the Calculation of Road Traffic Noise (CRTN) prediction methodologies, based on noise measurements taken at the site.

The assessment has been utilised to develop a masterplan for the site; the built form of which will add significant screening and reduce the effects of noise within the interior of the site.

In light of the findings of this assessment, it is considered with appropriate, acoustically sympathetic design that the site can be feasibly developed for residential purposes, while complying with all relevant British Standards and that noise should not present a constraint to the granting of outline planning permission for the residential development of this site.

**Landscape Assessment**

The text below summarises the findings of the Landscape and Visual Appraisal and Green Belt Review which accompanies the Vision Document.

The Site is not of noteworthy scenic beauty, and does not contain any landscape features of any particular importance with the exception of the TPO group in the north-eastern part of the Site, and does not afford the opportunity for public outdoor recreation due to the lack of access. It is not within the Surrey Hills AONB.

The Site is well contained and largely screened from view from its surrounding context, with the exception of glimpsed views from the A3 adjoining the south-eastern boundary of the Site and long distance glimpsed views from elevated land to the south. This is due to a combination of topography and the strong vegetation structure present locally within the settlements and wider landscape, including the field boundaries and numerous woodland blocks present locally.

The assessment within the Landscape and Visual Appraisal and Green Belt Review identifies that the contribution that the Site makes to the purposes of Green Belt is limited. The Council’s own assessment also supports this view.

In conclusion, development could be effectively assimilated within the Site from a landscape and visual perspective and would not compromise the purposes and function of the Green Belt. Furthermore, the proposed masterplan improves local visual amenity by relocating visually unattractive pylons and power cables underground for the benefit of the entire village.

On this basis, the Site is considered appropriate for release from the Green Belt for residential development.

6 Vision

*The vision for Garlick’s Arch is dual themed.*

**Liveability: A Good Neighbour**

Whilst an important theme is creating a considered, well designed and aspirational approach to site planning, the Land at Garlick’s Arch also seeks to add real benefit to the existing community by enhancing daily village life.
**Theme One: Enhance Village Facilities Burntcommon Today**

The Land at Garlick’s Arch presents an opportunity to enhance Send Marsh/Burntcommon as a liveable and sustainable village by providing those facilities and amenities you would expect to find in a settlement of a similar size.

Today the village is predominantly comprised of the built-up residential estates of Boughton Court Avenue and the Portsmouth Road forming Burntcommon. As identified in earlier chapters of this document, local facilities extend to a petrol filling station and a Little Waitrose with little else to meet the daily needs of villagers. There is a notable lack of public open space with the village lacking a park, sports pitches and allotments. Community space for social events is also absent.

The Land at Garlick’s Arch presents an opportunity to provide real benefit to the village through the provision of new facilities as part of a ‘community heart’.

**Theme Two: Site Vision**

The need for bespoke design solutions across the Land at Garlick’s Arch

The Site is divided into southern-northern parts by a stream and mature vegetation. The southern portion of the Site is a large, relatively flat, and irregular shaped field set against the urban context of the existing village edge and A3. The northern portion of the Site is more contained by mature woodland and also comprises a grazed field hillock and two further contained parcels of land.

A bespoke north and south design response

The differing southern and northern site conditions prompt the need for a bespoke design solution to each area. When this design solution is combined with analysis of what placemaking elements would enhance the village, undertaken in earlier sections of this document, a clear rationale for the Site’s organisation takes shape. Conceptually this is best described by the Venn diagram above. The ‘Village’ and ‘Infrastructure’ elements respond to the context of the southern, more urbanised, portion of the Site. The ‘Arcadia’ element responds to the landscape assets of the northern area of the Site.

The character of the ‘Village’, ‘Infrastructure’ and ‘Arcadia’ elements are outlined in the following pages of this document. Where the elements meet a new village heart complete with a village green, convenience shopping and community space is created.

**Development Principles**

The following sequence of diagrams show the key principles for the development of the Land at Garlick’s Arch.

The Site today

The Site, which covers a total area of circa 30 hectares, is surrounded by mature vegetation belts which provide physical and visual containment to much of the Site, particularly from the north and east.

Pylons extend across the Site, and a telecommunications mast is visible to the south of the Site, which in combination with the adjoining settlement edge of Send Marsh / Burntcommon and the presence of the A3 corridor, exert an urbanising influence on the Site.

The Site is divided into a southern and a northern part by a stream corridor and associated mature vegetation. The Site and wider landscape comprises parcels of woodland, some of which is ancient woodland.

1. Completion of the south eastern extent of the village

Development at the Land at Garlick’s Arch is enclosed by defensible boundaries of neighbouring built areas and the A3. Development at this location provides a logical development parcel in the completion of the village and does not open up the possibility of coalescence or further encroachment in to the Green Belt.
2. Improve Visual Amenity

The Land at Garlick’s Arch provides the opportunity to improve local visual amenity by relocating pylons and power cables underground for the benefit of the entire village.

3. Maintain and enhance visual enclosure and create an acoustic bund to mitigate noise generated by the A3

Retain and enhance natural features including hedgerows, trees and water bodies for the benefit of flora and fauna. The retention of trees and hedgerows provides mature planting with aesthetic value that helps to mitigate the visual impact of future development.

Opportunity to create a tree planted landscape bund to reduce the noise generated by the A3.

4. Create A Woodland Park

Create a woodland park to recognise the value of the existing ancient woodland and stream. The woodland landscape corridors provide new public open space for existing and new residents and are conduits for pedestrian and cycling movement. The landscape corridors link the Garlick’s Arch community to the village and surrounding countryside.

The woodland park provides an attractive outlook for new homes.

5. Mitigate Long Distance Views

Create planted screens and a hillock pocket park to mitigate the potential for external longer distance views.

6. Create a Sustainable Urban Drainage Strategy

The existing topography and proposed landscape corridors provide an opportunity to create a sustainable urban drainage system (SUDS) of swales and ponds to mitigate surface water. The creation of a SUDS network provides the opportunity for semi-wetland habitats to enhance biodiversity. Swales and ponds also provide a place for people to enjoy nature and relax.

7. Establish ‘Arcadia’

Create a sensitive, lower density, Arcadian approach to development in an area of the site with a wealth of valuable natural features including woodland and a stream.

Please see the following page for more information on Arcadia.

7. Establish 'Arcadia'

Introduction

The topography and mature planted landscape encircling the northern part of the Site offers the opportunity to create a unique character through a sensitive, landscape-led design approach. Long distance views into this part of the Site call for a proposal where rooftops blend within clusters of trees rather than dominating the skyline.

An Arcadian approach to development differs from more standard development models by creating pedestrian scaled environments through trees, hedges and shrubs rather than buildings. This allows a greater proportion of buildings to be free standing or clustered in smaller groups rather than space enclosing elements within a wider landscape. This provides a legitimate context for detached and semi-detached clusters of homes which are nestled amongst a dominant landscape.

Arcadia is the creation of the rural idyll by using the picturesque approach to landscape design as typified by the layout of parks of great country houses in the eighteenth century. These landscapes were pioneered by Capability Brown, ‘England’s greatest gardener’, whose approach to landscape was more organic and naturalistic.
A key ingredient of Arcadia is the use of meandering walks and lanes which successively reveal features interspersed within a dominant landscape. In the same way, early 'leafy' suburbs of the nineteenth and early twentieth century conceal houses among mature trees so that the visitor is more aware of the landscape setting than of the houses.

Arcadia at Garlick’s Arch should strive for the same effect.

Key ingredients of Arcadia:

- a dominant, naturalistic, landscape
- existing tree cover enhanced by new planting
- front gardens enclosed by hedges in order for the landscape to dominate the houses.
- avoidance of built enclosures such as walls and gates
- detached and semi-detached homes
- a meandering network of paths and lanes
- a sequence of green open spaces
- human-scale enclosure provided by landscape features rather than buildings
- natural materials and colour
- generous, planted, front gardens with buildings set back

8. Provide sports pitches for the benefit of new and existing residents

The local area lacks sports provision and a village green. New sports pitches benefit both existing and new residents. The creation of a village green encourages social cohesion and reflects the local settlement pattern of village greens at Send Marsh, Send and Ripley.

9. Extend the ‘Village’

Please see the following page for information on Extend the Village.

Introduction

The ‘Village’ is an a modern interpretation of the traditional village character found in surrounding historic villages such as Ripley and immediately around Send Manor in Send Marsh.

Key components of the village character include:

- Enclosure created by continuity of built front
- High proportion of dwellings joined to one another in flats, terraces and semidetached arrangement. Individuality of buildings should be encouraged as found in historic towns and villages where individual buildings happen to be joined to one another
- Breaks between buildings for car parking or access to read car parking areas should be bridged over at first floor level
- Buildings on corners to address dual street frontage through openings
- Shallow front gardens to encourage spatial enclosure
- Traditional materials deployed in a contemporary architectural language

Infrastructure Benefits

The Land at Garlick’s Arch presents an ideal opportunity to provide a sustainable, residential led development whilst enhancing the existing settlement’s infrastructure, providing additional benefits to the local community.

Local infrastructure will be improved through the provision of new vehicular linkages through the site, making land available for the creation of new slip roads onto the A3 and improving visual amenity by relocating pylons underground.

10. Relieving Traffic Pressure at the Send Barns Lane & Clandon/London/Portsmouth Road Roundabout Junction
Relieve traffic pressure at the Send Barns Lane & Clandon/London/Portsmouth Road Roundabout Junction by encouraging traffic through the Garlick’s Arch site between Portsmouth Road and the A3.

11. Enable the Delivery of A3 Slip Roads & Junction Improvements

Enable the delivery of new access slip roads and junctions improvements to the A3.

The site is capable of being delivered entirely independently of the proposed slip roads.

12. Provide a New Village Park & Suitable Alternative Natural Greenspace (SANG)

In accordance with Natural England guidelines, a large area of natural greenspace will be provided for the benefit of local residents. At present, neither the Site or the area where SANG is proposed benefits from public access. A potential location for the provision of this SANG has been identified immediately to the south of the Land at Garlick’s Arch, within easy walking distance of Burntcommon. This would provide immediate positives to the existing and proposed residents in terms of access to local walks, greenspaces, a village green and sports facilities on the Sang and the Site itself which is not currently available. Alternatively, an appropriate contribution can be made towards the funding a nearby SANG already approved by the Council and Natural England.

Introduction

The Suitable Alternative Natural Greenspace (SANG) will be delivered as part of a planning application for the proposed development of Garlick’s Arch, Send. A SANG Management Plan has been produced to accompany a future planning application and provides further information as to how the SANG will be used and managed.

The SANG is proposed as part of the mitigation package designed to ensure there are no adverse effects on the integrity of the Thames Basin Heaths Special Protection Area (TBH SPA).

The scheme’s required SANG provision will be 8ha and the site can provide 16ha.

The overall site consists of an area of pastoral farmland and Ancient Woodland, located within private land. The site includes boundary trees and hedgerows, and internal hedgerows with trees. The site is bordered to the south by Tithebarns Lane, to the west by Tithebarns and to the north by the A3 and the east by further farmland. A Phase 1 Habitat Survey of the site was carried out in September 2016. The arable land is of limited ecological value, although the fields are bounded by native hedgerows which offer some value to wildlife. The hedgerows and associated boundaries have potential for protected species including nesting birds, reptiles and hazel dormice.

The SANG has been designed in accordance with Natural England’s guidance and has involved correspondence and a site meeting with Natural England. The proposed SANG is closely linked to the proposed housing development and is thus intended for local use, plus has car park provision for the additional capacity for other housing developments.

13. Create a Mixed-Use Neighbourhood Heart

Introduction

The meeting of ‘Arcadia’, ‘Village’ and the ‘Infrastructure’ elements of the Site present an opportunity to create a neighbourhood heart for Burntcommon. The heart is a community focal point and includes a village green, convenience shopping and community space to support daily needs.

Village greens are a key component of the local village settlement pattern. This character extends the nearby villages of Send Marsh, Send and Ripley (see right). As identified in earlier chapters of this document, Burntcommon lacks a discernible village heart. The Land at Garlick’s Arch presents an opportunity to create a community focal point for Burntcommon through the creation of a village heart for the benefit of new and existing residents.

Vision
The Land at Garlick’s Arch adds real benefit to the existing community of Burntcommon by enhancing daily village life through the provision of a new community heart that includes a village green, convenience shopping and community space to support daily needs.

The Land at Garlick’s Arch enables the delivery of A3 slip roads & junction improvements. However, the Site is deliverable regardless of whether the slip roads are constructed. The two options showing the vision with and without the slips roads are shown pages 43 and 44.

**The Numbers**

The Vision support the emerging Local Plan policy by providing for approximately 400 homes.

**Community Engagement**

Community Engagement is integral to developing the vision for the Land at Garlick’s Arch. Ptarmigan Land has a strong track record in working with local residents, community groups and business groups, as well as locally elected representatives, at each stage of developing their proposals. We firmly believe that successful developments are those where the interests of stakeholders are given full consideration, and where a transparent, proactive engagement strategy is adopted.

This is true for the Land at Garlick’s Arch, where Ptarmigan Land will work closely with local ward members, Send and Ripley Parish Councils, as well as community action groups, to ensure that interested parties are kept up-to-date with the development of the proposals and have the opportunity to help shape them. The wider community will also be invited to take a proactive role in shaping the proposals, through a variety of tailored engagement events.

Engagement activities will be designed to be both appropriate for the stakeholders’ interest, and for the stage of the development of the proposals; allowing for meaningful engagement from the concept stage through to detailed design.

It is envisaged that engagement activities will include:

- One-to-one stakeholder meetings;
- Design-led workshops;
- Public drop-in exhibition events;
- Community update newsletters; and
- A community consultation website.

Early, regular engagement generating effective dialogue will help shape the vision for Garlick’s Arch. This will allow for a scheme that meets the needs of the local community, whilst maximising the opportunity of the site to provide for a sustainable community, and benefits for existing and new residents.

**7 Conclusions**

*This document has been prepared on behalf of Ptarmigan Land in relation to Land at Garlick’s Arch in order to set out a vision for development of the Site for residential-led purposes.*

The Site has been identified in the Submission Draft (June 2016) of the Local Plan to be released from the Green Belt consistent with draft allocation A43 of the Local Plan. The identified Site would also make land available for the provision of new slip roads onto the A3, in accordance with Policy A43a of the Submission Draft of the Local Plan.

The Site provides a significant opportunity to create a sustainable community by knitting together the existing ‘ad-hoc’ areas of the village with a new heart and community that is inherently more sustainable. It will help to meet local housing needs. As set out above, the Site is well located having regard to existing residential development in the area and the proximity of existing facilities, and is relatively unconstrained with regard to technical matters such as transport and access, utilities, air quality, noise, ecology and heritage. Development of this Site would not have an unduly detrimental impact on the landscape character of the wider countryside or adjacent Green Belt, and comprises a currently underutilised area to which the public have no access, between existing development on three sides and the A3 on the
fourth. Furthermore, the proposed masterplan improves local visual amenity by relocating visually unattractive pylons and power cables underground for the benefit of the entire village.

On this basis, the Site is considered appropriate for release from the Green Belt for residential development. This Site therefore represents a logical opportunity to enhance the character of Send Marsh/ Burntcommon and provide additional homes and local facilities within the settlement, and to provide a more logical and clearly defined southern boundary to the village and the wider Green Belt.

The vision for the Site includes a number of interlocking elements which will create a sustainable, mixed community which will enhance the existing settlement and provide a number of wider benefits. These elements include the provision of a logical, defined edge to the settlement, an improvement to visual amenity, the creation of a pleasant, liveable environment including a woodland park and sustainable drainage measures, and the establishment of ‘arcadia’. New homes and jobs will be provided around a thoughtfully designed heart of the community, incorporating sports pitches and creating the opportunity to provide other facilities such as a village shop of community hall. Local infrastructure will be improved through the provision of new vehicular linkages through the site, and making land available for the creation of new slip roads onto the A3.

Having regard to the various considerations discussed within this document, the Land at Garlick’s Arch presents an ideal opportunity to provide a sustainable, residential-led mixed use development which will assist in meeting Guildford Borough’s housing needs whilst enhancing the existing settlement and providing additional benefits to the local community. Ptarmigan Land look forward to engaging further with Guildford Borough Council, consultees and local stakeholders in order to realise this vision in the coming months and years.

</table>

The Site provides a significant opportunity to create a more sustainable community at Burntcommon whilst helping to meet local housing needs. The Site is located near to existing facilities within Send Marsh and key centres across the Borough more widely. As detailed in the technical appendices to this document, the Site is relatively unconstrained with regard to considerations such as transport and access, utilities, air quality, noise, ecology and heritage. Furthermore, the Site is well contained within the landscape and could be developed without having an unduly detrimental impact on the wider countryside. By infilling this vacant area of land between the existing residential development to the north and west and the A3 dual carriageway to the southeast, this Site will provide a more logical and clearly defined southern boundary to the village.

There are a number of potential benefits associated with development of the Site. In addition to the provision of a broad range of much-needed family housing that will assist in meeting the Borough’s acute needs, this residential-led development has the potential to provide community facilities/ infrastructure to create a more defined and sustainable ‘centre’ to Burntcommon. This will strengthen the sense of place and identity of the area, whilst providing the necessary ‘critical mass’ of population to support the viability of local facilities such as a village shop thereby creating a more sustainable community. Highways improvements associated with the development offer the potential to relieve traffic through Send Marsh and Ripley, and the proposed removal of the high voltage electricity pylons running through the Site would significantly enhance the visual appearance of the Site and wider area. Further benefits of developing the Site are discussed throughout this document.
This Vision Document also identifies the key considerations that will need to be taken into account as the emerging proposals for the Site progress. These include the provision of appropriate mitigation measures to account for noise and air quality, which have been fully investigated and accounted for in the design and layout of the development. An assessment of the potential impact on the surrounding landscape has also been undertaken to inform the location, design and density of the proposed uses. Highways and access will also be an important consideration; the Site is relatively well served by road, walking and cycling connections and public transport, and opportunities will be taken where appropriate to enhance local connectivity.

Having regard to the various considerations discussed within this document, the Land at Garlick’s Arch presents an ideal opportunity to provide a sustainable, residential-led mixed use development which will assist in meeting Guildford Borough’s housing needs whilst enhancing the existing settlement. The Site is suitably located and relatively unconstrained, and as acknowledged by the Council through the emerging Local Plan, would comprise a logical amendment to the historic Green Belt boundary in order to facilitate development and establish a robustly justified, long term, recognisable and defensible boundary to Burntcommon.

Set out on page 5 is an overview of the Site and its surroundings, followed by a summary of the latest planning policy position relating to this proposed allocation. Chapter 3 of this document identifies a number of the key benefits associated with the emerging proposals, whilst Chapter 4 considers the sustainability of development in this particular location. Chapter 5 provides an analysis of the key considerations which have been taken into account in the design of the Site. Further details regarding the vision for this Site – in particular how it could appear, contribute to and function as part of the wider settlement are provided in Chapter 6. This chapter, which brings together the various elements of the proposed vision into a high level illustrative masterplan. This illustrates how the Site might be comprehensively developed to provide a new sustainable community. Conclusions regarding the Site and the vision for its development are set out in Chapter 7.

About The Site

The Site, which covers a total area of circa 30 hectares, is located to the south of the B2215 (Portsmouth Road) approximately 6.5 kilometres to the north east of Guildford town centre within the administrative boundaries of Guildford Borough Council (GBC) and Surrey County Council (SCC).

The Site lies within land between Send Marsh / Burntcommon and the A3 which forms the southeastern edge of the Site. The nearest settlement to the south of Send Marsh / Burntcommon is Clandon, south of the A3.

The edge of the Site is surrounded by mature planting which provides physical and visual containment, particularly from the north, east and west of The Site. There are reciprocal intermittent views to the A3 to the south. There are also long distance views towards elevated land to the south associated with the Hogs Back Ridge formation.

Pylons extend across the Site, and a telecommunications mast is visible to the south of the Site, which in combination with the adjoining settlement edge of Send Marsh / Burntcommon and the presence of the A3 corridor, exert an urbanising influence on the Site.

The Site is divided into a southern and a northern part by a stream corridor and associated mature vegetation. The southern field is a large irregular shaped field tapering to its south-western corner which appears relatively flat, and falls gently towards the stream corridor (35 – 40m AOD). The northern part of the Site comprises a localised hillock formation (+40m AOD) which comprises a grazed field and two more contained parcels of land to the east. The northern part of the site includes a car workshop yard.

The Site and wider landscape comprises parcels of woodland, some of which is ancient woodland including Garlick’s Arch Copse and the northern part of Oldlands Copse, both of which are within the Site.

Land to the north, east and west of the Site comprises residential development within Send Marsh / Burntcommon. The south-eastern boundary of the Site is defined by the A3 which comprises a total of six lanes, which has a national speed limit. Intervening vegetation and an embankment along part of the southern part of the Site boundary with the A3 partially screens visibility into the Site however, there are stretches of open views into the Site from the A3. The Site’s
surroundings include development to the north and west and the A3 road corridor to the south which together have an urbanising effect on the Land at Garlick’s Arch.

The Site is not crossed by any public rights of way (PRoW), is not within an Area of Outstanding Natural Beauty, and there are no listed buildings or conservation areas within the vicinity of the Site.

2 Planning Overview

“... the emerging policy therefore sets out clear support for a residential led mixed use development of this site, to provide a valuable contribution towards meeting the Borough’s housing and economic needs.”

The Land at Garlick’s Arch, as identified on page 3, is currently located outside the settlement boundary of Send Marsh and within the Green Belt, as defined by the Council’s 2003 Proposals Map.

As such, existing local planning policies significantly restrict the nature and extent of development that could be achieved on this Site.

However, having regard to the June 2016 Proposed Submission Version of the Local Plan, the Council is proposing to remove the Site from the Green Belt and allocate the Site for residential-led mixed use development. Policy A43 of the emerging Local Plan specifically allocates the Land at Garlick’s Arch for approximately 400 homes.

A number of requirements for the proposed development are also set out within the draft policy, including the provision of appropriate flood risk mitigation, protection of the ancient woodland within the Site and the provision of green corridors and linkages to habitats outside of the Site.

Related to Policy A43, Policy A43a allocates the land immediately adjacent to the A3 Ripley Bypass for new slip roads linking the A247 to the A3. The northbound slip road is to be located within the wider Land at Garlick’s Arch Site identified above.

Associated with the draft allocations, the proposed updates to the Council’s Proposals Map identifies the Site as being within the village Green Belt inset boundary for Send Marsh, and as a specific Site Allocation.

Having regard to the above, the emerging policy therefore sets out clear support for a residential led mixed use development of the Site, to provide a valuable contribution towards meeting the Borough’s housing and economic needs.

3 Why Garlick’s Arch?

Why choose to locate new homes at the Land at Garlick’s Arch over another potential location?

The Land at Garlick’s Arch supports the objectives of the Guildford Borough Council’s emerging Local Plan.

Locating development at Garlick’s Arch provides many strategic benefits from improving visual amenity by under-grounding electrical pylons to helping to relieve congestion through Send Marsh/Ripley and providing facilities and amenities missing in the local area.

The Site enables the release of land to deliver new access slip roads and junction improvements to the A3. However the Site is deliverable regardless of whether the slip roads are constructed.

1. Provide sports pitches and a village green for the benefit of the village

The local area lacks sports provision and a village green. New sports pitches benefit both existing and new residents. The creation of a village green encourages social cohesion and reflects the local settlement pattern of village greens at Send Marsh, Send and Ripley.

2. Relieve congestion in Send Marsh
Potential to relieve traffic pressure at the Send Barns Lane & Clandon/London/Portsmouth Road Roundabout Junction by encouraging traffic through the Land at Garlick’s Arch.

3. Create a park for all in the village to enjoy

Send Marsh/Burntcommon lacks a village park. The Land at Garlick’s Arch provides the opportunity to create a new publicly accessible parkland landscape for new and existing residents to enjoy.

4. Create a village heart

Burntcommon lacks a discernible village heart. The Land at Garlick’s Arch provides the opportunity to create a community focal point for Burntcommon through the creation of a new village heart. The village heart includes a village green, convenience shopping and community space to support daily needs.

5. Improve Visual Amenity

The Land at Garlick’s Arch provides the opportunity to improve local visual amenity by relocating visually unattractive pylons and power cables underground for the benefit of the entire village.

6. Easy access to strategic employment, leisure and recreation destinations (10 minutes)

The Land at Garlick’s Arch is connected, by major infrastructure corridors, to nearby larger settlements that include strategic employment, leisure and recreation.

7. Excellent access to major transport corridors including the A3 and M25

The Site is well connected to major infrastructure corridors including the A3 directly to the south of the Site and the M25 which is approximately 6km from the Site.

8. A visually contained Site

The Site is already visually contained and has the capacity to accommodate new development without significant impact on external views.

9. Opportunity to enhance Burntcommon

The Land at Garlick’s Arch provides the opportunity to enhance Send Marsh/ Burntcommon as a well-rounded settlement by providing facilities currently lacking in the local area.

10. Enable the delivery of A3 slip roads and junction improvements

The Site enables release of land for the delivery of new access slip roads and junction improvements to the A3. However the Site is capable of being delivered entirely independently of the proposed slip roads.

11. Provision of SANG

In accordance with Natural England’s established principles, Suitable Alternative Natural Greenspace (SANG) will be provided for the benefit of residents, with features such as walking/ cycling routes and accessible green space. This will be provided either directly by the developer on land immediately to the southeast of the A3 – less than 1km from the Site, or as a financial contribution towards an existing SANG.

12. Creating local jobs

The provision of 400 homes will support a population of approximately 1,000 people that will help to underpin the viability of existing shops and services – i.e. education, health etc. thereby supporting and creating local jobs.

13. Mitigating noise from A3 to local houses
The Land at Garlick’s Arch provides the opportunity to mitigate the impact of noise generated by the A3 for the existing local residents at Burntcommon and Kiln Lane. Mitigation measures include the creation of a landscape bund, acoustic fence and planting screen.

14. Relieving traffic in Ripley

The Land at Garlick’s Arch provides the opportunity to relieve traffic congestion in Ripley by the release of land to enable delivery of northbound A3 slip roads. Currently all local traffic wishing to access the A3 in the northbound direction passes through Ripley High Street (B2215).

15. Completion of the south eastern extent of the village

Development at the Land at Garlick’s Arch is enclosed by defensible boundaries of neighbouring built areas and the A3. Development at this location provides a logical development parcel for the completion of the village and does not open up the possibility of coalescence or further encroachment in to the Green Belt.

16. Management of landscape assets

The Land at Garlick’s Arch includes a number of valuable landscape assets including Ancient Woodland and watercourses which are unmanaged. Development at the Land at Garlick’s Arch presents an opportunity to actively manage landscape assets and enhance their local heritage and biodiversity value.

17. Creation of a sustainable residential community

The delivery of a mix of residential properties will make a valuable contribution towards the Borough’s housing needs, enhance choice within the local housing market and improve affordability for local people.

4 The Audit

The Audit is a comprehensive analysis of the Site and the wider area, encompassing assessment of access to local facilities, landscape and open space, and connectivity.

Selecting a sustainable site

Access to local facilities is fundamental to the concept of locating sustainable development. New development needs the full range of social, retail, educational, health, transport and recreational facilities to allow people, especially those of limited means or mobility, to go about their daily lives without over reliance on a private car.

Building for Life is a tool to assess and compare the quality of proposed neighbourhoods. It is led by the Design Council CABE, Home Builders Federation and Design for Homes. Whilst Building for Life is usually awarded to completed schemes, the site selection criteria has been applied to the Land at Garlick’s Arch to demonstrate the sustainability of the site as a location for future a neighbourhood extension. Building for Life asks:

1) Does the development provide (or is it close to) community facilities, such as shops, schools, workplaces, parks, play areas, pubs or cafes?

2) Are there enough facilities and services in the local area to support the development? If not, what is needed?

The facilities audit on the next page demonstrates the Land at Garlick’s Arch is a sustainable site location and fully meets the Building for Life criteria through existing local facilities. Shaping Neighbourhoods, a best practice neighbourhood design guide, also suggests the site scores highly as a sustainable location for neighbourhood extensions. This is illustrated on the following pages.

Facilities Audit

Figures 1, 2 and 3 (on the following pages) assess the Land Garlick’s Arch against the accessibility criteria benchmark for new neighbourhoods established by Shaping Neighbourhoods. Fig 1 demonstrates the ideal distances of local facilities for
a sustainable neighbourhood. Fig. 2 illustrates how accessible local facilities are from the site in its current form and Fig. 3 illustrates the accessibility of local facilities when the site is built out.

The facilities audit has highlighted good access to a range of facilities, though access to a local centre, local parks and sports pitches is weak. Fig. 3 illustrates that once the site is built out many of the missing facilities are provided meaning the site exceeds expectations of access to facilities by some margin.

In summary the Land at Garlick’s Arch is a sustainable choice for new development and generally exceeds expectations of access to facilities as identified by ‘Shaping Neighbourhoods’: a best practice design guide for new neighbourhoods’ when fully built out.

**Connectivity Audit: Road Network**

At present the Site is undeveloped. However, as it is used for agricultural purposes it does benefit from vehicular access points onto Portsmouth Road and Kiln Lane, albeit the geometry of these accesses do not accord with current standards for new residential developments. Notwithstanding this, it is noteworthy the predominant land use in this area is residential and the proposals therefore form a natural extension to the existing built up environment.

The local highway network is focused around Portsmouth Road, which is a single carriageway road subject to a 40 mile per hour speed limit. Portsmouth Road provides a connection to Guildford town centre to the west and Junction 10 of the M25 Motorway to the east via the A3. The A3 can be accessed via the A247 (Send Road) and B2215 (London Road) to the west, and the Ockham Interchange to the east. As part of the Strategic Highway Network, the A3 also links the site with Portsmouth and the M3 Motorway (via the A31) to the south west. It is therefore evident that the Site is well located with respect to key local centres and the wider region. The location of the Site in relation to the wider highway network can be seen overleaf.

**Connectivity Audit: Public Transport**

The local pedestrian network connects to the local bus network with the closest bus stops located adjacent to the Portsmouth Road/Burnt Common Lane junction. Given that the bus services that operate from this stop (Routes 462/463 and 515) follow routes that incorporate Cobham, Esher, Guildford, Kingston, Surbiton and Woking, it is evident that the Site is well located to encourage future residents to travel to key local employment and retail centres by public transport. Furthermore, it should be noted that Route 462/463 also stops at Clandon railway station. As this station is served by circa 8 trains per hour (4 to London Waterloo and 4 to Guildford) it is evident that the Site is also well located for people to undertake longer journeys by a combined bus-rail trip.

**Connectivity Audit: Pedestrian Network**

It is generally accepted that walking and cycling provide important alternatives to the private car, and should also be encouraged to form part of longer journeys via public transport. Indeed, it is noteworthy that the Institute of Highways and Transportation (IHT) has prepared several guidance documents that provide advice with respect to the provision of sustainable travel in conjunction with new developments. Within these documents it is suggested that:

- The bicycle is a potential mode of transport for all journeys under five miles (Planning for Cycling, 2015)
- The maximum walk distance for commuting is 2 kilometres (Planning for Walking, 2015)
- Walking distances to bus stops should not exceed 400 metres (Planning for Walking, 2015)

Given the location of the Site, it is considered that it is well situated to encourage less reliance upon the private car. The plan, right, shows the Site is well connected with respect to an extensive network of pedestrian and cycle routes providing excellent access to local countryside, including direct pedestrian links to Suitable Alternative Natural Greenspace (SANG), and routes towards Ripley to the north and Burpham and Abbotswood to the south west.

Footways incorporate crossing facilities (i.e. dropped kerbs with tactile paving) along key desire lines. In this regard, the Site is well placed to encourage future residents to make use of these important modes of transport when travelling to and from the Site.

**Document:**  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

We object to the proposed development at Garlick’s Arch. Garlick’s Arch is in the Green Belt. It is designated as Priority Habitat and Ancient woodland. This is an irreplaceable asset and should be protected. The Green belt in Guildford does not “belong” to the people of Guildford alone. Across the county, indeed across the whole of England there are many people who love the Guildford countryside. Countryside like the Hogs Back, for example, “belongs” to us all; our green and pleasant land, the natural landscape and it’s rich biodiversity is part of our common heritage.

Green belt land is a finite resource, once developed it is gone forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/5209  
**Respondent:** 17111233 / Tony Wales  
**Agent:**

**Document:**  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**
Having seen the proposed changes to the Proposed Submission Local Plan, I am seriously concerned about the proposals around Burnt Common (plan 43).

From a transport viewpoint, the proposal to install a new exit ramp from the A3 at Burnt Common seems to be ill-thought out and counter-productive. I appreciate the need to relieve the volume of traffic through Ripley, but by adding a new exit from the A3 at Burnt Common, it will merely transfer the problem to the A247 and the villages of West Clandon, Send and surrounding areas. In particular, this will encourage traffic to use a ‘rat run’ through these villages to the southern areas of Guildford.

Please note the following important points:

1. The A247 is not a wide road and becomes exceptionally narrow as it passes through the West Clandon Conservation Area, where two large vehicles (lorries, buses) cannot easily pass each other.
2. There is no prospect of widening the A247 at this point as there are conservation properties close to the road boundary on both sides.
3. There is already limited access for pedestrians with a single, narrow pavement and any increased volume of traffic is likely to increase the risks for pedestrians.
4. West Clandon is a ‘ribbon village’ which is laid out along the path of the A247 as it becomes The Street. There is no village square or centre. Any increase in traffic along The Street would have a seriously detrimental impact on the life of the village, which would become dissected by an increasingly busy, major road.
5. There would be no benefit to the local residents of this area, as it merely gives greater access to through traffic at a serious cost to the detriment of the local area.

From a housing viewpoint, the Burnt Common proposals to create 1,700 new dwellings seem similarly ill-thought out. There is no infrastructure to support such a large development. Please note the following points:

1. There is an extremely limited bus service and the nearest rail station (Clandon) would be a 30 minutes’ walk. This would mean that the new residents would be forced to rely on car transport, thereby adding a severe load to the local roads which are already becoming congested.
2. There are no local shops and limited availability of schools in the area.
3. The proposals would merely create an isolated housing estate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/78  Respondent: 17133121 / Catherine Rose  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the fact that you are going to ruin beautiful parts of Surrey with your plans. These areas are beautiful spots in Surrey away from the noise and bustle of the nearby towns. Common sense must prevail here, surely?

-I object to any development on Site A43 at Garlicks Arch as this would be on Green Belt Land - there is nothing identified or exception in the Local Plan documentation.

-I object to including 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Green Belt and there is no identified need within the Local Plan.
- I object further to the allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. The Plan itself has huge discrepancies and is therefore not properly constituted.

- I object to the potential of an increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages. The plan states that “if the [Traveller sites] remains unsold, the future use of the land should have regard to an up to date Traveller Accommodation Assessment (TAA) and Strategic Housing Market Assessment (SHMA), with specific consideration of the use of the land for affordable housing”. So the creation of even more travellers pitches and houses, which you are yet to justify.

- I object to Section 4.2.22 of the Plan which states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” So why on earth would you put 75% of them in Ripley? This is ridiculously unbalanced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/243  Respondent: 17148161 / Sally Hall Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object to the Policy A43 change Land at Garlick’s Arch, Send Marsh because:

• There is no proven demand for any travelling showpeople slots in this location
• It will generate excessive traffic further blocking the local roads of Send and Ripley
• Again this area is subject to frequent flooding, being in a flood zone 2 allocation
• It seems once again to ignore the thousands of previous objections made by local residents
• This area has been contaminated by over 50 years of lead shot accumulation
• It is an obvious overdevelopment of the village and in addition the number of homes (400) is excessive
• This is a permanent Green Belt area and no ‘exceptional circumstances’ exist for this beautiful area
• This is an area of ancient woodland which existed in the time of Elizabeth 1, and it is exceptional
• This will cause a ‘joining up’ of Send and Ripley, which defeats the purpose of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/291  Respondent: 17158849 / Gwenda Wakefield Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43 change at Garlick’s Arch because:

It is Green Belt and no exceptional circumstances exist.

It is ancient woodland that has existed for 100’s of years.
The number of homes is excessive and will cause over development of our village.  

It defeats the key purpose of Green Belt by joining Ripley and Send.  

The additional traffic created will block up our local roads.  

There is no demand for Travelling plots at this location.  

I believe the site is contaminated by lead shot and is currently in a flood zone.  

It also ignores all the thousands of previous objections made by us, the local people.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to Policy A43 change at Garlick's Arch because the site floods regularly (designated as flood zone 2) and is covered by ancient woodland, up to 500 years old, which is home to a variety of wildlife. The currently existing brownfield sites within Guildford and its surrounding areas should be fully utilised before any housing is agreed within Green Field sites. There is no proven demand for traveller sites in the location and the addition of 400 houses in a small area defies all previous objections to this proposal and is a total over-development of the village. It will essentially create a "super-village" by which Ripley and Send are amalgamated into one and the increase in volume of traffic within the small roads and lanes around the villages will not be able to cope. There are no proposals around the increase in additional services, such as schools, doctors, shops or road improvements for the local village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object very strongly to Policy A43, land at Garlicks Arch. It is unacceptable that you have ignored the thousands of previous objections to this proposal. There is already far too much traffic in the Ripley/Send area and this will create so much more and will effectively join the 2 towns together, defeating one of the purposes of the Green Belt.

Also I do not believe that there has been any demand for Travellers sites, so why are they being created?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/355  Respondent: 17163361 / Victoria Marr  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- Any development at Site A43 Garlicks Arch would be on Green Belt land, and there is no identified or exceptional need within the Local Plan documentation
- The inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Green Belt and there is no identified need within the Local Plan
- The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. The Plan is self-inconsistent and therefore not properly constituted.
- The potential of an increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages. The plan states that “if the [Traveller sites] remains unsold, the future use of the land should have regard to an up to date Traveller Accommodation Assessment (TAA) and Strategic Housing Market Assessment (SHMA), with specific consideration of the use of the land for affordable housing”. So even more travellers pitches and houses, which is unjustified.
- Section 4.2.22 of the Plan states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” So why do 75% of them have to be in Ripley? This is unbalanced and unfair.
• The removal of site A46 from the Plan (with its proposed 1100 houses) has left the Plan even further unbalanced against the North East of the Borough with over 40% of the development proposed in this small area of Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy A43 – I object to Policy A43. This massive increase in housing plus travelling show-people plots is an over-development that would destroy the Green Belt and woodland, join up Ripley and Send plus yet again put additional stress on the fragile traffic system in and around Send, Ripley and the A3. This is also against previous objections and is frustrating to see on the plan.

Land at Garlik’s Arch, Send Marsh, Policy A43

I object to the Policy A43 change at Garlick’s Arch because:

• It ignores all the thousands of previous objections made by local people
• The is no proven demand for Travelling Showpeople plots in this location
• It is beautiful permanent Green Belt and no ‘exception circumstances’ exist
• It will cause overdevelopment of our village and the number of homes is excessive
• It is exquisite ancient woodland that existed at the time of Elizabeth 1
• It will join p Ripley and Send and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over 50 years
• It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A43 change - Land at Garlick’s Arch, Send Marsh because it ignores thousands of previous objections made by local people. There is no proven demand for Travelling Showpeople plots in this location. It will cause over development of our village generating excessive traffic and ruin for ever the green open space that should be protected for future generations to enjoy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the policy A43 land at Garlicks Arch at Send Marsh on two accounts: one there is no proven need for travelling show people in this area. This number of homes (400) will join Ripley and Send into one huge conurbation. Traffic on the Portsmouth road in over crowded and dangerout now and with cars that 400 homes will produce will make the morning and evening commute into one long and miserable traffic jam.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to Policy A43 because:

- This is Green Belt, and no exceptional circumstances exist.
- It is a site of ancient woodland.
- The site is subject to frequent flooding.
- The additional traffic generated will cause traffic jams in Send.
- There is no shown demand for Travelling Showpeople plots.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We object to the Policy A43 change at Garlick's Arch because it ignores the thousands of previous objections, the provision of 8 Travelling Showpeople plots is out of proportion, the number of houses is excessive and will cause the loss of ancient woodland, might exacerbate flooding in the area and will generate excessive traffic on roads and villages which cannot cope with the present volume of traffic at peak times. We are retired so don't travel to work during rush hour but if we have a doctor's appointment the volume of traffic has a significant impact.

I object to the amendment to A43, in that it not only fails to reduce the number of homes still proposed (remaining at the disproportionately high number of 400), but it also adds the provision of sites for 'Travelling Show People'.

I object in the strongest possible terms to the impact these recommendations will have on local roads (volume of traffic and addition to the already high level of general and noise pollution), the destruction of greenbelt and the undeniable ruining of the village of Send by placing a disproportionately high burden on Send (why are these housing needs not being more evenly distributed across the borough?) There are also other nearby developments in the Horsley and Clandon areas that means a huge volume of this change will impact a small patch of the borough and the proposed infrastructure changes will not be sufficient - even if they are carried through in every instance, which seems extremely unlikely given the current and future chronic pressures on public funding.

Are residents to be compensated for the destruction of greenbelt, impact on their local services and very likely negative impact on house prices?

The plan should be amended to more evenly share the burden across the borough. The plan should also remove provision of sites for 'Travelling show people' under A43. There is already increasingly heavy traffic traveling through Send accessing the A3 road and Old Woking/Woking. These changes will further impact these roads and negatively impact residents wellbeing (pollution and the stress of additional traffic and noise pollution).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This also leads to my objection of policy A43 and the proposals for the land at Garlicks Arch. Not only does it ignore the thousands of previous objections made, there is no proven demand for traveller plots in this location or for a development of this size in this area. It will cause significant over development of our village and increase the already excessive levels of traffic that already cause huge builds of traffic within both Send and Ripley.

Such proposals simply cannot go ahead. It is damaging the green belt and will cause severe unrest for those residence living in the

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to strongly object to the proposed development at the Garlick's Arch site. I object for the following reasons:

- the proposed houses would be on Greenbelt Land

- the potential increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause these villages to merge.

- the inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Greenbelt. There is no identified need within the Local Plan documentation. The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan and so is out of scale with the proposed development.

- the potential for a substantial increase in industrial floorspace from 7000 sq m to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch
The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. I object to the hiding of development by “deferment” (A24, A25, A26, A43)

This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:
   i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!), and
   ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch)

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

   1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [ than the Burnt Common site did ]”
   2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

Policy A43 Garlick’s Arch –Send Marsh, Burnt Common and Ripley

Again, the many thousands of objections to the proposed development in the 2016 Consultation have been completely ignored with respect to this Green Belt land.

Now 8 Pitches/Plots for ‘Travelling/Showpeople have been added to the original 400 houses, without any proven demand or requirement.

There has not been any visible consideration given to the infrastructure which would be required to support this type of expansion. This proposal is impractical.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be **no** inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

**I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch**

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

**The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch**

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. *The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [ than the Burnt Common site did ”]*

2. *The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”*

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.
Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Land at Garlick’s Arch, Send Marsh, Policy A43.
I object to the Policy A43 change at Garlick’s Arch because:
• It ignores all the thousands of previous objections made by local people
• There is no proven demand for Travelling Showpeople plots in this location and is not wanted
• It is beautiful permanent Green Belt and no "exceptional circumstances” exist
• It will cause over-development of our village and the number of homes is hugely excessive
• It is exquisite ancient woodland that existed at the time of Elizabeth 1
• It will join up Ripley and Send and defeat the key purpose of Green Belt
• It is subject to frequent flooding and is currently a flood zone 2 allocation
• It is contaminated by lead shot accumulated over fifty years
• It will generate excessive traffic that will block up the local roads even more than already does of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to state that I am not against all new build policies – I have children in their twenties who need homes and recognise the need to increase the housing stock. However, this development needs to be within current village boundaries, and in areas where School and Medical provision is adequate. Wisley Aerodrome is a site which makes total sense to me, due to the location near the A3/M25 and the fact that it is already mostly covered in concrete.

Please take the views of those who live locally into serious consideration!

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** psp172/1659  **Respondent:** 17283297 / John Ball  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), Sound? ( ), is Legally Compliant? ( )**

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on their way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial
(B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

27. Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We need proper consultation on any plans for Waste Management Facilities and the increase in industrial floorspace. Many local people are hugely concerned about many aspects of this plan and the potentially negative impact it will have on our local RURAL environment and our quality of life.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores the THOUSANDS of previous objections made by local people
- There is NO PROVEN DEMAND for Travelling Show-people plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our villages and the number of homes is excessive
- It is glorious ancient woodland that has existed from the time of Elizabeth 1. It is vandalism of the greatest order to demolish an area of such wonderful heritage.
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is liable to frequent flooding and is currently a flood zone 2 allocation
It is contaminated by lead shot accumulated over fifty years

It will cause massive traffic congestion that will block the local roads of Send and Ripley

It will ramp up (already unacceptably high levels of) air pollution

It does not address the problem of inadequate infrastructure – roads, schools, medical facilities – AS REQUIRED BY LAW

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

SITE A43, GARLICKS ARCH
The original proposal has been changed to now include a minimum of 400 houses, meaning that up to 650 houses will be built on this site. In addition, this allows for 6 travellers sites with associated mixed use yards and storage. This is greenbelt land and the increase in houses and buildings are harmful to the rural nature of the surrounding villages of Ripley, Send, and Clandon. The inclusion of the travellers sites is inappropriate in a rural environment within the greenbelt and there is no identified need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley - this is of significant concern to me as I live on Send Road, the traffic is already heavy and can also be very fast.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy A43 change at Clockbarn in Tannery Lane because we have recently moved to this small village to escape the throng and the increase to 60 homes in place of 45 is too much, and whilst ignoring hundreds of previous objection, it will make access and traffic problem in Tannery Lane and at the A247 junction worse than at present. It will cover more of the Green Belt thus making surface water flooding even worse than at present, and will impact open countryside views from the River Wey Navigation system.

We also object to Policy A43 - land at Garlick’s Arch, Send March because again it ignores all the previous objections make by the local people. There is no proven demand for Travelling Showpeople plots in this location and it is beautiful permanent Green Belt which should stay that way as no “exceptional circumstances” exist. It will cause over-development of the village and the 400 homes is excessive. The ancient woodland will be destroyed and that was in existence at the time of Elizabeth 1. It will join up Ripley and Send, thus defeating the key purpose of the Green Belt and it is subject to frequent flooding and is currently in flood zone 2. It has lead shot contamination and will generate excessive traffic that will further block the local roads of Send and Ripley.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, ... (site allocation A25) [ than the Burnt Common site did ]”
2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!) , and
ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

</tbody>
</table>
3. There is no proven demand for travelling show people plots in this location.
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time,
particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. 26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2139  Respondent: 17300737 / Katy Di Rienzo  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to Policy A43 (Garlicks Arch, Send Marsh) because

Again, the local infrastructure could not support such a change and would significantly worsen access to the A3 and local traffic issues but beyond that, local schools and medical amenities are not at a level where they could deal with such an increased local populace.

Again, it ignores the thousands of previous objections made by local people;

There is no proven demand for Travelling Showpeople plots in this location

I find it difficult to understand why, rather than listen to the thousands of previous objections from local people, Guildford Borough Council have in fact far worsened the proposed developments for Send Village and associated green belt within the recent iteration of the Local Plan and really demonstrates an authority that is not listening.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2156  Respondent: 17301089 / Amanda Alexander  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Firstly, I object to development on site A43, Garlic Arch is STILL Green Belt land and this amount of development, 1500-1999 homes, an INCREASE of 400 houses, is inappropriate for the area. The addition of six Traveller Plots, amongst/as well as all these houses in a rural area is completely harmful for wildlife and people alike.
Why do we need 6 new traveller sites? It is disproportionate and unfair to put such a heavy load, all in one area. I strongly object to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

- We simply do not have the road infrastructure to deal with large new developments & the additional road traffic this will bring. Ripley high street is already gridlocked every rush hour, twice a day with vehicles trying to get in & out of Newark Lane and to and from the A3. It’s already way over capacity, so to suggest a further cars and vans/lorries is completely unfeasible. How will small high streets such as Send and Old Woking be able to cope with this volume of additional traffic for families getting to and from Woking – White Rose Lane is yet another road that already is jam-packed?
- Air pollution will rise substantially with this proposed increase to road traffic.
- Woking station doesn’t have the capacity to deal with additional parking on this scale to cope with this amount of additional commuters.
- No bus services run prior to rush hour to get people to Woking/Guildford stations.
- Send Villages Medical Centre: Its already a nightmare getting an appointment to see a doctor – will you be building an additional facility of larger capacity in Ripley and if so where?
- Any development at Site A43 Garlicks Arch would be on Green Belt land, and there is no identified or exceptional need within the Local Plan documentation.
- The inclusion of 6 Travelling Showpeople plots with associated storage facilities is entirely inappropriate in a rural environment within the Green Belt and there is no identified need within the Local Plan.
- The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. The Plan is self-inconsistent and therefore not properly constituted.
- The potential of an increase from 400 houses at site A43 Garlicks Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The plan states that “if the [Traveller sites] remains unsold, the future use of the land should have regard to an up to date Traveller Accommodation Assessment (TAA) and Strategic Housing Market Assessment (SHMA), with specific consideration of the use of the land for affordable housing“. So even more travellers pitches and houses, which is unjustified.

- Section 4.2.22 of the Plan states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” So why do 75% of them have to be in Ripley? This is unbalanced and unfair.
- The removal of site A46 from the Plan (with its proposed 1100 houses) has left the Plan even further unbalanced against the North East of the Borough with over 40% of the development proposed in this small area of Green Belt, all within just 3 miles of Send Marsh.
- The potential for a substantial increase in industrial floorspace from 7000 sq m to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Policy A43 Garlicks Arch**

I have objected to the proposed development of 400 houses on Green Belt and good agricultural land. This new policy adds 8 travelling-show people pitches to the development making this development even even more inappropriate for this area. The Borough Council, 3 years ago, actively turned down a planning application from ‘Old lands’ to build 25 homes in the same location. So the Council cannot include this policy within the plan and maintain that it applies consistent and good policy.

I strongly object to the revised proposal for following reasons

1. The village has no shops or other infrastructure to support the development.
2. Additional traffic generated would create huge congestion on our already over crowded roads in Send, Send Marsh, Burnt Common and Ripley.
3. No exceptional circumstances exist to destroy this Green Belt land and ancient woodland in the [illegible word]
4. There is no proven demand for travelling/show people in the area.
5. The village of Send Marsh/Burnt Common, and Ripley would have their distinct characteristics destroyed.

### Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the A43 changes at Garlick's Arch as follows:

1. YOU have completely ignored the thousands of previous objections made by local people
2. Why should there be a plot for Travelling Show people in this location when there Is 'lc proven demand for this These people lead a transient lifestyle and therefore ere is no need to provide them with a plot of land.
3. You have not provided nor can you justify your reasons for proposing to build on the beautiful permanent Green Belt, there are no exceptional circumstances to allow you to do this.
4. Your proposals will mean our village is 'over developed' and the number of homes excessive.
5. We have beautiful and exquisite ancient woodland that have existed since the time of Elizabeth 1, why do you want to destroy this?
6. These changes will join up Ripley and Send and completely defeat the purpose of the Green Belt.
7. This area is subject to flooding and is currently in flood zone 2 and it is contaminated with lead shot which has built up over the last 50 years.
8. It will generate more traffic that will cause chaos in the local roads of Ripley and Send.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

I strongly object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch)

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were
The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, (site allocation A25) [than the Burnt Common site did]

The site [A43] provides the employment floorspace needed in the plan to help meet identified needs.

Since AS8 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since AS8 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

I strongly object to removing Send Business Park from the Green Belt (4.3.15).

Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

I strongly object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan.”

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object because the proposal ignores all the thousands of objections made by local people and makes things much worse by including even more houses, which looks like a punishment of local people having the temerity to object.

I object because there is no proven demand for travelling show-people in this location.

I object because this site is beautiful Green Belt land and there are no exceptional circumstances to merit removing this protection.

I object because it is grossly excessive development of our village and the number of houses proposed is overwhelmingly too many.

I object because this is a site of wonderful ancient woodland that dates back to medieval times.

I object because this proposal will connect Ripley and Send and defeat the key purpose of the Belt.
I object because the site often floods and is currently a Flood Zone 2 allocation.

I object because the site is contaminated with lead shot which has been accumulating for 50 years.

I object because the enormous amount of traffic which will be generated by this proposal will catastrophically clog up the roads of both Send and Ripley, many of which can barely take two lines of traffic. It will also make the clogging up of the nearby Guildford By-pass disastrously worse. One wonders whether the proposers of this policy ever use the by-pass, particularly travelling south, when bottle-necking can extend right to Burpham even on an ordinary weekday.

I object because potential objectors have never been shown the figures on which the proposed number of additional houses is based and which can only be of benefit to those who stand to profit from such proposals. Justice must not only be done but must be visibly and manifestly be seen to be

Housing at Site A43 Garlicks Arch would be on greenbelt land. The potential increase in the proposed 400 dwellings to 650, would be extremely harmful to the rural nature of the surrounding villages. The inclusion of 6 x travelling show people plots with associated storage facilities is entirely inappropriate in a rural environment within the greenbelt and there is no identified need within the Local Plan documentation. The allocation of 6 travelling show people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 local plan and so it is out of scale with the proposed development. The potential for a substantial increase in industrial floorspace from 7000sq m to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document. The potential for a waste management facility at site A58 Burnt Common is briefly mentioned and does not allow for full and proper consultation.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks.
Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

As explained having only just moved into the area, I was not aware of the congestion on Send Barnes Lane. I have quickly come to realise this road is used as a main cut through to get to the A3 to Woking and vice versa. Only this morning I found myself having to queue for some time to get out of my own road. This will only be compounded with the amount of vehicles using the road should the large amount of additional housing be created.

My children go to the local school and in the two weeks they have been there I have been shocked at both the speed and size of vehicles using the road. Having already moved away from an area due to health concerns it causes me great anxiety to think this could happen again. I have seen one of the parents taking matters into her own hands and wearing a hi viz jacket and waving a 30mph sign at drivers, such is the concern of such a busy road which will only get worse if the vast amount of houses are built.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43  
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I object to the Policy M3 change at Garlick's Arch because:
It ignores all the thousands of previous objections made by local people
There is no proven demand for Travelling Showpeople plots in this location
It is beautiful permanent Green Belt and no "exceptional circumstances" exist
It will cause over-development of our village and the number of homes is excessive
It is exquisite ancient woodland that existed at the time of Elizabeth 1
It will join up Ripley and Send and defeat the key purpose of Green Belt
It is subject to frequent flooding and is currently a flood zone 2 allocation
It is contaminated by lead shot accumulated over fifty years
It will generate excessive traffic that will block up the local roads of Send and Ripley
There is not currently sufficient infrastructure, roads and schools, to support the proposed increase in demand that will be placed upon the area with the proposed plans.
The additional traffic will cause a significant increase in rush hour traffic trying to gain access to the A3, which already queues through the villages of Ripley and Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to the Policy A43 change at Garlick's Arch I have been unable to find any justification in the Plan that requires the inclusion of a site for Travelling Showmen in this area. Travelling Showmen, by the very nature of their business TRAVEL. Is this site inclusion at Garlick's Arch for their winter quarters? We are all aware "when the fair comes to town" of the size and nature of showmen's vehicles and equipment and the long running of diesel generators with consequent atmospheric pollution. Yet again the wanton destruction of Green Belt and historic woodland. The increase of some likely 800 additional vehicle movements, on the naïve assumption of one car per household, in the immediate area to schools, doctor's surgery and supermarkets and workplaces.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2941  Respondent: 17344801 / Graham Rendell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick's Arch because a development of this size would put massive strain on the local infrastructure. For example it is already difficult to get an appointment at the local doctors in the Village health Centre and as far as I know there are no NHS dentist places available.

I would be concerned about the amount of traffic not just caused by people going to work and congesting the various access roads but also the total volume of cars in the area filling car parks. It is already difficult to park in the Cobham and Guildford public car parks and even the private super stores in Cobham and Ladymead are often full to capacity. An overall increase in traffic in the area is bound to increase in air pollution decrease in air quality which I think is in direct conflict with government policy.

I thought the point of the GREEN BELT was to stop the complete urbanisation of our country areas. It seems to me the Garick's Arch development will effectively join up the existing communities into one mass of houses.

I have no first hand experience of the schools in the area but I assume that a new school would need to be provided. With those students coming from this new estate would isolate them from the wider community.

As for the inclusion of Travelling Show people plots I am left dumfounded as to why greenbelt land should be ruined in
Another personal issue of concern I have is that of the interference with land drainage. My property was one of those flooded around 2001. An excellent flood prevention scheme was installed which seems to have prevented further flooding. However, given the flood water came from this proposed area I am very concerned that altering the use of this land will upset the drainage and once again put our properties in danger.

Finally the proposed development on the **Wisley Airfield** would I think put just as much strain on the area as the **Garlick's Arch** plan. Particularly the increase in traffic and impact on local facilities. It would obviously put major pressure on the small back roads into Cobham which I believe would make those small roads extremely dangerous. An increase in traffic through Ripley would cause massive congestion not seen since before the Ripley By-Pass was built - yes I am old enough to remember those times - with again an increase in air pollution and a decrease in air quality.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

An overall increase in traffic in the area is bound to increase in air pollution decrease in air quality which I think is in direct conflict with government policy.

I thought the point of the GREEN BELT was to stop the complete urbanisation of our country areas. It seems to me the Garlick's Arch development will effectively join up the existing communities into one mass of houses.

I have no first hand experience of the schools in the area but I assume that a new school would need to be provided. With those students coming from this new estate would isolate them from the wider community.

As for the inclusion of Travelling Show people plots I am left dumbfounded as to why greenbelt land should be ruined in this way.

Another personal issue of concern I have is that of the interference with land drainage. My property was one of those flooded around 2001. An excellent flood prevention scheme was installed which seems to have prevented further flooding. However, given the flood water came from this proposed area I am very concerned that altering the use of this land will upset the drainage and once again put our properties in danger.

**I object to the Policy A42 change at Clockbarn in Tannery Lane because** again this could also radically change the drainage in the area.

Many of my previous points also are reliant to this plan including the increase in traffic and more erosion of the greenbelt.
Given that so many objections were made to the previous plan it seems that by increasing the size of the development with this plan you are totally ignoring the wishes of the local community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to Garlick’s Arch (A43) being extended. This will cause excessive urban sprawl. This site should not be removed from green belt – there are no excessive reasons for this.

I strongly object to the allocation of 6 Travelling Showpeople sites A34 Garlicks Arch. This site is for 400 homes and is therefore not compliant with the minimum of 500 stated in section 4.2.24 of the plan. A50 covers total need of 8 so there is no need for these on site A43.

I object to lacking proper infrastructure planning for site A43 and A42. Foreward to plan stated by Paul Spooner recognises ‘the signification infrastructure upgrades are required to support existing communities and planned overgrowth of the borough?. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure which is a key theme of our local plan. Development of sites A43 Garlicks Arch and A42 Clockbarn Nursery, Send would therefore be contrary to stated aims and items of the Plan and should not go ahead.

I therefore strongly object to all proposed development A34, A43, A58, A42 on the grounds that the area will be grossly overcrowded causing urban sprawl. The roads are already at maximum capacity. One small breakdown occurrence in area causes vast traffic jams. I also object to the fact that the Guildford Borough Council ignored the thousands of objections from the Send/Ripley area and instead increased the allocation of housing etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Policy A43 change at Garlick's Arch because:
It ignores all the thousands of previous objections made by local people
There is no proven demand for Travelling Showpeople plots in this location
It is beautiful permanent Green Belt and no “exceptional circumstances” exist
It will cause over-development of our village and the number of homes is excessive
It is exquisite ancient woodland that existed at the time of Elizabeth 1
It will join up Ripley and Send and defeat the key purpose of Green Belt
It is subject to frequent flooding and is currently a flood zone 2 allocation
It is contaminated by lead shot accumulated over fifty years
It will generate excessive traffic that will block up the local roads of Send and Ripley
There is not currently sufficient infrastructure, roads and schools, to support the proposed increase in demand that will be placed upon the area with the proposed plans.
The additional traffic will cause a significant increase in rush hour traffic trying to gain access to the A3, which already queues through the villages of Ripley and Send.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the hiding of development by ‘deferment’ (A24, A25, A26, A43):
This version of the Plan has concealed some development planned to take place by ‘deferring’ it beyond the period covered by the Local Plan. This has two effects:

1. to hide the number of houses actually being built (A24, A25, A26 – total of 1,100 deferred, but still being built), and
2. to give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

should not be changed; this is a significant number of houses that have a major impact on nature of area to wildlife, life in the village, the balance of the population geographically, traffic, and views in a very negative way; this development in an area with flood zone 2 and the total inadequate planning concerning flooding any devolpment would cause problems here and up and down stream if here as planning does hot consider the whole basin nor the all contributing factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the change in designation of these sites to "Travellers" plots and industrial floorspace. The need for increased Traveller plot numbers is not proven nor is the position and location of the site suitable. This is adjacent to an already very busy, traffic-accident and traffic congestion-prone road and and circa 400 new homes/plots and the associated car/caravan numbers entering and exiting the site will exacerbate this further. As per my objection on A42, this too will place a great strain on an already very residentially dense area of the borough and exacerbate the underprovision of local amenities and infrastructure. This coupled with the new industrial floorspace and increase numbers of lorries and industrial related vehicle traffic, plus the proposed junction onto the A3 at Burntcommon, risks increased further congestion to an already trafficjam heavy blackspot for the A3 interchange with M25 at Ripley. This has repercussions to increase car numbers and Gridlock through Ripley village which is damaging to the qualities that make the Village a desirable place to live, plus the increased pollution and damage to air quality.

Existing local schools, doctors surgeries and shops will not be able to cope with this added influx of residents. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] considering the encroachment of the Greenbelt already planned for this area of Send and Ripley, and risks placing the existing natural ecosystem and habitats of wild birds and animals, not to mention the historic importance of these ancient woodlands at Garlicks Arch, at great risk of damage and extinction.

In summary, these proposals are unsuitable and the needs not proven considering the other available sites (including available brownfield sites) where these particular plots and industrial provision would be much better suited - why place a new industrial park so far away from the existing one at Slyfield when there is space closer to Slyfield site to develop instead - this seems a huge oversight and makes little sense from a perspective of logistics and efficiency for the operation of the industrial processes at these two sites. The increase in Traveller plot numbers and their proposed position in Send and Ripley really places existing infrastructure and amenities at great strain and risks damaging the demographic balance and quality of the built and natural environment which make this area of Guildford, and indeed Surrey, a desirable place to live for not only existing residents, but for those looking to move to the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I simply don't understand how the protection of green belt in this manner can be allowed. What possible exceptional circumstances can be shown to make this acceptable. The inclusion now of pitches for "travelling show people" despite the thousands of objections you have received as by suggesting there is a need for travelling show people pitches is cynical use of a minority, by suggesting such a need even exists. You should be ashamed at your blatant attempt to bypass the protection of a lovely area to get your way and build some 400 homes to meet some central government quota which takes NO consideration of impact. This is unacceptable and should not proceed.

**Comment ID:** pslp172/3486  **Respondent:** 17414561 / Elliot Rowland  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Now 400 homes and 6 Travelling Showpeople plots

I object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth I
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to policy A43 change at Garlick’s Arch for the following reasons:

Again this change totally disregards the thousands of previous objections. It is a beautiful area of Green Belt with very valuable and beautiful ancient woodland – something which is totally irreplaceable. It is a massive development for a village of this size causing Ripley and Send to join up, something which Green Belt land is designed to prevent. Again – another development in this area will massively increase the congestion on surrounding roads, something which is already a particular problem in our area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A43 change at Garlick’s Arch because:

There are no “exceptional circumstances” for development in this Green Belt area.

There is no proven demand in this location for Travelling Showpeople plots.

This area floods very often and is a designated floodzone.

The number of homes is excessive, will cause over-development in Send village and generate extra traffic that will considerably overload existing local and main roads in both Send and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Now 400 homes and 6 Travelling Showpeople plots
I object to Policy A 43 because it will cause over-development of Send and the number of homes is excessive. It will join us to Ripley which will defeat the key purpose of the green belt. It is a beautiful permanent Green Belt and no "exceptional circumstances" exist. It is subject to frequent flooding plots in this location. It ignores the thousands of previous objections made by local people. There will be pressure on village services and the excessive traffic that will cause heavy congestion on the A247 and the surrounding roads of Send and Ripley. There is no proven demand for plots for Travelling Show people.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>1. I object to the extended development within the Green Belt and the addition of 6 Travelling show people sites at Garlick’s Arch (A43)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• I object to the extension of Garlick’s Arch as it is entirely inappropriate for the Green Belt and will only increase Urban Sprawl. I also object to the proposal of 6 plots for travelling show people and there is no need for these to be built as the allocation in site A50 more than covers the 8 ‘needed’ as mentioned in the plan.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• The further extension of the homes at Garlick’s Arch if the plots aren’t used is completely unsustainable and will put a stretch on the area of Ripley and Send like never before. People move to this area for its idyllic country life style (as mentioned in the plan 2.10a as something to protect) and even now, especially in rush hour there are constant queues of traffic and the roads are just not made for it. In addition to the strain on the roads, the schools and surgeries will also be hugely affected due to the sheer number of people.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Filling in Garlick’s Arch further will also close the gap between Ripley/Send and Burnt Common which defeats the object of the Green Belt to keep the area open.

</table>
The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of
the surrounding villages of Ripley, Send and Clandon and will cause log jams of these villages.

**Garlick’s Arch (A43)** should not be extended or even developed with the resulting urban sprawl. There are no
exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

**I object to the allocation of 6 Traveling Show people sites in A34 Garlick’s Arch**

The allocation of 6 Travelling Show people plots is the designated formula for 1500-1999 homes on the same site
according to the 2017 Local Plan. There should be no inclusion of any Travelling Show people plots in A43 Garlicks
Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section
4.2.24 of the Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to Policy A43, which has changed to include 6 Travelling Showpeople plots despite no evidence to demonstrate a demand for these in this area. Furthermore this policy would involve the destruction of Green Belt despite there being no 'exceptional circumstances' for doing so and the fact that this ancient woodland dates back over 400 years and includes trees protected by Tree Preservation Orders. Additionally the implementation of this policy will put strain on both the local transport networks and infrastructure including schools and medical facilities in Ripley and Send, which are not large enough to deal with this increased pressure.

I object to the policy A43 very strongly.

I wish our village to remain in the Green Belt and I cannot see any 'exceptional circumstances' which might enable the council to consider removing us. Living here and purchasing a home here was because of the Green Belt protection to our wonderful countryside. Ripley and Send/Burnt Common are distinct village areas. This proposal tries to link them up resulting in a semi-urban sprawl which goes against the policy of the Green Belt.

Local villagers have already made strong objections which appear to have been ignored! There is no proven demand for Travelling Showpeople plots in this location.

The number of houses proposed for our village needs is excessive and will cause huge over development of our area. The road networks are already extremely busy and this proposal will result in a huge increase of traffic. Local roads and junctions with the main A3 simply will not cope with the extra influx. Additional traffic jams will result causing untold delays and inconvenience to people trying to commute to London or deliver children to local schools.

The area is subject to flooding (it is currently a flood zone 2 area) - further development will only make matters worse.

The area in question has been used over many years for shooting and the land is contaminated by lead shot.

Policy A43 Land at Garlick's Arch, Send Marsh

Now 400 homes and 6 Travelling Show People plot.

I object to the Policy A43 change at Garlick's Arch because:

This policy ignores the fact that there is no proven demand for Travelling Show people plots in this location.

It is situated in beautiful permanent; Green Belt and no "exceptional circumstances" exist. The area is ancient woodland in existence since the reign of Elizabeth I.

It will cause over-development of Send village and consequent congestion on the roads and join up Send to Ripley with consequent defeat of the object of the Green Belt.

It is subject to frequent flooding and is currently a flood zone 2 allocation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

• Policy A43 - Garlick’s Arch

I have previously objected to the proposed development of 400 houses on this Green Belt and good agricultural land. The new policy A43 adds 8 travelling/showpeople pitches to this development rendering the policy even more inappropriate for the area. The Borough Council is reminded that less than 3 years ago it refused a planning application from ‘Oldlands’ to build just 25 houses in the same location. The Council cannot therefore incorporate this policy within the Plan and still maintain that it applies consistent and good practice.

This policy would increase the population of the Send Marsh/Burnt Common village by 49% and totally destroy its rural character.

I therefore strongly object to the revised proposal on the grounds that;

1. the village has no shops or other infrastructure to support the development;
2. the additional traffic generated would create major congestion on the already busy roads throughout the villages of Send, Send Marsh/Burnt Common and Ripley;
3. no ‘exceptional circumstances’ exist to destroy this Green Belt land or the ancient woodland it contains;
4. there is no proven demand for travelling/showpeople pitches in this location, and
5. it would join up and destroy the distinct character of the villages of Send Marsh/Burnt Common and Ripley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the extended development in the Green Belt (Policy P2, Site A43)
I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch
The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

The Plan is self-inconsistent in respect of traveller sites.
A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ….” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

I object to the hiding of development by “deferment” (A24, A25, A26, A43)
This version of the Plan has concealed some development planned to take place by “deferring” it beyond the period covered by the Local Plan. This is designed to have 2 effects:
i) to hide the number of housed actually being built (A24, A25, A26 – total of 1100 deferred, but still being built!) , and
ii) give an excuse for building houses on another site (A43 – 400/650 houses proposed) when they are not needed.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch
The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [ than the Burnt Common site did ]”
2. The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.
Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed allocation for 400 homes and 6 travelling show people plots. There are no exceptional circumstances to warrant development on the green belt. There are not enough services and infrastructure for housing and show people plots, nor any justification for concentrating 6 of the proposed 8 borough-wide show people plots within Send. The roads in Send are not equipped to deal with the kind of traffic that will be generated by this in Send. It is also subject to flooding and has a flood zone 2 allocation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy A43 change at Garlick's Arch because:
Sneakily Increased to 400 homes and the addition of 6 travelling show people pitches
This proposed development totally ignored the previous 1000s of strong objections from local residents.
There is currently no proven demand for Travelling Showpeople plots in this area.
It is green belt and has been existence for many hundreds of years and no exceptional circumstances exist for this development to be built.
The idea of green belt is to separate villages, if this is built it will effectively joint Ripley and Send together.
It is currently a flood zone and liable to frequent flooding and I understand is contaminated with lead shot accumulated over many years.

The sheer number of properties will have major impact to the roads and infrastructure which are already struggling from existing traffic issues.

I write with reference to the local plan and in particular the changes to the site A43 Land at Garlick's Arch, Send Marsh Burnt Common and Ripley. In section 4.2 Housing Policies, Policy H1 section 7 states:

(7) Accommodation for Gypsy, Traveller or Travelling Showpeople (whether they meet the Planning Policy for Traveller Sites definition or not) accommodation should be provided on development sites of 500 homes or more whilst there remains an identified need. For 500 to 999 homes two pitches or plots should be provided, for 1,000 to 1,499 homes four pitches or plots, for 1,500 to 1,999 homes six pitches or plots and for 2,000 or more homes eight pitches or plots.

The land at Garlick's Arch is proposed to have 400 new homes built on it making it too small a development to include accommodation for travelling show people.

The impact of the 400 new homes (excessive for the size of the site and surrounding area) in the small village of Send and the impact on the traffic on the Portsmouth road can only be made even worse with the addition of the large vehicles, that usually travel in convoy, that are associated with travelling show people.

The future of the area and indeed the whole country is going through a period of extreme change and uncertainty following the country's decision to leave the European union. Foreign investors who bought property and left it standing empty purely because it would increase in percentage value better than any bank interest rate have stopped buying property. There has also been a slowdown in migration into Britain from EU countries. This will reduce the strain on the housing market and hopefully the government will put steps in place to get some of the hundreds of thousands of empty properties in the country available to rent or buy. I strongly believe we should protect our green belt land and keep our villages within it. There are may steps that can be taken to improve the housing situation without concreting over the south east of England.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** pslp172/3798  **Respondent:** 17427713 / The Aldertons Farm Residents Company Limited  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

The proposal for 400 residential units and 6 travelling showpeoples plots on a Green Belt site is contrary to current policies and ignores the many thousands of objections previously made by local people.
No ‘Special Circumstances’ exist or have been put forward to justify development on this Green Belt site.

The development will put extreme pressure on local roads and when considered with the other nearby proposals for development currently being put forward by the Council in the Draft Local Plan, (both residential and commercial/industrial), will result in gridlock at peak times with the resultant detriment to the quality of life and environment in the area, particularly considering the impact that the proposed North and South slip roads on to the A3 would make by drawing more traffic on to the local road network.

Residential development alongside major highways is known to cause health problems in the very young and old and if this site is developed the long term impact on the residents will in turn put more pressure on local and County Health facilities, particularly if the A3 slip roads abutting one side of the site, (as previously mentioned) are constructed thus increasing traffic flow around the site. The A3 is a major Trunk road that will inevitably become overloaded in the not too distant future given the lack of infrastructure improvements proposed by the Council to cope with the influx of traffic with regard to both proposed imminent and long term development.

The site contains ancient woodlands and should be protected (and enhanced) against development that might impinge upon the quality of the surrounding area and adversely affect the survival of the trees which are regarded as an important amenity for the area and can be seen from distant views.

Garlicks Arch adds to the important Green Barrier that separates the villages of Ripley and Send Marsh and any erosion of this will set precedent and eventually result in the merging of the two villages contrary to National Green Belt policy.

The site is currently designated as within Flood Zone 2/3 and as such development within Flood Plains should be avoided. If development is inevitable then Surface Water mitigation/management must ensure that flood water is properly dealt with and NOT directed so as to cause flooding elsewhere on existing developed land.

There is no proven demand to accommodate Travelling Showpeople in this area who, by the very nature of their business, will bring more traffic problems for the Ripley and Send villages when transporting very large vehicles to and from the site, where the visual impact of the vehicles and structures when stored, will be detrimental to the surrounding area.

1. **I object to the lack of proper infrastructure planning for sites (A43 and A42)**

The Foreword to the plan by Paul Spooner includes on page 5:
“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clock Barn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy A43 Garlick's Arch, Send Marsh

I object to the proposed allocation for 400 homes and 6 travelling show people plots. There are no exceptional circumstances to warrant development on the green belt. There is insufficient services infrastructure for housing and show people plots, nor any justification for concentrating 6 of the proposed 8 borough-wide show people plots within Send. The road network is insufficient for housing development on this scale.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3978  Respondent: 17440705 / Chris Brown  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the Garlick’s Arch (A43) proposed changes to this site which in combination would generate considerable activity in a most unsuitable location.

Pitches designated for Show People suggests large vehicle traffic movements and a further extension to the commercial premises that have already been added on that side of the road all of which is located in close proximity to the surrounding residential area.

Increasing the number of houses would mean a truly massive increase in the volume of traffic which will only be able to use the A3, Send Road and travelling through Ripley, all of which are unsuitable for the level of traffic associated with such a development.

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause log jams of these villages.

Garlick’s Arch (A43) should not be extended or even developed with the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Show people sites in A34 Garlick’s Arch
The allocation of 6 Travelling Show people plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Show people plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch

I further object to the Garlicks Arch site because if A58 Burt Common site and development at Gosden Hill Farm is also granted then the A3 corridor from Burpham to Ripley will be over developed and it will simply join up a sprawling set of developments. These in turn will lead to greater traffic density, slower journey times as well as increasing safety concerns for an infrastructure which cannot support this level of traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for
example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Again, this merely ignores previous objections. The proposed changes make no attempt to take any account of valid objections made to the original Plan.

There is absolutely no evidence of any demand for Travelling Showpeople plots in this area.

It is currently permanent Green Belt land and no "exceptional circumstances" exist to justify its development, as required by legislation. This is woodland that has existed since the time of Elizabeth 1 and the proposed scale of development is excessive; too many homes are proposed - these proposals would merely lead to over-development which current infrastructure is incapable of catering for.

The proposals would effectively join up Ripley and Send. One of the original principles of Green Belt legislation was to prevent such sprawl.

The area is currently adversely affected by flooding and is a flood zone 2 allocation. The current proposals will exacerbate this.

The area is affected by lead shot which has reached serious levels, having accumulated over the last 50 years.

The proposed development will cause serious traffic congestion; current roads are inadequate to handle the level of vehicular movement which will inevitably be generated and local roads in Send and Ripley will be blocked up as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to Policy A43 this land is Green Belt, with ancient woodland. The development would have a huge impact on the Flora, fauna and wildlife in the vicinity and development on this land will join the villages of Ripley and Send together defeating the object of the Green Belt. The local roads, doctors, schools, amenities are already struggling to cope with the existing residents and would be under pressure and would definitely not be fit to serve residents from another 400 homes.

Finally I feel that consideration should be made to firstly the existing infrastructure especially A247 Send Road, Clandon Road and Portsmouth Road at Ripley, the bus service, doctors, schools, shops etc. should any development within Send be approved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the Garlick’s Arch proposal as it uses valuable green belt land and the green space between the settlements at Burnt Common, Send Marsh and Ripley resulting in unacceptable harm to the openness of the Green Bely and the vistas locally and from the Surrey Hills AONB.

2. I continue to object to the inclusion of the following policies:

3. A36-A41 inclusive in the Horsleys, A43 at Garlick’s Arch, A42 Clockbarn, and A58. There is no evidence that anyone has considered the cumulative impact of these developments together with the development at A35. The infrastructure proposed is totally inadequate and, as these stand at the borough boundary will have a huge impact on residents throughout the borough and further afield, particularly those who use the A3.

4. I object to the fact that the land required at Garlick’s Arch is said to be almost 29ha where only 13ha is required at 30dph.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

...our company which is based on the Portsmouth Road in Ripley and is directly opposite to the proposed development at Garlick’s Arch. As a long time resident within the Woking and Guildford areas I have noted the ongoing deterioration in traffic congestion in this part of Surrey. Expanding residential properties to the extent proposed at Garlick’s arch without planned infrastructure improvements will cause further congestion problems which are very detrimental to the local community in so many respects notably the environment coupled with social and economic factors. Your plan has not shown how infrastructure improvements in all respects (not just road network) would be made. A vague recognition that infrastructure improvements will be required is not specific enough and if such developments are to take place without causing multiple problems then far more consideration has to be given to the strains that such levels of local population explosion will create. I hope that the concerns of local businesses will be listened to as they are the people that need to create employment and economic growth opportunities at a local level. Increasing population and density without the correct infrastructure will be harmful.

As a local business which will be very directly affected by the new proposals in the Guildford Borough Proposed Submission Local Plan (June 2017), we object very strongly to these and in particular to the changes affecting Ripley and Send, which make the Plan even worse than the 2016 proposals. We object on the following grounds :-

- Any development at Site A43 Garlick’s Arch would be on Green Belt land, and there is no identified or exceptional need within the Local Plan documentation for this to be the case. The potential of an increase from 400 houses at this site will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

- The inclusion of 6 Travelling Showpeople plots with associated storage facilities at Site A43 Garlick’s Arch is entirely inappropriate in a rural environment within the Green Belt and there is no identified need within the Local Plan.

In that respect, the allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. However, the Plan is self-inconsistent and therefore not properly constituted. Section 4.2.22 of the Plan states that “Sufficient sites are identified within the Local Plan [for] 8 plots for Travelling Showpeople” Why are 75% of them planned for Ripley? This is unbalanced and unfair and we contend...
that no Traveller sites should be part of any housing development plan for this area as there is provision at other locations that more than covers the need (e.g. Site A50 Whittles Drive, Normandy).

Also, the Plan states that “if the [Traveller sites] remain unsold, the future use of the land should have regard to an up to date Traveller Accommodation Assessment (TAA) and Strategic Housing Market Assessment (SHMA), with specific consideration of the use of the land for affordable housing”. We re-iterate that we consider that the provision of even more Travellers’ pitches and houses is unjustified in this rural environment.

Lack of proper infrastructure for planning for Sites A43 and A42: the Foreword to the Plan by Paul Spooner states on page 5: “We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”. The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlick’s Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists pass through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches 
2. It ignores all the thousands of previous objections made by local people 
3. There is no proven demand for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints, 
4. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required. 
5. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it. 
6. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. 
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsustainable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided. 
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. 
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached. 
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site. 
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. 
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600. 
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for
example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. It ignores all the thousands of previous objections made by local people.
3. There is no proven demand for travelling show people plots in this location.
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick's Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. It ignores all the thousands of previous objections made by local people.
3. There is no proven demand for travelling show people plots in this location.
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches.
2. It ignores all the thousands of previous objections made by local people.
3. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
4. There is no proven demand for travelling show people plots in this location.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of flood flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4495  Respondent: 17491489 / Margaret Perkins  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. It ignores all the thousands of previous objections made by local people.
3. There is no proven demand for travelling show people plots in this location.
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. It ignores all the thousands of previous objections made by local people.

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4549  Respondent: 17492897 / James Robinson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people.
3. There is no proven demand for travelling show people plots in this location.
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to rely on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Godsen Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. It ignores all the thousands of previous objections made by local people.

3. There is no proven demand for travelling show people plots in this location.

4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. 20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** pslp172/4648  **Respondent:** 17494945 / Diana Mulholland  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to rely on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. It ignores all the thousands of previous objections made by local people.

3. There is no proven demand for travelling show people plots in this location.

4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. It ignores all the thousands of previous objections made by local people.

3. There is no proven demand for travelling show people plots in this location.

4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.

7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick's Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy II). Policy II requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.
17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
C.ii. Policy A43 Garlick’s Arch – My Objections

I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches

It ignores all the thousands of previous objections made by local people

There is no proven demand for travelling show people plots in this location

There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.

The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.

This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport.

Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed
for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be
re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss
of four existing successful rural businesses, which have been in existence for over 30 years and another two
businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their
premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will
have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs
centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road
infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for
example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon.
The proposed development under the plan will cause greater congestion in and around our villages. The Plan
does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send
are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.
I object to the development proposed in the local plan, which will result in more traffic using these narrow roads
and a further deterioration in the road surfaces.

15. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from
parking problems. Further development around these villages will only result in more traffic and more parking
problems.

16. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley,
the roads serving the village will become even more congested. Cycling has become a popular past time,
particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no
proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being
generated from these developments there is a real danger that there will be an increase in road accidents
involving cyclists as a result of the development proposed under the local plan.

17. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development
will result in the roads becoming ever more dangerous for pedestrians.

18. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of
improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the
infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have
been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development,
the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to
capacity, such as the electrical network and sewers. No plans to improve these services should mean no
development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the
Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are
already at capacity and suffering from funding cuts or freezes. Any further development without funding will
place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no
certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion
during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35),
Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk
road network. The A3 & M25 are already at capacity during peak hours and any development prior to
improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also
mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The
significant level of development being proposed, particularly in the north east of the borough will lead to
considerable further congestion, despite any attempts to mitigate this through travel plans. This will be
particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will
have a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
